UNIVERSITY OF MIAMI

A private, independent, international university
An equal opportunity/affirmative action employer

An announcement with information on administration, organization, admission and graduation requirements, and the courses of instruction in:

UNDERGRADUATE and GRADUATE STUDIES, 2009-2010

It is the policy of the University of Miami that no person within the jurisdiction thereof shall, on the basis of race, religion, color, sex, age, disability, sexual orientation, veterans status, or national origin, be excluded from, participation in, be denied the benefits of, or be subjected to discrimination or harassment (including sexual harassment) under any program or activity of the University. The University does not intend by this commitment to require compliance with this policy by governmental or external organizations that associate with but are not controlled by the University, except as required by law. The Director of Equality Administration is responsible for coordinating the University’s effort to implement the nondiscrimination policy and Affirmative Action Programs for employees and students. The Director may be contacted at the following address or telephone number: Equality Administration Office 1507 Levante Avenue; P.O. Box 248106; Coral Gables, Florida 33124-1411; 305-284-3064.

The University of Miami is authorized under Federal law to enroll non-immigrant alien students.

The University reserves the right to change any provision or requirement, including, but not limited to fees and tuition, at any time without notice. Degrees, courses, programs, activities, and like academic or non-academic offerings of the University may also be changed from time to time without notice. The University further reserves the right to require a student to withdraw at any time under University policies, as may be promulgated from time to time. Further, admission of a student to the University of Miami for any semester does not imply that such student will be enrolled in any succeeding academic semesters. It also reserves the right to impose sanctions on any student whose conduct is unsatisfactory. Any admission on the basis of false statements or documents is void when the misconduct is discovered, and the student is not entitled to any credit for work which the student may have done at the University prior to any discipline that may be taken as a result of such misconduct. When a student is dismissed or suspended from the University for cause, there will be no refund of tuition or fees paid. If a dismissed student has paid only a part of his tuition and fees, the balance due the University will be considered a receivable and will be collected.

There will be no refund of tuition, fees, charges or any other payments made to the University in the event the operation of the University is suspended at any time as a result of any act of God, strike, riot, disruption, or for any other reason beyond the control of the University.

The University of Miami is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award the baccalaureate, masters and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of Miami.

THE UNIVERSITY OF MIAMI MISSION STATEMENT

The University of Miami’s mission is to educate and nurture students, to create knowledge, and to provide service to our community and beyond. Committed to excellence and proud of the diversity of our University family, we strive to develop future leaders of our nation and the world.
ACADEMIC PROCEDURES AND INFORMATION - UNDERGRADUATE

While the University makes every effort to provide academic counseling to its students, its basic policy places the responsibility for planning an academic program upon the student.

The University of Miami relies on electronic means (email and myUM accounts) for correspondence with students. Students are required to maintain a working email address and are expected to update their personal biographical information annually via their myUM account. Students who fail to maintain a working email account may not receive critical university information.

Students are expected to familiarize themselves with the requirements of:
- the University,
- the schools in which they are enrolled, and
- their major department.

Requirements refer to those stated in the Bulletin at the time of admission to degree status, unless a student has not been continuously enrolled. In such cases, the Bulletin in effect at the time of re-admission is the one to be used. In such cases, the determination of the Bulletin in effect is made by the readmitting School or College.

Academic core requirements will not be waived for students under any circumstances.

The work of each student is under the supervision of an academic Dean and of the appropriate Scholarship Committee. A student who fails to maintain an adequate academic record may be dismissed from the University.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters. If a student whose record is unsatisfactory is for some reason permitted to continue in attendance, the appropriate scholarship committee or Dean may specify the standard that must be attained, and any other conditions to be met.

A student who graduates and plans to enter a graduate school or professional school at the University of Miami must apply for admission to the appropriate school of the University in accordance with application deadlines of respective schools.

Not all the regulations and procedures described below pertain to the Graduate School, the Law School, and the School of Medicine. The specific regulations of these schools are stated in their Bulletins.

STUDENT-RIGHT-TO-KNOW AND CAMPUS SECURITY ACT

The Student-Right-to-Know and Campus Security Act requires institutions to disclose information about graduation rates and crime statistics to current and prospective students. Students interested in obtaining this type of information should contact the Office of Admission, (305) 284-4323 or go to www.miami.edu/hea.
FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA) (BUCKLEY AMENDMENT)

The purpose of this policy is to assure that students have access to their educational records and to assure the privacy of students by restricting the disclosure of information from education records to those persons authorized under the Act.

The policy is provided to all students in the Student Life Handbook and Daily Planner. Copies can also be printed from the website www.miami.edu/hea.

SECURITY OF STUDENT RECORDS

The Office of the Registrar is charged with the responsibility of maintaining the security and integrity of student records. Student records created before 1985 are stored either on microfiche or are on paper or have been electronically scanned. Those remaining on microfiche or on paper are stored in a secure room and/or in an off-site location. Both locations are available only to Registrar personnel. Student records created after 1985 are housed on an electronic database.

In order to maintain confidentiality, access to the student record system is limited to university personnel who have a legitimate need for this information. Each user is required to fill out an access form. A user name is created, and each user must also create a password that must be changed every 90 days. Periodic audits of records as well as reviews of who has access to the system are regularly scheduled to ensure a secure environment.

Students are assigned a UM ID number that is unique to them and they are encouraged to use it instead of their social security number. Students are required to provide their student ID or a photo ID when requesting academic record information from this office.

FERPA TRAINING

FERPA, the Family Educational Rights and Privacy Act, provides established guidelines for universities to ensure that students have access to their educational records as well as to ensure the privacy of said records by restricting the disclosure of information from educational records to those persons authorized under the Act. FERPA guidelines must be followed when dealing with the disclosure of student information.

All staff who use the student records system are required to complete an online FERPA tutorial. Periodic reviews are required; failure to complete this tutorial will lock a user out of the system. The Registrar’s Office also offers FERPA information sessions to parents of new students each fall during new student orientation.
ACADEMIC CREDITS

The University operates on the semester system and, for its measure of academic course work, uses academic credits (referred to as semester credits, semester hours, credit hours, hours, or credits).

An academic credit (of work) is given for one 50-minute period a week throughout an academic semester or its equivalent per week for a semester of fifteen weeks or its equivalent in summer session. Two or three laboratory hours each week throughout a semester are considered the equivalent of one lecture hour in counting credits earned in an undergraduate laboratory or studio course.

No grades or credits are given for audited courses.

CHANGE OR DROP OF COURSE

Course changes after the completion of registration must be approved by the student’s academic dean. Forms must be fully processed to make any approved changes official.

Dropping of any course for which the student has registered is official only when the appropriate approvals are obtained and the form has been processed by the Office of the Registrar. Failure to attend classes or merely giving notice to instructors of one’s absence will not be considered as an official withdrawal and may result in failure in the course.

The last day to drop a course is noted on the Academic Calendar located on the Office of the Registrar’s website at www.miami.edu/registrar. Students enrolled in a course after the withdrawal date must receive a final grade in the course.

During the academic year, a student may drop a course without having a W placed on his/her record until the 12th class day.

During a summer session, a student may drop a course until the 5th class day in summer I and until the 6th class day in summer II without having a W placed on his/her record.

During the academic year, changes in the credit-only option may be made until the 12th class day. During a summer session, changes may be made until the 5th class day in summer I and until the 6th class day in summer II.

CLASS ATTENDANCE AND ABSENCES

Regular and punctual class attendance is vital for all students. Instructors will distribute course syllabi which include policies regarding class attendance and missed or late work. Any student may be dropped from a course or receive a lowered grade for unauthorized absences in excess of those permitted by the instructor. It is each student’s responsibility to know and understand the instructor’s policies. It is also the student’s responsibility to give the instructor notice one week prior to any anticipated absence and to contact the instructor within one week after any unanticipated absence.

All students are responsible for material covered during their absence. However, the instructor must allow each student who is absent for a University-approved reason either
the opportunity to make up, or to be excused from, work missed, without any reduction in the student's final course grade as a direct result of such absence.

The following constitute University-approved reasons for absences:

1. Participation in an activity approved by the Academic Deans Policy Council, such as musical and debate activity, R.O.T.C. function, or varsity athletic trip; participation in a special academic activity such as a field trip or other special event connected with academic coursework. Verification of a student’s participation shall be issued by the sponsor when authorized by the Office of the Executive Vice President and Provost.
2. Observance of a major religious holy day. The University annually publishes a list of those dates it has designated as major religious holy days. Instructors and administrators shall endeavor not to schedule any examination or other graded class event, nor any major University activity, on a major religious holy day.

Other than absences for a University-approved reason, the instructor determines whether or not an absence is for an acceptable reason and whether or not students shall have the opportunity to make up missed work. If the instructor does not recognize the reason as acceptable, the student may appeal to the chair of the department in which the course is offered.

COURSE-NUMBERING SYSTEM

The following course-numbering system is used:

Courses in the 100 series are primarily for freshmen.
Courses in the 200 series are primarily for sophomores.
Courses in the 300 series are primarily for juniors.
Courses in the 400 series are primarily for seniors.
Courses in the 500 series are open only to qualified undergraduates and graduate students.
Courses in the 600 and 700 series are open only to graduate students.

Courses in some departments, with the specific numbers 100, 200, 300, 400 are offered, in most instances, on an experimental or trial basis. When listed in myUM’s Course Offerings, a more descriptive title will normally be attached.

CREDIT FOR SERVICE EXPERIENCE

Veterans of the military services may make application for academic credit for schooling received while in the armed forces. Credit may be awarded for work that the American Council on Education Guide regards as college level. Students must have credits approved by their departmental chairperson.

Credit for military service and experience is usually in the elective area and may not take the place of subjects required for graduation. Such work is not assigned quality points and is not included in quality point computations.
CREDIT ONLY OPTION

The credit only option has been established to encourage students to explore academic areas outside their major and minor fields of concentration. Students may use this option with free electives and receive a CR (Credit Received) or NC (No Credit). These courses become part of a student’s record, but they do not count in the grade point average as computed by the University of Miami.

Eligibility

To be eligible to enroll for courses under the CR/NC option, a student must:

1. hold the standing of Sophomore or above, and, if a transfer, must have completed one semester of residency at the University of Miami;
2. at the time of registration have a minimum cumulative grade point average of at least 3.00;
3. elect the CR/NC option within two weeks following the last day of registration for Fall and Spring semesters. Election of CR/NC options for Summer Sessions must occur no later than the fifth class day following the last day of registration. No changes except withdrawals from the course are permitted after this time.

Regulations and Restrictions

1. Eligible students may take one course per semester for credit only, to a maximum of 9 credits.
2. Only free electives may be taken under this option. Free electives are defined as courses not taken to fulfill the requirements for the major, minor, or general education requirements (including prerequisite course work) of the University and the individual schools.
3. ENGLISH 105 and ENGLISH 106 cannot be taken for credit only.
4. Grading standards for the credit only option are the same as for students who register for the course under the regular grading system. Letter grades will be submitted by instructors to the Office of the Registrar. The Office of the Registrar will change all grades A through C (including “C-”) to CR (Credit Received) for those enrolled under the CR/NC option.
5. A grade of NC (No Credit) will be recorded by the Office of the Registrar for all grades of D and F. The student will not receive credit hours or quality points for the grade of NC.
6. Should a student subsequently change his/her major, free electives taken for credit only prior to the declaration of this major may be counted toward fulfilling major, minor, or general education requirements at the discretion of the department chairman and the academic dean.

FINAL EXAMINATION POLICY

Final examinations may not be given during a regularly scheduled class period. No examinations shall be permitted during the reading period.

Final Examinations may be rescheduled only with the permission of the dean.
No student shall be required to take more than two final examinations on one day. A student having three or more final examinations scheduled during one day may request the instructor of the course with the smallest enrollment to reschedule the examination for that individual. The request shall be made no later than two weeks before the last class day.

A student who has a conflict between a final examination and a religious observance may request that the instructor reschedule that student’s examination. The request shall be made no later than two weeks before the last class day.

For the resolution of any problem pertaining to the scheduling of final examinations, students should first consult their instructor.

REGISTRATION

Registration dates are shown in the University Academic Calendar, and all students are expected to register on these days. If a student is permitted to register late, a fee is charged.

CANCELLATION OF COURSES

Students who select their courses and fail to make financial arrangements with the Office of Student Account Services (OSAS) will have their course schedules canceled. Once schedules are canceled, students are charged a reinstatement fee in addition to their other fees in order to reinstate their classes. These fees can only be waived by a staff member from OSAS or the Office of Financial Assistance Services. Reinstatement of classes can only occur after the cancellation stop has been removed due to payment of financial obligations.

REPEAT RULES

A student may repeat a course, but the repetition will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the chair of the department in which the course is offered or, in the case of an undepartmentalized school, by the dean.

ILLEGAL REPEAT

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

GENERAL REPEAT RULE

- If the initial grade is D+ or lower (or a C- in cases where an academic unit requires a C or higher), both the initial grade and the repeat grade are included in the computation of the student’s cumulative grade-point average (CGPA).

- If the initial grade is a D or D+ (or a C- in cases where an academic unit requires a C or higher) and the repeat grade is passing, the number of credits required for graduation will be increased by the number of credits repeated.

- Registrations that involve repeating a course in which a grade of C or higher (or C- in cases where an academic unit does not require a C or higher) has already been earned do not earn quality points or credit hours, nor count as credits attempted.
Courses repeated after graduation will be posted to the transcript showing the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.

**FRESHMAN REPEAT RULE**

- A student may elect to repeat up to two courses that were taken at the University of Miami within that student’s first two semesters of college work and in which the student earned a grade of D or F. Each repeated course must be taken at the University of Miami, must be the same course as the course initially taken, and must be completed within 12 months after the end of the semester (or summer session) in which the initial course was first taken.

- No course may be repeated more than once under this rule. A course repeated more than once under the University’s General Repeat Rule will not qualify under the Freshman Repeat Rule.

- Enrollment for a second time in a course constitutes a repeat of that course for the purposes of this rule, unless the student withdraws from the course on or before the University’s published Last Day to Drop a Course date.

- For each repeated course, only the second grade (whether higher, or lower, or the same as the first grade) will be used in the computation of the student’s CGPA. The initial course will not count as credits attempted or earned, although the initial course grade will remain on the student’s permanent record.

- Students who plan to apply to graduate and/or professional school should be aware that such institutions may recalculate the CGPA to include the initial grade earned before the repeat.

**SCHEDULES**

Fifteen or sixteen semester hours constitutes a normal schedule at the University. Academic deans and advisors will determine the appropriate credit load for their students. (A schedule of charges for credits is found in the Financial Payment Policies section of this Bulletin.) The schedule of any student whose outside interests cause unsatisfactory scholastic attainment may be reduced by the dean.

Veterans and children of deceased or totally disabled veterans receive training allowance in proportion to the schedule carried. The full load required to receive full training allowance is 12 in undergraduate school (nine in Graduate School).

**TEMPORARY/PERMANENT WITHDRAWAL FROM THE UNIVERSITY**

In order to withdraw officially from the University, a student must notify the Office of the Registrar and complete the withdrawal process. This includes obtaining a signed Drop/Add form from his/her academic dean and completing the Withdrawing Student Responsibility Form. These documents must be submitted to the Office of the Registrar. Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefit bills must also be cleared by the Veterans Affairs Certifying Official.
During the academic year, tuition will be refunded on a prorated basis depending on the date that is noted as the 'Total Withdrawal Date'. Tuition will be refunded on a prorated basis through 60 percent of the semester.

Dropping courses in a summer session, thereby reducing a student credit-hour load to zero, is not construed as a formal withdrawal from the University.

Title IV financial aid and tuition will be refunded on a pro rata daily basis through 60 percent of the semester. This date is determined based on the student notifying the Office of the Registrar of his/her intent to withdraw. If the student fails to notify the Office of the Registrar, federal guidelines for determining refunds will be followed. Please see the Refund Policy under the Financial Payment Policies section of this Bulletin.

**MILITARY WITHDRAWAL**

a. On the recommendation of the Dean of the school, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may either be awarded credit (CR) or an academic grade for any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

b. Credit granted for courses under this policy should count toward graduation.

c. There should be no refund of tuition for courses for which credit has been awarded. Refunds for courses not awarded credit should be on the same basis as complete withdrawals for military service.

d. The above recommendations are procedures for determining the awarding of credit and do not release the student from the usual withdrawal procedures.
GENERAL EDUCATIONAL REQUIREMENTS

PHILOSOPHY

The University of Miami and its faculty are committed to developing and nurturing within our students the ability to demonstrate critical thinking skills, communicate effectively, contribute knowledge, understand perspectives that differ from their own, and develop skills necessary to become effective leaders and active participants in the global society.

As an institution of higher learning in an increasingly diverse and global community our goals are to produce graduates who have been exposed to a broad spectrum of educational opportunities and to prepare them for successful participation in the world. The University’s General Education Requirements consist of coursework taken both before and in addition to students’ specialized study within their areas of concentration. The aims of the General Education Requirements are designed to ensure that graduates of the University will have acquired essential intellectual skills and exposure to a range of intellectual perspectives and academic disciplines. The University’s General Education Requirements focus on two student learning areas: 1) proficiency in English composition, writing, and mathematics and 2) knowledge of the natural world, people and society, and arts and humanities. By helping students strengthen their abilities to think with both words and numbers, they will develop the analytical skills basic to nearly all fields of advanced learning but exclusive to none. By deliberately introducing students to various intellectual achievements in major areas of human inquiry and creative endeavor, the University of Miami’s General Education Requirements provide a broad intellectual backdrop to students’ more focused studies in their majors and minors. Whereas the requirements of majors specified by Schools and Colleges within the University emphasize depth of learning, the General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge.

Some schools and colleges may designate specific coursework to fulfill the areas of knowledge requirements listed below; students should consult the specific GER requirements for their school or college in the appropriate section of this Bulletin.

These requirements may be satisfied by courses taken for a letter grade, or by credits earned through Advanced Placement (AP) or International Baccalaureate (IB) examinations taken in high school. These credits may be applied to the 120 credits required for graduation.

AREAS OF PROFICIENCY

Proficiency requirements are intended to ensure that students either already possess, or will develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

1. English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. It is the University’s expectation that our students become adept at using the English language as an effective tool for communication. Effective writing skills are representative of the educated person because they are instruments to advance ideas efficiently and persuasively. During their first year of study, students fulfill this requirement by satisfactorily completing English 105 and English 106 or the equivalent. Appropriate
Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the English 105/106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit in, ENG 105.

**Students will be able to:**
- Gather information, synthesize data, compare various points of view, and present the results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

2. Writing Across the Curriculum (W) 5 courses

In addition to English 105/106, students must complete five (5) courses designated as Writing Across the Curriculum (W) courses. The purpose of these courses is to help our students refine their writing abilities so that they are able to communicate their ideas clearly and effectively through the various styles of writing appropriate to the academic fields of their majors and minors. Courses designated as writing courses (“W” courses) require a substantial amount of writing and the preparation of papers that are corrected for diction, syntax, style, and content. Some courses satisfying this Writing Across the Curriculum requirement may simultaneously fulfill Areas of Knowledge requirements (described below).

**Students will be able to:**
- Demonstrate ability to write persuasively, using tools of argumentation and advocacy appropriate to subject, audience, and occasion.

3. Mathematics

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods in order to solve problems. The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by satisfactorily completing a course in mathematics numbered above MTH 101 (excluding MTH 107), or MAS 110, or an approved course in statistics. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics during Orientation.

**Students will be able to:**
- Select quantitative tools appropriate for the solution of problems.
- Use quantitative tools appropriate for the solution of problems.
- Interpret quantitative data in an appropriate manner for solving problems.

**AREAS OF KNOWLEDGE**

These requirements are designed to help students understand and appreciate the intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural...
exploration. In satisfying these requirements students will explore the natural world, examine human development and behavior, and appreciate creative expression in the arts, literature, and philosophy. Courses satisfying these requirements are identified in the Bulletin under the Requirements for Graduation sections for each school or college.

1. Natural World (formerly Natural Sciences) - 6 credits
2. People and Society (formerly Social Sciences) - 6 credits
3. Arts and Humanities - 12 credits

Schools and colleges that do not have a language requirement may allow their students to satisfy the humanities requirement by taking a modern language course numbered 101-212 or Latin or Greek, so long as the language selected differs from the student’s native language, and if, when beginning with a 101-level course, they also take the 102-level course in the same language.

No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement. There are pre-requisites for most courses above the 100-level.

The following general educational requirements are designed for general reference only. Please check with your advisor or the advising office in your school or college for specific requirements.

**Natural World**

The University believes a comprehensive curriculum maximizes our students’ capacity to understand the natural world through experimentation, observation, and quantitative analysis. Our purpose is to nurture our students’ curiosity regarding the natural world through the critical analysis of data as well as the evaluation of research. Students can satisfy the course requirements by selecting courses in Biology, Chemistry, Ecosystems Science and Policy, Geological Sciences, Marine Science, Physics, and Physical Science, as well as Anthropology 203, Geography 120, and Freshman Seminars in the Natural Sciences (FNS 190-199).

**Students will be able to:**

- Demonstrate ability to use experiment and observation quantitatively in order to analyze the natural world, to draw conclusions about it, and to understand modern scientific theories.

**People and Society**

This area of knowledge aims to help students understand and critically evaluate the organization of society and the patterns of social change, both in the past and in the contemporary world. Courses in the following areas may be used to fulfill this requirement: Africana Studies (AAS); American Studies (AMS); Anthropology (except APY 203); Economics (ECO); Education and Psychological Studies (EPS); Geography and Regional Studies (except GEG 120); International Studies (INS); Judaic Studies (JUS); History (HIS); Political Sciences (POL); Psychology (PSY); Sociology (SOC); Teaching and Learning (TAL); Women’s and Gender Studies (WGS), and the following courses: Broadcasting and Broadcast Journalism (CBR 102); Mass Media Communication in Society (COM 101); Communication Theory (COM 110); Interpersonal Communication (COS 112); Nonverbal Communication (COS 118); Political Communication (COS 336); Persuasion (COS 472); Freshman Seminars in the Social Sciences (FSS 190-199).
Students will be able to:
- Critically evaluate the organization of society both in the past and in the contemporary world.
- Critically evaluate patterns of social change, both in the past and in the contemporary world.

Arts and Humanities

The arts and humanities engage students in the study of some of the most enduring and influential works of art, imagination, and culture. Courses in this area help students learn to understand the deep insights and culturally formative works of philosophers, poets, novelists, artists, musicians, theologians, and playwrights. These courses will provide instruction and guidance to cultivate students’ abilities to interpret and critically evaluate the creative products of human expression. Courses in the following areas may be used to fulfill this requirement: Architecture; Music; Art and Art History; Theatre Arts; Motion Pictures and Photography; English (200-level or above): Modern Languages and Literature (300-level or above): Philosophy; Religious Studies; and the following courses: Public Speaking (COS 211); World History of the Dance (DAN 250); Freshman Seminars in the Arts and Humanities (FFA, FLT, FPR 190-199)

Students will be able to:
- Apply appropriate vocabulary and concepts for the description and analysis of artistic, literary, historical and philosophical or religious works.
- Interpret the creative products of human expression.
- Critically evaluate the creative products of human expression.

Assessment of General Education Competencies

All University of Miami students will be required to participate in a formal assessment of the General Education competencies at two points during their academic career: upon entry to UM and prior to graduation. Results will be used by the administration and faculty to ensure the continuous improvement of the educational experience provided to our students.
GRADES

ACADEMIC WARNING REPORT

Academic Warning Reports are sent to students who are doing D or F work in any course before the last day to drop a course. Faculty also have the option of providing students with constructive feedback relating to their attendance and the quality of their work. Academic Warning Reports are due on the 30th class day.

ACADEMIC STANDING, PROBATION, AND DISMISSAL

At the end of each semester the University shall determine whether a student is in Good Academic Standing, on Academic Probation, or subject to Academic Dismissal. Some schools and colleges may have exceptions to the Good Academic Standing, Academic Warning, Academic Probation and Academic Dismissal policies listed below.

Good Academic Standing

To be in Good Academic Standing a student must not be on Academic Probation or subject to Academic Dismissal.

Academic Warning

A student whose semester grade-point average (SGPA) or cumulative grade-point average (CGPA) falls below 2.0 shall receive an Academic Warning. All students who receive an Academic Warning must meet with their academic advisor prior to the following semester. The advisor may require a reduced course load.

Freshmen who receive a mid-term grade of D or F in any course shall receive an Academic Warning and must meet with their academic advisor within two weeks of the distribution of mid-term Academic Warnings.

Academic Probation

Students other than first-semester freshmen whose UM cumulative grade-point average (CGPA) in University of Miami courses is below the following levels shall be placed on Academic Probation.

<table>
<thead>
<tr>
<th>Credits earned*</th>
<th>CGPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 33 credits</td>
<td>1.7</td>
</tr>
<tr>
<td>33-64 credits</td>
<td>1.8</td>
</tr>
<tr>
<td>65-96 credits</td>
<td>1.9</td>
</tr>
<tr>
<td>More than 96 credits</td>
<td>2.0</td>
</tr>
</tbody>
</table>

* Total credits earned including work taken elsewhere and accepted by the University of Miami.

First-semester freshmen who have a semester grade-point average below 1.3 shall be placed on Academic Probation. In addition, students who fail to make satisfactory progress toward meeting the degree requirements specified by their School or College may be put on Probation by the Academic Standards Committee of the School/College. Students on
Academic Probation must meet with their academic advisor prior to the following semester and shall be restricted to a 13-credit load.

**Academic Dismissal**

A student who remains on probationary status after two consecutive semesters on Academic Probation shall be subject to Academic Dismissal. A student who has been on Academic Probation for one semester and has a CGPA below 1.0 shall also be subject to Academic Dismissal. The decision to dismiss shall be made by the Academic Standards Committee of the School or College in which the student is enrolled. If a decision is made not to dismiss, the student shall be on Academic Probation.

**APPEALS AND READMISSION**

Students who wish to appeal their Academic probation or dismissal for academic reasons, must do so in writing to the School or College Academic Standards Committee within thirty days of the notice of dismissal. Those who have been dismissed for academic reasons shall not be considered for readmission to any school or college at the University until at least two regular semesters have elapsed since their dismissal.

**Student Academic Appeals Process**

Appeals must be filed within a year of the occurrence of the academic action resulting in the appeal and prior to the completion of all degree requirements or withdrawal from the University. Exceptions to this deadline may be permitted by the Committee for good cause shown.

I. A student complaint regarding a faculty or administrative academic action must be addressed to the following entities or persons in this order:

a. The faculty member or administrator responsible for the course, program, or activity.

b. The department/program chair/director or administrative superior of the faculty member or administrator.

c. The Dean or designee of the school or college offering the course, program, or activity.

   If the school, college or administrative unit has a committee constituted to hear student appeals, the student must avail him/herself to that process.

d. The University Ombudsperson. The Ombudsperson will review the merits of the appeal, and attempt to resolve the matter. The Ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by the Committee. If the matter is the appeal of a final grade, and only after all the other steps are taken, the Ombudsperson may refer the matter to the Office of the Provost and forward the materials submitted by the student as indicated in Section II, below.

e. The Executive Vice-President and Provost may request the Committee to review an appeal. If, but only if, s/he does so, the Committee shall have jurisdiction to review a grade-related appeal. As part of the request, the Executive Vice-President and Provost
shall forward to the Committee, via the Faculty Senate office, the materials submitted by
the student as indicated in Section II, below.

II. When bringing a matter before the Committee, the student should include the following:

   a. The conditions as seen by the student, and offering reasons for granting the
      appeal. It should also indicate if the student wishes to make a personal appearance
      before the Committee and, if so, the reasons.

   b. Documents of support (e.g., examinations, term papers, syllabi, or medical
      documentation of illness) that the student wishes the Committee to examine.

   c. All written decisions of individual faculty/administrators,
      departments/programs/administrative units, college or school committees, and
      deans which are available to the student or in the student’s possession.

If the appeal is based on or related to a charge made by the student of discrimination on
the basis of race, color, national origin, religion, sex, sexual orientation, age, or
handicap, a representative of the appropriate University office will be contacted and, as
appropriate, consulted by the Committee in the appeal process.

III. If the appeal is based on or related to a disability:

   a. The ADA Coordinating Committee shall serve in an advisory capacity to the
      Committee.

   b. The student is to include in the materials provided, the appropriate forms from the
      Offices of Disability Services documenting:

      (1) an evaluation of the disability

      (2) recommendations related to the disability

   c. The Committee does not consider appeals based upon the grant or denial of an
      accommodation by the Office of Accessibility Resources. Instead, any such appeal is
      as prescribed by the Accessibility Resources Internal Appeals Procedure only.

      The student is to provide all the information and documentation noted above to the
      Ombudsperson.

IV. The Committee will consider appeals, absent unavoidable delays, at the first scheduled
meeting that occurs after a date three weeks following the date on which it receives the
appeal from the Ombudsperson. The student may obtain the schedule of the meeting dates
of the Committee from the Ombudsperson.

V. The Committee will review the student’s written appeal, confer with the appropriate
faculty, administrators, and others as it deems necessary in making its recommendation to
the Executive Vice President and Provost. In the process of making its recommendation,
the Committee may request:
a. The student to be interviewed, provide additional information or access to records, or appear before the Committee;

b. Relevant faculty or administrators to be interviewed, provide additional information or access to records, or appear before the Committee;

VI. The Committee will communicate its findings and recommendations to the Executive Vice President and Provost. The final decision with respect to the appeal will be made by the Executive Vice President and Provost and communicated to the student in writing. Copies shall be provided to the Faculty Senate office and to the Chair of the Committee.
## The Grading System

The following symbols are used:

<table>
<thead>
<tr>
<th>A</th>
<th>Excellent attainment</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>Good attainment</td>
</tr>
<tr>
<td>C</td>
<td>Fair attainment</td>
</tr>
<tr>
<td>D</td>
<td>Poor attainment (earns credit but may not fulfill requirement for a major)</td>
</tr>
<tr>
<td>F</td>
<td>Failure (effective Fall 1995)</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped on or before the last day for withdrawing from classes as published in the official calendar of the University. Credit can be earned only by successful repetition of the course.</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete work in passing status with the instructor’s permission to complete the course. An “I” will be assigned only if the instructor is satisfied that there are reasonable non-academic grounds for the student’s incomplete work. <strong>An “I” is not intended to be assigned in order to permit a student to repeat a course without registration or to permit a student to do additional work in order to improve upon grades earned during the semester.</strong> The student who receives an “I” must complete the course with a passing grade within the time frame specified by the professor of the course but not longer than the end of one calendar year, or prior to graduation, whichever occurs first. An Academic Dean may approve an extension initiated by the course instructor. An “I” not completed prior to the student’s graduation shall be changed to an “IE” or “IF” by action of the student’s Academic Dean.*</td>
</tr>
<tr>
<td>IP</td>
<td>Denotes in progress grade assigned upon satisfactory completion of the first-semester of a two-semester sequence, with the final grade for both courses to be submitted at the end of the second semester of the sequence. Please note that all “IP”s must be converted to a letter grade or “IF” at graduation. “IP” will also be converted to “IF” upon any departure from the University for a period in excess of one year.*****</td>
</tr>
<tr>
<td>IF</td>
<td>Symbol indicating that an “I” grade was not appropriately completed.**** The symbol “IF” is equivalent to an “F” when computing a student’s average.</td>
</tr>
<tr>
<td>CR</td>
<td>Grade signifying that credit only is awarded based on a “C” average or better.</td>
</tr>
<tr>
<td>NC</td>
<td>Grade signifying that no credit is awarded based on a course average below a grade of “C”.</td>
</tr>
<tr>
<td>NG</td>
<td>Symbol assigned by the Office of the Registrar indicating that the instructor has not reported the student’s grade. For a student to receive credit for the course, the instructor must report a passing grade prior to the student’s graduation, or by the end of one regular academic semester, whichever comes first. An Academic Dean may approve an extension initiated by the course instructor. An “NG” not replaced by a passing grade, or by a “W”, prior to the student’s graduation shall be changed to an “F” by action of the student’s Academic Dean.***</td>
</tr>
</tbody>
</table>

---

*For a student to receive credit for the course, the instructor must report a passing grade prior to the student’s graduation, or by the end of one regular academic semester, whichever comes first. An Academic Dean may approve an extension initiated by the course instructor. An “NG” not replaced by a passing grade, or by a “W”, prior to the student’s graduation shall be changed to an “F” by action of the student’s Academic Dean.***

**An “I” is not intended to be assigned in order to permit a student to repeat a course without registration or to permit a student to do additional work in order to improve upon grades earned during the semester.**
GRADE POINT AVERAGE

The grade point average is used to determine:

- class rank
- graduation and honor eligibility
- good standing, probation, and dismissal status
- scholarship eligibility

Your official grade point average is based only on the work you have completed at the University of Miami. The only exception to this policy is for determining whether a student qualifies for honors or has met the minimum grade point requirement at the time of graduation. For graduation purposes, cumulative grade point average is defined as either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere whether or not the transfer work is accepted toward a degree at the University of Miami, whichever is lower.

Quality points per credit are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>1.30</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>E (Prior to Fall 1995)</td>
<td>0.00</td>
</tr>
<tr>
<td>IE**</td>
<td>0.00</td>
</tr>
<tr>
<td>F (Effective Fall 1995)</td>
<td>0.00</td>
</tr>
<tr>
<td>IF</td>
<td>0.00</td>
</tr>
</tbody>
</table>

Courses marked with an “IE” or “IF” count as credit attempted but are not counted in credits earned and do not carry quality points.*** Credits marked CR are counted as credits earned but are not counted in credits attempted and do not carry quality points. Courses marked with the symbols I, IP, W, NC, and NG do not carry credits attempted, credits earned, or quality points.

The grade point average is determined by dividing the total quality points earned by the total credits attempted.

Military service credit, some foreign university credit, correspondence course credit, credit by examination, etc., are not awarded quality points and do not enter the computation of the grade point average.

HONOR CODE

The Honor Code, initiated at the request of the Undergraduate Student Body Government, ratified by student referendum, approved by the Faculty Senate, by the President of the University, and administered by students, protects the academic integrity of the University of Miami by encouraging consistent ethical behavior among its undergraduate students. The Code provides standards that prohibit all forms of scholastic dishonesty, including cheating, plagiarism, collusion, and falsification or misrepresentation of experimental data. The Code covers all written and oral examinations, term papers, creative works, assigned computer related work, and any other academic work done at the University by an undergraduate student.

All undergraduate students are responsible for reading, understanding, and upholding the Honor Code. Signed pledges are required for written work submitted for evaluation, but the absence of a signed pledge does not free a student from the ethical standards required by the Code. Procedures for dealing with infractions of the Code, including provisions for appeals, are printed in the text of the Honor Code. Copies may be obtained from the Office of the Dean of Students or from the office of the Undergraduate Student Body Government, or on-line at www.miami.edu/honor-council.

In keeping with the traditional prerogatives of university faculties, nothing in the Code infringes on the faculty’s assignment of grades undertaken in a class. Instructors are informed when students have been found guilty of infractions involving their classes. Courses in which students have been failed for academic dishonesty may neither be dropped nor repeated under the terms of the freshman repeat rule.

The Dean’s List

The Dean’s List is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained high scholastic achievement for the semester. To attain the Dean’s List, a student must, for the semester:

1. have registered for and have completed 12 or more graded credits (excluding the credits earned in courses taken for credit only);
2. have attained a quality point average of 3.50 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Dean’s List will be announced by each college and school at the end of the semester. The Office of the Registrar will post this achievement to the student’s permanent record.

The Provost’s Honor Roll

The Provost’s Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained a high scholastic achievement for the semester. To attain the Provost’s Honor Roll, a student must, for the semester:

1. have registered for and have completed 12 or more graded credits (excluding the credits earned in courses taken for credit only);
2. have attained a quality point average of 3.75 or higher for the semester;
3. have no courses with pending grades (I or NG).
The Provost’s Honor Roll will be announced by the Provost’s Office. The Office of the Registrar will post the achievement to the student’s permanent record, and distribute the Provost’s Honor Roll Certificate.

**The President’s Honor Roll**

The President’s Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained the highest possible scholastic achievement for the semester. To attain the President’s Honor Roll a student must, for the semester:

1. have registered for and completed 12 or more graded credits (excluding credits earned in courses taken for credit only);
2. have attained a quality point average of 4.0 for the semester;
3. have no courses with pending grades (I or NG).

The President’s Honor Roll will be announced by the Office of the Registrar who will post the achievement to the student’s permanent record, and distribute the President’s Honor Roll Certificate.
GRADUATION

DIPLOMAS AND TRANSCRIPTS

No diplomas or official transcripts are released from the Office of the Registrar without the approval of the Office of Student Account Services.

Official transcripts are issued only upon receipt of a secure electronic request through a student’s myUM account or a written request from the student and upon payment of the appropriate transcript fee.

Unofficial transcripts are available free of charge on myUM or for a fee if ordered in the Office of the Registrar, 121 UC. Those ordered in the Office of the Registrar will be available for pick-up within one week after the request is submitted.

GRADUATION AND DEGREES

It is the responsibility of the student to be sure he/she makes satisfactory progress toward, and fulfills requirements for, the degree he/she seeks. He/she may obtain help in the office of his/her Academic Dean.

To receive a Bachelor’s degree from the University, the student must earn at least 120 semester hours of credit (more in some schools), with a C average (2.0) or better as well as a C average for all work done at the University of Miami.

Students must also meet all of the degree requirements of their respective schools and should not expect requirements in composition, mathematics, foreign languages, or other subject areas to be waived for any reason.

- Each student must complete the final 45 credits that are applied to his or her baccalaureate degree in residence at the University of Miami.
- In addition, each student must complete at least half of the credits specified for his or her major in residence at the University of Miami.
- Not more than 30 hours of correspondence work and extension work combined will be accepted toward a degree, and neither correspondence nor extension work may be credited as a part of the last 45 hours of the student’s program.
- Not more than 30 hours of credit based on military experience will be awarded toward the degree.
- Credits earned in a manner other than by course registration, i.e. proficiency examination, CLEP, placement tests, etc., may not be used to meet the final 45 credit hour residency requirement, however such credit by examination may be earned while the student is enrolled in the courses needed to meet the final 45 credit-hour residency requirement.
- To obtain two different undergraduate degrees, a student must complete all the requirements for each degree.
- A second undergraduate degree on the same level requires a different major and a different minor.
- If the degrees are in two different schools, a student must meet the requirements with distinctly different majors and minors, wherever applicable, in each school.

As a general rule, college credits more than 12 years old are not recognized for degree purposes. Students in this category should consult their academic deans.
A student must apply on myUM during the semester in which they expect to graduate.

A diploma must be issued in the name on the student’s academic record. Addition or omission of a middle name is acceptable. The addition of a middle name will be acceptable only as it appears on the student’s application for admission. If the middle name is not on the application or if the student wants another version, documented proof such as a birth certificate or legal name change must be presented to the Office of the Registrar located in the University Center, Room 121.

The last date on which application may be made for each graduation period is published in the Academic Calendar. The academic deans are the only officers authorized to approve placing the student’s name on the candidate degree list.

GRADUATION HONORS

University Honors (summa cum laude, magna cum laude and cum laude) will be determined by a minimum GPA unique to the school or college from which the student is graduating.

The GPA required will change each academic year and will be based on the cumulative GPA of the previous year's graduating class.

Visit the Honors Program and Office of Academic Enhancement website at www.miami.edu/honorsprogram for specific GPA requirements each academic year to determine eligibility for graduation with University Honors.

The top 5% of the graduating class will receive summa cum laude within each individual school or college; the next 10% will receive magna cum laude, and the next 10% cum laude.

Eligibility for University honors for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

A student must meet the required GPA by the completion of the final semester within his/her school or college to be eligible to graduate with the honor.
STUDENT STATUS

ACADEMIC BANKRUPTCY

Students entering college sometimes perform at an unacceptable academic level. They either drop out or are dismissed. Some individuals with this experience re-evaluate their educational goals and desire to return to college. Their academic record, however, may present an insurmountable obstacle. In order to be considered for academic bankruptcy, a student’s combined college grade point average must be below 2.00 as calculated by the Office of Admission.

Undergraduate students in this category who want the opportunity for a fresh start at the University without this handicap may apply for admission or readmission with the request that their prior academic record be disregarded.

Application for Initial Admission to the University with Academic Bankruptcy

The applicant must apply to the Office of Admission and:

1. must have been admissible to the University as a senior in high school,
2. must have attended an accredited institution for at least one year and must not have attended any college or university for the preceding six months, and,
3. must not be admissible to the University based on his or her college-level work.

Application for Readmission to the University with Academic Bankruptcy

A University of Miami student who has dropped out or who has been dismissed may request Academic Bankruptcy on meeting these conditions:

1. The student must apply to the Office of the Registrar.
2. At least six months must have elapsed since the end of the semester in which the student was last in attendance at the University of Miami.
3. Detailed written evidence must be presented to the school in which reacceptance is sought, showing that the conditions or factors that caused the poor performance have changed sufficiently, so that there is a reasonable expectation of future satisfactory performance.

Conditions of Approval

1. If Academic Bankruptcy is approved, no course credits earned previously will be displayed on the transcript for credits attempted, credits earned, or quality points earned; however, all grades earned previously will remain on the transcript.
2. Readmission applicants with approval from the dean of the accepting school, may have Academic Bankruptcy apply only to those credits taken by the student when last in attendance at the University of Miami, so that credits earned at another institution subsequent to the date the student last attended the University are not affected.

Academic Bankruptcy can be granted only once for any student.
CERTIFICATION OF ENROLLMENT

Students who require certification of enrollment for insurance or financial lender purposes may obtain an enrollment letter via their myUM account or by submitting a request in writing to the Office of the Registrar. Students will be certified as currently enrolled once they have met their financial obligations. Students who require enrollment certification for scholarship purposes only, will be certified as course selected, until financial obligations are met.

CLASSIFICATION OF STUDENTS

Students are classified in three ways:

a. by course load (full- or part-time);

b. by objective (degree sought, non-degree, transient, audit, etc.);

c. by year.

By Course Load

A student is a full-time student if he/she carries not less than the minimum normal load, 12 semester hours per semester in most schools, nine semester hours in the Graduate School (please refer to the Graduate section for exceptions). The minimum semester hour credit loads in a summer session will vary for each category, according to the length of the sessions. (A typical full-time class schedule for fall and spring semesters not requiring override approval from an advisor consists of 15 semester hours. In some cases, students are recommended to enroll in fewer than 15 credits.) Please refer to the university’s full-time/half-time policy located at www.miami.edu/registrar. For spring semester, Intersession courses can be included when evaluating full-time status. It is important to note that tuition charges for Intersession courses typically are separate from and in addition to charges for the spring semester. Full-time status may vary from one college or school to another. Students should consult with the dean of his/her college or school for details.

By Objective

A degree student is one whose immediate educational objective consists wholly or principally of work normally credited to a University of Miami bachelor’s or higher degree. To qualify for this status, a student must meet the standards for admission.

A non-degree student is one who is not pursuing a degree program. Such students are those who, although eligible for degree candidacy, have requested permission to take a limited or special selection of credit courses without regard to requirements for a degree. This classification includes high school graduates and students with previous college credit

a. who do not want degree status;

b. whose applications for degree status are incomplete;

c. who are taking work toward teacher certification;

d. who are workshop applicants;

e. who are visiting summer school students.

(Students under 21 years of age who have not completed high school will not be admitted to this status.) Non-degree students are sub-classified as transient, special, etc.
An undergraduate non-degree student may petition the Director of Admissions to have his/her status changed to that of degree student. Up to 30 credits earned in non-degree status may be applied towards a degree, but only to the extent approved by the appropriate academic dean. It is therefore important that the degree student identify himself/herself as such, early in his/her program.

**Senior-Graduate**

University of Miami undergraduates within 30 credits of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree senior-graduate status, and in this status may take and receive credit for graduate courses while completing the requirement for the baccalaureate.

Admission to Senior-Graduate Status requires:

1. an academic record strong enough to justify regular admission to the department concerned on the basis of the academic record alone (at least 3.0 GPA);
2. the written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, Financial Aid and of the Graduate Dean prior to registration;
3. the submission of a special form (which can be obtained at the Graduate School) that will not require the thirty-five dollar ($35.00) application fee.

The graduate credits earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami. (Refer to the Graduate section for more information.)

No more than six (6) hours graduate credit may be taken in one semester, and no more than a total of twelve (12) hours credit may be taken in an academic year while in Senior-Graduate Status. Students may take no more than 15 credits of combined graduate and undergraduate courses per semester. Financial aid may be affected.

Admission to Senior-Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

NOTE: Senior Graduate registration can only be executed at the Office of the Registrar, 121 University Center.

A graduate student is one who has been admitted to the Graduate School.

**Transient Student**

A transient student is one who is enrolled at the University of Miami with the sole intention of using credits earned toward graduation elsewhere.

**Audit Student**

An audit student is one who enrolls as an observer or listener only. Auditing is allowed only when there is space available in the class. Audit status may be restricted by the Dean in the case of laboratory, studio or performance courses where audit status is not appropriate. Audit students receive no credit, do not prepare written assignments or take examinations, are not eligible for residence in campus residence halls, and do not receive student
privileges except for the use of the library. No entries are made on the permanent academic record for audited courses.

Students wishing to change from audit status to credit status must obtain all necessary approvals within two weeks following the last day of registration for Fall and Spring semesters and no later than the fifth class day following the last day of registration for Summer Sessions. No changes except withdrawals from the course are permitted after this time.

Note: Fee for auditing a course is non-refundable. Please refer to financial information section of the bulletin.

By Year

A freshman is a degree student who has earned 0 to 29 credits.
A sophomore is a degree student who has earned 30 to 59 credits.
A junior is a degree student who has earned 60 to 89 credits.
A senior is a degree student who has earned 90 credits or more.

ELIGIBILITY FOR UNIVERSITY EXTRACURRICULAR ACTIVITIES

Full participation in University-sanctioned extracurricular activities and organizations is open to all full-time students who are not on academic probation and who have been assessed the Student Activity Fee. Extracurricular activities include, but are not limited to the following: academic, athletic, dramatic, or musical organizations or teams; student organizations registered with the Committee on Student Organizations (COSO); fraternities and sororities; student publications; program boards; and University committees.

Students on probation may participate in any activity required as partial fulfillment of their degree program; may attend meetings of organizations; and may play intramural sports. They may not otherwise compete, perform, or hold a leadership position. At the beginning of each fall semester, the activity’s faculty or staff advisor or appropriate committee chairperson shall determine with the Office of the Provost the eligibility of each participating student. Some activities apply stricter standards, and may monitor academic progress and review eligibility during the academic year. Students should consult with the individual activity for specific requirements.

READMISSION

Undergraduate students who have not attended the University for at least one semester should request readmission through the Office of the Registrar no later than two weeks before the beginning of classes, in the semester they wish to re-enroll. Readmission to the University is contingent upon approval of the Dean of the school/college the student is applying to and clearance from the Office of Student Account Services.

International students who seek readmission must receive clearance from International Admission and submit a bank letter to receive an I-20 from International Student and Scholar Services.

Students who have attended another college or university since they were last enrolled at the University of Miami, will be required to provide a transcript of their work. Failure to disclose all prior institutions attended may result in disciplinary action.
A student who is placed on the bachelor’s degree candidate list for a given semester will not receive registration materials for any subsequent semester until the student applies for readmission or admission to a new program. A candidate may wish to continue his/her studies in one of the following situations:

1. If the student fails to graduate and further registration is needed, they must delete their application for graduation in myUM and within twenty-four hours, registration for subsequent semesters or sessions should be available. Students should contact the Office of the Registrar if they experience problems.
2. If the student graduates and wishes to pursue a second bachelor’s degree, the student must apply for readmission, stating his/her new degree objective.
3. If the student graduates and wishes to take additional course work without a degree objective, the student must apply for unclassified status.

Proof of immunization must be provided to the Student Health Service before readmission to the University of Miami. Failure to do so may prevent you from registering for classes.

INACTIVE STATUS

Inactive status is for undergraduate, degree-seeking students who intend, and qualify, to re-enroll at the University of Miami after leaving the university for a designated period of time. Students interested in this option may obtain further information at www.miami.edu/registrar or by visiting the Office of the Registrar.

NON-UM PROGRAMS

Students who study through a non-UM program, domestic or study abroad, and would like to have those credits applied toward their UM degree, should apply for Non-UM Program status. Students may obtain the appropriate form and information through their Academic Dean and/or advisor.

STUDENT IDENTIFICATION NUMBERS

All students at the University of Miami will receive an identification number that is unique to them. This number supplements the social security number, which is also required by the university in order to provide information to the federal government and approved agencies. Access to social security numbers is limited to staff who have a legitimate need for that information.

TRANSFERS BETWEEN SCHOOLS AND COLLEGES

Undergraduate students who have compiled fewer than sixty (60) credits may transfer between schools and colleges provided that such students:

1. demonstrate their academic admissibility to the new program (as defined by class rank and SAT scores) at the time of their original matriculation at the University;
2. satisfy any special criteria required for admission by a particular program (e.g., auditions in the arts, portfolios in architecture, etc.); and
3. obtain the approval of the Dean of the receiving school or college.

It is a general policy of the University that students admitted to degree seeking status may not transfer to an unclassified status.
Students who have compiled 60 or more credits with an average of 2.0 or higher and who have satisfied all of the above three conditions may be eligible to transfer between schools and colleges pending space availability and additional program requirements.
ADMISSION

The University of Miami is a member of the National Association for College Admission Counseling and subscribes to its Statement of Principles of Good Practice.

ADMISSION TO THE FRESHMAN CLASS

The Admission Committee reviews applications and bases admission decisions on the following factors:

- **The Secondary School Record.** The applicant must be in the process of completing graduation requirements at an accredited secondary school or must be a graduate of an accredited secondary school. The applicant must have successfully completed a solid college preparatory program including English, Mathematics, natural sciences, social sciences and foreign language.

- **Standardized Tests.** Official results of the SAT or ACT must be submitted by all applicants. The results of these tests, together with the secondary school record, provide a better measure of the ability of a candidate to perform college level work successfully than can be obtained by either measure alone.

- **The Counselors Evaluation Form.** This form is to be completed by the applicant’s secondary school counselor and includes rank in class, test score information, and an evaluation of potential for academic success in the student’s area of interest.

- **The Essay.** Since each applicant is considered individually, the Essay provides the opportunity to present information that may assist the Admission Committee as it evaluates the application for admission.

See admission procedures for freshmen

Admission of transfer students

Transfer admission may be granted in most fields of study to students who have earned credit from other regionally accredited colleges or universities. Courses completed with **passing grades of C or higher** at other colleges and universities and acceptable for academic credit by the University of Miami, will be verified, and where appropriate, will be translated into University of Miami equivalents by the Office of Admission. However, the Dean of the College or School within the University from which the student plans to graduate determines which transferred courses may be counted toward meeting graduation requirements of that College or School.

**Transfer of credits to UM**

Work taken at other institutions will appear on the University of Miami transcript in separate entries as:

a. The total number of transferable credits attempted and quality points earned, regardless of grades, and

b. The total credits transferred, which shall be the total credits for which a grade of C or higher was earned.
Note: Only the transfer totals earned are added to the University of Miami totals. Total credits attempted and quality points earned elsewhere are not included in the University of Miami totals.

The University does not accept transfer credit for courses in which a grade of C- and below (or the equivalent grade) was earned. However, grades of C-, D, and F are used to calculate the transfer admission grade point average.

Credits are not transferred from institutions not accredited by the appropriate regional accrediting association. Limited exceptions may be made with the approval of the Dean in the College or School of the student’s major. Credits transferred from institutions not in existence long enough to attain regional accreditation must be validated by the attainment of a C average or better in the first 12 credits of course work taken at the University of Miami.

The University does not have a coursework forgiveness policy. The grades of any repeated courses will be averaged.

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

Upper division course requirements (300 level or above) at the University may not be satisfied with community college courses.

**Required credits in residence at the University of Miami**

A student transferring credits from a 2-year community or junior college (this being the last school attended) must complete a minimum of **56 credits in residence** at the University of Miami to earn an undergraduate degree.

A student transferring credits from a 4-year college or university (this being the last school attended) must complete a minimum of **45 credits in residence** at the University of Miami to earn an undergraduate degree.

At least **half of the credits** required for the chosen Major or Minor must be completed at the University of Miami.

See [Admission procedures for transfer students](#)
ADMISSION OF UNDERGRADUATE INTERNATIONAL STUDENTS

ELIGIBILITY FOR ADMISSION

ADMISSION PROCEDURES FOR INTERNATIONAL STUDENTS

EDUCATIONAL DOCUMENTS

Diplomas, Certificates
Copies should be enclosed with the application. Students from countries following the British educational system must submit certified photocopies, or ask the examinations council to mail confidential results to the University of Miami. Reports of scores in school-leaving examinations (e.g., Baccalaureate) must also be submitted.

Transcripts, Statements of Marks
A transcript must contain the following information: subjects studied; marks (grades) awarded; length of class periods; number of periods per week for each subject; and grading scale with minimum passing mark. Year-by-year records of marks should be sent to the University of Miami directly from U.S. institutions. Certified records from foreign institutions may be submitted by applicants, but the University may sometimes insist that such transcripts be sent directly to the University of Miami from the issuing institutions. All secondary and tertiary transcripts must be submitted.

English Translations
Documents in a language other than English must be accompanied by certified English translations. Notarized translations will not be accepted. Translations supplement but do not replace original documents. Please remember to send both.

Syllabus of university study (description of each course or subject studied accompanied by certified English translations. Notarized translations will not be accepted).

A current (within the past six months) bank or government sponsorship letter guaranteeing payment for tuition and fees, books, room and board, medical insurance and personal expenses for one calendar year (two semesters and two summer sessions) is required.

EXAMINATIONS FOR INTERNATIONAL STUDENTS

All international students whose native language is not English, including those applying for transfer from U.S. institutions, are required to submit the results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The TOEFL code for the University of Miami is 5815.

The SAT score report is not required and should not be submitted for admission consideration from applicants who are attending schools outside the United States. Applicants should only submit an SAT score report if they qualify for merit scholarship consideration. The minimum combined score required for scholarship consideration is 1300 (critical reading and math sections only).

Conditional admission: Academically qualified applicants who are unable to take the TOEFL, or who have scored less than the required minimum, may be offered admission to undergraduate programs with the condition that they successfully complete level five of the University of Miami Intensive English Program or obtain a 550 TOEFL and higher. University of Miami TOEFL code number is 5815.

Institutional TOEFL scores are designed for academic placement use at the University of Miami. Those needing TOEFL for admission to the University of Miami or for use elsewhere should take the TOEFL iBT instead. Visit www.ets.org/toefl/ for more information about the TOEFL iBT.

IELTS is the International English Language Testing System. It measures ability to communicate in English across all four language skills – listening, reading, writing and speaking – for people who intend to study or work where English is the language of communication.

IELTS Course ID (codes): Undergraduate Admission – 4861; Graduate Admission – 4862. For more information, visit http://bandscore.ielts.org/course_info.aspx?OrgId=3187.

PROGRAMS OF STUDY

International students are eligible to apply for all programs offered at the University of Miami. It should be noted that medicine and law are studied at the graduate level in the United States, and it is therefore inappropriate for undergraduate international applicants to request these programs.

FINANCIAL INFORMATION

The University of Miami has no financial assistance for international students other than academic scholarships. International students must provide funds for all of their expenses during the entire period of study, including travel and vacations. Students who would not be able to cover their expenses are best advised not to apply for admission.
EARLY ADMISSION

A limited number of carefully selected students who are currently enrolled in high school and who have completed three years of study may be admitted to the University as freshmen. Early admission applicants typically have a very strong academic background and demonstrate a mature character.

Students who wish to apply under Early Admission must have the support of his/her parents, guidance counselor, and high school. Early applicants must also schedule an interview with the Director of Admission.

Early Admission applicants must submit official high school transcripts, SAT or ACT examination results, Counselor Evaluation Form and Essay as part of the admission process.

Early Admission applicants will be notified of an admission decision by June 1 or after receipt of grades from the final high school year completed.

Since every applicant must be appraised individually, no general qualifications can be listed. Students interested in early admission may send inquiries and requests for applications to the Office of Admission.

ADVANCED PLACEMENT AND/OR CREDIT GRANTED TOWARD GRADUATION

The University allows students to receive college credit toward graduation from the following programs: Advanced Placement, International Baccalaureate, and College Level Examination Program. To have Advanced Placement, International Baccalaureate, or College Level Examination Program credits evaluated, the student must submit an official test result report to the Office of Admission. The University of Miami does not give credit for CLEP Foreign Language and General Examinations.

The University will accept not more than 60 credits from these programs to count toward the 120 credits required for graduation.

SUBMITTING GED SCORES

An applicant may apply to the University upon completion of the GED in lieu of completing high school. When applying with the GED, the applicant must submit official high school transcripts up to the time of withdrawal, as well as the official GED score report and diploma.

Applicants submitting the GED must achieve the following scores to be considered for admission. These scores should be considered a guideline and do not guarantee admission to the applicant.

For exams taken in English:
Overall score of 2800
No subscore below 500

For exams taken in any language other than English:
Overall score of 3000
No subscore below 600

It is strongly suggested that applicants submitting the GED in any language other than English also submit a TOEFL score.

**NON-DEGREE ENROLLMENT**

**ADULT STUDENT ACCESS PROGRAM (A.S.A.P.)**

Students may take up to 30 credits in an undergraduate, non-degree seeking category, which may be applied to a degree program, after all application and degree-seeking requirements are met. In order to be enrolled in this category, students submit a one-page application and no other documents or transcripts; academic achievement is evaluated after 12 credits are earned. A 2.5 G.P.A. is required to continue in the program beyond 12 credits.

Students may take up to 6 credits maximum in a graduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. However, not all graduate departments participate in this program. In order to enroll in this category, students submit a one-page application and no other documents or transcripts, after securing the written permission of the participating graduate department and the Dean of the Graduate School. The application for enrollment may be found on the Web at [www.miami.edu/asap](http://www.miami.edu/asap).

For more information, contact: The Adult Student Access Program, Division of Continuing Studies, University of Miami, P.O. Box 248005, Coral Gables, FL 33124-1610, (305) 284-2727.
FINANCIAL ASSISTANCE

The Office of Financial Assistance Services administers federal, state, private and University financial assistance programs. Student employment, including the Miami Commitment Program, is managed by the Office of Student Employment.

FINANCIAL ASSISTANCE SERVICES

It is the purpose of the Office of Financial Assistance Services to provide needy and/or academically qualified students with financial aid in the form of scholarships, grants, loans and work programs to the extent that resources are available. In order to make the best use of limited funds, awards often consist of a combination of resources.

In addition, professional staff members are ready to help all students plan for the most efficient use of their financial resources for education.

Underlying the awarding of need-based financial assistance is the philosophy that the student and family have the primary responsibility for educational costs. Need-based financial assistance serves to supplement these primary resources.

- Students who require financial assistance in order to attend the University should apply for assistance while they are candidates for admission.
- Candidates should indicate their interest in financial assistance application information by checking the box provided for that purpose in the Application for Admission.
- The U.S. Department of Education’s Free Application for Federal Student Aid (FAFSA) on the Web is used to determine eligibility for assistance based on need. The FAFSA must be completed for each academic year.
- Entering freshmen should submit their FAFSA so that it is received by the federal processor by the February 1 preference date.
- Entering transfer and all graduate students should submit their regular or renewal FAFSA so that it is received by the federal processor by the March 1 preference date.
- Continuing undergraduate students should submit their regular or renewal FAFSA so that it is received by the federal processor by the February 1 preference date.
- Our office recommends the use of estimated financial information when completing the FAFSA on the Web in order to assure the February 1 preference date is met. Any estimated information must be updated by the applicant using FAFSA on the Web once final figures are available.

Financial aid applications are accepted throughout the year but it is important to note that the appropriate preference date for receipt of aid applications must be met. A new FAFSA on the Web must be submitted for EACH academic year.
STANDARDS OF ACADEMIC PROGRESS (Undergraduate and Graduate)

Yearly and Semester Review

- At the end of each spring semester, the Office of Financial Assistance Services reviews the academic progress of all University of Miami financial aid recipients.

- The academic records from both the fall and spring semesters are considered. If at that time it is determined that a student is not meeting the standards of academic progress for renewal of regular financial assistance and academic scholarships, a written notification is sent to the student. The notification includes information on the appeal process.

- Students granted a one-semester conditional appeal for scholarship and/or regular financial assistance by the Standards of Academic Progress Appeal Committee will be reviewed at the end of that semester.

Regular Financial Assistance

- In compliance with federal financial aid regulations, the University of Miami requires satisfactory progress towards a degree as an eligibility requirement for financial assistance.

- This policy is applicable to all undergraduate, graduate and doctoral students receiving financial aid through university, state, and federal aid sources, including the Federal Parent Loan for Undergraduate Students (PLUS).

Credit Requirements

- All full-time undergraduate students are required to register for and complete at least 24 (a minimum of 12 each semester) new credit hours at the University of Miami each academic year, defined as the fall and spring semesters.

- Full-time undergraduate students who enroll for only one semester are required to register for and complete at least 12 new credit hours during that semester.

- Graduate students must be enrolled at least half-time in order to receive federal financial assistance. A minimum of 5 graduate hours constitutes at least half time enrollment at the graduate level. The only exception to this credit requirement is enrollment in any of the 700 level research courses. Students enrolled in any of these courses are considered full-time and are eligible for federal loans.

- A student must have earned at least 75% of the total hours attempted during his/her overall academic career. Undergraduate and graduate level credits cannot be combined to meet the 75% standard; however, hours transferred into the University of Miami are used in the calculation. The percentage of earned hours is calculated by dividing earned hours by all attempted hours. Rounding does not apply. (e.g.: Student completes 18 of 24 attempted hours. Percentage complete is 18/24=75%)

- Withdrawals, incompletes, audits, and Fs are not considered earned hours.
Hours transferred in to the University of Miami will be counted as hours attempted and hours earned.

Reinstatement of aid eligibility can be obtained by earning additional University approved credits, achieving the 75% completion standard, or appealing as outlined later in this section. The University reviews progress once a year at the end of the spring semester. A student who completes courses that meet the requirements prior to the spring semester review may request, in writing, a review of their progress in advance of the end of year review. Aid eligibility will be restored upon determination that the progress requirements have been met.

Freshmen (0-29 credits) new to the University will be allowed a one academic year adjustment period.

A freshman that does not earn 75% of the hours attempted at the end of the initial academic year is considered to be on probation. Aid will not be withdrawn for the subsequent term, but at the end of that term, the student’s academic record will be reviewed by OFAS and appropriate renewal or termination actions will be taken.

Cumulative Grade Point Average Requirement

Undergraduate Students
All undergraduate students must meet and maintain the University of Miami credit and cumulative grade point average (CGPA) requirements to maintain satisfactory academic progress. The criteria listed below must be met to receive federal and institutional financial assistance administered by the Office of Financial Assistance Services.

<table>
<thead>
<tr>
<th>Semester Hours Earned</th>
<th>Minimum Cumulative G.P.A.</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 32</td>
<td>1.7</td>
</tr>
<tr>
<td>33 to 64</td>
<td>1.8</td>
</tr>
<tr>
<td>65 to 96</td>
<td>1.9</td>
</tr>
<tr>
<td>97 +</td>
<td>2.0</td>
</tr>
</tbody>
</table>

This does not include University of Miami scholarships and State of Florida financial aid. State of Florida financial aid and University of Miami academic scholarships have their own CGPA requirements.

Graduate and Doctoral Students
All University of Miami graduate and doctoral students must maintain a minimum 3.0 cumulative grade point average (CGPA). Graduate students who fail to meet the minimum credit or cumulative grade point average requirements have failed to meet the satisfactory academic progress standards established by the University. Those in violation of the satisfactory progress eligibility requirements will be notified in writing of their eligibility status and right of appeal.

Maximum Period of Eligibility

Degree-seeking undergraduate and graduate students receiving federal aid must complete their degrees within 150% of the normal time for completion as determined by the school or college catalog under which the student was admitted. For example, if an academic program requires 120 credit hours, the student must complete the
program within 180 total credit hours. Credits used in this calculation include those accepted for transfer and those attempted at the University of Miami.

- Students receiving University scholarships and need-based grants are limited to four years of eligibility (five years for five-year degrees).

- William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Access Grant (FSAG) recipients are limited to nine semesters of eligibility.

- Graduate students entering the dissertation or thesis stage of their degree program may receive federally funded assistance for only two years. Please note that these two years are included in the maximum periods previously listed.

- Graduate students who plan to enroll in a graduate degree program should keep in mind their aggregate loan limits. For more information, go to the National Student Loan Data System (NSLDS) at www.nslds.ed.gov. This site displays information on loan amounts, outstanding balances, loan statuses and disbursements.

**University Financial Assistance for Graduate Students**

In order to receive a graduate assistantship, fellowship or tuition scholarship, a graduate student must:

- Be admitted unconditionally to a post-baccalaureate degree program;
- Be enrolled for full-time study; and
- Maintain a cumulative graduate grade point average of 3.0 or above.

For additional information, please visit the Graduate School Website at www.miami.edu/grad. For specific information, contact the Graduate Advisor of each program. For information regarding loan and work-study opportunities, visit the Office of Financial Assistance website at www.miami.edu/ofas.

**SCHOLARSHIPS (Undergraduate only)**

- Students who are receiving any of the University of Miami academic scholarships must meet the same credit requirements as students receiving regular financial assistance.

- Reinstatement of academic scholarship eligibility can be obtained by earning additional University approved credits. The University reviews progress once a year at the end of the spring semester. A student who completes courses that meet the requirements prior to the spring semester review may request, in writing, a review of their progress in advance of the end of year review. Aid eligibility will be restored upon determination that the progress requirements have been met.

- Scholarship recipients, however, must maintain a CGPA of at least 3.0 for all credits earned at the University of Miami to retain their scholarship.
First-time freshmen are eligible for University of Miami academic scholarships for up to eight semesters; transfer students are eligible for up to four semesters. These scholarships are good for the fall and spring semesters only. Any requests to have an academic scholarship applied to summer or mini-mester terms need to be made in writing and submitted to our office.

Golden Drum/Ronald Hammond scholarship recipients should refer to their contract for renewal criteria provided by the Office of Multicultural Student Affairs.

Guaranteed Scholarship

First-time freshmen awarded a University of Miami academic scholarship, automatically retain their scholarship after their first year of school. The student must maintain a minimum 3.0 CGPA and complete at least 24 University of Miami credit hours during their second academic year to guarantee their scholarship for the remaining two years of undergraduate studies.

First-year transfer students awarded a University of Miami academic scholarship are guaranteed their scholarship if they:

- have completed 24 credit hours during their first academic year,
- have maintained a minimum 3.0 CGPA, and
- have registered as a full-time student for their second year of eligibility.

Transfer students meeting these requirements will be guaranteed their scholarship for four semesters or until they graduate, whichever comes first.

Any University of Miami academic scholarship will be guaranteed for the remainder of an undergraduate student’s eligibility if they are not on probation at the end of their 4th semester (2nd semester for transfer students).

Automatic Probation and Probationary Scholarship Assistance

Freshmen that fail to meet the scholarship academic progress standards at the end of the first academic year will receive a warning and are granted an additional year of eligibility under “Freshman Forgiveness.” Sophomores that fail to meet the scholarship academic progress standards at the end of the academic year are placed on probation, and may receive the scholarship for an additional semester as a probationary award. The student’s progress is reviewed at the completion of the semester. A student that fails to meet the scholarship academic progress standards at the end of the semester loses eligibility for the award the second semester, receives notification of the loss of eligibility, and is provided information on the appeal process.

A new transfer student receiving a University of Miami academic scholarship that does not meet the scholarship academic progress requirements at the end of the 2nd semester may receive a one-year probationary award. A student that fails to meet the scholarship academic progress standards at the end of the 4th semester loses eligibility for the award, receives notification of the loss of eligibility, and is provided information on the appeal process.
A student may receive probationary scholarship assistance only once. Any student who has received a scholarship under probation must meet the standard of academic progress requirements for that scholarship assistance by the end of the probationary period in order to maintain his/her eligibility for that scholarship in the future.

STATE OF FLORIDA AID

The Florida Department of Education, Office of Student Financial Assistance, has its own standards of progress for state financial assistance.

- All Bright Futures Scholarship recipients (includes Florida Academic, Florida Medallion, and Florida Gold Seal scholarships) recipients are eligible for up to 132 credit hours; however, eligible students may only receive up to 45 hours of credit per academic year.

A student that does not meet the minimum 12 credit hour (6 per semester) requirement at the end of the academic year will no longer be eligible for his/her Bright Futures award.

A student that fails to meet the minimum cumulative grade point average (3.0 for Florida Academic, 2.75 for Florida Medallion and Gold Seal) will no longer be eligible for his/her Bright Futures award. Florida Academic recipients that fail to achieve a 3.0 cumulative average, but achieve at least a 2.75 cumulative average will renew at the lower Florida Medallion amount. Recipients that fail to meet the progress requirements receive notice including information on the appeal process.

  - Award Reinstatement: an eligible student that did not receive scholarship funds for the last academic year (fall through spring), may request reinstatement of the award. The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at www.FloridaStudentFinancialAid.org.

  - Award Restoration: a student that failed to achieve a minimum 2.75 and became ineligible for funding may apply for restoration in an academic year after which the 2.75 cumulative GPA requirement was met. (The 2.75 GPA must be met before the fall term for which the student is applying.) The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at www.FloridaStudentFinancialAid.org.

- Recipients of the William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Assistance Grant (FSAG) must complete at least 24 credit hours each academic year with a cumulative grade point average of at least 2.0. Classes taken in the previous summer may be included in calculating the completed hours (credit hours earned during summer of 2008 may be combined with the credit hours earned during the 2008-2009 academic year to meet the 24 credit hour requirement).

Students that do not meet the annual minimum 24 credit hours requirement for renewal, may not receive funding the following academic year. To be eligible for
renewal in a subsequent year, the student must meet the general eligibility requirements for renewal and have maintained/earned a cumulative GPA of 2.0.

Students enrolling for only one semester must complete at least 12 new credit hours while maintaining the required CGPA.

**THE APPEAL PROCEDURE**

Students that do not meet the academic progress requirements may submit a written appeal to request reinstatement of eligibility to receive aid. The student must complete the University of Miami’s Academic Progress Appeal Form. This petition requires the student to:

1. Submit a written explanation as to why he/she was unable to meet or maintain the academic progress requirements; and

2. Submit documentation that substantiates the student’s circumstances, such as a letter from a doctor or copies of medical bills if a student cites medical reasons for not meeting the requirements.

The appeal form may be downloaded from the financial assistance website. Submit the Appeal Form and all documentation to the Standards of Academic Progress (SOAP) Appeal Committee, c/o the Office of Financial Assistance Services. All appeals should be submitted no later than 30 days from notice of ineligibility. All appeals submitted completely and on time will be reviewed by the committee prior to the beginning of each semester. Decisions are made using the appeal documentation provided by the student in conjunction with the student’s academic record. All decisions by the committee are final.

A general description of the major financial assistance programs available through various departments as well as the Office of Financial Assistance Services can be found at [www.miami.edu/ofas](http://www.miami.edu/ofas).
FINANCIAL PAYMENT POLICIES

Policy
All semester charges (tuition, room, board and fees) are due by the date on the Registration Billing Notification, unless an established Monthly Payment Plan contract has been finalized with the Office of Student Account Services. Previously unbilled and new charges are due and payable when incurred. A student is responsible for his/her tuition and fees upon registration. Financial registration is considered complete only when all charges are paid or when satisfactory arrangements to pay have been finalized with the Office of Student Account Services.

Consequences of Non-Payment
The University will not process transcript and/or diploma requests if a student is delinquent in paying his/her student account and/or Monthly Payment Plan. Course selection will not be permitted for any past due accounts including Monthly Payment Plans. A late payment fee will be assessed on all delinquent accounts.

Finance Charges
No additional charges are imposed on an account once Account Balance payments are received by the payment due date. If, however, payment is received after the payment due date, a Finance Charge is assessed. Finance charges are computed on the average daily account balance at an Annual Percentage Rate of 16%.

Deferred Payments
If financial aid funds are not available at the time of registration, the student would normally be expected to cover these payments. However, financial aid awards will be automatically deferred under the following conditions:

- The Office of Financial Assistance Services (OFAS) is provided with a source of aid (other than College Work Study or Miami Commitment) on the student's award package.
- OFAS awards the corresponding amount on the student's award package. i.e., outside scholarship information must be provided to both the Offices of Financial Assistance and Student Account Services in order to defer payment.
- OFAS allocates the guaranteed award during the semester that the disbursement should be expected.
- Final guarantees have been processed by the appropriate alternative loan lender – preliminary approvals will not result in automatic alternative loan deferments.

Examples
Veterans Monthly Educational Benefit Checks: An amount not to exceed the total of the checks expected to be received during the semester (for Fall and Spring, this is typically three checks) may be deferred. Arrangements for this type of tuition deferment must be initiated with a representative of Veterans Affairs through the Office of the Registrar and the Office of Student Account Services. Students with VA benefits are required to sign a promissory note with the Office of Student Accounts in order to defer anticipated payments.

International Students with Government Sponsorships: Payment of all or a portion of charges that can be billed directly to corresponding government agencies may be deferred upon presentation of appropriate documentation from their government or embassy. In addition, international students who receive monthly stipends for living
expenses from their government may (if expenses are covered by the student’s sponsor) defer a portion of the payment of their room and board charges. However, no deferment is permitted to an international student having a previous balance at the time of registration or one receiving tuition remission. Arrangements for this type of tuition deferment must be initiated with a Third Party Advisor at the Office of Student Account Services.

Florida Prepaid Program

The University of Miami will assist with a student’s education expenses by billing for any available Florida Prepaid College Program funding directly to the Florida Prepaid College Board. As a Florida Prepaid participant, you may authorize the University of Miami to request various payment disbursement options that best match your needs and current savings in the plan. We encourage all participants to authorize a payment that will facilitate your overall financial planning objectives for your son or daughter's enrollment at the University of Miami.

The University of Miami requires new students to have completed the “Florida Prepaid College Program Authorization Form”. In addition to this form, all students who plan to use their prepaid funds must contact Florida Prepaid at 1-800-552-4723 option 2, and request a separate Florida Prepaid “Transfer Form”. Upon your request, Florida Prepaid will mail the Transfer Form to you. The purchaser of the plan must complete this form and return it directly to Florida Prepaid. It is necessary that Florida Prepaid have this Transfer Form on file in order for students to use Florida Prepaid funds at the University of Miami.

Questions in reference to Florida Prepaid should be sent to saccounts@miami.edu with "Florida Prepaid" in the subject line. The required authorization form for the University of Miami and an example can be downloaded from the following web site: www.miami.edu/osas

Process

Final arrangements for tuition deferments that do not appear on Registration Billing Statements must be made with representatives of the Office of Student Account Services. For further clarification and interpretation of the University’s tuition deferment policy, contact the Office of Student Account Services. You may e-mail Student Accounts at: saccounts@miami.edu.

Policy on previous and unpaid balances

Non-Payment

The University of Miami may declare due and payable at once the sum of all past due balances. In addition, the student will be responsible for interest accrued on all past due and unpaid amounts at the maximum rate permitted by law and any and all costs incurred by the University of Miami in enforcing its rights. The University reserves the right to withhold transcripts, diplomas, readmission, and future registration for non-payment of outstanding balances. The University’s Collection Department may also disclose the student’s outstanding indebtedness, along with other relevant information, to credit information bureaus. A non-refundable $100 reinstatement fee will be charged to reinstate each unpaid and cancelled semester.
Refund Policy

DEFINITIONS

Title IV Financial Aid or Title IV Programs refers to the following awards:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans

- Federal PELL Grant
- Academic Competitiveness Grant
- National Smart Grant
- Federal Supplemental Educational Opportunity Grant (SEOG)
- Federal College Work Study
- State Subsidy Incentive Grants

REFUND POLICY

Students who have advised the appropriate University department of their withdrawal, through 60 percent of the semester, will receive credit for tuition and eligible financial aid refunds using a pro-rated calculation based on the percentage of the semester attended by the student. Unearned Title IV funds will be returned in accordance with the refund policy established in Section 484B of the Higher Education Act of 1965, as amended (HEA) and provided for through the Student Assistance General Provisions regulations enacted on October 7, 1998. Fees are not refundable and will not be pro-rated.

The University refund schedule does not apply to students in the following on-campus and off-campus programs: The Executive MBA, the MBA Program for Working Professionals, and the Master of Science in Professional Management. Unless the student has completed official withdrawal procedures in writing with the Graduate Business Program office prior to the beginning of a course/term, tuition will be refunded on a prorated basis based on the number of class meetings attended through the effective date of withdrawal.

No tuition refund will be granted when class attendance has exceeded 50% of class meetings. This policy supersedes any information stated in the Graduate Bulletin and other university publications.

PROCEDURE

The amount of earned tuition and financial aid will be calculated on a daily pro-rated basis. Unearned tuition will be credited to the students account. Unearned, disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid programs. Students who have not completed the verification process are ineligible to receive any financial aid and therefore no financial aid will have been earned. All disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid program.

The return of financial aid will be refunded to the following sources used in the specific order as noted below until the total amount of the school’s responsibility has been satisfied:
- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loans
- Federal PLUS Loans (Graduate Student)
- Federal PLUS Loans (Parent)
- Federal Pell Grant
- Academic Competitiveness Grant
- National SMART Grant
- Federal Supplemental Opportunity Grant (SEOG - Federal Portion Only)
- Any other Title IV Assistance
- State financial aid

In the event of an overpayment of unearned Title IV grants, the University will send the student a notification letter requesting payment in full or the establishment of a satisfactory payment arrangement with the University or the Debt Collection Services of the U.S. Department of Education. This notification letter will be processed within 30 days of the date of the University’s determination that the student withdrew.

If the student does not respond to the request for repayment within 15 days, the University will notify the Department of Education of any Title IV grant overpayment. If the student does not make satisfactory repayment arrangements for the repayment of Title IV grant aid, the student will then become ineligible for federal assistance on the 46th day from the date of the University’s repayment letter.

**WITHDRAWAL EXAMPLE**

A student notifies the Registrar of withdrawal on the 50th day of the semester. If the total number of calendar days in a semester were 108, the earned tuition and financial aid ratio would be 50 divided by 108 or 46.3 percent. The University would have earned 46.3 percent of the semester tuition and the student would have earned 46.3 percent of the approved federal aid that the student was originally scheduled to receive for the term. The remaining 53.7 percent of unearned tuition would be credited to the student’s account. The 53.7 percent of the student scheduled or disbursed aid remains unearned and must be returned to the Federal Program. If a student remains in school until the percentage of earned financial aid is 60% or more, then federal regulations consider the student to have earned 100% of their federal aid.

**POST WITHDRAWAL DISBURSEMENTS**

If the University determines that a student is eligible for Title IV funds that have not been disbursed, grant funds that the student is eligible for will be disbursed first. Federal aid that the student is eligible for will be credited to the student’s account and applied against any outstanding charges.

**ANNUAL TUITION**

In cases where tuition is assessed on an annual rather than semester basis (except for special contracted programs), the refund will be treated as though tuition were assessed in two equal halves, one for each of two semesters.
Reinstatement of cancelled classes

Classes are subject to cancellation if the student fails to complete Financial Registration at the start of the semester. A non-refundable $100.00 Reinstatement Fee will be assessed on the student account in order to reinstate canceled classes.

If the student does not reinstate his/her canceled classes prior to the end of the semester, the student will not be allowed to register for subsequent semesters. The student will be allowed to register only when he/she has paid the student account balance in full, with certified funds, and has reinstated all canceled classes.

Important Note: Students who are receiving financial assistance and have had their classes canceled for the semester may lose all or part of their financial aid for that semester.

Final arrangements for reinstatement of canceled classes must be made with a representative of the Office of Student Account Services.

Students must be reinstated into all classes in which they initially registered. Partial semester reinstatements will not be authorized.

Payment options

The University Cashier accepts cash, personal checks, traveler’s checks, cashier’s checks, certified checks, money orders, and checks drawn against lines of credit. Personal check and credit card payments are accepted online via myUM. Bank wire transfers are also accepted.

On-Line Payments:

**Web Checking Account (ACH) Payments:** Free on-line checking account payments are accepted through the myUM system. Students must sign onto myUM at (www.miami.edu/myum) and select the “Student” tab. The “Financial” link from the drop down menu should then be selected followed by clicking on the “Billing and On-Line Payment” link. Subsequent on-line instructions will then be provided. Once payment is processed, a confirmation email will be sent to the student’s email address noted in the University’s database. The student’s account will then be systematically updated with the payment. Please note that this option is only available on the myUM system and is at no charge to the student.

**On-Line Credit Card Payments:** Students must sign onto myUM (www.miami.edu/myum) and select the “Student” tab. The “Financial” link from the drop down menu should then be selected followed by clicking on the “Billing and On-Line Payment” link. Subsequent on-line instructions will then be provided. Once payment is processed, a confirmation email will be sent to the student’s email address noted in the University’s database. The student’s account will then be systematically updated with the payment. Please note that a non-refundable 2.5% convenience fee will be added to the amount charged by our credit card service provider.

**Checks and Money Orders**
Payments must be in U.S. Dollars and drawn on a U.S. bank. Payments must be made payable to the University of Miami and include the student’s identification number to ensure credit to the student’s account. Post-dated checks are not accepted.
IMPORTANT NOTE: Foreign drafts must be sent through a collection process requiring a 30-day process for collection purposes. Accounts will only be credited once confirmation of deposit has been received by the University’s bank. Collection fees, charged by the bank for processing these checks, will be charged to the students account.

_Returned checks policy_

All returned checks are deposited twice, automatically, and without notice. A Returned Check Fine will be assessed to the student’s account, as listed below, after the second attempt. Check cashing privileges will be canceled for those students who have three (3) or more returned checks.

A notification letter will be mailed to the maker of the check by the University’s Collection Department detailing the amount and fine for the returned check. Check cashing privileges will be restricted until cash or certified funds (money order or cashier’s check) are presented for payment. A personal check will not be accepted to replace a dishonored check.

_Returned check fines (includes on-line check payments through myUM):

<table>
<thead>
<tr>
<th>Check Type</th>
<th>Fines</th>

<td>2.5% of the check amount</td>
</tr>
<tr>
<td>Checks for Monthly Payment Plan</td>
<td>$25.00 Fee</td>
</tr>
</tbody>
</table>

_Wire Transfer of Funds_

Wire transfer of funds for payment on an account at the University of Miami may be processed through any full service bank. Please direct the transfer to:

Bank of America, N.A.  
1500 South Dixie Highway  
Coral Gables, Florida 33146

ABA Routing Number: 026009593  
For Credit to: University of Miami Account 5508319094  
For Further Credit to: Student Name and I.D. Number

The student’s name and the student’s identification number (C#) are required in order to properly credit funds to the student’s account.

_Tuition payment plans_

The Office of Student Account Services offers several tuition payment options to assist students and parents. The University’s payment options are designed to provide convenient alternative plans of budgeting and paying educational costs whether or not a financial assistance award is granted.

_MONTHLY PAYMENT PLAN (MPP)_

_Purpose:_ This plan allows you to divide all or part of your annual educational expenses (tuition, fees, on-campus housing, and meal plan less financial assistance) into ten
convenient monthly payments for a fall/spring combined plan; five months for a fall-only plan; and five months for a spring-only plan.

**Contract length:** This plan is offered on an annual basis for the fall and spring semesters combined, and the fall and spring separately as noted above. The minimum annual contract for any of these plans is $2,000.

**Fee:** A 3% non-refundable participation fee of the amount financed is charged and included in the established monthly payments.

**Conditions:** Payments are due on the 1st of each month with the exception of the first payment which is due upon signing the Monthly Payment Plan Agreement. The Monthly Payment Plan is completed online at www.miami.edu/osas/mppapp.html. This online process guarantees faster processing for financial registration purposes and automatically updates applicants via email notifications.

**TUITION STABILIZATION PLAN (TSP) (Undergraduates Only)**

The University of Miami Tuition Stabilization Plan (TSP) allows you to pre-pay up to four years of tuition at the current tuition rate. The TSP relieves students and parents of concerns relating to future tuition increases and may also offer substantial savings in future tuition expenses. This plan does not include mandatory fees.

The TSP is a sensible alternative for families and independent students paying for tuition from existing savings or investment accounts. With increases in tuition rates at most Universities running above current inflation rates, a participant’s savings in tuition increases may more than make up for the loss of investment income.

The TSP is designed to be used by full-time students for a minimum of two consecutive academic years and a maximum of four consecutive academic years; if a student withdraws from the University, the unused tuition will be refunded without penalty as outlined in the TSP agreement.

The TSP is designed to be used by students who are (a) are enrolled in a degree-seeking four-year program on a full-time basis and (b) do not receive any financial aid.

<tr>
<td>4-year contract</td>
<td>$142,160.00</td>
</tr>
</tbody>
</table>

**TUITION GUARANTEE PLAN (TGP) (Freshmen Only)**

The University of Miami Tuition Guarantee Plan (TGP) is a four-year budgeting plan for families. The TGP allows families to plan for “tuition only” expenses over a four-year period.

The TGP guarantees a pre-determined tuition rate increase for each of the four years and schedules payments over 44 months without interest or finance charges. A non-refundable participation fee of 3% of the plan amount is charged and included in the monthly payments. This payment plan also requires consecutive semester enrollment.

The TGP is designed to be used by students who are (a) first semester freshman; (b) are enrolled in a degree-seeking four-year program on a full-time basis and (c) do not receive any financial aid.
Note:  A) Neither plan above (TSP/TGP) covers intersession classes, housing and/or meal plan charges. These charges must be paid separately.

B) The receipt of any awards noted above will be refunded to the account holder as long as required payments are current. Adjustments to monthly payments will not be processed on either plan as these payment plans will be fixed according to tuition rates in place at the time a contract is issued.

C) As noted below, the contracted amounts for the TGP include both tuition and fees. The TSP is inclusive of tuition only.

TUITION and FEES

Tuition

The basic undergraduate tuition rate covers the normal student load and is increased if the student carries an overload. Private instruction, e.g., music lessons, carries extra charges.

For tuition charges in special programs and sessions, see announcements that are published concerning these components of the University’s academic program.

The following list of charges is effective for the academic year 2009-2010.

**UNDERGRADUATES (ALL COLLEGES AND SCHOOLS)**

</tr>
</tbody>
</table>

Undergraduate students carrying both undergraduate and graduate courses will be charged tuition at the rate in effect for undergraduate credits taken and appropriate fees. For example, tuition for a student carrying a total of 15 credits, of which 3 are graduate and 12 are undergraduate, would be charged at the $17,770.00 rate.

Undergraduate students taking graduate level coursework that is priced at a special level will be billed separately for these courses. Students should check with their advisors and/or the appropriate school’s department for more details on their course pricing requirements.

Full-time fees will be assessed according to student classification as an undergraduate or graduate.

The University reserves the right to change without notice tuition, fees, room and all other charges at the beginning of any academic year, and the right to change activities and board fees at the beginning of any semester.
GRADUATE STUDENTS

| (Pre-Master’s, Post-Master’s, and Doctoral Students per credit | $1,480.00 |
| Research in Residence (720 or 750) or Continuous Registration-Master’s Study (725), per fall/spring semester | $1,480.00 |
| Research in Residence (720 or 750) or Continuous Registration-Master’s Study (725), per summer session (0 Research Credit Courses) | $740.00 |
| Audit Work (No degree credit) Tuition, per course, non-refundable. | $1,480.00 |

The Executive M.B.A. Program officially begins with the Orientation session each year. Tuition charges and deposits are non-refundable after the start of the Program which begins with the Orientation session. Refer to the current brochure for additional information or call (305) 284-2510.

Certain programs are conducted by the University under contract with the State of Florida. Florida residents who have been accepted as students in those contract programs are required to pay current state tuition for each credit hour taken and the state provides the University with additional funds in accordance with the terms of the contracts. Students involved in state contract programs should contact the appropriate school/college to ascertain the state tuition charge per credit hour that they are expected to pay.

Fees

Some fees depend upon full-time status. This is determined by the sum total of semester credits carried by the student in all divisions. Intersession classes are included with regular fall and spring semester classes in determining the student’s full- or part-time status. This determination will also result in the billing of required fees. Fees are subject to change.

Full-time undergraduate students are all students carrying 12 or more credits in a regular semester or five (5) or more credits in a summer session.

Graduate students are classified full-time if they carry nine (9) or more credits in a regular semester or three (3) or more credits in a summer session.

</tr>
</tbody>
</table>

*Summer fees are mandatory for students taking 5 or more credits.

You are not required to have the University sponsored health insurance plan in order to utilize the services of the Student Health Center. During the summer sessions the University Fee is mandatory and is automatically added to tuition for students enrolled for 5 or more credit hours. Students who are enrolled for fewer than five credit hours during the summer must request this fee to be charged to gain access to the Student Health Service.

Students who are not enrolled for the current semester but intend to enroll for the next semester and graduating seniors who want access to the Health Center for the first summer session, can pay the Health Care Fee in order to gain access to the Health Service.

ALUMNI RATE and POLICY

Special Opportunity for UM Graduates

UM graduates may take undergraduate credit courses in the College of Arts and Sciences on a space available basis, at a special alumni rate. All University of Miami graduates are eligible for this special program.

Students may take whatever courses are of interest. From Anthropology to Theatre Arts and all the disciplines in between, participants may choose a course or collection of courses (maximum two courses per discipline) to meet professional or personal goals.

Interested students may call the Division of Continuing and International Education at 305-284-4000 to inquire about the benefit and/or the current tuition rate, request an application, or enroll in the courses. They will submit a simple, no-fee, one-page application, simply select an undergraduate course (open on a space available basis) and be on their way to continued learning at UM.

Policies Governing Enrollment in University of Miami Alumni Status

The University of Miami Alumni Status includes students who are not seeking a degree and meet the following requirements. Enrollment in a non-degree program and/or satisfactory completion of courses does not imply admission to a degree program.

a) University of Miami graduates (completed degree);

b) U.S. citizens or permanent U.S. residents.

I. Conditions applying to University of Miami Alumni enrollment

a) Students may enroll in a maximum of 12 undergraduate credits per semester.
b) Students are limited to two courses per academic department.*
c) Courses may be selected from the College of Arts and Sciences only.
d) International students will not be issued I-20 forms.
e) International students in B-1 (business) or B-2 (pleasure) visa status may engage in study as long as the educational activity is secondary to the principal activity for which the visa was sought.
f) Enrollment may be completed on a space-available basis only. (Course availability determined two days prior to semester start.)
g) Courses taken for undergraduate credit (including 500 level courses) will not be considered for graduate credit at a later date.

*Note: Not all courses and/or departments may be available.

Parking on the University of Miami’s Coral Gables campus is a privilege extended to those using the facilities of the University consistent with the terms of the University’s Motor Vehicle Parking Code and other policies of the University as they are set or amended by the Provost. Parking privileges are extended only to those eligible members of the university community including trustees, faculty, administrators, staff, students, vendors and visitors who have paid for, received and properly displayed a current and valid UM parking permit. In consideration of being allowed to use the University’s facilities for parking, the purchaser of a parking permit agrees to be bound by the rules set forth in the Motor Vehicle Parking Code, and agrees to pay to the University any fine or administrative charge assessed for non-compliance with this code.

Students, faculty, employees, and staff may not park in visitor parking spaces, and UM parking permits are not valid at parking meters.

First year resident students (students residing on the Coral Gables campus who are attending college on a full time basis for the first time) are restricted from purchasing a parking permit to park on the University of Miami’s Coral Gables campus. This policy applies to first year students living in University of Miami student housing on the Coral Gables campus.

Students, other than first year resident students as defined above, should purchase parking permits online in myUM through a charge to their student account, and specify convenient home delivery for a nominal handling/shipping fee. Students may purchase only the permit appropriate to their University domicile: Resident or Discount for an on-campus address; Commuter or Discount for an off-campus address. Annual permits are valid August 1, 2009 through August 15, 2010.
ACADEMIC RESOURCE CENTER

Located on the second floor of the University Center, the Academic Resource Center (ARC) offers free academic assistance to all UM students. The ARC offers individual tutoring by appointment in most subjects, walk-in tutoring in math via the Math Lab, study skills instruction, workshops, and many other valuable services. Please visit www.umarc.miami.edu or call 305-284-2800 to learn more or schedule an appointment.

Tutoring

At the ARC, all UM students can take advantage of free one-on-one peer tutoring to develop a deeper understanding of course work through additional, special, or corrective instruction. All tutoring is course specific and taught by nationally certified tutors. Students are eligible for two hours of tutoring per week for each course. Peer tutoring is available for more than 175 courses. Students may also receive individual tutoring in study skills or participate in a variety of workshops on topics such as time management, note taking, and preparing for midterms and finals.

Academic Workshops

Comprising 30- to 45-minute sessions, this free workshop series is designed to give an overview of various academic resources and methods geared toward improving student success. Workshop topics include reducing test anxiety, test-taking strategies, establishing effective relationships with professors, improving study strategies, and more. Topics are updated every semester, and students may attend unlimited sessions. Schedules are available at the beginning of each semester in the Academic Resource Center or online at www.umarc.miami.edu.

Advanced Academic Methods

Students are invited to make appointments with graduate students who have extensive knowledge of good study strategies and techniques to help students make the most of their study time. These specialists also meet with students to guide them in making good academic decisions. Students meet one on one with an Advanced Academic Methods Specialist, who develops an individualized plan based on the student’s needs. Students can fine-tune and enhance their academic skills in areas such as reading and comprehending college texts, annotation techniques, successful note-taking strategies, time management, and improving organizational skills.

Supplemental Instruction

Small group sessions are available to help students succeed in the University’s toughest courses. Tutoring is done on a weekly basis where students sit down to discuss course content in a small group setting with the tutor serving as a facilitator.

Math Lab

The Math Lab offers assistance with all levels of undergraduate math at no charge to students. Tutoring is available on a walk-in basis during the fall and spring semesters, Monday through Thursday. The Math Lab is staffed by graduate students, graduate teaching assistants, and undergraduate peer tutors. Students can use this
as a quick resource or a place to hold weekly study sessions. Immediate support is always available.
OFFICE OF DISABILITY SERVICES
www.umarc.miami.edu

The Office of Disabilities (ODS) is the primary University office responsible for the coordination of auxiliary aids and services for students with disabilities (Please also see information listed under the Academic Resource Center (ARC). Information is available to prospective and enrolled students, their parents and/or sponsors.

The Americans with Disabilities Act defines an individual with a disability as a person who
a) has a physical or mental impairment which substantially limits one or more of the person’s major life activities,
b) has a record of such an impairment or
c) is regarded as having such an impairment.

Students requesting services must submit current documentation to the Office of Disabilities along with a written request for services. The Office of Disabilities requires that documentation be current (within 3 years) and describe the nature of the disability, include a diagnosis by professionals in the field, outline the history of the disability and the treatment. Documentation should include a description of how the disability relates to the need for services. Auxiliary aids and services are provided on an individual basis, and may include, but are not limited to: letters to instructors outlining accommodation needs, note takers, testing accommodations and assistance with accessibility issues. Students should submit documentation at least one month prior to the start of classes to ensure time for the coordination of services. Academic accommodations are not applied retroactively and may only be provided to students officially registered with the Office of Disability Services. Confidentiality of records is maintained by the Office of Disabilities. Students seeking services should contact Office of Disabilities to discuss individual needs and obtain documentation guidelines specific to their disability.

The Office of Disability Services also reviews documentation for University housing accommodations. Students are required to complete all the necessary applications, pay all deposits, and meet all deadlines set forth by University Housing. Students must then submit documentation to the Office of Disabilities along with a written request for housing accommodations. Students are encouraged to submit requests early or prior to regular housing registration. Requests received after housing assignments have been published may not be considered until the following semester due to availability.

Documentation will only be reviewed once it is complete. Students are notified in writing of the decision. Documentation guidelines may be obtained by contacting the office or visiting our website.

Services of a personal nature (for example, readers for personal use or assistance in eating or dressing) are not provided through ODS. However, ODS counselors may make referrals, where possible, to other offices or agencies that may assist in providing nonacademic or personal services.
Office of Disabilities is located in the Academic Resource Center in Whitten University Center N201. ODS staff can be reached at 284-2374 (Voice), 284-3401 (TDD) or 284-1999 (Fax). Office hours are 8:30 am to 5:00 pm, Monday through Friday. Individuals may email the office staff at disabilityservices@miami.edu for quick responses to questions.

**Office of Disabilities Internal Appeals Procedure:**

The University of Miami, through the Office of Disability Services, has adopted a grievance procedure providing for prompt resolution of complaints by persons who believe they have been subjected to discrimination based upon their disability.

All complaints must be addressed to the University of Miami, Office of Disability Services, P.O. Box 249003, Coral Gables, Florida, 33124 or emailed to disabilityservices@miami.edu to the attention of the director.

1. All complaints must be in writing and must contain the name and address of the Complainant, and set forth specific facts in support of his/her complaint.

2. All grievances must be filed within 90 days of the alleged discriminatory event. If the complaint involves the denial of a student's request for auxiliary aids and services or other modifications, the grievance must be filed within five (5) days after the student receives notification that their request for auxiliary aids and services or other modifications has been denied.

3. An investigation, if appropriate, will be conducted by the Director of the Academic Resource Center (“the Director”) or a designee following receipt of the grievance. The Director may review information and documentation contained in a student's file, academic record and/or any other information an individual may submit in support of his/her grievance.

4. Within ten (10) working days of the receipt of the grievance, the grieving party will receive a written decision from the Director.

5. If the person does not agree with the decision, he/she may submit a final written appeal to the Vice Provost for Undergraduate Affairs or his designee, Ashe Building, Room 240, Coral Gables, Florida, 33124. The written appeal must: specifically state the issues to be considered and set forth “why” the individual disagrees with the Director's decision. This appeal must be received by the Vice Provost's office within ten (10) days of the date of the Director's decision. The individual may not include any new or additional information that was not presented in the initial grievance.

6. Although the University will make every effort to comply with the timelines set forth herein, circumstances such as school breaks, may justify an extension of time.

Retaliation against a person who files a grievance, or opposes a policy he/she believes to be discriminatory is prohibited.
Persons may contact the Assistant Director of Disability Services, who is responsible for coordinating the University's 504 compliance efforts at (305) 284-2374 (P.O. Box 249003, Coral Gables, Florida, 33124), with any questions or concerns.

Individuals, who believe that they were subjected to discrimination on the basis of disability by the University of Miami, are encouraged to use this grievance procedure to resolve their concerns. Individuals may, however, wish to file a complaint directly with the U.S. Department of Education, Office for Civil Rights, 61 Forsyth Street, Suite 19T70, Atlanta, Georgia, 30303 (404) 562-6350.
CANE CARDS

The Cane ID Card is an on campus student identification card. Students, faculty and staff must present appropriate identification when acquiring their card. The Cane ID Card provides access to on-campus student residences, the Otto G. Richter Library, computer laboratories, the swimming pool, the Student Wellness Center (for those who purchase a membership), and other facilities where access has been granted. The Cane ID Card is also used to control lending privileges at the library, access to athletic and other events (fee required), the purchase of discounted Metrorail tickets, and meal plan privileges.

All University of Miami students, faculty and staff are required carry their Cane Cards for identification purposes while on campus.
THE DEPARTMENT OF COMMUTER STUDENT INVOLVEMENT

The Department of Commuter Student Involvement (CSI) is located on the second floor of the University Center, Room 236. This department offers a variety of services and programs for the University of Miami commuter student. For more information, please visit our site at www.miami.edu/csi.

The Association of Commuter (ACS) is a second home for its members; a place to bond with fellow students and to participate in all that the University of Miami has to offer. ACS provides its members with a working knowledge of UM that gives them the opportunity to become fully involved in campus life. Brought together by a simple fact of life, commuting to school, ACS members have forged bonds that extend beyond this common circumstance. If you would like further information on joining this very active student group, please visit their website at http://www.miami.edu/studorgs/acs/.

The Commuter Advisory Board (CAB) is a group of students organized to voice the concerns of the off-campus/commuter to the administration and to plan programs focused specifically for the off-campus community. CAB offers leadership roles to commuter students as well as provides commuter students with information and guidance about off-campus life. CAB organizes the annual Commuter Community Meeting in addition to the Off-Campus Housing and Roommate Fair. If you are interested in joining, please visit the Commuter Student Involvement web site.

Great Start is an overnight, pre-orientation program designed to promote and emphasize college adjustment and campus involvement opportunities. The program's goal is to help you feel like a part of the University and give you a chance to meet other commuter students. Students who participated in Great Start have said the program greatly contributed to a positive transition from high school to college. Several of the participants return to the program to serve as Great Start Counselors. http://www.miami.edu/greatstart
OFF-CAMPUS HOUSING ASSISTANCE

www.miami.edu/housing

The Department of Residence Halls provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

- Individual consultations & appointments
- Over-the-phone guidance
- Knowledge of the greater Miami area & specific neighborhoods where students typically reside
- Roommate search assistance

For more information about assistance with off-campus housing, please see the Department of Residence Halls web page at www.miami.edu/housing. Their office telephone number is (305) 284-4505 and their e-mail address is housing@miami.edu.
COUNSELING CENTER

www.miami.edu/counseling-center

A college experience should be both productive and enjoyable, however, at times it can be stressful and overwhelming.

The Student Counseling Center has personal counselors who can help students effectively cope with the challenges of college life and facilitate learning, growing and socializing. The Counseling Center offers a wide range of services, including short-term individual counseling, career and educational counseling, outreach programs, and various groups aimed at enhancing personal growth and development. The Center is staffed by an experienced team of professionals from the fields of psychology, psychiatry, mental health counseling and social work.

Regular appointments are available Monday through Friday from 9 a.m. to 5 p.m. Students can call the Counseling Center directly at (305)284-5511 or come in person to request appointments. Generally, students can be seen the same day or the next day following their request for an appointment. The University Counseling Center is located in Building 21-R of the Center for Student Services. If a crisis occurs when the Center is closed, counselors can be reached by calling the University of Miami Police department at (305) 284-6666.

SEXUAL ASSAULT RESPONSE TEAM (S.A.R.T.)

The Counseling Center also coordinates the Sexual Assault Response Team (S.A.R.T.). Trained advocates can be reached for support related to a sexual assault at any time during the regular academic year by phoning (305) 798-6666.

STUDENT TRAINING

The Counseling Center participates in the Department of Psychology and the Department of Educational and Psychological Studies graduate training programs by making it possible for doctoral students in psychology to take part in the Center’s professional activities and to have first-hand contact with clinical problems. In addition, interns obtain professional training at the Counseling Center through the Dr. Jess Spirer Predoctoral Internship in Professional Psychology.
OFFICE OF THE DEAN OF STUDENTS - UNDERGRADUATE

www.miami.edu/dean-students

The Dean of Students Office houses the Honor Council and is also responsible for the administration and record keeping of all undergraduate student disciplinary programs. The Dean of Students Office staff advises and directs the efforts of students, faculty and administrators in disciplinary and Honor Code-related concerns.

The Dean of Students Office coordinates The Center for Alcohol and Other Drug Education and oversees the University Chaplains Association. Also, the Dean’s Office plays an integral role in the development of students by advising the Association of Greek Letter Organizations, the National Pan-Hellenic Council, Inc., the Interfraternity Council, the National Association of Latino Fraternal Organizations, Inc., the Panhellenic Association, Rho Lambda National Leadership Recognition Society for Sorority Women, Order of Omega Greek Leadership Honor Society, Gamma Sigma Alpha National Academic Greek Honor Society, Alpha Lambda Delta Freshmen Honor Society, BACCHUS and GAMMA.

The Dean of Students Office coordinates efforts in response to various student crises. Along with the Deans, the staff includes a Licensed Clinical Social Worker. The entire staff is knowledgeable and prepared to assist all students in their adjustments to campus life.

The Dean of Student Office is located in Building 21 (Center for Student Services), Suite H, (305) 284-5353.
GENERAL CAREER SERVICES

TOPPEL CAREER CENTER
www.miami.edu/toppel

The Toppel Career Center, located in the Whitten University Center, assists undergraduate students, graduate students and alumni in formulating their career plans and in pursuing graduate/professional school as well as full-time and internship opportunities.

It is the intent and desire of the University of Miami and the Toppel Career Center to provide equal employment opportunities for students and graduates regardless of race, color, national origin, religion, gender, sexual orientation, age or disabilities.

INDIVIDUAL CAREER ADVISING SESSIONS with professional career advisors are available to assist students with career questions, issues and concerns. Students are encouraged to meet with a professional staff member to discuss career goals and to obtain assistance in developing a career action plan (please call to make an appointment).

WALK-IN ADVISING is a service provided to students and alumni who need assistance with developing their resume and/or cover letter. No appointment is necessary for Walk-In advising - simply stop by Toppel Monday through Thursday, 10am - 4pm.

A series of PROGRAMS is offered throughout the academic year. Each session provides information and skill-building activities in the areas of resume development, interviewing skills, networking, securing internships, and much more.

THE TOPPEL INTERNSHIP PROGRAM is designed to provide valuable career-related work experience through internships with participating employers. Students can search CaneZone for hundreds of opportunities available to them. It is recommended that students complete at least two internships while in school. Students may take on an internship position beginning the second semester of their freshman year. The Toppel Internship Program can provide a zero-credit transcript notation that will be visible on University of Miami transcripts. Participating students will be registered for a course (UMI, University of Miami Internship) that will allow work experience related to major, career path, or possible career path/interest.

ON CAMPUS RECRUITING (OCR): Representatives from local, national and international businesses and industries, governmental agencies, military services, human services, and school systems visit the campus to meet with students and to interview and discuss career employment opportunities with graduating students and alumni. Individual interviews are scheduled with visiting employer representatives.

CAREER EXPOS AND EVENTS are open to all students and alumni and range from general events to major-specific fairs. CAREER EXPO is held twice a year - September 16, 2009 and February 10, 2010 - and is inclusive of all industries and majors. Special CAREER FAIRS are held for interested students in Accounting, Architecture, Education, Nursing and Health Sciences, Non-profit/Government, and Green Careers. Regardless of the focus, these EXPOS and FAIRS are intended to
provide students and alumni with an opportunity to network with recruiters from a wide variety of industries.

**CAREER LIBRARY RESOURCES:** The Toppel Career Center has established a comprehensive and current career resource and research facility, which contains career-related materials for use by University students and alumni in areas such as regional employment opportunities, salary surveys, descriptions of specific careers and the preparation necessary to attain them. Resource areas include:

- Job Postings
- Magazines and Periodicals
- Newspapers
- Career Resource Books
- Full and Part-time Job Binders

**A COMPUTER LAB** enables students to work on their job and internship search. CaneZone our Career Management System, an internet-based program, allows students to create a career profile, upload resumes, search for jobs and internships, and sign up for on-campus interviews. Students/alumni can also utilize TypeFocus, a computerized career information system, which is an excellent tool for career decision-making.

**The TIP Program** allows students who have already secured an internship a zero-credit transcript notation from the Toppel Career Center. The University of Miami Internship (UMI) course is offered fall, spring, and summer, and will allow you to have work experience related to your major, career path, or possible career path/interest and it will provide recognition of the internship experience on your official transcript. Part-time internships require at least 160 working hours while full-time internships require at least 320 working hours.

**The Launch Pad** is a career guidance component of the Toppel Career Center, providing resources to entrepreneurs and inventors at the University of Miami. They provide weekly information sessions and networking events, one-on-one facilitation to help students and alumni launch their ventures or help their companies grow, a venture coaching program, and an opportunity to join the Launch Pad Network, which will help you network with fellow entrepreneurs and inventors.
THE HONOR COUNCIL – UNDERGRADUATE

www.miami.edu/honor-council

The Honor Council is a standing committee of 29 undergraduate student representatives who are responsible for educating the University community on Honor Code related issues. The members promote academic integrity through a variety of educational programs and also investigate and adjudicate alleged violations of the Undergraduate Student Honor Code.

The purpose of the Honor Code is to protect the academic integrity of the University by encouraging consistent ethical behavior in assigned course work by students. Members of the University community who would like to request Honor Council programming or investigation of alleged academic dishonesty are encouraged to call the Secretary of the Honor Council at 284-5353.
THE DEPARTMENT OF INTERNATIONAL STUDENT AND SCHOLAR SERVICES (ISSS)

The Department of International Student and Scholar Services (ISSS) represents the needs and interests of the University of Miami international community and provides support services and programs for international students, scholars, observers and academic departments at UM. Over 1500 international students (undergraduate and graduate), 335 international scholars (professors and researchers), and 590 international observers from approximately 113 countries are studying, teaching, conducting research and observing at UM.

International students and scholars face some unique challenges as well as opportunities while pursuing their academic goals at UM. The professional and dedicated ISSS staff provides expert advice, services, programs, and information aimed at supporting their educational endeavors and enriching their U.S. experience over the entire course of their stay. ISSS support services and programs encompass:

- Pre-Arrival Information
- International Student Orientation
- International Scholar Orientation
- Immigration Advising for Students and Scholars in F-1 and J-1 Status
- Employment Information and Authorization
- CINTAX Online Tax Preparation Program
- Federal Income Tax Session
- Liaison with Sponsoring Embassies, Government and Agencies
- Short-Term, Small Emergency Loans
- Assistance with Personal and Adjustment Problems
- Assistance in Coping with Crises
- Advocacy
- Host-Family/Friends Program (HFFP)
- International Spouses Club (ISC)
- Advisory Committee of International Students (ACIS)
- Support for COISO: International Student Club and Cultural Student Clubs

On the ISSS website you will find detailed information regarding each of these services and programs. Please do not hesitate to contact us should you have any questions or require additional information. Our contact information is provided below. We look forward to assisting you.

LIBRARIES

The University of Miami Libraries provide support and services for students, faculty and staff. Please visit their website for detailed information.
OMBUDSPERSON AND UNIVERSITY TROUBLESHOOTERS PROGRAM

www.miami.edu/ombudsperson

The Ombudsperson acts as an independent representative of the University to listen to student grievances and complaints. The Ombudsperson listens to the concern, investigates the facts and attempts to resolve situations in the best possible way. The Ombudsperson neither makes University policy nor overrides it. However, because of extensive knowledge of the University, the Ombudsperson is in a position to interpret University policy to students and make recommendations to the central administration when policy changes are needed. The Ombudsperson expedites the decision-making process within the University and ensures that the University follows its own published policies and procedures.

The Ombudsperson Program was not established to bypass or circumvent those individuals who have responsibility for departments or classroom instruction. Nor is the Ombudsperson Program designed to eliminate certain structured grievance and appellate mechanisms already established by the University. Each academic department and each administrative unit has established a contact person, known as a University Troubleshooter, to assist students with academic and administrative related matters. These University Troubleshooters are faculty members and administrators who serve as a resource for students seeking assistance.

Academic Troubleshooters

Administrative Troubleshooters

When regular channels have not brought resolution to your problem and after you have spoken to the appropriate University Troubleshooter, you should contact the appropriate Ombudsperson. The Ombudsperson seeks to resolve matters informally before they become matters in a formal grievance-appeal proceeding and assists students in reestablishing communication with the person or persons with whom a complaint may have been filed.

The University Ombudsperson is Dr. Gail Cole-Avent. Academic cases are addressed by the Academic Ombudsperson, V. Chunoo. To access the University of Miami Ombudsperson and University Troubleshooters program, contact the Office of the Vice President for Student Affairs, Ashe Administration Building Room 244, or 305-284-4922. For more information, visit www.miami.edu/ombudsperson. Concerns may be submitted through an online form located on that website.
UNIVERSITY HOUSING/RESIDENCE LIFE
www.miami.edu/housing

The University of Miami offers undergraduate on-campus housing in five residential colleges, an apartment area consisting of seven buildings, and University Village that is comprised of seven buildings and two parking garages.

Each residential college has resident faculty members (Masters and Associate Masters), a student affairs professional staff member (Residence Coordinator) and student staff who live in the residential college with the resident students to support and promote student well-being, safety, academic achievement, student learning, and development. In addition, numerous social, educational, cultural, and recreational programs are offered throughout the academic year.

Special Interest Housing (SIH) is also available within the residential college system—existing programs, La Casa-The International Quarter and STRIVE, center around international languages & cultural immersion and volunteerism & leadership development. Additionally, for 2009-2010, three new SIH programs have been established (Canes Advocating a Substance Temperate Living Environment [CASTLE], Greeks at the U, and U Live U Learn) which consist of themes related to supporting a substance free lifestyle, developing a united community from various Greek organizations, and the promotion of academic exploration.

- The University has both single and double rooms. Singles are assigned based on seniority living on campus and, thus, entering students are assigned to double occupancy rooms. Effort is taken to assign roommates of similar age, class standing, and smoking preference.

- All non-local freshmen students are required to live in University housing for two academic semesters, as long as space is available. This policy does not apply to freshmen students living with parents or legal guardians in Miami-Dade or Broward Counties.

- The Apartment Area on campus offers two and three bedroom furnished apartments housing four to six students per apartment. Junior standing or above is required to reside in the Apartment Area.

- University Village, which is an apartment-style residential community with 12-month agreements, is an available option to juniors and seniors. The apartments are fully furnished and include in-apartment washers and dryers, full-size kitchen appliances (stove, refrigerator, microwave, & dishwasher), and free reserved parking. For general information on University Village, go on the web to http://www.miami.edu/universityvillage.

- All housing facilities are co-educational with men and women living on alternate floors or alternating separate suites or apartments.
All residential college rooms and apartment bedrooms are air-conditioned and equipped with a bed, dresser, desk, chair, trash can, and window coverings. 75+-channel cable television and local telephone service are also provided. Each residential college room and University Village bedroom is wired for internet access and wireless internet access is available in the Apartment Area.

Admitted undergraduate students, following verification of acceptance to the University and payment of the enrollment deposit, can apply for housing on-line in myUM. myUM is the University’s web-based, interactive information hub.

- Students are encouraged to apply for housing as soon as possible after paying the enrollment deposit. New freshmen housing applications should be submitted by May 1, 2009; applications received from new freshmen after May 1, 2009 will be accommodated on a space available basis.
- The $250 non-refundable deposit can be paid by credit card or electronic debit from a checking account at the time of application.
- Assignments to buildings, rooms, and specific roommates are made according to the date of application and receipt of the housing deposit.
- Whenever possible, requests for specific buildings, rooms, and roommates are honored. However, if specific preferences are not available, the University reserves the right to assign students to other locations and roommates.

The 2009-2010 housing agreement is for both fall and spring semesters (12-month annual agreement for University Village), unless the applicant is:

1. applying only for spring semester housing (not available in University Village)
2. applying only for summer session housing
3. graduating in December (and May as well for University Village)
4. participating in a University of Miami study abroad experience spring semester (or summer for University Village)
5. not enrolling in the University spring semester (or for subsequent fall semester in University Village)

Housing cancellations received through May 31, 2009 will result in the forfeiture of the $250 housing deposit. Cancellations received after May 31, 2009 will result in:
- the forfeiture of the $250 housing deposit; plus
- the canceling student remaining responsible for the fall semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student

*Note: Written notice of cancellations must be made to the Department of Residence Halls Office directly.

The dates of housing availability are:
- Fall Semester August 19, 2009 - December 18, 2009
- Spring Semester January 12, 2010 - May 15, 2010
The Department of Residence Halls also provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

- Individual consultations and appointments
- Over-the-phone guidance
- Knowledge of the greater Miami area & specific neighborhoods where students typically reside
- Roommate search assistance

For more information about housing on campus or assistance with off-campus housing, please see the Department of Residence Halls web page at www.miami.edu/housing. Their office telephone number is (305) 284-4505 and their e-mail address is housing@miami.edu.
STUDENT HEALTH SERVICE

The Student Health Service provides primary care, specialty care and pharmacy services to eligible University of Miami students. You are not required to have the Health Center sponsored insurance plan to utilize their services. Most services are available on a “drop-in” basis and many are provided free of charge. Appointments are available for specialty care and other services, if preferred.

The Student Health Service is located at 5513 Merrick Drive, Coral Gables, Florida 33146, (across from the Pavia Garage).

Contact numbers are:
Telephone: (305) 284-9100/Fax: (305) 284-4098

Hours of operation:
Fall and Spring semesters: 8:30 a.m. to 5:00 p.m., Mondays, Tuesdays, Wednesdays and Fridays. On Thursdays: 9:00 a.m. to 5:00 p.m. Sundays: 12:00 Noon until 4:00pm
Winter break, Spring break, and Summer sessions: Monday through Friday from 9:00 a.m. to 4:30 p.m.

The Health Service is closed on Saturdays and University holidays. After hours assistance is available by calling (305) 284-9100.

For sudden, severe illness or serious accident dial 911. For illnesses or injuries requiring immediate attention, students are urged to go to an Emergency Room. After hours assistance for urgent situations can be obtained by dialing (305) 284-9100. Students with UnitedHealthcare insurance may also contact the UnitedHealthcare Nurseline by calling (800) 436-7709 and selecting the Health Resources option. For less urgent conditions, you may visit one of the local Urgent Care Centers.

HEALTH INSURANCE

Domestic students enrolled in six or more credit hours per semester (or considered full time) are required to obtain adequate health insurance (see exceptions). The annual premium for the health insurance plan offered through the Student Health Service is added to each student's fees. Domestic students with adequate alternative coverage may request cancellation of the insurance fee via myUM. Insurance cancellation must be renewed each year via myUM.

Deadlines to waive the insurance are:
July 25 for the Fall semester,
January 25 for the Spring semester,
April 25 for Summer I,
June 25 for Summer II.

Domestic students can check the status of their insurance waiver/cancellation request via myUM. The insurance premium will be prorated for those students entering for the first time in the Spring or Summer semesters. No waiver and/or refund will be granted after the above dates.
Students who have previously waived the insurance charge can reinstate the insurance prior to the Spring semester or first Summer session by completing the reinstatement request form and checklist. Coverage can also be reinitiated at the start of the Fall semester by choosing not to re-waive the charge, or at other times during the academic year, if within 30 days of termination of other similar coverage, by completing the reinstatement request form and checklist. Documentation of termination may be requested.

Deadline for reinstatement of insurance is January 25th for the Spring. Please do not consider your reinstatement complete until reinstatement has been verified via myUM, the charge has been posted to your student account and all charges on your account have been paid.

All international students are required to enroll in the University sponsored health insurance program. The annual premium for this coverage is added to each student's fees.

Any additional questions regarding the health insurance requirement should be directed to the Student Health Service at 305-284-9100 or to studenthealth@miami.edu.

**IMMUNIZATION**

All new students are required to provide proof of immunization against measles, mumps and rubella. All new students must also provide proof of immunization against hepatitis B and meningococcal meningitis or sign a waiver declining these immunizations. An immunization form must be completed and returned to the Student Health Service prior to arrival on campus. For students less than 18 years old, the meningitis/hepatitis vaccine waivers must be signed by a parent or legal guardian.

All international students must also be screened for tuberculosis by completing page two of the immunization form.

Deadlines for submission of immunization records are Fall - August 22nd, Spring - January 15th, Summer - April 15th. Failure to comply with this requirement will interfere with registration. A $50.00 processing fee will be charged for any form received after the start of the semester. Forms will be processed within 48 hours of receipt, and immunization status can be verified via myUM.

Most students will be able to obtain the required immunization information from their prior medical providers or from their prior high school, college or university. Students who believe that they were previously immunized but are unable to provide proof of immunization may either obtain blood tests confirming immunity or obtain the necessary immunizations. Immunizations and blood tests documenting immunity are available at the Student Health Service. All charges are in addition to processing fees for late forms.

Immunization against varicella (chicken pox) and tetanus/diphtheria/pertussis are also suggested and are available at the Student Health Service for reasonable charges.

All students living on campus will also be asked to document receipt of hepatitis B and meningococcal meningitis immunizations, or to acknowledge both receipt of
information about these vaccines and preference against immunization, as part of the housing sign-up process.

**PHARMACY**

The pharmacy is located on the second floor of the Student Health Service, and can fill prescriptions from most local and out of town medical providers.

Prescription prices are often lower than at local drug stores, and most insurance plans are accepted. For students with the Student Health Service sponsored UnitedHealthcare insurance plan, low cost generic medications are available at the Student Health Service Pharmacy. Non-prescription medications, vitamins, nutritional supplements, personal care products, over-the-counter medications, and condoms are also available. New prescriptions can be dropped off or called or faxed by the ordering provider. Refill requests will be handled most promptly by having your prescription number available and calling the automated refill line at (305) 284-5922. Refills can also be requested via myUM.

- Students, spouses, and dependents may have their prescriptions filled at the Health Service pharmacy.
- Students with the Health Service sponsored insurance plan receive enhanced benefits if prescriptions are filled at the Health Service pharmacy.

Pharmacy telephone: (305) 284-5922; fax: (305) 284-4883.

Hours of operation:
Fall and Spring semesters are from 9:00 a.m. to 5:30 p.m., Monday through Friday. Winter break, Spring break, and Summer sessions, 9:00 a.m. to 5:00 p.m. Monday through Friday.

The pharmacy is closed on Saturdays, Sundays, and on University holidays.
UNIVERSITY DINING SERVICES

The University of Miami Dining Services program offers students a variety of food options conveniently located throughout the campus. Among these are the:

- **Hurricane Food Court** - featuring varied concepts including several well known national brands;
- **Sbarro** - a poolside Italian eatery;
- **Wellness Center Juice Bar** - featuring a variety of healthy food options;
- **Jenkins Snack Bar** – the perfect spot to grab a quick bite at the School of Business;
- **The Oasis** – our newest concept specializing in kosher deli products;
- **C-Store** – a full service convenience store;
- **Starbucks at Richter Library** – your favorite specialty coffee;
- **Carts** – for your convenience around campus.
- **University Village C-Store** – providing UV residents all your convenience store needs.

The University of Miami Dining Services program offers a variety of services that meet the individual student’s schedule of classes and extracurricular activities. Five different meal plan options are offered at the Hecht/Stanford and Mahoney/Pearson Cafeteria:

- 20-meal plan providing any 20 meals per week;
- 14-meal plan providing any 14 meals per week;
- 8-Kosher Plus meal plan providing any 8 meals per week;
- 8-meal plan providing any 8 meals per week;
- 5-meal plan providing any 5 meals per week;

Enrollment in any of the residential colleges (excluding Apartments and University Village) requires participation in either the 8, 8-Kosher Plus, 14, or 20 meal plans.
- Freshmen must choose from the 20, 14, or 8-Kosher Plus Meal Plans only.
- The 5-meal plan is open to Commuter, Apartment area or University Village students only. This plan provides five meals per week.
- Graduate and undergraduate students who are 25 or older as of September 1 of the contract year are excluded from this requirement.
- Apartment, commuter, and other students not enrolled in the residential colleges may participate in any meal plan.
- All meal plans are available seven days a week. Students have the opportunity to eat meals five times a day up to their weekly meal total.

Dining Dollars

- Dining Dollars provided with the meal plan may be used in approved food service locations for food purchases only. Usage is limited to $20 per day.
- Unused Dining Dollars at the end of the Fall Semester will carry into the Spring Semester.
- Unused Dining Dollars at the end of the Spring Semester are forfeited.
- Dining Dollars may be used at the Hurricane Food Court, Carts, The Oasis, Sbarro, Convenience Store, UV C-Store, Rathskeller, Subway, Jenkins Snack Bar, Starbucks, BankUnited Center and Wellness Center Juice Bar.
Dining Services Contract

- The Dining Services contract begins with the first meal of Fall Semester and extends through the last meal of Spring Semester.
- The student indicates choice of meal program on the Dining Contract or via myUM.
- The student’s signature on the Dining Contract or election via myUM signifies acceptance of that board plan for the period indicated.
- Students who do not enroll in any of the meal plans will be force enrolled. All terms and conditions will be binding upon the student.
- Meals are not served when the University is not in session, during official University vacation periods, or between semesters.
- The entire semester amount must be paid in full at the same time students pay other registration costs (tuition and fees) during or before the first week of classes.
- All students may make changes to their meal plan within the first week of the semester by notifying the Department of Dining Services or via myUM.
- Changes made to meal plans for the Spring Semester will be assessed a $40 processing fee.
- Charges will be prorated up to the end of the week.
- Meal plan weeks run Monday through Sunday.
- Releases will be subject to a $300 penalty plus full charges through the week of cancellation, and may result in a Dining Dollars surcharge fee.
- Approval is obtained solely through the Department of Dining Services.
- The University reserves the right to terminate the contract by written notice if a student fails to comply with any of the terms and conditions of the contract and all other University and Dining Services rules and regulations.

For more information on Dining Services write to University of Miami, Dining Services, P.O. Box 248106, Coral Gables, FL 33124-6909, call Dining Services at 305-284-3584, email diningservices@miami.edu or visit www.miami.edu/dining-services.
HONORS PROGRAMS

In 1957 the faculty of the University of Miami established the General Honors Program to provide an academically challenging course of study for outstanding students. The program was later expanded by the addition of departmental honors. Students who satisfactorily complete the requirements for general and/or departmental honors are graduated with General Honors and/or Departmental Honors; the award is noted on the graduates diploma and official transcript.

GENERAL HONORS PROGRAM

Over the past four decades since its foundation, the General Honors Program has grown. The program coordinates courses and sections each semester at the introductory through advanced levels, in a wide variety of fields in all colleges and schools of the University. In general, Honors courses are small classes taught as seminars with emphasis on interactive learning and discussion.

ADMISSION TO GENERAL HONORS

The University of Miami Honors Programs takes the initiative to invite the top 10% of the entering freshman class to join the General Honors Program. On receipt of an invitation, there is no further action required on the part of the student.

RETENTION AND REQUIREMENTS FOR GRADUATION WITH GENERAL HONORS

To remain in the General Honors Program a student must maintain an overall academic average of 3.500 and complete at least two Honors courses (six credits) per academic year.

To graduate with General Honors, a student must satisfy at least 24 credits in General Honors courses with a grade of “B” or better and have an overall grade point average of 3.500. Twelve of the 24 credits must be in courses at the 200 level or above. No more than 12 credits in the student’s major may be counted toward the 24 credits in General Honors.

WITHDRAWAL, DISMISSAL, AND REINSTATEMENT TO GENERAL HONORS

Students may withdraw from the program at any time at their discretion. They should notify the Honors Office in writing of their intention to withdraw. Honors students grade point averages and general performance are reviewed each academic year. Any student who fails to maintain the required cumulative grade point average or fails to take the required number of Honors credits will be excused from the program. Students may re-enter the program when their grade point average reaches 3.500; however, students must inform the Honors Office of the improved average and of their interest in re-entering the program.

DEPARTMENTAL HONORS PROGRAM

Among the departments offering approved programs for honors study at the junior-senior level for both majors and elective students are American studies, art and art history, biochemistry and molecular biology, biology, business administration, chemistry, computer science, engineering, English, finance, French, German, history, international finance and marketing, international studies, Judaic Studies, marine science, mathematics, meteorology,
microbiology and immunology, philosophy, political science, psychology, religious studies, sociology, Spanish, and women’s and gender studies. Admission into the program is by invitation, but any student who believes himself or herself qualified may apply to the Chairman or the Departmental Honors Advisor of the major department, preferably during the sophomore or early junior year. Upon successful completion of the required program and with approval by the faculty of the department, the notation Departmental Honors in ... is included in the candidate’s diploma and transcript.

Departmental Honors Programs are designed primarily to provide an opportunity for the superior student to intensify and deepen his or her knowledge of the major, to permit closer associations with professors in the student's area of concentration, and to prepare the student for research, thesis preparation, and other work at the graduate level in the major areas.

Minimal requirements for graduation with Departmental Honors are:
1. an over-all average of at least 3.300;
2. six credit hours or more in independent study, senior thesis, or designated advanced or special honors courses specified by the department, with grades of at least B;
3. an average in the major of at least 3.500.

Some departments specify additional requirements; the prospective Departmental Honors student should confer with the Honors Advisor within the department about specific requirements.

The College of Engineering offers a professionally oriented honors program which is described in their respective listing elsewhere in the Bulletin.

**FOOTE FELLOWS PROGRAM**

The Foote Fellows program, established in honor of former University of Miami President, Edward T. Foote II, each year allows a highly select group of incoming first-year undergraduate students an opportunity to explore a wide range of academic pursuits and interests across the curriculum. Foote Fellows, while completing specific requirements for their individual school or college, are exempted from university general education requirements. They also receive special academic mentoring and the opportunity to participate in many special education events and cultural activities.

**Honors Program in Exercise Physiology (HPEP)**

The Department of Exercise and Sport Sciences offers a 5-year program for promising students majoring in Exercise Physiology. Very highly qualified students are eligible to complete an accelerated 4-year program leading to a Bachelor of Science degree in Exercise Physiology followed by one additional year of graduate coursework.

The additional year of study will enable students to complete all requirements leading to a Master of Science degree in Exercise Physiology in the School of Education, (M.S. Ed.), in 5 years. To be considered applicants must be in the top 10% of their high school graduating class. Students must have a minimum SAT score of 1300 or an ACT score of 30 and an Unweighted GPA of 3.75. The HPEP application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.
HONORS PROGRAM IN LATIN AMERICAN STUDIES (HPLA)
The Honors Program in Latin American Studies (HPLA) is a dual degree program that allows students to receive a Bachelor of Arts and Master of Arts in five years following a rigorous, efficient, accelerated curriculum. This highly selective group of students will enjoy close faculty mentoring and the opportunity to engage in specialized research projects with faculty. Students will receive first-hand experience in their regions of focus by studying abroad. Most study abroad opportunities are for duration of six months. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Latin American Studies. The HPLA application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN MARINE GEOLOGY (HPMG)
The Honors Program in Marine Geology (HPMG) allows exceptional students to pursue an accelerated program in the undergraduate Geological Sciences and graduate Marine Geology and Geophysics programs. The degree consists of an undergraduate Bachelor of Sciences degree in Geological Sciences from the College of Arts and Sciences, combined with a graduate Master of Science degree from the Division of Marine Geology and Geophysics at the University of Miami Rosenstiel School of Marine and Atmospheric Science. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Marine Geology. The HPMG application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN MEDICINE (HPME)
The Honors Program in Medicine (HPME) provides an opportunity for outstanding high school seniors who are seeking careers in medicine or medical science to obtain the Bachelor of Science and Doctor of Medicine degrees in seven or eight years.

This program has been designed by the School of Medicine and the College of Arts and Sciences. It provides a plan whereby students entering the University of Miami are admitted simultaneously into the Honors Program and a special Privileged Studies Program in the College of Arts and Sciences which allows HPME students to participate in an enriched and challenging curricular experience without the strictures of conventional distribution requirements. HPME students are secure in the knowledge that they will have a place in the University of Miami School of Medicine as early as three years hence provided they maintain a cumulative grade point average of 3.700 in the sciences as well as an overall 3.700 GPA.
Applicants must have had in high school, or be in the process of completing at the time of application, four years each of English and mathematics and one year each of biology, chemistry, and physics. A course in calculus must be taken before beginning the program. Applicants who would like to be considered must have minimum scores of 1400 on the SAT I (or 32 ACT), be in the top 5% of their high school graduating class and have an unweighted GPA of 3.750. College Entrance Examination SAT II Subject Tests must be taken in mathematics, and either biology, chemistry, or physics and have a minimum score of 600. These tests must be taken no later than the October testing date of the applicant’s senior year in high school. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Medicine. The HPME application form and all supporting materials must be submitted by November 1 of the applicant’s senior year. A review of completed applications will begin by the end of November. Selected applicants will be invited for an on-campus interview with a member of the HPME Admission Committee.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN PHYSICAL THERAPY (HPPT)

The University of Miami offers the Honors Program in Physical Therapy to high school graduates with high academic ability and achievement seeking careers in physical therapy. Participants may earn both the Bachelor of Science in Health Science (B.S.H.S.) and the Doctor of Physical Therapy (DPT) degrees in a six-year accelerated program, rather than the customary seven years.

The Honors Program in Physical Therapy is a cooperative venture of the School of Nursing and Health Studies and the School of Medicine, with students majoring in Health Sciences. Students pursue an enriched and highly challenging undergraduate curriculum, secure in the knowledge that they will have a place in the graduate physical therapy program after successful completion of three years of pre-physical therapy curriculum.

Applicants must be in the top 10% of their class and have a minimum SAT I score of 1360 (or ACT 31). These tests must be taken no later than the December testing date of the applicant’s senior year in high school. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Physical Therapy. The Honors Program in Physical Therapy application form and all supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN LAW (HPLW)

The University of Miami offers the Honors Program in Law (HPLW) which allows excellent students with high academic ability to gain admission to both undergraduate study and to graduate study in the law school. Such an achievement eliminates the pressure of applying to law school and gives qualified students the chance to complete both Bachelor’s and Jurist Doctorate degree in 6 years. Applicants who wish to be considered for admission must be high school seniors in the top 5% of their class, have a minimum SAT I score of 1400 or (ACT 32) and an unweighted GPA of 3.750. In addition to the regular Application for
Admission to the University, the applicant must complete a separate application form for the Honors Program in Law. The HPLW application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address. www.miami.edu/dualdegree.

COURSES OFFERED IN HONORS - Dept. Code: HON

A list of these courses varies from semester to semester; an accurate list of offerings for a particular semester may be obtained from the Honors Program website (www.miami.edu/honorsprogram) or myUM.

HONOR SOCIETIES

The following honor societies have chapters at the University of Miami:

Alpha Epsilon Delta (Pre-Med)
Alpha Epsilon Rho (Broadcasting)
Alpha Kappa Delta (Sociology)
Alpha Lambda Delta (Freshmen General Scholarship)
Alpha Pi Mu (Industrial Engineering)
Alpha Psi Sigma (Criminology)
Alpha Rho Chi (Architecture)
Beta Alpha Psi (Accounting)
Beta Beta Beta (Biology)
Beta Gamma Sigma (Business)
Chi Epsilon (Civil, Architectural and Environmental Engineering)
Eta Kappa Nu (Electrical and Computer Engineering)
Golden Key National Honor Society (General Scholarship)
Honors Students’ Association (General Scholarship)
Mortar Board (General Scholarship)
Omicron Delta Kappa (General Scholarship)
Phi Alpha Delta (Pre-Legal)
Phi Alpha Epsilon (Engineering)
Phi Alpha Theta (History)
Phi Beta Kappa (General Scholarship)
Phi Kappa Phi (General Scholarship)
Phi Lambda Pi (General Scholarship)
Phi Sigma Tau (Philosophy)
Pi Delta Phi (French)
Pi Kappa Lambda (Music and Music Education)
Pi Tau Sigma (Mechanical and Aerospace Engineering)
Psi Chi (Psychology)
Rho Rho Rho (Marine Science)
Sigma Delta Pi (Spanish)
Sigma Gamma Epsilon (Geological Sciences)
Sigma Pi Sigma (Physics)
Sigma Tau Delta (International English)
Sigma Theta Tau (Nursing)
Tau Beta Pi (Engineering)
Tau Sigma Delta (Architecture)
Theta Alpha Kappa (Religious Studies)

UNIVERSITY EXPERIENCE – DEPT CODE: UMX
UMX 101, 102, 104, 105, 106, 107, 109, 110, and 112. University Experience
1 cr. – Offered Fall

The courses are designed to promote a positive transition to university life; to facilitate a positive University of Miami experience; to foster community building and collegial networking; to provide information about campus resources; and to achieve success at UM and beyond. Sections will have particular emphasis on a particular academic theme. Special groupings include: general, athletes, psychology and neurobiology, international, nursing, education, sports and wellness, undecided arts & sciences, and pre-law/pre-MBA. Classes include both lecture and small group seminar meetings. Prerequisite: None; free elective. Not for major, minor, or required area of study requirement.

UMX 101. University Experience – General
1 credit Offered Fall and Spring Semesters
This course is designed to promote a positive transition to UM; to give students the information they will need to maximize their UM experience; and to foster community building and networking.

UMX 102. University of Miami Experience – Athletes
1 credit Offered Fall Semester
This course is designed to facilitate student athletes in the development and enhancement of academic and life skills for success in the university setting and beyond. Students will learn how to utilize existing campus resources to achieve their academic and personal goals.

UMX 104. University of Miami Experience – Psychology and NeuroBiology Majors
1 credit Offered Fall Semester
This course is designed to ease the transition to college life; to give freshman the information they will need to maximize their undergraduate experience; and to foster community building and networking within the psychology department.

UMX 105. University of Miami Experience – International Students
1 credit Offered Fall Semester
To promote a positive adjustment to university life; to facilitate a positive University of Miami experience; to foster community building and collegial networking; to provide information about campus resources; and to achieve success at UM and beyond. This course has a particular emphasis on the needs of an international student.

UMX 106. University of Miami Experience – Nursing/Health Science Majors
1 credit Offered Fall Semester
To promote a positive adjustment to university life; to facilitate a positive University of Miami experience; to foster community building and collegial networking; to provide information about campus resources; and to achieve success at UM and beyond. This course has a particular emphasis on the needs of a nursing/health science major.

UMX 107. University of Miami Experience – Education Majors
1 credit Offered Fall Semester
To promote a positive adjustment to university life; to facilitate a positive University of Miami experience; to foster community building and collegial networking; to provide information about campus resources; and to achieve success at UM and beyond. This course has a particular emphasis on the needs of an education major.

**UMX 109. University of Miami Experience – Sports and Wellness**  
1 credit  
Offered Fall Semester  
To promote a positive adjustment to university life; to facilitate a positive University of Miami experience; to foster community building and collegial networking; to provide information about campus resources; and to achieve success at UM and beyond. This course has a particular emphasis on sports and wellness.

**UMX 110. University Experience – Undecided Arts and Sciences**  
1 credit  
Offered Fall and Spring Semesters  
This course is designed to maximize a student’s potential to achieve academic success; to adjust responsively to the individual and interpersonal challenges of life at UM; and to foster community building and networking within the University.

**UMX 112. University of Miami Experience – Business Majors, Pre-Law/Pre-MBA**  
1 credit  
Offered Fall Semester  
To promote a positive adjustment to university life; to facilitate a positive University of Miami experience; to foster community building and collegial networking; to provide information about campus resources; and to achieve success at UM and beyond. This course has a particular emphasis on business majors who plan to pursue law school or an MBA.

**Freshman Seminars**  
FFA 190-199. Freshman Seminars in Arts  
FLT 190-199. Freshman Seminars in Literature  
FNS 190-199. Freshman Seminars in Natural Science  
FPR 190-199. Freshman Seminars in Philosophy/Religion  
FSS 190-199. Freshman Seminars in the Social Sciences

Conceived as alternatives to standard freshman survey courses, Freshman Seminars offer a limited number of students a small class focused on a specific topic. The seminars are interdisciplinary in nature and/or experimental in subject and design. Seminars are taught by distinguished faculty from a wide variety of academic disciplines. No student may take more than one. Freshman Seminars are 3 credit courses that may be used to fulfill general education requirements in natural sciences, social sciences, or humanities (literature, fine arts, philosophy, and religion).
RESEARCH AND SPONSORED PROGRAMS

OAK RIDGE ASSOCIATED UNIVERSITIES
Since 1956, students and faculty of the University of Miami have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 91 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers. For more information about ORAU and its programs, contact Dr. Helena Solo-Gabriele, ORAU Councilor for University of Miami at 305-284-2908; or contact Ms. Monnie E. Champion, ORAU Corporate Secretary, at 865-576-3306; or visit the ORAU Home Page (http://www.orau.org).

PATENT AND COPYRIGHT REGULATIONS
Discoveries or inventions, whether or not subject to patent or copyright, developed by students as a result of research done or in connection with theses, dissertations or problems pertaining thereto, or as a result of a program of research financed wholly or in part by University funds, or by funds under the control of the University shall be the exclusive property of the University except as may be otherwise required by the terms of research grants or contracts. The University Patent and Copyright policy provides for the inventor(s) to share in any royalties received for any patented or patentable discovery or invention in which the University has a property interest. Any such discovery or invention shall be so disclosed promptly, but in any event within a period of not more than two months, to the Office of Technology Transfer. For specific information regarding the Policy, contact the Office of Technology Transfer, Medical Campus, 243-5689.

USE OF HUMAN SUBJECTS IN RESEARCH
All research that involves the use of human subjects must be reviewed and approved by one of the University Institutional Review Boards for the Protection of Human Subjects in Research. This policy applies to both funded and non-funded faculty and student research.
Any individual student research project, including thesis or dissertation, that involves human subjects must be approved by one of the committees prior to initiation of the research. If there are any questions on whether or not a project constitutes human subjects research, please refer to the policies and procedures on human subject research which can be found at www.hsro.miami.edu. For additional information, contact the Human Subjects Research Office at (305) 243-3195.
VETERANS

VETERANS BENEFITS

The University of Miami maintains a Veterans Affairs Office in the Office of the Registrar, 121 University Center, to assist veterans and dependents of veterans who are entitled to V.A. educational benefits under Chapter 30, 31, 32, 33, or Chapter 35 of Title 38, U.S. Code, and Chapter 1606 or Chapter 1607, Title 10, USC. Anyone needing information on Veterans Benefits is advised to contact the Office of the Registrar or visit the Registrar’s website at www.miami.edu/registrar and select “Veteran Information”.

V.A. students with previous postsecondary educational training/experience must request official transcript(s) be sent to the school. If the transcript has not been received prior to the end of the student’s initial semester, or as specified in the guidelines under the program he/she is enrolled in, the Veteran Affairs Office will not re-certify the student for V.A. educational benefits. The Veteran Affairs Office may re-certify the student after the transcript has been received.

The V.A. student’s previous training and/or experience will be evaluated by the school. Should credit(s) be accepted and/or granted, the V.A. student’s tuition and training time will be reduced proportionally. The V.A. and the student will receive a written notice of the credit(s) allowed.

STANDARDS OF PROGRESS POLICY FOR VETERANS

Satisfactory progress is indicated by a Satisfactory Progress Average (SPA), which is a variation of the Quality Point Average (QPA). The SPA is computed by the following formula:

A=4
B=3
C=2
D=1
E=0
IE=0
F=0
IF=0
NG=0

Note that “E’s”, “F’s”, “IE’s” and “IF’s” are included in the SPA. A grade of CR will be counted as CR=2.

The SPA is determined by dividing the total quality points earned by the credits attempted.

When a course is dropped with a grade of W, the V.A. requires a student to repay any benefits received for that course unless the V.A. determines there are mitigating circumstances involved.

Benefits will not be paid for courses in which a student receives a NG or NC.

- An SPA of 2.0 or greater for undergraduate students, or 3.0 or greater for graduate students, is satisfactory progress.
- Less than 2.0 for undergraduate, and less than 3.0 for graduate students, is not satisfactory.
Law and M.D. students will be considered to be making satisfactory progress as long as they meet the academic standards set by their schools for retention in their degree programs.

The SPA is non-cumulative. It is computed each term on a one-term basis.

Any term a student’s SPA is less than 2.0 for undergraduate or 3.0 for graduate, he/she will be notified that he/she is not making satisfactory progress. He/she will be certified, in a probationary status, for only one additional semester.

If, at the end of this additional semester, his/her SPA for that semester is still below the satisfactory level, the V.A. will be notified of the unsatisfactory progress and his/her educational benefits will be terminated.

A student whose V.A. educational benefits have been terminated for unsatisfactory progress may petition the Veteran Affairs Office, 121 University Center, to be re-certified after one semester has elapsed.

The Veteran Affairs Office may re-certify the student for V.A. educational benefits only if there is a reasonable likelihood that the student will be able to attain and maintain satisfactory progress for the remainder of the program.

FOR V.A. PAYMENT OF BENEFITS PURPOSES

An “I” (Incomplete) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of **one calendar year** unless permission for a delay is granted by the Academic Dean.

An “NG” (no grade) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of **one regular semester** unless permission for a delay is granted by the Academic Dean.

If permission is obtained, a memo signed by the Academic Dean must be given to the Veteran Affairs Office during the semester in which the “I” or “NG” was to be removed. This memo should also state period of time for which delay is approved.

If a memo giving permission for a delay in the “I” or “NG” removal is not received by the end of the semester in which the “I” or “NG” was to be removed, the V.A. will be notified of the incomplete grade resulting in loss of educational benefits for that course.

Please consult with our office regarding regulations for “IP’s” received in Thesis, Research, or Dissertation.

There is an official period after each registration in which a student may drop a course without a “W” appearing on his/her grade report: two weeks for Fall and Spring and four class days for each Summer Session.

These periods are not to be confused with the last date to drop a course with a “W” grade, which occurs the eighth week of the Fall and Spring Semesters and the third week of class in the Summer Sessions.
CLASS ATTENDANCE AND ABSENCES

- Regular and punctual class attendance is vital for all students.
- It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.
- A copy of the student’s transcript will be placed in the student’s permanent file maintained by the Veteran Affairs Office.

Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.
INTRODUCTION

The School of Architecture offers a five-year, accredited professional program leading to the Bachelor of Architecture degree. The Bachelor of Architecture fulfills the educational requirements for professional registration. It offers specialized architectural study through upper-level studios and architecture electives, as well as opportunities for the study of liberal arts through the elective sequence leading to a minor.

MISSION

- Prepare students for professional leadership and lifelong learning in architecture, urbanism and related fields.
- Preserve and develop knowledge for the profession through research and practice.
- Share knowledge locally and internationally through community service.
- Promote building and community design goals of environmental responsibility, social equity and economic sustainability.

ACCREDITATION

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accrediting Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The School of Architecture’s location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals. Students have the opportunity to work with the faculty in the exploration of theoretical issues and in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.
RESOURCES

The school’s resources, including a state-of-the-art computer laboratory, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for undergraduate architecture students include: the Historic Preservation Certificate, the Suburb and Town Design, the BSAE/MARCH and the BARCH/MBA.

ACADEMIC POLICIES

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the School of Architecture is selective and highly competitive. Application to the Bachelor of Architecture program is requested by February 1st. Early application is encouraged.

Freshman: Admission decisions are based on the following factors: portfolio, secondary school record, SAT/ACT score, counselor’s evaluation and the student essay.

Transfer Students: The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 G.P.A. is required for transfer admission. A portfolio is required for advanced placement in the design sequence of the Bachelor of Architecture Program. Application deadline for the School of Architecture program is March 1st.

Transfer Students

All transfer students requesting advanced placement in design must provide a portfolio of previous academic design and graphic work and three academic recommendations. Students accepted into third year design will be required to complete a transitional design course (ARC 301) during the summer prior to enrollment. The courses MTH 109 and PHY 103, or their equivalent be completed before admission into ARC 305.

Student Responsibilities

Students in the School of Architecture are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Written requests for variation from program or school requirements are reviewed by a faculty committee.

Academic Progress and Probation

The School of Architecture will review each student’s record at the end of each semester. When a students semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with School of Architecture policies and procedures.
Students on probation are not permitted to enroll in more than 13 semester hours, shall meet on a monthly basis with their academic advisor, and may have a STOP placed upon their future enrollment until grades for work-in-progress are reviewed. First semester freshmen who have a semester grade-point average below 2.0 shall be placed on probation.

<td>More than 96 credits</td>
<td>2.3</td>
</tr>
</tbody>
</table>

Students must complete all Architecture Design studios with a grade of C- or higher. Students receiving two consecutive C- grades in architecture design studios will have to repeat the later course. Students receiving a grade of D+ or lower in an architecture design studio must repeat the studio and will be restricted to a 15 credit semester load. The student will meet with an academic advisor on a monthly basis and will be reviewed prior to continuation.

**Academic Dismissal**

A student in the School of Architecture whose CGPA or progress toward degree completion falls below the level of the minimum standards of the University of Miami may be dismissed. In the School of Architecture this includes a student who receives three grades of D+ or lower in design courses.

**Class Attendance and Absences**

Class attendance is mandatory for all architecture courses; three unexcused absences constitutes grounds for dismissal from the course and/or a failing grade. Students are required to be present for an entire design review, therefore, students arriving late or departing early from class will be considered absent. Excused absences require written notification and are granted by the instructor.

**Failing Grades or Incompletes**

A required architecture course in which a student receives a failing grade must be repeated during the first subsequent semester in which the course is offered. Incompletes can be given only for reasons of serious illness or exceptional hardship.

**Student Work**

The University may retain selected student work and may place it in the architecture archives for exhibition, publication, or other use as the University deems appropriate. Each student in architecture is encouraged to maintain a design portfolio of every project undertaken throughout the five-year program.

**Permission to Take Courses at Another University**

A form is available from the Office of Academic Services and should be completed and approved PRIOR to off-campus enrollment. Students are encouraged to provide complete documentation for each course request form. Each student requesting transfer credit must supply the University of Miami registrar with certified transcripts. Additionally, each student should review transfer evaluations to be certain that all courses are correctly evaluated for credit. The proper transmission and transfer of credits is the responsibility of the individual.
student. The last 45 credits towards the degree must be completed at the University of Miami.

Changes to Academic Requirements

The School reserves the right to change academic requirements.

Computer Requirement

Undergraduate students entering their third year and all graduate students are required to purchase their own computers for use in the design studio. The School of Architecture computing resources are accessible via a wireless network with an approved device and subject to School and University policy. System requirements are published on the School of Architecture web site.

REQUIREMENTS FOR GRADUATION

The following courses are part of the required curriculum for all students pursuing the Bachelor of Architecture degree:

A. AREAS OF PROFICIENCY

*English Composition:* ENG 105 - English Composition I and ENG 106 - English Composition II

*Mathematics:* MTH 109 - Introductory Calculus

*Writing across the curriculum:* (minimum 15 credits required)
All required History of Architecture and Architecture Theory courses in the B.Arch. curriculum

B. AREAS OF KNOWLEDGE (24 credits required)

*Arts:* (6 credits required):
ARC 101 - Architecture Design I, ARC 111 Drawing I

*Humanities:* (6 credits required):
ARC 121 - Architecture and Culture, ARC 267 History of Architecture I: Ancient, Medieval and Renaissance

*Natural World (Natural Sciences):* (6 credits required):
PHY 103 - General Physics, and another course from the University’s approved master list of Natural Science courses taken as a non architecture elective.

*People and Society (Social Sciences):* (6 credits required):
Any History course

BACHELOR OF ARCHITECTURE MINOR REQUIREMENT

The Architecture curriculum requires a minor outside the School of Architecture, to be taken as non-architecture elective courses. The minor may not be satisfied with architecture elective courses. Many programs at the University award minors for twelve or more credits of study. Students are advised to consult the Bulletin and the chair of the appropriate department for details.

### Curriculum Notes

The School reserves the right to retain all student projects done in for academic credit. MTH 109 AND ENG 105 are entry-level courses. Courses taken to achieve entry-level status cannot be considered towards the total credits required for the B.Arch. Degree.
Electives

The program requires four types of electives:

Architecture electives (7 courses)
Investigations in areas of architectural interest beyond the core requirements
Professional practice elective (1 course)
Focused examination of a topic related to practice
Non-Architecture electives (2-3 courses)
Explorations of general University offerings
Minor (4-5 courses)
Concentrated study in an area outside of architecture

A minor or its equivalent is required for all students. Areas are selected in consultation with faculty advisors.

MINOR

A minor in architecture is available to non-architecture majors as an option in the undergraduate architecture program. The purpose of the minor is to provide a general understanding and appreciation of the discipline of architecture. The minor does not satisfy professional requirements in architecture but does offer an introductory basis for further study at the undergraduate or graduate level. The program requires 12 credit hours in architecture courses.

Four architecture electives from the following list of courses: ARC 121, 122, 141, 191, 223, 267, 268, 294, 323, 371, 372, 373, 374, 390, 475, 476, 521, 551, 554, 590 may be taken to complete the requirements for the minor.

HONORS

Henry Adams Medal
Awarded in conjunction with the American Institute of Architects to the highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Henry Adams Certificate
Awarded in conjunction with the American Institute of Architects to the second highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Other honors, distinctions, and awards are presented annually for excellent student performance.

Architecture Course Listing
INTRODUCTION

The College of Arts and Sciences offers courses leading to the degrees of:

Bachelor of Arts
Bachelor of Science
Bachelor of Fine Arts
Bachelor of Liberal Arts

Graduates with one of these degrees will have had a sound liberal arts introduction to the major fields of human knowledge. In addition to this background, each bachelor’s candidate has the opportunity to select an area of academic or of occupational interest. Within the degree may be built certain professional or pre-professional curricula leading to certification in teaching, medical technology, chemistry, or to dentistry, medicine, law, etc.

MISSION

The College of Arts and Sciences at the University of Miami is a community of scholars and students that encourages the quest for a deeper understanding of the human experience and fosters a personal commitment to lifelong learning, intellectual growth, and the enduring values of the liberal arts.

The College is dedicated to helping students develop analytical and communication skills, creative abilities, and a sense of civic responsibility needed in an increasingly complex society. It strives to provide them with a rigorous grounding in their chosen field, an awareness of the interconnectedness of disciplines, and an exposure to the discovery of new knowledge.

The College seeks to create an intellectual environment that enhances individual growth and supports scholarly activities and creative endeavors that augment human knowledge and understanding.

ACADEMIC POLICIES

The College of Arts and Sciences follows the general university academic policies outlined in the General Academic Information section of this Bulletin.

REQUIREMENTS FOR GRADUATION

BACHELOR OF ARTS AND BACHELOR OF SCIENCE DEGREES

Candidates for B.A. and B.S. degrees in the College of Arts and Sciences must complete the credit hours of work and achieve the quality point average specified for students in the University at large. These requirements are indicated in the Academic Procedures and Information section of this Bulletin.
I. Required Areas of Study. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the Areas of Study requirements of the College. In each department and program, the applicable prerequisites must be met before upper division courses can be taken. No more than six credits in any discipline may be used to satisfy the Areas of Study requirements.

A. English Composition  
B.A. and B.S. degrees: 3-6 credits

Students must take English 105 and 106, or their approved equivalents, in the first year of residence.

Students with an appropriate score on the Advanced Placement [AP] language and literature examination, or with an appropriate score on the International Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT verbal or ACT verbal exams may be exempted from English 105. Those with transfer credit for English 105 will take English 106 or its equivalent in the first year of residence.

B. Languages  
B.A. and B.S. degrees: 3-9 credits

Students must earn at least 3 credits of a language other than English at the 200 course level or higher. Special 100- and 200-level Spanish courses are required of heritage Spanish speakers who choose to fulfill the language requirement by taking Spanish. Students may fulfill the language requirement from the following: Arabic, Chinese, French, German, Greek, Hebrew, Italian, Japanese, Latin, Portuguese and Spanish.

C. People and Society (Social Sciences)  
B.A. and B.S. degree: 12 credits

B.A. and B.S. degree candidates must earn twelve credits in the following social science disciplines: Africana Studies, American Studies (AMS only), Anthropology (except APY 203), Economics, Ecosystem Science and Policy (except ECS 111, 112 and 301), Geography and Regional Studies (except GEG 120), History, International Studies, Judaic Studies, Political Science, Psychology, Sociology, Urban Studies and Women’s and Gender Studies. No more than six credits may be earned in any one discipline.

One approved First Year seminar course may be taken for the Social Sciences requirement.

D. Arts and Humanities  
B.A. and B.S. degree: 12 credits

B.A. and B.S. degree candidates must earn twelve credits in the three areas listed below. At least three credits must be earned in each area.

Fine Arts: any courses in the departments of Art and Art History, Dance (except DAN 101-104), Musicology, Music Theory, and Theatre Arts count toward this requirement.

Literature: Literature courses in the departments of English (200-level and higher) and Modern Languages and Literatures (300-level and higher) count toward this requirement.

Philosophy and Religious Studies: courses in the departments of Philosophy and Religious Studies count toward this requirement.

One approved First Year seminar course may be taken for the Arts and Humanities requirement.
E. Mathematics

B.A. degrees: 3-6 credits
B.S. degrees: 11-12 credits

B.A. degree candidates who do not place out of MTH 101 must take MTH 101 or MTH 107 during their first year in the College. In addition, all B.A. degree candidates must take one of the following MTH courses: MTH 103, MTH 108, MTH 109, MTH 111, or MTH 131.

B.S. degree candidates must earn 11-12 credits, consisting of two semesters of Calculus: MTH 110-112, MTH 111-112, MTH 131-132 and either a) one semester of a computer course approved by the major department; or b) a statistics course approved by the major department.

F. Natural World (Natural Science)

B.A. degrees: 9 credits
B.S. degrees: 4-8 credits

B.A. degree candidates must earn nine credits in two of the following disciplines: Biology, Chemistry, Ecosystem Science and Policy (except ECS 113 and 302), Geological Sciences, Marine Sciences (except MSC 313 and 314), Physical Sciences, and Physics. APY 203 and GEG 120 may also be taken for this requirement.

B.S. degree candidates minoring in one of the subjects approved as a B.S. major must earn 4 additional credits, and those minoring in other subjects must earn 8 additional credits, in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credits must be taken in a department other than the major or the minor, and must be earned in courses that count toward a major in that department.

II. Writing

Every student must complete five (5) writing-oriented (W) courses beyond ENG 105 and 106. Students are required to write at least 4000 words in each W course. Writing assignments will be graded on both content and style. All literature and modern language literature courses receive writing credit. No more than 2 writing courses may be transferred and used toward the required writing intensive courses. The remaining 3 courses must be completed at the University of Miami.

III. Major

Every candidate for a degree must choose a major field. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative. The candidate for the B.A. degree may choose a major from among the disciplines offering majors in the College of Arts and Sciences, from the Department of Economics in the School of Business Administration, and from Elementary Education and Special Education in the School of Education. The candidate for the B.S. degree must choose a major from the following areas: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Ecosystem Science and Policy, Geological Sciences, Microbiology and Immunology, Neuroscience, Physics, or Psychology. The choice of a major field should be made not later than the beginning of the junior year and must be approved by the major department. Any student making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.
All students (except for those majoring in Ecosystem Science and Policy) must complete a minor. For information about the selection of an appropriate minor, please see an advisor in the department of your major.

If the candidate for the B.A. degree presents Biology, Chemistry, Computer Science, Geological Sciences, or Mathematics as a major, the minor may not be selected from among these disciplines or from Biochemistry and Molecular Biology, Marine Sciences, Microbiology and Immunology, Physics, or Engineering. Subject to the foregoing, students may select a minor from any discipline in the College of Arts and Sciences, or from any School or College within the University offering a minor: College of Engineering, Schools of Architecture, Business Administration, Communication, Education, Marine and Atmospheric Science, Music or Nursing. Courses taken for the minor may also be used to satisfy the Areas of Study requirements of the College up to the limit of each area. Students planning a minor in Music should contact the School of Music for information regarding placement examinations in theory and applied music requirements.

V. Other Requirements.

Credit Only. Only free electives may be taken under this option. Courses which satisfy the major, the minor, the distribution requirements of the College and the general education requirements of the University may not be taken for credit only.

Exemption. Exemption from a course or courses refers specifically to the following: a) credit by examination through the Advanced Placement (AP) or International Baccalaureate (IB) programs; b) advanced placement by proficiency examinations or test scores, with no credit earned; c) advanced standing and/or placement, with credit granted.

Transfer Credits. Credits transferred from other institutions may not count towards the completion of a major or minor without the written approval of the department or program.

General Electives. Sufficient for a total of 120 credits. Electives may be chosen from any courses offered by the University except certain specific unapproved courses such as activity courses in the School of Education. The student should consult an advisor before selecting elective courses.

DEGREE PROGRAMS

BACHELOR OF FINE ARTS DEGREE

I. The candidate for the degree of Bachelor of Fine Arts must complete 120 credit hours with an overall quality point average of 2.0 or above as specified in departmental and program sections of this Bulletin.

II. The student must satisfy the College of Arts and Sciences distribution requirements for the Bachelor of Fine Arts by:

A. Satisfactory completion of six credits of English Composition (English 105 and 106 or its equivalent). Admission to English 105 requires a placement test score acceptable to the Department of English. A high test score may exempt a student from English 105 but not from 106 or its equivalent.
B. Satisfactory completion of the General Education Requirements from the areas of study listed below.
1. ENG 105 and ENG 106
2. MTH 101 and a course in math numbered above 101 (MTH 107 does not fulfill this requirement).
3. 5 writing oriented courses above ENG 105 and 106.
4. 6 credits in Humanities (from Literature, Philosophy, or Religious Studies)
5. 6 credits in Natural Sciences
6. 6 credits in Social Sciences

III. Students must satisfy the requirements of a major as determined by the Department of Art and Art History or the Department of Theatre Arts. Students must maintain at least a 3.0 average in their major.

BACHELOR OF LIBERAL ARTS DEGREE

I. The candidate for the degree of Bachelor of Liberal Arts must complete 120 hours with an overall quality point average of 2.0 or above.

II. He/she must satisfy the General Education Requirements of the University as set forth elsewhere in this Bulletin.

III. At least 60 of the 120 credit hours required must be in 300, 400, or 500-level courses. Of these, 30 credits must be completed in the College of Arts and Sciences.

IV. Not more than 40 hours in 300-level or higher courses may be taken in any one department. No more than 52 hours (in total credits) may be earned in any one department.

V. Up to 30 of the 120 hours may be courses from other schools and colleges of the University of Miami except for those courses expressly excluded from recognition by the College. These credits include both lower and upper division courses. Students who exceed this maximum will have the number of credits required to graduate increased by the number earned over 30 credits.

VI. The student may, but is not required to, elect a major in a department. If a student fulfills the departmental requirements for the major, it will be recorded on the official transcript. No minor may be elected.

PRELAW PREPARATION

Although no specific curriculum is required in preparation for Law School, the Pre-Law Committee of the American Bar Association strongly recommends that students considering a career in Law should have a well-balanced education. This education should include courses requiring intensive writing, logical reasoning and critical thinking and reading skills.

The College of Arts and Sciences Student Academic Services Office located in Room 200 in the Ashe Building, provides a variety of services to all students interested in attending Law School. These services include:

1. Pre-Law Advising: confidential advising in preparation for law school (i.e. application process, general information, discussion of your concerns).
3. Pre-Law Newsletter: information about programs and events.
4. LSAT and LSDAS registration booklets (for juniors and seniors).
5. Campus-wide programs for pre-law students such as Law Day.
6. Programs and seminars in coordination with other University of Miami departments such as: School of Law Career Planning Center, School of Law Center for Ethics and Public Service, Toppel Career Planning and Placement, the Counseling Center, and the Reading and Study Skills Center.

In order to take advantage of the services listed above a student should complete a Pre-Law registration card at the beginning of the academic year.

**PREMEDICAL PREPARATION**

The Committee on Premedical Studies, located in the College of Arts and Sciences (Ashe Building 205), assists students who plan to enter medicine (allopathic or osteopathic), dentistry, podiatry, optometry, chiropractic, or veterinary medicine. The Director of Premedical Studies provides guidance and also prepares a composite letter of recommendation in support of the application to health professional school.

Freshmen are encouraged to attend the premedical orientation in August and to set up a group appointment with the Director of Premedical Studies in the spring semester of their freshman year. At this time they will receive a copy of the “Premedical Student Guidelines” which details the process of opening, building and completing a file with Premedical Advising Office. Students are welcome to view the guide at www.as.miami.edu/premed.

For further guidance in curriculum planning, students should examine the requirements of the individual health professions. The Premedical Advising Office maintains a library of health professions admissions requirements and information on summer programs and related graduate programs.

In general, however, premedical students should take:
- English, two semesters
- College Mathematics, two semesters
- General Biology with lab, two semesters
- General Chemistry with lab, two semesters
- Organic Chemistry with lab, two semesters
- Physics with lab, two semesters
- Biochemistry, one semester

Other recommended courses are:
- Physiology
- Genetics
- Cellular and Molecular Biology
- Microbiology
- Psychology

Most medical schools advise against the study of science subjects to the exclusion of broadening courses in a College of Arts and Sciences; therefore, students should include
classes in literature, philosophy, religious studies, history, and languages other than English.

MINORS

Please see minor information located under the “Academic Policies” sub heading for the College of Arts and Sciences.

CONCENTRATIONS

Please see department sections for specific information relating to concentrations within a department in the College.

HONORS

Please see the section titled “HONORS PROGRAM” located in the General University Information section of the Bulletin for general honors program information and general departmental honors information. Please contact Honors Advisors within a department for any additional requirements.

OTHER

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available in Ashe 200 and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the Ashe Building.
UNDERGRADUATE ACADEMIC PROGRAMS

AEROSPACE STUDIES - Dept. Code: AIS
www.miami.edu/aerospace-studies

INTRODUCTION
The Department of Aerospace Studies represents the Air Force Reserve Officer Training Corps (AFROTC), at the University of Miami. Providing academic instruction and training experiences leading to commissioned service in the United States Air Force.

SCHOLARSHIPS
A variety of AFROTC scholarships for one, two, three, and four years are available on a competitive basis and include a $900 textbook allowance per year plus a non-taxable $300 - $500 stipend each month during the school year. Some scholarships provide full college tuition while others begin at $15,000 per year. In selected academic areas, scholarships may extend to meet a five year degree program recognized by the college. The one year program is for students preparing for occupations for which the Air Force has a special need. The majority of two to four year scholarships are for students pursuing degrees in certain fields of engineering, science and math, with a limited number going to other academic degrees. A number of scholarships are also available to students enrolled in certain non-technical degree programs such as business administration, accounting, economics, and management. Scholarships for careers in the medical field are also offered.

Additionally, University of Miami undergraduates enrolled in the Air Force ROTC program are assured annual combined University grant and/or scholarship resources amounting to one quarter* of the University’s tuition for up to four years. Students must maintain continuous enrollment in the AFROTC program and full time enrollment in one of the University’s undergraduate degree program. No application required. Awards are made automatically based on information provided by the University’s AFROTC detachment.

*Assured amount is lower if the total of all scholarships, grants and/or stipends received by the student would exceed the student’s cost of attendance for the academic year, as determined by the University of Miami Office of Financial Assistance Services.

ENROLLMENT
There is no military obligation to sign up for AFROTC. To take classes students must be U.S. citizens or resident aliens. It is possible to begin AFROTC as a resident alien and earn a commission once citizenship is obtained. AFROTC cadets must also pass the Air Force Officer Qualifying Test, a physical fitness test including a 1.5 mile timed run, push-ups, sit-ups and pass a Department of Defense physical exam in order to be eligible for scholarships and ultimately commissioning.

BENEFITS
All AFROTC cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon being commissioned a Second Lieutenant in the Air Force, you will receive a starting salary and allowances worth more than $40,000 per year. Free medical and dental care, 30 days annual vacation with pay tax deferred Federal Government-sponsored retirement savings and investment plan (similar to a “401(k)” plan) and added educational benefits are also part of the compensation package.
EDUCATIONAL OBJECTIVES

AFROTC is an educational program designed to give men and women the opportunity to become Air Force officers while completing a Bachelor’s degree. Although flying is a critical mission of the Air Force, it forms only a part of the 160-plus career specialties available to new officers. Today, since science and technology are a large part of the national defense, the Air Force needs the best scientists and engineers the nation can produce. It also needs other professional men and women with a broad range of knowledge and skills. Most young officers who enter the Air Force today do not expect to be pilots or astronauts. They want to be part of the large research and development program of the vast support organization that keeps our country strong and progressive. Exciting job opportunities exist everywhere in the Air Force. In addition to the recurring need for pilots, the Air Force also needs personnel to work in navigation, space and missile operations, engineering, mathematics, physics, computer science, and in the support fields of personnel, administration, logistics, finance, education, security forces, health, and others. In the years ahead, Air Force ROTC will continue to concentrate on preparing men and women to assume important and responsible positions of leadership in the modern Air Force.

AFROTC offers several routes to an Air Force commission. Optimally, the program lasts four years, but it can be completed in three, two or even just one year if you are majoring in a critically needed area. Depending on the program chosen, attendance at either a four-week or six-week summer field training course is required. AFROTC cadets will receive junior officer training, career orientation, and learn how the Air Force operates. Travel to and from the base where field training occurs is paid for by the Air Force. The end product of the AFROTC program is to produce Second Lieutenants for the Air Force upon graduation. For more information, contact the detachment at 305-284-2870.

MINOR

MINOR IN AEROSPACE STUDIES

- A minor in Aerospace Studies consists of 16 credits.
- You must take all AIS courses listed under the Aerospace Course Listing
- A grade of C- or higher, with an overall GPA of 2.0, is required in each course taken for the minor.

Aerospace Course Listing
AFRICANA STUDIES - Dept. Code: AAS
www.as.miami.edu/africanastudies
www.as.miami.edu/ids

INTRODUCTION

The Program in Africana Studies (AAS) provides opportunities for students to learn about the experiences of people of African descent in North and South America, the Caribbean and continental Africa. Courses are presently offered leading to a major or minor in Africana Studies. Students are encouraged to pursue these courses, even if they are not majors or minors, in order to achieve a balanced education in keeping with the stated goals of the University of Miami.

EDUCATIONAL OBJECTIVES

a) To help students research, acquire, and disseminate information about the historical and social experiences of Africans and people of African descent on all sides of the Atlantic basin, but with special emphasis on the United States.
b) To facilitate students’ understanding of the multi-cultural, multi-ethnic, globalized society of our time.
c) To help students think critically about the global black experience.
d) To prepare students for graduate work and professional careers.

DEGREE PROGRAMS

Bachelor of Arts

MAJOR

MAJOR IN AFRICANA STUDIES
- A major in Africana Studies consists of 30 credits.
- Twelve of the 30 credits must be completed at the 300 level or above.
- A grade of C- or better with an overall GPA of 2.0 is required in each course taken for the major.
- Africana majors must complete the following core courses: AAS 150, AAS 490, HIS 201, and HIS 209 or HIS 210.
- Africana majors must complete one course in Caribbean Studies (ENG 361, APY 385, GEG 212, HIS 318).
- The remaining courses must be selected from the list of acceptable courses approved by the program, in any school or college within the university.

MINOR

MINOR IN AFRICANA STUDIES
- A minor in Africana Studies consists of 15 credits.
- Africana minors must complete the following courses: AAS 150 and HIS 201 or HIS 209.
• The remaining courses must be selected from the list of acceptable courses approved by the program, in any school or college within the university.
• A grade of C- or higher with an overall GPA of 2.0, is required in each course taken for the minor.
• The remaining courses must be selected from the list of acceptable courses.
• A minimum of six credits must be numbered 300 or higher.

DEPARTMENTAL HONORS

Carter G. Woodson Award - Best all-round student who combines intellectual excellence and community service.

Africana Studies Course Listing
INTRODUCTION

The Program in American Studies at the University of Miami fosters the interdisciplinary study of American culture and society, and explores the place of the United States in an increasingly interconnected world. Our faculty come from a wide range of fields, including history, literature, religion, art, philosophy, law, music, ethnic studies, anthropology, architecture, sociology, communications, and education. What unites them is the commitment to examining the U.S. from multiple perspectives, highlighting the diversity of people, cultures, and experiences that have shaped the past and present United States. The Program places analysis of globalization at its center, and encourages a hemispheric perspective that allows students and faculty to explore interests in the United States, the Caribbean, Latin America, the Pacific Rim, and other border crossings.

EDUCATIONAL OBJECTIVES

The undergraduate curriculum in American Studies encourages students to bridge the divide between disciplines by examining specific themes and topics in an engaging, dynamic, interdisciplinary manner. By exposing students to courses that place questions of cultural diversity, regional difference, ethnic and racial identity, gender and sexuality, class dynamics, and popular culture at the forefront of intellectual investigation, the Program in American Studies enables them to situate their own experiences in a wider context. It also exposes them to a multiplicity of perspectives that inform our understanding of the United States and its place in a global society. The Program strongly encourages its majors to study abroad, and faculty members help students plan their curriculum to make that option feasible.

DEGREE PROGRAMS

Bachelor of Arts

MAJOR

MAJOR in American Studies (30 credits):

A major in American Studies consists of at least 30 credits in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses. These credits must include at least 18 at the 300 level or above. All majors must complete AMS 101: Introduction to American Studies; AMS 310: The U.S., Transnationalism, and Globalization; at least two other AMS core courses; at least one course in American history, and at least one course in American literature.
Students must take three courses, chosen in consultation with an American Studies advisor, in a specialized area of American Studies (200 level or higher). Students may work in areas including, but not limited to, Ethnic Studies, Caribbean Studies, Latino/a Studies, Environmental Studies, Communication Studies, Women's Literature, Urban Studies, Africana Studies, Religious Studies, or Material Culture Studies. At least one of these courses must be either comparative or non-U.S.-based.

Students must take courses from at least three different departments in order to fulfill the requirements for the major.

In addition, all majors must complete AMS 501: Senior Project. This capstone course can take the form of an individual research project or an internship at a local cultural or civic institution. For the research option, students will identify an appropriate faculty member to supervise and grade the project, and then obtain approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will be determined by the faculty member and student in consultation with the program director. For the internship option, students will partner with any number of local institutions and produce a creative and/or scholarly project for evaluation. The internship will be arranged through the program director, in consultation with the Butler Center. The final product will be evaluated by the program director.

MINOR

MINOR in American Studies (15 credits)

A minor in American Studies consists of at least 15 credits in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses. These credits must include at least 9 at the 300 level or above. All minors must complete AMS 101: Introduction to American Studies; AMS 310: The U.S., Transnationalism, and Globalization; at least one other AMS core course; and at least one course in American history or American literature.

DEPARTMENTAL HONORS

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505: Honors Thesis. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

American Studies Course Listing
INTRODUCTION

Anthropology is the scientific study of humankind, from its beginnings to the present. Of the many sciences that study aspects of humans and their behavior, only anthropology attempts to understand and integrate the entire panorama of human biology and culture in all times and places.

The Anthropology Department offers a wide range of courses for students in pursuit of the Bachelor of Arts degree, from the basic four fields of cultural anthropology, linguistics, physical anthropology, and archaeology, to advanced study of topics such as underwater archaeology, medical anthropology, Caribbean cultures, primatology, and Iron Age Europe.

The science of anthropology holds that to understand the principles of human behavior, we must compare our own behaviors with those of people from other times and places around the world. These comparisons demand evolutionary, cross-cultural studies of human behavior, constantly changing, ever intriguing us.

The field is especially suited to a multi-ethnic, multi-lingual, and multi-cultural urban center such as Miami, and the research programs of the department faculty reflect the compositions and concerns of the larger community.

Anthropological knowledge has taken an increasing role in the solution of practical problems in public health, cultural resource management, economic development in the Third World, business relations with immigrant and overseas populations, State and Federal programs, and many other areas. Anthropology majors may become professionals in the field by continuing their training in one of the many excellent graduate programs around the country.

EDUCATIONAL OBJECTIVES

Students who graduate from our program in anthropology will have achieved:

1) Basic familiarity with each of the four subfields of our discipline: archaeology, cultural anthropology, linguistic anthropology, and physical or biological anthropology.

2) Extended familiarity with one or more of these subfields in terms of knowledge of content, e.g. area ethnology in Latin America and/or the Caribbean, topical knowledge such as Drugs and Culture, Ritual and Sacrifice, Sex and Culture, Food, Primate Behavior, Iron Age Civilizations, or World Languages, or methodological skills involving field research in one or more of the subfields.

3) The ability to articulate the anthropological view of the human condition in terms of an operational definition of culture and a holistic perspective on how humans behave.

4) Sufficient skill in research to be able to produce a research paper on an anthropological topic.
DEGREE PROGRAMS

The Department of Anthropology offers a major and a minor in the University’s array of Bachelor of Arts Degrees.

MAJOR

- A major in Anthropology consists of 30 credits in Anthropology, passed with a grade of C- or higher with an overall GPA of 2.0.
- APY 201, 202, 203, 204 (or approved alternatives), and a minimum of four anthropology courses at the 300 level or higher are required. APY 208 may count as one of the six courses taken in addition to the four basic courses.
- The remainder of the program will be developed with the student’s departmental advisor.

MINOR

A minor in Anthropology consists of 15 or more credits, passed with a grade of C- or higher with an overall GPA of 2.0 including any two 200-level anthropology courses.

Any two of the following courses in other departments may be applied to the major in Anthropology; any one to the minor:

- ARH 239, 241, 242, 243, 249, 250, 330, 332
- MCY 554
- COS 545
- MAF 515, 526
- MAF 501 or MAF 505.

DEPARTMENTAL HONORS

A student with a cumulative grade point average of 3.5 or higher may earn honors in anthropology by writing a qualifying thesis paper under the direction of a member of the faculty in the Department of Anthropology.

Anthropology Course Listing
ART AND ART HISTORY - Dept. Codes: ART, ARH
www.as.miami.edu/art

EDUCATIONAL OBJECTIVES

The Department of Art and Art History provides facilities and instruction to serve equally the needs of the general student for participation in and appreciation of the visual arts and those of students with specialized interests and abilities preparing for careers in the production, teaching, utilization, and interpretation of Art and Art History.

DEGREE PROGRAMS

The Department of Art and Art History offers two degrees: the Bachelor of Arts with tracks in Art History, General Study and Studio Art and the Bachelor of Fine Arts with specializations in Painting, Sculpture, Printmaking, Photography/Digital Imaging, Graphic Design/Multimedia and Ceramics. The B.A. requires a minimum of 36 credit hours in the department with a grade of C or higher. The B. A. major is also required to have a minor outside the department. Minor requirements are specified by each department and are listed in the Bulletin. The B.F.A. requires a minimum of 72 credit hours in the department, a grade of C or higher in each course, a successful portfolio review, and at least a 3.0 average in departmental courses. The B.F.A. major is not required to have a minor outside the department.

MAJOR

DEGREE REQUIREMENTS

BACHELOR OF ARTS - ART HISTORY

Foundation Courses: 6 Credits
ART 101. Introduction to Drawing I
ART 104. Three-Dimensional Design

Art History Foundation Courses: 9 credits
ARH 131. Survey of Western Art I and
ARH 132. Survey of Western Art II and
ARH 133. Art of Non-Western Cultures or
ARH 134 Ancient American Art

Area of Study: 21 credits
Art History: six courses from 200 level or higher, plus one art history seminar course

Total: 36 credits

BACHELOR OF ARTS - GENERAL STUDY

Foundation Courses: 6 credits
ART 101. Introduction to Drawing I and
ART 109. Introduction to Electronic Media
Art History Courses:  
ARH 131. Survey of Western Art I or  
ARH 133. Art of Non-European Cultures or  
ARH 134 Ancient American Art and  
ARH 132. Survey of Western Art II  
One course from 100, 200, or 300 level

General Study Courses:  
Any seven courses from the following areas:  
Art History  
Drawing  
Painting  
Sculpture  
Printmaking  
Graphic Design/Multimedia  
Photography/Digital Imaging  
Ceramics/Glass

Total: 36 credits

BACHELOR OF ARTS STUDIO ART

Foundation Courses:  
ART 101. Introduction to Drawing I and  
ART 109. Introduction to Electronic Media

Art History Courses:  
ARH 131. Survey of Western Art I or  
ARH 133. Art of Non-European Cultures or  
ARH 134 Ancient American Art and  
ARH 132. Survey of Western Art II  
One additional course at the 100, 200, or 300 level

Studio Art Courses:  
Seven Studio courses from the following areas:  
Drawing  
Painting  
Sculpture  
Printmaking  
Graphic Design/Multimedia  
Photography/Digital Imaging  
Ceramics/Glass

Total: 36 credits

BACHELOR OF FINE ARTS

PORTFOLIO REVIEW
All students who anticipate graduating with a Bachelor of Fine Arts (BFA) degree must submit a portfolio consisting of 15-20 images of their work on either a CD/DVD or in slides for review by the faculty. Students can apply as incoming freshmen or anytime within their first years. NO STUDENT IS OFFICIALLY CONSIDERED A BFA CANDIDATE UNTIL THE PORTFOLIO IS APPROVED BY THE FACULTY. If the BFA portfolio is not submitted at the proper time or fails to be passed by the faculty, the student will be advised and registered as a Bachelor of Arts (BA) candidate.
BFA EXHIBITION

Unless otherwise instructed, each BFA candidate will take part in an exhibition of work screened and approved by a faculty member from their area of specialization, accomplished as an art major at the University of Miami, in the Fall or Spring semester of the senior year. The BFA exhibitions are held in the College Gallery.

At the time the candidates BFA exhibition is hung, a formal critique will be arranged between the student and the art faculty.

BFA COURSE REQUIREMENTS

General Foundation Courses: 6 credits
ART 101. Introduction to Drawing I and
ART 109. Introduction to Electronic Media

Art History Courses: 15 Credits
ARH 131. Survey of Western Art I or
ARH 133. Art of Non-European Cultures or
ARH 134 Ancient American Art and
ARH 132. Survey of Western Art II
ARH 343. Modern Art or
ARH 344. Contemporary Art
Two courses from 100, 200, or 300 level

Note: ARH 346 - History of Graphic Design is required for Graphic Design/ Multimedia majors.
ARH 107 – History of Photography is required for Photography majors.

Art Electives 12 Credits
12 Credits to be taken in the Department outside of area of specialization.

Areas of Concentration (one entire sequence required) 39 Credits

Primary concentrations can be taken in Painting, Printmaking, Graphics-Multimedia, Photo Digital, Ceramics and Sculpture.

Secondary and Tertiary concentrations can be taken in Painting, Printmaking, Graphics-Multimedia, Photo Digital, Ceramics, Sculpture, Introductory Art Studio (ART 102, 103, 104, 108), and Drawing (ART 102, 105, 107, 305).

TOTAL: 72 Credits

BFA Minor in Art History
All BFA studio majors automatically minor in art history. A minor outside the department is not required.

BFA Double Specialization
Double Specialization requires the completion of an entire sequence in a second area of specialization.

A BFA student is limited to a maximum of 21 credits in any one studio area – Painting, Printmaking, Graphics-Multimedia, Photo Digital, Ceramics, Sculpture. Courses beyond the 21 credit primary concentration limit will not be counted toward graduation.
A student may not exceed the required 72 credits within the Department of Art and Art History.

Students must maintain at least a 3.0 average in their major.

**MINOR**

A minor in Art and Art History consists of 15 credits (6 of which must be from the University of Miami) in departmental courses passed with a C or higher.

**DEPARTMENTAL HONORS**

*Admission*

Admission is by invitation from the Department Chair. Students are invited the first semester of their junior year and are required to complete the program before their date of graduation.

*Requirements*

**Studio Art Majors** - Students must have passed the B.F.A. Portfolio Review and have a GPA of 3.5 or higher in the Art major.

**Art History Majors** - Students must be a declared Art History major, and have a GPA of 3.5 or higher in the Art History major.

Students must complete a minimum of six credit hours in designated honors courses (ART 499 or ARH 499) with a grade of B or higher.

Students must have an overall GPA of 3.3 or higher.

Students must submit the results of their honors study for approval to a Departmental Honors Committee.

**ART SCHOLARSHIPS**

Partial tuition scholarships are awarded on the basis of artistic ability and academic achievement. Students must be accepted for admission to the University of Miami in order to apply for an Art Scholarship. The deadline for submission of materials is March 1.

**AUDIT**

Due to the nature of studio courses, it is not possible for a student to audit courses offered in the studio areas.
ASTRONOMY

For courses in Astronomy see PHYSICS, in particular PHY 110, 316, 317, 545.
INTRODUCTION

Biochemistry is the chemistry of life. It includes or has large areas of overlap with molecular biology, structural biology, cell biology, metabolism, nutrition, genetics, etc. It tries to explain what happens in living organisms and how biological processes are regulated. It is a relatively young science. Our understanding is still developing and students (and faculty) can learn something that is totally new every day.

An Undergraduate Major in Biochemistry and Molecular Biology provides an excellent preparation for:

1. Medical School

2. Graduate Studies in all basic medical sciences:
   - Biochemistry
   - Molecular Biology
   - Cell Biology
   - Genetics
   - Neurobiology
   - Microbiology
   - Immunology
   - Pharmacology
   - Biophysics
   - Physiology
   - Bio-informatics
   - Biology
   - and others

3. Industry
   - Biotechnology
   - Pharmaceutical

4. Patent Law

5. Allied Health Professions
   - Nutrition
   - Dentistry
   - Forensics
   - Veterinary Medicine
   - Toxicology
   - Clinical Chemistry
   - Environmental Science

6. Non-Health Professions
   - Chemistry
   - Physics
   - Scientific Publishing

INTERESTING ARTICLES

EDUCATIONAL OBJECTIVES

The Department of Biochemistry and Molecular Biology intends to provide its students with the best possible opportunities to master the subject and become independent learners.
DEGREE PROGRAMS

The Department of Biochemistry and Molecular Biology offers an undergraduate B.S. degree as a member of the College of Arts & Sciences. It also offers the following graduate degrees: Ph.D. and combined M.D. and Ph.D.

MAJOR

A major in Biochemistry and Molecular Biology leading to a Bachelor of Science degree requires a thorough foundation in chemistry and biology or microbiology and background knowledge of physics and mathematics.

Minimum requirements:

1. 15 credits from the courses offered by the Department of Biochemistry and Molecular Biology plus at least 16 credits in chemistry and at least 19 credits in biology. Examples of courses that can be taken for the major are BMB 151, 251, 258, 506, 407 or 507, 501, 509, 511 and 545. Courses printed in bold letters are absolutely required. Courses printed in italics can be taken more than once. Only in exceptional cases will BMB 401 be accepted in place of BMB 506. Students are encouraged to take at least one semester of BMB 545 (laboratory research). The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities.

A UM cumulative grade point average of 2.9 is required to declare a biochemistry major or minor. Transfer students can only declare a biochemistry major if they have a grade point average of 3.5. A grade of C or better must be earned in each Biochemistry and Molecular Biology course.

2. Required Biology and/or Microbiology courses are:
   BIL 150, 151, 160, 250, 252 or 256 or 251 (252 is preferred), 255 plus
   BIL 355 (Developmental Biology) or MIC 301

3. Required Chemistry courses are CHM 111/113, 112/114, 201/205, and 202/206. Chemistry 331 is recommended.

4. Mathematics: MTH 111 and 112 or 131 and 132.

5. Physics:
   For students contemplating graduate studies: PHY 205, 206 and 207 or PHY 205 and 210.
   For students not contemplating graduate studies: PHY 101 and 102 are acceptable.

Variations of the above program are feasible for students entering with advanced standing on the basis of placement tests or for transfer students.
MINOR

Minimum requirements are:
1. 8 credits in Biochemistry and Molecular Biology. BMB 506 is required. Students must have all the courses that are a prerequisite for BMB 506 and a good working knowledge of chemistry and biology before they take BMB 506. The remaining credits may come from any of the courses offered by the Department. Only in exceptional cases will BMB 401 be accepted in place of BMB 506 with the permission of the undergraduate advisor. Students should become familiar with the credit sharing rules. Credits for a minor cannot be used for a major. Credits can be shared between two majors.

2. The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities.

A grade of C or better must be earned in each Biochemistry and Molecular Biology course.

For graduate programs or combined Ph.D.-M.D. programs, consult the Bulletin of the Graduate School.

Registration in all 500-level courses requires permission from the Biochemistry advisor or course coordinator.

DEPARTMENTAL HONORS

Departmental honors can be earned by biochemistry majors who have:
1. successfully completed two semesters of research (5 or 6 credits of BMB 545). This research must be described in a brief thesis that needs to be approved by three BMB faculty members.

2. a 3.5 or higher grade point average in all BMB courses.

3. at least a 3.3 average for all their courses taken at the University of Miami.

For general honors see elsewhere in this Bulletin.

Biochemistry and Molecular Biology Course Listing
BIOLOGY - Dept. Code: BIL
www.bio.miami.edu

INTRODUCTION

The Department of Biology offers undergraduate programs for students interested in a natural science education that will prepare them for careers in biological research, medicine and other health-related fields, teaching, environmental management and other fields that require a broad base of biological knowledge.

EDUCATIONAL OBJECTIVES

The Department of Biology trains students to understand and use the scientific method, and to engage in critical thinking and experimental design. We strongly encourage original laboratory and/or field research under the mentorship of biology faculty. The Bachelor of Science in Biology prepares the student for further training in natural science, such as biology graduate school, as well as medical, veterinary, dental or other health-care professions. The Bachelor of Arts degree prepares the student for a career in more humanities-related fields such as teaching or environmental law.

DEGREE PROGRAMS

Two undergraduate degrees are available in Biology: the B.S. and B.A. Both require a major in Biology of 34 credits with a minimum grade of C- in each course and an overall GPA of 2.0.

MAJOR

Bachelor of Science Degree

The B.S. degree is recommended in preparation for graduate schools, professional schools, marine biology, and high school or college teaching. In addition to the College of Arts and Sciences general degree requirements, the B.S. requirements are as follows:

1. BIL 150, 151, 160, 161
2. BIL 235, 250, 255, 265
3. Additional BIL electives to total 34 credits.
4. Two laboratory or field courses beyond 151, 161 are required as part of the 34 credits in BIL.

One course of up to four credits toward the major, but not the minor, may be selected from courses numbered 300 or higher from the following departments: Biochemistry and Molecular Biology, Marine Biology and Fisheries, or Microbiology and Immunology. BME 305 may be used instead of a course from BMB, MBF, or MIC.
A maximum of two credits of BIL 371 and BIL 372 and six credits of BIL 495, 496 and 497 may be applied towards the major.

One course only from BIL 495, 496 or 497 may be counted towards the laboratory course requirement for the B.S. degree.

A maximum of one credit in BIL 381 and one credit of BIL 382 may be applied towards the major, although these two courses may be taken more than once each for general elective credit.

A maximum of one credit in BIL 481 under any single subtitle may be applied towards the major. This course may be taken more than once for general elective credit only.

In addition, students must complete the following:

1. Select one course from the following: BIL 311, BIL 511, EEN 118, CSC 120, MTH 224, or PSY 204. This will fulfill the Mathematics-statistics/computer programming requirement under the College of Arts and Sciences General degree requirements.

2. One year of inorganic chemistry (111-112) with laboratory (113-114), one semester of organic chemistry with laboratory (201/205).

3. Two semesters of college physics with laboratory or three semesters of university physics with laboratory.

4. A minor in chemistry, physics, geological sciences, marine sciences, biochemistry and molecular biology, computer science, mathematics, or microbiology and immunology.

**Bachelor of Arts Degree**

The B.A. degree is recommended for students involved in interdisciplinary programs and for entrance to those professional schools and specific biological careers not requiring a B.S. degree with a major in Biology. In addition to the College of Arts and Sciences degree requirements, the B.A. requirements are as follows:

1. Biology 150, 151, 160, 161 plus BIL electives to total 34 credits.

2. One course of up to four credits toward the major, but not the minor, may be selected from courses numbered 300 or higher from the following departments: Biochemistry and Molecular Biology, Marine Biology and Fisheries, or Microbiology and Immunology. BME 305 may be used instead of a course from BMB, MBF, or MIC.

3. One semester of inorganic chemistry with laboratory (111/113 or 103/105) and one semester of organic chemistry with laboratory (201/205 or 104/106).

4. A minor in a department other than natural science.
MINOR

A biology minor consists of BIL 150/151 and BIL 160/161 plus BIL electives to total 18 credits, with a minimum grade of C- in each course. (Note: All courses in the minor must be in BIL. Courses from BMB, MBF, MIC, or BME may not be counted towards the minor.)

Overall GPA in the major or minor must be a minimum of 2.0.

One half of the credits required for a Biology major or minor must be earned in residence at the University of Miami.

DEPARTMENTAL HONORS

HONORS PROGRAM

See HONORS PROGRAMS elsewhere in this Bulletin for minimal requirements. In addition to the grade point averages specified in the minimal requirements, the following program constitutes the Biology Departmental Honors Program:

1. A minimum of two of the following: Biology 495, 496, 497 (2 credits each), involving a research project carried out under the supervision of a member of the Department of Biology faculty.

2. Biology 498, a senior thesis, of superior quality, on the results of the research.

4. A minimum of two BIL credits from the following list: 253, 257, 299, 374, 375.

5. A minimum of one course in the Department of Biology at the 500 level.

6. An overall GPA of 3.3 and a biology GPA of 3.5.

Advanced placement, and in certain situations, course credit can be earned through the College Entrance Examination Board program, placement examinations, and departmental proficiency examinations.

For Graduate programs, consult the Graduate School section of this Bulletin.

Variations within the above program may be permitted by the Department Chairman in special cases.

Biology Course Listing
INTRODUCTION

Each undergraduate chemistry degree program requires the core courses CHM 111, 112, 113, 114, 201, 202, 205, 206, and 304; one year of calculus; and at least two semesters of physics. The requirements for a major are flexible and should conform to the objectives of the student. A grade of C- or higher must be earned in all courses taken for major or minor credit, and the Chemistry GPA must be 2.00 or higher. Credits earned in CHM 381 and CHM 382 do not count toward the major or minor.

EDUCATIONAL OBJECTIVES

The mission of the Bachelors degree program in the Chemistry Department is to promote an understanding and appreciation of the role of chemistry in modern society, especially as it relates to and integrates with other biological and physical sciences and societal issues facing humanity today such as the environment, health issues and technological advances.

DEGREE PROGRAMS

Three programs lead to degrees with a chemistry major:

1. the B.A. degree
2. the B.S. degree
3. the B.S. degree with certification by the American Chemical Society Committee for Professional Training of Chemists.

MAJOR

1. The B.A. degree requires 27 credits of chemistry: the core courses; CHM 331 or 360; plus electives from the following sufficient to reach the required credit hours for the degree: CHM 316, 320, 365, CHM 401, CHM 531, 520 or BMB 401. This major is designed for premedical students, high school science teachers, and others who choose a non-science minor. It may be combined with business courses in an interdisciplinary program.

2. The B.S. degree requires 34 credits of chemistry: the core courses; CHM 360, 364, 365 and 316, 320; plus electives from the following sufficient to reach the required credit hours for the degree: CHM 401, CHM 441, 520, 563 or BMB 401 or 506. Two semesters of physics are required. This major meets the minimum entrance requirements of many graduate programs in chemistry.

3. The American Chemical Society certified B.S. degree consists of 44 credits: the core courses; 316, 320, 360, 364, 365, 441, 442, 464, BMB 506; CHM 520, and 563; at least two credits in CHM 488 or 490; either PHY 205/210; or PHY 205, 206, and 207; and both PHY 208 and 209. The Professional Chemistry Program is also available in the Engineering Science Department, College of Engineering. A senior research thesis is required by the ACS for awarding of this degree.
Variations within the above programs may be recommended by the Department. Transfer students must complete a minimum of half of the required major credits in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner. For students who plan to do graduate work in physical chemistry, a double minor is recommended: Mathematics and Computer Science through 310 and 311, Physics through 350 and 360.

MINOR

A minor in chemistry consists of 8 credits in chemistry courses at the 200 level or above, taken at the University of Miami, exclusive of CHM 381, 382, 488 and 490.

Credit may be earned in only one of the courses Chemistry 103, 111 or 151. Credit may not be earned in both CHM 104 and CHM 201.

DEPARTMENTAL HONORS

Honors in Chemistry may be earned by students who are in good standing within the University’s Honors Program. In addition to the general requirements for University Honors, a student must also complete the core courses in Chemistry; CHM 360, 364, and 365; at least six credits of CHM 490; and any three of the following: CHM 316, 441, 520, 563, BMB 502, and BMB 401 or 506, all with an average grade of at least 3.30. A written Honors Thesis and oral defense on the subject of the Honors Research must be presented by the student and approved by a Department Honors Committee.

Chemistry Course Listing
INTRODUCTION

Every culture and civilization has its classics: those works of art that are seen as the best of their kind, have withstood the test of time, and embody the symbolic values of their society. In the western tradition, the study of 'Classics' has focused upon the literatures and cultures of ancient Greece and Rome, and their impact on the whole subsequent history of the western world.

The significance of the study of Classics to the history of the academy would be difficult to overstate. Indeed the entire notion of a 'university,' from the days of mediaeval Paris, Bologna, Oxford, and Heidelberg on, was founded consciously and explicitly upon the study of Greek and Latin literatures and thought. The discipline has been conceived in unusually broad terms; it is intended to encompass everything that can be known about the ancient Mediterranean world. Because of this, there is room in Classics for the study of areas as disparate as literature, science, sculpture, history, architecture, religion, philosophy, theater, economics, music -- in short, the entire panorama of human endeavor. It is no wonder that the study of Classics has always tended to attract some of the liveliest and most brilliant intellects; and it is equally unsurprising that students majoring in Classics find themselves extremely well-prepared for undertaking practically any type of career, whether that be in politics, law, teaching, commercial publishing, research of all kinds, medicine, journalism, banking, or the corporate world. A degree in Classics marks the UM graduate as a man or woman of superior analytical and critical skills, one who has proved able to cope with the most rigorous academic curriculum, and who is exceptionally broadly educated in the most fundamental aspects of what it means to be human.

EDUCATIONAL OBJECTIVES

The educational objectives of the Department of Classics may be stated in a variety of ways, and on a number of levels. In terms of linguistic competency, students majoring or minoring in Classics are required to reach an appropriate level of fluency in reading ancient Greek or Latin, or both. In terms of cultural literacy, students of the Classics are educated within a rigorous curriculum exposing them to the great literary works and material cultures of ancient Greece and Rome. In terms of critical thinking, students of the Classics are trained to hone the skills of memory, analysis, and synthesis, skills that they will be able to apply for the rest of their lives in any realm of thought whatsoever.

But -- stated in the most philosophical terms -- the goal of an education in Classics is to foster and inculcate an ever-burgeoning awareness of what Cicero referred to as *humanitas* -- in short, everything it is to be human. It is the mission of Classics to expose its students to the greatest thoughts and endeavors of the human race, and to encourage them to think about what that greatness consists in, and how to enlarge upon it. The profoundest educational objective of the Department of Classics is to preserve and study all that is important or beautiful about the past, in order best to prepare for the future.
DEGREE PROGRAMS

The Department of Classics offers the Major and the Minor in Classics; for details on these, see below.

MAJOR

The undergraduate Major in Classics at UM has four tracks. For more details on these four ways of earning the B.A. in Classics at UM, see the Department's website, specifically the page at [http://www.as.miami.edu/classics/undergraduate](http://www.as.miami.edu/classics/undergraduate).

MINOR

Students may instead elect to Minor in Classics at UM. For more details on the requirements for the Minor in Classics, see the Department's website, specifically the page at [http://www.as.miami.edu/classics/undergraduate/minor](http://www.as.miami.edu/classics/undergraduate/minor).

DEPARTMENTAL HONORS

Some Classics Majors may qualify to graduate with Departmental Honors in Classics. In order to earn Departmental Honors, the student must maintain a minimum average of 3.5 in all Classics courses (those labeled CLA, GRE, and LAT), plus an overall minimum GPA of 3.5. In addition, they must complete CLA 495 and CLA 496 with a grade of B or higher.

In addition, Classics Majors, Classics Minors, and other students who meet certain academic criteria are eligible for membership in Eta Sigma Phi, the National Honors Society for Classics.

[Classics Course Listing](#)
COMPUTER SCIENCE - Dept. Code:  CSC
www.cs.miami.edu

INTRODUCTION

The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. The Department has faculty with strong accomplishments in the fields of algorithm engineering, automated reasoning, bioinformatics, computational complexity, computational geometry & computer graphics, cryptography & network security, data mining, molecular computation, multimedia systems, music information retrieval, scientific computing, and wireless & mobile computing.

EDUCATIONAL OBJECTIVES

The Department of Computer Science educates students in the science of software development: the analysis of domain problems, the development of algorithms and programs, the use of specialist computing techniques, the system-software and hardware platforms, and the production and deployment of efficient and robust computer software. Instruction ranges from introductory programming classes and laboratories, through to research in various areas of computer science.

DEGREE PROGRAMS

The Department of Computer Science offers a Bachelor of Science, Bachelor of Arts, and a Medical Informatics major in Computer Science.

MAJORS

Bachelor of Science in Computer Science for students in the College of Arts and Sciences

Students must complete the Core, a Track, and the Science & Ethics requirements.

Core

Computer Science (20 credits)

- CSC 120 - Computer Programming I
- CSC 220 - Computer Programming II
- CSC 314 - Computer Organization and Architecture
- CSC 517 - Data Structures and Algorithm Analysis
- CSC 527 - Theory of Computing
- CSC 531 - Introduction to Software Engineering
Mathematics (17 Credits)

- MTH 111 - Calculus I
- MTH 112 - Calculus II
- MTH 210 - Vectors and Matrices
- MTH 224 - Introduction to Probability and Statistics
- MTH 309 - Discrete Mathematics I

Comprehensive Track (Available to all students)

- CSC 519 - Program Languages
- CSC 521 - Principles of Computer Operating Systems
- CSC 523 - Database Systems
- CSC 524 - Computer Networks
- At least 8 credits of approved electives (note: CSC 322 is prerequisite to CSC 521 and CSC 524)

The Comprehensive Track provides coverage of the topics in Computer Science prescribed by the Association of Computing Machinery curriculum and the ABET Computing Accreditation Commission.

Flexible Track (Available to all students)

- At least 20 credits of approved electives

Scientific Computing and Visualization Track

(Requires permission of the Director of Undergraduate Studies)

- CSC 529 - Introduction to Computer Graphics
- CSC 547 - Computational Geometry
- 3 credits from CSC 410 - Computer Science Project Planning-CSC 411 - Computer Science Project Implementation
- MTH 311 - Ordinary Differential Equations or MTH 515 - Ordinary Differential Equations
- MTH 320 - Introduction to Numerical Analysis or MTH 520 - Numerical Analysis I
- At least 5 credits of approved electives

Cryptography and Security Track

(Requires permission of the Director of Undergraduate Studies)

- CSC 507 - Data Security and Cryptography
- CSC 521 - Principles of Computer Operating Systems
- CSC 524 - Computer Networks
- 3 credits from CSC 410 - Computer Science Project Planning-CSC 411 - Computer Science Project Implementation
- MTH 505 - Theory of Numbers or MTH 509 - Discrete Mathematics II or MTH 561 – Abstract Algebra I
- At least 5 credits of approved electives (note: CSC 322 is prerequisite to CSC 521 and CSC 524)
Graphics and Games Track

(Requires permission of the Director of Undergraduate Studies)

- CSC 329 - Introduction to Game Programming
- CSC 529 - Introduction to Computer Graphics
- CSC 545 - Introduction to Artificial Intelligence
- 3 credits from CSC 410 - Computer Science Project Planning-CSC 411 - Computer Science Project Implementation
- At least 8 credits of approved electives. In addition to the generally approved electives, the following are approved for the Graphics and Games track:
  - EEN 596 – Maya Animation
  - MMI 504 - Audio Analysis & Synthesis
  - MMI 505 - Musician – Machine Interfaces
- The courses used to meet the Science requirement must include either
  - PHY 101 - College Physics I or
  - PHY 205 - University Physics I

Science & Ethics Requirement

The Computer Science major requires 13 credits of Science. The Science courses must include an approved two semester sequence of courses with laboratory. Courses may be taken in Biology, Chemistry, Environmental Science, Geological Science, Marine Science, Physics, and Physical Science. The Science courses must be acceptable for the Natural Science requirements in the College of Arts and Sciences, for Bachelor of Science students. The Computer Science major requires completion of the Ethics course PHI 115. This course is acceptable for the Arts & Humanities requirements of the College of Arts and Sciences.

Approved Electives

- Any CSC 3XX, CSC 4XX, CSC 5XX (maximally 6 credits from CSC 40X - Computer Science Practicum)
- CIS 360 - Analysis of Information Systems
- CIS 465 - Applied Software Project Development (instead of CSC410/CSC411)
- EEN 414 - Computer Organization and Design
- EEN 417 - Embedded Microprocessor System Design
- EEN 514 - Computer Architecture
- EEN 532 - VLSI Systems
- EEN 542 - Digital Integrated Circuits
- EEN 574 - Agent Technology
- EEN 577 - Data Mining
- MMI 505 – Musician – Machine Interfaces
- MTH 320 - Introduction to Numerical Analysis
- MTH 509 - Discrete Mathematics II
- MTH 520 - Numerical Analysis I
- MTH 521 - Numerical Analysis II
- MTH 524 - Introduction to Probability Theory
- MTH 525 - Introduction to Mathematical Statistics
- MTH 528 - Combinatorics
Medical Informatics Major for Bachelor of Science students in the College of Arts and Sciences

This program leads to a B.S. degree in Computer Science, tailored to the needs of students who are planning to work in a medical environment after graduation, including pre-medical, pre-dental, and pre-nursing students. The Medical Informatics program consists of three parts: (1) the basics of hardware and software systems, (2) information storing, retrieval, processing, and analysis, and (3) the application of the knowledge acquired in a medical environment. Students must complete the courses listed below, and an internship in medical information systems at a hospital or medical center. The Department will help students find an internship. Students in the Medical Informatics program will have enough flexibility to include all courses necessary for pre-medical or pre-dental curriculum within a 120 credit hour plan of study; students may wish to consult the University of Miami pre-medical guide.

Computer Science (26 credits)
- CSC 120 - Computer Programming I
- CSC 220 - Computer Programming II
- CSC 314 - Computer Organization and Architecture
- CSC 517 - Data Structures and Algorithm Analysis
- CSC 521 - Principles of Computer Operating Systems
- CSC 523 - Database Systems
- CSC 531 - Introduction to Software Engineering
- CSC 555 - Multimedia Systems

Mathematics (17 credits)
- MTH 111 - Calculus I
- MTH 112 - Calculus II
- MTH 210 - Vectors and Matrices
- MTH 224 - Introduction to Probability and Statistics
- MTH 309 - Discrete Mathematics

Other (9 credits)
- CIS 360 - Analysis of Information Systems
- MTH 542 - Statistical Analysis or
- IEN 312 - Applied Statistical Methods
- CSC 412 - Internship, approved by the Coordinator of the Medical Informatics Program

Bachelor of Science in Computer Science for students with a Second Major in Science, in the College of Arts and Sciences

Bachelor of Arts in Computer Science for students in the College of Arts and Sciences

Core

Computer Science (20 credits)
- CSC 119 - Computers and Society or
- CSC 210 - Computing for Scientists or
- 3 credits from CSC 3XX, CSC 4XX, CSC 5XX or
- CIS 120 - Introduction to Computer Information Systems or
- CIS 320 – Introduction to Programming or
- GEG 199 – Introduction to GIS or
- MSC 321 – Scientific Programming for Atmospheric Sciences
University of Miami Bulletin, 2009-2010
Undergraduate, College of Arts and Sciences

- CSC 120 - Computer Programming I (note: MTH 108 is corequisite to CSC 120)
- CSC 220 - Computer Programming II
- CSC 314 - Computer Organization and Architecture
- CSC 322 - C Programming and UNIX
- CSC 531 - Introduction to Software Engineering

Mathematics (6 credits)
- MTH 111 - Calculus I
- MTH 309 - Discrete Mathematics

Electives

6 approved credits from
- Any CSC 3XX, CSC 4XX, CSC 5XX
- BIL 552 - Bioinformatics Tools
- CIS 360 - Analysis of Information Systems and
- CIS 423 - Database Management Systems
- CIS 430 - Business Telecommunications
- CIS 465 - Applied Software Project Development (instead of CSC410/CSC411)
- EEN 414 - Computer Organization and Design
- EEN 514 - Computer Architecture
- EEN 368 - Internet Computing I and
  EEN 568 - Internet Computing II or EEN 576 - Internet and Intranet Security
- EEN 567 - Database Design and Management (or equivalent) and
  EEN 577 - Data Mining
- MMI505 - Musician-Machine Interfaces (for Music Engineering students only)

Computer Science as a Second Major

A second major in Computer Science is available to all students. A second major in Computer Science requires completion of the requirements of either the 70 credit Bachelor of Science version or 33 credit Bachelor of Arts/second major version.

MINOR

A minor in Computer Science requires completion of the following:

- CSC 120 - Computer Programming I
- CSC 220 - Computer Programming II
- CSC 314 - Computer Organization and Architecture
- 6 credits from CSC 3XX, CSC 4XX, CSC 5XX

NOTES
- A grade of C- or better is required in all CSC courses in a major, honors, or minor.
- The overall GPA for CSC courses in a major must be 2.5 or better.
- For all Computer Science majors, at least 15 credits of CSC courses must be completed at the University of Miami.
- For the Computer Science minor, at least 9 credits of CSC courses must be completed at the University of Miami.

138
DEPARTMENTAL HONORS

In addition to the University’s requirements for Departmental Honors, Departmental Honors in Computer Science requires completing a major and 6 additional approved credits (all CSC 4XX and CSC 5XX courses are approved). The major or additional credits must include at least 3 credits from CSC 410 and CSC 411.

Computer Science Course Listing
INTRODUCTION

The major in Criminology provides a comprehensive understanding of crime and the criminal justice system. The major prepares students to assume roles of leadership in this critical area of modern society. Courses are designed to review theory, research, and applications of knowledge regarding delinquency and crime, as well as to understand the manner in which offenders are processed. Students learn about the nature and extent of crime, different types of crime, and theories to explain crime. In addition, detailed analyses are made of the functions of the law, police, courts, and correctional systems and the ways in which these are linked to broader aspects of society. Students may also minor in Criminology. The Criminology major and minor are administered through the Department of Sociology.

EDUCATIONAL OBJECTIVES

CRIMINOLOGY courses have several broad objectives, including:

1. General education and development of critical thinking skills.
2. Undergraduate preparation for pursuing careers in such fields as law and society, in the local and state criminal justice systems (e.g., juvenile probation officer, pretrial services officer, crime analyst for criminal justice agencies), or in federal agencies (e.g., DEA).
3. Preparation for graduate study in criminology, criminal justice, sociology, or other social and behavioral sciences.
4. Preparation for law school.

DEGREE PROGRAMS

Students may earn a Bachelor of Arts degree in Criminology. The Department of Sociology also offers graduate degrees in Sociology (M.A., Ph.D.) with emphases in criminology and in other areas (race/ethnic relations and medical sociology).

MAJOR

The major in Criminology consists of 31 credit hours including SOC 101, SOC 210, SOC 211, SOC 212, SOC 371, and SOC 470. Fifteen additional credit hours in Sociology courses are required. It is highly recommended that students primarily take such classes that have criminological foci and emphases (e.g., SOC 370). Additional information and course descriptions are listed under the Department of Sociology in this Bulletin. All courses taken for credit toward the major must be passed with a grade of C- or higher with an overall GPA of 2.0. Normally students cannot transfer more than 12 credits toward the major.
MINOR

The minor in Criminology consists of 15 credit hours, including SOC 101 and SOC 371. A student majoring in Sociology may not minor in Criminology. All courses taken for credit toward the minor must be passed with a grade of C- or higher with an overall GPA of 2.0. Additional information and course descriptions are listed under the Department of Sociology in this Bulletin.

DEPARTMENTAL HONORS

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Criminology. They must also achieve a minimum of B in all Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.

2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee in the Department of Sociology. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499 (Honors I & II). The student should have the same professor for all six credits.

3. Recruitment of eligible students is by departmental invitation at the beginning of a student’s junior year.
ECONOMICS
www.bus.miami.edu

INTRODUCTION

Economics uses the idea of maximizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of human behavior. The program provides excellent preparation for careers in business, in government, and in international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

MAJOR

The major in economics consists of at least 24 credits, which must include:
ECO211
ECO212
ECO301
ECO302
MTH109 or MTH111, is required of all Economics majors and minors. The calculus course must be completed before enrolling in ECO302.

MINOR

Arts and Sciences students may minor in economics and are required to take ECO211, ECO212, ECO302 and two additional economics courses for a total of 15 credits.

Note: All courses submitted for the major or minor must be completed with a grade of C- or higher and with an overall grade point average of C or higher.

Academically qualified students may elect to take courses from the Departments curriculum for Honors credit.

Economics Course Listing
ECOSYSTEM SCIENCE AND POLICY - Dept. Code: ECS
www.cesp.miami.edu

INTRODUCTION

The goal of the undergraduate program in Ecosystem Science and Policy (ECS) is to educate the next generation of environmental leaders. The ECS program provides students with a broad background in environmental issues from a variety of perspectives, along with in-depth education in an area of specialization.

EDUCATIONAL OBJECTIVES

The ECS major offers a series of problem-based learning courses, culminating in a capstone course in the senior year team-taught by scientist and non-scientist faculty, emphasizing integration of science and policy approaches to real-world environmental issues. This preparation gives students both the theoretical background and technical skills to pursue an environmental career, including teaching and research as well as for careers in government and private industries concerned with the environment.

DEGREE PROGRAMS

The Ecosystem Science and Policy program offers two undergraduate degree major programs: a Bachelor of Science (B.S.) and a Bachelor of Arts (B.A.). The ECS degree is a double major program. Students earning a B.S. in ECS must also complete a second major from one of the following disciplines: biology, biochemistry, chemistry, computer science, geological sciences, mathematics, microbiology, or physics. Students earning a B.A. in ECS must also complete a second major in a non-science area or the B. A. major in Geological Sciences or the B. A. major in Biology. Students are required to complete either a research internship with an environmental organization or a research project with the Center for Ecosystem Science and Policy or with other UM faculty. Students earning dual degrees, for example from the College of Engineering and College of Arts and Sciences, must complete the ECS major and a minor in another area (typically mathematics).

Only those courses passed with a grade of “C-” or better in the ECS core may be applied to the major or minor. All ECS majors are required to maintain an overall cumulative grade point average of 2.5 or better in order to graduate with a double major in ECS.

MAJOR

Bachelor of Science Degree: The B.S. degree is recommended in preparation for careers in science, including graduate schools, professional schools, technical careers in government and private industries concerned with the environment, and high school or college teaching. In addition to the College of Arts and Sciences general degree requirements, the B.S. requirements are as follows:
ECS Core:

ECS 111, 112, 113, (201 or 202), 301, 302, 403, and either ECS 401 (internship) or 402 (research)

In addition, students must take the following courses, which may fulfill the College of Arts and Sciences general education or second major requirements:

Science Core:

Biology: BIL 160, 161 and 235
Chemistry: CHM 111/113, 112/114
Environmental Pollution: CAE 240
Geological or Marine Sciences: One of GSC 110/114, or GSC 111 or MSC 111
Physics: PHY 101/106 or PHY 205, 206/208
Environmentally-related science electives to total 6 credits.

Mathematics:

As required by the College, all B.S. degree candidates must pass two semesters of calculus (MTH 110-112, MTH 111-112, or MTH 131-132) and one semester of a statistics course (MTH 224, PSY 204 or BIL 311).

Social Science Core:

Economics ECO 211 and 212 or Political Science POL 211 and 212
Environmentally-related social science elective to total 3 credits

Bachelor of Arts Degree: The B.A. degree is recommended in preparation for careers in law and government, including professional schools and careers in government and private industries concerned with the environment. In addition to the College of Arts and Sciences general degree requirements, the B.A. requirements are as follows:

ECS Core:

ECS 111, 112, 113, (201 or 202) 301, 302, 403, and either ECS 401 (internship) or 402 (research)

In addition, students must take the following courses, which may fulfill the College of Arts and Sciences general education or second major requirements:

Science Core:

Biology: BIL 103
Chemistry: CHM 101 or 111/113
Environmental Pollution: CAE 240
Geological Sciences: One of GSC 103, 105, 106 or GSC 110/114 or GSC 111
Marine Science: MSC 101 or 111
Environmentally-related science elective(s) to total 3 credits.

Mathematics:

As required by the College, all B.A. degree candidates must pass one of MTH 103, 108, 109, 111, or 131. All ESC majors must complete one semester of a statistics course (MTH 224, PSY 204 or BIL 311).
Social Science Core:
   Economics ECO 211 and 212 or Political Science POL 211 and 212
   Environmentally-related social science electives to total 9 credits (at least
   one of which must be at 300 level or above)

MINOR

Minor in Ecosystem Science and Policy:
   A minor in ECS is 15 credits and includes:
   ECS 111, 112, 113, one of 201 or 202, and two 300-level ECS courses (one of
   which must be either 301, or 302).

Ecosystem Science & Policy Course Listing
EDUCATION

INTRODUCTION

Degree in Teacher Education for Elementary and Secondary Schools

The School of Education in conjunction with the College of Arts and Sciences and the School of Music offers a degree program in teacher education. Students majoring in Elementary or Special Education may choose to earn their degree through the School of Education or the College of Arts and Sciences.

The program in Secondary Education enables a student to teach in a secondary school in the areas of English, Mathematics, Chemistry, Biology, Economics, Geography, History, International Studies or Political Science. Students wishing to earn certification in Secondary Education must complete a Bachelor of Arts or a Bachelor of Science degree in the College of Arts and Sciences with a major in Secondary Education. *

MINOR

TRADITIONAL EDUCATION MINOR

The requirements for a minor in education consist of 15-credits passed with a C or higher, with an overall GPA of 2.0 in courses selected from the list of acceptable TAL departmental courses. A minimum of six credits must be numbered 300 or higher. This minor does not lead to teaching credentials.

PROFESSIONAL TRAINING OPTION CERTIFICATE

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional component, one of the requirements to become a certified teacher in the State of Florida.

The PTO minor consists of 18-credits. Upon completion of the program participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a Temporary Teaching Certificate in the State of Florida.

* For specific information regarding required coursework, field experiences, and State requirements, please see an academic advisor in the School of Education.
Courses for the PTO minor are:

OTHER

All education programs are approved by the State of Florida Department of Education.

* For specific information regarding required coursework, please see an education advisor.
MINOR

The College of Engineering offers the student in the College of Arts and Sciences a variety of 15-credit minors designed to give the student a basic understanding of the technologies that support and shape our civilization. Minors may be elected in Civil, Architectural, Environmental, Electrical, Computer, Industrial, or Mechanical Engineering. The student is given considerable freedom in choosing courses in accordance with the student’s interests.

Faculty in the College are prepared to assist Engineering minors in the preparation of programs of study.

More detailed descriptions of these minors will be found in the COLLEGE OF ENGINEERING section of this Bulletin.
ENGLISH - Dept. Code: ENG
www.as.miami.edu/english

INTRODUCTION
The English Department offers programs for students interested in a liberal arts education directed toward careers in law, business, creative writing, secondary education, and university teaching and scholarship. Students who would like to learn more about any of these programs are encouraged to consult the Director of Undergraduate Studies in the Department of English, Ashe Bldg. 321.

EDUCATIONAL OBJECTIVES
English as a discipline offers an opportunity for a general humanistic education, and it develops skills in communication and analysis essential in most careers. An education in English teaches students to write, to think critically, to weigh values, and to communicate ideas; at the same time, it affords them a sense of beauty and informs them of the heritage of their own culture as well as others.

DEGREE PROGRAMS
The major in English leads to the degree of Bachelor of Arts.

MAJOR
Students majoring in English must earn 30 credits in English courses (36 credits for Departmental Honors) and must meet the requirements for one of the tracks described below:
The English Literature Major,
The Creative Writing Concentration,
The Concentration in British Literary History, or
The Women's Literature Concentration.

Credits earned for courses in freshman composition (ENG 105, 106, 107, and 208) may not be applied toward the total number of credits required for the major. In each English course, the English major must make a grade of C- or better, with an overall GPA in the major of 2.0.

ENGLISH LITERATURE MAJOR
Requirements for the English Literature Major are as follows:

1. Two of the following courses: English 201, 202, 205, 210, 211, 212, 213, 214, 215, 260, 261. (ENG 210 may be counted only once toward the fulfillment of this requirement.)

6 credits
2. Five literature courses numbered 300 or above, at least two of which must be numbered 400 or above, distributed as follows: two courses in literature before 1700, two courses in literature between 1700 and 1900, and one course in literature since 1900.  

3. Three additional English courses other than freshman composition (i.e., any three courses designated ENG and numbered 200 or above, excluding ENG 208).

Total: 30 credits

CREATIVE WRITING CONCENTRATION
Requirements for the Creative Writing Concentration are as follows:

1. Admission to the Creative Writing Concentration is based on a writing sample submitted to the Director of Creative Writing. (For information about the writing sample, see the English Department Web site, www.as.miami.edu/English).

2. Completion of one of the following workshop tracks:

   Fiction track:  
   ENG 290  
   ENG 390  
   ENG 404 (to be taken twice) or ENG 404 (taken once) plus ENG 408

   Poetry track:  
   ENG 292  
   ENG 392  
   ENG 406 (to be taken twice) or ENG 406 (taken once) plus ENG 408

3. Two of the following courses: English 201, 202, 205, 210, 211, 212, 213, 214, 215, 260, 261.

4. Four more literature courses numbered 300 or higher, at least two of which must cover literature earlier than 1900. Two of the four courses must be 400-level.

Total: 30 credits

CONCENTRATION IN BRITISH LITERARY HISTORY
Requirements for the Concentration in British Literary History are as follows:

1. English 211 and 212.

Total: 6 credits
2. Eight courses numbered 300 or above, at least four of which must be numbered 400 or above, distributed as follows:
   One course on Shakespeare;
   One course on the history of criticism or literary theory;
   Two additional courses in British literature (or a combination of British and other literatures) before 1800;
   Two additional courses in British literature (or a combination of British and other literatures) after 1800;
   Two electives.  
   **24 credits**

3. Recommended: ancillary courses in Art History, Music, History Philosophy, in consultation with departmental advisor.

**Total: 30 credits**

**WOMEN’S LITERATURE CONCENTRATION**

Students considering this concentration may want to take a special Women’s Studies section of English 106 in the freshman year.

Requirements for the Women’s Literature Concentration are as follows:

1. English 215 and two of the following courses: English 201, 202, 205, 210, 211, 212, 213, 214, 260, 261.  
   **9 credits**

2. Five **literature** courses numbered 300 or above, at least two of which must be numbered 400 or above, distributed as follows: two courses in literature before 1700, two courses in literature between 1700 and 1900, and one course in literature since 1900.  
   **15 credits**

3. Two additional English courses other than freshman composition (i.e., any two courses designated ENG and numbered 200 or above, excluding ENG 208).  
   **6 credits**

4. Three of the courses in 2 and 3, above, must be chosen from the following: English 372, 373, 374, 490, 494, or any English course numbered 200 or higher (other than ENG 215) cross-listed with Women’s and Gender Studies.  
   **Total: 30 credits**

**MINOR**

The student minoring in English completes, with a grade of C- or better in each course and with an overall GPA in the minor of 2.0, at least 15 credits at the 200-level or above beyond the credits earned for freshman composition. The 15 credits must be distributed as follows:

1. One **literature** course at the 200-level;  
2. A second **literature** course, at either the 200-level or the 300-level;  
3. A third **literature** course, at the 400-level;  
4. Two additional English courses other than freshman composition (i.e., any two courses designated ENG and numbered 200 or above, excluding ENG 208).
DEPARTMENTAL HONORS

DEPARTMENTAL HONORS IN LITERATURE
Students interested in seeking Departmental Honors in English should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the English Literature Major, the candidate for Departmental Honors must:

1. Take at least three literature courses at the 400-level or higher in fulfilling requirement 2 of the English Literature Major.

2. Complete a six-credit Senior Thesis. This thesis is a documented essay of about 35 double-spaced typewritten pages on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497, Special Topics/Independent Study, for the first semester of the project, and in ENG 498, Senior Thesis, for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors.  

3. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.

4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credits

DEPARTMENTAL HONORS IN CREATIVE WRITING
To enter the program a student must have achieved by the end of the junior year a 3.5 average in English courses (including courses in creative writing) and a 3.3 average overall. In addition to meeting the requirements for the Creative Writing Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses at the 400-level or higher in fulfilling requirement 4 of the Creative Writing Concentration.

2. Complete a six-credit Senior Creative Writing Project. The student undertaking this project normally registers in ENG 497, Special Topics/Independent Study, for the first semester of the project, and in ENG 499, Senior Creative Writing Project, for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors.

3. Receive for the project a recommendation for honors by the director of the Senior Creative Writing Project and by one other faculty reader designated by the Director of Creative Writing.

4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credits
DEPARTMENTAL HONORS IN WOMEN’S LITERATURE
To enter the program a student must have achieved by the end of the junior year a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the Women’s Literature Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses at the 400-level or higher in fulfilling requirements 2 and 3 of the Women’s Literature Concentration.

2. Complete a six-credit Senior Thesis. This thesis is a documented essay of about 35 double-spaced typewritten pages on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497, Special Topics/Independent Study, for the first semester of the project, and in ENG 498, Senior Thesis, for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors.  

3. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.

4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credits

English Course Listing
INTRODUCTION

Geography and Regional Studies is concerned with the spatial or locational dimensions of environmental phenomena and organizational patterns of human activity on the earth’s surface. Concretely, geography deals with the analysis of topics ranging from environmental problems, political boundary disputes, and ethnic conflict to applied and more localized issues such as establishing new voting districts to provide better representation for ethnic minorities, determining where the next freeway link should be built, assessing the location of oil pipelines, or various matters regarding urban planning and governance.

Traditionally, geographers have regional expertise combining topical and geographic fields of knowledge: for example, population issues in the Caribbean, sustainable development in the Amazon basin, economic and political integration in Europe, territorial conflict in the Middle East, or the growth of megacities in South Asia.

Geographers are prepared for positions in teaching, government, private business, urban and regional planning, cartography, geographic information systems (GIS), conservation, and environmental analysis. The University of Miami’s Department of Geography and Regional Studies offers a wide range of specializations that relate to the social sciences at large and especially the field of international studies. Processes of globalization have increased the importance of the geographical analysis of human society and particularly the linkages between global processes and local outcomes and the growing interconnections of places across the globe.

EDUCATIONAL OBJECTIVES

The Department of Geography and Regional Studies offers specializations in areas such as:
- International migration
- Urban geography and international urbanization
- Environmental studies
- International and regional development
- Globalization

In addition, there is a range of courses on world regions such as Europe, the Middle East, Middle America, South America, etc. Finally, the department offers a set of courses that provide training in indispensable skills for everyone entering the present-day labor market:
- Research methodology
- Statistics
- Computer cartography
- Geographic information systems
- Remote sensing of the environment
MAJOR

GEOGRAPHY AS A FIRST MAJOR
REQUIREMENTS FOR GEOGRAPHY AND REGIONAL STUDIES
Students in the College of Arts and Sciences who take Geography and Regional Studies as a major must complete the following requirements:

I. Students must take at least 30 credits in geography courses.

II. For a geography course to count towards the major, the student must achieve a grade of C- or higher.

III. The overall GPA in courses toward the major must be 2.00 or higher.

IV. Majors must successfully complete three of the following courses:
   GEG 105
   GEG 110
   GEG 120
   GEG 199

GEOGRAPHY AS A SECOND MAJOR
Students who take Geography and Regional Studies as a second major must complete the following requirements:

I. Students must take at least 24 credits in geography courses.

II. For a geography course to count towards the major, the student must achieve a grade of C- or higher.

III. The overall GPA in courses counting toward the major must be 2.00 or higher.

IV. Majors must successfully complete two of the following courses:
   GEG 105
   GEG 110
   GEG 120 or GEG 121
   GEG 199

MINOR

Students in the College of Arts and Sciences who take Geography as a minor must meet the following requirements:

I. Completion of at least 15 credits in Geography courses.

II. For a Geography course to count towards the minor, the student must achieve a grade of C- or higher.

III. The overall GPA in courses counting toward the minor must be 2.00 or higher.

IV. At least 6 credits must be at the 300-level or higher.
OTHER

INTERNSHIP CREDIT

Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center. Upon approval, 3 to 4 credits may be earned with an internship. These credits will be included in the fulfillment of major requirements (GEG 535).

OVERLAPPING COURSES AMONG DUAL MAJORS

Of the coursework at the 200-level or higher in Geography and Regional Studies, no more than 6 credits may count double towards the other major.

STUDY ABROAD

Majors are strongly encouraged to study abroad for a summer, a semester, or an entire year. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

ACADEMIC STANDING

Only courses in which the grade of C- or better is attained may be counted towards the major or minor, and students must maintain a GPA of 2.00 or better in all required courses.

For more information, e-mail ssr@miami.edu, come by the Department of Geography and Regional Studies at 229 Ferre, or call (305) 284-4087, to make an appointment.

Geography and Regional Studies Course Listing
INTRODUCTION

Geological Sciences is concerned with Planet Earth, its origin, evolution, structure, internal and surface processes, mineral resources, environmental preservation, global dynamics, paleoclimate reconstruction, and life history. Geologists use their knowledge of chemistry, biology, physics and mathematics to solve Earth problems.

EDUCATIONAL OBJECTIVES

Geological Sciences undergraduates are prepared for careers in industry as well as graduate study in geosciences, the environmental sciences, and marine sciences. Career paths include research and teaching, as well as employment in the petroleum and mineral industries and in industries and government organizations concerned with energy resources, geodynamics, the marine environment, conservation, and climate change.

DEGREE PROGRAMS

The Department of Geological Sciences offers three undergraduate degree major programs and two double major programs:

Bachelor of Science (B.S.)
Bachelor of Arts (B.A.) in Geological Sciences
Five-year Master of Science Program (M.S.)
Geological Sciences/Marine Science (Double Major)
Geological Science/Ecosystem Science and Policy (Double Major)

For the Geoscience Graduate Program please see the Division of Marine Geology and Geophysics at the RSMAS campus.

MAJOR

BACHELOR OF SCIENCE (B.S.)

The B.S. in Geological Sciences is recommended as preparation for graduate school and careers in professional research and science teaching. As described in sections 3 and 4 below, a B.S. in Geological Science requires a strong foundation in mathematics and several applied sciences.

1. Students must complete a core curriculum of 34 credits (GSC 110 or 120; 114 or 115; 111; 260; 360; 380; 410 or 420; 440; 480, and 482) with a grade of C- or better and with an overall GPA of 2.0.

2. In addition, the B.S. candidates must complete a summer field course (GSC 580 or an approved field course through another university).
The field course (GSC 580 or an approved equivalent at another University) is required for B.S. students and encouraged for others in order to gain practical experience in the skills of observation, interpretation, measuring, sampling, mapping and report writing. This requirement, when completed, has proven to be a strong asset when applying for graduate work or employment.

3. As required by the College, all B.S. degree candidates must pass two semesters of calculus (MTH 111-112 or MTH 131-132) and either (a) one semester of a computer course or (b) a statistics course.

4. Students are also encouraged to take one or more of MTH 210, MTH 211, MTH 224, MTH 311, MTH 312. CHM 111 is required (CHM 112, CHM 113, and CHM 114 are all recommended). Two semesters of college physics (PHY 101-102) are required. Two semesters of university physics (PHY 205-206) are recommended in lieu of college physics. PHY 205-206 are also required for GSC 420 (Geophysics), and strongly recommended for the Honors degree.

5. All Geological Sciences majors must also complete the “Required Areas of Study” of the College (see under COLLEGE OF ARTS AND SCIENCES in this Bulletin).

6. B.S. students must choose a minor from the following:
   Biology
   Chemistry
   Computer Science
   Marine Science
   Mathematics
   Physics
   Ecosystem Science and Policy

**BACHELOR OF ARTS in GEOLOGICAL SCIENCES**

The B.A. in Geological Sciences is recommended for science oriented students who plan to use an understanding of Earth systems in their professional careers but desire a broader liberal arts education or are pursuing a dual major outside the sciences. B.A. students must complete a core curriculum of 24-27 credits including:

Two courses in the GSC 101, 102 or 111, 103 or 110 or 120 series; GSC 114 or 115; 260; 360; 482; two of 380, 410, 440, and 480 or 540 with a grade of C- or better and with an overall GPA of 2.0.

In addition, B.A. students are strongly encouraged to take the summer field course (GSC 580) and/or field courses offered during spring break (GSC 231 or GSC 311).

**FIVE YEAR B.S. /M.S. IN GEOLOGICAL SCIENCES AND MARINE GEOLOGY**

A 5-year B.S. /M.S. in Geological Sciences and Marine Geology allows qualified students to complete a master’s degree in one year of study beyond the B.S.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences.

The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).
Undergraduate requirements are listed under the B.S. degree above with the Honors option. By the beginning of their junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor. Contact the Geological Sciences chair at the departmental office (305-284-4253) for more information.

**DOUBLE MAJOR**

Double majors are offered in cooperation with the Marine and Atmospheric Science Program and the Ecosystem Science and Policy Program.

1. Marine Science (MSC): This program consists of a major in the Geological Sciences and a major in Marine Science. Interested students should read the information under Marine and Atmospheric Science in this Bulletin and contact the Marine Science office (184 Cox Science or 284-2180) for details.

2. Ecosystem Science and Policy (ECS): This program consists of a major in Geological Sciences and a major in Ecosystem Science and Policy (ECS). Interested students should read the information under ECS in this bulletin and contact the ECS office (058 Cox).

**MINOR**

The minor requirements are specified by each department and are listed under Departmental headings in the Bulletin.

**DEPARTMENTAL HONORS**

Honors in Geological Sciences may be earned by students in good standing within the University Honors program. In addition to their general requirements, a student must have an overall GPA of 3.0 or better, and also perform research beginning prior to their senior year, resulting in a written Honor’s Thesis and oral defense approved by the student’s thesis advisor.
INTRODUCTION

History is the systematic study of the past. The study of history includes training in how to gather information, how to research issues and problems, how to analyze data and construct arguments, and how to communicate ideas in writing. These are essential skills, tools that are prized in the world beyond the university. A major in history is an excellent beginning and solid stepping stone to professional school and the business world. For goals ranging from law to journalism, and from medicine to the MBA, history serves as a versatile undergraduate major. Multinational businesses demand that their executives understand the peoples and cultures around them, and be able to communicate that understanding effectively. If an occupation demands critical thinking and analysis, a background in history is invaluable.

EDUCATIONAL OBJECTIVES

All history courses expose students to historical interpretation and critical analysis. Courses at the 100 and 200 levels are intended as introductions to broad fields of history and are open to students with no previous college-level history experience. All 300 level history courses are writing intensive, are graded principally through essay examinations and short papers, and count toward the fulfillment of the University of Miami writing across the curriculum requirement. The normal prerequisite for 300 level history courses is 3 credits in history at the college level. Courses at the 400 level are programs of individual directed study. Permission of the instructor is required in each case, and such permission is normally given only to students who have completed a lower-level course with the faculty member in question. Courses at the 500 level require a 300 level history course as prerequisite. All 500 level courses deal extensively with the historiography of their particular subjects, and all require a written research project as a major component of the work of the course.

MAJOR

A major in history consists of at least 30 credits in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credits may include history courses taken for general distribution requirements, and must include at least 18 credits at the 300 level or above, of which at least 6 credits must be taken in the form of 500-level seminars. (HIS599 Independent Research does not count). All courses for majors will be selected by students in consultation with advisors designated by the department.

Credits from other institutions may be counted toward the major or minor, and to general distribution requirements as appropriate, but departmental approval is required in each case. Students who complete the Advanced Placement course in either United States or European history and pass the examination with a grade of 4 or 5 may receive credit in the appropriate history courses. Students who complete the International Baccalaureate program and pass the higher level history examination with a grade of 6 or higher will receive 3 credits in the appropriate entry-level history course. (However, in some cases
students will only receive elective credit). At least 18 credits of the major and at least 9 credits of the minor must be completed at the University of Miami.

The department offers a variety of study abroad options with credit toward the major or minor.

**MINOR**

A minor in history consists of at least 15 credits in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credits may include history courses taken for general distribution requirements, and must include at least 9 credits at the 300 level or above. Courses for minors should be selected in consultation with a departmental advisor.

**DEPARTMENTAL HONORS**

History majors with a cumulative GPA of at least 3.6 in history courses may earn departmental honors by completing a research project of 6 credits judged worthy of honors by a departmental committee, provided that at least 6 courses worth 18 credits have been completed at the University of Miami.

**OTHER**

For the requirements of the M.A. and Ph.D. degrees in history see the Bulletin of the Graduate School.

[History Course Listing](#)
INTERNATIONAL STUDIES - Dept. Code: INS
http://www.as.miami.edu/international-studies

INTRODUCTION

The International Studies major provides a focused educational experience aimed at familiarizing students with the key structural features and dynamics of the international system and preparing them to enter the growing international job market. Processes of globalization, in part driven by global capital flows, expanding trade and the unrelenting development of communication and information technologies, have affected virtually everyone in every country, often in ways we are just beginning to understand. These developments often pose serious problems for government and other societal institutions, while also creating a demand for individuals who understand international processes. Jobs in virtually all sectors have acquired a decidedly international dimension, whether in trade, tourism, finance, public policy, government, or education. INS Graduates have moved on to the corporate world, the public sector, started their own businesses, or have continued their studies at the graduate level (i.e. Law, Business, and International Studies).

EDUCATIONAL OBJECTIVES

International Studies seeks to provide students with the ability to understand:

- International politics within the context of interstate relations and foreign policy.
- International economics and its sub-discipline international political economy, including such issues as trade and production, money and finance, and development.
- Social science research methods including qualitative, quantitative, comparative case study and formal modeling.

Students are encouraged to explore interdisciplinary options that further their understanding of international studies. This type of coursework can be taken in other disciplines offered at the university or taken outside the institution, either through exchange programs or other inter-institutional options provided by UM. Students will demonstrate the ability to synthesize the various thematic areas of the discipline through required participation in advanced seminars. Seminars will stress analytical participation, oral presentations and the ability to interpret and critique core theoretical readings.

DEGREE PROGRAMS

International Studies provides both a major and minor option for students. The flexibility of the program often allows students to double major without the need to extend their university studies. Students are encouraged to speak with the International Studies advisor to explore such possibilities.
MAJOR

Requirements for the Major in International Studies (30 credits)

The International Studies major consists of three components:
I. Core Requirements
II. Thematic Core
III. INS Electives

I. Core Requirements (12 credits)
INS 101* Global Perspectives – Introduction to International Studies.
INS 102 Global Economics.
INS 201* Globalization and Change in World Politics.
INS 202 Research Methods in International Studies.

* These courses must be completed before taking the Thematic Core courses.

II. Thematic Core (12 credits):
Students should choose at least one course from each of the following four fields. Additional classes will be counted toward the elective portion of the INS major, if taken. Other courses, including classes in other disciplines, may be taken with the approval of the INS Advisor.

International Politics, Foreign Policy and Peace Studies:
INS 341 Nationalism, Ethnicity and Conflict
INS 540 International Peace and Conflict Resolution
INS 542 Drug-Trafficking in the Americas
INS 560 US Foreign Policy
INS 561 Negotiation and Bargaining
INS 566 US-Latin American Relations

Comparative Studies of Politics and Societies in a Globalizing World:
INS 330 Introduction to Comparative Analysis
INS 335 Democratization
INS 533 Transnational Social Movements
INS 534 The Military, State and Society
INS 565 The World Before European Domination
INS 584 Latin American Thought

International Economics, Political Economy and Development:
INS 320 Global Economics II
INS 321 Global Political Economy
INS 322 Economics of Development and Environment
INS 420 Global Trade
INS 520 Environmental Economics and Policy
INS 571 International Development and Human Welfare

International Law, Organizations, and Global Governance:
INS 460 United Nations Seminar
INS 564 International Law
INS 570 Globalization and Health
INS 573 Disasters, Terrorism and Global Public Health
INS 591 The European Union
INS 595 European Social Movements
III. INS Electives and Interdisciplinary Options (6 credits):
Students are required to take a total of 6 additional credits of elective course work from INS courses at the 300 level or above. With the approval of the INS Advisor, students may take courses from other departments outside of INS such as Geography and Regional Studies, History, Anthropology, Sociology, Political Science, Economics, Religion, Art History, Foreign Languages, Environmental Science, et cetera. Appropriate study abroad courses, an approved internship (INS 519), or an honors thesis (INS 418 & 419) may also be used to fulfill elective credit requirements.

Important Advising Notes for all International Studies Majors

1) Double Counting
Of the combined courses in the Thematic Core and the INS Electives, no more than 6 credits may count double towards a second major. A student may not count any course used to fulfill the requirements of the INS major toward a minor requirement.

2) Study Abroad
Students are strongly encouraged to study abroad for a summer, a semester, or an entire year, depending on the program. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

3) Internship Credit
Students are encouraged to find a suitable internship during their undergraduate career. Upon approval by an advisor in the International Studies Undergraduate Program Office, 3 credits may be earned with an internship (INS 519), either toward the major or as elective credits (depending on the relevance of the particular internship to the INS major). The University’s Toppel Career Planning and Placement Center regularly advertises internships.

4) Academic Standing
Only courses in which a grade of C- or better is attained, may be counted towards the International Studies major and students must maintain a GPA of 2.75 or better in all major requirements (30 credits).

MINOR

Requirements for the Minor in International Studies (15 credits)
The International Studies Minor consists of two parts: (I) a 6-credit set of introductory courses; (II) 9 credits in advanced courses.

I. Base (6 credits)
Two of the following core requirements must be taken:
INS 101 — Global Perspectives - Introduction to International Studies
INS 102 — Global Economics
INS 201 — Globalization and Change in World Politics
INS 202 — Research Methods in International Studies
II. Advanced courses (9 credits).
In order to graduate with a minor in International Studies, students must take three INS courses at the 300-level or above. Advanced level courses from other departments may be taken if approved by the INS advisor.

Only courses in which a grade of C- or better is attained may be counted towards the minor in International Studies, and students must maintain a GPA of 2.75 or better in all minor requirements (15 credits).

DEPARTMENTAL HONORS

The Department of International Studies encourages its majors to intensify and deepen their knowledge of the field through its departmental honors program. The program is designed to give students the opportunity to explore various topics and problems in international studies that are of particular interest to them, to work more closely with departmental faculty, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in international studies and related fields.

Minimal requirements for the program are as follows:
1) a cumulative grade point average of at least 3.30;
2) a cumulative grade point average in international studies of at least 3.50; and
3) a thesis that is approved, with a grade of at least B+, by a member of the departmental faculty.

After reaching agreement with a member of the faculty who will serve as the honors thesis advisor, students writing a senior honors thesis will enroll in INS 418 and 419, Honors Thesis, for a total of six credits [the credits may be spread over two semesters or taken in a single semester]. The thesis itself is expected to be an extended, coherent work of scholarship on an issue of relevance in the field of international studies.
THE GEORGE FELDENKREIS PROGRAM IN JUDAIC STUDIES – DEPT.
CODE: JUS
www.as.miami.edu/judaic

INTRODUCTION

The George Feldenkreis Program in Judaic Studies is a broad, flexible, interdisciplinary program designed for undergraduates to gain an understanding of Jewish civilization and its diverse cultural experiences. The program, which is non-theological in orientation, is an academic exploration of the multi-faceted, socio-historical, 4,000-year record of the Jewish people. Courses taught in, and cross-listed with the Program, highlight the variety of cultural, political, social, and religious experiences of Jews in different times and places.

EDUCATIONAL OBJECTIVES

The program is structured to provide an in-depth liberal arts education that will constitute a foundation for advanced academic study, professional careers in a variety of fields, and a more complex and rich understanding of the Jewish world. Judaic Studies courses frequently meet the requirements for both the Humanities and Social Sciences in the College of Arts and Sciences, the College of Engineering, the School of Communication and School of Business, and can be used to satisfy requirements by majors and non-majors.

MAJOR

THE MAJOR (ten courses – 30 credits):

1. Jewish Civilization: Society, Culture, and Religion (JUS 231). Its purpose will be to acquaint beginning students with the approaches and areas of inquiry common to the field of Judaic Studies.
2. An advanced seminar in Judaic Studies (JUS 401, JUS 410, or JUS 411).
4. A course in Hebrew at the 200-level or higher (which can be used simultaneously to fulfill the College of Arts and Sciences Language requirement).
5. One course in Ancient Jewish History and Society and one course in Modern Jewish History and Society. Courses will be designated appropriately by the Program Director each semester.
6. 15 more credits (5 courses) in classes listed in or cross-listed with Judaic Studies, 12 credits of which must be completed at the 300-level or higher. Students who complete HEB202 need only do 9 credits at the 300-level or higher.

MINOR

THE MINOR (five courses – 15 credits):

1. Jewish Civilization: Society, Culture, and Religion (JUS 231). Its purpose will be to acquaint beginning students with the approaches and areas of inquiry common to the field of Judaic Studies.
2. Survey of Jewish Literature (ENG 205).
3. A course in Ancient Jewish History and Society (to be designated as such by the Program Director each semester).
4. 3 more credits (1 course) in class listed or cross-listed with Judaic Studies, which must be completed at the 300-level or higher.
5. Any student who successfully completes the 5 courses in the UGalilee Program shall also be awarded a minor.

A grade of “C-” or better must be attained in each course taken for the major or the minor with an overall GPA of 2.0.

**NOTE:** The School of Education now offers a Minor in Jewish Education. For more information on this Minor, please see listing under the School of Education.

**DEPARTMENTAL HONORS**

Honors in Judaic Studies consists of the items listed above under the Major, plus an Honors Thesis and one additional elective at the 300 level or higher.

[Link to Judaic Studies Course Listing]
INTRODUCTION

Latin American Studies offers an interdisciplinary approach to learning about the cultures and societies of Latin America and the Caribbean. Undergraduate courses are offered in Africana Studies, American Studies, Anthropology, Architecture, Art and Art History, Biology, Communication, Economics, Geography, History, Journalism, International Studies, Marketing, English, Modern Languages and Literatures, Music, Musicology, Political Science, Religious Studies, Sociology, and Women’s and Gender Studies. The major in Latin American Studies is designed for the student who wants to acquire background knowledge about the area or who is interested in some aspect of Latin American and Caribbean affairs, such as government, law, business, research, journalism, or education. Students are strongly encouraged to spend at least one semester abroad on a program with a Latin American and Caribbean Studies component (see Office of International Education and Exchange Programs, 212 Allen Hall).

EDUCATIONAL OBJECTIVES

The goal of the BA in Latin American Studies is to acquire, advance and disseminate knowledge of the history, literature, culture, politics, economics, and natural and social sciences of the regions within an interdisciplinary framework, while at the same time emphasizing the languages and cultures of Hispanophone, Francophone and Lusophone Americas including the transnational study of Latin Americans, Caribbeans and their descendants in the United States. Students should leave the program with the following:

- the analytical and methodological tools needed to conduct interdisciplinary research;
- the ability to read, write and think critically about primary and secondary sources.
- a general knowledge of the different regions that comprise Latin America, the Caribbean and their Diaspora as well as a critical understanding that the geographic, political, and cultural boundaries that have traditionally defined the “area” as an object of study are not isomorphic and are connected to the interests of European and North American powers;
- a critical understanding of the competing ways in which Latin American and Caribbean peoples have represented themselves paying particular attention to race/ethnicity, class, gender and sexuality, language, religion, migration, transculturation, and other historical, social, economic, and political factors;
- a language competency in French, Spanish, or Portuguese at an intermediate level and with beginning competency in a language other than the above or in an indigenous language of Latin America and the Caribbean;
- a “Beyond the Books” experience that will bridge the gap between the university and the surrounding communities, and will help solidify a long-term interest in and commitment to the regions.

DEGREE PROGRAMS

Bachelor of Arts
MAJOR

MAJOR IN LATIN AMERICAN STUDIES (BA)
Program of Study:

1) First-year Seminar in LAS  
   (or an LAS-approved elective)  
   3 credits

2) 214 level (or higher) in French, Spanish, or Portuguese  
   and 105 (or equivalent) in a different one of  
   those languages (or in an indigenous language or Creole of  
   Latin America, with approval of the degree director)  
   6 credits

3) Gateway Course in LAS (LAS201)  
   3 credits

4) Six credits in Latin American history  
   6 credits

5) 15 credits (5 courses) in classes listed in LAS or cross-listed  
   with LAS, 12 credits of which must be completed at the  
   300-level or higher  
   (FRE, SPA, or POR 214 may count toward this requirement)  
   15 credits

6) Senior Seminar (LAS501) or Independent Study (LAS494)  
   3 credits

TOTAL 36 credits

**A C- or better for all major courses, with a GPA of 2.0

MINOR

Latin American Studies Minor
The minor in Latin American Studies may be obtained by completing 15 or more credits  
in courses on Latin America and the Caribbean, provided that they are selected from  
courses that fall outside the department of the student’s major. As part of the required  
15 credits, students must successfully complete LAS501 or LAS494 to obtain a minor.

FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to  
complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The  
program provides exciting collaborative research, travel, and work opportunities.

Working with UM’s world-class faculty in various academic disciplines, FILAS participants design  
individualized curricula. In addition to the regular general education course requirements of the  
College of Arts and Sciences, FILAS students choose one focus track for their most advanced  
courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public  
Health, or History. For broad-based, multi-disciplinary preparation, students choose courses  
that focus on Latin America and the Caribbean from the following categories (at least ten of  
these courses must be taken at the Master’s level):
• One gateway seminar in Latin American Studies
• Two History courses
• Two International Studies courses
• Two Economics courses
• Three advanced Languages and Literatures courses
• Seven courses in Study Abroad
• Two courses as internship/co-op credits
• Three courses above the 300-level (third-year) in a range of disciplines
• Ten courses in one focus track

150 total credits

FILAS students also write a thesis based on an original research project. In addition, they present their findings in a meeting of the UM Center for Latin American Studies in their final semester.

FILAS ADMISSION REQUIREMENTS
• SAT1 composite score of 1360 or ACT 31.
• Top 10% of high school graduating class.
• Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
• Recommendations from three high school teachers.
• Statement of interest in FILAS, emphasizing prior language or area study
• To continue through the Master’s level, students must maintain at least a 3.4 GPA and they must take the GRE Exam.

DEPARTMENTAL HONORS

Students with an appropriate GPA are encouraged to contact the program to apply for departmental honors.

Latin American Studies Course Listing
EDUCATIONAL OBJECTIVES

The aim of these degree programs is to provide students with a core knowledge of mathematics essential to the understanding of science and other disciplines. Students should gain substantial problem solving and critical reasoning skills and should develop an understanding of the conceptual underpinnings of mathematics. The knowledge gained through these programs should provide the necessary background in mathematics for those students planning to go on to graduate study in mathematics and related fields. This knowledge should also prepare those students who will be immediately entering careers in science, business, education or other fields which are increasingly making use of mathematics.

DEGREE PROGRAMS

Bachelor of Arts and Bachelor of Science

MAJOR

The requirements of a major in mathematics vary according to the objectives of the student. The seven courses required of all mathematics majors are 111 (or 131), 112 (or 132), 210, 230, 310, 461 (or 561), 433 (or 533). An additional four courses are required, selected from one of the following options:

- **General Mathematics**: four of 510, 512, 531, 532, 534, 551, 562.
- **Applied Analysis**: 311, 512, 513-514 or 515-516 (course work in physics is desirable).
- **Computational Mathematics**: 320, 517, 520-521.
- **Probability and Statistics**: 224, 524-525, 528 or 542.
- **Secondary School Teaching**: 224, 309, and two of: 502, 504, 505 (this option is only for those obtaining a teaching credential).
- **Mathematical Economics**: MTH 524-525, ECO 512 or ECO 520 or ECO 521, ECO 533.

It would be useful for students planning to do graduate study in mathematics to complete the following courses: 531, 532, 533, 534, 561, 562.

Students interested in **actuarial science** should choose the Probability and Statistics option; for these students a finance minor is recommended.
Transfer students will be permitted to apply up to 14 transfer credits towards the major; however, the courses 508 (or 509 or 561) and 533 must be completed at the University of Miami.

A combined major in meteorology and mathematics is available. For specific information please see the METEOROLOGY section of the Bulletin.

**MINOR**

A minor in mathematics requires three of the following courses which must be taken in the Department of Mathematics, University of Miami: 210; 211 or 310; 224, 230, 309, 311, 320; 500-level mathematics courses with departmental approval.

A grade of C- or better is required for each course applied toward the major or minor; the overall quality point average for the major or minor must be 2.5 or above.

**DEPARTMENTAL HONORS**

Requirements for departmental honors in Mathematics:
Three two-course sequences from 513-514, 515-516, 520-521, 524-525, 531-532, 533-534, 561-562; the student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average overall all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

For requirements leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees, with a major in mathematics, see the Bulletin of the Graduate School.

[Mathematics Course Listing]
INTRODUCTION

Microbiology and Immunology is an ancillary department in the College of Arts and Sciences. Our primary goal is to educate students in their chosen field and instill into them a desire for lifelong learning. Research opportunities and laboratory engagement help create knowledge in our students while preparing them to become active members of the scientific and public communities. A major in Microbiology and Immunology requires thorough preparation in chemistry, biology, biochemistry, physics, and mathematics.

EDUCATIONAL OBJECTIVES

1. To expose students to the various disciplines within the field of Microbiology and Immunology, including virology, parasitology, microbial genetics, immunology and medical bacteriology.
2. To introduce students to special projects and/or research opportunities in laboratories at the School of Medicine.
3. To provide laboratory experience for the development of skills required for the conduct of research.
4. To make students aware of current cutting edge research in the field of Microbiology and Immunology by attending seminars of speakers from within and outside the University.

DEGREE PROGRAMS

A Bachelor’s of Science degree is awarded to all microbiology and immunology majors upon completion of the requirements.

MAJOR

Minimum requirements are:

A. A total of 24 credits are required for the major: MIC 301 and MIC 321 are required of all Microbiology and Immunology majors. The remaining 17 credit hours must be earned from: MIC 322, 323, 434, 436, 441, and 451-456. In addition, [BIL 352 or BIL 554] and/or [BIL 250 or BIL 255] may also be used. Honors students must take both the MIC 301 and MIC 302.

B. Required courses are: Chemistry 111/113, 112/114, 201/205, 202/206; BIL 150, 151, and 160, 161; Biochemistry and Molecular Biology 401; Physics 101/106 and 102/108 or PHY 205, 206, 207, 208 and 209; Mathematics 111 and 112 and one computer science or statistics course (CSC 120, MTH 224, PSY 204, SOC 211, EPS 553).
All MIC majors are required to have a minor (science or non-science). Students automatically get a CHM minor provided that they take one year of organic chemistry while in residence at UM.

Transfer students seeking a Microbiology and Immunology major must earn at least 10 credits taken in residence at UM beyond MIC 301 in the courses listed above for majors under A.

MINOR

A minor in Microbiology and Immunology consists of 12 credits. Seven for MIC 301, MIC 321, and at least five additional credit hours in the following courses: MIC 322, 323, 434, 436, and 441.

Variations in the above programs may, in special cases, be approved by the Microbiology and Immunology undergraduate advisor and Director. All courses in Microbiology and Immunology to be credited toward a Microbiology and Immunology major or minor must be completed with a grade of C- or better with an overall GPA of 2.0.

MIC courses 451-456 must have department Director approval before registration.

DEPARTMENTAL HONORS

See HONORS PROGRAMS elsewhere in this Bulletin for minimal requirements. In addition to the grade point averages specified in the minimal requirements, the following program constitutes the Microbiology and Immunology Honors Program.

1. Six credits of Special Projects carried out under supervision of a member of the Microbiology and Immunology faculty, culminating in a senior thesis that includes 15 references.

Microbiology and Immunology Course Listing
INTRODUCTION

The Army Reserve Officer Training Corps is a college elective that will help students succeed in their desired career, whether civilian or military. Students who complete all ROTC requirements may be commissioned second lieutenants and serve in the Army, Army National Guard or Army Reserve.

The military science department's Reserve Officers Training Corps (ROTC) program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers' educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a 31-day summer camp, normally between the junior and senior years. Nursing students may attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The department offers both a four-year and a two-year program, each with its own special advantages. Students are invited to visit or write the Department of Military Science to obtain additional information.

Core Program

The program requires four years of military science courses which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as freshmen or as sophomores.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below.

Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Women are encouraged to enroll and will be commissioned as officers in the United States Army upon completion of the ROTC curriculum. Job opportunities for women officers in the Army are the same as those for men, excluding a few combat arms fields.

Basic Course

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course. Enrollment in ROTC requires proof of a doctor's physical screening.
Participation in regularly scheduled physical training is required. In addition to classroom instruction, a one and a half hour leadership laboratory period is required every other week.

**Advanced Course**

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet officers and noncommissioned officers. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (75 minutes) periods each week and one and a half hour (90 minutes) leadership laboratory period every other week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course.

**Army Nurse Corps Option**

Students enrolled in the School of Nursing curriculum leading to the degree of Bachelor of Science in Nursing may simultaneously qualify for commissions as Second Lieutenants in the Army Nurse Corps. Nursing students qualify for entry into the Officer Development Course through satisfactory completion of the General Military Course, the Basic Camp option or equivalent training. Nursing students participate in a summer Advanced Camp training program and an Army nurse training program. They provide practical and leadership experience in the clinical setting. The focus is to provide nursing cadets an experience which integrates clinical, interpersonal and leadership knowledge and skills. Emphasis is placed on practical experience under the direct supervision of an Army Nurse Corps Officer who acts as the cadet’s preceptor throughout the camp period.

**Professional Military Education**

In addition to basic and advanced ROTC courses, cadets must complete professional military education requirements consisting of one course in each of the following areas: written and oral communication skills, U.S. military history, and computer literacy. Students should consult with the professor of military science to determine those University courses suitable for fulfilling these requirements.

**Monetary Allowances**

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of $450–$500 per month for up to 20 months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide over $6,000 during the last two years of school. Both the United States Army Reserve and the National Guard offer additional monetary incentives for cadets who join their organizations.

**Army ROTC College Scholarship Program**

Financial assistance is available in the form of two- or three-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive FULL Tuition and Fees. Additionally, Army scholarship recipients receive a flat-rate allowance of $1200 per year for textbooks and other expenses and $350–$500 per month stipend for up to 10 months per year. During the 32-day advanced course summer training between the junior and senior years, Army ROTC also pays attending
cadets $27 per day plus room and board. There are also numerous national and organizational scholarships that students may compete for as a member of Army ROTC.

**Uniforms and Textbooks**

All uniforms and items of insignia incident to membership in the Army ROTC Program are furnished by the Department of Military Science. Textbooks are provided at no cost to students/cadets enrolled in the basic course.

**Special Activities**

Cadets have the opportunity to join and participate in a number of military affiliated organizations and activities, both on a voluntary and a selective basis. The Pershing Rifle Society is a voluntary organization that functions as a military unit participating in military ceremonies and presenting the national colors at civic events. Cadets have the opportunity to qualify for and compete with cadets from other universities and colleges in a series of military events termed Ranger Challenge. Cadets may also join Scabbard and Blade, a military honors society comprising those cadets with qualifying grades that denote scholarship.

**Awards and Decorations**

Awards and decorations made available by national organizations, the University of Miami Army ROTC Alumni Association, and local and national military organizations, are presented to both basic and advanced officer course cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in Army ROTC and other University academic courses, and in outstanding campus and cadet corps leadership.

**Prerequisite for Admission to the Professional Officer Course**

1. Be at least 17 years of age at time of acceptance.
2. Be able to complete the professional officer course and graduate from the University of Miami prior to reaching the age of thirty (30) at the time of commissioning.
3. Selection by the professor of military science and acceptance by the University of Miami.
4. Execute a written agreement with the government to complete the professional officer course and accept an Army ROTC commission.
5. Enlist in the Army Reserve Component-ROTC (terminated upon receiving an Army officer commission).

Those students enrolled in the four-year Army ROTC program must complete the basic course or its equivalent, or have acceptable prior military service. Veterans and students with previous ROTC training are invited to write, visit, or call the Department of Military Science (305) 284-3329 or (305) 348-1619 to discuss their eligibility status.

Students desiring entry into the two-year Army ROTC program should contact the Department of Military Science one semester prior to the semester in which they wish to enroll in the professional officer course. This lead time is required to complete the application and a physical examination prior to enrollment in the professional officer course.
Leadership Laboratory

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for one and one half (90 minutes) hours every other week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

EDUCATIONAL OBJECTIVES

To provide a base of knowledge in the areas of ethics, leadership, Communication skills, Military Leadership, U.S Military History, Tactics and Team building to include future Officer development.

DEGREE PROGRAMS

Students can receive degrees from any college in which their major falls under in addition to being in the Army ROTC program.

Military Science Course Listing
INTRODUCTION

The study of languages is integral to education in a global university. In addition to providing access to various cultural perspectives, multilingualism fosters success in business, economics, law, medicine, education, social sciences, politics, the arts, and literature. Language study most effectively enriches academic as well as personal experiences when students choose a language based on its relevance to possible careers, to research in particular fields, to personal heritage, or to the understanding of unfamiliar cultures. At the University of Miami, students can choose courses in Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Portuguese, and Spanish.

Many students combine advanced modern language study with majors in other fields. Students majoring in a modern language often choose second majors in programs such as International Studies, Communications, History, Political Science (and other pre-law fields), Biology (and other pre-med fields), English, Finance, Latin American Studies, Anthropology, Psychology, Computer Science, Sociology, and Philosophy.

The Department has Undergraduate Advisors for each language. You are encouraged to consult with them for placement, and must consult with them if you plan to major, minor, or study abroad (contact the Department office for names and office hours). If you plan to double major, you must have an advisor from each of your fields.

Students may qualify for a wide range of departmental awards for excellence in linguistic and literary achievement. The Modern Languages and Literatures Awards Reception takes place annually during graduation week. Awards are designated for students studying any language as well as for advanced majors, and many include cash prizes or scholarship funds. Some awards are conferred through nomination by professors; others require an application. Students may obtain information on specific awards in the Department office. The annual deadline for applications is usually in early March.

PLACEMENT GUIDELINE FOR MLL COURSES

Most students studying a second language can determine their appropriate level by following these guidelines:

- If you have not studied Arabic, Chinese, French, German, Hebrew, Italian, Japanese, or Spanish in high school, or have completed one to two years of high school instruction, take 101; for Portuguese, take 105.
- If you have taken 101 or its equivalent at another institution, take 102.
- If you have completed three years of high school instruction in French or Spanish, or scored a 3 on the AP language exam take 105. If you have had three years of high school Arabic, Chinese, German, Hebrew, Italian, or Japanese, take 102.
- If you have taken four years of high school French or Spanish, scored a 4 on the AP exam or a 4 on the IB exam in French or Spanish, or took the equivalent of 102 or 105 at another university, take 211. If you have taken four years of high school
German, Italian or Portuguese, take 211. If you have taken four years of Arabic, Chinese, Hebrew, or Japanese, take 201.

- If you had five to six years of high school French, German, Italian, or Spanish, take 212.
- If you have taken the equivalent of 211 at another university, or scored a 5 on the AP exam, you have completed your language requirement. If you wish to continue your studies, take 212.
- If you took the equivalent of 212 in French or Spanish at another university or scored a 4 on the AP literature exam, you have completed your language requirement. If you wish to continue your studies, take 214. If you took the equivalent of 212 in German, Italian or Portuguese at another university, you have completed your language requirement. If you wish to continue your studies, take 301.
- If you scored a 5 on the AP literature exam in French, Italian or Spanish, you have completed your language requirement. If you wish to continue your studies, take 301.

The Department offers courses for native speakers of French, German, Italian, Portuguese, and Spanish. Native speakers may not enroll in 101, 102, 105, 201, 202, 211, 212, 214, or 301 in their language. If you are a native speaker of French, German, Italian, Portuguese, or Spanish and graduated from a high school where that was the official language of instruction, you may take any course above 301 (consult with the respective Undergraduate Advisor).

The Department of Modern Languages & Literatures identifies as heritage learners of Spanish those students who begin their university studies of the language with little or no prior instruction in Spanish but who, because of family background or social experience, can already understand much casual spoken Spanish and have a passive knowledge of the language (though they may not usually speak the language themselves). In the great majority of cases, they have been born and fully educated in the United States, and may have grown up speaking principally English (or a ‘mix’ of Spanish and English, i.e. ‘Spanglish’) in the home with their grandparents, parents and siblings. Heritage learners may or may not consider themselves as “bilinguals” or “native speakers”, since both of these terms carry very different connotations—linguistic, social, and psychological—for different individuals. Some state that they “do not really speak Spanish” even though they are able to comprehend much spoken language (i.e., they are “passive bilinguals”). In the great majority of cases, they self-identify as “Hispanic” or “Latino/a”.

HERITAGE LEARNERS OF SPANISH MUST BE PLACED IN ONE OF THE FOLLOWING FOUR COURSES:

SPA 143 Basic Spanish for Heritage Learners is for those students with little or no prior instruction in Spanish who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language although they do not usually speak the language themselves. Generally, their abilities to read and write Spanish are very weak. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.

SPA 243 Intermediate Spanish for Heritage Learners is for those students WHO HAVE ALREADY TAKEN AND PASSED SPA 143 or who have studied Spanish for AT LEAST TWO
YEARS IN HIGH SCHOOL. They can understand casual spoken Spanish and have some functional ability in speaking, reading and writing the language. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.

SPA 244 Advanced Spanish for Heritage Learners is for those students who have studied Spanish for four years in high school and who have developed functional abilities in speaking, reading and writing the language. Students who earned a score of 5 on the AP Spanish Language Exam should register for this course. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.

SPA 343 Introduction to Literary Studies for Native/Heritage Speakers is intended for those students who have completed secondary and/or university studies in a Spanish-speaking country and for those heritage learners who demonstrate an advanced level of productive competence (in the written and spoken modes) in Spanish because of prior formal study of the language. Many heritage learners who place directly into 343 have taken AP Spanish literature in high school and earned a score of 4 or 5.

>>> SPA 101, 102, 105, 211, 212 AND 214 ARE NOT FOR HERITAGE LEARNERS. ANY HERITAGE LEARNER WHO ENROLLS IN ONE OF THESE COURSES WILL BE OBLIGATED TO SWITCH TO A HERITAGE LANGUAGE COURSE (SPA 143, 243, 244 OR 343) DURING THE FIRST WEEK OF CLASS.

Arts and Sciences Language Requirement

The College of Arts and Sciences requires all B.A. and B.S. degree students to show competency in a language other than English by successfully completing an approved college language course at the 200-level or higher.

Humanities Literature and Writing Credits

The Department offers a variety of courses that fulfill these Distribution Requirements for students in most majors (please consult the guidelines of your School or College); students can easily fulfill some or all of these requirements by majoring or minoring in a foreign language. Any literature courses in French, German, Italian, Portuguese or Spanish on the 300-level or higher fulfills a Humanities Literature requirement and counts as a writing credit. In addition, all 300-, 400- and all 500-level courses, unless otherwise specified, are for writing credit. NOTE: Courses may simultaneously fulfill the Humanities Literature Requirement and Writing Credit, or the Foreign Language Requirement and Writing Credit. A course cannot simultaneously fulfill the Foreign Language Requirement and the Humanities Literature Requirement.

DEGREE PROGRAMS

Students pursuing a single major in Arts and Sciences earn a BA.

MAJOR

Goals of the major: The major is designed to allow students to gain advanced linguistic, literary and cultural competence in the given language. Students will develop analytical and critical skills. They will learn to build coherent arguments orally and in writing; to develop
tools for the interpretation of various texts; to perform research and write critical papers; to find and evaluate sources of information; to heighten their sensitivity to contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Allen Hall, room 212) sponsors programs for French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit toward the major for courses taken abroad will be determined on an individual basis.

**Majors in French, German, and Spanish**

A major consists of at least 30 credits beyond the 200-level, which must include the following distribution:

- at least 9 credits must be at the 300 level;
- at least 6 credits must be above the 300 level; of these, 3 credits must be at the 500 level (capstone course);
- Five writing intensive classes (W) in the department are required of all majors.
- Spanish majors must take one full 3-course sequence of survey courses in either Peninsular or Latin American Literature, or a combination of both that covers all three chronological periods. That is, Spanish majors must take 353 OR 363; 354 OR 364; and 355 OR 365.

6 credits may be taken in courses not in the target language (in MLL or not) that are relevant to the course of study; these course are determined in consultation with the advisor. FLL 505 (taught in English) may count toward the 30 credits, but cannot replace the capstone course in the target language. Only one professional Spanish course (SPA 432 or SPA 433) will count towards the Spanish major, although students are free to take both. Students with transfer credits at the 300-level must take at least 21 graded credits at or above the 300-level at the University of Miami; i.e., up to 9 credits at the 300- and 400-level may be transferred from another institution or a study abroad program not administered by UM. Up to 12 credits taken abroad in a UM-administered program may count towards any of the majors in the Department. Students must earn a grade of C- or higher in every course counting toward the major, and maintain a minimum overall average of 2.5 in the major.

**Capstone Courses**

All students are required to take a 500-level capstone course in residence during their last semester in the major. This course will:
Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
Incorporate interpretive as well as presentational modes of communication;
Contain an over-arching and cohesive theme;
Include an element of collaboration among students.
It will constitute a moment of recapitulation of, synthesis, and reflection on a student’s experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

MINOR

You do not have to be a student of the College of Arts and Sciences to minor in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a minor in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Allen Hall, room 212) sponsors programs for French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit toward the major for courses taken abroad will be determined on an individual basis.

Minors in French, German, Italian, Portuguese, and Spanish

A minor in one modern language consists of a minimum of 12 credits in that language on the 300-level or above, earned according to the following guidelines: A minimum of 6 credits must be earned in courses taught by MLL faculty (in residence or abroad). Out of the remaining 6 credits, a maximum of three may be transferred from another institution or from a study-abroad program not administered by UM. The remaining 3 or 6 credits may be fulfilled in the MLL department or in a UM-administered study-abroad program. Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

Minor in Modern Languages

The minor in two foreign languages consists of at least 24 graded credit hours with 12 credits in one language on any level and 12 credits in any other language, 6 of which must be on the 300-level or above. For example: Arabic 101, 102, 201 and 202 along with Spanish 212, 214, 301 and 322 would constitute a Minor in Modern Languages; so would French 212, 214, 301 and 332 along with Italian 101, 102, 211 and 212. Many other combinations are possible. This minor must include 6 graded credits per language from the University of Miami. Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.
DEPARTMENTAL HONORS

Departmental Honors in Modern Languages are possible in the three languages for which the major is offered: French, German and Spanish. In order to request admission to Departmental Honors, candidates must have completed at least twelve credits at the 300 level or above. They must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for honors will identify an honors thesis supervisor and a second reader and request admission to Departmental Honors. Admission to candidacy must also be approved by the Director of Undergraduate Studies for the appropriate language.

In addition to fulfilling the regular major requirements, students must register in their Senior year for FRE or GER or SPA 594-595, Senior Honors Thesis. This is a two-semester, six credit sequence: 594 for research and 595 for the actual writing of the honors thesis.

The honors thesis advisor and the second reader will determine whether the finished thesis merits Departmental Honors.

Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Portuguese, and Spanish
INTRODUCTION

Neuroscience (NEUX) is a rigorous, interdisciplinary major offered by the Departments of Biology and Psychology in conjunction with the Neuroscience Program at the Miller School of Medicine. This major is intended for students preparing for medical school or for graduate study in such fields as neuroscience, biology, neuroscience, psychology, or behavioral medicine.

For curricular advice and for course and transfer approval, etc., students should consult an advisor in the Office of Undergraduate Academic Services for Psychology, Flipse 508, (305) 284-3303.

EDUCATIONAL OBJECTIVES

The Neuroscience major seeks to provide undergraduate students with exposure to and a fundamental understanding of the neural and biobehavioral sciences. It seeks to deliver an integrative educational experience by promoting interactions among faculty, graduate students, and undergraduate students in basic scientific inquiry, advising, and mentoring.

DEGREE PROGRAMS

Neuroscience is offered as a major for the Bachelor of Science degree within the College of Arts and Sciences.

MAJOR

The total number of credit hours for the Neuroscience major is 49, distributed between the Departments of Psychology and Biology (as indicated below). The total number of credits for the degree is 130.

Core Courses

All Neuroscience majors, regardless of track, must complete a set of core courses. These are BIL 150/151, BIL 160/161, BIL 250, BIL 255, NEU 403, PSY 110, PSY 204*, and PSY 316. Students within each track then select courses particular to the track. The total number of credits for both tracks in the Neuroscience major is 49.

*UM alternates to PSY 204 include, BIL 311; SOC 211 and 212; and MTH 224. These courses are acceptable as prerequisites for PSY 316, but do not count toward the major. Thus, students opting to do these alternate courses must take another course in Psychology to total the number of credits expected for the major.
Tracks in Neuroscience
There are two tracks available in the major.
- Psychobiology (NEUP) emphasizes cognitive functions and behavior.
- Neurobiology (NEUB) emphasizes cellular and molecular approaches to understanding nervous system functions.

Psychobiology track (NEUP)
Students who choose the Psychobiology track must also take PSY 202, PSY 402, a Psychology elective at the 300-level or above, and three Biology electives (see below) at the 200-level or above. Each of these courses must be three credits. NEUP majors may not take BIL 268.

Neurobiology track (NEUB)
Students who choose the Neurobiology track must take BIL 268, NEU 342, NEU 465, NEU 468, a Biology elective at the 200-level or above, and a three credit Psychology or Biology elective (see below) at the 300-level or above.

Electives in both tracks
Electives in both the Neurobiology and Psychobiology tracks are limited to specific courses pertinent to the major. Choices in Psychology include PSY 305, PSY 332, PSY 352, PSY 420, PSY 440, and PSY 444. The Biology electives are limited to BIL 235, BIL 241, BIL 261, BIL 265, BIL 268**, BIL 341, BIL 355, BIL 360, BIL 361, BIL 365, BIL 369, BIL 511, BIL 530, and BIL 540. Biochemistry, BMB 401 or BMB 506, may also be substituted and count as a Biology elective. Neuroscience majors on the Psychobiology track may also take NEU 342, NEU 465, and NEU 468 as one of their electives. (Note that for the Neurobiology track, BIL 268, NEU 342, NEU 465, and NEU 468 are requirements rather than electives.)

**Note: NEUP majors may not take BIL 268.

In addition to the above courses in Biology and Psychology, all Neuroscience students must complete 16 credits in Chemistry including CHM 111/113 and CHM 112/114, and CHM 201/205 and CHM 202/206; MTH 111/112 or MTH 131/132; 10 credits in Physics including PHY 101/106 and PHY 102/108. (The 200-level, calculus-based physics sequence [PHY 205/206/207/208/209] can be substituted for the 100 level physics sequence and is highly recommended for any student considering pursuing Neuroscience at the Ph.D. level.)

Neuroscience students automatically earn a Chemistry minor if they complete the year of Organic Chemistry (CHM 201 and CHM 202) with labs (CHM 205 and CHM 206) here at UM. Those who choose not to minor in Chemistry must choose a minor from among Biochemistry and Molecular Biology, Computer Science, Engineering, Geological Sciences, Mathematics, Microbiology and Immunology, or Physics.

Grades and Scores Required to Declare and Continue
A student must have an SAT score of 1300 or above or an ACT of 30 or above to declare Neuroscience as an incoming freshman. Thereafter, students need a 3.5 GPA after 24 credits at UM to declare the major. At least 3 of these 24 credits must have been in a BIL or CHM course designed for majors. Students transferring from another college or university must have a cumulative grade point average of 3.8 or above. Students are strongly advised not to continue as a Neuroscience major if, after having completed 15 credits in the major, the GPA is less than 2.8.

Grades Required to Graduate
A grade of C- or better is required in all courses applied to the Neuroscience major, and the GPA in these courses must be at least 2.6.
Residency Requirement
Students must complete all upper division Biology and Psychology courses at U.M. With prior Departmental approval, 6 of these 15 credits may be completed through the U.M. Study Abroad Program.

Research Experience for Course Credit
Research credits do not count for the major. To obtain course credit for working with a faculty member in a research laboratory, speak with the Director of Neuroscience or the Neuroscience Advisor.

Research Participation
As an introduction to behavioral science, students enrolled in PSY 110 may be required to participate as subjects in research studies being conducted by faculty and/or graduate students, or by reading and writing about selected research reports. For details, consult the course syllabus and/or contact the Psychology Department’s Undergraduate Academic Services for Psychology.

Course Prerequisites
Students who have not taken a prerequisite course (or who have taken it and obtained a D or an F) may not enroll in the course for which it is a prerequisite. Students enrolled without prerequisites may be dropped from the class roll.

Transfer
Transfer students wanting courses taken elsewhere to count as Neuroscience courses at U.M. must obtain written approval during their first semester at U.M. This is a separate process from the Admissions Evaluation of Transfer Credit.

Freshmen
All declared Neuroscience majors receive their advising as a part of a year-long advising, orientation, and mentoring program known as FACT FORUM. All majors will be placed in a Freshman Experience section of FACT (Freshman Advising Contact Term). This is a one credit general elective course that is designed to integrate freshmen into the major by familiarizing them with the guidelines, opportunities and responsibilities of a Neuroscience major. During the second semester, freshmen enroll in a FORUM section (Faculty Overview of Research and Undergraduate Mentoring). This one credit general elective course helps to put the curriculum in context, and stresses the importance of, and opportunities for research.

MINOR
There is no minor in Neuroscience.

DEPARTMENTAL HONORS
Students wishing to graduate with magna, summa, or Honors in Neuroscience should speak with the Director of Neuroscience or the Neuroscience Advisor.

Neuroscience Course Listing
INTRODUCTION

The Philosophy Department offers a wide range of courses at the undergraduate level which cover every major area of philosophy as well as its history. Students can major or minor in the subject. In addition, the department sponsors two undergraduate philosophy organizations: the Philosophy Club, which is open to all UM undergraduates, and Phi Sigma Tau, a chapter of the National Honor Society in Philosophy. Both groups afford students regular opportunities to meet, eat, and talk philosophy with each other and with graduate students and faculty in the department. All undergraduates who are interested in philosophy are welcome to participate in these philosophical events.

EDUCATIONAL OBJECTIVES

Philosophy is the study of the most basic moral, scientific, legal, aesthetic, religious, and metaphysical concepts and theories by which we understand ourselves and our universe. It is a reasoned pursuit of fundamental truths, a quest for understanding, a study of principles of conduct. It analyzes the basic assumptions and concepts of other disciplines and the norms that govern interpersonal relations and the acquisition of knowledge. It seeks to establish standards of evidence, to provide rational methods of resolving conflicts, and to create techniques for evaluating ideas and arguments. Philosophers are dedicated to developing the following abilities: reasoning clearly, distinguishing between good and bad arguments, thinking through complicated questions, and using reason in situations that are often governed by emotions. Studies have shown that philosophy majors do extremely well on standardized tests, and in careers that require analytical abilities such as the practice of law and software development. But irrespective of career choice, philosophy deepens one's sense of the meaning and varieties of human experience, and enhances self-knowledge, foresight, and sense of direction in life.

MAJOR

A major in philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Elective courses may be chosen to fit individual needs. Required courses for the major are Philosophy 210 or 215, either 271 or 272, twelve credits at the 300 level (including one course from 330-332 and two courses from 340-345), and six credits at the 500 level.

MINOR

A minor in philosophy consists of a minimum of five courses, each passed with a grade of C- or higher with an overall GPA of 2.0. At least three of the courses must be at the 200 level or above, and at least one of these three courses must be at the 300 level or above.

The major and the minor should be planned with the advice of the department.
PRE-LAW MAJOR AND MINOR TRACKS

The Department offers major and minor tracks for students wishing to enhance their Pre-Law studies with relevant Philosophy coursework.

A Pre-Law Major Track in Philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are either 210 (Formal Logic) or 215 (Logic and Law), either 271 or 272 (1 course in history of philosophy), either 330 (Ethics) or 331 (Social and Political Philosophy), either 332 (Philosophy of Law) or 333 (Philosophical Foundations of Criminal Law), two of either 340 (Epistemology), 341 (Philosophy of Language) or 343 (Philosophy of Science), 2 500-level courses, and any 2 additional PHI courses.

A Pre-Law Minor Track in Philosophy consists of a minimum of five courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are either 210 or 215, either 330 or 331, either 332 or 333, one of either 340, 341 or 343, and any other PHI course.

PRE-MED MAJOR AND MINOR TRACKS

The Department also offers major and minor tracks for students wishing to supplement their Pre-Med work with relevant Philosophy coursework.

A Pre-Med Major Track in Philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are 210 (logic), either 271 or 272 (1 course in history of philosophy), 330 (Ethics), 334 (Biomedical Ethics), 343 (Philosophy of Science), either 340 (Epistemology) or 344 (Philosophy of Mind), and 546 (Knowledge and Evidence in Medicine). Elective courses consist of one 500-level philosophy course and 2 other philosophy courses not listed above.

A Pre-Med Minor Track in Philosophy consists of a minimum of five courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are 210, 334, 343, either 340 or 344, and 546.

DEPARTMENTAL HONORS

A program of work toward graduation with Honors in Philosophy is available for qualified students. Interested students should consult the Departmental Director of Undergraduate Studies during their sophomore or junior years. Further information may be found under the section entitled HONORS PROGRAM.

For requirements leading to the Master of Arts and Ph.D. degree, see the Bulletin of the Graduate School.

Philosophy Course Listing
PHYSICAL SCIENCES - Dept. Code: PSC

INTRODUCTION

Physical Science 101 is an interdisciplinary physical science course designed primarily for the non-science major. It may be used to satisfy a physical science requirement in some degree programs. Students should consult the degree requirements listed elsewhere in the Bulletin as well as their advisors for the appropriateness of this course for their programs. See also under PHYSICS 110, 160.

Physical Sciences Course Listing
INTRODUCTION

The requirements for a major or minor in the Department of Physics are flexible and may be adapted to the needs of the individual student:

MAJOR

1. Pure Physics

This sequence is recommended for those intending to enter a graduate school in Physics. It consists of a minimum of 34 credits in Physics at or above the 200 level, including four credits of laboratory and the courses PHY 205, 206, 207 (or 205, 210); 360, 362; 340, 321; 350, 351; 540, 560. The physics minor consists of University Physics, two credits of laboratory work, PHY 360, and three more credits at the 300-level or above.

2. Marine Science/Physics

This is one of the interdisciplinary majors offered in conjunction with RSMAS. It includes 31 credits from the core physics courses through PHY 560 together with a group of marine science and other courses detailed in the section of this Bulletin on MARINE SCIENCE.

3. Applied Physics

This sequence is available for those intending careers in applied physics, and consists of 22 credits in Physics plus nine credits of Engineering and Computer Science courses with prior approval of the Department of Physics. The Physics courses must be at or above the 200 level and include three credits of laboratory. The major includes PHY 205, 206, 207 (or 205, 210), 208, 209, 340, 350, 360.

4. Dual Physics Majors

Physics requirements: PHY 205, 206, 207 (or 205, 210), 208, 209, 360 and at least two of the following: PHY 321, 340, 350, 351. In the total of 22 credits of physics, 2 or 3 credits of advanced lab may be included, or another lecture course.

Students will have the full, normal major in Biology or Chemistry and provided that among those courses certain specific ones are included, they will also be able to have the dual major in physics. The specific courses are

Biology – Physics

Three of the courses BIL 358, 359, 554, CHM 360, 365

Chemistry – Physics

Three of the courses CHM 360, 365, 565, BIL 358, 359.
Note: Depending on the selection of the Physics courses in the Biology and Chemistry dual majors, more mathematics beyond two semesters of calculus is required for most of the physics courses.

5. Students in the College of Engineering who want a dual major in physics should consult the Physics Department Chairman. A major tailored to the student’s needs will be arranged. The minimum number of physics credits is the same as for the Applied Physics major.

In order to complete any Physics major sequence in four years, the student should begin elementary calculus in the first semester. The recommended mathematics sequence is MTH 110 or 111, 112 (or 131, 132); (310 or 211), 311; 210; (230, 533, 534 also recommended).

A grade of C- or better is required in all courses counted toward the major or minor with an overall GPA of 2.0. Any lecture course in the Physics department may be passed by means of a proficiency examination.

Requirements for the Master of Science and Doctor of Philosophy degrees will be found in the Bulletin of the Graduate School.

**MINOR**

The physics minor consists of University Physics, two credits of laboratory work, PHY 360, and three more credits at the 300-level or above.

[Physics Course Listing](#)
POLITICAL SCIENCE
www.as.miami.edu/politicalscience

INTRODUCTION

A political science major prepares students for work in a number of fields including law, politics, public policy, public administration, and international affairs, as well as employment in business and the non-profit sector.

EDUCATIONAL OBJECTIVES

Political science majors gain an understanding of American political and legal life, the workings of other countries’ political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

DEGREE PROGRAMS

Bachelor of Arts in Political Science

Five year program: Bachelor of Arts in Political Science and Masters of Public Administration

A special curriculum for students specializing in public administration enables them to complete the requirements for a Bachelor’s and Master’s degree in five years.

MAJOR

The political science major consists of at least 30 credits. At least 21 credits of these must be earned at the University of Miami.

To count toward the major, each course must be completed with a grade of C- or above, with an overall GPA of 2.0 or above.

1. Nine credits must be taken in departmental core courses, namely, POL 201, POL 202, and POL 203. POL 213 does not count toward the major.

The remaining credits must meet the following distributional requirements:

2. Six of the credits must come from two 500-level seminar courses offered by the University of Miami. This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are not seminars and do not fulfill this requirement:

   POL 520  Internship
   POL 521  Public Affairs Internship
   POL 563  Senior Honors Thesis (I)
POL 564  Senior Honors Thesis (II)
POL 599  Directed Readings
(Note that POL 599: Special Topics is a seminar and does fulfill this requirement.)

3. At least one course above the 200-level must be taken in three of the following five principal sub-fields of political science:

American Politics
Comparative Politics
International Relations
Public Administration, Policy, and Law
Political Theory and Methods

These can include courses used to fulfill requirement #1 above. Please note that some courses cover more than one sub-field. Students may not, however, use a single class to fill two sub-field requirements

American Politics:

POL 309  American Political Thought
POL 314  Legislative Process
POL 315  American Presidency
POL 332  Mass Media and Politics
POL 334  Campaigns
POL 335  Local Government
POL 342  State and Local Government and Politics
POL 343  Government in Metropolitan Areas
POL 349  U. S. Defense Policy
POL 351  Public Opinion
POL 352  Political Parties
POL 353  Interest Groups and Lobbying
POL 360  Congressional Representation
POL 408  The 2008 Election
POL 515  Media Content Analysis
POL 528  Advanced Seminar on Electoral Behavior
POL 530  Intelligence and National Security Decision Making
POL 536  U.S. Health Care Crisis: Politics and Policies
POL 540  Problems in American Foreign Policy
POL 542  American Constitutional Development
POL 548  Civic Participation and Democracy
POL 543  Urban Politics
POL 550  Advanced Seminar on American Politics
POL 552  Politics and Group Perspectives
POL 547  Congressional Representation
POL 553  The Environmental Movement: Groups, Beliefs and Values
POL 599  Special Topics: Congress, the President, and Spending

Other POL599: Special Topics classes may count as an American Politics course. See the Director of Undergraduate Studies for questions about POL599 courses not listed in the Bulletin.
Comparative Politics:

POL 380 Comparative Political Analysis
POL 381 European Governments and Politics
POL 382 Government and Politics of the Federal Republic of Germany
POL 384 Soviet and Russian Politics
POL 385 Politics and Society in Latin America
POL 386 Democratic Consolidation
POL 387 Politics of the Middle East
POL 388 Politics of Israel
POL 525 Comparative Public Policy and Administration
POL 531 Global Environmental Politics
POL 534 War Crimes Tribunals
POL 535 Comparative Legal Systems
POL 579 Ethnicity, Nationalism, and Secession
POL 580 The Politics of Post-Communist Transitions
POL 581 Comparative Political Economy of Post-Industrial Democracies
POL 582 Political Economy Development
POL 584 Contemporary Latin American Politics
POL 588 Politics in China

POL 599: Special Topics may count as a Comparative Politics course. See the Director of Undergraduate Studies for questions about POL599 courses not listed in the Bulletin.

International Relations:

POL 337 International Law
POL 345 The United States and Asia
POL 346 U. S.-Latin American Relations
POL 347 American Foreign Policy
POL 348 United States Relations with the Middle East
POL 349 U. S. Defense Policy

POL 541  Philosophy of Law
POL 599  Introduction to Game Theory
POL 599  Ideals and Realities

Other POL 599: Special Topics courses may count as a Political Theory and Methods class. See the Director of Undergraduate Studies for questions about POL599 courses not listed in the Bulletin.

MINOR

A minor requires 15 credits of political science, three of which must be from POL 201, 202, or 203. To qualify for the minor at least 9 credits must be earned in residence.

To count toward a minor, each course must be completed with a grade of C- or higher, with an overall GPA of 2.0 or higher. POL 213 does not count toward the minor.

DEPARTMENTAL HONORS

The Department of Political Science offers the opportunity for outstanding majors to earn the graduation designation “Departmental Honors in Political Science.” Pursuing Departmental Honors provides superior students the opportunity to intensify and deepen their knowledge of political science, to permit closer associations with professors in their areas of concentration, and to prepare them for graduate level work in political science.

To be considered for Departmental Honors a student must:

1. Have an overall GPA of 3.60.

2. Have a political science GPA of at least 3.75 at the end of the junior year. This GPA must be based on at least four 300- or 500-level political science courses in addition to the introductory courses required for the major.

3. Be admitted to POL 563: Senior Honors Thesis I and POL564: Senior Honors Thesis II and earn a grade of B or above in each. (See below for admission requirements.)

4. Complete a senior honors thesis that constitutes significant original research. Students are responsible for collecting their own data and the thesis must be analytical, not descriptive. The thesis must also be well written, clearly organized, and devoid of grammatical mistakes, misspellings, or other errors. Sources must be properly cited. Political science honors theses are generally fifty or more pages in length.

Interested students should apply to the Director of Undergraduate Studies for admission to POL 563 by April 1st of their junior year. (For students planning a December graduation, the deadline is November 1st of their junior year.) An application consists of the student’s ACE and a one-page description of the student’s research interests. This statement of interest should include an explanation of how the student’s coursework to date prepares him or her to undertake the proposed research. Students should also state which tenure-track faculty member(s) they are
most interested in working with as a thesis advisor. In most cases, the thesis advisor should be a faculty member with whom the student has already taken a class. If a student wishes to work with a faculty member he or she has not previously had as an instructor, the student should additionally submit a writing sample (preferably a social science research paper) and the name of at least one political science professor who can serve as a reference. The Director of Undergraduate Studies will then work to pair Honors candidates with appropriate faculty members in a way that both meets the students’ academic needs and equalizes the advising burden across faculty members.

5. The thesis must be approved for Departmental Honors by at least one, preferably two, tenure-line political science professors.

6. Complete all requirements for the POL major with a GPA of at least 3.75.

[Political Science Course Listing]
INTRODUCTION

Psychology is the study of how individuals think, behave, feel, and relate to others. Because of its broad and fundamental nature, coursework in psychology is useful to any student pursuing a liberal arts major. Psychology is a good field of study for individuals who are preparing for post-graduate study in psychology or related fields such as counseling, guidance, or social work. It is also an appropriate field of study for students pursuing medicine, law, or business.

Psychology courses meet the general education requirements in the Social Sciences (People and Society). Although the vast majority of Psychology Majors are enrolled in the College of Arts and Sciences, Psychology often serves as a second major for students in the School of Communication or the School of Education.

While most majors sample broadly from among the Department’s offerings, students wishing to focus on a specific sub-area may select courses to provide a strong (though unofficial) specialization. There are, for instance, clusters of courses in child development, research methodology, the brain-behavior relationship, and industrial/organizational psychology that provide a basis for such a specialized major.

For curricular advice and for course and transfer approval etc., students should consult an advisor in the Office of Undergraduate Academic Services for Psychology, Flipse 508, (305) 284-3303.

EDUCATIONAL OBJECTIVES

The Department of Psychology seeks to provide undergraduate students with exposure to and a fundamental understanding of the psychological sciences. It seeks to deliver an integrative educational experience by promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

DEGREE PROGRAMS

The Department of Psychology offers both a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree. In addition to completing the coursework for the particular degree specified by the College of Arts and Sciences, students must also meet the Departmental requirements for each degree; these are described below.

Students in the School of Communication or the School of Education wishing to double major in Psychology must fulfill at least the Departmental requirements for the Bachelor of Arts.
MAJOR

B.A. Departmental Requirements

The B.A. in Psychology entails 30 credits in Psychology, including PSY 110. Students must also successfully complete a course in research design/statistics PSY 204* (which counts toward the major and serves as a prerequisite for advanced methods courses). Also required are 9 Psychology credits at the 300 level or higher and 6 additional credits at the 400 level or higher.

Students wishing to pursue careers in business, education, law, human resources, religion, social work, or other related fields often choose the B.A. degree. When it includes research-oriented courses such as PSY 204, PSY 316, PSY 418, and research experience, the B.A. is also appropriate for students aspiring to graduate study in many areas within Psychology. B.A. Psychology majors must choose one minor from the list of minors published by the College of Arts and Sciences.

B.S. Departmental Requirements

The B.S. Psychology major entails 33 credits in Psychology, including PSY 110, PSY 204*, PSY 316, and PSY 418, plus 3 additional credits at the 300 level or higher and 6 additional credits at the 400 level or higher.

Psychology majors aspiring to graduate study in Psychology and related fields often pursue the B.S. degree, as do students planning to attend medical school. B.S. Psychology majors must elect a minor from among the following: Biochemistry, Biology, Chemistry, Computer Science, Geological Sciences, Engineering, Mathematics, Microbiology and Immunology, or Physics.

*UM alternates to PSY 204 include BIL 311; SOC 211 and 212; and MTH 224. These courses are acceptable as prerequisites for PSY 316, but do not count toward the psychology major. Thus, students opting to do these alternate courses must take another course in Psychology to total the number of credits for that major.

Grades Required to Declare and Continue

A student must have an overall and Psychology GPA of at least 2.5 to transfer from another major to Psychology, to declare Psychology as a second major, to change from Undeclared status to a Psychology major.

Students are strongly advised not to continue as Psychology majors if, after having completed 15 credits in Psychology, the Psychology GPA is less than 2.3.

Grades Required to Graduate

A grade of C- or better is required in all courses applied to the Psychology major, and the GPA in these courses must be at least 2.3.

Residency Requirement

As part of a major in Psychology, students must complete at least 15 upper division (300 level and above) Psychology credits in residence at U.M. With prior Departmental approval, 6 of these 15 may be completed through the U.M. Study Abroad Program.
Research Experience for Course Credit
No more than 6 research credits (i.e., PSY 367/8 and PSY 499) may count toward the major. PSY 498 does not count toward the major or minor. Additional research credits may count toward general electives.

Research Participation
As an introduction to behavioral science, students enrolled in PSY 110 may be required to participate as subjects in research studies being conducted by faculty and/or graduate students, or by reading and writing about selected research reports. For details, consult the course syllabus and/or contact the Department’s Undergraduate Academic Services for Psychology. Note: This requirement is not sufficient for students interested in attending graduate school in psychology. Students seeking course credit for working in the laboratory of a psychology faculty member should see an advisor and sign up for PSY 367 or PSY 368 (see above).

Course Prerequisites
Most courses beyond the 100-level require students to have taken introductory or foundation courses. Students who have not taken a prerequisite course (or who have taken it and obtained a D or F) may not enroll in the course for which it is a prerequisite. Students without prerequisites may be dropped from the class roll.

Transfer
Transfer students wanting courses taken elsewhere to count as Psychology courses at U.M. must obtain written Departmental approval during their first semester at U.M. This is a separate process from the Admissions Evaluation of Transfer Credit. No more than one course at the 100 level (i.e., without a prerequisite) will be counted toward the major; these courses may, however, count as general electives.
Regularly enrolled UM students wishing to take a Psychology course elsewhere (e.g., during the summer) must obtain prior Departmental approval if they wish it to be counted in place of a U.M. Psychology course. In some cases, transfer courses not approved as part of the major or minor may still meet other distribution or elective requirements.

Freshmen
All freshmen declared Psychology majors receive their advising as a part of a year-long advising, orientation, and mentoring program known as FACT FORUM. All freshmen declared as Psychology majors in the College of Arts and Sciences will be placed in a Freshman Experience section of FACT (Freshman Advising Contact Term). This is a one credit general elective course that is designed to integrate freshmen into the Department by familiarizing them with the guidelines, opportunities and responsibilities of a Psychology major. During the second semester, freshmen enroll in a FORUM section (Faculty Overview of Research and Undergraduate Mentoring). This one credit general elective course helps to put the curriculum in context, and stresses the importance of and opportunities for research.

MINOR
The minor in Psychology requires 15 credits in Psychology, with a grade of C- or better and a GPA of 2.0 or better for these 15 credits. No more than 3 of these credits may be in courses having no prerequisite, and no more than 3 credits may be in research courses (e.g., PSY 367). Of the 15 credits, 9 must have been completed at U.M.; with prior approval, 3 of these 9 credits may be taken through the U.M. Study Abroad Program.
DEPARTMENTAL HONORS

Any Psychology major may graduate with Departmental Honors in Psychology by attaining an overall GPA of at least 3.3 and a Psychology GPA of at least 3.5 and by completing PSY 204, PSY 316, and PSY 498/499. Thus, Departmental Honors entails both excellence in regular classes and completion of a Senior Honors Thesis.

Preparation for the Senior Honors Thesis should begin prior to the senior year and usually involves enrolling in PSY 367/8 during the sophomore or junior year. Permission to enroll in PSY 498 (Senior Thesis) is given only to students who have completed at least 18 credits in Psychology (including PSY 316) and whose overall and Psychology GPAs are at the levels required for graduation with Departmental Honors. To enroll in PSY 498, students must obtain written approval from both the faculty mentor who will supervise the thesis and the Department’s Director of Undergraduate Studies. These faculty members also assess the adequacy of the thesis upon completion. Students are expected to complete the Thesis course sequence; a grade of “IP” (i.e., incomplete in progress) is given for PSY 498 until PSY 499 is completed and approved.

Psychology Course Listing
INTRODUCTION

The University regards the academic study of religion as an integral part of liberal, humane learning and seeks to assist students in understanding the role religion plays in human existence and culture. Instruction in the Department of Religious Studies is non-sectarian and seeks an open analysis of all points of view. Courses are designed to provide a general orientation to the academic study of religion for the undergraduate student, as well as more advanced exposure for those who wish to pursue professional careers where a study of religious ideas and institutions would be helpful, such as in psychology, sociology, history, journalism, teaching, law, medicine, the fine arts, religious education, the ministry, and the rabbinate.

The Department sponsors a Religious Studies Colloquium. It has enriched the existing curriculum by bringing to the campus such outstanding scholars as Elizabeth Kuebler-Ross, Joachim Jeremias, Alvin Plantinga, Harry M. Orlinsky, Anson Rainey, Abraham J. Malherbe, Alan Segal, William May, Robert Segal, Douglas Allen, Marvin Sweeney, Martin Hengel, Martin E. Marty, and Juergen Moltmann.

EDUCATIONAL OBJECTIVES

The general educational objectives of the Department are (1) To explore texts, histories, and ways in which humans from various cultures have understood their world. Such exploration includes the beliefs, ethics, rituals, artifacts, and organizations of religions. (2) To understand the changing relationship between religion and elements of the wider culture. Such understanding includes the dynamics of politics, art, economics, literature, and society and their relationship to religions. (3) To become familiar with the theories and methods used in the study of religion.

DEGREE PROGRAMS

For students entering the University in or after Fall 2008, a major in Religious Studies leading toward the B.A. degree requires 30 credits in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0. At least 15 credits must be earned in courses numbered 300 or above. Six credits must be taken in each of the three following subject areas: 1) Religious Texts; 2) Historical Traditions; 3) Contemporary Issues. A major must earn writing credit (W) in at least one course in the department and must take the majors/minors seminar, REL 499.

Transfer students who major in Religious Studies must complete at least 15 credits in departmental courses numbered 300 or above in residence at the Coral Gables Campus.

MINOR

For students entering the University in or after Fall 2008, an undergraduate minor requires 15 credits, passed with a grade of C- or higher, and a GPA in the minor of 2.0. At least six
credits must be earned in courses numbered 300 or above, and at least three credits must be taken in each of two of the three subject areas: 1) Religious Texts; 2) Historical Traditions; 3) Contemporary Issues. Religious Studies 101 is required of all minors. Religious Studies minors are encouraged to take the majors/minors seminar, REL 499, but are not so required.

Transfers who minor in Religious Studies must complete at least 6 credits in the departmental courses numbered 300 or above in residence at the Coral Gables campus.

DEPARTMENTAL HONORS

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Theta Alpha Kappa, the National Honor Society for Religious Studies and Theology. Theta Alpha Kappa sponsors events that enhance the academic and social life of the department.

The Department of Religious Studies is also the home for the Society for the Study of Religions and Cultures (SSRC). This is a student group whose mission is to increase students’ knowledge and understanding of the world’s religions and the cultures in which they exist. The society’s events cover issues beyond what students learn in the classroom. Among other activities, field trips to different religious centers in the area provide first-hand experience with various religions and cultures. SSRC is open to all students.

Religious Studies Course Listing
INTRODUCTION

The Department of Sociology offers two majors—sociology and criminology. A student majoring in Sociology or Criminology may not minor in the other. Courses for both majors are designated SOC; see course list below. For information on Criminology please see the CRIMINOLOGY section of the Bulletin.

Course work in SOCIOLOGY is designed to provide scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other.

EDUCATIONAL OBJECTIVES

SOCIOLOGY courses have several objectives, including:

1. strong component of a liberal arts education, including skills that employers seek;
2. valuable undergraduate preparation for pursuing careers in such fields as journalism, politics, public relations, business or public administration—fields that involve investigative skills and working with diverse groups;
3. excellent grounding and training for future graduate work to become a professor or a research or applied sociologist.

DEGREE PROGRAMS

Students may earn a Bachelor of Arts degree in Sociology. The Department of Sociology also offers graduate degrees in Sociology with emphases in medical sociology, race and ethnic relations, and criminology.

MAJOR

A major in SOCIOLOGY requires: a minimum of 31 credits, including Sociology 101, 210, 211, 212, 501, and two of the following courses: SOC 301, Social Organization; SOC 302, Social Psychology: Sociological Perspective; SOC 303, Social Inequalities. All courses taken for major credit must be passed with a grade of C- or higher with an overall GPA of 2.0. Normally students cannot transfer more than 12 credits toward the major.

MINOR

A minor in SOCIOLOGY consists of 15 credits in Sociology, including SOC 101 and at least six credits in courses at the 300 level or above. All courses taken for minor credit must be passed with a grade of C- or higher with an overall GPA of 2.0.
DEPARTMENTAL HONORS

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Sociology or Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Sociology or Criminology. They must also achieve a minimum of B in all Sociology/Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.

2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499 (Honors I & II). The student should have the same professor(s) for all six credits.

3. Recruitment of eligible students is by department invitation at the beginning of a student’s junior year.

Sociology Course Listing
INTRODUCTION

The University of Miami Department of Theatre Arts offers two distinct undergraduate degrees: a liberal arts program leading to a Bachelor of Arts degree in theatre and a pre-professional conservatory-based theatre training program leading to a Bachelor of Fine Arts degree in either performance, musical theatre, stage management, theatre management, or design/production.

The Department also produces a season of plays and musicals at the Jerry Herman Ring Theatre as well as workshops and student projects in the Studio Theatre.

EDUCATIONAL OBJECTIVES

The mission of the University of Miami’s Department of Theatre Arts is to equip students to work in professional theatre, film and television or to gain admission to the best professional graduate programs.

Our graduates will be capable of applying theatrical techniques without guidance and will be capable of making independent creative judgment. Our broad aim in theatre training is professional excellence combined with depth of human understanding, freedom of expression and imagination in communication for all practitioners of the art and craft of theatre.

DEGREE PROGRAMS

THE BACHELOR OF ARTS DEGREE
THE BACHELOR OF FINE ARTS DEGREE

MAJOR

THE BACHELOR OF ARTS DEGREE
All students seeking a Bachelor of Arts degree in Theatre Arts must take the following courses with a grade of C- or higher in all Theatre Arts classes and an overall GPA of 2.0 or above.

All Bachelor of Arts Candidates will take ALL FIVE of the following core courses: THA 105, 141/143, 142/144, 481, and 482.

All Bachelor of Arts candidates will then choose SEVEN elective courses from the following list: THA 140, 240, 241, 242, 243, 244, 251, 252, 253, 254, 300, 341, 342, 343, 344, 347, 348, 351, 352, 353, 364, 365, 375, 381, 382, 385, 386, 441, 442, 451, 452, 456, 459, 461, 462, 463, 464, 465, 466, 467, 468, 485, 487.
The State of Florida recognizes the Bachelor of Arts and Bachelor of Fine Arts Degrees as meeting the Theatre Arts subject area requirements for teaching at the secondary level. In addition to earning the BA or BFA degree in Theatre, students desiring to teach in the field of Theatre Arts should complete the required education credits in order to be certified by the state.

THE BACHELOR OF FINE ARTS DEGREE
In addition to the general requirements for admission to the University, the student seeking admission to the BFA program must meet the following requirements of the Department of Theatre Arts:

1. Submission of a special supplementary application to the Department of Theatre Arts. (This form is in Part II of the University application).

2. An audition or interview/portfolio review to determine acceptance into the program. These audition/reviews will be held three times on the University of Miami campus as well as in major cities throughout the United States.

3. Design/technical production, stage management and theatre management students will be accepted into these programs on a probationary basis following an interview/portfolio review. Permanent acceptance into these programs will be made at the end of the first year by a thorough examination of the student’s portfolio.

Transfer students must follow the same entering procedures as freshmen and should realize that placement into the program will be determined by the Theatre Arts faculty. Candidates cannot transfer into the design/technical production, stage management and theatre management BFA degree program beyond their sophomore year, unless approved by the head of the appropriate program. Transfer students are not allowed into the performance or musical BFA degree programs unless they are willing to begin on the freshman level in their conservatory curriculum.

The candidates for the degree of Bachelor of Fine Arts must satisfy the College of Arts and Sciences distribution requirements.

Each BFA student will be evaluated by the faculty at the end of each semester. This evaluation will determine if the student is invited to continue in the program. Additional evaluations will take place each time a student is involved in a project.

In Theatre Arts Department courses a cumulative 2.7 grade point average is required to remain in the BFA program. A Theatre Arts major must maintain a minimum grade of C- or higher in each required course outside the theatre. Failure to maintain satisfactory academic standing may result in the student being placed on academic probation by the Department.

Theatre Arts courses are progressive in nature and students must successfully complete each course in sequence. Failure to pass the requirements of any particular class in the conservatory may result in the student’s dismissal from the program.

Production activities and discipline within the Department will be governed by a student handbook, available on the Department website (www.miami.edu/tha).

Musical Theatre and Acting Majors will be admitted to the Bachelor of Fine Arts degree program only in the fall of each academic year. The following pages specify the course requirements for each area of the BFA program.

## NOTE:

1. All Stage Management majors are required to participate in a production capacity in one show per semester for all eight semesters.

2. All Stage Management majors are required to stage manage or assistant stage manage one show in each year in their Sophomore, Junior and Senior year. This management assignment doubles as their production assignment for that particular semester.

3. THA 459 Stage Management Practicum can be repeated for a maximum of 12 credits.

4. THA Elective must be a 200 level or above course unless otherwise approved by Stage Management Faculty.

## MINOR

### MINOR IN THEATRE ARTS

A minor in Theatre Arts consists of 15 credits of Theatre Arts classes with a minimum grade of C- in each course and an overall GPA of 2.0 or above.

[Theatre Arts Course Listing](#)
URBAN STUDIES

INTRODUCTION

The minor in Urban Studies provides undergraduate students with a flexible concentration in interdisciplinary studies of cities, urbanism, and urbanity. Urban Studies is a long established academic field, especially prominent in major cities in the United States. Course work combines a practical focus on Metropolitan Miami with more general attention to urban theory and globalization from a global perspective.

The minor has a liberal arts orientation: and includes perspectives from the social sciences, architecture, and history. It is a useful complement to majors such as Geography, History, Sociology, Anthropology, Literature, International Studies, Economics, Political Science, and others. The minor is also of particular interest to students in Architecture and Business. Courses in the Minor are from the College of Arts & Sciences and from the School of Architecture. Note that there are slightly different requirements for ARC students.

MINOR

Requirements:
- Students must complete 15 credits (five courses);
- In all five courses, students must achieve a minimum grade of C- with a 2.0 overall GPA;
- All minors are required to take two core courses:
  - URB 201 Metropolitan Miami, 3 cr.
  - URB 301 Cities in Time and Space, 3 cr.
- In addition, students must select three courses from the list of Optional Courses, below. All are 3-credit courses. ARC students may select no more than one ARC course while A&S students must select at least one ARC course. Note that URB 201 or URB 301 will suffice as prerequisites for any of these courses.
  - ARC 585 History of Cities
  - ARC 541 Seminar on Town Design
  - ARC 554 Architecture of South Florida
  - ARC 584 Special Topics: On-Site Survey of European Architecture and Urbanism
  - APY 420 Archaeology, Architecture, and the City
  - GEG 430 World Cities
  - GEG 522 Urbanization in the Developing World
  - SOC 304 Dynamics of Poverty in the United States
  - SOC 368 Violence in America
  - HIS 369 Introduction to Urban America
  - HIS 371 Immigration, Race, and Ethnicity in American History
  - POL 343 Government in Metropolitan Areas

Other courses may be approved upon request; please consult the program Director, Dr. Jan Nijman at Nijman@miami.edu.

Urban Studies Course Listing
INTRODUCTION

The Program in Women's and Gender Studies at the University of Miami seeks to encourage the rigorous investigation of gender as a significant issue in all areas of human experience. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures based on gender shape our lives. The program's core objective is to foster the examination, open discussion, and lively debate of gender issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university's academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

EDUCATIONAL OBJECTIVES

The undergraduate curriculum in Women's and Gender Studies explores the ways in which ideas about gender and sexuality shape social roles and identities, as well as the ways in which race, ethnicity, class, and nationhood influence the perception and experience of gender and sexuality within particular cultures. The curriculum is informed by recent scholarship that recognizes gender and sexuality as crucial components of human experience in social, cultural, economic, political, religious, and legal contexts. It includes courses that introduce students to feminist theory and scholarship, engaging ethical and political issues of equality and justice. The program encourages students to question their assumptions about the possible meanings of female and male through the comparative study of how different societies and historical periods have viewed manhood, womanhood, and relations between women and men. Courses in Women's and Gender Studies enable students to acquire critical and analytical skills that they can then apply in other aspects of their educational experience at UM and beyond the university in their careers and personal development.

MAJOR

A major in Women's and Gender Studies consists of at least 30 credits in Women's and Gender Studies courses (core, co-listed, and cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses. These credits must include at least 18 at the 300 level or above. All majors must complete WGS 201: Introduction to Women's and Gender Studies, WGS 301: Feminist Inquiries, and at least two other WGS core courses.

All majors must complete WGS 501: Senior Research Project, which will take the form of an individual research project with a faculty member of the student's choice; the student is responsible for finding an appropriate faculty member who is available to supervise the project and then must seek formal approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will vary according to the nature of the project.
**MINOR**

A minor in Women's and Gender Studies consists of at least 15 credits in Women's and Gender Studies courses (core, co-listed, and cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses. These credits must include at least 9 at the 300 level or above. All minors must complete WGS 201: Introduction to Women's and Gender Studies, WGS 301: Feminist Inquiries and at least one other WGS core course.

**DEPARTMENTAL HONORS**

Women's and Gender Studies majors with a cumulative GPA of at least 3.5 in WGS courses and an overall GPA of at least 3.0 may earn departmental honors by completing WGS 505: Honors Thesis instead of the senior research project. Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as thesis adviser and then must complete a thesis proposal of approximately 400 words which must be approved by the thesis adviser and then the program director. The format and length of the thesis will vary according to the nature of the project. Most students writing an honors thesis as part of their WGS major will take WGS 505 twice (for a total of 6 credits).

[Women’s and Gender Studies Course Listing]
INTRODUCTION

The School of Business Administration offers courses leading to the degrees of Bachelor of Business Administration (BBA) and Bachelor of Science in Business Administration (BSBA). Undergraduate degrees in business are administered by the Vice Dean, Undergraduate Business Programs.

MISSION

The mission of the University of Miami School of Business Administration is to provide an environment in which the creation and dissemination of business knowledge can flourish.

ACCREDITATION

The Bachelor of Science in Business Administration and the Bachelor and Master of Business Administration as well as the undergraduate and graduate Accounting programs are fully accredited by The Association to Advance Collegiate Schools of Business, International (AACSB – International).

ACADEMIC POLICIES

Student Responsibilities

- Students in the School of Business Administration are responsible for planning their own programs and for meeting degree requirements;

- It is the student’s responsibility to understand fully, and to comply with all the provisions of this Bulletin and written changes to their program of study;

- Students are provided assistance by academic advisors and faculty members;

- Requests for deviation from department, program, or school requirements are granted only by written approval from the Vice Dean or respective department chairperson;

- Students who are in violation of the provisions of this Bulletin may be withdrawn unilaterally by appropriate School officials from classes, deleted as Business students, and/or have a “STOP” placed upon their future enrollment;

- Students who are disruptive in class as determined by assigned faculty and the appropriate Vice Dean will be dropped from the class;

- Information regarding appeal procedures and special requests relative to academic matters is available in Merrick 104, School of Business Administration, Office of Undergraduate Business Programs.
Admission to The School of Business Administration

Admission to the University for undergraduate study as a freshman is sufficient to be granted admission to the School of Business Administration. However, strong quantitative skills are typically needed for success. Admitted students may select an intended major and optional minor(s). Students who do not state an intended major are listed as undeclared in business.

Transfer Student Admission

The transfer applicant must submit a satisfactory academic record in compliance with the standards of the University of Miami, Office of Admission. All previous transfer courses must be from an accredited institution. The applicant must be in good academic standing at all institutions previously attended with a minimum cumulative grade point average of 3.0. A minimum grade of "C" (2.0) must be earned in transfer courses, unless otherwise stated, in order for credit to be awarded. All grades earned in transfer courses are used to determine the overall cumulative grade point average. This includes repeated courses under a forgiveness policy at previous institutions.

All applicants to the School of Business Administration must have completed and received college credit for a calculus course and earned a grade of “B” or better. The calculus course must be evaluated by submitting the syllabus and textbook title for review to the Director of Advising, Undergraduate Business Programs in the School of Business Administration.

Any business course that is from a non-AACSB accredited institution will be accepted as electives toward the degree requirements. An applicant may appeal the decision by submitting the syllabus and textbook title to the appropriate department for review.

Transfer coursework must meet the specific curriculum requirements as determined by the Office of Undergraduate Business Programs. Note that transfer students must complete 50 percent of the total Business Foundation and Professional Business Core and 50 percent of all major and all minor courses at the University of Miami.

It is strongly recommended that transfer applicants meet the following requirements at the time of transfer application:

- One semester of microeconomics (ECO 211), which may also be fulfilled by:
  - A score of "3" on the AP Microeconomics exam;
  - A score of "5" on the IB Higher Level Economics exam;
  - A course equivalent to microeconomics as determined by the Department of Economics.

- One semester of financial accounting (ACC211), which may also be fulfilled by:
  - A course equivalent to Financial Accounting as determined by the Department of Accounting.

- One semester of statistics (MAS201), which may also be fulfilled by:
  - A score of "4" on the AP Statistics exam;
  - A course equivalent to Introduction to Business Statistics as determined by the Department of Management Science.
It is strongly recommended that transfer applicants applying with 60 semester hours or more meet the following requirements at the time of transfer application:

- Two semesters of introductory economics, Micro and Macro (ECO211 and ECO212), which may also be fulfilled by:
  - A score of "3" on the AP Micro and/or Macroeconomics exam;
  - A score of "5" on the IB Higher Level Economics exam awards credit in Microeconomics;
  - A score of "6" on the IB Higher Level Economics exam awards credit in Micro- and Macroeconomics;
  - A course equivalent to Microeconomics or Macroeconomics as determined by the Department of Economics.

- One semester of financial accounting (ACC211), which may also be fulfilled by:
  - A course equivalent to Financial Accounting as determined by the Department of Accounting.

- One semester of managerial accounting (ACC212) which may also be fulfilled by:
  - A course equivalent to Managerial Accounting as determined by the Department of Accounting.

- One semester of statistics (MAS201), which may also be fulfilled by:
  - A score of "4" on the AP Statistics exam;
  - A course equivalent to Introduction to Business Statistics as determined by the Department of Management Science;
  - A second semester of statistics (MAS202) is strongly recommended, which may be fulfilled by a course equivalent to Intermediate Business Statistics as determined by the Department of Management Science.

**Academic Progress and Probation**

- The School of Business Administration will review each student’s record at the end of each semester;

- When a student’s semester or cumulative average is less than 2.0, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with the University’s or School of Business Administration’s policies and procedures;

- Full-time business students who are not completing sufficient courses to graduate after ten regular semesters of enrollment are deemed not to be making satisfactory academic progress;

- The extent to which a student’s record is below a 2.0 average determines the severity of the sanction, i.e., warning, academic probation, or dismissal;

- Students on probation are not permitted to enroll in more than 13 semester hours and may have a “STOP” placed upon their future enrollment until grades for work-in-progress are reviewed.
Academic Dismissal

- Business students may be dismissed in accordance with the University’s or School of Business Administration’s Dismissal Standards;

- Additionally, a student in the School of Business Administration whose grade point average or progress toward degree completion falls below the level of the minimum standards may be dismissed;

- Students will be precluded from continuing their studies in a major or courses if they do not have the specified grade point average or grades for the major or courses;

- A student who is precluded from continuing as an undergraduate business student because of failure to satisfactorily complete the required business foundation courses or to attain a high enough grade point average is not considered as having been academically dismissed from the University. Accordingly, such students may apply to another School or College and if accepted, continue as students at the University of Miami.

Freshman Repeat Rule (FRR)

The Freshman Repeat Rule (FRR) allows a student who receives a "D" or an "F" in a course taken at the University of Miami within the student's first thirty semester hours or first two regular semesters of college work, to repeat up to two such courses within the following two semesters. After the course has been repeated, only the second grade earned will be used in the computation of the student's cumulative grade point average. However, the initial grade remains on the record, although the initial grade does not count as credits attempted or earned at the University of Miami.

The following policy is applied specifically to business students using the University's Freshman Repeat Rule (FRR):

- The student’s academic standing is based upon the current grades being counted as credits attempted or earned;

- Students who repeat a course not under the provisions of the FRR are administered using the University General Repeat Rule;

- Students desiring to implement the policy must complete the FRR Request Form which is available in the School of Business Administration, Office of Undergraduate Business Programs;

- The summer sessions are not counted as a semester in computing the two semesters in which a student may elect to repeat a course with a “D” or “F” grade. Additionally, a student who initially enters the University in the spring semester may repeat courses with a “D” or “F” grade taken in the summer sessions following initial enrollment without having the summer sessions count as one of the first two semesters;

- For additional information about the FRR, consult an Undergraduate Business Academic Advisor.
Readmission

The requirements for readmission may be viewed at the University’s website.

The following special conditions are in effect for the School of Business Administration:

- Students requesting readmission who were previously dismissed for academic reasons or who had below a 2.0 cumulative grade point average must present adequate evidence that the conditions and/or factors that caused their prior poor academic performance have changed sufficiently and that there is a reasonable expectation of satisfactory performance if they are permitted to resume study in the School of Business Administration;

- Additionally, students with prior unsatisfactory academic records who are readmitted may have conditions placed upon their readmission;

- Students requesting readmission who have earned 30 or more credits, unless otherwise specified, must have completed a calculus course with a grade of C- or higher.

- Failure to satisfactorily accomplish the stated conditions may result in the student not being permitted to register for future semesters.

Changes to Academic Requirements

The School of Business Administration reserves the right to change academic requirements to include course offerings, grades, and grade point averages, to ensure that students are receiving the latest knowledge and are maintaining standards necessary to be professionally competitive. Changes are transmitted to students either by written or electronic notice, or by academic advisors or mentors.

Requirements for Graduation

Residency Requirements

A candidate for the BBA or BSBA degree must complete the last 45 semester hours consecutively and exclusively in degree-seeking status in residence at the School of Business Administration, University of Miami, as well as meet the graduation requirements as listed in Degree Programs. Credit by examination may not be used to meet the residency requirement. In addition, a minimum of 120 semester hours is required for graduation, not including ENG103, or MTH099. The last 56 semester hours must be taken at a four-year institution.

Age of Credits

Credits more than 12 years old are not recognized for degree purposes.
**Grade Point Average**

Students must earn a cumulative grade point average of at least 2.0 on all undergraduate courses and a grade point average of at least 2.0 on all undergraduate courses taken at the University of Miami. Some majors require a higher grade point average. It is the student’s responsibility to be familiar with the grade point requirement for their respective major.

**Percentage of Credits at UM required**

At least fifty percent of the total semester hours required in the Business Foundation, Professional Business Core, and the major and minor must be completed at the University of Miami. Considered separately, fifty percent of the semester hours required in the major only and/or minor only must be completed at the University of Miami.

**DEGREE PROGRAMS**

**BACHELOR OF BUSINESS ADMINISTRATION (BBA)**

**Areas of Study**

All BBA majors must complete areas A, B, C, D, E, F, and G as listed below. All courses except area E must be taken for graded credit.

**A. BUSINESS FOUNDATION (39 Semester Hours)**

*Classes marked with an asterisk must be completed BEFORE beginning the Professional Business Core courses.

Unless otherwise specified, MAS110 and MAS201 must be completed with a “C-” or better.

ALL Business Foundation courses must be completed before entering any business major and/or minor course work.
B. PROFESSIONAL BUSINESS CORE (21 Semester Hours)

CIS410  Information Systems and Technology
ECO302  Micro Economic Theory
FIN302  Fundamentals of Finance
MGT303  Operations Management
MGT304  Organizational Behavior
MGT401  Strategic Management (Must be taken in final semester)
CORE ELECTIVE Any course at 300 level or higher from the School of Business Administration or any course at the 300 level or higher in a modern language.

C. GENERAL EDUCATION (30 Semester Hours)

ENG230  Advanced Business Writing
Fine Art
Humanities
Literature From Department of English
Natural World (6 Semester Hours)
People and Society (6 Semester Hours)
Philosophy or Religion
General Education Elective (From outside the School of Business Administration)

D. MAJOR AND MINOR REQUIREMENTS

All students must complete the requirements for at least one major in one of the areas of specialization. Additionally, students may elect to complete a minor in an area of specialization distinctly different from their major. The minor may be in an area of specialization offered by the School of Business Administration or by another school or college of the University. The major and minor requirements are specified by each department. All specialization (major/minor) requirements must be taken for a grade and completed with a grade of “C-” or higher with an overall grade point average in all major and minor courses attempted of at least a 2.0 unless a higher grade or grade point average is prescribed for a specific major or minor.

Dual Business Majors in distinctly different areas of specialization are also possible, pending proper scheduling. The only specialized courses that can be counted toward both majors or a major and a minor are those courses specifically listed by number as required for both majors and/or minors. The courses of choice required for one major or minor may not be utilized to satisfy requirements for a second major or minor.

Business students may choose to pursue a second major (also referred to as a co-major) from the College of Arts and Sciences. No courses used to satisfy a co-major may be used to satisfy a business major or minor. Courses used to satisfy a co-major may, however, also be used to satisfy a general education requirement or the General Education Elective.

Students in other colleges and schools desiring a major in the School of Business Administration must complete all requirements for both degrees and majors.

Students are required to declare their majors and minors with the Office of Undergraduate Business Programs prior to the start of their senior year. Students are advised that it often takes more than the minimum 120 semester hours to complete a minor or second major.

Please see the college, school, or department section within the Bulletin.

### E. ELECTIVES (as needed to meet the minimum 120 semester hours)

All undergraduate courses offered by the University may be used as free electives with the following exceptions:

- Not more than eight semester hours in applied music including band may be used;

- Courses taken in the following subjects require approval of the Vice Dean: athletic, physical and recreational activity courses offered in Exercise and Sport Sciences, Paralegal Studies, Vocal Performance and Teaching and Learning;

- ENG103 - Basic Writing Skills and MTH099 - Intermediate Algebra are offered but do not count toward degree requirements and the grade earned in the respective course is calculated into the cumulative grade point average;

- Any science course taken as an elective and used for preparing for entrance to medical school must be taken for a grade.
F. WRITING ACROSS THE CURRICULUM
Four of five writing courses required are provided within the degree requirements by the completion of BSL212, ENG230, one literature course, and MGT401. A fifth writing course is needed to complete University writing requirements.

G. INTERNATIONAL FOCUS WITHIN THE CURRICULUM
At least one course with an international focus must be completed within the degree requirements. The acceptability of the course is determined by the academic advisor.

BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION (BSBA)

Areas of Study
The BSBA degree in the School of Business Administration emphasizes quantitative foundation courses. All BSBA majors in the School of Business must complete areas A, B, C, D, E, F, and G as listed below. All courses except area E must be taken for graded credit.

- Any science course taken as an elective and used for preparing for entrance to medical school must be taken for a grade.
F. WRITING ACROSS THE CURRICULUM

Four of five writing courses required are provided within the degree requirements by the completion of BSL212, ENG230, one literature course, and MGT401. A fifth writing course is needed to complete University writing requirements.

G. INTERNATIONAL FOCUS WITHIN THE CURRICULUM

At least one course with an international focus must be completed within the degree requirements. The acceptability of the course is determined by the academic advisor.

INTERNATIONAL BUSINESS MINOR

IBUB MINOR

The International Business minor provides business students an interdisciplinary perspective of international business to augment their studies in other areas of specialization. The International Business minor consists of 12 semester hours as follows:

Core Courses - Choose two, three, or four courses from the following:

- ACC523
- FIN330
- MGT349
- MGT459
- MKT360

Breadth Elective Courses - Choose one or two courses to equal 12 total semester hours for the IBUB minor from:

- BSL412  ECO442  POL346  POL381  POL391  POL585
- ECO351  FIN431  POL347  POL384  POL392  POL588
- ECO371  MGT359  POL348  POL385  POL544  POL591
- ECO441  MKT469  POL380  POL387  POL582  POL593

The IBUB Minor may not be taken by students with the IFM major.

Student must complete all prerequisite courses before enrolling in required IBUB courses.

MINORS FOR NON-BUSINESS MAJORS (12-15 Semester Hours for Minor)

The School of Business Administration offers students in other schools and colleges of the University minors in:

<table>
<thead>
<tr>
<th>Minor Areas of Specialization</th>

<td>MKT</td>
</tr>
</tbody>
</table>
The International Business minor, the Accounting minor and the Management Science minor (BSBA degree only) are offered only to majors in the School of Business Administration.

Students interested in completing a minor offered by the School of Business Administration should consult with an academic advisor in the school or college of their major to determine if a minor in business is acceptable. The student must consult with an academic advisor in the Office of Undergraduate Business Programs for assistance in planning the minor. All courses within the minor must be taken for a grade and completed with a grade of "C-" or higher and with an overall grade point average of at least 2.0 in all minor courses unless a higher grade or grade point average is prescribed by the minor department. All courses in the minor department in which the student enrolls will count toward the minor grade point average.

**The Business Administration Minor (BUA)** consists of four courses (12 semester hours).

The required courses are:
- ACC211 Principles of Financial Accounting
- MGT304 Organizational Behavior
- FIN300 Finance for Non-Business Majors
- MKT301 Marketing Foundations

**Note:** A student must have 30 earned semester hours before enrolling in ACC211. Additionally, a student must have 60 earned semester hours before enrolling in the respective FIN, MGT, or MKT courses. ACC211 should be the first course taken for the BUA minor.

For a listing of the course requirements for other minors, consult the Bulletin section for the department that offers the minor.

**HONORS**

**DEPARTMENTAL HONORS IN BUSINESS**

Graduation with Departmental Business Honors requires:

- A 3.9 g.p.a. in Business School courses at the end of the junior year
- Completion of a 3-credit research project during the entire senior year on a topic that is of interest to both the faculty member supervising the research and the student responsible for completing it. The depth of the project must be consistent with the time requirements of a 3-credit upper-level class in the supervising department.
- A 3.9 g.p.a. in all Business School courses at graduation.

Students who double major can complete their research project in either major department. Students in combined majors (ENT, IFM, REA) can complete their research project in any department within the major. Students who have a minor can complete their research project in either their major or minor departments.

The 3-credit research project class is taken for credit only and will not count towards the 120 hours required for graduation.
Students who begin a research project but do not complete it will be retroactively withdrawn from the research course. Students receive credit for the project only if the work is deemed to be of exceptional quality, consistent with the workload of a 3-credit upper-level independent study course, and worthy of a designation that is only open to the top 1% of Business School undergraduates.

Deadlines and procedures for the projects are available in the Office of Undergraduate Programs and in department offices.

**GENERAL HONORS PROGRAM, UNIVERSITY OF MIAMI**

Eligible students are invited to join the University’s General Honors Program. A total of 24 semester hours of designated honors credits is required. A 3.5 cumulative grade point average must also be maintained in all honors courses.

For details, consult an academic advisor in the Office of Undergraduate Business Programs and the University Honors Program Office.

**GENERAL BUSINESS HONORS, SCHOOL OF BUSINESS ADMINISTRATION**

Business students who are members of the General Honors Program of the University, are completing the required 24 hours for that program, and have demonstrated superior performance in the School of Business may receive academic advantages, certain privileges, and recognition by participation in and successful completion of General Business Honors.

General Business Honors requires that 15 of the 24 semester hours are business courses taken in sections designated as “Honors.”

Strategic Management, MGT401 (at the Honors section), must be one of the 5 courses.

Examples of other business courses frequently offered in honors sections are:

- BSL212 Introduction to Business Law
- ECO211 Economic Principles and Problems (microeconomics)
- ECO212 Economic Principles and Problems (macroeconomics)
- ECO302 Micro Economic Theory
- FIN302 Fundamentals of Finance
- MAS110 Quantitative Applications in Business
- MGT304 Organizational Behavior
- MKT301 Marketing Foundations

In addition, a 3.5 cumulative grade point average must be maintained in all honors business courses to receive the notation, “General Business Honors” on the diploma and transcript.

For details, consult an academic advisor in the Office of Undergraduate Business Programs and the University Honors Program Office.

**GRADUATION HONORS**

- Students who qualify based on their cumulative grade point average and class rank will graduate with *cum laude, magna cum laude* or *summa cum laude* honors.
For details consult an academic advisor in the Office of Undergraduate Business Programs and the University Honors Program Office.

BUSINESS HONORS SOCIETIES

Students may be nominated for or elected into an honors society based on specific departmental criteria. Contact the department for additional information.

Beta Gamma Sigma (Highest Honors in Business) (Undergraduate Business Programs)
Beta Alpha Psi (Department of Accounting)

OTHER HONORS

Omicron Delta Epsilon (Department of Economics)
Hyperion Council (Undergraduate Business Programs)
ACCOUNTING - Department Code: ACC

INTRODUCTION AND EDUCATIONAL OBJECTIVES

The objective of the program of studies in accounting is to prepare students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed upon general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

DEGREE PROGRAMS

An Accounting major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

The undergraduate curriculum consists of 24 semester hours of Accounting and three semester hours of Business Law beyond the Business Foundation and the Professional Core requirements.

The following courses are required:
ACC301    ACC402
ACC306    ACC403
ACC311    ACC404
ACC312    ACC411
BSL301

To continue as an accounting major, a student must have a cumulative grade point average of 3.0 or higher in accounting before enrolling in ACC312.

MINOR

The Department of Accounting allows business students to earn a minor in accounting. In addition to the general requirements for all business minors, business students wishing to minor in accounting must complete ACC301, ACC311 and ACC403.

FLORIDA CPA EXAM

Persons who wish to become Certified Public Accountants in Florida and most other states are required to complete at least 30 semester hours beyond the baccalaureate degree. Accordingly, many of our graduates satisfy the 30 semester hours requirement for the CPA by continuing on for a fifth year during which time they also can complete the requirements for either the Master of Professional Accounting or Master of Science in Taxation degree.
Students interested in these programs should consult with the Program Director within the Department of Accounting.

Accounting Course Listing
BUSINESS LAW - Department Code: BSL

Business Law

INTRODUCTION

The modern manager faces increasing legal implications in daily operations and in formulating business policy. Consequently, effective decision-making requires an appreciation of the social, ethical, economic, and political bases of law as it relates to business. Business law courses provide the student with fundamental insight into legal institutions, the regulatory environment, and the nature of legal discourse, as well as an array of substantive principles of law, including such areas as contracts, sales, business organizations, and domestic and international commercial relationships.

EDUCATIONAL OBJECTIVES

The primary goals of the Department of Business Law are to contribute to legal knowledge through conducting scholarly research, to disseminate it by publication in leading journals and law reviews, and to transmit that knowledge to students and the larger UM-wide, business, and professional communities.

These goals both inform and drive the Department’s educational objectives, which focus on:

- instilling in students a strong sense of the legal and ethical issues permeating business;
- aiding students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- developing students’ analytical and problem solving ability, as well as their oral and written presentation skills.

DEGREE PROGRAMS

A Legal Studies major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

A student may major in Legal Studies. This course of study facilitates the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human relations, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.
The following comprises the coursework for a major in Legal Studies:
BSL212  Introduction to Business Law (required)
BSL485  Managing the Legal Factor (required in the student’s final semester)
and
Twelve (12) additional semester hours taken from the departmental offerings listed below:
BSL213  Business Organizations and Personal Property
BSL301  Commercial Paper and Creditors’ Rights
BSL305  Legal and Social Aspects of Business Regulation
BSL313  Coastal Law
BSL314  Ocean Law
BSL333  Legal Aspects of Real Estate Transactions
BSL412  International Business Law
BSL424  Intellectual Property Law
BSL460  Health Care Law and Ethics

MINOR

Students in the School of Business Administration as well as students in the other schools and colleges of the University of Miami may minor in Business Law. Like the Legal Studies major, the minor is a flexible one, permitting business and non-business students alike to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student’s chosen corporate, creative, scientific, academic, professional, or personal endeavors.

Twelve semester hours are required for the minor, including BSL 212 and BSL 485, plus six (6) additional semester hours taken from departmental offerings, excluding BSL 575.

Business Law Course Listing
INTRODUCTION

The Department of Computer Information Systems serves the University as the focus for employing Information Technology (IT) in the efficient solution of the entire range of business problems.

The administration and management of today’s business and government organizations rely heavily upon Information Technology for the efficient achievement of their goals. Collection, storage, and retrieval of data by computers are involved in the wide range of business activities including daily operations, management decision-making, and long-range planning. As the dependence of management on Information Technology grows, so does the need for Information Technology specialists. The courses and degree programs are described below.

EDUCATIONAL OBJECTIVES

The Computer Information Systems major is designed to provide the student with the key Information Technology skills needed in today’s business environment, plus a firm grounding in the major business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as programmers, systems analysts, consultants, user support analysts, or other Information Technology positions.

DEGREE PROGRAMS

A Computer Information Systems major can earn either a Bachelor in Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

Required Core (24 semester hours)
CIS320 Introduction to Programming
CIS324 Object-Oriented Programming in Java
CIS360 Analysis of Information Systems
CIS361 Design of Information Systems
CIS423 Database Management Systems
CIS430 Business Telecommunications
CIS465 Applied Software Project Development
CIS494 Web Application Technologies
Technical Electives (3 semester hours)
CIS390-CIS399   Topics in Computer Information Systems (with Departmental approval)
CIS490-CIS498   Topics in Computer Information Systems (with Departmental approval)
CIS499         Directed Study in Computer Information Systems (with Departmental approval)
CIS550         Computer Information Systems Internship (with Departmental approval)

Note: All major courses must be completed with a grade of “C-” or better. In addition, an overall grade point average of 2.5 or higher is required for all courses in the major.

MINOR

The minor in Computer Information Systems consists of:
CIS320   Introduction to Programming
CIS360   Analysis of Information Systems
and
Six (6) additional semester hours taken from the departmental offerings listed below:
CIS324   Object-Oriented Programming in Java
CIS361   Design of Information Systems
CIS423   Database Management Systems
CIS430   Business Telecommunications
CIS493   Fundamentals of IT Project Management
CIS494   Web Application Technologies
CIS498   Entrepreneurship: Technology and Innovation

Computer Information Systems Course Listing
ECONOMICS – Department Code: ECO

INTRODUCTION AND EDUCATIONAL OBJECTIVES

Economics uses the idea of maximizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of human behavior. The program provides excellent preparation for careers in business, in government, and in international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

DEGREE PROGRAMS

An Economics major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

The major in economics consists of at least 24 semester hours, which must include:

ECO211
ECO212
ECO301
ECO302

MTH109 or MAS110 or a higher calculus course is required of all Economics majors and minors. The calculus course must be completed before enrolling in ECO302.

MINOR

Business students may minor in economics by taking nine semester hours in addition to the business core courses of ECO211, ECO212, and ECO302.

Non-business students in any school or college may minor in economics. Non-business students are required to take ECO211, ECO212, ECO302 and two additional economics courses for a total of 15 semester hours.

Note: All courses submitted for the major or minor must be completed with a grade of “C-” or higher and with an overall grade point average of “C” or higher.

Academically qualified students may elect to take courses from the Department’s curriculum for Honors credit.

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may be the major of a candidate for the Master of Arts and Doctor of Philosophy degrees. Consult the Graduate
Bulletin for the program general requirements.

Economics Course Listing
FINANCE - Department Code: FIN
Finance

INTRODUCTION
The finance major is designed to prepare students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

EDUCATIONAL OBJECTIVES
The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. We study these issues in a variety of contexts and industries. The three primary areas of finance are financial management, investments, and financial markets and intermediaries. Financial management focuses on how an organization can accomplish its mission. For example, a corporation seeks to create and maintain wealth, and a non-profit organization seeks to improve the world in some way. All organizations want to achieve their mission to the greatest extent possible, and that requires making the best decisions with respect to value. The area of investments studies the purchase and sale of financial securities, such as stocks, bonds, options, and futures from the point of view of an investor. Financial markets are created to facilitate the trading (buying/selling) of financial securities. Financial intermediaries sell claims on themselves to investors, such as stock, life insurance, or a bank deposit. Financial intermediaries then invest the money from such sales in other assets such as loans, real estate, or other financial securities.

DEGREE PROGRAMS
A Finance major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

*and*

Twelve (12) additional semester hours taken from the departmental offerings, excluding FIN300. Six (6) of the semester hours must be taken at the 400 or 500 level.

**Note:** Students are strongly encouraged to take FIN303 and FIN320 during the same semester.

**MINOR**

A minor in Finance consists of 12 semester hours as follows:

- FIN302
- FIN303
- FIN320

*and*

One (1) additional finance course at the 300, 400, or 500 level, excluding FIN300.

All courses must be taken within the current prerequisite structure.
INTERNATIONAL FINANCE AND MARKETING
Finance - Department Code: FIN
Marketing - Department Code: MKT

INTRODUCTION

The International Finance and Marketing (IFM) major is aimed at meeting the needs of students who want to pursue a career in international business, finance, and/or marketing.

EDUCATIONAL OBJECTIVES

The IFM major is designed to prepare students for the most critical areas of decision making in international business. The objective is to provide students with a comprehensive curriculum based on a strong program of international courses, and create opportunities for access to multinational companies and the international business community.

INTERNATIONAL FINANCE AND MARKETING MAJOR

Important Note: To major in IFM, a student must earn a grade of “B” (grade point of 3.0) or higher in both FIN302 and MKT201/301 (note that a grade of “B-” does not qualify). The IFM major consists of a minimum of 21 semester hours beyond the core (FIN302 and MKT201/301). The IFM course requirements are:

<table>

and

One (1) additional finance course at the 400 level.
All courses must be taken within the current prerequisite structure.
REAL ESTATE
FINANCE - Department Code: FIN

INTRODUCTION

The Real Estate major in the Business School is created for students who want to apply the theoretical and analytical concepts of finance to real estate lending, investment and development.

EDUCATIONAL OBJECTIVES

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major strengthens ties with important segments of the business community and builds on the University’s strategic strengths in architecture (New Urbanism) and urban planning.

REAL ESTATE MAJOR

Important Note: To major in Real Estate, a student must earn a grade of “B” (grade point of 3.0) or higher in FIN302 (note that a grade of “B-” does not qualify). Real Estate Majors should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (For more information, contact the Director of the Urban Studies Program, Dr. Jan Nijman: 305-284-6692 or Nijman@miami.edu.)

The Real Estate Major consists of a minimum of 18 semester hours beyond the core (FIN302). The following courses beyond the School of Business Administration core are required:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Prerequisite(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select either:</td>
<td></td>
</tr>
<tr>
<td>FIN 303  Intermediate Financial Management</td>
<td>FIN302</td>
</tr>
<tr>
<td>or FIN 320 Investment and Security Markets</td>
<td>FIN302</td>
</tr>
</tbody>
</table>

Note: In choosing to take FIN303 and/or FIN320, students are strongly advised to consider the prerequisites of 400 level classes they might want to take later.

Select two courses from the following:

- FIN427 Fixed Income Markets and Analysis FIN302, FIN320
- FIN444 Real Estate Investment and Appraisal FIN302, FIN303 or FIN320
- FIN445 Real Estate Finance FIN302, FIN303 or FIN320

and

- BSL333 Real Estate Law BSL212
- ARC584 Introduction to Real Estate Development and New Urbanism

and

One (1) additional Finance or Business Law course at the 300 or 400 level available to be taken within the current pre-requisite structure.
Note: Students who do not already possess a valid real estate salespersons license may want to take Finance 340 (Principles of Real Estate) as their 300- or 400-level elective course.

Note: Students who have an interest in the marketing aspect of the real estate industry should also consider taking Marketing 340 (Personal Selling) as the upper-core elective in their program.
INTRODUCTION

The Department of Management in the School of Business Administration is the largest of the eight academic departments, and is heterogeneous with respect to both research and teaching areas. Faculty are specialized in and teach courses that span a number of fields including entrepreneurship, health care management and policy, human resources, international management, leadership, operations management, organizational behavior, strategic management, supply chain management, and teams. Given both the multinational context and diversity present in 21st century organizations, coursework in the Department of Management is focused on preparing students to be productive and effective contributors to the various communities they are embedded within or impact. Management majors pursue a variety of careers after graduation including law schools, advanced graduate degrees, starting businesses, running family businesses or accepting management positions in domestic or international organizations.

EDUCATIONAL OBJECTIVES

- Development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- Improvement of interpersonal skills and learning to work effectively in teams;
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations;
- Awareness of the ethical issues and responsibilities inherent in being a member of the global business community.

DEGREE PROGRAMS

Any major from the Department of Management may earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJORS

Note: All major and/or minor courses in the Department of Management must be completed with a grade of “C” or higher and with an overall grade point average of 2.5 or higher.

The Department of Management offers the following three majors:
MANAGEMENT MAJOR

The MGT major will prepare students for future careers in all areas of management, including small business and corporate levels. The MGT major provides a solid preparation for students interested in pursuing other graduate degree programs, particularly in law and business.

A major in Management consists of at least 21 semester hours, but not more than 27, in departmental courses completed with a grade of "C" or higher. Any one course may not be applied toward more than one major in the Department of Management. All majors must include:
- MGT302 Human Resource Management
- MGT303 Operations Management
- MGT304 Organizational Behavior
- MGT307 Advanced Organizational Behavior [prerequisite MGT304]

Plus nine semester hours from the Department of Management (excluding MGT100 and MGT401).

ENTREPRENEURSHIP MAJOR

The ENT major is primarily designed for students who intend to start and/or manage their own business. The required curriculum is a total of 18 semester hours and includes:
- MGT353 The Organization and Operation of the Small Business (must be taken during junior year for sequencing; FIN302 must be taken prior to or concurrently with MGT353)
- MGT454 High Potential Ventures (prerequisite MGT353)
- MGT455 Entrepreneurial Consulting (prerequisites MGT353, MGT454)
- MGT Elective Choose one from MGT302, MGT307, MGT360, MGT422 (MGT304 is the prerequisite for MGT307/360/422], MGT457, MGT498, MGT598 (selected topics in entrepreneurship, as approved).
- FIN Elective Choose one from FIN303, FIN320, FIN410, or FIN425
- MKT Elective Choose one from MKT302, MKT310, MKT320, or MKT340 (recommended)

All courses must be taken within the current prerequisite structure.

HUMAN RESOURCE MANAGEMENT MAJOR

The HRM major is for students who intend to pursue a career in human resources or personnel. The total major requirement is 15 semester hours and requires:
- MGT302 Human Resource Management
  (Must be taken during junior year for sequencing)
- MGT307 Advanced Organizational Behavior (prerequisite MGT304)

and

Nine semester hours from the following courses:
- MGT308 Training and Development (prerequisite MGT302)
- MGT360 Effective Leadership (prerequisite MGT304)
- MGT428 Wage and Salary Administration (prerequisite MGT302)
- MGT480 Organizational Development and Change (prerequisites MGT302, MGT304)
- MGT422 Leading Teams (prerequisite MGT304)
- PSY332 Tests and Measurements (check prerequisites)

All courses must be taken within the current prerequisite structure.
MINORS

Minor in Management for Business Students
A minor in this area for business students (MGTB) consists of 12 semester hours in MGT courses beyond the required MGT courses for the BBA or BSBA degree.

Minor in Management for Non-Business Students
A minor in this area for non-business students (MGT) consists of 12 semester hours and must include the following courses:
- MGT302 Human Resource Management
- MGT303 Operations Management
- MGT304 Organizational Behavior
- Plus one additional 300 level or higher course from the Department of Management.

_minor in Health Sector Management and Policy
The purpose of the minor in Health Sector Management and Policy (HSMP) is to provide the student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical and governmental policy of the health care industry. Appropriate candidates for this minor would include: students in any UM School or College interested in exploring the health care sector, working in the legal, management or policy making aspects of the health care sector or those wanting to have an augmentation to their pre-med, pre-law or pre-MBA, MPA or MPH studies as well as those pursuing a Ph.D. The minor in this area consists of the following four courses:

Required Courses
- MGT270 Introduction to Health Sector Administration
- ECO386 Health Economics
- BSL460 Health Care Law and Ethics
- POL536 US Health Care Crisis: Politics and Policies

Prerequisite(s)
- ECO211, ECO212, ECO302
- BSL212
- Junior Standing

Minor in Entrepreneurship for Business Students
Eligible business students must have a declared business major other than Entrepreneurship. Two specialized tracks are offered for business students who are interested in minoring in Entrepreneurship. Specifically:

High Growth/Technology Ventures
- MGT353/Entrepreneurship
- MGT454/High Potential Ventures
- FIN320/Investment and Security Markets OR FIN425/Business and Security Valuations
- MGT498/Entrepreneurship: Launching Hi-Tech Ventures OR CIS410/Information Systems and Technology (applicable only for BSBA students)

Health Care Ventures
- MGT353/Entrepreneurship
- MGT454/High Potential Ventures
- MGT270/Health Sector Administration
- BSL460/Health Care Law and Ethics
Minor in Entrepreneurship for Non-Business Students

This minor is for non-business students interested in developing business plans, or learning more about how to initiate and manage small business enterprises. Eligible UM students must be enrolled, and have a declared major outside of the School of Business Administration. An Entrepreneurship minor for non-business students consists of 6 courses, 18 credits as follows:

- ACC211/Principles of Financial Accounting
- ECO211/Economic Principles and Problems
- MKT301/Marketing Foundations
- FIN300/Finance for Non-Business Majors
- MGT251/Nature and Foundations of Entrepreneurship
- MGT353/Entrepreneurship

Management Course Listing
MANAGEMENT SCIENCE - Department Code: MAS
Management Science

INTRODUCTION
Management Science uses the ideas and methods of science, mathematics, statistics, and computing to help managers make better decisions. Management Science had its modern origins in the study of military operations during World War II; hence this field of study may also be called Operations Research. Today, Management Science/Operations Research is applied in a wide variety of areas including financial modeling, marketing research, organizational theory, transportation and logistics, health care, environmental protection, and manufacturing. Almost any decision you make can benefit from the methods of Management Science.

EDUCATIONAL OBJECTIVES
The curriculum in the Department of Management Science is designed to give students the necessary educational background and experience to allow them to work as successful Management Science analysts. In addition to the general education, business, and economics courses of the Bachelor of Science in Business Administration degree program, the major in Management Science requires a solid background in the natural sciences and mathematics. Additionally, students are required to take sequences of courses in calculus-based statistics, deterministic and stochastic modeling, and computer programming. A number of the courses in the curriculum require projects that have students evaluate a real-world system or process. As the system is studied and modeled, the students apply the methods of Management Science to find ways to improve the process. The written and oral presentation of their findings is part of the learning and evaluation process. A major or minor in Management Science is recommended to qualified students as preparation for direct entry into the field of Management Science or as preparation for future graduate studies.

DEGREE PROGRAMS
The Bachelor of Science in Business Administration (BSBA) is awarded for the major in Management Science by meeting the appropriate School of Business Administration requirements.

MAJOR
The Department of Management Science offers both a major and minor for students pursuing the Bachelor of Science in Business Administration degree. All required courses within the major or minor in Management Science must be completed with a grade of “C-” or higher. Additionally, the cumulative grade point average of the Management Science major or minor course work must be 2.5 or higher. The coursework for obtaining a major in Management Science is as follows:
Required Core (15 semester hours)
MAS441  Deterministic Models in Operations Research
MAS442  Stochastic Models in Operations Research
MAS452  Systems Analysis Methodology and Applications
MAS547  Computer Simulation Systems
CIS320  Introduction to Programming
and
One (1) of the following courses:
CIS323  Object-Oriented Programming in C++
CIS324  Object-Oriented Programming in Java
CIS360  Analysis of Information Systems
MAS548  Systems Dynamics Modeling and Analysis

MINOR
Available only for majors in the Bachelor of Science in Business Administration. The coursework required for a minor in Management Science is as follows:

MAS441  Deterministic Models in Operations Research
MAS442  Stochastic Models in Operations Research
MAS452  Systems Analysis Methodology and Applications
All courses must be taken within the current prerequisite structure.

DEPARTMENTAL HONORS
Students interested in having departmental honors entered on their diploma must meet the general requirements outlined by the School of Business Administration and must complete the departmental course requirements with a grade of “B+” or higher. Students interested in having departmental honors must also complete a three semester hour thesis/project under MAS499 Directed Study, as part of their electives. This project must be approved by the Department Chair by the end of the student’s junior year (90 semester hours) of study. Students wishing to be considered for graduation magna cum laude or summa cum laude are required to write an honors thesis. These students must confer with the department chairman to select a thesis topic at the end of their junior year (90 semester hours) of study.
INTRODUCTION

Rapidly increasing global competition, emergence of new markets, and technological advancements make today’s marketplace a highly dynamic and challenging environment for companies. Effective marketing is therefore crucial for organizations to survive and prosper in such an environment. Marketing is the process through which organizations develop and distribute products and services that satisfy the needs of customers. Customer satisfaction is critical to the profitable operations and growth of organizations and, as such, an integral component of modern-day marketing.

EDUCATIONAL OBJECTIVES

The primary goals of the Department of Marketing are: (a) to contribute to marketing knowledge through conducting scholarly research and disseminating the research findings through leading journals, (b) to excel in imparting marketing knowledge to students and honing their critical-thinking skills so as to prepare them for potentially successful careers in an increasingly competitive, dynamic, global, and service-and technology-oriented environment, and (c) to be of service to the business and professional communities at large.

The marketing curriculum offers courses and programs to undergraduate and graduate students for their professional development in domestic and world business.

A program of study in marketing offers students better understanding of and insights into:

- Marketing’s role within the organization and society;
- The various ‘markets’ for goods and services through better identification and analysis of consumer needs, wants, and interests;
- Marketing’s responsibility to society in legal, ethical, and moral matters;
- Methods, procedures and techniques used in planning and managing marketing decisions.

DEGREE PROGRAMS

A Marketing major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

The Marketing major provides students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major prepares students to practice marketing in a changing competitive environment. Specifically the major covers the 4 Ps of marketing (i.e., product/service, price, promotion and
place/distribution) from a managerial perspective. Additionally, the marketing major is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research. A program of study in marketing offers students a comprehensive understanding of such topics as:

- Marketing’s critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies;
- Legal and ethical responsibilities of marketers.

**MAJOR**

The program of study for Marketing majors consists of the following:

**Important Note:** A student must earn a grade of “B” (*grade point average of 3.0*) or higher in MKT201/301 to continue the major or minor (a grade of “B-” does not qualify.) The overall grade point average in all Marketing courses taken must be 2.5 or higher. All Marketing courses in which a Marketing major enrolls will count toward the major.

**MINOR**

A minor in Marketing for business majors consists of at least 12 semester hours of marketing courses and must include the following: MKT201/301, with a grade of “B” (*grade point average of 3.0*) or higher (a grade of “B-” does not qualify), plus any three courses from the Department of Marketing as long as the prerequisite courses are taken. The overall grade point average in all marketing courses taken must be 2.5 or higher. All marketing courses in which a Marketing minor enrolls will count toward the minor.
MINOR FOR NON-BUSINESS MAJORS

A minor in Marketing for non-business majors consists of at least 12 semester hours of marketing courses and must include the following: MKT201/301 with a grade of "B" (grade point average of 3.0) or higher, plus any three courses from the Department of Marketing as long as the prerequisite courses are taken. Students may choose from MKT310, MKT320, MKT340, MKT360 or other electives with the permission of the instructor. The overall grade point average in all marketing courses must be 2.5 or higher. All marketing courses in which a Marketing minor enrolls will count toward the minor.

Marketing Course Listing
INTRODUCTION
The School of Communication offers courses in nine Programs of Study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Journalism, Motion Pictures, Communication Studies, Electronic Media, Media Management, Broadcast Journalism, and Visual Journalism. The degrees Master of Arts, Master of Fine Arts, and Doctor of Philosophy are available in the School; these degrees are under the supervision of the Dean of the Graduate School and the Faculty Council on Graduate Studies.

Students engage in a variety of hands-on learning experiences embracing research, production, creative problem solving and multimedia storytelling. All instruction requires the student to be familiar with computer technology and basic word and image processing software. Individual programs have specific computer, image taking and software tools and skills expectations of students. On campus television, radio, motion picture studios and multimedia labs are available for academic and extra-curricular student projects. Visual Journalism students utilize contemporary digital imaging technology. Motion picture production, digital editing, recording, and mixing facilities are available. Electronic Media and Broadcast Journalism students use TV studios and remote digital technology. New media technology is incorporated throughout the curriculum and the School houses several computer labs and digitally “smart” classrooms.

The School houses two video-conference centers with simultaneous translation capability and broadcast quality interactive capability for remote interviews and programming. The School also houses three TV studios, including a fiber-optic linked studio allowing real-time, broadcast-quality transmissions with remote sites around the world. Under Communication faculty supervision, student-produced programming is distributed through the University’s cable facility and is carried throughout Coral Gables by the local cable operator.

The University’s FM stereo radio station and student online and print newspapers and magazines offer additional opportunities for career development. The Bill Cosford Cinema, a 250-seat motion picture theatre, supports the motion picture program and offers programming for the community in connection with the Raymond J. Regis Motion Picture Archive consisting of over 2,000 original prints of classic motion pictures. The School operates several online sites that afford students outlets for multimedia and cross platform writing, research, reporting and creative work.

The School’s Knight Center for International Media supports innovative research and development dedicated to a broad spectrum of interdisciplinary communication study. The Center has produced a variety of special projects including documentary motion pictures, specialized research, and global issue-oriented faculty/student initiatives. Two endowed Knight Chairs bring additional expertise and international perspective to the School’s research and learning experience.

The School sponsors a nationally competitive intercollegiate debate team, which annually produces several members of the All American Debate team. In addition, the School supports student chapters of the American Advertising Association, the Public Relations Society of America, the Society of Professional Journalists, the National Broadcasting Society and other professional organizations.
Internships in professional settings are available to Communication students at the junior and senior levels. Professionals at daily and weekly newspapers, magazines, news bureaus, cable systems, radio and television stations, production houses, and motion picture studios cooperate in the faculty-supervised internships. Executives of city and county governments, advertising agencies, public relations counseling firms, and private business and nonprofit organizations join in providing internship opportunities.

**MISSION**

The School of Communication is dedicated to a global educational perspective and is committed to providing a socially responsible and ethically grounded learning environment guided by a diverse faculty of scholars, artists and professionals. The School is committed to quality undergraduate and graduate programs in communication that emphasize the relationship between theory and practice. We believe in freedom of expression and creativity, and encourage both collaboration and independent thinking as we prepare future scholars, professionals and leaders for a lifetime of service and learning. The objectives of the School are to develop the student’s understanding and appreciation of communication theory, art, and science; to improve the student’s awareness of the pervasive role of communication in society; and to enhance the student’s communication skills.

**ACCREDITATION**

The School’s programs in Advertising, Electronic Media, Broadcast Journalism, Media Management, Journalism, Public Relations and Visual Journalism are accredited by the Accrediting Council on Education in Journalism and Mass Communication, Stauffer-Flint Hall, 1435 Jayhawk Blvd., Lawrence, KS 66045-7575.

**ACADEMIC POLICIES**

**Admission to Major**

A student entering the School of Communication as a freshman or as a transfer will enroll in Communication pre-major status. Candidates for the Bachelor of Science in Communication who have achieved sophomore standing and have satisfactorily completed the entrance requirements of one of the Communication majors (see Program Statements) will be admitted to major status in their chosen specific program of the School.

**Internal Transfer into the School of Communication**

A student enrolled at the University of Miami in a school or college other than the School of Communication may apply for admission into the School of Communication. Applications are accepted every fall and spring semester. A minimum overall grade point average of 2.5 is necessary for consideration. Applications are available in the Admissions, Academic &
Alumni Services Office of the School of Communication and must be submitted prior to the end of classes in either the fall or spring semester. Admission decisions will be made promptly after semester grades are final. Students will be notified in writing of the School’s decision.

Transfer Students

A transfer student must complete in residence a minimum of 15 credits toward a Communication major or a minimum of 9 credits toward a Communication minor. Courses taken elsewhere in Communication or related disciplines are not automatically accepted for a major at the University of Miami. Students who have obtained the written approval of the head of a Communication major to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major. Students should consult a School of Communication advisor to determine whether the transfer of Communication courses will increase beyond 120 the total number of credits required for a degree. In general, transfer credit will not be accepted to satisfy requirements for any course in any major or minor at the 300-level or above. Student petitions to transfer credit from ACEJMC-accredited or other accredited programs will be considered on an individual basis.

Transfer credit may not be used to satisfy requirements for any major in Communication without the written approval of the heads of the programs concerned.

Academic Progress & Probation/Dismissal

Students must maintain a quality point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication major. Following the first semester in which any student’s quality point average in the major falls below a 2.5, the School may issue a warning to that student that his or her work does not meet School expectations. Should that student’s QPA in the major be below a 2.5 in any subsequent semester, he or she may be placed on Academic Probation. The School may dismiss from the University any student who is on probation a total of two semesters (not necessarily consecutive). A student who has completed 45 University credits while enrolled in the School but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. A student who has been dismissed from the School may apply for admission to one of the other schools or colleges within the University but will not later be readmitted to the School of Communication. Those who wish to appeal their probation or dismissal must do so in writing to the Dean within 30 days of the notice of probation or dismissal. See also GOOD ACADEMIC STANDING, WARNING, PROBATION, AND DISMISSAL, in this Bulletin.

Internship Credit

Some programs allow students to complete multiple internships. However, students will be permitted no more than three credits in School of Communication Internship(s) toward their 39- or 45-credit majors or toward their 120-credit University degree.
Credit Hours and Advanced Placement Credit

Credits may be earned through Advanced Placement, IB, CLEP Examinations, and Advanced Placement by Proficiency Examinations. These credits may be applied to the appropriate Required Areas of Study or as electives except: (1) where prohibited by a specific program area; or (2) if the course is remedial (e.g., ENG 103, MTH 099). To earn credit toward the 66 credits required in the liberal arts and sciences, and toward the 120 credits required for graduation, each student must pay a recording fee and have exempted course credits entered on his or her University transcript. An exemption may be granted for ENG 105 by the Department of English, but this exemption will not earn credit to be applied toward the 66 credits required in the liberal arts and sciences or toward the 120 University credits required for graduation.

Grade Point Average

A candidate for the B.S. in Communication must complete the credit hours and achieve the quality point average specified for students in the University at large as stated in the section titled ACADEMIC PROCEDURES AND INFORMATION, subject to additional requirements specified in School and Program sections of this Bulletin.

Areas of Study

In applying these requirements to his or her course of study, each student must carefully read School of Communication program and major requirements that follow. In many cases, these requirements will be more restrictive and more specific in describing how each of these Required Areas of Study is to be satisfied.

DEGREE PROGRAMS

The School of Communication offers courses in nine Programs of Study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Journalism, Motion Pictures, Communication Studies, Electronic Media, Media Management, Broadcast Journalism, and Visual Journalism.

MINORS

The School of Communication offers minors in each of its nine Programs of Study.

CONCENTRATIONS

Each degree program offers concentrations or tracks of study in specialty areas. See the individual program sections for details on these concentrations.
REQUIREMENTS FOR GRADUATION

BACHELOR of SCIENCE DEGREE in COMMUNICATION

Required University General Education Requirements

A. AREAS OF PROFICIENCY

Proficiency requirements are intended to ensure that students either already possess, or will develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently. Superior scores on the SAT or ACT examinations may waive students from ENG 105 (requirement 1) and superior placement test scores administered by the Department of Mathematics may waive students from MTH 101 (requirement 2), but not from requirement 3.

1. English Composition 3 credits
   Students fulfill this requirement by satisfactorily completing English 105 and English 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the English 105/106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit in, ENG 105.

   Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit in, English 105.

   Courses satisfying the English Composition requirement may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

2. Mathematics 3 credits
   Students fulfill this requirement by satisfactorily completing a course in mathematics numbered above MTH 101 (excluding MTH 107 and MTH 119), or MAS 110, or an approved course in statistics. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics during orientation.

3. Writing Across the Curriculum (W) 5 courses
   Courses satisfying this requirement are those designated as involving a substantial amount of writing and the preparation of papers that are corrected for diction, syntax, style, and content. Some courses satisfying this Writing Across the Curriculum requirement will simultaneously fulfill a requirement under B. Areas of Knowledge (below).

B. Areas of Knowledge

These requirements are designed to help students understand and appreciate the intellectual achievements in major areas of human inquiry and creative endeavor. In satisfying these requirements students will explore the natural world, examine human development and behavior, and appreciate creative expression in the arts, literature, and philosophy.

No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement. Most courses above the 100-level require prerequisites.
Natural World (6 credits) Courses in the following areas: Biology; Chemistry; Ecosystems Science and Policy; Geological Sciences; Marine Science; Physics; Physical Science; and the following courses: Anthropology 203; Geography 120; Freshman Seminars in the Natural Sciences 190-199.

People and Society (6 credits) Courses in the following areas: Africana Studies; American Studies (AMS); Anthropology (except APY 203); Economics; Educational Psychology; Geography (except GEG 120); History; International Studies; Judaic Studies (JUS); Political Sciences; Psychology; Sociology; Teaching and Learning; Women and Gender Studies (WOS); and the following courses: CEM 102; COM 101; COM 110; COS 112; COS 336; COS 472; Freshman Seminars in the Social Sciences.

Arts and Humanities (12 credits) Courses in the following areas: American Studies (AMH); Architecture; Music; Art and Art History; Judaic Studies (JUH); Motion Pictures; Theatre Arts; English (200-level or above except ENG 208); Foreign Languages and Literatures (300-level or above); Philosophy; Religious Studies; and the following courses: COS 211; DAN 250; Freshman Seminars in the Arts and Humanities FFA 190-199. Students who do not have a separate foreign language requirement may use foreign language courses numbered at the 100 or 200 level to satisfy part of the arts and humanities requirement, if the language differs from the student’s native language and if, when beginning with a 101-level course, they also take the 102-level course in the same language.

Majors/Minors

Students majoring or minoring in the School of Communication must complete a School of Communication course with a grade of C or higher (a grade of C- or lower is not acceptable) before taking another course for which the first course is a prerequisite.

Major/Minor Requirements

The Major in the School of Communication 39 to 45 credits

A major in the School of Communication leading to a Bachelor of Science in Communication requires 39 or 45 credits in School of Communication courses specified in Program statements (below). Each course within the 39- or 45-credit major must be completed with a grade of C or higher (a grade of C- or lower is not acceptable). In addition, students must maintain a quality point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication 39- or 45-credit majors.

Students majoring in Advertising, Public Relations, Journalism, Visual Journalism, Electronic Media, Broadcast Journalism, and Media Management will be permitted no more than 30 credits in all these areas and in Motion Pictures, whether earned at the University of Miami or elsewhere, toward their 120-credit University degrees. Courses in these areas hereafter designated Mass Communication courses in this Bulletin, do not include COM 101, COM 110 or COM 250.

Students majoring in Motion Pictures will be permitted no more than 36 credits in Mass Communication courses, whether taken at the University of Miami or elsewhere, toward their 120-credit University degrees.
Students majoring in Communication Studies will be permitted no more than 36 credits of
courses in these areas of study, whether taken at the University of Miami or elsewhere,
toward their 120-credit University degrees.

Students who exceed the 30- or 36-credit limits set forth above must complete a like
number of credits more than the 120 credits normally required for a University degree.

**The second major**  
24 to 40 credits

Each Communication student, in addition to completing requirements for a Communication
major (below), must choose a second major field in the University curriculum. To find the
requirements for such a major, consult this Bulletin and confer with the appropriate
department representative. School of Communication advisors will aid students in
identifying the appropriate representative. The candidate for a Communication degree may
choose from among any of the disciplines offering majors for which they may qualify and
complete the major’s requirements.

The choice of the second major should be made no later than the beginning of the junior
year and must be approved by the discipline concerned. Each Communication student will
be required, by the time he or she has earned 72 credits, to submit to his or her
Communication advisor a statement of courses and other requirements for the chosen
major. This statement must be signed by the second major’s program head concerned, or
by the head’s representative. Any student making unsatisfactory progress in the second
major subject may be required to change majors or to relinquish candidacy for the
Communication degree.

Unless Communication Program statements otherwise restrict, a maximum of six credits
may count toward both a second major and the Required Areas of Study in the School of
Communication (above); see Program Statements.

**Minors**

A minor is not required for a Bachelor of Science degree candidate in the School of
Communication. A student who wishes to complete a minor offered by any program in the
University, in addition to the major in Communication and second major, must consult the
School of Communication Admissions, Academic & Alumni Services Office. A student who
wishes to take a minor as well as a major in Communication must take into account the
credit limits in area courses specified above.

The School offers minors for students enrolled in the College of Arts and Sciences and for
other students who require minors in their programs.

- A student minoring in the general area of Communication must complete 15 credits
  at least six of which must be at the 300-level or above.
- Courses taken for this minor must be approved in advance through the School’s
  advising system in the office of Admissions, Academic & Alumni Services.
- Other minors are in Advertising, Public Relations, Journalism, Visual Journalism,
  Motion Pictures, Communication Studies, and Electronic Media; see Program
  statements.
- Each course submitted for a Communication minor must be completed with a grade
  of C or higher (a grade of C- or lower is not acceptable).
Upper Division Credits

In earning a Bachelor of Science in Communication, each School of Communication student must complete a minimum of 36 credits of course work at the 300-level or above. Upper division courses taken in Required Areas of Study, in the School of Communication major, in the second major, and as general electives will count toward this 36-credit minimum requirement. Upper division transfer credits also apply.

Electives

Only Free Elective courses may be taken under the University’s Credit Only option (see CREDIT ONLY OPTION, this Bulletin). Free Electives are defined as courses not taken to fulfill the requirements of the major within the School of Communication, of the second major, or of the School’s Required Areas of Study (i.e., General Distribution requirements). Free Electives are courses taken not to meet any of the above requirements or their prerequisites, but taken solely to meet the requirement of a total of 66 credits in the liberal arts and sciences or the requirement of a total of 120 credits for the degree.

General electives

Electives in the University must be completed sufficient for a minimum total of 120 credits. Electives may be chosen from any courses offered by the University except certain unapproved courses such as Dance 101, 102, 103, and activity courses offered by the School of Education. Students should consult a School of Communication advisor before selecting elective courses. General electives may be taken in any School or College outside of the School of Communication. Excess credits in Communication will increase the total amount of credits required for graduation. Because specific courses are required in some School of Communication majors, students are advised to read Program statements carefully and seek the advice of a School of Communication advisor prior to taking general University electives.

Electives in the Liberal Arts and Sciences

Students must earn a total of 66 credits in the liberal arts and sciences, including those credits earned in Required Areas of Study, in the second major, in electives in the College of Arts and Sciences, in courses in the Department of Economics, in approved courses in the School of Music and School of Education, and in COM/COS courses 110, 211, and 333. Some majors require specific courses; see Program Statements.

Schedules

Fifteen or sixteen credits constitute a normal semester schedule in the School of Communication. Students who wish to register for more than sixteen credits must obtain prior approval. Students who are on academic probation will be limited to a maximum of thirteen credits.

Double Counting

A maximum of 6 credits from the second major, or from COM 101, or COM 110, may be used to satisfy the Required Areas of Study in the School of Communication. No course may be used to satisfy the requirements of more than one major or of a major and a minor. Two Communication core courses (see Program Statements) but no other courses submitted for
a student’s Communication major may be used also to satisfy School of Communication Required Areas of Study. Unless Communication Program statements otherwise restrict: (a) a course taken to satisfy Additional Requirements of a student’s major (and which appears on the list of courses accepted in satisfaction of School Required Areas of Study) may also be used to satisfy a School Required Areas of Study requirement; and (b) a maximum of six credits may count toward both a second major and the School Required Areas of Study. The foregoing notwithstanding, any course designated as a Writing course, whether taken to fulfill a major, minor, Additional Requirements, or Required Areas of Study requirement, or as an elective, may also be applied to the Writing Across the Curriculum requirement.

**Freshman Seminars**

An approved Freshman Seminar may satisfy one of the School Required Areas of Study requirements. Consult the School of Communication Academic Services Office.

**Aerospace Studies and Military Science**

A maximum of six credits of Aerospace Studies and Military Science courses at the 300-level or above may count toward the 120-credit University degree but only as general elective credit.

**Additional program requirements**

Most programs in the School require a student, in order to obtain the School’s Bachelor of Science degree, to complete specified courses in addition to those 13 or 15 courses that comprise the majors. These courses may, in some cases, fulfill requirements in Required Areas of Study or in the second major, or may be electives in the College of Arts and Sciences or general electives in the University. In completing these additional course requirements, passing grades (D or better) are usually acceptable. If a grade of C or better is required in any additional course or courses beyond the 39- or 45-credit School of Communication major, program statements will so state. Read program statements carefully. Do not register for courses without a program advisor’s signed approval.

**HONORS**

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details about the School of Communication Honors Program.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.
UNDERGRADUATE ACADEMIC PROGRAMS

ADVERTISING - Dept. Code: CAD
http://com.miami.edu/Advertising

INTRODUCTION

Students majoring in Advertising learn the art, craft and business of how to promote brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development, and media planning skills. Both a major and a minor are offered in Advertising.

The program includes both fundamental and theoretical approaches to the world of professional advertising, both domestically and internationally.

The curriculum is hands-on and students learn first-hand how to create an advertising campaign that meets their client's goals.

Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community in the Greater Miami area or other regions. The School's Advertising program also has an active alliance with the American Advertising Federation.

EDUCATIONAL OBJECTIVES

The educational objectives of the undergraduate Advertising program require that

- Students demonstrate an understanding of the history of advertising as it relates to the emergence of mass media outlets and the importance of advertising in the marketplace.

- Students apply theoretical concepts related to advertising, mass communication, consumer behavior, psychology, sociology, marketing, and other related fields to understand how advertising works in a free-market economy.

- Students analyze primary and secondary research data to create advertising strategies for a variety of products and services.

- Students demonstrate the ability to create strategic advertisements for print, broadcast, online and other media, as well as how to integrate a campaign idea across several media categories in a culturally diverse marketplace.

- Students research, create, design, write, and present an advertising campaign of their own creation and compete for an account as they would at an advertising agency.
• Students understand how advertising works in a global economy, taking into account cultural, societal, political, and economic differences that exist across countries and cultures.

• Students demonstrate an understanding and appreciation of the core ethical principles of the advertising profession.

DEGREE PROGRAMS

The Bachelor of Science in Communication is offered in the Advertising Program.

MAJOR

A major is offered in Advertising.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the Required Areas of Study, the student’s chosen second major, and electives sufficient for a total of 66 credits in the liberal arts and sciences.

A Bachelor of Science student in Advertising will be permitted a maximum of 30 credits in Mass Communication courses (excluding COM 101, COM 110 and COM 250) toward the 120-credit University degree.

Admission to the Advertising major

Before admission as an Advertising (CAD) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

Students who have obtained the written approval of the director of the Advertising program to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.
THE ADVERTISING MAJOR

Students majoring in advertising will choose one of the following three tracks: the General Advertising Track, the Advertising Management Track, or the Advertising Creative Track.

THE GENERAL ADVERTISING TRACK

**CORE COURSES**

- COM 101 Mass Media Communication in Society
- COM 110 Communication Theory
- CAD 114 Principles of Advertising
- COM 250 Freedom of Expression and Communication Ethics

Select one of the following courses:
- CAD 231 Advertising Copywriting and Concept or
- CAD 233 Writing for Account Planning

**OTHER REQUIRED COURSES**

- CAD 201 Advertising Strategy Development
- CAD 312 Research Methods for Advertising
- CAD 388 Media Planning
- CAD 434 Advertising Campaigns

Four additional advertising electives (12 credits) must be selected. Electives outside the advertising major (but within the School of Communication) must be approved by an academic advisor.

THE ADVERTISING MANAGEMENT TRACK

**CORE COURSES**

- COM 101 Mass Media Communication in Society
- COM 110 Communication Theory
- CAD 114 Principles of Advertising
- CAD 233 Writing for Account Planning
- COM 250 Freedom of Expression and Communication Ethics

**OTHER REQUIRED COURSES**

- CAD 201 Advertising Strategy Development
- CAD 312 Research Methods for Advertising
- CAD 388 Media Planning
- CAD 434 Advertising Campaigns
- CAD 495 Advertising Management
**ELECTIVES** (Choose 3, with at least one course from each group)

**Group 1**
- CAD 380 Advertising Internship
- CAD 389 Media Buying and Advertising Sales
- CEM 403 Media Economics
- CAD 483 Integrated Marketing Communication

**Group 2**
- CAD 202 Introduction to Graphic Design
- CAD 231 Advertising Copywriting and Concept
- CAD 340 Interactive, Digital, and Social Media in Advertising
- CAD 350 International and Cross-cultural Advertising
- CAD 384 Advertising Creative Strategy and Execution
- CAD 390 Art Direction
- CAD 401 Advertising and Societies
- CAD 412 Public Opinion
- CAD 490 Special Topics in Advertising

Other elective courses within the School of Communication may be permissible, but only with the approval of the Advertising program director.

**THE ADVERTISING CREATIVE TRACK**

**CORE COURSES**

- COM 101 Mass Media Communication in Society
- COM 110 Communication Theory
- CAD 114 Principles of Advertising
- CAD 231 Advertising Copywriting and Concept
- COM 250 Freedom of Expression and Communication Ethics

**OTHER REQUIRED COURSES**

- CAD 201 Advertising Strategy Development
- CAD 202 Introduction to Graphic Design
- CAD 384 Advertising Creative Strategy and Execution
- CAD 434 Advertising Campaigns
- CAD 496 Portfolio Development

**ELECTIVES** (Choose 3, with at least one course from each group)

**Group 1**
- CVJ 221 Introduction to Photojournalism
- CEM 245 Introduction to Electronic Media Production
- CAD 390 Art Direction
- CVJ 341 Web Production
- CAD 490 Special Topics in Advertising: Creative
Group 2

CAD 312 Research Methods for Advertising
CAD 340 Interactive, Digital, and Social Media in Advertising
CAD 350 International and Cross-cultural Advertising
CAD 380 Advertising Internship
CAD 388 Media Planning
CAD 389 Media Buying and Advertising Sales
CAD 401 Advertising and Societies
CAD 412 Public Opinion and Mass Communication
CAD 483 Integrated Marketing Communication
CAD 490 Special Topics in Advertising

Other elective courses within the School of Communication may be permissible, but only with the approval of the Advertising program director.

ADDITIONAL REQUIREMENTS FOR THE ADVERTISING MAJOR: ALL TRACKS

Students must complete ECO 211 and POL 201. These may be used for the People and Society General Education Requirements.

Students must complete at least one course with an international or intercultural focus. Courses that meet this requirement include: CAD 350, CAD 401, MKT 360, CPR 582, COS 343, and COS 545. Other courses may be used to fulfill this requirement with the approval of an Advertising advisor.

Students must complete COS 211 and MKT 301, plus three additional credits at the 300-level or above in the School of Business Administration, chosen with the prior approval of an Advertising advisor.

MINOR

A Minor is offered in Advertising.
The minor in Advertising requires a grade of C or better in CAD 114, 201, 231, 312, 388, and 434.

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Advertising Course Listing
ELECTRONIC MEDIA, BROADCAST JOURNALISM AND MEDIA MANAGEMENT - Dept. Code: CEM
http://com.miami.edu/ElectronicMedia

INTRODUCTION

The electronic media have a profound impact on daily life and the future of local and global communities. The School of Communication Electronic Media Program is dedicated to nurturing the aspirations of men and women who seek to dedicate their professional lives to the arts, crafts and businesses of broadcasting and allied fields.

Majors study all aspects of television, radio, cable, broadband, and web operations in preparation for careers as electronic media professionals. Three majors and one minor are offered in the Electronic Media Program. The program emphasizes hands-on learning within a multicultural, international context. Students consistently win 1st place awards in regional and national competitions.

All Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel is made available to area cable subscribers, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School's facilities include state-of-the-art, all-digital television and radio studios, digital post production stations and related capabilities.

EDUCATIONAL OBJECTIVES

Learning objectives for each of the three majors in the Electronic Media program should foster critical thinking skills. Our majors develop the intellectual capacity to analyze, evaluate and adapt to an ever-changing media environment.

The educational objectives of the undergraduate Electronic Media major require that students:

- Demonstrate knowledge of the workings of the electronic mass media and be able to identify and describe the impact of historical events, economic factors, technology, audience analysis research, content choices, and regulation of the electronic media industry. This knowledge should be understood within the context of a global and culturally diverse communications environment.

- Demonstrate the ability to identify and operate traditional and computer-based audio and video equipment and accompanying software. Students concentrating in electronic media production will demonstrate the ability to produce video programs meeting entry-level professional expectations.

- Demonstrate writing ability at the level required for meeting entry-level professional expectations.

- Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility, and expectations of
the profession. In particular, students should demonstrate an understanding of the principles and laws regarding freedom of expression within a democratic society.

- Demonstrate service to the campus and larger community through participation in the creation and delivery of content for campus and community audiences.

The educational objectives of the undergraduate Broadcast Journalism major require that students:

- Demonstrate the ability to acquire information and effectively present journalistic messages in an appropriate format using basic oral, written and visual communication skills.

- Demonstrate knowledge of the workings of the electronic mass media and be able to identify and describe the impact of historical events, economic factors, technology, audience analysis research, content choices, and regulation on the electronic media industry. This knowledge should be understood within the context of a global and culturally diverse communications environment.

- Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility, and expectations of the profession. In particular, students should demonstrate an understanding of the principles and laws regarding freedom of expression within a democratic society.

- Demonstrate service to the campus and larger community through participation in the creation and delivery of content for campus and community audiences.

The educational objectives of the undergraduate Media Management major require that students:

- Demonstrate knowledge of the workings of the electronic mass media and be able to identify and describe the impact of historical events, economic factors, technology, audience analysis research, content choices, and regulation of the electronic media industry. This knowledge should be understood within the context of a global and culturally diverse communications environment.

- Demonstrate writing ability at the level required for meeting entry-level professional expectations.

- Demonstrate analytical and critical skills needed to acquire, organize and synthesize information and data in a manner consistent with professional standards; the student will demonstrate the ability to define problems, evaluate decision options and select the best course of action.

- Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility, and expectations of the profession. In particular, students should demonstrate an understanding of the principles and laws regarding freedom of expression within a democratic society.

- Demonstrate service to the campus community through collaboration with School and campus media outlets.
DEGREE PROGRAMS

The Bachelor of Science in Communication is offered in Electronic Media, Broadcast Journalism, and Media Management.

MAJOR

Majors are offered in Electronic Media, Broadcast Journalism, and Media Management.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the Required Areas of Study, the second major, and electives sufficient for a total of 66 credits in the liberal arts and sciences.

A Bachelor of Science student in Electronic Media, Broadcast Journalism, or Media Management will be permitted a maximum of 30 credits in Mass Communication courses (excluding COM 101, COM 110, and COM 250) toward the 120-credit University degree.

Admission to the Electronic Media, Broadcast Journalism and Media Management majors

Before admission as an Electronic Media (CEM), Broadcast Journalism (CBJ) or Media Management (CMM) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

Students who have obtained the written approval of the Director of the Electronic Media, Broadcast Journalism, and Media Management majors to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.
THE ELECTRONIC MEDIA MAJOR

CORE COURSES
COM 101  Mass Media Communication in Society  
CEM 102  Introduction to Electronic Media  
COM 110  Communication Theory  
CEM 201  Writing for the Electronic Media  
COM 250  Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES
Six credits at the 200-level or above.

Twelve credits at the 300-level or above.

Six credits at the 400-level or above. Only three of the six credits may be used for Internships or Projects and Directed Research.

All courses selected for the Electronic Media major must be approved by an area faculty advisor.

ADDITIONAL REQUIREMENTS FOR THE ELECTRONIC MEDIA MAJOR

Students majoring in Electronic Media must also complete COS 211 or COS 333.

Sample Track #1: 15 Credit Core plus:
CEM 245 Introduction to Electronic Media Production  
CEM 301 Measurement and Analysis of Electronic Media Audiences  
CEM 345 Intermediate Electronic Media Production  
CEM 313 Electronic Media Sales  
CEM 314 Broadcast and Cable Programming  
CEM 445 Advanced Electronic Media Production  
CEM 408 International Electronic Media Systems  
CEM 491 Internship in Broadcasting and Allied Fields

Sample Track #2: 15 Credit Core plus:
CEM 235 Radio Production and Performance  
CEM 245 Introduction to Electronic Media Production  
CEM 302 Electronic Media Law  
CEM 345 Intermediate Electronic Media Production  
CMP 357 Editing  
CEM 445 Advanced Electronic Media Production  
CEM 491 Internship in Broadcasting and Allied Fields
THE BROADCAST JOURNALISM MAJOR

CORE COURSES
COM 101 Mass Media Communication in Society
CEM 102 Introduction to Electronic Media
COM 110 Communication Theory
CNJ 111 Introduction to News Media Writing
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES
CNJ 216 News Reporting and Writing
CEM 245 Introduction to Electronic Media Production
CEM 301 Measurement and Analysis of Electronic Media Audiences
CEM 302 Electronic Media Law
CEM 317 Broadcast Journalism
CEM 417 Advanced Broadcast Journalism

Six additional credits at the 300-level or above in School of Communication courses, chosen with the prior approval of a Broadcast Journalism advisor.

ADDITIONAL REQUIREMENTS FOR THE BROADCAST JOURNALISM MAJOR

Students majoring in Broadcast Journalism are required to complete the following: COS 211 or COS 333; POL 201; and six additional credits in Political Science, History, or Economics.

THE MEDIA MANAGEMENT MAJOR

CORE COURSES
COM 101 Mass Media Communication in Society
COM 110 Communication Theory
COM 250 Freedom of Expression and Communication Ethics
CEM 102 Introduction to Electronic Media

Select one of the following courses:
ENG 230 Business Writing or
CEM 201 Writing for the Electronic Media or
CPR 232 Promotional Writing

OTHER REQUIRED COURSES
CEM 314 Broadcast and Cable Programming
CEM 435 Telecommunication Systems
CEM 403 Media Economics
CEM 402 Electronic Media Management

Select one of the following courses:
CEM 302 Electronic Media Law or
CNJ 303 Mass Media Law or
CMP 509 Legal Aspects of Motion Pictures
Nine additional credits in School of Communication courses chosen with the prior approval of an area faculty advisor. At least three of the nine credits must be at the 300-level or above.

**ADDITIONAL REQUIREMENTS FOR THE MEDIA MANAGEMENT MAJOR**

Media Management students must complete ECO 211 or ECO 212. These courses may be used for the School’s People and Society requirement.

Media Management students must complete MKT 301 plus six additional credits in the School of Business Administration chosen with the prior approval of a School of Communication advisor. Three of these six credits must be at the 300-level or above. Students majoring in Media Management must also complete COS 333 or COS 418.

Students seeking a Marketing Minor from the School of Business Administration must complete MKT 301, plus three of the following: 310, 320, 340, and 360 with a cumulative quality point average of 2.5 or higher. Consult the School of Business section of this Bulletin.

Students seeking a General Business Minor from the School of Business Administration must complete MKT 301, ACC 211, FIN 300 and MGT 304 with a cumulative quality point average of 2.0 or higher. Consult the School of Business section of this Bulletin.

**MINOR**

The minor in Electronic Media requires CEM 102, 301, 302, and six additional credits, three of which must be at the 300-level or above, chosen with the prior approval of the program director.

**DEPARTMENT HONORS**

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.
COMMUNICATION STUDIES - Dept. Code: COS  
http://com.miami.edu/CommunicationStudies

INTRODUCTION

The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete application for particular contexts. Students are prepared for a myriad of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in communication, law and other areas.

EDUCATIONAL OBJECTIVES

The educational objectives of the Communication Studies program require that:

- Students will demonstrate a comprehensive understanding of the human communication process in a diverse society and application of communication skills through examinations, written and multimedia assignments, class discussions, group problem solving, presentations, speeches, debates, and service learning activities.

- Students will demonstrate an understanding of communication contexts such as intrapersonal, interpersonal, intercultural, small group, organizational, political, and public communication.

- Students will demonstrate skill development and application of communication processes including message design, message delivery, critical thinking, creative thinking, and argumentation.

- Students will demonstrate the effects of communication and social interaction based on perceptions, construction of reality, relationship development, persuasion, and conflict resolution.

- Students will demonstrate an understanding of generating knowledge relating to the human communication process and social interaction using appropriate methods such as qualitative analysis (observations, case studies, interviews, focus groups), quantitative analysis (surveys, experimental design, content analysis) or critical approaches (rhetorical criticism, discourse analysis, textual analysis).
DEGREE PROGRAMS

The Bachelor of Science in Communication degree is offered in Communication Studies.

MAJOR

A major is offered in Communication Studies.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the Required Areas of Study, the second major, and electives sufficient for a total of 66 credits in the liberal arts and sciences.

A Bachelor of Science student in Communication Studies will be permitted a maximum of 36 credits in Communication courses (excluding COM 101, COM 110, and COM 250) toward the 120-credit University degree.

Admission to the Communication Studies major

Before admission as a Communication Studies (COS) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

Students who have obtained the written approval of the Director of Communication Studies to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE COMMUNICATION STUDIES MAJOR

CORE COURSES
COM 101 Mass Media Communication in Society
COM 110 Communication Theory
COS 112 Interpersonal Communication
COM 250 Freedom of Expression and Communication Ethics
COS 210 Writing for Communication and Social Interaction
OTHER REQUIRED COURSES
Students majoring in Communication Studies must complete the following courses (15 credits):

COS 351 Qualitative Research Methods
COS 353 Quantitative Communication Research Methods and Analyses
COS 479 Capstone for Communication Studies

Select one of the following courses:
COS 343 Introduction to Intercultural Communication or
COS 445 Intercultural Communication: International Perspectives or
COS 446 Intercultural Communication: Domestic Perspectives

Select one of the following courses:
COS 405 Practicum in Communication and Social Interaction Research or
COS 498 Communication Studies Internship

All majors are required to complete six additional elective credits in Communication Studies chosen with the prior approval of a program advisor. A minimum of 15 credits at the 300-level or above is required within the 36-credit major.

MINOR
The minor in Communication Studies for students also majoring in the School of Communication requires nine additional credits in Communication Studies beyond the School’s core (COM 101, COM 110 and COM 250), at least six of which must be at the 300-level or above. The additional credits must be chosen with the prior approval of a Communication Studies area advisor.

The minor in Communication Studies for students not majoring in the School of Communication requires COM 110, plus twelve additional credits in Communication Studies, at least six of which must be at the 300-level or above. The additional credits must be chosen with the prior approval of a Communication Studies area advisor.

DEPARTMENT HONORS
School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Communication Studies Course Listing
JOURNALISM - Dept. Code: CNJ
http://com.miami.edu/Journalism

INTRODUCTION

The program in Journalism prepares students to be writers, editors and/or designers for print media and online multimedia. The program enables students to gather information, learn how to evaluate that information and then communicate it to the interested parties.

Journalism majors learn through hands-on practice to gather information, verify facts, exercise news judgment, write against deadlines, edit, practice ethical decision-making, and adhere to press laws and regulations.

In addition to the School's core, students complete 10 journalism or related courses. The program begins with a course that surveys mass communication, including the role of print and multimedia journalism. Students mix skills and theory to explore the history of journalism, its laws and regulations.

Small laboratory classes allow students to practice writing skills in an introductory news writing course, an advanced reporting course and a senior-level course in advanced reporting. Electives include courses in newspaper, magazine and newsletter writing and graphics; still photography; newspaper or magazine editing and layout; computer-assisted reporting and the Internet; and global journalism and media. Journalism seniors participate in a news ethics and professional problems seminar to prepare them for on-the-job decision-making.

Print majors are encouraged to work for The Miami Hurricane, UM's award-winning, student-run newspaper published twice weekly in print and on the Hurricane Online site; Distraction magazine; the Ibis, UM's yearbook; and Communique, the School of Communication's newspaper.

Students choose from the plethora of newspapers, magazines, newsletters and websites published in the Greater Miami-Fort Lauderdale area for internships and part-time employment. Students have been awarded competitive internships from The Washington Post, the Los Angeles Times, Tribune Newspapers, Knight-Ridder Newspapers and the Poynter Institute, among others.

EDUCATIONAL OBJECTIVES

The educational objectives of the Journalism Program require that:

- Students can locate and gather information, using interpersonal interviewing skills, knowledge about domestic and global information sources and social and institutional information processes, sophisticated reporting techniques, computer skills, and general knowledge and common sense.

- Using knowledge from broad-based liberal arts and science courses and courses in journalism practice, history, law and ethics, students can critically analyze complex information and organize it based on sound reasoning, cultural awareness, and journalistic principles.
• Students can write, visualize and otherwise accurately communicate, with knowledge of grammar, style, and journalistic principles, complex information to diverse mass audiences.

• Students can convey information in traditional and multimedia formats in the context of a dynamic and converging news media environment.

DEGREE PROGRAMS

The Bachelor of Science in Communication degree is offered in the Journalism Program.

MAJOR

A major is offered in Journalism.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the Required Areas of Study, the second major, and electives sufficient for a total of 66 credits in the liberal arts and sciences.

A Bachelor of Science student in Journalism will be permitted a maximum of 30 credits in Mass Communication courses (excluding COM 101, COM 110, and COM 250) toward the 120-credit University degree.

Admission to the Journalism major

Before admission as a Journalism (CNJ) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

Students who have obtained the written approval of the Director of the Journalism major to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.
THE JOURNALISM MAJOR

CORE COURSES
COM 101 Mass Media Communication in Society
CNJ 111 Introduction to News Media Writing
COM 110 Communication Theory
COM 250 Freedom of Expression and Communication Ethics
CNJ 319 History of Journalism

OTHER REQUIRED COURSES
CNJ 216 News Reporting and Writing
CNJ 303 Mass Media Law
CNJ 461 Seminar in News Ethics and Problems

Students must select one of the following 15-credit tracks of specialization:

A. The NEWS Track
CVJ 221 Introduction to Photojournalism
CNJ 444 Public Affairs Reporting
CNJ 445 In-Depth Reporting in a Convergent Media Environment

Select one of the following courses:
CNJ 513 Computer-Assisted Reporting or
CNJ 515 Reporting and the Internet

Select one of the following courses:
CNJ 381 Newspaper Editing and Layout or
CNJ 442 Online Journalism

B. The MAGAZINE/FEATURES Track
CVJ 106 Multimedia Design
CVJ 221 Introduction to Photojournalism
CNJ 382 Publication Planning and Editing

Select one of the following courses:
CNJ 513 Computer-Assisted Reporting or
CNJ 515 Reporting and the Internet or
CNJ 442 Online Journalism

Select one of the following:
CNJ 544 Feature Writing or
CNJ 446 Travel Writing

C. The GLOBAL JOURNALISM Track
CNJ 510 Comparative Media Systems
CNJ 511 Global Media
CNJ 517 International Journalism

Six additional credits from the School of Communication are required at the 300-level or higher, chosen with the prior approval of a Journalism advisor. Students are encouraged to complete their second major in Latin American Studies, International Studies, or
Comparative Politics. Other disciplines that include a significant international or cross-cultural focus can be approved by a Journalism advisor.

**D. The PUBLICATION DESIGN Track**

CVJ 106 Multimedia Design  
CVJ 221 Introduction to Photojournalism  
CVJ 341 Web Design

Select one of the following courses:  
CNJ 381 Newspaper Editing and Layout or  
CNJ 382 Publication Planning and Editing

Three additional credits from the School of Communication are required at the 300-level or higher, chosen with the prior approval of a Journalism advisor.

**E. The NEWS DIGITAL Track**

CVJ 106 Multimedia Design  
CNJ 442 Online Journalism  
CNJ 515 Reporting and the Internet

Select one of the following courses:  
CEM 435 Telecommunication Systems or  
CNJ 513 Computer-Assisted Reporting

Select one of the following courses:  
CVJ 209 Audio/Visual Production or  
CVJ 221 Introduction to Photojournalism or  
CVJ 341 Web Design or  
CNJ 419 Advanced Web Production or  
CVJ 422 Programming for Interactivity

**F. The CUSTOM Track**

Fifteen additional credits from the School of Communication are required, nine of them at the 300-level or higher, chosen with the prior approval of a Journalism advisor.

**ADDITIONAL REQUIREMENTS FOR THE JOURNALISM MAJOR**

Students majoring in Journalism will be required to complete the following six credits that will be in addition to the credits required by the School in People and Society:  
Three credits in History  
Three credits in Political Science  
Journalism students must complete COS 211 as a general University elective.
MINOR

The minor in Journalism requires:
COM 101
CNJ 111
CNJ 216
CNJ 303
CNJ 381 or CNJ 382

One of the following courses is also recommended: CVJ106, CNJ 319, CNJ 442, CNJ 444, CNJ 461 or CNJ 544.

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Journalism Course Listing
MOTION PICTURES - Dept. Code: CMP
http://com.miami.edu/MotionPictures

INTRODUCTION

The Motion Pictures program offers a complete curricular experience for its majors, including writing, production, the business of film and film studies. Students graduating from the program have not only studied motion picture theory, but have also had the opportunity to learn how to script a film or television program, produce that program (lighting, sound, set design, photography and editing) and how to promote and market a film or television production. A major is offered in Motion Pictures. Minors are offered in Motion Pictures and Motion Pictures Film Studies.

Motion Pictures majors may elect to specialize in one of four areas: production, screenwriting, business, or film studies. Production and screenwriting specialties allow students to concentrate in narrative film, documentary, animation, or experimental filmmaking. Most production courses utilize a 16mm motion picture or digital format. The film studies concentration examines the history, theory and criticism of film, while the business specialization concentrates on producing, financing, distribution, and related aspects of the industry.

Special facilities in the Motion Pictures program include the Bill Cosford Cinema, a site for the exhibition of first-run and alternative films, AVID and FinalCut Pro non-linear editing suites, and digital audio post-production and mixing facilities. The Canes Film Festival showcasing UM undergraduate and graduate films is held every year on campus with a showcase screening in Los Angeles.

The School also possesses one of the nation's largest privately held collections of 35mm and 70mm films dating from the beginning of motion pictures to the present.

Special programs include the summer Film Program in Prague, Czech Republic, the summer Film Program in England and Ireland, and an annual trip to Los Angeles which offers an opportunity to interact with leading film and television professionals.

EDUCATIONAL OBJECTIVES

The educational objectives of the Motion Pictures program require that:

• Students will demonstrate an understanding of and proficiency with the basic motion picture and digital visual storytelling collaborative creative process.

• Students will demonstrate fundamental competency with 16mm and digital production. Learning also the theoretical and historical underpinnings of production, students will be encouraged to apply these skills in narrative, documentary, and animation moving image forms.

• Students will demonstrate understanding and proficiency with the basics of story and writing for the screen. Through a progression of classes, student work will evolve from exercises in story development to screenplay formatting and feature-length screenplay writing. Students will be expected to demonstrate an understanding of
dramatic structures, narrative points of view, and their application to screenplay forms.

- Students will become familiar with major individual works, genres, national cinemas and movements and their significance within the history and theory of the moving image. Students will become conversant with major film theories and concepts in terms of both social and cultural contexts. Students will be expected to demonstrate the ability to articulate their thoughts and opinions regarding motion pictures within a diverse and multicultural critical and historical context.

DEGREE PROGRAMS

The Bachelor of Science in Communication is offered in the Motion Pictures Program.

MAJOR

A major is offered in Motion Pictures.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the Required Areas of Study, the second major, and electives sufficient for a total of 66 credits in the liberal arts and sciences.

A Bachelor of Science student in Motion Pictures will be permitted a maximum of 36 credits in Mass Communication courses (excluding COM 101, COM 110, and COM 250) toward the 120-credit University degree.

Admission to the Motion Picture major

Before admission as a Motion Pictures (CMP) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

Students who have obtained the written approval of the Director of the Motion Pictures major to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but
who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE MOTION PICTURES MAJOR

CORE COURSES
COM 101 Mass Media Communication in Society
CMP 103 Survey of Motion Pictures
COM 110 Communication Theory
CMP 126 Introduction to Scriptwriting
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES
CMP 204 History of Motion Pictures (1895-1940)
CMP 205 History of Motion Pictures (1941-Present)
CMP 222 Motion Picture Techniques
CMP 306 What is Cinema?

Select one of the following courses:
CMP 403 Film Directors or
CMP 406 American Movie Genres or
CMP 407 Film, Society, and Culture or
CMP 408 Women, Media and Popular Culture or
CMP 429 Nonfiction Film

Select one of the following courses:
CMP 455 Producing the Motion Picture or
CMP 509 Legal Aspects of Motion Pictures or
CMP 552 Motion Picture Marketing and Distribution

Twelve additional credits in Motion Pictures chosen with the prior approval of a Motion Pictures advisor. A minimum of 18 credits at the 300-level or above is required within the 45-credit major.

Participation in CMP 352 requires a cumulative quality point average of 3.0 or higher in CMP 103, 126, 204 or 205, and 222.

MINOR

The minor in Motion Pictures requires CMP 103, 204 or 205, 222, 306, and one of the following: 403, 406 or 407.

The minor in Motion Pictures Film Studies requires CMP 204, 205, 306, and two of the following: 403, 406, 407 or 429.
DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Motion Pictures Course Listing
PUBLIC RELATIONS - Dept. Code: CPR
http://com.miami.edu/PublicRelations

INTRODUCTION

Students majoring in Public Relations learn how to promote a client’s business, image, or product in the international marketplace. Public relations focuses on managing a client’s (individual, product, business, governmental agency) key messages often through the free placement of messages in the media through media releases, editorial content, and promotion. Focus is on the strategic management and evaluation of key messaging systems in traditional and non-traditional media milieus. Both a major and a minor are offered in Public Relations.

Classroom requirements reflect the importance of research, computers, and the relationship of all media (electronic, print, and related technology) to public relations in both the public and private sectors.

Students create and execute PR campaigns in a senior-level campaigns class. Demand for PR interns is high, and the internship and practicum programs for up to four semesters provide students ample opportunity to work within a professional environment after being admitted to the major.

EDUCATIONAL OBJECTIVES

The educational objectives of the program in Public Relations require that:

• Students demonstrate they understand and can apply the principles and laws of freedom of speech and press, and understand how public relations research, theory, and tactics are used in organizations, roles and situations.

• Students produce effective, audience-sensitive communications in forms appropriate for intended audiences that demonstrate an understanding of the diversity of groups in a global society for public relations purposes.

• Students demonstrate an ability to think critically, creatively, and independently and express that through appropriately written and spoken communications that are grammatically and stylistically correct for the medium in which they are to be communicated.

• Students create, design, present and evaluate strategically planned campaigns that meet public relations objectives that demonstrate an understanding of the ethical principles of truth, accuracy, fairness and diversity.

• Students gain a broad understanding of public relations practices through an understanding of the history and role of professionals and institutions in shaping communications.

• Students demonstrate an ability to apply tools and technologies appropriate for the communications professions in which they work.
DEGREE PROGRAMS

The Bachelor of Science in Communication degree is offered in the Public Relations Program.

MAJOR

A major is offered in Public Relations.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the Required Areas of Study, the second major, and electives sufficient for a total of 66 credits in the liberal arts and sciences.

A Bachelor of Science student in Public Relations will be permitted a maximum of 30 credits in Mass Communication courses (excluding COM 101, COM 110 and COM 250) toward the 120-credit University degree.

Admission to the Public Relations major

Before admission as a Public Relations (CPR) a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable)

Students who have obtained the written approval of the Director of the Public Relations major to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE PUBLIC RELATIONS MAJOR

CORE COURSES
COM 101 Mass Media Communication in Society
COM 110 Communication Theory
CPR 116 Introduction to Public Relations in Society
CPR 232 Promotional Writing
COM 250 Freedom of Expression and Communication Ethics
OTHER REQUIRED COURSES
CPR 311 Research Methods for Public Relations
CPR 346 Advanced Public Relations Writing and Design
CPR 436 Public Relations Campaigns

Five additional courses (15 credits) in a concentration at the 300-level or higher (12 credits if a 200-level School of Communication graphics design course is taken as prerequisite to CPR 346) must be selected, with the prior approval of a Public Relations advisor, from School courses leading to professional orientation and practice. Examples of such concentrations might be International Public Relations, Health Public Relations, Sports Promotion, Interactive Media, Corporate Communication, Public Affairs, or Travel and Tourism.

Students may not use courses required to fulfill the requirements for the public relations major outside of the major, a second major or any minor as elective credits towards the public relations 30-credit major requirement.

ADDITIONAL REQUIREMENTS FOR THE PUBLIC RELATIONS COMMUNICATION MAJOR

For the School’s People and Society requirement, students must complete ECO 211 and POL 201.

For the School’s Arts and Humanities requirement, students must complete COS 211 and are strongly encouraged to complete ART 109 [see DOUBLE COUNTING], and six additional credits in Arts and Humanities; students wishing to participate in Study Abroad should consider a two-course basic language sequence to complete the requirement.

Students must complete MKT 301 plus three additional 300-level or above credits in the School of Business Administration chosen with the prior approval of their Public Relations advisor. Public Relations majors are strongly encouraged to complete either the Marketing (MKT 301, 310, 340 and 360) or General Business (ACC 211, FIN 300, MGT 304, MKT 301) minor with a cumulative grade point average of 2.50 or higher in Marketing and 2.0 or higher in General Business.

These courses may not count as public relations major electives if the Marketing or General Business minor is declared (MKT 301 and the three additional 300-level or above credits will not count as public relations major elective credits).

MINOR

The minor in Public Relations requires passing CPR 116, 232, 311, 346, and 436 with grades of C or higher with a cumulative grade point average of at least 2.50. Minors may participate in the program’s internship program after completing CPR 116, 232 and 311 with a cumulative grade point average of 2.75 or higher by enrolling in CPR 380 with program director approval.
DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Public Relations Course Listing
VISUAL JOURNALISM - Dept. Code: CVJ
http://com.miami.edu/VisualJournalism

INTRODUCTION

The Visual Journalism program emphasizes visual storytelling that includes meaningful content within the global community. It teaches technical literacy in traditional and cutting-edge technologies. Each course builds upon an understanding of the visual storytelling process, and each course stresses the theoretical underpinnings and ethical foundations of the journalistic tradition.

Our internationally recognized faculty is a blend of award-winning professionals and distinguished researchers and includes two Knight Chairs specializing in Visual Journalism and Cross-Cultural Journalism. Alumni of the program include award-winning journalists working with major news organizations.

EDUCATIONAL OBJECTIVES

The educational objectives of the Visual Journalism Program require that students:

• Demonstrate knowledge of the workings of the diverse global communication marketplace and be able to identify the impact of historical, technological, ethical and sociological influences in the communication evolution.

• Demonstrate the ability to gather and chronicle community-based information using research, interpersonal interviewing skills and media technology tools.

• Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility and expectations of the profession.

• Demonstrate the ability to critically analyze one’s own creative work as well as the work of fellow students and professionals in terms of content and aesthetics.

• Demonstrate service to the campus and community at large through participation in the creation and delivery of content for the campus and community audiences.

• Demonstrate technical proficiency in visual storytelling using both traditional and cutting-edge technology.

DEGREE PROGRAMS

The Bachelor of Science in Communication is offered in the Visual Journalism Program.
MAJOR

A Major is offered in Visual Journalism.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the Required Areas of Study, the second major, and electives sufficient for a total of 66 credits in the liberal arts and sciences.

A Bachelor of Science student in Visual Journalism will be permitted a maximum of 30 credits in Mass Communication courses (excluding COM 101, COM 110, and COM 250) toward the 120-credit University degree.

Visual Journalism majors who select ART as their second major may choose any ART area of specialization except Photography.

Admission to the Visual Journalism major

Before admission as a Visual Journalism (CVJ) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

Students who have obtained the written approval of the Director of the Visual Journalism major to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student's first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student's major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE VISUAL JOURNALISM MAJOR

Core Courses
COM 101  Mass Media Communication and Society
COM 110  Communication Theory
COM 250  Freedom of Expression and Communication Ethics
CVJ 106  Multimedia Design
CVJ 221  Introduction to Photojournalism
**Other Required Courses**

CVJ 209  Audio Visual Production  
CVJ 341  Web Design  

Select one of the following courses:  
CNJ 111  Introduction to News Media Writing  
CMP 126  Introduction to Scriptwriting  
CEM 201  Writing for the Electronic Media  

**Multimedia Programming Track**  
CVJ 309  Database Journalism  
CVJ 422  Programming for Interactivity  
CNJ 595  Advanced Programming  
SOC elective  

Select one of the following courses:  
CVJ 519  Interactive Storytelling  
CNJ 599  Adv. Projects (Team Multimedia Project)  

**News Design Track**  
CVJ 331  Infographics  
CNJ 595  Special Topics: 3D Infographics  
CVJ 409  Advanced Feature Design  
SOC elective  

Select one of the following courses:  
CVJ 519  Interactive Storytelling (Capstone)  
CNJ 599  Adv. Projects (Team Multimedia Project - Capstone)  

**Photojournalism Track**  
CVJ 361  Advanced Photojournalism  
CVJ 435  Video Journalism  
CNJ 595  Special Topics: Photographic Storytelling  
SOC elective  

Select one of the following courses:  
CVJ 519  Interactive Storytelling (Capstone)  
CNJ 599  Adv. Projects (Team Multimedia Project - Capstone)  

**MINOR**  

**VISUAL JOURNALISM MINOR:** CVJ 106, 209, 221, 341, and one 300-level or higher from one of the three tracks of specialization in Visual Journalism.

[Visual Journalism Course Listing]
DIVISION OF CONTINUING AND INTERNATIONAL EDUCATION (DCIE)
www.educationmiami.com

The mission of the DCIE is to provide educational programs to meet the needs of non-traditional students, including adults, pre-college students, part-time students and international students.

Our primary goal is to promote the academic excellence of the University of Miami and the expertise of the faculty through outreach programs. By developing, marketing, and administering short courses, seminars, workshops, lectures, and special events, Continuing and International Education is able to provide access to the public at large as well as to degree seeking students. In addition, Continuing and International Education coordinates weekend credit courses, administers the Summer Session and Intersession, and provides counseling and advising services for returning adult students. Continuing and International Education is an agent for University outreach in the community and serves the corporate world with professional continuing education and workforce training.

The Division has three centers: Allen Hall, on the Coral Gables Campus is the administrative headquarters for the DCIE and the location for the Intensive Language Institute, programs for adults returning to school and preparing for career advancement and youth programs. The University’s downtown center, together with the City of Miami’s 5,000-seat auditorium and exhibition hall, and the Hyatt Regency Hotel, comprise the University of Miami/James L. Knight International Center. The Koubek Center, located in Little Havana between Coral Gables and downtown Miami, has served the local community since 1960, offering courses and certificates taught in Spanish. The Division also has a site at IMG Academies in Bradenton, Florida providing educational opportunities for the Bradenton/Sarasota/Tampa area and for young athletes training at the IMG facility and their families.

BACHELOR OF GENERAL STUDIES DEGREE PROGRAM

INTRODUCTION

Under the leadership of Collegiate Studies, the DCIE offers the Bachelor of General Studies (BGS) degree program, which provides a solid and rigorous, interdisciplinary academic experience for adult, part-time students. It is designed specifically for adults who have previously attended college but have not yet completed their undergraduate degrees, as well as for those who have never had the opportunity to pursue post-secondary studies. You are eligible for admission if you graduated from high school at least four years ago, have not attended the University of Miami during the past calendar year, have a minimum of 2.2 grade-point average on previous college work, and are a U.S. citizen or permanent resident.

The BGS curriculum allows an individual the flexibility to design an area of concentration to enhance professional or personal goals. The core of the BGS is its interdisciplinary colloquia. Designed to strengthen critical thinking and writing skills of the students, each course is taught by exceptional University of Miami faculty who are committed to the adult student.

Advisors offer personalized attention in career exploration and academic advising and discuss educational alternatives with potential students. Every effort is made to ensure that
the process - from admission to registration - is efficient and convenient. Students may attend day, evening, or weekend classes to complete their educational goals.

To underscore its commitment to the adults in our community, the University offers a special tuition to students in the Bachelor of General Studies program which enables the adult, part-time student to pursue this degree at an affordable tuition rate.

The admission process takes into consideration that one’s grade-point average, while significant, is only one factor in determining an applicant’s qualification for acceptance. Therefore, an admissions interview with an advisor from the DCIE will be scheduled to supplement the information you provide on the BGS application form, which may be obtained by calling Collegiate Studies at (305) 284-2727 or at www.miami.edu/bgsdegree.

REQUIREMENTS FOR GRADUATION

I. Candidates for the Bachelor of General Studies (BGS) degree must complete the required credit hours and achieve the quality point average specified for students in the University at large as stated in the section Academic Regulations and Procedures. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:
   A. Advanced Standing and Placement (Credit Granted);
   B. Credit by Examination;
   C. Advanced Placement (by proficiency examination);

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours for that subject as a general requirement for graduation, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied towards the 120 required for graduation.

III. Credit Only
Only free electives may be taken under this option. Courses which satisfy the major, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Required Areas of Study
A. English Composition 3-6 credits
Students must take English 105 and 106 (or their equivalent) during the first year of enrollment in the School.

Foreign Languages 3-9 credits
Students must earn at least 3 credits of foreign language at the 200 course level or higher.

B. People and Society (History/Social Sciences) 15 credits
BGS degree candidates must earn 6 credits in a single two-semester History survey sequence. In addition, BGS degree candidates must earn 9 credits in courses taught by at least two of the following disciplines: African American Studies, American Studies in Social Science, Anthropology, Communication, Economics, Education and Psychological Studies, Geography, Judaic Studies, Political Science, Psychology and Sociology.
C. Arts and Humanities 21 credits
Credits must be earned in each of the following disciplines: Art History, Literature, Philosophy, and Religious Studies.

In addition, BGS degree candidates must earn 9 credits in any of the following disciplines: American Studies in Humanities, Art, Art History, Communications (Motion Pictures), Dance, Theatre Arts, Musicology, English, Italian, German, Portuguese, Spanish or French Literature, Philosophy, Religion or Women’s Studies in Humanities.

D. Mathematics/Computer Information Systems 9 credits
Math 101 or an acceptable score on the math placement test is required.
In addition, students must take either Math 103 (finite mathematics) or a math course approved by the advisor. Finally, a 3-credit course in computer information systems is also mandatory.

E. Natural World (Natural Sciences) 6 credits
BGS degree candidates may fulfill the Natural Sciences requirement by taking 6 credits in one or more of the following disciplines: Biology, Chemistry, Geological Sciences, Environmental Science, Marine Sciences, Physics and Physical Sciences.

V. Area of Concentration 30 Credits
Every candidate for a degree must select an area of concentration. The candidate designs an area of concentration that meets his/her professional and personal goals. The course of study is reviewed and approved by the Dean and/or Director of the program.

VI. COLLOQUIA 15 Credits
BGS Colloquia are seminar courses, of particular interest to adult students, especially designed to foster critical thinking and taught by faculty from all departments. Candidates for the BGS degree select 5 colloquia to meet requirements for graduation (ENG 333 IS A REQUIRED COLLOQUIUM)

VII. Electives 15 credits
Students choose elective courses in consultation with their advisor to meet the 120-credit graduation requirement.

CREDIT CERTIFICATE PROGRAMS

Not everyone needs or wants a complete degree program. Recognizing this, the DCIE - in cooperation with several other colleges and schools of the University - offers special Credit Certificate Programs.

Focusing on a single subject, these certificate programs allow students to concentrate on courses that offer the specific knowledge and skills needed for career advancement. All courses are taught by University of Miami faculty at the undergraduate level and are taken for academic credit.

Each certificate program varies in the number of required credits. While required courses are noted, students may work with an advisor in developing an individually-designed program.
Credit certificate programs are currently available in the following subject areas:

**Certificate in Accounting**
The Undergraduate Certificate in Accounting is awarded by the Division of Continuing and International Education and the Department of Accounting. It is designed for those who hold at least an undergraduate degree (preferably in business) from an accredited college or university, and whose present interest or occupation is accounting. The program requires students to take the same 24 semester hours of accounting courses required for the undergraduate major in Accounting. To sit for the Certified Public Accountant (CPA) examination in Florida, students must have completed 120 semester hours, including 24 semester hours of accounting (above the elementary level) and 24 semester hours of business courses, including a minimum of six hours of business law. There are additional educational requirements to become licensed as a Certified Public Accountant in Florida. Students may wish to consider either the Graduate Certificate in Accounting or the Graduate Certificate in Taxation (offered by the School of Business) to meet those additional education requirements.

**Certificate in Art History**
Awarded by the DCIE and the Department of Art and Art History, this certificate program is designed to offer an appreciation of the visual arts for those who may not have the time or the desire to pursue a full degree, and to provide special knowledge in the field of Art History for persons in complementary professions such as journalists, decorators, business managers, or studio art teachers who may occasionally teach humanities courses. The program also serves to enhance the cultural background of those who have already acquired a degree in another subject and to introduce Art History to those who may be considering a career in this field. A Certificate will be granted upon completion of 18 credit hours in Art History, beyond the survey level.

**Certificate in Computer Information Systems**
The Certificate in Computer Information Systems program is designed to provide a broad background in business computer information systems and to develop the technical skills one needs to stay competitive in this challenging field. The program will be of particular benefit to programmers and to management information systems analysts. The certificate is awarded by the DCIE and the Department of Computer Information Systems upon the successful completion of 18 credits.

**Certificate in General Business**
Awarded by the DCIE and the Department of Management, this certificate provides a broad understanding of the business world. A total of 21 credit hours is required to earn the certificate, including Principles of Accounting (ACC 211) and courses from at least three of the following general business areas: accounting, business management, finance, marketing, business law, economics, or management science. The admission process requires students to submit a copy of college transcript showing 60 credits completed and/or required prerequisites.

**Certificate in Human Resources**
Created for professionals currently in personnel or human resources management or those who wish to move into such positions in the future, the Certificate in Human Resources is awarded by the DCIE and the Department of Management after the successful completion of 21 academic credits. The admission process requires students to submit a copy of college transcript showing 60 credits completed and/or required prerequisites.
Certificate in International Business
The Certificate Program in International Business is designed to educate the student in the major components (law, accounting, tax, and marketing) of international business transactions. The program encompasses the legal and tax framework upon which international business is conducted, explores the uniqueness of international marketing, and investigates the international dimensions of business. The certificate program is designed for people in both small and large businesses, with interests ranging from export/import management to executive decision-making in multinational companies. This certificate requires a minimum of 18 academic credits. The admission process requires students to submit a copy of college transcript showing 60 credits completed and/or required prerequisites.

For more information, contact: Collegiate Studies, DCIE, University of Miami, P. O. Box 248005, Coral Gables, FL 33124-1610, (305) 284-2727.

OFFICE OF PROFESSIONAL ADVANCEMENT

Dedicated to providing the highest quality, competency-based, continuing professional education, the Office of Professional Advancement offers seminars, courses and certificate programs to meet the training and professional development needs of both corporations and individuals.

For more information, specific curriculum descriptions and a listing of current seminars, courses and workshops, contact the Office of Professional Advancement, DCIE, University of Miami, 111 Allen Hall, Coral Gables, Florida 33124-1610, (305) 284-5800 or email opa@miami.edu. Additional information on the web at: www.educationmiami.com/opa.

Personal Financial Planning Certificate Program

Designed for students preparing for professional examinations and professional practice in personal financial planning. Topics addressed are Investment Planning, Retirement Planning, Income and Estate Tax Planning, Insurance Planning, as well as how to develop a comprehensive financial plan. The University of Miami's comprehensive Personal Financial Planning certificate program will prepare you to pass the rigorous CFP® exam. This program is endorsed by the Certified Financial Planner Board.

Human Resources Management Certificate Program

This certificate provides the latest in proven techniques and strategies to effectively manage organizational challenges. This program covers the following topics: Legal and Regulatory Issues; Employment, Planning, and Placement; Current Trends in Employee Benefits; Developing and Administering Compensation Programs; Training and Development and Employee and Labor Relations. The HR Program is recognized by the Greater Miami Society for Human Resource Management, this program delivers a comprehensive curriculum ideally suited for all human resource professionals, especially small business owners.

Paralegal Studies Certificate program

The UM Paralegal Studies program is an intense four-month course of study which certifies the successful student as a qualified professional ready to start an exciting new career as a paralegal. Classes are taught by prominent local attorneys, Judges and Magistrates. The
Paralegal Program classes are offered on the weekends, weekdays or weekday evenings at various locations- Downtown, Broward, and Coral Gables. This program is also available online in both English and Spanish.

Coaching Certificate Training Program

This Coach Certificate Training Program is designed to support you in becoming a professional coach or in using coaching skills to enhance your leadership, management, and/or communication skills. This program has been written by master coaches and aligns with the International Coach Federation (ICF) Core Coaching Competencies. The University of Miami has designed a thorough, basic program that will allow you to make a powerful leap into using coaching skills and becoming a professional coach. This program is structured in 10 six hour modules with total classroom time of 60 hours.

Transportation Management Certificate Program

The Transportation Management Certificate Program will accelerate your career with the needed management skills in both public and private transportation and transit industries. Topics addressed are Transportation Development; Leadership Theories and Skill Enhancement; Financial, Service Quality, Maintenance and Operations Management; Risk Management, Safety and Security; Human Resource Management and Development; Managing the Policy Environment; and Marketing and Customer Service.

Computer Training Programs

Computer skills are essential to get a job or even to lead a productive life in the twenty-first century. The ability to use a computer is the new literacy. We offer a wide selection of classes that cater to different skill-levels and interests including our own UM certifications. Whether you are a beginner with no previous knowledge of computers, someone who wants to enhance their efficiency in the workplace, or an IT professional seeking a specific industry certification, we can offer the computer training that you need. Courses are offered on evenings and weekends.

Courses and Programs
For more detailed course descriptions, current schedule, and prices please visit our website at http://www.educationmiami.com/computer.

Office Productivity

Classes for Beginners
A great place to start! Our UM Computer Foundation course will help you develop a solid understanding of how computers work and teach you essential Internet skills. After you have mastered the fundamentals, you will be ready to explore Microsoft Windows and Word and develop the habits and learn the computer conventions which are used in all applications. This 6 hour course is designed for students with little or no computer experience. 6 hours

University of Miami Office Professional
The UM Office Professional is a certification course created by the University of Miami to establish a nationally recognized standard of business computer skills. The UM Office Professional is an intensive, hands-on computer training course which teaches, tests and
certifies all the core skills for Microsoft Windows, Word, Excel, Access, PowerPoint and Outlook.

This 40-hour course is designed for people who have some basic computer experience and want to become proficient in all the popular Microsoft office applications. The UM Office Professional certificate will demonstrate to potential employers that you are proficient in all the core computer skills required in the modern work-place. This is an invaluable tool for the job seeker to establish their computer credentials. It is also invaluable for the employer seeking qualified and productive staff. A more detailed description can be found at www.miami.edu/umop. 40 hours (5 weeks)

Students can choose individual 8-hour section or the complete 40 hour computer training program.

UMWM (UM Web Master):
Master the fundamental skills of planning, designing, building, launching, and maintaining a website. This course is great for small businesses interested in creating a professional website. 40 hours (5 weeks)

IT Professional Certifications

We offer training towards Microsoft certification.

CompTIA (Computer Technology Industry Association) provides testing that is vendor-neutral and sets the technology standards and guidelines for testing the competency of IT professionals.

Microsoft Certified Systems Engineer (MCSE):
An MCSE designs, installs, configures, and implements new network systems. Appropriate for aspiring Systems Engineers, Technical Support Engineers, Systems Analysts, Network Analysts, and Technical Consultants. 232 hours (7 months)

Microsoft Certified Professional Developer (MCPD) for Microsoft .NET:
This certification is aimed at professionals who design and develop business solutions with Microsoft .NET development tools, technologies, and platforms. MCPDs can develop desktop applications as well as multi-user, web-based, XML, n-tier, and transaction-based applications. 272 hours (9 months)

For more information about computer training:

ADULT STUDENT ACCESS PROGRAM (A.S.A.P.)

Students may take up to 30 credits in an undergraduate, non-degree seeking category, which may be applied to a degree program, after all application and degree-seeking requirements are met. In order to be enrolled in this category, students submit a one-page application and no other documents or transcripts; academic achievement is evaluated after 12 credits are attempted. A 2.5 G.P.A. is required to continue in the program beyond 12 attempted credits. The application for enrollment may be found on the Web at www.miami.edu/asap.

Students may take up to 6 credits, lifetime maximum, in a graduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. Not all graduate departments participate in this program. In order to enroll in this category, students submit a one-page application and no other documents or transcripts, after securing the written permission of the participating graduate department. The application for enrollment may be found on the Web at www.miami.edu/asap.

For more information, contact: The Adult Student Access Program, DCIE, University of Miami, P.O. Box 248005, Coral Gables, FL 33124-1610, (305) 284-6600.

CERTIFICATE PROGRAMS TAUGHT IN SPANISH AT THE KOUBEK CENTER

The Koubek Center offers Certificate Programs (in Spanish) in Business Management, International Commerce, Marketing, Accounting, Digital Journalism, TV Journalism, Public Speaking and Animation for Radio and TV, Journalism Online, and Clinical Hypnosis. Certificates in Business Fundamentals, International Trade and Healthcare Management are offered in English. Additional non-credit courses are offered in a variety of areas, such as Interior Decoration, Graphic Design, Event Planning and Cybernetics.

For more information, contact the Koubek Center at (305) 284-6001 or visit our web page, www.educationmiami.com/koubek.
INTRODUCTION

The School of Education offers undergraduate majors in Human and Social Development (Track I: Individual and Relational Development or Track II: Community and Program Development), Athletic Training, Exercise Physiology, Sport Administration, Elementary Education with ESOL endorsement (grades K-6), Secondary English with ESOL endorsement, and Secondary Chemistry, Biology, Mathematics and Social Science (grades 6-12).

The degrees of Master of Science in Education, Specialist in Education, and Doctor of Philosophy are available in various departments within the School. These programs are under the supervision of the Dean of the Graduate School and the School of Education Associate Dean for Graduate Studies.

VISION/MISSION

Our vision is to be a center of excellence in the study, promotion and integration of educational, psychological, and physical well-being in multicultural communities.

Our mission is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community.

ACCREDITATION

The Counseling Psychology Program offered by the Department of Educational and Psychological Studies is accredited by the American Psychological Association.

Exercise and Sport Sciences offers the Athletic Training Program that is accredited by the Commission on Accreditation of Athletic Training Education (CAATE); the Sport Administration Program is approved by the North American Society of Sport Management.

Teacher Education Programs offered by the School of Education are approved by the Florida Department of Education. In conjunction with the Phillip and Patricia Frost School of Music, the School of Education offers Teacher Education Programs in Music Education at the undergraduate and graduate levels.
DEGREE PROGRAMS - UNDERGRADUATE

DEPT. of EDUCATIONAL AND PSYCHOLOGICAL STUDIES - Dept. Code: EPS

MAJOR

The major in Human and Social Development (HSD) focuses on the promotion of healthy development and well-being. It prepares students to work with people in multiple contexts and settings:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements

By exploring the scholarly and practical interconnections among individual, interpersonal, social, and community approaches to change, students learn to identify barriers to well-being and to implement effective change-oriented strategies and policies. HSD coursework emphasizes theory, research, and skills. It culminates in a practicum in a setting related to students’ area of interest and prepares them for both graduate studies and careers.

Students choose between two areas of concentration (tracks).

Track I: Individual and Relational Development (Track Code: HSDI)

This track emphasizes individual, relational, and family well-being. Focusing on context and diversity in mental health and on strength-based, preventive, and empowering approaches, courses cover counseling theories and techniques, interviewing skills, and the basics of human service work. Students are well-prepared for graduate study in the helping professions and careers in health and human services.

Track II: Community and Program Development (Track Code: HSDC)

This track promotes healthy individual and community development by emphasizing how social, institutional, and community dynamics affect personal well-being. Stressing the role of non-government agencies in fostering well-being for people with diverse backgrounds, HSDC prepares students to diagnose institutional and community challenges and offer strategies for positive change. Courses include community-focused planning, needs assessment, and change strategies and non-profit program development, implementation, and evaluation. Students are well-prepared for graduate study in community psychology and public policy and careers in community organizations.

HSD students must declare an approved second major or a minor in the School of Education (Elementary Education, Exercise Physiology or Sport Administration) or through any other school or college.
The following Education courses are required for the Human and Social Development major:

### HSD Track I: Individual and Relational Development (HSDI)

Electives are available to bring total to 120 credits.

**MINOR IN HUMAN AND SOCIAL DEVELOPMENT – Code for Minor: HSDM**

- The requirements of the minor are 15 credits with a grade of C or better.
- Nine of these 15 credits must have been completed at UM; with prior approval, 3 of these 9 may be taken through the UM Study Abroad Program.
- EPS 201—Psychosocial Change and Well Being is required
• Two courses must be upper division courses (at or above the 300 level)
• The undergraduate coursework in Human and Social Development is open to all qualified University of Miami students.
• Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student’s degree granting college or school.

REQUIREMENTS FOR GRADUATION

BACHELOR OF SCIENCE IN EDUCATION

I. Candidates for B.S.Ed. in the School of Education must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

A. Advanced Standing and Placement (Credit Granted);
B. Credit by Examination;
C. Advanced Placement (by proficiency examination);
D. Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied toward the 120 credits required for graduation.

III. Credit Only
Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education.

V. Required Areas of Study

A. English Composition.
   Students must take English 105 and 106 (or their equivalent) during the first year of enrollment in the School. Admission to English 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take ENG 103 before taking ENG 105 and 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

B. Mathematics
   B.S.Ed. degree candidates in the Department of Educational and Psychological Studies are required to take EPS 351 – Introduction to Statistics and Research Design. This course fulfills a Math requirement for the HSD major. Prior to taking EPS
351, students must complete MTH 101 or be exempt from MTH 101 based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics.

C. Foreign Languages (not applicable)

Areas of Knowledge

D. People and Society
B.S.Ed. Degree candidates must earn 6 credits in the social sciences.

E. Arts and Humanities
B.S.Ed. degree candidates must earn 12 credits in the areas of 1) Fine Arts; 2) Literature, Philosophy, and/or Religion. A minimum of 3 credits must be earned in the Fine Arts and a minimum of 3 credits in the Humanities. COS 211: Public Speaking is recommended for HSD majors.

F. Natural World
B.S.Ed. degree candidates may fulfill the Natural Sciences requirement by taking 6 credits in the following disciplines: Biology, Chemistry, Exercise Physiology, Geological Sciences, Marine Sciences, Physics, and Physical Sciences.

Note: No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement.

VI. Writing
Every student must complete five writing-oriented (W) courses beyond ENG 105 and 106. Students must take one approved writing course section per academic year for a minimum of five writing intensive course sections, or their equivalents. A student is required to write at least 4000 words in each W course. Writing assignments will be assessed for both content and style. A W course listed in section VII (Required Areas of Study) may be used to satisfy both the writing and Required Areas of Study criteria. Foreign language courses that meet the criteria above may be used to satisfy the writing requirement. Transfer students must satisfy at least 3 courses of the writing requirement at the University of Miami.

VII. Major in Human and Social Development

- Every candidate for the B.S.Ed. degree in the Department of Educational and Psychological Studies must choose a major in Human and Social Development.
- Students choose between two areas of concentration: Track I – Individual and Relational Development (HSDI) or Track II – Community and Program Development (HSDC). To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.
- HSD majors must maintain a minimum overall grade point average of 2.0 with a grade of C or better in all courses in the major.
- HSD students must declare an approved second major or a minor in the School of Education (Elementary Education, Exercise Physiology and Sport Administration) or through any other UM school or college.
VIII Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least six credits must be at the 300 level or above.

For further information, address all inquiries to: Associate Dean; School of Education; P. O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3415.

See the Department of Educational and Psychological Studies for list of courses:

Educational and Psychological Studies Course Listing
MAJORS

Bachelor of Science in Education, Athletic Training

The Athletic Training program at the University of Miami is an undergraduate education program that has been accredited by CAATE. The program is designed to provide a structured classroom and clinical experience to prepare students to become eligible to sit for the Board of Certification exam; Didactic courses are sequenced to maximize student learning. Please see the Athletic Training website or the Athletic Training Guidelines Manual for the course sequence form and other important information regarding the requirements for completion of the Athletic Training major.

Bachelor of Science in Education, Exercise Physiology

- The Undergraduate program at the University of Miami is designed for students to acquire a sound knowledge base in the sciences followed by the application of that knowledge base to human movement, exercise and sports performance. Clinical laboratory experiences supplement applied scientific theory in a rigorous academic setting.
- Students may pursue a pre-med track concurrent with the Exercise Physiology major and should inform their advisor if selecting this track.

Writing Credit Courses – Exercise Physiology

Courses will be available for writing credit for Exercise Physiology pending individual request by students provided the following stipulations are met:

1. Permission of instructor
2. The course is under the direction of a full-time faculty member in Exercise Physiology
3. The student completes a writing credit agreement form and submits this form to the instructor within the first three weeks of a semester
4. The student completes assigned writing credit work by the end of the semester.
5. Assignments completed for writing credit are in addition to work normally required in the course
6. Students may be required to submit written work to the University of Miami Writing Center for review
University of Miami Honors Program – Exercise Physiology

The courses below will be available for honors credit for Exercise Physiology students provided the following stipulations are met:

1. The course is under the direction of a full-time faculty member in Exercise Physiology
2. The student completes an honors project permission form and submits this form to the instructor within the first three weeks of the semester.
3. The student completes assigned writing credit work by the end of the semester.
4. Assignments completed for honors credit are in addition to the University of Miami Writing Center for review.

The University of Miami currently has a 5-year program for undergraduate Exercise Physiology majors who want to obtain a Master’s Degree in Exercise Physiology. This can be done by taking one additional year of graduate courses. These students must take two graduate courses in Exercise Physiology in their senior undergraduate year in order to get an M.S.Ed. degree in Exercise Physiology in one extra year. Please check our website www.education.miami.edu for additional information on the “5-year program”. To be eligible you must apply for entrance into the 5-year program no later than the Fall of your junior year.

Bachelor of Science in Education, Sport Administration

- The Sport Administration major at the University of Miami is an undergraduate education program designed to prepare students for careers in the sport industry. The program is committed to the professional development of students so that competencies and skills relevant to the Sport Industry can be acquired over time. Specific competencies in organization, ethics, marketing, leadership and legal issues are emphasized.
- Field experience and internships are an essential component of the major. The ESS department is actively engaged in placing students in visible sports settings and appropriate sport environments so that students acquire relevant competencies and gain pragmatic hands-on experiences that are necessary for success in today’s sport industry.
- The Sport Administration major is a 39-credit major leading to a Bachelor of Science in Education.
- A Business Administration minor is suggested to complement the Sport Administration major and provide a well-rounded comprehensive background to the Sport Administration field.

Business Administration Minor (optional)

ACC211  Principles of Financial Accounting
FIN300  Finance for Non-Business Majors
MGT304  Organizational Behavior
MKT301  Marketing Foundations

MINORS

A minor in any of the five areas below consists of 15 credits:

A minor in **Exercise Physiology** consists of ESS 155, ESS 202, ESS 212, ESS 221 and ESS 365.

A minor in **Sports Medicine** consists of ESS 184, ESS 202, ESS 212, ESS 245 and ESS 321.

A minor in **Sport Administration** consists of ESS 201, plus four (4) courses taken from the following: ESS 204, ESS 206, ESS 212, ESS 302, ESS 306, ESS 308, ESS 401, ESS 403, ESS 405 or ESS 490.

A minor in **Leadership** consists of ESS 306, ESS 308, EPS 311 plus six (6) restricted credits taken from the following: MGT 304, MGT 307, MGT 360, MGT 422, PHI 330, and PSY 215.

- A grade of C- or better is required for each course applied toward the minor; the overall quality point average for the minor must be 2.0 or above.
- The undergraduate coursework in Exercise Physiology, Sports Medicine, Sport Administration, and Leadership are open to all qualified University of Miami students.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student’s degree granting college or school.
REQUIREMENTS FOR GRADUATION

BACHELOR OF SCIENCE IN EDUCATION

I. Candidates for B.S.Ed. in the School of Education must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

   A. Advanced Standing and Placement (Credit Granted);
   B. Credit by Examination;
   C. Advanced Placement (by proficiency examination);
   D. Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied toward the 120 credits required for graduation.

III. Credit Only
Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education.

V. Required Areas of Study.

A. English Composition.
Students must take English 105 and 106 (or their equivalent) during the first year of enrollment in the School. Admission to English 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

B. Mathematics
B.S.Ed. degree candidates must complete MTH 103 or higher. Students who do not place directly into MTH 103 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

C. Foreign Languages (applicable to Sport Administration majors only)
Students must earn at least 3 credits of a foreign language at the 200 course level or higher. Special 200-level courses are required of native speakers who choose to fulfill the language requirement.
Areas of Knowledge

D. People and Society
B.S.Ed. degree candidates must earn 9 credits in the History/Social Sciences. Three of these credits must be earned in ESS 212 Elements of Sport Psychology.

E. Arts and Humanities
B.S.Ed. degree candidates must earn 12 credits, which must be earned in the areas of 1) Fine Arts; 2) Humanities with a minimum of 3 credits in each area. The literature requirement may not be fulfilled by a course that has been used to fulfill the foreign language requirement. All Humanities credits must be earned in courses from among the following:
   1. Fine Arts: *Note: COS 211 Public Speaking is required of all Sport Administration majors.
   2. Literature
   3. Philosophy/Religion

F. Natural World
B.S.Ed. degree candidates may fulfill the Natural Sciences requirement by taking 6-12 credits (credits required depends on the program in which the student is enrolled) in the following disciplines: Biology, Chemistry, Geological Sciences, Marine Sciences, Physics, Physical Sciences, and designated ESS classes.

Note: No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement.

VI. Writing
Every student must complete five writing-oriented (W) courses beyond ENG 105 and 106. Students must take one approved writing course section per academic year for a minimum of five writing intensive course sections, or their equivalents. A student is required to write at least 4000 words in each W course. Writing assignments will be assessed for both content and style. A W course listed in section V (Required Areas of Study) may be used to satisfy both the writing and Required Areas of Study criteria. Foreign language courses that meet the criteria above may be used to satisfy the writing requirement. Transfer students must satisfy at least 3 courses of the writing requirement at the University of Miami.

VII. Majors
Every candidate for the B.S.Ed. degree must choose a major in Athletic Training, Sport Administration or Exercise Physiology. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative. Candidates with a major in Sport Administration have the option of selecting a second major in the School of Communications.

The choice of majors should be made no later than the beginning of the junior year and must be approved by the major department. Any student making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

VIII. Minors
B.S.Ed. candidates in Sport Administration and Exercise Physiology are required to declare a minor. Sport Administration students require department approval before declaring a minor. Exercise Physiology students may choose not to declare a minor if they’re following the pre-med track, pre-physical therapy, pre-physician’s assistant or pre-chiropractic track.

IX. Electives
Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least six credits must be at the 300 level or above.

For Graduate Coursework, Graduate Degree Programs Offered by The School of Education, see the Bulletin of the Graduate School.

For further information, address all inquiries to: Dean; School of Education; P. O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3711

Exercise and Sport Sciences Course Listing
DEPT. of TEACHING AND LEARNING - Dept. Code: TAL

The Department of Teaching and Learning offers a Bachelor of Science in Education Degree in Elementary Education (grades K-6) with ESOL (English to Speakers of Other Languages) endorsement.

In conjunction with the College of Arts and Sciences, the Department also offers majors in Secondary Education in English with ESOL endorsement, in Chemistry, in Biology, in Mathematics, and in Social Science (grades 6-12). Students in Secondary Education programs are required to fulfill the general education requirements for the College of Arts and Sciences.

The Department offers three minors: (1) a traditional 15 credit minor, (2) an 18 credit minor that fulfills the State of Florida "Professional Training Option" for teaching in secondary-school English, secondary school mathematics, secondary-school science, secondary-school social studies, or in other areas of certification, and (3) a minor in Jewish Education.

MAJORS

Elementary Education with ESOL Endorsement

The Department of Teaching and Learning offers a major in Elementary Education that leads to certification in Elementary Education (grades K-6) with ESOL endorsement. The requirements for Elementary Education are a major in Elementary Education and a second major in the School of Education (Human and Social Development, Sport Administration, Exercise Physiology) or through any other approved major in another UM school or college. The following Education courses are required for the Elementary Education major:

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
</tbody>
</table>

Please note: Students may not register for any classes above TAL 321 without admission to Candidacy.
Secondary Education

The Department of Teaching and Learning offers a major in Secondary education (grades 6-12). Certification is offered in the general areas of: English; Mathematics; Sciences (Biology, Chemistry); Social Science (Economics, Geography, History, International Studies, or Political Science). Each student should complete a major from the appropriate department in the College of Arts and Sciences and a second major in the Department of Teaching and Learning.

The requirements for a major leading to secondary certification include

(a) a major in the appropriate field of Arts and Sciences (Biology, Chemistry, Economics, English, Geography, International Studies, History, Math or Political Science only) and
(b) the following education courses:

<table>

MINORS

Traditional Education Minor

The requirements for a minor in education consists of 15 credits passed with a C or higher, with an overall GPA of 2.0 in courses selected from the list of acceptable TAL departmental courses. A minimum of six (6) credits must be numbered 300 or higher. This minor does not lead to teaching credentials.
Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. The PTO minor consists of 18 credits. Upon completion of the program courses, participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a Temporary Teaching Certificate in the State of Florida.

The required courses for the PTO minor are:

</tr>
</tbody>
</table>

Option II: UGALILEE: University of Miami Spring Semester in the Galilee

Any 6 of the 15 credits of UGALILEE course work can be used to fulfill the remaining Judaic Studies requirements of this minor. The balance of the credits for the UGALILEE Semester program can be used to fulfill other course requirements subject to approval by UM advisors in your major program of study or in lieu of Gen Ed. Requirements as approved.

PROFESSIONAL DEVELOPMENT SCHOOLS

Bel-Aire Elementary, Kensington Park Elementary, Henry S. West Laboratory Elementary, and Miami Palmetto Senior High School are operated by Miami-Dade County Public Schools. These schools provide the most up-to-date teaching environments, both in terms of design and curriculum, work in partnership with the University of Miami. Students are welcomed at these facilities for field experiences, and both students and faculty have the opportunity to
contribute to the high quality functioning of these professional development schools.

TEACHER EDUCATION PROGRAMS

Teacher Education Programs/majors that lead to a professional certification and applicable endorsements are approved by the Florida Department of Education (FLDOE). Please be advised that the State may implement new requirements for certification. These requirements will be mandatory with or without notice in this bulletin. The student is responsible for securing the application for certification and submitting the necessary documents and fees to the Florida Department of Education to obtain certification and endorsement. The DOE Certification Ombudsman in the School of Education is available to assist with certification and re-certification matters.

ACADEMIC POLICIES

ADMISSION

SELECTION FOR THE TEACHING PROFESSION

The faculty of the School of Education conceives its ultimate obligation to be to the children, adolescents, and adults who will be taught by teachers who have completed teacher preparation programs at the University. The quality of students admitted into the teacher education curriculum is as important as the skills, content, and concepts to be learned.

Most courses in the teacher education program require school site-based field experiences, culminating in a full-time 15-week internship. School districts require a criminal background check for field placement students and interns. Fingerprinting and FBI background check procedures are at the applicant's expense. Students with felony arrests may wish to consider these requirements carefully and, if necessary, seek advice from an advisor in the School of Education before applying to programs in the School of Education. Students without a valid social security number will not be eligible for placement in the school district. The Director of Clinical Supervision and Internship Placement will assist students through these requirements.

All students who wish to be considered for admission and/or retention in curricula leading to Florida Teacher Certification will be formally screened at certain points in their program of study with respect to the following criteria:

1. Admission to Teacher Candidacy (see requirements below).
2. Acceptable grade point averages (C or better for courses in the major).
3. Acceptable evaluations by University of Miami faculty.
4. Evaluations by clinical faculty at various field experience sites.
5. Satisfactory progress toward the completion of the Florida Educators Accomplished Practices requirement.

Students who receive a grade below C in their Associate Teaching semester will not be recommended for teacher certification.

Note: The Associate Dean of the School of Education must approve Appeals to the above policies.
REQUIREMENTS FOR ADMISSION TO TEACHER CANDIDACY

2. Completion of 40 semester hours. In addition, transfer students must have a minimum of 9 semester hours of acceptable credit earned at the University of Miami.

3. A 2.5 GPA in education core courses. No education classes lower than C.

4. A 2.5 GPA in the content area teaching major (for secondary education majors).

5. Completion of the Course Advisement Plan (CAP).

6. Satisfactory progress towards the completion of the Florida Educators Accomplished Practices requirement.

7. Above average ratings on field experience evaluations.

8. Further enrollment in teacher education course work offered by the School of Education is contingent upon the student meeting requirements 1-7 above.

9. All students must successfully complete M-DCPS fingerprinting process. Forms are available in the Office of Undergraduate Academic Services.

NOTE: Appeals to the policies stated 1-6 above must be directed to the Associate Dean of the School of Education.

REQUIREMENTS FOR ADMISSION TO ASSOCIATE TEACHING

Students submit a formal application to the Office of Undergraduate Academic Services for admission to Associate Teaching. Application materials are available and are to be completed by students no later than the week of September 25th for Spring Semester Associate Teaching and by the week of February 27th for Fall Semester Associate Teaching.

The following requirements must be met:
1. Admission to a Teacher Education Program (Teacher Candidacy).

2. Completion of application for admission to Associate Teaching, which includes the submission of designated folders to the Office of Undergraduate Academic Services.

3. Approval of the Associate Dean for Undergraduate Studies, the TAL Department Chair, and the Director of Teacher Education Programs.

4. Recommendations from two members of the faculty familiar with the student’s academic proficiency. One of these must be from a faculty member in the School of Education.

5. Earned a minimum of 90 credit hours.

6. All secondary majors must have completed approximately two-thirds of the courses in the teaching major and received departmental approval. Elementary majors must have completed TAL 308, 320, 321, 422, 423, 425, 426, 428, and received departmental approval.
7. Earned a minimum of 2.5 grade point average in core courses offered by the School of Education.

8. A grade of C or better is required of each course applied to the major.

9. Earned a minimum of a 2.5 grade point average overall.

10. Successfully completed pre-internship field experiences.

11. Demonstrate satisfactory progress towards the completion of the Florida Educators Accomplished Practices requirement.

12. Passed the Florida General Knowledge Test.

13. Taken the Professional Education Test and the Subject Area Exam.

NOTE: A MAXIMUM OF 12 CREDITS MAY BE TAKEN DURING THE ASSOCIATE TEACHING SEMESTER. No outside job may be held or additional classes taken during the Associate Teaching semester.

NOTE: the Associate Dean of the School of Education must approve Appeals to the above policies.

**REQUIREMENTS FOR GRADUATION**

**BACHELOR OF SCIENCE IN EDUCATION**

I. Candidates for B.S.Ed. in the School of Education must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

   A. Advanced Standing and Placement (Credit Granted);
   B. Credit by Examination;
   C. Advanced Placement (by proficiency examination);
   D. Statement of Foreign Language Requirements;

II. Students must pass the Professional Education, General Knowledge and Subject Area tests of the Florida Teacher Certification Examination (FTCE).

III. Students must complete the Florida Educator Accomplished Practices and the P-12 Student Impact requirements.

IV. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied toward the 120 credits required for graduation.
V. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

VI. Transferred credit may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education.

VII. Required Areas of Study

A. English Composition.

Students must take English 105 and 106 (or their equivalent) during the first year of enrollment in the School. Admission to English 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

B. Mathematics

B.S.Ed. degree candidates must complete MTH 103 or higher. Students who do not place directly into MTH 103 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

C. Foreign Languages (not applicable)

Areas of Knowledge

D. People and Society

B.S.Ed. Degree candidates must earn 6 credits (credits required depends on the program in which the student is enrolled) in the History/Social Sciences.

E. Arts and Humanities

B.S.Ed. degree candidates must earn 12 credits must be earned in the areas of 1) Fine Arts; 2) Literature; and 3) Philosophy/Religion. At least 3 credits must be earned in the Arts and 3 credits in the Humanities. The literature requirement may not be fulfilled by a course that has been used to fulfill the foreign language requirement. All Humanities/Literature credits must be earned in courses from among the following:

1. Fine Arts: *Note: COS 211 Public Speaking is required of all Teaching and Learning and Sport Administration majors.
2. Literature
3. Philosophy/Religion

F. Natural World

B.S.Ed. degree candidates may fulfill the Natural Sciences requirement by taking 6 credits (credits required depends on the program the student is enrolled) in the following disciplines: Biology, Chemistry, Geological Sciences, Marine Sciences, Physics, and Physical Sciences.

Note: No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement.
VIII. Writing
Every student must complete five writing-oriented (W) courses beyond ENG 105 and 106. Students must take one approved writing course section per academic year for a minimum of five writing intensive course sections, or their equivalents. A student is required to write at least 4000 words in each W course. Writing assignments will be assessed for both content and style. A W course listed in section V (Required Areas of Study) may be used to satisfy both the writing and Required Areas of Study criteria. Foreign language courses that meet the criteria above may be used to satisfy the writing requirement. Transfer students must satisfy at least 3 courses of the writing requirement at the University of Miami.

IX. Majors
Every candidate for the B.S.Ed. degree must choose a major in Elementary Education/ESOL endorsement, Secondary Education (English with ESOL endorsement, Chemistry, Biology, Mathematics, Geography, History, International Studies, Political Science or Economics) Athletic Training, Sport Administration or Exercise Physiology. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative. Candidates with a major in the Department of Teaching and Learning are required to select an approved second major in the College of Arts and Sciences.

The choice of majors should be made no later than the beginning of the junior year and must be approved by the major department. Any student making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

X. Minors
Every candidate for an 18-credit minor that fulfills the State of Florida’s Professional Training Option (PTO) must select, at the point of application to candidacy, a minor area of study: Secondary English, Secondary Mathematics, Secondary Science, or Secondary Social Studies or other areas of recognized certification.

XI. Electives
Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least six credits must be at the 300 level or above.

Note: Common prerequisites and total length for state-approved teacher education programs are subject to revision based on legislative and State of Florida Department of Education rule changes.

For Graduate Coursework and Graduate Degree Programs Offered by The School of Education, see the Bulletin of the Graduate School.

For further information, address all inquiries to: Dean; School of Education; P. O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3711

TEACHER EDUCATION PROGRAM

One of the roles of the School of Education is to serve as the professional school to conduct and coordinate programs for the preparation of teachers and other educational personnel at the University of Miami. Membership is held in the American Association of Colleges for Teacher Education, the National Association of State Directors of Teacher Education & Certification and in the Florida Association of Colleges for Teacher Educators. Teacher Education Programs (TEP) are accredited by the Florida Department of Education for the
preparation of elementary teachers, secondary teachers, music teachers and other school service personnel.

**LICENSURE/CERTIFICATION INFORMATION**

Only students who have completed all requirements for any State approved degree or certificate program will have their transcripts stamped as meeting State approved requirements for certification as well as appropriate endorsements. Students must meet requirements of the School of Education as well as the college or school issuing the second major.

Transcript stamp is contingent upon the student taking at least half of the coursework in teacher education at the University of Miami, including the Associate Teaching component. At least half of the coursework in the students teaching content area(s) must be taken at the University of Miami in the School of Education, School of Music, or other UM schools or colleges as determined by the program in which the student is enrolled.

For Graduate Degree Programs offered by the School of Education, see the Bulletin of the Graduate School.

For further information, address all inquiries to: Dean; School of Education; P.O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3711

*Teaching and Learning Course Listing*
MISSION

The College of Engineering is committed to the constant pursuit of excellence in Engineering Education, Research, and Service to meet society’s changing needs and aspirations.

The objective of the College of Engineering is to serve society by offering high quality educational programs in the professional areas that it covers, and by performing research and community service, with high professional standards. The College is dedicated to educating engineers to deal with the major issues of society over the next generation - enhancing competitiveness, advancing health care, coming into harmony with the environment, utilizing technology for humankind's benefit, and supporting a sophisticated infrastructure. The goal of the faculty is to prepare students to be employed effectively in manufacturing, consulting, construction, information technology, service industries, and those related to medical care, in roles involving planning, design and implementation at all levels of decision making. Students are broadly prepared in technical, leadership, and management skills. Student development accrues both inside and outside the classroom, with input from faculty, employers, alumni, and other students. They are made acutely aware of environmental and international perspectives. Professional competence in the traditional sense is complemented by a broad capability to function in society. The College places great emphasis on providing students with a learning experience which will enable them to develop productive careers while creating engineering solutions to problems of our society. Learning is centered around real life experiences, which involve an understanding of science, mathematics, social values, and aesthetics, to produce economical solutions to physical problems which society encounters. Protection and enhancement of the environment is stressed at all levels, and emphasis is placed on the creative application of knowledge which will improve the quality of life.

DEPARTMENT AND PROGRAMS

The College of Engineering has five departments - Biomedical Engineering, Civil, Architectural, and Environmental Engineering, Electrical and Computer Engineering, Industrial Engineering, and Mechanical and Aerospace Engineering - offering curricula leading to Bachelor of Science degrees in the following fields: Aerospace Engineering, Architectural Engineering; Biomedical Engineering; Civil Engineering; Computer Engineering; Electrical Engineering; Engineering Science; Environmental Engineering; Industrial Engineering; Information Technology and Software Engineering; and Mechanical Engineering.

Interdisciplinary areas of study, areas of specialization within departments, and study in two entirely different areas are available through options, concentrations and dual degree programs.
ACCREDITATION

The programs in Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

The College offers graduate programs leading to degrees both in the traditional and interdisciplinary areas of study. Programs leading to the M.S. degree may include specialization in the following areas of study: Architectural Engineering, Biomedical Engineering, Civil Engineering, Electrical and Computer Engineering, Engineering Management, Environmental Engineering, Industrial Engineering, Mechanical Engineering, Medical Informatics, Structural Engineering, Transportation Engineering, and Thermal and Fluid Sciences. A joint M.S.I.E./M.B.A. program and a M.S. program in Management of Technology are offered in conjunction with the School of Business Administration, a M.S. in Environmental Health and Safety in conjunction with the School of Medicine and a M.S. in Occupational Health and Safety in conjunction with the School of Medicine.

Combined BS/MS Program

The College offers a five-year Bachelor of Science and Master of Science BS/MS degree program in Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, Information Technology and Software Engineering, and Mechanical Engineering. This program is specifically designed for those students who want to pursue their graduate study as they are completing their undergraduate study. The special conditions and processes for the five-year BS/MS Program are as follows:

Requirements:

You must be an undergraduate student in the College of Engineering (CoE). You must have a cumulative GPA of at least 3.0 at the time of application. Students should discuss the program and possibility of entering with an academic advisor. Completed applications are due prior to the beginning of the final exams in your junior year.

Application Process:

Get the application form (It is different for US students and International students) from the CoE Office of Research and Graduate Studies, fill it out and then return it to the same office. The application fee is waived for currently enrolled students in the CoE.

Take the GRE Examination before the end of your senior year and attain a combined score of more than 1000 on the Verbal and Quantitative portions.

Financial Implications:

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree. For further information contact the CoE office of Research and Graduate Studies.
Once admitted into BS-MS program:

In your senior year when you have a fulltime undergraduate status, you may take a maximum of twelve (12) graduate credits (a maximum of six (6) credits per semester). In order to register for these classes, you must complete and submit the special “SENIOR GRADUATE STATUS REQUEST FORM” for students in this program.

During your last one or two semesters, when you are taking graduate course work only, register as a graduate student.

A student wishing to withdraw from the BS/MS Program without the MS degree must complete all the requirements for the BS degree.

To qualify for the MS degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA in the credits applied toward the MS degree.

The student is awarded both the BS and MS degrees at the end of the fifth year when all degree requirements are satisfied.

The Doctor of Philosophy Degree is currently offered in the area of Biomedical Engineering, Civil Engineering, Electrical and Computer Engineering, Ergonomics, Industrial Engineering, and Mechanical Engineering. The Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

The Bulletin of the Graduate School presents more detailed information on these graduate programs.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Annex is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

ENGINEERING LABORATORIES
The College of Engineering maintains a variety of well-equipped laboratories adequate for undergraduate instruction and providing for graduate and sponsored research.

COMPUTER LABORATORIES
Clarke Computational Laboratory
Computer Graphics Laboratory
Computer-Aided Design Laboratories

BIOMEDICAL ENGINEERING LABORATORIES
Biomaterials/Circulatory Assist Device Laboratory
Biomechanics Laboratory
Biomedical Instrumentation Laboratory
Dauer Hemodynamics Laboratory
Rehabilitative Engineering Laboratory
Neurosensory Laboratory
Biomedical Optics Laboratory
Tissue Biomechanics Laboratory
Tissue Engineering Laboratory

CIVIL, ARCHITECTURAL AND ENVIRONMENTAL ENGINEERING LABORATORIES
Geotechnical Engineering Laboratory
Structural Laboratories
Environmental Engineering Laboratory
Architectural Engineering Laboratory
Computer-Aided Engineering Applications Laboratory

ELECTRICAL AND COMPUTER ENGINEERING LABORATORIES
Electronics Laboratory
Wireless Communications Laboratory
Digital Signal Processing Laboratory
Electrical Machinery Laboratory
Digital Design Laboratory
Microprocessor Laboratory
Electro-Optics and Micro-Devices Laboratory
Distributed Decision Environments Laboratory
Underwater Imaging Laboratory
Networks Laboratory
Embedded Systems Laboratory
Computer Vision and Image Processing Laboratory
Information Technology Laboratory
Multimedia Laboratory
Digital Audio and Speech Processing Laboratory
Optics and Fiber Communications Laboratory
ECE Computer Laboratory

INDUSTRIAL ENGINEERING LABORATORIES
Computer Integrated Manufacturing Laboratory
Industrial Hygiene Laboratory
Biomechanics and Gait Laboratory
Human Factors and Aging Research Laboratory
Productivity Research Laboratory
Work Design Laboratory
Work Physiology Laboratory
Systems and Operations Research Laboratory
Industrial Ventilation Laboratory
Robotics Laboratory

MECHANICAL AND AEROSPACE ENGINEERING LABORATORIES
Aerospace Materials Simulation Laboratory
Controls Laboratory
Design and Manufacturing Laboratory
Fluid Mechanics Laboratory
Heat Transfer Laboratory
Integrated Nano-Bio-Systems Laboratory
Internal Combustion Laboratory
Materials Laboratory
Materials Modeling Laboratory
Measurements Laboratory
Stress Analysis Laboratory
ACADEMIC POLICIES

ADMISSION

Admission to the College of Engineering is covered under the section on Admission to the University in the General Information section of this Bulletin. Algebra, trigonometry, analytic geometry, chemistry, computer literacy, and physics are high school subjects that are appropriate for students planning on entering the College.

The academic work of each transfer student will be evaluated on an individual basis, and the student will be enrolled in the College at an appropriate level.

REQUIREMENTS FOR GRADUATION

The College believes that emphasis should be placed on the student’s ultimate level of attainment in selected subject areas. For those students whose preparation is advanced beyond that of the average secondary school graduate, the University provides proficiency examinations and schedules the students for more advanced work. Graduation for these students may be accelerated. For those students whose secondary school preparation has not provided an adequate background, the University offers preparatory courses. Graduation for these students may be delayed accordingly.

The student’s program of study is selected jointly with an advisor, with special attention to the individual students needs. Flexibility is ordinarily possible within the framework of sound education in the essential fundamentals and within the development of depth in selected fields of design and analysis. An examination of a typical curriculum given under the various department sections of this Bulletin shows that there is a strong common core of studies. Therefore, students uncertain of their ultimate field of specialization retain a high degree of mobility to enable them to transfer from one curriculum to another.

Each student must demonstrate upon admission an adequate preparation in the necessary skills of reading, writing, and mathematics. Placement test scores will indicate which, if any, supplementary courses must be taken the first semester. Although these courses are recorded for University credit, the student must take the full curriculum, as listed, in addition to these courses. Students not prepared in these areas are advised to make every effort to correct deficiencies before the first semester.

Completion of any of the prescribed curricula, except Engineering Science, with an overall grade point average of at least 2.0 (C) in all course work, to include all accepted work from other institution(s), is the basic requirement for graduation in the College. An average of C also must be attained in all work attempted at the University of Miami and the professional studies. The Engineering Science curriculum, because of its special purpose, has a higher requirement, i.e., a grade point average of 3.0 (B).

The requirements for graduation as specified by each Department and Program reflect the general education requirements of the University of Miami and the requirements of the appropriate accrediting agencies. The curricula contain required courses and elective courses. No course required for graduation may be taken under the credit-no credit (Credit-Only) option.

Students are expected to make satisfactory progress toward graduation by meeting the
criteria established above. Whenever a student fails to demonstrate positive academic progress, he/she may be placed on academic probation or dismissed by the College of Engineering Scholastic Standards and Advising (SSA) Committee.

General Educational Requirements

People and Society and Humanities and Arts electives may be taken from a wide variety of courses. A minimum of 18 credits of people and society/humanities and arts electives is required for graduation, with a distribution of a minimum of 6 credits each in the areas of Humanities and Arts and People and Society; the other 6 credits may be taken in either Humanities and Arts or People and Society.

The College of Engineering faculty requires that the courses selected must provide both breadth and depth and not be limited to a selection of unrelated introductory courses. Courses that instill cultural values are acceptable, while written exercises and personal craft are not. Foreign language courses in a student’s native language(s) or that spoken at home are not acceptable. To provide depth, the College of Engineering Faculty requires at least two courses be at the advanced level. An advanced level course is defined as a course with at least one prerequisite or a course at the 300 or 400 levels.

To satisfy the University of Miami general education requirements on writing intensive courses, at least six credits of the People and Society/Humanities and Arts electives must be in writing sections (W) (note: all English and literature courses are considered writing courses). The remainder of the required writing is satisfied by writing within the engineering design and laboratory courses.

COLLEGE OF ENGINEERING – HUMANITIES AND ARTS - PEOPLE AND SOCIETY ELECTIVES

Select six courses with at least two courses in HUMANITIES AND ARTS and two in PEOPLE AND SOCIETY.

Two of these six courses must be taken in sections designated as Writing sections (W).

Also at least two of these six courses must be at the advanced level. An advanced level course is defined as a course with at least one prerequisite or a course at the 300 or 400 levels.

People and Society

Courses in the following areas may be used to fulfill this requirement: Africana Studies; American Studies (AMS); Anthropology (except APY 203); Economics; Educational Psychology; Geography and Regional Studies (except GEG 120); International Studies; Judaic Studies; History; Political Sciences; Psychology (except PSY 204); Sociology; Teaching and Learning; Women’s and Gender Studies (WGS), and the following courses: BME 320; CBR 102; COM 101; COM 110; COS 112; COS 118; COS 336; COS 472; FSS 190-199.

Humanities and Arts excluding Talent and Performance Courses

Courses in the following areas may be used to fulfill this requirement: Architecture (Note: A special form must be completed prior to registration in the course ARC 323); Musicology; Art History; English (200-level or above): Modern Languages and Literature (300-level or
above): Philosophy (except PHI 210 and PHI 510); Religious Studies; and the following courses: CMP 103, CMP 204, CMP 205, COS 211; DAN 250; FFA, FLT, FPR 190-199.

The following are examples of excluded Talent and Performance Courses:
1. All studio courses: ARTXXX
2. All theater courses: THAXXX
3. All Dance courses other than DAN250: DANXXX
4. All Performance courses: MIPXXX
5. All Keyboard and Vocal courses: MKPXXX and MVPXXX
6. All Music Education courses: MEDXXX
7. All Music Business and Entertainment courses: MMIXXX
8. All Music Theory & Composition courses: MTCXXX
9. All Music and Jazz Instrumental courses: MSJXXX

The student’s official records are maintained by the Office of Enrollment Services. It is the student’s obligation to take the initiative to assure that all requirements are being met in conformity with his/her own graduation plans.

DEGREE PROGRAMS

DUAL MAJORS
Dual majors are offered for engineering students with strong interest in related fields of study such as Physics or Mathematics. In order to obtain a dual major in one of these areas, the student will have to obtain, in parallel, a degree in one of the engineering programs, plus additional course work approved by the dual majors department. Further information on this dual major program may be obtained from the Deans Office of the College.

MINORS

Minors are offered by the College of Engineering. The departments of Civil, Architectural, and Environmental Engineering, Electrical and Computer Engineering, Industrial Engineering, and Mechanical Engineering offer minors with various areas of specialization. Details of each area of concentration and its requirements may be found under each departmental listing.

Engineering students can earn a minor offered by any other College/School within the University of Miami, including the College of Engineering. In cases where the major degree requirements satisfy some of the requirements for the minor, at least six credits beyond the major degree requirements must be taken in the minor subject area to earn a minor. Minors in Engineering require a minimum GPA of 2.0 in the courses required for the minor.

HONORS

Students who show both promise and superior performance may receive academic advantages, certain privileges, and recognition through admission to the Honors Program of the University. Please refer to the HONORS PROGRAMS section, which appears elsewhere in this Bulletin, for information on these programs.
FOOTE FELLOWS IN CoE
The Foote Fellows Program was established in honor of former President Edward T. Foote, II. The Foote Fellows Program is intended for students who enter the University with advanced knowledge in several disciplines, who demonstrate intellectual rigor and who are highly motivated thinkers and researchers. In the College of Engineering this program offers such students the opportunity to explore their academic interests without the strictures of the People and Society and Humanities and Arts distribution requirements unless it is part of their engineering program as well as a broader choice of technical electives in their engineering program.

DEPARTMENTAL HONORS PROGRAM
A student in the College of Engineering may graduate with Departmental Honors noted upon his/her diploma and transcript upon fulfillment of the following requirements:

A. Completion of at least 18 credits of course work in honors courses and/or in courses at the 500 level, including 6 credits in independent study, senior thesis, or designated advanced or special honors courses specified by the department, with grades of at least B in these 6 credits.

B. Attainment of at least a 3.4 overall grade point average. Transfer students must also attain at least a 3.4 grade point average in all work taken at the University of Miami.

C. Attainment of at least a 3.5 average in the departmental major courses.

D. A written request from the student to the departmental faculty during his/her semester of expected graduation stating the desire to graduate with Departmental Honors, and specifying those courses taken in compliance with section (A) above.

CERTIFICATE PROGRAMS IN ENGINEERING
In cooperation with the University’s School of Continuing Studies, the College of Engineering offers practicing engineers advanced or specialized training without having to meet the stringent entrance requirements of the Graduate School. Persons holding Bachelors degrees, registered as Professional Engineers, or possessing equivalent qualifications can be granted Certificates of Proficiency by the University after completing fifteen semester-hours of course work in a specified field of engineering. Study programs are arranged on an individual basis by each student and his/her advisor. Detailed information on Certificate Programs can be requested from the Office of the Dean of Engineering.

THE INTERNSHIP COOPERATIVE PROGRAM
The Cooperative Program takes its name from the close cooperation that exists between the College and participating employers. This arrangement attempts to insure that each student’s academic and work experience will integrate and contribute significantly to his/her overall growth and professional development. Interviews and screening by both the employer and Cooperative Program personnel attempt to match the needs of the employer carefully with the interests and capability of the student.

ADVANTAGES TO THE STUDENT:
1. Offers on-the-job experience to supplement the academic degree program.

2. Offers potential long term career employment with the Cooperative Program employer.

3. The experience obtained makes the student, upon graduation, potentially much more valuable to any future employer. Upon completion of an appropriate amount and level of
experience, graduation in the Cooperative Program may be recognized by a special seal on the student’s diploma.

4. Helps the student to verify whether or not his/her career or specialty choice is correct.

5. Tends to increase motivation and to make academic studies more meaningful.

6. Earnings from Cooperative Program employment can cover a significant portion of the student’s college expenses.

7. Certain work experience may shorten the experience requirements, after graduation, for eligibility for professional registration.

8. Helps to develop the students understanding of human relations and the lifelong need of learning to balance appropriately the demands on ones time of multiple duties such as studying, employment, daily necessities, family obligations, etc.

ADVANTAGES TO THE EMPLOYER:
1. Offers an opportunity to recruit and screen potential employees in the fields of engineering.

2. The Cooperative Program maintains an up-to-date roster of available undergraduate and graduate students, many with previous experience. This roster offers employers means of obtaining employees to meet fluctuating work loads, on relatively short notice.

3. Students in the Cooperative Program can provide good company public relations with their classmates.

4. Participation in a Cooperative Program serves the profession by providing opportunities for many capable and well deserving young persons to attend a University, who otherwise might lack the financial ability or motivation to attend.

TYPES OF COOPERATIVE PROGRAM ARRANGEMENTS

CONTINUOUS WORK-STUDY
An arrangement involving a combination of part-time employment (15 or more hours per week) and a credit hour academic load which is appropriately reduced from the normal full-time load to balance the employment duties. Full-time employment may be undertaken during the summer period. Two students may be used during the year to share the hours of a full-time position (20 hours each student). In some instances, an individual student will hold a full-time position and carry a light academic load in evening and/or early morning classes.

ALTERNATING WORK-STUDY
An arrangement involving two students alternating full-time employment and full-time study. Students alternate positions of work and study at the end of each semester (including the summer), and thereby provide the equivalent employee time of a full-time position year-round.

STUDENT ELIGIBILITY FOR THE PROGRAM
University of Miami students enrolled in the College of Engineering are eligible to enter the Cooperative Program. Initial entry into the Program is limited to superior students. Normally, work assignments are not given until the equivalent of one or two semesters of
full-time academic work is completed. Currently, most students in the Program are under continuous work-study arrangements.

**STUDY ABROAD PROGRAMS**
The College of Engineering encourages its students to take advantage of one of the University of Miami’s numerous study abroad options in Latin America, Europe, Asia, Australia and the Middle East. Of particular interest to Engineering students are the following: internships (unpaid and paid) in Spain, England, France, Argentina, Colombia, Chile, and Australia in which professional work experience is carried out abroad; course work at Engineering schools abroad for a semester or an academic year; summer programs in intensive Language instruction, Humanities and Social Sciences abroad. The cost of attending these programs is equivalent to University of Miami tuition and fees. Almost all University of Miami financial aid is granted. With prior approval and detailed curriculum advice, courses taken abroad will apply towards graduation.

**THE MANAGEMENT OF TECHNOLOGY SUPPLEMENTAL PROGRAM**
The objective of this program is to educate engineers in how to exploit their technological knowledge. This is a vital, but often neglected, link in achieving competitiveness in the global marketplace. The basic premise motivating this approach is the recognition that in today’s world, technology is the backbone of the business enterprise system and that wealth can only be created through production of goods and services. This program will educate engineers in a multitude of subjects bridging the gap between product technology, production technology and the marketplace, which is the ultimate customer of engineering contributions.

The program consists of four courses:
1. Quality in Design of Products and Production Systems
2. Entrepreneurship for Engineers
3. Production Systems Design

A project is required at the end of the program, but is threaded throughout the program starting with the first course. Upon completion of the program, the student will receive a special certificate of completion. This program is available to all qualified students in all departments of the College of Engineering.

**Admission to the Program**
Admission to this supplemental program will be by application submitted by the candidate or by nomination by an advisor or department chair. All applications will be reviewed by a standing committee. Students must meet the prerequisite of each course before enrolling in it.

**Requirements for the Certificate**
The program is an add-on to existing curriculum. Students must complete all courses designated in order to qualify for the certificate. A notation will be made on the student’s transcript recognizing their completion of the special program. No designation will be made on the diploma.

**Course Sequence**
Courses are recommended to be taken in the sequence indicated above.
Team Work
Students will be encouraged to work on projects in teams. Multidisciplinary teams will also be encouraged.
BIOMEDICAL ENGINEERING - Dept. Code: BME
http://www.miami.edu/bme

INTRODUCTION

Biomedical engineering is a field where engineering principles and techniques are applied to the life sciences and medicine. It covers a wide spectrum of activities from the development of artificial organs and limbs, tissue engineering, implantable medical devices, biomedical instrumentation, computing in medical research and diagnosis, signal and image processing, clinical engineering, rehabilitation engineering, to cardiovascular, neurological, respiratory and flow studies. The diagnostic and therapeutic tools available to the physician entering the twenty-first century represent complex and intricate applications of engineering.

Although Biomedical Engineering has been a graduate program at the University of Miami for more than thirty years, the Bachelor of Science in Biomedical Engineering has been awarded since 1993. This program was designed to offer the interested student an opportunity to integrate knowledge in engineering and in the life sciences over a four year period while also developing a set of practical skills.

Opportunities for quality education extend beyond the classroom. The small-class environment and the open-door policy of the faculty foster information exchange. The Biomedical Engineering Society sponsors speakers presenting aspects of the biomedical industry and entrepreneurship-an excellent opportunity to learn about employment.

Graduates of the biomedical engineering undergraduate program may seek employment in industry or continue their studies either in graduate school or in a professional school in medicine and other health-related disciplines (such as dentistry, optometry), law or business. The biomedical engineering undergraduate program is accredited by the Accreditation Board of Engineering and Technology.

The Department of Biomedical Engineering also offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees.

Qualified students may apply for the combined BS/MS program. Details are provided following the curricula for the BS degrees.

The College offers a dual major in Biomedical Engineering. In order to obtain the dual major in Biomedical Engineering, the student will have to obtain, in parallel, a major in one of the fundamental engineering programs, plus 24 credit-hours of course work, including 18 credits of required course work and 6 credits of elective course work from the lists given below. Of this total of 24 credits, at least 12 have to be at the level of 400 and above.

The Biomedical Engineering courses are open to students with background in mathematics, physics and chemistry upon approval of their respective department.
The required courses for the dual major are:

- BME 335. Biomaterials I   3 credits
- BME 375. Biomechanics I   3 credits
- BME 440. Biomedical Measurements 4 credits
- BME 480. Biomedical Instrumentation 3 credits
- BME 501. Unified Medical Sciences 3 credits
- BME 502. Unified Medical Sciences II 3 credits

The electives are to be chosen from the BME course list.

**Mission Statement**

The mission of the biomedical engineering program is to prepare students to become knowledgeable and skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.

**Program Description**

The Biomedical Engineering program at the University of Miami has three major goals achieved via the implementation of three parallel concentrations. Each one provides a broad foundation in the basic sciences and in engineering while offering special courses to allow the students to focus on specific career related subjects. The three concentrations are Electrical (E), Mechanical (M), and Preclinical (P). The goals are: 1. Prepare the students in all three concentrations for graduate or professional studies in relation to engineering. 2. Enable the students in the Preclinical concentration to satisfy the requirements for medical schools while thoroughly exposing them to the major areas in BME. 3. Prepare the students for immediate employment as engineers in the biomedical devices and diagnostics industry as contributors to the economy. In striving to achieve these goals, the objective of the faculty is to provide all graduates with the mathematical, investigational, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to research, development and economic problems. Superior students are prepared for graduate studies or medical school. The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of biomechanics, tissue mechanics, instrumentation, biomedical optics and other areas. The curriculum includes required courses in mathematics and in the physical and life sciences that ensure a firm scientific background, while advanced departmental courses provide for specialization. Required courses in the humanities and social sciences give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to complete the upper level course requirements successfully.

The engineering design experience is interwoven in the curriculum throughout the students four years of study. In their junior and senior years, the students enroll in 26 mandatory BME credits (Biomaterials, Biomechanics, Biomedical Measurements, Mathematical Analysis in BME, Foundations of Medical Imaging, Biomedical Transport Phenomena, Biomedical Signal Processing and Biomedical Instrumentation). During the senior year each student is involved in a major design experience through a year-long Senior Design Project. It is a capstone project where the students pool all their knowledge and previous design experience into one major project integrating the various components of the curriculum.
Students prepare written and oral presentations. They also select two or three technical electives to pursue their individual professional interests.

Technical Entrepreneurship is an alternative to the Senior Design Project. In this two-semester sequence the students form entrepreneurial teams of 4 to 6 members to design and develop new products. They also work on the business aspects of the project. This program was established with a grant from the National Collegiate Innovators and Inventors Alliance (NCIIA) in 1999 and it is currently supported by additional grants from NCIIA. Voluntary participation in ongoing research and development projects within the department's laboratories, or on technical problems within the medical research laboratories, or at industrial firms are strongly encouraged. Communication is emphasized through requirements for oral presentation and written technical reports in many of the BME courses, in the Senior Design Project, in the Technical Entrepreneurship sequence and in the special laboratory experience. These activities provide the graduates with valuable practical experience and communications skills while studying Biomedical Engineering at the University of Miami.

DEPARTMENTAL HONORS

Upon request departmental honor is noted in a student’s diploma and transcript upon fulfillment of the requirements specified in the College Bulletin.

EDUCATIONAL OBJECTIVES

The educational objectives of the biomedical engineering program at the University of Miami are to graduate engineers who:

1. have a sound background in the fundamentals of engineering, physical and life sciences, and are prepared to practice biomedical engineering in the areas of bioelectrical and biomechanical engineering.
2. have mastered the skills and knowledge expected by the biomedical industry.
3. are prepared to enter graduate and professional degree programs, as well as other careers.

DEGREE PROGRAMS

The department offers one degree program with three concentrations: the Premed graduates are prepared for studies in medicine or related fields. The Electrical and Mechanical Concentrations graduates must be prepared to carry out engineering tasks in industry or in graduate work in their specific area of concentration.

A tabular listing of the course requirements for the degree Bachelor of Science in Biomedical Engineering is shown below for each of three concentrations:
## BACHELOR OF SCIENCE IN BIOMEDICAL ENGINEERING
### Electrical Concentration (135 credits)

BACHELOR OF SCIENCE IN BIOMEDICAL ENGINEERING (Any of the three Concentrations) AND MASTER OF SCIENCE IN BIOMEDICAL ENGINEERING

- Juniors from any of the three BME Concentrations who have maintained at least a 3.0 CGPA are invited to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program, must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credits to meet the requirements of the Graduate School.
- The participants are excused from BME 401/402 Senior Design I and II, but are required to complete BME 605/606 Master Design Project I and II.
- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.
- The curriculum is altered only for the fourth year by the elimination of 1 credit for BME 401 during the first semester and 2 credits for BME 402 during the second semester.
- A 3 credit Technical Elective is added for the second semester.
- The 6 credits of Technical electives earned during the second term of the fourth year are counted toward the required 30 credits for the MS degree.
- The curriculum for the fifth year is shown below.

Biomedical Engineering Course Listing
CIVIL, ARCHITECTURAL, AND ENVIRONMENTAL ENGINEERING
Dept. Code: CAE
Civil, Architectural and Environmental Engineering

MISSION STATEMENT

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise

The department offers three undergraduate degrees: Bachelor of Science in Civil Engineering, Bachelor of Science in Architectural Engineering and Bachelor of Science in Environmental Engineering.

CIVIL ENGINEERING
Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

ARCHITECTURAL ENGINEERING
Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, architectural firms, government agencies, and universities.

ENVIRONMENTAL ENGINEERING
Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature’s beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.

EDUCATIONAL OBJECTIVES

The objectives of the Civil Engineering Program are to have graduates who within the first several years following graduation are either
1. Working as a professional in an area closely related to civil engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Architectural Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to architectural engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Environmental Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to the water environment or
2. Pursuing a graduate or professional degree.

**DEGREE PROGRAMS**

**Civil Engineering Curriculum**

The Civil Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and civil engineering design. The first two years of the Civil Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. During the next two years of the four-year program, the Civil Engineering curriculum integrates engineering sciences with design applications in the areas of structural, environmental, geotechnical, and water resources engineering. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of civil engineering.

Graduate study is offered leading to the degrees Master of Science and Doctor of Philosophy in Civil Engineering. For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Civil Engineering is shown below:

### Architectural Engineering Curriculum

The Architectural Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and architectural engineering design. The Architectural Engineering program integrates design applications across the curriculum, beginning with building construction and architectural design in the sophomore year, and continuing with structural, building mechanical and electrical systems design, and construction management in the junior and senior years. The curriculum culminates with a major comprehensive design experience that includes applications from the major specialty areas of architectural engineering.

Graduate study is offered leading to the degree of Master of Science in Architectural Engineering. For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Architectural Engineering is shown below:
### FRESHMAN YEAR

**Fall Semester**
- CAE 111 Introduction to Engineering I: 3 credits
- PHY 205 University Physics I: 3 credits
- MTH 110 Analytic Geometry and Calculus I: 5 credits
- ENG 105 English Composition I: 3 credits

**Spring Semester**
- CAE 112 Introduction to Engineering II: 2 credits
- PHY 206 University Physics II: 3 credits
- MTH 112 Calculus II: 4 credits
- ENG 107 Writing about Science: 3 credits

### SOPHOMORE YEAR

**Fall Semester**
- CAE 201 Computer-Aided Drafting and Design: 2 credits
- CAE 210 Mechanics of Solids I: 3 credits
- ARC 261 Building Construction: 3 credits
- ARC 294 Introd. to the Devl. of Architecture: 3 credits
- PHY 207 University Physics III: 3 credits
- PHY 209 University Physics III Lab: 1 credit
- MTH 211 Calculus III: 3 credits

**Spring Semester**
- CAE 211 Mechanics of Solids II: 3 credits
- EEN 205 Principles of Electrical Engineering I: 3 credits
- ARC 292 Introduction to Architecture Design I: 3 credits
- CHM 151 Chemistry for Engineers I: 3 credits
- CHM 153 Chemistry Laboratory for Engineers: 1 credit
- People and Society Elective*: 3 credits

### JUNIOR YEAR

**Fall Semester**
- CAE 310 Structural Analysis: 3 credits
- CAE 330 Fluid Mechanics: 3 credits
- MAE 303 Thermodynamics I: 3 credits
- IEN 311 Applied Probability and Statistics: 3 credits
- ARC 293 Introduction to Architecture Design II: 3 credits
- Tech. Elective*: 3 credits

**Spring Semester**
- CAE 321 Design of Steel Structures: 3 credits
- CAE 370 Geotechnical Engineering I: 3 credits
- CAE 371 Geotechnical Laboratory: 1 credit
- CAE 481 Mech. Systems for Buildings: 3 credits
- MTH 311 Ordinary Differential Equations: 3 credits

### SENIOR YEAR

**Fall Semester**
- CAE 320 Design of Concrete Structures: 3 credits
- CAE 403 Senior Design Project: 3 credits
- CAE 480 Building Environmental Systems: 3 credits
- ARC 476 19th and 20th Century Architecture: 3 credits
- CAE 470 Foundation Eng. and Earth Retaining Sys.: 3 credits

**Spring Semester**
- CAE 402 Professional Engineering Practice: 3 credits
- CAE 460 Construction Management: 3 credits
- Arch. Eng. Technical Elective*: 3 credits
- Arch. Eng. Design Elective*: 3 credits
- Advanced PS/HA Elective*: 3 credits

* To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA), Technical and Design electives.

### Environmental Engineering Curriculum

The Environmental Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and environmental engineering design. The first two years of the Environmental Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. The next two years of the four-year program, integrate engineering sciences with design applications in the areas of Air pollution control engineering, Water and wastewater engineering and Solid and hazardous wastes engineering.

Design courses emphasize an integrated approach that considers all environmental media in the prevention and control of environmental problems. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of environmental engineering.

A tabular listing of the course requirements for the degree of Bachelor of Science in Environmental Engineering is shown below:

### DUAL-DEGREE PROGRAMS

Dual degree programs leading Bachelor of Science degrees in both Civil Engineering and Architectural Engineering, and both Civil Engineering and Environmental Engineering are offered by the department. These dual-degree programs are very popular, highly recommended and, if planned in advance, take only one more semester than degree programs in Civil Engineering, Architectural Engineering, or Environmental Engineering alone. Curricula for the dual degree programs are available in the Department office.

A dual degree program is also available leading to a degree in Bachelor of Science in Environmental Engineering and a Bachelor of Science from the College of Arts and Sciences with a major in Ecosystem Science and Policy (ECS). The ECS major is offered through the Center for Ecosystem Science and Policy (CESP). The goal of the ECS program is to educate the next generation of environmental scientists, policy makers, managers, and planners with grounding in the fundamentals of the natural sciences, social science, and public policy. This preparation will give students both the theoretical background and technical skills to
pursue an environmental career, including teaching and research as well as for careers in government and private industries concerned with the environment. The course requirements for the dual degree program are as follows:

**Bachelor of Science in Environmental Engineering/**
**Bachelor of Science with a major in Ecosystem Science and Policy**

| Foreign Language elective (200 level) | 3          | Literature elective | 3          |

* Classes with satisfactory AP scores may be used to satisfy these requirements
** To be selected from the list of approved Environmental Engineering courses.

Total 159 credits

A six year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is also available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an
engineer and an architect. The course requirements for the BSAE/MArch program are as follows:

The department also offers 5 year programs leading to the B.S. and the M.S. degrees. These programs are open to exceptional students who are admitted to the graduate program at the end of their junior year. Students applying for this program must have a minimum grade point average of 3.0, and score more than 1000 on the Graduate Record Examination. The course requirements for the five-year BS/MS programs are as follows:
# Bachelor of Science in Civil Engineering and Master of Science in Civil Engineering

MINOR IN CIVIL, ARCHITECTURAL OR ENVIRONMENTAL ENGINEERING
(for students in the College of Arts and Sciences and the School of Architecture)

A Minor in Civil, Architectural, or Environmental Engineering requires 15 credits passed with a grade of C or higher. Students are required to satisfy the prerequisites for all courses, and are required to complete the core course, CAE 210, plus an additional 12 or 13 credits within an area of specialization. The additional credits required for minors in civil, architectural, and environmental engineering are as follows:

**Minor in Civil Engineering**

*GEOTECHNICAL TRACK*
CAE 211 (CAE 212 optional), CAE 330, CAE 370/371, CAE 470.

*STRUCTURAL TRACK*
CAE 211 (CAE 212 optional), CAE 310, and any two of: CAE 320, CAE 321, and CAE 421

**Minor in Architectural Engineering**

*STRUCTURAL TRACK*
CAE 211 (CAE 212 optional), CAE 310, CAE 320, and CAE 321

*MECHANICAL/ELECTRICAL Systems TRACK*
CAE 330, CAE 380, CAE 480, and CAE 481

**Minor in Environmental Engineering**

CAE 330, CAE 340, CAE 430, and CAE 440

[Civil, Architectural & Environmental Engineering Course Listing](#)
MISSION STATEMENT

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

INTRODUCTION

Electrical and Computer Engineering are complementary disciplines that are at the forefront of the continuing development and evolution of our modern technological society. Electrical and computer engineers have initiated and contributed to the development of such important and diverse areas as integrated electronics and photonics, telecommunication systems and computer networks, computer hardware and software, image processing and computer vision, automation and robotics, electrical power generating and transmission systems, as well as participated in the development of significant applications to biotechnology. These technologies have significantly transformed how our evolving society will live, learn, work, communicate and do business in the 21st century and are critical to the development of a sustainable world economy. It is an exciting and challenging discipline offering a variety of rewarding career paths. The Department of Electrical and Computer Engineering offers a number of innovative academic and research programs to help prepare students to achieve a variety of career goals.

The Department offers three undergraduate degree programs:

1. Bachelor of Science in Electrical Engineering degree program (B.S.E.E.)
2. Bachelor of Science in Computer Engineering degree program (B.S.Cp.E.)
3. Bachelor of Science in Information Technology and Software Engineering degree program (B.S.I.S.E.)

The Electrical Engineering and the Computer Engineering degree programs are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

In addition, the Department offers graduate courses leading to the Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.), and the Doctor of Philosophy degree (Ph.D.). For further information see the Bulletin of the Graduate School.
BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.)

The Electrical Engineering degree program has three options:

1- Electrical Engineering Option;
2- Audio Engineering Option;
3- Wireless Communication Option.

All of these three options require specialized courses as well as the 49 Engineering Credit Hours required in the accredited Electrical Engineering degree program.

**Electrical Engineering** is concerned with the design, analysis and implementation of a variety of systems, components and devices, primarily of an electrical or electronic nature, which form the cornerstone of our complex and technologically oriented society. This ranges from small-scale integrated electronics and photonics systems and devices, the technological drivers of the information technology revolution, to large-scale electrical power systems and power generators, which supply the nation’s energy needs and form the basis for sustained economic growth. Electrical engineering is a rapidly changing discipline. To adequately train students to meet the challenges of the future and to assume leadership roles in the practice of electrical engineering, the department has in place a modern curriculum that reflects best practices in the industries we serve and is constantly updated to incorporate new technological, scientific and economic developments. The curriculum in the first two years provides a thorough background and in-depth preparation in the physical and mathematical sciences as well as fundamental knowledge and exposure to basic engineering principles and computer programming techniques. Students then concentrate on electrical engineering courses in their junior and senior years. Because of the overwhelming computer-oriented nature of modern electrical and electronic systems, students in electrical engineering are also expected to take courses in computer hardware and software and to incorporate this knowledge into a variety of design experiences offered.

**Audio Engineering** was developed with support from the School of Music in response to the need for industry professionals with the theoretical knowledge and the analytical, technical and design skills, which can only be acquired in a formal engineering degree. The Audio Engineering option combines traditional electrical engineering studies with audio studies in areas such as acoustics, digital audio, transducers, signal processing, post production, and recording. Our Audio Engineering graduates are highly sought by industry and have been pursuing successful careers in music/entertainment and the telecommunications industries, in the analog and digital electronics industry, and in the hearing aid/medical instrumentation industry, or have chosen to pursue graduate degrees. Students enrolled in Audio Engineering have access to a variety of well-equipped laboratories, At the College of Engineering the students are expected to be involved in laboratories of electronics, computing, digital design, signal processing, and audio and speech processing. At the School of Music students have access to the Gusman Concert Hall, which houses a professional recording studio with automated console and multi-track recording. There, students can record live concerts ranging from small jazz groups to a symphony orchestra. In addition, Audio Engineering students use the Weeks Center for Recording and Performance, which also features a fully professional recording studio, analog and digital signal processing equipment and audio test equipment.

**Wireless Communication** was recently added to meet the growing need in wireless communications and networking. The option provides a solid background in the areas of conventional communications, modern computer networks and protocols, wireless network design and management, wireless networks, wireless web protocols, internet programming,
databases, distributed transaction processing, and security. The Wireless Communication option is concerned with the design and implementation of projects related to wireless systems. The graduates of this option will not only have theoretical and practical foundations, but will also be aware of the recent developments in all emerging fields and standardization efforts in wireless systems. Considering that there currently is and expected to remain an acute shortage of manpower in the high tech areas, we expect our graduates to have no problem in positioning themselves favorably in the job market.

EDUCATIONAL OBJECTIVES

The educational objectives of the Electrical Engineering Degree Program are to produce graduates who have the:

1. knowledge of mathematics, physics and the engineering sciences as well as the skill needed to plan, design, and develop successful solutions to electrical engineering problems.
2. broad educational background, professional and ethical context, and communication and team skills expected from a successful and responsible practicing electrical engineer.
3. background, preparation and experience necessary to be successful in graduate and professional degree programs, and a variety of alternative career paths.
4. foundations for independent learning and commitment to life-long education to continually improve, refine, and broaden their skills and competencies in the face of evolving technological developments and global needs.

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern electrical engineering, along with the necessary skills and experiences to apply standard practices, methodologies and available tools for solving electrical engineering problems. The major areas of Electrical Engineering include electronics, analog and digital circuits, microprocessors, communications and control systems. The design sequence is spread throughout the educational experience curricula, culminating in the two-semester senior design project. Graduates are expected to keep pace with this rapidly evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

DOUBLE DEGREE PROGRAM - B.S.E.E. & B.S.B.E.
A BME student who satisfies the requirement of the B.S.B.E. degree with electrical orientation as described in this Bulletin may also qualify for the B.S.E.E. degree by taking the following additional courses: EEN 218, 301, 306, 308, 311, 312, 316, 336, 404, 405, 435, 436 and one of each from (EEN 503, 516, 542, 555) and (EEN 536, 537, 538, 553) as well as having an ECE Faculty as co-sponsor of the Senior Project.

THE FIVE-YEAR B.S.E.E.-M.S.E.C.E. DUAL DEGREE PROGRAM
This is a structured and integrated program with a minimum of 158 approved credits including two required courses EEN 615 & 616 and 12 Technical Elective courses as follows:

- At least one Analysis elective courses.
- At least two Computer Engineering elective courses.
- At least six EEN Elective Courses.
- An additional three EEN or other Technical Elective courses.

The above Elective courses are to be selected in consultation with the advisor such that: At least thirty credits must be at the graduate (500 or 600 level). Of these at least 12 credits must be at the 600 level.

Note that:
- Interested EEN Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the MSECE portion of the program.
- A student wishing to drop out of the five-year program without the MSECE degree could receive the BSEE degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination before beginning their fifth-year courses.
- To qualify for the MSECE degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credits applied towards the MSECE degree.
- The student is awarded both the BSEE and the MSECE degrees after the requirements for both degrees are satisfied.
COURSE REQUIREMENT FOR THE BSEE-MSECE FIVE YEAR DUAL DEGREE PROGRAM (158 credits)

The first three years are the same as in the undergraduate B.S.E.E. program with 97 credits. The remaining 61 credits shown below should include at least ten graduate courses of which, at least four are at the 600 level. Also see description of electives under the Electrical and Computer Engineering Section.

MINOR IN ELECTRICAL ENGINEERING

Non-ECE Students wishing to minor in Electrical Engineering should satisfy a 15 credit requirement specified as follows:

1. A core of seven credits consisting of EEN 201, EEN 204, and EEN 305.

2. Eight or more credits of Electrical Engineering Electives. It is recommended that these elective credits be taken from one of the following two sets of EEN courses:
   - Communication (EEN 306, 307, 311, 336, 404, 436, 534)

3. Students with a major in Computer Engineering wishing to add a minor in Electrical Engineering must take six Electrical Engineering course credits in addition to those needed to satisfy their degree requirements.

4. A 2.0 grade point average in all EEN courses taken.
BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (B.S.Cp.E.)

Computer engineering is concerned with the characterization, design, analysis and implementation of hardware, software and the overall architecture of computers and computer systems, and with the development of applications enabled by such configurations. This ranges from embedded microprocessors and associated software supporting a variety of familiar devices, to large-scale distributed computer systems interconnected by high-speed telecommunication networks controlled by sophisticated communication protocols. Since modern electronic computing systems are digital in nature, the program provides in-depth coverage of a range of topics dealing with digital information processing systems. Among the topics covered are digital system design, computer organization and architecture, operating systems, software engineering, database systems, image processing and computer vision, programming languages, microprocessor-based systems, digital communications, computer communication networks, wireless and mobile networks, design and implementation of very large scale integrated (VLSI) circuits and systems, artificial intelligence, data mining, agent technology, computer graphics, and multimedia systems and networks.

Computer engineering is a rapidly changing and evolving discipline driven by new technology developments and marketplace conditions. To adequately train students to meet the challenges of the future and to assume leadership roles in the practice of computer engineering, the department offers an up-to-date curriculum that reflects new technology developments that have the potential for significantly impacting professional practice in the industry. The curriculum is constantly updated to incorporate new technological, scientific and economic developments.

EDUCATIONAL OBJECTIVES

The educational objectives of the Computer Engineering Degree Program are to produce graduates who have the:

1. knowledge of mathematics, physics and the engineering sciences as well as the skill needed to plan, design, and develop successful solutions to computer engineering problems.

2. broad educational background, professional and ethical context, and communication and team skills expected from a successful and responsible practicing computer engineer.

3. background, preparation and experience necessary to be successful in graduate and professional degree programs, and a variety of alternative career paths.

4. foundations for independent learning and commitment to life-long education to continually improve, refine, and broaden their skills and competencies in the face of evolving technological developments and global needs.
DEGREE PROGRAM

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern computer engineering, along with the necessary skills and experiences to apply standard practices, methodologies and modern tools for solving computer engineering problems. The major areas of Computer Engineering include digital systems, algorithms and data structures, programming languages, computer architecture, microprocessors, operating systems, software engineering, databases, and artificial intelligence.

The computer engineering design sequence is spread throughout the computer engineering curriculum. System design is emphasized during the last three semesters, culminating in the senior design project.

Graduates are expected to keep pace with this rapidly-evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development, by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

THE FIVE-YEAR B.S.Cp.E.-M.S.E.C.E. DUAL DEGREE PROGRAM

This is a structured and integrated program with a minimum of 160 approved credits that includes ten additional elective courses and replaces three technical elective courses as well as one senior design course currently required under the B.S.Cp.E. Degree as follows:

- Four required courses: EEN 368, 418, 615, 616.
- Two hardware elective courses from: EEN 532, 542, 614.
- Two software elective courses from: EEN 511, 512, 513, 572.
- Four elective courses from the following:
  - EEN 336, 436, 519, 534, 536, 538, 540, 548, 568, 570, 571, 574-578, 586, 587, 634, 638, 653, 671, and as well as CSC 544, 529.
- Three additional technical electives to be selected in consultation with the advisor from the appropriate courses listed above for each area.
- At least thirty credits must be at the graduate (500 or 600) level. Of these, at least twelve credits must be in courses open to graduate students only (600 level).
- Interested ECN juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 36 credits applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

MINOR IN COMPUTER ENGINEERING

Students wishing to minor in Computer Engineering must satisfy the following requirements:

1. A core of thirteen credits consisting of EEN 118, 218, 304, and 312.

2. At least five credits of computer engineering electives selected from the following courses: EEN 315, 316, 318, 368, 414, 424, 454/455, 511, 512, 513, 519, 521, 534, 537, 547, 567, 571.

3. Students with a major in Electrical Engineering wishing to add a minor in Computer Engineering must take six Computer Engineering course credits in addition to those needed to satisfy their degree requirements.

4. A minimum grade point average of 2.0 in all EEN courses taken.
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY AND SOFTWARE ENGINEERING DEGREE PROGRAM (B.S.I.S.E.)

INFORMATION TECHNOLOGY AND SOFTWARE ENGINEERING PROGRAM
Information technology has had a profound impact on business and commerce, education and knowledge dissemination, entertainment and the arts, biomedical research and practice, scholarly research, and society in general. The Internet now interconnects millions of computers around the world allowing individuals, organizations and businesses to communicate freely and almost instantaneously and to share information on a worldwide basis. Modern information technology, based on a combination of highly dynamic and complex electronic computing environments together with networking infrastructure and software systems, requires practitioners who are well versed in a variety of these key areas of information technology. Individuals are needed with experience and hands-on training in the design, deployment, operational use, and management of these complex systems.

The Information Technology and Software Engineering (ITSE) Program at the University of Miami’s College of Engineering is designed to prepare students for a successful career as information technology professionals. The extensive practical nature of this curriculum is supported by the new Information Technology Laboratory, which serves as a microcosm of a real-world environment that encompasses enterprise issues such as network connectivity, systems interoperability, portable software development, redundant system architecture, web development, system integration, and multimedia delivery. The hardware and software systems that constitute the laboratory are those used in enterprises to provide their information technology solutions. Departmental laboratories utilized by this program include the following:

1. Multimedia Laboratory (Arnold Center for Confluent Media Studies)
2. Software Engineering Laboratory
3. Networks Laboratory
4. Microprocessor Laboratory
5. Embedded Systems Laboratory
6. Digital Signal Processing Laboratory
7. Digital Audio and Speech Processing Laboratory
8. Information Technology Laboratory

Information Technology option provides an in-depth training in the areas of computer organization and architectures, operating systems, software development and documentation, information retrieval and database systems, computer communication networks, the Internet and intranets, wireless and mobile networks, multimedia systems and networks, systems and network management, information modeling and characterization, and modern information processing concepts to prepare the information technology professional of the 21st century. The curriculum is constantly updated to incorporate new technological developments and reflect best practices in the information technology industry.
Software Engineering option is concerned with the sound application of engineering and mathematical techniques in designing, building, operating and maintaining reliable and economical software systems. As computer use has increased and the need for reliable, efficient, economical and ‘correct’ software systems has grown it is one of the fastest growing segments of the computing industry and plays an important role in almost every field. This option provides a solid background in the areas of general engineering, mathematics, science and a strong emphasis in software design and development. The rate of growth of software systems has far outpaced the growth of hardware systems in recent years. With this growing market, there is a need to produce engineers who have the formal training in sound engineering practices, while at the same time are able to work in team environments on large scale, complex software systems. This option prepares the student for the demands of this exciting field with a strong emphasis on hands-on training.

EDUCATIONAL OBJECTIVES

The educational objectives of the Information Technology and Software Engineering Degree Program are to produce graduates who have the:

1. knowledge of mathematics, science, and engineering, and the skills needed to analyze computer and information technology applications and requirements, and to plan, design, and develop successful solutions.

2. broad educational background, professional and ethical context, and communication and team skills expected from a successful and responsible practicing information technology professional.

3. background, preparation and experience necessary to be successful in graduate and professional degree programs, and a variety of alternative career paths.

4. foundations for independent learning and commitment to life-long education to continually improve, refine, and broaden their skills and competencies in the face of evolving technological developments and global needs.

DEGREE PROGRAM

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying the field of information technology, along with the necessary skills and experiences to apply standard practices, methodologies and modern tools for developing information technology solutions. The major areas of Information Technology include algorithms and data structures, computer programming, web technologies, computer networks, network programming/computing, software development and testing, database management systems, and multimedia systems and networks.

The design experience involving a wide spectrum of information technologies is spread throughout the information technology curriculum. System design is emphasized during the last three semesters, culminating in the senior design project.

Graduates are expected to keep pace with this rapidly-evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional
development, by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

AREAS OF CONCENTRATION WITHIN THE BSISE PROGRAM (IT OPTION):

GENERAL IT CONCENTRATION
Fifteen credits to satisfy the I.T. elective courses are selected in consultation with, and approval of, the academic advisor.

COMPUTER ENGINEERING IT CONCENTRATION
EEN 204  Electronic Circuits Laboratory (1 cr.)
EEN 315  Digital Design Laboratory (1 cr.)
EEN 316  Structured Digital Design (1 cr.)
EEN 454  Digital System Design and Testing (2 cr.)
EEN 455  Design-for-Testability Laboratory (1 cr.)
Three courses selected from EEN 514, 521, 532, 542 and CSC 529 (3 cr. each)
(EEN 305 is a prerequisite for EEN 532, 542)

COMPUTER SCIENCE IT CONCENTRATION
Select fifteen credits from:
CSC 517  Data Structures and Algorithm Theory (3 cr.)
CSC 518  Interpreters and Compiler Theory (3 cr.)
CSC/EEN 519 Programming Languages (3 cr.)
CSC 527  Theory of Computing (3 cr.)
CSC 529  Introduction to Computer Graphics (3 cr.)
CSC 540  Algorithm Design and Analysis (3 cr.)

MULTIMEDIA IT CONCENTRATION
EEN 586  Multimedia Networking (3 cr.)
EEN 589  Multimedia Databases (3 cr.)
CSC 529  Computer Graphics (3 cr.)
EEN 421  Intro. To 3D Computer Modeling and Animation (2cr)
Two courses from:
EEN 422  Character Design and Motion Capture for Computer Games (2cr.)
CSC 329  Game Programming (3cr.)
CSC 547  Computational Geometry (3cr.)

BUSINESS IT CONCENTRATION
Select fifteen credits in junior- and/or senior-level courses in the Business IT concentration to satisfy the I.T. Elective courses. Also, select at least nine credits to satisfy the University of Miami General education requirements, and possibly satisfy the prerequisite courses of the selected I.T. Elective courses. Both selections must be done with the approval of both the department chair and IT program coordinator.

COMMUNICATION IT CONCENTRATION
Select fifteen credits in junior- and/or senior-level courses in the Communication IT concentration to satisfy the I.T. Elective courses. Also, select at least nine credits to satisfy the University of Miami General education requirements, and possibly satisfy the prerequisite courses of the selected I.T. Elective courses. Both selections must be done with the approval of both the department chair and ITSE program coordinator.
SOFTWARE ENGINEERING OPTION - 131 credits

THE FIVE YEAR B.S.I.S.E.-M.S.E.C.E. DUAL DEGREE PROGRAM
This is a structured and integrated program with a minimum of 159 approved credits including six elective courses as follows:

- Six credits of EEN elective courses selected from the following list: EEN 511, 512, 513, 514, 532, 536, 538, 540, 542, 553, 562, 563, 564, 565, 614, 638, and 671.
- Nine credits of technical elective courses selected in consultation with the Academic Advisor
- At least thirty credits must be at the graduate (500 or 600) level including twelve credits in courses open to graduate students only (600 level).
- Interested juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.I.S.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the thirty credits applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.I.S.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

COURSE REQUIREMENT FOR THE B.S.I.S.E. - M.S.E.C.E. FIVE YEAR DUAL DEGREE PROGRAM (159 CREDITS)
The first two years are the same as in the B.S.I.S.E. Degree Program with 65 credits. The remaining 94 credits are specified below:

** Two of these six electives must be at the 600 level.
DEPARTMENTAL LABORATORIES

The Department maintains a variety of well-equipped laboratories and computers adequate for undergraduate instruction and graduate research. The laboratories and computer facilities include:

Electronics Laboratory
Wireless Communications Laboratory
Digital Signal Processing Laboratory
Electrical Energy Conversion Laboratory
Digital Design Laboratory
Information Technology Laboratory
Microprocessor Laboratory
Electro-Optics and Micro-Devices Laboratory
Distributed Decision Environments Laboratory
Computer Vision and Image Processing Laboratory
Embedded Systems Laboratory
Underwater Imaging Laboratory
Networks Laboratory
Multimedia Laboratory (Arnold Center for Confluent Media Studies)
Digital Audio and Speech Processing Laboratory
ECE Computing Laboratory
Optics and Fiber Communications Laboratory

DEPARTMENTAL ELECTIVES

1. Humanities and Arts/People and Society Electives: selected from the appropriate table found in this Bulletin under the Engineering section

2. Technical electives: Appropriate EEN, Math, Physics, Chemistry, Biology, Computer Science, or other Engineering Courses selected in consultation with, and with the approval of, the academic advisor.

3. Analysis Elective: selected from EEN 500 or 533 or any Elective Math course approved by the academic advisor.

4. Computer Engineering Technical Elective are selected in consultation with the Academic Advisor from the following list of courses: EEN 368, 511, 512, 513, 519, 532, 534, 537, 538, 542, 548, 553, 565, 568, 570, 571, 572, 574, 575, 576, 577, 578, 579, 586, and 587. The EEN 421 and 422 sequence can also be used as one technical elective. In addition, one computer engineering elective course may be selected from the following computer science courses: CSC 517, 518, 527, 529, 540, and 555.

5. Information Technology Technical Elective: selected in consultation with, and with the approval of, the academic advisor.

6. Software Engineering Technical Electives are selected from EEN 519, 537, 562, 568, 571, 572, 574, 577, 578, 579, 586, 587, CSC 329, 529, and 540.
INTERNSHIP PROGRAM

The Department of Electrical and Computer Engineering encourages its students to take advantage of the College of Engineering Internship Cooperative Program with Industry. Students could do that either on a part-time or a full-time arrangement. Students who wish to intern full-time for one semester or for twelve weeks in the summer may apply to earn as much as three credit hours that could be applied to their degree requirement as a Technical Elective. Students interested in such a possibility need to submit a proposal to the ECE Department describing the type of work they expect to accomplish approved by the industrial supervisor. If the proposal is approved the student will be assigned a Faculty Supervisor and will be able to register under EEN499. At the end of the Internship Program, the Student is expected to submit to the ECE Department a technical report with comments from the student industrial supervisor. The Faculty advisor will review the report and submit the appropriate grade for EEN499.

NOTE: An EEN course for which another EEN course is a prerequisite may not be taken unless the student has completed the EEN prerequisite course with a grade of C- or better.

DEPARTMENTAL HONORS

See College of Engineering section

Electrical and Computer Engineering Course Listing
ENGINEERING SCIENCE

INTRODUCTION

The curricula in the engineering sciences have been designed to prepare a student to fill the gap between the pure and applied sciences. The programs have been planned to enable the graduate to meet, work, and communicate with scientists and engineers at all levels of research and development, design and production, sales and distribution and to participate in the rapid and efficient translation of the latest scientific discoveries into technological achievements.

The general curriculum outlined below has been developed to give the student a firm foundation in the engineering sciences supported by a thorough grounding and facility in mathematics, physics and chemistry. In addition, each student will choose an area of specialization in at least one of the Engineering fields of architectural, civil, biomedical, electrical, industrial, or mechanical, and mathematics, chemistry or physics. By being well grounded in both the basic and applied sciences, the student, upon graduation, will be well prepared to assume responsibilities in his/her field of specialization or continue his/her professional development through graduate studies.

The engineering science program is intended primarily for students who expect to pursue graduate studies, and it will not satisfy the licensure requirements for professional engineering registration.

Premedical Studies: When BIL 150 and 160 are added to the course sequence for engineering science, basic premedical requirements are satisfied. Additional specific courses, such as genetics or biochemistry, may be required for admission to certain medical schools. For optimum timing and course selection students who combine premedical studies and engineering science should consult the faculty advisor for engineering science and the Coordinator, Committee on Premedical Studies.

Because of the nature of the curriculum and its goals, the student must maintain a B average. The degree of Bachelor of Science Engineering Science is awarded upon successful completion of the program.

The required curriculum for the degree of Bachelor of Science in Engineering Science (General Concentration) is shown below as is a typical premed curriculum. A Professional Chemistry Concentration in the Engineering Science Program is available (the Professional Chemistry Program, approved by the American Chemical Society, is also available in the College of Arts and Sciences).

MISSION STATEMENT

The mission of the Engineering Science program is to provide excellent undergraduate and graduate education in engineering that will prepare graduates to meet Society's changing needs and aspirations.
EDUCATIONAL OBJECTIVES

The objectives of the Engineering Science program are to educate engineers who:

- have a sound background in the fundamentals of engineering science grounded in mathematics, physics and chemistry
- have abilities and knowledge expected by graduate programs
- are prepared to enter graduate programs with a strong background in pure science

* People and Society (PS)/Humanities and Arts (HA) Electives are selected from the appropriate table found in this Bulletin in the College of Engineering section.

** Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives. The Department recommends that students take Engineering Administration (MAE 410) as a possible
technical elective. It is a part of the professional registration examinations, and professional registration, a desirable qualification for all engineers, is essential for those in consulting work and those employed by large utilities

*** Applied electives are advanced courses selected in coordination with the Faculty Advisor and require his/her approval.

**ENGINEERING SCIENCE (Premed Concentration) 124 credits**

INDUSTRIAL ENGINEERING - Dept. Code: IEN
Industrial Engineering

Mission Statement

The Department of Industrial Engineering’s mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Overview

Industrial Engineering combines science and technical knowledge with human sciences to design, plan, and analyze systems that involve people, materials, money, energy, equipment, and other resources. Industrial engineers work with personnel in research and development, accounting, engineers in other disciplines, maintenance, human resources, and production to increase organizational productivity, improve quality, reduce health care costs, conserve energy, develop public transportation systems, and improve industrial safety conditions. Industrial engineering distinguishes itself from other engineering professions because it has applications in manufacturing, service, commercial, and governmental activities. It is the major branch of engineering concerned not only with technology, but with people, making industrial engineers a prime source of management talent.

Through consultation with his/her academic advisor, a student is assisted in choosing electives which will prepare him/her for a degree of specialization compatible with his/her future goals. The available concentrations are Engineering Management and Manufacturing. Specific courses required in each concentration are described in Degree Programs Section.

The Department of Industrial Engineering offers graduate programs leading to the Master of Science in Industrial Engineering, Master of Science in Environmental Health and Safety, and Master of Science in Management of Technology. The Department also offers a Ph.D. program in Ergonomics and Human Factors and a Ph.D. in Industrial Engineering. For further information, see the Bulletin of the Graduate School.

The Department of Industrial Engineering in cooperation with the School of Business Administration offers a dual MSIE/MBA weekend executive program. For more details of this program contact the Department of Industrial Engineering.

EDUCATIONAL OBJECTIVES

BACHELOR OF SCIENCE IN INDUSTRIAL ENGINEERING

Industrial Engineering Program Educational Objectives

The major goal of the Industrial Engineering program at the University of Miami is to prepare graduates to contribute to the economy by virtue of employment in a variety of industries: manufacturing (heavy and light, traditional and high technology) and service (health care, retail, transportation, logistics, government, consulting, banking, and insurance). In striving to achieve this goal, the objective of the faculty is to provide all
graduates with the mathematical, scientific, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to clients or decision makers in a fashion that facilitates decision-making processes. In addition, superior students are prepared for graduate studies and research. Within the first several years following graduation from the Industrial Engineering program, graduates are expected to be:

1. Working as professionals by adding value in any one of the following sectors:
   - Service
   - Government
   - Consulting
   - Retail
   - Manufacturing

2. Pursuing or holding a graduate degree and/or developing professionally through continuing education, licensure, certification and seminars in a new area or their chosen areas of expertise.

The curriculum includes required courses in mathematics and the physical sciences that ensure a firm scientific background while advanced departmental courses provide specialization. Required courses in the people and society - humanities and arts give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to successfully complete upper level course requirements.

The engineering design experience is interwoven in the curriculum throughout the students’ four years of study.

- Starting with IEN 111 Introduction to Engineering I and IEN 112 Introduction to Engineering II, an introduction to Engineering graphics, Auto CAD, MATLAB, C++, advanced Excel and Access are given.
- The students then move on to take IEN 201 Methods Analysis & Project Management where they perform work measurement projects in industry, write reports, and make oral presentations to management. In addition, the students are exposed to techniques and tools in project management such as use of network flow and MSProject.
- In IEN 306 Manufacturing Processes the students are introduced to the principles of metal cutting, metal forming, and metrology.
- Students take IEN 361 Industrial Cost Analysis and IEN 380 Engineering Economy where they become aware of the impact of productivity on the economic and social well-being of industry and countries. The students are also introduced to basic models of decision making such as the formulation and evaluation of an economic strategy.
- IEN 406 Computer-Aided Manufacturing introduces the students to product design in manufacturing and modern concepts of CAD/CAM/Automation.
- IEN 441 Deterministic Models in Operations Research focuses on the formulation of linear programming problems and solutions by the simplex method. Related topics include sensitivity analysis, duality theory and network programming. Engineering applications are emphasized.
- IEN 442 Stochastic Models in Operations Research focuses on basic concepts and techniques of random processes that are used to develop models for a variety of
engineering and managerial problems. Topics include the Poisson Process, Markov chains, renewal theory, queuing models, and reliability.

- IEN 465 Production and Inventory Control provides a thorough treatment of modern production and inventory management policies, and their ramifications on supply chain management.
- Theory and applications of decision support systems in industrial engineering are covered in IEN 524 Decision Support Systems in IE. The topics include the study of model-based data-based, knowledge-based, and communication-based decision support systems.
- In IEN 557 Ergonomics and Human Factors Engineering both laboratory projects and real-world projects are designed, discussed, and conducted.
- Industry based projects are embedded into several other courses such as IEN 512 Statistical Quality Control and Quality Management, IEN 547 Computer Simulation Systems, and IEN 568 Materials Handling and Facilities Planning.
- IEN 494 Senior Project is a capstone project course where the students pool all of their knowledge and previous design experience into one major project integrating all components of the curriculum together. These projects are usually industry-based. Students prepare written and oral presentations. These presentations are made before top management or engineers of the organization where the projects were conducted in the presence of the faculty representatives from the department.

Real world projects are an integral part of most junior and senior level courses. In these courses, communication is emphasized through requirements for oral presentation and written technical reports. This experience provides the graduates with valuable industrial experience and communications skills while studying at the University of Miami.

The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of production system design, work methods and measurement, human factors engineering, manufacturing processes, computer applications in industrial engineering and operations research.

FIVE-YEAR BACHELOR OF SCIENCE IN INDUSTRIAL ENGINEERING AND MASTER OF SCIENCE IN INDUSTRIAL ENGINEERING (FIVE-YEAR BSIE/MSIE PROGRAM)

This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering. The special conditions for this Five-Year BSIE/MSIE Program are as follows:

1. The student must declare his/her intent to participate before the end of the Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
2. A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.
3. To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.
4. The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all undergraduate and graduate requirements are satisfied.

MINOR

INDUSTRIAL ENGINEERING MINOR
A student majoring in another discipline who chooses to take a minor in Industrial Engineering must complete 15 credits of coursework consisting of the following:
IEN 201
IEN 351
IEN 380 and
Any two 300, 400 or 500 level IEN courses

Substitutions may be accepted with the permission of the Department Chairman.

Industrial Engineering Course Listing
MECHANICAL AND AEROSPACE ENGINEERING - Dept. Code: MAE
Mechanical and Aerospace Engineering

INTRODUCTION

Engineering is the art of applying the knowledge of science for the benefit of humanity. Mechanical Engineering is the most broadly based area of engineering. It is concerned with the analysis, design, development and application of equipment for such diverse fields as energy conversion, transportation, production machinery, consumer goods, and environmental control. Today’s advanced technology is largely a result of the skill of mechanical engineers who are heavily represented in most fields of modern industry.

Because of the varied careers and opportunities which are available to the Mechanical Engineering graduates, the curriculum emphasizes education in the fundamentals of the physical, mathematical, and engineering sciences, including materials science, solid mechanics, fluid mechanics and thermodynamics. These basic subjects are followed by courses in their application to the design and analysis of engineering devices and systems. The available mini- and micro-computers are utilized for analysis and design throughout the curriculum.

Aerospace Engineering is concerned with the analysis, design and development of a wide variety of aircraft and space vehicles and systems. The undergraduate aerospace engineering program is designed to provide a broad based foundation in aeronautics and astronautics, including topics such as aerodynamics, propulsion, aerospace structures and materials, flight dynamics, control and performance.

In the junior and senior years, the student is assisted in choosing technical electives in preparation for a degree of professional specialization or for further study in engineering, law, business or medicine. With the aid of an advisor and the concurrence of the department chairman, the student may select courses compatible with a variety of career goals.

The department offers two undergraduate degrees: Bachelor of Science in Mechanical Engineering and Bachelor of Science in Aerospace Engineering. Within the Bachelor of Science in Mechanical Engineering program, sequences of courses are available to provide advanced knowledge in such traditional areas as electromechanical design, heat transfer, applied mechanics, fluid mechanics, materials science, and nuclear engineering. There are concentrations in Aerospace Engineering, Environmental Engineering, Energy Engineering, Automobile Engineering, Combustion Engines/Exhaust Emissions, and Heating, Ventilation and Air Conditioning. In addition, a Biomedical Engineering concentration is offered in conjunction with the Department of Biomedical Engineering and the Medical School.

MISSION STATEMENTS

Mission of Mechanical and Aerospace Engineering Department

The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet Society’s changing needs and aspirations.
Mission of the Mechanical Engineering Program
The mission of the Mechanical Engineering program is to provide excellent undergraduate education in Mechanical Engineering that will prepare graduates to meet society’s changing needs and aspirations.

Mission of the Aerospace Engineering Program
The mission of the Aerospace Engineering program is to provide excellent undergraduate education in Aerospace Engineering that will prepare graduates to meet society’s changing needs and aspirations.

EDUCATIONAL OBJECTIVES

The objectives of the mechanical engineering program are to educate engineers who:

(1) have a sound background in the fundamentals of engineering
(2) have the abilities and knowledge expected by industry
(3) are prepared for entry-level jobs in mechanical engineering
(4) are prepared for graduate work in mechanical engineering

The objectives of the aerospace engineering program are to educate engineers who:

(1) have a sound background in the fundamentals of engineering
(2) have the abilities and knowledge expected by industry
(3) are prepared for entry-level jobs in aerospace engineering
(4) are prepared for graduate work in aerospace engineering

GRADUATE STUDIES
Graduate programs leading to the degrees of Master of Science and Doctor of Philosophy are offered by the Department with options in various engineering and interdisciplinary fields. Detailed information is available in the Bulletin of the Graduate School.

* People and Society (PS)/Humanities and Arts (HA) Electives are selected from the appropriate table found in this Bulletin in the College of Engineering section.

** Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives. The Department recommends that students take Engineering Administration (MAE 410) as a possible technical elective. It is a part of the professional registration examinations, and professional registration, a desirable qualification for all engineers, is essential for those in consulting work and those employed by large utilities.

*** Applied Thermodynamics Electives are selected with approval of Faculty Advisor, e.g., MAE 308, MAE 408, MAE 503, MAE 510, MAE 520, MAE 570.

* People and Society (PS)/Humanities and Arts (HA) Electives are selected from the appropriate table found in this Bulletin in the College of Engineering section.

** Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives. The Department recommends that students take Engineering Administration (MAE 410) as a possible technical elective. It is a part of the professional registration examinations, and professional registration, a desirable qualification for all engineers, is essential for those in consulting work and those employed by large utilities.

### CONCENTRATIONS IN MECHANICAL ENGINEERING

**Aerospace Engineering Concentration**

The mission of the aerospace engineer is to design and manufacture payload carrying vehicles to travel distances at the lowest cost in the shortest period of time. The training of the aerospace engineer is by demand multidisciplinary and by spirit pioneering. It includes aerodynamics, propulsion, advanced materials, structures, controls, robotics, electronics and computer usage.

An option has been developed to allow students at the University of Miami to have a concentration of courses in Aerospace Engineering. This concentration in aerospace is built on the existing accredited degree program in Mechanical Engineering.
See Aerospace Engineering Concentration Curriculum.

**Energy Engineering Concentration**
This concentration provides the fundamentals and applications of various aspects of energy such as solar, hydrogen, electric and nuclear energy sources; energy conversion; internal combustion engines; and energy utilization in heating, ventilating, air conditioning and refrigeration systems. The technical electives related to this concentration include MAE 408, MAE 503, MAE 506, MAE 509, MAE 510, MAE 514, MAE 538, MAE 539, and MAE 540. Students can take special project courses in Internal Combustion Engines, Dorgan Solar Energy, Pollution Control, Fluid and Thermal Sciences, and Two-Phase Flow Laboratories.

**Biomedical Engineering Concentration**
This concentration is built around a 9-credit course sequence which has been developed to familiarize graduate and advanced undergraduate students with the rudiments of anatomy, physiology, biochemistry, and clinical medicine. Completion of the program is intended to aid the student in pursuing a career in medicine or in engineering and design in such areas as extracorporeal life-support systems and prosthetic devices.

The student should take Chemistry 201 as a prerequisite to Biomedical Engineering 501 and 502, Unified Medical Sciences I and II. These Biomedical Engineering courses satisfy the requirements for electives in the Mechanical Engineering Program, but under current regulations, the student will require 131 credits to graduate.

**Automotive Engineering Concentration**
This program is designed to acquaint the mechanical engineering student with the fundamental science and engineering underlying the design of both conventional and high performance internal combustion engines and the fundamentals of emission formation in combustion systems, automobile mechanisms and structures including vibrations and noise. Included are studies of conventional fuels and synthetic fuels of the future such as hydrogen and methanol.

Technical Electives are MAE 503, 514 and 521.

**Environmental Engineering Concentration**
In the students junior and senior years he or she should select three People and Society/Humanities and Arts electives from List A below, including one of the 500-level courses, and two Technical Electives from List B.

<tr>
<td>GEG 341</td>
<td>MAS 547</td>
</tr>
<tr>
<td></td>
<td>BIL 150, 160</td>
</tr>
</tbody>
</table>

**HVAC Systems Concentration**
This concentration is offered to specialize the mechanical engineering student with the theory and applications of HVAC systems. At least the HVAC Technical Electives MAE 408, MAE 508, and MAE 539 should be selected. The design project for MAE 442-443 will involve air-conditioning component and system design.
Sustainable Engineering Concentration
The Sustainable Engineering concentration focuses on engineering that maximizes the benefits of technology to society while it minimizes the non-renewable resources utilized and the associated impact on the environment of producing and disposing of that technology. Projects in the design courses MAE 342, MAE 441 and MAE 442-443 will focus on Sustainable Engineering, and there will be a Special Project in the laboratory course MAE 404.

Other Concentrations
Concentrations may also be elected in electro-mechanical design, heat transfer, fluid mechanics, solid mechanics, computer aided design, nuclear engineering, materials science and chemical technology by judicious selection of technical electives.

* People and Society (PS)/Humanities and Arts (HA) Electives are selected from the appropriate table found in this Bulletin in the College of Engineering section.

** Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives. The Department recommends that students take Engineering Administration (MAE 410) as a possible
technical elective. It is a part of the professional registration examinations, and professional registration, a desirable qualification for all engineers, is essential for those in consulting work and those employed by large utilities.

*** Applied Thermodynamics Electives are selected with approval of Faculty Advisor, e.g., MAE 308, MAE 408, MAE 503, MAE 510, MAE 520, MAE 570.

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of more than 1000 on the Graduate Record Examination (taken before the fifth year). The curriculum requirements for this program are as follows:

**BACHELOR of SCIENCE and MASTER of SCIENCE in MECHANICAL ENGINEERING**

MINOR

MECHANICAL ENGINEERING MINOR

A student in the College of Arts and Sciences choosing the general field of mechanical engineering as a minor must complete 15 credits consisting of the following:

1. A core of CAE 210 and MAE 111.

2. Nine additional credits of Mechanical Engineering electives. These nine credits must be chosen from one of the following areas of specialization:
   d. Thermal Engineering: MAE 303, MAE 308, MAE 310, MAE 408, MAE 441, MAE 503, MAE 508, MAE 510.

Mechanical and Aerospace Engineering Course Listing
OCEAN ENGINEERING/APPLIED MARINE PHYSICS

Ocean engineering concerns engineering in the marine environment. The ocean engineer provides solutions compatible with man's need for utilization of marine resources on one hand and his concern for ecological balance on the other. The largest structures ever known, fixed or floating, now are fabricated at sea. Delicate and complex underwater systems are designed to resist the harshness of the ocean environment. Population centers and industrial developments are clustered along our shoreline creating a number of problems which need to be solved. All these aspects of ocean engineering offer challenge and opportunities.

The College offers an M.S. in Ocean Engineering. This degree is sponsored jointly by the College of Engineering and the Rosenstiel School of Marine and Atmospheric Science.

Applied Marine Physics courses open to undergraduate students are listed under THE ROSENSTIEL SCHOOL OF MARINE AND ATMOSPHERIC SCIENCE elsewhere in this Bulletin.

For detailed information relative to graduate studies, see the Bulletin of the Graduate School.
DOROTHY H. AND LEWIS ROSENSTIEL
SCHOOL OF MARINE AND ATMOSPHERIC SCIENCE

MARINE AND ATMOSPHERIC SCIENCE PROGRAM – Dept. Code: MSC
www.rsmas.miami.edu

INTRODUCTION

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School’s present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired and additional buildings were constructed to accommodate new wide-ranging projects. In 1969, the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution, made through the Rosenstiel Foundation, to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the Rosenstiel School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of 100 scientists who conduct sponsored research while offering studies leading to the Bachelor of Science, Bachelor of Arts, Master of Arts, Master of Science and Doctor of Philosophy degrees.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate and undergraduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the-art catamaran, unrivaled worldwide for both shallow and deep water research. The vessel, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School, signals a new era in scientific research.
MISSION

The Rosenstiel School strives to be in the forefront of basic and applied research as it applies to the ocean, atmosphere and global environment, with particular emphasis on subjects of societal significance. Our goal is to provide excellence in graduate and undergraduate education and research training, and to be a strong force towards improved environmental understanding and management.

ACADEMIC POLICIES

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the Undergraduate Marine and Atmospheric Science Program is selective and highly competitive. Admission decisions are based on the secondary school record, SAT/ACT score, counselor’s evaluation and the applicant’s essay.

Student Responsibilities

Students of the Rosenstiel School are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study.

Academic Progress

The Rosenstiel School will review each student’s record at the end of each semester. All students in the Undergraduate Marine and Atmospheric Science Program must maintain a cumulative grade point average of 2.5 or better in order to remain in the program. Only those courses passed with a grade of C- or better may be applied to the major or minor.

DEGREE PROGRAMS

The Rosenstiel School of Marine and Atmospheric Science offers degree programs on both the undergraduate and graduate levels for students interested in marine and atmospheric science as a career.

UNDERGRADUATE DEGREE PROGRAMS

Marine and Atmospheric Science is an interdisciplinary program dealing with the study of the world’s oceans and atmosphere, their physical and biological constituents, the influence of oceanic resources on human society, and the conservation and future development of these resources.

The Rosenstiel School offers two undergraduate degree options, a Bachelor of Science in Marine and Atmospheric Science with majors in Marine Science and Meteorology and a Bachelor of Arts in Marine Affairs. The Bachelor of Science track in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a major in one of the basic sciences through the College of Arts and Sciences.
The accepted double major combinations are marine science/biology, marine science/chemistry, marine science/geology, marine science/physics, and marine science/computer science. The Bachelor of Science degree in Meteorology is a single major program, though students often combine meteorology with a second major in mathematics, physics, or ecosystem science and policy, among others. A double major combining meteorology and broadcast journalism through the School of Communications is an increasingly popular option.

The Bachelor of Science degree program is meant for students planning to continue with graduate studies in marine and atmospheric science, or for those who will pursue a technical career in this area in government or private industry.

The Bachelor of Arts degree will be useful to students planning either non-technical careers with government agencies or private industries directly or indirectly concerned with the ocean, or graduate studies in such areas as business, law, economics, political science, education, or communication.

In cooperation with the graduate program in Marine Affairs and Policy, a five-year BA/MA program in Marine Affairs is available. This program enables qualified students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Arts in Marine Affairs with only one additional year.

GRADUATE DEGREE PROGRAMS

Graduate courses in the marine and atmospheric sciences are offered through the Graduate School and the Rosenstiel School of Marine and Atmospheric Science and are listed under the following divisional headings of the Rosenstiel School graduate programs entry in the Bulletin:

- Applied Marine Physics
- Marine and Atmospheric Chemistry
- Marine Biology and Fisheries
- Marine Geology and Geophysics
- Meteorology and Physical Oceanography
- Marine Affairs and Policy

Courses at the 500-level may be taken for undergraduate credit with junior standing and departmental consent.
UNDERGRADUATE MAJORS

MARINE SCIENCE

The Bachelor of Science double major in Marine Science prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credits for graduation.

In addition to the courses that fulfill the General Education Requirements, the required courses for each area of concentration are:

Marine Science/Biology

- Marine Science 111, 215, 216, 230, 232*, 301, and 5 credits of elective in Marine Science
- Biology 150, 151, 160, 161, 235, 250, 255, 265 and 12 credits of elective as described for Biology majors
- (Marine Science 230 and one advanced biology course may fulfill requirements in both Biology and Marine Science)
- Chemistry 111, 112, 113, 114, 201, 202, 205, 206
- Geological Sciences 110 and 114
- Mathematics 111-112, one semester of a computer or statistics course. The following classes are approved to satisfy the computer/statistics requirement: MSC 200, BIL 311, Computer Science 120 or Mathematics 224, Industrial Engineering 124, Electrical and Computer Engineering 118, MSC 321, Psychology 204.
- Physics 205, 206, 207, and either 208 or 209; or Physics 101, 102, 106 and 108 (University Physics is recommended)

Marine Science/Chemistry

- Marine Science 111, 215, 216, 230, 232*, 301, and 5 credits of elective in Marine Science
- Biology 150, 151 or 160, 161
- Chemistry 111, 112, 113, 114, 201, 202, 205, 206, 304, 316, 320, 360, 364, 365, and one of CHM 401, 441, 520, 563 or BMB 401 or 502 as described for Chemistry majors
- Geological Sciences 110 and 114
- Mathematics 111-112, one semester of a computer or statistics course. The following classes are approved to satisfy the computer/statistics requirement: Chemistry 256 or Computer Science 120 or Electrical and Computer Engineering 118.
• Physics 205, 206, 207, and either 208 or 209

**Marine Science/Geological Sciences**

• Marine Science 111, 215, 216, 230, 232*, 301, and 5 credits of elective in Marine Science

• Biology 150, 151 or 160, 161

• Chemistry 111, 112, 113, 114

• Geological Sciences 110, 111, 114, 260, 360, 380, 410 or 420, 440, 480, 482, 580.

• (One course in Geological Sciences may fulfill requirements in both Marine Science and Geology.)

• Mathematics 111-112, one semester of a computer or statistics course.

• Physics 205, 206, 207, and either 208 or 209

**Marine Science/Physics**

• Marine Science 111, 215, 216, 230, 232*, 301, and 5 credits of elective in Marine Science.

• Biology 150, 151 or 160, 161

• Chemistry 111, 112, 113, 114

• Geological Sciences 110 and 114

• Mathematics 111-112, 210, 312, and one semester of a computer or statistics course. The following classes are approved to satisfy the computer/statistics requirement: Computer Science 120, Electrical and Computer Engineering 118.

• Physics 205, 206, 207, 208, 209, 321, 340, 350, 351, 360, 362, 540, 560 as described for Physics majors

**Marine Science/Computer Science**

• Marine Science 111, 215, 216, 230, 232, 301, 321 and 3 credits of elective in Marine Science

• Biology 150 or 160

• Chemistry 111, 112, 113, 114

• Computer Science 120, 220, 314, 322, 531 and 6 credits of elective

• Geography 199
• Geological Sciences 110, and 114
• Mathematics 112 and 309
• Physics 205, 206, 207 and one semester of laboratory or Physics 101, 102, 106 and 108

*Marine Biology and Fisheries 514 or MSC 231 may substitute for MSC 232.
METEOROLOGY

Meteorology is the study of the atmosphere and has many facets, including climate and climate variability, weather forecasting, cloud and precipitation physics, severe weather and hurricanes. Atmospheric scientists frequently develop and use computer models and sophisticated observing systems to describe and understand the atmosphere. Today’s meteorologists find rewarding and challenging jobs in industry, government, and education in such fields as space technology, air transportation, environmental impacts assessment, communication, agriculture, weather forecasting and basic research.

The Rosenstiel School offers a Bachelor of Science in Marine and Atmospheric Science with a major in Meteorology. In addition to the General Education Requirements, the following courses are required for the Meteorology major:

Marine and Atmospheric Science (28 credits):
MSC103, MSC111, MSC118, MSC243, MSC303, MSC305, MSC405, MSC406, MSC407, MSC409.

Mathematics (20 credits)*:
MTH111, MTH112, MTH210, MTH224, MTH310, and MTH311**
*Double majors in ECS and CBR must take either MTH224 or MTH311, but are not required to take both.
**Students may substitute MTH320 for MTH311.

Physics and Chemistry (14 credits):
PHY205, PHY206, PHY207, PHY208. CHM111, CHM113.

Computer Science (4 credits):
CSC120 or suitable elective.

Although Meteorology is approved as a single major program, students often combine Meteorology with a second major in such diverse fields as mathematics, broadcast journalism, or ecosystem science and policy. Sample curricula can be found at www.meteorology.miami.edu.
MARINE AFFAIRS

The ocean is acquiring an ever-increasing significance as an avenue of worldwide commerce and communication and as a source of food, energy, minerals and fuels. As nations and private concerns become more involved in the ocean, the need increases for qualified professionals to deal with the commercial and legal complexities of marine affairs. In order to meet this need, the Rosenstiel School offers a Bachelor of Arts degree with a major in Marine Affairs combined with a minor in Anthropology, General Business, Economics, Geography, Political Science, or Political Science/General Business. Students in the School of Communication may include Marine Affairs as their required second major. This program is designed for students who wish to prepare themselves for graduate studies and careers in ocean related areas of business, policy, management, law, and communication.

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Affairs are:

- Biology 150, 160
- Chemistry 111, 112,
- Marine Science 111, 215, 230, 313 or 314, 491 and seven credits of approved electives in marine affairs.
- Geological Sciences 110
- Economics 211
- One course in computer programming or statistics

Marine Affairs courses offered through the graduate Marine Affairs and Policy division at the Rosenstiel School may be taken by upperclass students with permission.

5 Year BA/MA Program in Marine Affairs

The Rosenstiel School offers a 5 year BA/MA Program in Marine Affairs. This program enables qualified Marine Affairs students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Arts in Marine Affairs in one additional year. Conditional acceptance to the graduate Marine Affairs and Policy Division is based on the student’s GPA at the end of the sophomore year. Students must then apply for acceptance to the graduate program at the Rosenstiel School during their junior year.

MINORS

A Bachelor of Science minor in Marine Science requires the following courses:

To obtain a minor in Meteorology, students must complete: MSC103, MSC118, MSC 220, MSC243, MSC303.

A minor in Marine Affairs is currently not offered.

HONORS

Honors in the Marine and Atmospheric Science program may be earned by students who have a 3.5 GPA and have completed 6 credits of independent research and a senior thesis.
REQUIREMENTS FOR GRADUATION

In addition to satisfying the course requirements for graduation with majors in Marine Science, Meteorology and Marine Affairs (specified above under "Undergraduate Majors"), students are expected to satisfy the General Education Requirements required of students in the College of Arts and Sciences. General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the General Education Requirements.

AREAS OF PROFICIENCY

A) English Composition: 3-6 credits

Students (except those first enrolling in English 103) must take English 105 and 106, or their approved equivalents, in the first year of residence.

Students with an appropriate score on the Advanced Placement [AP] language and literature examination, or with an appropriate score on the International Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT verbal or ACT verbal exams may be exempted from English 105. Those with transfer credit for English 105 will take English 106 or its equivalent in the first year of residence; those with credit for English 105 and 106 will take an approved advanced composition course or intensive writing course section in the first year of residence, unless otherwise exempted with the approval of the English Composition Program.

B) Writing Across the Curriculum

Every student must complete five (5) writing-oriented (W) courses beyond ENG 105 and 106. Students are required to write at least 4000 words in each W course. Writing assignments will be graded on both content and style. All literature and foreign language literature courses receive writing credit. Transfer students must satisfy at least three (3) courses of the writing requirement at the University of Miami.

C) Languages: 3-9 credits

Students must earn at least 3 credits of a language other than English at the 200 course level or higher. Special 100- and 200-level Spanish courses are required of native Spanish speakers who choose to fulfill the language requirement by taking Spanish. Students may fulfill the foreign language requirement from the following: Arabic, French, German, Greek Hebrew, Italian, Japanese, Latin, Portuguese and Spanish.

D) Mathematics

Bachelor of Arts in Marine Affairs: 3-6 credits
Bachelor of Science in Marine and Atmospheric Science: 11-12 credits

B.S. degree candidates must earn 11-12 credits, consisting of two semesters of Calculus: MTH 110-112, MTH 111-112, MTH 131-132 and either a) one semester of a computer course approved by the department; or b) a statistics course approved by the department.
B.A. degree candidates who do not place out of MTH 101 must take MTH 101 or MTH 107 during their first year. In addition, all B.A. degree candidates must take one of the following MTH courses: MTH 103, MTH 108, MTH 109, MTH 111, or MTH 131.

**AREAS OF KNOWLEDGE**

*A) People and Society (Social Sciences): 12 credits*

All students must earn twelve credits in the following social science disciplines: Africana Studies, American Studies (AMS only), Anthropology (except APY 203), Classics (CLA 301, 302, 303 and 304), Economics, Geography and Regional Studies (except GEG 120), History, International Studies, Judaic Studies (JUS ), Political Science, Psychology, Sociology, and Women’s Studies (WGS only). No more than six credits may be earned in any one discipline.

One approved First Year Seminar course may be taken for the Social Sciences requirement.

*B) Arts and Humanities: 12 credits*

Students must earn twelve credits in the three areas listed below. At least three credits must be earned in each area.

Fine Arts: courses in the departments of Art and Art History, Dance (DAN 250 only), Musicology, Music Theory (MTC 125 only), and Theatre Arts (THA 101 only) count toward this requirement.

Literature: literature courses in the departments of English (200-level and higher), Modern Languages and Literatures (300-level and higher) and Classics (CLA 220, CLA 310, CLA 311 and CLA 370) count toward this requirement.

Philosophy and Religious Studies: courses in the departments of Philosophy and Religious Studies count toward this requirement.

One approved First Year Seminar course may be taken for the Arts and Humanities requirement.

*C) Natural World (Natural Science)*

Bachelor of Arts in Marine Affairs: 9 credits
Bachelor of Science in Marine and Atmospheric Science: 4-8 credits

B.A. degree candidates must earn nine credits in two of the following disciplines: Biology, Chemistry, Ecosystem Science and Policy, Geological Sciences, Marine Sciences, Physical Sciences, and Physics. APY 203 and/or GEG 120 may also be taken for this requirement.

B.S. degree candidates minoring in one of the subjects approved as a B.S. major must earn 4 credits, and those minoring in other subjects must earn 8 credits, in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credits must be taken in a department other than the major or the minor, and must be earned in courses that count toward a major in that department.

[Marine and Atmospheric Science Course Listing](#)
INTRODUCTION

The University of Miami Frost School of Music awards the Bachelor of Music degree with majors in nine areas: Composition, Performance, Music Education, Music Engineering Technology, Music Business and Entertainment Industries, Musical Theatre, Music Therapy, Studio Music and Jazz, and Bachelor of Science in Music Engineering.

The Bachelor of Arts in music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and prelegal. A minor outside the Frost School of Music is required. A second major outside the School of Music can sometimes be pursued.

The Master of Music is offered with majors in Music Education, Music Therapy, Theory, Composition, Performance (voice, piano, conducting, harp, woodwind, multi-woodwinds, brass, percussion, and stringed instruments), Musicology, Accompanying and Chamber Music, Jazz Performance, Jazz Pedagogy, Music Business and Entertainment Industries, Studio Jazz Writing, Media Writing and Production. Music Engineering Technology is offered by the School of Music as a Master of Science Degree.

The Doctor of Philosophy degree in Music Education and the Doctor of Musical Arts degree also are offered. Refer to the appropriate section of the Graduate Bulletin for policies concerning admission, course of study, residence, research, tool requirements, examinations, candidacy, and dissertation/final project requirements.

MISSION

As one of the most comprehensive music units in American higher education, and as a free-standing school within a major research university, the Frost School of Music perpetuates a historic commitment to the values inherent in the juxtaposition of professional and general studies in undergraduate curricula. The comprehensiveness of the School’s undergraduate and graduate programs manifests a philosophy that places importance upon establishing and maintaining connections between its instructional and associated activities and the broad spectrum of music and music-related fields for which it seeks to prepare its students.

In broadest terms, the four-fold mission of the Frost School of Music is to provide a high quality music education and training for its undergraduate and graduate majors; foster advancements in music performance, creativity, scholarship, and teaching among its faculty; serve the general student population of the University; and act as an educational and cultural resource for the University, South Florida, and as appropriate, for national and international constituencies.

ACCREDITATION

The Frost School of Music has been a member of the National Association of Schools of Music since 1939. The requirements for entrance and for graduation as set forth in this Bulletin are in accordance with the published regulations of this Association.
**GOALS**

The primary goals are:

1. to provide music majors with a high quality pre-professional education,

2. to provide opportunities for other University students to increase their musical skill, understanding, and appreciation,

3. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and

4. to serve as an educational and cultural resource for the University, South Florida, and global communities.

**PHYSICAL FACILITIES**

Henry Fillmore Band Hall (1958) has a rehearsal hall, uniform and instrument storage, the band library, offices, and the Henry Fillmore Museum.

Nancy Greene Hall (1960) contains a rehearsal hall, studio-offices, and ensemble library.

The Percussion Building (1968) is the percussion teaching studio and office.

The Bertha Foster Memorial Music Building (1960, with second story addition completed in 1970), contains practice rooms and teaching studios, pipe organ studio, an electronic music laboratory, and two studios equipped for audio and video recording.

The Gusman Concert Hall (1975) houses the administrative offices, data processing center, and the Music Engineering Technology center. The 600 seat sound chamber is one of the finest concert facilities in the Southeast.

The L. Austin Weeks Center for Recording and Performance (1994) contains the 150 seat Victor E. Clarke Recital Hall, featuring adjustable acoustics, a pre-function area, a green room, and a state-of-the-art recording studio. The recording area of the building features 48-track digital recording capabilities with a computer automated console, and a multimedia workstation.

The Marta and Austin Weeks Music Library and Technology Center (2005) contains a 15,300 square-foot library which houses collections of books, scores, recordings, special collections, reference works, and computer facilities. The 5,200 square-foot advanced technology center contains six labs, each servicing a specific program for higher-level work, including a music engineering lab, two keyboard/computer labs, a multimedia instruction and learning lab, an electronic and computer music lab, and a media-writing and production lab.

**PERFORMING ENSEMBLES**

Through regular rehearsals and public concerts, ensembles provide performing experience for all students on the University of Miami campus. Membership in each of these performing ensembles is based on auditions. Students interested in instrumental music may participate in any of the following:
Accompanying
Avant Garde Ensemble
“Band of the Hour” Marching Band
Brass Chamber Music
Brass Choir
Clarinet Choir
Classical Guitar Ensemble
Concert Jazz Band
Contemporary Music Ensemble
E.C.M. Ensemble
Electronic Music Ensemble
Flute Choir
Funk/Fusion Ensemble
Horace Silver Ensemble
Jazz Bass Ensemble
Jazz Guitar Ensemble
Jazz Keyboard Ensemble
Jazz Saxophone Ensemble
Mallet Ensemble
Marimba Ensemble
Monk/Mingus Ensemble
Percussion Ensemble
Rock Ensemble
Salsa Ensemble
Saxophone Ensemble
Small Jazz Ensembles
String-Keyboard Chamber Music
Studio Jazz Band
Studio Rhythm Section
Symphonic Winds
Symphony Orchestra
Synthesizer Ensemble
The Other Music Ensemble
Trombone Choir
Tuba Ensemble
University Band
Wind Ensemble
Woodwind Chamber Music
XJazz Band
Choral experience may be gained through participation in the

Chamber Singers
Civic Chorale
Collegium Musicum
Jazz Vocal I-III
Men’s Chorale
Musical Theatre Workshop
Opera Theater
University Chorale
Women’s Chorale

PUBLIC PERFORMANCES

During the academic year the Frost School of Music presents more than 300 student forums, student and faculty recitals, concerts, lectures, master classes, and guest artist recitals. Student ensembles and faculty present numerous master classes, recitals, and concerts throughout the United States and abroad.

Students are encouraged to attend recitals, concerts, master classes, and festivals which are presented within the Frost School of Music as well as throughout metropolitan Miami.

PROFESSIONAL SOCIETIES

In addition to other extra-curricular activities of the University, the Frost School of Music has established on its campus active chapters of Phi Mu Alpha Sinfonia, Sigma Alpha Iota, Music Educators National Conference (student), American Musicological Society, Tau Beta Sigma, Pi Kappa Lambda, International Association of Jazz Educators, Music Entertainment Industry Student Association, and the Audio Engineering Society.

SCHOOL OF MUSIC SCHOLARSHIPS

The Frost School of Music grants scholarships based on music performance. All domestic students seeking scholarship funds are encouraged to complete a Free Application for Federal Student Aid and/or other required forms. Please consult with the Office of Financial Assistance Services for further information.

SPECIAL PROGRAMS

Workshops and clinics are offered to enrich the musical knowledge of in-service teachers and professional musicians during the academic year. The program of activities continues through the summer when special workshops and seminars are offered. Opportunities for pre-college students are provided in all areas of music and dance throughout the year.

MUSIC FOR NON-DEGREE STUDENTS

Certain music courses are available to students not enrolled in a music degree program. Pre-college students, matriculating University of Miami students, and interested community adults may enroll in these courses. Students who are not currently enrolled at the University of Miami but who wish to pursue courses will need to apply as a special student through the Frost School of Music Office of Admission.
Non-music majors wishing to enroll in performance study are required to audition and may, with the permission of the appropriate faculty member and the undergraduate or graduate dean, register for one or two credits a semester upon payment of tuition and an applied music fee of $200.00 per credit. Performance study by non-music majors is subject to teacher availability.

**ACADEMIC POLICIES**

**REQUIREMENTS FOR ADMISSION**

**ADMISSION TO THE FROST SCHOOL OF MUSIC**

Students admitted to the Frost School of Music must successfully complete a dual admission process. In addition to the general requirements for admission to the University, the undergraduate student must meet the following requirements of the Frost School of Music:

1. Submit a Frost School of Music Application directly to the Frost School of Music Admission Office.

2. Submit an Application for Undergraduate Study directly to the University Office of Undergraduate Admission.

3. Demonstrate performance proficiency by auditioning on campus, at designated regional audition centers, or by recording. The audition will be evaluated by appropriate faculty committees.

4. After being admitted to the University each student will be required to participate in placement auditions and exams in theory and applied music (performance). These examinations will be given just immediately to registration in the fall.

5. Transfer students who are admitted to the University will receive a tentative evaluation of their previous work from the office of Admission. Validation of credits in music will be based on the results of auditions and placement examinations discussed above. The Assistant Dean for Undergraduate Studies of the Frost School of Music determines which transferred courses will meet specific requirements for graduation.

6. Admission is granted in Fall semesters only.

Students who are admitted to the Frost School of Music must begin a program of specialized requirements in music during their first semester.

**ADMISSION TO THE UNIVERSITY (UNDERGRADUATE STUDENTS)**

Application forms and bulletins for undergraduate students may be secured from the University of Miami web site at [www.miami.edu](http://www.miami.edu). The University Office of Admission receives and processes all undergraduate applications, evaluates credentials, and mails letters of acceptance to applicants who qualify for entrance. Because of the University’s selective admissions policy and limited enrollment only those applicants are accepted who present evidence of intellectual promise, unusual talent and potential, and strong personal qualifications. Admission as a transfer student requires a 3.0 grade point average from the previous institution. Admission to the University in all cases is determined by the University Office of Admission and the Frost School of Music.
Prospective students should make formal application for admission in the fall of the senior year in high school. The Frost School of Music does not participate in the Early Decision or Early Action program.

**PLACEMENT TESTS**

Upon entering the Frost School of Music, students must demonstrate through placement auditions college-level performance on their instrument and in music theory. Results of placement tests will enable music advisors to assist students in selecting the appropriate program and level of study.

**ENGLISH and MATHEMATICS REQUIREMENTS**

Students requiring English 105, English 106, or Mathematics 101 must enroll for these classes during the first year in residence and are not permitted to drop.

**AUDIT**

Due to the nature of music courses, it is not possible for a student to audit courses offered in the Frost School of Music.

**PERFORMANCE STUDY**

**CATALOG DESCRIPTION**

The study of a musical instrument privately or in a small group. Prerequisite: Audition.

**PERFORMANCE MAJOR**

A Performance Major aspires to a professional career in music performance.

**PRINCIPAL INSTRUMENT**

Non-Performance Majors study a principal instrument to develop their music performance skills to the fullest extent possible.

**PERFORMANCE INSTRUCTION**

The letter designations A through R classify the levels of undergraduate and graduate performance instruction. The letters A through H signify undergraduate study; letters I through L, master’s study; and letters M through R, doctoral study. Transfer students enroll in Level A for the first semester and are placed at an appropriate classification level of study based on the results of the Jury at the end of each semester.

**CREDIT FOR LESSONS**

The number of credit hours awarded for performance study is determined by the student’s curriculum. Students enrolled for two or more credits of performance study are required to perform a Jury at the end of each semester.

**JURY**

The purpose of the Jury is to evaluate student musicianship and technique progress. Students enrolled for 2 to 4 credits of private lessons are required to play a Jury before a panel of performance faculty at the end of each semester. Juries are held during Reading Days. Students perform technical requirements and repertoire as assigned by their performance study teacher.
The private teacher prepares a Jury Sheet that lists the repertoire covered during the semester and the studio grade, for each student. Following a student performance, the grades of the Jury Panel are averaged. The final grade is comprised of the grade given by the teacher (65%) and the grade of the Jury Panel (35%). The grade is recorded on the Jury Sheet and placed in the student’s file. The final grade can be lowered as a result of poor recital attendance or other requirements specific to the student’s program of study.

**PERFORMANCE WARNING, PROBATION AND DISMISSAL**

The following applies to all majors and programs in the Frost School of Music:

Students earning a grade of C+ or lower in performance study will be placed on Performance Warning for one semester. A subsequent grade of C+ or lower in performance study will result in Performance Probation for one semester. Following Probation, an additional grade of C+ or lower in performance study will result in dismissal from the Frost School of Music.

**Students Who Fail to Successfully Complete a Music Course**

Students who fail to successfully complete a music course after the second enrollment will be dismissed from the Frost School. Courses may not be dropped during the second enrollment.

**SUMMER LESSONS**

During each of the five-week summer sessions, students may register for one credit of performance study and receive a one-hour lesson per week. Summer lessons do not fulfill degree requirements.

**SPECIAL FEES**

Students studying a secondary instrument beyond the required four semesters of secondary piano will be assessed a per-credit fee and must have the approval of the undergraduate dean and program director or department chair. Students who require an accompanist may be assessed an accompanying fee.

**REQUIREMENTS FOR GRADUATION**

The general requirements for graduation from the University of Miami are described in the General Information section of this Bulletin. These general requirements are included in the specific listing of requirements for various majors under the appropriate department in the Frost School of Music. Outlines of achievement levels in applied music for each major are available in the Office of the Dean of the Frost School of Music. The student should consult regularly with his/her advisor and download their Academic Credit Evaluations which track all courses taken to see that all requirements for his/her particular area of concentration degree requirements are being met. Changes or deviations from the printed requirements must be approved in writing by the Dean.

**WRITING COURSES**

Frost School of Music students are expected to complete five writing-intensive courses in addition to English 105 and 106. Courses designated to meet this requirement are identified in the semester course schedule.
Courses satisfying this requirement are those which involve a substantial amount of writing. The preparation of papers in these courses are corrected for diction, syntax, style, and content.

Non Music or Free Electives

Non – Music or Free Electives may be chosen from any courses offered by the University except ESS courses numbered below 140.

MINORS

MUSIC MINOR

Any student wishing to declare a minor in music must audition on an instrument and register with the Frost School of Music as a minor. A fee is assessed for private instruction. Please note that a minor in certain instruments may not be available. Minors are not available in Jazz Instruments or Jazz Voice. Availability on other instruments and voice varies from year to year depending on studio space.

A minor in music consists of 20 credits:
- Music theory (MTC) 111, 112, 121, 122: 6 Credits
- Music literature (MCY) 132, and 3 credit MCY elective: 6 Credits
- Music performance (Instrument/Voice, 4 semesters of 1 credit lessons): 4 Credits
- Ensembles: 2 Credits
- Music Electives: 2 Credits

HONORS

See general Honors program described elsewhere in Bulletin.
UNDERGRADUATE ACADEMIC PROGRAMS

DANCE – Dept. Code: DAN

There is currently no Undergraduate degree for Dance.

MINOR IN DANCE

A minor in dance is intended for students interested in developing basic teaching skills for elementary and secondary dance education. Prospective students interested in this minor are required to audition for acceptance as well as maintain a grade point average of 3.0 in dance courses. 20 credits are required.

Orientation to Dance (DAN 130) This course is a prerequisite for all students who are interested in the minor in Dance 2 credits
Advanced studio technique (DAN 311 or 411 and DAN 321 or DAN 421) 6 credits
Dance education and history (DAN 385 or DAN 585 and DAN 450 or DAN 550) 6 credits
Dance education electives (DAN 285, 286, 290 and 335) 6 credits
Studio Electives (DAN 111, DAN 190, DAN 121, DAN 140, DAN 211, DAN 221, DAN 235, DAN 240, DAN 340) 4 credits

Dance courses are open to all university students with the approval of their advisor. For further information, contact the Dance coordinator.

Dance Course Listing
PERFORMANCE

INTRODUCTION

The mission of the Bachelor of Music Degree is to (1) provide the highest quality of education possible in the areas of musicianship that will provide the foundation for graduate degree work which will lead toward a professional performance career as a classical artist; (2) to provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research (3) to provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

EDUCATIONAL OBJECTIVES

- Students will develop musicianship skills and technique adequate for acceptance into graduate study for fostering a professional career as a solo classical performer.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble adequate for acceptance into graduate study leading towards a professional career as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for acceptance into graduate study for fostering a professional career as a solo classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.

Vocal Performance Course Listing
MUSICAL THEATRE

INTRODUCTION

The mission of the Bachelor of Music Degree in Musical Theatre is to (1) provide the highest quality of education possible in the areas of singing, acting and dancing that will foster a professional performance career in musical theatre; (2) provide performance opportunities that integrate the skills learned in music and theatre classes and to foster creativity and research; (3) assist the Jerry Herman Ring Theatre productions by providing musical direction, rehearsal pianists, conductors and instrumentals; and (4) provide the skills for managing the non-performance aspects of a professional career.

EDUCATIONAL OBJECTIVES

- Students will develop as a singer with musicianship skills adequate for beginning a professional career in musical theatre.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop the techniques of acting and script analysis that are adequate for beginning a professional career in musical theatre.
- Students will develop the ability to self-direct and acting performance for both musical and non-musical theatre.
- Students will develop skills for dancing in dancing and movement classes that are adequate for beginning a professional career in musical theatre.

DEGREE PROGRAMS

Bachelor of Music Degree in Musical Theatre

MAJOR

Musical Theatre (MTR)

The Musical Theatre - Conservatory degree is interdisciplinary in nature with emphasis in both music and theatre and requires four years to complete from the time a student enters the program.

+ MVP 105 Prerequisite (Must pass with grade of C or above)
INTRODUCTION

A basic premise of the program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical foundation of music education methodology. We believe the instructional program should prepare students for teaching all areas of the instructional specialization (e.g. choral, general, instrumental music) while at the same time allowing them to develop a specialization in a given area of music teaching. We believe the basic theoretical foundations in our series of music education techniques and methods courses should be carefully coordinated and that all of these courses should emphasize sequencing of instruction in terms of student's musical development. This sequence should incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners.

Program Goals:
- Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.
- Enable students to apply the musical and instructional skills developed in the program (and reinforced during field experience and the student internship) to the teaching of music in elementary, middle, and senior high schools. Prepare students to plan and sequence music instruction at all levels.
- Help students to develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.
- Help students develop skills in integrating information from the diverse professional literature into their teaching.

EDUCATIONAL OBJECTIVES

- Students must demonstrate generic competencies required by the University, including 27 credits in general education.
- Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida, including 24 credits in Teaching and Learning (TAL) and Student Teaching (MED).
- Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree, including 66 credits in music.
- Students must demonstrate teaching competencies related to the core courses in the music education specialization, including 21-22 credits in Music Education.

DEGREE PROGRAMS

Bachelor of Music

MAJOR
Music Education (MED)
Music Education with Jazz Emphasis Instrumental (MEDJI)
Music Education with Jazz Emphasis Vocal (MEDJV)
The Music Education curriculum is designed to prepare students to teach music in public and private schools at both the elementary and secondary grade levels. All Music Education majors must perform at a high level either vocally or on an instrument. Students must successfully complete the Florida General Knowledge Examination (FGKE) to be admitted to teacher candidacy and the Florida Teacher Certification Examination (FCTE) to graduate.

Instrumental majors must develop knowledge of and performance ability on wind, string, and percussion instruments sufficient to teach beginning students. All choral and general music majors must develop adequate vocal skills to assure effective use of the voice in teaching.

Admission to and/or retention in the music education curriculum leading to Florida Teacher Certification requires that students be formally screened with respect to specific criteria. Following are the Requirements for Admission to Teacher Candidacy and for Admission to Associate Teaching:

**Admission to Teacher Candidacy**
1. Acceptance as a major in the music education program.
2. Satisfactory performance on the FGKE and the FCTE.
3. Completion of 55 semester hours of credit. (Transfer students must have at least 12 semester hours of credit earned at the University of Miami.)
4. A 2.5 GPA in TAL and MED courses.
6. Required Background Check completed.

**Admission to Associate Teaching**
1. Two recommendations from faculty members familiar with academic proficiency.
2. Completion of 90 semester hours of credit.
3. Completion of at least three-fourths of the courses in the teaching major, verified by advisor.
4. Completion of and a C- or better in the following prerequisite courses: TAL 103, 304, 305, 480, 506, MED 240, 241, 242, 243, 245, 430, 542, 543, 544, 549, and for instrumental emphasis, MED 244, 340 choral emphasis, MVP 250 string emphasis, MIP 549
5. Completion of pre-internship field experiences with above-average evaluations.

MUSIC THERAPY - Dept Code MTY

INTRODUCTION

The music therapy program provides students with the opportunity to develop comprehensive musicianship as well as clinical knowledge and skills within a rich musical, scholarly and communicative environment. Music therapy majors must demonstrate musical proficiency, either vocally or instrumentally, and must acquire musical competency on guitar, piano, voice and percussion.

Graduates of this program are prepared for careers as professional music therapists in a variety of health care and educational settings. Furthermore, graduates are eligible to take the Board Certification Exam in music therapy, leading to the credential, Music Therapist Board Certified (MT-BC). The music therapy curriculum is approved by the American Music Therapy Association, and is based on the clinical and research paradigm known as Neurologic Music Therapy.

To remain in the music therapy program, students must maintain a minimum GPA of 2.5. Additionally, music therapy core courses must be completed with a grade of C or higher.

EDUCATIONAL OBJECTIVES

The music therapy program is designed to address three primary objectives:

- Comprehensive musicianship: through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.

- Knowledge of human behavior: by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.

- Knowledge of Music Therapy: students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context. Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through six consecutive semesters of clinical practica in addition to a six-month, full-time clinical internship.
DEGREE PROGRAMS

Bachelor of Music in Music Therapy

MAJOR

Music Therapy (MTY)
Music Therapy & Music Education Double Major (MTY/MED)

The purpose of the program in Music Therapy is to prepare individuals for careers as professional music therapists in a variety of health care and educational settings. All Music Therapy majors must demonstrate acceptable musical skills, either vocally or on a traditional symphonic instrument. In addition, students must demonstrate musical competency in the following areas: guitar, piano, voice, and percussion.

The Music Therapy curriculum is approved by the American Music Therapy Association. Graduates are eligible to sit for the Music Therapy Board Certification Exam, leading to the credential, Music Therapist Board Certified (MT-BC).

To remain in the Music Therapy program, students must maintain a minimum of 2.5 GPA. Additionally, music therapy core courses must be completed with a grade of C or better.

**FIFTH YEAR**

**NOTE:** It is recommended that students plan to take general education courses in the summer. This will reduce the academic load during the regular school year.

Minimum 2.5 GPA must be maintained in music education core courses.

A grade of C or above is required in all music therapy core courses.

# Must pass with a grade of C- or above.

* Must pass with a grade of C or above.

** Required if math placement is MTH 101 or lower.

In order to apply for graduate studies in music therapy, students must complete either a bachelor’s degree in music therapy or a music therapy equivalency program.

**THE MUSIC THERAPY EQUIVALENCY PROGRAM**

The equivalency program is designed for the individual who has already completed a bachelor’s degree in a related discipline, including the following courses:

Music Theory I, II, III and IV; Music History I and II; Conducting, Arranging, Applied Lessons (6 semesters), Performing Ensembles (8 semesters), Piano Competency (4 semesters of either lessons or group piano) and Introduction to Psychology.

Beyond these courses, the program consists of 50 credit hours that can be completed in two years, followed by a six-month clinical internship. Please contact the Music Therapy Program Director for a listing of the 50 credit hours.

If any of the prerequisite courses have not yet been completed, they can be taken at the University of Miami. Taking these additional courses, however, may lengthen the amount of time required to complete the equivalency program. In certain situations, alternate courses from other universities can substitute for the required courses. Depending on the nature of the course, this decision will be made by the undergraduate dean, in consultation with the Music Therapy Program Director.
In order to determine exactly how many credits are required to complete the equivalency program, the student should obtain official transcripts for their previous degree and meet with the music therapy program director. Following completion of the course and internship, students are then eligible to sit for the music therapy board certification exam and can become professional members of the American Music Therapy Association (AMTA).

For students wishing to pursue graduate studies in music therapy, the equivalency program can be combined with the master’s degree in music therapy.

[Music Education and Music Therapy Course Listing]
MUSIC MEDIA AND INDUSTRY - Dept. Code: MMI

The Department of Music Media and Industry includes two programs, Music Engineering Technology and Music Business and Entertainment Industries.

INTRODUCTION

The Bachelor of Music in Music Business and Entertainment Industries is a professional degree program designed to prepare qualified musicians for careers in the business management, financial, legal, and artistic areas of the music industry. Music, business, and music business courses are combined in an interdisciplinary curriculum which includes a minor in Marketing, Legal Studies, Business Administration, Management, Finance, Computer Information Systems, Public Relations, or other approved business-related area. The MBEI program also features a capstone music or entertainment industry internship.

EDUCATIONAL OBJECTIVES

- Students will have a conceptual understanding of the structures and inter-relationships of the music and entertainment industries.
- Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
- Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
- Students will know how to promote and sell a music industry product.
- Students will have an understanding of the performing artist as a major economic factor in the marketplace.
- Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

DEGREE PROGRAMS

Bachelor of Music

MAJORS

Music Business & Entertainment Industries (MBEI)
Music Business & Entertainment Industries with Entrepreneurship and Management Emphasis (MBEM)
Music Business & Entertainment Industries with Entrepreneurship and Management Emphasis and a minor in Creative American Music (MBEC)

MINORS

MINOR IN MUSIC BUSINESS AND ENTERTAINMENT INDUSTRIES (MBEI) (No audition required)

A minor in Music Business and Entertainment Industries consists of 12 credits:
- Entertainment Industry Survey (MMI 178) 3 Credits
- 9 Additional Credits in Music Business

MINOR IN CREATIVE AMERICAN MUSIC (CAM)
(See below under The Bruce Hornsby Creative American Music Program)
MUSIC BUSINESS AND ENTERTAINMENT INDUSTRIES (MBEI)

The objective of the Music Business and Entertainment Industries program is to prepare interested and qualified students for positions in all areas of the music industry. The program is interdisciplinary in nature; emphasis is placed upon courses in music, business, and music business and carries a built-in business-related minor.

THE BRUCE HORNSBY CREATIVE AMERICAN MUSIC PROGRAM

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a Minor in Creative American Music.

THE CONTEMPORARY PERFORMANCE PRINCIPAL

Recognizing the fact that many talented songwriters do not always have a background in traditional performance areas, the Frost School has created a new category of principal instrument to accommodate Creative American Music students who are not classical or jazz musicians. Contemporary Guitar, Voice, Bass, Keyboard, and Percussion (Drums) principals can choose to major in Music Business and Entertainment Industries, Media Writing and Production, Music Engineering Technology, Music Education, and Music Therapy. The Contemporary Performance Principal is exclusively for students in the Creative American Music Program and requires auditions in songwriting and performance.
MUSIC BUSINESS ENTREPRENEURSHIP MANAGEMENT EMPHASIS with Double Minor in Creative American Music and Business Administration (MBEC)

This curriculum is for Contemporary Performance principals. It combines the Music Business Entrepreneurship Management emphasis with the Creative American Music minor and is designed to prepare aspiring performing songwriters for a variety of entrepreneurial opportunities. The curriculum is interdisciplinary in nature; emphasis is placed upon courses in music, business, and music business and carries a built-in Minor in Business Administration.

**NOTE:** To remain in the Music Business and Entertainment Industries program, students must maintain a minimum 2.70 G.P.A.

* Must pass with grade of C or above.

** If not initially placed in MTH 103, prerequisites must be taken as required.

*** Contemporary Performance is available in Guitar, Bass, Drums, Keyboards, and Voice by audition only upon acceptance into the Creative American Music Program.
MUSIC ENGINEERING TECHNOLOGY

INTRODUCTION

The mission of the Music Engineering Technology program is to (1) provide the highest quality education in the field of music engineering; (2) promote advancements in the fidelity and creativity of music recording, production and reproduction; and (3) promote advancements in the invention, design and implementation of audio hardware and software. The goals of the Music Engineering Technology program are to (1) further enhance the program's national and international stature; (2) obtain teaching infrastructure and resources needed to provide contemporary education in the field of music engineering technology; (3) ensure that curricular offerings are current and able to educate students in new and future theory and practice; and (4) to help graduates find professional career positions.

EDUCATIONAL OBJECTIVES

- Understanding the theoretical basis of sound recording, processing and reproduction.
- Understanding the practice techniques used in sound recording, processing and reproduction.
- Designing and implementing original audio hardware and/or software.
- Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

DEGREE PROGRAMS

Bachelor of Music in Music Engineering Technology (MUE)
Bachelor of Science in Music Engineering Technology (MEC)

MAJORS

Music Engineering (MUE)
Music Engineering with Double Major in Computer Science (MEC)

The Music Engineering Technology curriculum is designed for musicians interested in pursuing a career in music recording, audio hardware and software design, and related professions in the audio, audio-video, multimedia, and internet industries. The program is interdisciplinary in nature; it includes courses in music, music engineering, computer science, electrical engineering, and mathematics. This program includes a minor in Electrical Engineering or a double major in Computer Science. Freshman students are expected to enroll in calculus, which carries a prerequisite of Trigonometry and Analytical Geometry. Prospective students are expected to have a strong background in music performance and in mathematics.

**Note:** A minimum 2.70 GPA is required to remain in the Music Engineering Technology program. A grade of C- or better is required in all CSC courses. The overall GPA for CSC courses must be 2.5 or better.

* Must pass with a grade of C or above
** Approved courses at 400 level or higher which contain substantial technical/creative content. Some examples include:

- MMI 504 Audio Analysis & Synthesis
- MMI 505 Advanced Audio Signal Processing
- MMI 416 Orchestration
- MMI 504 Audio Analysis & Synthesis
- MMI 465 Internship in Music Engineering
- CMP 594 Motion Picture – Sound Design/Sound Theory

# For Electrical Engineering, take EEN 306
# For Computer Engineering, take EEN 318 or EEN 424
# For dual minor in electrical engineering and computer engineering, take EEN 306 and (EEN 318 or EEN 424)

BACHELOR OF ARTS IN MUSIC

INTRODUCTION

The mission of the Bachelor of Arts in Music is to provide students with the highest quality education possible in music, provide a broad education in the liberal arts, and provide in-depth study in an academic area outside of the Frost School of Music.

EDUCATIONAL OBJECTIVES

- Students will acquire a thorough knowledge of music theory and music history, and develop advanced competence in musical performance.
- They will develop the ability to think, speak, and write clearly with the capacity to explain and defend their views effectively and rationally based on substantive knowledge of the liberal arts.
- The student will acquire competency in a selected non-music academic area that includes a broad understanding of the area and contemporary thought within the area.

DEGREE PROGRAMS

Bachelor of Arts in Music

MAJOR

Bachelor of Arts in Music (BAM)

The Bachelor of Arts in music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and prelegal. A minor outside the Frost School of Music is required.

MUSIC THEORY-COMPOSITION - Dept. Code: MTC

INTRODUCTION

The Bachelor of Music in Composition is designed to (1) provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition, production, and performance; (2) to provide student access varied composition communities; (3) to continue to build upon the Frost School of Music’s reputation as an innovative, forward-thinking, and first-rate center for advanced study; and (4) to maintain the highest educational, professional, and ethical standards. Goals of the program are (1) to provide students with training to be fluent in basic compositional skills; (2) to help students understand various directions that available to composers in the 21st century; and (3) to help students perform, produce, or realize their music.

The Commercial Music & Production track within the Theory & Composition curriculum is designed to prepare undergraduate students for the many issues facing today’s commercial music writers and producers. In this specialized program, successful students complete diverse compositional assignments, develop technical and practical skills in the recording studio, and acquire an understanding of the music industry. Prospective students should furnish evidence of outstanding compositional ability as well as basic sequencing and music notation skills.

EDUCATIONAL OBJECTIVES

- Students develop basic compositional skills of varying lengths and genres.
- Students compose or produce works utilizing various compositional techniques and styles.
- Students compose works for varied instrumentation and/or media.

DEGREE PROGRAMS

Bachelor of Music in Composition

MAJOR

Music Theory and Composition (MTC)
Media Writing & Production (MWP)

MINOR

MINOR IN MUSIC COMPOSITION

A minor in music composition is primarily intended for students in the Frost School of Music who are pursuing majors in other fields within the Frost School. Students interested in this
minor are required to submit a portfolio to the chairman of the department for approval before declaring the minor. The minor consists of 15 credits.

Composition I (MTC 101) 2 credits
Composition II (MTC 102) 2 credits
Composition III (MTC 201) 2 credits
Composition IV (MTC 202) 2 credits
Composition Workshop (MTC 182) 4 credits
Orchestration (MTC 416) or Twentieth Century Techniques (MTC 312) 3 credits

The curriculum in Composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Theory or Composition. Prospective students are expected to furnish evidence of compositional ability.

[Music Theory - Composition Course Listing](#)
STUDIO MUSIC AND JAZZ - Dept. Code: MSJ

INTRODUCTION

The mission of the Studio Music and Jazz Performance Program is to: (1) prepare jazz instrumentalists to enter the music profession or graduate school; (2) identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career; (3) foster faculty creativity and performance which serves as a role model for students; (4) develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities; (5) produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast; and (6) provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

EDUCATIONAL OBJECTIVES

- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

DEGREE PROGRAMS

Bachelor of Music in Studio Music & Jazz

MAJOR

Studio Music & Jazz Instrumental (MSJI)
Studio Music & Jazz Vocal (MSJV)
Double Major Studio Music & Jazz Instrumental with Instrumental Performance

MINOR
MINOR IN STUDIO MUSIC AND JAZZ (INSTRUMENTAL)
A 12 credit minor is available for students enrolled in the Frost School of Music whose principal performance medium is a jazz instrument. Permission of studio teacher required. The following courses must be taken to fulfill the requirement of this minor:

Analysis and Evolution of Jazz Styles (MSJ 113) 3 credits
Introduction to Jazz Improvisation (MSJ 124) 3 credits
Jazz Improvisation Theory I (MSJ 371) 3 credits
Advanced Modern Arranging I (MSJ 519) 3 credits

**INSTRUMENTAL EMPHASIS**
The instrumental curriculum in Studio Music and Jazz is designed for interested and qualified students who desire to continue to develop to the highest degree their background and skills in the performance of studio music and jazz. Admission to this major pre-supposes musical training in jazz on the principal instrument.

VOCAL EMPHASIS

The vocal curriculum in Studio Music and Jazz is designed for interested and qualified vocalists who desire to continue to develop to the highest degree their backgrounds and skills in the performance of studio music (recording), jazz, and contemporary pop music. Admission to this major pre-supposes music training in jazz.

[Studio Music and Jazz Course Listing](#)
SCHOOL OF NURSING AND HEALTH STUDIES – UNDERGRADUATE NURSING

Please consult your 2009-10 Student Handbook for the applicable curriculum and progression policies.

The University of Miami School of Nursing and Health Studies (SONHS) offers courses leading to the degrees of Bachelor of Science in Nursing (BSN), Master of Science in Nursing (MSN), Doctor of Nursing Practice (DNP) and Doctor of Philosophy (PhD). Baccalaureate education is the primary foundation for professional nursing, as well as for graduate education; students who successfully complete the baccalaureate program are eligible to sit for the licensure examination to practice professional nursing. Graduates of diploma and associate nursing degree programs are admitted as transfer students to get their BSN degree. Students that hold a baccalaureate degree in other fields and would like to pursue their BSN in Nursing are admitted in the Accelerated Program.

The School of Nursing and Health Studies is committed to academic excellence, the advancement of nursing as a discipline, and service to society. Opportunities are available for students to study and earn course credit in a variety of international settings.

MISSION

The mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in the art and science of nursing and health studies through creating and disseminating health knowledge and developing culturally competent leaders to provide service to our community, the nation, and the world.

ACCREDITATION

The nursing baccalaureate program is approved by the Florida Board of Nursing and accredited by the Commission of Collegiate Nursing Education (CCNE), One DuPont Circle NW, Suite 530, Washington, DC 20036, (202) 887-6791.

FACILITIES:

The School of Nursing and Health Studies is located on the Coral Gables Campus. The four-story Jerusalem-stone and stucco Schwartz Center features classrooms and clinical practice labs, seminar and conference rooms, two computer labs, and a simulation academy, all equipped with the latest technology. The spacious 53,000-square-foot facility supports the work of more than 40 nurse scientists and clinical educators and our 500 undergraduate and graduate students enrolled in the school’s nursing and health science programs annually. The building opened in fall 2006. Library resources for nursing students are at the Otto G. Richter Library on the Coral Gables Campus and the Calder Medical Library on the Medical Center Campus. Clinical experiences are offered in a variety of hospitals and health related agencies in the community.
ACADEMIC POLICIES

ADMISSION:

Admission to the BSN Program is open to individuals who have demonstrated that they have the intellectual ability and the personal qualifications necessary for the profession of nursing. All applicants must meet the requirements for admission to the University of Miami; requests for admission should be directed to the Office of Admissions on the Coral Gables Campus.

Transfer students from accredited universities, colleges, or junior colleges may be admitted with advanced standing as space allows provided they have completed courses comparable to those required by the University of Miami. Transfer students are advised to contact the office of Student Services at School of Nursing and Health Studies concerning prerequisites.

An RN transition option is offered which allows Associate degree diplomas and Prepared RNs to earn the BSN Degree. Academic transcripts are evaluated to determine that the 60 credits of transferable course work has been successfully completed.

REQUIREMENTS FOR ENROLLMENT INTO CLINICAL COURSES:

To be eligible to enroll, a student must have achieved junior standing with an overall grade point average of no less than 3.0

Transfer students must have a minimum cumulative GPA of 3.3 and a prerequisite GPA of 3.00.

Accelerated Option students must have a minimum GPA of 3.0 with a 3.00 for prerequisite courses.

To be considered for progression or admission to clinical coursework, students are allowed to repeat only 1 prerequisite course.

Requirements for enrollment into nursing courses:

Students are required to have a health examination prior to enrollment in clinical nursing courses. All students must provide evidence of a current TB screening test, hepatitis B vaccination, MMR vaccination, tetanus vaccination, polio vaccination, and certification in Basic Life Support. Students must submit to drug screening and background checks. See the School of Nursing and Health Studies Student Handbook 2008-2009 for further information on these or other requirements.

**ACADEMIC PROGRESS:**

To be assured of uninterrupted progression through the program, students must maintain a grade point average of 2.0 or better.

Student records are reviewed at the close of each semester, and those students with a cumulative average of less than 2.0 are subject to being placed on academic probation according to the University of Miami Policy on Academic Probation and Dismissal. A grade of C- is not an acceptable passing grade on any nursing course within the BSN program. When a clinical nursing course is repeated both theoretical and clinical components must be repeated. When a course must be repeated the progression in the nursing program will be altered in order for prerequisites to be met. Such alteration will in all likelihood lengthen the time required to complete the nursing program. Students will be required to fulfill the requirements that are in effect at the time of the current program. No special courses will be created for students that are repeating the same course.

Students are allowed to repeat only one failed nursing course. Failure of the same course again or any other nursing course will be grounds for dismissal from SONHS.

**REGISTERED NURSE LICENSURE:**

Graduates of the BSN program are eligible to take the National Council Licensure Examination (NCLEX) registered nursing licensure examination after the student passes all the courses, completes the credit hours and completes the requirements for the HESI exit exam.

**STUDENTS WITH DISABILITY ACCOMMODATION POLICY:**

It is the policy of the University of Miami School of Nursing and Health Studies to adhere to Standards of the Americans with Disabilities Act. Any students needing special accommodations to complete a course must submit written documentation to the Office of Disability Services (ODS). This office is the primary source responsible for the coordination of auxiliary aids and services for students with disabilities. Information and/or services are available to prospective and enrolled students, their parents and/or sponsors.

**FINANCIAL ASSISTANCE:**

Students interested in obtaining financial aid in the form of student loans and grants should contact the Office of Financial Assistance Services. Limited scholarships are available.
through the School of Nursing and Health Studies. The qualifications for these scholarships vary; further information is available from the School of Nursing and Health Studies, Student Services Office, and in the SONHS website (www.miami.edu/sonhs).

REQUIREMENTS FOR GRADUATION

1. STUDENT RESPONSIBILITIES:

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student's responsibility to understand fully, and comply with all the provisions of the Bulletin. Changes to academic requirements and policies are transmitted by written notice to the School of Nursing and Health Studies Undergraduate Handbook.

The general requirements for graduation from the University of Miami are further described in the GENERAL INFORMATION section of the Bulletin.

General Education Requirements

AREAS OF PROFICIENCY
Proficiency requirements are intended to ensure that students either already possess, or will develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

1. English Composition 6 credits

English 105 and English 106 or the equivalent

2. Writing Across the Curriculum (W) 5 courses
In addition to English 105/106, students must complete five (5) courses designated as Writing Across the Curriculum (W) courses. Courses designated as writing courses ("W" courses) require a substantial amount of writing and the preparation of papers that are corrected for diction, syntax, style, and content. Some courses satisfying this Writing Across the Curriculum requirement may simultaneously fulfill Areas of Knowledge requirements (described below).

3. Mathematics
Students fulfill this requirement by satisfactorily completing a course in mathematics numbered above MTH 101 (excluding MTH 107), or MAS 110, or an approved course in statistics.

AREAS OF KNOWLEDGE
These requirements are designed to help students understand and appreciate the intellectual achievements in major areas of human inquiry and creative endeavor.

1. Natural World (formerly Natural Sciences) - 6 credits
   a. Biology 150/151
   b. Chemistry 103/105

2. People and Society (formerly Social Sciences) - 6 credits
   a. Psychology 110
   b. 3 additional credits
Courses in the following areas may be used to fulfill this requirement: Africana Studies (AAS); American Studies (AMS); Anthropology (except APY 203); Economics (ECO); Education and Psychological Studies (EPS); Geography and Regional Studies (except GEG 120); International Studies (INS); Judaic Studies (JUS); History (HIS); Political Sciences (POL); Psychology (PSY); Sociology (SOC); Teaching and Learning (TAL); Women’s and Gender Studies (WGS), and the following courses: Broadcasting and Broadcast Journalism (CBR 102); Mass Media Communication in Society (COM 101); Communication Theory (COM 110); Interpersonal Communication (COS 112); Nonverbal Communication (COS 118); Political Communication (COS 336); Persuasion (COS 472); Freshman Seminars in the Social Sciences (FSS 190-199).

3. Arts and Humanities - 12 credits

Courses in the following areas may be used to fulfill this requirement: Architecture; Music; Art and Art History; Theatre Arts; Motion Pictures and Photography; English (200-level or above); Modern Languages and Literature (300-level or above); Philosophy; Religious Studies; and the following courses: Public Speaking (COS 211); World History of the Dance (DAN 250); Freshman Seminars in the Arts and Humanities (FLT, FPR 190-199).

**ACADEMIC PROGRAMS:**

**BSN TRADITIONAL**  
**PROGRAM OF STUDY**  
**LOWER DIVISION**  
**NURSING MAJOR**  
(Approved 2008)

These are intended as examples only. Students have several options for completing the first two years of study. The Office of Student Services will assist students to select specific courses which most accurately reflect the student’s interests, abilities, and career goals. Students must complete all prerequisite requirements prior to entering junior year of clinical coursework.

### RN to BSN
#### PROGRAM OF STUDY
(Currently Under Revision)

Nursing Course Listing
SCHOOL OF NURSING AND HEALTH STUDIES - UNDERGRADUATE HEALTH SCIENCE

The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields. Pre-professional tracks include Pre-physical Therapy, Pre-pharmacy, Pre-forensics, Health Science/Business Administration, Pre-physician Assistant and Health Science General.

ACADEMIC POLICIES

ADMISSION:

In accepting students into the Health Science program, the University does not in any way assure admittance into any professional graduate programs. Admission to any of these programs is dependent upon the academic performance in the pre-clinical course-work and is determined independently by the faculty of the school or program involved.

Because of the increasingly sophisticated skills necessary in the health sciences, to be accepted into the program, entering freshmen must have a minimum SAT score of 1100 or an ACT score of 24. Transfer students must have a minimum cumulative grade point average of 3.0 for the pre-physical therapy track or a 2.8 for the other tracks. The program director may drop from, or refuse to accept into, the program any student who falls below these minimum cumulative grade point averages.

REQUIREMENTS FOR ADMITTED STUDENTS:

The Health Science degree requires courses in biology, chemistry and health science with a minimum grade of C- in each course. Students must satisfy both the general degree requirements listed below and the requirements of a specific track, to be awarded the Bachelor of Science in Health Science degree. Students must maintain at least a 2.8 GPA in the courses listed under the track requirements with no grade below a C-.

ACADEMIC PROGRAMS

The Pre-Physical Therapy track is a program developed in conjunction with the Physical Therapy Program of the Department of Orthopaedics and Rehabilitation in the Miller School of Medicine. The School of Nursing and Health Studies will award a Bachelor of Science in Health Science after completion of the requirements listed below.

The Health Science Program also offers curricula that are designed to prepare students for other health professional or graduate education programs. Also available is a pre-pharmacy track for students wishing to attend a graduate pharmacy program, a pre-forensics track for students interested in attending a forensics graduate program, and a program of study for students wishing to enroll in a physician assistant program. Programs of study can also be tailored for students wishing other health occupation options. Students are encouraged to contact graduate programs directly to ascertain if there are specific course requirements that might differ from health science track requirements. Any course requirements may be added to a student’s undergraduate curriculum track.
No minor is offered in Health Science. Health Science students may not minor in biology.

**GENERAL DEGREE REQUIREMENTS:**

1. **English Composition - 3-6 credits**

   Except as indicated below, students must take English 105 and 106 (or its equivalent) during the first year of enrollment. Admission to ENG 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and 106. Such students must fulfill the English Composition requirement within the first three semesters. Students whose placement scores are high may be exempted from ENG 105 but not from ENG 106 or its equivalent.

2. **Mathematics - 4 credits**
   a. MTH 111 or equivalent

3. **Statistics and Computer Programming - 6-7 credits**
   a. MTH 224 or PSY 204 (MAS 201 for Bus. Admin. Track)
   b. EEN 118, IEN 124, CSC or CIS

4. **Arts and Humanities - 12 credits**

   B.S.H.S. degree candidates must earn twelve credits in the three areas listed below. At least three credits must be earned in each area.

   a. Fine Arts: courses in the departments of Art and Art History, Dance (DAN 250 only), Musicology (only the following: either MCY 131 or MCY 132, but not both, MCY 325, MCY 361 and MCY 362), Music Theory (MTC 125 only), and Theatre Arts (THA 101 only) count toward this requirement.

   b. Literature: courses in the departments of English (200-level and higher) and Foreign Languages and Literatures (300-level and higher) count toward this requirement.

   c. Philosophy and Religious Studies: courses in the departments of Philosophy and Religious Studies count toward this requirement.

   d. An additional 3 credits from a, b, or c above or 3 credits in a foreign language other than ones native language. A Freshman Seminar in the Arts and Humanities (FLT, FPR 190-199) may count towards this requirement.

5. **(People and Society) Social Science - 6 credits**

   B.S.H.S. degree candidates must earn six credits in the following social science disciplines: African-American Studies, American Studies, Anthropology (except APY 203), Economics, Geography and Regional Studies (except GEG 120), History, International Studies, a Judaic Studies Social Science course, Political Science, Psychology, Sociology, and Women’s Studies. No more than three credits may be earned in any one discipline.

   A Freshman Seminar in the Social Sciences (FSS 190-199 may count towards this requirement).
6. Writing - 15 credits

May include any of the courses listed above except ENG 105 and ENG 106.

TRACK REQUIREMENTS:

1. Pre-Physical Therapy Track
Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above 100 level.
Health Science 212, 213, 215
Chemistry - two semesters with lab, must include 104/106 or 201/205.
Physics - two semesters with lab.
Psychology 203 or 352
A minor in a discipline accepted by the School of Nursing and Health Studies.

2. Pre-Pharmacy Track
Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above the 100 level.
Health Science 212, 213, 215.
Physics - two semesters with lab.
Economics 211, 212.
Biochemistry and Molecular Biology 401.
Communication 211.
(Transfer students who do not complete the chemistry minor at the University of Miami must choose another minor accepted by the School of Nursing and Health Studies.)

3. Pre-Forensics Track
Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above the 100 level.
Health Science 212, 213, 215, 216, and BIL 251 or BIL 252.
Psychology 110 and 352.
(Transfer students who do not complete the chemistry minor at the University of Miami must choose another minor accepted by the School of Nursing and Health Studies.)

4. Health Science/Business Administration Track
Biology 150/151, 160/161, and 12 credits of electives in biology or health science above the 100 level.
Health Science 212, 213, 215.
Chemistry - two semesters with lab, must include 104/106 or 201/205.
Physics - two semesters with lab.
Business Administration minor including ACC 211, 212, CIS, MAS 201, MGT 304, MKT 301, and FIN 300.

5. Pre-Physicians Assistant Track
Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above the 100 level.
Health Science 212, 213, 215, 216.
Physics - two semesters with lab.
Microbiology 301.
Psychology 110 and 3 additional credits in PSY.
Sociology 101.
Communication 211.
(Transfer students who do not complete the chemistry minor at the University of Miami must choose another minor accepted by the School of Nursing and Health Studies.)

6. Health Science General Track
Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above 100 level.
Health Science 212, 213, 215.
Chemistry - two semesters with lab must include 104/106 or 201/205.
Physics - two semesters with lab.
A minor in a discipline accepted by the School of Nursing and Health Studies.
This program may be modified to meet the needs of various students. See the Program Director for more details.

Health Science Course Listing
THE GRADUATE SCHOOL
www.miami.edu/grad

All graduate work (except for the Masters degree/J.D. in Law, Masters in Business Administration and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various programs in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Admission requirements are described in the Bulletin of the Graduate School, and may be obtained from the individual department or program. Information is also available on the Internet at www.miami.edu/grad.

Application forms are distributed by and processed through the various Schools and Colleges. See www.miami.edu/grad/apply for a listing of online applications by program.

Prospective students should note that “graduate study” means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative, and scholarship of the student. The term must be distinguished from “post-graduation study” which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor’s degree.

To preserve its ideals of scholarship, conduct, and character the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

MISSION

The mission of the Graduate School is to promote graduate education, scholarship, and research; to support individuals, departments, and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the Committee.
ACADEMIC POLICIES

RECENCY OF CREDIT
All work must be completed within four years of the time of admission to graduate work, for those studying for the various master’s degrees; and within six years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master’s degree in field, work must be completed within eight years. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director.

VALIDATION FOR OVER-AGED CREDITS
Graduate credits transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the UM program exceeds ten years. On an individual basis, students may be permitted to validate over-aged credits by examination, with program approval.

REGISTRATION
Graduate students can register on the first day of registration or at any time after. For more information on registration, students should contact their respective School or College. See academic calendar for dates: http://www6.miami.edu/UMH/CDA/UMH_Main/0,1770,2385-1;56961-2;27396-2,00.html

FULL-TIME STUDY
The categories of full-time students include:

1. Graduate students taking eighteen or more graduate credits during the calendar year (nine credits in a regular semester, or 3 credits in a summer session).
2. Graduate teaching and research assistants taking sixteen or more graduate credits during the calendar year (eight credits in regular semester or 3 credits in a summer session).
3. Graduate students enrolled in any course numbered 700 or above, i.e., any 700-level course required for the completion of the degree.
4. All MBA for Executives and Professionals students and Master of Science in Professional Management students are considered full-time.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School.

The maximum number of credits allowed for full-time study is 12 for each semester and three for each summer session. Exception to this policy can only be made by the Dean of the Graduate School or his/her designee and requires a signed recommendation from the Program Director.

Full-time registration is required during the semester or summer session in which a candidate defends the thesis or dissertation.

No full-time faculty member may be a full-time student, whether or not working toward a degree. Nor may a full-time student be a full-time faculty member.

No full-time student will be a principal investigator in any grant or contract, whether in name or fact. And no principal investigator will be a full-time student.
Exceptions to these rules may be made in cases in which students are encouraged to apply individually for small research grants that are consistent with and contribute to their field of study and their dissertation work, and, in certain programs, in which students in a terminal degree status are obliged, as a part of their degree program, to teach as de facto faculty members. (Note: Faculty from School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue Doctoral degrees in their home program/school.)

WITHDRAWALS
Withdrawals, either from individual courses or from a Graduate program, should be processed through the office of the Dean of the School of the student’s program. The date of withdrawal is that on which the student notifies the office of the Dean or the date of receipt of a letter requesting withdrawal. No withdrawal from the University is official until the student has consulted with the Dean of his/her school and has completed the necessary forms. The withdrawal procedure is described in detail at http://www6.miami.edu/UMH/CDA/UMH_Main/0,1770,2385-1;6241-2;6247-3,00.html

Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefits bills must also clear their withdrawal with the main campus Veterans Affairs office in the Whitten University Center, Room 121.

To officially withdraw from the MBA Program or Master of Science in Professional Management program, students must inform the Office of Graduate Business Programs in writing prior to the beginning of a course/term. Tuition will be refunded on a prorated basis based on the number of class meetings attended. No tuition refund will be granted when class attendance has exceeded 50% of class meetings.

LEAVE OF ABSENCE
Leave of absence assumes that no scholarly work in connection with the degree is being carried on by the student. Leave may be obtained by petition of the Program Director followed by the approval of the Dean of the Graduate School. Leave of Absence officially stops the recency of credit clock.

GRADES AND CREDITS
The same letter grades are used for graduate and undergraduate students, but with somewhat different meaning.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent accomplishment</td>
</tr>
<tr>
<td>B</td>
<td>Good accomplishment</td>
</tr>
<tr>
<td>C</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).</td>
</tr>
<tr>
<td>S</td>
<td>Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum, and internship credit. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School.</td>
</tr>
<tr>
<td>D</td>
<td>Poor (not acceptable for credit toward the advanced degree).</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the university. Courses dropped after last date must have approval of Dean of graduate school. Credit can be earned only by successful repetition of the course.</td>
</tr>
</tbody>
</table>
**I** | Incomplete work in passing status with the instructor’s permission to complete the course. (Not to be used for thesis or dissertation credits). The “I” should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student’s primary school or college and the Dean of the Graduate School approve the delay. If the “I” is not changed within one year, credit can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of “I”s on a student’s transcript).

**IP** | Denotes in progress grade given by instructor for any course (500G, 600, or 700 level) in which a student has made *expected or clearly satisfactory* progress during the semester, but has yet fully to complete requirements for the course. “IP” is to be given for 700-level internships, research, thesis, and dissertation courses that have not been completed. Upon satisfaction of all Graduate School requirements, the Dissertation Coordinator of the Graduate School will issue final credit for all master’s thesis and doctoral dissertation courses (*e.g.*, 710, 720, 730, 735, 740 and 750). Zero-credit courses (*e.g.*, 720 and 750) will be changed to S. Please note that all “IP”s must be converted to “S”, letter grade, or “I” at graduation. “IP” will also be converted to “I” upon any departure from the University for a period in excess of one year.

**NG** | Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student’s grade. For a student to receive credit for the course, the instructor must report a passing grade prior to the student’s graduation.

* Faculty Senate Legislation #85005(B)

An average of B (3.0) is required for a graduate degree, and no “D” credit may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded “D”.

No transferred credits are calculated into the University of Miami G.P.A.

**AWARD OF ACADEMIC MERIT**

Students who obtain a 3.8 GPA or better will receive an Award of Academic Merit from the Graduate School. The Award is mailed to the student’s home address after conferral of the degree.

**Quality points are awarded as follows:**

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>0.00</td>
</tr>
<tr>
<td>D</td>
<td>0.00</td>
</tr>
<tr>
<td>E</td>
<td>0.00</td>
</tr>
</tbody>
</table>

The quality point average is then determined by dividing the total of quality points earned by the total of credits attempted. The symbols “S”, “W”, and “I” are not counted as credit attempted.
REPEAT RULE
A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a “C-” or higher, the number of credits required for graduation will be increased by the number of credits repeated.

Registrations which involve repeating a course in which a grade of “A” or “B” has already been earned may not earn quality points or credit hours, nor count as credits attempted.

LEVELS OF GRADUATE STUDY
Graduate study implies the need for a minimum of formal courses and a maximum of independent work under faculty supervision. Coursework, in itself, is not necessarily a determinant of graduate progress and achievement. The appropriate determinants are the ability of the qualified student to master the various qualifying and comprehensive examinations that a program requires of the student. All work taken by a graduate student in the major area or area of concentration shall be at the graduate level (500 or above).

With the permission of the major department or program of major concentration a student may take elective credits (not prerequisite to the major) at any level provided the following limits are observed:

<table>
<thead>
<tr>
<th>TOTAL GRADUATE COURSE CREDITS</th>
<th>MAXIMUM COURSE CREDITS BELOW 500 LEVEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>24-30</td>
<td>3</td>
</tr>
<tr>
<td>31 or above</td>
<td>6</td>
</tr>
</tbody>
</table>

Approval for undergraduate credits as part of the graduate degree program can be made only after a minimum of 12 credits is completed. Award may not be made retroactively, nor are credits accepted from another institution.

RA, TA, GA Hourly Guidelines
Graduate students with appointments as RAs, TAs or GAs will have work assignments limited to 20-hours per week with the exception of efforts directly required for dissertation research.

International students may work on campus provided the student is maintaining F1 status and does not work more than a total of 20 hours per week (including any off campus work the student may have been authorized to perform) while school is in session. Questions regarding work for international students should be directed to International Student and Scholar Services: [http://www6.miami.edu/international-student](http://www6.miami.edu/international-student).

Graduate students with Assistantships and Fellowships will be classified with the following designations. *(FE) Fellows, *(RA) Research Assistant, *(TA) Teaching Assistant, *(GA) Graduate Assistant, *(TR) Trainee. *Please contact the Graduate School for specific codes.
Definitions:

FE (Fellow): Responsibilities do not include the provision of direct services to the University and require internal/external fellowship support.

RA (Research Assistant): Responsibilities are mainly conducting research and/or assisting with research projects.

TA (Teaching Assistant): Responsibilities are mainly teaching and/or assisting in the area of teaching.

GA (Graduate Assistant): Responsibilities are mainly in professional support of University operations and programs. Graduate students should not be hired to perform clerical duties.

TR (Trainee): Designated as such by specific federal guidelines which indicate a complex process wherein the trainee takes on an increasingly independent role in the selection, conceptualization, and execution of research projects under the supervision of an experienced mentor.

In definitions where the word “mainly” is used, “mainly” is defined as greater than 50%.

Requirements for Teaching Assistants

1. Graduate teaching assistants who are the instructors of record and responsible for assigning grades in a course must have a master’s in the teaching discipline or 18 graduate credit hours in the discipline.
2. Graduate teaching assistants must be directly supervised by a faculty member in the teaching discipline, must attend regular in-service training provided by the Instructional Advancement Center (in coordination with the Graduate School or provided by the specific graduate program), and must be reviewed by the supervising faculty member once a semester.
3. Graduate Teaching Assistants who have previous teaching experience and indication of competency may be exempted from TA Training by the Dean of the Graduate School in consultation with the Graduate Program Director in the discipline. A request for waiver must be submitted to the Dean of the Graduate School by the Graduate Program Director.

POLICY ON OUTSIDE EMPLOYMENT FOR RA/TA/GA
A graduate student must have prior approval from the chair or advisor to work outside the department, since such activities might impede progress toward his/her degree. Any question or concern should be discussed with the Dean of the Graduate School.

1. A graduate student is allowed to supplement his/her stipend by tutoring undergraduate students in courses in which he/she has no direct responsibility at the time.
2. A graduate student who is teaching a class or lab of a multi-section course using a common syllabus and common exams may not tutor any student in any section of that course.
3. A graduate student, like any other member of the teaching faculty, may offer review sessions for his or her students to which he or she may invite students from other sections of the same course. The graduate student arranging such sessions may not under any circumstances take money from the students in attendance.
4. A graduate student may use his or her office for tutoring or may ask
departmental permission to use a classroom or other appropriate university
facility.
5. The graduate advisor or department chair may require a graduate student to limit
his or her outside employment or tutoring activity if, in the view of the
department, such activity is impeding the graduate student’s academic progress
or keeping him or her from fulfilling responsibilities within the department.
6. International students should clear their work instructions with International
Student and Scholar Services.

GRADUATION
It is the responsibility of the student to apply for graduation through MyUM during the
student’s final semester before the date indicated on the Graduate School calendar and the
Schedule of Classes. These dates are published at
http://www6.miami.edu/UMH/CDA/UMH_Main/0,1770,2385-1;2326-2,00.html. Students
who previously applied for a diploma but did not receive the degree must repeat the
application procedure. Deadlines for the commencement program are firm. Students may
walk in the graduation ceremony, but the program will indicate “in progress” if information
is missing. Students will be degree candidates until they have been cleared by the Graduate
School.

Graduation ceremonies are held in May and December only. Those completing degree
requirements during the Fall, Spring or Summer sessions may, if they wish, participate in
the graduation ceremonies of the previous or following May or December. Students
receiving a Ph.D., D.M.A., D.N.P, D.P.T, or Ed.D. degree that are participating in the
hooding ceremony and all masters marching in the graduation ceremony must have the
approval of the graduate advisor, director, or appropriate person in the department/school
to participate in the ceremonies.

Participation in graduation for students in all graduate programs is contingent upon the
following:

1. The student must have met the requirements for their program.
2. The student must have a minimum of 3.00 cumulative grade point average;
3. The student (doctoral only) must be admitted to candidacy one semester prior to
   graduation;
4. The student may not have any outstanding debt including, but not limited to, tuition,
   fines, and fees. Tuition for the last semester of study must be paid in full by the
   beginning of the final semester.
5. The student must complete an electronic thesis or dissertation (ETD) according to
   the Graduate School’s requirements and submit all hard copies, paperwork, and fees
   (if required) by the last day of exams in the semester the student wishes to
   graduate. It is recommended that students begin the ETD process early in the
   semester by discussing with their advisors a suitable timetable for completing the
   defense of their thesis or dissertation two weeks before the last day of classes in the
   semester they wish to graduate. The Graduate School also encourages students to
   familiarize themselves with the ETD process at
   http://etd.library.miami.edu/students.html or contact the Dissertation Editor early in
   the semester at grad.dissertation@miami.edu if they have questions regarding any
   aspect of the ETD process. (See dissertation section of the Ph.D. description.)
CLEARANCE FOR DEGREE CONFERRAL
For the Graduate School to clear a student for graduation:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one semester before graduation.
3. The student must defend his/her thesis or dissertation no later than two weeks before the last day of class in the semester he/she wishes to graduate.
4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the semester he/she wishes to graduate for their clearance to be processed in time.

CLASS ATTENDANCE AND ABSENCES
Regular and punctual class attendance is expected of all graduate students. It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.

V.A. students will be provided a grade report at the end of each semester period. A copy of the report will be placed in the student’s permanent file maintained by the Veteran Affairs Office. Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.

STUDENT RESPONSIBILITY
Standards of study and conduct in the Graduate School are set and maintained, not by fiat of the Graduate School, but rather by the faculty who determine the standards. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School devolves responsibility upon the student and the appointed committee. Within this broad responsibility the recommendation for the degree rests with the committee.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various departments in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements at the time specified.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

It is the responsibility of the student to be informed concerning all regulations and procedures required. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that he/she was not informed of it by an advisor or other authority. The student should become familiar with the Bulletin, including

1. The section presenting the requirements for the degree to be undertaken;
2. The offerings and requirements of the major department.
3. The Graduate Student Honor Code.
After the applicant has been admitted to the Graduate School but before the first registration, the student should consult the school or college and program in which the major work will be done concerning course requirements, deficiencies, if any, the planning of a program, special regulations, etc. Programs may have additional degree requirements that are not listed in this Bulletin. All registrations require the signature of the dean of the school or college (or his/her representative) in which the degree is to be awarded.

Only the Council of the Graduate School may waive requirements stated in this Bulletin.

GRADUATE STUDENT CODE OF ETHICS
Graduate students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the students program and/or the Graduate School through the process described in the Graduate Student Honor Code. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The Honor Code can be reviewed at http://www6.miami.edu/dean-student/honor-code/.

GRADUATE SCHOOL GRIEVANCE GUIDELINES

INTRODUCTION
These University of Miami Graduate Grievance Procedures provides an opportunity for the resolution of disputes involving graduate students in a fair and collegial manner. These Graduate Student Grievance Procedures supersede all prior such procedures in effect or formerly utilized at the graduate level. They do not supplant UM Students Rights & Responsibilities or any other published policy or procedure relating to graduate students.

PURVIEW OF THE GUIDELINES
The formal grievance process described herein is intended for cases not involving grades or matters covered by the Honor Code, which have not been resolved at the department or program level, and it is available only after a final determination within the relevant School or College has been reached. Students are encouraged to seek assistance from the University Ombudsperson for possible resolution before initiating the formal graduate grievance process. The procedures set forth here are applicable to any of the following types of grievances by graduate students who are enrolled in any graduate program at the University of Miami, except exclusively in the MD and JD programs:
1. grievances alleging improper dismissal or suspension from a graduate program;
2. grievances alleging the improper withholding or termination of financial support of any kind;
3. grievances alleging any other improper treatment, either substantive or procedural, of a graduate student by a faculty member, department or program, or university agency or administrator except:
a. allegations of improper evaluation of the quality and/or quantity of academic work (see UM Student Rights & Responsibilities);

b. allegations of unfair recommendation for employment or further graduate study;

c. allegations of discriminatory treatment arising from the student complainant’s age, race, gender, sexual preference, handicap, national origin, or religion. (Such allegations ordinarily are handled by the Office of Equality Administration);

CONSTITUTION OF THE COMMITTEE AND GRIEVANCE PANEL

The Graduate Council Grievance Committee (GCGC) is a standing committee comprised of the Schools’ and Colleges’ alternate representatives to the Graduate Council. Grievances as understood herein shall be heard by ad hoc appeals panels, constituted from time to time by the Dean of the Graduate School to review individual graduate grievances. The grievance review panel (GRP) shall consist of five disinterested members: four faculty members of the GCGC and one graduate student appointed by the executive board of the Graduate Students’ Association. Notice of the constitution of the GRP shall be given by the Office of the Graduate Dean in writing to all parties to the grievance within ten (10) days after the grievance review request is properly filed.

Any party to the grievance may challenge the disinterestedness of a GRP member in writing to the Dean of the Graduate School within five (5) days after notification of the appointment. The challenge must specify reasons that would prevent the committee member or graduate student from making an unbiased recommendation with respect to the grievance. If such a challenge is determined to be valid by the Graduate Dean, a substitute appointment shall be made and the process will resume accordingly.

PROCEDURE AND TIME LIMITS FOR FILING A GRIEVANCE

After a final determination has been made in the relevant School or College (or by the head of the relevant administrative office in the event of a grievance against a university agency), a student who believes he or she has grounds for appeal within the purview of these guidelines may file a written grievance review request with the Office of the Dean of the Graduate School. The request shall describe the student’s allegations in a clear and concise fashion and shall clearly identify the individual(s), program(s), department, School or College, and/or University agency or administrator against whom the grievance is brought. The student’s written grievance review request shall be filed within thirty (30) days of the final determination. No grievance review request nor any other appeal of any kind will be granted after this time limit has expired unless a written extension of time is granted by the Dean of the Graduate School based on a written request from the grievant stating good cause.

DEFINITIONS AND ASSUMPTIONS

Burden of Persuasion: The burden of persuasion is on the grievant.

Final Determination: This grievance process is available only after a final determination within the relevant School or College has been reached. This provision is intended to require the grievant to exhaust the remedies available within the relevant School or College before appealing to the Graduate Dean. In the case of a student in an interdisciplinary program who does not yet have a chair and/or committee assembled, the Dean of the Graduate School shall make a final determination in the student’s case subject thereafter to the appeal contemplated by this policy. Appeal from the Graduate School Dean’s decision follows this same procedure, except that the GRP shall be constituted by the Office of the Provost from the pool of GCGC members. Written notice of the constitution of the GRP in the case of a student in an interdisciplinary program without a chair or committee, shall be given by the Office of the Provost to all parties to the grievance within ten (10) days after
the grievance review request is properly filed. All other deadlines, requirements, procedures, and the hearing format remain the same.

Originals: Wherever possible, the party in possession of an original document in support of or rebuttal to or at issue in the grievance shall provide it to the GRP within the time frames set out in the Hearing Materials and Preparation Deadlines. If a party has only a copy of a document not received by him, her, or it, the copy shall serve as an original. Digital documents or email messages in contention shall be printed and may then serve as originals.

Party: A party is the student grievant or the individual, program, department, School or College, or University agency or administrator against whom the student brings his or her grievance.

Time Limits: All time limits shall be calculated based on working days of the Fall and Spring Semesters, excluding reading and exam periods and University holidays. Grievances originally filed after the end of the Spring semester will be heard at the beginning of the following Fall Semester. Any stated time limit herein may be extended with the written consent of the grievant and the Dean of the Graduate School.

Written: Any document to which these guidelines refer as written signifies paper (hard) copy. Email messages and digital or other electronic versions do not meet the requirement that a form or notice be provided in writing. However, a party may transmit a digital version of any written document by email in addition to providing it in paper form.

DEADLINES FOR HEARING MATERIALS, PREPARATION, AND WITNESS IDENTIFICATION
All materials to be considered for review by the members of the GRP must be submitted in writing to the Office of the Dean of the Graduate School at least fourteen (14) days before the scheduled date of the hearing, at which time such materials will be distributed to all parties to the grievance and to the members of the GRP. Thereafter, to the extent that any of the parties wishes to have additional materials considered by the GRP, such materials must be received by the Graduate School no later than seven (7) days before the scheduled date of the hearing, at which time all such additional written materials will be distributed to the parties as well as to the members of the GRP. Any party submitting written materials for consideration shall submit the original(s) and five (5) copies thereof to the Office of the Graduate Dean at his, her, or its own expense.

The name of any witness to be called by any party at the hearing shall be provided in writing to the Office of the Graduate Dean no less than five (5) days before the scheduled date of the hearing.

HEARING
The grievance review hearing is chaired by a designated member of the GRP. The hearing is staffed by the non-voting Administrative Assistant of the Dean of the Graduate School, who will record it for archival purposes only. The hearing will proceed as follows:

a. GRP chair’s introduction, summary of issues, and process overview.
b. Student’s presentation of issues (15 minutes maximum).
c. University representative’s presentation of issues (15 minutes maximum).
d. Optional: Presentation(s) by witnesses (limited to 3 per side and a maximum of 15 minutes total per side).
e. Questions by members of the GRP.
f. All presenters and witnesses are excused.
g. Deliberation by GRP.

Presentation of the issues should be concise and relevant. Undoubtedly the dispute is somewhat complex or it would not have reached this stage. Points of dispute or ambiguity may be summarized or illustrated by anecdote at the hearing. Experience suggests, however, that the best approach is to minimize formal presentations and allow the GRP members maximum time for questions.

**GRP DECISION AND AUTHORITY**
No additional substantive information may be submitted by any party following the hearing, unless requested by the grievance review panel. The GRP may but need not seek additional information from other sources during its deliberations, which will be conducted in closed session. Following its deliberations, and within ten (10) days of the date of the grievance review hearing, the GRP will make its confidential advisory recommendation to the Dean of the Graduate School [Office of the Provost in the event of a student in an interdisciplinary program who does not yet have a chair or committee]. The subsequent decision by the Dean of the Graduate School [Office of the Provost], which shall be rendered within ten (10) days of the GRP’s recommendation, is final.

Note: The above guidelines pertain only to matters which do not involve representation by an attorney. If an attorney is involved in the grievance, the Office of Legal Counsel at the University should be contacted.

**MODIFICATIONS**
These procedures may be modified or withdrawn with or without notice.
ADMISSION

ELIGIBILITY FOR ADMISSION
In addition to holding the baccalaureate degree from an institution accredited by a regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). Foreign students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score. University of Miami faculty members above the rank of instructor are not eligible to apply for the doctorate at the University of Miami. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue doctoral degrees in their home program/school.)

For specific admission requirements see also statements of the various programs.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

All those wishing to take courses for graduate credit, whether or not they wish to become candidates for a degree, must make application for admission directly to the program of interest prior to registration.

REQUIREMENTS FOR ADMISSION APPLICATION

1. The completed online application form
2. Official transcripts of all college work, both undergraduate and graduate
3. The official score report of the appropriate entrance examination
4. Letters of recommendation sent directly to the graduate program director of the academic program.

<table>
<thead>
<tr>
<th>GRE</th>
<th>All applicants must submit recent (within five years) Graduate Record Examination (GRE) scores which include 1) the aptitude portion; and 2) the most relevant advanced test in the major field if required by the program.</th>
</tr>
</thead>
<tbody>
<tr>
<td>GMAT</td>
<td>Applicants for the Master or Ph.D. of Business Administration, the Master of Professional Accounting, the Master of Science in Management Science (Operations Research/Applied Statistics), or Taxation must submit the Graduate Management Admissions Test (GMAT) scores</td>
</tr>
<tr>
<td>TOEFL/IELTS</td>
<td>International applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) and the Graduate Record Examination</td>
</tr>
</tbody>
</table>
5. Other requirements as may be required/requested by individual programs. Contact the specific program to which you are applying for their requirements, or for exemptions from the entrance examination.

6. Application fee
7. All materials and the fee should be sent directly to the School or academic department as indicated on the application.

*Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.*

**CATEGORIES OF ADMISSION**

1. **Regular** admission with or without specified deficiencies. Under circumstances in which it is difficult to evaluate the academic background of intellectually qualified applicants, they may be admitted with specified deficiencies. Such status is often appropriate for foreign students. Only one semester or one summer session of study in deficiency status is permitted and the student who fails to qualify at the end of that time will be requested to withdraw from the Graduate School.

2. **Post Baccalaureate.** This category provides an opportunity for graduate study for:
   a. qualified applicants who, for good reason, do not wish to work toward an advanced degree. This would be appropriate for those students who have special objectives for professional study or scholarly work;
   b. students enrolled in a graduate program elsewhere but desiring to earn graduate credit at the University of Miami for the purpose of transferring it to the other institution;
   c. students already holding the master’s degree or doctorate but who desire additional coursework in their field.

Those admitted to a post-baccalaureate status should realize that their future admission to regular status is improbable unless they achieve the qualifications originally appropriate to admission to those categories. This is to say that the mere accumulation of graduate course credits is not sufficient to permit entrance into another graduate category. No more than a total of twelve (12) credit hours may be taken while in post-baccalaureate status.

Transient students described in (b) above should have sent to the Graduate School a letter from the Dean of the graduate school at which they expect to earn a degree, stating that they are in good standing there and have permission to transfer credit. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and graduate degree [to be sent directly by the issuing institution to the Graduate School].

3. **Certification/Professional Goals.** This category provides an opportunity for graduate study for qualified teachers or professionals who do not wish to work toward an advanced degree but who for professional reasons need to continue to take graduate courses and have already taken 12 credits in Post-Baccalaureate Status. No credit taken in this status can be applied toward a graduate degree at the University. A letter explaining the need for the course work by the student’s employer must accompany the application.

Every applicant for admission can be assured that all credentials will be carefully studied in an effort to select appropriately qualified students. Each application for admission is examined by the members of the faculty responsible for the graduate program. The program informs each applicant of the results.
It is expected that most applicants for admission will be candidates for an advanced degree. Except under unusual circumstances those who already hold an advanced degree are not admitted to candidacy for the same degree. Graduate programs vary as to whether students who do not hold the Master’s degree are required to initiate graduate studies at that level. The faculties in some fields wish their students to do this, and in other fields accept students directly into a Ph.D. program.

Applicants should note the following:
1. M.B.A. applicants should send applications and all documents to the Office of Graduate Business Programs in the School of Business Administration; P.O. Box 248505, Coral Gables, FL 33124;
2. all other correspondence, applications and documents should be sent directly to the academic department;
3. no action is taken until a file is complete and all documents are available;
4. application files should be complete at least one month before registration, much earlier for some applications, as specified elsewhere in this Bulletin;
5. admission to graduate status does not imply admission to candidacy for a degree;
6. some departments close admissions early because of limited capacity;
7. materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant.

International Students Admissions
All international students who have been admitted to a program of full-time study at the University of Miami need to enter the U.S. on a student visa. In order to apply for the F-1 student visa at a U.S. embassy or consulate, the student is required to complete and submit the Form I-20 issued by International Admissions. For specific questions regarding I-20 issuance, please contact Nancy Ortiz, Sr. Associate Director, International Admission (nortiz@miami.edu).

FOR UNIVERSITY OF MIAMI UNDERGRADUATES ONLY
Senior-Graduate Status. University of Miami undergraduates within 30 credits of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree senior-graduate status, and in this status may take and receive credit for graduate courses, while completing the requirement for the baccalaureate.

Admission to Senior-Graduate Status requires:

1. Must have a minimum of 3.000 GPA. the submission of a special form (which can be obtained at the Graduate School) which will not require the application fee;
2. the written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the special form.

Admission to Senior-Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credits earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.
No more than six (6) hours credit may be taken in one semester, and no more than a total of twelve (12) hours credit may be taken while in Senior-Graduate Status. Students may take no more than 13 credits of combined undergraduate and graduate courses per semester.

Students electing Senior Graduate status must register and be processed centrally at the Office of the Registrar, University Center.

**READMISSION**

Unless a leave of absence has been requested and approved, students who have not been continuously enrolled for sessions must request readmission. Contact the appropriate program office well in advance of registration. If additional college work has been completed elsewhere since the last enrollment at the University of Miami, an official transcript of this will be required. Recency of credit rules will apply.
DEGREE PROGRAMS

The University of Miami offers majors leading to graduate degrees as follows:

- **MASTER OF ARCHITECTURE (M. Arch.)**
- **MASTER OF ARCHITECTURE IN SUBURB AND TOWN DESIGN (M.Arch.S.T.)**
- **MASTER OF ARCHITECTURE IN REAL ESTATE AND URBANISM (MRED&U)**
- **MASTER OF ARTS (M.A.) with concentrations in the following:**
  - Applied Marine Physics
  - Art History
  - Communication
  - Communication Studies
  - Film Studies
  - Television Broadcast
  - Print Journalism
  - Public Relations
  - Spanish Print in Journalism
  - Economics
  - English
  - Geography and Regional Studies
  - History
  - International Administration
  - International Studies
  - Latin American Studies
  - Marine Affairs and Policy
  - Marine Biology and Fisheries
  - Marine Geology and Geophysics
  - Marine and Atmospheric Chemistry
  - Mathematics
  - Meteorology and Physical Oceanography
  - Sociology

- **MASTER OF ARTS IN LIBERAL STUDIES (M.A.L.S.)**
- **Master in Accounting (M.P.Acc.)**
- **MASTER OF BUSINESS ADMINISTRATION (MBA)**
- **MASTER OF SCIENCE IN EDUCATION (M.S.Ed.) with concentrations in the following:**
  - Counseling and Research
  - Early Childhood Special Education
  - Elementary Education
  - Exercise Physiology
  - Higher Education/Enrollment Management
  - Higher Education/Student Life & Development
  - Marriage and Family Therapy
  - Mental Health Counseling
  - Research, Measurement and Evaluation
  - Sport Administration (Focus athletics or recreational sports)
  - Sports Medicine

- **MASTER OF FINE ARTS (M.F.A.) with concentrations in the following:**
  - Art (Studio Work)
  - Painting
  - Sculpture
  - Graphic Design / Multimedia
  - Ceramics / Glass
  - Photography/Digital Imaging
  - Printmaking
  - Creative Writing
  - Motion Pictures
  - Production
  - Producing
  - Screenwriting

- **MASTER OF MUSIC (M.M.) with concentrations in the following:**
  - Accompanying and Chamber Music
  - Choral Conducting
  - Composition
  - Electronic Music
  - Instrumental Conducting
  - Instrumental Performance
  - Jazz Pedagogy
  - Jazz Performance
  - Keyboard Performance and Pedagogy
  - Media Writing and Production
  - Multiple Woodwinds
  - Music Business and Entertainment Industries
  - Piano Performance
  - Music Education
  - Music Theory
  - Music Therapy
  - Musicology
  - Studio Jazz Writing
  - Vocal Performance
• **MASTER OF SCIENCE (M.S.)** with concentrations in the following:

INTERDISCIPLINARY GRADUATE STUDIES - Dept. Code: IDS

The Graduate School is no longer accepting applications for the IDS program. This will not affect current IDS students.
The Master of Arts in International Administration, known as the MAIA program, is an interdisciplinary degree program designed to integrate theory and real-world experiences in international affairs. The degree is awarded by the College of Arts and Sciences.

The MAIA program is designed to provide students with the skills and knowledge needed to advance professionally and to build a solid international career. The degree features advanced study in specialized subject matter with an emphasis on research skills and practical applications. MAIA is a university wide program with the participation of eight departments, five schools and upward of twenty faculty members. The faculty is drawn from the best resources of the University of Miami and from highly skilled professionals from the fields of diplomacy, journalism, law, international business, and other related areas. The program is directed by the assistant provost for university-wide international studies, a professor of International Studies.

For complete information on the faculty and staff of the MAIA program, and for many other details of the program, please visit the MAIA web site www.miami.edu/maia.

**Core Requirements**

Six core courses are required of all MAIA students. Students then complete the degree with three graduate-level electives, which may be chosen from among other UM graduate offerings. Finally, all MAIA students must enroll in and complete a practicum, details of which are described below. The core courses are taught in an integrated fashion, designed to give students the maximum learning experience in an efficient manner. The courses are a mixture of theory and practice, skills and knowledge, geared toward the demands of international professional careers.

In the core courses, students will

1. develop skills in writing, speaking, and numerical and historical analysis;
2. learn how to collect, interpret and report complex social, political, and economic data;
3. increase skills in methods of research, communications skills;
4. master strategic and tactical thinking and negotiation;
5. build practical and theoretical knowledge in international relations, international economics, intercultural communication, and public administration in an international context.

Core courses include

1. International Administration (IGS 612)
2. World Affairs (IGS 614)
3. World Cultures (IGS 613)
4. Organizational Administration (IGS 616)
5. International Economics (IGS 615)
6. International Organizations (IGS 611)

**Practicum in International Administration (IGS 517)**

The purpose of the practicum is to give students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students are expected to complete the practicum during the summer months with a minimum time commitment of at least 200 hours. A final report/case study analysis is required as part of successful completion of the practicum. A fuller guide to the practicum and the...
requirements for the practicum is provided to students during meetings with the practicum advisor.

**Other Requirements for Graduation**

In addition to completing 30 credits at the graduate level, which must include the six required core courses and the practicum course, students must satisfy the following additional program requirements.

The information technology boot camp is an intensive six-day program, which is generally the new student’s introduction to MAIA and is taken just prior to the start of the semester of admission. This boot camp is a special edition of the UM Office Specialist (UMOS), a certification course created by the University of Miami to establish a nationally recognized standard of business computer skills. The MAIA/UMOS boot camp is an intensive, hands-on computer course that trains, tests and certifies all the core skills for Microsoft Windows, Word, Excel, Access, PowerPoint, FrontPage and Outlook.

The accounting and taxation boot camp is a two-day, non-credit workshop that covers key subjects essential to successful budgeting and financial control for NGOs and other not-for-profit companies. It is taught by a professional financial manager and is offered once a year.

MAIA students must demonstrate proficiency in a second language prior to graduation. They are tested by staff and faculty with the Intensive Language Institute of the Division of Continuing and International Education. If students need additional language training after the testing result, they will be recommended to enroll in non-credit language courses to attain the necessary proficiency.

All MAIA students must complete their degree with three graduate level elective courses. Electives must be approved by MAIA directors and students are encouraged to use the electives to create a specialization in an area of study. For example, students may specialize in marine affairs by taking courses at RSMAS, public health by taking courses in the School of Medicine’s MPH program, or public administration by taking courses in the School of Business’ MPA program. Students may also seek elective credits within other disciplines in the College of Arts and Sciences to round out the program. Electives may be taken at Charles University, Prague or at the School of International Relations at the St. Petersburg State University, Russia. (For elective credit conversions please consult International Admissions, 305-284-2271 or admission@miami.edu.

Students must also select an area of regional focus. While enrolling in the program’s six core courses, students would gear final presentations, group projects, and class reports with an emphasis on their chosen region of expertise. Students are then assigned to regional advisors chosen from among UM’s faculty experts in that area or region of the world.

[Interdisciplinary Global Studies (IGS) Course Listing](#)

**Dual Degree Program: MAIA/MPH**

The MAIA program and the School of Medicine’s Department of Epidemiology offer a dual degree sequence leading to the award of both the Master of Arts in International Administration and the Master of Public Health degrees. This sequence is particularly appropriate for individuals seeking careers in the growing field of international public health. A major advantage of this program is that the two offering bodies have agreed to accept a number of courses from each other's programs as partially fulfilling requirements for the two degrees.
UM INTERNATIONAL EDUCATION AND EXCHANGE PROGRAMS -
Dept. Code: SAP

Opportunities for study abroad may be available for some graduate degree programs.
The particular courses must be developed by the student and the program in which the degree is to be earned.

For further information contact: UM International Education and Exchange Programs, PO Box 248005, Coral Gables, FL 33124-1610, (305) 284-3434, e-mail: ieep@miami.edu.

In some programs it is possible to earn graduate credits for study taken abroad. Curriculum must be worked out by the student in conjunction with an advisor.
THE MASTER’S DEGREE - GENERAL

The minimum residence requirement is two semesters in full-time study or the equivalent in part-time work. In practice, most students need at least three semesters, or two semesters plus summer work, to complete degree requirements.

FOREIGN LANGUAGE
The requirements in a foreign language or languages are established by the student’s program. In those cases where the program deems it necessary that the student have competency in a foreign language, the student will be required to demonstrate such competence by examination in one or more languages. The choice of language or languages required will be by the program.

THESIS
Decision as to the thesis subject must be approved by the program. The thesis committee will consist of not less than three members. At least one of these must be a regular member of the Graduate Faculty of the University of Miami, and one must be from outside of the program awarding the degree. The committee is nominated by the Graduate Program Director of the department or program concerned. The duties of the thesis committee are similar to those of the dissertation committee. Thesis Committees cannot be appointed prior to admission to candidacy. The student who presents a thesis must enroll for a total of six hours of thesis credit. Ordinarily no more than six credits may be granted.

When a student has completed coursework, it is recommended that those students in programs requiring a thesis or dissertation make their first appointment with the Dissertation Editor at the Graduate School once their thesis topic has been approved by the major department. The Dissertation Editor will provide information on the guidelines and deadlines that will become critical in the final months of the degree process. The Graduate School office telephone number is (305) 284-4154, the email address is grad.dissertation@miami.edu.

Master’s degree students who are required to write a thesis must defend their thesis by the date specified in the academic calendar and submit a Dissertation Editor-approved hard and electronic copy and paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at http://etd.library.miami.edu/students.html. The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

FINAL EXAMINATION
A final public oral defense of the thesis is required. However, none but the members of the thesis committee may interrogate the candidate. In addition there may be required, if desired by the program, a final written integration examination to test the candidate’s ability to integrate the whole graduate program and the thesis in relation to it. These examinations must be held at least two weeks prior to commencement.
RESEARCH IN RESIDENCE
Once a student has completed all course and required research credits, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. (See Recency of Credit section of the Bulletin.) Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students.

COMPREHENSIVE EXAMINATION
In most programs a comprehensive examination, either written, oral or both, is a requirement. When the thesis is not a part of the program, an examining board, at least one of whose members must be a regular member of the Graduate Faculty, will be appointed by the program. A student failing the comprehensive may be allowed one opportunity to retake it if the students committee so advises. The re-examination may not be taken during the same semester or summer session, and must be taken within one calendar year.

TRANSFER OF CREDIT
Upon recommendation of the major program and the approval of the Graduate School, a maximum of six semester hours of graduate credit, with grades of B or above, may be transferred from another accredited graduate institution, in partial satisfaction of a Masters degree requiring less than 36 semester hours. Nine hours of graduate credit may be approved for transfer to a degree program requiring 36 semester hours or more. Work taken more than ten years prior to transfer will not be accepted. Work taken by extension, correspondence or online is not acceptable. All work transferred is subject to examination by the program. In no case will credit be transferred until the student has completed acceptably an equivalent number of credits at the University of Miami. The satisfaction of the requirements of another university does not relieve the student from the University of Miami’s requirements. An official transcript of work to be transferred must be on file in the Graduate Office. Credits that pertain to or have been counted toward another degree cannot be transferred. Students enrolled in the Master of Business Administration program are not eligible for credit transfers.

Exceptions must be approved by the Dean of the Graduate School.

No transferred credits are calculated into the University of Miami G.P.A.

A SECOND MASTER’S DEGREE
A student enrolled in a University of Miami master’s degree program or holding a University of Miami master’s degree may earn a second master’s degree in a related area at the University by completing a minimum of 21 hours toward the second degree, as long as all program and admission requirements for the degree are met. Each degree must have a separate thesis if two thesis options are elected. The second program decides if the areas are related enough to qualify for the reduced number of credits.
DOCTOR OF PHILOSOPHY

(For Doctor of Musical Arts, D.MA., see music section of bulletin. For Doctor of Physical Therapy, D.PT., see medicine section of bulletin. For Doctor of Nursing Practice, D.N.P., see Nursing & Health Studies section of bulletin, for Ed.D, see School of Education section.)

GENERAL
The Graduate School does not specify course requirements for the Ph.D. However, the Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. Sixty credits beyond the baccalaureate degree are the minimum requirement for the Ph.D., and not less than half of the total credits must be in work open only to graduate students. At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credits must be taken. Graduate students studying for the Ph.D. who have received their master’s degree in the same field must take at least twenty-four (24) hours in residence at the University of Miami in doctoral status.

The specific course requirements for the Ph.D. are established by the major department or program which may require such additional graduate credit as it deems necessary. Such requirements will be found in that part of the Bulletin which lists course offerings.

REGISTRATION
To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted. Doctoral students for whom course work is no longer appropriate and who are engaged on their dissertation should consult the following section.

DISSERTATION
A student must take a minimum of 12 hours of dissertation research except where otherwise stated. Not more than 12 hours of research may be taken in a regular semester, nor more than six in a summer session.

Ph.D., D.M.A., or Lecture Recital degree students must defend their dissertation, or doctoral essay, or lecture recital essay at least two weeks before the last day of classes and submit a Dissertation Editor-approved hard copy and paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at http://etd.library.miami.edu/students.html. The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

Three typewritten, unbound copies of the thesis, in approved form on proper paper (the original and two legible copies), conforming in style to the standards set by the Graduate School, must be deposited with the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each dissertation must be accompanied by two certificates of approval of oral defense of thesis signed by all members of the Committee. Forms should be obtained in the Graduate School Office or downloaded from http://etd.library.miami.edu/students.html.
RESEARCH IN RESIDENCE
Once a student has completed all course and required research credits, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students. (see Recency of Credit section.)

RESIDENCE
The student must spend at least two consecutive semesters beyond the first year’s graduate work, wherever taken, in full-time study at the University of Miami. With program approval, a) one summer of full-time study in sessions I and II can be substituted for one semester of residence, or b) full-time study for two successive summers can be substituted for two regular semesters. Residence requirements may be altered only by the Dean of the Graduate School. (At least 24 credits must be taken in residence.)

THE SUPERVISORY AND DISSERTATION COMMITTEES
A supervisory committee is usually appointed when a student is formally admitted to a doctoral program. The committee must be comprised of at least four members; this includes the committee chair, who shall be a member of the program or department of concentration (this includes secondary appointments), as well as a regular member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from Graduate Faculty, and one from outside the program or department of concentration. A department, program, or school or college may require additional members.

This committee is nominated by the chairperson of the program or department concerned. It is appropriate for the chairperson to consult with the student regarding the membership of the committee. The supervisory committee is empowered to plan the course of study for the student; to determine deficiencies, if any; to set language and other requirements; to request applicable transfer of credit where appropriate and to make up and administer the qualifying examination.

When the student is admitted to candidacy, a dissertation committee is formed. This may be the supervisory committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The dissertation committee is nominated by the department or program concerned, and appointed by the Graduate Program Director and approved by department chair. As with the supervisory committee, it must be comprised of at least four members; this includes the committee chair, who shall be a member of the program or department of concentration, as well as a regular member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from Graduate Faculty and one from outside the program or department of concentration. A department, program, or school or college may require additional members. The duties of the Dissertation Committee are:

1. to consult with and to advise students on their research;
2. to meet, at regular intervals, to review progress and expected results;
3. to read and comment upon the draft dissertation;
4. to meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work a minimum of two weeks prior to the defense.

Three copies of the dissertation in approved form on proper paper and two copies of an abstract of not over 350 words will be handed in to the Graduate School on or before the date specified in the calendar published each session, accompanied by 1 certificate of approval of doctoral dissertation defense. It is the duty of the student to acquire a copy of the guidelines for preparing dissertations from the Graduate School or http://etd.library.miami.edu/students.html and to conform to the requirements therein. All dissertations are published by ProQuest/University Microfilms, Inc.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved to the student’s committee. Changes of committee members must be approved by Graduate Program Director.

QUALIFYING EXAMINATIONS
A written qualifying examination is to be taken by each doctoral degree (Ph.D., D.M.A., D.N.P, D.P.T., Ed.D.) candidate at the time that the student and the Supervisory Committee deem appropriate. The school or major program may specify that its students must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the supervisory committee shall notify the Graduate School and the instructional school or program that the student has passed or failed the examination. A student who fails the examination will be given one opportunity to retake it with the permission of the supervisory committee. Some programs do not administer qualifying examinations during the summer months. Check with the Graduate Program Director for specific program requirements.

ADMISSION TO CANDIDACY
When the student has met all requirements and passed the qualifying examinations, admission to candidacy for the degree is approved. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the defense of dissertation is scheduled.

FINAL EXAMINATION
A final public oral defense of the dissertation is required. However, only the members of the dissertation committee may interrogate the candidate. In addition there may be required, if desired by the program, a final written integration examination to test the candidate’s ability to integrate the whole graduate program and the dissertation in relation to it. See academic calendar for deadlines regarding dissertation defense.

TRANSFER OF CREDIT
Transfer of graduate credit from another institution will not be made until the student has completed a like amount of credit at the University of Miami, and the transfer has been approved by the supervisory committee and the Dean of the Graduate School. Credit transferred is subject to the same recency rules as all other credit counted toward the degree, and is also subject to examination by the program. An official transcript of work to be transferred must be on file in the Graduate School. Credits that pertain to or have been counted toward another degree cannot be transferred.
Florida International University and University of Miami agreement for Ph.D. Courses
Effective as of Fall 2007, students may take up to six credits at the host institution as long as the following requirements are met:

1. Approval from both home and host institution;
2. Approval of Graduate School Deans;
3. Space at the host institution is available.

Tuition and fees are to be paid at the home institution. Performance level is set at host institution. Contact the Graduate School for more information.
The School of Architecture at the University of Miami offers both a professional and a post-professional Master of Architecture degree.

The School is a member of the Association of Collegiate Schools of Architecture.

The School of Architecture’s location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals.

Students have the opportunity to work with the faculty in the exploration of theoretical issues as well as in the resolution of practical problems.

The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

The school’s resources, including an accredited undergraduate program in architecture and a state-of-the-art computer laboratory, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

All students admitted full time to the Master of Architecture program may be eligible for partial tuition scholarships and/or graduate assistantships, based on academic record.

Scholarships may vary in amounts and are intended to assist the recipient pursue studies as required by the program. Scholarships will be awarded on a competitive basis. Graduate assistantships require service in the form of teaching, research assistance, or other appropriate educational activities as designated by the director of the graduate program.

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.
ADMISSION REQUIREMENTS

Applications are for the fall semester only. Applications completed by February 1st will be given the highest priority. Admission to the graduate program is subject to the rules, regulations and procedures of the Graduate School as stipulated in the University Graduate Bulletin. It is the responsibility of each student to understand these requirements and to ensure that they are met.

The minimum requirements for application to the Master of Architecture Degree program are:
1. 3.0 cumulative grade point average.
2. 1000 cumulative Graduate Record Examination score on verbal and quantitative sections / 550 TOEFL score for international applicants and/or those whose native language is not English.
3. For Master of Architecture: Suburb and Town Design; Master of Architecture: Research - a Professional Degree in Architecture (Bachelor of Architecture or Master of Architecture).

RESOURCES

The school’s resources, including a state-of-the-art computer laboratory, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for graduate architecture students include: the Historic Preservation Certificate, the Suburb and Town Design, the BSAE/MARCH and the BARCH/MBA.

DEGREE PROGRAMS

MASTER OF ARCHITECTURE: PROFESSIONAL DEGREE

The Master of Architecture is designed for college graduates seeking a first professional degree in architecture. It consists of the following two tracks:

3.5-year Track: A 3.5-year program for students holding undergraduate degrees in non-design fields. Completion of 105 credit hours required.

Advanced Standing Track: A program for students holding a previous non-professional degree in architecture or a closely related field. Completion of 51-60 credit hours required.

Masters degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, compromise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.
MASTER OF ARCHITECTURE: POST PROFESSIONAL DEGREE

The Master of Architecture post-professional program provides an environment for serious inquiry into the nature of architecture.

Post-professional study is available to students holding an accredited degree in architecture who wish to develop a specialization in architectural theory and practice.

Three areas of study offer students the opportunity to investigate specific aspects of architecture and to elaborate their understanding for future teaching, research, publications and professional practice.

Master of Architecture: Suburb and Town Design

This concentration consists of three semesters of directed study to explore in-depth the existing state of suburbs and cities, study precedents and propose design solutions.

The faculty is dedicated to seeking alternatives to modern patterns of urban growth.

The Miami metropolitan area provides a laboratory for the identification of urban problems and for the exploration of design solutions.

Each semester is comprised of a design studio and a seminar in parallel, studying both the real and ideal solutions for three aspects of town planning: new town design, housing and the redesign of existing situations.

The School of Architecture faculty teaches the curriculum with field condition input from visiting faculty and other experts such as developers, marketing experts and bankers.

Master in Real Estate Development and Urbanism

A one-year interdisciplinary program that will blend the fundamentals of real estate development with the School of Architecture's strengths in the New Urbanism, community design and civic engagement.

Master of Architecture: Research

This program allows students to specialize in a specific area of study within the context of the discipline.

Each student must complete 36 credits, normally over three semesters. A specific program of study, reflecting the proposed professional objectives, is established for each student. In addition, a six-credit thesis is required.

An advisory committee of the faculty of the school supervises the progress of the students. The program is based on studio work combined with cross-disciplinary and specialized studies.

The program culminates in a comprehensive project tailored to meet the needs of the individual student.

Architecture and professional courses completed in a pre-professional bachelor’s degree program will be evaluated to identify courses that may be waived in the Master of Architecture Professional Degree Program.

A maximum of 54 credits, including three design studios, may be waived; generally architecture and professional courses with a grade of B- or higher will be accepted. Requirements for the degree will be contingent on the evaluation of the student’s prior work.

Master of Architecture: Research
Post Professional Degree
An individual curriculum is developed for each student in consultations with the research program faculty and the director of graduate studies.

AWARDS AND SCHOLARSHIPS

American Institute of Architects Henry Adams Medal awarded by the American Institute of Architects to the highest ranking graduating student for scholarship and excellence in architecture.

American Institute of Architects Henry Adams Certificate awarded to the second highest ranking graduating student for scholarship and excellence in architecture.
Other honors, distinctions, and awards are presented annually for excellent student performance.

Master of Public Administration
Master of Science
Doctor of Philosophy

DEGREE REQUIREMENTS

Please consult the specific department section for information related to degree requirements in addition to general degree requirements for the various degrees as listed by the Graduate School.
OTHER

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available in Ashe 200 and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the Ashe Building.
ANTHROPOLOGY - Dept. Code: APY

The Department of Anthropology does not have a graduate program. The courses may be taken for graduate credit with the consent of the major department.

DEGREE PROGRAMS

Two programs serve the needs of graduate students in Art and Art History.

Master of Fine Arts program in the studio areas of
- Painting
- Sculpture
- Graphic Design/Multimedia
- Ceramics/Glass
- Printmaking
- Photography/Digital Imaging

Master of Arts program in Art History

MASTER OF ARTS

The M.A. degree is designed for students in art history who plan academic, museum or gallery careers. It entails a minimum of 36 credits in art history and related courses, including six credits of thesis. M.A. students must pass a slide examination and a comprehensive examination. Reading knowledge of a foreign language appropriate to the study of Art History (e.g. French, German, Italian, Spanish) is required.

REQUIREMENTS FOR THE MASTER OF ARTS DEGREE IN ART HISTORY ARE:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>

<td>9</td>
</tr>
<tr>
<td>Thesis</td>
<td>6</td>
</tr>
</tbody>
</table>

Admission to the Master of Arts program requires a minimum of eighteen semester hours of undergraduate study in Art History.

Applicants for admission are required to submit an example of an art history research paper they have done in addition to the general requirements of transcripts, GRE scores and letters of recommendation. It is highly recommended that applicants have reading knowledge of a foreign language (e.g., French, German, Italian, Spanish).

A maximum of six semester hours of graduate credit may be transferred from another institution, providing that the credits have been taken within six years prior to matriculation at the University of Miami and have been passed with a grade of B or higher.
Applicants for admission to the Master of Arts program are responsible for the submission of the following materials to the Graduate Secretary in Art and Art History:
All transcripts of college-level academic work;
GRE scores (and TOEFL score for foreign students);
A research paper from an undergraduate art history course;
Three letters of recommendation;
Application form.

Applicants for the M.A. degree are considered in the Spring and Fall. The deadlines for applying are February 15 for Fall admission and September 15 for Spring admission.

FINANCIAL AID: Graduate Teaching Assistantships and tuition waivers are awarded by the department in both studio areas and Art History.

The G.R.E. is required for the M.A., but not for the M.F.A. degree.

All M.F.A. and M.A. students with Teaching Assistantships must contribute to the teaching program as an essential part of their responsibilities.

**MASTER OF FINE ARTS**

The Master of Fine Arts degree is the terminal degree for students interested in the creation of art who plan to pursue careers as practicing artists/teachers.

The students will take a minimum requirement of 60 credit hours in approved graduate courses.

Teaching assistants can opt to take 10 credits each semester, or will take 9 credits each semester the first year, 12 credits each semester the second year, and 9 credits each semester the third year.

A Supervisory Committee will be assigned when the student is formally admitted to the program.

It will be comprised of at least four members.
The Supervisory Committee chair will be from the student’s area of concentration and a member of the graduate faculty.
The head of the Supervisory Committee will select the membership of the Committee after conferring with the student.
The Supervisory Committee will formally review the student’s progress; the student may be put on probation at the end of any semester, and given one semester to improve or be removed from the program.

Application for candidacy may be made any time after the completion of 30 credits, but must be attained prior to registration for the final semester.

The Supervisory Committee will determine whether the student should be admitted to candidacy.
When the student is admitted to candidacy, a Thesis Committee is formed with at least four members, who need not be the same as the Supervisory Committee.
The Chair should be from the student’s area of concentration and a member of the graduate faculty.

Two others should be department faculty, and the fourth person must be from outside the studio faculty.

This committee will consult with and advise the student on his or her work, meet twice a semester to review progress, read and comment on the thesis document, and conduct a final oral exam during the thesis exhibition.

The thesis exhibition will be scheduled after the successful completion of ART 599; the show will be installed after the candidate has submitted an accepted thesis document. All incompletes must be cleared before the exhibition can be scheduled.

No student gains the right to be recommended for the degree simply by completing requirements. This right is reserved to the student’s Thesis Committee in coordination with the Graduate Program Director.

**REQUIREMENTS FOR THE MASTER OF FINE ARTS DEGREE IN STUDIO:**

<table>
<thead>
<tr>

<td>6 credits</td>
</tr>
</tbody>
</table>

Applicants for admission to the Master of Fine Arts program are responsible for the submission of the following materials to the Graduate Secretary in Art and Art History:

1. All transcripts of college-level academic work;
2. 20 slides of studio work; OR 20 images on a CD/DVD
3. Three letters of recommendation;
4. Application form.

Applicants for MFA degrees are considered in the Spring and Fall. February 15 is the postmark deadline for Fall admission and September 15 is the postmark deadline for the Spring admission. Teaching Assistantships are available only with Fall admission. The deadline for international applications for the following Fall semester is January 15.
BIOLOGY - Dept. Code: BIL
www.bio.miami.edu

DEGREE PROGRAMS

APPLICATION FOR ADMISSION

Applications are due January 1.
In applying for admission, applicants must select either the Master's or the Ph.D. track.

Students with an appropriate B.S. degree may seek direct entry to either M.S. track or Ph.D. track.

Applicants who were admitted on the Master's track, but wish to change to a Ph.D. track without completing the Master's may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three U of M Biology faculty, including a major advisor, should be added to the applicant's file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master's track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three U of M Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must send the following to the Director of Graduate Studies in Biology:

A. completed application form.

B. all undergraduate and graduate official transcripts (photocopies are not accepted).

C. official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; the Biology subject matter test is also recommended (photocopies of scores are not accepted).

D. international applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English) official scores (photocopies of scores are not accepted).

E. letters of recommendation, from three science instructors/ supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential.

F. cover letter that identifies interests, suggests possible research projects and states career goals.

G. copies of any research papers (e.g., publications, manuscripts, senior reports, etc.).

H. written confirmation of a faculty sponsor; applicants MUST secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor.

I. application fee of $65.
A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense.

*Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.*

**DEGREE REQUIREMENTS**

All students are required to satisfy the general requirements for the appropriate degree that are listed in the Graduate Studies Bulletin, whether or not they are listed among the Biology requirements.

**MASTER OF SCIENCE** - This degree may be attained by either of the two following routes.

**A. M.S. with thesis (a three year program)**

1. Credits: a total of 30 credits are required:
   - 24 course credits, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one area; they are encouraged to select courses and independent studies that will prepare them for research, as listed under the Ph.D. requirements. No more than 9 credits from the independent study series (BIL 671-675) may be used to fulfill the 24 course credits. At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credits can be counted as a non-independent study credit. Course selection requires committee approval.
   - 6 research credits (BIL 710); no more than 6 M.S. research credits are allowed.
   - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Research Proposal: public presentation and successful defense to the committee of a written research proposal.

3. Admission to candidacy is made by recommendation of the committee.

4. Thesis: A well-written and successfully defended thesis of publishable quality; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation.

5. Other requirements described under "The Master's Degree," including but not limited to:
   - a total of at least 30 credits (course credits plus research credits). The Graduate School and the Department concur in requiring at least 24 course credits and exactly 6 research credits (BIL 710) for a thesis M.S.);
   - once a student has completed all required credits, she/he must enroll in "Research in Residence" (BIL 720) status until the degree is granted. This course carries 0 credits, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit normally applies to this course.

6. About the committee:
A single committee will combine the responsibilities of the supervisory and thesis committees.

The supervisory committee will be determined by the student in consultation with his or her advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

The thesis committee is formed officially when the student is admitted to candidacy. It may be comprised of the same individuals as are on the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

The thesis committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.

Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should consult with the committee about major changes in research goals and about problems. Memos summarizing each meeting should be in the student’s file.

7. About the time table:

- A written thesis proposal is due no later than the middle of the second semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the time table.
- Admission to candidacy normally occurs after completion of one year or 12 credits of graduate work and successful defense of the thesis proposal.
- Analysis of data and a polished draft of the thesis should be completed and in the hands of the committee by the middle of the sixth semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the time table.
- Defense of the thesis and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the sixth semester unless an extension has been approved by GAAC upon recommendation of the thesis committee. Notice of the defense must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
- The oral defense of the thesis must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
- No student may receive the degree in the same semester in which she/he is admitted to candidacy.
- The indicated dates form firm deadlines. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will only be granted under extraordinary circumstances and will be effective upon written approval by GAAC.
- Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change should also address the proposed financial support.
B. M. S. without thesis (a two year program)

1. Credits:

- A total of 36 course credits are required by the Biology Department, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one core area, listed under the Ph.D. requirements. No more than 9 credits from the independent study series (BIL 671-675) may be used to fulfill the 36 course credits. At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credits can be counted as a non-independent study credit. Course selection requires committee approval.
- The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Admission to candidacy.

3. Passing a written comprehensive exam given by the committee.

4. About the committee

- A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
- The examination committee is formed officially when the student is admitted to candidacy. It may be comprised of the same individuals as are on the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student’s advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
- The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
- Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student’s file.

5. Other requirements described under "The Master's Degree," including but not limited to:

Note that although the Graduate School requires only 30 credits for an M.S. degree, the Department requires 36 course credits for a non-thesis M.S.

6. About the time table:

- **Admission to candidacy** normally occurs after completion of one year or 12 credits of graduate work.
• The comprehensive exam must be passed by the end of the fourth semester.
• No student may receive the degree in the same semester in which she/he is admitted to candidacy.
• The indicated dates form firm deadlines. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will only be granted under extraordinary circumstances and will be effective upon written approval by GAAC.
• Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change should also address the proposed financial support.

C. DOCTOR OF PHILOSOPHY

1. Credits: a total of 60 credits (including both course and research credits) beyond the Bachelor’s degree are required:
   • At least 18 course credits that are not from the independent study series, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. The independent study series is BIL 671-675. However, at times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credits can be counted as a non-independent study credit. Course selection requires committee approval.
   • At least 12 research credits (BIL 730 and/or BIL 740). There is no cap on the number of Ph.D. research credits, but once the overall number of required credits (see below) has been reached, there is no need to take additional research credits.
   • An additional 30 credits from any combination of graduate courses (500 and 600 level regular courses and independent study courses) and research credits (700 level) to bring the total number of credits beyond the Bachelor's Degree to 60 credits. (One example: 18 required course credits + 12 required research credits + 15 additional course credits + 15 additional research credits = 60 total; another example would be 18 additional course credits and only 12 additional dissertation credits, etc.)
   • Students who already have a Master’s Degree in the same field may not need as many course credits (consult Graduate School rules on transfer credits), but at least 24 credits must be taken in residence at UM.
   • The committee may decide that students with previous graduate level courses may be exempt from some of the course requirements.
   • The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."
   • CONCEPTUAL AREAS: Students are encouraged to take courses and independent studies from at least 3 main conceptual areas and urged to take courses and independent studies that will prepare them for research and for the comprehensive qualifying exam. Students are also encouraged to participate in seminars and study groups. They are also encouraged to take special courses in other departments of UM, at our Coalition for Excellence in Tropical Biology partner institutions, from the Organization for Tropical Studies, or other special interdisciplinary courses. Such courses should be appropriate to their course of study and research area as determined by their committees. Conceptual areas offered in our department include: EVOLUTION (graduate level evolution courses are in the series 520’s or 620’s, also 519 is included); ECOLOGY (graduate level ecology courses are in the series 530’s or 630’s), BEHAVIOR (graduate level behavior courses are in the series 540’s or 640’s); GENETICS AND MOLECULAR BIOLOGY (graduate level genetics
courses include BMB 509, and BIL 530 in addition the series 550’s or 650’s); and PHYSIOLOGY AND CELL BIOLOGY (graduate level physiology courses are in the series 560’s or 660’s). Special concentrations in our department and/or in collaboration with other departments include: Tropical Biology, Mathematical Ecology, Neuroscience and Behavior.

2. Comprehensive qualifying exam should be passed by the end of the third semester.
   - A single committee (see number 9 below about the committee membership) will advise the student on both comprehensive and research training. To fulfill the **comprehensive function**, the committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above).
   - To establish intellectual communication between the committee members and students early on, the committee will begin to work with the student in the first semester. Faculty will suggest reading lists, courses and/or independent study, as needed, to prepare the student with sufficient background for the comprehensive examination which will include 3 areas, one of which is the research area. The committee and student will interactively define the scope of comprehensive training and thus of the comprehensive examination in these 3 areas.
   - The comprehensive examination will be held in the third semester. The committee will designate a chair to administer the examination. The written part of the exam will not be open book and it will be administered on campus for a discrete period of time (up to 4 hours within each of two consecutive days) by the examination chair. All members of the committee will grade all the questions. There will be an oral exam about one week later, after the committee has read the written answers, for the purpose of further exploring the student’s grasp of the subject matter.
   - Each committee member will decide on a pass/fail grade based on the total picture (written plus oral). For the student to pass the examination, 3 of the 4 examiners must vote a grade of pass. An oral and written summary of the committee’s evaluation must be prepared by the chair of the **examination committee** and given to the student and to GAAC. If the student does not pass the examination, there will be a chance to retake it the following semester. In the case of failure a second time, he/she will be terminated from the program.

3. Research proposal: public presentation of a research proposal and defense of a written research proposal to the complete research committee (see below) should be completed by the middle of the fourth semester. Students are encouraged to follow the format of a grant proposal to a major funding agency. At the proposal defense, the student will receive either a pass or a fail. A grade of pass will be recorded if no more than one member of the complete research committee (see below) votes to fail the student. If the student fails the proposal defense, she/he will be given a **second chance** to defend no later than the sixth week of the fifth semester. If the defense is failed a second time, the student will be terminated from the program.

4. Admission to candidacy: (application is made on a form available in the grad school and in the department). This normally will occur at the end of the fourth semester. Requirements are passing the comprehensive examination and successfully defending a written research proposal.

5. Teaching: All students on the Ph.D. track in Biology are required to serve satisfactorily at least one semester as a teaching assistant in one of the courses offered as part of the Department's training program.
6. Grants: Submission of a grant proposal to a major funding agency (e.g., NSF, NIH, National Geographic, World Wildlife Fund, etc.). All students are required to seek outside funding for their research. This must be a research project proposal. Application for an NSF pre-doctoral fellowship does not meet this requirement, but application for an NSF dissertation improvement grant does qualify.

7. Ph.D. Dissertation: A well-written and successfully defended dissertation containing an original contribution to the field and of quality appropriate for publication in a scientific journal; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation. A public dissertation seminar is also made at the time of the defense.

8. Other requirements described under "Doctor of Philosophy," including but not limited to:
   - a total of at least 60 credits (course credits plus research credits).
   - once a student has completed all required credits, she/he must enroll in "Research in Residence" (BIL 750) status until the degree is granted. This course carries 0 credits, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit normally applies to this course.

9. A single committee will advise the student on both comprehensive and research training. The committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above). The research function of the committee is to advise the student on research, including preparation, training, project choice, project design, implementation and evaluation of the research. The committee will go through several phases and its membership will be determined by the advisor and student together, contingent upon approval of GAAC and/or the Graduate School, as appropriate at each phase:
   - The **initial committee** will consist of at least 4 faculty, 2 appointed to ensure breadth of training (from two areas outside the research area) and 2 from the research area. It will be formed to help the student choose courses during the first few weeks of the first semester. This committee will decide whether students having a M.S. in biology (botany, zoology, etc.) from another institution can substitute a graduate level course taken elsewhere for a departmental course requirement; it will also decide which additional courses should be taken for both research and breadth. The choice of areas will be briefly outlined in a memo to GAAC.
   - The **initial committee of at least 4 faculty** will be responsible for preparing and administering the comprehensive examination.
   - The **complete committee of at least 4 faculty** including one from outside the department, should be formed by the end of the third semester; all four members should participate in the proposal evaluation which will take place in the fourth semester. The committee will consist of a minimum of four faculty, which includes the committee chair, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty.
   - The **dissertation committee (of four)** is formed officially when the student is admitted to candidacy. It will usually be comprised of the same individuals as are on the complete research committee, or it may be formed anew. The student and advisor consult on the membership of the committee, and the department nominates the committee to the graduate school. The committee will consist of a minimum of four faculty, which includes the committee chair who is the advisor, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty and one from outside the department of concentration. The dissertation committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
Committee meetings are **required at least once a year** (recommended at least once a semester in the early phases). The student is responsible for arranging meetings; the student should consult with the committee about any major changes in research goals and any problems; memos summarizing each meeting should be in the student’s file.

10. About the time table:

- The written **comprehensive qualifying examination** must be passed by the **end of the third semester**.
- A polished, written **dissertation proposal** must be **defended to the committee in the fourth semester** together with a **public presentation of the proposal**. This must take place by mid-April of the spring semester or mid-November of the fall semester.
- **Admission to candidacy** normally occurs after the comprehensive qualifying exam and proposal defense are passed upon the recommendation of the committee and the approval of the Graduate School. Application for admission to candidacy is made to the graduate school on a special form.
- Analysis of data and a **polished draft of dissertation** should be completed and in the hands of the dissertation committee **no later than the middle of the tenth semester**.
- **Defense of the dissertation and its submission to the Graduate School** must meet or precede the deadline for graduation immediately following the **tenth semester** unless an extension has been approved by GAAC upon recommendation of the dissertation committee. Notice of the defense and of the public seminar must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
- The oral **defense of the dissertation** must be given during **regular sessions** of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
- **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**
- The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will only be granted under extraordinary circumstances and will be effective upon written approval by GAAC.**
- Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit** and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change should also address the **proposed financial support** of the student beyond the 10 semesters of normal departmental support.

11. Public presentations must be during regular semesters. The public presentation associated with the defense of the proposal and the public seminar associated with the defense of the dissertation must be given during regular sessions of Fall or Spring semesters, not during summer sessions, inter-sessions, reading days, or finals weeks.

**IMPLEMENTATION**

All Graduate students will be reviewed each fall semester by GAAC.

A. The advisor will review the student’s progress to date.
B. The student will provide updates for a student progress database every October.
C. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
D. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
E. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
F. Possible outcomes of the review:
   1. Student making satisfactory progress
   2. Student not making satisfactory progress; recommendations for improvement
   3. Student not making satisfactory progress; his/her tenure terminated

FINANCIAL SUPPORT
A. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
B. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data.
C. Students holding full Maytag fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold Maytag fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

Biology Course Listing
Prospective graduate students are expected to have completed, during their undergraduate training:

The candidate must hold a B.S./B.A. degree from an accredited institution. Consideration is given to applicants who have successfully completed general chemistry (two semesters), organic chemistry (two semesters), physical chemistry (two semesters), and the related laboratories. A course in advanced inorganic chemistry is strongly recommended, and remedial work in this area may be required of students who have not taken such a course. The mathematics and physics courses that are normally included in a B.S. program in chemistry are also required.

Undergraduate deficiencies are treated as such and must be overcome during the first year of graduate study.

**M.S. Degree**

The MS degree requires a minimum of 30 credits. The department will cover tuition costs up to 30 credits for students on assistantships and fellowships. At least 18 credits must be formal lecture courses. The remaining 12 credits must be broken down as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry Seminar (CHM 679)</td>
<td>2</td>
</tr>
<tr>
<td>Chemistry Seminar (CHM 680)</td>
<td>1</td>
</tr>
<tr>
<td>Introduction to Research (CHM 685)</td>
<td>2</td>
</tr>
<tr>
<td>Master's Thesis (CHM 710)</td>
<td>7</td>
</tr>
</tbody>
</table>

Students must take a minimum of 9 credits of formal lecture courses in the fall semester of their first year and a minimum 9 credits of formal lecture courses in the spring semester of their first year. Of the 18 credits, 3 core courses totaling 9 credits should be taken by all graduate students.

- The required number of credits in the chemistry seminars (CHM 679 and 680) and Introduction to Research (CHM 685) must be taken in the first and second year.
- The required number of credits in research (CHM 710) must be taken in the second year.
- A dissertation based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the second year.

The remaining courses may be selected from 600-level chemistry courses or 500- or 600-level courses in other departments.

The M.S. degree may be earned with or without a thesis. In order to complete a MS degree without thesis, an advanced comprehensive exam must be passed.

The exam is administered at the end of the second year in the program.
Ph. D. Degree

The general requirements for the doctorate in Chemistry are set forth in this Bulletin under the heading Doctor of Philosophy. The Department of Chemistry has the following specific requirements:

The PhD degree requires a minimum of 60 credits. The department will cover tuition costs up to 60 credits for students on assistantships and fellowships. At least 18 credits must be formal lecture courses. The remaining 42 credits could be broken down as follows:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry Seminar (CHM 679)</td>
<td>4</td>
</tr>
<tr>
<td>Chemistry Seminar (CHM 680)</td>
<td>2</td>
</tr>
<tr>
<td>Introduction to Research (CHM 685)</td>
<td>2</td>
</tr>
<tr>
<td>Problems in Research Planning (CHM 688)</td>
<td>2</td>
</tr>
<tr>
<td>Pre-candidacy Doctoral Dissertation (CHM 730)</td>
<td>28</td>
</tr>
<tr>
<td>Post-candidacy Doctoral Dissertation (CHM 740)</td>
<td>4</td>
</tr>
</tbody>
</table>

Students must take a minimum of 9 credits of formal lecture courses in the fall semester of their first year and a minimum 9 credits of formal lecture courses in the spring semester of their first year. Of the 18 credits, 3 core courses totaling 9 credits should be taken by all graduate students.

- The required number of credits in the chemistry seminar (CHM 679) must be taken in the first and second year.
- The required number of credits in Introduction to Research (CHM 685) must be taken in the first year.
- The required number of credits in the chemistry seminar (CHM 680) must be taken in the second and fourth year.
- The required number of credits in Pre-candidacy Doctoral Dissertation (CHM 730) must be taken in the first, second, third and fourth year.
- The required number of credits in Post-candidacy Doctoral Dissertation (CHM 740) must be taken in the fourth year.

Four Cumulative Examinations must be passed before the end of the first year.

- An Oral Comprehensive Exam must be passed before the end of the second year.
- An original research proposal in Problems in Research Planning (CHM 688) must be presented and defended before the end of the third year.
- A dissertation based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the fifth year.

Chemistry Course Listing
COMPUTER SCIENCE

DEPT. CODE: CSC

www.cs.miami.edu

DEGREE PROGRAMS

The department of Computer Science offers a Master of Science in Computer Science and a Doctor of Philosophy in Computer Science.

MASTER OF SCIENCE IN COMPUTER SCIENCE

The Master of Science program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student's program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites

Completion of the following courses, or their equivalents, is prerequisite to entry into the program: CSC 120, CSC 220, CSC 314, CSC 517, CSC 527, MTH 111, MTH 224, and MTH 309. Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.

Requirements

Students must complete either the thesis option or the coursework option.

1. Thesis option:
   - CSC 710 – Master's Thesis (6 credits) and coursework, one of:
     - 12 credits from CSC 6XX courses and 15 credits from other approved courses.
     - 9-11 credits from CSC 6XX courses and 19-21 credits from other approved courses.

2. Coursework option:

   36 credits of approved courses, including, at least 18 credits from CSC 6XX courses. At least 18 credits, exclusive of the thesis credits, must be earned in courses offered by the Department of Computer Science.

   Each program must include both theoretical and experimental topics, and may not include more than 3 credits from CSC 670.

Recommended subjects include:

Operating Systems, Programming Languages, Analysis of Algorithms, Theory of Computation, and Computer Architecture or Software Development. The approval is made by the CSGC and the Department Chairman or designate. Programs may thus be individually tailored to meet varied backgrounds and objectives. It is recognized that there are still individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and other individuals with work experience in the field wishing to advance their formal training in Computer Science.
DOCTOR OF PHILOSOPHY IN COMPUTER SCIENCE

The Doctor of Philosophy program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student's program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites
In order to be admitted to the Ph.D. program in Computer Science, an applicant must have obtained a minimum of 15 credits in courses at sophomore level and above. These courses in the Department of Computer Science are numbered 200 and above. Applicants may be admitted with deficiencies; these must be completed in addition to the degree requirements.

Requirements

Written Qualifying Exam:
The student must pass a three-hour written exam of general knowledge of Computer Science at the end of the first year. Upon failure, the student may petition the CSGC to allow a second attempt at the end of the second year. The exam will be administered once a year in the early weeks of the summer session. It will cover expected knowledge of all first-year graduate students. Included in this material are a fundamental understanding of algorithm analysis and design, advanced skills in programming, basic knowledge of computer architecture, and a general understanding of computer systems.

Classroom Course Requirements:
In the first two years, the student must take eight CSGC-approved classroom courses, for a total of 24 credits. At least four of these courses (12 credits) must be open only to graduate students. These courses are numbered 600 and above. The eight courses must include two courses from each of the areas of Analysis, Applications, and Systems. The student should work with the Director of Graduate Studies to select a cohesive set of courses as approved by the CSGC. The CSGC will have sole authority in designating the areas to which each course belongs. In the case that a course is designated in more than one area, a student may apply the course to only one area. The designation of current CSGC-approved courses appears at the end of this description.

Project Course Requirements:
By the end of the second year the student must complete two graduate level project courses for a minimum total of 6 credits. Each project shall be under the supervision of a different faculty member in the Department. All Ph.D. students must find faculty willing to supervise their project in the semester preceding the project. The deadline for finding a supervisor shall be the first full week in April or November for the Fall and Spring terms, respectively. This deadline does not require identifying a specific project but only finding a faculty member willing to supervise a project. Upon completion of a project, the student must write a detailed project report. This report shall become a public document and shall be kept on file by the Department. The student must present the finished project to a quorum of the CSGC at a time to be approved by the chairman of the Department. The supervisor and CSGC must approve each project as applicable toward candidacy for a Ph.D. A primary factor in determining approval shall be the stated willingness of the supervisor to become an initial Ph.D. advisor for the student.
Annual Presentations:
After passing the written qualifying exam, the student must make a public oral presentation to the Department at least once per year. These presentations include the two project presentations, the thesis proposal, and the thesis defense. The goals are to develop the student’s oral and presentation skills, to provide a means for the Department to check the research and progress of the student, and to present the opportunity for feedback to improve the student’s research.

Teaching Experience:
Each student must teach a lab-based course for a minimum of one semester. Lab-based courses typically require the student to present material in a relaxed lecture format, re-emphasizing material learned in the general lecture as well as introducing new material to the students.

CREATIVE WRITING
www.as.miami.edu/english

DEGREE PROGRAMS

The Department of English offers a two-year program in fiction or poetry writing leading to the Master of Fine Arts degree. The program provides an opportunity for students of superior ability in imaginative writing to develop their skills and critical judgment through the practice of writing and the study of literature.

The creative writing program is a member of the Associated Writing Programs.

For further information, please consult the description of the M.F.A. in English.

ENGLISH - Dept. Code: ENG
www.as.miami.edu/english

DEGREE PROGRAMS

The Department of English offers programs leading to the degrees of M.A. and Ph.D. The Ph.D. program is an innovative scholarly course of study offering substantial work in all areas of English, American, and Transnational literature, including Anglo-Irish literature, with some opportunities for advanced work in comparative literature.

A. Master of Arts

1. Program of Study
A candidate must complete 36 credits at the 600-level in literature and literary theory. Six hours of graduate credit from related fields may be included with the consent of the Director of Graduate Studies.

2. Language Requirements
A reading knowledge of a foreign language is required.

B. Doctor of Philosophy

1. Courses
Ph.D. students must complete 54 credits (if entering with a B.A.) or 36 credits (if entering with an M.A.) of 600-level courses in literature and literary theory.

2. Language Requirements
A reading knowledge of two foreign languages is required.

3. Qualifying Examination
All Ph.D. students are required to pass a qualifying examination. Students may not take the qualifying examination until they have
- completed the required Ph.D. coursework,
- satisfied the foreign language requirement
- enrolled for English 697 (Readings for the Qualifying Examination).
4. Dissertation
Students may proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been accepted by the committee and approved by the department.
The dissertation itself must be an investigation of a substantial critical or scholarly topic. A final oral defense of the dissertation is required.
Further information on the department’s graduate programs is contained in the Guide for Graduate Students, available from the Department of English.

English Course Listing
GEOGRAPHY AND REGIONAL STUDIES - Dept. Code: GEG
www.as.miami.edu/geography

DEGREE PROGRAMS

The Department of Geography offers a graduate M.A. program. For more information, please contact Dr. Ira Sheskin at isheskin@miami.edu or visit the Geography Department’s web page at www.as.miami.edu/geography.

The following graduate level courses may be taken for graduate credit with the consent of the major department:
GEG 501, GEG 503, GEG 510, GEG 511, GEG 520, GEG 521, GEG 522, GEG 523, GEG 525, GEG 535, GEG 545, GEG 552, GEG 570, GEG 582, GEG 591, GEG 595, GEG 603, GEG 620, GEG 625, GEG 637, GEG 645, GEG 651, GEG 661, GEG 672, GEG 681, GEG 710, GEG 720, GEG 725

Geography and Regional Studies Course Listing
GEOLOGICAL SCIENCES - Dept. Code: GSC
www.as.miami.edu/geology

DEGREE PROGRAMS

A 5-year B.S./M.S. in Geological Sciences and Marine Geology allows qualified students to complete a master’s degree in one year of study beyond the B.S.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences.

The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree above.

By the spring of their Junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor.

Contact Dr. Harold Wanless at the departmental office (305-284-4253) for more information.

Geological Course Listing
HISTORY - Dept. Code:  HIS
www.as.miami.edu/history

DEGREE PROGRAMS

I. REQUIREMENTS FOR THE M.A. DEGREE IN HISTORY

A. Admissions

We are looking for applicants with a record of outstanding achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master’s degree from an accredited institution may apply for admission to the doctoral program. Students with a bachelor’s degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1) A completed application form.

2) A completed financial aid application, if seeking aid.

3) Three letters of recommendation, preferably from applicant’s former professors.

4) Recent Graduate Record Examination scores on the General Test.

5) TOEFL scores (for international students).

6) Official transcripts.

7) A detailed statement from the student indicating:
   (a) the student’s background and education;
   (b) the student’s interests (field, topic, etc.);
   (c) why the student wants to pursue a graduate degree in history at the University of Miami;
   (d) what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.

8) A representative writing sample.

Deadlines

January 20: Applications for admission and aid for Fall semester.
B. Committee

Upon admission to the masters program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student's secondary field, must be formed no later than the student's second semester in the program. There are then two options for completing the masters. One requires 27 hours of coursework and an exam. The other requires 21 hours of coursework, a master's thesis (6 thesis credits), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student's course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

C. Requirements

27 credits at the 500 level or above, of which at least 18 must be at the 600 level or above.

Passage of an oral exam in two fields.

Completion of History 695 (Historiography). This course is normally given in the fall semester. All students are required to take the Historiography course in their first year.

Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing a thesis should register for 6 credits of History 710, which count toward the 27 required credits.

Language Requirements: Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor.

See under Ph.D. requirements for more information on fulfilling language requirements.

The student must apply for graduation in his or her penultimate semester (i.e. fall semester for spring semester).

The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Though the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive will also act as a thesis defense.

D. Fields

See H under Requirements for the Ph.D.
II. REQUIREMENTS FOR THE PH.D. DEGREE IN HISTORY

A. Admissions
We are looking for applicants with a record of outstanding academic achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master’s from an accredited institution may apply for admission to the doctoral program. Students with a bachelor’s degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1) A completed application form.

2) A completed financial aid application, if seeking aid.

3) Three letters of recommendation, preferably from the applicant’s former professors.

4) Recent Graduate Record Examination scores.

5) For international students, TOEFL scores.

6) Official transcripts.

7) A detailed statement from the student indicating: a) the student’s background and education; b) the student’s interests (field, topic, etc.); c) why the student wants to pursue a graduate degree in history at the University of Miami; and d) what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.

8) A representative writing sample.

Admission from M.A. to Ph.D. Status
Students admitted at the master’s level who are performing well in their studies are encouraged to proceed to Ph.D. status. Advisors who believe that a student should be admitted to the Ph.D. program, and have the consent of the student, inform the DGS of this desire early in the spring semester and at least before the annual departmental meeting reviewing graduate students’ progress. The request is then reviewed by the department at its annual meeting for recommendation to the graduate committee. Students who move from the M.A. to the Ph.D. program are eligible for the same number of years’ aid as students entering the Ph.D. program directly from the B.A., minus the years of aid they have already received. For course requirements, see below.
Deadlines
January 20: Applications for admissions and aid for Fall semester.

B. Committee
Upon admission to the program, the student is assigned a provisional major advisor. As noted above, students should then concur or select a different advisor by the beginning of the second semester in the program. An advisory committee of four or five, including the major advisor and faculty members representing the second and third fields, must be formed no later than the student’s third semester in the program. Concurrent with the formation of the committee, the student should choose the 4 fields of study. One of these must be from a cognate discipline. It is the responsibility of the student and the advisor to form this committee and notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee will also administer the oral and written comprehensive examinations. Students may change advisor and other committee members throughout the program provided that the faculty member(s) selected agree(s).

C. Requirements

1a) For students entering the Ph.D. program with a B.A., 45 credit hours (5 semesters) of graduate coursework at the University of Miami.

1b) For students entering the Ph.D. program with a masters from another university, at least 27 credit hours (3 semesters) of graduate coursework at the University of Miami.

1c) For students entering the Ph.D. program with a Masters from another program at the University of Miami, at least 27 additional credit hours (3 semesters) of graduate coursework at the University of Miami.

1d) For students entering the Ph.D. program with a Masters from the History department at the University of Miami, 24 additional credit hours of graduate coursework (to conform to a Graduate School requirement) at the University of Miami.

1e) All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the History Graduate Program at the University of Miami.

2) Completion of History 695 (Historiography), included in the above number of credits. All students are required to take the Historiography course in their first year.

3) Completion of History 693 (the two-semester Research Seminar), included in the above number of credits, at least once. Typically, students take History 693 in their 2nd and 3rd semesters in the program.

4a) Passage of a major field in written and oral exams.
4b) Passage of a 2nd field in written and oral exams.
4c) Passage of a 3rd field in written and oral exams.
4d) Passage of a 4th (cognate) field in the oral exam alone.

5) Following completion of course credit hours, students will need to take sufficient dissertation research credits (History 730 if before the comprehensives have passed; History 740 after the comprehensives have been passed) to reach a total of 60 credits hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credits. Students who enter the Ph.D. program
with an M.A. from another university or from another program at the U. of M. receive 30 credit hours towards the 60 credit hour requirement.

The required credits of coursework are only the formal minimum. Although coursework is necessary preparation for the comprehensive examination, students are examined on the mastery of fields of knowledge rather than courses. The number of courses taken depends on the student’s background, choice of fields, nature of related work, language skills, etc. Courses should be selected only after consultation with the Major Advisor.

D. Incompletes

All incompletes from the fall semester must be made up by the official end of the following spring semester. All incompletes from the spring semester must be made up before the official start of the subsequent fall semester. No student will be allowed to proceed to exams until all incompletes have been made up.

E. Languages Requirement

Reading knowledge of at least one foreign language is required. More than one foreign language may be required if the major advisor deems it necessary. The Modern Languages and Literatures Department administers examinations in the languages that it teaches and offers preparation courses in a handful of languages. Students may contact the DGS for the various options for taking courses in foreign languages. Students must, in conjunction with their advisor, prepare a plan that specifies how they will demonstrate language proficiency. The language requirement must be completed before a student can take the comprehensive examinations (see below).

F. Comprehensive Examinations

It is the responsibility of the student and major advisor to organize the comprehensive examinations. Students may take them at any time of the year that classes are in session. Arrangements for the exams, including selection of their dates and a final list of committee members, should be made by the end of the first month of the semester in question, with notification to the Department Chair and DGS.

The student takes the written part of the examinations in three history fields, which are normally administered over a period of two successive weeks. The portion for each field is four hours in duration. Only after the advisory committee deems that the student has successfully passed the written portions for each field is the student permitted to take the oral part of the examination.

The oral section covers the three history fields and one cognate field and is approximately two hours in duration. The prospectus may form part of the discussion, but the examination will focus on coverage of the fields. The committee consists of four to five faculty members. One member of the examining committee must be from outside the department. Normally this is the committee member representing the cognate field.

The student advances to candidate status after passing the comprehensive examinations and submitting an acceptable dissertation prospectus.

Students who have not already received a master’s degree from the University of Miami will be awarded an M.A. upon successful completion of their doctoral comprehensive exams.

G. Dissertation

After passing the examinations, students form a dissertation committee. This may be the original advisory committee, but it may also be revised to meet the needs of the dissertation work. The students, in consultation with the Major Advisor, put forward the names of individuals suggested to serve on the dissertation committee. The committee is then approved and appointed by the dean of the graduate school.
The dissertation must make a significant contribution to the candidate’s field of specialization. It must meet the highest standards of research, substance, and form, and demonstrate an ability to conduct and report independent and original scholarly investigation.

The student must apply for graduation in his or her penultimate semester (i.e. fall for spring semester).

Upon completion of the dissertation and its tentative approval by the dissertation committee, the student takes a final oral examination that is a “defense” of the dissertation and that lasts for approximately two hours. It is open to the university community. Following the defense of the dissertation, the dissertation committee will render its decision to accept or reject the dissertation. Approval of the dissertation must be indicated by the signature of all members of the dissertation committee.

H. Fields

Chronological/Geographical fields
Medieval Europe
Early Modern Europe
Modern Europe
Early American History
Modern U.S. History
Colonial Latin America
Modern Latin America
East Asia
Russia
Africa
Caribbean

Topical Fields. These must cover either two of the geographic or two of the temporal fields listed above.
African Diaspora
Race and Ethnicity
Gender and Sexuality
History of Religion
History of Science and Medicine
History of Crime and Law
Political History
Diplomatic History
Urban and Environmental History
Economic History
Business History
Labor History
History of Sport
Military History
Cultural and Intellectual History
Public History
Atlantic World

Customized Fields
Students may create their own fields in consultation with their advisory committee. The student opting for this approach must file a plan of study listing relevant courses, the
faculty member(s) involved, and the rationale. To pursue the individualized concentration, the student must obtain written approval of the plan by the major advisor, DGS, and the Department Chair.
The plan and signed approvals are placed in the student's file. With rare exceptions, a customized field may not be the major field of study.

History Course Listing
INTERNATIONAL STUDIES - Dept. Code: INS
www.as.miami.edu/international-studies/

DEGREE PROGRAMS
The Department of International Studies offers interdisciplinary social science programs leading to the Ph.D. and MA degrees. Ph.D. and MA programs offer advanced students the opportunity to study issues such as globalization, democratic governance, comparative and international political economy, post-Cold War conflicts and security threats, new forms of civil society mobilization in world politics, global environmental challenges and the management of the global commons. To organize the study of these debates in the social sciences, the Department offers three major fields of specialization:

- **International Relations**: international relations theory; globalization; social movements beyond the nation-state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.

- **Comparative Politics**: theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship; comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.

- **International and Comparative Political Economy**: the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; international economic theory; applied macroeconomics, etc.

Ph.D. Degree Requirements
The Department’s Ph.D. program’s primary objective is to prepare a relatively small group of highly qualified doctoral students for careers in academic teaching and research. The requirements include:

- Complete a total of 66 degree credits (12 semester courses) to obtain the Ph.D. degree (i.e., 36 credits at the doctoral level beyond the MA degree).
- Complete one seminar on quantitative methods and one seminar on qualitative methods in the social sciences.
- Complete a sequence of two core seminars in two of the Department’s three major fields of study: International Relations; Comparative Politics; and International and Comparative Political Economy.
- Pass written and oral examinations in two of the Department’s three fields of study.
- Complete at least one of the basic core seminars in the third (non-examination) field.
- Complete the Doctoral Workshop.
- Successfully defend a dissertation proposal/prospectus.
- Pass a foreign language examination.
- Complete 12 dissertation credits.
- Research, write and orally defend a dissertation that makes an original contribution to knowledge.
See the INS Graduate Student Handbook (insert link) for a complete description of the requirements for the Ph.D. degree.

**MA Degree Requirements**

The Department’s MA program prepares students for careers in international diplomacy, business, trade and finance, for service in government and non-governmental organizations and international institutions, and with the necessary degree and academic training to enter a doctoral program. The requirements include:

- Complete ten semester courses (30 credits).
- Complete a seminar on social science methodology.
- Complete two of the core seminars in one of the Department’s fields of study, and at least one of the core seminars in either of the other two fields. These fields include: International Relations; Comparative Politics; International and Comparative Political Economy.
- Pass a written qualifying (comprehensive) examination in one of the three fields of specialization.
- Pass a foreign language examination.
- MA candidates with a cumulative grade point average of at least 3.5 may, with the permission, substitute the qualifying examination with a written MA thesis.
- See the INS Graduate Student Handbook (insert link) for a complete description of the requirements for the MA degree.

**International Studies Course Listing**
**LATIN AMERICAN STUDIES - Dept. Code: LAS**

http://www.as.miami.edu/lasp/degrees/masters

http://www.as.miami.edu/lasp/degrees/filas

**DEGREE PROGRAMS**

**MASTER OF ARTS IN LATIN AMERICAN STUDIES**

A. The M.A. in Latin American and Caribbean Studies is a 36-credit interdisciplinary degree, with a strong emphasis on Latin American politics and U.S.-Latin American relations as well as opportunities to specialize in History, Literary and Cultural Studies, and other fields.

B. The program consists of two core Latin American and Caribbean seminars and a minimum of eight or nine additional seminars to be taken as electives.

C. Students are required to write a master’s thesis or pass a comprehensive exam.

D. Students must demonstrate advanced language competence in either Spanish or Portuguese by passing a course taught in the target language at the 500-level or above, or by passing an equivalent language competency exam.

Students must also demonstrate basic knowledge of a second Latin American language by passing a course at the 105 level or equivalent.

E. The Latin Americanist faculty have research expertise and teach a broad variety of graduate level seminars on topics ranging from
   1. Globalization and social change.
   2. Latin American and Caribbean literary, film, and cultural studies.
   3. Social and political movements.
   4. Regime transitions, democratization, and citizenship.
   5. Museums and representations of identity.
   6. Civil-military relations.
   7. Political economy of market reforms.
   8. Colonial and post-colonial studies.
   10. Latin American and Caribbean political thought.

With approval from the Director of Latin American Studies degree programs, students may also take their elective credits with Latin Americanists in other Schools such as Communication, Law, Business, or Marine Sciences.

**FILAS (Fellows in Latin American Studies)**

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM’s world-class faculty in various academic disciplines, **FILAS** participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, **FILAS** students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Public Health, Environmental
Studies, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master’s level):

- One gateway seminar in Latin American Studies
- Two History courses
- Two International Studies courses
- Two Economics courses
- Three advanced Languages and Literatures courses
- Seven courses in Study Abroad
- Two courses as internship/co-op credits
- Three courses above the 300-level (third-year) in a range of disciplines
- Ten courses in one focus track

150 total credits

FILAS students also write a thesis based on an original research project. In addition, they present their findings in a meeting of the UM Center for Latin American Studies in their final semester.

FILAS ADMISSION REQUIREMENTS
- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in FILAS, emphasizing prior language or area study
- To continue through the Master’s level, students must maintain at least a 3.4 GPA and they must take the GRE Exam.

Latin American Studies Course Listing
LIBERAL STUDIES - Dept. Code: MLS  
www.as.miami.edu/mals

DEGREE PROGRAMS

The Liberal Studies program is founded on an interdisciplinary approach to issues and questions central to the history and development of human culture. It is designed to provide a broad understanding of these issues and questions through a focused and systematic program of study drawing upon faculty from various disciplines in the humanities, the social sciences, and the basic sciences.

THE MASTER OF ARTS IN LIBERAL STUDIES

The Master of Arts in Liberal Studies degree requires 24 credits, plus a six-credit thesis OR an additional six credits of coursework and a representative portfolio. In addition all students are required to participate in the MALS Writing Seminar. The curriculum is drawn from three core courses as well as additional courses designed for MALS students. Students may select from other graduate level courses with the approval of the director.

For the program with a thesis, a candidate must complete a minimum of 30 credits on the graduate level which includes:

- Three 3-credit core courses.
- 15 approved graduate credits.
- Six credits for thesis.

For the program without a thesis, a candidate must complete a minimum of 30 credits on the graduate level which includes:

- Three 3-credit core courses.
- 21 approved graduate credits.
- A portfolio representative of works completed.

For further information regarding this program, please write to:  
Master of Arts in Liberal Studies Program  
125-G Memorial Classroom Building  
Coral Gables, FL 33124-2302

Liberal Studies Course Listing
MATHEMATICS - Dept. Code: MTH
www.math.miami.edu

DEGREE PROGRAMS

The Mathematics Department offers graduate degree programs leading to the

- Master of Arts
- Master of Science
- Doctor of Philosophy

Prerequisites and requirements for these degrees are described below:

MASTER OF ARTS IN MATHEMATICS
A. Prerequisite:
   A minimum of nine credits in mathematics courses numbered 200 and above is required.
B. Requirements:
   1. A total of 30 credits must be earned; at least 18 credits of which are in mathematical courses numbered 500 or above. These courses must include at least one of the following year-long sequences: 513-514, 515-516, 524-525, 531-532, 533-534, and 561-562. All courses from other departments must be numbered 600 or above, be pertinent to the teaching of secondary school mathematics, and be approved by the graduate committee.
   2. A three-hour written examination covering the material in one of the year-long sequences listed above.

MASTER OF SCIENCE IN MATHEMATICS
A. Prerequisite:
   A minimum of 15 credits in mathematics courses numbered 200 and above is required.
B. Requirements:
   1. A total of 30, 33, or 36 credits in approved courses must be earned, depending on whether at least 15, 12-14, or 9-11 credits, respectively, are in mathematics courses numbered 600 and above.
   2. A minimum of 24 credits must be earned in mathematics courses.
   3. At least two of the basic sequences 531-532, 533-534, and 561-562 are required.
   4. Three written exams, at least two of which are on the basic sequences of the above list, must be passed.

DOCTOR OF PHILOSOPHY IN MATHEMATICS
The following requirements are in addition to the general requirements for the Doctor of Philosophy Degree as described by the Graduate School (see section on Doctor of Philosophy elsewhere in this Bulletin).

1. A minimum of 36 credits must be earned in mathematics courses numbered 600 and above.
2. All four basic sequences 630-631, 632-633, 640-641, and 661-662 or their equivalents are required.
3. Preliminary and three written qualifying exams must be passed. Of these written exams, two must be from the above basic sequences; the other may be another from the basic sequences or in the candidate’s area of specialty.
4. A proficiency in one of the languages French, German, or Russian must be demonstrated.
MASTER OF SCIENCE IN STATISTICS
The university offers an interdepartmental M.S. degree in statistics. The program is a cooperative effort between the Department of Mathematics and the Department of Management Science. For details, see the section of this Bulletin entitled Interdisciplinary and Interdepartmental Programs.

Mathematics Course Listing
MODERN LANGUAGES AND LITERATURES
Dept. Codes: FRE, GER, ITA, MLL (former FLL) POR, SPA
www.as.miami.edu/mll

DEGREE PROGRAMS

The Department of Modern Languages and Literatures offers programs leading to the Ph.D. in Romance Studies with concentrations in French and Spanish. Graduate course work comprehends all major periods and areas, providing the breadth needed for interdisciplinary work and required of today’s teachers. The program is designed to prepare students for careers as university professors, teachers and research scholars. It includes training in advanced language, teaching, and research skills that may also contribute to other professions. For additional information on teaching and research opportunities, faculty, program policies and application requirements, visit http://www.as.miami.edu/mll/graduate/.

The Ph.D. in Romance Studies (with concentrations in French and Spanish) is designed to prepare you for a career as a university professor and research scholar. It also provides training in advanced language, teaching, and research skills that can be used in other professions. The requirements set out below for the Ph.D. in Romance Studies are minimum requirements; the Committee on Graduate Studies, the Director of Graduate Studies, or your advisor may set additional requirements.

1. a) for students entering on the “five year plan” (B.A. or M. A., see below), passing satisfactorily a minimum of 45 credits in approved courses;
b) for students entering on the “four year plan” (M.A., see below) passing satisfactorily a minimum of 36 credits in approved courses;

2. passing “Introduction to Literary Theory” (MLL 611; former MLL 505), “Introduction to Modern Language Teaching” (MLL 611; former MLL 503), and a minimum of 3 graded credits in each of the following areas:

<table>
<thead>
<tr>
<th>French</th>
<th>Spanish</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Middle Ages and/or 16th Century</td>
<td>• Middle Ages and/or Golden Age</td>
</tr>
<tr>
<td>• 17th Century and/or 18th Century</td>
<td>• 18th-19th-Century Spain and/or 20th-Century Spain</td>
</tr>
<tr>
<td>• 19th Century and/or 20th Century</td>
<td>• Colonial Latin America</td>
</tr>
<tr>
<td>• Francophone Studies</td>
<td>• 19th-Century Latin America</td>
</tr>
<tr>
<td></td>
<td>• 20th-Century Latin America</td>
</tr>
</tbody>
</table>

Note: Ordinarily, students will take at least two graduate courses in the dept each semester.

3. in addition to proficiency in English and the language of study, demonstrating the following
   a) reading knowledge of two other languages, or
   b) holistic knowledge of one other language by passing the equivalent of a course on at least the 300-level;
Note: In consultation with the student’s advisor, appropriate languages of study will be determined (e.g. Latin American literature students may be encouraged to study Portuguese; students of Early Modern literature may be encouraged to study Italian, etc.)

c) if area of specialization is Medieval or Early Modern (including Colonial Latin America), then also demonstrating reading knowledge of Latin.

4. passing a breadth exam that covers either three periods in one region or two periods in two regions;

5. passing a qualifying exam, on an approved topic;
The exam includes three general approaches that focus on literature, theory, and a cognate discipline (e.g. history, sociology, art, film, etc.);

6. successfully defending a dissertation prospectus;

7. completing and defending satisfactorily a dissertation;

8. satisfying the requirements of the Graduate School as stated in the Bulletin.

ADMISSIONS REQUIREMENTS

We accept applications for Fall admission only, and only for doctoral study (we do not have an independent Master’s program). You may apply for the Ph.D. while holding either a B.A. or an M.A. degree.

The priority deadline to apply to begin classes in Fall 2009 is January 15, 2009 (all fellowships and most teaching assistantships are awarded to those who apply by this deadline). However, we will continue to accept applications through March 15, 2009

Your completed application must include the following (incomplete applications will not be considered):

1. A completed application form, including a detailed statement of purpose. We only accept on-line applications. Visit our web page for on-line application instructions: http://www.as.miami.edu/mll/graduate/admissions.html

2. A completed Graduate Assistantship Application (to be considered for departmental and university awards).

3. Three substantial letters of recommendation (please provide each recommender with a cover sheet, available on line at: http://www.as.miami.edu/mll/graduate/admissions.html).

4. GRE scores, mailed directly from the testing agency (optional if you hold an M.A. degree and do not wish to be considered for fellowships)

5. Official transcripts from all colleges and/or universities you have attended and listed in your application. If the transcripts are from international institutions, you must provide an official translation.

6. A substantial writing sample in English (research papers are preferable)
7. A substantial writing sample in the language of study (French or Spanish; research papers are preferable)

8. International students only: TOEFL scores, mailed directly from the testing agency

9. Application fee of $65.00.

Letters of recommendation and other printed materials should be sent to:

Graduate Program Admissions  
Department of Modern Languages & Literatures  
University of Miami  
P. O. Box 248093  
Coral Gables, Florida 33124-4650  
FAX: 305-284-2068  
E-mail: grad.fll@mail.as.miami.edu

We strongly encourage African-American and Hispanic candidates to apply for the Florida Education Fund domestic African American and Hispanic McKnight Doctoral Fellowships. Applications must be postmarked no later than January 15th of each year. The Fellowship is open to any incoming domestic Ph.D. African American or Hispanic student in ANY discipline. You may apply online at www.fefonline.org. The Florida Education Fund may be reached at (813) 272-2772. If an applicant who is accepted into our Ph. D. program receives a McKnight Fellowship, the College of Arts and Sciences will increase the amount of the fellowship’s stipend to match the current Teaching Assistantship stipend amount.

Modern Languages and Literatures Course Listing

Course Listings for: French and Spanish
PHILOSOPHY - Dept. Code: PHI
www.as.miami.edu/phi

DEGREE PROGRAMS

The requirements for the Master of Arts degree in philosophy may be satisfied in two ways.

A. The first is through
   1. passing satisfactorily a minimum of 24 course credits in philosophy, at least 12 of which must be at the 600 level;
   2. presenting and defending orally an acceptable thesis;
   3. satisfying the requirements of the Graduate School as stated in this Bulletin.

B. The second is through
   1. completing satisfactorily a minimum of 45 course credits in philosophy, at least 24 of which must be at the 600 level;
   2. passing a comprehensive examination;
   3. satisfying the requirements of the Graduate School as stated in this Bulletin.

The requirements for the Ph.D. degree in philosophy

A. Course requirements
   Satisfactory completion of a minimum of 45 course credits in philosophy, at least 24 of which must be at the 600 level. Students are required to pass the following 500-level courses:
   1. Logic requirement: PHI510
   2. Ethics requirement: PHI530 or 533.
   3. One course from the epistemology and metaphysics group: PHI540-545.
   4-5. Two courses from the history group: PHI560-583.

B. Qualifying examination
   A comprehensive qualifying examination must be taken before the student’s dissertation proposal is approved. It is a broad examination in a general area of philosophy close to the student’s proposed dissertation topic or intended area of specialization, for example, epistemology, philosophy of mind, metaphysics, or ethics and political philosophy. The examination is based on a list of core texts in the area in question, but some of the required texts are chosen for each student individually by the committee for qualifying examinations. Students can apply for Ph.D. candidacy after they have passed this examination and their dissertation proposal has been approved.

C. The language requirement
   A student who submits a dissertation proposal must possess the linguistic proficiency required by the proposed dissertation topic. This is determined by the dissertation proposal committee on the basis of examinations or coursework.

D. Ph.D. dissertation
   Presentation and oral defense of an acceptable dissertation.

E. The requirements of the Graduate School as stated in this Bulletin

Philosophy Course Listing
DEGREE PROGRAMS

All graduate students in physics must plan their entire program with the advice and approval of a departmental advisor.

The program of graduate studies in physics emphasizes research work, but also includes teaching experience as an essential element. Research and thesis opportunities are at present available in the fields of astrophysics and cosmology, atmospheric and ocean optics, complexity, condensed matter physics, elementary particle theory, plasma physics.

In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

A. Submission of scores on the Graduate Record Examination (Aptitude Test and Advanced Test in Physics) with the application for admission.
B. A minimum of 24 physics course credits at the 500-600 level are required for the PhD.
C. The following specific courses, or their equivalent, are required for the PhD degree: PHY 540, 560, 561, 623, 650, 651, 670, 671. Also required: three additional physics lecture courses at the 500 or 600 level.
D. For the M.S. degree no more than three credits for reading courses may be counted, and no more than two credits of seminars. Up to six credits may be earned in thesis work for this degree.
E. The physics department offers a comprehensive graduate examination each year. A passing grade at an appropriate level is required for either the M.S. or the Ph.D. A student is required to take the exam each year and is allowed two attempts toward a passing grade.
F. Courses taken outside the department should be relevant to the students program and approved by the graduate advisor.
G. Students are required to participate in research at the earliest opportunity. Specifically, upon passing the written graduate examination and before the end of the following semester, the student is required to select a faculty member who consents to serve as the students Ph.D. thesis advisor. Student and thesis advisor are to form, in a timely fashion, a dissertation committee to review an oral presentation of the student’s initial research activities and future plans. Should a student need to select a new thesis advisor, this selection must be made without delay, and the review process must be repeated.
H. Renewal of financial support from the department is contingent, each semester, upon satisfactory performance of teaching duties and research activities, and upon timely progress towards completion of all requirements for the Ph.D. degree.

Physics Course Listing
POLITICAL SCIENCE - Dept. Code: POL  
www.as.miami.edu/politicalscience/graduate

DEGREE PROGRAMS

The Department of Political Science offers a Masters degree in Public Administration.

The requirements for the Masters in Public Administration degree are:

A. Thirty-six to forty-eight credits at the graduate level, depending on government management experience and academic preparation.

B. Completion of core and specialized track course requirements as specified by the POL Department in consultation with the student’s career goals and interests.

C. An option exists for those students who wish to complete in five years their Bachelors degree and a Master of Public Administration. Contact POL Department for details.

D. All other requirements as stated in sections Requirements for the Master of Arts Degree and General Information.

SECOND MASTERS DEGREE IN PUBLIC HEALTH (MPA/MPH)

The Master of Public Administration/Master of Public Health combines programs from the College of Arts and Sciences and the School of Medicine and is designed for students who seek an in-depth knowledge of management and public policy administration with training in public health.

It is possible for full-time students to complete the requirements for both degrees requirements within two and one-half years.

Interested students must apply and be accepted by both Departments. For further information, contact the Department of Political Science at (305) 284-2401 or the Department of Epidemiology and Public Health at (305) 243-6759.

Political Science Course Listing
PSYCHOLOGY - Dept. Code: PSY
www.psy.miami.edu

DEGREE PROGRAMS

Ph.D.

I. The principal goal of the graduate program in Psychology is that of preparing the student for a career contributing to the growth of scientific knowledge in psychology.

II. Applicants for admission to graduate status in psychology shall have
   A. a minimum average of B over-all
   B. at least 18 hours of psychology that must include courses in Introductory Psychology, Statistics, and Experimental Psychology or Research Methods.
   C. Students lacking the necessary preparation must ordinarily make up deficiencies prior to admission to the Graduate School.

III. All applicants must present the Graduate Record Examination (Aptitude Tests; Advanced Test in Psychology preferred). In all cases admission to graduate degree programs in Psychology is competitive, since available resources do not permit admission of all qualified applicants.

IV. The Ph.D. programs are categorized into three Divisions:
   • Health Psychology (including Health Clinical Psychology, Behavioral Medicine and Behavioral Neurosciences)
   • Child Psychology (including Clinical Child Psychology, Pediatric Health Psychology Applied Developmental Psychology)
   • Adult Psychology (including Adult Clinical Psychology)
     1. All Ph.D. programs in Psychology require a minimum of 72 credits, including thesis and dissertation credits:
     2. Psychology 680 and 681 will not be counted toward the 72 credit minimum.
     3. A Master of Science in Psychology based upon 24 credits of course work and six credits of Master's thesis research is required in all programs.
     4. In cases in which a student has a prior graduate degree, the number of credits required for the Ph.D. may be reduced at the discretion of the Department.
     5. All programs in Clinical Psychology require an internship.

V. All students must successfully complete six foundation courses
   A. PSY 604, 605, 614, 620, 625, and 640 or 641.
   B. methodological courses 631, 632, and either 633, 634 or 698.
   C. A minimum grade average of B is required for all students.
   D. All students seeking an advanced degree in Psychology must participate substantially in the teaching of course offerings in the Psychology Department as an essential part of their education.

DEGREE PROGRAMS

The Department of Sociology at the University of Miami offers two graduate degrees, the Master of Arts (M.A.) and the Doctor of Philosophy (Ph.D.). Graduate study in the Department of Sociology equips students with the theoretical, methodological, and analytical tools required for teaching, research, and scholarship in academic and non-academic settings.

I. The Ph.D. program in Sociology

Graduate students in the Ph.D. program are encouraged to choose concentrations from three substantive program areas: (1) Criminology; (2) Race & Ethnic Relations; and (3) Medical Sociology. Although the strengths of the department lie within these major programmatic fields, students may also plan one course of study that meets their own research interests and career objectives. Our current faculty and graduate students study a wide range of exciting topics, including Aging/Life Course, Crime/Delinquency, Economics of Crime, Health Economics, Mental Illness, Morbidity/Mortality, Neighborhood Context, Race/Ethnicity, Racism/Discrimination, Sex/Gender, Social Psychology, Socioeconomic Status, and Substance Abuse.

II. Requirements for the Master of Arts degree with a major in Sociology are:
   A. Candidates must complete at least 31 hours of graduate credit at the 500 level or above.
   B. Candidates must submit and successfully defend a thesis in accordance with current Graduate School policy.
   C. Course work must include Sociology 601, 602, 604, 610 or 613, 611, and 615 or 616.
   D. Six credit hours must be counted toward thesis work.
   E. No more than 6 hours of “independent study” can be applied toward the M.A. degree.
   F. With prior departmental approval, 3 hours of course work in a related discipline may be counted toward the M.A. degree.
   G. A maximum of 6 hours can be transferred from acceptable graduate institutions.

III. Requirements for the Ph.D. degree with a major in Sociology are:
   A. Candidates must hold an M.A. degree.
B. Candidates must complete at least 42 hours of graduate credit beyond the M.A. degree.
C. Course work must include Sociology 612, one of 613 or 610, 622, 615 or 616, and 18 hours split evenly between two of our three areas of concentration.
D. Some candidates may be required to complete courses in areas where they have incomplete backgrounds (e.g., statistics, research methods, or theory).
E. Candidates must pass four comprehensive examinations.
F. Candidates must submit and successfully defend a dissertation in accordance with current Graduate School policy.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department.

Marketing

DEGREE PROGRAMS

The School of Business offers the following degrees:
Doctor of Philosophy in Economics, Marketing, Management, and Management Science
Master degree in Business Administration (MBA)
Master of Professional Accounting
Master of Science in Taxation
Non-degree executive education programs are also available

The requirements for the Doctor of Philosophy degree are the same as those listed in the general section of this Bulletin.

MASTER OF BUSINESS ADMINISTRATION

The University of Miami School of Business offers two full-time Master of Business Administration degrees.

FULL-TIME TWO-YEAR MBA PROGRAM

The Full-time two-year MBA Program is innovative, flexible, and career focused. It is designed to meet the needs of the student with an undergraduate background in business as well as the student who is just entering the business arena. The curriculum not only prepares business leaders of the future, but also adds a valuable dimension to other professions.

UM's Full-time MBA program is a 56-58 credit, lock-step program that is completed in less than two calendar years. Students typically enroll in elective courses during the third semester and the first term of the fourth semester of the program. Students may be able to complete a concentration based on completion of appropriate electives.
CURRICULUM

YEAR ONE

FALL SEMESTER – Building Management Skills

Term 1-1
BUS 604 MBA Career Development and Enrichment

Term 2-4
BSL 690 Legal and Ethical Implications of Business Decision Making
MGT 677 Corporate Strategy and Organization
MKT 650 Strategic Marketing

Students may be able to complete a concentration based on completion of required electives. Areas of concentration include: Accounting, Computer Information Systems, Finance, International Business, Management, Management Science, Six Sigma, Management Science Consulting, Marketing, and Real Estate. Elective offerings are based on student demand. Students beginning the program in January obtain a cross-functional MBA in lieu of a concentration. This multi-disciplinary MBA program will expose students to various areas of business.

FULL-TIME ONE-YEAR MBA PROGRAM

The Full-time one-year MBA Program is offered once per year in January. This program is designed to meet the needs of the student with an undergraduate degree in business, who graduated in the last seven years from an accredited university. The curriculum prepares business leaders of the future, adding a valuable dimension to their education.

CURRICULUM

The One-Year MBA program is a 33-credit, cohort program that is completed in one year. There are no summer classes. Internship opportunities may be available through the Ziff Graduate Career Services Center during the summer months. The program is “lock-step” and students progress together through a sequential pattern of sixteen 2-credit courses, eight of which are electives and one 1-credit course. There are two semesters totaling 28 weeks of class time. Each semester consists of two 7 week terms. There are no prerequisite courses required. Concentrations are not available or granted.

DUAL DEGREE PROGRAMS

The University of Miami offers dual degree programs in the areas of JD/MBA, MD/MBA, and Master of Science in Industrial Engineering. Dual degree programs are only available in conjunction with the Full-time two-year MBA Program. Admissions and all requirements for each program must be fulfilled in order to apply to the MBA program. Effective Spring 2010, Architecture students will be able to apply to the BARCH/MBA dual degree program.

For more information on dual degree programs, please contact the Office of Recruiting and Admissions at 305-284-2510 or visit our website at www.bus.miami.edu/grad.

INTERNSHIPS

The School of Business encourages students to augment their classroom experience through a comprehensive internship program. Students who are interested in internships must register with the Ziff Graduate Career Center as soon as they arrive on campus.

ADMISSION REQUIREMENTS

The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited colleges or universities. Acceptance is based upon an evaluation of all credentials presented by the applicant. The following are the requirements for admission for both the Full-time two-year and one-year MBA Programs:

- Completed application, which includes an essay
- Application Fee of $100.00
- Resume
- Transcripts
- Letter(s) of Recommendation
- Official GMAT Score Report
- Test of English as a Foreign Language (TOEFL), if applicable
- International Student Financial Statement, if applicable
- Campus Visit, encouraged
- Interview, optional but may be required
EXECUTIVE MBA PROGRAMS AND THE MBA FOR WORKING PROFESSIONALS

The University of Miami offers Executive MBA Programs and an MBA for Working Professionals that are designed for accomplished professionals who are ready to take their career to the next level. Participants gain insight and understanding into the business environment by gaining a more global outlook and are better equipped to meet the challenges of today's business world. They become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations.

CURRICULUM

To obtain detailed program curricula on the Executive MBA and MBA for Working Professional Programs, please reference the program brochures which can be requested by contacting the Office of Recruiting and Admissions at (305) 284-2510 or visit our website at www.bus.miami.edu/grad.

EXECUTIVE MBA

The Executive MBA programs provide business executives and professionals the opportunity to earn an MBA by attending class on Saturdays. Saturday programs include:

- Executive MBA
- Executive MBA - Health Administration and Policy Concentration
- Executive MBA - Master of Science in Industrial Engineering Dual Degree
- Executive MBA – Off Campus Programs across Florida in Tampa, Orlando, and Palm Beach County and in Puerto Rico (anticipated start date of October 2009)

ADMISSION REQUIREMENTS

- Completed application
- Application Fee of $100.00
- Resume
- Transcripts
- Letter(s) of Recommendation
- Official GMAT Score Report, may be required
- Test of English as a Foreign Language (TOEFL), if applicable
- International Student Financial Statement, if applicable
- Campus Visit, encouraged
- Interview, optional but may be required

MBA FOR WORKING PROFESSIONALS

The MBA for Working Professionals Program also provides professionals the opportunity to earn an MBA by attending class on Monday evenings and Saturday mornings. The program offered under this structure includes:

- MBA for Working Professionals
ADMISSION REQUIREMENTS

- Completed application
- Application Fee of $100.00
- Resume
- Transcripts
- Letter(s) of Recommendation
- Official GMAT Score Report, may be required
- Test of English as a Foreign Language (TOEFL), if applicable
- International Student Financial Statement, if applicable
- Campus Visit, encouraged
- Interview, optional but may be required
MASTER OF SCIENCE IN PROFESSIONAL MANAGEMENT (MSPM)

The Master of Science in Professional Management with a concentration in International Business is a graduate business program targeted to Spanish-speaking executives and working professionals. Although the program is taught in Spanish, textbooks are in English; therefore, a reading knowledge of English is required.

The program is designed especially for managers and executives who live in or work extensively with Latin America.

This 36-credit hour program is taught in five, two-week sessions.

Each session students take two classes and earn six credit hours. Additionally, there is a six credit supervised, independent directed study course related to the students business to be completed by the end of the program. The same group of students progress through the entire program.

CURRICULUM

Session 1
- CIS 621 Management Information Systems 3 credits
- MGT 651 Behavioral and Organizational Systems 3 credits
- ESP 734 Research Project 6 credits

Session 2
- ACC 607 Financial Accounting & Reporting 3 credits
- MKT 660 Foundations of Marketing Management 3 credits

Session 3
- BSL 696 Legal and Ethical Implications in Executive Decision Making 3 credits
- FIN 602 Fundamentals of Finance 3 credits

Session 4
- ECO 675 Economic Problems of Latin America 3 credits
- MGT 659 Management of Multinational Enterprise 3 credits

Session 5
- BSL 612 Legal Aspects of International Business 3 credits
- MGT 658 Strategic Management 3 credits

TOTAL CREDITS 36 credits

ADMISSION REQUIREMENTS

- Completed application
- Application Fee of $100.00
- Resume
- Transcripts
- Letter(s) of Recommendation
- Campus Visit, encouraged
- Interview, optional but may be required

MSPM graduates can seek an MBA degree by continuing their studies through an additional three, two-week sessions consisting of 24 credits. For more information, please contact the Office of Recruiting and Admissions at 305-284-2510.
CERTIFICATE PROGRAMS

GENERAL BUSINESS CERTIFICATE

The General Business Certificate program provides professionals and graduate students an opportunity to add basic business courses to their portfolio. The program consists of four three-credit courses in functional areas of accounting, finance, management and marketing. Students can take one or more courses for credit but must satisfactorily complete all four courses to be awarded the certificate. Students must have an undergraduate degree to be eligible for this certificate. Classes meet on Saturday from 8:00 a.m. – 12:00 p.m. and 1:00 p.m. – 5:00 p.m.

CURRICULUM
ACC 600 Accounting for Decision-Making and Control (3 credits)
FIN 602 Fundamentals of Finance (3 credits)
MGT 600 Managing Responsible Behavior in Organizations (3 credits)
MKT 660 Foundations of Marketing Management (3 credits)

For complete information on the General Business Certificate program, including course dates and descriptions, please visit the Graduate Business Programs website at www.bus.miami.edu or call 305-284-2510.

ADMISSION REQUIREMENTS

The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited colleges or universities. Acceptance is based upon an evaluation of all credentials presented by the applicant. The following are the requirements for admission:

- Completed application
- Application Fee of $50.00
- Resume
- Transcripts

INVESTMENT CERTIFICATE

The Certificate in Investments program offers a rigorous and structured course of study in the field of investments. It is designed for those with an MBA degree who want training in this field beyond what is typically available from the core MBA curriculum. Taught over 15 Saturdays, the coursework spans topics in investment analysis, portfolio construction, and financial derivatives. Applicants should have an MBA degree from an accredited institution. Applicants with undergraduate business degrees with appropriate experience will also be considered on an exceptional basis. Classes meet on Saturday from 8:00 a.m. – 12:00 p.m. and 1:00 p.m. – 5:00 p.m.

CURRICULUM
FIN 620 Investment Analysis
FIN 621 Portfolio Construction and Management
FIN 622 Financial Options and Futures
For complete information on the Investment Certificate program, including course dates and descriptions, please visit the Graduate Business Programs website at www.bus.miami.edu or call 305-284-2510.

ADMISSION REQUIREMENTS

The Graduate Admissions Committee welcomes applications from individuals who have already obtained an MBA degree from an accredited college or university. Acceptance is based upon an evaluation of all credentials presented by the applicant. The following are the requirements for admission:

- Completed application
- Application Fee of $50.00
- Resume
- Transcripts
RESEARCH INSTITUTES

INSTITUTE FOR THE STUDY OF QUALITY IN MANUFACTURING AND SERVICE

The University of Miami Institute for the Study of Quality in Manufacturing and Service (UMISQ) exists to advance the theory and practice of Quality Science. Its mission is to promote the improvement and innovation of quality on local, national, and international levels through the acquisition, dissemination, and application of knowledge in the areas of science, technology, and management as related to Quality Science in general, and Lean Six Sigma Management specifically.

Objectives

1. To conduct research in Quality Science and to publish its results through appropriate professional and academic outlets.
2. To educate and train management, labor, UM students, and others in the theories and practices of Quality Science in general, and Lean Six Sigma Management specifically.
3. To create internships for M.B.A. students in which they can solve real world problems using Quality Science theory and practice in general, and Lean Six Sigma management theory and practice in particular.
4. To remain financially self-sufficient.

The Institute pursues its objectives through involvement of faculty, students, and client organizations in all sectors of the economy.

INTELLIGENT COMPUTER SYSTEMS RESEARCH INSTITUTE

The Intelligent Computer Systems Research Institute is a center for research and information dissemination in applied artificial intelligence.

Applied Artificial Intelligence is the use of science and technology to assist the human mind (and body as in an intelligent robot) to do something it already does, or would like to be able to do faster, more elegantly, even innovatively.

The devices, the artifacts-computers, knowledge machines, logical circuits, inference engines, software-to accomplish such ends are designed and programmed by humans.

Multidisciplinary studies will cover areas of computer technology and software as applied to business, education, engineering, law, medicine, government, communications, and other fields in which the computer enhancement of mental capabilities should be significant.

The Institute acts as a repository and communicator of applied artificial intelligence knowledge.
THE GRADUATE STUDENT ASSOCIATION

The Graduate Student Association (GSA) is the student government organization representing students in the Graduate School (and all schools and colleges included under the Graduate School). Established in 1969, the GSA is one of the oldest graduate student governments in the United States. The primary function of the GSA is to provide the means for responsible and effective graduate student participation in the planning and conduct of University affairs. The GSA serves as a liaison between graduate students, individually and collectively, the faculty and the administration. In addition, the GSA exists as a social and intellectual forum to support and improve the quality of the graduate student environment at the University of Miami.

The Graduate Student Association is made up of seven officers and nearly fifty full- and part-time senators; the role of the GSA is both supervisory and implementary, and its scope encompasses both academic and social interests of the University’s graduate student body. Officers and Senators meet regularly to discuss important issues and are often required to attend University-wide meetings with faculty, staff, administration and fellow students. The Graduate Student Senate is the primary body that represents the interests and concerns of the entire graduate student body at the University of Miami. The Senate is made up of one representative from every graduate department or program (currently there are 46 recognized graduate programs) at the University of Miami. The Senate coordinates most of the graduate activities and programs that the GSA sponsors, and acts as a hub for the exchange of information between different departments and programs. Typically, senators are either elected or appointed by their peers or program directors and serve for a one-year term. Each senator has one vote in the senate. Throughout the semester, the senate can issue directives, bills and resolutions pertaining to any aspect of graduate student life at the University of Miami, and works extremely closely with the Dean of the Graduate School in effecting changes and/or improvements.

The Senate, also as part of its charge, decides on and elects the new Executive Board of the Graduate Student Association each spring semester. Alternates are also elected or appointed to assist the senator when they are unable to carry out their duties.

The office of the GSA is located at Suite 21-T, 5606 Merrick Drive, please call 305-284-6750, e-mail: gsa@miami.edu, or visit our website at www.miami.edu/gsa for more information.

GRADUATE ACTIVITY FEE ALLOCATION COMMITTEE (GAFAC)

The unallocated portion of the graduate activity fee produces an annual fund that is available for graduate students to seek for enrichment of their various activities. The monies are allotted by a graduate student committee composed of nine elected representatives from Architecture, Arts and Sciences, Business, Communication, Education, Engineering, International Studies, Music and Nursing; and the Treasurer of the Graduate Student Association.

Petitions for funds are judged on the merits of the individual requests, the anticipated direct or indirect benefit to the University, the effort of the petitioners to generate support from other areas, past experience with the petitioning group, if applicable, and the current amount of funds available.
Forms for petitions are available in the Office of the Vice President for Student Affairs, Room 244, Ashe Building.

THE GRADUATE BUSINESS STUDENT ASSOCIATION

The Graduate Business Student Association (GBSA) is a professional and social student-run organization. All graduate business students become members once enrolled in a business masters program and are encouraged to attend meetings and events. The GBSA organizes presentations by executives from the business community on topics of interest to graduate students, and sponsors numerous social events and activities. The GBSA is governed by a committee that consists of a president, vice president professional, vice president social, secretary, member relations, treasurer, and promotions director. Elections take place at the end of each spring semester.

FINANCIAL ASSISTANCE

GRADUATE ASSISTANTSHIPS AND FELLOWSHIPS

There are a limited number of merit-based graduate assistantships which are awarded at the time of admission to qualified full-time MBA students entering in the fall semester only. Graduate Business Programs begins awarding assistantships in March. A graduate assistantship covers a portion of tuition for the MBA degree. Graduate assistantships are not automatically renewed.

In addition to graduate assistantships, there are a limited number of Emery Means Findley, Jr. Fellowships and scholarships which are awarded by Graduate Business Programs to applicants with outstanding academic credentials. Any applicant who wishes to be considered for a graduate assistantship or a fellowship, must indicate this in the space provided on the application. Awards are available to both domestic and international students.

DONOR SCHOLARSHIPS

Several endowed scholarships are made available to incoming graduate business students on a one-time basis through the generosity of alumni and friends of the University of Miami School of Business Administration. These donor scholarships are for the purpose of recruiting students of high academic merit. The total number and amount of scholarship awards vary from year to year.

Scholarships will be awarded based on the recommendations of the Faculty Admissions Committee on a first come, first served basis. Since the number of scholarships is limited, students who meet the minimum criteria are not guaranteed a donor scholarship award.

We regret that a student is ineligible for financial awards if he/she receives tuition benefits from the University of Miami or accepts any assistantship, scholarship, grant or fellowship from the University of Miami, in addition to our offer. This includes employees, their spouses, and dependents.
BANK OF AMERICA - ENDOWED BUSINESS SCHOLARSHIPS*
Criteria: A graduate business school student based on a combination of scholarship and financial need, who will preferably specialize in Finance, Accounting, or Management.

JACK R. BORSTING - GRADUATE SCHOLARSHIP ENDOWMENT
Criteria: Outstanding candidate for a master's level business degree.

PATRICK J. CESARANO – ENDOWED SCHOLARSHIP*
Criteria: Outstanding candidate for a master's level business degree.

PAT & LON WORTH CROW - SCHOLARSHIP ENDOWMENT*
Criteria: Graduate business student specializing in Finance, who possesses several years of work experience, preferably with an expressed interest in a career in banking or a banking-related field. U.S. citizen, preferably resident in South Florida community.

EMY MEANS FINDLEY, JR. – ENDOWED GRADUATE FELLOWSHIPS IN BUSINESS
Criteria: Outstanding candidates for Graduate Business Programs.

ALBERT AND ESTHER GREEN ENDOWED SCHOLARSHIP
Criteria: Graduate Business Student with a health challenge, or student studying or working in Health Administration.

ALLAN M. HERBERT & PATRICIA M. HERBERT – ENDOWED GRADUATE BUSINESS SCHOLARSHIP*
Criteria: Outstanding graduate business student, well-rounded, willing to finance his/her own education, and who appreciates the value of work and strives to combine study, work and extra-curricular activities.

JAMES W. McLAMORE – GRADUATE BUSINESS FELLOWSHIPS
Criteria: To recruit and retain outstanding graduate business students.

BRUCE E. MCLAUGHLIN & CYNTHIA M. SWOL - ENDOWED SCHOLARSHIP IN MARKETING*
Criteria: Graduate business student with concentration in Marketing, who has significant work experience prior to entering the MBA program. U. S. citizen, with preference given to female students with unmet financial need.

MERRILL LYNCH & CO. FOUNDATION, INC. – FELLOWSHIPS IN INTERNATIONAL FINANCE
Criteria: Graduate business student preparing for a career in International Finance.

SOUTHEAST BANKING CORPORATION FOUNDATION – ENDOWED SCHOLARSHIPS*
Criteria: Graduate student in the MBA program who is a Florida resident. Based on academic excellence and financial need.
* Essay Required

In 300 words or less, please explain why you need financial assistance to complete your MBA degree. The essay must be included with your application.

Various other donor scholarships are available based upon need, merit, or other specified criteria.

Students enrolled in M.A. or PH.D. programs through the Department of Economics should be aware of the following:

1. All candidates for the degree are required to be involved in teaching and/or research activities. The teaching and/or research is intended to be of primary benefit to the recipient in furtherance of his/her education and training.

2. Limited scholarship assistance is available on a competitive basis to Ph.D. candidates. These scholarships are not intended as compensation for services but are intended to assist outstanding students in furthering their education.

ZIFF GRADUATE CAREER SERVICES CENTER

A. The Ziff Graduate Career Services Center’s mission is to provide top quality resources and career guidance to School of Business graduate students and build strong partner relationships with the corporate community.

1. The Ziff Career Services Team is committed to providing each student a personalized program and the resources and skills needed to be competitive in the marketplace.

2. The Ziff Career Services Team is the student’s frontline resource to securing employment upon graduation. Students who engage with the Ziff Graduate Career Services Center will utilize the staff to assist them in developing an effective career strategy and marketing campaign that will prepare them for a successful job search at all levels of their career. The marketing campaign will equip the student with a strategic résumé, perfect their interview skills, generate contacts, develop networking opportunities, and prepare them for a successful career transition.

B. RESOURCES

1. Ziffcareercenter.com – The center’s online portal where students find access to the Ziff Professional Network, links to many of Ziff’s career resources, access to all current job postings and upcoming events.

2. Careerleader – An assessment tool specifically developed for MBA students that provides expert assessment of a student’s unique pattern of business relevant interests, values and abilities.

3. InterviewStream – Take a virtual interview which will provide feedback and tips of non-verbal behavior and communication missteps.

4. Careershift - a tool that provides you access to thousands of national contacts based on company, alumni affiliation, location and create targeted contact lists. One-stop location to conduct national and local job search for both full-time and internship opportunities.

559
5. Vault.com – Provides inside information and advice on industries, companies, the job search and industry interview prep.
6. MonsterTrak – Job search tool to search graduate level jobs and internships from local and national companies.
7. GoingGlobal – the leading provider of both country-specific and USA city-specific career and employment information. Features 30 Country Career Guides, 41 USA City Career guides, corporate profiles and more than 500,000 internship and job listings within the USA and around the world.
8. US Jobs – For international students to identify opportunity for H1B jobs and Visa sponsorships.
9. Myvisajobs.com - Current job listings and information on companies that hire international students.

C. REGISTRATION
1. Graduate business students that are seeking employment post graduation are required to register with the Ziff Graduate Career Center to commence your Career Management Plan.
2. The registration process begins with the Pre-MBA On-Boarding Program. Students are required to complete key assignments prior to orientation.

D. ON CAMPUS INTERVIEWS/CORPORATE RECRUITING
1. The recruiting program begins in the fall semester from mid-September through mid-December and continues from mid-January through May.
2. The Ziff Graduate Career Center has a national focus, contacting Fortune 1000 and southeast regional companies to form a recruiting relationship with them to increase exposure for University of Miami School of Business Administration graduates.
3. MBA/Masters students can utilize the Ziff Graduate Career Services Center’s Internet Employment system, www.ziffecareercenter.com to sign up for on-campus interviews, monitor corporate presentation schedules, upload resumes and cover letters, and stay abreast of job opportunities offered by companies that are recruiting on campus and to access the Ziff Professional network.

E. INTERNSHIPS
1. The School of Business Administration encourages students to augment their classroom experience through participation in a summer internship.

F. CAREER EMPLOYMENT LISTINGS
1. The School of Business has established relationships with many companies both locally and nationally.

2. The Ziff Graduate Career Center regularly receives career opportunities that are made available through www.ziffecareercenter.com to students and alumni alike so they can review career opportunities listed with the center.

G. RÉSUMÉ BOOKS
1. Each year, the Ziff Graduate Career Center produces for employers, targeted résumé books of graduating students and students seeking summer
internships.

2. With the student’s permission, the Ziff Graduate Career Center will place the student’s résumé on the Ziff Web Résumé Book, providing access to recruiters throughout the world, who seek University of Miami résumés.

H. CAREER INFORMATION

1. Company contact information can be accessed by students through many resources including the Ziff Professional Network, CareerShift, LinkedIn and MiamiAlumni.net.

2. Available online resources are Vault, and many other sources providing comprehensive business information via the Web. Additional corporate information is available in the Career Resource Room in the form of business publications and newspapers.

3. Students can access numerous popular web sites listing positions both nationally and internationally using state-of-the-art computers in the Ziff Resource Room.

I. NETWORKING CONTACTS

1. Ziff Professional Network – Students can increase their network by using the online Ziff Professional Network tool. The network includes employer contacts and alumni who serve as mentors, provide career advice and are willing to share their industry knowledge and work experience.

2. 'Cane Connections is an online University of Miami database that allows students to talk to alumni throughout the United States about their work experiences and gather other career related information. The database is a valuable network of contacts in a variety of fields. It is accessible through www.miamialumni.net.

3. Students are invited to join the School of Business MBA group on Linkedin and Facebook, an easy way to reach out to more contacts and build your network circle.

J. STUDENT RESPONSIBILITY

1. Ultimately, success in securing a job is defined by the student. Together with the Ziff Graduate Career Center as a partner, the student can create a successful marketing campaign that will connect him/her to a network of contacts and networking opportunities leading to interviews and job offers.

2. Students are to register online with the Ziff Graduate Career Center during the Pre-MBA On-Boarding cycle. All pre-MBA assignments need to be completed prior to orientation. The career action plan and strategy will be built through numerous advising appointments and workshop events.

3. Students are required to meet with a career advisor in term one to discuss their career goals and develop a personalized career action plan/marketing campaign that will lay out the strategy and timing sequence of their goals.
4. Students are expected to visit the Ziff Graduate Career Center regularly and access [www.ziffecareercenter.com](http://www.ziffecareercenter.com) to identify and attend on-campus recruiting activities, corporate presentations, relevant workshops and MBA clubs sponsored events.

The Ziff Graduate Career Services Center is located in the School of Business complex on the first floor of the Jenkins Building.

**THE MENTOR PROGRAM**

1. The School of Business Mentor Program is designed to enhance the classroom experience by matching students one-to-one with local professionals working in the students’ area of career interest, or versed in areas of professional development.

2. Through personal interaction with experienced business professionals, students gain an understanding of corporate culture, career directions, and networking. Students also have the opportunity to interact with other mentors by attending regular roundtables, hosted by the School.

3. Graduate business students are encouraged to participate.

4. Applications are available at the School of Business Office of Alumni Relations, 215 Jenkins Building. Phone: 305-284-4052
DEGREE PROGRAMS

The Department of Accounting offers two degree programs leading to the Masters degree:

Master of Professional Accounting (MPrA) and
Master of Science in Taxation (MST).

While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation.

For the undergraduate accounting major these programs should satisfy the educational requirements to become eligible to be a CPA in the State of Florida as well as in most other states. The State of Florida requirements include (for students with an undergraduate degree from an accredited university):

1. an additional 30 semester credit hours of work beyond the bachelors degree (not necessarily at the graduate level),
2. 36 semester hours of accounting beyond principles of accounting (ACC 211 and 212)
3. 39 semester hours of other business courses including at least 6 semester hours of Business Law.

Additional information on CPA exam requirements may be obtained from the Department of Accounting.

For admission to both programs, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant’s undergraduate grade point average, GMAT score (required), and grades in specific accounting courses, the rigor of the undergraduate program, and other factors such as work experience. Admission decisions are made on a competitive basis from the applicant pool.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score.

Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses.

SCHOLARSHIPS

University of Miami School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available. An application may be obtained from the Department.
MASTER OF PROFESSIONAL ACCOUNTING (MPRA)

This program offers the highest degree of concentration in financial and managerial accounting, auditing and systems that are needed by accounting professionals in public accountancy and industry.

Emphasis is placed on the development and ongoing evolution of generally accepted accounting principles and auditing standards, product costing trends and issues and familiarization with the computer as an important tool of the accounting professional.

The MPRA is an ideal program for those who will seek employment with public accounting firms as auditors or with industry or government as accounting and information specialists.

The MPRA is designed for the student who has taken the accounting and related courses required for an undergraduate major in accounting.

These students should be able to complete the MPRA in a year or less provided they enroll as full time students.

The MPRA requires 30 semester hours consisting of the courses listed below, provided the student has an undergraduate major in accounting, which satisfies AACSB accreditation standards.

Students pursuing the MPRA Degree must take the required courses specified and may select additional accounting courses as electives in consultation with the program director.

Students must complete a total of 30 semester hours from the following:

Required Courses (12 Hours):

ACC 602 - Analysis of Financial Statements
ACC 604 - Seminar in Cost Accounting
ACC 610 - Accounting Research and Theory
ACC 622 - Advanced Issues in Auditing

Elective Courses (18 Hours):

In addition to the above required courses, a student must select 18 credit hours in other courses, which may be earned at the 500 or 600 level. Students may take non-accounting courses with the permission of the Department, but at least 6 hours of the 18 hours of electives must be in accounting courses. In preparation for the CPA exam, students may wish to take Business Law 575, Advanced Business Law. Altogether, of the 30 credit hours required to complete the MPRA, no more than 6 credit hours may be earned at the 500 level.

In consultation with the program director, students may select from the following courses:

601 - Trends in Present Day Accounting
603 - Studies in Financial Reporting Issues
606 - Internal Auditing
611 - Auditing Seminar
620 - Accounting Controls in Information Technology
621 - Advanced Cost Accounting
Undergraduate Course Requirements

The courses listed below are undergraduate prerequisites that, unless already completed, must be fulfilled in order to be admitted for graduate study. For certain graduate tax classes the undergraduate equivalent of Corporate and Partnership Income Tax (ACC 404: Advanced Taxation) is required. If a candidate does not have an undergraduate business degree, additional business prerequisites (economics, marketing, management, finance and others) will also be required.

Principles of Financial Accounting (ACC 211)
Managerial Accounting (ACC 212)
Intermediate Financial Accounting I and II (ACC 311 and 312)
Cost/Managerial Accounting (ACC 301)
Fundamentals of Taxation (ACC 403)
Auditing (ACC 402)

MASTER OF SCIENCE IN TAXATION

This program affords the accounting major or equivalent the opportunity to specialize in the area of federal taxation.

Emphasis is placed on a thorough grounding in the principles of tax research, corporate taxation, and taxation of partnerships and partners.

Courses address issues in both tax compliance and tax planning.

Through electives, students are able to expand their areas of expertise, so that they may adequately prepare themselves for careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government.

The program requires 30 semester hours, taken from the following:

Required Courses (12 Hours):

ACC 640 - Corporations I
ACC 641 - Corporations II
ACC 643 - Tax Research
ACC 645 - Partnerships
Elective Tax Courses (6 to 12 Hours) from the following:

ACC 647 - Estates and Gift Taxes
ACC 649 - Issues in Tax Policy
ACC 662 - Taxation of Multinational Corporations
ACC 623 - International Accounting and Taxation

Other electives - 6 to 12 hours.

GRADUATE CERTIFICATE PROGRAMS IN ACCOUNTING AND TAXATION

The Graduate Certificate in Accounting and the Graduate Certificate in Taxation programs are designed for students who have an undergraduate degree in accounting and wish to complete the educational requirements to become a CPA in Florida. The Graduate Certificate in Accounting consists of 12 semester hours in graduate level accounting (or tax) classes (other than ACC 600, ACC 607, ACC 608, ACC 670, ACC 671, ACC 672, and ACC 673 which are for MBA non-accounting students). The Graduate Certificate in Taxation consists of 12 semester hours in graduate level tax or accounting classes of which at least 9 semester hours are in taxation.

Applicants for the Graduate Certificate in Accounting or Certificate in Taxation must have an overall undergraduate GPA of 3.0, a GPA of 3.0 or higher for upper division (300-level and above) accounting courses, and completed all of the requirements for an undergraduate accounting major before beginning to take graduate classes. Students who have taken their undergraduate accounting classes at an accredited school other than the University of Miami will be evaluated on an individual basis (and may need a higher GPA to meet our admission standards).

Students must satisfy all prerequisites for classes they wish to take. Students can choose to take less than four courses under this program; however, they must complete 12 semester hours in graduate accounting or tax classes at UM to receive a certificate. Students wishing to take more than 12 semester hours of graduate accounting or tax classes would have to apply and be admitted to the Master of Professional Accounting or the Master of Science in Taxation program before taking any additional courses. Students with a 3.25 or better GPA in the graduate accounting courses can have these courses count for both the Certificate and the Master's program so that students could move into one of the Master's degree programs with no loss of credits.

Accounting Course Listing
BUSINESS LAW - Dept. Code:  BSL

The Department of Business Law does not offer a graduate degree program.

ECONOMICS - Dept. Code: ECO

DEGREE PROGRAMS

The Department of Economics offers the Master of Arts and Doctor of Philosophy degrees. Applicants for admission to graduate study in Economics should have an extensive background in Economic Theory and Quantitative methods.

I. The Master of Arts program may serve as a terminal degree for students preparing for careers in business, government, international agencies, or teaching, or as the first phase of a prospective doctoral program. The program of study, which consists of thirty credits, is structured as follows:

a. All Master of Arts students must take the following core that consists of the following courses:

i. a 500-level mathematical economics course (ECO 510)
ii. a 500-level econometrics course (ECO 520)
iii. a 500-level macroeconomics course (ECO 521)
iv. a 500-level microeconomics course (ECO 533)
v. a 600-level macroeconomics course (ECO 621)
vi. a 600-level microeconomics course (ECO 633)
vii. a 500 level mathematics course (MTH 512)
viii. 600 level econometrics (ECO 620)

b. Additional requirements are as follows:

i. two courses in an area of specialization in a major economic discipline (e.g., international trade) or two related disciplines (e.g., health economics and labor economics)

ii. comprehensive examinations over the core and area of specialization

c. Furthermore, all applicants must submit their scores on the GRE, hold a baccalaureate degree from an institution of recognized standing, and have demonstrated, by their undergraduate record, capability of completing an M.A. program. In addition, foreign students are required to score 550 on the Test of English as a Foreign Language.

2. The Ph.D. program prepares the recipient for a variety of career opportunities, including university teaching, federal, state, and local government employment, and a host of employment opportunities in the private sector. The Ph.D. program, which consists of a total of sixty credits, is structured as follows:

a. All Doctor of Philosophy students must take the core that consists of the following courses:

i. 500-level mathematical economics courses (ECO 512)
ii. a 500-level macroeconomics course (ECO 521)
iii. a 500-level microeconomics course (ECO 533)
iv. a 500-level econometrics course (ECO 520).
v. two 600-level econometrics courses (ECO 620, 625)
vi. A 500 level mathematics (MTH 533)
vii. three 600-level microeconomics courses (ECO 633, 634, and 635)
viii. two 600-level macroeconomics/monetary theory courses (ECO 621, 603)

b. Two fields of specialization are required. A field is comprised of two courses. These two fields are selected from the following areas of concentration:
i. ECO 603, 604
ii. international trade (ECO 661, 760)
iii. human resource economics (ECO 511, 586, 611)
iv. cognate areas with departmental approval

c. One elective must be taken. Elective courses may be selected from the graduate offerings of the Mathematics, Computer Information Systems, Management Science, and Finance departments.

d. Additional Requirements:
i. comprehensive examinations covering the core and the one field of specialization
ii. a doctoral dissertation for 12 credit hours.

e. To be considered for admission, all applicants must
i. score a minimum of 1100 on the Graduate Record Examination general tests (combined verbal and quantitative scores),
ii. hold a baccalaureate degree from an institution of recognized standing,
iii. submit two copies of their official undergraduate transcript,
iv. have demonstrated, by their undergraduate record, capability of completing a Ph.D. program.
v. In addition, foreign students are required to score a minimum of 550 on the Test of English as a Foreign Language.

DEPARTMENTS

The School of Communication is a non-departmentalized School with graduate programs in Communication, Communication Studies, Electronic Media, Journalism, Motion Pictures and Public Relations.

ADMISSION REQUIREMENTS

Admission to graduate studies at the Master’s level:

Requirements for admission to graduate status for the Master of Arts or Master of Fine Arts degree in the School of Communication are:

- A baccalaureate degree from an accredited institution
- The School’s official application
- A $50.00 non-refundable application fee
- Official transcripts of all undergraduate and graduate college work
- Three letters of recommendation
- Official Graduate Record Examination (GRE) scores or the requisite portfolio for the M.F.A. in Motion Pictures
- Official TOEFL scores for international students
- A 500-word typed statement of academic and professional goals
- Essays or other writing samples as required by the Journalism and Film Studies programs.

Contact the School’s Graduate Studies Office for further information.

Admission Requirements for Doctoral level studies:

Requirements for admission to graduate status for the Doctor of Philosophy in Communication are:

- A Master’s degree in communication, or in another appropriate field, is required of all applicants. The degree must be in addition to a bachelor’s degree. All degrees must be from accredited institutions.
- The School’s official application
- A $50.00 non-refundable application fee
- Official transcripts of all undergraduate and graduate college work
- Three letters of recommendation
- Official Graduate Record Examination (GRE) scores
- Official TOEFL scores for international students
- Letter of intent – a minimum 500 word typed statement of academic and professional goals
- A copy of the completed Master’s thesis or comparable scholarly work if no Master’s thesis has been completed. If the Master’s thesis is in progress, completed chapters should be submitted.
- Resume
DEGREE PROGRAMS

The School of Communication offers graduate programs leading to the Doctor of Philosophy, Master of Arts and Master of Fine Arts degrees.

COMMUNICATION (Ph.D.)

The Ph.D. program is a highly individualized and innovative program. Students are paired after their first year of study with a faculty member who assists the student in developing the requisite research techniques, teaching, writing, and media skills necessary for an outstanding media, business, industry, or educational career.

Research interests of the School of Communication faculty are diverse. Possible areas of specialization for doctoral work include intercultural communication, health communication, organizational communication, international communication, political communication, interpersonal communication, film studies, public relations, and mass communication.

COMMUNICATION STUDIES (M.A.) is a program designed to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. The 30-credit thesis track program emphasizes the student’s development of research skills. The 36-credit non-thesis track program focuses on a theoretical foundation with emphasis on applied communication.

JOURNALISM (M.A.) is an intensive program of academic study and supervised, hands-on practice designed to develop competitive, high-level newsgathering, reporting, news writing, and news editing skills. Students have the option to concentrate in PRINT JOURNALISM, TELEVISION BROADCAST JOURNALISM, or MULTIMEDIA JOURNALISM. Operating in a converged news bureau setting, the program begins in the fall semester. No prior training or experience in journalism is required.

FILM STUDIES (M.A.) examines the creative, historical, critical and theoretical aspects of motion pictures. The curriculum seeks to develop the student’s research, analytical and writing skills to a high level of professional scholarship and research. Thesis is required.

MOTION PICTURES (M.F.A.) offers programs with emphasis in PRODUCTION, PRODUCING, or SCREENWRITING. Students are required to complete three critical studies courses, three professional development courses, and three production or screenwriting courses. With the approval and supervision of the faculty, each student conceives and executes or produces a major creative project – either a motion picture or a feature-length screenplay. All M.F.A. students must demonstrate competence in a required list of readings or films included in required Film Culture classes. Incoming students without fundamental knowledge or skill in production or screenwriting may be required to take one or more undergraduate courses or complete an intensive production or screenwriting workshop conducted at the beginning of each fall semester.

PUBLIC RELATIONS (M.A.) offers two programs. The 30-credit thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second non-thesis track program builds
from a foundation of public relations and communication courses. A practicum is required in lieu of a thesis for this 36-credit program.

**SPANISH LANGUAGE JOURNALISM (M.A.)** offers a professional news media graduate program taught in Spanish. The various journalism cultures of the Americas are studied and compared. The program serves recent graduates of communication and related programs and mid-career professionals who want to update their skills and advance their knowledge of media theories with information and multimedia technologies, industry and management skills, and ethical and policy knowledge.

Graduate students are encouraged to pursue independent and critical thinking, research and creative work as appropriate to the fulfillment of the requirements of their degree. In addition, the graduate program seeks to support innovative approaches and ideas and to aid in the pursuit of relevant scholarly and creative endeavors.

**DEGREE REQUIREMENTS**

Programs of Study for the Master of Arts and Master of Fine Arts degrees are available with these options:

**MASTER OF ARTS - THESIS TRACK**

For programs including a thesis, the candidate must complete a minimum of 30 credit hours on the graduate level with the approval of a faculty advisor. Of the 30 credit hours, 15 credit hours must be at or above the 600 level. Six credit hours will be earned for thesis work. The thesis may represent an applied research project, original research, or a critical review on a topic approved by a thesis committee. The thesis committee chair must be a member of the Graduate Faculty of the University. A thesis is required in Film Studies, and for thesis-track Communication Studies and Public Relations students.

**MASTER OF ARTS - NON-THESIS TRACK**

Students must complete a minimum of 36 credit hours on the graduate level with the approval of a faculty advisor. Of the 36 credit hours, 18 must be at or above the 600 level.

**MASTER OF FINE ARTS**

The candidate must complete a minimum of 42 credit hours with the approval of a faculty advisor. Of the 42 credit hours, at least 24 must be at or above the 600 level.
GENERAL DEGREE REQUIREMENTS

1. All students in the Master of Arts (M.A.) program will complete the following core courses:

   COM 601 Theories of Communication or CMP 667 Film Culture II

   COM 602 Methods of Communication Research and/or COM 603 Qualitative Research Methodologies

2. All students in the Master of Fine Arts (M.F.A.) program will take 3 courses from Critical Studies, 3 courses from the Professional Development offerings, 3 Production courses, 4 Elective courses, and complete the requisite M.F.A. thesis project.

3. With the approval of a faculty advisor, a student may take from 6 to 15 credits hours in courses outside the School of Communication.

4. Candidates in thesis programs must have their thesis proposals formally approved by their thesis committee following a personal meeting with committee members. Candidates will be given final oral examinations in defense of their thesis.

5. Final (Capstone) Projects or written comprehensive examinations are required in some M.A. programs.

All students should consult the School of Communication Graduate Studies Handbook for additional requirements.

It is the responsibility of the student to apply for graduation either during registration for the final semester or before the date indicated on the Graduate School calendar and the Schedule of Classes. Students who previously applied for a diploma but did not receive the degree must repeat the application procedure. Graduation is based in the following:

a. Students must complete the minimum credits required for their area of study with a minimum GPA of 3.0.

b. Course substitutions will not apply toward graduation without the written approval of the Program Director of the area and the Vice-Dean for Graduate Studies.

c. Students are required to have the approval of the area Program Director and the Vice-Dean for Graduate Studies to take courses at another University.

Communication Studies (M.A.)

The goals of the Master of Arts program in Communication Studies are to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. Students may complete coursework in persuasion, interpersonal, intercultural, organizational, and health communication together with research methods applicable to these areas.
Two programs are offered. The thesis program emphasizes the student’s development of research skills under faculty supervision (30 credits). The non-thesis program focuses on a theoretical foundation with emphasis on applied communication (36 credits). Students will be prepared for leadership positions in public or private organizations at the national or international level, or pursue advanced degrees. Non-thesis students must complete a minimum of 36 credit hours on the graduate level with the approval of a faculty advisor. Of the 36 credits, 18 credit hours must be at or above the 600 level. No more than six hours will be allowed for advanced projects and directed research (599).

COMPREHENSIVE EXAMINATION:

Written Comprehensive Examinations are required for this degree. This exam requires the graduate student to demonstrate an articulate understanding of the primary concepts and issues of their chosen field of specialization within the larger context of communication. Generally, the exam is a total of six (6) hours consisting of 4 separate exams. An oral examination may be required following the written exams.

TOTAL CREDITS = 36

Public Relations (M.A. - Thesis)

This program includes a thesis. Students must complete a minimum of 30 credit hours at the graduate level with the approval of a faculty advisor. Of the 30 credit hours, 15 credit hours must be at or above the 600 level. No more than six hours will be allowed for advanced projects and directed research (599). Six credit hours will be earned for thesis work.

DOCTOR OF PHILOSOPHY IN COMMUNICATION

Students will not be admitted to the doctoral program until they have earned a Master’s degree in communication or in another appropriate field.

Students must complete 57 credits of course work beyond the Master’s degree. Twenty-four credits must be in courses at the 600-level. No transfer credits may count toward these 24 credits.

At a minimum, 12 of the 57 credits must be dissertation credits.

REQUIRED CORE COURSES 21 CREDITS

COM 601 - Theories of Communication
COM 602 - Methods of Communication Research
COM 603 - Qualitative Research Methodologies
COM 604 - Advanced Communication Research Methods
COM 613 – History of Communication
COM 698 – Doctoral Seminars (2 3-credit courses)

School of Communication Electives 9-12 CREDITS

Courses outside the School of Communication 12-15 CREDITS

Examinations

All School of Communication Ph.D. students will be given written and oral qualifying examinations following the conclusion of all course work prior to being admitted to candidacy for the Ph.D. degree. A majority of the examination committee must be members of the Graduate Faculty of the University. A failure to pass the qualifying exams will require the student to retake and pass them within one calendar year. Any student who fails to be admitted to candidacy for the degree within this one-year period will be dismissed from the program.

Dissertation

Students must complete a minimum of 12 dissertation credits. Students must proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been approved by the committee and accepted by the Director of Graduate Studies and the Graduate School. The dissertation must be an investigation of a substantial scholarly topic. A final oral defense of the dissertation is required.

Requirements for Candidacy

Admission to Candidacy is based on:

a. GPA of at least 3.0
b. Approval from Program Director
c. Successful completion of qualifying examinations
DEPARTMENTS
- Educational and Psychological Studies (EPS)
- Exercise and Sport Sciences (ESS)
- Teaching and Learning (TAL)

DEGREE PROGRAMS

MASTER OF SCIENCE IN EDUCATION
The requirements for the degree of Master of Science in Education are described in a separate section.

SPECIALIST IN EDUCATION
The requirements for the degree of Specialist in Education are described in a separate section.

DOCTOR OF PHILOSOPHY IN EDUCATION
The Doctor of Philosophy degree with a major in education is designed to develop personnel competent to conduct research in a particular field of education or behavioral sciences.

Concentrations are offered in:
- exercise physiology (ESS),
- counseling psychology (EPS),
- language and literacy learning in multicultural settings (TAL),
- mathematics and science education (TAL),
- special education (TAL), and
- research, measurement, and evaluation (EPS).

DOCTOR OF EDUCATION
The Doctor of Education degree is designed to develop personnel in education competent to utilize the results of research in practical situations.

Concentration is offered in:
- higher education leadership (EPS)
ADMISSION REQUIREMENTS

Admission to Doctor of Philosophy in Education

1. Consideration for admission to the doctoral program will be based on the following factors:
   a. acceptable Graduate Record Exam (GRE) scores taken within the past five years; international applicants whose native language is not English must pass the Test of English for Foreign Languages (TOEFL);
   b. professional experience relevant to degree program;
   c. undergraduate grade point average of 3.0 or better (on a four point scale);
   d. three letters of recommendation that address the applicant’s academic potential;
   e. available student space in program;
   f. admissions interview (optional for TAL);
   g. personal characteristics relevant to the profession;
   h. For TAL: availability of faculty advisor willing to mentor the student.

2. Upon admission to graduate study, a supervisory committee, consisting of three members, will be appointed by the School of Education.
   a. The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.
   b. The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Associate Dean of Academic Studies in the School of Education.
   c. The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education by the end of the second semester of enrollment or future registration will not be permitted.

3. All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

4. The residence requirement is two full-time consecutive semesters at the University of Miami.

5. The minimum total credits required beyond the Bachelor’s is 60, plus a minimum of 12 dissertation credits.

6. Fifteen credit hours of statistics and research methods are required as prescribed by the supervisory committee.

7. Students are required to maintain enrollment of at least one credit hour on a continuous basis during all fall and spring semesters until such time as they fulfill their doctoral degree requirements. Note: Failure to do so may result in additional fees and/or inability to continue the program.

8. Students are required to complete all Ph. D requirements within 8 years of initial enrollment.
In addition to the formal academic requirements, the School of Education requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education reserves the right to dismiss any student who is academically or personally unwilling or unable to carry out the professional responsibilities of the respective professions for which he/she is being trained. Conduct which may be considered unprofessional may include research or professional misconduct, dishonesty, cheating, plagiarism, sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation, and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.

Admission to Doctor of Education

1. Consideration for admission to the doctoral program will be based on the following factors:
   a. acceptable Graduate Record Exam (GRE) scores taken within the past five years; international applicants whose native language is not English must pass the Test of English for Foreign Languages (TOEFL);
   b. professional experience relevant to degree program;
   c. undergraduate grade point average of 3.0 or better (on a four point scale):
   d. three letters of recommendation;
   e. available student space in program;
   f. admissions interview
   g. personal characteristics relevant to the profession;

2. Upon admission to graduate study, a supervisory committee, consisting of three members, will be appointed by the School of Education.
   a. The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.
   b. The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Associate Dean of Academic Studies in the School of Education.
   c. The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education by the end of the second semester of enrollment or future registration will not be permitted.

3. All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

4. The minimum total credits required beyond the bachelors is 60, including a minimum of 12 dissertation credits.

5. A supporting area consisting of at least 12 credits is required; the student must be qualified for admission to graduate status in this area, and receive approval for enrollment from the appropriate department and from the School of Education.

6. Fifteen credit hours of statistics and research methods are required as prescribed by the supervisory committee.
7. Students are required to maintain enrollment of at least one credit hour on a continuous basis during all fall and spring semesters until such time as they fulfill their doctoral degree requirements. Note: Failure to do so may result in additional fees and/or inability to continue the program.

8. Students are required to complete all Ed. D requirements within 8 year of initial enrollment.

In addition to the formal academic requirements, the School of Education requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education reserves the right to dismiss any student who is academically or personally unwilling or unable to carry out the professional responsibilities of the respective professions for which he/she is being trained. Conduct which may be considered unprofessional may include research or professional misconduct, dishonesty, cheating, plagiarism, sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation, and inappropriate interpersonal behavior. It is up to each student to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.
MASTER OF SCIENCE IN EDUCATION
REQUIREMENTS FOR ADMISSION

1. Admission to the Master of Science in Education is based on the following:
   a. acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English must pass the Test of English as a Foreign Language [TOEFL] and the GRE. Teachers with at least three years full-time teaching experience may apply for a GRE waiver. If a GRE waiver is sought, a 3-page essay on an important educational topic is also required.
   b. completion of a bachelor’s degree from an accredited institution;
   c. acceptable undergraduate grade point average;
   d. three letters of recommendation;
   e. an interview (required by some programs);
   f. personal characteristics relevant to the profession;
   g. teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

2. Students must select a major from the areas offered. A School of Education faculty advisor in the student’s major will be appointed to meet with the student to design a Program of Study. The Program of Study must be on file in the Associate Dean’s Office by the end of the first semester of study or future registration will not be permitted.

3. All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

DEGREE REQUIREMENTS

REQUIREMENTS FOR GRADUATION

1. Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen (in the ESS Dept. or EPS Dept.), a maximum of six credits may be counted toward the total degree requirement, and an oral examination in defense of the thesis will be required.

2. Students must complete a minimum of thirty credits at the graduate level with an average of B and no grade lower than C-. Course substitutions will not apply toward graduation without the written approval of the chairperson of the Department and the Associate Dean. Students are required to have Department and Associate Dean’s approval prior to taking a course at another university.
3. Students enrolled in any Florida Department of Education approved program must fulfill any and all additional requirements (e.g., passing state teacher tests) specified by the program approval.

4. Students are required to complete all master’s degree requirements within 6 years of initial enrollment.

5. Students in counseling must complete the required “Personal Growth Experience” form.

DEGREE PROGRAM REQUIREMENT

In addition to the formal academic requirements, the School of Education requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education reserves the right to dismiss any student who is academically or personally unwilling or unable to carry out the professional responsibilities of the respective professions for which they are being trained. Conduct which may be considered unprofessional may include research or professional misconduct, dishonesty, cheating, plagiarism, sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation, and inappropriate interpersonal behavior. It is up to each student to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.

RECENCY OF CREDIT

All work towards the Master’s degree must be completed within six years of initial enrollment.

SPECIALIST IN EDUCATION

The Specialist in Education is a graduate degree requiring a minimum of 30 hours beyond a Master’s degree. It is administered by the School of Education through the Graduate School.

RELATION TO DOCTORAL WORK

The Specialist in Education is a degree independent of the Doctor of Philosophy in Education. Although there is normally some overlap in coursework, admission to a specialist program does not imply admission to a doctoral program.

ADMISSION TO THE SPECIALIST PROGRAM

Admission to this program is based upon the recommendation of the faculty of the School of Education. Among the factors to be considered are the following:

1. Completion of a master’s degree with an outstanding record from an accredited institution;

2. Adequacy of previous study in the field of education;

3. An appropriate period of successful teaching experience;
4. Acceptable scores on the Graduate Record Examination (GRE) or approval of a GRE waiver. If a GRE waiver is sought, a 3-page essay on an important educational topic is also required.

5. Programs may require an interview.

6. Submission of signed Student Responsibility Checklist and the Graduate Student Honor Code. These documents must be submitted to the Office of the Associate Dean by the end of the student’s first semester of enrollment.

Applications for admission to the program are filed directly with the Graduate Admissions Office in the School of Education. Application papers and further information may be secured by addressing the Department Chair of the specific Doctoral Program.

**DEGREE REQUIREMENTS**

**SUPERVISORY COMMITTEE**

A supervisory committee consisting of three faculty members in the student’s area of study will be appointed by the School of Education.

**CREDIT**

A minimum of 60 graduate credits, (or 30 credits after completion of the Master’s program) is required. The program must include at least 30 graduate credits earned at the University of Miami and at least 18 graduate credits earned following admission to the specialist program. The specialist program of study is developed in consultation with the Supervisory Committee that consists of 3 faculty members (a chairperson and 2 other members).

**MAJOR**

Upon admission to the specialist program, a formal program of study is approved by Supervisory Committee that consists of 3 faculty members.

**COMPREHENSIVE EXAMINATION/PROJECT**

A written examination, portfolio, or capstone project will be required. The written comprehensive examination will cover the student’s program of studies. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the Chairperson of the Specialist Committee.

**RECENCY OF CREDIT**

All work for the degree of Specialist in Education must be completed within six years of initial enrollment.
DEGREE PROGRAM REQUIREMENT

All specialist students must engage in teaching and/or research appropriate to their degree program. In addition to the general academic requirements, the School of Education requires that specialist students demonstrate personal qualities which, in the judgment of the faculty, would permit them to function effectively in their professional capacities. The School of Education reserves the right to dismiss any student who is academically or personally unwilling or unable to carry out the professional responsibilities of the respective professions for which he/she is being trained. Conduct which may be considered unprofessional may include research and professional misconduct, dishonesty, cheating, plagiarism, sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation, and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.

FINANCIAL ASSISTANCE

This applies to all programs. Note: The School of Education provides many forms of financial assistance for students enrolled in its graduate programs. These include tuition discounts, scholarships (including federally funded scholarships), tuition waivers, training fellowships, and other forms of help. Financial assistance is to be used only for enrollment in courses that define each student’s program. Students who are found to have enrolled in courses outside of their programs of study will be charged full tuition for those courses.

Note: Teacher Tuition Discounts does not apply to PhD programs.

MASTER’S DEGREE

HIGHER EDUCATION ADMINISTRATION (Enrollment Management/Student Life and Development)

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management or Student Life and Development, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today’s challenges from a broad-based, highly informed perspective.

Also offered is a Certificate Program for working professionals who already have Master’s degrees and seek career-furthering credentials and skills.
• The Enrollment Management concentration, the product of a unique collaboration between the School of Education and the Division of Enrollments, integrates theory, research, teamwork, and effective communication. It is an interdisciplinary program, with courses also required in the School of Business Administration. Opportunities abound for integrating research and theory in daily practice.

• The Student Life and Development concentration provides knowledge and skills necessary to facilitate undergraduate students’ transition, adjustment and involvement in college, in ways that enhance their academic achievement and lead to persistence and graduation.

Certificate in Enrollment Management or Student Life and Development, Post Master’s Degree (a minimum of 4 courses)

• The Certificate can be integrated into the Master’s Program in Higher Education Administration.
• It can be completed in addition to or after completion of a Master’s Program in Higher Education Administration, or a related field.

DOCTORAL DEGREE

HIGHER EDUCATION LEADERSHIP

The Higher Education Leadership program, which offers a Doctor of Education degree, is committed to preparing high-quality graduates for leadership positions in colleges and universities, state and federal agencies, professional organizations, and other professional leadership roles. The Ed.D program is guided by a practitioner-scholar model that brings together theoretical offerings with training in the application of theory to practical higher education problems. Students can focus on areas of special interest, including choosing dissertation projects that address issues and problems in the higher education work place.

The following programs are offered in Higher Education:

MASTER’S DEGREE
M.S.Ed. in Higher Education

DOCTORAL DEGREE
Ed.D in Higher Education Leadership

**COUNSELING PSYCHOLOGY/COUNSELING**

Programs offered in counseling and counseling psychology are characterized by intensive clinical supervision by faculty members in an on-campus clinic, by strengths in the areas of family systems and health psychology, and by the rich multi-ethnic composition of the community, students and clients.

In addition to the formal academic requirements, the School of Education requires its student to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education reserves the right to dismiss any student who is academically or personally unable to carry out the professional responsibilities of the respective professions for which they are being trained. Conduct which may be considered unprofessional may include dishonesty, cheating, plagiarism, sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation, and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.

**MASTER’S DEGREE**

The M.S.Ed. in counseling is a two year program which includes approximately 60-credits of coursework and a comprehensive examination in one of three areas of specialization:

- **Mental Health Counseling** – This program provides the academic and pre-degree supervision requirements for licensing as a Mental Health Counselor in the State of Florida.
• Marriage and Family Therapy – This program provides the academic and pre-degree supervision requirements for licensing as a Marriage and Family Therapist in the State of Florida and also may lead to qualification for certification by the American Association of Marriage and Family Therapy.

• Counseling and Research – This program prepares students for future doctoral study in counseling psychology and other applied mental health doctoral programs. It provides an advanced level of research training as well as standard training for clinical work. It does not qualify graduates for licensure in Florida.

DOCTORAL DEGREE

• The Ph.D. degree is offered in Counseling Psychology.
• The program is accredited by the American Psychological Association. It follows a scientist-practitioner model.
• The program is characterized by close scholarly relationships between students and faculty.
• Applications for doctoral study are due by January 2. Doctoral applications are reviewed once each year.
• The Ed.D Degree is offered in Higher Education Leadership

THE CERTIFICATE IN BILINGUAL AND BICULTURAL COUNSELING

• This Certificate can be integrated into the Masters Program in Counseling or the Doctoral Program in Counseling Psychology.
• It can be completed in addition to or after completion of a degree program in counseling, psychology or a related field.
• See the Department of Educational and Psychological Studies for a program sheet or www.education.miami.edu. 312 Merrick Building; (305) 284-3001.

**RESEARCH, MEASUREMENT AND EVALUATION**

The graduate programs and courses listed below are designed to prepare students in the broad fields of behavioral research, measurement statistics and evaluation. While primarily oriented to education, they are equally suitable to such allied professions as mental health, exercise physiology, and community agency programs. Both quantitative and qualitative aspects of research are offered.

Exercise Physiology, a specialization within the research doctoral program, prepares students to conduct research in this area, and places an emphasis on the application of scientific research for the practitioner.

**DEGREE PROGRAMS**

Two degree programs are offered:

- **MASTERS DEGREE**: M.S.Ed. in Research and Evaluation.
- **DOCTORAL DEGREE**: Ph.D. in Research, Measurement and Evaluation
Courses include:

DOCTORAL PROGRAMS
The Department of Exercise and Sport Sciences also offers a doctoral program in Exercise Physiology. Coursework specialization is available in this program for persons interested in clinical and research orientation in the area of exercise physiology. Courses include:
ESS520 Cellular Exercise Physiology
ESS521 Systemic Exercise Physiology
ESS530 Laboratory: Techniques in Functional Evaluation of Skeletal Muscle
ESS541 Neurophysiology in Exercise Science
ESS555 Exercise Biochemistry
ESS577 Advanced Nutrition for Sports and Fitness
ESS578 Pharmacology for Allied Health Professionals
ESS579 Principles of Exercise Prescription/Assessment: Cardiovascular
ESS580 Principles of Exercise Prescription: Neuromuscular
ESS586 Laboratory: Exercise Prescription/Assessment
ESS589 Readings in Exercise & Sport Sciences
ESS612 Psychophysiology
ESS641 Aging: Physiological Changes and Their Implications of Training
ESS642 Cardiac Rehabilitation: Phases I - IV
ESS644 Interpretation of the ECG
ESS646 Research Methods in Exercise & Sport Sciences
ESS681 Issues Specific to Women's Health
ESS682 Psychosocial Issues in Women's Health
ESS683 Sports Medicine for the Female Athlete
ESS684 Energetics of Obesity
EPS730 Doctor of Philosophy Dissertation

Courses in Research Competencies (15 credits) and outside supporting field (12 credits) are also required.

Certificate in Women’s Health - A certificate in women’s health is available for those wishing to specialize in research issues, trends, and physiological concerns of women across the female lifespan. These courses may be considered as part of their outside supporting field in the doctoral program and include:

ESS681 Issues Specific to Women's Health
ESS682 Psychosocial Issues in Women's Health
ESS683 Sports Medicine for the Female Athlete
ESS684 Energetics of Obesity

Note: The Women’s Health Certificate consists of 12 credits with a grade of "B" or higher in this specialty. Students will receive a certificate of completion upon completing all coursework in this specialty area.

Exercise and Sport Sciences Course Listing
TEACHING AND LEARNING - Dept. Code: TAL

DEGREE PROGRAMS

MASTER OF SCIENCE IN EDUCATION (M.S.Ed.)
- Early Childhood Special Education
- Resource Teacher in Secondary Mathematics, or in Secondary Science or in Elementary Math-Science-Technology

SPECIALIST IN EDUCATION
- Early Childhood Special Education
- Resource Teacher in Secondary Mathematics, or in Secondary Science or in Elementary Math-Science-Technology

DOCTOR OF PHILOSOPHY (Ph.D.)
- Teaching and Learning with specializations in:
  Language and Literacy Learning in Multilingual Settings,
  Mathematics and Science Education, or
  Special Education

CERTIFICATE
- Professional Training Option (PTO)

MASTER OF SCIENCE IN EDUCATION
The Department of Teaching and Learning offers programs leading to a Master of Science in Education degree for individuals who are currently certified. Note: Students in these programs must meet FLDOE requirements.

Periodically, the School of Education offers various Resource Teacher Education and Advanced Professional Studies programs to specific groups of teachers (cohorts). The purpose of these programs is to prepare teachers to assume leadership roles in various disciplines and to enhance the teachers’ current knowledge of “best practices” in education. Each cohort’s curriculum is designed to meet that cohort’s primary mission. Successful completion of these programs leads to conferral of the Master’s of Education (M.S.Ed.) or Specialist in Education (Ed.S.) degree.

Applications are being accepted only for admission to the Master of Science in Education in Early Childhood Special Education. Applicants must meet the admission requirements of the School of Education. (See requirements for admission under Admission Requirements or www.education.miami.edu)

SPECIALIST IN EDUCATION
The Ed.S. degree is available for teachers who wish to increase their proficiency in their chosen field.

Specializations for the degree are:
Early Childhood Special Education and

The program requires 30 additional credits beyond the Masters Degree (minimum) and is individually designed after admission. Some programs for cohorts of teachers feature lock-step curricula. These programs typically combine students pursuing M.S.Ed. degrees with those pursuing Ed.S. degrees. While all students in these programs follow the same curriculum, students pursuing Ed.S. degrees may receive additional or different assignments. Applicants for the Ed.S. must meet the requirements of the School of Education. Additional information about the Specialist in Education is provided in a separate section.

Applications are being accepted only for admission to the Early Childhood Special Education program. Applicants must meet the admission requirements of the School of Education. (See requirements for admission under Admission Requirements or www.education.miami.edu)

DOCTOR OF PHILOSOPHY

The University of Miami Department of Teaching and Learning offers a Doctor of Philosophy Degree (Ph.D.) in the following areas of study:

- Language and Literacy Learning in Multicultural Settings,
- Special Education,
- Mathematics and Science Education

An individual program of study is planned for each doctoral candidate based upon the student’s past academic and experiential background. This program of study is required to be completed by the end of the second semester of enrollment and submitted to the Office of the Associate Dean. The overall goal of the doctoral program is to provide professional development for individuals interested in careers in teacher education and research in institutions of higher education. Applicants for admission to the doctoral program must meet the requirements of the School of Education. Additional information about the Doctor of Philosophy is provided in a separate section.

Applications to all programs must be submitted electronically, through the Graduate School website.

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida.

The Post Baccalaureate PTO consists of 18 credits and has been designed for those persons who hold a baccalaureate or higher degree in fields other than education and wish to enter the teaching profession. In order to complete the program students must take and pass the Florida Teacher Certification Exam (FTCE).
Courses will be held at the University of Miami, Coral Gables campus. Courses will be offered in the evenings to accommodate working professionals.

Upon completion of the program participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible for a Temporary Teaching Certificate.

For further information about programs of study (including possible course sequences) in the Department of Teaching and Learning, please contact the Department.

Teaching and Learning Course Listing
DEGREE PROGRAMS

The College of Engineering offers courses of graduate study leading to the degrees of
Master of Science,
Master of Science in Architectural Engineering,
Master of Science in Biomedical Engineering,
Master of Science in Civil Engineering,
Master of Science in Electrical and Computer Engineering,
Master of Science in Industrial Engineering, and
Master of Science in Mechanical Engineering.

Ph.D. degrees are offered in the areas of
1. Biomedical Engineering,
2. Civil Engineering,
3. Electrical and Computer Engineering,
4. Ergonomics and Human Factors
5. Industrial Engineering, and

ADMISSION REQUIREMENTS

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or Ph.D. track. Admission guidelines for the various tracks are as follows. Please refer to program specific sections of the bulletin for more information with respect to admission and degree requirements.

- B.S. to M.S.: Minimum criteria for admission into the M.S. track from the B.S. (GPA of 3.0 on a 4.0 scale and a GRE of 1,000 – verbal plus quantitative) is consistent with the general requirements of the University.
- B.S. to Ph.D.: Direct admission to the Ph.D. track by students holding B.S. degrees is limited to students with exceptional credentials. These credentials typically include a minimum GPA of 3.5 on a 4.0 scale and a minimum GRE of 1,200 (verbal plus quantitative). After completion of the Departmental M.S. requirements, students enrolled in the direct B.S. to Ph.D. track may apply for an M.S. degree.
- M.S. to Ph.D.: Criteria for admission into the Ph.D. program for students with an appropriate M.S. degree include a minimum GPA of 3.5 on a 4.0 scale within their M.S. degree program and a minimum GRE of 1,100 (verbal plus quantitative).

The College offers graduate programs leading to degrees in both traditional and interdisciplinary areas of study. The primary focus of the College lies in those areas and problems that cross traditional lines. Given the interdisciplinary nature of programs, flexibility is provided in course selection which allows each student to pursue a program especially tailored to the goals of the individual. Given the strengths of the University, graduate programs are offered in conjunction with other schools or units. These programs include:
• Biomedical Engineering in conjunction with the School of Medicine
• Engineering Management
  Dual M.S. in Industrial Engineering and M.B.A. in conjunction with the School of Business Administration
• M.S. program in Management of Technology in conjunction with the School of Business Administration
• M.S. in Environmental Health and Safety in conjunction with the School of Medicine.

The M.S. and Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

Further details on the various College of Engineering areas of specialization are given under the Departmental and Program headings that follow this section.

Students applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant’s abilities and background.

Students who hold a bachelors degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

A student’s overall program is planned by the student and the student’s advisory committee. Requirements for the M.S. thesis and non-thesis options (not available in all areas of specialization) are shown below.

DEGREE REQUIREMENTS

Requirements for the Master of Science Degree (thesis option):

• An approved integrated program with a minimum of 30 semester credits with an average grade of B or better and no grade below C.
• At least six (6) course credits must be at the 600-level.
• Six credits of the required 30 must be earned in thesis work.
• An oral examination in defense of the thesis.

Requirements for the Master of Science Degree (non-thesis option):

• An approved integrated program with a minimum of 30 semester credits with an average grade of B or better and no grade below C.
• At least twelve (12) of the course credits must be at the 600 level.
• In most departments a 3-credit graduating project is required.

The programs leading to the degree of Doctor of Philosophy comply in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and dissertation.
Applicants for admission to the Ph.D. program will be expected to have superior records in their M.S. and B.S. degree programs, well above average scores on the Graduate Record Examination, and strong letters of recommendation.

At least 18 credits in courses must be taken beyond the requirements for the M.S. degree of which 6 credits must be at the 600 level.

All candidates for the doctorate are expected to complete an appropriate integrated program of studies in preparation for the comprehensive Qualifying Examination.

Students are expected to take their qualifying exams during the first year of enrollment. Admission to candidacy across College of Engineering Departments includes passing the qualifying exam and successful defense of a proposal for research.

Minimum of one year beyond admission to candidacy is usually necessary for the completion of an acceptable dissertation (12 credits or more), whereupon the student is then expected to defend their Ph.D. thesis during the Final Oral Examination.

Departments may have requirements in addition to the above general requirements for their own graduate programs.

Financial assistance is available in the form of fellowships, partial tuition scholarships, teaching and research assistantships, and graduate cooperative assistantships combining study and work assignments with private engineering and architectural firms and government agencies. Financial support is provided predominantly to students pursuing Ph.D. degrees. A minimum graduate GPA of 3.3 must be maintained in order to maintain satisfactory progress.

For further information, write to the Dean of the College of Engineering.

POSTGRADUATE CERTIFICATE PROGRAM

A Postgraduate Certificate Program is available requiring the completion of a minimum of 15 semester hours of individually planned advanced course work in an area of engineering specialization, or interdisciplinary study.

Course sequences culminate at an advanced level, but may begin at a basic level if a new area of specialization is to be undertaken.

The Program must be completed with a grade average of at least C, within a period of five calendar years from the date of enrollment.

No transfer credits will be accepted. International students requiring a student visa must be in a degree program, and cannot obtain a student visa for the Certificate Program; but international students with certain other types of visas may enroll in the Program.

Basic admission requirement for the Program is a bachelor's degree in a recognized field of engineering or registration as a Professional Engineer by examination.

Students demonstrating marked ability in the Program may be encouraged to apply for admission to study for the Masters Degree, and may apply up to six credits toward the M.S. degree.
BIOMEDICAL ENGINEERING - Dept. Code: BME

DEGREE PROGRAMS

I. The Department of Biomedical Engineering offers graduate programs leading to the degrees of Master of Science (thesis or non-thesis option) and Doctor of Philosophy in Biomedical Engineering.

A. The specialty areas of study in Biomedical Engineering include the following:
   1. Biomedical instrumentation and devices
   2. Applications of computers to diagnostic and therapeutic systems
   3. Biomechanics, biofluid dynamics, hemodynamics
   4. Biomaterials, Tissue and cellular engineering
   5. Biomedical signal and image processing
   6. Rehabilitation and neural engineering
   7. Biomedical optics and lasers

II. ADMISSION REQUIREMENTS

A. All students applying to the graduate program are required to submit GRE scores and three letters of recommendation.

B. Students who hold a Bachelors degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate courses, in addition to the regular requirements for the graduate degree.

III. MASTER OF SCIENCE

A. The Master of Science degree offers the graduate student an opportunity to obtain advanced training in selected areas of biomedical engineering and to begin independent research.

B. General requirements for the M.S. degree are listed in this Bulletin under Engineering and under Masters Degree-General.

C. Both a 30-credit thesis option and a 30 credit non-thesis option are available.

D. There is also a 5-year BS/MS option available for qualified undergraduate students enrolled within the Department.

E. The department admits four types of students to its MS program:
   1. Students with BS degrees in Biomedical Engineering or similar engineering fields
   2. Students with BS degrees in Electrical, Computer, Mechanical, Chemical, or similar engineering fields
   3. Students with BS degrees in Physics, Mathematics, Computer Science, Chemistry, Biology or similar fields
   4. Students with MD or similar degrees

F. Students in the last two groups are generally given conditional admission and required to take additional undergraduate courses in engineering, mathematics and science depending on their previous course work as decided by the graduate program director and the designated advisor.

G. There are three paths to earn a Master of Science degree in Biomedical Engineering:
1. The Thesis Option requires a minimum of 30 credits beyond the BS degree. These must include a minimum of 6 thesis credits and the completion of at least two appropriate courses at the 600 level.

2. The Non-Thesis Option requires a minimum of 30 credits beyond the BS degree. These must include at least 3 credits for an independent design or research project for which the student enrolls in BME625. In addition, at least three appropriate courses at the 600 level must be completed.

3. The BS/MS Dual degree Program (see separate section below).

H. The student’s overall graduate program is planned by the student, advisor, graduate program director and the thesis committee (for the thesis option).

   1. The thesis committee consists of a minimum of 3 members.

   a) 2. Two members, including the chair of the committee, shall be faculty members from the BME Department (primary or secondary), and one member must be from outside the Department.

   b) 3. Outside members of the thesis committee can include part-time faculty that teach within the Department.

   c) 4. One of the committee members must be a member of the Graduate Faculty.

I. The three courses of the Unified Medical Sciences sequence (BME 501, 502 and 503) were designed to apprise the engineer of the basic knowledge in the life sciences necessary to work in the broad field of biomedical engineering.

   1. Students coming from traditional engineering field with no biology/medicine backgrounds are required to complete all of the three Unified Medical Sciences courses.

   a) 2. Other students are required to take at least two of the three courses unless the student holds a degree in medicine (MD, DO or equivalent) or an advanced degree (or its equivalent) in the life sciences.

   b) 3. Each such exception requires the approval of the department’s faculty/the instructor for the course of concern.

J. A specific requirement for all M.S. students is the completion of a zero-credit course in Biomedical Engineering Seminar (BME 680).

IV. BS/MS 5-YEAR PROGRAM

   A. This program is available only to qualified undergraduate students enrolled within the Department and described in the Undergraduate Bulletin.

   1. This unique program permits students to receive a baccalaureate degree (BSBE) and a Master of Science (MS) degree in five years.

   2. The two degrees are awarded simultaneously when the combined requirements have been met for both degrees.

   3. Qualified students who want to be enrolled in this program must apply before the end of their junior year and meet all pertinent graduate school and College of Engineering requirements.

   4. In lieu of the 6-credit thesis requirement, the participants complete either one significant design project or two shorter duration projects while registering for BME 605 and 606.

   5. The design project(s) is (are) monitored by at least two mentors, one of the mentors must be a member of the primary faculty in the department.
6. The project(s) is (are) completed by the acceptance of a verbal presentation and a written report by the student’s mentors.

V. DOCTOR OF PHILOSOPHY

A. The Doctor of Philosophy degree offers the graduate student an opportunity to do advanced research.

B. The general requirements for award of the Doctor of Philosophy degree include:

1. Completion of a minimum of 60 credits beyond the Bachelor of Science degree.

2. Satisfactory completion of a qualifying examination.

3. The submission, oral defense, and approval of a dissertation proposal.

4. The submission and oral defense and approval of a dissertation.

5. There are no foreign language competency requirements for the PhD in biomedical engineering.

C. The requirements for admission to the PhD program in biomedical engineering usually include:

1. In general, the department admits three types of students to its PhD program:
   a) Students with MS degrees in Biomedical Engineering or related science and engineering fields.
   b) Students with MD degrees with undergraduate degrees in sciences or engineering.
   c) Highly qualified students with BS degrees in engineering or sciences.

2. The general requirements for admission of BS students to the doctoral degree program are consistent with the admission requirements of the College of Engineering.

3. M.S. thesis candidates who wish to pursue a doctoral degree can transfer to the doctoral degree program without completing a thesis under the following general requirements:
   a) Submission of a manuscript in a peer-reviewed scientific journal in lieu of the thesis.
   b) A letter of support by a faculty member who agrees to serve as the student’s Ph.D. dissertation advisor.
   c) Approval of a change in status application by the Department’s Graduate Admissions Committee.
4. Regulations concerning admission, course requirements, residence requirements, qualifying and final examinations, and dissertation are listed in this Bulletin under Engineering and Doctor of Philosophy.

D. The doctoral program in biomedical engineering requires each student to pass a departmental qualifying screening examination.

1. The screening examination consists of three written examinations on each of the following broad subjects:
   a) basic engineering;
   b) applied mathematics and computer science; and
   c) applied physiology and medical science.

2. These examinations are usually offered once or twice each year.

3. The examination must be taken the first time it is scheduled after completion of the first two semesters.

4. A student may repeat once any or all parts of the examination where the results were found unsatisfactory.

5. Students admitted to the doctoral program with a BS degree that do not pass the qualifying examination may complete the MS degree.

F. Following the successful completion of the departmental qualifying screening examination, the student, with concurrence from the faculty and the Graduate School, establishes a Dissertation Committee (see Doctor of Philosophy section in this Bulletin) and selects a dissertation topic.

1. The dissertation committee is composed of a minimum of 5 members.

2. Three members, including the chair, shall be members of the Graduate Faculty, and one member shall be from outside the Department.

3. A minimum of two members, including the chair of the committee, must be full-time members from the BME Department.

4. A written dissertation proposal is submitted along with an oral presentation to that committee.

5. Acceptance of a dissertation proposal in combination with other examinations as determined by the committee to assure the qualifications of the student for the doctorate leads to candidacy for the Ph.D.

6. Successful defense of the dissertation leads to the award of the PhD degree.
G. All students in the BME Doctor or Philosophy program are required to complete the following course or credit requirements:

1. At least two of the following three courses: BME 501, BME502, BME503.
   
a. Students, who have completed these courses or similar coursework in their previous MS programs, may substitute technical electives for this requirement.
   
b. This requirement can only be waived for students holding MD degrees.

2. A zero-credit Biomedical Engineering Seminar course (BME 680). This requirement is not waived, even if the student has taken this course in his/her MS program.

3. A minimum of 6 course credits at the 600 level beyond the MS degree.

4. Students admitted to the PhD program with a BS degree must complete a minimum of 18 course credits at the 600 level.

5. A minimum of 12 dissertation credits (BME 730 or BME 740)

• 500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students and seniors with graduate standing.

Biomedical Engineering Course Listing
CIVIL, ARCHITECTURAL, AND ENVIRONMENTAL ENGINEERING -  
Dept. Code:  CAE

DEGREE PROGRAMS

The Department of Civil, Architectural, and Environmental Engineering offers graduate programs leading to the degrees of
- Master of Science in Architectural Engineering
- Master of Science in Civil Engineering
- Doctor of Philosophy in Civil Engineering

The specialty areas of study in Civil Engineering include
- structural engineering and structural materials
- environmental engineering
- water-resources engineering

The specialty areas of study in Architectural Engineering include:
- integrated building systems
- environmental systems

In all fields of specialization, up to one-half of the required course work for the selected degree may be taken outside of the Department.

ADMISSION REQUIREMENTS

All students applying to the graduate program are required to submit GRE scores and three letters of recommendation (recommendations not required from University of Miami graduates). Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements.

1. International students should consult the section on admissions.
2. Students who hold a bachelors degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

MASTER OF SCIENCE

A. Requirements for the M.S. degree are listed in this Bulletin under Engineering and under Master’s Degree General.
B. Both a thesis option and a non-thesis option are available.
C. There is also a 5-year B.S./M.S. option available for qualified undergraduate students enrolled within the Department.
D. The student and an advisory committee plan the students overall program.
   1. The advisory committee consists of a minimum of 3 members.
   2. The chair of the committee shall be a full-time faculty member from the CAE Department, one member must be from outside the Department, and one member other than the chair must be either a full-time or part-time member of the Department.
   3. One of the committee members must be a member of the Graduate Faculty.
DOCTOR OF PHILOSOPHY

A. Regulations concerning admission, course requirements, residence requirements, qualifying and final examinations, and dissertation are listed in this Bulletin under Engineering and Doctor of Philosophy.

B. The student and a supervisory committee plan the student's overall program.

C. A separate dissertation committee may be formed to oversee the progress of the dissertation but, in most instances, the student's supervisory committee also serves as the dissertation committee.

D. The supervisory/dissertation committee shall be composed of a minimum of 4 members.
   1. Three members, including the chair, shall be members of the Graduate Faculty, and one member shall be from outside the Department.
   2. A minimum of two members, including the chair of the committee, must be full-time members from the CAE Department.

RESEARCH OPPORTUNITIES - CIVIL/ARCHITECTURAL ENGINEERING

- Current research activities in the Department include properties of concrete materials, such as cellular concrete, composite structural systems, fiber-reinforced concrete, modeling and simulation of engineering materials, multi-scale modeling of materials, fracture mechanics, structural steel behavior, structural health monitoring, structural repair and rehabilitation, energy, indoor air quality, heating, ventilating and air conditioning (HVAC), building material emissions and sorption, air cleaning using photocatalytic or other oxidizing technologies.

RESEARCH OPPORTUNITIES - ENVIRONMENTAL ENGINEERING

- Current research activities in the Department include water quality studies, groundwater, surface-water, and contaminant-transport processes, hydrologic processes, water resources planning and management, water policy, development of new physicochemical water and wastewater treatment processes, potable wastewater reuse, solid and hazardous waste management, health and environmental risk analysis, environmental/economic planning for sustainable development, and hazardous waste remediation.

DEGREE PROGRAMS

I. MASTER OF SCIENCE IN ELECTRICAL AND COMPUTER ENGINEERING
   A. The Electrical and Computer Engineering Department offers the Degree of Master of Science in Electrical and Computer Engineering with 24 course credits and 6 thesis credits or 30 course credits and no thesis.

II. THE FIVE-YEAR B.S.E.E. - M.S.E.C.E DUAL DEGREE PROGRAM
   A. This is a structured and integrated program with a minimum of 158 approved credits including two required courses EEN 615 & 616 as well as 12 Elective courses defined as follows:
      1. At least one Analysis elective courses;
      2. At least two Computer Engineering elective courses;
      3. At least six EEN Elective Courses;
      4. An additional three EEN or Technical Elective courses;
         Elective courses are to be selected in consultation with the advisor.

III. THE FIVE-YEAR B.S.CP.E. - M.S.E.C.E DUAL DEGREE PROGRAM:
   A. This Dual Degree Program requires ten additional courses and replaces three technical elective courses as well as one senior design course currently required under the B.S.Cp.E. Degree.
      These fourteen courses are specified as follows:
      1. Three required courses EEN 368, 615, 616
      2. select two hardware courses from: EEN 532, 542, 614
      3. select two software courses from: EEN 511, 512, 513, 537, 572
      4. select four courses from the following:
         -EEN 336, 436, 519, 534, 536, 538, 540, 548, 553, 568, 570, 571, (573-578), 634, 638, 653, 671, CSC 529, 544
         a) select three additional technical electives in consultation with the academic advisor.
IV. THE FIVE-YEAR B.S.I.T.S.E. - M.S.E.C.E DUAL DEGREE PROGRAM:
   A. This is a structured and integrated program with a minimum of 159 approved credits. These include:
      1. Thirty credits of required courses as follows:
         EEN 307, 315, 316, 336, 404, 454/455, 521, 562, 563, 568, 615, 616;
      2. Fifteen credits selected from the following elective courses:
         a) Six credits of EEN elective courses selected from the following list: EEN 511, 512, 513, 514, 532, 536, 538, 540, 542, 553, 562, 563, 564, 565, 614, 638, 671
         b) Nine credits of Technical Electives selected in consultation with the academic advisor

V. DOCTOR OF PHILOSOPHY
   A. The program leading to the degree of Doctor of Philosophy complies in full with the requirements of the Graduate School concerning admission, residence requirements, qualifying examinations and the dissertation.
   B. Course requirements for the Ph.D. are described under the College of Engineering section.
   C. There is no foreign language requirement.
   D. The Ph.D. program in the Department will concentrate on a variety of emphasis areas for study and research.

500-level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

Electrical and Computer Engineering Course Listing
INDUSTRIAL ENGINEERING - Dept. Code: IEN

DEGREE PROGRAMS

I. Department Mission Statement
The Department of Industrial Engineering mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

II. MASTER OF SCIENCE
A. The Master of Science degree in Industrial Engineering includes the following areas of concentration:
   1. Engineering Management,
   2. Ergonomics and Human Factors,
   3. Health Care Systems,
   4. Management of Technology,
   5. Manufacturing Engineering,
   6. Occupational Health and Safety,
   7. Operations Research,
   8. Productivity Engineering,

B. Students (other than University of Miami graduates) applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant’s abilities and background. Students who hold a bachelor’s degree in a field other than Industrial Engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree. A student’s overall program is planned by the student and the Graduate Advisor.

C. Requirements for the M.S. thesis and non-thesis options are shown below:
   Requirements for the Master of Science Degree (both thesis and non-thesis option):
   1. An approved integrated program with a minimum of 30 semester credits with an average grade of “B” or better and no grade below “C.”
   2. At least twelve (12) course credits must be on the 600 level.

THESIS OPTION (30 Credits)
5 Common Core Courses 15 Credits
3 Elective Courses 9 Credits
Master's Thesis (IEN 710) 6 Credits
TOTAL 30 Credits
NON-THESIS OPTION (30 Credits)

5 Common Core Courses  15 Credits
4 Elective Courses  12 Credits
Master's Project (IEN 694)  3 Credits
TOTAL 30 Credits
(Note: All courses are 3 credit hours unless otherwise indicated)

COMMON CORE COURSES

IEN 612 Design of Experiments
IEN 642 Linear Programming and Extensions (or advanced level Operations Research course)
IEN 657 Ergonomics and Occupational Biomechanics (or advanced level Human Factors course)
IEN 664 Supply Chain Management or IEN 572 Management of Technology (or advanced level Management Course)
IEN 665 Advanced Production Systems

Notes:

i. In addition to the above required courses, the student will have to take other graduate level elective courses to fulfill the degree requirements. A list of approved electives is maintained by the Graduate Advisor in the Department of Industrial Engineering. Substitution of courses is allowed, but must be approved by the Graduate Advisor and the Department Chairman.

ii. 500-level courses are open to advanced undergraduates and to graduate students; 600-level courses are open only to graduate students.

iii. 500-level and 600-level courses are also open to qualified graduate students majoring in other disciplines.

D. An interdisciplinary M.S. degree program in Environmental Health and Safety and an M.S. degree program in Occupational Ergonomics and Safety are offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student’s interests and career objectives.

E. The Department of Industrial Engineering offers a Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering Program (BSIE/MSIE Program).

1. This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering.

2. The special conditions for this Five-Year BSIE/MSIE Program are as follows:

   a) The student must declare his/her intent to participate before the end of the Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
b) A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.

c) To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.

d) The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all requirements are satisfied.

F. The Department of Industrial Engineering, in cooperation with the School of Business Administration, offers three programs:

1. a dual MSIE/MBA weekend executive program,
2. an M.S. in Management of Technology,
3. an M.S. in Quality Management.

For more details on these programs, contact the Department of Industrial Engineering.

III. DOCTOR OF PHILOSOPHY

A. The Department offers a Ph.D. in Industrial Engineering for students with a background in engineering and a Ph.D. in Ergonomics and Human Factors for students with a background in engineering and/or related sciences.

B. General requirements for award of the Doctor of Philosophy degree include:

1. Sixty credits beyond the baccalaureate degree are the minimum requirement for the Ph.D.
2. At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credits must be taken.

C. Course work requirements depend on the student's background, and are established by the Graduate Advisor and the Department Chairman.

D. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.

E. Once a student has completed all course and required research credits, he or she must enroll in “Research in Residence” status until the degree has been granted. “Research in Residence” status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.

F. A written qualifying examination is to be taken by each doctoral degree candidate during the first year of graduate work. The department may specify that the student must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the Graduate Advisor notifies the Department Chairman that the student has passed or failed the examination. A student who fails the examination may be permitted to retake it, with the permission of the Graduate Advisor and the Chairman. Qualifying examinations normally will not be given during the summer months. The applicant must hold a 3.0 average on all credits attempted with no single grade below "C" at the University of Miami while a graduate student.
G. Each student in the Ph.D. program in Industrial Engineering has to take and pass 5 qualifying exams in the following areas: Management of Technology, Ergonomics & Biomechanics, Operations Research, Manufacturing Engineering, and Statistics & Regression analysis.

H. Each student in Ph.D. program in Ergonomics and Human Factors has to take and pass 5 qualifying exams in the following areas: Ergonomics and Human Factors, Industrial Hygiene, Safety Engineering, Biomechanics, and Statistics & Regression analysis.

I. Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.

J. There are no foreign language requirements for the Ph.D. degree.

K. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist not less than four members, three from the Department’s graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research.
2. To meet, at intervals, to review progress and expected results.
3. To read and comment upon the draft dissertation.
4. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
5. The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.
MECHANICAL AND AEROSPACE ENGINEERING - Dept. Code: MAE

DEGREE PROGRAMS

I. The Department of Mechanical and Aerospace Engineering offers courses and provides facilities for two programs of graduate study and research in Mechanical Engineering, leading to the degrees of
- Master of Science
- Doctor of Philosophy

A. The program of study must reflect the importance of underlying principles of the physical sciences and mathematical analysis to all phases of modern mechanical engineering.

B. Within the department, specializations are available in

<table>

C. It is expected that each graduate student will indicate early in his/her graduate work (within the first year), the particular area in which he/she intends to concentrate his/her efforts as well as the faculty advisor for dissertation.

II. MASTER OF SCIENCE

A. One academic year, or equivalent, spent in full time graduate study will be the minimum time necessary for a student to fulfill the requirements for the degree of Master of Science in Mechanical Engineering.

B. General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

C. Students applying for acceptance to degree status must comply with the general requirements of the Graduate School.

D. Both a 30 credit hour thesis option and a 30 credit hour non-thesis option are available.

1. The student taking the Thesis Option must take an oral examination in defense of the thesis.

2. The student taking the Non-Thesis Option must complete a 3-credit Graduation Project at the end of the course program.

3. The Master of Science Degree in Mechanical Engineering (Management Option) can only be taken under the Non-Thesis Option.

   a) This degree specialization combines 15 credits selected from graduate business courses with 15 credits in a graduate engineering area of concentration.

   b) An undergraduate degree in engineering is required.
III. DOCTOR OF PHILOSOPHY

A. The program in the Department of Mechanical and Aerospace Engineering leading to the degree of Doctor of Philosophy complies in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and the dissertation.

B. There is no foreign language requirement.

C. All candidates for the Ph.D. degree are expected to complete an integrated program of studies in mechanical engineering, mathematics, physics and/or chemistry in preparation for the Qualifying Examination.

D. A qualifying examination is to be taken by each doctoral degree student within the first year. In the qualifying examination, the student is expected to demonstrate his/her competence in certain basic courses appropriate to modern mechanical engineering to the satisfaction of the department. A Ph.D. student will be admitted to candidacy after passing the qualifying examination as well as the defense of dissertation proposal.

E. One or two years beyond admittance to candidacy will usually be found necessary for the completion of an acceptable dissertation, whereupon the student will be required to pass the Final Oral Defense of the Dissertation.

F. The candidate may, if he/she so desires, pursue for his/her dissertation an investigation in connection with any of the research projects in progress in the Mechanical and Aerospace Engineering Department or, in the case of interdisciplinary programs, in other Colleges/Schools such as the School of Marine and Atmospheric Science or the Medical School.

500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

IV. CLEAN ENERGY RESEARCH INSTITUTE

A. The Clean Energy Research Institute in the Department of Mechanical and Aerospace Engineering acts as the focal point of energy and environment related activities in the College of Engineering.

B. Its goals are: to conduct research and to generate research proposals to investigate energy and environmental problems; to organize seminars, workshops and conferences using researchers within and without the University; to assemble, compile, publish and disseminate information on every aspect of energy and environmental problems; and to cooperate with other organs of the University, other academic institutions, government and private organizations in connection with the above listed activities.

C. The current activities of the Institute include research into hydrogen as a clean, inexhaustible synthetic fuel, environmental damage caused by fossil fuels, global warming and its remediation, instabilities in boiling systems, solar cooling and heating, hybrid solar collectors, remote sensing applied to energy related problems and solar energy, and organization of national and international conferences and symposia on energy and environmental problems.
V. FLUIDS AND THERMAL SCIENCES LABORATORY
A. The Fluids and Thermal Science Laboratory provides such equipment as a wind tunnel producing wind velocities of 150mph allowing opportunity to study the principles of aerodynamics, the effects of a hurricane, and air pollution modeling. Pressure and velocity measurements, renewable energy by wind power are simulated in this laboratory.
B. Research includes an open water channel that allows basic work on oil booms and boom arrangements to be done.
C. Additionally, air pollution research is conducted through sampling trains and equipment for stack sampling.
D. This laboratory provides research opportunities for both undergraduate and graduate students.

VI. INTERNAL COMBUSTION ENGINES LABORATORY
A. Funded continuously since the 1970s, the Internal Combustion Engines Laboratory is a well-established research laboratory internationally known for its work in designing and testing engines for use with conventional and alternative fuels.
B. Graduate and undergraduate students alike have worked with faculty on numerous projects.
C. The laboratory focuses on issues of performance, energy conservation (fuel economy) and environmental impact (exhaust emissions).
D. Faculty research has received international recognition, and students’ research have been presented in numerous publications and at conferences sponsored by industry, government and academic venues.

VII. HVAC&R AND TWO-PHASE FLOW LABORATORY
A. Due to the significance of HVAC&R in the South Florida region, the HVAC&R and Two-Phase Flow Laboratories have extensive facilities for both undergraduate and graduate education as well as graduate research.
B. This research includes frost formation, boiling and condensation heat transfer, two-phase flow instabilities and alternative HVAC&R technologies using hydrogen hydrides.
C. Due to the significance of HVAC&R in the South Florida region, the HVAC&R and Two-Phase Flow Laboratories have facilities for both undergraduate and graduate education as well as graduate research.
D. This research includes frost formation, boiling and condensation heat transfer and two-phase flow instabilities.

VIII. DORGAN SOLAR ENERGY LABORATORY
A. The Dorgan Solar Energy Laboratory is equipped with a photovoltaic system, a solar air-conditioning system, a solar domestic hot water system, a solar-assisted heat pump system, and a meteorological data gathering station.
B. Both graduate and undergraduate students have worked with faculty on various research projects.
C. In addition to solar energy related projects, current research activities also include research on Hydrogen-Oxygen fuel cells and other energy and environment-related topics.

IX. COMPUTATIONAL FLUID DYNAMICS LABORATORY

A. The CFD lab is equipped with a Beowulf PC cluster parallel computing system with 16 Pentium 4 Xeon 1.7G processors.

B. Current interests are mainly in the area of aerospace propulsion systems including turbomachinery unsteady aerodynamics, fluid-structure interaction, turbulence simulation, design optimization, rocket engine turbopump flow, CFD algorithm/code development, etc.
OCEAN ENGINEERING/APPLIED MARINE PHYSICS

I. Ocean Engineering concentrates on problems associated with the interaction of the ocean and the works of man.
   A. The ocean engineer combines competence as an engineer with both a practical experience in and theoretical understanding of the ocean.
   B. The Ocean Engineering program, offered jointly with the Rosenstiel School of Marine and Atmospheric Science, is intended to lay the foundation of this competence, experience and understanding.
   C. The areas of faculty specialization in this program include coastal engineering, off-shore engineering, underwater acoustics, ocean measurements, marine geotechnics, and naval hydrodynamics.

II. The Master of Science degree in ocean engineering is offered jointly with the Rosenstiel School of Marine and Atmospheric Science.
   A. In addition, Master of Science and Doctor of Philosophy degrees in applied marine physics are offered by the Rosenstiel School of Marine and Atmospheric Science.
   B. See APPLIED MARINE PHYSICS/OCEAN ENGINEERING under RSMAS elsewhere in this Bulletin for information on the applied marine physics.

III. An approved interdisciplinary program is required for the M.S. degree in ocean engineering which consists of a minimum of 30 credits at the graduate level with an average grade of B or better and no grade below C.
   A. The 30 credits are divided among 24 credits in courses and six credits for thesis research.
   B. At least nine of the required credits must be 600 level courses.  
   500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.
INTRODUCTION

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School’s present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969 the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution made through the Rosenstiel Foundation to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of 100 scientists who conduct sponsored research while offering graduate studies leading to the Master of Arts, Master of Science and Doctor of Philosophy degrees. The School offers curricula in applied marine physics, marine and atmospheric chemistry, marine affairs and policy, marine biology and fisheries, marine geology and geophysics, and meteorology and physical oceanography. The School also offers undergraduate programs leading to the Bachelor of Science in Marine and Atmospheric Science degree and the Bachelor of Arts in Marine Affairs.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the art catamaran, unrivaled worldwide for both shallow and deep water research. The vessel, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School, signals a new era in scientific research. The Smith was built in 1999 and placed in service in February, 2000.

The 96-foot-long catamaran is capable of reaching speeds of over 12 knots and has a draft of only 5 feet, which enables it to explore heretofore inaccessible areas such as reefs, mangroves, grassbeds, and other shallow environments. The vessel accommodates 20 people in its ten two-person staterooms and encompasses 800 square feet of laboratory space, as well as an additional 800 square feet of multi-use space astern. Constructed by Eastern Shipbuilding Group in Panama City, Florida, the catamaran boasts twin Cummins engines at 760 hp each, Servogear variable pitch propellers, a 3,000-gallon tank of fresh water plus a reverse osmosis water maker, and 10,000 gallons of fuel storage.
DEPARTMENTS

The Rosenstiel School is made up of six academic divisions through which graduate degree programs are offered. These are:

- Applied Marine Physics
- Marine and Atmospheric Chemistry
- Marine Affairs and Policy
- Marine Biology and Fisheries
- Marine Geology and Geophysics
- Meteorology and Physical Oceanography

DEGREE PROGRAMS

The Rosenstiel School of Marine and Atmospheric Science offers graduate degree programs leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees in applied marine physics, marine and atmospheric chemistry, marine biology and fisheries, marine geology and geophysics, and meteorology and physical oceanography. The division of Marine Affairs and Policy offers interdisciplinary Master of Arts and Master of Science degrees only.

In conjunction with the University of Miami School of Law, the Division of Marine Affairs and Policy at the Rosenstiel School also offers a joint degree program in Law and Marine Affairs. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and the M.A. in Marine Affairs and Policy from Rosenstiel.

The Rosenstiel School admits graduate students in the following categories. Regular admission is for students who wish to pursue a graduate degree. Non-degree admission provides an opportunity for graduate study to qualified applicants who do not wish to work toward an advanced degree but who have special objectives for professional study, or who already hold an advanced degree and desire additional coursework in the field. No more than twelve (12) credit hours may be taken while in non-degree status. A Certificate Program is available in all areas of study. This program provides professional training for any student who requires training in a specific research area but does not require an advanced degree. This program consists of one year full-time study with a minimum of eighteen (18) credit hours. Transient status is a type of non-degree admission available to students enrolled in a graduate program elsewhere but desiring to earn credit at the University of Miami for the purpose of transferring it to the home institution. All graduate students are required to demonstrate the ability to prepare and teach scientific material.

ADMISSION REQUIREMENTS

An application for admission to the Rosenstiel School of Marine and Atmospheric Science consists of the application form, application fee, transcripts, results of the Graduate Record Examination, results of the TOEFL or IELTS exam (for international students), and three letters of recommendation from persons knowing the applicant’s academic abilities. The application must be filed by January 1st in order to be considered for admission the following Fall semester. Students are normally admitted only in the Fall semester; however, applicants who have received a Master’s degree may be considered for Spring admission to the Ph.D. program.
Because of resource limitations, only a small percentage of those applying for graduate study in marine and atmospheric science can be accepted. Undergraduate scholastic performance, the reputation of the school involved, Graduate Record Examination scores, and the letters of recommendation are all considered in evaluating an application.

A complete description of the Rosenstiel School, its faculty, educational and research facilities, curriculum and degree requirements is contained in the Bulletin of the Rosenstiel School of Marine and Atmospheric Science. The current Bulletin and additional information can be found on the Rosenstiel School website located at www.rsmas.miami.edu/grad-studies/.

UNDERGRADUATE PREPARATION

Students interested in pursuing marine or atmospheric science on the graduate level should elect an undergraduate major in one of the basic scientific disciplines. The undergraduate college should be selected on the basis of curriculum, staff strength, and research interests in that major. The student should be careful to satisfy the graduation requirements of his/her own college or university and should consult undergraduate departmental advisors for assistance on individual programs.

The undergraduate course requirements for students applying for graduate study at the Rosenstiel School are detailed below. The courses that are required or strongly recommended are printed in roman type. The courses which should be taken if the student’s program can include them are printed in italic type.

633
DEGREE REQUIREMENTS

THE M.S. PROGRAM
The Master of Science degree is offered in the disciplines of applied marine physics, marine biology and fisheries, marine and atmospheric chemistry, marine geology and geophysics, or meteorology and physical oceanography. It is expected that the normal time for completion of degree requirements for the Masters of Science degree will be two years of full-time study.

Credit Requirements
Twenty-four graduate course credits are required for the Master of Science degree. In addition, the student must enroll for a total of six credit hours of thesis research (710). All students are required to take at least one course outside the division of residence.

Comprehensive Examination
An oral comprehensive examination is required of all students. Some divisions may also require a written component in addition to the oral exam. Each division determines the content and form of the examination and establishes a test date for its students according to general School guidelines. In the event of a failure, a student may be reexamined once, upon the advice of the student’s committee and at the discretion of the faculty of the Division. If granted, the reexamination must be given before the end of the following semester. Students who fail the re-examination are subject to dismissal from the School.

Thesis
A thesis is normally required for the Master of Science degree in marine and atmospheric science. Under certain conditions, the requirement of a thesis may be waived. A paper accepted for publication can be substituted for the thesis (only where the student is the sole author), or the M.S. degree can be bypassed. Both of these exceptions must be approved by the student’s committee, the faculty of the pertinent division, and the School Graduate
Academic Committee. If a thesis is required, a public oral defense of the thesis must take place. The thesis committee must consist of at least three members, one of whom is a regular member of the Graduate Faculty of the University; one member must be from outside the division.

THE M.A./M.S. PROGRAM IN MARINE AFFAIRS

The Rosenstiel School of Marine and Atmospheric Science offers a Master of Arts and Master of Science Program in Marine Affairs and Policy. The M.A. program is designed for students who wish to obtain a Masters degree in a fixed period of time (one year plus a summer). The Master of Arts degree offers an advanced training program in marine science applicable to topics such as the coastal zone and the development of marine resources. Applicants must have a baccalaureate degree from an accredited college or University. This program is for students with interests in the areas of administration, management and the conservation of marine resources. The program will also be useful to high school science teachers who want to upgrade their credentials and bring marine science to the classroom. The M.A. degree is primarily for those students who do not intend to obtain a Ph.D. in science.

The Master of Science degree in Marine Affairs and Policy is an integrated track in marine science and policy and gives students with a strong science background opportunities to build careers in marine resource management. The M.S. offers an academic curriculum for students interested in the application of science and technology to management issues. The M.S. may be completed in two and one half years in an intensive program of five semesters. The M.S. applicant must select and be accepted by one of the five RSMAS physical science divisions in addition to their acceptance into Marine Affairs and Policy. The student’s committee must consist of a chairperson from the Division of Marine Affairs and Policy and a co-chair from the physical science division.

Credit Requirements
Twenty-seven graduate course credits and a three credit internship paper, researched and written on a topic approved by the faculty advisor, are required for the Master of Arts degree in Marine Affairs and Policy. The advisory committee shall consist of at least three members, one of whom is a regular member of the Graduate Faculty of the University; one member must be from outside the division. The Master of Science requires the completion of 30 course credits and six master's thesis credits. A committee of three is required – two co-advisors (one MAF and one from the science division) and one other faculty member from Marine Affairs and Policy. A thesis is required for the M.S. degree and a public oral defense of the thesis must take place. A grade point average of 3.0 or better must be maintained. All students are required to take at least one course outside the division of residence.

Comprehensive Examination
An oral and written comprehensive examination is required of all students in Marine Affairs and Policy. In the event of a failure, a student may be reexamined once, upon the advice of the students committee and at the discretion of the faculty of the Division. If granted, the reexamination must be given before the end of the following semester. Students who fail the re-examination are subject to dismissal from the School.

THE PH.D. PROGRAM
The Doctor of Philosophy degree is offered in applied marine physics, marine biology and fisheries, marine and atmospheric chemistry, marine geology and geophysics, and meteorology and physical oceanography. It is expected that the total time to complete the requirements for the Ph.D. degree will normally be four years of full-time study from the
date of receipt of the M.S. degree or, if the M.S. is bypassed, five years of full-time study from the date of admission with a bachelor’s degree.

**Credit Requirements**
A total of sixty credits are required for the Ph.D. and not less than half of the total credits must be in work open only to graduate students (i.e. 600 level or above). At least twenty-four of the sixty credits must be course credits taken in residence at the University of Miami, and may include those course credits taken as part of the Masters of Science degree. A minimum of 12 dissertation research credits must be taken; however, the course credit and research credit requirements needed are determined by the individual division. Students transferring into the school with a Master’s of Science degree are normally given credit for twenty-four course credits. However, individual divisions may require additional course credits to remove deficiencies. All students entering the Ph.D. program without a master’s degree are required to take at least one course outside the division of residence.

**Dissertation Committee**
The dissertation committee must consist of at least four members; this includes the committee chair, who shall be a member of the division as well as a regular member of the Graduate Faculty. Of the remaining members, two shall be from the Graduate Faculty, and one member of each Ph.D. committee must have their primary affiliation outside of RSMAS and that member must also have a Ph.D. degree. (Adjunct and secondary appointments are considered outside if their primary affiliation is not RSMAS).

**Comprehensive Examination**
An oral comprehensive examination is required of all RSMAS students. Some divisions may also require a written component in addition to the oral exam. In the event of a failure, a student may be re-examined once, upon the advice of the student's committee and at the discretion of the faculty of the division. Students who fail the re-examination are subject to dismissal from the School.

**Qualifying Examination**
A written qualifying examination is required of all students admitted to the doctoral program. The student’s committee will normally prepare and administer the examination within the guidelines established by the faculty of the School and of each division. In the event of a failure, a student may be reexamined once, upon the recommendation of the student’s committee and at the discretion of the faculty of the division. If granted, the reexamination must be given before the end of the following semester. Language and other research tools requirements, if applicable, must be completed prior to taking the qualifying examination. Students who fail the re-examination are subject to dismissal from the School.

**Dissertation Proposal**
An outline of the dissertation containing the following must be approved by the student’s committee and submitted to the RSMAS Graduate Studies Office with a copy to the division academic committee:
(a) tentative title
(b) statement of the problem and objectives
(c) methods of attacking the problem, including equipment and facilities required
(d) timetable
A “Proposal Approval” form must accompany the proposal and be signed by the members of the student’s committee.
Admission to Candidacy
Upon completion of the following requirements, the student is admitted to candidacy:
(a) have an approved committee on file in Graduate Studies
(b) successfully pass the comprehensive examination
(c) successfully pass the qualifying examination
(d) complete the language requirement, if any
(e) submit the dissertation proposal
(f) have a 3.0 average in all credits earned (≥ 12 credits)
(g) remove all “I” or deficiencies
An application for Admission to Candidacy must be completed. All doctoral students must be admitted to candidacy at least one semester prior to the one they intend to graduate.

Dissertation
A dissertation is required of all doctoral students at the Rosenstiel School. A public oral defense of the dissertation is required. A student must be admitted to candidacy prior to the defense and registered in the semester that he/she defends. Each dissertation must be accompanied by three originals of the Certificate of Approval. This form must be signed by all members of the student's committee and the RSMAS Associate Dean for Academic Affairs.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved for the student’s Committee. Any student who fails to meet the cumulative grade point average requirement and other academic progress standards established by the University and the School is subject to dismissal from the graduate program.
APPLIED MARINE PHYSICS
Dept. Code: AMP

DEGREE PROGRAMS

Master of Science and Doctor of Philosophy degrees in applied marine physics are offered by the Applied Marine Physics Division of the Rosenstiel School of Marine and Atmospheric Science. An approved interdisciplinary program is required for the M.S. degree in applied marine physics which consists of a minimum of 30 semester credits at the graduate level with an average grade of "B" or better and no grade below "C." The 30 credits are divided among 24 credits in courses and six credits for thesis research. At least six of the required course credits must be at the 600 level. For the Ph.D. degree, 60 graduate semester credits are required. These are divided among a minimum of 36 credits in courses (18 of which must be at the 600 level) and a minimum of 12 credits in dissertation research.

Applied Marine Physics Course Listing
MARINE AFFAIRS AND POLICY - Dept. Code: MAF

DEGREE PROGRAMS

The Division of Marine Affairs accepts highly qualified students who wish to pursue an academic degree program that combines a basic curriculum in marine science with a complementary program in a non-marine science discipline. Student programs are individually designed and lead to an M.A. degree or an M.S. degree. The M.A. curriculum requires participation in the intern program in lieu of a thesis. The M.S. curriculum requires a thesis. The program is intended to provide the student with a broadened perspective of marine issues and problem-solving abilities. MAF offers a specialization in aquaculture management. This track focuses on technological, environmental, and economic feasibility of sustainable aquaculture operations.

Current Division research and teaching focus on integrated coastal zone management, marine resource economics, political and environmental ecology, coastal and ocean law and policy, fisheries and aquaculture management, environmental planning and environmental impact assessment, underwater marine cultural resource management and marine geographic information systems.

Marine Affairs and Policy, in cooperation with the Undergraduate Marine and Atmospheric Science Program, also offers a five-year BA/MA Program in Marine Affairs. This program enables qualified students to earn a B.A. in Marine Affairs in four years with the opportunity to earn an M.A. with only one additional year. Conditional acceptance to the M.A. program is based on the student’s GPA at the end of their sophomore year. Students must then take GRE exams and apply for acceptance to the graduate program at Rosenstiel during their junior year.

The Division of Marine Affairs and Policy at the Rosenstiel School and the University of Miami School of Law offer a Joint degree program in Law and Marine Affairs. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and the M.A. in Marine Affairs from Rosenstiel. A student may complete requirements for both degrees within three and one-half years in an intensive program of six semesters and two full summers. This program is geared toward students who want a career in the field of law with a specialization in marine and environmental issues.

Marine Affairs and Policy Course Listing
MARINE AND ATMOSPHERIC CHEMISTRY - Dept. Code: MAC

DEGREE PROGRAMS

The program covers the chemistry of the atmosphere and oceans, including geochemical, photochemical and biochemical processes. Undergraduate training should be in chemistry, physics, biology and mathematics; also useful may be courses in geology, biochemistry, oceanography and meteorology.

New students are evaluated for their knowledge of chemistry; deficiencies are corrected by directed study and/or course work and must be remedied within one year. New students can be admitted to the M.A. or the M.S. program, or directly into the PhD program, even without a prior M.S. degree.

Students are assigned a faculty advisor when they are accepted into MAC, and during their first year they form a supervisory committee. The advisor and committee plan a course of study and research for the student. Students without an MS degree take a written comprehensive examination towards the end of the first year. The comprehensive exam tests the basic knowledge of marine and atmospheric science, and is based on core course material. The research proposal usually includes an abstract, background material, hypothesis and/or list of objectives, methods, preliminary data, and bibliography. Ph.D. students also take a written qualifying exam. The qualifying examination is set by the advisor and supervisory committee and is taken after their approval of the dissertation proposal. An oral examination may be required after the written examination. Students who twice fail the qualifying examination will receive an MS if they present and successfully defend a written thesis. For all students, the seminar (MAC 670) is taken twice for credit. However, each student must give one seminar per year and they must attend seminars regularly.

The MA is a non-research degree that occupies 1 year: two semesters of 12 course credits each, and a summer session of experimental work and a written project (6 credits).

[Marine and Atmospheric Chemistry Course Listing]
MARINE BIOLOGY AND FISHERIES - Dept. Code: MBF

DEGREE PROGRAMS

Students admitted to the program in the Division of Marine Biology and Fisheries are required to have a strong undergraduate preparation in the life sciences, with additional coursework in mathematics (calculus), physics, and chemistry (through organic). The program offers a series of study-options leading to the M.A., M.S. or Ph.D. degrees. These are intended to guide the student in a comprehensive study of marine organisms and the marine environment, and to develop areas of specialization within the marine biological sciences. Students are strongly encouraged to contact the faculty member whose area of research is of interest to them.

Areas of faculty interest include biological oceanography, biochemistry and molecular biology, ecology, fisheries, microbiology, physiology, toxicology, systematics, behavior and ecosystem and fisheries management. Students are not restricted to studies in any one study-option, and may (in consultation with their faculty advisor and/or committee) tailor their academic programs to suit individual interests in more than one area of faculty expertise. Within the Division of Marine Biology and Fisheries there are four major academic tracks, each of which has one or more sub-specializations. These are (1) Biological Oceanography, which has an emphasis on nearshore and pelagic marine life; (2) Fisheries Sciences, which focuses on fisheries stock assessment, population modeling, and fisheries management; (3) Marine Biomedical Sciences, which has subspecialities in Marine Molecular Biology and Genetics, Marine Diseases, and Marine Physiology and Biochemistry/Toxicology; and (4) Ecological Sciences and Coastal Marine Biology. This latter academic track offers specialization in Marine Biology, Coral Reef and Coastal-Marine Ecology, and Ecological Systems and Environmental Management. Individual curricula may blend coursework from one or more tracks depending on the specific interests of the student.

Marine Biology and Fisheries Course Listing
MARINE GEOLOGY AND GEOPHYSICS - Dept. Code: MGG

DEGREE PROGRAMS

The undergraduate student wishing to prepare for graduate work in marine geology and geophysics must be well trained in the basic sciences. According to the special interests of the individual, the undergraduate major and minor should be in geology, physics, chemistry, and/or mathematics.

The Division of Marine Geology and Geophysics offers M.S. and Ph.D. programs in the following broad areas:

- Environmental Geology and Geochemistry
- Sedimentary Systems and Marine Geology
- Paleoclimatology and Global Change
- Igneous Petrology and Geochemistry
- Geophysics
- Geodesy

Within each discipline, students have considerable flexibility in choice of courses, and “cross-track” courses are possible for students with special interests. Interactions with other divisions are particularly encouraged.

[Marine Geology and Geophysics Course Listing](#)
METEOROLOGY AND PHYSICAL OCEANOGRAPHY - Dept. Code: MPO

DEGREE PROGRAMS

The Division of Meteorology and Physical Oceanography (MPO) of the Rosenstiel School of Marine and Atmospheric Science (RSMAS) is engaged in research and graduate instruction in the physical processes governing the motion and composition of the ocean and atmosphere. The program ranges from direct observation to theoretical and numerical modeling of the earth-atmosphere system.

Three types of degrees are awarded by the Division: Master of Science, which requires 30 credits, including 24 credits in courses and 6 research credits; Doctor of Philosophy, which requires 60 credits, including a minimum of 36 course credits and a minimum of 12 research credits; the Division also awards Master of Arts degrees, requiring 24 course credits and six credits of directed research leading to a research paper.

Students applying for admission to graduate study in the Division of Meteorology and Physical Oceanography should have a solid background in mathematics and physics or engineering. Once admitted, students in this Division will take courses in both Meteorology and Physical Oceanography in order to develop an understanding of the ocean and the atmosphere as closely related dynamical systems.

In the first year, students will take 6 courses, followed by a comprehensive exam at the end of the spring semester. Based on the results of this exam, students may be given the option to enter the Ph.D. program directly, to enter the M.S. program (leading to subsequent entrance into the Ph.D. program), or they may be required to re-take the comprehensive exam. Typical times for completion are 2-3 years for M.S. degrees and 4-6 years for Ph.D. degrees.

[Meteorology and Physical Oceanography Course Listing]
LIFE SCIENCES-SCHOOL OF MEDICINE

PROGRAM IN BIOMEDICAL SCIENCES – DEPT CODE: PIBS
www.biomed.miami.edu

The Program in Biomedical Sciences (PIBS) provides an entry point for first year doctoral students interested in obtaining a Ph.D. from the Leonard M. Miller School of Medicine. PIBS students experience a common first-year curriculum to build a solid foundation in biomedical science.

In the fall, students enroll in PIBS 601, which is a 9 credit course covering fundamentals of molecular and cellular biology, important model organ systems, and technical approaches in modern biomedical science. The course meets 4 days/week, 2 hours/day. The first hour is a lecture/discussion, and the second hour varies from professional development activities (reading papers, writing papers, choosing a lab and a project, time management, etc) to discussions of particular relevant techniques, to critical reading of relevant literature.

In the spring semester, students elect from a menu of individual modular courses offered by the 8 graduate programs. Each modular course covers 6-7 weeks, and students will elect 1-2 of these per half semester. These courses will cover topics of more specific relevance to graduate programs or research themes.

Students will perform at least 3 laboratory rotations of 9 weeks each during the first year, and will generally choose a dissertation laboratory (and graduate program) during the latter half of the spring semester. If necessary a fourth rotation is possible, and in this case laboratory choice may be deferred until June.

In addition, students will meet several times per semester in small groups (6-7/group) with a mentor. Mentors are chosen for their experience and commitment to student training. In these group sessions, students will discuss a variety of issues relevant to challenges and opportunities in biomedical research, preparing for success in graduate school, and building a successful research career.

Ph.D. Program Choices:
- Biochemistry & Molecular Biology
- Cancer Biology
- Human Genetics & Genomics
- Microbiology & Immunology
- Molecular Cell & Developmental Biology
- Molecular & Cellular Pharmacology
- Neuroscience
- Physiology & Biophysics.

ADMISSION REQUIREMENTS

Applicants should have a bachelor's degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.
Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

- Students should apply online at: www.biomed.miami.edu

Website: www.biomed.miami.edu

PIBS Course Listing (under development – will appear in 2010-2011 listing)

M.D./Ph.D. PROGRAM

ADMISSION REQUIREMENTS

Admission to the MD/PhD Program is highly competitive, and interested applicants are advised to apply early in the fall. AMCAS applications must be received by the Medical Admissions Office no later than December 15. Competitive applicants usually have a cumulative undergraduate science G.P.A. of at least 3.4 and a composite score of at least 32 on the MCAT exam. Preference will be given to candidates who can provide tangible evidence of a commitment to biomedical research, substantial laboratory or other relevant research experience and scientific talent. Applications from under-represented groups, including minorities and women, are encouraged.

The completed application should contain a research narrative and two letters of recommendation from scientists who specifically address their potential as a physician scientist. One of these must come from a scientist with whom the student performed research. Composite evaluations from a premedical advisory committee cannot be substituted for either of these letters. The Graduate Record Examination (GRE) is not required for matriculation into the MD/PhD Program.

All MD/PhD applicants are reviewed by both the MD Program Admissions Committee and the MD/Ph.D Program Admissions Committee. These evaluations proceed independently and a student will still be considered for the MD program, even after an unfavorable review by the MD/PhD Program. A successful applicant is granted admission to both the MD Program and the MD/PhD Program.
DEGREE PROGRAMS

The Basic Science Graduate Programs

The following doctoral programs, described elsewhere in this bulletin, participate in the MD/PhD Program. The MD/PhD Program office can provide you with further information about these programs and the research interests of their faculty.

- Biochemistry and Molecular Biology
- Sheila and David Fuente Cancer Biology Program
- Epidemiology and Public Health
- Human Genetics & Genomics
- Microbiology and Immunology
- Molecular Cell and Developmental Biology
- Molecular and Cellular Pharmacology
- Neuroscience
- Physiology and Biophysics

Program Sequence

Students complete the first two years of medical school, which is followed by their PhD training and then the final two years of clinical clerkships. Students are advised to begin the program in June to enable an early start on their research rotations as the MD program courses begin in mid-August. Some students choose to continue their research during the first two years of medical school. It is recommended that students select and apply to a graduate program by February of their second year in the program and identify a research mentor no later than the beginning of the third year. The summers before the second and third year are usually spent in research rotations. The third year is spent both in class to fulfill the final graduate course requirements and in the mentor’s laboratory. Students should plan to take their Ph.D. qualifying exam by the end of the third year. The following two or more years are spent carrying out original research for their dissertation. All Ph.D. requirements must be completed before entry into the third year of medical school.

Combined degree programs are long and challenging. To relieve pressure produced by the demands of the medical and graduate curricula, the University of Miami Miller School of Medicine provides a stimulating and supportive environment in which all combined degree students have frequent opportunities to exchange their ideas, energy and concerns.

The on-going program activities

- provide opportunities for integration of clinical problems with basic science advances
- Enhance the clinical curriculum with in-depth case reviews.
- Foster discussion of the students’ own research results in an interdisciplinary, rigorous, but informal setting.

Also, special events are scheduled to bring the program’s students together for in-depth discussion with international leaders in research.
SHEILA AND DAVID FUENTE GRADUATE PROGRAM IN CANCER BIOLOGY- DEPT CODE: CAB
www.biomed.miami.edu/cab

THE PROGRAM

The Sheila and David Fuente Graduate Program in Cancer Biology is a University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. The objective of this program is to provide a unique multidisciplinary training environment for highly qualified individuals that will prepare them for independent research and teaching careers. The overall philosophy of the program is to integrate basic and clinical research. The scientific focus is on the biology of cancer and the development of novel diagnostic and therapeutic approaches.

The program emphasizes a multidisciplinary approach which incorporates concepts and state-of-the-art techniques from molecular biology, biochemistry, cell biology, biostatistics, genetics, genomics, immunology, proteomics, structural biology, clinical oncology, and translational research programs at the Sylvester Comprehensive Cancer Center. An important goal of the program is to provide students with a strong background in basic biomedical research coupled with an understanding of clinical aspects of cancer including diagnostic, prognostic, and therapeutic intervention. To achieve this goal the program utilizes a unique program of study that includes lectures from both basic and clinical researchers. In addition, the program has a two-tier mentoring system in which students receive guidance from both a research mentor and a physician mentor. The research mentor is the dissertation advisor, while the physician mentor will provide the student with a clinical perspective in oncology. Through this dual mentorship students conduct their doctoral research and obtain clinical knowledge in their area of study. The program aims to instill in students the ability to design multidisciplinary research programs in which scientific research is driven by unmet clinical challenges.

The curriculum includes core courses in Tumor Biology, Clinical Oncology, Scientific Reasoning and Logic in Cancer Biology: Bench-to-Bedside, Colloquia in Translational Cancer Research, and Approaches to Understanding Cancer. Students can also choose electives in cancer epidemiology, cellular and molecular biology, immunology, pharmacology, and microbiology. During the first year, students attend a series of lectures in which oncologists discuss clinical aspects of cancer including epidemiology, detection and treatment. Rotations through faculty laboratories provide students with hands-on experience in various research areas. The rotations also provide the student the background necessary to select their dissertation advisor and research area. During the second year of study, students formulate a dissertation proposal and take a qualifying exam. Their subsequent research is guided by an individually tailored dissertation committee, including the research advisor and physician mentor.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The
PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development. Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study.

- Students should apply online at: [www.biomed.miami.edu](http://www.biomed.miami.edu)

[Cancer Biology Course Listing](#)
BIOCHEMISTRY AND MOLECULAR BIOLOGY
Dept. Code: BMB
http://chroma.med.miami.edu/bmb/index.html

The aim of graduate education in this department is to prepare students for careers in biochemistry and molecular biology. This training provides the student with a broad knowledge in the various aspects of modern biochemistry and molecular biology. Independent laboratory research is emphasized at all stages of the student's career.

Some of the Biochemistry faculty is affiliated with other departments in the University, with the VA hospital, the Sylvester Comprehensive Cancer Research Center, the Brahman Breast Cancer Institute. Thus, research facilities for a large variety of specialties are available to our students. Some of the graduate students participate in the combined M.D.-Ph.D. Program.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development. Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study.

The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the 1st year
students choose mentors and formally enter individual graduate programs.

- Students should apply online at: www.biomed.miami.edu

**DEGREE PROGRAMS**

All incoming students will be advised by the operating committee. This committee will assist and mentor students prior to their selection of a thesis advisor. In addition students will be provided guidance concerning choices of courses and research programs.

The student should choose a thesis mentor from the program faculty by the beginning of the second year of graduate study.

The program operating Committee, in consultation with the mentor, will appoint a thesis committee and set up a tentative schedule for the remainder of the student’s graduate studies.

**DEGREE REQUIREMENTS**

Completion of the Ph.D. degree requires the completion of 36 credits of coursework at the graduate level (including specific required courses), 24 credits of thesis research, passing a qualifying exam, and submitting and successfully defending a dissertation showing results obtained on a research problem. The degree earned will be Doctor of Philosophy in Biochemistry and Molecular Biology.

Inquiries should be directed to

**COMBINED M.D.-PH.D. DEGREE.**
- The Department participates in the School of Medicine’s M.D.-Ph.D. Program in which students may obtain both degrees.
- The curriculum will be tailored to the needs of the individual student.

**Biochemistry and Molecular Biology Course Listing**
The Department of Epidemiology and Public Health offers graduate programs leading to the degrees of

- Master of Public Health (MPH),
- Master of Science in Public Health (MSPH), and
- Doctor of Philosophy (PhD) in Epidemiology.

The mission of the Graduate Programs in Epidemiology and Public Health is to provide up-to-date educational programs to practicing health professionals and students newly entering the field; to conduct, stimulate, and guide research activities relevant to local, state-wide, and national health needs; and to provide assistance to health agencies for the continued improvement of disease prevention and health promotion, environmental safety and monitoring, and the planning, analysis, and management of health delivery services.

The MPH degree is a 45 semester-hour program that is accredited by the Council on Education for Public Health and provides fundamental skills in core areas of public health to persons involved in the implementation of community health programs and to those seeking a broader base of knowledge to improve environmental and personal health services for the community.

- The core courses for the MPH include biostatistics, epidemiology, environmental health, public health administration, health education and behavior, and a capstone practicum.

The MSPH degree is a 45 semester-hour academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia, or private institutions.

- Studies for the MSPH degree include many of the core disciplines included in the MPH degree with an additional emphasis on advanced research methods and quantitative analysis skills.
- All MSPH students will complete an original public health research thesis as their culminating experience.

Full-time students can expect to complete the MPH or MSPH degree requirements within 2 years.

A nine-credit waiver is available for students who enter the MPH or MSPH degree programs with an earned advanced degree (e.g., MD, DDS, DVM).

Joint degree programs are also offered in conjunction with the School of Medicine (MD/MPH, MD/PhD), School of Law (JD/MPH), College of Arts and Sciences (MPA/MPH), and the Division of Continuing Studies and International Programs (MAIA/MPH).

The PhD program in Epidemiology is an intensive research training program for students with prior training in epidemiology or related disciplines.
All PhD students in the program have extensive contact with faculty members, in part because the program is explicitly designed to be small and interactive. The program takes advantage of South Florida’s unique opportunities for epidemiologic research, including our ever-changing mix of races, ethnicities, and cultures. In fact, many of our research programs could not be conducted elsewhere. Furthermore, since the program is located within the Miller School of Medicine, interactions with basic scientists and clinicians provide opportunities for epidemiologists to develop translational and interdisciplinary research. The program is designed primarily for students who have completed an MPH or MSPH degree. However, students possessing a master’s or professional degree in a related discipline, as well as selected post-baccalaureate students may be eligible for admission.

ADMISSION REQUIREMENTS

MASTER’S DEGREES
All prospective Master’s students must make an application for admission, whether or not they wish to become candidates for the degree. Applications for the MPH and MSPH degrees are accepted for the fall and spring semesters. The applicant’s completed file must contain the following information:
1. Completed and signed application form
2. Official transcripts of all college work
3. A recommended minimum cumulative Grade Point Average (GPA) of 3.0
4. Official report of the Graduate Record Examination (GRE) taken within the last 5 years with a recommended minimum combined verbal and quantitative score of 1100. The MCAT can serve as a substitute for the GRE for medical school graduates only.
5. Three letters of recommendation
6. A 400 word letter of intent
7. Current resume
8. International students are required to submit a score report for the Test of English as a Foreign Language (TOEFL) examination
9. A non-refundable application fee

PHD DEGREE IN EPIDEMIOLOGY
Applications for the PhD program should be submitted as early as possible, but no later than January 31st, to receive maximum consideration for admission. Applications are only accepted for the fall semesters. A completed application file consists of the following information:
1. Completed and signed application form
2. Non-refundable application fee
3. Official transcripts of all college work
4. A recommended minimum Grade Point Average (GPA) of 3.0
5. Official score report of the Graduate Record Examination (GRE) taken within the last 5 years with a recommended minimum combined verbal and quantitative score of 1100 on the GRE General Test (at least 550 on each section).

6. Three written letters of recommendation

7. A 1000 word written personal statement

8. Current Curriculum Vitae

9. Prerequisite coursework in the following areas: one graduate level course in epidemiology and two graduate level courses in biostatistics

10. Highly qualified candidates for admission will be contacted to schedule an interview with the PhD Program Director and additional faculty members from the Department of Epidemiology and Public Health

11. International applicants whose native language is not English must submit results of the Test for English as a Foreign Language (TOEFL)

DEGREE REQUIREMENTS

CURRICULUM REQUIREMENTS FOR THE MPH DEGREE
   A. Completion of 27 credits of core courses
   B. Completion of 12 credits of approved elective courses
   C. A 6 credit capstone practicum
   D. An oral presentation of the practicum experience
   E. Other requirements as stated in the Graduate Bulletin under “The Master’s Degree-General”.

CURRICULUM REQUIREMENTS FOR THE MSPH DEGREE
   A. Completion of 24 credits of core courses
   B. Completion of 15 credits of approved elective courses
   C. An original public health research project and thesis (6 credits)
   D. An oral presentation of the public health project
   E. Other requirements as stated in the Graduate Bulletin under “The Master’s Degree-General”.

CURRICULUM REQUIREMENTS FOR THE PHD DEGREE
   A. Completion of 27 credits of core courses
   B. Completion of 9 credits of approved elective courses
   C. Presentation and oral defense of an acceptable dissertation (>24 credits)
   D. Other requirements as stated in the Graduate Bulletin under “Doctor of Philosophy”.
Epidemiology and Public Health Course Listing
HUMAN GENETICS AND GENOMICS: HGG
http://chroma.med.miami.edu/genetics/program.html

THE PROGRAM

The graduate program in Human Genetics and Genomics is part of the University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. This program aims to train scientists broadly in areas of human genetics and genomics relevant to human health and disease. Modern medicine is increasingly dependent on “genomic literacy” among practitioners and patients, and training the scientists who will work in genomics is an important mission of our program. Individuals earning PhD degrees in human genetics will have various career options, including clinical laboratory (after fellowship training and board certification, for which existing programs are available at the University of Miami), research laboratory, or computational research in academia, healthcare, and the biotechnology industry.

During the first year PIBS curriculum, students will have the opportunity to take two introductory short courses: Fundamentals of Human Molecular Genetics and Fundamentals of Genetic Epidemiology. Rotations through faculty laboratories provide students with hands-on experience in various research areas. The rotations also provide the student the background necessary to select their dissertation advisor and area research.

During the second year the curriculum focuses on core coursework in molecular and computational genetics, biostatistics, and seminars and journal clubs. During the second and third years of study, students formulate and defend a dissertation proposal.

During the third year, students choose to pursue one of two tracks within the program: molecular genetics or computational genetics. Course requirements differ slightly between these two paths: students in the molecular genetics track will take Molecular Genetics while the Computational Genetics track students take Fundamentals of Epidemiology and Advanced Genetics Data Analysis. All students participate in a one-credit clinical rotation during their third or fourth years, and complete a teaching practicum.

APPLYING TO THE PROGRAM

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.
Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development.

Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study.

- Students should apply online at: [www.biomed.miami.edu](http://www.biomed.miami.edu)

Email: lacosta@med.miami.edu
Objective

The objective is to provide multi-faceted training opportunities for students to become highly competitive for various postgraduate careers upon acquisition of their Ph.D. from the Microbiology and Immunology (MIC) Graduate Program.

The program trains students to rigorously investigate central topics and applications based on a broad comprehension of interdisciplinary science provided by the Program in Interdisciplinary Biomedical Sciences (PIBS) in year 1. Thereafter, the MIC Graduate Program offers students a specialty curriculum that is interactive and discussion based.

Furthermore, students are in charge of a research project in either viral or bacterial pathogenesis or in molecular immunology, autoimmunity, tumor immunity or transplantation. Finally, the MIC program offers outstanding training opportunities in translational research in the respective diseases or in therapeutical settings.

Goals

The goals of the MIC Graduate Program are five-fold:

1) Train up critical and creative scientific minds built on solid interdisciplinary knowledge of Microbiology or Immunology
2) Train technical laboratory skills necessary to perform experiments in the area of specialization
3) Continue PIBS training of skills necessary to present scientific findings orally and in writing, including independent research plans as well as competitive manuscripts and grant proposals
4) Prepare students to become the teachers of tomorrow by involving them in the active teaching process of a laboratory class for undergraduate students (Microbiology 301)
5) Nourish the next generation of a networked community of scientists that is well prepared for challenging postgraduate careers.

ADMISSION REQUIREMENTS

All students for the Microbiology & Immunology doctoral graduate program are admitted through PIBS along with students interested in other Ph.D. programs at UMMSM (Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics). The PIBS Admissions Committee will review and make decisions on complete applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.
Strong candidates will have research experience in a laboratory setting, an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research. Applicants should apply online at: www.biomed.miami.edu

**First year of Graduate Study in Microbiology and Immunology**

In the first-year PIBS training phase, students of all graduate programs at UMMSM participate in a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development. Specific coursework relating to Microbiology and Immunology is largely being offered in the second PIBS semester.

**Graduation**

To be eligible for graduation, students must present and defend an acceptable Ph.D. dissertation embodying original investigative findings suitable for publication. The doctoral degree in Microbiology and Immunology normally requires five to six years beyond the baccalaureate.

**Financial Support**

All students accepted are awarded a stipend of $25,500 per annum (as of June 1, 2009) and receive a full tuition scholarship. In addition, if students choose the University of Miami graduate student health insurance program, 80% of the individual insurance premium will be covered.

[Microbiology and Immunology Course Listing](#)
Scientists in the Molecular and Cellular Pharmacology Program make use of the knowledge and techniques of biology, chemistry and physics to study the action of drugs, hormones and neurotransmitters on living systems and, more generally, the mechanisms through which signals are recognized and transduced by cells. The goals of the research in this department are: 1) to develop, and study agents that may be beneficial in the treatment of disease; 2) to use drugs as tools in the study of basic biological signaling processes; and 3) to identify new targets and pathways for development of pharmaceuticals.

A variety of technical approaches is used, including genetics, molecular biology, protein biochemistry and biophysics, fluorescence microscopy, immunology, computer modeling, cell culture, imaging, gene expression profiling, proteomics and whole animal studies including transgenic and genetically engineered mouse models. The faculty is a mixture of senior scientists who are recognized leaders in their respective fields and more junior faculty with recent training in state-of-the-art research techniques applied to important biomedical problems.

The Department’s more than 40 graduate students and postdoctoral fellows contribute to the creative and stimulating scientific atmosphere.

Research interests of the faculty include:

**Cardiovascular Pharmacology/Muscle Contraction:**
Investigators in this area study transcriptional regulation of gene expression and intracellular signals associated with the growth and function of the heart, heart valves, cardiac muscle contraction and the effect of disease causing mutations on heart function. They also study ion channels, membrane events, blood vessels, etc.

Current research areas includes, for example, structure/function relationships in the proteins of the thin (troponin complex) and thick (myosin) filaments, the role of specific ion channels in ventricular hypertrophy and its alleviation, excitation-contraction coupling in skeletal and cardiac muscle, proto-oncogene regulation of cardiac-specific genes, signaling in cardiac myocytes including the characterization of multimolecular enzyme complexes, the molecular mechanisms of heart valve development and disease, apoptosis during myocardial ischemia, and the potential of stem cell based therapy for cardiac disease. A new study has been launched to investigate the effect of bone marrow stem cells in cardiac repair. Research in this area is supported by a National Heart Lung and Blood Institute Cardiovascular Pharmacology Training Grant. The students will have the opportunity to receive training in specific cardiovascular techniques utilized in the Program as well as attend cardiovascular journal club to learn about new findings in the cardiovascular field.

**Neuropharmacology/Neuroscience:**
Investigators in this area study the development, function, pharmacology, and diseases of the nervous system.
Current research interests include neuronal signaling through G-proteins, Ca2+, and cyclic nucleotides, growth and guidance of axons during development and regeneration after injury, molecular control of dendrite development, involvement of muscarinic acetylcholine receptors in Alzheimer’s, Parkinson’s, and other diseases, excitation-secretion coupling and structure-function relationships in nicotinic acetylcholine receptors; molecular mechanisms and cell biology of phototransduction; the genetic and cellular basis of neural development and degeneration using the fruit fly *Drosophila melanogaster* as a model system.

**Cell Biology/Cancer:**
Investigators in this area study cell cycle control and cancer, gene expression, mechanisms of hormone action, signal transduction, cytoskeleton, membrane transport, stem cells, and novel therapeutics.

Current research interests include steroid hormone regulation of gene expression and cell proliferation; cell cycle checkpoints during DNA replication; protein trafficking including endocytosis and exocytosis; control of cell polarity and morphogenesis; cilia in pulmonary function; molecular basis of human lymphoma; endocrine-related cancers including prostate and breast; stem cell maintenance and therapy; and physicochemical and metabolic aspects of drug design.

**Model Systems:**
Many investigators are using model organisms for their studies. These include Xenopus, Drosophila and yeast models. Yeast and Drosophila are important models because of the powerful molecular and genetic approaches and tools available. Xenopus provides a unique system for studying development and for protein expression and analysis. These systems are being used to study fundamental processes such as apoptosis, cell cycle, signal transduction, membrane dynamics, cytoskeleton, cell polarity, olfaction, development of the cardiovascular system, neurogenesis and neuronal degeneration. All of these processes are conserved in humans, so these systems serve as important models for human diseases. Investigators are also using these systems to screen for therapeutic agents and to identify targets of toxins and other natural, synthetic or pharmacologically relevant compounds.

**Training Program:**
In the first year, students receive a solid foundation in biomedical science. The core coursework ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of student development. In subsequent semesters, students take core courses encompassing mechanisms of drug action, neuropharmacology, cardiovascular pharmacology and intracellular signal transduction. A variety of elective courses are offered by this department and others.
Students begin their dissertation research at the end of the first year and complete their course requirements in the second year. In subsequent years, students devote their efforts to original thesis research. The department sponsors the visits of internationally-known scientists, who discuss their research in formal seminars and meet with students and faculty. Weekly intradepartmental seminars keep students abreast of new developments within the School of Medicine.

**ADMISSION REQUIREMENTS**

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. THE REQUIREMENTS FOR THE PH.D. DEGREE IN MOLECULAR AND CELLULAR PHARMACOLOGY

These consist of 36 credit hours of graduate courses and seminars and 24 credits of Thesis Research. Students are required to pass a qualifying examination at the completion of their second year before undertaking Thesis Research at an intensive level.

The recruitment and training of applicants from underrepresented minority groups is an important goal of the Program.

Pharmacology Students supported by the National Institutes of Health training program must be United States citizens or permanent residents.

Other sources of support may be available on a limited basis for foreign applicants.

Molecular and Cellular Pharmacology Course Listing
The graduate program in Molecular Cell and Developmental Biology is an interdisciplinary program, providing a wide range of research opportunities, comprised of faculty members from the Departments of Cell Biology and Anatomy, Ophthalmology, Surgery, Medicine, Neurology, Neurosurgery, Molecular and Cellular Pharmacology, Urology, Microbiology and Immunology, and Biochemistry and Molecular Biology.

Students have the opportunity to do research in the many areas of modern cell and molecular biology and developmental biology. Research topics including the cytoskeleton, cell surface molecular biology, stem cells, lens, corneal and retinal biology, protein processing and sorting, signal transduction, airway biology, regulation of gene expression in development, podocyte biology, cancer, neuromuscular development, malignant transformation, growth factors, epithelial cell biology, organogenesis and tissue repair, pattern formation in early development, RNA localization, mitochondrial molecular biology and cancer therapeutics.

The primary objective of this interdisciplinary graduate program is to prepare students for careers as independent, Ph.D. level researchers and teachers in both academic institutions and in the biotechnology industry and other venues.

Applicants are accepted only for the Ph.D. or combined M.D./Ph.D. degrees.

**DEGREE REQUIREMENTS**

Minimum credit requirements for the Ph.D. degree are set by the University at 36 course credits (including specific required courses) and 24 credit hours of research. The course credits must be earned in graduate level (500 and above) courses. Elective courses may be taken from the graduate courses offered by this program, or from a large variety of advanced courses offered by other departments at the University of Miami.

Typical coursework includes: Interdisciplinary Biomedical Studies, Methods/Techniques, Seminar, Journal Club, Biological Macromolecules, Professional Skills and Ethics, Tumor Biology, Molecular Genetics, Developmental Biology, Advanced Molecular Cell Biology, Biostatistics Workshop and Histology. The interdisciplinary biomedical studies course covers fundamental topics of cellular and molecular biology, biochemistry, cellular physiology, neurobiology, and immunology. Other requirements include participation in a departmental seminar series, a journal club, and three semesters of advanced topics courses.

**ADMISSION REQUIREMENTS**

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology,
Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the 1st year students choose mentors and formally enter individual graduate programs.

COMBINED M.D.-PH.D. DEGREE.
The Department participates in the Miller School of Medicine’s combined M.D.-Ph.D. Program.
The curriculum will be tailored to the needs of the individual student.

Molecular Cell and Developmental Biology Course Listing
The Neuroscience Program is an interdisciplinary program established in 1988 leading to the Ph.D. in Neuroscience.

The program aims to train highly-qualified individuals for independent research and teaching careers in the Neurosciences.

More than 85 participating faculty are located in several departments and schools; Cell Biology and Anatomy, The Dr. John T. Macdonald Foundation Department of Human Genetics, Molecular and Cellular Pharmacology, Physiology and Biophysics, the Biology and Psychology Departments, the Rosenstiel School of Marine and Atmospheric Sciences, as well as several clinical departments including Neurological Surgery, Neurology, Ophthalmology, Otolaryngology, and Psychiatry.

Neuroscience Program faculty pursue a wide variety of research interests including cellular and molecular mechanisms involved in signal transduction, gene expression in electrically excitable cells, synapse formation, neuronal growth and survival, integrative neuroscience, neuroimmunology, stroke, neuronal regeneration, autonomic control, brain metabolism and cerebral blood flow, degenerative changes within specific neural pathways in Parkinson's and Alzheimer's diseases and genetic analysis of neurological disorders.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor's degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important
issues of faculty development. Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study. The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the 1st year students choose mentors and formally enter individual graduate programs.

- Students should apply online at: www.biomed.miami.edu

THE NEUROSCIENCE PROGRAM

Graduate training is the major goal of the program, with emphasis on cellular, molecular and genetic approaches to Neuroscience.

A single core curriculum provides the didactic scaffold of the program. This curriculum consists of courses in Molecular Biology, Cell Biology, Membrane Biophysics, Statistics, Introductory Neuroscience, and Neuroanatomy. The core courses are supplemented with elective courses such as Neuropharmacology, Developmental Neurobiology and a wide variety of Special Topics Short Courses. Students also attend research seminars and a scientific journal club.

The Neuroscience Steering Committee guides the students, overseeing their coursework, until they have passed their qualifying exams. From then on their progress is supervised by individually-tailored dissertation committees.

The Neuroscience Program also participates in the School of Medicine’s MD/PhD combined degree program www.biomed.miami.edu/mdphd

REQUIREMENTS FOR A PH.D. DEGREE IN NEUROSCIENCE

Students are required to complete 36 credit hours of graduate courses and seminars, including at least 18 credit hours in Neuroscience, and 24 credits of Dissertation Research.

Students are required to pass a qualifying examination during their second year, before undertaking Dissertation Research at an intensive level.

Inquiries should be directed to:

University of Miami Miller School of Medicine
Locator R-50
PO BOX 011351
Miami, Florida 33101
Tel: 305-243-3368
FAX (305) 243-2970
E-mail: neurosci@med.miami.edu
Web: www.biomed.miami.edu/neuro
RESEARCH AREAS:

1. BEHAVIORAL NEUROBIOLOGY
2. DEVELOPMENTAL NEUROBIOLOGY
3. CELL/MOLECULAR NEUROBIOLOGY
4. CNS INJURY AND REPAIR
5. GENETIC ANALYSIS OF NEUROLOGICAL DISORDERS
6. NEUROLOGICAL DISORDERS
7. PSYCHIATRIC DISORDERS
8. SENSORY NEUROBIOLOGY
9. SYNAPSES
10. TRANSMITTERS AND RECEPTORS

Neuroscience Course Listing
The Department of Physical Therapy is committed to providing quality educational experiences that enable its graduates to effectively carry out the expanding responsibilities of physical therapists as autonomous health care providers practicing in preventive, evaluative, maintenance, acute care and rehabilitation settings, and in educational and research environments.

The individual and collective efforts of the members of the Physical Therapy faculty are directed toward attaining specific goals and objectives as expressed in the philosophic statement of the American Physical Therapy Association.

The Mission of the Department of Physical Therapy (revised in December, 2000; re-affirmed in 2006) in accordance with the Mission of the Miller School of Medicine is to provide excellence in physical therapist education, to expand evidence-based practice of physical therapy through research, to provide high quality care to all who need it, and to be a community partner.

ADMISSION REQUIREMENTS

DOCTOR OF PHYSICAL THERAPY (entry level D.P.T.)

Applicants should have a baccalaureate degree in a related field and 3.0, or "B" average or better in the following courses:

- **English Composition/ Writing intensive course** (3 semester or 5 quarter hours); **Introduction to Statistics** (3 semester or 5 quarter hours);
- **Psychology** (3 semester or 5 quarter hours); **General Biology** (3 semester or 5 quarter hours); **General Chemistry with Lab** (8 semester or 12 quarter hours);
- **General Physics with Lab** (8 semester or 12 quarter hours);
- **Human Anatomy** (3 semester or 5 quarter hours); **Human Physiology** (3 semester or 5 quarter hours) or **Combined Anatomy and Physiology** (6 semester or 9 quarter hours).

I. APPLICATION PROCEDURE

Beginning July 1, 2009 we are now accepting applications only thru Physical Therapist Centralized Application Service (PTCAS), go to [www.ptcas.org](http://www.ptcas.org) to apply.

A. Application deadline is December 1; We encourage you to apply early. Applications completed by November 1 will be reviewed for early consideration. Classes begin in May. Application requirements consist of the following:

1. Submission of all application materials to PTCAS. Completion of prerequisites, with a minimum GPA of 3.0 on a 4.0 scale.
2. Demonstration of knowledge concerning the physical therapy profession by submitting:
   a) Questions 1, 2, and 3 on the PTCAS documentation of a minimum of 100 hours of first-hand observation and/or work experience related to the practice of physical therapy.
   b) This experience must be substantiated in writing by a registered/licensed physical therapist.
3. Submission of three (3) letters of recommendation addressing both the applicant's moral character and potential as a physical therapist.
   a) At least one letter must be written by a registered/licensed physical therapist, and one or more from faculty.
4. An interview with at least one member of the Physical Therapy Review Committee.
   - Graduate Record Exam must be taken no later than November 30. Applicants must score a minimum of 500 on verbal and quantitative sections of the GRE, and a 4.5 on the analytical section

For more information contact:
Admissions Office
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
phone 305-284-4535
email: physicaltherapy@miami.edu

DOCTOR OF PHILOSOPHY IN PHYSICAL THERAPY (Ph.D.)

Application requirements: Applicants to the Physical Therapy PhD Studies Program must have a clinical degree in physical therapy from an accredited physical therapy program and be eligible for licensure to practice physical therapy in the United States. Students enrolled in the PhD in Physical Therapy program at the University of Miami work closely with a faculty mentor from their first days in the program. As a first step in the application process, the applicant must identify a track of interest and contact a faculty mentor in the selected track. Students are admitted to the program upon endorsement of a faculty mentor and completion of all admission requirements, with final selection made by the PhD Studies Committee. Stipend and tuition support is potentially available for qualified applicants.

- **Motor Control:** Contact Edelle Field-Fote PhD, PT edee@miami.edu
- **Musculoskeletal Anatomical Sciences:** Contact Philip Waggoner, PhD, PT waggoner@miami.edu
- **Musculoskeletal Prosthetics and Amputee Rehabilitation:** Contact Robert Gailey, PhD, PT rgailey@miami.edu
- **Outcomes Research:** Contact Kathryn Roach PhD, PT keroach@miami.edu OR Neva Kirk-Sanchez, PhD, PT nkirksanchez@miami.edu

The applicant must meet all the general admissions requirements of the University of Miami Graduate School. Additionally, stipulations include:

- Direct entry into the PhD program is dependent upon having any of the degrees below:
  - An entry-level Masters Degree in Physical Therapy
  - An advanced Masters Degree with a Bachelors Degree in Physical Therapy
  - A Bachelors Degree in Physical Therapy.
- An applicant with a Bachelors Degree in Physical Therapy, though able to commence course work in the PHD Program, will be required to complete the credits to equal
that of Advanced Masters Degree in Physical Therapy before final admission to the PhD Program.

- Official Transcripts of all college work.
- Three completed recommendation forms with at least one form completed by a physical therapist.
- A letter indicating career goals and objectives.
- Licensure or eligibility for licensure, as a physical therapist in the State of Florida (must be licensed within 1 year of admission).
- GRE, The University of Miami requires a minimum of 1000 on the verbal and quantitative section. In addition you are required to take the analytical section.

Foreign applicants, who complete college and university work in a foreign country, must have all transcripts evaluated by the University of Miami’s Office of International Admissions.

The research areas of the faculty are diverse, reflecting the clinical and scientific emphasizes areas of the faculty. Please refer to the Faculty Section for specifics.

For more information contact:

Dr. Edelle Field-Fote, Assistant-Chair, PhD Studies
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
phone 305-284-4535
e-mail: physicaltherapy@miami.edu

DEGREE PROGRAMS

DOCTOR OF PHYSICAL THERAPY (entry level D.P.T.)

The Department offers the clinical Doctor of Physical Therapy (DPT). The DPT program recognizes the importance of in-depth basic and applied science knowledge and the humanities. As such, the curriculum is carefully sequenced to allow students to develop skills in both classroom and clinical settings.

Faculty also understand the importance of presenting problem-solving skills in conjunction with fundamental physical therapy concepts so that students will develop the professional attitudes and insights required for sustained and continued growth throughout their careers.

The entry-level doctoral program (DPT) is offered under the auspices of the Department of Physical Therapy, University of Miami Miller School of Medicine.

DOCTOR OF PHILOSOPHY IN PHYSICAL THERAPY (Ph.D.)

The University of Miami Doctor of Philosophy in Physical Therapy program develops physical therapist students for leadership positions in academic and research settings. Along with guiding students in the development of requisite knowledge and skills, the program promotes professional socialization into the role of academic faculty. We believe preparation to teach and undertake research in a physical therapy curriculum at the university level requires excellence in three dimensions: 1) Expertise in a specified content area; 2) Advanced knowledge and skill in research
methods, design, and implementation of analysis and communication of results; and 3) Proficiency in instructional design, teaching methods, and evaluation. The successful integration of these three dimensions, each complex in its own right, provides the means for the student to develop expertise in testing, analyzing, researching, and teaching about disorders that interfere with function. Unifying these three core areas is the process of socialization to the role of a faculty member, including an awareness of academic responsibilities and sensitivity to the needs of the adult learner.

In keeping with this philosophy, students develop breadth of knowledge through completion of coursework from three basic core areas: Concentration Core, Research Core, and Education Core. They develop depth by completing elective courses with the intent to build expertise in their respective areas of concentration. The successful graduate of this program will have the requisite knowledge and skills to integrate research findings and scientific theory with clinical observations. On this basis, the graduate will be prepared to perform original research aimed at developing new knowledge to enhance the scientific basis of clinical practice and theoretical principles that will advance the profession of physical therapy. The program offers opportunities for the student to gain skill in communicating theories, concepts and research findings and to experience the roles and responsibilities of an academic faculty member. Students complete a dissertation project in which they develop and conduct a unique and significant research investigation with the guidance of a Physical Therapy faculty member as research advisor.

**DEGREE REQUIREMENTS**

**DOCTOR OF PHYSICAL THERAPY (D.P.T.)**

Completion of the degree requirement for the DPT degree in Physical Therapy entails didactic studies, a completed research project, and clinical internships totaling 105 credits.

The University of Miami, Department of Physical Therapy has affiliations with 350 clinical sites locally and throughout the country. Distant internships may incur additional expenses for the student.

**DOCTOR OF PHILOSOPHY IN PHYSICAL THERAPY (Ph.D.)**

The curriculum, for all three core content areas (Musculoskeletal, Motor Control, and Outcomes Research) consist of:

- 19 - 21 credits in a core concentration area (i.e., Motor Control, Musculoskeletal, or Outcomes Research) 12 credits in core education courses,
- 12 credits in core research courses,
- 6 - 21 credits in electives in area of concentration and
- 12 credits of Doctoral dissertation for a total of 60-75 credits.
- Credits may vary depending on educational background of applicants.

[Physical Therapy Course Listing](#)
PHYSIOLOGY AND BIOPHYSICS - Dept. Code: PHS
www.biomed.miami.edu/physiol

The Department offers training leading to the Ph.D. degree in Physiology and Biophysics.
Inquiries are also invited from those wishing to pursue a dual, M.D./Ph.D., degree program.
The M.S. degree is normally bypassed in the Department.
Physiology and Biophysics studies the molecular basis for fundamental processes related to life such as:

- How does the brain work?
- How do we remember?
- How does the heart beat?
- How do we breathe?
- How do we see?
- How do we move?

Research facilities and guidance for graduate and postdoctoral work are available in development of neurobiology, sensory receptor mechanisms, axonal electrophysiology, ionic mechanism of the nerve impulse, electrophysiological and molecular aspects of synaptic and neuromuscular transmission, ion channels in nerve and muscle cell membranes, metabolic aspects of nervous function, molecular neuroscience, neuroimmunology, protein structure-function studies, molecular recognition, ligand-receptor interactions, neuropeptides, axonal growth, neurotrophic factors, cytokines, gene targeting, transgenic mice, neuronal apoptosis, nerve regeneration, molecular adhesion, and regulation of muscle contraction.

As described below, entrance into all graduate programs at the Miller School of Medicine is now through the Program in Biomedical Sciences (PIBS).

After entry into the Physiology and Biophysics program students take courses PHS 510, 511, 512, 641, and 642 unless they have mastered the equivalent of these. In planning their programs, students should take advantage not only of courses given by this Department but also of pertinent course offerings of other departments. Once the student has a sponsor, who, in consultation with a supervisory committee appointed when the dissertation project is chosen, provides guidance.

Since the Department aims to prepare its graduates for careers in research and teaching, all students in the Department are expected to participate in some teaching. Fellowships are general awarded to accepted students. Traineeships are also available under an NIH supported Training Grant.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.
Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development. Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study.

- Students should apply online at: www.biomed.miami.edu

The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the 1st year students choose mentors and formally enter individual graduate programs.

**REQUIREMENTS FOR THE PH.D. DEGREE INCLUDE:**

36 graduate credits in courses and seminars and an additional 24 credits in dissertation research.

Satisfactory performance on both written and oral parts of a qualifying examination that will require demonstrating mastery of relevant physiological principles and methods. The examination must be passed not later than 24 months after enrollment in the Department. Up to 12 transfer credits earned elsewhere may be acceptable toward Ph.D. requirements.

The Ph.D. dissertation research must be original work of a quality acceptable for publication in a first-rate scientific journal.

For further details on requirements, the general information sections of this Bulletin should be consulted.

Prospective applicants are urged to write early to the Department for further information on the Department’s activities, training resources, requirements, and financial aids. Address inquiries to:

Dr. D. Landowne, Chair
Graduate Studies Committee
Department of Physiology and Biophysics
P. O. Box 016430
Miami, FL 33101
305/243-6821
305/243-5931 (fax)
email to dl@miami.edu or visit http://chroma.med.miami.edu/physiol
M.D./PH.D. PROGRAMS
Students interested in pursuing careers in academic medicine or, more generally, in medically-related research may wish to enter a dual (M.D./Ph.D.) degree program. Details about this program and application procedures are obtainable from the Graduate Studies Committee Chairman at the address given above.

Physiology and Biophysics Course Listing
DEPARTMENTS
DEPARTMENT OF INSTRUMENTAL PERFORMANCE - Dept. Code: MIP
DEPARTMENT OF KEYBOARD PERFORMANCE - Dept. Code: MKP
DEPARTMENT OF MUSIC EDUCATION AND MUSIC THERAPY - Dept. Code: MED
DEPARTMENT OF MUSIC MEDIA AND INDUSTRY - Dept. Code: MMI
DEPARTMENT OF MUSIC THEORY-COMPOSITION - Dept. Code: MTC
DEPARTMENT OF MUSICOLOGY - Dept. Code: MCY
DEPARTMENT OF STUDIO MUSIC AND JAZZ - Dept. Code: MSJ
DEPARTMENT OF VOCAL PERFORMANCE - Dept. Code: MVP

ADMISSION REQUIREMENTS
I. Students wishing to enroll for graduate credit in the Frost School of Music, whether or not they plan to become candidates for a degree, must fulfill the requirements for admission to the Graduate School listed elsewhere in the Bulletin.

II. In addition to these general requirements, the student must meet the following requirements of the Frost School of Music:
A. The Graduate Record Examination. (G.R.E. not required for Master of Music in Performance and Jazz Performance).
B. An on-campus audition is required of all D.M.A. applicants in Performance; M.M. applicants in Performance may audition in person or by recording. Prospective students for any major are encouraged to seek an interview with members of the University of Miami staff when they are serving as guest conductors and clinicians in various parts of the country.
C. An interview either on or off campus is required of all prospective Ph.D. students and D.M.A. students in composition and jazz composition.
D. Prospective Composition majors, Media Writing and Production majors, and Studio Jazz Writing majors are required to submit a portfolio of original compositions.
E. A writing sample of a major paper or thesis is required of applicants in Choral Conducting, Music Theory, Music Therapy, Musicology, Vocal Pedagogy, and Vocal Performance.
F. Prospective Ph.D. students in Music Education are required to show evidence of successful teaching experience and provide a writing sample of a major paper or thesis.
G. Placement Examination: During the orientation prior to registration, new masters and doctoral students are required to take placement tests for entrance to graduate courses. Placement auditions are also required in performance before assignment to ensembles. Courses to remedy deficiencies indicated by these examinations must be taken at the earliest opportunity. (A student is presumed deficient in any area in which he/she does not take the entrance examinations.)
DEGREE PROGRAMS

Doctor of Philosophy – Deg. Code: PHD
  Music Education – Conc. Code: MED

Doctor of Musical Arts – Deg. Code: DMA

DEGREE REQUIREMENTS

DOCTOR OF MUSICAL ARTS (DMA)

The purpose of the Doctor of Musical Arts is to train the most promising musicians at the highest musical and intellectual level for prominent careers in their field. The degree stresses excellence in performance, composition, scholarship, and teaching. By its nature, the Doctor of Musical Arts provides opportunities for students with proven accomplishment to prepare themselves for the professorship.

For the Doctor of Musical Arts in Performance, Keyboard Performance and Pedagogy, Composition, Jazz Composition, Jazz Performance, and Conducting, the candidate must meet all the general requirements for the Ph.D. degree with respect to residence, research tool requirements, total minimum hours, and written and oral examinations. The major differences between the D.M.A. and the Ph.D. are the creative efforts and performance that replace the dissertation requirements in the D.M.A. degree program. There will also be some variation in the research tool requirements in order that they apply in a more practical way to the needs of students.

ENTRANCE REQUIREMENTS

Selection of student based on:

1. Graduate Record Examination (Aptitude portion)
2. Academic record
3. Recommendations
4. Personal audition (Performance Majors); preliminary video tape required for instrumental conducting
5. Samples of musical composition (Composition Majors)
6. Writing Sample (major paper or thesis; Choral Conducting and Vocal Performance Majors)

PLACEMENT EXAMINATIONS

During the three days before registration, all new doctoral students are required to take examinations in music theory, and music history and literature, which will serve as placement tests or prerequisites for entrance to graduate courses. Courses to remedy deficiencies indicated by these examinations must be taken at the earliest opportunity.
DOCTORAL COMMITTEE

The committee is appointed when the student is formally admitted to a doctoral program. It will consist of a minimum of four members, three from the area of concentration and a minimum of one from the areas of Music Theory, Musicology, or Music Education (an approved member from a department outside of the Frost School of Music is possible). A committee may be expanded beyond the minimum number of members based on the needs of the student to a maximum of six. Of these, three (including the committee chairman) shall be regular members of the Graduate Faculty.

Responsibilities of the committee shall include the following:

1. Overseeing all of the students work prior to admission to candidacy, including academic program planning and advising as to recital repertoire.

2. Advising the student regarding relevant research competencies (tools) and ensuring that the student demonstrates these competencies prior to admission to candidacy.

3. Adjudging the quality of the student’s recitals, pedagogy presentations or compositions.

4. Overseeing the doctoral essay or lecture recital, including approval of the topic and proposal, supervision of the writing of the essay or lecture recital, assessment of the quality of the final essay or lecture recital, and the quality of the final essay defense. (In cases where special faculty expertise is needed for a particular essay topic, changes in membership of the doctoral committee may be made. Membership of the essay committee is recommended by the department or program concerned, and approved and appointed by the Dean of the Graduate School.)

RESEARCH TOOL REQUIREMENTS

The candidate will be required to show competency in the research tools recommended by the student’s doctoral committee, which is responsible for ensuring that the tools are relevant to the student and that procedures for demonstration of the competencies are appropriate. Research tools must be demonstrated and documented prior to admission to candidacy.

COURSE WORK (Extent of course work is determined by Placement Examinations, however, candidate must complete a minimum of 42 credit hours)

COGNATES

Doctor of Musical Arts students may select an additional formal area of study through the cognate option. The Departments in which the cognate resides administers the cognate. Students must apply to the cognate Department for admission. The admission process may include an audition, interview, portfolio, or testing as determined by the cognate Department. Students must complete all requirements specified for a cognate to be recognized as having completed the cognate. Otherwise, the credits will be considered electives. No credits required in the DMA program can apply to the cognate. Any overlap will require approved course substitutions within either the DMA program or the cognate as determined to be most appropriate by the Dean of Graduate Studies.
Procedures for Entering a Cognate
1. Review the cognates offered on the Graduate Studies web site.
2. Select the cognate you would like to pursue.
3. Contact the Department in which the cognate resides and obtain written approval of your entrance. A simple e-mail by the faculty member in charge of the cognate to the Graduate Studies Office would suffice.
4. Visit the Graduate Studies Office to formally sign-up for the cognate and to obtain a copy of the Academic Program Record (APR) for the cognate.

ACCOMPANYING/CHAMBER MUSIC (12 credits)

Studio/Ensemble Accompanying (MKP691) 5 credits
String/Keyboard Ensemble (MIP645) 1 credit
Accompanying/Chamber Music Seminar 2 credits
Any one of the following courses: 1 credit
   String/Keyboard Ensemble (MIP645, 1 cr.)
   Accompanying/Chamber Music Seminar (1 cr.)
   Harpsichord, Organ, or Jazz Piano (1 cr.)
Any one of the following courses: 3 credits
   History of Chamber Music (MCY532, 3 cr.)
   Art Song Literature (MVP525, 3 cr.)
   Operatic Literature (MVP522, 3 cr.)
   American Musical Theater (MCY583, 3 cr.)

CONDUCTING: Choral (12 credits)

Applied Conducting Instruction 1 credit
Choral Conducting Workshop (MVP67X) 3 credits
Choral Score Study (MVP508) 2 credits
Choral Literature I (MCY535) 2 credits
Choral Literature II (MCY536) 2 credits
Choral Methods (MED632) 2 credits

CONDUCTING: Instrumental (12 credits)

MIP610 Conducting Seminar 4 credits
Approved electives in conducting and/or ensembles 3 credits
Approved electives related to the art of conducting 5 credits

HIGHER EDUCATION (12 credits)

Technology in Music Education (MED570) 3 credits
Teaching Music in College (MED690) 1 credit
Any combination of the following two courses types: 5 credits
   Special Projects: Higher Ed. in Music (MED693, 1-2 cr.)
   Pedagogy Course(s) in Music (2-3 cr.)
Elective selected from one of the following: 3 credits
   Organiz. & Admin. in Higher Ed. (EPS533, 3 cr.)
   Higher Ed. in the U. S. (EPS603, 3 cr.)
   Music Learning & Curriculum (MED560, 3 cr.)

INSTRUMENTAL PERFORMANCE (12 credits)

Applied Performance Instruction 6 credits
Approved Performance Ensembles 6 credits
JAZZ PERFORMANCE (12 credits)
- Applied Performance Instruction 6 credits
- Select one course from below: 3 credits
  - Jazz Pedagogy (MSJ544, 3 cr.)
  - Analysis of Jazz Styles (MSJ620, 3 cr.)
- Electives in Jazz Theory / Improv. / Ensembles 3 credits

KEYBOARD PEDAGOGY (12 credits)
- Keyboard Pedagogy (MKP547) 2 credits
- Keyboard Pedagogy (MKP593 or 693) 2 credits
- Seminar in Keyboard Pedagogy (MKP647) 2 credits
- Keyboard Pedagogy Workshop (MKP650) 4 credits
- Keyboard Pedagogy Internship (MKP680) 2 credits

MUSIC BUSINESS (12 credits)
- Copyright/Publication (MMI573) 3 credits
- Recorded Music Operations (MMI537) 3 credits
- Entrepreneurship for Musicians (MMI530) 3 credits
- Analysis of Music Industry Agreements (MMI650) 3 credits

MUSIC EDUCATION (12 credits)
- Music Learning & Curriculum (MED560) 3 credits
- Psychology of Music (MED562) 3 credits
- Seminar in Music Teacher Education (MED670) 1 credit
- Doctoral Seminar (MED680) 1 credit
- Teaching Music in College (MED690) 1 credit
- Course selected from one of the following: 3 credits
  - Music Assessment (MED664, 3 cr.)
  - Technology in Music Education (MED570, 3 cr.)
  - International Music Education (MED620, 3 cr.)
  - History & Philosophy of Music Education (MED660, 3 cr.)

MUSIC TECHNOLOGY (12 credits)
- Select courses from those below: 12 credits
  - Electronic Music Studio (MTC505, 2 cr.)
  - MIDI and Control Processing (MTC506, 2 cr.)
  - Digital Sound Synthesis and Processing (MTC507, 2 cr.)
  - Multimedia for Musicians (MTC521, 3 cr.)
  - Film Scoring I (MTC511, 3 cr.)
  - Film Scoring II (MTC512, 3 cr.)
  - Electronic and Computer Music Seminar (MTC667) 1-3 credits
  - Intro To MIDI Seq. & Digital Workstations (MSJ522, 2 cr.)
  - Audio Technology for Musicians (MMI520, 2 cr.)
  - Digital Audio I (MMI502, 3 cr.)
  - Technology in Music Education (MED570, 3 cr.)
  - Computer Applications in Music Education (MED571, 2 cr.)

MUSIC THEORY (12 credits)
- Enrollment in this cognate waives any other MTC requirements for the degree.
- Select courses from those below: 12 credits
  - The Aesthetics of Music (MTC501, 3 cr.)
  - Sixteenth-Century Counterpoint (MTC513, 3 cr.)
Advanced Counterpoint (MTC518, 3 cr.)
Theory Pedagogy (MTC611, 3 cr.)
Advanced Comprehensive Theory (MTC612, 3 cr.)
Twentieth Century Idioms (MTC613, 3 cr.)
Analytical Techniques (MTC617, 3 cr.)

MUSICOLOGY (12 credits)
Bibliography (MCY528) 3 credits
Approved Musicology Courses 9 credits

VOCAL PEDAGOGY (12 credits)
Approved courses in pedagogy, vocal diction, or related courses.

VOCAL PERFORMANCE (12 credits)
Private Voice MVP VOM-P 4 credits
Vocal Pedagogy (MVP538) 2 credits
Vocal Pedagogy (MVP638) 2 credits
Language Diction for Singers (MVP65X) 4 credits

VOCAL ACCOMPANYING (12 credits)
Private Voice Lessons 2 credits
Language Diction for Singers (MVP65X) 2 credits
Vocal Accompanying (MKP687) 2 credits
Vocal Literature (Select one from below): 3 credits
  Art Song Literature (MCY525, 3 cr.)
  Operatic Literature (MCY522, 3 cr.)
Select courses from any below: 3 credits
  American Musical Theater (MCY583, 3 cr.)
  Graduate Courses in Vocal Performance

QUALIFYING EXAMINATION
To be taken upon completion of approximately 18 credit hours of work. Exams in the areas of

1. Musicology;
2. Music Theory-Composition; and
3. Music Education (If required by the program).

Performance and jazz performance majors must present a qualifying recital during the first semester in residence.

COMPREHENSIVE EXAMINATION
To be taken in major area (except performance) after completion of approximately 36 credit hours. Examination may be oral or written.
ADMISSION TO CANDIDACY

Doctoral students are admitted to candidacy after completing research tool requirements, qualifying and comprehensive examinations. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

PERFORMANCE AND CREATIVE REQUIREMENTS

D.M.A. students in performance, jazz performance, or keyboard performance and pedagogy may present one recital before the qualifying written examination (provided they have passed their qualifying recital). Before the second or third, depending upon program, recital they must have passed the Qualifying Examinations and removed all reservations for the written examinations in music theory, musicology, and music education, as well as having presented a proposal for the doctoral essay to their committee. Before the final recital the student must be admitted to candidacy (this requirement includes the completion of both the qualifying examination and research tool subjects). All recitals are to be presented during either Fall or Spring semesters.

Performance Majors
Students accepted in the program must present three full-length solo recitals. In addition, instrumentalists are expected to perform a concerto with orchestra or a chamber music recital. Vocalists are expected to execute one or more substantial roles in a large scale work, e.g., opera or oratorio in addition to the solo recitals. Students majoring in accompanying and chamber music will present one solo recital, one chamber music recital, and three accompanying recitals. For Keyboard Performance and Pedagogy, an approved combination of recitals and pedagogy presentations is required.

Jazz Performance Majors
Students must present three full-length recitals

Conducting Majors (Choral)
No less than two approved full recitals shall be presented by each candidate.

Conducting Majors (Instrumental)
Three approved public recitals (or the equivalent) with suitable performing groups must be given during the period of residency and prior to the oral examination.

Composition Majors
1. The candidate will be required to compose a piece of major proportions for large ensemble. In addition, no less than three works for any instrumental or vocal group combination will be required during the period of residency.

2. A formal written analysis of the major work will be required. This will serve as the Doctoral Essay for composition majors.

3. Some form of a recital or public performance of the candidate’s compositions will be required. This requirement could be fulfilled with a recital that would include representative works composed during the student’s residence.
By means of a written doctoral essay or a lecture recital all D.M.A. candidates will be expected to give evidence of their ability to make an original scholarly investigation and present its results in an articulate manner.

Final Oral Examination (administered during Fall and Spring semesters only): defense of the creative or recreative work, and the written essay or lecture recital.

LECTURE RECITAL

The lecture recital is a major presentation whose content must pertain to musical performance, musical analysis, performance practice, comparative editions, interpretation, musical style, or other issues that directly relate to a central theme of music performance. A written document of the lecture recital must be submitted to the Graduate School following procedures similar to those of the Doctoral Essay.

MASTER’S DEGREES

I. Programs. The Master of Music Degree is offered with majors in the areas shown above.

II. Ensemble Requirements. The curricula for Master of Music degrees in performance and conducting include participation in one ensemble during each semester that a student is registered for seven credits or more.

III. General Admission Requirements. Those seeking admission in Performance should have an undergraduate major or its equivalent in the performance field chosen. Those applying for admission in Music Education should have an undergraduate background substantially equivalent to certification requirements and teaching experience. Students entering all graduate degree programs must take placement tests at the beginning of the first Fall or Spring Semester in residence. Those seeking admission in Composition, Studio Jazz Writing, or Media Writing and Production must submit with the application a portfolio of compositions as evidence of creative ability.

IV. Credits. A minimum of thirty credits of graduate level courses with an average of B and no grade below C. All students must complete the required courses of their major.

V. Oral Examinations. An oral examination in defense of the thesis, project, or recital is required. Final oral exams are administered during Fall and Spring semesters only.

VI. SPECIFIC REQUIREMENTS FOR PERFORMANCE MAJORS

A. Prior to admission to candidacy for a degree in performance, the student must demonstrate, by examination, skills and capacities in the following areas:

1. Harmony - written, aural, and keyboard
2. Proficiency in sight-singing and in melodic, harmonic, and rhythmic dictation
3. Elementary counterpoint
4. The history and literature of music and the study of musical form, analytic or applied
Conducting Recital Guidelines

**Master’s Recital (1 Credit)**
A compilation on DVD of conducting single or multiple works of live performances of major ensembles spread across the Masters’ experience. These performances are arranged in consultation with the major professor who assists in the preparation of the performances.

**Master’s Advanced Recital (2 Credits)**
A full-length conducting recital is prepared and presented. The ensemble(s) and repertoire will be selected in close consultation with the major professor who will assist in the preparation process. All aspects of performance preparation including scheduling, venue arrangements, program notes, and the like will be carried out by the student under the guidance of the major professor.

Performance Recital Guidelines

**Master’s Recital (1 Credit)**
A full-length recital performed publicly by the student that may include chamber music in which the student’s instrument plays a prominent role. Selection of repertoire is determined in consultation with the major professor who assists in the preparation of the performances.

**Master’s Advanced Recital (2 Credits)**
A full-length recital in which all music performed features the recitalist as a soloist. The recitalist will prepare extended program notes on the repertoire performed. Portions of the extended program notes are to be included with the recital program distributed to the audience. The performance is to be recorded in both audio and video so that the recitalist presents a DVD as evidence of the recital to the Dean of Graduate Studies prior to the end of the semester in which the recital was given. Repertoire will be selected in consultation with the major professor, who will assist in the preparation process. The student under the guidance of the major professor will carry out all aspects of performance preparation including scheduling, venue arrangements, program notes, and the like.

MM–Instrumental Conducting (MCDI)
Candidates must possess and demonstrate an unquestioned gift of musical leadership based upon broad experience with instrumental ensembles. Advanced orchestration must be included in the program. Admission requirements include a baccalaureate degree in conducting or performance, accumulated practical experience with instrumental ensembles, and experience equivalent to an undergraduate requirement in orchestration. Enrollment in this major is only by special permission.

MM–Instrumental Performance (MIP)

Violin: The candidate must show an adequate technical grounding in scales, arpeggios, bowing and phrasing, demonstrate adequate ability in sight reading on the instrument, and be able to read at sight simple piano accompaniments.

Harp: The candidate must have a mastery of scales and arpeggios in all octaves in both slow and rapid tempo, and in various rhythms, should have had orchestral and other ensemble experience, should be able to read orchestral parts at sight, and should have developed the ability to transcribe music written for keyboard (or other) instruments for use in orchestra or ensemble or accompanying.

Multiple Woodwinds: The applicant must demonstrate, by audition, proficiency in at least three of the following families of instruments: clarinet, saxophone, flute, and double reed. Applied instruction will include a minimum of six credits from the above groups as determined by the supervisory committee. The curriculum further includes two credits in MIP 547 and one credit in MED 541. The recital (whose content and evaluation are the responsibility of the student’s committee) will consist of performance on the candidate’s major instrument, and on instruments from at least two other woodwinds. The student is expected to supply his/her own professional quality instruments.

Other Orchestral Instruments: The candidate must demonstrate a well grounded technique and an able control of his/her instrument, be able to perform as a soloist with orchestra in a concerto or concert piece for the instrument, and should have acquired a sufficiently thorough orchestral routine to play in a professional orchestra. The candidate should also be able to read at sight simple piano music, and must have completed sufficient experience in band, orchestra and chamber music playing.

DEGREE PROGRAMS

DOCTOR OF PHILOSOPHY (PHD)

The Doctor of Philosophy program is offered in Music Education. Requirements for the degree will conform to those for the general Doctor of Philosophy degree, listed elsewhere in this Bulletin. The Ph.D. is a research degree requiring 60 credit hours beyond the Master's degree or 90 credit hours beyond a Bachelor’s degree. Enrollment for the Ph.D. degree is limited. Acceptance into the program will be based on academic record, Graduate Record Examination Scores, personal suitability, recommendations, experience, and demonstrated teaching competency.

Students are admitted to candidacy after successful completion of course work, qualifying examinations in musicology, music theory, and music education, and research tool requirements. Research tools are selected in consultation with the student's advisor, and are related to the student’s proposed dissertation research. Comprehensive examinations are given after all academic work is completed to meet the candidacy requirement. The student’s dissertation research topic must be presented to and approved by the student’s committee. No student gains the right to be recommended for the degree simply by completing course requirements. Final oral examinations are administered during Fall & Spring Semesters only.

SPECIALIST IN MUSIC EDUCATION

The Specialist in Music Education is a terminal degree requiring 33 credit hours beyond the Master’s degree. The program emphasizes course work rather than research, and is designed for music teachers who desire post-master’s work that results in recognized professional credentials. The culminating project for the degree is a curriculum project that deals with some aspect of preschool, elementary, or secondary music education. The Specialist in Music Education degree is independent of the Doctor of Philosophy degree in Music Education, and admission to the program does not imply admission in the Doctor of Philosophy program.

Admission Requirements

1. Certification as a music teacher.
2. Completion of the master’s degree with an outstanding record from an accredited institution.
3. A minimum of three years of successful teaching experience.
4. Acceptable performance on the Graduate Record Examination.
5. Teaching videotape.
6. Admission interview.

Musicology students are expected to demonstrate proficiency in a language other than English, normally German, French, or Spanish. Proficiency examinations will be administered by the Musicology Department and will consist of 1-2 passages from representative scholarly readings. Alternatively, enrolling in GER 625, FRE 625, or an equivalent course at the graduate level may fulfill the requirement. This requirement should be completed by the beginning of the second year to facilitate research on the master’s thesis.

**MM–Choral Conducting (MCDC)**

Candidates must possess and demonstrate an unquestioned gift of musical leadership based upon broad experience with choral ensembles. MVP538 (Vocal Pedagogy) and 2-3 credits of private vocal instruction must be included in the program. Admission requirements include a baccalaureate degree in music, practical experience in choral conducting through church, school, or community ensembles. Enrollment in this major is only by special permission. For detailed information, please consult the Graduate Choral Conducting Student Handbook, available from the Choral Office.

**Major Area**
1 credit   MVPCDI Private Conducting Lessons

ARTIST DIPLOMA IN PERFORMANCE
The Artist Diploma in Performance is a program of advanced study designed for the outstanding performance career-oriented performer. The curriculum will focus on preparation for major competitions, auditions, apprenticeships, and the development of a performance career. Entrance to the program is limited to those individuals who have demonstrated exceptional performance skills by audition. A fully enrolled student can complete the eighteen-hour program in one year.

Requirements
8 credits Applied Lessons
2 credits Performance Ensembles
2 credits Recital
6 credits Approved Studies in Music

Vocal Performance Course Listing
The School of Nursing and Health Studies offers three graduate degrees: the Master of Science in Nursing (MSN), the Doctor of Nursing Practice (DNP), and the Doctor of Philosophy (PhD) with a major in Nursing.

**MSN ADMISSION REQUIREMENTS**

Admission to graduate programs in the School is subject to the rules, regulations, and procedures as determined by each graduate nursing program and/or set out in the Graduate Bulletin of the University of Miami. It is the responsibility of each student to understand these requirements and to be sure that they are met.

All of those wishing to take courses for graduate credit, whether or not they wish to become candidates for the Master of Science in Nursing degree (M.S.N.), must complete an application for admission well in advance of registration. Professional nurses holding a Bachelor of Science degree with a major in nursing are eligible to apply for admission to the Master of Science program. Admission to the masters program requires:

1. The completed application form.
2. Official transcripts of all previous coursework, both undergraduate and graduate (with undergraduate G.P.A. of 3.0 on a 4.0 scale).
3. A satisfactory score on the quantitative and verbal portions of the Graduate Record Examination (GRE) General Test. A waiver of the GRE for the MSN in Nurse Education is permitted on a case by case basis.
4. A satisfactory score on the Test of English as a Foreign Language (TOEFL) by those international applicants whose native language is not English.
5. Three written references from persons qualified to comment upon the applicants’ academic abilities and probable success in graduate study; references will be acceptable from a major professor, supervisor/employer, and other professional persons, preferably professional nursing personnel.
6. A current Florida license is required for clinical courses.
7. A statement of professional goals and objectives for graduate study.
8. An interview with one or more faculty.
9. Advanced Cardiac Life Support (ACLS) certification for the Acute Care and Nurse Anesthesia specialties.

**MASTER OF SCIENCE IN NURSING**

The Master of Science in Nursing degree focuses upon selected areas of advanced practice nursing consisting of 30 to 44 semester hours credits. The degree requirements may be completed in three to seven semesters of full-time study depending on the specialty. Part-time study is also available for the Acute Care, Nurse Education, and Family Nurse Practitioner tracks. MSN programs are lock-step and students must successfully complete a semester to progress to the next semester. Further information about each program can be obtained from the Office of Student Services, School of Nursing and Health Studies, University of Miami, P.O. Box 248153, Coral Gables, FL 33124-3850; ph (305) 284-3666.
The MSN Program is accredited by the Commission of Collegiate Nursing Education (CCNE), One DuPont Circle NW, Suite 530, Washington, DC 20036, (202) 887-6791. Additional national accreditations are from the American College of Nurse Midwives Division of Accreditation, 8430 Colesville Road, Suite 1550, Silver Spring, MD 20910, (204) 485-1845, and the Council on Accreditation of Nurse Anesthesia Education Programs (COA), 222 South Prospect Avenue, Park Ridge, Illinois, 60068-4001, (847) 692-7050 (ext. 1154).

**MSN SPECIALTY TRACKS: ACUTE CARE NURSE PRACTITIONER, NURSE ANESTHESIA, FAMILY NURSE PRACTITIONER**

The curriculum leading to the Master of Science in Nursing degree prepares students for advanced practice nursing in Acute Care, Nurse Anesthesia, and Family Nursing.

MSN DEGREE REQUIREMENTS

GRADUATE STUDENT RESPONSIBILITIES

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student’s responsibility to understand fully, and comply with all the provisions of the Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Requests for deviation from the program of study or school requirements are granted only by written approval from the Dean. Students who are in violation of the provisions of this Bulletin may be withdrawn unilaterally by appropriate School officials from classes, deleted as Nursing and Health Studies students or have a stop placed upon their future enrollment. The school reserves the right to change academic requirements to include course offerings to ensure that students are receiving the latest knowledge. Changes are transmitted by written notice in the current year of the School of Nursing and Health Studies Master’s Handbook located at www.miami.edu/sonhs or by the Dean.

PROGRESSION POLICY

In order for MSN students to progress through their programs to completion, the academic policy is as follows:

1. Any graduate student who receives a “C” in a nursing course will be dismissed from his or her program.
2. A grade of “B-” or “C+” for a course is below graduate standards, and the student must repeat that course. However, a student may only repeat one course, one time.
3. A passing grade in all clinical experiences is required to pass a course having a clinical component (generally listed as a “lab section” by UM). Students will be counseled during their mid-term evaluations as to their status or progress. Students who are not making satisfactory progress may also receive an academic alert at mid-semester or mid-course.
4. All grades are included in the computation of the UM overall grade point average including those that are failed or repeated.

DOCTOR OF NURSING PRACTICE

The Doctorate in Nursing Practice (DNP) requires 38 credits of coursework beyond the master’s degree. The DNP degree is a practice-focused doctorate designed for nurses seeking a terminal degree in nursing practice. The outcome objectives for graduates of the DNP program are to:

- Integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice that addresses health care disparities.
- Evaluate research methods and findings to create an evidence base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities.
- Synthesize knowledge gained from traditional and innovative learning methods to lead quality, cost-effective health care collaborations addressing health care disparities.
Demonstrate expert clinical judgment and knowledge of health care systems to design, deliver and evaluate evidence-based care interventions to reduce health care disparities.

Model expert nursing practice and serve as mentors to nursing colleagues in their efforts to improve nursing practice and health care systems.

Employ knowledge of health care policy and economics to develop and evaluate programs to address health care disparities.

**DNP ADMISSION REQUIREMENTS**

- Applicants to the program must submit an online application form located at [www.miami.edu/grad](http://www.miami.edu/grad) and the required application fee.
- A Baccalaureate degree and a Master’s degree in nursing (MSN), and an RN license are required. Applicants with Master’s degrees in other areas will be considered for admission on a case by case basis.
- Official transcripts from undergraduate and graduate institutions if the applicant is not a graduate of the University of Miami
- The Graduate Record Examination (GRE) is not required.
- Three strong letters of recommendation are required preferably from individuals with doctorates in nursing. At least one recommendation should be from an academic source.
- Statement of professional goals for graduate study
- Current résumé
- Applicants for whom English is not the native language must take the Test of English as a Foreign Language
- All applicants will be scheduled for an interview.

**DEGREE REQUIREMENTS**

To receive the Doctor of Nursing Practice degree, the candidate must:

1. Complete all coursework as required with an overall GPA of 3.0 or better.
2. Complete the clinical hours required.
3. Successfully complete the capstone project.
4. Successfully pass a comprehensive examination. The exam is an integrative experience to demonstrate students’ mastery of the outcome objectives of the program.

**GRADUATE STUDENT RESPONSIBILITIES**

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student’s responsibility to understand fully, and comply with all the provisions of the Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Requests for deviation from the program of study or school requirements are granted only by written approval from the Dean. Students who are in violation of the provisions of this Bulletin may be withdrawn unilaterally by appropriate School officials from classes, deleted as Nursing and Health Studies students or have a stop placed upon their future enrollment. The school reserves the right to change academic requirements to include course offerings to ensure that students are receiving the latest knowledge. Changes are transmitted by written notice in the current year of the School of Nursing and Health Studies DNP Handbook located at [www.miami.edu/sonhs](http://www.miami.edu/sonhs) or by the Dean.

DOCTOR OF PHILOSOPHY

The Ph.D. with a major in Nursing Science requires a minimum of 40 credits of coursework beyond the master’s degree or 61 credits of coursework beyond the bachelor’s degree. The principal goal of the Ph.D. with a major in Nursing Science is to prepare scholars and researchers who will contribute to the growth of science in nursing through recognized methods of scholarly inquiry. Admission to the doctoral program is competitive.

PHD ADMISSION REQUIREMENTS

I. Entrance Requirements
   A. Admission. The regular admission procedures include:
      1. The completed application form
      2. The official transcripts of all college work previously taken, including both undergraduate and graduate
      3. The official report of the appropriate entrance examination, taken within five years of the application. Applicants must submit the scores from the Graduate Record Examination; International applicants whose native language is not English must also take and pass the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

   B. Selection of students. Factors considered for admission include:
      1. Completion of the masters degree with an outstanding record from an accredited institution
      2. Adequacy of previous study in advanced clinical nursing
      3. Relevant experience as evidenced in curriculum vitae
      4. Recommendations
      5. Written evaluations by key professors
      6. Statement of professional goals and interests in doctoral study
7. Admissions interview
8. Portfolio of scholarly work related to some aspect of nursing for evaluation by the doctoral admissions committee for evidence of scholarly potential

DEGREE REQUIREMENTS

To receive the Doctor of Philosophy degree the candidate must meet all the general requirements for the Ph.D. degree with respect to residency, and written and oral examinations. 12 credits of dissertation seminar and approval of the dissertation prospectus are required.

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student’s responsibility to understand fully, and comply with all the provisions of the Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Requests for deviation from the program of study or school requirements are granted only by written approval from the Dean. Students who are in violation of the provisions of this Bulletin may be withdrawn unilaterally by appropriate School officials from classes, deleted as Nursing and Health Studies students or have a stop placed upon their future enrollment. The school reserves the right to change academic requirements to include course offerings to ensure that students are receiving the latest knowledge. Changes are transmitted by written notice in the current year of the School of Nursing and Health Studies PhD Handbook located at www.miami.edu/sonhs or by the Dean.

Total dissertation credits = 12
Total credits = 61 (post baccalaureate)

FINANCIAL ASSISTANCE

The School of Nursing and Health Studies provides the following sources of financial assistance for full time graduate students who are not employed full time by other agencies:

1. Tuition Scholarships. These awards vary in amount and are intended to assist the recipient in pursuit of study and research as required by the degree. These scholarships are awarded on a competitive basis.

2. Graduate Stipends. These cash awards, paid monthly, are intended as part of an educational assistance program for Doctoral degree students. The stipends require service in the form of teaching, research assistance, or other appropriate educational activities that may be designated by the supervisor of the recipient.

For further information, contact: Office of Student Services, School of Nursing and Health Studies, University of Miami, P.O. Box 248153, Coral Gables, FL 33124-3850, ph (305) 284-3666.

Nursing Course Listing

Health Sciences Course Listing
INTENSIVE LANGUAGE INSTITUTE

The Intensive Language Institute offers comprehensive language instruction for academic, professional, and personal purposes. The Intensive English Program, a full-time course of study for international students who wish to pursue university studies in the United States, provides instruction in English language and academic study skills. The ILI also offers certificate programs, part-time language courses and customized language programs.

Intensive English Program

The Intensive English Program is designed to prepare students to participate successfully in the academic environment. Students are given a placement test upon arrival to determine the most appropriate level of study. Courses are offered at five levels of instruction. The skills-based curriculum integrates reading and writing, listening and speaking into one complete program of study. The focus is on English language acquisition and application in an academic setting. Specialized classes vary by level; focusing on the needs of the language learners. In Levels 1-3 students concentrate on reading skills and conversation. In Levels 4 and 5, courses on selected topics allow students to use their improving English to investigate areas of interest. Satisfactory completion of the highest level meets the English language requirement for acceptance to undergraduate programs at the University.

For more information contact: Intensive English Program, PO Box 248005, Coral Gables, FL 33124-1610, (305) 284-2752. E-mail: iep@miami.edu. Visit our website at www.miami.edu/iep.

Intensive Language Programs

The certificate in English for Law School Studies is a 6-week summer program for international students to prepare for the English language and academic study skills needed for law school. The certificate in Business Communication consists of five courses focusing on oral and written communication skills necessary for the workplace. Communicative language classes are offered in the evenings and on weekends in Spanish, Portuguese, Italian, Mandarin Chinese and ESL throughout the year. These courses focus on meaningful communication in the chosen language. Advanced level classes focus on Accent Reduction, Presentation Skills, and/or Business Writing. A short-term immersion-style program in Spanish is also offered. The Intensive Language Institute develops and conducts customized language courses on or off campus for individuals, businesses, and organizations with specialized language training needs. For further information, or to register for classes, please call us at (305) 284-4000 or visit us on the web at: www.educationmiami.com/ili. Email: alc.cstudies@miami.edu.
INTERNATIONAL EXCHANGE and LANGUAGE PROGRAMS

INTERNATIONAL EDUCATION AND EXCHANGE PROGRAMS - Dept. Code: SAP

To help you meet the challenges of today and tomorrow, as well as to broaden your educational experience, the University of Miami’s Office of the International Education and Exchange Programs offers an extensive array of overseas programs in over thirty-three countries. Many of our programs offer coursework taught in English.

As you choose among programs, consider some of your options ... Study marine biology on the edge of Australia’s Great Barrier Reef at James Cook University; be at the nerve center of a unified Europe and study economics or politics at the University of Leipzig in Germany; immerse yourself in Japanese culture and business practices at Sophia University, Tokyo; do an internship at Tecnológico de Monterrey in Mexico; explore Europe’s rich heritage at the University of Edinburgh in Scotland; become acquainted with the changing panorama of international relations at Uppsala University in Sweden.

These opportunities for exchange - and many more - are available through the International Education and Exchange Programs office. In addition to programs at overseas universities, the International Education and Exchange Programs office offers UM faculty-led programs abroad. These are UM courses taught by UM faculty who travel abroad with the students during Intersession, Spring Break, and Summer terms. Undergraduate and graduate credits are offered.

Many departments at the University of Miami encourage study abroad options to enhance their basic curriculum. With the assistance of the International Education and Exchange Programs staff and the guidance of your academic advisor, you can select a study abroad program to fit almost any major. Studying abroad is open to Sophomores, Juniors, and Seniors for a semester, a full academic year, or during the intersession and summer terms. Full university credit is awarded for approved courses to participants on UM study abroad programs so that you proceed normally toward graduation. Most financial aid applies.

For further information contact: UM International Education and Exchange Programs, P. O. Box 248263, Coral Gables, FL 33124-1610, (305) 284-3434. E-mail: ieep@miami.edu. Visit our website at www.miami.edu/studyabroad.
The Miami Semester
www.miami.edu/miamisemester

The Miami Semester provides the opportunity for degree-seeking students attending other colleges to spend a semester or summer in Miami living, studying and doing research at the University of Miami. Domestic or international students can take advantage of these unique discipline or topic focused programs. Each Miami Semester is designed to highlight the programs unique to the University, taking advantage of our geographical location, nationally known faculty, and unique environmental features.

The Miami Semester is limited to degree-seeking undergraduates in good standing attending other universities and colleges.

Spring Programs

American Studies

This program allows students to select one to two courses from among the American Studies (AMS) Program's core courses, and classes from other departments based on availability and interests. It is an interdisciplinary approach for students to reflect on the interrelated nature of subjects like, but not limited to, Sociology, Geography, History, and Anthropology, and topics that are relevant to today's society such as cultural diversity, the global economy, regional and geographical norms, and popular culture. The goal of this program is to assist in students’ understanding of the world around them by analyzing events, policies, societal norms and cultures, and historical events. Students may take any combination of courses that equal at least 12 credit hours.

Core Courses:

Students must enroll in at least one (1) of the following:
Introduction to American Studies AMS 101
The U.S., Transnationalism, and Globalism AMS 310
History and Culture of South Florida AMS 350

Additional Courses

Race and Healthcare in America AMS 401

Architecture: New Urbanism

The program allows for students currently majoring in Architecture at other colleges and universities to gain perspective of the field in South Florida. Students enroll in six credits of Architectural Design and six to nine credits of related electives or courses in Urban Studies. Students will also have opportunities to participate in study abroad programs in London, Venice, and/or Spain during intersession and spring breaks as an additional enrollment option (additional tuition and program fees apply). Students are required to maintain a standard full-load of credits for the spring semester of 12-15 UM credits.

Core Courses: (students must submit a design portfolio prior to enrolling in courses)

Students enroll in one (1) of the following:
Architectural Design VII ARC 407
Architectural Design VIII ARC 408
Architectural Design IX ARC 509
Architectural Design X ARC 510
Additional Courses

- Site Study of Selected Architecture and Urbanism (Intersession/Study Abroad)
- ARC323 Management of Professional Practice ARC 452
- Advanced Visual Analysis ARC 512
- General Physics for Architectural Majors PHY 103
- Cities in Time and Space URB 301
- Other Architecture elective course offerings (Interior Design, Landscape, and Historic Preservation)

Audio Engineering

Audio Engineering allows for students currently majoring in Electrical Engineering to study areas such as circuit theory, electronics, signal processing and multimedia with audio studies in acoustics, digital audio, recording and postproduction. Students must enroll in a minimum of two Electrical Engineering courses from the core courses. Students may also opt to add courses in other areas based on availability and interests.

Core Courses:

- Introduction to Digital Signal Processing EEN 436
- Real-time Digital Signal Processing Laboratory EEN 437
- Engineering Acoustics EEN 502
- Digital Speech and Audio EEN 540

Additional Courses:

- Advanced Digital Compositing for Film and Video EEN 595
- Advanced Computer Modeling and 3D Animation EEN 596
- Advanced Audio Editing for Film and Video EEN xxx

Courses available through the Frost School of Music:

- Audio Workshop MMI 141
- Transducer Theory MMI 501

Ecosystem Science and Policy

The Certificate in Ecosystem Science and Policy provides an opportunity for students from other universities to explore the South Florida environment, ecology and culture via interdisciplinary courses and experiential learning.

Students must take at least two core courses in Ecosystem Science and Policy. Miami Semester students will complete their schedules with courses chosen from among the interdisciplinary ECS courses and from other departments based on availability and interests.

Core Courses for sophomores:

- Problems in Ecosystem Science and Policy ECS 112
- Contemporary Environmental Issues ECS 202

Core Courses for juniors and seniors:

- Contemporary Environmental Issues ECS 202
- Perspectives on Environmental Decisions ECS 302
- Interdisciplinary Approaches to Complex Human-Environmental Problems ECS 403
International Finance and Marketing

The Certificate in International Finance and Marketing is designed for business students from other universities who want to add an international dimension to their studies. This program allows students to select from a limited set of courses offered by the School of Business. The program focuses on the international aspects of business. The program is open to students with at least a junior standing who have met the course prerequisites. Students must take at least two courses below, but may take all four.

Core Courses:
- International Finance FIN 330
- International Marketing MKT 360
- International Monetary Economics ECO 442
- International Business Law BSL 412

Marine Science

The Certificate in Marine Science is a hands-on study opportunity for those interested in marine science, oceanography, geology and marine physics. Students must enroll in a minimum of three Marine Science courses. In addition, highly qualified students may be eligible for an independent study research project. Students may also opt to add courses in other areas based on availability and interests.

Sport Administration

Sport Administration is an opportunity for students who are interested in the ethics, leadership, and business of managing athletic organizations. Students will have the opportunity to participate in an internship that fits their interest area as well taking hands-on courses in the Department of Exercise & Sport Sciences. Internships may take place within the UM Athletic Department or local professional sport franchises. Students make take any combination of courses that equal at least 12 credit hours.

Core Courses:
- Sport Facilities and Event Management ESS 206
- Sport Marketing ESS 302
- Essential Leadership in Sports and the Professions ESS 306
- Ethics Ethical Decision Making in Sport and the Professions ESS 308
- Legal Aspects of Sport ESS 401
- Sport Information Management ESS 403
- Finance and Budget in Sport Administration ESS 405
- Seminar in Sport Administration (internship) ESS 498
Summer Program

Cuban Studies (summer only)

Miami is home to a large number of Cuban exiles, who brought their professional backgrounds, culture, music, politics, and diversity. For the last 40+ years they have contributed to the growth and prosperity of Miami. This academic program focuses the possible scenarios that may occur with the transition of power and lessons learned from governments in transition.

Core Course:
   History of Cuba: Cuba After Fidel Castro HIS 353

Additional Course:
   Directed Study (US-Cuba Relations) HIS 451

Students will be able to:
   ▪ Conduct research using the one-of-a-kind Cuban Heritage Collection
   ▪ Participate in special program activities throughout Miami and neighborhoods like Little Havana
   ▪ Become involved in a variety of cultural and educational activities hosted by Casa Bacardi
UNDERGRADUATE COURSES*
* 500 level courses appear in both the undergraduate and graduate course listing and may be considered undergraduate or graduate at the discretion of the department. Prerequisites, co-requisites and other course requirements are subject to change.

Study Abroad Program
ARC101 Architecture Design I
6 credits Fall Semester
The study of architecture as an intellectual and aesthetic discipline. Topics include concept, site, form and technique. Corequisite: ARC 111, 121.
PREREQUISITE: COREQUISITE: ARC 111, 121.

ARC102 Architecture Design II
6 credits Spring Semester
Architectural response to shelter, space and setting requirements. Topics include programming, program analysis and design, anthropometrics, and architecture psychology. Corequisite: ARC 112, 122.

ARC110 Introduction to Architectural Design
3 credits First & Second Summer Session
Introduction to the design process and the role of the architect in society. Building design, landscape architecture, urban planning, historic preservation, architectural theory and graphics are taught through drawing and model making in a studio setting. Open to non-architecture majors in college and high school students entering 10th, 11th and 12th grades interested in exploring the field of architecture.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARC111 Drawing I
3 credits Fall Semester
Exploration and expression of ideas through increased awareness and acquisition of visual and graphic vocabulary, stressing orthographic, oblique and conical projections; light shade and shadow; freehand sketching. Corequisite: ARC 101, 121.
PREREQUISITE: COREQUISITE: ARC 101, 121.

ARC112 Drawing II
3 credits Spring Semester
Conical projection and freehand exploration of graphic expression and representation, studies in principles of composition, perspective, form, color, materials. Corequisite: ARC 102, 122.
PREREQUISITE: ARC 101, 111. COREQUISITE: ARC 102, 122.

ARC121 Architecture and Culture
3 credits Fall Semester
Architectural design as an intellectual and aesthetic discipline. Focus on design theory, language, typology, image, form, context, and case studies. Corequisite: ARC 101, 111.
PREREQUISITE: COREQUISITE: ARC 101, 111.

ARC122 Architecture and Behavior
3 credits Spring Semester
Those aspects of environmental psychology which affect architectural design. Studies in human behavior and the design process, application of psychological factors to the design of buildings and their environment. Corequisite: ARC 102, 112.
PREREQUISITE: ARC 101, 121. COREQUISITE: ARC 102, 112.
ARC141 On-Site Survey of European Architecture and Urbanism
3-6 credits  Spring Semester & First & Second Summer Session
On site introduction to architecture and the city with a historical review of most European periods from classical to contemporary. Survey of European architectural and urbanistic precedents in important selected locations. Elective course open to all majors; lecture and seminar format.

ARC171 Architecture: The Natural and the Manmade
3 credits  Offered By Announcement Only
A review of the relationship between mankind, the landscape, and architecture from American pre-history to the twentieth century.

ARC191 Architecture Drawing
3 credits  Offered By Announcement Only
Methods of graphic simulation for non-architecture majors, stressing orthographic, oblique and conical projections, and architectural graphic conventions: plan, elevation, section, perspective.

ARC203 Architecture Design III
6 credits  Fall Semester
Architectural response to natural environment and site requirements. Focus on site analysis and design, climate, access and circulation, landscape, relation to larger context. Corequisite: ARC 223.
PREREQUISITE: ARC 102, COREQUISITE: ARC 223.

ARC204 Architecture Design IV
6 credits  Spring Semester
Building materials and structure as active constituents of architecture design. Focus on orientation, enclosure, low-energy responses, selection and assembly of construction materials, short and intermediate span structural systems. Corequisite: ARC 231.
PREREQUISITE: ARC 203, 261. COREQUISITE: ARC 231.

ARC213 Computing I
3 credits  Fall & Spring Semester
An introduction to new electronic design tools and technology available to architects today. Lectures on the history and future of computing in the profession.
PREREQUISITE: ARC 102, 111, 112 OR PERMISSION OF INSTRUCTOR.

ARC223 Architecture and the Environment
3 credits  Fall Semester
Architectural response to natural environmental requirements. Focus on climate, control, natural energy use, ecosystems, energy flow, environmental intervention, case studies of indigenous buildings.
PREREQUISITE: ARC 102, 122.

ARC231 Building Structures
3 credits  Spring Semester
The structural behavior and tectonic form of the basic elements of buildings. Topics include loads, stability, equilibrium, strength, and dimensions of structural form.
Corequisite: ARC 204.
PREREQUISITE: PHY 103. COREQUISITE: ARC 204.
University of Miami Bulletin, 2009-2010
Undergraduate Course Listing
SCHOOL OF ARCHITECTURE
ARCHITECTURE

ARC261 Building Construction
3 credits  Fall Semester
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials; wood, masonry, concrete, steel and glass construction techniques; on-site and off-site processes; interior and exterior finishes; assemblies, detailing and building codes. Corequisite: ARC 203.
PREREQUISITE: ARC 102. COREQUISITE: ARC 203.

ARC267 History of Architecture I: Ancient, Medieval and Renaissance
3 credits  Fall Semester
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Corequisite: ARC 203.
PREREQUISITE: COREQUISITE: ARC 203.

ARC268 History of Architecture II: Baroque through Contemporary
3 credits  Spring Semester
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present. Corequisite: ARC 204.
PREREQUISITE: COREQUISITE: ARC 204.

ARC292 Introduction to Architecture Design I
3 credits  Spring Semester
Survey of the architecture profession and introduction to architecture design for non-architecture majors. Role, opportunities, vocabulary, visual awareness, techniques and procedures of design.
PREREQUISITE: ARC 191.

ARC293 Introduction to Architecture Design II
3 credits  Fall Semester
Continuation of ARC 292 and an introduction to the interactions between architecture and the engineering disciplines for non-architecture majors. Theories of building and site design, technology as an integral component of design, program, site, climate and methodology.
PREREQUISITE: ARC 191, 292.

ARC294 Introduction to the Development of Architecture
3 credits  Fall Semester
Introduction to architecture for non-architecture majors. Vocabulary, themes, principles and processes of design, cultural, social, economic and technological influences demonstrated through historic examples.
PREREQUISITE: SOPHOMORE STANDING OR PERMISSION OF INSTRUCTOR.

ARC301 Architecture Design
6 credits  First & Second Summer Session
Comprehensive building and site design for students transferring into the architecture program at third year level. Topics include human, environmental, cultural and technological factors.
PREREQUISITE: SOPHOMORE STANDING.
ARC302 Theory of Classical Architecture and Urbanism
3 credits  Fall Semester
Theoretical basis of western classical architecture and urbanism from Greek and Roman times to today. Studies of classical theories of siting and urbanism, anthologies of classical works, and vernacular interpretations and main contemporary theories and works.
PREREQUISITE: PERMISSION OF INSTRUCTOR, OR ARC 204.

ARC305 Architecture Design V
6 credits  Fall Semester
Environmental systems and structure as active constituents of architectural design. Topics include the integration of enclosure, structure, environmental and mechanical systems in intermediate and long span structures. Corequisite: ARC 362, CAE 213.
PREREQUISITE: ARC 204. COREQUISITE: ARC 362, CAE 213.

ARC306 Architecture Design VI
6 credits  Spring Semester
Government and finance as active constituents of architecture design. Topics include zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies. Corequisite: ARC 351, CAE 313.
PREREQUISITE: ARC 305. CAE 313.

ARC323 On Site Study of Selected Architecture and Urbanism
3-6 credits  Spring Semester & First & Second Summer Session
On site study of specific architectural and/or urbanistic precedents at selected locations. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

ARC324 On Site Graphic Analysis of Selected Architecture and Urbanism
3 credits  Spring Semester & First & Second Summer Session
On site analysis and illustration of specific architectural and/or urbanistic precedents at selected locations. Diagrams, sketches, and drawings recording, analyzing and evaluating buildings and places. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

ARC362 Building Systems I
3 credits  Fall Semester
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; safety systems - fire safety and emergency and signal systems. Corequisite: ARC 305.
PREREQUISITE: ARC 261, PHY 103. COREQUISITE: ARC 305.

ARC363 Building Systems II
3 credits  Spring Semester
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces. Principles and applications of electrical equipment and wiring design. Corequisite: ARC 306.
PREREQUISITE: ARC 362, PHY 103. COREQUISITE: ARC 306.
ARC371 Ancient Architecture
3 credits  Fall Semester
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
PREREQUISITE: HIS 131 AND 132, ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC372 Selected Topics in World Architecture
3 credits  Fall Semester
History of architecture and human settlements. Islamic Near East, Spain, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
PREREQUISITE: HIS 131 AND 132, ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC373 Early Christian, Byzantine, and Medieval Architecture
3 credits  Fall Semester
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
PREREQUISITE: HIS 131 AND 132, ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC374 Renaissance Architecture
3 credits  Fall Semester
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
PREREQUISITE: HIS 131 AND 132, ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC382 Architecture and Culture in Italy
3 credits  Spring Semester
A cultural and historical framework in preparation for participation in the Rome program. A range of topics, including architecture, art, history, cinema, literature and politics presented by University faculty from a variety of disciplines. Required for participation in the Rome Program.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARC390 History of Cities
3 credits  Fall Semester
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.
PREREQUISITE: ARC 204.

ARC407 Architecture Design VII
6 credits  Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design.

ARC408 Architecture Design VIII
6 credits  Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
PREREQUISITE: ARC 407.
ARC452 Management of Professional Practice  
3 credits  
Fall & Spring Semester  
Overview of the practice and the profession, legal and ethical concerns, business 
types and management practices, traditional and non-traditional practices and services, 
contracts and contractual relationships. 
PREREQUISITE: ARC 306.

ARC475 Colonial Architecture  
3 credits  
Fall Semester  
History of architecture and human settlements. Colonial Architecture from the 16th 
through the 19th centuries in North and South America, the Caribbean, India and 
Africa. 
PREREQUISITE: ARC 204.

ARC476 19th and 20th Century Architecture  
3 credits  
Fall Semester  
History of architecture and human settlements. America and Europe during the 19th 
and 20th centuries; cultural, technological and theoretical development. 
PREREQUISITE: ARC 204 OR 292, 294 OR 371 OR 372 OR 373 OR PERMISSION OF THE INSTRUCTOR.

ARC481 Special Problems  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Group or individual investigations of significant architectural issues, offered 
by special arrangement only. 
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC482 Special Problems  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Group or individual investigations of significant architectural issues, offered 
by special arrangement only. 
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC483 Special Problems  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Group or individual investigations of significant architectural issues, offered 
by special arrangement only. 
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC501 Architecture Design and Theory I  
6 credits  
Fall Semester  
Cultural, human and environment component and architectural responses to these: 
Social and aesthetic concepts, architectural psychology, climatic principles, 
programming analysis and design. 
PREREQUISITE: GRADUATE STANDING.

ARC502 Architecture Design and Theory II  
6 credits  
Spring Semester  
Technology component; materials, structure, and environmental control systems as 
a framework for architectural design. Construction materials and methods, structural 
systems, mechanical systems. 
PREREQUISITE: ARC 501.
ARC503 Architectural Design and Theory III
6 credits
Fall Semester
Legal and economic component; government and finances as active constituents of
architecture design. Zoning regulations, building codes, principles of public
health, safety and welfare, market and feasibility studies.
PREREQUISITE: ARC 502.

ARC507 Architecture Design
6 credits
Fall & Spring Semester & First & Second Summer Session
 Elective component: student and faculty select areas of in-depth study. Topics
include building types, environment, energy, community design, etc.
PREREQUISITE: ARC503

ARC509 Architecture Design IX
6 credits
Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics
include building types, environment, energy, community design, etc.
PREREQUISITE: ARC 408.

ARC510 Architecture Design X
6 credits
Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics
include building types, environment, energy, community design, etc.
PREREQUISITE: ARC 509.

ARC511 Drawing
3 credits
Fall Semester
Graphic representation and exploration of visual ideas through increased awareness
of visual and graphic vocabulary, stressing projections, light, shade and shadow,
perspective, and freehand sketching.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ARC512 Advanced Visual Analysis
3 credits
Offered By Announcement Only
Drawing as a means of analyzing and recording visual experience. Composition, form,
light, color and drawing as a primary device in the mental registration of visual
experience.
PREREQUISITE: ARC 204, 112.

ARC513 Computing
3 credits
Spring Semester
An introduction to new electronic design tools and technology available to architects
today. Lectures on the history and future of computing in the profession.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ARC514 Michelangelo
3 credits
Fall Semester
Drawing as a form of research across mediums to understand historical research
and interpretation of Michelangelo's work.
PREREQUISITE: ARC 306, 112, 213 OR PERMISSION OF THE INSTRUCTOR.
ARC515 Computer Modeling
3 credits Fall & Spring Semester
Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.
PREREQUISITE: ARC 213, 513 OR PERMISSION OF THE INSTRUCTOR.

ARC516 Architectural Watercolor Renderings
3 credits Fall Semester
This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).
PREREQUISITE: ARC 306 OR PERMISSION OF THE INSTRUCTOR.

ARC517 Construction Documents
3 credits Fall Semester
Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.
PREREQUISITE: ARC 204 AND 261.

ARC518 Documentation of Historic Architecture
3 credits First & Second Summer Session
Principles of preservation and restoration, research methods, measured drawings, surveying methods, case studies.
PREREQUISITE: ARC 204.

ARC519 Architecture and Color
3 credits First & Second Summer Session
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.
PREREQUISITE: ARC 306 OR PERMISSION OF THE INSTRUCTOR.

ARC520 Computer Modeling II
3 credits Spring Semester
Advanced three-dimensional computer modeling and rendering. Lecture, problem solving exercises and laboratory.
PREREQUISITE: ARC 213 OR 513 AND 515 OR PERMISSION OF THE INSTRUCTOR.

ARC521 The Architecture of American Cities
3 credits Fall Semester
Study of theories on relationships between architectural objects and urban space based on works which include Sitte, Rossi, and Norberg-Schulz. Application of selected theoretical principles to the contemporary American cities.
PREREQUISITE: ARC 374.
ARC522 Architecture Psychology
3 credits Offered By Announcement Only
Environmental behavior concepts and their application to an architecture focused on designing for people. Fundamental principles covered include proxemics, privacy, personalization, territoriality, defensible space, social interaction, aesthetics, symbolism, and spatial perception, reasons for individual and cultural differences in spatial actions are outlined. Psychological and social concepts are applied to the process of design and to residential environments, neighborhoods, and public spaces.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARC523 Interior Architecture Design
3 credits Fall Semester
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC524 Selected Topics in Interior Architecture Design
3 credits Spring Semester
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC525 Landscape Arch Design I
3 credits Fall & Spring Semester
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC526 Landscape Arch Design II
3 credits Offered By Announcement Only
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC527 Architecture Photography
3 credits Offered By Announcement Only
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.
PREREQUISITE: ARC 204.

ARC528 Historic Preservation
3 credits Spring Semester
Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior's Standards for rehabilitation.
PREREQUISITE: ARC 204.

ARC529 Research in Design-Methods and Procedures
3 credits Fall & Spring Semester
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.
ARCHITECTURE

ARC530 Architectural Principles of Harmony
3 credits  Fall & Spring Semester
The study of the essential elements of architectural design including form, proportion, light, color, ornamentation and intention. Referring to historic precedents, students will investigate the relationship between these elements through the spectrum of harmonic ratios. Emphasis on understanding Greek and Roman principles of design through analytical drawing.
PREREQUISITE: ARC 382.

ARC531 Building Structures I
3 credits  Spring Semester
The structural behavior and tectonic form of the elements of buildings. Topics include loads, stability, equilibrium, strength, and the dimensions of structural form.
PREREQUISITE: PHY 103, GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC532 Building Structures II
3 credits  Spring Semester & First Summer Session
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.
PREREQUISITE: ARC 531.

ARC533 Building Structures III
3 credits  Fall Semester & Second Summer Session
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
PREREQUISITE: ARC 532.

ARC534 The Palazzo in Italian Architecture
3 credits  Fall & Spring Semester
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.
PREREQUISITE: ARC 382.

ARC535 Historic Italian Urbanism
3 credits  Fall & Spring Semester
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.
PREREQUISITE: ARC 382.

ARC536 Italian Gardens
3 credits  Fall & Spring Semester
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.
PREREQUISITE: ARC 382.

ARC537 Research in Rome
3 credits  Fall & Spring Semester
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.
PREREQUISITE: ARC 382.
ARC541 Seminar on Town Design
3 credits 
Fall Semester
Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.

ARC542 Seminar on Housing
3 credits 
Offered By Announcement Only
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC543 Seminar on Retrofit of Suburbia
3 credits 
Offered By Announcement Only
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC544 The Architecture of Palladio
3 credits 
Fall Semester
On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ARC545 Urban Composition
3 credits 
Offered By Announcement Only
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.
PREREQUISITE: ARC 306, 502, OR PERMISSION OF INSTRUCTOR.

ARC546 Studies of Havana
3 credits 
Spring Semester
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

ARC547 Architecture and Urban Identity
3 credits 
Offered By Announcement Only
Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC548 Seminar in Community Development
3 credits 
Offered By Announcement Only
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.
PREREQUISITE: ARC 305, 502, OR PERMISSION OF INSTRUCTOR.
ARC550 Professional Lecture Series
3 credits
Fall & Spring Semester
Exposure to the various professional disciplines in South Florida that make contributions to the design process. Case study analysis and evaluation of current building project, from time of initial formulation through completion, including research, diagrammatic studies, site visits and lectures.

ARC551 Contemporary Theories of Architecture
3 credits
Offered By Announcement Only
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.
PREREQUISITE: ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC553 Structural Design Theory
3 credits
Offered By Announcement Only
Relationship of structural systems to architectural design. Case studies in theories of structure, form and construction.
PREREQUISITE: ARC 306 AND CAE 313.

ARC554 Architecture of South Florida
3 credits
Offered By Announcement Only
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC555 Design and Fabrication Techniques in Wood: The Lamp
3 credits
Spring Semester
Design, construction and detailing of wood as applied to furnishings and interiors. Focus: lamps and illumination. Workshop based course including research, exercises, measuring, documentation and a final project.

ARC556 Design and Fabrication Techniques in Wood - The Clock
3 credits
Fall Semester
Design, construction and detailing of wood as applied to furnishings and interiors. Focus: Traditional Clock and Case Design. Workshop based course including research, exercises, measuring, documentation and a final project.

ARC557 Design and Fabrication Techniques: Carved Panels
3 credits
First & Second Summer Session
Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.

ARC558 Theories of Landscape Architecture
3 credits
Fall Semester
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design.
PREREQUISITE: ARC 204 OR PERMISSION OF INSTRUCTOR.
ARC559 Computer Aided Presentation Graphics
3 credits
Offered By Announcement Only
Introduction to computer aided presentation graphics from the perspective of the design professional. Topics include: desktop publishing, image processing, and desktop presentations.
PREREQUISITE: ARC 213 OR PERMISSION OF INSTRUCTOR.

ARC561 Building Construction
3 credits
Fall Semester
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include: properties of building materials; wood, masonry, concrete, steel and glass construction techniques; on-site and off-site processes; interior and exterior finishes; assemblies, detailing and building codes.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC562 Building Systems I
3 credits
Fall Semester
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.
PREREQUISITE: ARC 561 OR PERMISSION OF INSTRUCTOR.

ARC563 Building Systems II
3 credits
Spring Semester
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design.
PREREQUISITE: ARC 562 OR PERMISSION OF INSTRUCTOR.

ARC564 Building Systems III
3 credits
Offered By Announcement Only
Direction, control and coordination of construction project activities. Topics include inspection, reporting, recording, safety standards.
PREREQUISITE: ARC 363 OR 563 OR PERMISSION OF INSTRUCTOR.

ARC567 History of Architecture I: Ancient, Medieval and Renaissance
3 credits
Fall Semester
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Corequisite: ARC 501.

ARC568 History of Architecture II: Baroque through Contemporary
3 credits
Spring Semester
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Corequisite: ARC502.
ARC569 Directed Readings
3 credits                    Fall & Spring Semester & First & Second Summer Session
A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR

ARC570 Modern Architecture
3 credits                                                           Spring Semester
History of architecture, landscape, and city design in the modern era.

ARC571 Ancient Architecture
3 credits                                                             Fall Semester
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ARC572 Selected Topics in World Architecture
3 credits                                                             Fall Semester
History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ARC573 Early Christian, Byzantine, and Medieval Architecture
3 credits                                                             Fall Semester
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ARC574 Renaissance Architecture
3 credits                                                             Fall Semester
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ARC575 Colonial Architecture
3 credits                                                             Fall Semester
History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ARC576 19th and 20th Century Architecture
3 credits                                                             Fall Semester
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ARC577 The Architecture of Alvar Aalto
3 credits                                                             Fall Semester
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR
ARC578 Italian Rationalist Architecture
3 credits
Offered By Announcement Only
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
PREREQUISITE: ARC 305 OR PERMISSION OF THE INSTRUCTOR.

ARC579 History of Architecture: The Natural and the Man-Made
3 credits
Offered By Announcement Only
A review of the relationship between man, the landscape, and architecture from pre-history to the twentieth century.
PREREQUISITE: GRADUATE STANDING.

ARC584 Special Problems
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC585 Special Problems
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC586 Special Problems
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC590 History of Cities
3 credits
Fall & Spring Semester
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC592 Computing in Design Practice
3 credits
Fall Semester
Introduction to computer applications specific to the design professional practice and management of computing resources in a design firm.
PREREQUISITE: ARC 213 OR 513 OR PERMISSION OF INSTRUCTOR.

ARC593 Computer Animation
3 credits
Spring Semester
Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.
PREREQUISITE: ARC 415 OR PERMISSION OF INSTRUCTOR.
ARC594 Geographic Information Systems in Urban Design
3 credits  Spring Semester
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.
PREREQUISITE: ARC 213 OR 513 OR PERMISSION OF INSTRUCTOR.

ARC595 Database Management Systems and Programming
3 credits  Fall Semester
Introduction to principles of database management and programming. Instruction of a selected database management program and a programming language.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC596 Interactive Multimedia in Design
3 credits  Spring Semester
Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.
PREREQUISITE: ARC 213 OR 513 OR PERMISSION OF INSTRUCTOR.

ARC597 Computer Visualization
3 credits  Spring Semester
Focus: Explores the use of various advanced visualization techniques in design. Topic will change from semester to semester. Format: lecture, laboratory and exercises.
PREREQUISITE: ARC 593 OR 596 OR PERMISSION OF INSTRUCTOR.
AIS101 The Foundations of the United States Air Force I  
1 credit  
Fall Semester  
Survey course designed to introduce students to the United States Air Force and encourage participation in Air Force Reserve Officer Training Corps (AFROTC). Featured topics include: overview of AFROTC, special programs offered through AFROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership, Air Force officer career opportunities, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.  
PREREQUISITE: MUST BE TAKEN WITH AIS150 PT LAB

AIS102 The Foundations of the United States Air Force II  
1 credit  
Spring Semester  
Survey and follow-on course to AIS 101 designed to introduce students to the United States Air Force and encourage participation in Air Force Reserve Officer Training Corps (AFROTC). Featured topics include: introduction to leadership, Air Force Core Values, introduction to interpersonal communication and team building, and a continuation of communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS150 Leadership Laboratory  
0 credit  
Fall & Spring Semester  
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the detachment commander and commandant of cadets.

AIS201 The Evolution of USAF Air and Space Power I  
1 credit  
Fall Semester  
Course designed to examine general aspects of air and space power through a historical perspective. Covers time period from first balloons and dirigibles to space-age global positioning systems of the Afghan/Iraqi Wars. Examines several fundamental truths associated with war in the third dimension: e.g. Principles of War and Tenets of Air and Space Power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS202 The Evolution of USAF Air and Space Power II  
1 credit  
Spring Semester  
Continuation of AIS 201 which provides students with knowledge level understanding for general element and employment of air and space power. Discusses the importance of Air Force Core Values with use of operational examples and historical Air Force leaders. Continues to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS301 Air Force Leadership Studies I  
3 credits  
Fall Semester  
Study of leadership, management fundamentals, professional knowledge, and communication skills required of Air Force junior officers. Case studies are used to examine Air Force leadership and management situations. Mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities.
AIS302 Air Force Leadership Studies II
3 credits
Spring Semester
Continuation of AIS 301 and is a study of Air Force personnel and evaluation systems, leadership ethics, and communication skills required of Air Force junior officers. Case studies are used to examine Air Force leadership and management situations. Mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities.

AIS401 National Security Affairs/Preparation for Active Duty I
3 credits
Fall Semester
Examines national security process, regional studies, and Air Force doctrine. Special topics of interest focus on civilian control of military and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. Mandatory Leadership Laboratory complements this course by providing students advanced leadership experiences.

AIS402 National Security Affairs/Preparation for Active Duty II
3 credits
Spring Semester
Continuation of AIS 401 which examines regional studies and advanced leadership ethics. Special topics of interest focus on the military as a profession, officerhood, military justice, preparation for active duty, and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. Mandatory Leadership Laboratory complements this course by providing students advanced leadership experiences.

AFRICANA STUDIES
AAS150 Introduction to Africana Studies
3 credits
Fall & Spring Semester & First & Second Summer Session
Experiences of African American and other African-descended peoples with emphases on social, cultural, political, etc.
PREREQUISITE: NONE

AAS260 History of Slavery in the Atlantic
3 credits
Fall Semester
The emergence and eventual abolition of the Trans-Atlantic slave trade and its effects on both old and new world
PREREQUISITE: NONE

AAS290 Special Topics
3 credits
Offered By Announcement Only
Content varies by semester.

AAS350 Black Leadership in the U.S.
3 credits
Fall & Spring Semester
Black leaders and leadership organizations. Emphasis on their role in overcoming oppression and barriers to advancement.
PREREQUISITE: THREE CREDITS IN AAS OR PERMISSION OF INSTRUCTOR

AAS390 Special Topics
3 credits
Fall & Spring Semester & First & Second Summer Session
Content varies by semester
PREREQUISITE: 3 CREDITS IN AFRICAN STUDIES OR PERMISSION OF INSTRUCTOR
AAS490 Senior Seminar in African American Studies  
3 credits  
Fall & Spring Semester  
Content varies by semester.  
PREREQUISITE: 6 CREDITS IN AFRICANA STUDIES.

AMERICAN STUDIES  
AMS101 Introduction to American Studies  
3 credits  
Fall & Spring Semester  
An interdisciplinary approach to American Studies with attention to a particular theme or period. (Satisfies Social Science core requirement).

AMS301 Topics in American Studies  
3 credits  
Fall & Spring Semester  
Content varies by semester.  
PREREQUISITE: AMS 101 OR PERMISSION OF INSTRUCTOR.

AMS310 The U.S., Transnationalism, and Globalization  
3 credits  
Spring Semester  
The history of the United States within a global framework.  
PREREQUISITE: AMS 101 OR PERMISSION OF INSTRUCTOR.

AMS350 History and culture of South Florida  
3 credits  
Spring Semester  
The history and culture of South Florida from a multidisciplinary perspective.  
PREREQUISITE: AMS101 OR PERMISSION OF INSTRUCTOR.

AMS399 Independent Study  
1-3 credits  
Offered By Announcement Only  
By arrangement with instructor; content varies.  
PREREQUISITE: AMS 101 AND PERMISSION OF INSTRUCTOR.

AMS401 Seminar in American Studies  
3 credits  
Fall & Spring Semester  
Content varies by semester.  
PREREQUISITE: SIX CREDITS IN AMS COURSES.

AMS415 Labor, migrations, and social movements in the americas  
3 credits  
Spring Semester  
Social, political, economic, and cultural issues related to migrant labor in the Americas while placing Miami at the center of analysis.  
PREREQUISITE: 3 CREDITS IN AMERICAN STUDIES OR LATIN AMERICAN STUDIES.

AMS450 Popular culture in the united states  
3 credits  
Fall Semester  
rise of various forms of popular culture, from print media to music and film, in American history.  
PREREQUISITE: 3 CREDITS IN AMERICAN HISTORY.

AMS499 Senior Thesis  
3 credits  
Offered By Announcement Only  
Thesis to be a documented study of a topic in American culture written under the direction of a member of the American Studies faculty.  
PREREQUISITE: AMS 401, SENIOR STATUS, AND APPROVAL OF PROGRAM DIRECTOR.
AMS501 SENIOR PROJECT
3 credits Spring Semester
ALL MAJORS MUST COMPLETE EITHER AN INDIVIDUAL RESEARCH PROJECT OR AN INTERNSHIP AT A LOCAL CULTURAL OR CIVIC INSTITUTION. EITHER OPTION MUST BE APPROVED BY THE PROGRAM DIRECTOR.
PREREQUISITE: SENIOR STANDING

AMS505 HONORS THESIS
3 credits Spring Semester
AMERICAN STUDIES MAJORS WITH A CUMULATIVE GPA OF AT LEAST 3.5 IN AMS COURSES AND AN OVERALL GPA OF AT LEAST 3.0 MAY EARN DEPARTMENTAL HONORS BY COMPLETING AMS 505: HONORS THESIS. CANDIDATES FOR DEPARTMENTAL HONORS ARE RESPONSIBLE FOR FINDING A FACULTY MEMBER TO SERVE AS THE THESIS ADVISOR. STUDENTS WOULD TAKE AMS 501 IN THE FALL SEMESTER OR THE SENIOR YEAR AND AMS 505 IN THE SPRING TO COMPLETE THE HONORS THESIS.
PREREQUISITE: SENIOR STANDING, MINIMUM GPA 3.5. PERMISSION OF PROGRAM DIRECTOR

ANTHROPOLOGY

APY101 Introduction to Anthropology
3 credits Fall & Spring Semester
A broad overview of archaeology, cultural anthropology, biological anthropology, and linguistics.

APY201 Principles of Archaeology
3 credits Fall & Spring Semester
History, methods, and theory of archaeology with an outline of the main characteristics of the prehistoric record throughout the world.

APY202 Principles of Cultural Anthropology
3 credits Fall & Spring Semester
Cultural anthropology, including such topics as economics, politics, kinship and families, health systems, religion, and personality.

APY203 Principles of Physical Anthropology
3 credits Fall & Spring Semester
The origin and biological development of the human species; human evolution explored by means of the fossil record of prehistoric population; differentiation and adaptation of contemporary populations in various world environments; the comparison of humans and other primates with respect to biological and behavioral variability.

APY204 Principles of Linguistic Anthropology
3 credits Fall Semester
Human linguistic principles of phonology, morphology, and grammar to construct a framework for understanding the operation of language in cultural context. The functions of human language in structuring ideological, economic, and political realms.

APY208 Short-Changed in the City
3 credits Fall Semester
Marginalization plagues sub-populations in almost every large city. An anthropological view of this problem and its origins, presented through readings, discussions, lectures and field trips.
PREREQUISITE: APY 202 OR OTHER SOCIAL/BEHAVIORAL SCIENCE
APY210 Physical Anthropology and Society
3 credits
Offered By Announcement Only
An evolutionary analysis of the human species from a social science perspective. History, methods, major theories, and key findings of Physical Anthropology.

APY230 The Sounds of the World's Languages
3 credits
Fall Semester
The range of sounds produced by the speakers of the world's languages. An introduction to phonetics, with a focus on acoustically-oriented methods used in contemporary phonetics.
PREREQUISITE: APY 204

APY301 World Prehistory
3 credits
Fall Semester
The global prehistoric record, with emphasis on the development of social complexity and ancient states.
PREREQUISITE: APY 201.

APY306 Human Evolution
3 credits
Spring Semester
The macroevolution of humans using the fossil record of vertebrates, including the development of uniquely human behavioral and anatomical adaptations, and of diversity in living populations.
PREREQUISITE: APY 201, OR 203, OR PERMISSION OF THE INSTRUCTOR.

APY307 Human Adaptation
3 credits
Spring Semester
Human biological adaptation to different environments and stress is examined anthropologically within an evolutionary framework. Mechanisms of adaptation to temperature extremes and other climatic variables, high altitude, disease, nutritional stress, urbanization, extraterrestrial conditions, and other environmental challenges are described in relation to biological and behavioral variations among human populations. The limits of human performance and human adaptive potential in the present and future are explored.

APY308 Human Variation: Anthropology of Race
3 credits
Fall Semester
Human biological diversity is viewed historically within a cross-cultural, evolutionary framework. Patterns of variation in human morphological, anatomical, physiological, biochemical, genetic, and behavioral characteristics are investigated in peoples living in different environments throughout the world. Observed differences among human populations are discussed with reference to traditional theories of racial taxonomy and modern perspectives in human classification.

APY309 Evolution of Human Behavior
3 credits
Spring Semester
PREREQUISITE: APY 201 OR 202 OR 203 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.
APY310 Primate Behavior and Adaptation  
3 credits  
Spring Semester  
The taxonomy, distribution, anatomy, social behavior and adaptations to habitats of human and non-human primates as seen from an evolutionary perspective.  
PREREQUISITE: APY 203 AND BIL 150 OR PERMISSION OF INSTRUCTOR.

APY315 Folk and Alternative Medicine  
3 credits  
Spring Semester  
Historical and cultural backgrounds of health therapies, including theoretical bases of traditional ethnomedical, nonwestern, and complementary medical systems.  
PREREQUISITE: ANY 200 LEVEL ANTHROPOLOGY COURSE, OR ANY 300 LEVEL NURSING COURSE, OR PERMISSION OF THE INSTRUCTOR.

APY320 The Evolution of Language  
3 credits  
Fall Semester  
Popular contemporary hypotheses on the origins and development of language.  
PREREQUISITE: APY 204

APY326 Paleolithic Cultures  
3 credits  
Offered By Announcement Only  
The emergence of technology, the process of domestication, and the development of symbolic systems.  
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY330 Bronze Age Cultures  
3 credits  
Offered By Announcement Only  
An analysis of the cultural milieu of Bronze Age Greece, the Aegean Islands, and Crete from the introduction of copper and bronze down to the introduction of iron and the ethnic invasions. Archaeological history of the sites, artifact examination and recent developments in decipherment of Linear B script.  
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY332 Old World Archaeology  
3 credits  
Offered By Announcement Only  
Pre-Classical Greek cultures following the Bronze Age, emphasizing archaeological excavations, general methodology, artifact analysis, and cultural diffusion route theories.  
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY333 Ancient Celtic Society  
3 credits  
Offered By Announcement Only  
Early Celtic culture and technology as reflected in the Iron Age archaeological remains of Europe.  
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY340 Marine Archaeology  
3 credits  
Spring Semester  
Location, excavation, and study of submerged sites.  
PREREQUISITE: APY 201 OR PERMISSION OF INSTRUCTOR.

APY345 Ancient Civilizations of Mesoamerica  
3 credits  
Spring Semester  
Major pre-Columbian cultures of Mesoamerica, from Olmec to Aztec periods, with emphasis on ancient Maya.  
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.
APY350 Ancient Cultures of the New World
3 credits
Offered By Announcement Only
The prehistoric record of the Americas, emphasizing the belief systems and social
development of ancient chiefdoms and states.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY355 Ancient People of North America
3 credits
Offered By Announcement Only
The archaeological record of North America prior to European contact, exploring
the relationship of art and oral history to material remains.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY356 Florida Archaeology
3 credits
Offered By Announcement Only
Archaeological remains of ancient cultures in the Florida peninsula, from initial
occupation to the Colonial Period.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY360 Anthropology of Food
3 credits
Fall Semester
Evolution of human diet, basic nutrition, food taboos, effects of domestication,
effects of diet on skeletal remains, analysis of your own food habits, and the
impact of certain foods on our biocultural evolution of our species.
PREREQUISITE: ANY 200 LEVEL ANTHROPOLOGY COURSE OR PERMISSION OF INSTRUCTOR.

APY361 Gender and Language
3 credits
Fall & Spring Semester & First & Second Summer Session
the ways in which language is used in the constitution of gender from a cross-cultural
perspective. Course is co-listed with WGS 361
PREREQUISITE: NONE

APY362 The Languages of the World
3 credits
Fall Semester
The world's languages. The primary focus is on major differences and similarities
among the structural properties of languages from diverse regions and linguistic
families. In short, an introduction to linguistic typology.
PREREQUISITE: APY 204

APY376 Economic Anthropology
3 credits
Offered By Announcement Only
The structure and operation of the small-scale economy in the social system is
examined. The interrelationship between social and economic systems, and the formation
of non-market economies.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY377 Anthropology of Political Systems and Discourse
3 credits
Offered By Announcement Only
Political systems and processes in tribal societies, with special emphasis on dispute
settlement, the organization of political control, and the use of oratory. Case
studies from Latin American and African examples.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.
ANTHROPOLOGY

APY385 Caribbean Cultures
3 credits                     Spring Semester
Caribbean societies, including ethnic diversity, production and exchange, domestic organization, and belief systems.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY386 Psychological Anthropology
3 credits                     Fall Semester
The interaction between personality and cultural settings. Topics include cross-cultural child rearing and enculturation, behavioral development and adjustment, "deviance," and ethnopsychiatry.
PREREQUISITE: APY 201 OR PSY 110 AND THREE ADDITIONAL CREDITS IN EITHER ANTHROPOLOGY OR PSYCHOLOGY.

APY387 Cultural Evolution
3 credits                     Spring Semester
Evolution of social systems and technologies, from hunting and gathering bands through industrial states.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY390 African Cultures
3 credits                     Offered By Announcement Only
Political and domestic organization, production, exchange, and belief systems of traditional African cultures, and the changes caused by increasing urbanization and modernization.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY391 Gender in Ancient Cultures
3 credits                     Offered By Announcement Only
A cross-cultural examination of the role gender played in ancient complex culture areas, such as Mesoamerica, Mesopotamia, and the Mediterranean, with emphasis on using the archaeological record to reconstruct social roles.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY392 Sex and Culture
3 credits                     Fall Semester
A cross-cultural examination of sex roles and sexuality; gender identity, division of labor, functions of marriage, sexual practices, reproductive control, and political relationships between the sexes.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY393 Drugs and Culture
3 credits                     Offered By Announcement Only
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANOTHER SOCIAL/BEHAVIORAL SCIENCE.

APY394 Comparative Religion
3 credits                     Fall Semester
A cross-cultural investigation of differing levels of religious belief systems examined from both etic and emic points of view.
APY396 Youth Culture, Identity and Globalization

3 credits
Fall Semester
Youth cultural practices and experiences in various urban contexts in the world. Particular emphasis is placed on marginalization, identity and commodification of violent practices as embedded in the globalization processes.
PREREQUISITE: APY 202 OR ANY SOCIAL AND BEHAVIORAL SCIENCES

APY397 Violence and Ritual

3 credits
Fall Semester
Various theories of ritual and violence with reference to ethnographically-based topics. It will explore the role of symbols, rituals and ideologies in shaping and contesting power within nations and other political communities.
PREREQUISITE: APY 202 OR ANY SOCIAL AND BEHAVIORAL SCIENCES

APY398 Coastal Cultures

3 credits
Fall Semester
Fishermen and their special relations to the environment, from Thailand and Sri Lanka to Alaska and the West Indies. Decision-making processes among fishermen, business concepts, responses to technology and myths of the sea.
PREREQUISITE: APY 202 AND THREE CREDITS IN ANTHROPOLOGY OR PERMISSION OF INSTRUCTOR.

APY399 The Anthropology of Kinship and Family in America

3 credits
Fall Semester
Theories of kinship and the family. It will examine emergence of new patterns of kinship networks and construction of individuals. Ethnographic materials will be drawn from the Americas and the Caribbean, particularly Brazil, Cuba, Haiti, Jamaica and the United States.
PREREQUISITE: 6 CREDITS 200 LEVELS OR ABOVE IN ANTHROPOLOGY

APY401 Archaeology and the Evolution of Culture

3 credits
Fall Semester
A survey of man's cultural evolution from prehistoric times, with emphasis given to his art and artifacts as revealed through archaeology. Focus is primarily on Old World culture of the Mediterranean area, with attention given to diffusion theories regarding culture transmission to the New World.

APY405 Readings in Anthropology

1-3 credits
Fall Semester
Supervised readings on special topics in Anthropology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY406 Readings in Anthropology

1-3 credits
Spring Semester
Supervised readings on special topics in Anthropology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY413 Medical Anthropology

3 credits
Fall Semester
PREREQUISITE: THREE CREDITS IN ANTHROPOLOGY, AND THREE CREDITS FROM BIOLOGY OR NURSING.
COLLEGE OF ARTS AND SCIENCES
ANTHROPOLOGY

APY414 Forensic Anthropology I: Human Osteology
3 credits Fall Semester
Identification and interpretation of the human skeleton, including age, sex, hard tissue pathology and traumas.
PREREQUISITE: APY 203, OR PERMISSION OF THE INSTRUCTOR.

APY415 Forensic Anthropology II: Fieldwork
3 credits Spring Semester
The investigation, analyses, and legal aspects of human remains recovered from crime scenes and mass disasters.
PREREQUISITE: APY 203 AND 414 OR PERMISSION OF THE INSTRUCTOR.

APY416 Bioarchaeology-Peopling the past
3 credits Offered By Announcement Only
Contextualization of bodies in space, cultural milieu and time are the primary focus of this course. Students will explore bioarchaeology's history, development and major topical concerns.
PREREQUISITE: APY 201 AND APY 203, OR PERMISSION OF THE INSTRUCTOR.

APY418 Seminar in Anthropology
3 credits Fall & Spring Semester
Consideration of special topics in physical anthropology, linguistics, archaeology and ethnology and their interrelationships.

APY420 Archaeology, Architecture, and the City
3 credits Offered By Announcement Only
Ancient architectural remains in the global anthropological perspective, emphasizing the role of architecture in shaping the evolution of social and political interactions.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY422 Pseudoscience in Archaeology
3 credits Fall Semester
Reconstructions of how people lived in the past that claim scientific validity, use the terminology of science, but are unsupported by evidence, can be called pseudoscientific. This course critically evaluates the field of pseudoscientific archaeology by applying the scientific method, logic, and common sense.
PREREQUISITE: APY 201 AND THREE ADDITIONAL APY CREDITS.

APY440 Environmental Archaeology
3 credits Offered By Announcement Only
Theory and methodologies in the reconstruction of Quaternary environments from the archaeological record. Techniques of geoarchaeology, zooarchaeology, and paleoethnobotany.
PREREQUISITE: APY 201 AND THREE CREDITS IN BIOLOGY OR MARINE SCIENCE OR PERMISSION OF INSTRUCTOR.

APY445 Archaeology of the Ancient Maya
3 credits Offered By Announcement Only
Seminar in ancient Maya culture, including examination of archaeological remains, epigraphy, lifeways, and art.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.
APY477 Sacrifice and Ritual
3 credits  Fall Semester
Rituals from both tribal and other societies considered in a framework of a general theory of symbols and practice. Structure and function of sacrifice in the definition of cultural categories, concepts of morality, and the general relationship of humans to the supernatural.
PREREQUISITE: APY 394 OR PERMISSION OF THE INSTRUCTOR.

APY484 Anthropological Theory
3 credits  Spring Semester
Theoretical frameworks directing data collection and research methodology in anthropology.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY485 Archeological Theory and Technique
3 credits  Offered By Announcement Only
Theoretical traditions that shape modern archaeological research design and interpretation.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY501 Methods of Anthropological Research
3-6 credits  Spring Semester
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE.

APY502 Field Studies in Anthropology
3-6 credits  Fall & Spring Semester & First Summer Session
Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE AND WRITTEN PERMISSION FROM INSTRUCTOR.

APY505 Museum Internship
3 credits  Fall & Spring Semester
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY506 Workshop in Anthropology
3-6 credits  Fall & Spring Semester
This course is designed for upper level and graduate students to participate in special topics in Anthropology and related fields.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY512 Advanced Medical Anthropology
3 credits  Fall & Spring Semester
Applications of theories and methods of medical anthropology to problems in human health and disease.
PREREQUISITE: APY 413, OR THREE CREDITS IN NURSING, OR THREE CREDITS IN EPIDEMIOLOGY AND PUBLIC HEALTH, OR PERMISSION OF THE INSTRUCTOR.
ANTHROPOLOGY

APY518 Advanced Seminar in Anthropology
3 credits
Fall & Spring Semester
Specialized topics in Anthropology to involve students into current research specializations.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE OR PERMISSION OF INSTRUCTOR.

ARABIC

ARB101 Elementary Arabic I
3 credits
Fall Semester
Fundamental grammatical principles; drill in pronunciation; simple reading and translation. Closed to native speakers.

ARB102 Elementary Arabic II
3 credits
Spring Semester
Reading and translation; oral and written exercises. Closed to native speakers. Closed to native speakers.
PREREQUISITE: ARB 101 OR THE EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

ARB201 Intermediate Arabic
3 credits
Fall Semester
Reading and translation; oral and written exercises. Closed to native speakers. Closed to native speakers.
PREREQUISITE: TWO SEMESTERS OF ARABIC OR THE EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

ARB202 Intermediate Arabic II
3 credits
Spring Semester
Continuation of Arabic 201. Readings designed to integrate listening comprehension, speaking, reading, writing skills. Discussion of Arab society, history and culture. Closed to native speakers.
PREREQUISITE: ARABIC 201 - CLOSED TO NATIVE SPEAKERS.

ART

ART10T Art Appreciation
0 credit
Fall Semester
PREREQUISITE: MDCC TRANSFER COURSE.

ART101 Introduction to Drawing I
3 credits
Fall & Spring Semester & First Summer Session
Contour, cross-contour, perspective, proportion, chiaroscuro, and gesture in pictorial composition.

ART102 Introduction to Drawing II
3 credits
Fall & Spring Semester
Experimentation, chance, exaggeration, movement, texture, and color in pictorial composition.

ART103 Two-Dimensional Design
3 credits
Fall & Spring Semester & First & Second Summer Session
Line, rhythm, shape, pattern, value and color in pictorial composition.

ART104 Three-Dimensional Design
3 credits
Fall & Spring Semester & Second Summer Session
Basic 3D design principles to include: structure, shape, volume, and weight.
ART 105 Figure Drawing
3 credits Fall & Spring Semester
Drawing the human figure: proportion, anatomy, perspective, gesture, and expressive line.
PREREQUISITE: ART 101.

ART 106 Issues in Art Making
3 credits Fall Semester
Survey of theoretical, historical and contemporary approaches.
PREREQUISITE: ART 101; 103 OR 104, OR PERMISSION OF INSTRUCTOR.

ART 107 Introduction to Drawing III
3 credits Fall Semester
Continuation of ART 101 with emphasis on Renaissance perspective and alternative systems of spatial representation. Survey of materials and methods. Introduction of color.
PREREQUISITE: ART 101.

ART 108 Figure in Clay I
3 credits Fall & Spring Semester
Modeling the human figure in clay; proportion, anatomy, volume, gesture and form.
PREREQUISITE: NONE

ART 109 Introduction to Electronic Media
3 credits Fall & Spring Semester
Computer skills for desktop publishing and digital imaging.

ART 180 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART 181 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART 182 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART 183 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART 184 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART 185 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.
ART200 Intro to Concepts and Techniques in Digital Video
3 credits  Fall Semester
An introduction to digital video as a means of artistic expression and its unique
approach to technology. A hands on approach to beginning video art production.
PREREQUISITE: SUMMER SCHOLAR STUDENT ONLY.

ART202 Introduction to Painting
3 credits  Fall & Spring Semester
Materials and techniques of easel painting.
PREREQUISITE: ART 101 AND 103, OR PERMISSION OF INSTRUCTOR.

ART210 Introduction to Photography
3 credits  Fall & Spring Semester & First Summer Session
Camera techniques and darkroom procedures for black and white photography.

ART217 Introduction to Sculpture
3 credits  Fall & Spring Semester
Integrated approach to concept development, craftsmanship and appropriate use of
materials.
PREREQUISITE: ART 101 AND 104 OR PERMISSION OF INSTRUCTOR.

ART251 Intaglio/Relief I
3 credits  Offered By Announcement Only
Drypoint, engraving, etching, aquatint, and softground; relief and intaglio printed
collographs; relief printing from linoleum.
PREREQUISITE: ART 101 AND 103 AND 109, OR PERMISSION OF INSTRUCTOR.

ART252 Lithography I
3 credits  Offered By Announcement Only
Beginning lithography in black and white from stones, aluminum plates, and photo
plates.
PREREQUISITE: ART 101 AND 103 AND 109 OR PERMISSION OF INSTRUCTOR.

ART253 Silkscreen I
3 credits  Offered By Announcement Only
Beginning silkscreen: monotyping with screens, reduction printing, multiple run
silkscreen printing and beginning photo silkscreen.
PREREQUISITE: ART 101 AND 103 AND 109 OR PERMISSION OF INSTRUCTOR.

ART254 Computer Applications for Printmaking
3 credits  Offered By Announcement Only
Software programs used as printmaking manipulation tools to aid in the planning
of prints.
PREREQUISITE: ART 101, 103, AND 109 OR PERMISSION OF INSTRUCTOR.

ART261 Hand-built Ceramics I
3 credits  Fall & Spring Semester
Beginning hand-building techniques: pinching, coiling, slab construction; introduction
to glazing and firing.
PREREQUISITE: NONE.

ART262 Wheel Thrown Ceramics I
3 credits  Fall & Spring Semester
Wheel throwing, glazing and firing.
PREREQUISITE: NONE.
ART263 Introduction to Glass Blowing
3 credits
Fall & Spring Semester
Forming shapes and vessels from molten glass by the use of a blow pipe and glass tools.
PREREQUISITE: ART 104 OR PERMISSION OF INSTRUCTOR

ART280 Studies in Studio Art
1-3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART281 Studies in Studio Art
1-3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART282 Studies in Studio Art
1-3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART283 Studies in Studio Art
1-3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART284 Studies in Studio Art
1-3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART285 Studies in Studio Art
1-3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART291 Graphic Design I
3 credits
Fall & Spring Semester
A comprehensive approach to the study of graphic communications.
PREREQUISITE: ART 101 AND 109, OR PERMISSION OF INSTRUCTOR.

ART292 Multimedia I/Web Design
3 credits
Fall & Spring Semester
Introduction to web design using time-based media.
PREREQUISITE: ART 109, OR EQUIVALENT

ART293 Typography
3 credits
Fall & Spring Semester
Type and image compositions, history, arrangement, style, aesthetics of printed communications, type software and calligraphy.
PREREQUISITE: ART 291 OR PERMISSION OF INSTRUCTOR.

ART294 Multimedia II/Animation
3 credits
Fall & Spring Semester
Introduction to animation using time-based media.
PREREQUISITE: ART 292 OR EQUIVALENT.

ART301 Intermediate Painting I
3 credits
Fall & Spring Semester
Painting in oil and acrylic. Emphasis on experimentation and creative expression.
ART 302 Intermediate Painting II  
3 credits  
Fall & Spring Semester  
Continuation of ART 301.  
PREREQUISITE: ART 301.

ART 305 Intermediate Figure Drawing  
3 credits  
Fall & Spring Semester  
Continuation of ART 105.  
PREREQUISITE: ART 105.

ART 308 Figure in Clay II  
3 credits  
Fall & Spring Semester  
Continuation of ART 108  
PREREQUISITE: ART 108 OR PERMISSION OF INSTRUCTOR.

ART 310 Intermediate Photography I  
3 credits  
Fall & Spring Semester  
Fine art photography in black and white. Continuation of ART 210. Emphasis on experimentation  
and creative expression.  

ART 311 Color Photography  
3 credits  
Fall & Spring Semester  
Fine Art photography in color. Emphasis on craftsmanship and creative expression.  
PREREQUISITE: ART 310.

ART 312 Introduction to Digital Photography  
3 credits  
Fall & Spring Semester  
Introduction to the technology of electronic/computer digitized photography.  
PREREQUISITE: ART 310 AND 311.

ART 317 Intermediate Sculpture I  
3 credits  
Fall & Spring Semester  
Incorporation of symbol and metaphor to achieve meaning, use of additional materials  
and technical processes.  
PREREQUISITE: ART 217.

ART 318 Intermediate Sculpture II  
3 credits  
Fall & Spring Semester  
Continuation of ART 317.  
PREREQUISITE: ART 317.

ART 319 Sculpture in Architecture & Science  
3 credits  
Fall Semester  
The principles of 3-D design and sculpture as applied to architectural and engineering  
uses, both functional and aesthetic.  
PREREQUISITE: ART 104

ART 351 Intaglio/Relief II  
3 credits  
Offered By Announcement Only  
Continuation of ART 251. Additional processes such as mezzotint, relief printing  
from woodblocks, multiple block printing, photographic xerox transfers and photo  
etching.  
PREREQUISITE: ART 251.
ART352 Lithography II
3 credits
Continuation of ART 252. Color printing from stones, aluminum plates and photo litho plates. Combination of lithography with other print media.
PREREQUISITE: ART 252.

ART353 Silkscreen II
3 credits
Continuation of ART 253, including silkscreening on canvas, larger format work, and advanced photo silkscreen techniques.
PREREQUISITE: ART 253.

ART354 Computer Assisted Printmaking: Lithography and Silkscreen
3 credits
The use of inkjet and laser printers to make positives for black and white and process color work in photo lithography; custom color separations for multiple screen printing.
PREREQUISITE: ART 254 OR PERMISSION OF INSTRUCTOR.

ART361 Hand-built Ceramics II
3 credits
Fall & Spring Semester
Continuation of ART 261.
PREREQUISITE: ART 261 OR PERMISSION OF INSTRUCTOR.

ART362 Wheel Thrown Ceramics II
3 credits
Fall & Spring Semester
Continuation of ART 262.
PREREQUISITE: ART 262 OR PERMISSION OF INSTRUCTOR.

ART363 Cast Glass Processes
3 credits
Fall Semester
The art of cast glass including sand casting and lost wax techniques.
PREREQUISITE: ART 104 OR PERMISSION OF INSTRUCTOR.

ART364 Intermediate Glass Blowing
3 credits
Fall Semester
Exploration of glass working techniques.
PREREQUISITE: ART 263.

ART380 Studies in Studio Art
1- 3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART381 Studies in Studio Art
1- 3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART382 Studies in Studio Art
1- 3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART383 Studies in Studio Art
1- 3 credits
Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.
ART384 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART385 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART391 Graphic Design II
3 credits  Fall & Spring Semester
Development of form and concept. Visual rhetorical strategies such as metaphors, puns, irony, and metonymy,
PREREQUISITE: ART 291, 292, AND 293.

ART392 Multimedia III
3 credits  Fall & Spring Semester
Video art, multimedia, installation art and interactive animation.
PREREQUISITE: ART 109

ART401 Advanced Painting I
3 credits  Fall & Spring Semester
Development of a personal style in painting.
PREREQUISITE: ART 302.

ART402 Advanced Painting II
3 credits  Fall & Spring Semester
Continuation of ART 401.
PREREQUISITE: ART 401.

ART405 Advanced Figure Drawing
3 credits  Fall & Spring Semester
Continuation of ART 305.
PREREQUISITE: ART 305.

ART410 Advanced Photography I
3 credits  Fall & Spring Semester
Development of a personal style in black and white, color, and/or digital photography.
PREREQUISITE: ART 311 AND 312.

ART411 Intermediate Digital Photography
3 credits  Offered By Announcement Only
Digital photographic imaging with an emphasis on computer integration of silver based and alternative processes.
PREREQUISITE: ART 312 AND 410.

ART417 Advanced Sculpture I
3 credits  Fall & Spring Semester
Individual and collaborative installation and site-specific art.
PREREQUISITE: ART 318.

ART418 Advanced Sculpture II
3 credits  Fall & Spring Semester
Development of a personal visual vocabulary.
PREREQUISITE: ART 417.
ART451 Intaglio/Relief III
3 credits
Continuation of ART 351.
PREREQUISITE: ART 351.
Offered By Announcement Only

ART452 Lithography III
3 credits
Continuation of ART 352.
PREREQUISITE: ART 352.
Offered By Announcement Only

ART453 Silkscreen III
3 credits
Continuation of ART 353.
PREREQUISITE: ART 353.
Offered By Announcement Only

ART454 Computer Assisted Printmaking: Intaglio and Relief
3 credits
Continuation of ART 354, photo etching and relief processes.
PREREQUISITE: ART 354 OR PERMISSION OF INSTRUCTOR.
Offered By Announcement Only

ART461 Figure in Clay III
3 credits
Fall & Spring Semester
Advanced modeling from the figure. Emphasis on anatomy, line, gesture, volume, proportions and the expressive handling of clay.
PREREQUISITE: ART 361 OR PERMISSION OF INSTRUCTOR.

ART462 Advanced Ceramics
3 credits
Fall & Spring Semester
Development of expressive skills in either handbuilding or wheel throwing techniques.
PREREQUISITE: ART 361 OR 362.

ART463 Advance Topics in Ceramics
3 credits
Fall & Spring Semester
Changing topics/ Advance problems in ceramics processes.
PREREQUISITE: ART 361 OR ART 362 OR PERMISSION OF INSTRUCTOR.

ART491 Graphic Design III
3 credits
Fall & Spring Semester
Advanced page layout coupled with extensive use of typography with applications in page design for advertising and collateral projects.
PREREQUISITE: ART 391.

ART492 Multimedia IV
3 credits
Offered By Announcement Only
Video art and multimedia installations/independent study.
PREREQUISITE: ART 292, 294, 392

ART493 Illustration
3 credits
Offered By Announcement Only
Contemporary illustration for print, new media, portfolio and exhibition.
PREREQUISITE: ART 109 AND THREE ADDITIONAL CREDITS IN ART.
ART494 Critical Issues in Design and Culture
3 credits
Offered By Announcement Only
Analytical and critical approach to graphic design/multimedia practice.
PREREQUISITE: ART 491.

ART499 Honors Thesis
3- 6 credits
Fall & Spring Semester
Formal thesis and project including an exhibition supervised by member of the department faculty.
PREREQUISITE: B.F.A. CANDIDATE, SENIOR STANDING AND ACCEPTANCE IN DEPARTMENTAL HONORS PROGRAM.

ART501 Advanced Painting III
3 credits
Fall & Spring Semester
Course content decided between student and professor.
PREREQUISITE: ART 402.

ART502 Advanced Painting IV
3 credits
Fall & Spring Semester
Continuation of ART 501.
PREREQUISITE: ART 501.

ART503 Independent Study in Painting
1- 6 credits
Fall & Spring Semester
Course content decided between student and professor. An independent study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART504 Independent Study in Drawing
1- 6 credits
Offered By Announcement Only
Course content decided between student and professor. An Independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART505 Topics in Painting
1- 6 credits
Fall Semester
Current readings and/or technical concerns not covered in the regular curriculum.
Course content will vary each semester.
PREREQUISITE: ANY 400 LEVEL PAINTING CLASS.

ART509 Independent Study in Other Media
1- 6 credits
Fall & Spring Semester
Course content decided between student and professor. Independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART510 Advanced Photography III
3 credits
Fall & Spring Semester
Course content decided between student and professor.
PREREQUISITE: ART 411.

ART511 Advanced Photography IV
3 credits
Fall & Spring Semester
Continuation of ART 510.
PREREQUISITE: ART 510.
ART512 Independent Study in Photography
1-6 credits
Fall & Spring Semester
Course content decided between student and professor. An independent study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART517 Advanced Sculpture III
3 credits
Fall & Spring Semester
Examination of ongoing work in relationship to historical and contemporary interpretations issues.
PREREQUISITE: ART 418 AND PERMISSION OF INSTRUCTOR.

ART518 Advanced Sculpture IV
3 credits
Fall & Spring Semester
Continuation of ART 517.
PREREQUISITE: ART 517.

ART519 Independent Study in Sculpture
1-6 credits
Fall & Spring Semester
Course content decided between student and professor. An Independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART551 Intaglio/Relief IV
3 credits
Offered By Announcement Only
Advanced work in intaglio/relief processes: course requirements decided between student and professor.
PREREQUISITE: ART 451.

ART552 Lithography IV
3 credits
Offered By Announcement Only
Advanced work in lithography: course requirements decided between student and professor.
PREREQUISITE: ART 452.

ART553 Silkscreen IV
3 credits
Offered By Announcement Only
Advanced work in silkscreen.
PREREQUISITE: ART 453.

ART554 Computer Assisted Printmaking
3 credits
Offered By Announcement Only
Advanced work in computer assisted printmaking; course requirements decided between student and professor.
PREREQUISITE: ART 454 OR PERMISSION OF INSTRUCTOR.

ART555 Topics in Printmaking
1-6 credits
Fall Semester
Current readings and/or technical concerns not covered in the regular curriculum.
Course content will vary each semester.
PREREQUISITE: ANY 400 LEVEL PRINTMAKING CLASS.
ART562 Contemporary Ceramic Art  
3 credits  
Fall & Spring Semester  
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.  
PREREQUISITE: ART 462 OR ART 463 OR PERMISSION OF INSTRUCTOR

ART563 Independent Study in Ceramics/Glass  
1- 6 credits  
Fall & Spring Semester  
Course content decided between student and professor. An Independent Study course may be repeated.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART564 Directed Research and Projects in Ceramics/Glass  
3 credits  
Fall & Spring Semester  
Ceramic/glass approaches from early history to contemporary period, and the development of technical ability.  
PREREQUISITE: ART 561 OR PERMISSION OF INSTRUCTOR.

ART591 Portfolio/Business of Design  
3 credits  
Offered By Announcement Only  
Individually supervised graphic design portfolio. Professional practices in design.  
PREREQUISITE: ART 491.

ART592 Special Projects/Multimedia  
3 credits  
Offered By Announcement Only  
Video Art and multimedia portfolio includes classroom work.  
PREREQUISITE: ART 392, 491, OR PERMISSION OF INSTRUCTOR.

ART593 Seminar in Professional Practices  
1- 6 credits  
Fall & Spring Semester  
Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.  
PREREQUISITE: SENIOR STANDING.

ART599 Exhibition Preparation  
3 credits  
Fall Semester  
A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART HISTORY

ARH107 History of Photography  
3 credits  
Spring Semester  
A study of photography as a visual medium of expression and communication: a chronological examination of its origins, styles and uses.

ARH131 Survey of Western Art I  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
The art of western cultures from pre-history through the Middle Ages.

ARH132 Survey of Western Art II  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
The art of western cultures from the Renaissance through the 20th century.
ARH133 Art of Non-European Cultures
3 credits Offered By Announcement Only
The art of non-European cultures with selections from Africa, Oceania, Asia, and/or the Native Americas.

ARH134 Ancient American Art through the Contact Period
3 credits Fall Semester
Indigenous American arts (Andean South America, Mesoamerica, Native North America) produced in antiquity through the European contact period.

ARH180 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH181 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH182 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH183 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH184 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH185 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH200 Islamic Art
3 credits Fall Semester
Students in this course will study Islam as a religious and political entity and will analyze how the Islamic world defined itself in the realm of cultural production. This course will analyze a variety of Islamic artistic media, including architecture, manuscript illumination, textiles, ceramics, and small-scale luxury objects. Artworks from the 7th to the 17th century, created in a geographic area extending from Spain to India, will be studied in order to provide a general overview of artistic production in diverse Islamic lands.

ARH233 European Visions of the New World
3 credits Offered By Announcement Only
Survey of the European view of the Americas (16th-18th centuries) using prints, paintings, drawings, and illustrations in travel accounts.

ARH280 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.
ARH281 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH282 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH283 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH284 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH285 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH300 Spanish Art
3 credits Offered By Announcement Only
This course will study art produced on the Iberian Peninsula from the prehistoric period to the present day. It will proceed chronologically, addressing significant periods in Spanish art history, such as Roman, Islamic, Romanesque, Golden Age, Baroque and early Modern Spain. The aim of the course is to establish the unique characteristics of Spanish art, and how historical events (Islamic presence on the peninsula, American colonies, the regime of Franco) defined Spain as distinct from its European neighbors. The Spanish influence in art and architecture has been far-reaching, particularly in the Americas, and we will explore this influence in the early modern and contemporary periods in a variety of American locations.
PREREQUISITE: NONE

ARH321 Andean Art
3 credits Offered By Announcement Only
South American art from formative times through the Incan empire and the Spanish conquest (A.D. 1521).
PREREQUISITE: ARH 133 OR 134, OR PERMISSION OF INSTRUCTOR

ARH322 Mesoamerican Art
3 credits Offered By Announcement Only
From Olmec Beginnings (ca 1,500 B.C.) through the Teotihuacan, the Mayan and the Aztec cultures to the Spanish Conquest (A.D. 1521).
PREREQUISITE: ARH 133 OR 134, OR PERMISSION OF INSTRUCTOR

ARH323 Native American Art
3 credits Offered By Announcement Only
From the cultures of the Archaic Woodlands and the ancient Southwest (ca. 6,000 B.C.) to the present.
PREREQUISITE: ARH 133 OR 134, OR PERMISSION OF INSTRUCTOR
COLLEGE OF ARTS AND SCIENCES
ART HISTORY

ARH324 Art of West Africa
3 credits Offered By Announcement Only
Traditional Art of Africa south of the Sahara and west of the Nigeria/Cameroon border from earliest forms to the present.
PREREQUISITE: ARH 133.

ARH325 Art of Central Africa
3 credits Offered By Announcement Only
Traditional Art of Central, Eastern, and Southern Africa from earliest forms to the present.
PREREQUISITE: ARH 133.

ARH326 The Art of South Asia
3 credits Fall Semester
The Arts of South Asia with selections from India and Thailand.
PREREQUISITE: ARH 133 OR PERMISSION OF INSTRUCTOR.

ARH327 The Art of East Asia
3 credits Fall Semester
The Art of East Asia with selections from China, Korea, and Japan.
PREREQUISITE: ARH 133 OR PERMISSION OF INSTRUCTOR.

ARH331 Art of Egypt and Mesopotamia
3 credits Fall Semester
A study of the art and civilizations of ancient Egypt and the Tigris-Euphrates Valley.
PREREQUISITE: ARH 131 OR HIS 221.

ARH332 Greek Art
3 credits Offered By Announcement Only
The art of ancient Greek civilization.
PREREQUISITE: ARH 131 OR HIS 221.

ARH333 Roman Art
3 credits Offered By Announcement Only
Roman art from the 1st century B.C. through the 4th century A.D.
PREREQUISITE: ARH 131 OR HIS 221.

ARH335 Early Christian and Byzantine Art
3 credits Offered By Announcement Only
Christian art from the second through the fifteenth centuries in Rome and the Byzantine Empire.
PREREQUISITE: ARH 131 OR HIS 221.

ARH336 Medieval Art
3 credits Offered By Announcement Only
Western European art from the fourth through the twelfth century.
PREREQUISITE: ARH 131 OR HIS 221.

ARH337 Italian Renaissance Art
3 credits Offered By Announcement Only
The painting, sculpture, and architecture of Florence in the fifteenth century.
PREREQUISITE: ARH 132 OR HIS 221.
ARH338 Sixteenth Century Italian Art
3 credits Offered By Announcement Only
The painting, sculpture, and architecture of Italy in the sixteenth century.
PREREQUISITE: ARH 132 OR HIS 221.

ARH339 Northern Renaissance Art
3 credits Offered By Announcement Only
The painting of France and the Netherlands in the fourteenth and fifteenth centuries.
PREREQUISITE: ARH 132 OR HIS 221.

ARH340 Baroque Art
3 credits Offered By Announcement Only
Art and architecture of the seventeenth century, focusing on major cultural centers in Europe and the Americas.
PREREQUISITE: ARH 132 OR HIS 222.

ARH341 Eighteenth-Century European Art
3 credits Offered By Announcement Only
European art from 1700-1820, including Rococo and Neoclassicism, ending with Goya in Spain.
PREREQUISITE: ARH 132 OR HIS 222.

ARH342 Nineteenth-Century European Art
3 credits Offered By Announcement Only
Neo-Classicism, Romanticism, Realism, Impressionism, 1760-1900.
PREREQUISITE: ARH 132 OR HIS 222.

ARH343 Modern Art
3 credits Fall Semester
Cezanne to Surrealism. Primarily European Art c. 1880-1940 in the context of the development of Modernism and its aesthetic theories.
PREREQUISITE: ARH 132, HIS 222 OR THREE CREDITS OF HUMANITIES AT THE 300 LEVEL OR ABOVE.

ARH344 Contemporary Art
3 credits Spring Semester
American and European Art from the Second World War to the present in its social, political, and theoretical contexts.
PREREQUISITE: ARH 132, HIS 222, OR THREE CREDITS OF HUMANITIES AT THE 300 LEVEL OR ABOVE.

ARH345 Art in the United States
3 credits Offered By Announcement Only
Colonial Art through the Armory Show c. 1750-1920.
PREREQUISITE: ARH 132, HIS 222, OR THREE CREDITS OF HUMANITIES AT THE 300 LEVEL OR ABOVE.

ARH346 History of Graphic Design
3 credits Offered By Announcement Only
Evolution of Graphic Design from the invention of writing through the twentieth century concentrating on contemporary themes and technical innovations.
PREREQUISITE: ARH 131, 132 OR PERMISSION OF INSTRUCTOR.
ARH380 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH381 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH382 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH383 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH384 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH385 Studies in Art History
1-3 credits Not Offered; Transfer Credit Only
Art History studies taken at other institutions with no direct equivalents.

ARH407 Special Topics: Renaissance and Baroque Art
3 credits Offered By Announcement Only
Changing topics in Renaissance and Baroque art.
PREREQUISITE: PERMISSION OF INSTRUCTOR

ARH409 Special Topics in Contemporary Art
3 credits Offered By Announcement Only
Changing topics in contemporary art.
PREREQUISITE: PERMISSION OF INSTRUCTOR

ARH411 Special Topics: Museum Studies
3 credits Offered By Announcement Only
Changing topics in museum studies.
PREREQUISITE: PERMISSION OF INSTRUCTOR

ARH440 Seventeenth-century Dutch Art
3 credits Fall Semester
Art and artists of the 17th Century Dutch Republic, including Rembrandt and Vermeer.
PREREQUISITE: ARH 132.

ARH499 Honors Thesis
3-6 credits Fall & Spring Semester
Directed reading and a substantial and scholarly paper.
PREREQUISITE: SENIOR STANDING AND ACCEPTANCE IN DEPARTMENTAL HONORS PROGRAM.
COLLEGE OF ARTS AND SCIENCES

ART HISTORY

ARH505 Problems in Art History
3 credits                                                    Fall & Spring Semester
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.
PREREQUISITE: ANY 300-LEVEL OR 400-LEVEL COURSE IN ART HISTORY AND PERMISSION OF INSTRUCTOR.

ARH506 Problems in Art History
3 credits                                                    Fall & Spring Semester
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.
PREREQUISITE: ANY 300-LEVEL OR 400-LEVEL COURSE IN ART HISTORY AND PERMISSION OF INSTRUCTOR.

ARH507 Museum Studies I
3 credits                                                    Fall & Spring Semester
Administrative functions of local art museums; researching selected art works in their permanent collections.
PREREQUISITE: ARH 131, 132, ONE 300/400 LEVEL COURSE IN ART HISTORY, OR PERMISSION OF INSTRUCTOR.

ARH508 Museum Studies II
3 credits                                                    Fall & Spring Semester
Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.

ARH509 Museum Internship
1- 3 credits                                                 Fall & Spring Semester
UM sponsored internship with Miami-area museum.
PREREQUISITE: BY PERMISSION OF HEAD OF ART HISTORY.

ARH510 Arts Administration Internship
1- 3 credits                                                 Fall & Spring Semester
UM sponsored internship with Miami-area arts institution.
PREREQUISITE: BY PERMISSION OF HEAD OF ART HISTORY.

ARH530 Seminar in Art History
3 credits                                              Offered By Announcement Only
Special topics in western and nonwestern art. Semester's topic will be announced.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARH560 Seminar in Nineteenth and Twentieth Century Art
3 credits                                              Offered By Announcement Only
Special topics including museum practices and theory, women's art and contemporary issues.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARH570 Seminar in Non-European Art
3 credits                                              Offered By Announcement Only
Special Topics in African, Oriental, Oceanic, Native North or South American art traditions.
PREREQUISITE: ARH 133, 134, OR PERMISSION OF INSTRUCTOR.
ARH598 Seminar in Contemporary American Art
3 credits
Fall Semester
Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
PREREQUISITE: ARH 344. UNDERGRADUATES MUST HAVE PERMISSION OF INSTRUCTOR.

BIOCHEMISTRY & MOLECULAR BIOLOGY

BMB151 Freshman Seminar
1 credit
Spring Semester
Biochemistry and Molecular Biology and their impact on society. Basic Biochemistry and Molecular Biology information on these topics. Students write a paper and present a poster.
PREREQUISITE: BIOCHEMISTRY MAJORS ONLY. PREREQUISITE: BIL 150, COREQUISITE: BIL 160, CHM 111.

BMB251 Sophomore Seminar
1 credit
Spring Semester
Biochemistry and Molecular Biology and their impact on society. Basic Biochemistry and Molecular Biology information on these topics is presented. Students write a paper and present a poster.

BMB258 Introduction to Biochemistry and Molecular Biology
3 credits
Spring Semester
The composition and functioning of a typical cell are described in chemical terms, leading to an understanding of how life processes occur and are regulated at the level of individual molecules and reactions.
PREREQUISITE: CHM 112.

BMB401 Biochemistry for the Medical Sciences
3 credits
Fall Semester
Basic areas of biochemistry are discussed including protein structure, enzymology, metabolism, and molecular genetics. Emphasis is placed on central concepts of mammalian biochemistry. This course is recommended for premedical preparation. Lecture, 3 hours.
PREREQUISITE: A GRADE OF C OR BETTER IN CHM 202, BIL 150 AND 160, OR PERMISSION OF INSTRUCTOR. NOT FOR BIOCHEMISTRY MAJORS OR MINORS. NOT OPEN TO STUDENTS WITH CREDIT IN BMB 406 OR 506.

BMB406 Principles of Biochemistry and Molecular Biology
3 credits
Offered By Announcement Only
Protein Structure and function, enzyme mechanism and kinetics, and metabolism, focusing on energy metabolism and central concepts of metabolic regulation and of molecular biology including nucleic acid structure, protein synthesis, and DNA replication. Undergraduate majors. (Not open to students with credit in BMB 401 or 506).
PREREQUISITE: A GRADE OF C OR BETTER IN CHM 202, BIL 150 AND 160, OR PERMISSION OF INSTRUCTOR.

BMB407 Proteins and Enzymes
3 credits
Spring Semester
Course analyzes folding and binding of proteins, kinetics, and mechanisms of enzyme action. Not open to students with credits in BMB 507.
PREREQUISITE: BMB 406 OR 506 OR PERMISSION OF INSTRUCTOR.
BMB501 Senior Seminars
1 credit  Fall & Spring Semester
Students attend seminars by faculty or graduate students on recent research topics in Biochemistry and Molecular Biology. Students write short reports on these seminars and critically evaluate the presentations.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BMB 506.

BMB502 Physical Biochemistry
3 credits  Offered By Announcement Only
Thermodynamics of biochemical reactions including chemical potential and equilibrium constants. Principles of diffusion and viscosity with applications to the ultracentrifuge, electrophoresis and chromatography are included. Topics in spectroscopy including visible, UV, IR absorption, and fluorescence. Biochemical applications of ORD, CD, NMR, and ESR. X-ray crystallography.
PREREQUISITE: BMB 407.

BMB505 Metabolic Processes
2 credits  Offered By Announcement Only
Intermediary metabolic processes. Catabolism of carbohydrates, lipids, and nitrogen compounds. Biosynthetic processes leading to amino acids, lipids, and isoprenoids, sugars, are addressed. Regulation of metabolism and cellular economy by various means, including hormones is also included. Lecture, 2 hours.
PREREQUISITE: BMB 506 OR PERMISSION OF INSTRUCTOR.

BMB506 Principles of Biochemistry and Molecular Biology
3 credits  Fall Semester
Protein structure and function, enzyme mechanism and kinetics, and metabolism, focusing on energy metabolism and central concepts of metabolic regulation and of molecular biology including nucleic acid structure, protein synthesis, and DNA replication. (Not open to students with credit in BMB 401 or 406; for undergraduate honors credit or graduate student not majoring in biochemistry.
PREREQUISITE: A GRADE OF C OR BETTER IN CHM 202, BIL 150 AND 160 OR PERMISSION OF INSTRUCTOR.

BMB507 Proteins and Enzymes
3 credits  Spring Semester
Course analyzes the folding and binding of proteins, kinetics and mechanisms of enzyme action. For honors undergraduates. Not open to students in BMB 407.
PREREQUISITE: BMB 406 OR 506 OR PERMISSION OF INSTRUCTOR; FOR UNDERGRADUATE HONORS CREDIT OR GRADUATE STUDENTS NOT MAJORING IN BIOCHEMISTRY.

BMB508 Biochemistry and Molecular Biology Laboratory
1 credit  Offered By Announcement Only
Experience in a spectrum of biochemical experiments ranging from enzyme chemistry to recombinant DNA. Laboratory, 3 hours.
PREREQUISITE: PRE OR COREQUISITE: BMB 258 OR CHM 202

BMB509 Molecular Biology of the Gene I
3 credits  Fall Semester
Biochemical processes involved in the propagation and expression of genetic information in both prokaryotes and eukaryotes. Basic cellular processes of DNA replication, repair, genetic recombination, RNA transcription and processing, protein synthesis, control of gene expression, cell differentiation, and recombinant DNA technology. Reading includes both textbook assignments and original research papers.
PREREQUISITE: BMB 506 OR PERMISSION OF INSTRUCTOR.
BMB511 Topics in Applied BCH and Molecular Biology
1-3 credits Fall & Spring Semester & First & Second Summer Session
Selected topics from the fields of applied and pure biochemistry and molecular biology taught as a tutorial.
PREREQUISITE: BMB 406 OR 506 AND PERMISSION OF INSTRUCTOR.

BMB545 Research Problems in Biochemistry and Molecular Biology
2-3 credits Fall & Spring Semester & First & Second Summer Session
Laboratory research problems in various fields of biochemistry, including literature search, experiment design, data gathering, and evaluation or results.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIOLOGY
BIL101 Introductory Biological Science
3 credits Fall & Spring Semester & First & Second Summer Session
An integrated presentation of important biological processes and principles. Designed as an introduction to life sciences for the non-major. Students with credit in BIL 150 may NOT take this course to fulfill the natural science requirement. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS. STUDENTS WITH CREDIT IN BIL 150 MAY NOT TAKE THIS COURSE TO FULFILL THE NATURAL SCIENCE REQUIREMENT.

BIL102 Elementary Biotechnology
3 credits Fall Semester
Major aspects of the biotechnology field for the non-science major. Food biotechnology, enzymes, environmental biotechnology, transgenic animals and plants, analytical biotechnology and more.

BIL103 Humans and the Environment
3 credits Fall Semester
Survey of the general principles of ecology; the relationships of organisms to both physical and biotic aspects of their environment. Emphasis on human impact on natural communities.
PREREQUISITE: DOES NOT COUNT TOWARDS THE BIL MAJOR OR MINOR.

BIL104 Genetics and Society
3 credits Offered By Announcement Only
The impact of new knowledge in genetics and heredity on society, including a consideration of questions about the inheritance of I.Q. and behavior, racial differences, genetic screening, control of reproduction, genetic engineering, forensic applications.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL105 Elementary Botany
3 credits Offered By Announcement Only
Survey of the evolution and diversity of the plant kingdom; economic and cultural, importance of plants to humans. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL106 Elementary Zoology
3 credits Offered By Announcement Only
Survey of the evolution and diversity of the animal kingdom and the relationship between humans and other animals. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.
BIL107 Introduction to Evolution
3 credits
Fall Semester
Hereditary variation and the mechanisms of evolutionary change. Processes of species formation and the origin of adaptations. The development of evolutionary thinking from classical to contemporary time, including social issues (e.g., social Darwinism, creationism). Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL109 Human Biology
3 credits
Fall Semester
A survey of the anatomy and physiology of man and his relationship to some major biological problems. Lectures and demonstrations. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL113 General Biology Honors Seminar
1 credit
Fall Semester
Special topics in biology correlated with BIL 150.
PREREQUISITE: COREQUISITE: BIL 150.

BIL114 General Biology Honors Seminar
1 credit
Spring Semester
Special topics in biology correlated with BIL 160.
PREREQUISITE: COREQUISITE: BIL 160.

BIL149 First Year Information
1 credit
Fall Semester
First year seminar for incoming Biology majors. Facilitation and encouragement of development of critical thinking skills, proficiency in oral and written expression, and an ability to solve problems by integrating knowledge from different disciplines in Biology.

BIL150 General Biology
4 credits
Fall Semester & First Summer Session
Principles of biology at the cellular, genetic, organismal, population, community and ecosystem levels of organization.

BIL151 General Biology Laboratory
1 credit
Fall Semester & First Summer Session
Laboratory exercises to accompany BIL 150.
PREREQUISITE: COREQUISITE: BIL 150.

BIL160 Evolution and Biodiversity
4 credits
Spring Semester & Second Summer Session
Evolutionary processes from an organismal perspective. Biosystematics, biogeography and a survey of the diversity of life, with emphasis on the morphological, ecological, and behavioral adaptations of selected representatives of the Domains of living organisms.

BIL161 Evolution and Biodiversity Laboratory
1 credit
Spring Semester & Second Summer Session
Laboratory exercises to accompany BIL 160.
PREREQUISITE: COREQUISITE: BIL 160.
BIL190 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL191 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL192 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL193 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL194 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL195 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL210 Human Anatomy  
4 credits  
Fall Semester  
Structural interrelationships of organ systems. Demonstrations, dissections, and discussions.  
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY.

BIL215 Systemic Human Physiology  
3 credits  
Fall Semester  
Function of major human systems.  
PREREQUISITE: BIL 210 (HSC 210).

BIL216 Systemic Human Physiology Laboratory  
2 credits  
Spring Semester & Second Summer Session  
Experiments illustrating the physiology of human organ systems.  
PREREQUISITE: BIL 210 (HSC 210).

BIL220 Evolution and Disease  
3 credits  
Fall & Spring Semester  
Evolutionary insights on the origins and emergence of diseases, drug resistance, and how diseases have shaped human evolution.  
PREREQUISITE: ONE YEAR OF MAJORS' GENERAL BIOLOGY WITH LABORATORY

BIL221 Biology of Birds  
4 credits  
Offered By Announcement Only  
General biology of birds, field identification, natural history and migrations of southern Florida species. Lecture, 2 hours; laboratory, 3 hours; 4 field trips, 6 hours each. Binoculars needed.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.
BIL226 General Botany
3 credits
Offered By Announcement Only
Survey of the plant kingdom, including evolution, plant diversity, reproduction, structure, function and ecology.
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY OR PERMISSION OF INSTRUCTOR.

BIL227 General Botany Laboratory
1 credit
Offered By Announcement Only
Laboratory exercises to accompany BIL 226.
PREREQUISITE: BIL 226

BIL230 Introduction to Marine Biology
3 credits
Fall Semester
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORIES. COREQUISITE: BIL 231.

BIL231 Introduction to Marine Biology Laboratory
1 credit
Fall Semester
Experimental laboratory exploring ecology, physiology and behavior of marine organisms in southern Florida marine habitats. Exercises cover laboratory techniques in behavior, functional morphology, productivity, fisheries research, osmoregulation and community ecology.
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORIES. COREQUISITE: BIL 230.

BIL232 Populations, Resources and the Environment
3 credits
Offered By Announcement Only
Populations and their interrelationships with the environment. Human demographics, and natural resource issues including compatible development and landscape changes.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL233 Conservation Biology
3 credits
Offered By Announcement Only
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL235 Ecology
3 credits
Fall & Spring Semester
An Introduction to study of organisms in relation to their environment. Lecture, 3 hours.

BIL236 Ecology Lab
1 credit
Fall & Spring Semester
Lab and field exercises in ecology. Some Saturday field trips required.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 235.

BIL241 Animal Behavior
3 credits
Fall & Spring Semester
Mechanistic and evolutionary aspects of animal behavior. A survey of systems that illustrate the control, development and function of behavior in a variety of animals.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.
BIL242 Animal Behavior Laboratory
1 credit
A lab/field course in basic behavioral concepts using a variety of organisms, both vertebrate and invertebrate, in aquatic and terrestrial environments.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 241.

BIL250 Genetics
3 credits
Fall & Spring Semester & First Summer Session
The nature, organization, replication, expression, and evolution of the genetic materials.

BIL251 Principles of Genetics Laboratory
1 credit
Fall & Spring Semester
Laboratory exercises in genetics.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 250.

BIL252 HON: Honors Laboratory in Genetics
2 credits
Spring Semester
Laboratory exercises in genetics.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 250.

BIL253 Honors Seminar in Genetics
1 credit
Spring Semester
Special topics in genetics correlated with BIL 250.
PREREQUISITE: BIL 250.

BIL255 Cellular and Molecular Biology
3 credits
Fall & Spring Semester & First & Second Summer Session
Structure, molecules, and functions of cells.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL256 Cellular and Molecular Biology Laboratory
2 credits
Spring Semester
Laboratory exercises in cellular and organismal physiology; involving current research techniques and applications.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 255.

BIL257 HON: Honors Seminar in Cell Biology
1 credit
Spring Semester
Special topics in cell and molecular biology correlated with BIL 255.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 255.

BIL258 Core Laboratory Techniques
2 credits
Fall Semester
Conceptual and applied "methods" course in modern analytical techniques. It will expose students to the Department of Biology's three best-developed core laboratory facilities for imaging, molecular biology, and element analysis.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL261 Comparative Vertebrate Anatomy
4 credits
Offered By Announcement Only
Anatomy, classification, function, distribution, and evolution of vertebrate animals and their relationships to the environment. Lecture, 2 hours; laboratory, 6 hours.
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY.
COLLEGE OF ARTS AND SCIENCES

BIOLOGY

BIL265 Comparative Physiology
3 credits
Fall & Spring Semester
Animal and plant physiological processes such as homeostasis, energy budget, movement, sensation, and reproduction with emphasis on the organismal level.

BIL266 Comparative Physiology Laboratory
1 credit
Fall Semester
Experiments to illustrate basic plant and animal physiological processes.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 265.

BIL268 Neurobiology
3 credits
Offered By Announcement Only
Neurons, organization of the nervous system, electrical properties of neurons, neurotransmitters, receptors, synaptic transmission, sensory and motor system, and complex brain functions.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL284 Special Laboratory Topics in Biology
1 credit
Fall Semester
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL285 Special Topics in Biology
3 credits
Fall Semester
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL286 Special Topics in Biology
4 credits
Fall Semester
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL290 Studies in Biology
1- 5 credits
Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL291 Studies in Biology
1- 5 credits
Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL292 Studies in Biology
1- 5 credits
Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL293 Studies in Biology
1- 5 credits
Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL294 Studies in Biology
1- 5 credits
Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.
BIL295 Studies in Biology
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL299 Seminar in Research Problems
2 credits  
Fall & Spring Semester  
Discussion of current research of the Biology Faculty.  
PREREQUISITE: MINIMUM SOPHOMORE STANDING.

BIL310 Advanced Human Anatomy
4 credits  
Fall Semester  
An in-depth exploration of the human body requiring extensive laboratory work, lectures, dissections, and field trips.  
PREREQUISITE: BIL 210 (HSC 210) AND PERMISSION OF INSTRUCTOR.

BIL311 Biostatistics
3 credits  
Fall Semester  
Descriptive and inferential univariate and bivariate statistics applied to biological data. Probability, probability distributions, data description and presentation, hypothesis testing, decision making and experimental design. (Not open to students with credit in MTH 224, PSY 204 or equivalent).  
PREREQUISITE: MTH 105 OR 108 OR SCORES OF MATHEMATICS PLACEMENT TEST SUFFICIENT FOR ADMISSION TO A CALCULUS COURSE. 12 CREDITS IN BIOLOGY.

BIL312 Biostatistics Laboratory
1 credit  
Fall Semester  
Computer laboratory exercises to complement Biostatistics.  
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY.

BIL315 Marine Biota and Biogeochemical Cycles
3 credits  
Spring Semester  
The distribution of dissolved and particulate materials in the sea is not uniform in time and space. This variability reflects the diverse sources, transformations, and sinks of chemical constituents in the sea. This course focuses on the role of marine organisms in marine biogeochemical cycling and the marine carbon cycle and its interaction with the terrestrial biosphere and atmosphere.  
PREREQUISITE: MSC 320

BIL321 Invertebrate Zoology
4 credits  
Offered By Announcement Only  
Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.  
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY.

BIL323 Biology of Insects
3 credits  
Offered By Announcement Only  
Evolution, structure, physiology, behavior and ecology of major orders of insects. Lecture and demonstration.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL324 The Biology of Fishes
3 credits  
Offered By Announcement Only  
Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.  
PREREQUISITE: BIL 255 AND 265, AND PERMISSION OF INSTRUCTOR.
BIL326 Plant Taxonomy  
4 credits  
Offered By Announcement Only  
Application of the principles and techniques of taxonomy to the flora of Southern Florida. Lecture, 2 hours; laboratory, 3 hours, and field trips.  
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY.

BIL327 Marine and Fresh Water Algae  
4 credits  
Offered By Announcement Only  
Fundamentals of the biology of marine and fresh water algae. Lecture, 3 hours; laboratory, 3 hours.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL328 Parasitology  
3 credits  
Offered By Announcement Only  
Morphology, classification, life history, pathology and control of protozoan helminth and arthropod parasites.  
PREREQUISITE: BIL 150/151, BIL 160/161. JUNIOR OR SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

BIL329 Parasitology Laboratory  
1 credit  
Offered By Announcement Only  
Laboratory exercises in parasitology.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 328.

BIL331 Vertebrate Ecology  
4 credits  
Offered By Announcement Only  
General basis of vertebrate taxonomy. Behavior, natural history, physiological ecology, adaptive morphology and zoogeography of the vertebrates. Lecture, 3 hours; laboratory, 3 hours; field trips.  
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY.

BIL332 Principles of Wildlife Management  
3 credits  
Offered By Announcement Only  
Principles and concepts of wildlife conservation and management.  
PREREQUISITE: BIL 235.

BIL333 Wildlife Management Laboratory  
1 credit  
Offered By Announcement Only  
Field and laboratory exercises illustrating techniques of wildlife management.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 332.

BIL335 Tropical Field Biology  
3 credits  
Spring Semester  
Intensive field study conducted during semester breaks or recesses with additional pre-trip lectures. Requires payment of trip costs.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY AND PERMISSION OF INSTRUCTOR.

BIL336 Tropical Plant Biology  
3 credits  
Spring Semester  
Structure, diversity, ecology, development and physiology of major plant groups of the tropics. Lecture, 3 hours; field trips.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.
BIL337 Advanced Ecology Laboratory
2 credits
Offered By Announcement Only
Research methods in physiological, behavioral, population, community, ecosystem and landscape ecology. Original research using current instrumentation in the field, the laboratory and on computer.
PREREQUISITE: BIL 235.

BIL338 Ecology of Southern Florida
4 credits
Offered By Announcement Only
Structure, function and management of major natural communities. Lecture 2 hours; 6 all-day field trips (Saturdays).
PREREQUISITE: BIL 235 AND PERMISSION OF INSTRUCTOR.

BIL341 Behavioral Physiology
3 credits
Offered By Announcement Only
The function and structure of the proximate mechanisms underlying behavior in an evolutionary context. Behavioral substrates, including sensory, central and peripheral aspects of nervous systems, effector organs, and hormonal influences, will be examined and compared across taxa.
PREREQUISITE: BIL 265 OR PERMISSION OF INSTRUCTOR.

BIL345 Behavioral Endocrinology
3 credits
Offered By Announcement Only
The effects of hormones on aggressive behavior, biological rhythms, ingestive behavior, reproductive behavior, and stress response in a variety of vertebrate and invertebrate species.
PREREQUISITE: BIL 365.

BIL350 Survey of Marine Mammals
3 credits
Fall Semester
The evolution and ecology of the cetaceans, pinnipeds, manatees, and allies: Natural history, zoogeography, physiology, husbandry, and biomedical aspects.
PREREQUISITE: BIL 150, MSC 230

BIL351 Human Genetics
3 credits
Offered By Announcement Only
Molecular organization of the human genome, methods of gene mapping, cytogenetics, population and medical genetics, current research. Lecture and discussion.
PREREQUISITE: BIL 250.

BIL352 Techniques in Scanning Electron Microscopy
3 credits
Spring Semester
Tissue preparation, use of the scanning electron microscope, photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.
PREREQUISITE: TWELVE CREDITS IN BIOLOGY, INCLUDING ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY AND PERMISSION OF INSTRUCTOR.

BIL353 Projects in Scanning Electron Microscopy
2 credits
Fall Semester
Individual research projects in scanning electron microscopy. Six hours of laboratory.
PREREQUISITE: BIL 352 AND PERMISSION OF INSTRUCTOR.
BIL354 Advance Topics in Cell Biology  
3 credits  
Fall Semester  
Study of cell biology through comprehensive survey of relevant topics and in-depth discussion on important recent works.  
PREREQUISITE: BIL 255

BIL355 Developmental Biology  
3 credits  
Offered By Announcement Only  
Principles of differentiation, morphogenesis and development will be studies along with a critical analysis of the methods used to study these problems.  
PREREQUISITE: BIL 250 AND 255.

BIL356 Developmental Biology Laboratory  
1 credit  
Offered By Announcement Only  
Laboratory exercises in developmental biology.  

BIL358 Mathematical Biology  
3 credits  
Offered By Announcement Only  
Biomathematics concerned with shape and form, random processes, dynamic phenomena, and chaos in complex systems.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY; MTH 112 OR 132.

BIL359 Biophysics  
3 credits  
Offered By Announcement Only  
Analysis of problems in Biophysics, with emphasis on the statistical nature of biological processes. Examples from cellular physiology, ecology, genetics and the health sciences.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY AND MTH 112 OR 132, OR PERMISSION OF INSTRUCTOR.

BIL360 Animal Physiology  
3 credits  
Offered By Announcement Only  
Principles of homeostasis and behavioral integration. Physiological and structural adaptations of animals to their environments.  
PREREQUISITE: BIL 265.

BIL361 Cytology and Histology  
3 credits  
Offered By Announcement Only  
Structure and function of cells and cell organelles, including a survey of selected cell and tissue types in the vertebrate body. Lecture, 3 hours.  
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL362 Cytology and Histology Laboratory  
2 credits  
Offered By Announcement Only  
Survey of cells, tissues and organs of the vertebrate body, from prepared microscope slides and atlases of electron microscopy. Demonstrations of microscopic methods in cytology and histology. Four hours per week.  
PREREQUISITE: PRE OR COREQUISITE: BIL 361.

BIL363 Environmental Physiology  
3 credits  
Fall Semester  
Functional and adaptive significance of morphological and physiological traits of organisms in relation to their physical environment.  
PREREQUISITE: BIL 265.
BIL364 Environmental Physiology
3 credits  
Spring Semester
Functional and adaptive significance of morphological and physiological traits of organisms in relation to their physical environment.
PREREQUISITE: BIL 265.

BIL365 Endocrinology
3 credits  
Offered By Announcement Only
The endocrine glands and the chemistry, mechanisms of action, and physiological effects of hormones. Emphasis on vertebrate hormones, including clinical aspects of human endocrinology. Lecture, 3 hours.
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORY.

BIL366 Comparative Vertebrate Physiology
3 credits  
Offered By Announcement Only
Homeostasis interactions with the external environment, and special topics in physiology including life without oxygen, behavioral energetics, allometry.
PREREQUISITE: BIL 265 OR PERMISSION OF THE INSTRUCTOR.

BIL367 A Survey of Cancer Biology
3 credits  
Offered By Announcement Only
The biological aspect of human cancers, including their incidence, diagnosis and treatment.
PREREQUISITE: BIL 255.

BIL369 Fundamentals of the Biology of Aging
3 credits  
Offered By Announcement Only
How and why we age. The biology of aging at the molecular, cellular, and organismal levels is presented in a comparative and evolutionary context.
PREREQUISITE: BIL 250, 255 OR 265.

BIL371 Readings in Biology
1 credit  
Spring Semester
Independent readings on selected topics in biology under the supervision of individual faculty.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL372 Readings in Biology
1 credit  
Fall & Spring Semester
Independent readings on selected topics in biology under the supervision of individual faculty.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL374 Seminar in Biology
1 credit  
Fall & Spring Semester
Seminar on selected topics in biology.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY.

BIL375 Seminar in Biology
1 credit  
Fall & Spring Semester
Seminar on selected topics in biology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
BIL381 Workshop Leaders in Biology I
0-1 credits Fall Semester
Students engage in Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for a general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.
PREREQUISITE: A GRADE OF "A" OR "B" IN BIL 150, 151, 160, AND 161, OR EQUIVALENT OR AP OUTPLACING; PERMISSION OF INSTRUCTOR.

BIL382 Workshop Leaders in Biology II
0-1 credits Spring Semester
Students engage in Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.
PREREQUISITE: A GRADE OF "A" OR "B" IN BIL 150, 151, 160, 161 OR EQUIVALENT OR AP OUTPLACING; PERMISSION OF INSTRUCTOR.

BIL384 Special Laboratory Topics in Biology
1-3 credits Fall Semester
Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL385 Special Topics in Biology
2-6 credits Fall Semester
Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL390 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL391 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL392 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL393 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL394 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL395 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.
BIL403 Neuroscience Laboratory
4 credits Spring Semester
Research methods and laboratory experiments in contemporary neuroscience from individual cells to behavior. Scientific report writing and computer applications in experimental design and analysis. Lecture/Lab.
PREREQUISITE: PSY 316 WITH PSY 402 OR BIL 268 AS PRE- OR COREQUISITE.

BIL410 Marine Conservation Science
3 credits Fall Semester
Marine populations and ecosystems; threats to marine biological diversity; place-based management of marine ecosystems; human dimensions of marine conservation. 
PREREQUISITE: BIL 150 AND 160 OR EQUIVALENT.

BIL415 Coral Reef Science and Management
3 credits Fall Semester
Coral reefs as biophysical and socioeconomic systems. Coral reef typology, geomorphology; biotic and abiotic components of coral reef ecosystems.
PREREQUISITE: BIL 150 AND 160 OR EQUIVALENT.

BIL424 Reef Fish Identification and Survey Techniques
2 credits Offered By Announcement Only
Basic ecology of reef fishes, field identification of tropical Atlantic coral reef fishes, analyses of fish survey data, and use of statistics software packages to detect differences in fish assemblages.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY; MTH 111/112; MSC 230; AND STATISTICS (PSY 204, BIL 311, OR EQUIVALENT).

BIL431 Global Environmental Issues
3 credits Offered By Announcement Only
Environment and global policy issues; environmental problems in the international arena and the impact of global change based on monitoring initiatives and long-term data.
PREREQUISITE: JUNIOR STANDING IN INTERNATIONAL STUDIES, ENVIRONMENTAL SCIENCES/STUDIES OR BIOLOGY.

BIL432 Ecotoxicology
3 credits Offered By Announcement Only
Ecological effects of contamination on populations, communities, and ecosystems and strategies for prevention and/or control measures.

BIL481 Undergraduate Teaching Assistant in Biology
1-3 credits Fall Semester
Teaching assistance for undergraduate workshops or laboratories, under the direct supervision of faculty. Specific topic is indicated by course subtitle. This course may be taken no more than twice for credit in the Biology major or minor, and if taken twice, teaching assistance must be for two different BIL courses. May be taken multiple times for general elective credit only. PREREQUISITE: MINIMUM GRADE OF "B" IN THE COURSE IN WHICH STUDENT IS TO ASSIST. PREMISSION OF INSTRUCTOR.
BIL484 Special Laboratory Topics in Biology
1 credit
Fall Semester
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL485 Special Topics in Biology
2-6 credits
Fall & Spring Semester
Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.
PREREQUISITE: PERMISSION OF INSTRUCTOR

BIL491 Departmental Seminar in Biology
1 credit
Fall Semester
Research seminars by distinguished biologists.
PREREQUISITE: 24 CREDITS IN BIOLOGY.

BIL492 Departmental Seminar in Biology
1 credit
Spring Semester
Research seminars by distinguished biologists.
PREREQUISITE: 24 CREDITS IN BIOLOGY.

BIL495 Projects in Biology
2 credits
Fall & Spring Semester
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL496 Projects in Biology
2 credits
Fall & Spring Semester
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL497 Projects in Biology
2 credits
Fall & Spring Semester
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL498 Senior Thesis
2 credits
Fall & Spring Semester
Formal thesis preparation supervised by a member of the departmental faculty including a public oral defense and submission of the written document to the department.
PREREQUISITE: PREREQUISITE OR COREQUISITE: FOUR (4) CREDITS OF "PROJECTS IN BIOLOGY" OR EQUIVALENT.

BIL499 Research Colloquium
1 credit
Fall & Spring Semester
Discussion of current research of Biology undergraduate students.
PREREQUISITE: BIL 495, JUNIOR OR SENIOR STANDING, AND PERMISSION OF THE DEPARTMENTAL HONORS DIRECTOR. COREQUISITE: BIL 496 OR 497.
BIL511 Biometry
3 credits
Offered By Announcement Only
Descriptive and analytical statistics as used in biology. Emphasizes sampling, presentation of quantitative data, probability theory applications, distributions, parametric and non-parametric test procedures.
PREREQUISITE: ONE SEMESTER OF STATISTICS AND ONE YEAR OF CALCULUS.

BIL512 PERL programming lab for Biologists
1 credit
Fall Semester
PREREQUISITE: PERMISSION FROM INSTRUCTOR.

BIL520 Evolution
3 credits
Offered By Announcement Only
Evolutionary mechanisms and pathways: sources of hereditary variation, evolutionary forces, origins of adaptations, speciation, macroevolution, origin of life and humankind.
PREREQUISITE: BIL 250.

BIL521 Systematics
3 credits
Offered By Announcement Only
Concepts and methods in phylogenetic systematics. Lectures, discussions, and computer labs, 3 hours.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL522 Plant Evolution
3 credits
Offered By Announcement Only
Role of genetic variation, local adaptation, speciation, hybridization and polyploidy, and life histories in plant evolution.
PREREQUISITE: BIL 250 OR PERMISSION OF INSTRUCTION.

BIL523 Advanced Biology of Marine Invertebrates
4 credits
Offered By Announcement Only
Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.
PREREQUISITE: BIL 235 AND 321.

BIL525 Herpetology
3 credits
Offered By Announcement Only
Systematics, biogeography, and evolutionary biology of amphibians and reptiles, with emphasis on modern families. Lecture, 2 hours; laboratory, 3 hours.
PREREQUISITE: BIL 235.

BIL526 Studies in the Biology of Mycorrhizae
2 credits
Offered By Announcement Only
Readings, discussions and laboratory exercises concerning the biology of mutualistic root-inhabiting fungi and their plant hosts. Topics will vary by semester, may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL527 Biology of Fungi
4 credits
Offered By Announcement Only
Physiology and ecology of the major groups of fungi, especially those of importance as pathogens or mutualists. Combined lecture and laboratory.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.
BIL529 Higher Vascular Plants
4 credits Offered By Announcement Only
Anatomy and morphology of higher vascular plants; emphasis on form as related to function and ecology. Lecture plus laboratory, 6 hours.
PREREQUISITE: BIL 235.

BIL530 Population Genetics
3 credits Offered By Announcement Only
Theories of genes in populations, including an analysis of the genetic basis of microevolution; current examples from natural and experimental populations. Lecture and discussion, 3 hours.
PREREQUISITE: BIL 251 AND A YEAR OF CALCULUS OR THEIR EQUIVALENTS.

BIL531 Advanced Field Ecology
5 credits Offered By Announcement Only
Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory and field, 10 hours alternate Saturdays plus projects.
PREREQUISITE: ONE SEMESTER OF ECOLOGY AND BIL 511 OR ANOTHER STATISTICS COURSE.

BIL535 Molecular Ecology
3 credits Fall Semester
Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA barcodes, and gene expression from a population biological perspective.
PREREQUISITE: BIL 250

BIL536 Molecular Ecology Laboratory
1 credit Offered By Announcement Only
Laboratory techniques, molecular tools, applications, and analysis methods commonly used by researchers in the areas of molecular ecology and population genetics.
PREREQUISITE: BIL 535

BIL537 Ecosystem Ecology
3 credits Offered By Announcement Only
Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.
PREREQUISITE: BIL 235 OR PERMISSION OF INSTRUCTOR

BIL539 Wildlife Resource Philosophy and Policy
3 credits Offered By Announcement Only
Attitudes, philosophy, and policies that govern management of wildlife resources worldwide. Methods to influence public support for implementation of sound wildlife resource management.
PREREQUISITE: BIL 332.

BIL540 Ethology and Behavioral Ecology
3 credits Offered By Announcement Only
Evolutionary and comparative approach to concepts in animal behavior emphasizing function and mechanism. Topics include genetics of behavior, orientation, foraging, communication, and social behavior.
PREREQUISITE: BIL 235 AND EITHER BIL 241 OR 341 OR PERMISSION OF INSTRUCTOR
BIL541 Laboratory and Field Ethology
3 credits
Offered By Announcement Only
Laboratory and field exercises introduce the quantitative techniques currently employed in ethological research. Both principles and practice will be covered and a term project is required.
PREREQUISITE: BIL 236.

BIL550 Cell Metabolism: Structure and Function
3 credits
Offered By Announcement Only
Interactions of cell organelles within the dynamic context of intracellular microarchitecture, enzyme kinetics and bioenergetics.
PREREQUISITE: BIL 255.

BIL551 Current Topics in Genetics
1-2 credits
Offered By Announcement Only
Research literature in cytogenetics, molecular, human and population genetics. Subjects vary from year to year. This course may be repeated for credit.
PREREQUISITE: BIL 250 AND PERMISSION OF INSTRUCTOR.

BIL552 Bioinformatics Tools
3 credits
Fall Semester
Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure-function analysis and various applications.
PREREQUISITE: BIL 250

BIL554 Electron Microscopy
4 credits
Fall Semester
Techniques in transmission electron microscopy including tissue preparation, use of the electron microscope, photography, and interpretation of micrographys. Lecture, 1 hour; laboratory, 6 hours.
PREREQUISITE: BIL 255 OR 361 AND PERMISSION OF INSTRUCTOR.

BIL555 Projects in Electron Microscopy
2 credits
Spring Semester
Individual research projects in transmission electron microscopy, 6 hours.
PREREQUISITE: BIL 554. PERMISSION OF INSTRUCTOR.

BIL556 Ecological and Evolutionary Genomics
3 credits
Fall Semester
PREREQUISITE: BIL 250, BIL 255 OR PERMISSION FROM INSTRUCTOR

BIL562 Ornithology
4 credits
Offered By Announcement Only
Advanced ornithology with stress on quantitative aspects.
PREREQUISITE: BIL 261 OR EQUIVALENT.

BIL564 Advanced Developmental Biology
3 credits
Offered By Announcement Only
Comprehensive survey of the principles of development and methods of experimental analysis. Lecture, discussion and demonstration, 3 hours.
PREREQUISITE: BIL 364.
BIL566 Plant Environmental Physiology
3 credits
Offered By Announcement Only
Environmental influence on the physical and chemical bases of life processes in plants, including ecosystem consequences.
PREREQUISITE: BIL 255, 265 OR PERMISSION OF INSTRUCTOR.

BIL567 Animal Physiological Ecology
3 credits
Offered By Announcement Only
Physiological interactions of animals with their biotic and abiotic environments: Information integrated from tissue, organ, and whole organism levels.
PREREQUISITE: BIL 265 OR PERMISSION OF INSTRUCTOR.

BIL568 Evolution and development of Nervous Systems
3 credits
Fall Semester
Mechanisms/pathways/modules underlying formation of the nervous system during development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.
PREREQUISITE: BIL 268 OR BIL 355 OR PERMISSION OF INSTRUCTOR

BIL569 Biology of Aging
3 credits
Offered By Announcement Only
The hypotheses and data relating to the biological basis of aging in invertebrates and vertebrates, including humans.
PREREQUISITE: SENIOR OR GRADUATE STATUS IN A BIOLOGICAL SCIENCE.

BIL571 Advanced Special Studies in Biology
1-6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL572 Advanced Special Studies in Biology
1-6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL573 Advanced Special Studies in Biology
1-6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL574 Advanced Special Studies in Biology
1-6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL575 Advanced Special Studies in Biology
1-6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL581 Survey of the History and Literature of Biology
2 credits
Offered By Announcement Only
Emphasis on historical development and central concepts of biology.
PREREQUISITE: SENIOR STANDING AND PERMISSION OF INSTRUCTOR.
BIL 582 Borderless Science  
3 credits  
Fall Semester  
Students from various scientific disciplines will be introduced to new technologies and resources from wide-ranging fields of science and learn to apply them in their own fields. Students will engage in mutual exchange of discipline-specific practices and novel ideas for research in biology, neuroscience, psychology, chemistry, physics, mathematics, engineering, etc.  
PREREQUISITE: PERMISSION FROM INSTRUCTOR

BIL 585 Advanced special topics in biology  
3 credits  
Fall Semester  
Topics relevant to the biological sciences, co-listed with other departments or programs.  
PREREQUISITE: SENIOR OR GRADUATE STUDENT STATUS

BIL 586 Advanced Special Topics in Biology  
4 credits  
Fall Semester  
Topics relevant to the biological sciences, co-listed with other departments or programs.  
PREREQUISITE: SENIOR OR GRADUATE STUDENT STATUS

BIL 590 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL 591 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL 592 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL 593 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL 594 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

BIL 595 Studies in Biology  
1-5 credits  
Not Offered; Transfer Credit Only  
Special topics taken at other institutions with no direct equivalents.

CHEMISTRY

CHM 101 Fundamentals of Chemistry I  
3 credits  
Fall Semester  
Fundamental concepts of chemistry and their relation to living systems, utilitarian chemical processes, and the environment. Lecture, 3 hours. Not for major or minor credit.

CHM 102 Fundamentals of Chemistry II  
3 credits  
Offered By Announcement Only  
A continuation of Chemistry 101.  
PREREQUISITE: CHM 101 OR HIGH SCHOOL CHEMISTRY.
CHM103 Chemistry for Life Sciences I (Lecture)  
3 credits  
Fall Semester  
Essentials of inorganic chemistry as it applies to biological systems. Designed for (but not limited to) those planning health-related careers. Lecture, 3 hours.

CHM104 Chemistry for Life Sciences II (Lecture)  
3 credits  
Spring Semester  
A continuation of CHM 103, with emphasis on organic and biological chemistry, including biochemical processes and metabolism. Lecture, 3 hours.  
PREREQUISITE: CHM 103.

CHM105 Chemistry for Life Sciences I (Laboratory)  
1 credit  
Fall Semester  
Designed for those students in CHM 103 requiring a laboratory course. Laboratory, 3 hours.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 103.

CHM106 Chemistry for Life Sciences II (Laboratory)  
1 credit  
Spring Semester  
Designed for those students in CHM 104 requiring a laboratory course. Laboratory, 3 hours.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 104.

CHM111 Principles of Chemistry I  
3 credits  
Fall & Spring Semester & First Summer Session  
Fundamental principles of chemical science. The beginning course for science majors and premedical students. Lecture, 3 hours.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 105 OR 107.

CHM112 Principles of Chemistry II  
3 credits  
Fall & Spring Semester & Second Summer Session  
Continuation of CHM 111. Lecture, 3 hours.  
PREREQUISITE: CHM 111 OR 151.

CHM113 Chemistry Laboratory I  
1 credit  
Fall & Spring Semester & First Summer Session  
Laboratory techniques of chemistry. To accompany CHM 111. Laboratory, 3 hours.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 111.

CHM114 Chemistry Laboratory II  
1 credit  
Fall & Spring Semester & Second Summer Session  
Continuation of CHM 113. Intermediate laboratory techniques and quantitative analysis. To accompany CHM 112. Laboratory, 3 hours.  
PREREQUISITE: CHM 113; PREREQUISITE OR COREQUISITE: CHM 112.

CHM151 Chemistry for Engineers I  
3 credits  
Fall & Spring Semester  
Fundamental principles of chemistry for engineering students. Not recommended for students that plan to enter Medical School. Lecture, 3 hours.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 105 OR 107.
CHM153 Chemistry Laboratory for Engineers
1 credit
Fall & Spring Semester
An introductory laboratory course to accompany CHM 151. The techniques of chemistry for engineering students.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 151.

CHM201 Organic Chemistry I (Lecture)
3 credits
Fall & Spring Semester & First Summer Session
The chemistry of carbon compounds. Required of chemistry majors, and premedical students; recommended for majors in life sciences. Lecture, 3 hours.
PREREQUISITE: CHM 112.

CHM202 Organic Chemistry II (Lecture)
3 credits
Fall & Spring Semester & Second Summer Session
Continuation of CHM 201. Lecture, 3 hours.
PREREQUISITE: CHM 201.

CHM205 Organic Chemistry Laboratory I
1 credit
Fall & Spring Semester & First Summer Session
Introduction to techniques of organic chemistry. Laboratory, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 201.

CHM206 Organic Chemistry Laboratory II
1 credit
Fall & Spring Semester & Second Summer Session
Continuation of CHM 205. Laboratory, 3 hours.

CHM304 Spectroscopic Methods in Chemistry and Biochemistry
3 credits
Fall Semester
Modern spectroscopic methods of analysis. Lecture 3 hours;
PREREQUISITE: CHM 202 AND 206.

CHM316 Instrumental Analytical Chemistry
3 credits
Spring Semester
Modern methods of quantitative analysis. Lecture, 3 hours.
PREREQUISITE: CHM 304 AND 360.

CHM320 Instrumental Methods in Chemistry and Biochemistry
2 credits
Spring Semester
Instrumental methods in modern chemistry and biochemistry, including spectrometric, electrochemical and chromatographic (separation) techniques. Laboratory, 8 hours.
PREREQUISITE: CHM 304. COREQUISITE: CHM 316.

CHM331 Physical Chemistry for Premedical Students
3 credits
Spring Semester
Fundamentals of thermodynamics as applied to gases, liquids and solutions; chemical kinetics and other selected topics. Lecture, 3 hours.
PREREQUISITE: CHM 112, MTH 110 OR 111 OR 131, PHY 102 OR PERMISSION OF INSTRUCTOR.

CHM360 Physical Chemistry I (Lecture)
3 credits
Fall Semester
Introduction to physical chemistry including thermodynamics, gaseous and liquid states, solutions, homogeneous and heterogeneous equilibriums. Lecture, 3 hours.
PREREQUISITE: CHM 112, MTH 112 OR 132. PREREQUISITE OR COREQUISITE: ONE SEMESTER OF PHYSICS.
CHM364 Physical Chemistry (Laboratory I)  
1 credit Fall & Spring Semester  
Representative experiments in physical chemistry. Laboratory, 4 hours. PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 331 OR 360.

CHM365 Physical Chemistry II (Lecture)  
3 credits Spring Semester  
Chemical kinetics, introductory quantum chemistry, molecular spectroscopy. PREREQUISITE: CHM 360, MTH 112. PREREQUISITE OR COREQUISITE: TWO SEMESTERS OF PHYSICS.

CHM381 Workshop Leaders in Chemistry I  
1 credit Fall Semester  
Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated. PREREQUISITE: A GRADE OF "A" OR "B" IN CHM 111 AND 112 OR AP OUTPLACING.

CHM382 Workshop Leaders in Chemistry II  
1 credit Fall Semester  
Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated. PREREQUISITE: A GRADE OF "A" OR "B" IN CHM 111 AND 112 OR AP OUTPLACING.

CHM401 Environmental Chemistry  
3 credits Spring Semester  
Major environmental features of the earth; Role of natural and synthetic chemicals in the environment; Atmospheric and aquatic pollution; Application of acid-base theory and oxidation reduction to environmental problems. PREREQUISITE: CHM 111 AND 112; AND JUNIOR STANDING; NOT OPEN TO STUDENTS WITH CREDITS IN ESC 401.

CHM416 Environmental Analysis  
3 credits Offered By Announcement Only  
A laboratory course using the Environmental Protection Agency's methods of sampling, sample preparation, and analysis for priority pollutants; methods of ultra-micro chemical analysis; Quality Assurance and Quality Control. PREREQUISITE: CHM 206.

CHM442 Inorganic Chemistry (Laboratory)  
1 credit Spring Semester  
Synthesis of inorganic compounds and determination of their physical and chemical properties. CHM 541 is a corequisite for ACS chemistry majors. Laboratory, 3 hours. PREREQUISITE: CHM 365 AND 541.

CHM464 Physical Chemistry (Laboratory II)  
1 credit Spring Semester  
Continuation of CHM 364. Laboratory, 4 hours. PREREQUISITE: CHM 360 AND 364. PREREQUISITE OR COREQUISITE: CHM 365.

CHM488 Undergraduate Research  
1-3 credits Fall & Spring Semester & First & Second Summer Session  
Laboratory research under the direction of a member of the chemistry faculty. Thesis optional. Course may be repeated for credit. PREREQUISITE: B AVERAGE IN CHEMISTRY COURSES AND DEPARTMENTAL CONSENT.
CHM490 Honors Research
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Laboratory research under the direction of a member of the Chemistry faculty. Thesis required. Course may be repeated for credit.
PREREQUISITE: ADMISSION TO HONORS PROGRAM. CHEMISTRY DEPARTMENT CONSENT. CHM 206.

CHM520 Physical Organic Chemistry
3 credits  Fall Semester
Aspects of chemical bonding, acids and bases, steeochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bimolecular reactions.
PREREQUISITE: CHM 202 AND 360.

CHM522 Synthetic Organic Chemistry
3 credits  Fall Semester
Functional group transformations, Synthon approach. Retrosynthetic analyses, multistep syntheses.

CHM524 Supramolecular Chemistry
3 credits  Fall Semester
Complexation, recognition, and catalysis as applied to bioorganic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.
PREREQUISITE: CHM 365 AND 520.

CHM525 Structural Organic Chemistry
3 credits  Spring Semester

CHM541 Principles of Bonding and Reactivity in Inorganic Chemistry
3 credits  Fall Semester
Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic compounds.
PREREQUISITE: CHM 365.

CHM553 Modern Quantum Chemistry
3 credits  Offered By Announcement Only
Many-electron wave functions and operators. Hartee-Fock approximation, density functional theory, configuration interaction, and many-body perturbation theory.
PREREQUISITE: CHM 365

CHM556 Self-Assembly and Surface Chemistry
3 credits  Fall Semester
Methods of preparation of self-assembly monolayers and surface chemistry properties.
PREREQUISITE: CHM 365.

CHM563 Electronic Structure Methods
3 credits  Fall Semester
Basis sets, post-SCF methods, and potential energy surfaces. Thermodynamic, structural, and vibrational predictions, excited states, solvation and hybrid Hamiltonians.
PREREQUISITE: CHM 365
CHM564 Molecular Simulations
1 credit
Offered By Announcement Only
Classical dynamics, force-fields, sampling, periodic and stochastic boundaries, Monte-Carlo and molecular dynamics simulations, and free energy perturbation.
PREREQUISITE: PERMISSION OF DEPARTMENT.

CHM565 Principles of Spectroscopic Techniques
3 credits
Fall Semester
Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.
PREREQUISITE: CHM 365.

CHM570 Advanced Physical Chemistry Topics
3 credits
Fall Semester
PREREQUISITE: CHM 365.

CHM579 Special Topics: Chemistry Internship
1-3 credits
Offered By Announcement Only

CHM580 Special Topics: Chemistry Internship
1-3 credits
Fall Semester

CHM591 Topics in Chemistry
1-3 credits
Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
PREREQUISITE: 20 CREDITS IN CHEMISTRY.

CHM592 Topics in Chemistry
1-3 credits
Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
PREREQUISITE: 20 CREDITS IN CHEMISTRY.

CHM593 Readings in Chemistry
1-3 credits
Offered By Announcement Only
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
PREREQUISITE: 20 CREDITS IN CHEMISTRY AND PERMISSION OF THE DEPARTMENT CHAIRMAN.

CHM594 Readings in Chemistry
1-3 credits
Offered By Announcement Only
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
PREREQUISITE: 20 CREDITS IN CHEMISTRY AND PERMISSION OF THE DEPARTMENT CHAIRMAN.

CHINESE

CHI101 Elementary Chinese (Mandarin)
3 credits
Fall Semester
Conversation, grammar, reading, elementary composition.
CHI102 Elementary Chinese (Mandarin)
3 credits  
Continuation of CHI 101, conversation, grammar, reading, elementary composition.
PREREQUISITE: CHI 101.

CHI201 Intermediate Chinese I
3 credits  
Expanding further on language skills (grammar, composition and reading) while introducing students to aspects of Chinese customs, history and culture. Closed to native speakers.
PREREQUISITE: CHI 102. CLOSED TO NATIVE SPEAKERS

CHI202 Intermediate Chinese II
3 credits  
To consolidate the foundation which students have built on CHI 101, 102, and 201, with emphasis on four language skills and cultural studies. Closed to native speakers.
PREREQUISITE: CHI 201, AND CLOSED TO NATIVE SPEAKERS.

CLASSICS

CLA220 Greek and Roman Mythology
3 credits  
The major political, cultural, and social themes that appear in Greek and Roman mythology, examining literary and material evidence.
PREREQUISITE: ENG 105 AND 106 OR BY PERMISSION OF THE INSTRUCTOR

CLA221 Sports & Society in the Ancient World
3 credits  
Sports in the civilizations of ancient Greece and Rome, making comparisons with modern American sports culture. Topics may include the origins of sports competitions in religious rituals; athletes and athletics in myth and legend; architectural remains such as the Colosseum and the stadium at Olympia; and modern recreations of ancient sports events in films such as Gladiator and Ben Hur.

CLA222 Sexuality and Gender in the Ancient World
3 credits  
Basic questions of sexuality and gender in ancient Greece and Rome: What does it mean to be male or female? What can we discover about ourselves from the way(s) we have sex? How are all these things related to life, love, power?

CLA223 The Ancient World on Screen
3 credits  
How do we represent the ancient Greeks and Romans in modern media? What happens to the books the ancients wrote when these are turned into modern films, TV shows or video games?

CLA224 The Heroic Journey
3 credits  
The figure of the Hero On a Journey has long captivated the minds of story-tellers and audiences. This motif, known as "The Monomyth," speaks the profoundest hopes and fears of humankind. This course will examine the Monomyth as it occurs particularly in the classical tradition from Gilgamesh to Tolkein.
CLA300 Vampire in folklore, fiction and film.
3 credits Fall Semester
Bram Stoker's Dracula remains one of the best-selling novels of all time. Films and television series, from Nosferatu to Trueblood, recapitulate the wild success of such novels. But why exactly is it that the notion of The Vampire so captures our imagination? What do these remarkable intersections of actual history, folklore, high literary art, and popular culture tell us about the human condition today? This course is designed to gain insight into such issues. Special attention will be paid to the historical roots of the Dracula motif.

CLA301 Ancient Greece
3 credits Fall Semester
Greek civilization from the Late Bronze Age to the end of Greek independence at the battle of Chaeronea in 338 B.C.E.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

CLA302 The Hellenistic Age
3 credits Fall Semester
Conquests of Alexander the Great and the spread of Greek culture in the Near East under Alexander's successors until the death of Cleopatra in 31 B.C.E.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

CLA303 The Roman Republic
3 credits Fall Semester
Roman civilization from the establishment of the Republic until the Battle of Actium in 31 B.C.E.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

CLA304 The Roman Empire
3 credits Fall Semester
Roman civilization from the reign of Augustus in 37 B.C.E. to the Fall of Rome in 476 C.E.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

CLA310 Survey of Ancient Greek Literature and Culture
3 credits Fall & Spring Semester & First & Second Summer Session
Classical Greek culture, paying special attention to Greek literature from Homer to Aristotle. It is intended to lay a foundation for understanding how Hellenic thought and art influenced the development of all subsequent Western culture. All texts will be read in English translation.
PREREQUISITE: THREE CREDITS IN LITERATURE.

CLA311 Survey of Classical Latin Literature and Culture
3 credits Fall & Spring Semester & First & Second Summer Session
A broad introduction (in English translation) to the literature of the Roman Republic and Empire. The Greek heritage behind Latin literature will be highlighted. Readings will be chosen from authors such as Catullus, Cicero, Vergil, Horace, Ovid, Petronius, Juvenal, Tacitus, and Suetonius, and from genres such as epic and lyric poetry, oratory, history and satire.
CLA315 The Classical Epic Tradition
3 credits  Offered By Announcement Only
The course treats the rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.
PREREQUISITE: ENG 106 OR PERMISSION OF INSTRUCTOR

CLA340 Greek Tragedy
3 credits  Fall Semester
Readings in English of the tragedies of Aeschylus, Sophocles, and Euripides.
PREREQUISITE: ENG 106 OR PERMISSION OF INSTRUCTOR.

CLA370 Self and Other in the Ancient World
3 credits  Fall Semester
The course examines Greek and Roman depictions of outsiders in a wide range of ancient texts and material sources.
PREREQUISITE: ENG 105 AND/OR 106 OR PERMISSION OF INSTRUCTOR.

CLA401 Special Topics in Classics
3 credits  Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle).
Required readings will be in English. Analogous to REL 404-409 courses.

CLA402 Special Topics in Classics
3 credits  Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle).
Required readings will be in English. Analogous to REL 404-409 courses.

CLA403 Special Topics in Classics
3 credits  Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle).
Required readings will be in English. Analogous to REL 404-409 courses.

CLA404 Special Projects in Classics
3 credits  Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle).
Analogous to REL 407-409.

CLA405 Special Projects in Classics
3 credits  Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle).
Analogous to REL 407-409.

CLA406 Special Projects in Classics
3 credits  Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle).
Analogous to REL 407-409.

CLA491 Directed Readings
1-3 credits  Fall Semester
Content to be determined by faculty member and registering student(s).
PREREQUISITE: SIX CREDITS IN CLASSICS OR PERMISSION OF INSTRUCTOR.
COLLEGE OF ARTS AND SCIENCES

CLASSICS

CLA492 Directed Reading in Classics
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle).
Analogous to REL 401-403 courses and to (existing) CLA 491.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CLA493 Directed Reading in Classics
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle).
Analogous to REL 401-403 courses and to (existing) CLA 491.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CLA495 Senior Thesis I
3 credits
Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: SENIOR STANDING

CLA496 Senior Thesis II
3 credits
Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: SENIOR STANDING

CLA505 Seminar in Ancient Studies
3 credits
Fall Semester
Topics in Greek and Roman studies.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

COMPUTER SCIENCE

CSC115 Social and Ethical Issues in Computing
3 credits
Spring Semester
History, social context and methods and tools of analysis. Professional and ethical responsibilities. Intellectual property. Privacy and civil liberties.
PREREQUISITE: NO PREREQUISITES FOUND FOR THIS COURSE

CSC119 Computers and Society
3 credits
Spring Semester

CSC120 Computer Programming I
4 credits
Fall & Spring Semester
PREREQUISITE: COREQUISITE: MTH 108, OR MAS 110, OR ADEQUATE SCORE ON THE MATHEMATICS PLACEMENT TEST.

CSC210 Computing for Scientists
3 credits
Fall Semester
PREREQUISITE: 3 CREDITS IN SCIENCE
CSC220 Computer Programming II
4 credits                                                    Fall & Spring Semester
PREREQUISITE: CSC 120.

CSC314 Computer Organization and Architecture
3 credits                                                             Fall Semester
PREREQUISITE: PREREQUISITE: CSC 120 OR CIS 324

CSC322 System Programming
3 credits                                                           Spring Semester
PREREQUISITE: CSC 220 OR CIS 324

CSC329 Introduction to Game Programming
3 credits                                                             Fall Semester
Fundamental programming issues in game design: Software design; Version control; Basic graphics; GUI programming. Large-scale game project: Team development of a functional game; Graphics and GUI component; Networking component; Core game engine.
PREREQUISITE: CSC 220.

CSC401 Computer Science Practicum I
1 credit                                               Offered By Announcement Only
Implementation of techniques, algorithms, and data structures being taught in a corequisite computer science course.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC402 Computer Science Practicum II
1 credit                                               Offered By Announcement Only
Implementation of techniques, algorithms, and data structures being taught in a corequisite computer science course.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC403 Computer Science Practicum III
1- 3 credits                                               Offered By Announcement Only
Implementation of techniques, algorithms, and data structures being taught in a corequisite computer science course.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC410 Computer Science Project Planning
1- 3 credits                                               Offered By Announcement Only
Planning for the implementation of a Computer Science project, including: Problem analysis, System architecture design, Algorithm and data structure selection, User interface design, Verification and validation plan, and Prototyping.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
CSC411 Computer Science Project Implementation  
1-3 credits  Offered By Announcement Only  
Implementation of a Computer Science project, including: Hardware preparation, Component implementation, System integration, Verification and validation, and Documentation. 
PREREQUISITE: CSC 410 OR PERMISSION OF INSTRUCTOR.

CSC412 Computer Science Internship  
1-3 credits  Offered By Announcement Only  
A commercial computing environment. Normally 50 internship hours are required per credit earned (the host company must supply documentary evidence of hours worked). 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC498 Senior Topics in Computer Science  
3 credits  Offered By Announcement Only  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC506 Logic  
3 credits  Offered By Announcement Only  
PREREQUISITE: MTH 230 OR 309 OR PERMISSION OF THE INSTRUCTOR.

CSC507 Data Security and Cryptography  
3 credits  Offered By Announcement Only  
PREREQUISITE: (CSC 517 OR 527)

CSC517 Data Structures and Algorithm Analysis  
3 credits  Fall & Spring Semester  
PREREQUISITE: MTH 309, AND CSC 220.

CSC518 Interpreters and Compiler Theory  
3 credits  Offered By Announcement Only  
PREREQUISITE: CSC 519.

CSC519 Program Languages  
3 credits  Fall Semester  
PREREQUISITE: CSC 517.
CSC521 Principles of Computer Operating Systems
3 credits  Fall Semester
PREREQUISITE: (CSC 314 OR 350), (CSC 322 OR PERMISSION OF INSTRUCTOR).

CSC523 Database Systems
3 credits  Fall Semester
PREREQUISITE: CSC 517.

CSC524 Computer Networks
3 credits  Spring Semester
PREREQUISITE: (CSC 314 OR 350), (CSC 322 OR PERMISSION OF INSTRUCTOR).

CSC527 Theory of Computing
3 credits  Spring Semester
Sets, relations, and languages. Automata theory. Basic computability theory. Turing machines. The complexity classes P and NP.
PREREQUISITE: CSC 220, MTH 309

CSC529 Introduction to Computer Graphics
3 credits  Offered By Announcement Only
PREREQUISITE: CSC 220, MTH 210

CSC531 Introduction to Software Engineering
3 credits  Spring Semester
PREREQUISITE: CSC 322 OR 517.

CSC540 Algorithm Design and Analysis
3 credits  Offered By Announcement Only
Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.
PREREQUISITE: CSC 517.

CSC545 Introduction to Artificial Intelligence
3 credits  Offered By Announcement Only
PREREQUISITE: CSC 220 AND MTH 309.
CSC547 Computational Geometry
3 credits Offered By Announcement Only
Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.
PREREQUISITE: CSC 517

CSC548 Bioinformatics Algorithms
3 credits Fall Semester
PREREQUISITE: (CSC120 OR CSC210) AND (BIL150 OR BIL104 OR BIL352 OR BIL552)

CSC555 Multimedia Systems
3 credits Offered By Announcement Only
PREREQUISITE: CSC 517.

CSC595 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC596 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC597 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC598 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC599 Topics in Computer Science
1- 3 credits Offered By Announcement Only

ECOSYSTEM SCIENCE & POLICY

ECS111 Introduction to the Earth’s Ecosystem
3 credits Fall & Spring Semester
Earth's ecosystem and the interactions of humans with it. Concepts in ecology, environmental science and policy. Two field trips. Team-taught.

ECS112 Problems in Ecosystem Science and Policy
2 credits Spring Semester
Problem solving in ecology and environmental management. Class projects and case studies providing experience in identifying problems, quantifying scientific issues, and considering management options and outcomes. Extensive field experience. Team-taught.
PREREQUISITE: ECS 111.

ECS113 Introduction to Environmental Policy
3 credits Fall Semester
Theories and case studies from various fields, including anthropology, economics, ethics, geography, political science and psychology, will be used to explore the multiple perspectives that influence group and individual perceptions of environmental issues.
PREREQUISITE: ECS 111
### ECS195 Studies in Ecosystem Science and Policy

1-5 credits  
Not Offered; Transfer Credit Only  
Courses taken at other institutions but having no direct equivalents here.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

### ECS200 Environmental Statistics

3 credits  
Fall Semester  
Descriptive and inferential statistics applied to ecological and environmental data. Probability distributions, data description and presentation, hypothesis testing, decision making and experimental design. (Not open to students with credit in MTH 224, PSY 204 or equivalent).  
PREREQUISITE: MTH 103 OR HIGHER, AND 6 CREDITS IN MSC OR ECS.

### ECS201 Seminar Series in Contemporary Environmental Issues I

1 credit  
Fall Semester  
Current environmental topics involving interaction of science and policy.

### ECS202 Seminar Series in Contemporary Environmental Issues II

1 credit  
Spring Semester  
Current environmental topics involving interaction of science and policy.

### ECS272 Special Topics in Ecosystem Science and Policy

1-3 credits  
Offered By Announcement Only  
Content varies by semester and is indicated in parentheses following course number and title in class schedule.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

### ECS295 Studies in Ecosystem Science and Policy

1-5 credits  
Not Offered; Transfer Credit Only  
For courses taken at other institutions that have no equivalents here.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
ECS296 Studies in Ecosystem Science and Policy
1- 5 credits                                      Not Offered; Transfer Credit Only
For courses taken at other institutions that have no equivalents here.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS297 Studies in Ecosystem Science and Policy
1- 5 credits                                      Not Offered; Transfer Credit Only
For courses taken at other institutions that have no equivalents here.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS298 Studies in Ecosystem Science and Policy
1- 5 credits                                      Not Offered; Transfer Credit Only
For courses taken at other institutions that have no equivalents here.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS299 Studies in Ecosystem Science and Policy
1- 5 credits                                      Not Offered; Transfer Credit Only
For courses taken at other institutions that have no equivalents here.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS301 Tools for Environmental Decision-Making: The Quantitative Perspective
3 credits                                                             Fall Semester
Quantitative decision-making techniques and methodologies.
PREREQUISITE: ECS 111, 112.

ECS302 Perspectives on Environmental Decisions
3 credits                                              Offered By Announcement Only
Analytical techniques to assess human impacts on the environment. Team-taught by
faculty from law, ethics, anthropology and economics with experience in local,
regional and global environmental management issues.
PREREQUISITE: ECS 111, 112 & 113

ECS310 Sustainable Living
3 credits                                                           Spring Semester
Sustainable Living explores ways of living that can be sustained for thousands
of years, without further damage to earth, ocean and atmosphere. Topics covered
include renewable energy, agricultural practices, water issues, green building,
low carbon transportation and healthy living/eating. Students advocate for sustainable
practices of their choice in writing and in oral/visual presentations. Frequent
field trips.
PREREQUISITE: ECS 111 OR PERMISSION OF INSTRUCTOR

ECS371 Readings in Ecosystem Science and Policy
1- 2 credits                                     Offered By Announcement Only
Supervised readings on special topics. Offered by special arrangement with a faculty
member. May be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS372 Special Topics in Ecosystem Science and Policy
1- 3 credits                                     Offered By Announcement Only
Content varies by semester and is indicated in parentheses following course number
and title in class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
ECS380 Field Studies.  
1-4 credits  Offered By Announcement Only
This course will provide participants with an understanding of the natural history of tropical islands as well as their many environmental issues and conservation concerns.
PREREQUISITE: ADVANCED UNDERGRADUATE STANDING AND PERMISSION OF DEPARTMENT.

ECS401 Internship  
3 credits  Fall & Spring Semester & First & Second Summer Session
Students selecting the internship will be required to spend a minimum of 120 contact hours working in an outside firm or agency whose mission is to address environmental issues where science and policy intersect.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

ECS402 Thesis  
3 credits  Fall & Spring Semester & First & Second Summer Session
Individual, original research of independent study supervised by a UM faculty member and concluded by formal thesis preparation, public oral defense and submission of the thesis.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

ECS403 Interdisciplinary Approaches to Complex Human-Environmental Problems (Capstone  
3 credits  Spring Semester
Students with diverse disciplinary backgrounds will design an interdisciplinary study focused on an environmental problem with a major science component and significant societal implications. Students will apply quantitative methods, formulate usable policy, and communicate their results.
PREREQUISITE: ECS 111, 112, 301, 302.

ENGLISH

ENG103 Basic Academic Writing  
3 credits  Fall & Spring Semester
Intensive approach to the basics of academic writing with emphasis on building written fluency, using conventions of standard written English, and editing for precision and correctness. Intended for students who need extra preparation before entering ENG 105. Not for credit toward graduation.

ENG105 English Composition I  
3 credits  Fall & Spring Semester
Introduction to written academic argument and inquiry. Not for major or minor. Cannot be taken on credit-only option.

ENG106 English Composition II  
3 credits  Fall & Spring Semester
Advanced approaches to written academic argument, with emphasis on textual analysis and incorporation of secondary sources. Not for major or minor. Cannot be taken on credit-only option.
PREREQUISITE: ENG 105.

ENG107 English Composition II: Science and Technology  
3 credits  Fall & Spring Semester
Advanced approaches to written academic argument, with emphasis on textual analysis and incorporating source material using readings and approaches connected to science and technology. Alternative to ENG 106. Not for major or minor. Cannot be taken on credit-only option.
ENG20T Advanced Composition
0 credit
Fall Semester
PREREQUISITE: MDCC TRANSFER COURSE.

ENG201 World Literary Masterpieces I
3 credits
Fall & Spring Semester & First & Second Summer Session
Comparative study of literary masterpieces from ancient times through the Renaissance.
Satisfies writing requirement.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG202 World Literary Masterpieces II
3 credits
Fall & Spring Semester & First & Second Summer Session
Comparative study of literary masterpieces from the Renaissance to the present.
Satisfies writing requirement.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG205 Jewish Literature
3 credits
Fall Semester & First & Second Summer Session
Selections from the Bible, the Talmud, the Kabbalah, medieval poetry and prose,
Yiddish and Sephardic literature, and contemporary American and Israeli writers.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG208 Advanced Academic Writing for Transfer Students
3 credits
Fall & Spring Semester
Review of research techniques and revision strategies. Completes the university
composition requirement for those students who transfer into UM with credit for
one composition course from another institution. Open only to transfer students
who have received transfer credit for either English 105 or English 106. Not open
to students who have taken either English 105 and/or 106 at UM.
PREREQUISITE: OPEN ONLY TO TRANSFER STUDENTS WHO HAVE RECEIVED TRANSFER CREDIT
FOR EITHER ENGLISH 105 OR ENGLISH 106. NOT OPEN TO STUDENTS WHO HAVE TAKEN EITHER
ENGLISH 105 AND/OR 106 AT UM.

ENG209 Creative Writing
3 credits
Fall & Spring Semester & First & Second Summer Session
Analysis and writing of Short stories and poems. Cannot be taken for credit only.
PREREQUISITE: ENG 105 OR EQUIVALENT. CANNOT BE TAKEN FOR CREDIT ONLY.

ENG210 Literary Themes and Topics
3 credits
Fall Semester & First & Second Summer Session
Literary analysis and practice in critical writing through the study of selected
works; themes and topics vary by semester.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG211 English Literature I
3 credits
Fall & Spring Semester & First & Second Summer Session
Selected readings from the middle ages to the late 18th century. Satisfies writing
requirement.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG212 English Literature II
3 credits
Fall & Spring Semester & First & Second Summer Session
Selected readings from the late 18th century to the present. Satisfies writing
requirement.
PREREQUISITE: ENG 106 OR EQUIVALENT.
ENG213 American Literature I
3 credits                    Fall & Spring Semester & First & Second Summer Session
Selected American authors prior to the Civil War. Satisfies writing requirement.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG214 American Literature II
3 credits                    Fall & Spring Semester & First & Second Summer Session
Selected American authors from the Civil War to the present. Satisfies writing requirement.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG215 English and American Literature by Women

FRE102 Elementary French II
3 credits Fall & Spring Semester & First Summer Session
Continuation of FRE 101. The development of communicative abilities in speaking, reading, writing and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.
PREREQUISITE: FRE 101 OR THE EQUIVALENT OF FRE 101 AT ANOTHER INSTITUTION. CLOSED TO HERITAGE AND NATIVE SPEAKERS
FRE105 Accelerated Elementary French
3 credits Fall & Spring Semester
For students with previous study of French desiring to review material covered in FRE 101 and 102 in preparation for continued study of French at the intermediate level. The focus of FRE 105 is the continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: family, leisure activities, home, and community, childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.
PREREQUISITE: THREE OR MORE YEARS OF HIGH SCHOOL FRENCH OR THE EQUIVALENT. CLOSED TO HERITAGE AND NATIVE SPEAKERS.

FRE211 Intermediate French I
3 credits Fall & Spring Semester & First Summer Session
For students with previous study of elementary-level French. The continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: travel, technological innovations, the evolution of family values, and social and environmental issues. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.
PREREQUISITE: FRE 102 OR FRE 105, THE EQUIVALENT FROM ANOTHER INSTITUTION OR 3-4 YEARS HIGH SCHOOL FRENCH. AP 3 (LANGUAGE TEST) OR IB 4. CLOSED TO HERITAGE OR NATIVE SPEAKERS OF FRENCH.

FRE212 Intermediate French II
3 credits Fall & Spring Semester
For students with some previous study of French at the intermediate level, who are familiar with all tenses and with vocabulary related to the topics covered in FRE 101-211. FRE 212 is the first semester of a two-semester sequence ending with FRE 214. The continued development of skills in reading, writing, speaking, and listening in French, with an additional emphasis on cultural competence in the French-speaking world. Themes on: relationships, cultural values, different historical perspectives, and current politics. These themes will be explored through articles, films and literary texts. The course will develop writing and reading strategies, providing them with the tools to think, read, and write critically and analytically in papers of 1-3 pages. Progress will also be assessed through quizzes and exams. Course conducted entirely in French.
PREREQUISITE: FRE 211 OR 5-6 YEARS OF HIGH SCHOOL FRENCH. CLOSED TO NATIVE SPEAKERS OF FRENCH.

FRE214 Advanced French
3 credits Fall & Spring Semester
Continuation of FRE 212. This course will prepare students for advanced literature, linguistics, and culture courses. The class will use films, literary works, and other cultural texts. Students will write analytic essays of 3-5 pages to develop style, vocabulary, and syntax. Course conducted entirely in French.
PREREQUISITE: FRE 212 CLOSED TO NATIVE SPEAKERS OF FRENCH.
FRE301 Introduction to Literary Genres
3 credits  Fall & Spring Semester
Selected materials from various genres and periods of French Literature. Further
development of critical writing skills for non-native speakers. Closed to native
speakers formally educated in French. May be used to fulfill the humanities literature
requirement. Writing credit.
PREREQUISITE: FRE 214 OR EQUIVALENT.

FRE302 French Civilization
3 credits  Offered By Announcement Only
Historical survey of French intellectual, artistic, and popular culture. Writing
credit.
PREREQUISITE: FRE 214 OR EQUIVALENT.

FRE321 Introduction to Literary Themes
3 credits  Offered By Announcement Only
The study of literature through thematic readings. May be repeated for credit if
topic is different. Topics vary. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE322 Cultural Topics
3 credits  Offered By Announcement Only
Cultural issues in France and/or French-speaking regions. Topics such as film,
Caribbean history, journalism, Francophone Africa, immigration. May be repeated
for credit if topic is different. Writing credit.
PREREQUISITE: FRE 301 OR PERMISSION OF THE INSTRUCTOR; FRE 302 RECOMMENDED.

FRE363 Introduction to Medieval and Renaissance French Literature
3 credits  Offered By Announcement Only
French literature from the 12th century to the end of the 16th century. May be
used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE364 Introduction to 17th and 18th Century French Literature
3 credits  Offered By Announcement Only
French literature from the 17th and 18th centuries. May be used to fulfill the
humanities Literature requirement. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE365 Introduction to 19th and 20th Century French Literature
3 credits  Offered By Announcement Only
French literature from the 19th and 20th centuries. May be used to fulfill the
humanities literature requirement. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE395 Transfer Credits
1-3 credits  Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

FRE396 Transfer Credits
1-3 credits  Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.
FRE397 Transfer Credits
1- 3 credits Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

FRE398 Transfer Credits
1- 3 credits Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

FRE399 Transfer Credits
1- 3 credits Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

FRE432 Business French
3 credits Fall Semester
Commercial Vocabulary, economic and technical terminology in French. Composition based on models of business correspondence directed to French speaking countries or firms.
PREREQUISITE: FRE 214 OR PERMISSION OF THE INSTRUCTOR.

FRE440 Phonetics
3 credits Offered By Announcement Only
French pronunciation based on phonetics. Exercises in diction and phonetic transcription.
PREREQUISITE: FRE 301 OR PERMISSION OF INSTRUCTOR.

FRE442 Advanced Stylistics and Composition
3 credits Offered By Announcement Only
PREREQUISITE: FRE 301 OR PERMISSION OF INSTRUCTOR.

FRE495 Transfer Credits
1- 3 credits Not Offered; Transfer Credit Only
Awarded for 400-level course work at another institution for which UM has no direct equivalent.

FRE501 Capstone
3 credits Fall & Spring Semester
Course with a broad-based topic designed to integrate high-level linguistic, critical and analytical skills with the body of knowledge acquired during the course of study toward the major. Topics vary. Open only to undergraduates in the last semester of their French major. Course is writing intensive; fulfills writing credit requirement.
PREREQUISITE: TO BE TAKEN IN THE LAST SEMESTER OF THE MAJOR.

FRE591 Directed Readings
1- 3 credits Offered By Announcement Only
May be repeated for credit if topic is different.
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.

FRE592 Directed Readings
1- 3 credits Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.

FRE593 Directed Readings
1- 3 credits Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.
FRE594 Senior honors Thesis I
3 credits  Fall Semester
Directed research for honors thesis.
PREREQUISITE: MUST HAVE COMPLETED AT LEAST TWELVE CREDITS AT THE 300-LEVEL OR ABOVE TOWARDS FRENCH MAJOR, MUST MEET ELIGIBILITY FOR HONORS IN FRENCH.

FRE595 Senior Honors Thesis II
3 credits  Fall Semester
Directed writing of honors thesis.
PREREQUISITE: FRE 594.

GEOGRAPHY

GEG105 World Regional Geography
3 credits  Fall & Spring Semester
An introduction to geography's basic concepts within the framework of a comprehensive survey of the world's major regions.

GEG110 Introduction to Human Geography
3 credits  Fall & Spring Semester
An introduction to the sub-fields of human geography by an examination of patterns and process in the international system.

GEG120 Physical Geography
3 credits  Fall & Spring Semester
The Earth system (atmosphere; hydrosphere; biosphere; lithosphere) emphasizing the interrelationships among its constituent subsystems; human-environmental interactions and geographic dimensions of these four subsystems.

GEG199 Introduction to GIS (Geographic Information Systems)
3 credits  Fall & Spring Semester
This course uses lecture and lab sessions to teach fundamental concepts in Geographic Information Systems (GIS) and introduce related geographic technologies (Global Positioning Systems, Remote Sensing, etc.). Topics include the nature and sources of digital and spatial data, map projections and datums, raster and vector data structures, raster and vector spatial analysis, and GIS project design. Students will learn to use ArcView and Idrisi, two leading GIS software programs.

GEG201 Topics in Geography
3 credits  Fall & Spring Semester
Content and prerequisites vary.
PREREQUISITE: ANY 100 LEVEL GEG COURSE.

GEG212 Geography of Middle America and the Caribbean
3 credits  Fall Semester
Human and physical geography of Middle America and the Caribbean.

GEG222 Geography of South America
3 credits  Spring Semester
This course is an introduction to the geography of South America. It explores the physical, political, economic, social and cultural geographies of this diverse and complex world region. The course covers agrarian and urban land-use patterns, migration and territorial development and includes urban and regional planning, health, education and social services, with particular attention given to how these interventions address problems of uneven territorial development and social inequality.
GEG232 Geography and Development in Africa
3 credits  Fall Semester
A survey of the geography of Africa south of the Sahara, with particular emphasis on development and the role of African states in the international system.

GEG242 Economic and Political Geography of the Middle East
3 credits  Fall Semester
Human and physical geography of the Middle East with emphasis on current topics.

GEG252 United States and Canada
3 credits  Spring Semester
Human and physical geography of North America.

GEG262 Political Geography of Europe
3 credits  Spring Semester
Human and physical geography of contemporary Europe.

GEG280 Introduction to Cartography and Computer Mapping
3 credits  Offered By Announcement Only
Methods and techniques of cartography. Cartographic representation of spatial data.

GEG301 Topics in Geography
3 credits  Offered By Announcement Only
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.

GEG304 World Economic Geography
3 credits  Fall Semester
Geographic analysis of the distribution of economic activities with emphasis on present-day patterns and trends of production, distribution, and consumption of the world's major commodities.  
PREREQUISITE: ANY 100 OR 200-LEVEL COURSE IN GEOGRAPHY.

GEG341 Geography of Population and Development
3 credits  Spring Semester
Major world population issues are discussed, including population growth, fertility patterns, mortality change, migration, ethnicity, and population structure changes.  
PREREQUISITE: ANY 100 OR 200-LEVEL GEOGRAPHY COURSE.

GEG350 Gender Relations in Global Perspective: A Social and Economic Geography
3 credits  Fall Semester
Comparative geographic analysis of gender (male and female) roles in their societies and associated issues.  
PREREQUISITE: ANY 100 OR 200 GEOGRAPHY COURSE.

GEG362 World Urban Geography
3 credits  Offered By Announcement Only
An introduction to the principles and methods that apply to the geographic study of cities and urbanization.  
PREREQUISITE: ANY 100- OR 200-LEVEL GEOGRAPHY COURSE.

GEG370 Conservation of Resources
3 credits  Offered By Announcement Only
Problems of resource availability in an urban-industrial society.  
PREREQUISITE: ANY 100 OR 200-LEVEL GEOGRAPHY COURSE.
GEG371 Environmental Geography: Current Issues
3 credits                                               Offered By Announcement Only
Topics selected from a wide range of current environmental problems from a geographical perspective. Students will become familiar with a wide range of ecological processes as well as the human forces that currently modify them.
PREREQUISITE: ONE COURSE IN EITHER PHYSICAL GEOGRAPHY OR ECOLOGY OR PERMISSION OF INSTRUCTOR.

GEG391 Intermediate GIS (Geographic Information Systems)
3 credits                                                    Fall & Spring Semester
This course deals with fundamental concepts of raster and vector data manipulation and analysis through lectures and laboratory exercises. Topics covered include vector polygon editing and topology, data quality assessment, integration of raster and vector data, basic concepts of remote sensing, cartographic modeling, suitability mapping, and multi-criteria evaluations.
PREREQUISITE: GEG 199 OR PERMISSION OF INSTRUCTOR.

GEG392 Remote Sensing of the Environment
3 credits                                                           Spring Semester
Theory and techniques of environmental remote sensing and imagery interpretation for earth resources monitoring and management.
PREREQUISITE: GEG 199 OR PERMISSION OF INSTRUCTOR.

GEG420 Geopolitics
3 credits                                                             Fall Semester
Analysis of contemporary global geopolitical issues.
PREREQUISITE: ANY 100- OR 200-LEVEL GEOGRAPHY COURSE.

GEG430 World Cities
3 credits                                                           Spring Semester
The role of major cities in the world economy and the social consequences of globalization for urban areas.
PREREQUISITE: ANY 100- OR 200-LEVEL GEG COURSE.

GEG471 Ecological Biogeography
3 credits                                               Offered By Announcement Only
Survey in modern Biogeography, emphasizing ecological rather than evolutionary concepts; the distributions of species and factors that have influenced the organization of plant communities.
PREREQUISITE: ONE COURSE IN EITHER PHYSICAL GEOGRAPHY OR ECOLOGY OR PERMISSION OF INSTRUCTOR.

GEG481 Introduction to Quantitative Methods
3 credits                                                             Fall Semester
The use of basic methods or quantitative analysis in geographic research.
PREREQUISITE: GEOGRAPHY MAJOR OR MINOR AND MTH 101 OR EQUIVALENT.

GEG491 GIS and Environmental Modeling
3 credits                                               Offered By Announcement Only
Creation, editing, management and display of spatial databases in ARC/INFO, a vector-based GIS (Geographic Information System).
PREREQUISITE: GEG 391 OR PERMISSION OF INSTRUCTOR.
GEG495 Advanced Seminar in Human Geography
3 credits
Spring Semester
Seminar on development-related issues in South Asia.
PREREQUISITE: ANY 100 OR 200 LEVEL GEG COURSE.

GEG501 Place, Region, Nature
3 credits
Offered By Announcement Only
Introductory seminar for Graduate students about geographic thought and geographical traditions.
PREREQUISITE: AT LEAST 6 CREDITS IN GEOGRAPHY OR PERMISSION FROM INSTRUCTOR.

GEG503 Research Trends in Geography
3 credits
Offered By Announcement Only
Contemporary research trends and methodological developments.

GEG510 Survey Research in Geography
3 credits
Offered By Announcement Only
The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.

GEG511 Field Studies in Geography
1-6 credits
Offered By Announcement Only
One to six weeks of intensive geographic field studies outside the Miami area. Lectures will be given prior to departure. The locations and topics of study will vary.
PREREQUISITE: GEG 105 OR ANY 200-LEVEL GEOGRAPHY COURSE.

GEG515 Human Dimensions of Global Environmental Change
3 credits
Fall Semester
Explores the human dimensions of global environmental change using an interdisciplinary approach. The course is reading and writing intensive. Special attention is given to the central role that land-use/cover change plays in the larger realm of global environmental change.
PREREQUISITE: GEG 105 AND JUNIOR/SENIOR STANDING.

GEG520 Immigration to the United States
3 credits
Fall Semester
A description and analysis of current immigration patterns in the United States.
PREREQUISITE: ANY 100 OR 200 LEVEL COURSE OR PERMISSION FROM INSTRUCTOR.

GEG521 Global Trade
3 credits
Offered By Announcement Only
Geographic analysis of the distribution of economic activities and capabilities, with emphasis on contemporary trade patterns and policies.

GEG522 Urbanization in the Developing World
3 credits
Spring Semester
Patterns and processes in large cities in the developing world are examined.
PREREQUISITE: ANY 100 OR 200 LEVEL COURSE IN GEOGRAPHY OF PERMISSION FROM INSTRUCTOR.
GEG523 Seminar in Urban Management
3 credits Fall Semester
Identification of and responses to urban problems in large cities in European and Latin American metropolitan areas. Emphasis is on demographic, cultural/ethnic, service-provision, environmental, transportation, and land-use problems. Approach is via case studies, theory applications, and planning practicalities.

GEG525 Problems in Geography
1-6 credits Fall & Spring Semester
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.
PREREQUISITE: GEOGRAPHY GRADUATE STUDENT, MAJOR, OR MINOR ONLY.

GEG535 Internship in Geography
1-4 credits Fall & Spring Semester
Students are assigned to work for a local public or private agency.
PREREQUISITE: 15 CREDITS IN GEOGRAPHY AND PERMISSION OF DEPARTMENT.

GEG545 Special Topics
3 credits Fall & Spring Semester
PREREQUISITE: NINE CREDITS IN GEOGRAPHY.

GEG552 Seminar on the Geography of South Florida
3 credits Offered By Announcement Only
Human and physical geography of South Florida.
PREREQUISITE: NINE CREDITS IN GEOGRAPHY.

GEG570 Gender and Development
3 credits Offered By Announcement Only
Theoretical and empirical examination of gender and development processes through exploration of gender and development evolution as an academic discipline and application in development practice.
PREREQUISITE: GRADUATE STUDENTS OR PERMISSION OF INSTRUCTOR.

GEG580 Introductory quantitative methods for geographical analysis.
3 credits Spring Semester
Basic quantitative methods for geographic analysis.
PREREQUISITE: GRADUATE STANDING

GEG582 Advanced Quantitative Methods
3 credits Spring Semester
Continuation of GEG 481. The use of statistical methods and techniques in the solution of geographic research problems.
PREREQUISITE: GEG 481.

GEG591 Introduction to GIS (Geographic Information Systems) for graduate students
3 credits Offered By Announcement Only
Overview of basic concepts in GIS (Geographic Information Systems) for students wishing to get graduate credit. This class involves a student project using GIS.

GEG595 Advanced Seminar on South Asia
3 credits Spring Semester
Seminar on development-related issues in South Asia.
PREREQUISITE: PERMISSION FROM INSTRUCTOR (GRADUATE).
GSC101 Origin and Evolution of Planet Earth
3 credits Fall & Spring Semester
The origin of the elements and the evolution of the universe. The formation and early evolution of the solar system. The differentiation of the earth into core, mantle, and crust. Origin of the oceans and atmosphere.

GSC102 Evolution of the Biosphere
3 credits Fall & Spring Semester & Second Summer Session
The physical basis of life. The origin, early evolution, history of life on Earth. Emphasis on major crises and innovations, including the evolution of modern man.

GSC103 Evolution of the Modern Earth's Environment
3 credits Fall & Spring Semester & First Summer Session

GSC104 The Coastal Environment of South Florida
1 credit Offered By Announcement Only
Lectures and excursions to the coastal environment and the Everglades.
PREREQUISITE: NOT FOR MAJOR OR MINOR.

GSC105 The Global Environment
3 credits Fall Semester
Ongoing problems in earth systems: global warming, ozone depletion, energy shortages, air and water pollution, radioactivity.

GSC106 Geological Influences on Society
3 credits Spring Semester

GSC110 The Earth System
3 credits Fall & Spring Semester & First Summer Session
Interactions among the major components of the Earth System - the geosphere, the hydrosphere, the atmosphere, and the biosphere. To be taken concurrently with GSC 114 lab section.

GSC111 Earth System History
4 credits Fall & Spring Semester
Earth History, beginning with earliest origins and surveying major steps in the evolution of the geosphere, atmosphere, hydrosphere, and biosphere.

GSC114 Marine Geology Lab/Field Study
2 credits Fall & Spring Semester
Minerals, rocks, sediments, maps, imagery, fossils and paleoenvironmental reconstruction methods. Current frontiers of knowledge and field introduction to marine geology.
Corequisite: GSC 110.
PREREQUISITE: COREQUISITE GSC 110.
GSC115 Environmental Geology Lab/Field Study
2 credits    Fall & Spring Semester & First & Second Summer Session
Minerals, rocks, sediments, soils, maps, imagery, fossils and paleoenvironmental reconstruction, methods for studying dynamics and human impact on surficial environments. Field introduction to environmental geology problems and methods. Corequisite: GSC 110 or 120.
PREREQUISITE: COREQUISITE: GSC 110 OR 120.

GSC131 Volcanoes and Society
1 credit    Spring Semester
Impact of volcanoes on past and present human civilizations. Topics include the origin of volcanoes, types of volcanic hazards, impact of volcanoes on climate, beneficial aspects of volcanic eruptions, and historical examples.

GSC132 History of Life in the Universe
1 credit    Spring Semester

GSC133 Dinosaurs and Disasters
1 credit    Spring Semester
Examination of the biology, evolution and extinction of the dinosaurs.

GSC230 Reef Systems Through Time
3 credits    Spring Semester
Interacting geological, physical, chemical, biological, and climatic processes that define a reeval setting and system. Field trips included.
PREREQUISITE: GSC 110, 111.

GSC231 Field Study of Reef Systems Through Time
2 credits    Spring Semester
PREREQUISITE: GSC 230.

GSC240 Introduction to Marine Geology
3 credits    Offered By Announcement Only
The principal marine geological environments of the world, their substrate, their sediments, their flora and fauna, and their evolution through time.
PREREQUISITE: GSC 110 OR PERMISSION OF INSTRUCTOR.

GSC260 Earth Materials
4 credits    Fall Semester
Physical and optical properties of common rock-forming minerals and their occurrence in igneous, metamorphic, sedimentary rocks, and ore deposits. Lecture, 3 hours; laboratory, 4 hours.
PREREQUISITE: GSC 110; PREREQUISITE OR COREQUISITE CHM 111.
GSC301 Science and Human Affairs in the 20th Century  
3 credits  
Spring Semester  
Scientific descriptions of the technologies arising in the 20th century, and the interactions between them and our civilization. Course will be divided into four parts: World War I, the interwar years, World War II, and the postwar years. Grades will be based on weekly quizzes, three hour-exams, and a final. An extra-credit term paper will be suggested.  
PREREQUISITE: GSC 101.

GSC310 Microbes and the Environment  
3 credits  
Fall Semester  
This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.  
PREREQUISITE: GSC110/114, GSC 111 OR CONSENT OF INSTRUCTOR.

GSC311 Field Study of Volcanoes and Society  
2 credits  
Spring Semester  
Field trip to Popocatepetl and surrounding sites near Mexico City. Nature and impact of explosive volcanic eruptions on prehistoric civilizations. Fee required.  
PREREQUISITE: GSC 110 OR PERMISSION OF INSTRUCTOR. GSC 440 RECOMMENDED.

GSC360 Depositional and Diagenetic Systems  
4 credits  
Fall Semester  
Sedimentary processes, sedimentology, and sedimentary diagenesis. Physical, biological and chemical sedimentation in Earth's surficial environments. Paleoenvironmental and diagenetic history reconstruction using petrologic, hand specimen, and field methods. Cyclicity in sedimentary systems. Lecture, 3 hours; field/laboratory, 3 hours.  
PREREQUISITE: GSC 110.

GSC380 Paleontology and Stratigraphy  
4 credits  
Spring Semester  
Biostratigraphy, paleoecology, taphonomy, micro- and macroevolutionary processes, and physical and chemical methods used for stratigraphic correlation. Major groups of invertebrate phyla comprising the bulk of the fossil record. Lecture, 3 hours; laboratory, 2 hours.  
PREREQUISITE: GSC 111.

GSC401 Senior Internship  
3 credits  
Offered By Announcement Only  
Field and laboratory studies conducted in conjunction with an approved academic environmental or industrial research laboratory or agency.  
PREREQUISITE: 15 CREDITS IN GEOLOGICAL SCIENCES AND PERMISSION OF THE DEPARTMENT.
GSC410 Environmental Geochemistry
3 credits Spring Semester
Natural distribution of the elements on earth, and how this is being changed. Radioactivity and energy, greenhouse warming and ozone depletion, water and waste and other environmental problems.
PREREQUISITE: GSC 110; CHM 111 OR PERMISSION FROM THE INSTRUCTOR.

GSC420 Geophysics
3 credits Fall Semester
PREREQUISITE: PHY 205, & 206. OR PERMISSION OF INSTRUCTOR.

GSC440 Igneous and Metamorphic Petrology
4 credits Fall Semester
Genesis and classification of igneous and metamorphic rocks, field relationships of rock assemblages, and results of recent laboratory investigations. Identification of common rock types in hand specimens and by thin-section and X-ray diffraction techniques. Lecture, 3 hours; laboratory, 3 hours.
PREREQUISITE: GSC 260.

GSC450 Sedimentology
4 credits Offered By Announcement Only
Sedimentary environment and processes. The geochemistry, formation and diagenesis of sediments. The role of physical and biological factors, including tectonism and climate. Use of sediments in paleoenvironmental reconstructions. Genesis of sedimentary economic deposits, with special emphasis on the formation of petroleum. Lecture, 3 hours; laboratory, 2 hours.

GSC480 Structural Geology
4 credits Spring Semester
Behavior of rock materials; analysis, description and classification of geologic folds, faults, joints; analysis of rock fabrics; tectonic and geologic history of continents and continental margins. Lecture, 2 hours; laboratory, 2 hours.
PREREQUISITE: GSC 440.

GSC482 Field Methods
2 credits Spring Semester
Field and laboratory exercises in mapping, interpretation of aerial and satellite photographs interpretation; coring and sampling; sequence description and interpretation of modern and ancient environments; sediment and rock sequences. Training in field use of brunton, GPS, well logging; application to sedimentary, tectonic, and marine settings. Laboratory meets two hours/week. Field portion is on alternate Saturdays plus four day trip to Appalachians or Caribbean.
PREREQUISITE: GSC 360 OR 380.

GSC490 Senior Thesis
3 credits Fall & Spring Semester & First & Second Summer Session
Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.
PREREQUISITE: 3.0 GPA IN MAJOR; PASS DEPARTMENTAL EXAMINATION AT CONCLUSION OF JUNIOR YEAR; PERMISSION OF THE DEPARTMENT.
GSC491 Senior Thesis
3 credits   Fall & Spring Semester & First & Second Summer Session
Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.
PREREQUISITE: 3.0 GPA IN MAJOR; PASS DEPARTMENTAL EXAMINATION AT CONCLUSION OF JUNIOR YEAR; PERMISSION OF THE DEPARTMENT.

GSC515 Applied Environmental Geology
3 credits   Spring Semester
An advanced undergraduate/graduate course providing knowledge and methods for effective environmental site surveys, to be presented in a weekly 3-hour lecture and discussion. The course will cover policies and regulation including applied practice to comply with safe environmental conduct and valid assessment. Case study, best management practice, and appropriate field equipment and approaches will complement two one-day field trips associated with this course.
PREREQUISITE: PERMISSION OF INSTRUCTOR OR DEPARTMENT CHAIR.

GSC520 Geology of Florida and the Caribbean
3 credits   Fall Semester
The land and marine geologic history, the natural resources and geologic hazards of Florida and the Caribbean region.
PREREQUISITE: GSC 110, 111, 260.

GSC540 Geophysics
3 credits   Spring Semester
PREREQUISITE: PHY 205, 206.

GSC545 Introduction to Isotope and Nuclear Geology
4 credits   Offered By Announcement Only
Radioactivity and particle counting. The geological time scale. Isotope fractionation in natural systems. Mass spectrometry and the measurements of relative isotopic abundances in the ocean, the atmosphere, and the solid earth. Lecture, 2 hours; laboratory, 4 hours.

GSC550 Hydrogeology
3 credits   Fall Semester
Movement of subterranean water. The mechanical, chemical and thermal interaction of water with porous solids, and the transport of energy and chemical constituents. The origin of porosity and permeability. The controls exerted on aquifers by the lithology, stratigraphy and structure of geologic deposits and formations.
PREREQUISITE: 8 CREDITS IN GEOLOGICAL SCIENCES AND PERMISSION OF INSTRUCTOR.

GSC555 Mathematical Methods for Geoscientists
3 credits   Fall Semester
Background mathematics needed to solve problems in the geosciences. Applications in tectonics, structural geology, geochemical systems, seismology and hydrology.
PREREQUISITE: MTH 112 OR 132, 211 OR 310, OR 312, AND PHY 206, OR EQUIVALENT.
GSC556 Complexity in Coastal Systems
4 credits                                                     Fall Semester
Different aspects of the coastal system and their interactions using inquiry-based learning; will include remote sensing data as a tool for data analysis and visualization. PREREQUISITE: SIX CREDITS IN BIOLOGY OR GEOLOGICAL SCIENCES.

GSC560 Colloquium - Current Topics in the Geosciences
1 credit                                                       Fall Semester
Weekly presentations and discussions. Written and oral presentations required. PREREQUISITE: SENIOR STANDING.

GSC561 Colloquium - Current Topics in the Geosciences
1 credit                                                       Spring Semester
Weekly presentations and discussions. Written and oral presentations required. PREREQUISITE: SENIOR STANDING.

GSC565 Fluxes of Energy and Matter in the Earth Systems
3 credits                                                     Offered By Announcement Only
Transport phenomena, motions, and deformation in Earth Systems. PREREQUISITE: GSC 110, 360.

GSC574 Special Studies
1- 4 credits                                                   Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit. PREREQUISITE: PERMISSION OF DEPARTMENT.

GSC575 Special Studies
1- 4 credits                                                   Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit. PREREQUISITE: PERMISSION OF DEPARTMENT.

GSC576 Special Studies
1- 4 credits                                                   Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit. PREREQUISITE: PERMISSION OF DEPARTMENT.

GSC580 Summer Field Geology
4 credits                                                     Spring Semester & First & Second Summer Session
An intensive four-week summer field laboratory study of modern geological processes and ancient rock sequences. Mapping, description and interpretation of rock and structural sequences, paleoenvironmental reconstruction, interpretation of tectonic history. Reports required. Touring course. Travel fee required. PREREQUISITE: 18 CREDITS IN GEOLOGICAL SCIENCES AND/OR PERMISSION OF INSTRUCTOR.

GSC581 Summer Field Environmental Geology
2 credits                                                     Spring Semester & First & Second Summer Session
GEOLOGICAL SCIENCES

GSC582 Field Studies
1-4 credits  Offered By Announcement Only
Conducted field trips to selected geological sites in the United States and abroad.
Report required.
PREREQUISITE: GRADUATE OR ADVANCED UNDERGRADUATE STANDING AND PERMISSION OF DEPARTMENT.

GSC596 Research in Geology
1-4 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: PERMISSION OF INSTRUCTOR.

GERMAN

GER101 Elementary German I
3 credits  Fall & Spring Semester
Fundamental grammatical principles; exercises to develop a foundation for skills
of listening, speaking, reading, and writing; introduction to German culture. Closed
to native speakers.

GER102 Elementary German II
3 credits  Fall & Spring Semester
Continuation of GER 101. PREREQUISITE: GER 101 OR EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

GER211 Intermediate German I
3 credits  Fall & Spring Semester
Continuation of GER 102, with special emphasis on essay writing.
PREREQUISITE: GER 102 OR EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

GER212 Intermediate German II
3 credits  Fall & Spring Semester
Integrated grammar, writing, and conversation via content-based instruction. Diverse
selection of readings: stories, plays, essays, interviews, other materials. Development
of skills in a workshop format.
PREREQUISITE: GER 211 OR EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

Awarded for course work at another institution for which UM has no direct equivalent.

GER396 Transfer Credits
1- 3 credits  Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

GER397 Transfer Credits
1- 3 credits  Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

GER398 Transfer Credits
1- 3 credits  Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

GER399 Transfer Credits
1- 3 credits  Not Offered; Transfer Credit Only
Awarded for course work at another institution for which UM has no direct equivalent.

GER432 Business and Diplomatic German
3 credits  Offered By Announcement Only
Commercial, economic, and technical terminology. Conversation and composition based on models of business interactions and correspondence directed to German-speaking countries and firms. Writing credit.
PREREQUISITE: GER 212.
GER442 Advanced Stylistics and Composition
3 credits
Spring Semester
PREREQUISITE: ONE 300-LEVEL GER COURSE.

GER521 Advanced German Studies
3 credits
Offered By Announcement Only
German language, literature, culture of the 18th-20th centuries. Involves independent research. WRITING CREDIT: May be repeated for credit if topic is different.
PREREQUISITE: GER 363, 364, OR 365.

GER522 Special Topics in German Literature
3 credits
Offered By Announcement Only
WRITING CREDIT. May be repeated for credit if topic is different.
PREREQUISITE: TWO COURSES ON THE 300-LEVEL; PERMISSION OF THE INSTRUCTOR.

GER566 German Literature of the Twentieth Century
3 credits
Offered By Announcement Only
WRITING CREDIT. Major literary movements: prose, poetry, and drama.
PREREQUISITE: GER 363 OR 364.

GER591 Directed Readings
1-3 credits
Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER592 Directed Readings
1-3 credits
Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER593 Directed Readings
1-3 credits
Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER594 Senior Honors Thesis I
3 credits
Fall Semester
Directed research for honors thesis.
PREREQUISITE: MUST HAVE COMPLETED AT LEAST NINE CREDITS AT THE 300-LEVEL OR ABOVE TOWARDS GERMAN MAJOR, MUST MEET ELIGIBILITY FOR HONORS IN GERMAN.

GER595 Senior Honors Thesis II
3 credits
Fall Semester
Directed writing of honors thesis.
PREREQUISITE: GER 594.

GREEK
GRE101 Elementary Ancient Greek I
3 credits
Offered By Announcement Only
Alphabet, pronunciation, accentuation, vocabulary, grammar, reading exercises, and written exercises.

GRE102 Elementary Ancient Greek II
3 credits
Fall Semester
Continuation of GRE 101.
PREREQUISITE: GRE 101.
GRE201 Intermediate Ancient Greek
3 credits
Spring Semester
Reading from classical and Hellenistic authors. Students must take three semesters (13 credits) of Classical Greek to fulfill the language requirement.

3 credits
Fall Semester
Readings from one or two plays of Euripides.
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR.

GRE401 Special Topics in Greek Literature
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. This will vary each time the course is offered
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE402 Special Topics in Greek Literature
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. This will vary each time the course is offered
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE403 Special Topics in Greek Literature
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. This will vary each time the course is offered
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE404 Special Projects in Ancient Greek Literature & Culture
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle) Analogous to REL 407-409. This will vary each time the course is offered
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE405 Special Projects in Ancient Greek Literature and Culture
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

GRE406 Special Projects in Ancient Greek Literature and Culture
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR
GREEK

GRE407 Supervised Reading in Classical Greek
3 credits                    Fall & Spring Semester & First & Second Summer Session
Variable subject matter determined by instructor and student. Analogous to REL 401-403.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

GRE408 Supervised Reading in Classical Greek
3 credits                    Fall & Spring Semester & First & Second Summer Session
Variable subject matter determined by instructor and student. Analogous to REL 401-403.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

GRE409 Supervised Reading in Classical Greek
3 credits                    Fall & Spring Semester & First & Second Summer Session
Variable subject matter determined by instructor and student. Analogous to REL 401-403.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

GRE411 Homer
3 credits                                                             Fall Semester
Readings from the Iliad and/or Odyssey.
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE421 Greek Orators
3 credits                                                             Fall Semester
Readings from Lysias and Demosthenes.
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE431 Greek Historians
3 credits                                                             Fall Semester
Readings from Herodotus and Thucydides.
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE491 Directed Readings
1- 3 credits                 Fall & Spring Semester & First & Second Summer Session
Content to be determined by faculty member and registering student(s)
PREREQUISITE: SIX CREDITS IN CLASSICS OR PERMISSION OF INSTRUCTOR

HEBREW

HEB101 Elementary Hebrew I
3 credits                                                             Fall Semester
Grammatical principles: reading for comprehension and conversation; oral and written exercises. Normally, closed to students who have completed two years of high school Hebrew. Closed to native speakers.
PREREQUISITE: CLOSED TO NATIVE SPEAKERS.

HEB102 Elementary Hebrew II
3 credits                                                             Spring Semester
Continuation of HEB 101. Closed to native speakers.
PREREQUISITE: HEB 101 OR EQUIVALENT, AND CLOSED TO NATIVE SPEAKERS.
HEB201 Intermediate Hebrew I  
3 credits                                                                Fall Semester  
PREREQUISITE: HEB 102 OR 4 YEARS OF HIGH SCHOOL HEBREW OR PERMISSION OF INSTRUCTOR, AND CLOSED TO NATIVE SPEAKERS.

HEB202 Intermediate Hebrew II  
3 credits                                                           Spring Semester  
Continuation of 201 with oral presentations, compositions, and grammar review. Class conducted in Hebrew. Closed to native speakers.  
PREREQUISITE: HEB 201 OR EQUIVALENT, AND CLOSED TO NATIVE SPEAKERS.

HEB243 Hebrew for Native Speakers  
3 credits                                                             Fall Semester  
Grammar, morphology, syntax, and semantics of Modern Hebrew based on texts and media that expose the student to a multi-faceted experience of Hebrew language and culture.  
PREREQUISITE: FOR NATIVE AND HERITAGE SPEAKERS WITH SOME FORMAL TRAINING IN MODERN HEBREW (SUCH AS AN "ULPAN" IN ISRAEL OR CONSISTENT STUDY OF HEBREW IN A JEWISH HIGH SCHOOL) OR PERMISSION OF INSTRUCTOR.

HISTORY

HIS101 History of the United States, I (to 1877)  
3 credits                                                    Fall & Spring Semester  
Political, social, and economic development of the United States through Reconstruction.

HIS102 History of the United States, II (since 1877)  
3 credits                                                    Fall & Spring Semester  
Political, social, and economic development of the United States since Reconstruction.

HIS121 Development of Asian Civilizations, I  
3 credits                                                        Fall Semester  
Evolution of the principal Asian civilizations to 1600.

HIS122 Development of Asian Civilizations, II  
3 credits                                                Offered By Announcement Only  
The principal Asian civilizations since 1600 emphasizing the breakdown of traditional societies and the rise of modern nations.

HIS131 Development of Western Civilization, I  
3 credits                                                Fall & Spring Semester  
A survey of the development of the West from the emergence of the earliest civilizations in Mesopotamia and Egypt to the formation of modern European nation states in the sixteenth and seventeenth centuries, emphasizing the ideas, values, events, and institutions that have influenced the present.

HIS132 Development of Western Civilization, II  
3 credits                                                       Fall & Spring Semester
