PREREQUISITE: (CSC120 OR CSC210) AND (BIL150 OR BIL104 OR BIL352 OR BIL552)
BIL552 Bioinformatics Tools
3 credits
Offered By Announcement Only
Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure-function analysis and various applications.
PREREQUISITE: BIL 250 OR BIL 150 AND PERMISSION OF INSTRUCTOR.

BIL553 Concepts in Cell Biology
3 credits
Fall Semester
A comprehensive and updated view of biology based on the Cell Theory through infusion of new genetics, pan-genomics, proteomics, photonics, bioinformatics and molecular engineering.
PREREQUISITE: BIL 255 OR GRADUATE STANDING

BIL554 Electron Microscopy
4 credits
Fall Semester
Techniques in transmission electron microscopy including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.
PREREQUISITE: BIL 255 OR 361 AND PERMISSION OF INSTRUCTOR.

BIL555 Projects in Electron Microscopy
2 credits
Spring Semester
Individual research projects in transmission electron microscopy, 6 hours.
PREREQUISITE: BIL 554. PERMISSION OF INSTRUCTOR.

BIL556 Ecological and Evolutionary Genomics
3 credits
Offered By Announcement Only
PREREQUISITE: BIL 250, BIL 255 OR PERMISSION FROM INSTRUCTOR

BIL557 Evolution and Development
3 credits
Offered By Announcement Only
PREREQUISITE: BIL 250 AND BIL 255

BIL564 Advanced Developmental Biology
3 credits
Offered By Announcement Only
Comprehensive survey of the principles of development and methods of experimental analysis. Lecture, discussion and demonstration, 3 hours.
PREREQUISITE: BIL 364.

BIL565 Evolution and Development
3 credits
Offered By Announcement Only
The hypothesis and data relating to the biological basis of aging in invertebrates and vertebrates including humans. Prerequisite: Senior or graduate status in a biological science.
PREREQUISITE: BIL 250

BIL568 Evolution and development of Nervous Systems
3 credits
Offered By Announcement Only
Mechanisms/pathways/modules underlying formation of the nervous system during development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.
PREREQUISITE: BIL 268 OR BIL 355 OR PERMISSION OF INSTRUCTOR.
BIL569 Biology of Aging
3 credits
Offered By Announcement Only
The hypotheses and data relating to the biological basis of aging in invertebrates and vertebrates, including humans.
PREREQUISITE: SENIOR OR GRADUATE STATUS IN A BIOLOGICAL SCIENCE.

BIL571 Advanced Special Studies in Biology
1- 6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL572 Advanced Special Studies in Biology
1- 6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL573 Advanced Special Studies in Biology
1- 6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL574 Advanced Special Studies in Biology
1- 6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL575 Advanced Special Studies in Biology
1- 6 credits
Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL582 Borderless Science
3 credits
Offered By Announcement Only
Students from various scientific disciplines will be introduced to new technologies and resources from wide-ranging fields of science and learn to apply them in their own fields. Students will engage in mutual exchange of discipline-specific practices and novel ideas for research in biology, neuroscience, psychology, chemistry, physics, mathematics, engineering, etc.
PREREQUISITE: PERMISSION FROM INSTRUCTOR

BIL585 Advanced special topics in biology
3 credits
Offered By Announcement Only
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: SENIOR OR GRADUATE STUDENT STATUS

BIL586 Advanced Special Topics in Biology
4 credits
Offered By Announcement Only
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: SENIOR OR GRADUATE STUDENT STATUS

BIL590 Studies in Biology
1- 5 credits
Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.
University of Miami Bulletin, 2012-2013
Undergraduate Course Listing
COLLEGE OF ARTS AND SCIENCES
BIOLOGY

BIL591 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL592 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL593 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL594 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

BIL595 Studies in Biology
1-5 credits Not Offered; Transfer Credit Only
Special topics taken at other institutions with no direct equivalents.

CHEMISTRY

CHM101 Fundamentals of Chemistry I
3 credits Fall Semester
Fundamental concepts of chemistry and their relation to living systems, utilitarian chemical processes, and the environment. Lecture, 3 hours. Not for major or minor credit.

CHM102 Fundamentals of Chemistry II
3 credits Offered By Announcement Only
A continuation of Chemistry 101.
PREREQUISITE: CHM 101 OR HIGH SCHOOL CHEMISTRY.

CHM103 Chemistry for Life Sciences I (Lecture)
3 credits Fall Semester
Essentials of inorganic chemistry as it apply to biological systems. Designed for (but not limited to) those planning health-related careers. Lecture, 3 hours.

CHM104 Chemistry for Life Sciences II (Lecture)
3 credits Spring Semester
A continuation of CHM 103, with emphasis on organic and biological chemistry, including biochemical processes and metabolism. Lecture, 3 hours.
PREREQUISITE: CHM 103.

CHM105 Chemistry for Life Sciences I (Laboratory)
1 credit Fall Semester
Designed for those students in CHM 103 requiring a laboratory course. Laboratory, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 103.

CHM106 Chemistry for Life Sciences II (Laboratory)
1 credit Spring Semester
Designed for those students in CHM 104 requiring a laboratory course. Laboratory, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 104.
COLLEGE OF ARTS AND SCIENCES

CHEMISTRY

CHM111 Principles of Chemistry I
0-3 credits  Fall & Spring Semester & First Summer Session
Fundamental principles of chemical science. The beginning course for science majors and premedical students. Lecture, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 105 OR 107.

CHM112 Principles of Chemistry II
0-3 credits  Fall & Spring Semester & Second Summer Session
Continuation of CHM 111. Lecture, 3 hours.
PREREQUISITE: CHM 111 OR 151.

CHM113 Chemistry Laboratory I
1 credit  Fall & Spring Semester & First Summer Session
Laboratory techniques of chemistry. To accompany CHM 111. Laboratory, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 111.

CHM114 Chemistry Laboratory II
1 credit  Fall & Spring Semester & Second Summer Session
Continuation of CHM 113. Intermediate laboratory techniques and quantitative analysis. To accompany CHM 112. Laboratory, 3 hours.
PREREQUISITE: CHM 113; PREREQUISITE OR COREQUISITE: CHM 112.

CHM151 Chemistry for Engineers I
0-3 credits  Fall & Spring Semester
Fundamental principles of chemistry for engineering students. Not recommended for students that plan to enter Medical School. Lecture, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 105 OR 107.

CHM153 Chemistry Laboratory for Engineers
1 credit  Fall & Spring Semester
An introductory laboratory course to accompany CHM 151. The techniques of chemistry for engineering students.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 151.

CHM201 Organic Chemistry I (Lecture)
3 credits  Fall & Spring Semester & First Summer Session
The chemistry of carbon compounds. Required of chemistry majors, and premedical students; recommended for majors in life sciences. Lecture, 3 hours.
PREREQUISITE: CHM 112.

CHM202 Organic Chemistry II (Lecture)
3 credits  Fall & Spring Semester & Second Summer Session
Continuation of CHM 201. Lecture, 3 hours.
PREREQUISITE: CHM 201.

CHM205 Organic Chemistry Laboratory I
1 credit  Fall & Spring Semester & First Summer Session
Introduction to techniques of organic chemistry. Laboratory, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 201.

CHM206 Organic Chemistry Laboratory II
1 credit  Fall & Spring Semester & Second Summer Session
Continuation of CHM 205. Laboratory, 3 hours.
CHM304 Structural Identification of Organic Compounds  
3 credits  Fall Semester  
The fundamental principles of ultraviolet/visible, infrared, nuclear magnetic resonance and mass spectrometry. How the combination of these sophisticated analytical techniques can be used to elucidate the structures of organic compounds.  
PREREQUISITE: CHM 202 AND 206.

CHM316 Instrumental Analytical Chemistry  
3 credits  Spring Semester  
Modern methods of quantitative analysis. Lecture, 3 hours.  
PREREQUISITE: CHM 304 AND 360.

CHM317 The Chemistry of Food and Taste.  
3 credits  Spring Semester  
The chemical compositions of the raw materials and end products, and an investigation and understanding of the changes that these undergo when exposed to human manipulations.  
PREREQUISITE: CHM 201 AND CHM 202

CHM320 Instrumental Methods in Chemistry and Biochemistry  
2 credits  Spring Semester  
Instrumental methods in modern chemistry and biochemistry, including spectrometric, electrochemical and chromatographic (separation) techniques. Laboratory, 8 hours.  
PREREQUISITE: CHM 304. COREQUISITE: CHM 316.

CHM331 Physical Chemistry for Premedical Students  
3 credits  Spring Semester  
Fundamentals of thermodynamics as applied to gases, liquids and solutions; chemical kinetics and other selected topics. Lecture, 3 hours.  
PREREQUISITE: CHM 112, MTH 110 OR 111 OR 131, PHY 102 OR PERMISSION OF INSTRUCTOR.

CHM360 Physical Chemistry I (Lecture)  
0-3 credits  Fall Semester  
Introduction to physical chemistry including thermodynamics, gaseous and liquid states, solutions, homogeneous and heterogeneous equilibriums. Lecture, 3 hours.  
PREREQUISITE: CHM 112, MTH 112 OR 132. PREREQUISITE OR COREQUISITE: ONE SEMESTER OF PHYSICS.

CHM364 Physical Chemistry (Laboratory I)  
1 credit  Fall & Spring Semester  
Representative experiments in physical chemistry. Laboratory, 4 hours.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: CHM 331 OR 360.

CHM365 Physical Chemistry II (Lecture)  
3 credits  Spring Semester  
Chemical kinetics, introductory quantum chemistry, molecular spectroscopy.  
PREREQUISITE: CHM 360, MTH 112. PREREQUISITE OR COREQUISITE: TWO SEMESTERS OF PHYSICS.

CHM381 Workshop Leaders in Chemistry I  
1 credit  Fall & Spring Semester  
Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.  
PREREQUISITE: A GRADE OF "A" OR "B" IN CHM 111 AND 112 OR AP OUTPLACING.
CHM382 Workshop Leaders in Chemistry II
1 credit Fall & Spring Semester
Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.
PREREQUISITE: A GRADE OF "A" OR "B" IN CHM 111 AND 112 OR AP OUTPLACING.

CHM401 Environmental Chemistry
3 credits Spring Semester
Major environmental features of the earth; Role of natural and synthetic chemicals in the environment; Atmospheric and aquatic pollution; Application of acid-base theory and oxidation reduction to environmental problems.
PREREQUISITE: CHM 111 AND 112; AND JUNIOR STANDING; NOT OPEN TO STUDENTS WITH CREDITS IN ESC 401.

CHM442 Inorganic Chemistry (Laboratory)
1 credit Spring Semester
Synthesis of inorganic compounds and determination of their physical and chemical properties. CHM 541 is a co requisite for ACS chemistry majors. Laboratory, 3 hours.
PREREQUISITE: CHM 365 AND 541.

CHM464 Physical Chemistry (Laboratory II)
1 credit Spring Semester
Continuation of CHM 364. Laboratory, 4 hours.

CHM488 Undergraduate Research
1-3 credits Fall & Spring Semester & First & Second Summer Session
Laboratory research under the direction of a member of the chemistry faculty. Thesis optional. Course may be repeated for credit.
PREREQUISITE: B AVERAGE IN CHEMISTRY COURSES AND DEPARTMENTAL CONSENT.

CHM490 Honors Research
1-3 credits Fall & Spring Semester & First & Second Summer Session
Laboratory research under the direction of a member of the Chemistry faculty. Thesis required. Course may be repeated for credit.
PREREQUISITE: ADMISSION TO HONORS PROGRAM. CHEMISTRY DEPARTMENT CONSENT. CHM 206.

CHM510 Enzyme Kinetics and Mechanism
3 credits Fall & Spring Semester
Detailed coverage of chemistry of enzyme-catalyzed reactions.
PREREQUISITE: CHM 201 AND CHM 202

CHM515 Makings of a Scientist
3 credits Offered By Announcement Only
By analyzing achievements and advice of few successful scientists, chemists in particular will highlight what qualities are needed to be a successful scientist. Importance of motivation, perseverance, communication skills, adhering to ethical guidelines and ability to deal with colleagues and co-workers will be brought out. Career options available for a trained chemist and how different each one is will be pointed out. Overall this is a course in multi-mentoring of graduate students who are aiming for a career in science and hope to be successful researchers in science, particularly in chemistry.
PREREQUISITE: REGISTERED GRADUATE STUDENTS OR UNDERGRADUATES IN THEIR SENIOR YEAR
CHM520 Physical Organic Chemistry
3 credits Fall Semester
Aspects of chemical bonding, acids and bases, stereochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bimolecular reactions.
PREREQUISITE: CHM 202 AND 360.

CHM521 Polymer Chemistry
3 credits Offered By Announcement Only
Fundamental concepts in polymer chemistry. Course will cover the terminology and chemistry of polymers and polymerizations. Students will be required to synthesize several different types of polymers. This will reinforce concepts learned during lecture and give students hands-on experience.
PREREQUISITE: CHM 201 AND CHM 202

CHM522 Synthetic Organic Chemistry
3 credits Fall Semester
Functional group transformations, Synthon approach. Retrosynthetic analyses, multistep syntheses.

CHM523 Contemporary Total Synthesis
3 credits Spring Semester
New methods strategies and perspectives for the total synthesis based on the modern literature.
PREREQUISITE: CHM 201, CHM 202, AND CHM 522

CHM524 Supramolecular Chemistry
3 credits Offered By Announcement Only
Complexation, recognition, and catalysis as applied to bioorganic chemistry. Steric, polar, and lipophillic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.
PREREQUISITE: CHM 365 AND 520.

CHM525 Structural Organic Chemistry
3 credits Spring Semester

CHM530 Fluorescence Spectroscopy and Microscopy
3 credits Fall & Spring Semester
The photo physical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and medicine.
PREREQUISITE: CHM 304 AND CHM 360
**CHM535 Molecular and Supramolecular Photochemistry**

3 credits

Offered By Announcement Only

Generation of a model that will help rationalize/predict excited state reactions.
A brief background on physical aspects of photochemistry will be given. Exploring
and understanding of reactions that are triggered by light. Importance of light
in life will be highlighted.

PREREQUISITE: CHM 201 AND CHM 202

**CHM541 Principles of Bonding and Reactivity in Inorganic Chemistry**

3 credits

Fall Semester

Bonding principles necessary to understand the structure, stability, and fundamental
reactivity of main group and transition metal inorganic compounds.

PREREQUISITE: CHM 365.

**CHM553 Modern Quantum Chemistry**

3 credits

Offered By Announcement Only

Many-electron wave functions and operators. Hartee-Fock approximation, density
functional theory, configuration interaction, and many-body perturbation theory.

PREREQUISITE: CHM 365

**CHM555 Modern Statistical Mechanics**

3 credits

Offered By Announcement Only

The statistical foundation of thermodynamics; ensemble averages and fluctuations;
partition functions for ideal and nonideal systems; Monte Carlo methods, classical
fluids, and no equilibrium statistical mechanics.

PREREQUISITE: ONE SEMESTER OF PHYSICS, MTH 112 OR 132, CHM 360, OR PERMISSION OF
INSTRUCTOR  COREQUISITE(S): CHM 365

**CHM556 Self-Assembly and Surface Chemistry**

3 credits

Offered By Announcement Only

Methods of preparation of self-assembly monolayers and surface chemistry properties.

PREREQUISITE: CHM 365.

**CHM563 Electronic Structure Methods**

3 credits

Fall Semester

Basis sets, post-SCF methods, and potential energy surfaces. Thermodynamic, structural,
and vibrational predictions, excited states, solvation and hybrid Hamiltonians.

PREREQUISITE: CHM 365

**CHM564 Molecular Simulations**

1 credit

Offered By Announcement Only

Classical dynamics, force-fields, sampling, periodic and stochastic boundaries,
Monte-Carlo and molecular dynamics simulations, and free energy perturbation.

PREREQUISITE: PERMISSION OF DEPARTMENT.

**CHM565 Principles of Spectroscopic Techniques**

3 credits

Offered By Announcement Only

Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS),
ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic
techniques.

PREREQUISITE: CHM 365.

**CHM570 Advanced Physical Chemistry Topics**

3 credits

Offered By Announcement Only

PREREQUISITE: CHM 365.
CHM575 Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy
3 credits
Offered By Announcement Only
Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time-domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy. PREREQUISITE: ONE SEMESTER OF PHYSICS, MTH 112 OR 132, CHM 304, OR PERMISSION OF INSTRUCTOR. COREQUISITE(S): CHM 360

CHM579 Special Topics: Chemistry Internship
1-3 credits
Offered By Announcement Only

CHM580 Special Topics: Chemistry Internship
1-3 credits
Offered By Announcement Only

CHM591 Topics in Chemistry
1-3 credits
Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry". PREREQUISITE: 20 CREDITS IN CHEMISTRY.

CHM592 Topics in Chemistry
1-3 credits
Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry." PREREQUISITE: 20 CREDITS IN CHEMISTRY.

CHM593 Readings in Chemistry
1-3 credits
Offered By Announcement Only
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit. PREREQUISITE: 20 CREDITS IN CHEMISTRY AND PERMISSION OF THE DEPARTMENT CHAIRMAN.

CHM594 Readings in Chemistry
1-3 credits
Offered By Announcement Only
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit. PREREQUISITE: 20 CREDITS IN CHEMISTRY AND PERMISSION OF THE DEPARTMENT CHAIRMAN.

CHINESE

CHI101 Elementary Chinese (Mandarin)
3 credits
Fall & Spring Semester
Conversation, grammar, reading, elementary composition.

CHI102 Elementary Chinese (Mandarin)
3 credits
Spring Semester
Continuation of CHI 101, conversation, grammar, reading, elementary composition. PREREQUISITE: CHI 101.

CHI201 Intermediate Chinese I
3 credits
Fall & Spring Semester
Expanding further on language skills (grammar, composition and reading) while introducing students to aspects of Chinese customs, history and culture. Closed to native speakers. PREREQUISITE: CHI 102. CLOSED TO NATIVE SPEAKERS
CHI202 Intermediate Chinese II
3 credits Spring Semester
To consolidate the foundation which students have built on CHI 101, 102, and 201, with emphasis on four language skills and cultural studies. Closed to native speakers.
PREREQUISITE: CHI 201, AND CLOSED TO NATIVE SPEAKERS.

CLASSICS
CLA220 Greek and Roman Mythology
3 credits Fall & Spring Semester & First & Second Summer Session
The major political, cultural, and social themes that appear in Greek and Roman mythology, examining literary and material evidence.

CLA221 Sports & Society in the Ancient World
3 credits Fall & Spring Semester
Sports in the civilizations of ancient Greece and Rome, making comparisons with modern American sports culture. Topics may include the origins of sports competitions in religious rituals; athletes and athletics in myth and legend; architectural remains such as the Colosseum and the stadium at Olympia; and modern recreations of ancient sports events in films such as Gladiator and Ben Hur.

CLA224 The Heroic Journey
3 credits Spring Semester
The figure of the Hero on a Journey has long captivated the minds of story-tellers and audiences. This motif, known as "The Monomyth," speaks the profoundest hopes and fears of humankind. This course will examine the Monomyth as it occurs particularly in the classical tradition from Gilgamesh to Tolkien.

CLA232 Topics in Ancient Law, Scandalous Trails from the Ancient Legal World
3 credits Fall & Spring Semester

CLA233 Ancient Medicine
3 credits Fall & Spring Semester

CLA241 Greek Civilization
3 credits Fall & Spring Semester
This course introduces key concepts, events, and personalities of Greek culture.

CLA242 Roman Civilization
3 credits Fall & Spring Semester
Introduces key concepts, events, and personalities of ancient Roman culture.

CLA246 Ancient Rhetorical Theory
3 credits Fall & Spring Semester & First & Second Summer Session

CLA301 Ancient Greece
3 credits Fall Semester
Greek civilization from the Late Bronze Age to the end of Greek independence at the battle of Chaeronea in 338 B.C.E.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

CLA302 The Hellenistic Age
3 credits Spring Semester
Conquests of Alexander the Great and the spread of Greek culture in the Near East under Alexander's successors until the death of Cleopatra in 31 B.C.E.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.
CLA303 The Roman Republic  
3 credits  
Fall Semester  
Roman civilization from the establishment of the Republic until the Battle of Actium in 31 B.C.E.  
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

CLA304 The Roman Empire  
3 credits  
Spring Semester  
Roman civilization from the reign of Augustus in 37 B.C.E. to the Fall of Rome in 476 C.E.  
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

CLA310 Survey of Ancient Greek Literature and Culture  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Classical Greek culture, paying special attention to Greek literature from Homer to Aristotle. It is intended to lay a foundation for understanding how Hellenic thought and art influenced the development of all subsequent Western culture. All texts will be read in English translation.  
PREREQUISITE: THREE CREDITS IN LITERATURE.

CLA311 Survey of Classical Latin Literature and Culture  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
A broad introduction (in English translation) to the literature of the Roman Republic and Empire. The Greek heritage behind Latin literature will be highlighted. Readings will be chosen from authors such as Catullus, Cicero, Vergil, Horace, Ovid, Petronius, Juvenal, Tacitus, and Suetonius, and from genres such as epic and lyric poetry, oratory, history and satire.

CLA315 The Classical Epic Tradition  
3 credits  
Offered By Announcement Only  
The course treats the rise and development of the Western epic tradition from Homer, Lucretius, and Vergil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.  
PREREQUISITE: ENG 106 OR PERMISSION OF INSTRUCTOR.

CLA323 The Ancient World on Screen  
3 credits  
Fall & Spring Semester & First & Second Summer Session  

CLA325 Vampire in Folklore, Fiction, and Film  
3 credits  
Fall & Spring Semester & First & Second Summer Session  

CLA340 Greek Tragedy  
3 credits  
Fall & Spring Semester  
Readings in English of the tragedies of Aeschylus, Sophocles, and Euripides.  
PREREQUISITE: ENG 106 OR PERMISSION OF INSTRUCTOR.

CLA370 Self and Other in the Ancient World  
3 credits  
Fall & Spring Semester  
The course examines Greek and Roman depictions of outsiders in a wide range of ancient texts and material sources.  
PREREQUISITE: ENG 105 AND/OR 106 OR PERMISSION OF INSTRUCTOR.
CLA401 Special Topics in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

CLA402 Special Topics in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

CLA403 Special Topics in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

CLA404 Special Projects in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

CLA405 Special Projects in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

CLA406 Special Projects in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

CLA422 Aristophanes
3 credits Fall & Spring Semester
PREREQUISITE: GRE 201

CLA491 DIRECTED READING IN CLASSICS
1- 3 credits Fall & Spring Semester & First & Second Summer Session
Content to be determined by faculty member and registering student(s).
PREREQUISITE: SIX CREDITS IN CLASSICS OR PERMISSION OF INSTRUCTOR

CLA492 Directed Reading in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing) CLA 491.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CLA493 Directed Reading in Classics
3 credits Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing) CLA 491.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CLA495 Senior Thesis I
3 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: SENIOR STANDING
CLA496 Senior Thesis II  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
PREREQUISITE: SENIOR STANDING

CLA505 Seminar in Ancient Studies  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Topics in Greek and Roman studies.  
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

COMPUTER SCIENCE

CSC115 Social and Ethical Issues in Computing  
3 credits  
Spring Semester  
History, social context and methods and tools of analysis. Professional and ethical responsibilities. Intellectual property. Privacy and civil liberties.  
PREREQUISITE: NO PREREQUISITES FOUND FOR THIS COURSE

CSC119 Computers and Society  
3 credits  
Spring Semester  

CSC120 Computer Programming I  
0- 4 credits  
Fall Semester  

CSC210 Computing for Scientists  
3 credits  
Fall & Spring Semester  
PREREQUISITE: MTH 161 AND 3 CREDITS IN SCIENCE

CSC220 Computer Programming II  
0- 4 credits  
Fall & Spring Semester  
PREREQUISITE: CSC 120.

CSC300 Android Programming  
3 credits  
Offered By Announcement Only  
Programming mobile devices in the Android framework.  
PREREQUISITE: “A” GRADE IN CSC 220. STUDENTS MUST BRING OWN LAPTOP.

CSC314 Computer Organization and Architecture  
3 credits  
Fall Semester  
PREREQUISITE: PREREQUISITE: CSC 120 OR CIS 324
CSC322 System Programming  
3 credits  
Spring Semester  
PREREQUISITE: CSC 220 OR CIS 324

CSC329 Introduction to Game Programming  
3 credits  
Spring Semester  
Fundamental programming issues in game design: Software design; Version control; Basic graphics; GUI programming. Large-scale game project: Team development of a functional game; Graphics and GUI component; Networking component; Core game engine.  
PREREQUISITE: CSC 220.

CSC401 Computer Science Practicum I  
1 credit  
Offered By Announcement Only  
Implementation of techniques, algorithms, and data structures being taught in a co requisite computer science course.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC402 Computer Science Practicum II  
1 credit  
Offered By Announcement Only  
Implementation of techniques, algorithms, and data structures being taught in a co requisite computer science course.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC403 Computer Science Practicum III  
1- 3 credits  
Offered By Announcement Only  
Implementation of techniques, algorithms, and data structures being taught in a co requisite computer science course.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC405 Computer Science Seminars  
1 credit  
Fall & Spring Semester  
PREREQUISITE: 12 CREDITS IN CSC COURSES

CSC410 Computer Science Project Planning  
1- 3 credits  
Offered By Announcement Only  
Planning for the implementation of a Computer Science project, including: Problem analysis, System architecture design, Algorithm and data structure selection, User interface design, Verification and validation plan, and Prototyping.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC411 Computer Science Project Implementation  
1- 3 credits  
Offered By Announcement Only  
Implementation of a Computer Science project, including: Hardware preparation, Component implementation, System integration, Verification and validation, and Documentation.  
PREREQUISITE: CSC 410 OR PERMISSION OF INSTRUCTOR.
CSC412 Computer Science Internship
1-3 credits
Offered By Announcement Only
A commercial computing environment. Normally 50 internship hours are required per credit earned (the host company must supply documentary evidence of hours worked).
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC481 Undergraduate Teaching Assistant Training in Computer Science
1-3 credits
Fall & Spring Semester
Training and teaching assistant for a specific course, in computer laboratories.
May be taken multiple times, assisting maximally twice for a given course.
PREREQUISITE: “A” GRADE IN THE COURSE IN WHICH STUDENT IS TO ASSIST, AND PERMISSION OF INSTRUCTOR.

CSC498 Senior Topics in Computer Science
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC506 Logic
3 credits
Offered By Announcement Only
PREREQUISITE: MTH 230 OR 309 OR PERMISSION OF THE INSTRUCTOR.

CSC507 Data Security and Cryptography
3 credits
Offered By Announcement Only
Access, information flow, and inference controls. Network security and management.
Encryption algorithms. Cryptographic techniques.
PREREQUISITE: (CSC 517 OR 527)

CSC517 Data Structures and Algorithm Analysis
3 credits
Fall & Spring Semester
Distributed algorithms. Cryptographic algorithms. Geometric algorithms.
PREREQUISITE: MTH 309, AND CSC 220.

CSC518 Interpreters and Compiler Theory
3 credits
Offered By Announcement Only
Translation of higher-level languages into machine language. Grammars, parsing, scanners, precedence relations. Run-time storage and symbol table organization.
PREREQUISITE: CSC 519.

CSC519 Program Languages
3 credits
Fall Semester
PREREQUISITE: CSC 517.
CSC521 Principles of Computer Operating Systems
3 credits  Fall Semester
Process management. Scheduling and dispatch. Interprocess communication. Memory
for UNIX.
PREREQUISITE: (CSC 314 OR 350), (CSC 322 OR PERMISSION OF INSTRUCTOR).

CSC523 Database Systems
3 credits  Fall Semester
Information models and systems. Database systems. Data modeling. Relational databases.
Relational database design. Database query languages. Database Mining concepts,
Web database programming.
PREREQUISITE: CSC 517.

CSC524 Computer Networks
3 credits  Spring Semester
Computer networks and network applications. The protocol stack. Routing, switching
and bridging technologies. Models of network computing. Internet standards and
protocols.
PREREQUISITE: (CSC 314 OR 350), (CSC 322 OR PERMISSION OF INSTRUCTOR).

CSC527 Theory of Computing
3 credits  Spring Semester
Sets, relations, and languages. Automata theory. Basic computability theory. Turing
machines. The complexity classes P and NP.
PREREQUISITE: CSC 220, MTH 309

CSC528 Introduction to Parallel Computing
3 credits  Offered By Announcement Only
Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory
parallel programming, software with open MPI software package. Applications: vector
and matrix operations, sorting, image processing.
PREREQUISITE: CSC 517

CSC529 Introduction to Computer Graphics
3 credits  Offered By Announcement Only
Graphic systems. Graphic communication. Geometric modeling (2D and 3D representations).
PREREQUISITE: CSC 220, MTH 210

CSC531 Introduction to Software Engineering
3 credits  Spring Semester
Requirements and specifications. Design, validation, and evolution. Project management.
Tools and environments. Foundations of human-computer interaction. Risks and liabilities
of computer-based systems. Intellectual property.
PREREQUISITE: CSC 322 OR 517.

CSC540 Algorithm Design and Analysis
3 credits  Offered By Announcement Only
Design techniques include divide-and-conquer, greedy method, dynamic programming,
backtracking. Time and space complexity. Sorting, searching, combinatorial and
graph algorithms.
PREREQUISITE: CSC 517.
CSC545 Introduction to Artificial Intelligence
3 credits Offered By Announcement Only
PREREQUISITE: CSC 220 AND MTH 309.

CSC547 Computational Geometry
3 credits Offered By Announcement Only
Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.
PREREQUISITE: CSC 517

CSC548 Bioinformatics Algorithms
3 credits Fall Semester
PREREQUISITE: (CSC120 OR CSC210) AND (BIL150 OR BIL104 OR BIL352 OR BIL552 OR CSC 552)

CSC552 Bioinformatics Tools
3 credits Fall Semester
Databases and tools of bioinformatics, as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, and protein structure-function analysis, and various applications.
PREREQUISITE: BIL 250 OR (BIL 150 AND PERMISSION OF INSTRUCTOR)

CSC555 Multimedia Systems
3 credits Offered By Announcement Only
PREREQUISITE: CSC 517.

CSC595 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC596 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC597 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC598 Topics in Computer Science
1- 3 credits Offered By Announcement Only

CSC599 Topics in Computer Science
1- 3 credits Offered By Announcement Only

ECOSYSTEM SCIENCE & POLICY
ECS111 Introduction to the Earth’s Ecosystem
3 credits Fall & Spring Semester
Earth's ecosystem and the interactions of humans with it. Concepts in ecology, environmental science and policy. Two field trips. Team-taught.
ECS112 Field Problems in Ecosystem Science and Policy
2 credits Spring Semester
Problem solving in ecology and environmental management. Class projects and case studies providing experience in identifying problems, quantifying scientific issues and considering management options and outcomes. Extensive field experience.
PREREQUISITE: ECS 111 OR PERMISSION OF THE INSTRUCTOR

ECS113 Introduction to Environmental Policy
3 credits Fall Semester
Theories and case studies from various fields, including anthropology, economics, ethics, geography, political science and psychology, will be used to explore the multiple perspectives that influence group and individual perceptions of environmental issues.
PREREQUISITE: ECS 111

ECS201 Seminar Series in Contemporary Environmental Issues I
1 credit Fall Semester
Current environmental topics involving interaction of science and policy.

ECS202 Seminar Series in Contemporary Environmental Issues II
1 credit Spring Semester
Current environmental topics involving interaction of science and policy.

ECS204 Environmental Statistics
3 credits Fall & Spring Semester
An overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data.
PREREQUISITE: MTH 103 OR HIGHER, PLUS SIX (6) CREDITS IN ECS.

ECS232 Ecological Principles and Environmental Applications
3 credits Fall Semester
PREREQUISITE: ECS 111

ECS272 Special Topics in Ecosystem Science and Policy
1-3 credits Offered By Announcement Only
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS301 Tools for Environmental Decision-Making: The Quantitative Perspective
3 credits Fall Semester
Quantitative decision-making techniques and methodologies.
PREREQUISITE: ECS 111, 112.

ECS302 Perspectives on Environmental Decision Making
3 credits Fall & Spring Semester
Analytical techniques to assess human impacts on the environment. Team-taught by faculty from law, ethics, anthropology and economics with experience in local, regional and global environmental management issues.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF THE INSTRUCTOR

ECS309 Microbes and the Environment
3 credits Fall Semester
PREREQUISITE: GSC 110/114, GSC 111 OR PERMISSION OF INSTRUCTOR
ECS310 Sustainable Living  
3 credits  
Spring Semester  
Sustainable Living explores ways of living that can be sustained for thousands of years, without further damage to earth, ocean and atmosphere. Topics covered include renewable energy, agricultural practices, water issues, green building, low carbon transportation and healthy living/eating. Students advocate for sustainable practices of their choice in writing and in oral/visual presentations. Frequent field trips.  
PREREQUISITE: ECS 111 OR PERMISSION OF INSTRUCTOR.

ECS332 Ecology and Land Use in the Galapagos  
3 credits  
Fall Semester  
PREREQUISITE: BIL 250 OR BIL 255 OR PERMISSION OF INSTRUCTOR.

ECS371 Readings in Ecosystem Science and Policy  
1-2 credits  
Offered By Announcement Only  
Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS372 Special Topics in Ecosystem Science and Policy  
1-3 credits  
Offered By Announcement Only  
Content varies by semester and is indicated in parentheses following course number and title in class schedule.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ECS373 Topics in Ecosystem Science  
3 credits  
Fall & Spring Semester & First & Second Summer Session

ECS374 Topics in Environmental Policy  
3 credits  
Fall & Spring Semester & First & Second Summer Session

ECS375 Topics in Environment and the Humanities  
3 credits  
Offered By Announcement Only

ECS376 Topics in Environmental Communication  
3 credits  
Offered By Announcement Only

ECS377 Topics in Environmental Economics and Development  
3 credits  
Offered By Announcement Only

ECS380 Field Studies in Ecosystem Science and Policy  
1-4 credits  
Offered By Announcement Only  
Field course to various U.S. and international regions, focusing on current and historic interactions of humans with the local environment. Includes water, land, and mineral resources as well as impacts on local ecosystems. Emphasis on current management efforts and potential impacts of climate change.  
PREREQUISITE: ADVANCED UNDERGRADUATE STANDING AND PERMISSION OF DEPARTMENT

ECS401 Internship  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Students selecting the internship will be required to spend a minimum of 120 contact hours working in an outside firm or agency whose mission is to address environmental issues where science and policy intersect.  
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.
ECS402 Thesis
3 credits  Fall & Spring Semester & First & Second Summer Session
Individual, original research of independent study supervised by a UM faculty member and concluded by formal thesis preparation, public oral defense and submission of the thesis.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR

ECS403 Interdisciplinary Approaches
3 credits  Fall & Spring Semester
Students with diverse disciplinary backgrounds will design an interdisciplinary study focused on an environmental problem with a major science component and significant societal implications. Students will apply quantitative methods, formulate usable policy, and communicate their results.
PREREQUISITE: CO-REQUISITES OR PREREQUISITES ECS 301, ECS 302

ECS405 APPLIED RESEARCH IN ECOSYSTEM SCIENCE AND POLICY
1-3 credits  Fall & Spring Semester & Second Summer Session
Faculty-mentored applied research in environmental topics. Projects in natural ecosystems, sustainable design and business, and communication of environmental issues.
PREREQUISITE: 9 CREDITS IN ECS

ECS432 Ecology in the Galapagos
3 credits  Fall Semester
PREREQUISITE: BIL 332/ ECS 332 OR PERMISSION OF INSTRUCTOR

ECS433 Conservation in Practice
3 credits  Fall Semester
PREREQUISITE: BIL 432/ ECS 432 OR PERMISSION OF INSTRUCTOR

ECS501 Interdisciplinary Environmental Theory
3 credits  Fall Semester
Theoretical approaches in environmental and social science fields, including conservation biology, ecology, geography, economics, sociology, anthropology, philosophy, and interdisciplinary approaches. Themes include human ecology, historical ecology, landscape ecology, environmental law and ethics, perception of risk and uncertainty, vulnerability and adaptation, and environmental valuation.
PREREQUISITE: SENIOR OR GRADUATE STANDING IN ECS

ECS503 Interdisciplinary Environmental Methods
3 credits  Fall Semester
Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.
PREREQUISITE: SENIOR OR GRADUATE STANDING IN ECS
ECS507  INTERDISCIPLINARY ENVIRONMENTAL DECISION ANALYSIS
3 credits  Fall Semester
Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm. Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.
PREREQUISITE: SENIOR OR GRADUATE STANDING IN ECS.

ECS572  Special Topics in ECS
0-3 credits  Fall & Spring Semester & First & Second Summer Session
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

ECS580  Field Studies
1-4 credits  Offered By Announcement Only
This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.
PREREQUISITE: ADVANCED UNDERGRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ENGLISH

ENG103  Basic Academic Writing
3 credits  Fall & Spring Semester
Intensive approach to the basics of academic writing with emphasis on building written fluency, using conventions of standard written English, and editing for precision and correctness. Intended for students who need extra preparation before entering ENG 105. Not for credit toward graduation.

ENG105  English Composition I
3 credits  Fall & Spring Semester
Introduction to written academic argument and inquiry. Not for major or minor. Cannot be taken on credit-only option.

ENG106  English Composition II
3 credits  Fall & Spring Semester
Advanced approaches to written academic argument, with emphasis on textual analysis and incorporation of secondary sources. Not for major or minor. Cannot be taken on credit-only option.
PREREQUISITE: ENG 105.

ENG107  English Composition II: Science and Technology
3 credits  Fall & Spring Semester
Advanced approaches to written academic argument, with emphasis on textual analysis and incorporating source material using readings and approaches connected to science and technology. Alternative to ENG 106. Not for major or minor. Cannot be taken on credit-only option.
PREREQUISITE: ENG 105-ENGLISH COMPOSITION I

ENG20T  Advanced Composition
0 credit  Not Offered; Transfer Credit Only
PREREQUISITE: MDCC TRANSFER COURSE.
ENG201 World Literary Masterpieces I  
3 credits  Fall & Spring Semester & First & Second Summer Session  
Comparative study of literary masterpieces from ancient times through the Renaissance.  
Satisfies writing requirement.  
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG202 World Literary Masterpieces II  
3 credits  Fall & Spring Semester & First & Second Summer Session  
Comparative study of literary masterpieces from the Renaissance to the present.  
Satisfies writing requirement.  
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG205 Jewish Literature  
3 credits  Offered By Announcement Only  
Selections from the Bible, the Talmud, the Kabbalah, medieval poetry and prose,  
Yiddish and Sephardic literature, and contemporary American and Israeli writers.  
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG208 Advanced Academic Writing for Transfer Students  
3 credits  Fall & Spring Semester  
Review of research techniques and revision strategies. Completes the university  
composition requirement for those students who transfer into UM with credit for  
one composition course from another institution. Open only to transfer students  
who have received transfer credit for either English 105 or English 106. Not open  
to students who have taken either English 105 and/or 106 at UM.  
PREREQUISITE: OPEN ONLY TO TRANSFER STUDENTS WHO HAVE RECEIVED TRANSFER CREDIT  
FOR EITHER ENGLISH 105 OR ENGLISH 106. NOT OPEN TO STUDENTS WHO HAVE TAKEN EITHER  
ENGLISH 105 AND/OR 106 AT UM

ENG209 Creative Writing  
3 credits  Fall & Spring Semester & First & Second Summer Session  
Analysis and writing of Short stories and poems. Cannot be taken for credit only.  
PREREQUISITE: ENG 105 OR EQUIVALENT. CANNOT BE TAKEN FOR CREDIT ONLY.

ENG210 Literary Themes and Topics  
3 credits  Offered By Announcement Only  
Literary analysis and practice in critical writing through the study of selected  
works; themes and topics vary by semester.  
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG211 English Literature I  
3 credits  Fall & Spring Semester & First & Second Summer Session  
Selected readings from the middle ages to the late 18th century. Satisfies writing  
requirement.  
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG212 English Literature II  
3 credits  Fall & Spring Semester & First & Second Summer Session  
Selected readings from the late 18th century to the present. Satisfies writing  
requirement.  
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106
ENG213 American Literature I
3 credits                    Fall & Spring Semester & First & Second Summer Session
Selected American authors prior to the Civil War. Satisfies writing requirement.
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG214 American Literature II
3 credits                    Fall & Spring Semester & First & Second Summer Session
Selected American authors from the Civil War to the present. Satisfies writing requirement.
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG215 English and American Literature by Women
3 credits                                              Offered By Announcement Only
A survey of women writers from the Middle Ages to the present; explores the female literary tradition and women's relationship to culture and society.
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG220 Introduction to Poetry
3 credits                                              Offered By Announcement Only
Introduction to the forms of poetry through the analysis of representative poems.
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG221 Introduction to Fiction
3 credits                                              Offered By Announcement Only
Forms of prose fiction and the analysis of representative short stories and novels.
PREREQUISITE: PREREQUISITE OR COREQUISITE ENG 106

ENG230 Advanced Business Communication
3 credits                    Fall & Spring Semester & First & Second Summer Session
Professional writing with critical attention to complex rhetorical situations.
Practice in formal and informal written communication styles.

ENG245 The Circle of Knowledge: Science and the Humanities
3 credits                                                    Fall Semester

ENG260 African-American Literature
3 credits                                              Offered By Announcement Only
Selected readings of the eighteenth century to the present.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG261 Literature of the Americas
3 credits                                              Offered By Announcement Only
Selected readings from North, Central, and South American, and Caribbean literatures from their origins to the present.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG290 Beginning Fiction Workshop
3 credits                    Fall & Spring Semester
Frequent exercises in workshop environment, with readings in contemporary fiction. Attention to tense and points of view; reviews of grammar and punctuation. 30-40 pages of creative writing, including development and revision of one full-length short story (12-20 pages).
PREREQUISITE: ENG 106 OR EQUIVALENT AND ADMISSION TO THE CREATIVE WRITING TRACK BASED ON CREATIVE WRITING SAMPLE.
ENG292 Beginning Poetry Workshop
3 credits
Fall & Spring Semester
Emphasis of creation and critique of new student poetry in workshop setting; continued reading in genre. Variety of styles and techniques presented, including line, image and metaphor. 12-15 new poems, plus revisions, required.
PREREQUISITE: ENG 106, OR EQUIVALENT AND ADMISSION TO THE CREATIVE WRITING TRACK BASED ON CREATIVE WRITING SAMPLE.

ENG301 The Study of Language
3 credits
Offered By Announcement Only
Language itself as an object of study; broad linguistic issues of language types, processes of language change, and language variation. Emphasis on language in "real world" applications such as law, folk culture, poetry, education, and computers.
PREREQUISITE: ENG106 OR EQUIVALENT.

ENG306 Advanced Composition
3 credits
Offered By Announcement Only
Composition and analysis of English prose. Topics vary. May be repeated if topics are different.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG310 Literature and Culture in Classical Greece and Rome, I
3 credits
Offered By Announcement Only
Major pre-classical and classical Greek writers, including Homer, Sappho, Pindar, Aeschylus, Herodotus, and Sophocles, treated by close analysis, and attention to connecting themes; Greek art and archeology in reference to specific texts.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG311 Literature and Culture in Classical Greece and Rome, II
3 credits
Offered By Announcement Only
Thucydides on the Peloponnesian War; the drama of Euripides and Aristophanes; the dialogues of Plato on Socrates' trial and death; Aristotle's Poetics. Early Roman tradition; Rome and its relation to Greek culture; Livy on Roman history; Cicero, Virgil's Aeneid, Marcus Aurelius.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG312 The European Middle Ages
3 credits
Offered By Announcement Only
British and continental literature and thought from the 5th through the 15th centuries.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG313 The European Renaissance
3 credits
Offered By Announcement Only
Major writers of the European Renaissance, such as Petrarch, Machiavelli, Castiglione, Erasmus, More, Rabelais, Montaigne, Marguerite de Navarre.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG314 The European Enlightenment
3 credits
Offered By Announcement Only
Major writers of the European Enlightenment, such as Locke, Montesquieu, Vico, Hume, Voltaire, Rousseau, Diderot, Lessing, Smith, and Kant.
PREREQUISITE: ENG 106 OR EQUIVALENT

884
ENG315 The Classical Epic Tradition
3 credits
Offered By Announcement Only
The rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG319 Shakespeare
3 credits
Offered By Announcement Only
Representative comedies, histories, tragedies and romances. Not for students who have taken ENG 430 or 431; may not be taken concurrently with ENG 430 or 431.
PREREQUISITE: ENG 106 OR EQUIVALENT. NOT FOR STUDENTS WHO HAVE TAKEN ENG 430 OR 431; MAY NOT BE TAKEN CONCURRENTLY WITH ENG 430 OR 431.

ENG321 Major American Novelists
3 credits
Offered By Announcement Only
Works by selected American novelists.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG323 Major British Novelists
3 credits
Offered By Announcement Only
Works by selected British novelists.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG325 Major European Novelists
3 credits
Offered By Announcement Only
Works by selected European novelists.
PREREQUISITE: ENG106 OR EQUIVALENT

ENG331 Legal Writing
3 credits
Offered By Announcement Only
A study of the composition of legal arguments in court opinions, legal briefs, oral arguments before the Supreme Court, and social-legal documents. Emphasis on analysis of issues, structure and style of legal writing, and the function of logic in persuasion.
PREREQUISITE: ENG 106 OR EQUIVALENT.

ENG333 Writing the Research Paper
3 credits
Offered By Announcement Only
Advanced techniques in conducting research and writing the research paper. Use of traditional library resources, on-line searches, the Internet, and other research methods. Strategies for effective presentation of research findings. Students not in the Bachelor of General Studies program need permission of instructor.
PREREQUISITE: ENG 106 OR EQUIVALENT. STUDENTS NOT IN THE BACHELOR OF GENERAL STUDIES PROGRAM NEED PERMISSION OF INSTRUCTOR.

ENG334 Legal Rhetoric
3 credits
Offered By Announcement Only
Legal texts and the rhetoric of legal discourse.
PREREQUISITE: ENG 106 OR EQUIVALENT
ENG340 Forms of the Novel
3 credits
Offered By Announcement Only
Techniques and esthetics of the novel form; emphasis on major tendencies in the evolution of long prose fiction rather than on chronological development.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG341 Modern British and American Poetry
3 credits
Offered By Announcement Only
Representative poets and critics of poetry since 1900; attention to the basic principles of poetics.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG342 Lyric Voices and Traditions
3 credits
Offered By Announcement Only
Major figures and trends in the history of lyric poetry.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG360 Comparative Literature of the Black World
3 credits
Offered By Announcement Only
Oral and written Black literature in Africa, the United States, the Caribbean, and South America.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG361 Caribbean Literature
3 credits
Offered By Announcement Only
Introduction to twentieth-century literature with special emphasis on the regional preoccupation with a distinctly Caribbean aesthetic.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG363 Jewish American Literature
3 credits
Offered By Announcement Only
Twentieth-century Jewish writers in the United States such as Singer, Bellow, Roth, Ozick, and Malamud.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG364 Sephardic Literature
3 credits
Offered By Announcement Only
Judeo-Spanish culture and literature from medieval times to the present.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG365 Literature of the Holocaust
3 credits
Offered By Announcement Only
Literature relating to the Nazi genocide and its aftermath.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG366 Asian American Literature
3 credits
Offered By Announcement Only
Literature by Asian immigrants and exiles in the United States.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG372 Women Writing: Theory and Practice
3 credits
Offered By Announcement Only
Women writers, emphasizing the role of gender in literary creation.
PREREQUISITE: ENG 106 OR EQUIVALENT
ENG373 Literary Representations of Women
3 credits
Offered By Announcement Only
The portrayal of women in literature from ancient times to the present.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG374 Women Writers
3 credits
Offered By Announcement Only
A study of women's writings and feminist criticism from 1930 to the present.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG375 Modern Drama
3 credits
Offered By Announcement Only
The major dramatists of the modern world: Ibsen, Chekhov, Strindberg, Shaw, Pirandello, and O'Neill.
PREREQUISITE: ENG OR EQUIVALENT

ENG376 Contemporary Drama
3 credits
Offered By Announcement Only
The dramatists of our time: Albee, Miller, Williams, Becket, Sartre, Genet, Pinter, Osborne, Stoppard, Durenmatt, and others.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG379 Modern Literature
3 credits
Offered By Announcement Only
Western literature of the modern era. emphasizing roots, traditions, practices.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG380 Contemporary Literature
3 credits
Offered By Announcement Only
Fiction, drama, and poetry from World War II to the present.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG383 The Literature of Science Fiction
3 credits
Offered By Announcement Only
A general survey of the literature of science fiction, with emphasis on writings of the twentieth century.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG384 The Bible as Literature
3 credits
Offered By Announcement Only
Selected readings from the Bible.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG385 Myth and Literature
3 credits
Offered By Announcement Only
A study of myth and ritual and their relation to literary works, from the early epic to contemporary literature.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG386 King Arthur in Literature
3 credits
Offered By Announcement Only
King Arthur in literature from the fifteenth to the twentieth century in England and America.
PREREQUISITE: ENG 106 OR EQUIVALENT
ENG387 Literature and Imperialism
3 credits
Offered By Announcement Only
Relationships between empire and literary expression. Works by authors such as Shakespeare, Behn, Defoe, Bronte, Conrad, Kipling, Melville, Yeats, Twain, and Forster.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG388 Literature and Popular Culture
3 credits
Offered By Announcement Only
Literary forms of popular expression, considered in relation to politics, ideology, gender, or race; comparison to other forms of popular culture in print, music, or the visual media.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG390 Intermediate Fiction Workshop
3 credits
Fall & Spring Semester
Review of craft issues presented in 290, with emphasis on development of structure and contemporary use of point of view.
PREREQUISITE: ENG 290 OR PERMISSION OF CREATIVE WRITING DIRECTOR. MAY NOT BE TAKEN CONCURRENTLY WITH ANOTHER CREATIVE WRITING WORKSHOP

ENG392 Intermediate Poetry Workshop
3 credits
Fall & Spring Semester
Review of craft issues presented in 292, integrating formal strategies with research topics.
PREREQUISITE: ENG 292 OR PERMISSION OF CREATIVE WRITING DIRECTOR. MAY NOT BE TAKEN CONCURRENTLY WITH ANOTHER CREATIVE WRITING WORKSHOP.

ENG395 Special Topics
3 credits
Offered By Announcement Only
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG396 Special Topics
3 credits
Offered By Announcement Only
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG397 Special Topics
3 credits
Offered By Announcement Only
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
PREREQUISITE: ENG 106 OR EQUIVALENT

ENG398 Directed Readings/Directed Research
3 credits
Offered By Announcement Only
By arrangement with instructor. Content varies.
PREREQUISITE: PERMISSION OF DIRECTOR OF UNDERGRADUATE STUDIES AND THREE CREDITS IN LITERATURE.
ENG401 Senior Seminar in Literature
3 credits
An intensive study of a literary topic or figure.
PREREQUISITE: 15 CREDITS IN LITERATURE AND AT LEAST ONE 400 LEVEL COURSE IN LITERATURE.

3 credits  
Offered By Announcement Only  
The legacy of colonialism as expressed in the works of Gordimer, Rushdie, Achebe, Walcott, Cesaire, Naipaul, Mukherjee, Crow Dog, Menchu, and others. Readings will address theoretical issues such as national formation, cultural hybridity, globalization.  
PREREQUISITE: SIX CREDITS IN LITERATURE.

ENG493 History of Literary Criticism  
3 credits  
Offered By Announcement Only  
PREREQUISITE: SIX CREDITS IN LITERATURE.

ENG494 Feminist Literary Theory  
3 credits  
Offered By Announcement Only  
Examination of women's contributions to literary theory.  
PREREQUISITE: SIX CREDITS IN LITERATURE INCLUDING AT LEAST ONE 300-LEVEL COURSE IN LITERATURE.

ENG495 Special Topics  
3 credits  
Offered By Announcement Only  
Content varies by semester and is indicated parenthetically following the title in the class schedule.  
PREREQUISITE: SIX CREDITS IN LITERATURE.

ENG496 Independent Study  
1-3 credits  
Offered By Announcement Only  
Content varies by semester and is indicated in parentheses following the title in the class schedule.  
PREREQUISITE: SIX CREDITS IN ENGLISH LITERATURE AND PERMISSION OF INSTRUCTOR.

ENG497 Senior Thesis I  
3 credits  
Offered By Announcement Only  
Content varies by semester and is indicated in parentheses following the title in the class schedule.  
PREREQUISITE: SENIOR STATUS APPROVAL OF THE DIRECTOR OF UNDERGRADUATE STUDIES, AND PERMISSION OF THE FACULTY THESIS DIRECTOR.

ENG498 Senior Thesis II  
3 credits  
Offered By Announcement Only  
Partial requirement for Departmental Honors in English. Thesis to be a documented essay on a literary subject written under the direction of a member of the English faculty.  
PREREQUISITE: ENG 497, SENIOR STATUS APPROVAL OF THE DIRECTOR OF UNDERGRADUATE STUDIES, AND PERMISSION OF THE FACULTY THESIS DIRECTOR.

ENG504 Form in Poetry  
3 credits  
Offered By Announcement Only  
Poetic works as literary objects, with attention to poetic trends and the creative process.  
PREREQUISITE: PERMISSION OF INSTRUCTOR. SIX CREDITS IN LITERATURE OR GRADUATE STANDING.
ENG505 Form in Fiction
3 credits
Offered By Announcement Only
Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.
PREREQUISITE: GRADUATE STUDENTS: PERMISSION OF INSTRUCTOR. UNDER-GRADUATES: SIX CREDITS IN LITERATURE AND PERMISSION OF INSTRUCTOR.

ENG560 Creative Writing: Fiction I
3 credits
Offered By Announcement Only
Advanced work in the writing of fiction.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND, FOR UNDERGRADUATE, SIX CREDITS IN ENGLISH AT THE 200 LEVEL OR ABOVE

ENG561 Creative Writing: Fiction II
3 credits
Offered By Announcement Only
Advanced work for students displaying superior ability for prose fiction writing.
Admission by recommendation or demonstration of skills.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ENG562 Creative Writing: Poetry
3 credits
Offered By Announcement Only
Advanced work in the writing of poetry.
PREREQUISITE: AT LEAST SIX CREDITS IN ENGLISH AT THE 200 LEVEL OR ABOVE OR GRADUATE STANDING.

ENG591 Graduate Practicum I: Teaching College Writing
0 credit
Fall Semester
Methods and problems in teaching English composition and college writing.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG592 Graduate Practicum II: Teaching College Literature
0 credit
Spring Semester
Methods and problems in teaching introductory literature courses.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG595 Special Topics
3 credits
Offered By Announcement Only
PREREQUISITE: FOR UNDERGRADUATES, SIX CREDITS IN LITERATURE OR PERMISSION OF INSTRUCTOR; FOR GRADUATE STUDENTS, PERMISSION OF DIRECTOR OF GRADUATE STUDIES.

FRENCH
FRE101 Elementary French I
3 credits
Fall & Spring Semester & First Summer Session
For students with no background or previous study of French. The focus of FRE 101 is the development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: university life, family, leisure activities, home and community. Includes both oral and written assessment of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French. Not open to students who have completed 2 or more years of high school French. Closed to heritage or native speakers of French.
FRE102 Elementary French II  
3 credits  
Fall & Spring Semester & First Summer Session  
Continuation of FRE 101. The development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.  
PREREQUISITE: FRE 101 OR THE EQUIVALENT OF FRE 101 AT ANOTHER INSTITUTION. CLOSED TO HERITAGE AND NATIVE SPEAKERS.

FRE105 Accelerated Elementary French  
3 credits  
Fall & Spring Semester  
For students with previous study of French desiring to review material covered in FRE 101 and 102 in preparation for continued study of French at the intermediate level. The focus of FRE 105 is the continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: family, leisure activities, home, and community, childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.  
PREREQUISITE: THREE OR MORE YEARS OF HIGH SCHOOL FRENCH OR THE EQUIVALENT. CLOSED TO HERITAGE AND NATIVE SPEAKERS.

FRE211 Intermediate French I  
3 credits  
Fall & Spring Semester & First Summer Session  
For students with previous study of elementary-level French. The continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: travel, technological innovations, the evolution of family values, and social and environmental issues. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.  
PREREQUISITE: FRE 102 OR FRE 105, OR EQUIVALENT. CLOSED TO HERITAGE OR NATIVE SPEAKERS OF FRENCH.

FRE212 Intermediate French II  
3 credits  
Fall & Spring Semester  
For students with some previous study of French at the intermediate level, who are familiar with all tenses and with vocabulary related to the topics covered in FRE 101-211. FRE 212 is the first semester of a two-semester sequence ending with FRE 214. The continued development of skills in reading, writing, speaking, and listening in French, with an additional emphasis on cultural competence in the French-speaking world. Themes on: relationships, cultural values, different historical perspectives, and current politics. These themes will be explored through articles, films and literary texts. The course will develop writing and reading strategies, providing them with the tools to think, read, and write critically and analytically in papers of 1-3 pages. Progress will also be accessed through quizzes and exams. Course conducted entirely in French.  
PREREQUISITE: FRE 211 OR 5-6 YEARS OF HIGH SCHOOL FRENCH. CLOSED TO NATIVE SPEAKERS OF FRENCH.
FRE214 Advanced French
3 credits                                  Fall & Spring Semester
Continuation of FRE 212. This course will prepare students for advanced literature, linguistics, and culture courses. The class will use films, literary works, and other cultural texts. Students will write analytic essays of 3-5 pages to develop style, vocabulary, and syntax. Course conducted entirely in French.
PREREQUISITE: FRE 212 CLOSED TO NATIVE SPEAKERS OF FRENCH.

FRE300 Nation on the fault lines: Haiti, Immigration and the Arts
3 credits                                  Fall Semester
This course in French culture and civilization will study the evolution of French society through film. Students will learn to "read" films critically and will examine 15 of the major films produced between 1929 and 2001, in addition to 4 short documentaries presenting the main aspects of the early stages of French Cinematography from 1895 to 1925 (Auguste and Louis Lumiere; Melies; Pathe, Zecca). This course will also include theoretical readings aimed at helping students develop analytical and critical skills useful in their evaluation of the contextual production of French cinema. This course is for students in the Bachelor of General Studies.

FRE301 Introduction to Literature and Culture in French
3 credits                                  Fall & Spring Semester
Selected materials from various genres and periods of French Literature. Further development of critical writing skills for non-native speakers. Closed to native speakers formally educated in French. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: FRE 214 OR EQUIVALENT.

3 credits                                  Offered By Announcement Only
Historical survey of French intellectual, artistic, and popular culture. Writing credit.
PREREQUISITE: FRE 214 OR EQUIVALENT.

FRE303 Introduction to Francophone Cultures
3 credits                                  Offered By Announcement Only
PREREQUISITE: FRE 214 OR EQUIVALENT

FRE310 Topics in French and Francophone Studies in Translation
3 credits                                  Offered By Announcement Only
PREREQUISITE: ENG 106 OR EQUIVALENT

FRE321 Literature, Film and Art in French: Topics
3 credits                                  Offered By Announcement Only
The study of literature through thematic readings. May be repeated for credit if topic is different. Topics vary. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE322 Topics in Global French Culture
3 credits                                  Offered By Announcement Only
Cultural issues in France and/or French-speaking regions. Topics such as film, Caribbean history, journalism, Francophone Africa, immigration. May be repeated for credit if topic is different. Writing credit.
PREREQUISITE: FRE 301 OR PERMISSION OF THE INSTRUCTOR, FRE 302 RECOMMENDED.
FRE363 Introduction to Medieval and Renaissance French Literature
3 credits
Offered By Announcement Only
French literature from the 12th century to the end of the 16th century. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE364 Introduction to 17th and 18th Century French Literature
3 credits
Offered By Announcement Only
French literature from the 17th and 18th centuries. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE365 Introduction to 19th and 20th Century French Literature
3 credits
Offered By Announcement Only
French literature from the 19th and 20th centuries. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: FRE 301 OR EQUIVALENT.

FRE432 French for Global Business
3 credits
Fall Semester
Commercial Vocabulary, economic and technical terminology in French. Composition based on models of business correspondence directed to French speaking countries or firms.
PREREQUISITE: FRE 214 OR PERMISSION OF THE INSTRUCTOR.

FRE440 Advanced Oral Practice in French
3 credits
Offered By Announcement Only
French pronunciation based on phonetics. Exercises in diction and phonetic transcription.
PREREQUISITE: FRE 301 OR PERMISSION OF INSTRUCTOR.

FRE442 Advanced writing workshop in French
3 credits
Offered By Announcement Only
PREREQUISITE: FRE 301 OR PERMISSION OF INSTRUCTOR.

FRE495 Transfer Credits
1-3 credits
Not Offered; Transfer Credit Only
Awarded for 400-level course work at another institution for which UM has no direct equivalent.

FRE501 Capstone
3 credits
Fall & Spring Semester
Course with a broad-based topic designed to integrate high-level linguistic, critical and analytical skills with the body of knowledge acquired during the course of study toward the major. Topics vary. Open only to undergraduates in the last semester of their French major. Course is writing intensive; fulfills writing credit requirement.
PREREQUISITE: TO BE TAKEN IN THE LAST SEMESTER OF THE MAJOR.

FRE591 Directed Readings
1-3 credits
Offered By Announcement Only
May be repeated for credit if topic is different.
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.
FRE592 Directed Readings
1-3 credits
Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.

FRE593 Directed Readings
1-3 credits
Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.

FRE594 Senior honors Thesis I
3 credits
Fall & Spring Semester
Directed research for honors thesis.
PREREQUISITE: MUST HAVE COMPLETED AT LEAST TWELVE CREDITS AT THE 300-LEVEL OR ABOVE TOWARDS FRENCH MAJOR, MUST MEET ELIGIBILITY FOR HONORS IN FRENCH.

FRE595 Senior Honors Thesis II
3 credits
Fall & Spring Semester
Directed writing of honors thesis.
PREREQUISITE: FRE 594.

GEOGRAPHY

GEG105 World Regional Geography
3 credits
Fall & Spring Semester
An introduction to geography's basic concepts within the framework of a comprehensive survey of the world's major regions.

GEG110 Introduction to Human Geography
3 credits
Fall & Spring Semester
An introduction to the sub-fields of human geography by an examination of patterns and process in the international system.

GEG120 Physical Geography
3 credits
Fall & Spring Semester
The Earth system (atmosphere; hydrosphere; biosphere; lithosphere) emphasizing the interrelationships among its constituent subsystems; human-environmental interactions and geographic dimensions of these four subsystems.

GEG199 Introduction to GIS (Geographic Information Systems)
0-3 credits
Fall & Spring Semester
This course uses lecture and lab sessions to teach fundamental concepts in Geographic Information Systems (GIS) and introduce related geographic technologies (Global Positioning Systems, Remote Sensing, etc.). Topics include the nature and sources of digital and spatial data, map projections and datum, raster and vector data structures, raster and vector spatial analysis, and GIS project design. Students will learn to use ArcView and Idrisi, two leading GIS software programs.

GEG201 Topics in Geography
3 credits
Fall & Spring Semester
Content and prerequisites vary.
PREREQUISITE: ANY 100 LEVEL GEG COURSE.

GEG212 Geography of Middle America and the Caribbean
3 credits
Fall Semester
Human and physical geography of Middle America and the Caribbean.
GEG222 Geography of South America  
3 credits
Spring Semester
This course is an introduction to the geography of South America. It explores the physical, political, economic, social and cultural geographies of this diverse and complex world region. The course covers agrarian and urban land-use patterns, migration and territorial development and includes urban and regional planning, health, education and social services, with particular attention given to how these interventions address problems of uneven territorial development and social inequality.

GEG232 Geography and Development in Africa  
3 credits
Fall Semester
A survey of the geography of Africa south of the Sahara, with particular emphasis on development and the role of African states in the international system.

GEG242 Economic and Political Geography of the Middle East  
3 credits
Fall Semester
Human and physical geography of the Middle East with emphasis on current topics.

GEG252 United States and Canada  
3 credits
Spring Semester
Human and physical geography of North America.

GEG262 Political Geography of Europe  
3 credits
Spring Semester
Human and physical geography of contemporary Europe.

GEG272 Jewish Geography  
3 credits
Spring Semester
Introduces basic concepts in world Jewish geography and the geography of American Jews.
PREREQUISITE: NONE

GEG280 Introduction to Cartography and Computer Mapping  
3 credits
Offered By Announcement Only
Methods and techniques of cartography. Cartographic representation of spatial data.

GEG292 Jewish Geography  
3 credits
Spring Semester
Introduces basic concepts in world Jewish geography and the geography of American Jews.
PREREQUISITE: NONE

GEG301 Topics in Geography  
3 credits
Offered By Announcement Only
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.

GEG304 World Economic Geography  
3 credits
Fall Semester
Geographic analysis of the distribution of economic activities with emphasis on present-day patterns and trends of production, distribution, and consumption of the world's major commodities.
PREREQUISITE: ANY 100 OR 200-LEVEL COURSE IN GEOGRAPHY.
GEG320 TOPICS IN CLIMATOLOGY; EXTREME WEATHER  
3 credits  
Spring Semester  
The fundamentals of atmospheric phenomena with an emphasis on understanding concepts and processes behind extreme manifestations of weather and climate. Topics covered include tornadoes, hurricanes, hailstorms, blizzards, floods.  
PREREQUISITE: GEG 120 OR INSTRUCTOR'S PERMISSION

GEG341 Geography of Population and Development  
3 credits  
Spring Semester  
Major world population issues are discussed, including population growth, fertility patterns, mortality change, migration, ethnicity, and population structure changes.  
PREREQUISITE: ANY 100 OR 200-LEVEL GEOGRAPHY COURSE.

GEG350 Gender Relations in Global Perspective: A Social and Economic Geography  
3 credits  
Fall Semester  
Comparative geographic analysis of gender (male and female) roles in their societies and associated issues.  
PREREQUISITE: ANY 100 OR 200 GEOGRAPHY COURSE.

GEG362 World Urban Geography  
3 credits  
Offered By Announcement Only  
An introduction to the principles and methods that apply to the geographic study of cities and urbanization.  
PREREQUISITE: ANY 100- OR 200-LEVEL GEOGRAPHY COURSE.

GEG370 Conservation of Resources  
3 credits  
Offered By Announcement Only  
Problems of resource availability in an urban-industrial society.  
PREREQUISITE: ANY 100 OR 200-LEVEL GEOGRAPHY COURSE.

GEG371 Environmental Geography: Current Issues  
3 credits  
Offered By Announcement Only  
Topics selected from a wide range of current environmental problems from a geographical perspective. Students will become familiar with a wide range of ecological processes as well as the human forces that currently modify them.  
PREREQUISITE: ONE COURSE IN EITHER PHYSICAL GEOGRAPHY OR ECOLOGY OR PERMISSION OF INSTRUCTOR.

GEG391 Intermediate GIS (Geographic Information Systems)  
3 credits  
Fall & Spring Semester  
This course deals with fundamental concepts of raster and vector data manipulation and analysis through lectures and laboratory exercises. Topics covered include vector polygon editing and topology, data quality assessment, integration of raster and vector data, basic concepts of remote sensing, cartographic modeling, suitability mapping, and multi-criteria evaluations.  
PREREQUISITE: GEG 199 OR PERMISSION OF INSTRUCTOR.

GEG392 Remote Sensing of the Environment  
3 credits  
Spring Semester  
Theory and techniques of environmental remote sensing and imagery interpretation for earth resources monitoring and management.  
PREREQUISITE: GEG 199 OR PERMISSION OF INSTRUCTOR.
GEG420 Geopolitics
3 credits
Analysis of contemporary global geopolitical issues.
PREREQUISITE: ANY 100- OR 200-LEVEL GEOGRAPHY COURSE.

GEG430 World Cities
3 credits
The role of major cities in the world economy and the social consequences of globalization for urban areas.
PREREQUISITE: ANY 100- OR 200- LEVEL GEG COURSE.

GEG471 Ecological Biogeography
3 credits
Survey in modern Biogeography, emphasizing ecological rather than evolutionary concepts; the distributions of species and factors that have influenced the organization of plant communities.
PREREQUISITE: ONE COURSE IN EITHER PHYSICAL GEOGRAPHY OR ECOLOGY OR PERMISSION OF INSTRUCTOR.

GEG481 Introduction to Quantitative Methods
3 credits
The use of basic methods or quantitative analysis in geographic research.
PREREQUISITE: GEOGRAPHY MAJOR OR MINOR AND MTH 101 OR EQUIVALENT.

GEG491 GIS and Environmental Modeling
3 credits
Creation, editing, management and display of spatial databases in ARC/INFO, a vector-based GIS (Geographic Information System).
PREREQUISITE: GEG 391 OR PERMISSION OF INSTRUCTOR.

GEG495 Advanced Seminar in Human Geography
3 credits
Seminar on development-related issues in South Asia.
PREREQUISITE: ANY 100 OR 200 LEVEL GEG COURSE.

GEG501 Place, Region, Nature
3 credits
Introductory seminar for Graduate students about geographic thought and geographical traditions.
PREREQUISITE: AT LEAST 6 CREDITS IN GEOGRAPHY OR PERMISSION FROM INSTRUCTOR.

GEG510 Survey Research in Geography
3 credits
The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.

GEG511 Field Studies in Geography
1-6 credits
One to six weeks of intensive geographic field studies outside the Miami area. Lectures will be given prior to departure. The locations and topics of study will vary.
PREREQUISITE: GEG 105 OR ANY 200-LEVEL GEOGRAPHY COURSE.
GEG515 Human Dimensions of Global Environmental Change
3 credits  Fall Semester
Explores the human dimensions of global environmental change using an interdisciplinary approach. The course is reading and writing intensive. Special attention is given to the central role that land-use/cover change plays in the larger realm of global environmental change.
PREREQUISITE: GEG 105 AND JUNIOR/SENIOR STANDING.

GEG520 Immigration to the United States
3 credits  Fall Semester
A description and analysis of current immigration patterns in the United States. PREREQUISITE: ANY 100 OR 200 LEVEL COURSE OR PERMISSION FROM INSTRUCTOR.

GEG521 Global Trade
3 credits  Offered By Announcement Only
Geographic analysis of the distribution of economic activities and capabilities, with emphasis on contemporary trade patterns and policies.

GEG522 Urbanization in the Developing World
3 credits  Spring Semester
Patterns and processes in large cities in the developing world are examined.
PREREQUISITE: ANY 100 OR 200 LEVEL COURSE IN GEOGRAPHY OR PERMISSION FROM INSTRUCTOR.

GEG523 Seminar in Urban Management
3 credits  Fall Semester
Identification of and responses to urban problems in large cities in European and Latin American metropolitan areas. Emphasis is on demographic, cultural/ethnic, service-provision, environmental, transportation, and land-use problems. Approach is via case studies, theory applications, and planning practicalities.

GEG525 Problems in Geography
1-6 credits  Fall & Spring Semester
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.
PREREQUISITE: GEOGRAPHY GRADUATE STUDENT, MAJOR, OR MINOR ONLY.

GEG530 Resources and Society
3 credits  Offered By Announcement Only
This course examines the relations between human society and material nature from within a broad theoretical perspective, relating questions of science, culture, and technology to the politics and economics of natural resources, focusing particularly on water, food, and petroleum.
PREREQUISITE: 300-LEVEL COURSE IN HUMAN GEOGRAPHY OR PERMISSION OF INSTRUCTOR.

GEG535 Internship in Geography
1-4 credits  Fall & Spring Semester
Students are assigned to work for a local public or private agency.
PREREQUISITE: 15 CREDITS IN GEOGRAPHY AND PERMISSION OF DEPARTMENT.

GEG545 Special Topics
3 credits  Fall & Spring Semester
PREREQUISITE: NINE CREDITS IN GEOGRAPHY.
GEG552 Seminar on the Geography of South Florida
3 credits
Offered By Announcement Only
Human and physical geography of South Florida.
PREREQUISITE: NINE CREDITS IN GEOGRAPHY.

GEG555 Field Methods and Geospatial Analysis
3 credits
Fall & Spring Semester

GEG570 Gender and Development
3 credits
Offered By Announcement Only
Theoretical and empirical examination of gender and development processes through exploration of gender and development evolution as an academic discipline and application in development practice.
PREREQUISITE: GRADUATE STUDENTS OR PERMISSION OF INSTRUCTOR.

GEG580 Introductory Quantitative Methods for Geographical Analysis.
3 credits
Spring Semester
Basic quantitative methods for geographic analysis.
PREREQUISITE: GRADUATE STANDING

GEG582 Advanced Quantitative Methods
3 credits
Offered By Announcement Only
Continuation of GEG 481. The use of statistical methods and techniques in the solution of geographic research problems.
PREREQUISITE: GEG 481 OR GEG 580 OR PERMISSION OF INSTRUCTOR

GEG585 Advanced Catography
3 credits
Fall & Spring Semester

GEG591 Introduction to GIS (Geographic Information Systems) for graduate students
0-3 credits
Offered By Announcement Only
Overview of basic concepts in GIS (Geographic Information Systems) for students wishing to get graduate credit. This class involves a student project using GIS.

GEG592 Advanced Environmental Remote Sensing
3 credits
Fall & Spring Semester
PREREQUISITE: GEG 199 OR EQUIVALENT

GEG593 Intermediate GIS
3 credits
Fall & Spring Semester
PREREQUISITE: GEG 591 OR EQUIVALENT OR PERMISSION OF INSTRUCTOR

GEG594 GIS and Environmental Modeling
3 credits
Fall & Spring Semester
PREREQUISITE: GEG 391 OR EQUIVALENT

GEG595 Web GISd Seminar on South Asia
3 credits
Fall & Spring Semester
Seminar on development-related issues in South Asia.
PREREQUISITE: GEG 391 OR EQUIVALENT
GSC101 Origin and Evolution of Planet Earth  
3 credits  
Fall & Spring Semester  
The origin of the elements and the evolution of the universe. The formation and early evolution of the solar system. The differentiation of the earth into core, mantle, and crust. Origin of the oceans and atmosphere.

GSC102 Evolution of the Biosphere  
3 credits  
Fall & Spring Semester & Second Summer Session  
The physical basis of life. The origin, early evolution, history of life on Earth. Emphasis on major crises and innovations, including the evolution of modern man.

GSC103 Evolution of the Modern Earth's Environment  
3 credits  
Fall & Spring Semester & First Summer Session  

GSC104 The Coastal Environment of South Florida  
1 credit  
Offered By Announcement Only  
Lectures and excursions to the coastal environment and the Everglades.  
PREREQUISITE: NOT FOR MAJOR OR MINOR

GSC105 The Global Environment  
3 credits  
Fall Semester  
Ongoing problems in earth systems: global warming, ozone depletion, energy shortages, air and water pollution, radioactivity.

GSC106 Geological Influences on Society  
3 credits  
Spring Semester  

GSC107 Natural Disasters - Hollywood Vs. Reality  
3 credits  
Spring Semester  
This course will explore the causes, effects and societal responses to disasters. We will look at a variety of natural hazards and related disasters including flooding, volcanoes, landslides, earthquakes, hurricanes, tsunami and drought. Using excerpted segments of "disaster films" in conjunction with scientific treatments, we can identify the causes, frequency, consequences, risks, and public perceptions of natural hazards.  
PREREQUISITE: NONE

GSC110 The Earth System  
3 credits  
Fall & Spring Semester & First Summer Session  
Interactions among the major components of the Earth System - the geosphere, the hydrosphere, the atmosphere, and the biosphere. To be taken concurrently with GSC 114 lab section.

GSC111 Earth System History  
4 credits  
Fall & Spring Semester  
Earth History, beginning with earliest origins and surveying major steps in the evolution of the geosphere, atmosphere, hydrosphere, and biosphere.
GSC114 Marine Geology Lab/Field Study
2 credits  Fall & Spring Semester
PREREQUISITE: COREQUISITE. GSC 110.

GSC115 Environmental Geology Lab/Field Study
2 credits  Fall & Spring Semester & First & Second Summer Session
Minerals, rocks, sediments, soils, maps, imagery, fossils and paleoenvironmental reconstruction, methods for studying dynamics and human impact on surficial environments. Field introduction to environmental geology problems and methods. Co requisite: GSC 110 or 120.
PREREQUISITE: COREQUISITE GSC 110 OR 120.

GSC131 Volcanoes and Society
1 credit  Spring Semester
Impact of volcanoes on past and present human civilizations. Topics include the origin of volcanoes, types of volcanic hazards, impact of volcanoes on climate, beneficial aspects of volcanic eruptions, and historical examples.

GSC132 History of Life in the Universe
1 credit  Spring Semester

GSC133 Dinosaurs and Disasters
1 credit  Spring Semester
Examination of the biology, evolution and extinction of the dinosaurs.

GSC204 Environmental Statistics
3 credits  Fall & Spring Semester
This introductory course provides an overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data. PREREQUISITE: MTH 103 OR HIGHER, PLUS SIX (6) CREDITS IN GSC.

GSC230 Reef Systems Through Time
3 credits  Spring Semester
Interacting geological, physical, chemical, biological, and climatic processes that define a reeval setting and system. Field trips included. PREREQUISITE: GSC 110, 111.

GSC231 Field Study of Reef Systems Through Time
2 credits  Spring Semester
GSC240 Introduction to Marine Geology
3 credits
Offered By Announcement Only
The principal marine geological environments of the world, their substrate, their sediments, their flora and fauna, and their evolution through time.
PREREQUISITE: GSC 110 OR PERMISSION OF INSTRUCTOR.

GSC260 Earth Materials
4 credits
Fall Semester
Physical and optical properties of common rock-forming minerals and their occurrence in igneous, metamorphic, sedimentary rocks, and ore deposits. Lecture, 3 hours; laboratory, 4 hours.
PREREQUISITE: GSC 110; PREREQUISITE OR COREQUISITE: CHM 111.

GSC301 Science and Human Affairs in the 20th Century
3 credits
Spring Semester
Scientific descriptions of the technologies arising in the 20th century, and the interactions between them and our civilization. Course will be divided into four parts: World War I, the interwar years, World War II, and the postwar years. Grades will be based on weekly quizzes, three hour-exams, and a final. An extra-credit term paper will be suggested.
PREREQUISITE: GSC 101.

GSC310 Microbes and the Environment
3 credits
Fall Semester
This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.
PREREQUISITE: GSC110/114, GSC 111 OR CONSENT OF INSTRUCTOR.

GSC311 Field Study of Volcanoes and Society
2 credits
Spring Semester
Field trip to Popocatepeti and surrounding sites near Mexico City. Nature and impact of explosive volcanic eruptions on prehistoric civilizations. Fee required.
PREREQUISITE: GSC 110 OR PERMISSION OF INSTRUCTOR. GSC 440 RECOMMENDED.

GSC360 Depositional and Diagenetic Systems
4 credits
Fall Semester
Sedimentary processes, sedimentology, and sedimentary diagenesis. Physical, biological and chemical sedimentation in Earth's surficial environments. Paleoenvironmental and diagenetic history reconstruction using petrologic, hand specimen, and field methods. Cyclicity in sedimentary systems. Lecture, 3 hours; field/laboratory, 3 hours.
PREREQUISITE: GSC 110.
GSC380 Paleontology and Stratigraphy
4 credits
Spring Semester
Biostratigraphy, paleoecology, taphonomy, micro- and macroevolutionary processes, and physical and chemical methods used for stratigraphic correlation. Major groups of invertebrate phyla comprising the bulk of the fossil record. Lecture, 3 hours; laboratory, 2 hours.
PREREQUISITE: GSC 111.

GSC401 Senior Internship
3 credits
Offered By Announcement Only
Field and laboratory studies conducted in conjunction with an approved academic environmental or industrial research laboratory or agency.
PREREQUISITE: 15 CREDITS IN GEOLOGICAL SCIENCES AND PERMISSION OF THE DEPARTMENT.

GSC410 Environmental Geochemistry
3 credits
Spring Semester
Natural distribution of the elements on earth, and how this is being changed. Radioactivity and energy, greenhouse warming and ozone depletion, water and waste and other environmental problems.
PREREQUISITE: GSC 110; CHM 111 OR PERMISSION FROM THE INSTRUCTOR.

GSC420 Geophysics
3 credits
Spring Semester
PREREQUISITE: PHY 205, & 206. OR PERMISSION OF INSTRUCTOR.

GSC440 Igneous and Metamorphic Petrology
4 credits
Fall Semester
Genesis and classification of igneous and metamorphic rocks, field relationships of rock assemblages, and results of recent laboratory investigations. Identification of common rock types in hand specimens and by thin-section and X-ray diffraction techniques. Lecture, 3 hours; laboratory, 3 hours.
PREREQUISITE: GSC 260.

GSC450 Sedimentology
4 credits
Offered By Announcement Only
Sedimentary environment and processes. The geochemistry, formation and diagenesis of sediments. The role of physical and biological factors, including tectonism and climate. Use of sediments in paleoenvironmental reconstructions. Genesis of sedimentary economic deposits, with special emphasis on the formation of petroleum. Lecture, 3 hours; laboratory, 2 hours.

GSC480 Structural Geology
4 credits
Spring Semester
Behavior of rock materials; analysis, description and classification of geologic folds, faults, joints; analysis of rock fabrics; tectonic and geologic history of continents and continental margins. Lecture, 2 hours; laboratory, 2 hours.
PREREQUISITE: GSC 440.
GSC482 Field Methods  
2 credits  
Spring Semester  
Field and laboratory exercises in mapping. Interpretation of aerial and satellite photographic; coring and laboratory meet two hours/week. Field portion is on alternate Saturdays plus four day trip to Appalachians or Caribbean.  
PREREQUISITE: GSC 110/114 AND GSC 111

GSC490 Senior Thesis  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.  
PREREQUISITE: 3.0 GPA IN MAJOR; PASS DEPARTMENTAL EXAMINATION AT CONCLUSION OF JUNIOR YEAR; PERMISSION OF THE DEPARTMENT.

GSC491 Senior Thesis  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.  
PREREQUISITE: 3.0 GPA IN MAJOR; PASS DEPARTMENTAL EXAMINATION AT CONCLUSION OF JUNIOR YEAR; PERMISSION OF THE DEPARTMENT.

GSC515 Applied Environmental Geology  
3 credits  
Spring Semester  
An advanced undergraduate/graduate course providing knowledge and methods for effective environmental site surveys, to be presented in a weekly 3-hour lecture and discussion. The course will cover policies and regulation including applied practice to comply with safe environmental conduct and valid assessment. Case study, best management practice, and appropriate field equipment and approaches will complement two one-day field trips associated with this course.  
PREREQUISITE: PERMISSION OF INSTRUCTOR OR DEPARTMENT CHAIR.

GSC520 Geology of Florida and the Caribbean  
3 credits  
Fall Semester  
The land and marine geologic history, the natural resources and geologic hazards of Florida and the Caribbean region.  
PREREQUISITE: GSC 110, 111, 260.

GSC540 Geophysics  
3 credits  
Spring Semester  
PREREQUISITE: PHY 205, 206.

GSC545 Introduction to Isotope and Nuclear Geology  
4 credits  
Offered By Announcement Only  
Radioactivity and particle counting. The geological time scale. Isotope fractionation in natural systems. Mass spectrometry and the measurements of relative isotopic abundances in the ocean, the atmosphere, and the solid earth. Lecture, 2 hours; laboratory, 4 hours.
GSC550 Hydrogeology
3 credits  Fall Semester
Movement of subterranean water. The mechanical, chemical and thermal interaction of water with porous solids, and the transport of energy and chemical constituents. The origin of porosity and permeability. The controls exerted on aquifers by the lithology, stratigraphy and structure of geologic deposits and formations.
PREREQUISITE: 8 CREDITS IN GEOLOGICAL SCIENCES AND PERMISSION OF INSTRUCTOR.

GSC555 Mathematical Methods for Geoscientists
3 credits  Fall Semester
Background mathematics needed to solve problems in the geosciences. Applications in tectonics, structural geology, geochemical systems, seismology and hydrology.
PREREQUISITE: MTH 112 OR 132, 211 OR 310, OR 312, AND PHY 206, OR EQUIVALENT.

GSC556 Complexity in Coastal Systems
4 credits  Offered By Announcement Only
Different aspects of the coastal system and their interactions using inquiry-based learning; will include remote sensing data as a tool for data analysis and visualization.
PREREQUISITE: SIX CREDITS IN BIOLOGY OR GEOLOGICAL SCIENCES.

GSC560 Colloquium - Current Topics in the Geosciences
1 credit  Fall Semester
Weekly presentations and discussions. Written and oral presentations required.
PREREQUISITE: SENIOR STANDING.

GSC561 Colloquium - Current Topics in the Geosciences
1 credit  Spring Semester
Weekly presentations and discussions. Written and oral presentations required.
PREREQUISITE: SENIOR STANDING.

GSC565 Fluxes of Energy and Matter in the Earth Systems
3 credits  Offered By Announcement Only
Transport phenomena, motions, and deformation in Earth Systems.
PREREQUISITE: GSC 110, 360.

GSC574 Special Studies
1-4 credits  Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.
PREREQUISITE: PERMISSION OF DEPARTMENT.

GSC575 Special Studies
1-4 credits  Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.
PREREQUISITE: PERMISSION OF DEPARTMENT.

GSC576 Special Studies
1-4 credits  Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.
PREREQUISITE: PERMISSION OF DEPARTMENT.
GSC580 Summer Field Geology
4 credits
Spring Semester & First & Second Summer Session
An intensive four-week summer field laboratory study of modern geological processes and ancient rock sequences. Mapping, description and interpretation of rock and structural sequences, paleoenvironmental reconstruction, interpretation of tectonic history. Reports required. Touring course. Travel fee required.
PREREQUISITE: 18 CREDITS IN GEOLOGICAL SCIENCES AND/OR PERMISSION OF INSTRUCTOR.

GSC581 Summer Field Environmental Geology
2 credits
Spring Semester & First & Second Summer Session
Field evaluation of environmental geology problems in marine, coastal, wetland and terrestrial environments. Effects of human alteration of landscape, natural hazards, pollution of ground water, surface water and soils. Role of climate change on surficial environments. Reports required. Touring course. Travel fee required.
Co requisite: GSC 580.
PREREQUISITE: COREQUISITE GSC 580.

GSC582 Field Studies
1-4 credits
Offered By Announcement Only
Conducted field trips to selected geological sites in the United States and abroad.
Report required.
PREREQUISITE: GRADUATE OR ADVANCED UNDERGRADUATE STANDING AND PERMISSION OF DEPARTMENT.

GSC596 Research in Geology
1-4 credits
Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: PERMISSION OF INSTRUCTOR.

GERMAN
GER101 Elementary German I
3 credits
Fall & Spring Semester
Fundamental grammatical principles; exercises to develop a foundation for skills of listening, speaking, reading, and writing; introduction to German culture. Closed to native speakers.

GER102 Elementary German II
3 credits
Fall & Spring Semester
Continuation of GER 101. Closed to native speakers.
PREREQUISITE: GER 101 OR EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

GER211 Intermediate German I
3 credits
Fall & Spring Semester
Continuation of GER 102, with special emphasis on essay writing.
PREREQUISITE: GER 102 OR EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

GER212 Intermediate German II
3 credits
Fall & Spring Semester
Integrated grammar, writing, and conversation via content-based instruction. Diverse selection of readings: stories, plays, essays, interviews, other materials. Development of skills in a workshop format.
PREREQUISITE: GER 211 OR EQUIVALENT. CLOSED TO NATIVE SPEAKERS.
GER301 Advanced German Studies
3 credits
Fall Semester
Intensive preparation for further 300-level work through use of various genres of German-language texts (short stories, poems, plays, comics, essays). Development of critical reading and writing skills. Writing credit.
PREREQUISITE: GER 212 OR PERMISSION OF INSTRUCTOR

GER302 The Cultures of the German-Speaking World
3 credits
Offered By Announcement Only
Historical survey of German civilization; arts, letters, science, political and social institutions. Conducted in German. Collateral readings and reports.
PREREQUISITE: GER 212 OR EQUIVALENT.

GER310 Ger 310: German Studies in Translation
3 credits
Spring Semester
Topics in German literature, philosophy, history, etc. Readings and discussion in English. Development of critical reading and writing skills. Fulfills humanities literature requirement. Writing credit. Does not fulfill foreign language requirement. May not be used for German minor credit.
PREREQUISITE: ENG 106 AND ONE 200-LEVEL COURSE IN HUMANITIES OR SOCIAL SCIENCES.

GER321 Special Topics in German Studies
3 credits
Offered By Announcement Only
Intensive study of a special topic. May be repeated for credit when topic varies. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: GER 301.

GER363 Eighteenth-century German Studies
3 credits
Offered By Announcement Only
The Enlightenment and its aftermath. Examination of the arts, sciences, letters, and political and social institutions of eighteenth-century Germanophone areas. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: GER 301.

GER364 Nineteenth-Century German Studies
3 credits
Offered By Announcement Only
The concept 'German,' formation of the nation, and social unrest. Examination of the arts, sciences, letters, and political and social institutions of nineteenth-century Germanophone areas. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: GER 301.

GER365 Twentieth-Century German Studies
3 credits
Offered By Announcement Only
The second empire and the third Reich, the Weimar Republic, and the two Germanies. Examination of the arts, sciences, letters, and political and social institutions of twentieth-century Germanophone areas. May be used to fulfill the humanities literature requirement. Writing credit.
PREREQUISITE: GER 301.
GER370 The Holocaust in History, Film, and Memorial Culture
3 credits
Offered By Announcement Only
The course examines the representation of the Holocaust in historiography, film, and memorial culture. Readings will include texts by historians and writers such as Primo Levi, Raul Hilberg, Daniel Goldhagen, James Young and others; films will include, among others, Alain Resnais's NIGHT AND FOG, Claude Lanzmann's SHOAH, and Steven Spielberg's SCHINDLER'S LIST. Reading-and writing-intensive course with reading and discussions in English. In addition to daily/weekly homework assignments, an in-class midterm exam and a final, cumulative take-home exam, students will also complete an extended analytical term paper. Students will also be required to watch films outside of regularly scheduled class hours.
PREREQUISITE: SOPHOMORE STANDING OR PERMISSION OF INSTRUCTOR

GER400 Advanced German Conversation Contemporary German Politics & Society
3 credits
Fall Semester
The course examines the representation of the Holocaust in historiography, film, and memorial culture. Readings will include texts by historians and writers such as Primo Levi, Raul Hilberg, Daniel Goldhagen, James Young and others; films will include, among others, Alain Resnais' NIGHT AND FOG, Claude Lanzmann's SHOAH, and Steven Spielberg's SCHINDLER'S LIST. Readings and discussions in English. Students will be required to attend some film screenings outside our regularly scheduled class hours. German-language students who wish to take the course for German minor credit will meet an additional hour per week (day and time TBA)
PREREQUISITE: GER 212 OR PERMISSION OF INSTRUCTOR

GER432 Business and Diplomatic German
3 credits
Offered By Announcement Only
Commercial, economic, and technical terminology. Conversation and composition based on models of business interactions and correspondence directed to German-speaking countries and firms. Writing credit.
PREREQUISITE: GER 212.

GER442 Advanced Stylistics and Composition
3 credits
Spring Semester
PREREQUISITE: ONE 300-LEVEL GER COURSE

GER521 Advanced German Studies
3 credits
Offered By Announcement Only
German language, literature, culture of the 18th-20th centuries. Involves independent research. WRITING CREDIT May be repeated for credit if topic is different.
PREREQUISITE: GER 363, 364, OR 365.

GER522 Special Topics in German Literature
3 credits
Offered By Announcement Only
WRITING CREDIT. May be repeated for credit if topic is different.
PREREQUISITE: TWO COURSES ON THE 300-LEVEL; PERMISSION OF THE INSTRUCTOR.

GER566 German Literature of the Twentieth Century
3 credits
Offered By Announcement Only
WRITING CREDIT. Major literary movements: prose, poetry, and drama.
PREREQUISITE: GER 363 OR 364.
GER591 Directed Readings
1-3 credits                                           Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER592 Directed Readings
1-3 credits                                           Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER593 Directed Readings
1-3 credits                                           Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER594 Senior Honors Thesis I
3 credits                                                    Fall & Spring Semester
Directed research for honors thesis.
PREREQUISITE: MUST HAVE COMPLETED AT LEAST NINE CREDITS AT THE 300-LEVEL OR ABOVE TOWARDS GERMAN MAJOR, MUST MEET ELIGIBILITY FOR HONORS IN GERMAN.

GER595 Senior Honors Thesis II
3 credits                                                    Fall & Spring Semester
Directed writing of honors thesis.
PREREQUISITE: GER 594.

GREEK
GRE101 Elementary Ancient Greek I
3 credits                                                             Fall Semester
Alphabet, pronunciation, accentuation, vocabulary, grammar, reading exercises, and written exercises.

GRE102 Elementary Ancient Greek II
3 credits                                                         Spring Semester
Continuation of GRE 101.
PREREQUISITE: GRE 101.

GRE201 INTERMEDIATE ANCIENT GREEK I
3 credits                                                    Fall Semester
Reading from classical and Hellenistic authors. Building on their knowledge of elementary Greek grammar, students move toward real fluency in reading ancient Greek, and the pleasure of encountering these great authors in their original language.
PREREQUISITE: GRE 102 OR PERMISSION OF THE INSTRUCTOR

GRE202 Intermediate Ancient Greek II
3 credits                                                    Fall & Spring Semester
Reading Ancient Greek poetry. Students will read selections from Homer's Odyssey and Iliad, with emphasis on the Homeric dialect, meter, and the oral tradition of these epics. Greek 202 prepares students for 300- and 400-level Ancient Greek poetry courses.
PREREQUISITE: GRE 201 AND PERMISSION OF THE INSTRUCTOR

GRE311 PLATO
3 credits                                                    Fall & Spring Semester
Reading of Plato's dialogues and letters with a view to syntax, the acquisition of vocabulary, and Plato's prose style and philosophical thought.
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR
GRE321 EURIPIDES
3 credits
Readings in the plays of Euripides, with an emphasis on syntax, vocabulary, dramaturgy, and the social role of tragedy in ancient Athenian culture.
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE401 Special Topics in Greek Literature
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [This will vary each time the course is offered]
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE402 Special Topics in Greek Literature
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [This will vary each time the course is offered]
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE403 Special Topics in Greek Literature
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [This will vary each time the course is offered]
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE404 Special Projects in Ancient Greek Literature & Culture
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle) Analogous to REL 407-409 [This will vary each time the course is offered]
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

GRE405 Special Projects in Ancient Greek Literature and Culture
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

GRE406 Special Projects in Ancient Greek Literature and Culture
3 credits
Fall & Spring Semester & First & Second Summer Session
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

GRE407 Supervised Reading in Classical Greek
3 credits
Fall & Spring Semester & First & Second Summer Session
Variable subject matter determined by instructor and student. Analogous to REL 401-403.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

GRE408 Supervised Reading in Classical Greek
3 credits
Fall & Spring Semester & First & Second Summer Session
Variable subject matter determined by instructor and student. Analogous to REL 401-403.
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR
**Greek**

**GRE409 Supervised Reading in Classical Greek**
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Variable subject matter determined by instructor and student. Analogous to REL 401-403.  
PREREQUISITE: GRE 201 OR PERMISSION OF INSTRUCTOR

**GRE411 Homer**
3 credits  
Spring Semester  
Readings from the Iliad and/or Odyssey.  
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

**GRE421 Greek Orators**
3 credits  
Fall Semester  
Readings from Lysias and Demosthenes.  
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

**GRE422 Aristophanes**
3 credits  
Fall & Spring Semester  
PREREQUISITE: GRE 201

**GRE431 Greek Historians**
3 credits  
Fall Semester  
Readings from Herodotus and Thucydides.  
PREREQUISITE: GRE 201 OR PERMISSION OF THE INSTRUCTOR

**GRE491 Directed Readings**
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session  
Content to be determined by faculty member and registering student(s)  
PREREQUISITE: SIX CREDITS IN CLASSICS OR PERMISSION OF INSTRUCTOR

**Haitian**

**HAI101 Elementary Haitian Creole I**
3 credits  
Fall Semester  
Development of basic listening, speaking, reading and writing skills; focus on conversation and the grammatical fundaments of Haitian Creole.

**HAI102 Elementary Haitian Creole II**
3 credits  
Spring Semester  
PREREQUISITE: HAI 101 OR ITS EQUIVALENT

**HAI201 Intermediate Haitian Creole I**
3 credits  
Fall Semester  
PREREQUISITE: HAI 102 OR EQUIVALENT

**Hebrew**

**HEB101 Elementary Hebrew I**
3 credits  
Fall Semester  
Grammatical principles: reading for comprehension and conversation; oral and written exercises. Normally, closed to students who have completed two years of high school Hebrew. Closed to native speakers.  
PREREQUISITE: CLOSED TO NATIVE SPEAKERS.

3 credits  Offered By Announcement Only
Italian culture and literature from the Baroque to the nineteenth century. May be used to fulfill humanities literature requirement. Writing credit.
PREREQUISITE: ITA 212 OR EQUIVALENT.

ITA365 Introduction to 20th Century Italian Literature
3 credits  Offered By Announcement Only
Italian culture and literature of the twentieth century. May be used to fulfill humanities literature requirement. Writing credit.
PREREQUISITE: ITA 212 OR EQUIVALENT.

ITA394 Internship
1-3 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: 6 CREDITS IN ITA ABOVE ITA 211
ITALIAN

ITA591 Directed Readings
1- 3 credits                                           Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ITA592 Directed Readings
1- 3 credits                                           Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ITA593 Directed Readings
1- 3 credits                                           Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

JAPANESE

JPN101 Elementary Japanese I
3 credits                                                             Fall Semester
Introduction to modern Japanese: pronunciation, grammar, conversation, and the
elements of the writing system. Closed to native speakers.

JPN102 Elementary Japanese II
3 credits                                                           Spring Semester
Continuation of JPN 101. Introduction to modern Japanese: pronunciation, grammar,
conversation, and the elements of the writing system. Closed to native speakers.
PREREQUISITE: JPN 101, AND CLOSED TO NATIVE SPEAKERS.

JPN201 Intermediate Japanese I
3 credits                                                             Fall Semester
Continuation of JPN 102. Grammar, composition and readings in modern Japanese,
which will introduce students to aspects of Japanese customs, history and culture.
Closed to native speakers.
PREREQUISITE: JPN 102, AND CLOSED TO NATIVE SPEAKERS.

3 credits                                                           Spring Semester
Continuation of JPN 201. Grammar, dialogues, and readings, designed to integrate
listening, comprehension, speaking, reading and writing skills. Discussion of the
Japanese culture, history, and customs. Closed to native speakers.
PREREQUISITE: JPN 201. CLOSED TO NATIVE SPEAKERS.

JUDAIC STUDIES - HUMANITIES

JUH231 Jewish Civilization: Society, Culture, and Religion
3 credits                                              Offered By Announcement Only
Introduction to Jewish civilization from Abraham to present.

JUDAIC STUDIES

JUS205 Icheic Service Corps Internship
3 credits                                                             Fall Semester
Interns will gain meaningful experiences that will offer them an opportunity to
become involved in service-oriented activities that give them a deep insight and
unique understanding of the historical significance of the Holocaust while providing
valuable services to the survivors of Nazi atrocities
PREREQUISITE: SOPHOMORE STANDING OR PERMISSION OF THE ICHEIC COORDINATOR. STUDENTS
SHOULD HAVE TAKEN AT LEAST ONE COURSE ON THE HOLOCAUST, E.G. HIS348, 396,
341, 338 OR JUS 401.
JUS206 ICHEIC Service Corps Internship  
3 credits  
Spring Semester  
Interns will gain meaningful experiences that will offer them an opportunity to become involved in service-oriented activities that give them a deep insight and unique understanding of the historical significance of the Holocaust while providing valuable services to the survivors of Nazi atrocities.  
PREREQUISITE: SOPHOMORE STANDING OR PERMISSION OF THE ICHEIC COORDINATOR. STUDENTS SHOULD HAVE TAKEN AT LEAST ONE COURSE ON THE HOLOCAUST, E.G. HIS348, 396, 341, 338 OR JUS 401.

JUS231 Jewish Civilization: Society, Culture, and Religion  
3 credits  
Offered By Announcement Only  
Introduction to Jewish civilization from Abraham to present.

JUS250 The Holocaust Through Film, Memoir and Testimony  
3 credits  
Offered By Announcement Only  
The purpose of the course is to introduce students to the history of the Holocaust through classroom dialogue, film, and literature analysis. Involve students in major ethical and moral issues raised in the study of the Holocaust by encouraging students to think critically, explore choices, and make decisions based on a code of conduct that reflects a commitment to humanity.  
PREREQUISITE: NONE

JUS301 STUDIES IN JUDAICA  
3 credits  
Offered By Announcement Only  
Special topics offering at the 300-level for students pursuing a major/minor in Judaic Studies.  
PREREQUISITE: NONE

JUS310 Development of Jewish Intellectual Roots  
3 credits  
Offered By Announcement Only  
Contributions by Jewish intellectuals from diversified fields in the establishment of Jewish roots.  
PREREQUISITE: JUS 231.

JUS314 The Rise of Judaism  
3 credits  
Fall & Spring Semester  
The history and literature of early Judaism, covering the period from the fall of Jerusalem in 587/586 BCE to the beginnings of rabbinic Judaism and the formation of the Mishnah (ca. 200 CE).  
PREREQUISITE: 3 CREDITS IN JUDAIC STUDIES

JUS338 History of the Holocaust  
3 credits  
Fall Semester

JUS352 Panoramic View of the Middle East  
3 credits  
Fall & Spring Semester  
The course is designed to provide a comprehensive introduction to the Middle East and a basic understanding of factors, forces and processes shaping developments in the modern and contemporary history of this important world region.  
PREREQUISITE: INS 201, GEG 242 OR POL 212 OR PERMISSION OF INSTRUCTOR
JUS360 Hollywood and Popular Culture: The American Jewish Experience  
3 credits Offered By Announcement Only  
The image of the Jew and the Jewish experience in American Cinema.  
PREREQUISITE: JUH 231 OR HIS 102 AND PERMISSION OF INSTRUCTOR.

JUS375 Religion and Democracy in Israel  
3 credits Offered By Announcement Only  
Israel's evolution as a nation and a society by focusing on how religion impacts ethnicity, culture, and democracy.  
PREREQUISITE: THREE CREDITS IN REL AND/OR PERMISSION OF INSTRUCTOR.

JUS380 Archeology of Palestine  
3 credits Fall & Spring Semester  
Survey of the major archaeological excavations and surveys of Palestine, how this is used to interpret biblical narrative. The emergence of Judaism and Christianity.  
PREREQUISITE: 3 CREDITS IN REL, HIS 221, OR PERMISSION OF INSTRUCTOR

JUS401 Studies in Judaica  
1- 3 credits Offered By Announcement Only  
Designed to enable students interested in some phase of Judaic Studies to study extensively in that field of interest.  
PREREQUISITE: JUS 231 OR PERMISSION OF INSTRUCTOR.

JUS410 Special Topics  
1- 3 credits Offered By Announcement Only  
PREREQUISITE: JUS 231 OR PERMISSION OF INSTRUCTOR.

JUS411 Special Topics  
1- 3 credits Offered By Announcement Only  
PREREQUISITE: JUS 231 OR PERMISSION OF INSTRUCTOR.

JUS421 Internship in Judaic Studies  
1- 3 credits Fall & Spring Semester  
Prescribed study and supervised work with practitioners in Judaic services.  
PREREQUISITE: JUS 231 AND THREE OTHER CREDITS IN JUDAIC STUDIES.

JUS498 Senior Thesis  
3 credits Fall & Spring Semester  
Partial requirement for Departmental Honors in Judaic Studies. Thesis to be a documented essay in any area of Judaic Studies written under the direction of a member of the faculty.  
PREREQUISITE: SENIOR STATUS, CERTIFICATION BY DIRECTOR OF JUDAIC STUDIES, AND PERMISSION OF THE THESIS DIRECTOR.

JUS499 Senior Thesis  
3 credits Fall & Spring Semester  
Partial requirement for Departmental Honors in Judaic Studies. Thesis to be a documented essay in any area of Judaic Studies written under the direction of a member of the faculty.  
PREREQUISITE: SENIOR STATUS, CERTIFICATION BY DIRECTOR OF JUDAIC STUDIES, AND PERMISSION OF THE THESIS DIRECTOR.

LATIN  
LAT101 Elementary Latin I  
3 credits Fall & Spring Semester  
Elementary vocabulary, grammar and reading.
LAT102 Elementary Latin II 3 credits Fall & Spring Semester
Continuation of LAT 101.

LAT201 INTERMEDIATE LATIN I 3 credits Fall & Spring Semester
Translation and grammatical analysis of selected texts from Latin authors.
PREREQUISITE: LAT 102 OR PERMISSION OF THE INSTRUCTOR

LAT202 INTERMEDIATE LATIN II 3 credits Fall & Spring Semester
Introduction to reading Latin poetry. Students will read selections from the Aeneid, with emphasis on Virgil's language and meter, as well as the ancient epic tradition.
Latin 202 prepares students for 300- and 400-level Latin poetry courses.
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR

LAT203 Ovid's Metamorphoses 3 credits Fall & Spring Semester
PREREQUISITE: LAT 201 OR EQUIVALENT

LAT301 CATULLUS 3 credits Fall & Spring Semester
An advanced Latin course on the works of the Roman poet Catullus. Students will read almost all of the poems in the Catullan corpus, and be introduced to the related secondary literature, covering topics such as ancient sexuality, invective and obscenity, the figure of the mistress in Latin love poetry, the arrangement of poems within a poetic book, meter, and the textual tradition.
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR

LAT302 Petronius 3 credits Fall & Spring Semester
An advance Latin prose reading course on Petronius "Satyricon," a mysterious and fragmentary novel dating from the time of the decadent emperor Nero. Trimalchio's Dinner-Party, the central section of the work, forms the focus of the course.
It is an account of a dinner hosted by a wealthy ex-slave, and can be read as a critique of the excesses of the Neronian age.

LAT311 CICERO: ORATIONS 3 credits Fall & Spring Semester
Readings from the speeches of Cicero, with an emphasis on syntax, vocabulary, rhetorical theory and practice, and the historical situation of the speeches.
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR.

LAT321 VERGIL 3 credits Fall & Spring Semester
An advanced reading course in the poems of Vergil.
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR

LAT322 Martial Epigrams 3 credits Fall & Spring Semester
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR

LAT323 Seneca 3 credits Fall & Spring Semester
LAT401 Special Topics in Latin Literature  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
This course will address a specific author, topic, or text (appearing as a subtitle)  
Analogous to REL 404-409 courses. This will vary each time the course is offered.  
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR  

LAT402 Special Topics in Latin Literature  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
This course will address a specific author, topic, or text (appearing as a subtitle).  
Analogous to REL 404-409 courses. [this will vary each time the course is offered]  
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR  

LAT403 Special Topics in Latin Literature  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
This course will address a specific author, topic, or text (appearing as a subtitle).  
Analogous to REL 404-409 courses. [this will vary each time the course is offered]  
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR  

LAT404 Special Projects in the Literature & Culture of Ancient Rome  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
This course will address a specific project in Classics (appearing as a subtitle)  
Analogous to REL 407-409. [this will vary each time the course is offered]  
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR  

LAT405 Special Projects in the Literature and Culture of Ancient Rome  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
This course will address a specific project in Classics (appearing as a subtitle)  
Analogous to REL 407-409.  
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR  

LAT406 Special Projects in the Literature and Culture of Ancient Rome  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
This course will address a specific project in Classics (appearing as a subtitle).  
Analogous to REL 407-409.  
PREREQUISITE: LAT 201 OR PERMISSION OF INSTRUCTOR  

LAT407 Supervised Reading in Classical Latin  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
Variable subject matter determined by instructor and student. Analogous to REL 401-403.  
PREREQUISITE: LAT 201 OR PERMISSION OF INSTRUCTOR  

LAT408 Supervised Reading in Classical Latin  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
Variable subject matter determined by instructor and student. Analogous to REL 401-403.  
PREREQUISITE: LAT 201 OR PERMISSION OF INSTRUCTOR  

LAT409 Supervised Reading in Classical Latin  
3 credits  
FALL & SPRING SEMESTER & FIRST & SECOND SUMMER SESSION  
Variable subject matter determined by instructor and student. Analogous to REL 401-403.  
PREREQUISITE: LAT 201 OR PERMISSION OF INSTRUCTOR
LAT411 HORACE
3 credits  Fall & Spring Semester
Readings in the odes, epodes, satires and epistles of Horace.
PREREQUISITE: LAT 201 OR PERMISSION OF THE INSTRUCTOR.

LAT421 Roman Epic
3 credits  Fall & Spring Semester
Studies from Roman epic poetry of Lucretius and Virgil to Lucan and Statius.

LAT422 Lucretius
3 credits  Fall & Spring Semester
Detailed treatment of the Latin philosophical poet Lucretius and his lone surviving poem, DE RERVM NATVRA.
PREREQUISITE: LAT 202 OR PERMISSION OF THE INSTRUCTOR

LAT431 Roman Historians
3 credits  Fall & Spring Semester
Readings from Sallust, Livy, and Tacitus.

LAT491 Directed Readings
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Content to be determined by faculty member and registering student(s)
PREREQUISITE: SIX CREDITS IN CLASSICS OR PERMISSION OF INSTRUCTOR

LATIN AMERICAN STUDIES

LAS101 Introduction to Latin American and Caribbean Studies
3 credits  Fall & Spring Semester

LAS110 Students in Latin America and the Caribbean
1-3 credits  Not Offered; Transfer Credit Only

LAS111 Studies in Latin America and the Caribbean
1-3 credits  Not Offered; Transfer Credit Only

LAS112 Studies in Latin America and the Caribbean
1-3 credits  Not Offered; Transfer Credit Only

LAS113 Studies in Latin America and the Caribbean
1-3 credits  Not Offered; Transfer Credit Only

LAS114 Studies in Latin America and the Caribbean
1-3 credits  Not Offered; Transfer Credit Only

LAS115 Studies in Latin America and the Caribbean
1-3 credits  Not Offered; Transfer Credit Only

LAS196 Film Series and Colloquia for First Year Seminar in Latin American and Caribbean
1 credit  Fall Semester
Screening and discussion of films related to FSS 195. Must be taken with FSS 195.
PREREQUISITE: MUST BE TAKEN WITH FSS 195

LAS201 Introduction to Latin American and Caribbean Studies
3 credits  Fall Semester
Course will focus interdisciplinary on culture, economy, geography, history, politics, and society of Latin America and the Caribbean, as well as on the ways in which scholars have studied the region.
PREREQUISITE: FSS 195 OR ANY COURSE WITH A LATIN AMERICAN AND/OR CARIBBEAN FOCUS
LAS210 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS211 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS212 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS213 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS214 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS215 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS251 History Discussion Section for Learning Community  
0 credit  
Fall Semester  
PREREQUISITE: COREQUISITE HIS 251

LAS301 Interdisciplinary Topics in Latin American and Caribbean Studies  
3 credits  
Fall & Spring Semester  
Topics Vary, Interdisciplinary focus may be thematic (e.g.: revolutions, new social movements, women's rights, Latin Americanism, testimonies, culture industries, etc.) or regional/national (e.g.: Andean Studies, Southern Cone Studies, Caribbean Studies, Mexican Studies, etc.)  
PREREQUISITE: LAS 101 OR PERMISSION OF INSTRUCTOR

LAS302 Interdisciplinary Topics in Latin American and Caribbean Studies-Travel Course  
3 credits  
Spring Semester  
Topics vary, Interdisciplinary focus is thematic and regional (i.e. tourism in Yucatan; civil society in Chile, civil society in Haiti, cultural policy in the Caribbean, environmental policy in Panama). Course involves travel during Spring Break and it has a program fee.  
PREREQUISITE: LAS 101 AND PERMISSION OF INSTRUCTOR

LAS310 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS311 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS312 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS313 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS314 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only

LAS315 Studies in Latin America and the Caribbean  
1-3 credits  
Not Offered; Transfer Credit Only
LAS320 Special Topics in Latin American and Caribbean Environment
3 credits                                              Offered By Announcement Only
Topics vary. Interdisciplinary focus on policies and impact on globalization on
the environment.
PREREQUISITE: PREREQUISITES VARY - SEE COURSE OFFERINGS FOR DETAILS

LAS321 Latin American Environmental Issues
3 credits                                              Fall Semester
PREREQUISITE: LAS 101 OR PERMISSION OF INSTRUCTOR

LAS330 Special Topics in Latin American and Caribbean Religions
3 credits                                              Offered By Announcement Only
Topics vary. Interdisciplinary focus may be thematic or regional (eg: Liberation
Theology, Latin American and Latino Religions, Caribbean Religions.)
PREREQUISITE: PREREQUISITES VARY - SEE COURSE OFFERINGS FOR DETAILS

LAS340 Special Topics in Latin American and Caribbean Economics
3 credits                                              Offered By Announcement Only
PREREQUISITE: PREREQUISITES VARY - SEE COURSE OFFERINGS FOR DETAILS

LAS350 Special Topics in Latin American and Caribbean Art and Culture
3 credits                                              Offered By Announcement Only
PREREQUISITE: PREREQUISITES VARY - SEE COURSE OFFERINGS FOR DETAILS

LAS360 Special Topics in Latin American and Caribbean Politics
3 credits                                              Offered By Announcement Only
Topics Vary. Interdisciplinary focus may be thematic or regional (eg: democracy,
new social movements, globalization, politics and society.)
PREREQUISITE: PREREQUISITES VARY - SEE COURSE OFFERING FOR DETAILS

LAS370 Special Topics in Latin American and Caribbean Media and Communications
3 credits                                              Offered By Announcement Only
PREREQUISITE: PREREQUISITES VARY - SEE COURS OFFERING FOR DETAILS

LAS410 Studies in Latin America and the Caribbean
1- 3 credits                                              Not Offered; Transfer Credit Only

LAS411 Studies in Latin America and the Caribbean
1- 3 credits                                              Not Offered; Transfer Credit Only

LAS412 Studies in Latin America and the Caribbean
1- 3 credits                                              Not Offered; Transfer Credit Only

LAS413 Studies in Latin America and the Caribbean
1- 3 credits                                              Not Offered; Transfer Credit Only

1- 3 credits                                              Not Offered; Transfer Credit Only

LAS415 Studies in Latin America and the Caribbean
1- 3 credits                                              Not Offered; Transfer Credit Only
LAS494 Independent Study in Latin American and Caribbean Studies
1-3 credits Fall & Spring Semester
Independent study leading to a thesis, original piece of research, or creative project on a Latin American or Caribbean subject.
PREREQUISITE: SIX CREDITS IN LAS OR LAS-APPROVED COURSES AT OR ABOVE THE 300-LEVEL, AND PERMISSION OF INSTRUCTOR.

LAS501 Interdisciplinary in Latin American and Caribbean Studies.
3 credits Fall Semester
Interdisciplinary methods and politics of Latin American and Caribbean area Studies.
PREREQUISITE: SIX CREDITS IN LAS OR LAS-APPROVED COURSES AT OR ABOVE THE 300-LEVEL.

LAS502 Research Design in Latin American Studies
3 credits Spring Semester
Interdisciplinary research methods and skills in Latin American and Caribbean studies.
PREREQUISITE: LAS 501 OR PERMISSION OF INSTRUCTOR

LAS503 Program Seminar in Latin American Studies and Caribbean Studies
3 credits Fall & Spring Semester
Content of course will vary by semester.
PREREQUISITE: LAS 501 OR SIX CREDITS IN LAS OR LAS-APPROVED COURSES AT OR ABOVE THE 300-LEVEL.

LAS504 Interdisciplinary Topics in Latin American and Caribbean Studies - Travel Course
3 credits Spring Semester
Topics vary. Interdisciplinary focus is thematic and regional (e.g.: tourism in Yucatan; civil society in Chile, Haiti-Dominican Republic relations, cultural policy in the Caribbean, environmental policy in Panama.) Course involves travel during Spring Break and it has a program fee.
PREREQUISITE: LAS 101 AND SENIOR STATUS AND PERMISSION OF INSTRUCTOR

LAS505 Internship in Latin American and Caribbean Studies
1-3 credits Fall & Spring Semester & First & Second Summer Session
On-site experience in business, governmental organization, or non-profit organization dealing with Latin America and/or the Caribbean.
PREREQUISITE: DECLARED MAJOR OR MINOR IN LATIN AMERICAN STUDIES, SIX CREDITS IN LAS OR LAS-APPROVED COURSES AT OR ABOVE THE 300-LEVEL, AND PERMISSION OF LAS DIRECTOR.

LAS520 Interdisciplinary Topics in Latin American and Caribbean Environments
3 credits Fall & Spring Semester
Topics vary. Interdisciplinary focus on policies and impact of globalization on the environment.
PREREQUISITE: LAS 101 AND SENIOR STATUS

LAS521 Latin American Environmental Issues
3 credits Fall Semester
PREREQUISITE: LAS 101 AND SENIOR STATUS, OR LAS 501, OR PERMISSION OF INSTRUCTOR
LAS594 Directed Readings in Latin America and Caribbean
3 credits Fall & Spring Semester
Independent Study leading to an original piece of research, or creative project on a Latin American or Caribbean interdisciplinary topic.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF LAS DIRECTOR

LAS597 Readings for the Comprehensive Exam
3 credits Fall & Spring Semester
Readings for M.A. students who are preparing for comprehensive examinations.
PREREQUISITE: PERMISSION OF ADVISOR AND PROGRAM DIRECTOR

MATHEMATICS

MTH099 Intermediate Algebra
3 credits Fall & Spring Semester & First & Second Summer Session
Real number operations, polynomials, factoring, rational numbers and rational expressions. Cannot be used to fulfill the 120 credits required for graduation.
PREREQUISITE: EXTREME DEFICIENCY IN ALGEBRA. CANNOT BE USED TO FULFILL THE 120 CREDITS REQUIRED FOR GRADUATION.

MTH101 Algebra for College Students
3 credits Fall & Spring Semester & First & Second Summer Session
Algebraic operations and properties of the real numbers; linear and quadratic equations and inequalities; polynomials and factoring; rational expressions; radical expressions; graphs of lines; systems of linear equations.
PREREQUISITE: ADEQUATE ACHIEVEMENT ON MATHEMATICS PLACEMENT TEST. NOT OPEN TO STUDENTS WITH CREDIT IN MTH 105 OR 107. NOT FOR MAJOR OR MINOR.

MTH104 Geometry for Educators
3 credits Offered By Announcement Only
Origins of geometry; topics from Euclidean, coordinate, and transformational geometry. Includes laboratory component. Only for pre-certification students in the School of Education who are not mathematics or science majors.
PREREQUISITE: MTH 101 OR ADEQUATE ACHIEVEMENT ON MATHEMATICS PLACEMENT TEST.

MTH105 Algebra and Trigonometry
5 credits Fall & Spring Semester
An intensive course in algebra and trigonometry as covered in MTH 107-108, but without analytic geometry.
PREREQUISITE: MTH 101 OR ADEQUATE ACHIEVEMENT ON MATHEMATICS PLACEMENT TEST. NOT OPEN TO STUDENTS WITH CREDIT IN MTH 107 OR 108. NOT FOR MAJOR OR MINOR.

MTH107 Precalculus Mathematics I
3 credits Fall & Spring Semester & First & Second Summer Session
Algebraic operations; equations and inequalities; complex numbers; functions and their graphs; polynomial, exponential, and logarithmic functions; systems of equations.
PREREQUISITE: ADEQUATE ACHIEVEMENT ON MATHEMATICS PLACEMENT TEST. NOT OPEN TO STUDENTS WITH CREDIT IN MTH 105. NOT FOR MAJOR OR MINOR.
MTH108 Precalculus Mathematics II

1. **Credits:** 3
2. **Terms:** Fall & Spring Semester & First & Second Summer Session
3. **Description:** Rational functions; analytic geometry; trigonometric functions, identities, and equations.
4. **Prerequisites:** At least C- in MTH 107 or adequate achievement on Mathematics Placement Test. Not open to students with credit in MTH 105. Not for major or minor.

MTH113 Finite Mathematics

1. **Credits:** 3
2. **Terms:** Fall & Spring Semester & First & Second Summer Session
3. **Description:** Formerly MTH 103. Sets, logic, counting techniques, elementary probability and statistics, the mathematics finance, linear programming, algebraic structures, symmetry. The selection of topics may vary by instructor. Intended for BA students.
4. **Prerequisites:** MTH 101 or adequate achievement on Mathematics Placement Test.

MTH130 Introductory Calculus

1. **Credits:** 3
2. **Terms:** Fall & Spring Semester
3. **Description:** Formerly MTH 109. A one-semester survey of the fundamental principles of calculus, functions, limits, derivatives, definite integrals, applications.
4. **Prerequisites:** MTH 107 or adequate achievement on Mathematics Placement Test. Not for major or minor. Not for B.S. students.

MTH140 Calculus Concepts with Foundations A

1. **Credits:** 0 - 4
2. **Terms:** Fall Semester
3. **Description:** Formerly MTH 106. Tools from algebra and trigonometry for calculus. Functions and graphs, limits and continuity, the derivative and applications.
4. **Prerequisites:** Adequate achievement on Mathematics Placement Test. Not open to students with credit in MTH 161 or 162 or 171 or 172.

MTH141 Calculus Concepts with Foundations B

1. **Credits:** 4
2. **Terms:** Spring Semester
3. **Description:** Tools from algebra, trigonometry, and analytic geometry for calculus. Further aspects of differentiation. Antiderivatives, definite integrals, and their applications.
4. **Prerequisites:** C-Minus or better in MTH 140

MTH151 Calculus I for Engineers

1. **Credits:** 0 - 5
2. **Terms:** Fall & Spring Semester
3. **Description:** Formerly MTH 110. Analytic geometry, limits and continuity, derivatives, the definite integral, and applications relevant to engineering. Intended for students taking PHY 205 currently.
4. **Prerequisites:** At least a C- in MTH 105 or adequate achievement on Mathematics Placement Test together with completion of high school trigonometry and analytic geometry. Not open to students with credit in MTH 141 or 161 or 171.

MTH161 Calculus I

1. **Credits:** 0 - 4
2. **Terms:** Fall & Spring Semester & First & Second Summer Session
3. **Description:** Formerly MTH 111. Limits and continuity, derivatives and applications, the definite integral and applications.
4. **Prerequisites:** At least a C- in MTH 108 or adequate achievement on Mathematics Placement Test together with completion of high school trigonometry and analytic geometry. Not open to students with credit in MTH 141, 151, or 171.
MTH162 Calculus II
0-4 credits
Fall & Spring Semester & First & Second Summer Session
FORMERLY MTH 112 Transcendental functions, methods of integration. L'Hospital's Rule and improper integrals, infinite series, polar coordinates, and introduction to differential equations.
PREREQUISITE: MTH 141 OR MTH 151 OR MTH 161. NOT OPEN FOR STUDENTS WITH CREDIT IN MTH 172

MTH171 Calculus I
0-4 credits
Fall Semester
FORMERLY MTH 131 The theory of limits, the derivative and the definite integral, techniques and applications. The sequence MTH 171-172 is more conceptually-oriented than MT 161-162.
PREREQUISITE: FOR STUDENTS IN THE PRISM PROGRAM. NOT OPEN TO STUDENTS WITH CREDIT IN MTH 141 OR 151 OR 161

MTH172 Calculus II
0-4 credits
Fall & Spring Semester
FORMERLY MTH 132 Continuation of MTH 171. Additional topics on the derivative and definite integral, improper integrals, infinite series, and introduction to differential equations.
PREREQUISITE: FOR STUDENTS IN THE PRISM PROGRAM. NOT OPEN TO STUDENTS WITH CREDIT IN MTH 141 OR 151 OR 161

MTH210 Introduction to Linear Algebra
3 credits
Fall & Spring Semester
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 112 OR 132

MTH211 Calculus III
3 credits
Fall & Spring Semester & First Summer Session
Matrix algebra, vectors in space, partial differentiation, multiple integration.
PREREQUISITE: MTH 162 OR 172. NOT OPEN TO STUDENTS WITH CREDIT IN MTH 310 OR 433 OR 533

MTH224 Introduction to Probability and Statistics
3 credits
Fall & Spring Semester & First Summer Session
Probability distributions, random variables, expectation and variance, point estimation, interval estimation, testing of hypothesis, analysis of variance.
PREREQUISITE: (OR COREQUISITE) MTH 162 OR 172

MTH230 Introduction to Abstract Mathematics
3 credits
Fall & Spring Semester
Fundamentals of set theory, logic and methods of mathematical proof.
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 112 OR 132

MTH309 Discrete Mathematics I
3 credits
Fall & Spring Semester
PREREQUISITE: MTH 141 OR 151 OR 161 OR 171
MTH310 Multivariable Calculus
3 credits  Fall & Spring Semester & First Summer Session
Equations of curves, surfaces, solids; vector differential calculus; integration of scalar valued functions. Applications.
PREREQUISITE: MTH 210 AND (MTH 162 OR 172). NOT OPEN TO STUDENTS WITH CREDIT IN MTH 433 OR 533

MTH311 Introduction to Ordinary Differential Equations
3 credits  Fall & Spring Semester
PREREQUISITE: MTH 162 OR 172.

MTH320 Introduction to Numerical Analysis
3 credits  Spring Semester
Interpolation, quadrature, numerical solution of algebraic and transcendental equations, and optimization.
PREREQUISITE: MTH 210 AND (211 OR 310).

MTH359 Mathematical Models in Biology and Medicine
3 credits  Spring Semester
Fundamentals of the dynamical systems approach to modeling temporal change in biological systems. An introduction to the analysis of mathematical models in biology and medicine with detailed, concrete examples drawn from ecology, cell biology, neuro-science, and physiology.
PREREQUISITE: MTH 162 OR MTH 172 WITH GRADE OF C- OR BETTER

MTH433 Advanced Calculus
3 credits  Fall Semester
A rigorous and comprehensive treatment of the theoretical concepts of calculus. The real number system; sequences; series; continuity, differentiation, and integration of functions of one variable.
PREREQUISITE: MTH 230 AND 310

MTH461 Survey of Modern Algebra
3 credits  Fall & Spring Semester
ALGEBRAIC SYSTEMS, EQUIVALENCE CLASSES, GROUPS, RINGS, FIELDS, UNIQUE FACTORIZATION DOMAINS.
PREREQUISITE: MTH 210 AND MTH 230

MTH471 Directed Readings
1- 3 credits  Offered By Announcement Only
Topics selected from algebra, geometry, analysis, topology.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MTH472 Directed Readings
1- 3 credits  Offered By Announcement Only
Topics selected from algebra, geometry, analysis, topology.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MTH501 Place, Region, Nature
3 credits  Fall Semester
PREREQUISITE: 6 CREDITS IN GEG OR PERMISSION OF INSTRUCTOR
MTH502 History of Mathematics
3 credits
Fall Semester
The development of mathematics from its earliest beginnings through the first half of the twentieth century. Numeral systems, geometry, algebra, analysis and set theory.
PREREQUISITE: TWO COURSES IN MATHEMATICS AT THE 200 LEVEL OR ABOVE.

MTH504 Foundations of Geometry
3 credits
Fall Semester
Axiom systems and models of Euclidean and Non-Euclidean geometry.
PREREQUISITE: MTH 230 OR 309.

MTH505 Theory of Numbers
3 credits
Spring Semester
Divisibility, primes; congruences, quadratic residues and reciprocity; Diophantine equations. Applications to cryptography.
PREREQUISITE: MTH 210 OR 504.

MTH506 Mathematical Logic
3 credits
Offered By Announcement Only
Logics, truth, proof, logical consequence, model theory, formalization, and computation. Meta-theory of first-order logic, computability theory, and Godel’s incompleteness theorems. Related results by Church, Turing, and Tarski. Discussion of their philosophical significance.
PREREQUISITE: MTH 230

MTH510 Linear Algebra
3 credits
Spring Semester
Abstract vector spaces, bases and dimensions, linear maps, eigenvalues and eigenvectors, inner product spaces, operators, spectral theorems, canonical forms.
PREREQUISITE: MTH 210; TRANSITION COURSE IN LOGICAL REASONING SUCH AS MTH 230 OR 309 RECOMMENDED BUT NOT REQUIRED.

MTH512 Elementary Complex Analysis
3 credits
Spring Semester
Complex variables; conformal mapping, contour integration.
PREREQUISITE: MTH 211 OR 310.

MTH513 Partial Differential Equations I
3 credits
Fall Semester
Derivation, well posedness, and qualitative properties of initial value and boundary value problems for the heat, wave and Laplace equations. Energy methods, causality, maximum principles, heat kernels, Fourier series, and potential theory.
PREREQUISITE: MTH 210, 311 AND EITHER MTH 211 OR 310.

MTH514 Partial Differential Equations II
3 credits
Spring Semester
PREREQUISITE: MTH 513 OR PERMISSION OF THE INSTRUCTOR.
MTH515 Ordinary Differential Equations
3 credits  Fall Semester
Linear systems, equilibria and periodic solutions, stability analysis, bifurcation, phase plane analysis, boundary value problems, applications to engineering and physics.
PREREQUISITE: MTH 311 AND EITHER MTH 211 OR 310.

MTH516 Dynamics and Bifurcations
3 credits  Spring Semester
Bifurcation of equilibria and periodic solutions, global theory of planar systems, planar maps, nonlinear vibrations, forced oscillations, chaotic solutions, Hamiltonian systems, applications to engineering and physics.
PREREQUISITE: MTH 515 OR PERMISSION OF INSTRUCTOR.

MTH517 Data Structures and Algorithm Analysis
3 credits  Offered By Announcement Only
Data abstraction, formal specification, trees, B-trees, balanced binary trees, graphs, searching and sorting. Algorithm analysis. Memory management.
PREREQUISITE: MTH 309 (OR 230) AND CSC 220

MTH520 Numerical Analysis I
3 credits  Spring Semester
Topics from numerical linear algebra including solving systems of equations, LU, QR, and SVD factorizations, eigenvalues and eigenvectors, interactive methods and applications.
PREREQUISITE: MTH 320 OR PERMISSION OF DEPARTMENT CHAIRMAN.

MTH521 Numerical Analysis II
3 credits  Offered By Announcement Only
Numerical solution of ordinary and partial differential equations.
PREREQUISITE: MTH 320 OR 520 OR PERMISSION OF DEPARTMENT CHAIRMAN.

MTH524 Introduction to Probability Theory
3 credits  Fall Semester
Probability spaces, random variables, expectation, limit theorems.
PREREQUISITE: MTH 224 AND 310

MTH525 Introduction to Mathematical Statistics
3 credits  Spring Semester
Probability distributions, theory of sampling and hypothesis testing.
PREREQUISITE: MTH 524.

MTH527 Theory of Computing
3 credits  Offered By Announcement Only
Finite-state automata, context-free grammars, pushdown automata, Turing machines and computability.
PREREQUISITE: MTH 309 OR MTH 461

MTH528 Combinatorics
3 credits  Offered By Announcement Only
Permutations and combinations, generating functions, enumerative analysis.
PREREQUISITE: MTH 461 OR MTH 561
MTH531 Topology I
3 credits Fall Semester
Set theory, topological spaces, compactness, connectedness, separation properties, quotient spaces, Tychonoff Theorem, compactification, Urysohn Lemma and Tietze Extension Theorem, function spaces.
PREREQUISITE: MTH 230

MTH532 Topology II
3 credits Spring Semester
Differential and topological manifolds, classical groups and associated manifolds, tangent and tensor bundles, vector fields, differential forms, transversality, Sard's theorem, Stokes' Theorem.
PREREQUISITE: MTH 210 AND 531.

MTH533 Introduction to Real Analysis I
3 credits Fall Semester
Sequences and series in Euclidean space; sequences and series of functions; Fourier series; continuity, differentiation, and integration of functions between Euclidean spaces; implicit and inverse function theorems.
PREREQUISITE: MTH 230 AND MTH 310

MTH534 Introduction to Real Analysis II
3 credits Spring Semester
Continuation of MTH 533.
PREREQUISITE: MTH 533.

MTH540 Algorithm Design and Analysis
3 credits Offered By Announcement Only
Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.
PREREQUISITE: MTH 517 OR CSC 517

MTH542 Statistical Analysis
3 credits Fall Semester
Statistical inference about one or two populations from interval, ordinal and categorical data; analysis of variance; simple and multiple linear regression; designing research studies.
PREREQUISITE: MTH 210, 224

MTH551 Introduction to Differential Geometry
3 credits Fall Semester
Geometry of curves and surfaces in Euclidean space. Local space curve theory, intrinsic and extrinsic curvature of surfaces, geodesics, parallelism, and differential forms.
PREREQUISITE: MTH 210 AND EITHER MTH 211 OR 310

MTH561 Abstract Algebra I
3 credits Fall Semester
Groups; rings; linear algebra; modules.
PREREQUISITE: MTH 210 AND PERMISSION OF DEPARTMENT CHAIRMAN
COLLEGE OF ARTS AND SCIENCES
MATHEMATICS

MTH562 Abstract Algebra II

3 credits                              Spring Semester
Continuation of MTH 561.
PREREQUISITE: MTH 561.

MTH571 Directed Readings in Mathematics

1- 3 credits                           Fall & Spring Semester
Readings in special topics.
PREREQUISITE: GRADUATE STANDING; PERMISSION OF DEPARTMENT CHAIR.

MTH572 Directed Readings in Mathematics

1- 3 credits                           Fall & Spring Semester
Readings in special topics.
PREREQUISITE: GRADUATE STANDING; PERMISSION OF DEPARTMENT CHAIR.

MTH591 Topics in Mathematics

1- 3 credits                           Offered By Announcement Only

MTH592 Topics in Mathematics

1- 3 credits                           Offered By Announcement Only

MTH593 Topics in Mathematics

1- 3 credits                           Offered By Announcement Only

MTH594 Topics in Mathematics

1- 3 credits                           Offered By Announcement Only
MIC301 Introduction to Microbiology and Immunology
0-5 credits  Spring Semester
Basic principles of microbiology and immunology, including laboratory exercises.
Course is required for microbiology and immunology majors; recommended for biology,
chemistry and biochemistry majors and those considering the health sciences.
PREREQUISITE: CHM 111 AND BIL 150/151

MIC302 Introduction to Microbiology and Immunology Honors Seminar
1 credit  Spring Semester
Special topics in Microbiology/Immunology requiring a term paper and/or an oral
presentation.
PREREQUISITE: CO-REQUISITE: MIC 301 HONORS AND MIC 301 LAB.

MIC303 Part 1 of 2: Introductory Microbiology and Immunology (Lecture)
3 credits  Spring Semester
PREREQUISITE: CHM 111, BIL 150, BIL 151

MIC304 Part 2 of 2: Introductory Microbiology and Immunology (Lab)
2 credits  Fall Semester
PREREQUISITE: CHM 111, BIL 150/151, MIC 303

MIC320 Introduction to Microbiology and Immunology for Nurses
3 credits  Spring Semester
Course covers the basic principles of microbiology and immunology. Course cannot
be used for MIC major or minor credit.
PREREQUISITE: CHM 103 AND BIL 150. OPEN TO NURSING STUDENTS ONLY.

MIC321 Immunobiology
3 credits  Fall Semester
Mechanisms underlying the cooperation between T-cells, B-cells, and antigens leading
to humoral and cell mediated responses. The significance of immune cells and their
products pertaining to autoimmunity, transplantation, and the surveillance of neoplastic
cells is covered.
PREREQUISITE: MIC 301.

MIC322 Medical Parasitology
3 credits  Spring Semester
Course discusses the biochemistry, physiology, pathogenicity, immunology, and mechanism
of drug action and resistance of medically important parasitic protozoa, trematodes,
nematodes, and cestodes.
PREREQUISITE: MIC 301.

MIC323 Principles of Microbial Pathogenesis
3 credits  Fall Semester
Course analyzes host-microbe relationships at the molecular and cellular levels
with an emphasis on microbial virulence determinants and host cell defense responses.
PREREQUISITE: MIC 301.

MIC421 Molecular Immunobiology
4 credits  Offered By Announcement Only
Techniques of Molecular Immunology.
PREREQUISITE: MIC 321.
MIC434 Microbial Genetics and Molecular Immunology
3 credits  Fall Semester
Course analyzes DNA replication, mutation, repair, recombination, jumping genes (transposons), infective hereditary mechanisms, gene regulation, protein synthesis, recombinant DNA technology, modern methods, and application of genetic engineering. Origin of antibody diversity, organization, and expression of antibody genes is included.
PREREQUISITE: MIC 301.

MIC436 Fundamental and Medical Virology
3 credits  Spring Semester
The study of viruses as biological entities and etiological agents of disease. Virus-cell and virus-host interactions are also discussed.
PREREQUISITE: MIC 301.

MIC441 Microbiology and Immunology Colloquium
1 credit  Fall & Spring Semester
External and internal faculty presentations as well as graduate presentations of recent advances in research. Course meets one hour per week.
PREREQUISITE: MIC 301

MIC451 Special Projects in Immunobiology
2-6 credits  Fall & Spring Semester
Laboratory research problems in major areas of immunobiology including literature search, experimental design, data gathering and evaluation of results.
PREREQUISITE: MAJOR IN MICROBIOLOGY AND IMMUNOLOGY, 17 CREDITS IN MICROBIOLOGY AND IMMUNOLOGY.

MIC452 Special Projects in Parasitology
2-6 credits  Fall & Spring Semester
Laboratory research problems in major areas of parasitology including literature search, experimental design, data gathering and evaluation of results.
PREREQUISITE: MAJOR IN MICROBIOLOGY AND IMMUNOLOGY, 17 CREDITS IN MICROBIOLOGY AND IMMUNOLOGY.

MIC453 Special Projects in Pathogenic Bacteriology
2-6 credits  Fall & Spring Semester
Laboratory research problems in major areas of pathogenic bacteriology including literature search, experimental design, data gathering and evaluation of results.
PREREQUISITE: MAJOR IN MICROBIOLOGY AND IMMUNOLOGY, 17 CREDITS IN MICROBIOLOGY AND IMMUNOLOGY.

MIC454 Special Projects in Microbial Genetics
2-6 credits  Fall & Spring Semester
Laboratory research problems in major areas of microbial genetics including literature search, experimental design, data gathering and evaluation of results.
PREREQUISITE: MAJOR IN MICROBIOLOGY AND IMMUNOLOGY, 17 CREDITS IN MICROBIOLOGY AND IMMUNOLOGY.

MIC455 Special Projects in Immunogenetics
2-6 credits  Fall & Spring Semester
Laboratory research problems in major areas of immunogenetics including literature search, experimental design, data gathering and evaluation of results.
PREREQUISITE: MAJOR IN MICROBIOLOGY AND IMMUNOLOGY, 17 CREDITS IN MICROBIOLOGY AND IMMUNOLOGY.
MIC456 Special Projects in Virology
2-6 credits  Fall & Spring Semester
Laboratory research problems in major areas of virology including literature search, experimental design, data gathering, and evaluation of results.
PREREQUISITE: MAJOR IN MICROBIOLOGY AND IMMUNOLOGY, 17 CREDITS IN MICROBIOLOGY AND IMMUNOLOGY.

MIC501 Medical Microbiology
5 credits  Offered By Announcement Only
Course discusses the nature of microbial agents of infectious disease as well. As relationship of virulence to host resistance and fundamental immunologic concepts. Microbial physiology and genetics, the structure, design, and mechanism of action on antimicrobials. are also.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MIC523 Mechanisms of Microbial Virulence
2 credits  Spring Semester
This course will focus on the mechanisms employed by bacterial and viral pathogens to produce disease in animals and humans. The course is divided into two 3 week modules. The first module will cover bacterial pathogens with an emphasis on the bacteria-host cell interaction. Specific topics will include: bacterial attachment and invasion of eukaryotic cells, virulence gene regulation, and secretion of virulence factors, bacterial toxins and obligate intracellular bacterial pathogens. The second module will cover viruses and human viral diseases with an emphasis on viral replication, gene expression, virus-host cell interactions and viral oncology. Classes will consist of a mixture of lectures and discussions of recent or classic papers. There will be 2 exams.
MSL101 Basic Military Science  
0 - 2 credits  Fall Semester  
Introduction to Army organizations, military customs and courtesies, basic stationary and marching drills, basic map reading, land navigation, drown proofing, rappelling, river crossing techniques, physical fitness training, and practical exercises in field discipline. Requires outdoor leadership laboratory and at least one weekend field training exercise.

MSL102 Basic Military Science  
0 - 2 credits  Spring Semester  
Introduction to basic leadership principles and traits, army command and staff officer duties, awards, decorations, individual military tactics, field discipline, patrolling techniques, radio telephone procedures, rappelling and river crossing. Requires outdoor leadership laboratory and at least one weekend field training exercise.

MSL201 Basic Military Science  
0 - 2 credits  Fall Semester  
Instruction to squad and platoon marching drills, development of physical fitness training programs, conduct on military training and inspections, leadership techniques, advanced map reading, rappelling and river crossing techniques. Requires outdoor leadership laboratory and at least one weekend field training exercise.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MSL202 Basic Military Science  
0 - 2 credits  Spring Semester  
Continued instruction in drill and ceremonies, radio/telephone procedures, nuclear, biological, and chemical warfare, practical land navigation, orienteering, and introduction to combat troop leading procedures. Requires outdoor leadership laboratory and at least one weekend field training exercise.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MSL301 Basic Military Science  
0 - 3 credits  Fall Semester  
Classroom and field experience in leading squads and platoons in both garrison and combat environments. Basic rifle marksmanship and live fire of the M16A1 rifle. Practical exercises in combat troop leading procedures. Advanced physical fitness training to include endurance runs and tactical road marches.  
PREREQUISITE: PERMISSION OF DEPARTMENT.

MSL302 Advanced Military Science  
0 - 3 credits  Spring Semester  
Classroom instruction and field experience in combat troop leading procedures for offensive, defensive and patrolling missions. Advanced written and practical land navigation exercises. M16A1 rifle qualification. Company level drill and ceremonies to include manual of arms. Classroom and practical exercises on requests for artillery and mortar fires. Practical experience with training underclassmen in first aid and individual tactics.  
PREREQUISITE: PERMISSION OF DEPARTMENT.
MSL401 Advanced Military Science
0-3 credits  
Fall Semester
Instruction instills an uncompromising commitment to the Army Ethic, enhances thought processes and decision-making skills, and relates officer behavior to cadet leadership roles. Students are primarily responsible for the command and control of the cadet battalion for training purposes. Student's role is principally one of officer leader at the platoon (30 or more under classmen) and higher levels and cadet instructor/evaluator.
PREREQUISITE: PERMISSION OF DEPARTMENT.

MSL402 Advanced Military Science
0-3 credits  
Spring Semester
Capstone course in the preparation for a commission as a second lieutenant. The training is intended to solidify the commitment to officership, reinforce individual competencies, and afford maximum practical officer leader experiences through responsible leadership positions within the cadet battalion command and staff.
PREREQUISITE: PERMISSION OF DEPARTMENT.

MSL440 Studies in Military History
1-3 credits  
Fall & Spring Semester
Supervised readings and independent study in military history.
PREREQUISITE: PERMISSION OF DEPARTMENT.

MSL441 Studies in Military History
1-3 credits  
Fall & Spring Semester
Supervised readings and independent study in military history.
PREREQUISITE: PERMISSION OF DEPARTMENT.

MSL499 Independent Studies in U.S. Military History
3 credits  
Fall & Spring Semester
Supervised readings and independent study in United States Military History. Writing requirements.
PREREQUISITE: DEPARTMENT APPROVAL REQUIRED.

MODERN LANGUAGES & LITERATURES

MLL321 Topics in Literary and Cultural Studies
0-3 credits  
Fall & Spring Semester
Comparative topics in the study of literature and culture. Specific topics vary; may be repeated for credit if topics differ. Taught in English.
PREREQUISITE: THREE CREDITS IN LITERATURE

MLL322 Special Topics: Travel Writers, Photographers & Filmmakers: How they Want us to
3 credits  
Second Summer Session
Through textual and visual media, this course reflects on travel representations from cultural and formal perspectives. More specifically, we'll explore the works of important travel writers (Theroux, While), renowned photo-reporters (Salgado, Reza) and maybe less known documentaries (Kramer, Melroz).
MLL404 Language in Society
3 credits Fall Semester
Overview of ideological, social, political, economic, and cultural issues of language in society, and the principle linguistic concepts and methodologies that guide research on those issues. Language variation, social dialectology, multilingualism, interaction and interpersonal communication, gender, language and power, language policy and planning, and globalization are highlighted. The main focus of the course (at least 80%) will be on non-English languages—in particular, those taught in MLL.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

MLL597 Readings for the Ph.D. Examinations
1- 3 credits Offered By Announcement Only
For Ph.D. students who are preparing for exams.
PREREQUISITE: PERMISSION OF DIRECTOR OF GRADUATE STUDIES

MLL599 Internship
1 credit Offered By Announcement Only
Students work in a community or business setting on issues related to language, culture, and/or teaching.
NEU120 Orientation to the Study of Neuroscience II: FORUM  
1 credit  
Spring Semester  
Critical discussion of research in neuroscience. 
PREREQUISITE: ONLY FIRST YEAR NEUROSCIENCE MAJORS. COUNTS AS ELECTIVE CREDIT.

NEU342 Neural Mechanisms of Disease  
3 credits  
Fall & Spring Semester  
Cellular and molecular mechanisms underlying nervous system dysfunction and mental illness. Biological bases, including clinical and therapeutic aspects, of specific neurological disorders. 
PREREQUISITE: BIL 268 OR PSY 202

NEU367 Introduction to Research Projects I  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Students assist on a research project under supervision of a faculty member. Activities include library research, data collection and management, and attendance at research team meetings. 
PREREQUISITE: 6 CREDITS IN BIOLOGY OR PSYCHOLOGY. SECOND SEMESTER AND SOPHOMORE STANDING. STUDENTS MUST OBTAIN FACULTY SPONSORSHIP IN WRITING PRIOR TO REGISTRATION. FORMS ARE AVAILABLE IN UNDERGRADUATE ACADEMIC SERVICES FOR PSYCHOLOGY, FLIPSE 508. OVERRIDE BY DIRECTOR OF UNDERGRAD. STUDIES IN PSYCHOLOGY REQUIRED.

NEU368 Introduction to Research Projects II  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Students assist on a research project under supervision of a faculty member. Activities include library research, data collection and management, and attendance at research team meetings. 
PREREQUISITE: STUDENTS MUST OBTAIN FACULTY SPONSORSHIP IN WRITING, PRIOR TO REGISTRATION. FORMS ARE AVAILABLE IN UNDERGRADUATE ACADEMIC SERVICES FOR PSYCHOLOGY, FLIPSE 508 OVERRIDE BY DIRECTOR OF UNDERGRADUATE STUDIES IN PSYCHOLOGY REQUIRED.

NEU403 Neuroscience laboratory  
4 credits  
Fall & Spring Semester  
Research methods and laboratory experiments in contemporary neuroscience from individual cells to behavior. Scientific report writing and computer applications in experimental design and analysis. 
PREREQUISITE: PSY 316; PSY 402 OR BIL 268. USUALLY LIMITED TO NEUROSCIENCE GRADUATING SENIORS. PERMISSION REQUIRED FROM DIRECTOR OF UNDERGRADUATE STUDIES IN PSYCHOLOGY.

NEU465 Cellular and Molecular Neuroscience  
3 credits  
Fall & Spring Semester  
Biophysical, biochemical, and structural features of nerve muscle and sensory cells. Basic cellular processes underlying function and development of nervous system. 
PREREQUISITE: BIL 255, CHM 202, PSY 202, OR BIL 268

NEU468 Developmental Neuroscience.  
3 credits  
Spring Semester  
Cellular and molecular aspects of nervous system including neuronal differentiation. 
PREREQUISITE: BIL 255; BIL 268 OR PSY 202; CHM 202

NEU498 Senior Honors Thesis in Neuroscience II  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Independent research project. 
PREREQUISITE: PERMISSION OF FACULTY MENTOR AND DIRECTOR OF UNDERGRADUATE STUDIES IN PSYCHOLOGY REQUIRED.
NEU499 Senior Honors Thesis in Neuroscience I
3 credits  Fall & Spring Semester
PREREQUISITE: 18 CREDITS IN MAJOR, PSY 316 AND ELIGIBILITY FOR HONORS IN NEUROSCIENCE.
PHI101 Introduction to Philosophy  
3 credits  
Fall & Spring Semester & First Summer Session  
Problems concerning knowledge, mind, freedom, religion, and morality. Reading and discussion of primary sources.

PHI110 Critical Thinking  
3 credits  
Fall & Spring Semester  
Principles of sound reasoning; the construction and evaluation of arguments in everyday contexts and the assessment of evidence.

PHI115 Social and Ethical Issues in Computing  
3 credits  
Spring Semester  
History, social context and methods and tools of analysis. Professional and ethical responsibilities. Intellectual property. Privacy and civil liberties.

PHI130 Contemporary Moral Issues  
3 credits  
Fall & Spring Semester & First Summer Session  
An examination of the philosophical problems which arise in connection with such moral and social issues as abortion, war, suicide, civil disobedience, racial discrimination, the death penalty, and the right to privacy.

PHI210 Symbolic Logic  
3 credits  
Fall Semester & First Summer Session  
Introduction to symbolic logic and its methods.

PHI215 Logic and Law  
3 credits  
Spring Semester  
Principles and techniques of logic applied to legal reasoning.

PHI236 Feminist Philosophy  
3 credits  
Fall & Spring Semester  
This course is an introduction to issues in feminist philosophy, including its critique of Western philosophy and its contributions to major areas of philosophy such as ethics, social philosophy, theories of human nature, and theories of knowledge. Theories of oppression introduced at the beginning of the course inform analyses of sexism, heterosexism, racism, classism and ableism, and philosophizing about their "isms" is aided by sociocultural research. The emphasis is not only on what is contained in these topics, but also on how to think critically about them.  
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR SOPHOMORE STANDING

PHI241 History and Philosophy of Science  
3 credits  
Spring Semester  
PREREQUISITE: ENG 245

PHI271 Ancient Philosophy  
3 credits  
Fall Semester  
Ancient Greek, Hellenistic, Roman, and early Christian (Patristic) philosophy with emphasis on its contribution to Western culture.  
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR SOPHOMORE STANDING.

PHI272 Modern Philosophy  
3 credits  
Spring Semester  
The Renaissance through Kant.  
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR SOPHOMORE STANDING.
PHI330 Ethics
3 credits
Fall & Spring Semester
The main ethical systems and ethical concepts, an analysis of important ethical readings, and an application of ethical concepts to the individual and to society.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR PERMISSION OF INSTRUCTOR.

PHI331 Social and Political Philosophy
3 credits
Offered By Announcement Only
Relations between morality and politics, the sources and the limits of political obligation, the function of the state, the nature of law, civil disobedience and revolution.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI332 Philosophy of Law
3 credits
Offered By Announcement Only
An examination of basic philosophical issues concerning the nature and function of law, with particular attention to the legal system of the United States.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI333 Philosophical foundations of criminal law
3 credits
Offered By Announcement Only
Philosophical examination of questions concerning the purpose, scope and limits of criminal law and the justification of punishment.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR PERMISSION OF INSTRUCTOR.

PHI334 Biomedical Ethics
3 credits
Offered By Announcement Only
Fundamental issues including: the allocation of medical resources, behavior control, definition of death, experimentation with human subjects, euthanasia, and abortion.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI335 Professional Ethics
3 credits
Offered By Announcement Only
Moral issues in business, engineering, law, and medicine. Development of moral principles to guide those in professional roles.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR PERMISSION OF INSTRUCTOR.

PHI336 Human Rights
3 credits
Offered By Announcement Only
This course offers philosophical, legal, and political perspectives on human rights. After a short introduction to international human rights, it surveys international human rights treaties and institutions. Next it turns to topics in human rights theory, covering some contemporary philosophical theories of human rights. The final section explores some human rights problems and controversies.
PREREQUISITE: 3 CREDITS IN PHILOSOPHY, OR PERMISSION FROM INSTRUCTOR.

PHI340 Theory of Knowledge
3 credits
Offered By Announcement Only
Analysis of the nature, sources and structure of knowledge. Possible topics include perception, skepticism, reason, truth, justification, and certainty.
PREREQUISITE: PHI 110 OR 210.
PHI341 Philosophy of Language
3 credits
Theories of meaning, reference, predication, nature of signs and symbols, types and functions of discourse.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI343 Philosophy of Science
3 credits
Scientific theories and their relation to evidence; experimentation and its logic; explanation, the rationality of science and the growth of scientific knowledge.
PREREQUISITE: PHI 110 OR 210.

PHI344 Philosophy of Mind
3 credits
The nature of mind and mental acts, events, and states and their relations to physical states of the brain and body and to behavior.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI345 Metaphysics
3 credits
The basic structure and kinds of constituents of the world.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR JUNIOR STANDING.

PHI346 Philosophy of Mathematics
3 credits
PREREQUISITE: 3 CREDITS IN PHILOSOPHY, COMPLETED UNIVERSITY GENERAL EDUCATION REQUIREMENTS IN MATHEMATICS, OR PERMISSION FROM INSTRUCTOR

PHI349 Philosophy of Space and Time
3 credits
Fall & Spring Semester
Time and space are notoriously difficult to think about. We seem to have an intuitive understanding of them, but it is surprisingly hard to express that understanding. To make matters worse, modern physics challenges what little grasp we thought we had on the concepts of space and time. We are told that space can be curved, and that there can fail to be an objective fact about which of two events occurred first. So we are left without even an intuitive grasp of two of the most fundamental concepts of experience.
PREREQUISITE: 3 CREDITS IN PHILOSOPHY OR PERMISSION FROM INSTRUCTOR

PHI351 Philosophy of Religion
3 credits
The nature of and grounds for religious beliefs; traditional arguments for and against the existence of God; God’s attributes; reason vs. faith.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI352 Aesthetics
3 credits
The philosophy of art, such as defining 'art', adjudicating among competing judgments or interpretations of works of art, and understanding the metaphysical status of art objects.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY OR PERMISSION OF INSTRUCTOR.
PHI353 Philosophy of Film
3 credits
Fall & Spring Semester
Philosophical questions concerning the ontology and aesthetics of film.
PREREQUISITE: 3 CREDITS IN PHILOSOPHY, OR PERMISSION FROM INSTRUCTOR.

PHI354 Philosophy of Literature
3 credits
Offered By Announcement Only
Central philosophical issues concerning literature and the evaluation of literary works.
PREREQUISITE: 3 CREDITS IN PHILOSOPHY, COMPLETION OF UNIVERSITY GENERAL EDUCATION REQUIREMENT IN LITERATURE, OR PERMISSION FROM INSTRUCTOR

PHI373 Nineteenth Century Philosophy
3 credits
Offered By Announcement Only
Fichte, Schelling, Hegel, Schopenhauer, Kierkegaard, Marx, Comte, Mill, Spencer, and Nietzsche.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI374 Twentieth Century Philosophy
3 credits
Offered By Announcement Only
Philosophy and philosophers in the twentieth century.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI381 Existentialism
3 credits
Offered By Announcement Only
Existentialist philosophy as seen in the works of such authors as Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, and Dostoevsky.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI391 Special Studies
3 credits
Offered By Announcement Only
Study of selected problems, philosophers, or movements. May be repeated for credit.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI392 Special Studies
3 credits
Offered By Announcement Only
Study of selected problems, philosophers, or movements. May be repeated for credit.
PREREQUISITE: THREE CREDITS IN PHILOSOPHY.

PHI494 Independent Study in Philosophy
3 credits
Offered By Announcement Only
Independent research conducted under the guidance of a faculty member. May be repeated for credit.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND PERMISSION OF INSTRUCTOR.

PHI495 Senior Honors Thesis
3 credits
Offered By Announcement Only
Directed reading and a substantial and scholarly paper.
PREREQUISITE: SENIOR STANDING AND ENROLLMENT IN THE DEPARTMENTAL HONORS PROGRAM.

PHI496 Senior Honors Thesis
3 credits
Offered By Announcement Only
PREREQUISITE: PHI 495.
PHI506 Mathematical Logic
3 credits
Offered By Announcement Only
PREREQUISITE: PHI 210 OR PHI 510

PHI510 Formal Logic
3 credits
Spring Semester
First and second-order quantification theory; metalogic.

PHI530 Ethical Theory
3 credits
Offered By Announcement Only
G. E. Moore to the present.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 330.

PHI533 Political Philosophy
3 credits
Offered By Announcement Only
A survey of some central issues and developments in political philosophy.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 330.

PHI540 Epistemology
3 credits
Offered By Announcement Only
A survey of the basic topics and questions in epistemology: knowledge acquisition and justification, perception, fallibilism, and skepticism.

PHI541 Mind and Language
3 credits
Offered By Announcement Only
Philosophical problems about signs, linguistic and mental representations, intentionality, action, and consciousness.

PHI543 Induction, Probability, and Scientific Method
3 credits
Offered By Announcement Only
Foundations of inductive reasoning and role of experiment in science.

PHI545 Metaphysics
3 credits
Offered By Announcement Only
A selection of topics dealing with the main problems of metaphysics: existence, modality, universals, identity and persistence through time, causation, the self and physicalism.

PHI546 Evidence and Knowledge in Medicine
3 credits
Spring Semester
Basic methodologies in medicine in the context of philosophical theories of evidence.
PREREQUISITE: 2 COURSES IN PHI, OR PERMISSION FROM INSTRUCTOR
PHI555 Philosophy of Education
3 credits
Fall Semester
Problems concerning the nature and aims of education.

PHI560 History of Logic
3 credits
Fall & Spring Semester
Aristotle, the Stoics, the Scholastics, Leibniz, Boole, DeMorgan, Peirce, Frege, and Russell and Whitehead.

PHI562 History of Ethics
3 credits
Offered By Announcement Only
A selection of ethical theories from Aristotle to Rawls.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 330.

PHI570 Pre-Socratics and Plato
3 credits
Offered By Announcement Only
Fragments from the Pre-socratics and the dialogues of Plato.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 271.

PHI571 Aristotle and Hellenistic Philosophy
3 credits
Offered By Announcement Only
A survey of central philosophical topics in Aristotle and Hellenistic Philosophers (Epicureans, Stoics, and Skeptics).
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 271.

PHI572 Medieval Philosophy
3 credits
Offered By Announcement Only
The patristic period through the scholasticism of the late middle ages.

PHI573 Early Modern Philosophy
3 credits
Offered By Announcement Only
An examination of early modern philosophy from Hobbes and Descartes to Hume.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 272.

PHI575 Kant
3 credits
Offered By Announcement Only
An examination of selected issues in Kant's theoretical or practical philosophy.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 272.

PHI581 Pragmatism
3 credits
Offered By Announcement Only
Peirce, James, Dewey, and others.
PHI582 History of Analytic Philosophy
3 credits
Offered By Announcement Only
The development of analytic philosophy from its beginnings in the work of Frege and Russell through logical positivism to contemporary philosophy.

PHI583 The Phenomenological Tradition
3 credits
Offered By Announcement Only
An examination of the phenomenological movement (Edmund Husserl, Martin Heidegger, Maurice Merleau-Ponty, and others) and of its impact on contemporary thought.

PHI591 Special Topics
3 credits
Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING.

PHI592 Special Topics
3 credits
Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING.

PHI593 Special Topics
3 credits
Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit. Prerequisite: Six credits in Philosophy and junior standing.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING

PHI594 Independent Study in Philosophy
1-3 credits
Offered By Announcement Only
Directed reading on a topic or philosopher. May be repeated for credit.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING.

PHYSICAL SCIENCE
PSC101 Physical Science
3 credits
Fall & Spring Semester
An interdisciplinary course to provide the non-science major with an understanding of some of the methods, ideas and accomplishments of Physics, Astronomy, Chemistry, Geology, and their role in the development of civilization.
PREREQUISITE: NOT FOR MAJOR OR MINOR

PHYSICS
PHY101 College Physics I
0-4 credits
Fall & Spring Semester & First Summer Session
Elementary mechanics, thermal phenomena, fluids, waves. Courses 101-102-106-108 provide a ten credit 'physics with lab' sequence for premedical students and others.
PREREQUISITE: MTH 108 OR 105.

PHY102 College Physics II
0-4 credits
Fall & Spring Semester & First & Second Summer Session
Electromagnetism, optics, and modern physics.
PREREQUISITE: PHY 101.
PHY103 General Physics

3 credits  
Spring Semester 
Mechanics, waves, electromagnetism. 
PREREQUISITE: ARCHITECTURE MAJOR.

PHY106 College Physics Laboratory I

1 credit  
Fall & Spring Semester & First Summer Session 
Laboratory course to accompany PHY 101. 
PREREQUISITE: PREREQUISITE OR COREQUISITE: PHY 101.

PHY108 College Physics Laboratory II

1 credit  
Fall & Spring Semester & First & Second Summer Session 
Laboratory course to accompany PHY 102. 
PREREQUISITE: PREREQUISITE OR COREQUISITE: PHY 102.

PHY110 Descriptive Astronomy

3 credits  
Fall & Spring Semester 
For students not majoring in Mathematics or a Physical Science. A brief non-technical treatment of the universe and its contents. Mathematical requirements are minimal with emphasis on our present knowledge about energy and matter in space. Not for major or minor. 
PREREQUISITE: NOT FOR MAJOR OR MINOR.

PHY160 Physics of the Arts

3 credits  
Spring Semester 
Newtonian mechanics, energy, wave motion, atoms, and electricity. Applications to music, art and communications.

PHY201 University Physics I. Life Sciences

0-4 credits  
Fall Semester 
Calculus based introductory physics: mechanics, heat, fluids, waves, with applications from the life sciences. 
PREREQUISITE: MTH 162 OR 172.

PHY202 University Physics II - Life Sciences.

0-4 credits  
Fall Semester & First Summer Session 
Calculus based introductory physics: electromagnetism, optics, modern physics, with applications from the life sciences. 
PREREQUISITE: PHY 201.

PHY205 University Physics I

0-3 credits  
Fall & Spring Semester & First Summer Session 
Mechanics through gravity and harmonic motion, intended for science and engineering students. 
PREREQUISITE: OR CO-REQUISITE MTH 151 OR 141, WITH A "B" IN MTH 105 OR 108 OR PLACEMENT INTO CALCULUS BY MTH PLACEMENT EXAM. OTHERWISE, PRE-REQUISITE: MTH 151, 161, 171, OR 141.

PHY206 University Physics II

0-3 credits  
Fall & Spring Semester & Second Summer Session 
Fluids, waves, optics, thermal phenomena. 
PREREQUISITE: PHY 205. PRE OR CO-REQUISITE: MTH 162 OR 172.
PHY207 University Physics III
  0-3 credits Fall & Spring Semester & First Summer Session
  Electromagnetism through Maxwell's equations.
  PREREQUISITE: PHY 205; MTH 162 OR 172

PHY208 University Physics II Lab
  1 credit Fall & Spring Semester & Second Summer Session
  Laboratory to accompany PHY 206.
  PREREQUISITE: PREREQUISITE OR COREQUISITE: PHY 206.

PHY209 University Physics III Lab
  1 credit Fall & Spring Semester & First Summer Session
  Lab to accompany PHY 207.
  PREREQUISITE: PREREQUISITE OR COREQUISITE: PHY 207.

PHY210 Honors University Physics II-III
  5-6 credits Fall & Spring Semester
  Fluids, waves, optics, thermal phenomena, electromagnetism. Combines PHY 206 and 207.
  PREREQUISITE: PHY 205; MTH 162 OR 172, AND WRITTEN PERMISSION

PHY315 Mathematical Tools for Physics
  3 credits Spring Semester
  How to use mathematics. Series, complex algebra, vector analysis, differential equations, etc.
  PREREQUISITE: PHY 207, MTH 211 OR MTH 310; PRE-OR COREQUISITE: MTH 311.

PHY316 Physics of the Solar System
  3 credits Offered By Announcement Only
  A mathematical treatment of the structure and composition of the solar system.
  The physical nature of the sun, planets, satellites, comets, and meteors. Occasional observation sessions will be scheduled.
  PREREQUISITE: PHY 206, 207.

PHY317 Physics of Stellar Systems
  3 credits Offered By Announcement Only
  Normal and peculiar stars: their structure and evolution. Galactic structure and some cosmology. Occasional observation sessions will be scheduled.
  PREREQUISITE: PHY 206, 207.

PHY321 Thermodynamics and Kinetic Theory
  3 credits Spring Semester
  An intermediate course in thermal phenomena, from both macroscopic and microscopic points of view.
  PREREQUISITE: PHY 206 AND MTH 211 OR 310

PHY340 Classical Mechanics I
  3 credits Fall Semester
  Includes harmonic motion, orbit theory, coupled oscillations, rigid body motions.
  PREREQUISITE: PHY 206, 207. PRE OR CO-REQUISITE: MTH 210, 311
PHY350 Intermediate Electricity and Magnetism  
3 credits  
Fall Semester  
Includes the integral and differential forms of Maxwell's equations, circuit theory, and boundary value problems.  
PREREQUISITE: PHY 206, 207, MTH 211 OR 310. PREREQUISITE OR COREQUISITE: MTH 311.

PHY351 Intermediate Electricity and Magnetism II  
3 credits  
Spring Semester  
A continuation of PHY 350. Includes further application of Maxwell's equations with emphasis on radiation theory.  
PREREQUISITE: PHY 350.

PHY360 Introduction to Modern Physics  
3 credits  
Fall & Spring Semester  
Emphasis on the experimental foundations of modern physics. Relativity, quantization, atomic structure, radiation, nuclei.  
PREREQUISITE: PHY 206. PREREQUISITE OR COREQUISITE: PHY 207.

PHY362 Modern Physics Honors Seminar  
1 credit  
Fall & Spring Semester  
Special Topics to accompany PHY 360. Co requisite: PHY 360.  
PREREQUISITE: COREQUISITE: PHY 360.

PHY401 Senior Thesis  
3 credits  
Offered By Announcement Only  

PHY402 Senior Thesis  
3 credits  
Offered By Announcement Only  

PHY500 Research  
1-3 credits  
Offered By Announcement Only  
Project course introducing methods of research, individual investigation of current problems.

PHY505 Advanced Laboratory  
1-2 credits  
Fall Semester  
Advanced experiments such as properties of the electron, optical spectra, electrical measurements, radioactive decay, absorption, etc.  
PREREQUISITE: PHY 208. PREREQUISITE OR COREQUISITE: PHY 360.

PHY506 Advanced Laboratory  
1-2 credits  
Spring Semester  
Advanced experiments such as properties of the electron, optical spectra, electrical measurements, radioactive decay, absorption, etc.  
PREREQUISITE: PHY 208. PREREQUISITE OR COREQUISITE: PHY 360.

PHY515 Mathematical Techniques in Physics  
3 credits  
Spring Semester  
Complex variables and applications. Infinite series and their uses, particularly in differential equations. Multiple integrals and Fourier series.  
PREREQUISITE: PHY 206, 207; MTH 311, AND 310 OR 312.
PHYSICS

PHY516 Readings in Physics  
1- 3 credits  
Fall & Spring Semester  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PHY517 Readings in Physics  
1- 3 credits  
Spring Semester  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PHY518 Readings in Physics  
1- 3 credits  
Offered By Announcement Only  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PHY520 Solid State Physics  
3 credits  
Offered By Announcement Only  
Crystal structure, quantum theory of the electronic structure of solids, mechanical, electric, magnetic and optical properties of solids.  
PREREQUISITE: PHY 560.

PHY530 Plasma Physics I  
3 credits  
Offered By Announcement Only  
Kinetic theory of plasmas, adiabatic motion of charged particles magnetofluid dynamics, transport properties of plasmas in electromagnetic fields.  
PREREQUISITE: PHY 340, 351, 360.

PHY540 Classical Mechanics II  
3 credits  
Fall Semester  
Lagrangian formulation, rigid body dynamics. Topics selected from fluid dynamics, non-linear oscillations, normal modes, phase plane analysis.  
PREREQUISITE: PHY 340.

PHY545 Introduction to Astrophysics  
3 credits  
Offered By Announcement Only  
celestial mechanics, solar models, galaxies, distance scales, instruments.  
PREREQUISITE: PHY 360 AND ANOTHER 3 CREDIT 300 LEVEL PHYSICS COURSE.

PHY552 Optical Physics  
3 credits  
Offered By Announcement Only  
Geometric optics, interference and diffraction, polarized light, optical pumping, coherence phenomena, applications to modern physical research.  
PREREQUISITE: PHY 351, 360.

PHY560 Quantum Mechanics and Modern Physics I  
3 credits  
Fall Semester  
Introductory theory with applications to simple systems. Perturbation theory and atomic structure.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: PHY 350.

PHY561 Quantum Mechanics and Modern Physics II  
3 credits  
Spring Semester  
Applications of quantum mechanics to atomic and molecular spectroscopy, quantum statistical mechanics, and nuclear physics.  
PREREQUISITE: PHY 560.
POL199 UMinDC Introduction to American National Government  
6 credits  
Fall Semester

POL201 Introduction to American National Government  
3 credits  
Fall & Spring Semester & First & Second Summer Session
Examination of the principles, structures, and processes of the national government of the United States. Frequent comparisons made with others countries.

POL202 Introduction to Comparative Politics  
3 credits  
Fall & Spring Semester & First & Second Summer Session
This course examines how countries around the world, democracies (established and new) and authoritarian regimes are governed. The different ways in which, and the different degrees to which, governments intervene in the economy.

POL203 Introduction to International Relations  
0-3 credits  
Fall & Spring Semester & Second Summer Session
Introduction to the theory and practice of international relations. Analyzes the modern state system; globalization; diplomacy and negotiation, balance of power considerations.
PREREQUISITE: NONE

POL204 POL 203 Discussion Section  
0 credit  
Fall & Spring Semester

POL205 POL 203 Discussion Section  
0 credit  
Fall & Spring Semester

POL213 Government and Society  
3 credits  
Offered By Announcement Only
Examination of such key issues as the role of business in society, the nature of corporate responsibility, business ethics practices, and the interactive roles of government and business in a global society. Not for major or minor credit.
PREREQUISITE: POL 211.

POL250 Scope and Methods of Political Science  
3 credits  
Offered By Announcement Only
The basic skills needed in political science to critically read academic journal articles and books. The application of scientific methods to the study of public life, focusing on research design and introducing students to the various methodologies used by researchers to draw descriptive and causal inference about the political world. Some methods introduced include ethnography, experimentation, the case study, and survey research.
PREREQUISITE: POL 20, 202, OR 203

POL305 Introduction to Political Theory  
3 credits  
Offered By Announcement Only
Survey and analysis of political theories from Plato to the present. Topics include competing ideas on the organization of human communities, morality, and justice. Illumination of traditional political thought with more recent insights and concepts that question previous theories on the nature of the self, the scope of rationality, and social organization.
PREREQUISITE: POL 201, 202, OR 203
POL306 Positive Political Theory
3 credits
Offered By Announcement Only
Introduction to positive political theory as a study of politics using quantitative methods such as game theory, laboratory experiments, and computer simulation. The political agents involved in a given interaction are modeled as rational players guided by self-interest whose behavior can be formally explained or predicted.

POL307 Political Ideologies
3 credits
Offered By Announcement Only
Covers modern and contemporary political ideologies, such as Liberalism, Conservativism, and Marxism.
PREREQUISITE: POL 201, 202 OR 203

3 credits
Offered By Announcement Only
Tracks the roles of power and morality in the political cultures of Great Britain, including the use of force in national security policies, the moral and political framing of global terrorism, the deployment of human rights to address recent global issues (like genocide), and the influence of religion in contemporary British politics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL309 American Political Thought
3 credits
Offered By Announcement Only
This class traces the evolution of democratic thinking in America. Topics include the meaning of representation, citizenship, equality and liberty.
PREREQUISITE: POL 201

POL310 God, Science, and Politics
3 credits
Fall Semester
A study of morality and religion that addresses the competing influences of material and spiritual discourses on political regimes and practices. The talking points for the course include the various proofs and refutations offered throughout history of God's existence, the differences and similarities of scientific and religious approaches to experience, and the ways in which moral and religious principles enlighten politics as they fold into the vocabularies of natural law and right, and contaminate the political with religious violence in the name of God.
PREREQUISITE: POL 201 OR POL 202 OR POL 203 OR REL 101 OR PHI 101

POL311 Conspiracy Theories and the Public
3 credits
Spring Semester
PREREQUISITE: POL 201

POL313 The Constitution
3 credits
Fall Semester
The major concepts and theories regarding the U.S. Constitution and other important American political documents.
PREREQUISITE: POL 201
POL314 Legislative Processes
3 credits  
Spring Semester
Examination and analysis of the United States Congress. Emphasis on internal structure and operations, congressional roles and procedures, party leadership, external influences on congress, and incentives for congressional behavior.
PREREQUISITE: POL 201

POL315 American Presidency
3 credits  
Offered By Announcement Only
Historic development of presidential power; sources of the powers of the modern presidency, institutional decision-making; how and to what degree presidential power should be controlled.
PREREQUISITE: POL 201

POL321 Public Policy and Administration
3 credits  
Fall & Spring Semester
Analysis of justification for government policies, and specifically of situations where private sector institutions fail to achieve the socially optimal level of a good or service. Identifies the general type of government policies and which of these policies are appropriate for the various problems. Explores the likelihood that policies will be successful and the way the political process shapes the final choice and implementation of government policies.
PREREQUISITE: POL 201

POL322 Environmental Politics and Policy
3 credits  
Fall Semester & First Summer Session
Examines the federal government's policies toward the National Forests and public grasslands; water supply policies and politics of the Everglade and Far West; global warming; U.S. air and water pollution policies and politics as well as those related to waste management; U.S. energy policies; and trade and the environment.
PREREQUISITE: POL 201 OR POL 203.

POL323 Global Warming, Politics and the European Union
6 credits  
First & Second Summer Session
The European Union (EU) and especially France to ecologically modernize their advanced economies. The course will treat the EU effort to fashion an international agreement on climate change. This class in conducted in Paris, France.
PREREQUISITE: THREE (3) CREDITS IN THE SOCIAL SCIENCES.

POL332 Mass Media and Politics
3 credits  
Offered By Announcement Only
Role of media in American politics. Historical development of the media from newspapers, through radio, to television and new media such as the internet. Changing norms of news media reportage. The growth of political advertising both during and between elections; the effects of these developments on American government and on the public.
PREREQUISITE: POL 201
POL334 Campaigns
3 credits
Offered By Announcement Only
Students learn about political campaigns by becoming involved in an active campaign and studying the academic literature about elections and campaigns. Topics are media, campaign organization, voters, issues, political parties, elections, and the five elements of every campaign.
PREREQUISITE: POL 201

POL335 Local Government
3 credits
Offered By Announcement Only
Examination of city and county governments and politics. Focuses on structures, leadership, taxing and spending, the influence of state and federal governments, and "hot-button" issues of importance to South Florida communities.
PREREQUISITE: POL 201

POL337 International Law and Organizations
3 credits
Offered By Announcement Only
This course focuses on the interaction of states through various legal regimes. We will consider the role of international law and organizations in politics, and the political implications of both criminal and civil international law from the perspective of the state, the individual and non-governmental actors. Readings, lectures, class discussions, and examinations will familiarize the students with the parameters and limitations as well as the policy and practice of international law.
PREREQUISITE: POL 203

POL342 State and Local Government and Politics
3 credits
Offered By Announcement Only
State constitutions, political parties, legislatures, executive court systems, administrative systems and services, financial problems, city and county governments, local-state, federal-state and interstate relations. Special emphasis on governments in Florida.
PREREQUISITE: POL 201

POL343 Government in Metropolitan Areas
3 credits
Offered By Announcement Only
Political and administrative processes of governmental units within metropolitan areas; interrelations of these units and the evolution of metropolitan processes and forms.
PREREQUISITE: POL 201

POL344 Gender and Politics
3 credits
Offered By Announcement Only
Compares the roles played by men and women in political systems worldwide; examines public policy outcomes with significant gender-based effects, including policies on sexuality & reproductive health, gender-based violence, work & the family, and access to education.
PREREQUISITE: POL 202
POL345 The United States and Asia
3 credits
Offered By Announcement Only
Political, economic, and security aspects of America's relations with the Asian-Pacific area. Trade and alliance relationships. Actions and interactions of Asian states, their alignments with each other; the impact of these alignments on their relationships with the United States and in the global balance of power.
PREREQUISITE: POL 203

POL346 U.S.-Latin American Relations
3 credits
Fall Semester
Systematic survey of U.S.-Latin American relations highlighting contending paradigms in the study of hemispheric relations. Examines issues in East-West and North-South relations and political economy of Brazil, Mexico, and Argentina. Considers alternative U.S. foreign policies.
PREREQUISITE: POL 202, OR POL 203

POL347 American Foreign Policy
3 credits
Offered By Announcement Only
Examination and analysis of American diplomacy with emphasis on the post-cold war period. Introduces the constitutional framework within which foreign policy is formulated and the evolution of policies in response to changes in the external environment.
PREREQUISITE: POL 201 AND 203

POL348 United States Relations with the Middle East
3 credits
Offered By Announcement Only
Evolution of American relations with the Middle East. Analysis of the motivations and calculations, including domestic and external sources of policy-making and implementation. Emphasis on post-World War II period, with particular attention to the current administration.
PREREQUISITE: POL 203

POL349 U. S. Defense Policy
3 credits
Spring Semester
Examination of key problems of national security in the post-Cold War environment. Emphasis on the structure and functioning of the US defense establishment and its interactions with its most probable adversaries and allies. Consideration of the constraints on, and options open to, policy planners, and with the institutional elements of the decision making process.
PREREQUISITE: POL 201 AND 203 OR HIS 121 OR HIS 122

POL351 Public Opinion
3 credits
Fall Semester
Political functions of public opinion; opinion dynamics in the U.S.A.; quantitative analysis of elements in opinion change; principles of political control via mass media in the U.S.A.
PREREQUISITE: POL 201
POL352 Political Parties
3 credits
Offered By Announcement Only
Analysis of political organizations and electoral processes in the United States: their history, current status, and present trends. Consideration of the organization, control, and finances of political parties and pressure groups, their characteristic practices, and their relationship to political democracy.
PREREQUISITE: POL 201

POL353 Interest Groups and Lobbying
3 credits
Offered By Announcement Only
Analysis of lobbying and political interest groups in the United States; history, current status, and present trends. The organizations, control, and finances of pressure groups, their characteristic practices, and their relationship to democracy. Also, lobbying by citizens and groups more broadly, including the role of campaign contributions.
PREREQUISITE: POL 201

POL354 The CIA and the World of Intelligence
3 credits
Fall Semester
What the CIA does, how it does it, and the ways in which the CIA works with other intelligence agencies. Topics explored include: notable intelligence successes and failures, key intelligence issues, and ethical debates about intelligence activities including covert action.
PREREQUISITE: POL 201 OR POL 203

POL360 Congressional Representation
3 credits
Fall Semester
Examination of how and when citizens influence legislators' behavior. How legislators' floor behavior reflects citizens' preferences and how these preferences influence the formation of electoral coalitions.
PREREQUISITE: POL 201

POL370 Global Energy Politics
3 credits
Offered By Announcement Only
PREREQUISITE: POL 201 OR 203

POL372 Introduction to Criminal Justice
3 credits
Spring Semester
Selected topics in criminal law with an emphasis on constitutional criminal procedure and post 9/11 developments in federal criminal law: constitutional principles covering investigation and arrest, racial profiling, warrantless searches, controversial interrogation techniques, rights of "enemy combatants" and the imposition of capital punishment.
PREREQUISITE: POL 201

POL373 Constitutional Law I
3 credits
Fall Semester
A study of the development of the principles of American Constitutional Law, with a course focus upon those constitutional principles developed from the original document. Areas of study include judicial review, separation of powers, the Commerce Clause, the Contract Clause, and the Due Process Clauses.
PREREQUISITE: POL 201
POL374 Constitutional Law II
3 credits Not Offered; Transfer Credit Only
This course is a continuation of Constitutional LAW I. The curriculum covers the twenty-seven Amendments to the Constitution with a primary focus upon speech, assembly, religion, right to counsel, self-incrimination and unreasonable searches.
PREREQUISITE: POL 201

POL380 Comparative Political Analysis
3 credits Spring Semester
An introduction to the techniques of comparative political analysis by applying major social scientific arguments to the question: Why do some countries develop stable democracies and others do not? Students will pursue their own research projects seeking to answer this question in the context of a country or countries of their choice.
PREREQUISITE: POL 202; POL 250 IS RECOMMENDED

POL381 West European Politics (Previous Title: European Politics and Government)
3 credits Fall Semester
Examination of post-war political and economic developments in selected European countries. Focuses on political parties, welfare states, and political institutions.
PREREQUISITE: POL 202

POL382 Government and Politics of the Federal Republic of Germany
3 credits Offered By Announcement Only
An examination of Germany's political system, its political parties, and the country's economic, social and foreign policies.
PREREQUISITE: POL 202

POL384 Post communist Russian Politics
3 credits Fall Semester
Examines the demise of the USSR and the tumultuous post communist transition in Russia from Gorbachev to Putin and Medvedev. The foundations of state power, the political party system, civil society, petro-state capitalism, endemic corruption, current politics, and Russian nationalism are examined through the lens of western and Russian political science theories.
PREREQUISITE: POL 202

POL385 Politics and Society in Latin America
3 credits Fall & Spring Semester
Introduction to the politics of Latin American countries focusing on 20th century history, the impact of the Cold War and home-grown social struggles, economic development models, the difficulties of democratic consolidation, U.S-Latin America relations, the emergence of new political factors such as women's and indigenous movements, and current political constellations. The course combines a study of thematic issues with case studies.
PREREQUISITE: POL 202
POL386 Democratic Consolidation
3 credits  Offered By Announcement Only
Explore the general concept of "democratic consolidation" which has become a timely topic in the discourse of today's foreign policy. We will examine the central theoretical concepts that frame the discourse and then examine several case studies.
PREREQUISITE: POL 202

POL387 Politics of the Middle East
3 credits  Fall Semester
Comparative analysis of the political development of the Middle East in terms of nations and as a region. Particular stress is on the relationships within the region and with other regions of the world.
PREREQUISITE: POL 202

POL388 Politics of Israel
3 credits  Fall Semester
Comparative analysis of the political development of the state of Israel from the Yishuv period to the current pluralistic society. Particular stress is on the unique status of a predominantly Jewish state in the midst of an Arab/Islamic regional subsystem of political relationships.
PREREQUISITE: POL 202

POL391 Topics in International Relations (Previously: Introduction to International Relations)
3 credits  Fall & Spring Semester & First & Second Summer Session
Introduction to the theory and practice of international relations. Development of the modern state system; diplomacy and negotiation; balance of power considerations. Evaluation of past and present experiences of international cooperation through various multinational organizations; international law. Introduction to the principles of international political economy; "high" versus "low" and "hard" versus "soft" politics. "North"-"South" divisions. Class discussion of topics of current relevance to the international community.
PREREQUISITE: POL 203

POL392 International Terrorism
3 credits  Spring Semester
Study of phenomenon of low-intensity warfare known as international terrorism in all its variations: state, state-sponsored, state-supported, domestic revolutionary terrorism and counterterrorism. Also examines governmental policies of countering terrorism.
PREREQUISITE: POL 202 OR 203

POL499 Special Topics
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Government Accountability and Personal Responsibility, emphasizing new ways public agencies are communicating with citizens and changes in citizen expectations for self-governance. Various provisions of the new health care reform act, such as the requirement that all citizens purchase health insurance, would be covered along with new technologies such as "311" systems and social networking designed to improve citizen-government contacts.
POL501 Budget and Financial Management and Administration
3 credits  Spring Semester
Role of the budget in shaping public policy; managing public revenues; budgetary theory, politics, and fiscal management. Examples from state, municipal and federal governments.
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

POL510 Political Analysis
3 credits  Fall Semester
Introduction to the tools used to investigate empirical questions relevant to politics, policy and public administration. Students apply statistical concepts to contemporary social phenomena. Examines the impact of minority-majority redistricting, the fairness of the butterfly ballot, and the sources of political realignment.
PREREQUISITE: POL 201 OR POL 202 OR POL 203 OR POL 380 OR GRADUATE STANDING

POL512 Advanced Political Analysis
3 credits  Offered By Announcement Only
This course teaches students how to do social science research using the applied techniques of statistics and case study analysis while exposing them to research in the leading sub-fields of political science. Students will produce an original paper that evaluates an academic question using empirical social science evidence.
PREREQUISITE: POL 380 OR POL 510

POL513 Models of Politics
3 credits  Offered By Announcement Only
Hands-on examination of the process by which quantitative and qualitative models are constructed in political science. The course focuses on the creative aspect of model building and diverse forms of theory construction.
PREREQUISITE: POL 201, POL 202, OR POL 203

POL515 Media Content Analysis
3 credits  Fall Semester
There are few facets of our lives which are not directly affected by media content. From cell phones to televisions, the media is with us all the time. But what messages are contained in the mass media? What methods can we employ to study media content scientifically? This course will explore methods of analyzing media sources including movies, newspapers, magazines, and television. Course topics will include political bias, campaign coverage, and news content. Students will design their own projects and implement their own coding strategies.
PREREQUISITE: FOR POLITICAL SCIENCE MAJORS: POL 201. FOR NON-POLITICAL SCIENCE MAJORS, JUNIOR SENIOR, OR GRADUATE STUDENT STANDING.

POL520 Internship
3 credits  Fall & Spring Semester & First & Second Summer Session
Provides advanced political science majors with an opportunity to participate in a structured, supervised internship. 25-35 page research paper required.
PREREQUISITE: JUNIOR OR SENIOR STANDING; OPEN TO POLITICAL SCIENCE MAJORS ONLY, WITH MINIMUM GPA OF 3.5 IN THE MAJOR, 3.3 OVERALL; PERMISSION OF SUPERVISING INSTRUCTOR AND DEPARTMENT CHAIR.
POL 521 Public Affairs Internship
3 credits Fall & Spring Semester & First & Second Summer Session
Opportunity for the advanced student specializing in public administration to participate in an administrative capacity in an agency of state or local government. Periodic conferences with adviser and paper required.
PREREQUISITE: JUNIOR OR SENIOR STANDING; OPENING TO POLITICAL SCIENCE MAJORS ONLY. NEED MINIMUM GPA OF 3.5 IN THE MAJOR, 3.3 GPA OVERALL. PERMISSION OF SUPERVISING INSTRUCTOR AND DEPARTMENT CHAIR.

POL 522 Introduction to Graduate Public Administration
3 credits Fall & Spring Semester
Introduction to concepts, issues, problems, theories and process in the field of public administration and/or public management.
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

POL 523 Problems in Public and Non-Profit Management
3 credits Offered By Announcement Only
Nature of the power vested in administrative bodies and problems involved in management procedures. Special emphasis on local or non-profit administration.
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING. PERMISSION OF INSTRUCTOR.

POL 524 Non-Profit Organizations: Law, Policy, and Management
3 credits Fall Semester
This course teaches students the essential requirements for creation and operation of tax-exempt nonprofit organization in accordance with state and federal law. The course covers a wide range of relevant topics including guidelines for charitable giving and charitable solicitation, pitfalls that can result in personal liability for officers and directors, and statutory constraints on legislative lobbying and political activities.
PREREQUISITE: JUNIOR OR SENIOR STATUS, GRADUATE STANDING, OR PERMISSION OF THE INSTRUCTOR.

POL 525 Comparative Public Policy and Administration
3 credits Offered By Announcement Only
Comparison and analysis of the organizational and managerial policy problems of developed and developing nations. The administrative process will be considered within the institutional and cultural framework of each nation. Case studies will be used to focus on transition from traditional to modern techniques of public management.
PREREQUISITE: POL 202

POL 526 Administrative Law
3 credits Fall Semester
Administrative law is the study of the legal relationship of government agencies to legislatures, courts, and private parties. The course examines the legal dimensions of bureaucratic power and procedures as well as constitutional and statutory constraints on regulators and administrators. Topics include rulemaking, adjudication, investigation and enforcement, political controls on agencies, judicial review of agency decisions, governmental liability and immunity, public records and open meetings laws. Both federal law and Florida law are covered. The course assumes a basic knowledge of the American legal system, constitutional law and bureaucracy.
PREREQUISITE: FOR POLITICAL SCIENCE MAJORS: POL 201 AND POL 321. FOR NON-POLITICAL SCIENCE MAJORS, JUNIOR, SENIOR, OR GRADUATE STANDING.
POL528 Advanced Seminar on Electoral Behavior
3 credits Offered By Announcement Only
This seminar examines the opinions that Americans have and how those opinions are expressed through participation in elections. At the end of the semester we will also examine other forms of political participation (e.g., interest groups).
PREREQUISITE: POL 201.

POL529 Voting in the US: Access, Fairness, and Reform
3 credits Fall Semester
Fair and free democratic elections are the heart of US democracy. This course will examine who gets to vote, whether election laws and rules are fair (and fairly implemented), and proposals to reform the way elections are run.
PREREQUISITE: POL 201

POL530 Intelligence and National Security Decision Making
3 credits Offered By Announcement Only
This course will study the US national security community structure and decision making process. The course will look at the National Security Council, the principal national security agencies (such as the CIA, Defense Department, and State Department), how they interact, and their roles in devising and executing policy. We will also examine the role and function of senior policy decision makers such as the President. We will study recent policy challenges such as Iraq and Afghanistan as examples of National Security policy.
PREREQUISITE: POL 201 AND POL 203

POL531 Global Environmental Politics
3 credits Offered By Announcement Only
Examination of the environment within the context of economic globalization. Contrasts the international trading regime and those regimes designed to protect the environment, with specific attention to the issues of global warming and bio-diversity.
PREREQUISITE: POL 203

POL535 Comparative Legal Systems
3 credits Fall & Spring Semester
Considers the institutional and political roles of Courts from a comparative perspective. With a focus on judicial independence and judicial review, will consider the juridical systems of a variety of countries and regions including the US, the EU, Germany, France, Great Britain, Chile, Argentina, Russia, The Asian-Pacific Rim, South Africa, Israel, Central America and the Middle East.
PREREQUISITE: POL 202 OR GRADUATE STANDING.
POL536 U.S. Health Care Crisis: Politics and Policies
3 credits
Spring Semester
This seminar will explore the politics and policies of healthcare in the United States. Our examination of the current crisis in cost and coverage will draw on experience from the debates on comprehensive and incremental reform over the past decade. In addition, we will explore the politics and policies of other health and science issues. Students will be expected to attend every class and be actively involved in class discussions. There will be two examinations, one at mid-term and a final based on readings and course discussions.
PREREQUISITE: JUNIORS AND SENIORS ONLY (JUNIORS MUST HAVE JUNIOR STANDING THE SEMESTER THEY TAKE THE CLASS.)

POL541 Philosophy of Law
3 credits
Offered By Announcement Only
Case-based study of jurisprudence designed to illuminate and explain philosophies of law. Examination of theories of free expression; bioethical matters; theories of punishment and legal responsibility; and the placement of religious discourses in liberal systems of law. Special attention to cases involving fundamental rights and liberties; the role of the individual and the state in civil society; and the capacities of individual to be legally competent in contemporary systems of law.
PREREQUISITE: POL 201, 212 OR POL 203 OR GRADUATE STANDING.

POL543 Urban Politics
3 credits
Offered By Announcement Only
Examination of sources of political power in urban areas and how they influence the policies pursued in those areas. Analysis of the role of economic power, protest actions, neighborhood groups, and voting to evaluate whether there is a bias in urban politics that systematically favors some groups over other and, if so, how likely it is that the bias can be overcome.
PREREQUISITE: POL 201 OR GRADUATE STANDING.

POL544 Chinese Foreign Policy
3 credits
Fall Semester
PREREQUISITE: POL 203

POL545 Environmental Policymaking
3 credits
Spring Semester
Examination of different ethical approaches to the environment; the federal government's management of natural resources; selected environmental policies; international environmental policy issues. Topics include federal management of national grazing lands, national forests, and minerals in the public domain. Analyzes environmental policies such as air, water, toxic wastes, energy, and environmentally-related issues in international trade and national security.
PREREQUISITE: POL 201 OR POL 203
POL547 Congressional Representation

This course examines how and when citizens influence legislators' behavior. More specifically, we examine how legislators' floor behavior reflects citizens' preferences and how these preferences influence the manner in which legislators build electoral coalitions.

PREREQUISITE: POL 201

POL548 Civic Participation and Democracy

Citizens participate in the governing process by communicating their preferences and pressuring the government to respond. In this course we examine these various mechanisms of "civic participation", and discuss the meaning and consequences of participatory democracy. The course focuses on the contemporary United States, but we will devote some time to discuss civic participation in other countries as well.

PREREQUISITE: POL 201

POL550 Advanced Seminar on American Politics

This seminar provides students with a survey of significant research on major topics in American Politics. We will read influential works of the past, as well as recent cutting-edge research. Particular attention will be paid to discussing the methods and theories used in the research we will read. The purpose of the course is to acquaint students with the literature on American Politics, while also providing an opportunity for students to develop skills in critically assessing and skillfully conducting social science research.

PREREQUISITE: POL 201

POL551 Productivity in the Public and Non-Profit Sectors

Definitions and measures of productivity. Evaluation of government programs, and methods of productivity improvement.

PREREQUISITE: POL 201

POL553 The Environmental Movement: Groups, Beliefs and Values

Exploration of the origins and political impact of environmentalism in the United States and, to a lesser extent, in the global context. Impact of democratic participation on environmental politics.

PREREQUISITE: POL 201

POL555 Total Quality Public Service Management: Achieving High Performance Government

Examination of the theory and practice of Total Quality Management (TQM) in the government and non-profit sector. Focuses on budgetary, customer service, employee and process improvements that facilitate increased public and non-profit performance. Special emphasis to TQM's contribution to improved service delivery.

PREREQUISITE: POL 201
POL556 Politics and Ethics
3 credits
Offered By Announcement Only
Personal, professional, organizational, and societal levels of ethical analysis. Ethical theories will be reviewed and applied to actual cases that focus on public policy and/or the officials who create and implement it. Profiles of moral exemplars in public life will be examined.
PREREQUISITE: POL 201 OR GRADUATE STANDING

POL557 Ethical and Managerial Issues in Government, Business and Non-Profit Organizations
3 credits
Governments at all levels in this country-national (Larry Craig, David Vitter, Mark Foley, Bill Clinton, Randy Cunningham, Tom DeLay, William Jefferson, James Traficant, Robert Torricelli, Jack Abramoff), state (former Illinois, Louisiana, New York, Ohio and Arizona governors), and local (Miami, Providence city officials; Miami-Dade, Broward, and Palm Beach counties) have encounter scandals involving ethical wrongdoing. Business (Enron, Worldcom) and nonprofit organizations (Boy Scouts, United Way) have faced similar problems. Countless less visible examples of unethical and ethical behavior occur in organizations daily. This course examines the causes and consequences of such actions and the managerial strategies and competencies needed to effectively cope with the ethical issues confronting individuals and organizations.
PREREQUISITE: POL 201 OR GRADUATE STANDING

POL558 From Electronic Government to Digital Governance
3 credits
Fall Semester
Explores the transition from electronic government to digital governance, emphasizing citizen participation and citizen-centric public administration; examines the economic and political consequences of new information technologies; studies the shift from bureaucracy-centered to customer-centric service orientation as a means to reduce costs, restore public trust, and improve service quality.
PREREQUISITE: POL 201

POL563 Senior Thesis
3 credits
Fall Semester
General reading, preparation of research design and collection of information for senior thesis.
PREREQUISITE: ADMISSION BY APPLICATION ONLY. SEE THE DIRECTOR OF UNDERGRADUATE STUDIES FOR DETAILS.

POL564 Senior Thesis II
3 credits
Spring Semester
Continuation of POL 563: writing and defense of the theses.
PREREQUISITE: ADMISSION BY APPLICATION ONLY. SEE THE DIRECTOR OF UNDERGRADUATE STUDIES FOR DETAILS.
POL570 Uniting States in International Perspective
3 credits  Fall Semester
How states form and fragment; The main actors in nation formation; the elements of continuity and change; the impact outsiders can have on the process.
PREREQUISITE: POL 211 AND POL 212

POL577 Security in South Asia: The Conflicts of Afghanistan, Pakistan and India
3 credits  Fall & Spring Semester
The security system of South Asia's northern reaches and the current conflict involving Afghanistan, Pakistan, and India: considerations of sovereignty and the role of frontiers in world politics.
PREREQUISITE: POL 203

POL578 Energy and Security in the Caspian and Black Sea Regions
3 credits  Fall & Spring Semester
The intersection of energy and security within the contested geopolitical and geocultural space of the Caspian and Black Sea basins. It is concerned with these two, interconnected, sub-regions for what they tell us about ideas and acts, identities and interests, in a notoriously fluid periods in international politics.
PREREQUISITE: POL 203

POL579 The politics of post-communist transactions
3 credits  Fall Semester
Examination of the creation, breakdown, and aftermath of communist governments in Eastern Europe and the USSR. Develops a theoretical framework for understanding cross-national patterns of post-communist development in the context of country-specific experiences.
PREREQUISITE: POL 202

POL580 Ethnicity, Nationalism and Secession
3 credits  Spring Semester
Examination of the creation, breakdown, and aftermath of communist governments in Eastern Europe and the Soviet Union. Using empirical evidence from four case studies, develops a theoretical framework for understanding cross-national patterns of post-communist development in the context of country-specific experiences.
PREREQUISITE: POL 202 OR POL 203

POL581 Comparative Political Economy of Post-Industrial Democracies
3 credits  Fall Semester
This seminar examines four key turning points in the development of capitalism: the industrial revolution, the aftermath of the depression and world wars, the oil crisis of the 1970's, and today's "globalization". We will compare the relationships between government and the economy in Western Europe, Canada, the U.S., Australia, New Zealand, and Japan in each period, and attempt to evaluate why these countries react similarly or differently to identical changes in world economy.
PREREQUISITE: POL 202
POL582 Political Economy of Development
3 credits
Offered By Announcement Only
Overview of the principal theoretical paradigms of the development process. Comparative analysis of issues such as the role of the state, strategies of industrialization, changes in social structure, basic needs and the trade-offs between growth and equity.
PREREQUISITE: POL 202 OR GRADUATE STANDING.

POL584 Contemporary Latin American Politics
3 credits
Fall & Spring Semester
This course assumes a basic knowledge of Latin American politics, and is designed to foster deeper understanding of political processes in the region and to provide an overview of key debates among political scientists specializing in Latin America. We discuss issues related to democratic consolidation, political participation, representation and governance.
PREREQUISITE: POL 202; POL 385 IS STRONGLY RECOMMENDED

POL586 Conflict in the Middle East and Africa
3 credits
Fall Semester
Introduction to major paradigms for the explanation of war and conflict in two of the most unstable regions of the world. Reading and class discussions on select cases of current and past conflicts in each region in order to discern patterns of conflict within and across regions, gain a clearer understanding of what drives violent conflict, and assess strategies of resolution.
PREREQUISITE: POL 203.

POL588 Politics in China
3 credits
Spring Semester
Development and nature of Chinese domestic politics in theory and practice; problems of political stability and conflict; the role of historical and cultural traditions, institutions, social, economic and personality factors in Chinese politics; process of change and problems of leadership succession; the significance of changes in the character and style of Chinese leadership.
PREREQUISITE: POL 202 OR HIS 121 OR HIS 122 OR GRADUATE STANDING.

POL591 International Security
3 credits
Offered By Announcement Only
Analysis and evaluation of approaches to international conflict, resolution, reduction and stabilization such as international organization, law, collective security, balance of power, functionalism, world government, morality, and conscience. Special emphasis on recent problems and efforts at institutionalizing social control.
PREREQUISITE: POL 203 OR GRADUATE STANDING.

POL592 International Political Economy
3 credits
Offered By Announcement Only
This course provides an analysis of the changing trade and financial structures of the international economy and the differing approaches that developed and developing states have taken in adapting to them. Special emphasis will be placed on the political implications of economic strategies, the challenges and opportunities posed by the increasingly free mobility of capital and goods across borders, and the ability of states to shape domestic economic outcomes.
PREREQUISITE: POL 203
POL593 International Relations of the Middle East
3 credits Offered By Announcement Only
Regional and interregional analysis of the foreign relations of Middle Eastern
nations, domestic and geopolitical factors.
PREREQUISITE: POL 203, 387 OR GRADUATE STANDING.

POL599 Special Topics
1-3 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: POL 201, POL 202 OR 203
POR 101 Elementary Portuguese I
3 credits
Offered By Announcement Only
Drill in pronunciation, fundamental grammatical principles, simple reading and
translation, oral and written exercises. Normally, not open to students who have
completed two years of Portuguese. Closed to native speakers.

POR 102 Elementary Portuguese II
3 credits
Offered By Announcement Only
Continuation of POR 101. Closed to native speakers.
PREREQUISITE: POR 101. CLOSED TO NATIVE SPEAKERS.

POR 105 Accelerated Elementary Portuguese
3 credits
Fall & Spring Semester
Intensive study of material covered in 101 and 102. Specifically intended for students
who have completed three or more than years of high school Spanish or beginning
Spanish at another university. Also intended for heritage speakers of Romance
Languages other than Portuguese, or students with at least two years of college
study of Spanish, Italian, or French. Closed to native speakers.
PREREQUISITE: TWO OR MORE YEARS OF COLLEGE STUDY OF SPANISH, FRENCH, ITALIAN, OR
LATIN. ALSO OPEN TO HERITAGE SPEAKERS OF ROMANCE LANGUAGES OTHER THAN PORTUGUESE.

POR 211 Intermediate Portuguese I
3 credits
Fall & Spring Semester
Integrated grammar review. Diverse selection of readings: stories, plays, essays,
interviews. Practice in speaking and in writing. Class conducted in Portuguese.
Not open to native speakers.
PREREQUISITE: POR 102 OR 4 YEARS HIGH SCHOOL PORTUGUESE, OR PERMISSION OF INSTRUCTOR,
AND CLOSED TO NATIVE SPEAKERS.

POR 212 Intermediate Portuguese II
3 credits
Fall & Spring Semester
Intensive preparation for 300-level work through various genres (portraits, descriptions,
short stories, film reviews, magazines, a novel). Workshop format, the course also
develops conversational skills. Students complete a number of written projects
(including an analytic paper). Class conducted in Portuguese. Closed to native
speakers.
PREREQUISITE: POR 211 or AP-4 (IB-5), AND CLOSED TO NATIVE SPEAKERS.

POR 301 Introduction to Literary Genres
3 credits
Offered By Announcement Only
Selected materials from various genres of Luso-Afro-Brazilian literatures. Further
development of critical writing and reading skills for non-native and heritage
speakers. May be used to fulfill the humanities literature requirement. Writing
credit.
PREREQUISITE: POR 212, OR EQUIVALENT, OR HERITAGE SPEAKERS NOT FORMALLY EDUCATED
IN PORTUGUESE.

POR 310 Brazilian Women Writers in Translation
3 credits
Offered By Announcement Only
Selected contemporary Brazilian women writers. Conducted in English. Emphasis on
representations of nationality, race, class, ethnicity, gender, and
sexuality. May be used to fulfill the humanities literature requirement;
writing credit.
PREREQUISITE: ENG 106, OR EQUIVALENT; ONE 200-LEVEL COURSE IN HUMANITIES OR SOCIAL
SCIENCES; OR PERMISSION OF INSTRUCTOR.
PORTUGUESE

POR321 Studies in Luso-Brazilian Literary Themes
3 credits
Offered By Announcement Only
The study of literature through thematic readings. Writing credit. May be repeated for credit if topics vary.
PREREQUISITE: POR 212

POR322 Topics in Luso-Brazilian Cultures
3 credits
Offered By Announcement Only
Cultural issues in the Portuguese-speaking world. Topics include media, religion, language in society, popular and mass culture, the arts, immigration, social movements, race, ethnicity, and gender. Writing credit. May be repeated for credit if topics vary.
PREREQUISITE: POR 212

POR364 The Brazilian Short Story
3 credits
Offered By Announcement Only
The Brazilian short story since 1890. Conducted in Portuguese. POR minors must complete all written assignments in Portuguese. Others may opt to write in English, Portuguese, or Spanish. Fulfills Humanities literature requirement; writing credit.
PREREQUISITE: POR 212 OR EQUIVALENT.

POR391 Directed Readings
1-3 credits
Offered By Announcement Only
Individual work on a topic not covered in the regular curriculum. May be repeated on a different topic.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POR392 Directed Readings
1-3 credits
Offered By Announcement Only
Individual work on a topic not covered in the regular curriculum. May be repeated on a different topic.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
PORTUGUESE

POR393 Directed Readings
1- 3 credits
Offered By Announcement Only
Individual work on a topic not covered in the regular curriculum. May be repeated on a different topic.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POR591 Directed Readings in Portuguese
1- 3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

POR592 Directed Readings in Portuguese
1- 3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

POR593 Directed Readings in Portuguese
1- 3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PSYCHOLOGY

PSY10T HUMAN RELATIONS
0 credit
Fall Semester
PREREQUISITE: MDCC TRANSFER COURSE.

PSY11T DYNAMICS OF BEHAVIOR
0 credit
Fall Semester
PREREQUISITE: MDCC TRANSFER COURSE.

PSY110 Introduction to Psychology
3 credits
Fall & Spring Semester & First & Second Summer Session
A survey of modern scientific psychology. Topics include learning, memory, perception, cognition, personality, motivation, emotion, development, abnormal psychology, and social psychology. Participation in a small number of experiments is required to ensure that students become acquainted first hand with the experimental laboratory methods used in Psychology. Students may choose to satisfy this requirement by writing a small number of methodology papers instead.

PSY120 Orientation to the Study of Psychology II: Forum
1 credit
Spring Semester
Critical discussion of research reports in psychology.
PREREQUISITE: PSY 110. ONLY FOR PSYCHOLOGY AND NEUROSCIENCE MAJORS WITH FEWER THAN NINE PSYCHOLOGY CREDITS-COUNTS AS ELECTIVE CREDIT.

PSY201 Social Psychology: Psychological Perspective
3 credits
Fall & Spring Semester
The major theories, methods and research findings in social psychology. Attitude formation and change, person perception, interpersonal attraction, aggression, group structure, leadership, conformity and mass phenomena. Emphasizes the individual as the basic unit of analysis (compare SOC 302).
PREREQUISITE: PSY 110.

PSY202 Introduction to Psychobiology
3 credits
Fall & Spring Semester
Behavior viewed from a biological perspective. Survey of biological factors sub serving sensation, perception, sleep, emotions, motivation, learning, memory, and development.
PREREQUISITE: PSY 110.
PSY203 Child and Adolescent Development  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Survey of significant aspects of growth and development throughout the lifespan.  
Emphasis placed on childhood and adolescence.  
PREREQUISITE: PSY 110.

PSY204 Introductory Biobehavioral Statistics  
4 credits  
Fall & Spring Semester & First & Second Summer Session  
Application of descriptive and inferential statistics to behavioral data. Principles  
and methods of summarizing data. Correlation and regression. Basic concepts of  
probability, hypothesis testing, and decision making. Tests of significance,  
confidence intervals, and analysis of variance. Examples and problems from  
biology, education, medicine, nursing, psychology, sociology.  
PREREQUISITE: MTH 101 OR 105 OR SCORES ON THE MATHEMATICS PLACEMENT TEST SUFFICIENT  
FOR ADMISSION TO A CALCULUS COURSE.

PSY207 Introduction to Cognition  
3 credits  
Fall & Spring Semester  
Survey of theory and research on human information processing and cognitive processes.  
PREREQUISITE: PSY 110.

PSY209 Introduction to Personality  
3 credits  
Fall & Spring Semester  
A survey of the area of Personality, including the relation of Personality to General  
Psychology, history of theory and research in the field, definition, assessment,  
and research findings in major substantive areas.  
PREREQUISITE: PSY 110. NOT FOR STUDENTS WITH CREDIT IN PSY 416.

PSY215 Stress Management  
3 credits  
Fall & Spring Semester & First Summer Session  
Physiology and psychology of stress, with emphasis on mind-body (stress-health)  
connection. Integrates scientific knowledge with practice techniques such as  
muscle relaxation, cognitive restructuring, meditation, anger management, yoga,  
exercise, assertiveness training, and social support.  
PREREQUISITE: PSY 110 OR PERMISSION OF INSTRUCTOR

PSY340 The Psychology of Thinking and Learning in Children
3 credits       Fall & Spring Semester
Development of perception, thought, and language processes throughout the lifespan
with an emphasis on early and middle childhood.
PREREQUISITE: PSY 203.

PSY341 Psychology of Social and Emotional Development
3 credits       Fall & Spring Semester
Social and emotional growth; topics include family and peer relationships, sex
roles, self-control, and moral development.
PREREQUISITE: PSY 203.

PSY342 Psychology of Adulthood and Aging
3 credits       Spring Semester
Major developments during the middle and later years of adulthood including changes
in family and peer relationships, cognitive changes, physical changes, psychological
aspects of death and dying.
PREREQUISITE: PSY 203.

PSY343 Psychology of Language Development
3 credits       Offered By Announcement Only
Developmental sequences in the acquisition of language; the scientific endeavor
to understand language learning.
PREREQUISITE: PSY 203.

PSY344 Psychology of Infancy
3 credits       Offered By Announcement Only
Perceptual, motor, cognitive and social development during the first two years
of life. Specialized research methods and assessment procedures.
PREREQUISITE: PSY 203.
PSY350 Psychology of Human Sexual Behavior
3 credits Offered By Announcement Only
Interaction of biological and social factors in normal sexual development, and behavior patterns; etiologies of dysfunctions, paraphilias and gender-identity disorders; assessment and intervention procedures.
PREREQUISITE: SIX CREDITS IN PSYCHOLOGY.

PSY352 Abnormal Psychology
3 credits Fall & Spring Semester
Diagnostic formulations of the clinical syndromes; theories of psychopathological states.
PREREQUISITE: SIX CREDITS IN PSYCHOLOGY.

PSY365 Practicum
1-3 credits Fall & Spring Semester
Individual or small group activities and discussions regarding general principles of psychology; learn by doing; field experiences, library research, or teaching assistance. PSY 365 does not count for major or minor.
PREREQUISITE: SIX CREDITS IN PSYCHOLOGY, JUNIOR STANDING, AND PERMISSION OF CHAIRMAN.

PSY367 Introduction to Research Projects
1-3 credits Fall & Spring Semester & First & Second Summer Session
Students assist on a research project in psychology under supervision of a faculty member. Activities include library research, data collection and management, and attendance at research team meetings.
PREREQUISITE: SIX CREDITS IN PSYCHOLOGY PREFERABLY INCLUDING 204. STUDENTS MUST OBTAIN FACULTY SPONSORSHIP, IN WRITING, PRIOR TO REGISTRATION.

PSY368 Introduction to Research Projects
1-3 credits Fall & Spring Semester & First & Second Summer Session
Students assist on a research project in psychology under supervision of a faculty member. Activities include library research, data collection and management, and attendance at research team meetings.
PREREQUISITE: SIX CREDITS IN PSYCHOLOGY PREFERABLY INCLUDING 204. STUDENTS MUST OBTAIN FACULTY SPONSORSHIP, IN WRITING, PRIOR TO REGISTRATION.

PSY402 Psychobiology
3 credits Fall & Spring Semester
Basic neuroanatomy, neurophysiology, and neurochemistry followed by an introduction to the physiological bases of sensation, motor systems, motivation, emotion, learning and memory.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY INCLUDING PSY 202; OR NINE CREDITS IN PSYCHOLOGY AND BIL 150.

PSY403 Neuroscience Laboratory
4 credits Fall & Spring Semester
Research methods and laboratory experiments in contemporary Neuroscience, from individual cells to behavior. Scientific report writing and computer applications in experimental design and analysis. Lecture/Lab.
PREREQUISITE: PSY 316. PREREQUISITE OR COREQUISITE: PSY 402 OR BIL 268.

PSY414 Motivation
3 credits Offered By Announcement Only
Experimental evidence relating to theories of motivation.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY.
PSY416 Personality Theory
3 credits  Fall & Spring Semester
The role of structure, development, dynamics, individual differences, assessments, and deviations.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY.

PSY417 Emotion
3 credits  Fall & Spring Semester
Theory and research concerning the development, arousal, and expression of emotional reaction.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY.

PSY418 Experimental Personality and Social Psychology
0-4 credits  Fall & Spring Semester
Readings, laboratory experiments, and demonstrations relevant to behavioral and biomedical sciences. Experimental design, methodology, implementation, analysis, and interpretation of research with scientific report writing and computer applications.
PREREQUISITE: PSY 316 AND EITHER 201, 203, OR 209.

PSY420 Health and Medical Psychology
3 credits  Offered By Announcement Only
The psychosomatic and biopsychosocial models of illness.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY INCLUDING 202, OR PERMISSION OF INSTRUCTOR.

PSY440 Abnormal Child Psychology
3 credits  Fall & Spring Semester & First & Second Summer Session
Factors that interfere with normal development, including mental retardation, learning disabilities, emotional disturbances, and delinquency.
PREREQUISITE: JUNIOR STANDING AND NINE CREDITS IN PSYCHOLOGY INCLUDING PSY 203.

PSY441 Psychology of the Intellectual and Developmental Disabilities
3 credits  Offered By Announcement Only
The etiological, social, and psychological aspects of intellectual and developmental disabilities.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY INCLUDING PSY 203.

PSY444 Intermediate Psychological Statistics
3 credits  Spring Semester
Statistical reasoning and methods.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY INCLUDING PSY 204.

PSY450 Psychology of Religion
3 credits  Offered By Announcement Only
Contemporary psychological theory and research on religious belief, experience, and behavior. Topics include the biological bases of religion, religious development, and the links of religion to health and well-being.
PREREQUISITE: PSY 110, REL 101, AND THREE ADDITIONAL CREDITS IN PSYCHOLOGY OR RELIGIOUS STUDIES.

PSY475 Social Interaction Processes
3 credits  Offered By Announcement Only
An in-depth analysis of variables leading to, and processes involved in, human social interactions ranging from superficial encounters to intimate relationships.
PREREQUISITE: NINE CREDITS IN PSYCHOLOGY, INCLUDING PSY 201.
PSY481 Special Topics in Psychology
   1- 3 credits                                           Offered By Announcement Only
   PREREQUISITE: NINE CREDITS IN PSYCHOLOGY.

PSY498 Senior Honors in Psychology I
   3 credits                                                    Fall & Spring Semester
   Independent research project.
   PREREQUISITE: 18 CREDITS IN PSYCHOLOGY AND ELIGIBILITY FOR HONORS IN PSYCHOLOGY.

PSY499 Senior Honors in Psychology II
   3 credits                                                    Fall & Spring Semester
   Independent research project.
   PREREQUISITE: 18 CREDITS IN PSYCHOLOGY AND ELIGIBILITY FOR HONORS IN PSYCHOLOGY.

PSY501 History and Systems of Psychology
   3 credits                                           Offered By Announcement Only
   Development of psychology as a science.
   PREREQUISITE: 12 CREDITS IN PSYCHOLOGY.

PSY502 Culture, Values, Religiosity, and Mental Illness
   3 credits                                           Offered By Announcement Only

3 credits Fall & Spring Semester
The doctrines, practices, teachings, and history of Sufism, the mystical dimension of Islam. PREREQUISITE: ONE COURSE IN ISLAM OR PERMISSION OF THE INSTRUCTOR.

REL380 Archaeology of Palestine from Prehistory to Islam
3 credits Offered By Announcement Only
A survey and analysis of the major archaeological excavations and surveys of Palestine. PREREQUISITE: THREE CREDITS IN RELIGIOUS STUDIES OR PERMISSION OF INSTRUCTOR.

REL401 Supervised Reading in Religious Literature or Texts
1-3 credits Fall & Spring Semester & First & Second Summer Session
Independent study to enable students to read extensively in an area of personal interest in religious literature or texts. PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL402 Supervised Reading in Religious or Historical Traditions
1-3 credits Fall & Spring Semester & First & Second Summer Session
Independent study to enable students to read extensively in an area of personal interest in religious or historical traditions. PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL403 Supervised Reading in Religious Issues or Problems
1-3 credits Spring Semester
Independent study to enable students to read extensively in an area of personal interest in religious issues or problems. PREREQUISITE: PERMISSION OF INSTRUCTOR.
REL404 Special Topics in Religious Literature or Texts
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL405 Special Topics in Religious or Historical Traditions
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL406 Special Topics in Religious Issues or Problems
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL407 Special Projects in Religious Literature or Texts
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL408 Special Projects in Religious or Historical Traditions
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL409 Special Projects in Religious Issues or Problems
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL450 Psychology of Religion
3 credits
Offered By Announcement Only
Contemporary psychological theory and research on religious belief, experience, and behavior. Topics include the biological bases of religion, religious development, and the links of religion to health and well-being.
PREREQUISITE: NINE CREDITS IN RELIGIOUS STUDIES. PSY 110, REL 101 AND THREE ADDITIONAL CREDITS IN PSYCHOLOGY OR RELIGIOUS STUDIES.

3 credits
Offered By Announcement Only
PREREQUISITE: SIX CREDITS IN RELIGIOUS STUDIES OR PERMISSION OF INSTRUCTOR.

REL491 Sr. Honors Thesis
3 credits
Offered By Announcement Only
PREREQUISITE: SENIOR STANDING AND ENROLLMENT IN THE DEPARTMENTAL HONORS PROGRAM.

REL492 Sr. Honors Thesis II
3 credits
Fall & Spring Semester
PREREQUISITE: SENIOR STANDING AND ENROLLMENT IN THE DEPARTMENTAL HONORS PROGRAM.

REL499 Method and Theory in the Study of Religion
3 credits
Offered By Announcement Only
An examination of central issues and texts in the academic study of religion, with special focus on the rise of the discipline, its axioms, and its several schools of interpretation.
PREREQUISITE: JUNIOR STANDING
REL501 Supervised Reading in Religious Literature or Texts
1- 3 credits
Offered By Announcement Only
Independent study to enable students to read extensively in an area of personal interest in religious literature or texts.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL502 Supervised Reading in Religious or Historical Traditions
1- 3 credits
Offered By Announcement Only
Independent study to enable students to read extensively in an area of personal interest in religious or historical traditions.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL503 Supervised Reading in Religious Issues or Problems
1- 3 credits
Offered By Announcement Only
Independent study to enable students to read extensively in an area of personal interest in religious issues or problems.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL505 Seminar in Ancient Studies
3 credits
Offered By Announcement Only
Various topics in Greek and Roman Studies.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

REL510 Seminar in Hebrew Bible and Ancient Judaism
3 credits
Offered By Announcement Only
Selected topics in Hebrew Bible and Ancient Judaism.
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF THE INSTRUCTOR.

REL520 Seminar in New Testament and Early Christianity
3 credits
Offered By Announcement Only
Selected topics in New Testament and Early Christianity.
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF THE INSTRUCTOR.

REL530 Seminar in Religious or Historical Traditions
1- 3 credits
Offered By Announcement Only
Selected topics in religious or historical traditions.
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF INSTRUCTOR.

REL550 Seminar in Religious Ethics
3 credits
Offered By Announcement Only
Selected issues in religious ethics and their social implications.
PREREQUISITE: SIX CREDITS IN RELIGIOUS STUDIES AND JUNIOR STANDING.

REL560 Seminar in Contemporary Religious Issues
1- 3 credits
Offered By Announcement Only
Selected topics in contemporary religious issues.
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF INSTRUCTOR.
**SOC101 Introduction to Sociology**  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Organization of human society, processes of change, and society's influence on individual behavior.

ACC212 Managerial Accounting
3 credits Fall & Spring Semester & First & Second Summer Session
Introduction to managerial accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective.
PREREQUISITE: ACC 211.

ACC301 Cost Accounting
3 credits Fall & Spring Semester & First Summer Session
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. Course is designed to provide students with the necessary skills to perform basic cost accounting.
PREREQUISITE: ACC 212.

ACC306 Accounting Systems
3 credits Fall & Spring Semester & First Summer Session
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool.
PREREQUISITE: ACC 212.

ACC311 Intermediate Accounting I
3 credits Fall & Spring Semester & First Summer Session
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows.
PREREQUISITE: ACC 212.

ACC312 Intermediate Accounting II
3 credits Fall & Spring Semester & Second Summer Session
A continuation of ACC 311. Course focuses on more complex accounting applications such as leases, postretirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.
PREREQUISITE: ACC 311 PLUS A GPA OF 3.0 OR HIGHER IN ACCOUNTING.
ACC315 Accounting for Health Care Organizations.
3 credits
Spring Semester
This course focuses on the financial accounting and reporting processes in healthcare, service industry, and governmental organizations. Practice problem solving techniques related to health care organizations. This will not count as an accounting course for accounting majors and will not satisfy any accounting requirements needed to sit for the CPA exam in Florida.
PREREQUISITE: ACC 212

ACC401 International Business Analysis
3 credits
Offered By Announcement Only
Inter-disciplinary course in the international aspects of accounting, finance, marketing, and management. Students work on an integrative case project analyzing the financial, managerial, and marketing issues in the acquisition of a foreign firm by an American firm and produce a marketing plan, pro-forma financial statements, and an organizational plan.
PREREQUISITE: FIN 330 OR MKT 360.

ACC402 Auditing
3 credits
Fall & Spring Semester & First Summer Session
Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports.
PREREQUISITE: ACC 312 AS PREREQUISITE OR CO-REQUISITE

ACC403 Fundamentals of Taxation
3 credits
Fall & Spring Semester & First Summer Session
Basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. The fundamentals of tax research are also introduced. For students who need to take ACC 303, this course satisfies that requirement. Prerequisite: ACC 311
PREREQUISITE: ACC 311

ACC404 Advanced Taxation
3 credits
Fall & Spring Semester & Second Summer Session
Study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, reorganization, distribution, and liquidation of corporations and partnerships. Also includes an introduction to estate and gift taxation.
PREREQUISITE: ACC 403.

ACC406 Accounting Systems
3 credits
Fall & Spring Semester & First Summer Session
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool.
PREREQUISITE: ACC 311
ACC411 Advanced Accounting
3 credits                         Fall & Spring Semester & First Summer Session
The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships. For Accounting majors who need to take a 500-level accounting course, this course satisfies that requirement.
Prerequisite: ACC 312.
PREREQUISITE: ACC 312 AND SENIOR STATUS

ACC501 Advanced Cost Accounting
3 credits                         Offered By Announcement Only
The latest developments in cost and managerial accounting are studied. Using case studies, the course focuses on activity based product cost allocation methodology in terms of: (1) basic concepts and rationale, (2) applicability in both manufacturing and service industries, (3) strategic cost analyses, and (4) applicability in total quality management programs. Other topics include cost pools, two stage costing methodologies, and the behavioral aspects of cost systems. Finally, students implement an activity based cost system using commercially developed software.
PREREQUISITE: ACC 301 AND SENIOR STATUS

ACC505 Accounting Controls in Information Technology
3 credits                         Offered By Announcement Only
Course develops a student's understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
PREREQUISITE: ACC 212 AND PERMISSION OF INSTRUCTOR; SENIOR STATUS

ACC506 Internal Auditing
3 credits                         Offered By Announcement Only
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
PREREQUISITE: ACC 402 AND SENIOR STATUS

ACC511 Advanced Accounting
3 credits                         Fall & Spring Semester
The primary focus on the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships. This meets the requirement for accounting students who are required to take Accounting 411.
PREREQUISITE: ACC 312 AND SENIOR STATUS

ACC522 Advanced Issues in Auditing
3 credits                         Fall Semester
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
PREREQUISITE: ACC 402 AND ACCEPTED INTO THE ACCOUNTING ACCELERATED PROGRAM OR GRADUATE STATUS.
ACC523 International Accounting and Taxation
3 credits Offered By Announcement Only
Course covers tax accounting and business considerations in the global business environment. U.S. issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering, and uses of accounting information in managing an international business.
PREREQUISITE: ACC 212 AND SENIOR STATUS.

ACC524 Accounting for Governmental and Not-for-Profit Entities
2 credits Fall Semester
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities.
PREREQUISITE: ACC 312 AND ACCEPTED INTO THE ACCOUNTING ACCELERATED PROGRAM OR GRADUATE STATUS.

ACC525 Trends in Present Day Accounting
3 credits Offered By Announcement Only
Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of financial data to meet the needs of third parties, and surveys accounting literature.
PREREQUISITE: ACC 312 AND SENIOR STATUS.

ACC530 International Financial Reporting Standards
1 credit Fall Semester
This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).
PREREQUISITE: ACC 312 AND ACCEPTED INTO THE ACCOUNTING ACCELERATED PROGRAM OR GRADUATE STATUS.

ACC550 Accounting Internship
0-3 credits Fall & Spring Semester & First & Second Summer Session
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman is required at time of registration.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

ACC555 Accounting Honors Research Project
0-3 credits Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors Accounting.
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

ACC599 Directed Readings
1-3 credits Fall & Spring Semester & First & Second Summer Session
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project is required at time of registration.
PREREQUISITE: SENIOR STANDING AND PERMISSION OF DEPARTMENT CHAIR.
BSL212 Introduction to Business Law  
3 credits  
Fall & Spring Semester & First Summer Session  
Introduction to law and legal procedure. Topics include contracts (nature and requisites, formation, operations, interpretation, discharge, and remedies) sales (Uniform Commercial Code, transfer of title, warranties, rights, and remedies of buyer and seller), and business ethics.

BSL304 Corporate Law  
3 credits  
Fall & Spring Semester & First Summer Session  
PREREQUISITE: BSL 212 OR EQUIVALENT

BSL305 Legal and Social Aspects of Business Regulation  
3 credits  
Offered By Announcement Only  
An introduction to the legal and ethical issues arising out of business and the regulatory environment. Topics include business ethics and subjects as environmental law antitrust, securities, administrative process, consumer protection, and employment regulation.

BSL313 Coastal Law  
3 credits  
Fall Semester  
Basic doctrines and public policy related to the use and regulation of the United States coastal zone and seabed.  
PREREQUISITE: BSL 212 OR EQUIVALENT.

BSL314 Ocean Law  
3 credits  
Spring Semester  
The principles of international ocean law regarding ocean management. Topics include ocean delimitation and issues of environmental ocean regulation within international legal framework.  
PREREQUISITE: BSL 212 OR EQUIVALENT.

BSL333 Legal Aspects of Real Estate Transactions  
3 credits  
Fall & Spring Semester & First Summer Session  
Legal principles controlling the acquisition, ownership, financing, and development of real property. Topics include nature and acquisition of rights in real property, theory of estates, co-ownership, fixtures, easements, legal descriptions, evidence of title, title insurance, deeds, mortgages, closing the sales and mortgage transactions, condominiums and cooperatives, brokers, and land use.  
PREREQUISITE: BSL 212 OR EQUIVALENT.

BSL401 The Law of Financial Transactions  
3 credits  
Fall & Spring Semester & First Summer Session  
PREREQUISITE: BSL 212 OR EQUIVALENT

BSL412 International Business Law  
3 credits  
Fall & Spring Semester & First Summer Session  
International law and organizations, international sales, credits and commercial transactions, U.S. trade law, and the regulation of the international market place are discussed.  
PREREQUISITE: BSL 212 OR EQUIVALENT.
BSL424 Intellectual Property Law
3 credits
Spring Semester
This course is designed to acquaint the business student with the general framework of laws that regulate innovation, marketing, competition, and business development in the U.S. Special emphasis will be placed on discussion of ethical issues in information property, unfair competition, and management of intellectual property across various industries.
PREREQUISITE: BSL 212 OR EQUIVALENT.

BSL460 Health Care Law and Ethics
3 credits
Fall & Spring Semester
This course is designed to offer the business student an appreciation of the legal foundations and ethical considerations in health care administration in the United States.
PREREQUISITE: BSL 212 OR EQUIVALENT.

BSL485 Managing the Legal Factor
3 credits
Fall & Spring Semester
This course offers the business manager a frank and analytical view of law and legal practice as they affect business decision-making. It addresses both the issues of cost containment and relationships between counsel and the company with the objective of achieving a more effective management of the legal function in business.
PREREQUISITE: BSL 212 OR EQUIVALENT AND SENIOR STANDING.

BSL499 Special Topics
1-3 credits
Offered By Announcement Only
Independent investigation of special subjects. Approval of supervising professor as to topic and evaluation of project required at time of registration.

BSL550 Business Law Internship
2-3 credits
Offered By Announcement Only
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman required at time of registration.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

BSL555 Business Law Honors Research Project.
0-3 credits
Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors in Business Law.
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

BSL575 Advanced Business Law
3 credits
Spring Semester
Legal problems encountered by Certified Public Accountants, Finance, Management and Marketing Executives, including agency, commercial paper, bank deposits and collections, secured transactions, suretyship, bankruptcy, partnership, corporations, contracts, anti-trust, insurance, property, wills and estates, SEC law, and accountants' legal responsibility. Special attention is given to the commercial law segment of the Uniform Public Accountant Examination.
PREREQUISITE: BSL 212 OR EQUIVALENT AND SENIOR STANDING. NOT FOR LST MAJORS OR BSL MINORS.
BUS100 Fundamentals in Business
3 credits Fall Semester
We will expose students to the fundamental activities of the functional areas of business.
PREREQUISITE: SSP

BUS155 Exploration of Faculty Research in SBA
1 credit Offered By Announcement Only
Students will be exposed to some of the SBA's top faculty researchers to learn more about research opportunities and styles of research methodologies within business.

BUS200 The Car of the Future
3 credits Offered By Announcement Only
Powerful trends-technological, environmental, and geopolitical-will converge to transform the cars we drive on a scale not seen since Henry Ford's Model T in 1908. Dominated today by a handful of slow-moving global giants, hundreds of new entrepreneurial participants are beginning to dynamically destroy, and will subsequently reinvent, a second generation auto industry. This course will focus on the economic cross-currents that caused the collapse of General Motors and the overall disruption of the auto industry. It will explore the range of technological alternatives to the internal combustion engine vehicle with special emphasis on electrical vehicles. The innards of future electric vehicles will be discussed in detail, including battery pack design, controllers, chargers, and vehicle instrumentation. Environment incentives, including the logic of cap and trade legislation will be covered in the context of the debate on global warming. The final part of the course will extrapolate car of the future trends in terms of energy use, transportation infrastructure, urban air quality, employment and other critical issues.

BUS255 Business & Society: Inquiry + Discourse
3 credits Fall Semester

BUS300 Critical Thinking & Persuasion for Business
3 credits Fall & Spring Semester
PREREQUISITE: ACC 311

BUS498 SPECIAL TOPICS IN BUSINESS
1-3 credits Fall Semester
Topics in selected areas of Business
PREREQUISITE: PERMISSION OF INSTRUCTOR

BUS598 SPECIAL TOPICS IN BUSINESS
1-3 credits Fall Semester
Topics in selected areas of Business.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COMPUTER INFORMATION SYSTEMS
CIS120 Introduction to Computer Information Systems
3 credits Offered By Announcement Only
An introduction to computers and information processing, with emphasis on application software. The course material includes: spreadsheet design and analysis, as well as the use of spreadsheet tools in facilitating decision making; relational database design and the development of database management tools; basic Internet terminology and Web design; development of team-work, presentation, and communication skills through presentation software; and the use of advanced word processing features to create a more efficient and productive working environment, as well as software application integration.
CIS150 Business Analytics  
3 credits  
Fall & Spring Semester  
The primary purpose of this course is to build skills in learning and using software technologies to support business-oriented problem solving and decision making. Specifically, you will develop the ability to solve problems, to organize and analyze data using spreadsheet and database software, and to learn to distribute information to others through the effective use of collaborative technologies and the Web. Case problems will cover areas such as accounting, finance, marketing, and statistics and operations management. Professors from several business school departments will discuss how their disciplines use spreadsheets to solve problems.

CIS151 CIS 150 Discussion Section  
0 credit  
Fall & Spring Semester  
This is a required discussion section for CIS 150.  
PREREQUISITE: CO-REQUISITE: CIS 150

CIS316 Microcomputer Business Applications  
3 credits  
Offered By Announcement Only  
A continuation of CIS 120, with emphasis on spreadsheet macros, advanced DOS, structured methodology, and command level programming. Students design and implement a relational system in Access. Course cannot be used as a technical elective in the Computer Information Systems major.  
PREREQUISITE: CIS 120.

CIS320 Introduction to Programming  
3 credits  
Fall & Spring Semester  
Course covers the fundamentals of programming logic and structured programming principles including problem solving, algorithm design, and program development using Visual Basic.

CIS322 Introduction to C++ Programming  
3 credits  
Offered By Announcement Only  
An introduction to the syntax and semantics of the C++ programming language. Topics include editing, compiling and linking C++ source code, data types, operators, precedence rules, flow of control, repetitive calculations, input/output, functions, arrays, structures, and pointers.  
PREREQUISITE: CIS 320 OR EQUIVALENT.

CIS323 Object-Oriented Programming in C++  
3 credits  
Offered By Announcement Only  
This course introduces the fundamental concepts of the C++ programming language and the techniques of object-orientation. Topics include data abstraction, encapsulation, inheritance, polymorphism, overloading, templates exception handling, data structures, namespaces, virtual functions, stream input/output, Standard Template Library, advanced pointers, and interactive code debugging.  
PREREQUISITE: CIS 320 OR EQUIVALENT

CIS324 Object-Oriented Programming in Java  
3 credits  
Spring Semester  
This course introduces the fundamental concepts of JAVA programming language and the techniques of Object-Orientation. Topics include data abstraction, encapsulation, inheritance, polymorphism, Java class library, graphics/GUI, exception handling, multithreading, multimedia, files and streams, Internet applets, application development, integrated development environment, and interactive program debugging.  
PREREQUISITE: CIS 320 OR EQUIVALENT
CIS360 Systems Analysis and Design
3 credits                                                    Fall & Spring Semester
Overview of the systems development life cycle (SDLC). Topics include concepts, tools, and techniques of systems analysis, data modeling, process modeling, CASE tools, and the role of the system analyst in the organization. Students work in groups to analyze an application system for a business related problem.
PREREQUISITE: CIS 320, OR CSC 120 OR EEN 118 OR EQUIVALENT

CIS361 Design of Information Systems
3 credits                                                             Fall Semester
Continuation of CIS 360. Topics include concepts, tools, and techniques of systems design, prototyping, file/database design, and physical process modeling. Students work in groups to design an application system for a business related problem.
PREREQUISITE: CIS 360.

CIS390 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS391 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS392 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS393 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS394 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS395 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS396 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS397 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS398 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.

CIS399 Topics in Computer Information Systems
3 credits                                                  Offered By Announcement Only
Topics in selected areas of specialization.
CIS410 Information Systems and Technology
3 credits Fall & Spring Semester & First Summer Session
Course develops an understanding of the role of information technology within an organizational perspective. The course focuses upon the basic building blocks of information technology architectures and examines the issues facing a Chief Technology Officer in developing systems solutions. Topics include enterprise systems, database, decision support, intelligent systems, the Internet and e-business, as well as the ethical policy issues that affect systems architectures and their use.
PREREQUISITE: NO PREREQUISITE (ANY SCHOOL OR COLLEGE) BUT CLASS OF 2, SOPHOMORE OR BETTER.

CIS423 Database Management Systems
3 credits Fall Semester
Course covers the fundamental concepts of database management systems using the Oracle DBMS. Topics include database theory and terminology, logical modeling, normalization, SQL language, database design and implementation, database administration, data security, database transaction/concurrency, and data backup.
PREREQUISITE: CIS 360

CIS430 Business Telecommunications
3 credits Spring Semester
This course introduces the subject of voice and computer networks and their use in business applications. Topics include the local and long distance telephone networks, client-server networks, network hardware and software, distributed computing, key issues in network management, and the fundamentals of data communication.
PREREQUISITE: JUNIOR OR SENIOR STANDING.

CIS450 Introduction to Health Informatics
3 credits Spring Semester
The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.

CIS465 Applied Software Project Development
3 credits Spring Semester
Advanced concepts and techniques in application project development. Topics include project management, project development, testing, implementation, documentation, and maintenance. Students work on a group project to fully understand the skills required in the development of complete production quality applications.
PREREQUISITE: CIS 324, 361, 423 AND 430.

CIS490 Topics in Computer Information Systems
3 credits Offered By Announcement Only
Topics in selected areas of specialization.

CIS491 Topics in Computer Information Systems
3 credits Offered By Announcement Only
Topics in selected areas of specialization.
CIS492 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS493 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS494 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS495 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS496 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS497 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS498 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS499 Directed Study in Computer Information Systems
1- 3 credits
Individually supervised investigation or research project in selected topics. Offered by special arrangement only. Approval of supervising professor as to topic and evaluation of project required at time of registration. PREREQUISITE: APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.

CIS550 Computer Information Systems Internship
1- 3 credits Fall & Spring Semester & First & Second Summer Session
Student is individually assigned to operating business firm or other organization to gain insight in information technology practice in the area of career interest. Periodic reports and conferences are required. PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN. FOR CREDIT ONLY.

CIS555 Computer Information System Honors Research Project.
0- 3 credits
Research project to fulfill requirements for Departmental Honors in Computer Information Systems. PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

CIS590 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization. Offered By Announcement Only

CIS591 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization. Offered By Announcement Only
CIS592 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

CIS593 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

CIS594 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

CIS595 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

CIS596 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

CIS597 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

CIS598 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

CIS599 Topics in Computer Information Systems
1- 3 credits
Topics in selected areas of specialization.

ECONOMICS

ECO201 Essentials of Economic Theory
3 credits
A study of the economic system providing a broad based survey of basic economic principles, concepts, and tools of conventional economics. Topics include how markets function, how firms maximize profits, and the analysis of macroeconomic factors. Limited to students in Saturday BBA program.

ECO211 Economic Principles and Problems
3 credits
Fall & Spring Semester & First & Second Summer Session
Fundamental course devoted to development and application of basic analytical tools and principles required for an understanding of major economic problems and policy alternatives available for their solution. Particular emphasis on microeconomic analysis. Topics include the study of markets under varying conditions of competition, including market deficiencies such as pollution, prices, and resource allocation distribution of income, including poverty problems, the economics of the firm and the government, and international economic relations.

ECO212 Economic Principles and Problems
3 credits
Fall & Spring Semester & First & Second Summer Session
Continuation of ECO 211. Course emphasis is placed on macroeconomic analysis. Areas covered include national income and employment analysis, money and banking, economic growth, and comparison of different economic systems, including the problems of developing the less developed world.
ECO301 Macro Economic Theory
3 credits  Fall & Spring Semester & First Summer Session
Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.
PREREQUISITE: ECO 211 AND 212 AND MTH 130 OR MAS 110; OR HIGHER CALCULUS OR PERMISSION OF INSTRUCTOR

ECO302 Micro Economic Theory
3 credits  Fall & Spring Semester & First & Second Summer Session
Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition, as well as in the determination of wages, rent, interest, profits, and public policy.
PREREQUISITE: ECO 211 AND 212 AND MTH 130 OR MAS 110 OR HIGHER CALCULUS OR PERMISSION OF INSTRUCTOR.

ECO307 Public Finance and Fiscal Policy
3 credits  Offered By Announcement Only
The role of local, state, and federal government in attaining an efficient allocation of resources and an equitable distribution of income. Emphasis on criteria for the selection and evaluation of public expenditure and tax programs including the problems of coordinating federal, state, and local finance. Special attention is given to current policy issues.
PREREQUISITE: ECO 211, 212, 302.

ECO311 Labor Economics (I)
3 credits  Fall Semester
Course surveys the structure and functioning of labor markets. Topics include determinants of labor supply and labor demand, economics of wage differentials, economic impact of labor unions, discrimination in labor markets, and the labor market effects of various government policies such as payroll and income taxes, educational subsidies, and minimum wage laws. The central goal of the course is to provide the student with a framework for analyzing diverse issues related to the labor sector of the economy.
PREREQUISITE: ECO 211.

ECO345 Environmental Economics
3 credits  Fall Semester
This course determines the appropriate way to regulate economic activity so as to achieve an optimal balance between competing environmental and economic goals. Economic reasoning is used to evaluate causes and consequences of environmental problems. The course rigorously evaluates various types of environmental regulation, including "cap-and-trade," command and control mandates, and pollution taxes. Other specific topics include public goods, externalities, cost benefit analysis, non-market valuation, and international trade and development and the environment.
PREREQUISITE: ECO 211 & ECO 302

ECO350 The US in the World Economy
3 credits  Offered By Announcement Only
Course introduces International Studies students to International Economics. The gains from international trade, "competitiveness" and free trade areas are dealt with in the first part of the class. The final part of the course deals with international macroeconomics. Topics include national income accounting as well as the balance of payments and exchange rates.
PREREQUISITE: ECO 211 and 212.
ECO351 Economics of Developing Countries
3 credits
Offered By Announcement Only
Factors underlying economic development, measures of and goals for development, principles applicable to problems of development, the role of markets and planning in development, social, cultural, and political factors affecting economic development, and comparative rates of progress in different countries.
PREREQUISITE: ECO 211 AND 212.

ECO355 Urban and Regional Economics
3 credits
Offered By Announcement Only
Analysis of the location and organization of urban and regional economic activities. Topics include regional income analysis, economic stability, factor mobility, economic growth and development, land use patterns, and special urban and regional problems and policies.
PREREQUISITE: ECO 211 AND 212.

ECO371 Economic Problems of Latin America
3 credits
Spring Semester
An analysis of the historical growth of major Latin American countries, with emphasis on the post World War II period. Topics include industrialization, foreign investment, international trade and regional integration, agrarian reform, inflation, and development strategies and planning within the context of Latin America.
PREREQUISITE: ECO 211 AND 212.

ECO386 Health Economics
3 credits
Offered By Announcement Only
The course applies the tools of microeconomic analysis to the health care sector. By examining the actors and issues in this market, students are able to discuss policy issues from an economic perspective.
PREREQUISITE: ECO 211, 212, 302

ECO391 Managerial Economics
3 credits
Offered By Announcement Only
Course introduces modern techniques of economic analysis and decision science with particular application to the management of the firm in a global environment. Topics include estimation of demand (regression analysis, exponential smoothing, and moving averages), linear program solving of product mix, cost problems, game-theory in a competitive business environment, decision trees, risk and uncertainty management, and capital budgeting. Other managerial economics tools are applied to the theory of the firm.
PREREQUISITE: ECO 211/212.

ECO403 Contemporary Issues in Monetary Economics
3 credits
Fall Semester
Analysis of the role of money in economic affairs. Topics include the determinants of the money supply and interest rates, money and prices, money and stability, and growth. Emphasis is placed on current problems and policies.
PREREQUISITE: ECO 211 AND 212.
ECO420 Economic Growth  
3 credits  
Offered By Announcement Only  
Course covers selected topics in economic growth. Topics include stylized facts associated with economic growth, the theoretical study of economic growth, and empirical tests of those theories. Course work is supplemented by case studies of individual countries, particularly developing countries.  
PREREQUISITE: ECO 301.

ECO430 Applied Econometrics  
3 credits  
Fall & Spring Semester  
This course introduces basic econometric techniques for analyzing economic data. The goal is to make students sophisticated consumers and skilled producers of empirical analysis, which will be attained by extensive work on a variety of real-world data like students' test scores, CEO wages, mortgage applications, cigarette demand, stock market capitalization, inflation, GDP and interest rates. Learning how to use econometric analysis software is an integral part of the course.  
PREREQUISITE: ECO 302, MAS 110 OR MTH 130, AND MAS 202 OR MTH 224 OR EQUIVALENT.

ECO441 International Trade Theory  
3 credits  
Fall Semester  
Study of the principles of comparative advantage and the gains from international trade. Analysis of tariffs, quotas, and protectionism is included.  
PREREQUISITE: ECO 302.

ECO442 International Monetary Economics  
3 credits  
Spring Semester  
Analysis of models of the exchange rate, the balance of payments, and monetary policy in an open economy.  
PREREQUISITE: ECO 301.

ECO444 Game Theory in Economic Applications.  
3 credits  
Fall & Spring Semester  
This course is an introduction to the techniques and questions of modern microeconomics. The course will expose you to the techniques of game theory, the workhorse of modern microeconomics, and will apply those techniques to the analysis of a variety of economics situations and institutions.  
PREREQUISITE: CALCULUS I

ECO460 Industrial Organization  
3 credits  
Offered By Announcement Only  
This course shows how microeconomic theory can be used to understand the diverse practices encountered in real-world markets between the extreme cases of perfect competition and monopoly. Topics to be covered include strategic pricing behavior, collusion, advertising and information, vertical integration, vertical restraints, regulation and a review of empirical literature.  
PREREQUISITE: ECO 302.

ECO499 Special Topics  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Topics in area of specialization. Approval of department required at time of registration.
ECO507 Taxation and Government Expenditure
3 credits
Offered By Announcement Only
The incentive and equity effects of taxation and public expenditures. Efficiency aspects of various tax and expenditure programs and the application of cost-benefit analysis to such areas as health, education, and welfare programs, both domestic and foreign, are discussed.
PREREQUISITE: ECO 302.

ECO510 Mathematical Economics
3 credits
Fall Semester
Introduction to mathematical techniques commonly employed in economic analysis. Topics include simultaneous linear equation systems, linear algebra, and expansions of polynomials, logarithmic and exponential equations, differential calculus, and optimization theory. A substantial part of the course focuses on the comparative static analysis of both macroeconomic and microeconomic problems.
PREREQUISITE: A SEMESTER COURSE IN CALCULUS. ECO 301 AND 302.

ECO511 Labor Economics (II)
3 credits
Spring Semester
A theoretical and empirical analysis of how labor markets operate. A survey of the literature, problems, and methodology of modern labor economics. Human capital analysis, the wage structure, job search and job-matching models, time-allocation models, the economic impact of labor unions, labor market discrimination, the determinants of labor demand and supply, and the factors affecting government policy relating to the labor sector is also included.
PREREQUISITE: ECO 302.

ECO512 Mathematical Economics (II)
3 credits
Spring Semester
Economics 512 will be sequential to the introductory Mathematical Economics I (ECO 510). Topics include integral calculus, differential equations, difference equations, Kuhn-Tucker conditions, and solutions to general equilibrium systems, optimization under uncertainty, and an introduction to dynamic optimization. Applications of mathematical techniques to economic analysis will be stressed.
PREREQUISITE: ECO 510 OR ITS EQUIVALENT.

ECO520 Econometrics
3 credits
Fall Semester
Statistical methods of estimating and testing mathematical model of economic relationships.
PREREQUISITE: ECO 301 AND 302, A COURSE IN STATISTICS AND PERMISSION OF INSTRUCTOR.

ECO521 Graduate Macroeconomic Theory
3 credits
Fall Semester
The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.
PREREQUISITE: INTERMEDIATE MACROECONOMIC THEORY AND PERMISSION OF INSTRUCTOR.
ECO532 History of Economic Thought  
3 credits  
Historical development of economic doctrines and theory. Topics and individuals discussed include mercantilism, physiocracy, Adam Smith, Thomas Malthus, David Ricardo, J. S. Mill, Karl Marx, marginal analysis, Alfred Marshall, and J. M. Keynes. Special emphasis is placed on the effect of historical insights upon the contemporary core of economic theory.  
PREREQUISITE: ECO 301 AND 302.

ECO533 Advanced Microeconomic Theory  
3 credits  
Fall Semester  
An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.  
PREREQUISITE: ECO 302, AND PERMISSION OF INSTRUCTOR.

ECO545 Natural Resources Economics II  
3 credits  
Offered By Announcement Only  
This course surveys the economics of natural resource use, and is targeted to upper-division undergraduate and graduate students in economics. Topics include the economics of pollution control, the application of cost/benefit analysis to the marine environment, the economics of non-renewable and renewable resource extraction, and international environmental problems.  
PREREQUISITE: ECO 345 or MAF 502.

ECO555 Economics Honors Research Project  
0-3 credits  
Offered By Announcement Only  
Research project to fulfill requirements for Departmental Honors in Economics.  
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

ECO586 Economics of Health  
3 credits  
Offered By Announcement Only  
A survey of the literature on the health care market. Economic theory is used to analyze public policy alternatives.  
PREREQUISITE: ECO 302 OR 691, OR CONSENT OF INSTRUCTOR.

EXECUTIVE & SPECIAL PROGRAMS

ESP500 Review Module  
0 credit  
Fall Semester  
A non-credit review session to provide students with the skills necessary to prepare for the successful completion of the common body of knowledge courses.

ESP501 Fundamentals of Accounting  
3 credits  
Spring Semester  
The generally accepted principles governing the preparation of financial reports, the use of accounting information systems in collecting financial, and cost data used in investment decisions and controlling an enterprise are discussed.  
PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP510 Introduction to Business Statistics  
3 credits  
First Summer Session  
Data analysis, probability concepts, distributions, sampling, estimation, hypothesis testing, simple and multiple regression, and correlation analysis are discussed.  
PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.
University of Miami Bulletin, 2012-2013
Undergraduate Course Listing
SCHOOL OF BUSINESS ADMINISTRATION
EXECUTIVE & SPECIAL PROGRAMS

ESP521 Introduction to Information Systems
3 credits Offered By Announcement Only
Computer information system concepts, including spreadsheets, data management, and word processing.
PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP551 Organizational Behavior
3 credits Spring Semester
Exploration of relevant concepts, research findings and pragmatic implications of the behavioral sciences for the management of complex socio-technical systems.
PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP560 Fundamentals of Marketing
3 credits Fall Semester
Marketing problems experienced by top executives are examined. Fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution, and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.
PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP590 Macro- and Microeconomics
3 credits First Summer Session
An economic study of the environment in which the decision-making process takes place in management and the functional areas. Course is structured especially for students without an undergraduate background in economics.
PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

FINANCE

FIN250 Personal Finance
3 credits Offered By Announcement Only
This course addresses all of the major personal financial planning problems that individuals and households encounter. It presents a model of the major elements of effective money management. All of the latest financial planning tools and techniques are discussed. (Not for credit for finance majors or minors.)

FIN300 Finance for Non-Business Majors
3 credits Fall & Spring Semester
This course provides an overview of modern finance for non-business majors. Topics include: how financial markets work, understanding financial pages in newspapers and the Internet, how stock and bond prices are determined, how investment portfolios are structured, concepts of risk and return, how companies manage their cash and investments and international finance. Not for credit for business students.
PREREQUISITE: JUNIOR STANDING.

FIN302 Fundamentals of Finance
3 credits Fall & Spring Semester & First Summer Session
Introduction to the basic tools and concepts in finance. This is the core class in finance for our undergraduate program. Topics include the financial framework of a business entity, taxes, the time value of money, capital market theory, financial risk measures, and capital budgeting. Note: to be eligible to major in finance, a student must earn a grade of B or higher in this class (a grade of B- does not qualify).
PREREQUISITE: MAS 201 OR EQUIVALENT, ECO 211, ACC 211.
FIN303 Intermediate Financial Management
3 credits Fall & Spring Semester & First Summer Session
This course provides an overview of financial decision-making by corporations. Building on topics covered in the introductory finance classes; this course develops the foundations of optimal financial policy and applies these principles to corporate financial decision-making including capital structure, capital budgeting, dividend policy, leasing, securities issuance and the role of investment banks, and mergers and acquisitions. Note: a student must have obtained a B or higher grade in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate that requirement.
PREREQUISITE: FIN 302 & MAS 202

FIN308 Intermediate Financial Management for Entrepreneurs
3 credits Fall Semester
PREREQUISITE: FIN 302, MAS 202

FIN320 Investment and Security Markets
3 credits Fall & Spring Semester & First Summer Session
This course introduces students to both practical and theoretical aspects of investment with an emphasis on financial markets. Topics include valuation of financial securities such as stocks, bonds and options; modern portfolio theory; the process and institutional characteristics of investing. Note that this course does not address the details of individual security valuation and selection, i.e., this course is not about stock picking or about how to get rich by investing in the markets. Instead, this course attempts to help you develop a lasting conceptual framework in which to view the investment process and to analyze future ideas and changes in investment environment. This class is essential to any student considering a finance concentration. Note: A student must have obtained a B or higher in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate this requirement.
PREREQUISITE: FIN 302, MAS 202

FIN330 International Finance
3 credits Fall & Spring Semester & First Summer Session
This course applies the principles of finance to international business decisions. Topics include the analysis of foreign exchange rates, balance of payments, characteristics and use of international financial institutions and instruments, the analysis and management of financial risk in the international environment, and financing multinational corporations. Note: a student must have a B or higher in FIN 302 to major in International Finance and Marketing (or Finance). Earning an A in this class or any other class or classes does not eliminate this requirement.
PREREQUISITE: FIN 302

FIN340 Real Estate Principles
3 credits Fall & Spring Semester
This course provides an introduction to basic principles and fundamental practices in the real estate industry. Students learn how to apply the principles of finance to the real estate industry. Topics include common institutional aspects, brokerage, contracting, financing, ownership, management, valuation, appraisal, and investment analysis.
PREREQUISITE: FIN 300 OR 302.
FIN404 Applications in Corporate Finance
3 credits
Spring Semester
An application of the concepts and tools of corporate finance. Primary emphasis on analyzing real-world cases dealing with liquidity issues, capital budgeting, firm valuation, advanced corporate financing, hedging with options and futures, corporate financial strategy, and other current issues in corporate finance.
PREREQUISITE: FIN 302, 303.

FIN405 Financial Modeling
3 credits
Fall & Spring Semester & First Summer Session
This course takes a variety of finance topics, which have been covered in the prerequisite courses, and implements them using practical spreadsheet models. Students will use the internet and financial databases to obtain input data for their models. Students will use Visual Basic for Applications (VBA) and design functions and macros to enhance their models. Students must have a solid working knowledge of Windows and Excel, as well as a good understanding of the material taught in the prerequisite finance classes. Students are required to also take FIN406, a co-requisite (zero credit) laboratory class, which provides hands-on instruction. Students must have a mobile ("lap-top") computer with the capability to run Windows-based software.
PREREQUISITE: FIN 302, 303, 320; CO-REQUISITE: FIN 406

FIN406 Financial Modeling Lab
0 credit
Fall & Spring Semester & First Summer Session
This is the lab component for FIN 405. Students must have a mobile computer with capability to run Windows based software.
PREREQUISITE: FIN 302, 303, 320; CO-REQUISITE: FIN 405

FIN410 Financial Institutions and Markets
3 credits
Fall Semester
This course examines financial institutions, such as banks (commercial, investment, mortgage, and savings), credit unions, insurance companies, pension funds, and mutual funds and the money markets in which they operate, and focuses on why they exist and how to manage them. Topics include financial intermediation and transmutation, monetary theory and policy, Federal Reserve management of the money supply, velocity of money, fiscal theory and policy, interest rates, and immunization.
PREREQUISITE: FIN 302, 320.

FIN411 Commercial Bank Management
3 credits
Spring Semester
This course introduces the theory and practice of asset-liability management by large publicly traded commercial banks, including the fundamental principles of structuring loans into balance sheets. A major objective of this class is to provide students sufficient background to enter the credit department in the executive development program of a major money center bank.
PREREQUISITE: FIN 302, 320.

FIN421 Investment Portfolio Management
3 credits
Fall & Spring Semester
This course covers the techniques of institutional and individual portfolio management. Topics include: Portfolio theory, diversification, asset allocation strategies, equity indexing, equity style management: Value versus growth, mutual funds, basics of hedge funds and fund of funds, ETF basics, introduction to private equity, equity and bond portfolio management strategies.
PREREQUISITE: FIN 302, 320.
FIN422 Speculative Markets and Derivatives
3 credits Fall & Spring Semester
This course is an introduction to derivative securities, and examines the nature of derivatives and applications of such instruments in investments and corporate settings. The emphasis is on derivatives of equity-based securities (such as stocks and stock indices), but coverage includes derivatives of debt-based securities (such as Treasury and Eurodollar securities). Topics include options, futures, forwards, and other derivatives, such as options on futures, foreign currency derivatives, swaps, exotic options, real options, as well as financial engineering using derivatives.
PREREQUISITE: FIN 302, 303, 320.

FIN425 Business and Security Valuation
3 credits Fall & Spring Semester
Applications of finance theory to the problem of valuing public and non-public companies. Multiplier models, discounted cash flow analysis, and the strengths and weaknesses of traditional security valuation methods are addressed in detail. Financial spreadsheet programs and data sources are an integral part of the course.
PREREQUISITE: FIN 302, 320.

FIN427 Fixed Income Markets and Analysis
3 credits Fall Semester
This course examines financial markets that trade fixed income securities. A fixed income security is based primarily on a debt contract, such as a bond, debenture, note or Treasury bill. Topics include the valuation, computation of return, and computation of various measures of risk for fixed income securities, as well as the analysis of the term structure of interest rates and various option features commonly included in debt contracts and fixed income securities. Students must have a solid working knowledge of Excel to take this class.
PREREQUISITE: FIN 320

FIN431 International Financial Management
3 credits Fall & Spring Semester
This is an advanced class in international finance from the viewpoint of multi-national organizations, including corporations, investment banks, and commercial banks. Topics include managing the various sources of risk, such as economic, political, and currency; cash receivables, inventory, and payables management; financing; transfer pricing; taxation; currency netting; capital budgeting; and hedging.
PREREQUISITE: FIN 302, 320, 330

FIN444 Real Estate Investment Analysis
3 credits Spring Semester
This course introduces the theoretical concepts and analytical techniques used to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Each student will complete a written evaluation and investment analysis of an existing or proposed commercial real estate project in Miami-Dade, Broward or Monroe County.
PREREQUISITE: FIN 302, FIN 303 OR FIN 320
FIN445 Real Estate Finance
3 credits
Fall Semester
This course introduces the theoretical concepts and analytical techniques used to make a decision to finance the purchase or development of a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Students are also encouraged to use their semester projects to apply for one of the numerous case competitions.
PREREQUISITE: FIN 302, 303 OR FIN 320

FIN446 Practical Training in ARGUS Real Estate Software
0 credit
Offered By Announcement Only
Practical training in the use of ARGUS software for the financial analysis of real estate projects.
PREREQUISITE: NONE

FIN476 Pure Risk Management
3 credits
Offered By Announcement Only
The nature and objectives of corporate and personal risk management. Emphasis is placed on the recognition, evaluation, and treatment of the pure risks to which businesses and individuals are exposed.
PREREQUISITE: FIN 302, 303, 320.

FIN499 Special Topics in Finance
3 credits
Offered By Announcement Only
Topics in selected areas of specialization.
PREREQUISITE: FIN 302, 303, 320; REQUIRES DEPARTMENTAL APPROVAL

FIN546 Introduction to ARGUS for Real Estate Analysis
1 credit
Fall Semester
Introduction to real estate ownership analysis using proprietary ARGUS assumptions for different property types, purchase and resale assumptions and preparing reports for buyers and investors.
PREREQUISITE: UNDERGRADUATE SENIOR OR GRADUATE STATUS

FIN547 Advanced ARGUS and Excel for Real Estate Application
2 credits
Spring Semester
Advanced topics in real estate analysis using Excel and ARGUS, including discounted cash flow and leverage models, modeling hard and soft development costs, partnership analysis and depreciation waterfalls.
PREREQUISITE: FIN 546, UNDERGRADUATE SENIOR, OR GRADUATE

FIN555 Finance Honors Research Project
0-3 credits
Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors in Finance.
PREREQUISITE: 3.9 GPA, SENIOR STANDING, PERMISSION OF INSTRUCTOR AND DEPARTMENT.
FIN590 Internship  
1 credit  Offered By Announcement Only  
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of department is required at time of time of registration. Note: FIN 590 is an elective and is not for credit toward the major.  
PREREQUISITE: FIN 303, 320 AND PERMISSION OF DEPARTMENT CHAIRMAN. REQUIRES DEPARTMENTAL APPROVAL. NOTE: DOES NOT COUNT AS CREDIT TOWARDS MAJOR.

FIN599 Directed Study  
3 credits  Offered By Announcement Only  
Individually supervised research projects in selected finance topics. Approval of the Chairperson and advisor is required prior to registration.  
PREREQUISITE: FIN 302, 320. REQUIRES DEPARTMENTAL APPROVAL.

GENERAL BUSINESS AND MANAGEMENT  
GBM101 Exploring The Law: Essential Tools for preparing for a career in the Law  
3 credits  Fall Semester  
This course will give students the opportunity to learn about the area of law and what skills are needed to properly prepare for an undergraduate and law school education. The course is designed to provide students with the foundational knowledge and skills to become independent life-long learners, critical thinkers, effective communicators, problem solvers, and develop connections with the University of Miami legal community.  
PREREQUISITE: SSP

MANAGEMENT  
MGT100 First Step (Freshman Integrity, Responsibility, and Success through teamwork)  
3 credits  Fall Semester  
This course is designed to provide entering freshman business majors an enriched curriculum that examines key issues in the global business environment and emphasizes the importance of ethical business practices. The course culminates with a team project that encourages students to address real world problems and encourages a lifelong commitment to civic engagement.

MGT251 Nature and Foundations of Entrepreneurship  
3 credits  Spring Semester  
This course seeks to understand some of the basic social, legal, cultural, and economic infrastructure that enables and sustains the creation of new enterprises. Although conventional perspectives on entrepreneurship often overlook political or religious activists whose "products" are not "sold" in traditional markets, a more expansive view considers actions that transform idea into enterprises that generate intellectual, social, cultural, religious, or economic value. Theory, data, and case study will be covered to help students to think both broadly and deeply about what it means - and what it takes - to be an entrepreneur, and what characterizes the entrepreneurial society.

MGT270 Introduction to Health Sector Administration  
3 credits  Fall & Spring Semester  
This course provides a basic understanding of the components of the health care sector and their interrelationships. The role of hospitals, ambulatory care (including physicians), long-term care, mental health care, hospice care, and pharmaceuticals will be examined. The role of government financed (Medicare and Medicaid) and private health insurance in affecting decision making by health care consumers and providers will be examined as well. A historical context will be used.
MGT302 Human Resource Management
3 credits
Fall & Spring Semester
Theory and practice of modern personnel management related to the other management functions in the conduct of the enterprise. Attention is focused on the needs of the line executive as well as those intending to pursue a staff career.

MGT303 Operations Management
3 credits
Fall & Spring Semester
Problems and methods of planning the efficient utilization of capital, labor, equipment, and materials. Sales forecasting, production planning, production control, scheduling, routing, dispatching, expediting, materials planning, inventory control, capital budgets, and costing are discussed. The application of quantitative techniques in problem solving and decision making are included as well as case problems. PREREQUISITE: MAS 201.

MGT304 Organizational Behavior
3 credits
Fall & Spring Semester & First & Second Summer Session
First professional course in management. Concepts of organization, motivation, leadership, dynamics of the group, personality, organizational development strategies, and other behavioral aspects involved in the effective management of an organization are discussed.

MGT307 Advanced Organizational Behavior
3 credits
Fall & Spring Semester
Continuation of MGT 304--primarily for, but not limited to, BMO majors. Through case analysis and other relevant exercises, theories are applied to specific situations in organizational settings. PREREQUISITE: MGT 304.

MGT308 Training and Development
3 credits
Fall & Spring Semester & First & Second Summer Session
An examination of key issues in designing training and development programs. Topics include organizational needs analysis, training design and implementation, evaluation techniques, and understanding of how such programs interact with other human resource functions. PREREQUISITE: MGT 302 AND HRM/BMO MAJOR.

MGT349 International Business
3 credits
Fall & Spring Semester
An introduction to the theory and institutions relevant to the conduct of business internationally. Includes an overview of current business patterns and their historical antecedents; social systems in countries as they affect the conduct of business from one country to another; basic assessment of international activities that fall within functional disciplines; and analysis of alternative ways in which international business may evolve in the future.

MGT353 Introduction to Entrepreneurship
3 credits
Fall & Spring Semester
The opportunities for the organization and operation of the small business. Organization, location, financial planning, records, unit costs, merchandising, credits, and personnel are discussed. Opportunities in various other fields are also considered. PREREQUISITE: JUNIOR STANDING
MGT359 Comparative Management
3 credits Offered By Announcement Only
Analysis of professional management as affected by the cultural environments in which it operates in major industrial nations. The problems of trans-cultural managers in multinational structures is examined.

MGT360 Effective Leadership
3 credits Fall & Spring Semester
This course covers the key theories, models, and frameworks about the effective leadership of people in organizations. A multimedia approach is taken, using readings, films, lecture, discussion, and case analyses. The emphasis is on building a sound grasp of good practice, and on developing the ability to apply such knowledge to everyday leadership situations.
PREREQUISITE: MGT 304

MGT401 Strategic Management
3 credits Fall & Spring Semester
An integrative approach to strategy formulation and implementation, from a domestic and international perspective, is the focus of this core capstone course. All the primary areas of business are emphasized using cases and readings. Course is required of all graduating seniors in Business.
PREREQUISITE: GRADUATING SEMESTER BUSINESS SENIORS ONLY.

MGT422 Leading Teams
3 credits Offered By Announcement Only
The objectives of this course are to develop interpersonal communication and conflict management skills necessary to work in teams and exercise leadership in teams. Topics include team development, decision making, and managing conflict.
PREREQUISITE: MGT 304.

MGT428 Compensation and Benefits Design
3 credits Fall & Spring Semester
Theory techniques and procedures of Job Evaluation and Wage Incentive as a basis for managerial procedures. The development and evaluation of alternative means of determining the relative worth of jobs, and the conversion of data to actual base rates is discussed. The design, evaluation, and administration of wage incentive plans through the application of work measurement time values to jobs involving bonus, piece work, or time-saved provisions is also included.
PREREQUISITE: MGT 302 AND HRMMGT MAJOR.

MGT445 Supply Chain Modeling and Analysis
3 credits Fall & Spring Semester
This course will introduce students to managerial decision problems in modern supply chains, and will develop structured mathematical tools to model and solve these problems. Students will also learn to apply these tools through problem-solving exercises, experiential games, and spreadsheet-based case studies.
PREREQUISITE: MGT 303
MGT446 Supply Chain Strategy
3 credits                                                    Fall & Spring Semester
This course will deal with issues such as inventory management, supply chain design/coordination, revenue management, and sourcing. Each module discusses how a real company practices some aspect of supply chain strategy, and then reviews the concepts behind that practice. Tools are provided to analyze the concepts, distill their principles, and suggest guidelines for implementation and improvement.
PREREQUISITE: MGT 303

MGT454 Business Planning for Entrepreneurs
3 credits                                                             Fall Semester
The basics of starting a business for aspiring entrepreneurs. Topics include sources of capital, market choices, division of the equity pie, choice of distribution channels, choosing an accountant and a legal advisor, preparation of a business plan, and product design. Teams of students develop business plans to start new enterprises.
PREREQUISITE: MGT 353

MGT455 Entrepreneurial Consulting
3 credits                                                           Spring Semester
Students review techniques, methods, and organizational forms of management consultants. Emphasis on small business problems, particularly start-ups, is provided through preparation of consulting reports on written cases, guest speakers, and actual business firms or start-ups.
PREREQUISITE: MGT 353, 454

MGT459 International and Multinational Management
3 credits                                                    Fall & Spring Semester
Foreign environment for overseas operations with a survey involving economics, political, and social constraints. The effects of overseas investments on foreign economies with emphasis on the emerging managerial structures is included.

MGT480 Organizational Development and Change
3 credits                                                    Fall & Spring Semester
Course is intended for students who are interested in learning about how to manage, plan, and implement large-scale change efforts within organizations. Part of the course is devoted to organizational analysis techniques and the remainder addresses behavioral intervention strategies (including survey feedback, technostructural interventions, and team building).
PREREQUISITE: MINIMUM SOPHOMORE STANDING

MGT498 Selected Topics
1- 6 credits                          Fall & Spring Semester & First Summer Session
Topics in selected areas of specialization.

MGT540 Behavioral Aspects of Productivity
3 credits                                                Offered By Announcement Only
Productivity management impacts organizational strategy, efficiency, quality, and survival. Course examines these varied impacts and discusses the managerial issues related to productivity measurement, organizational values, incentives, gain sharing, motivation, organizational change, gain sharing, motivation, organizational change, and organizational politics. Course is taught from behavioral and systems theory viewpoints, focusing on how behavioral change impacts system productivity. Course is multidisciplinary and supplemented with examples of corporate applications.
MGT545 Self-Assessment and Career Development  
3 credits \hspace{1cm} Offered By Announcement Only  
Course provides a framework for individuals facing the complex process of making career decisions. Emphasis is placed on self-assessment to help students better understand their career motivations. Additional topics include job searches, interviewing, analyzing, choosing job offers, managing the first year on the job, developmental relationships such as mentoring, the early career experience, and managing a career over time.  
PREREQUISITE: MGT 304 + SENIOR STANDING.

MGT550 MGT Internship  
1 credit \hspace{1cm} Fall & Spring Semester & First & Second Summer Session  
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Cannot be used toward major requirements.  
PREREQUISITE: MAJOR/SPECIALIZATION IN MGT DEPARTMENT, MINIMUM 3.0 GPA, AND DEPARTMENT CHAIR APPROVAL PRIOR TO REGISTRATION.

MGT598 Selected Topics  
3 credits \hspace{1cm} Fall & Spring Semester & First & Second Summer Session  
Topics in selected areas of specialization.

MGT599 Directed Study  
1-6 credits \hspace{1cm} Fall & Spring Semester & First & Second Summer Session  
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration. Only open to undergraduate students.  
PREREQUISITE: SENIOR STANDING + MAJOR IN MGT DEPARTMENT.

MANAGEMENT SCIENCE  
MAS105 Quantitative Methods in Business I  
3 credits \hspace{1cm} Offered By Announcement Only  
This course provides a background in algebra, linear equations, matrices, quadratic, exponential, and logarithmic functions appropriate for the successful understanding, interpretation, and use of these concepts and their application to business and economics within the Business School curriculum and in career endeavors. The course also provides an introduction to the mathematics of finance, interest rates, discounting of future returns, and linear programming.  
PREREQUISITE: HIGH SCHOOL ALGEBRA.

MAS110 Quantitative Applications in Business  
3 credits \hspace{1cm} Fall & Spring Semester & First & Second Summer Session  
Review of algebra emphasizing its application to supply and demand functions, market equilibrium, compound interest, and amortization. Differential calculus emphasizing its applications to marginal cost and revenue functions, maximization, taxation in competitive markets, and elasticity of demand are discussed. The application of integral calculus to total cost and profit of demand, to total cost and profit functions, consumer's and producer's surplus, computation of present value, and constrained optimization using partial differentiation are also included.  
PREREQUISITE: MTH107 OR EQUIVALENT.
MAS201 Introduction to Business Statistics
3 credits  Fall & Spring Semester & First & Second Summer Session
Data analysis and presentation, cross tabulations, descriptive statistical measures, probability, sampling, statistical inference, hypothesis testing for one and two populations, covariance and correlation analysis. Utilization of microcomputer statistical packages is also included.
PREREQUISITE: MAS 110 OR EQUIVALENT

MAS202 Intermediate Business Statistics
3 credits  Fall & Spring Semester & First & Second Summer Session
Chi-squared goodness of fit tests, and contingency tables, analysis of variance, simple linear regression, multiple regression, time series, forecasting, statistical methods of quality. Utilization of microcomputer statistical packages, case analyses, and presentations are also included.
PREREQUISITE: MAS 201.

MAS311 Applied Probability and Statistics
3 credits  Fall & Spring Semester
Descriptive statistics, basic probability, distribution theory, point and interval estimation, testing hypotheses, simple linear regression, correlation, and quality control charts are discussed. Examples are drawn from various disciplines. Lecture, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 162 OR 172

MAS312 Statistical Methods and Quality Control
3 credits  Fall & Spring Semester
Analysis of variance, multiple regression, and statistical quality control methodology, including reliability are discussed.
PREREQUISITE: MAS/IEN 311 OR EQUIVALENT.

MAS441 Deterministic Models in Operations Research
3 credits  Fall Semester
Introduction to deterministic mathematical models with applications to business problems. Topics include the methodology of operations research, linear, integer, and dynamic programming, project management, networks, multi-objective optimization and heuristics. Software packages are used for programming applications. Lecture, 3 hours.

MAS442 Stochastic Models in Operations Research
3 credits  Spring Semester
Introduction to probabilistic models and their applications. Topics include inventory theory, stochastic processes (queuing systems, Markov chains), and computer simulation. Lecture, 3 hours.
PREREQUISITE: MAS 311 OR EQUIVALENT.

MAS452 Systems Analysis Methodology and Applications
3 credits  Spring Semester
Solution of problems from the general systems point of view. Case studies are used with emphasis on report writing. The preparation of a project proposal and the conduct of the proposed study are also required.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.
MAS499 Directed Study
1-3 credits Fall & Spring Semester & First Summer Session
Independent investigation of special problems. Offered by special arrangement only. Approval of supervising professor as to topic and evaluation of project required at time of registration.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAS547 Computer Simulation Systems
3 credits Fall Semester
Introduction to discrete-event computer simulation and hands-on development of simulation models. Topics include introduction to queuing theory, input and output analysis, random number generation, and variance reduction techniques. Students practice their modeling skills using commercial state-of-the-art simulation software. Assigned readings of real-life simulation projects complement the material learned in the classroom. Lecture, 3 hours.
PREREQUISITE: MAS/IEN 311 OR EQUIVALENT.

MAS548 Data Mining and Knowledge Acquisition
3 credits Spring Semester
This course provides an introduction to the principles and techniques of data mining. Topics covered include the data mining process, data preprocessing, data mining techniques and data mining evaluation. The course will involve a combination of lectures, labs, projects and case studies.
PREREQUISITE: MAS 201 & MAS 202

MAS550 Management Science Internship
1-3 credits Fall & Spring Semester & First Summer Session
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Permission of department chair is required prior to registration.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN. FOR CREDIT ONLY.

MAS555 Management Science Honors Research Project.
0-3 credits Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors in Management Science.
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

MAS595 Topics in Management Science
1-3 credits Fall & Spring Semester & First Summer Session
Topics in selected areas of specialization.

MAS596 Topics in Management Science
1-3 credits Fall & Spring Semester & First Summer Session
Topics in selected areas of specialization.

MARKETING
MKT201 Foundations of Marketing
3 credits Fall & Spring Semester
Understanding and satisfying consumer need through product planning, pricing, promotion, and distribution. Students identify and analyze marketing problems. Discovery and application of marketing skills are developed by marketing planning assignments, computer simulations, and case analysis.
PREREQUISITE: FOR SCHOOL OF BUSINESS FRESHMAN ONLY
MKT301 Marketing Foundations
3 credits Fall & Spring Semester & First Summer Session
Understanding and satisfying consumer needs through product planning, pricing, promotion, and distribution. Students identify and analyze marketing problems. Discovery and application of marketing skills are developed by marketing planning assignments, computer simulation, and case analysis.
PREREQUISITE: JUNIOR STATUS.

MKT302 Marketing Research and Market Analysis
3 credits Fall & Spring Semester
Examination of the process, role, and function of marketing research, including research problem formation, research methods and procedures, data acquisition, sampling theory and practice, data analysis, presentation of results, ethical issues, and application for each of the above.
PREREQUISITE: MAS 201, MAS 202 AND MKT 201 OR MKT 301

MKT310 Consumer Behavior and Marketing Strategy
3 credits Fall & Spring Semester
The study of behavioral science research findings, principles, and theories, especially those from psychology and sociology, as they relate to the determinants of consumer buying behavior. The case approach is utilized to stimulate the development of creative marketing strategy.
PREREQUISITE: MKT 201 OR MKT 301

MKT320 Retailing
3 credits Fall & Spring Semester & First Summer Session
Retail store management, location, buying, merchandise control, policies, services, pricing, expenses, profits, training and supervision of retail sales force, and administrative problems are discussed.
PREREQUISITE: MKT 201 OR MKT 301

MKT340 Professional Selling
3 credits Fall & Spring Semester & First Summer Session
Nature of the professional selling function and its relationship and contribution to the marketing strategy of organizations. Special emphasis is placed on broadly applicable principles and effective personal communication skills during the sales process.
PREREQUISITE: MKT 201 OR MKT 301

MKT360 International Marketing
3 credits Fall & Spring Semester & Second Summer Session
The major current factors affecting international marketing. Course is designed to acquaint students with the growing importance of world marketing in the U.S. and the strategic issues involved.
PREREQUISITE: MKT 201 OR MKT 301

MKT380 New Product Development
3 credits Fall & Spring Semester
This course enables students to appreciate the systematic approach that goes into the creation and marketing of new products. Practical aspects of developing and marketing new products are inculcated through two assignments and one class project.
PREREQUISITE: MKT 201 OR MKT 301
MKT385 Marketing for Entrepreneurs

3 credits  Fall & Spring Semester
This course is focused on the study and practice of marketing all aspects of an entrepreneurial venture: the new company itself as well as its products or services. Topics will include: branding, pricing and costing, buying behavior, market segmentation, channel management, as well as exploring issues such as intellectual property, customer service, corporate versus product web sites, media exposure and PR, and maintaining an integrated plan for building the venture's brand.
PREREQUISITE: MKT 201 OR MKT 301

MKT386 Advertising Management

3 credits  Fall & Spring Semester
In this course, students learn about the components involved in researching, planning, creating, and executing advertising strategies. The class gives students a better understanding of how advertising can be effectively used in a marketing strategy. Students also learn how advertising both influences and is influenced by cultural trends. Implications of this to both marketers and society as a whole are discussed.
PREREQUISITE: MKT 201 OR MKT 301.

MKT387 Internet Marketing

3 credits  Fall & Spring Semester
This course will introduce students to the principles of Internet marketing from both perspectives of theory and practice. On the theory side, students will learn foundations and recent research and development of internet marketing. Main contemporary internet marketing issues will be extensively discussed in class, including social media marketing, search engine marketing, e-commerce, online advertising, mass customization, and others. Students will also learn how to form an appropriate strategy for an internet marketing campaign and use quantitative skills to analyze the effectiveness of such a campaign. On the practice side, students will collaborate in teams and participate in real-world Google online marketing challenge. Students will grasp critical concepts of search engine optimization by working with a local business client, laying out a suitable pre-campaign strategy, implementing and modifying the campaign in real time, and summarizing the campaign results in a meaningful and concise manner when it is over.
PREREQUISITE: MKT 201 OR MKT 301 - MINIMUM CREDITS EARNED 42

MKT388 Health Care Marketing

3 credits  Fall & Spring Semester
This course is devoted to the study of health care marketing and the health care system involved with the task of marking products and services. As health care reform continues to evolve current market conditions and transform existing organizations into new practices, this course will focus on how managed care providers, hospitals, physicians, federal government, device and pharmaceutical companies will embrace the new patient centered market in their marketing strategies. Key learning objectives include: Healthcare System Interaction, Consumer Driven Market Research & Segmentation, Health Network Channel Partner Marketing Services vs. Good Marketing Variation, Healthcare Service Selection Drivers, Patient & Community Oriented Marketing Technology, Social Media & Advertising Impact on Health Marketing, Cause & Global Marketing Platforms in healthcare and Integrated Marketing & Marketing Variation between Healthcare Segments.
PREREQUISITE: MKT 201 OR MKT 301 OR PERMISSION BY THE DEPARTMENT CHAIR
MKT403 Marketing Management  
3 credits  
Fall & Spring Semester  
Marketing Management is a capstone course that examines new concepts and insights regarding marketing management. Through case analysis the course covers important aspects of marketing management. The students also participate in a simulation in which they manage multi-segment markets. 
PREREQUISITE: MKT 201 OR MKT 301, FIN 302 AND COMPLETION OF/OR CURRENTLY ENROLLED IN MKT 302.

MKT450 Marketing Internship  
1 credit  
Offered By Announcement Only  
The student is individually assigned to an operating business firm or other organization to gain insight into management practice in the area of their career interest. The internship cannot be used to satisfy course requirements for marketing majors or minors and periodic reports and conferences are required. Obtain permission of department chairman before enrolling. 
PREREQUISITE: DECLARED MARKETING OR IFM MAJOR, A MINIMUM OF 3.0 GPA AND APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.

MKT451 Marketing Internship  
1 credit  
Offered By Announcement Only  
The student is individually assigned to an operating business firm or other organization to gain insight into management practices in the area of their career interest. The internship cannot be used to satisfy course requirements for marketing majors and minors periodic reports and conferences are required. Obtain permission of department chair before enrolling. 
PREREQUISITE: DECLARED MARKETING OR IFM MAJOR, A MINIMUM OF 3.0 GPA AND APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.

MKT469 International Marketing Management  
3 credits  
Fall & Spring Semester  
International Marketing Management is a capstone course that examines new concepts and insights regarding international marketing management. Through case analysis the course covers important aspects of international marketing management. The students also participate in a simulation in which they manage multi-country markets. 
PREREQUISITE: MKT 360 AND COMPLETION OF/OR CURRENTLY ENROLLED IN MKT 302.

MKT497 Topics in Marketing  
3 credits  
Offered By Announcement Only  
Topics in selected areas of marketing.

MKT498 Topics in Marketing  
3 credits  
Offered By Announcement Only  
Topics in selected areas of Marketing.

MKT499 Undergraduate Directed Study  
1 credit  
Offered By Announcement Only  
Individually supervised readings or research projects. Restricted to students with superior academic records. Approval of supervising professor as to topic and evaluation of project required at time of registration. 
PREREQUISITE: SENIOR STANDING AND APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.
MKT555 Marketing Honors Research Project  

Offered By Announcement Only

3 credits

Research project to fulfill requirements for Departmental Honors in Marketing.
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR OR DEPARTMENT.
CAD102 Graphic Design for Advertising I
3 credits
Fall & Spring Semester & First Summer Session

CAD114 Principles of Advertising
3 credits
Fall & Spring Semester
An introduction to the principles and practice of advertising in a free-market economy. Students will be introduced to several areas of advertising including account planning, creative strategy, media planning, research methods, consumer behavior, and integrated marketing. Emphasis on cultural, social, ethical, and regulatory aspects of advertising.

CAD201 Advertising Strategy Development
3 credits
Fall & Spring Semester
Introduction to the development of effective advertising strategies. Topics include consumer behavior, attitude development, persuasion tactics, targeting, market segmentation, market analysis, and brand management.
PREREQUISITE: CAD 114

CAD202 Graphic Design for Advertising II
3 credits
Fall & Spring Semester
An introduction to the art of visual communication as it relates to advertising design. Topics include typography, design principles, art and illustration, conceptualization and layout stages, color and color reproduction, printing processes, and production.
PREREQUISITE: CAD 102 OR ART 109, AND CAD 114

CAD231 Advertising Copywriting and Concept
3 credits
Fall & Spring Semester & First Summer Session
Introduction to writing advertising copy and conceptualizing campaign ideas for print, broadcast, out-of-home, interactive, and specialty media.
PREREQUISITE: CAD 114

CAD233 Writing for Account Management
3 credits
Fall & Spring Semester
Introduction to writing for the business side of advertising. This course will prepare students to write and create comprehensive reports and prepare presentations related to the business of account planning including research, creative strategies, and media planning.
PREREQUISITE: CAD 114   COREQUISITE: CAD 201

CAD290 Special Topics in Advertising
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

CAD312 Research Methods for Advertising
3 credits
Fall & Spring Semester
Application of research techniques used in the field of advertising. Students will learn to collect, analyze, and report secondary and primary research findings as they apply to advertising decision-making.
PREREQUISITE: CAD 201,CAD 233 AND STATISTICS (PSY 204 OR MTH 224 OR MAS 201 OR SOC 211/212)
CAD340 Interactive, Digital, and Social Media in Advertising
3 credits
Offered By Announcement Only
The course will explore the use of new and evolving media in the development of effective advertising campaigns, as well as the impact of these media on the advertising industry.
PREREQUISITE: CAD 114

CAD350 International and Cross-cultural Advertising
3 credits
Offered By Announcement Only
This course will explore advertising in a global marketplace. Emphasis will be placed on understanding cultural differences as they relate to international advertising planning, as well as techniques for gathering secondary and primary data on international markets and consumers.
PREREQUISITE: CAD 114

CAD380 Advertising Internship
1- 3 credits
Fall & Spring Semester & First & Second Summer Session
Students select an internship in the field of advertising for on-the-job training. The student will work a minimum of 45 hours for each credit.
PREREQUISITE: JUNIOR STANDING, MINIMUM GPA OF 2.75, AND PERMISSION OF PROGRAM DIRECTOR

CAD384 Advertising Creative Strategy and Execution
3 credits
Fall & Spring Semester & First Summer Session
Development of effective creative campaigns. Students will design advertisements for print, broadcast, interactive, and specialty media that meet specific campaign objectives.
PREREQUISITE: CAD 201, CAD 202, AND CAD 231

CAD388 Media Planning
3 credits
Fall & Spring Semester & First Summer Session
An introduction to the principles and concepts of advertising media planning including media selection, media plan development, forecasting, and budgeting.
PREREQUISITE: CAD 201 AND CAD 233 OR PERMISSION OF INSTRUCTOR

CAD389 Media Buying and Advertising Sales
3 credits
Offered By Announcement Only
Students will learn the art of buying media in all categories, as well as how to sell advertising space in these media.
PREREQUISITE: CAD 201

CAD390 Art Direction
3 credits
Fall & Spring Semester
Students will learn art direction skills for both print and electronic media including newspapers, magazines, outdoor, television, radio, and the internet.
PREREQUISITE: CAD 202, CAD 231, AND CAD 384

CAD401 Seminar in Advertising and Society
3 credits
Offered By Announcement Only
This course will examine the ethical, persuasive, cultural, societal, and economic effects of advertising, focusing on the theoretical frameworks that explain how advertising works in these arenas.
PREREQUISITE: CAD 201; JUNIOR STANDING
CAD412 Public Opinion and Mass Communication  
3 credits  
Fall Semester  
An exploration of the formation and role of public opinion in mass communication. Emphasis is placed on its role in advertising and promotion. Topics include the evolution and history of public opinion in American culture, the application of public opinion on attitude formation and persuasion, measurement of public opinion, and propaganda.

CAD434 Advertising Campaigns  
3 credits  
Fall & Spring Semester & First Summer Session  
Capstone course in which students develop a full-scale advertising campaign. Students are responsible for conducting secondary and primary research, strategic planning, development of creative executions, planning and executing media selections, and campaign evaluation.  
PREREQUISITE: GENERAL TRACK: CAD 114, CAD 201, CAD 231 OR CAD 232, CAD 312 AND CAD 388; MANAGEMENT TRACK: CAD 114, CAD 201, CAD 233, CAD 312 AND CAD 388; CREATIVE TRACK: CAD 114, CAD 201, CAD 202, CAD 231, AND CAD 384

CAD438 Practicum in Advertising  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Students will work in the advertising field for advanced on-the-job training in their specific area of advertising specialization.  
PREREQUISITE: CAD 380, SENIOR STANDING, AND PERMISSION OF PROGRAM DIRECTOR

CAD483 Integrated Marketing Communication  
3 credits  
Offered By Announcement Only  
An exploration of how brands are built and promoted through the integration of advertising, public relations, sales promotion, personal selling, direct marketing, and e-commerce.

CAD490 Special Topics in Advertising  
3 credits  
Offered By Announcement Only  
This course subject matter varies according to announced special topic. See class schedule for details.  
PREREQUISITE: SENIOR STANDING; ADMISSION TO MAJOR; PERMISSION OF INSTRUCTOR

CAD491 The Business of Account Management  
3 credits  
Spring Semester  
PREREQUISITE: CAD 201, CAD 233, CAD 312, AND CAD 388

CAD495 Advertising Management  
3 credits  
Fall & Spring Semester  
Students will learn to approach advertising problems at both micro and macro levels from the perspective of a manager in charge of solving such problems. Emphasis will be on problem identification, development of alternative strategies to solve problems, tactics for executing strategies, and evaluation of proposed solutions.  
PREREQUISITE: CAD 201, CAD 233, CAD 312, CAD 388  COREQUISITE: CAD 434

CAD496 Portfolio Development  
3 credits  
Fall & Spring Semester  
This course will assist students in putting together a professional-quality advertising portfolio of their work.  
PREREQUISITE: CAD 201, CAD 202, CAD 231, CAD 384, CAD 434
CAD498 AAF National Student Advertising Campaign Competition
3 credits  Spring Semester
Students compete in the American Advertising Federation's National Student Advertising Campaign Competition.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CAD499 Projects and Directed Research in Advertising
3 credits  Fall & Spring Semester & First & Second Summer Session
Individual study.
PREREQUISITE: PERMISSION OF INSTRUCTOR; JUNIOR STANDING; ADMISSION TO MAJOR

COMMUNICATION
COM101 Mass Media Communication in Society
3 credits  Fall & Spring Semester & First Summer Session
A survey of the history, development, structure, and effects of mass communication media.

COM110 Communication Theory
3 credits  Fall & Spring Semester & First & Second Summer Session
Survey of basic communication theories and models. Study of processes, functions, levels, and general principles of human communication.

COM250 Freedom of Expression and Communication Ethics
3 credits  Fall & Spring Semester & Second Summer Session
Survey of basic communication theories and models. Study of processes, functions, levels, and general principles of human communication.

COM395 Honors Seminar in Communication
3 credits  Fall & Spring Semester
An examination of central issues and topics in the field of Communication.
PREREQUISITE: SENIOR STANDING AND ENROLLMENT IN THE SCHOOL'S HONORS PROGRAM

COM401 Honors Communication Colloquium
3 credits  Fall & Spring Semester
An examination of central issues and topics in the field of Communication.
PREREQUISITE: JUNIOR OR SENIOR STANDING AND ENROLLMENT IN THE SCHOOL'S HONORS PROGRAM

COM406 SPECIAL TOPICS IN COMMUNICATION
3 credits  Offered By Announcement Only
Course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR OR PROGRAM DIRECTOR

COM499 Senior Honors Project/Thesis
3 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: SENIOR STANDING AND ENROLLMENT IN THE SCHOOL'S HONORS PROGRAM

COM598 Special Topics in Communication
3 credits  Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: 12 CREDITS IN COMMUNICATION AT 300 LEVEL OR ABOVE OR EQUIVALENT,
PERMISSION OF INSTRUCTOR
COS112 Interpersonal Communication
3 credits
Offered By Announcement Only
Overview of current theories of interpersonal communication. Consideration is
given to impression formation, relationship between self-concept and others, function
of language in social interaction, and development and maintenance of relationships.

COS210 Writing for Communication Studies
3 credits
Spring Semester
Principles of writing, reviewing literature, and synthesizing research for communication
studies and the social sciences.
PREREQUISITE: COM 110

COS211 Public Speaking
3 credits
Fall & Spring Semester & First & Second Summer Session
Introduction to effective audience communication including theory and extensive
practice in oral presentations.

COS304 Intercollegiate Debate Theory and Practice
1 credit
Fall & Spring Semester
A course designed to teach students how to compete successfully in intercollegiate
debate, and to reinforce training through practice and competition.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS316 Small Group Communication
3 credits
Offered By Announcement Only
Techniques of discussion applied to goal-oriented, small group situations. Consideration
is given to research methods, leadership, and conflict resolution. Theory is applied
to active classroom participation.

COS318 Nonverbal Communication
3 credits
Offered By Announcement Only
Theory and application of selected areas of research in nonverbal communication
is addressed. Discussion of environment, space, body movement, posture, eye contact,
facial expression, vocal cues, and physical appearance is included.

COS324 Health Communication
3 credits
Fall & Spring Semester
This course is designed to provide a broad introduction to human communication
in a health-care context. Emphasis will be on issues of social support, patient-health
professional/caregiver interaction, organizational culture, planning health promotion
campaigns, and cultural conceptions of health and illness.

COS333 Business Communication
3 credits
Fall & Spring Semester & First & Second Summer Session
Study and practice in the major forms of spoken and written communication in the
context of businesses and other professional organizational settings.
PREREQUISITE: JUNIOR STANDING

COS336 American Political Campaign Communication
3 credits
Offered By Announcement Only
Uses and functions of communication in American and international politics. Communication
during political events and campaigns is also addressed.
COS343 Introduction to Intercultural Communication
3 credits Offered By Announcement Only
Introduction to communication among people from diverse cultures. Application of communication theory to intercultural sensitivity and cultural diversity is emphasized.

COS351 Qualitative Research Methods
3 credits Spring Semester
Course is designed to introduce students to a sample of qualitative research methods used in communication.
PREREQUISITE: COM 110, COS 210

COS353 Quantitative Communication Research Methods and Analyses
3 credits Fall Semester
Introduction to communication research methods. Application of quantitative measurement techniques and statistical analyses will be discussed as well as the use of microcomputer statistical programs.
PREREQUISITE: COM 110, COS 210

COS377 Argumentation and Debate
3 credits Offered By Announcement Only
Argumentation theory and practice are discussed. Rhetorical and philosophical foundations of argumentation and their application in various settings, including academic debate, are also covered.

COS391 Undergraduate Special Topics in Communication Studies
3 credits Offered By Announcement Only
Course subject matter varies according to announced special topic. See class schedule for details.

COS405 Practicum in Communication Studies
1-3 credits Fall & Spring Semester & First & Second Summer Session
Structured participation in programmatic research and applied practice in the community.
PREREQUISITE: JUNIOR STANDING AND PERMISSION OF INSTRUCTOR

COS418 Organizational Communication
3 credits Offered By Announcement Only
Introduction to organizational communication theory. Consideration of structure, function, and effects of communication in organizations are analyzed. Emphasis is placed on principles needed for decision making and effective management of organizational communication processes.

COS455 Advanced Research Methods in Communication
3 credits Spring Semester
Advanced Research Methods in Communication is designed to provide students with continued instruction in research methods beyond the introductory quantitative course. Special attention is paid to (a) measurement problems, (b) complex research designs, and (c) statistical analysis of data.
PREREQUISITE: COM 110, COS 353

COS472 Persuasion
3 credits Offered By Announcement Only
A review of theory, research, and practice of the intentional use of symbols to influence attitudes, beliefs, and actions.
COS479 Capstone for Communication Studies
3 credits  
Capstone course designed for communication studies majors. Provides students with the opportunity to apply knowledge of communication theory and research skills through development of capstone project.  
PREREQUISITE: COM 110, COS 351, COS 353, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR

COS498 Communication Studies Internship
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Prescribed study and supervised work with practitioners in organizations.  
PREREQUISITE: JUNIOR STANDING AND PERMISSION OF FACULTY SUPERVISOR

COS499 Projects and Directed Research
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Individual study. No more than three credits may be counted toward a Communication major or minor.  
PREREQUISITE: 12 CREDITS IN COMMUNICATION STUDIES AND PERMISSION OF SUPERVISING INSTRUCTOR

COS545 Intercultural Communication: International Perspectives
3 credits  
Offered By Announcement Only  
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.  
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS546 Intercultural Communication: Domestic Perspectives
3 credits  
Offered By Announcement Only  
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.  
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS560 The Executive Communicator
3 credits  
Offered By Announcement Only  
Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.  
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

COS591 Advanced Special Topics in Communication Studies
3 credits  
Offered By Announcement Only  
This course subject matter varies according to announced special topic. See class schedule for details.  
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS599 Advanced Projects and Directed Research
1-6 credits  
Fall & Spring Semester & First & Second Summer Session  
Individual study. Course may be repeated to a maximum of six credits.  
PREREQUISITE: PERMISSION OF INSTRUCTOR
CEM102 Introduction to Electronic Media
3 credits  Fall & Spring Semester
Technology, history, economics, regulation, and social roles of radio, television, cable, satellite, online, and other electronic media.

CEM201 Writing for the Electronic Media
3 credits  Fall & Spring Semester
Principles of writing for radio and television. Communicating in the aural and visual modes in persuasive, informational, and dramatic contexts is emphasized.
PREREQUISITE: CEM 102, ENG 105

CEM206 Special Topics in Electronic Media I
3 credits  Offered By Announcement Only
This course subject matter varies according to announced special topics. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR OR PROGRAM DIRECTOR

CEM233 Television Performance
3 credits  Fall & Spring Semester
Introduction to communication concepts and skills involved in typical on-camera duties such as interviewing, commercials, characterizations, and ad-libbing.
PREREQUISITE: CEM 102, OR NON-MAJORS, PERMISSION OF INSTRUCTOR

CEM235 Radio Production Performance
3 credits  Spring Semester
Introduction to equipment and procedures of radio. Production of radio programs and formats, editing, announcing, sequencing program elements, and designing program formulas are discussed.
PREREQUISITE: CEM 102

CEM245 Introduction to Electronic Media Production
3 credits  Fall & Spring Semester
Introduction to the theory, process, and procedure of electronic media production. Lecture and laboratory are included.

CEM301 Electronic Media Research and Theories
3 credits  Fall & Spring Semester
Survey of qualitative and quantitative research methods used to collect and analyze data on broadcast, cable and online audiences. Course also covers theories to explain how electronic media influence individuals and society. Practice in conducting small-scale audience measurement is included.
PREREQUISITE: CEM 102

CEM302 Electronic Media Law
3 credits  Fall & Spring Semester
Course provides analysis of laws and other forces that influence broadcasting, cable, and online media operations. Examines the application of the First Amendment to media operations with a focus on press law.
PREREQUISITE: COM 101, CEM 102 AND SOPHOMORE STANDING. STUDENTS MAY NOT TAKE BOTH CEM 302 AND CNJ 303 FOR CREDIT.
CEM306 Special Topics in Electronic Media II
3 credits
Offered By Announcement Only
This course subject matter varies according to announced special topics. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND PROGRAM DIRECTOR

CEM313 Electronic Media Sales
3 credits
Offered By Announcement Only
Operation of sales departments at radio, television, and cable outlets. Course includes the preparation and delivery of sales presentations, and use of audience research reports. Online and print media sales are examined in context.
PREREQUISITE: CEM 102

CEM314 Broadcast and Cable Programming
3 credits
Fall & Spring Semester
Course covers categories and sources for selecting program materials used in radio, television, and cable television program services. Strategies employed in devising program services are also covered.

CEM315 Acting for the Camera
3 credits
Offered By Announcement Only
Dramatic performance techniques for television and motion pictures. Lecture and laboratory are included.
PREREQUISITE: CEM 233, NON-MAJORS NEED PERMISSION OF INSTRUCTOR

CEM317 Broadcast Journalism
3 credits
Fall & Spring Semester
Preparation of materials for presentation through the broadcast/cable media with emphasis on news writing for oral presentation by studio anchors and field reporters. Course examines issues facing the profession of broadcast journalism, radio and TV reporting techniques, and news program formats.
PREREQUISITE: CNJ 111, CNJ 216

CEM345 Intermediate Electronic Media Production
3 credits
Fall & Spring Semester
Planning and execution of complex field, studio, and multimedia production in a variety of lengths and formats. High level skills in television control room situations and non-linear editing will be used to produce audio, video, and online content.
PREREQUISITE: CEM 245

CEM402 Strategic Media Management
3 credits
Spring Semester
This capstone course focuses on strategic decision-making involved with developing and managing electronic media enterprises. The course concludes with student entrepreneurs generating comprehensive business plans for a proposed media enterprise. Although intended primarily for media management majors, other qualified students may be admitted with permission of instructor.
PREREQUISITE: CEM 403 AND CEM 435, OR PERMISSION OF INSTRUCTOR

CEM403 Media Economics
3 credits
Spring Semester
Economic concepts, practices, and issues as they relate to the mass media industry.
PREREQUISITE: JUNIOR STANDING
CEM406 Special Topics in Electronic Media III
3 credits Offered By Announcement Only
This course subject matter varies according to announced special topics. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR OR PROGRAM DIRECTOR

CEM408 International Electronic Media Systems
3 credits Fall Semester
Seminar on world broadcasting systems and trans-national communication services. Discussion of contemporary issues involving electronic media systems worldwide.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR

CEM417 Advanced Broadcast Journalism
3 credits Fall & Spring Semester
This capstone course concentrates on gathering and preparing news stories for presentation in news programs. Includes field reporting, editing, and preparation of visual and aural TV elements, writing, producing and performing for on-air presentation. Lecture and laboratory are included.
PREREQUISITE: CEM 245, CEM 317

CEM427 Television Newscast
3 credits Fall & Spring Semester
Studio anchoring, newscast producing, and field reporting for news and public affairs programming.
PREREQUISITE: CEM 417

CEM435 Telecommunication Systems
3 credits Fall Semester
The convergence and interrelationship of broadcast, cable, satellite, telephone, computer, and other telecommunication technologies and industries, with emphasis on policy, effects, regulation, economics, management, and information content.
PREREQUISITE: JUNIOR STANDING

CEM445 Advanced Electronic Media Production
3 credits Fall Semester
The integration of the producer's role and the structure of program design as they relate to day-to-day production operations. Lecture and laboratory are included.
PREREQUISITE: CEM 345

CEM446 Electronic Media Production Design
3 credits Offered By Announcement Only
A communication-based synthesis of the production process.
PREREQUISITE: CEM 345

CEM491 Internship in Broadcasting and Allied Fields
1-3 credits Fall & Spring Semester & First & Second Summer Session
Course provides a prescribed study and supervised work with practitioners in broadcasting, broadcast journalism, and allied fields.
PREREQUISITE: SENIOR OR JUNIOR STANDING, MAJOR IN COMMUNICATION, CUMULATIVE GPA OF 2.5 IN ALL COURSES OFFERED FOR COMMUNICATION MAJOR, AND PERMISSION OF INSTRUCTOR. BROADCAST JOURNALISM MAJORS MUST HAVE COMPLETED CEM 317
CEM499 Projects and Directed Research
1-3 credits Fall & Spring Semester & First & Second Summer Session
Individual study. No more than three credits may be counted toward a communication major or minor.
PREREQUISITE: 12 CREDITS IN COMMUNICATION AND PERMISSION OF SUPERVISING INSTRUCTOR

CEM517 Television News Reporting
3 credits Fall & Spring Semester
PREREQUISITE: CEM 245 AND CEM 317 FOR UNDERGRADUATE STUDENTS. PERMISSION OF INSTRUCTOR FOR GRADUATE STUDENTS.

CEM527 Television Newscast
3 credits Fall & Spring Semester
PREREQUISITE: CEM 417 OR CEM 517

CEM531 Audio Production Techniques
3 credits Offered By Announcement Only
Writing, preparation, and production of material for auditory presentation, live or recorded, broadcast on open or closed circuit radio systems. Familiarization with magnetic and optical recording procedures, both double and single system sound, in television and motion picture production is discussed. Lecture and laboratory are included.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CEM534 Practicum in Communication
3 credits Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

CEM535 Telecommunication Systems
3 credits Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

CEM592 Special Topics in Electronic Media
3 credits Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND PROGRAM DIRECTOR

CEM599 Advanced Projects and Directed Research
1-6 credits Fall & Spring Semester & First & Second Summer Session
Individual study. Course may be repeated for a maximum of six credits.
PREREQUISITE: PERMISSION OF SUPERVISING INSTRUCTOR
CNJ111 Introduction to News Media Writing  
3 credits  
Fall & Spring Semester  
Principles and practices in journalism for the mass communication media.  

CNJ216 News Reporting and Writing  
3 credits  
Fall & Spring Semester & First Summer Session  
Practice in gathering material for and preparation of stories.  
PREREQUISITE: CNJ 111. STUDENTS TRANSFERRING CREDIT FOR CNJ 111 MUST PASS THE ENGLISH-LANGUAGE SKILLS AND TYPING TESTS REQUIRED FOR CNJ 111  

CNJ300 Journalism Practicum  
1- 3 credits  
Fall & Spring Semester  
Prescribed study and supervised work with faculty and staff of the student newspaper or related news media. Students receive first-hand knowledge and experience in a working news environment.  
PREREQUISITE: PERMISSION OF THE PRACTICUM SUPERVISOR  

CNJ303 Mass Media Law  
3 credits  
Fall & Spring Semester & First Summer Session  
Study of defamation, right of privacy, journalists’ privilege, advertising law, constitutional guarantees, and Communications Act guarantees.  
PREREQUISITE: ONE OF THE FOLLOWING: CAD 232, CNJ 216, OR CPR 232. STUDENTS MAY NOT TAKE BOTH CNJ 303 AND CEM 302 FOR CREDIT  

CNJ319 History of Journalism  
3 credits  
Fall Semester  
The development and impact of American journalism.  

CNJ381 Newspaper Editing and Layout  
3 credits  
Fall Semester  
Introduction to electronic editing and development of skills in copy editing, headline writing, picture editing, and newspaper layout.  
PREREQUISITE: CNJ 216  

CNJ382 Publication Planning and Editing  
3 credits  
Offered By Announcement Only  
Procedures for designing and publishing company publications, trade, general and special interest magazines, newsletters and web sites.  
PREREQUISITE: CNJ 216  

CNJ401 Editorial Interpretation of Contemporary Events  
3 credits  
Offered By Announcement Only  
Critical examination of fundamental issues in public life. Preparation of editorials and interpretive articles for mass media are included.  
PREREQUISITE: SENIOR STANDING OR PERMISSION OF THE INSTRUCTOR
CNJ441 Business Reporting
3 credits Offered By Announcement Only
A study of the major types and styles of business news and feature stories with emphasis on understanding business culture, values, and terminology.
PREREQUISITE: CNJ 216 OR PERMISSION OF THE INSTRUCTOR

CNJ442 Online Journalism
3 credits Offered By Announcement Only
A study of the issues, skills and practices related to the online presentation of news and information in a convergent media environment.
PREREQUISITE: CNJ 216 OR PERMISSION OF THE INSTRUCTOR

CNJ444 Public Affairs Reporting
3 credits Fall Semester
Emphasis on reporting, writing and analysis about institutions, issues and actions of local government, and their effects on society.
PREREQUISITE: CNJ 216, CNJ 303 AND JUNIOR STANDING

CNJ445 In-depth Journalism and Media Convergence
3 credits Fall & Spring Semester
A capstone experience that requires students to use effectively their full range of journalistic knowledge, newsgathering, and writing skills to prepare news and information for different media platforms.
PREREQUISITE: CNJ 216, CNJ 303 OR CEM 302, SENIOR STANDING, MAJOR IN PRINT, BROADCAST, VISUAL JOURNALISM, OR PERMISSION OF THE INSTRUCTOR

CNJ446 Travel Writing
3 credits Offered By Announcement Only
A study of the major types and styles of travel news and features stories for newspapers, magazines, newsletters, and web sites.
PREREQUISITE: CNJ 216 OR PERMISSION OF THE INSTRUCTOR

CNJ461 Seminar in News Ethics and Problems
3 credits Spring Semester
Ethical, practical, and professional problems of news communicators in society.
PREREQUISITE: SENIOR STANDING IN JOURNALISM, BROADCAST JOURNALISM, VISUAL JOURNALISM, PUBLIC RELATIONS, OR PERMISSION OF INSTRUCTOR

CNJ495 Internship in Newspaper/Magazine/Web site
1-3 credits Fall & Spring Semester & First & Second Summer Session
Prescribed study and supervised work with professionals in newspapers, magazines, web sites, or related news media.
PREREQUISITE: CNJ 303, ADVANCED JUNIOR STANDING, MAJOR IN COMMUNICATION, CUMULATIVE GPA OF 2.5 IN ALL COURSES OFFERED IN COMMUNICATION, AND PERMISSION OF THE INSTRUCTOR

CNJ499 Projects and Directed Research
1-3 credits Fall & Spring Semester & First & Second Summer Session
Individual study. No more than three credits may be counted toward a Communication major or minor.
PREREQUISITE: 12 CREDITS IN COMMUNICATION AND PERMISSION OF SUPERVISING INSTRUCTOR
CNJ510 Comparative Media Systems
3 credits Offered By Announcement Only
This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ511 Global Media
3 credits Offered By Announcement Only
An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ513 Computer-Assisted Reporting
3 credits Offered By Announcement Only
Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.
PREREQUISITE: CNJ 216 OR PERMISSION OF INSTRUCTOR

CNJ515 Reporting and the Internet
3 credits Offered By Announcement Only
Overview of uses of online computer services for newsgathering and distribution with emphasis on the Internet.
PREREQUISITE: CNJ 216 OR PERMISSION OF INSTRUCTOR

CNJ517 International Journalism
3 credits Offered By Announcement Only
PREREQUISITE: COM 601

CNJ522 Principles of Interactive Design
3 credits Fall Semester
This is an advanced multimedia design course that focuses on techniques and methods to create the best user experience in multimedia journalism projects.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ523 Sports Reporting
3 credits Offered By Announcement Only
An analysis of sports journalism that will develop students' skills in sports reporting and sports writing. Discussions range across the entire field of sports reporting, including broadcasting, but the greatest emphasis is concentrated on sports reporting and writing for newspapers and magazines.
PREREQUISITE: CNJ 216 OR PERMISSION OF INSTRUCTOR

CNJ544 Feature Writing
3 credits Offered By Announcement Only
Analyzing and writing feature articles for magazines, newspapers, and other news media.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ595 Special Topics in Journalism
3 credits Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR
CNJ599 Advanced Projects and Directed Research
1-6 credits Fall & Spring Semester & First & Second Summer Session
Individual study. Course may be repeated to a maximum of six credits.
PREREQUISITE: PERMISSION OF SUPERVISING INSTRUCTOR

MOTION PICTURES

CMP103 Survey of Motion Pictures
3 credits Fall & Spring Semester & First Summer Session
Examination of the aesthetic, social, and economic aspects of the motion picture industry. Concentration on the present state of the medium with particular emphasis on future trends.

CMP126 Introduction to Screenwriting
3 credits Fall & Spring Semester & First & Second Summer Session
Creation and formatting of narrative material for motion pictures. Emphasis on writing the short film.
PREREQUISITE: CMP 103 OR CEM 102 AND ENG 106

CMP151 Introduction to Digital Production
3 credits Fall & Spring Semester & First Summer Session
Lectures and laboratory work to acquaint the student with the basic techniques of motion pictures. Digital equipment is used to develop an understanding of the motion picture as a creative tool of communication and expression.

CMP204 History of International Cinema I
3 credits Fall Semester & First Summer Session
Examination of the origin and history of the motion picture. Narrative and non-fiction genres in the American and world cinemas from their inception through 1940 are discussed.

CMP205 History of International Cinema II
3 credits Spring Semester & Second Summer Session
Examination of the history of the motion picture from 1941 to the present. Narrative and non-fiction genres in the American and world cinemas are included.

CMP251 Motion Picture Workshop: Storytelling
3 credits Fall & Spring Semester & Second Summer Session
The practice of the grammar of cinematic language including shot selection, composition, pacing, story clarity, performance, pre-visualization and pre-planning for the creation of short narrative projects. Through critiques, students encounter and interact with an audience of their peers. This course requires students to master contemporary technology in use in the profession.
PREREQUISITE: CMP 151

CMP326 Intermediate Screenwriting
3 credits Fall & Spring Semester & Second Summer Session
Study of, and practice in, writing feature length, narrative motion pictures. Development of story line in treatment form, attention to cinematic structure, the development of character, and its presentation on screen is discussed.
PREREQUISITE: CMP 126

CMP329 Writing for Series Television
3 credits Fall Semester
An introduction to the structures and techniques of writing situation-comedy and dramatic series television.
PREREQUISITE: CMP 126
CMP351 Introduction to Film Production
3 credits                     Fall & Spring Semester
Introduction to key set crew positions through lectures, exercises and the production of a collective narrative assignment. Students are required to master contemporary and traditional technology in use in the profession including 16mm cameras and synch sound recording.
PREREQUISITE: CMP 103, CMP 126, CMP 151, CMP 204, CMP 205, AND CMP 251

CMP353 Post Production Sound Editing and Design
3 credits                     Fall & Spring Semester
Post production sound editing and design is a seminar/workshop that provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course explores the process from production recording through the final mix.
PREREQUISITE: CMP 351 AND PERMISSION OF INSTRUCTOR

CMP356 Cinematography
3 credits                     Fall Semester
An overview of the cinematographer's process from script to screen. Working with camera, lighting, and grip equipment on exercises and projects is discussed.
PREREQUISITE: CMP 351

CMP357 Editing
3 credits                     Fall Semester
Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students' understanding of aesthetic, and technical considerations in the art of dramatic editing.
PREREQUISITE: CMP 351

CMP359 Motion Graphics, Compositing and Animation
3 credits                     Fall Semester
This course is an introduction to 2D animation, motion graphics and compositing techniques. All essential technical and aesthetic possibilities are explored in a series of projects. All projects are designed to provide the student with a thorough grounding in contemporary professional practices.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CMP364 Business of Motion Pictures
3 credits                     Fall & Spring Semester
An examination of the industry's three part structure-production, distribution and exhibition. Consideration given to intellectual property, motion picture "creative accounting" and changes affected by new technologies. Surveys both studio films and independents.
PREREQUISITE: CMP 103, CMP 151

CMP386 Online Screenwriting
3 credits                     Fall & Spring Semester & First & Second Summer Session
The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.
PREREQUISITE: PERMISSION OF INSTRUCTOR
CMP394 Special Topics in Motion Pictures
3 credits
Fall & Spring Semester
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: CMP 204, CMP 205 OR PERMISSION OF INSTRUCTOR

CMP395 Directing Techniques I
3 credits
Fall & Spring Semester
To teach the craft of directing through exercises, screen work, and readings.
PREREQUISITE: CMP 251

CMP401 Nonfiction Film and Digital Media
3 credits
Fall Semester
An examination of American and world nonfiction films and media.
PREREQUISITE: CMP 151 OR PERMISSION OF INSTRUCTOR

CMP403 Film Directors
3 credits
Fall Semester
The study of the film authorship through a focus on specific directors.
PREREQUISITE: CMP 204 AND 205, NON-MAJORS BY PERMISSION OF INSTRUCTOR

CMP404 Aspects of Contemporary Cinema
3 credits
Spring Semester
Study of contemporary movements in American and world cinemas.
PREREQUISITE: CMP 204 AND 205, NON-MAJORS BY PERMISSION OF INSTRUCTOR

CMP406 Genres
3 credits
Offered By Announcement Only
Study of selected genres from a variety of critical perspectives. Issues pertaining to methodologies of defining and categorizing film are discussed.
PREREQUISITE: CMP 204 AND 205, NON-MAJORS BY PERMISSION OF INSTRUCTOR

CMP407 National Cinemas
3 credits
Offered By Announcement Only
Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social, political and cultural contexts.
PREREQUISITE: CMP 204 AND 205, NON-MAJORS BY PERMISSION OF INSTRUCTOR

CMP408 Women, Media, and Popular Culture
3 credits
Offered By Announcement Only
Examination of film, media, and gender representation from the perspective of feminist theory and cultural studies. Students explore the many ways that women have been portrayed, and how they have portrayed themselves, within popular culture.
PREREQUISITE: CMP 204 OR CMP 205, NON-MAJORS BY PERMISSION OF INSTRUCTOR

CMP426 Advanced Screenwriting
3 credits
Spring Semester
A continuation of CMP 326. Study of, and practice in, writing feature length, narrative motion picture scripts. Attention is given to cinematic structure, the development of character, and its presentation on screen. Emphasis is placed on bringing the script to a completed draft.
PREREQUISITE: CMP 326
CMP429 Advanced Television Writing  
3 credits  
Spring Semester  
This course explores how to create, format, and write the original Television Pilot and treatment. The class will cover TV pilot format, length, structure as well as techniques in creating TV characters and situations for both comedy and dramatic episodic TV.  
PREREQUISITE: CMP 329

CMP451 Motion Picture Practicum  
3 credits  
Fall & Spring Semester  
The theory and practice of motion pictures production from script to screen. Lecture and laboratory. Students will develop and produce a narrative, a documentary, or an experimental work of their choice.  
PREREQUISITE: CMP 351 AND PERMISSION OF INSTRUCTOR

CMP455 Producing the Motion Picture.  
3 credits  
Spring Semester  
A practical examination of the development, production and marketing responsibilities involved in producing theatrical feature films. Focus is placed on the process including the ethical considerations that confront the producer.  
PREREQUISITE: JUNIOR STANDING AND 12 MOTION PICTURE CREDITS.

CMP456 Advanced Cinematography  
3 credits  
Spring Semester  
Advanced work with camera, lighting, and grip equipment on exercises and projects.  
PREREQUISITE: CMP 356 OR PERMISSION OF INSTRUCTOR

CMP457 Advanced Editing  
3 credits  
Spring Semester  
Advanced concepts in aesthetics and theories of picture and sound editing, mixing, color correction, and finishing techniques.  
PREREQUISITE: CMP 357 OR PERMISSION OF INSTRUCTOR

CMP458 Documentary Production  
3 credits  
Fall & Spring Semester & First Summer Session  
Students produce two short digital documentaries and explore various approaches to the documentary film.  
PREREQUISITE: CMP 151 OR PERMISSION OF INSTRUCTOR

CMP459 Advanced Motion Graphics, Compositing, and Animation  
3 credits  
Fall & Spring Semester  
This is an advanced animation, compositing, and motion graphics workshop in which students will design a three to five minute production from script to final product.  
PREREQUISITE: CMP 359, EEN 596, OR PERMISSION OF INSTRUCTOR

CMP462 Motion Picture Marketing and Distribution  
3 credits  
Fall Semester  
Economic and marketing considerations in the production and distribution of motion pictures.  
PREREQUISITE: CMP 364
CMP465 Producing the Motion Picture
3 credits  
Fall Semester
A practical examination of the development, production and marketing responsibilities in producing theatrical feature films. Focus is placed on the processes involved including the ethical considerations that confront the producer.
PREREQUISITE: CMP 364

CMP469 Legal Aspects of Motion Pictures
3 credits  
Spring Semester
The law, contracts, and negotiating techniques of the business affairs aspect of the production of motion pictures.
PREREQUISITE: CMP 364

CMP489 Projects in Screenwriting
3 credits  
Fall & Spring Semester
Individual study. This course and CMP 499 cannot count for more than three credits towards a Communication major or minor.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CMP494 Motion Picture Internship
1-3 credits  
Fall & Spring Semester & First & Second Summer Session
Prescribed study and supervised work with practitioners in motion pictures.
PREREQUISITE: SENIOR OR JUNIOR STANDING, ADMISSION TO MAJOR IN MOTION PICTURES, CUMULATIVE GPA OF 2.5 IN ALL COURSES OFFERED FOR COMMUNICATION MAJOR.

CMP499 Projects and Directed Research
1-3 credits  
Fall & Spring Semester & First & Second Summer Session
Individual study. No more than three credits may be counted toward a Communication major or minor.
PREREQUISITE: 12 CREDITS IN COMMUNICATION AND PERMISSION OF SUPERVISING INSTRUCTOR.

CMP501 Principles of Aesthetics and Analysis
3 credits  
Fall Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP503 Film Directors
3 credits  
Fall Semester
This course will address the conditions of authorship in film through an intensive study of the films of two or more directors, whose careers will serve as case studies. These directors will be historically important and their work will represent significant achievements in the art of film.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

CMP504 Aspects of Contemporary Cinema
3 credits  
Offered By Announcement Only
The study of the ways in which film communicates. Intensive analysis and criticism of cinematic techniques exemplified through particular films.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

CMP506 Genres
3 credits  
Offered By Announcement Only
A study of selected movie genres from a variety of critical perspectives. Issues pertaining to selfhood, sexual difference, and other concerns of present-day film criticism will be examined.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR
CMP507 National Cinemas  
3 credits Spring Semester  
Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social/political and cultural contexts.  
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

CMP509 Legal Aspects of Motion Pictures  
3 credits Spring Semester  
The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.  
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF THE DIRECTOR OF THE MOTION PICTURE PROGRAM

CMP510 Foundation of Screenwriting  
3 credits Fall Semester  
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP511 Writing the Short Film  
3 credits Offered By Announcement Only  
PREREQUISITE: CMP 510, LIMITED TO MFA CANDIDATES

CMP520 Cinematography  
3 credits Fall Semester  
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP529 Nonfiction Film  
3 credits Offered By Announcement Only  
An examination of American and world nonfiction films.  
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

CMP530 Introduction to Editing  
3 credits Spring Semester  
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP550 Production Workshop I - Narrative  
3 credits Spring Semester  
Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design and green screen.  
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP551 Advanced Motion Graphics and Compositing  
3 credits Spring Semester  
Extend the 2D skills of students who have taken CMP 550 to 3D motion graphics and animation. Emphasis on title design and animation.  
PREREQUISITE: CMP 550 OR PERMISSION OF INSTRUCTOR

CMP552 Motion Picture Marketing and Distribution  
3 credits Fall Semester  
Economic and marketing considerations in the production and distribution of motion pictures.  
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF THE DIRECTOR OF THE MOTION PICTURE PROGRAM
MOTION PICTURES

CMP553 Advanced Motion Picture Marketing
3 credits
Offered By Announcement Only
Advanced marketing considerations in the distribution of motion pictures.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

CMP558 Documentary Production
3 credits
Offered By Announcement Only
An introduction to the documentary genre including the production of a documentary from start to finish.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

CMP560 Directing the Actor
3 credits
Fall Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP566 Character and Dialogue
3 credits
Offered By Announcement Only
An examination of the craft and techniques of creating original characters and dialogue.
PREREQUISITE: MFA SCREENWRITING STATUS OR PERMISSION OF INSTRUCTOR

CMP570 Producing the Motion Picture
3 credits
Spring Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP586 Online Screenwriting
3 credits
Fall & Spring Semester & First & Second Summer Session
The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CMP594 Special Topics in Motion Picture
3 credits
Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CMP595 Directing Techniques
3 credits
Fall & Spring Semester
To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.
PREREQUISITE: CMP 251 OR PERMISSION OF INSTRUCTOR

PUBLIC RELATIONS

CPR116 Principles of Public Relations
3 credits
Fall & Spring Semester
History, organization, ethics, law, and practice of public relations.

CPR202 Design Principles and Techniques
3 credits
Fall & Spring Semester
Introduction to graphic design for communication media and use of computer software as layout and design tools. Selection, preparation, and study of design principles and production processes for typography, photography, art work, and white space.
PREREQUISITE: CPR 116 OR PERMISSION OF INSTRUCTOR
CPR232 Writing for Public Relations  
3 credits                                                    Fall & Spring Semester  
Principles and techniques for the development of creative strategies, concepts, and writing of effective public relations messages for all types of media.

CPR311 Public Relations Research  
3 credits                                                    Fall & Spring Semester  
Public relations research techniques focusing on applications of strategic planning, message evaluation, opinion research, and theory testing of public relations programs. Emphasis on qualitative and quantitative methods and data analysis.  
PREREQUISITE: ADMISSION TO MAJOR OR PERMISSION OF INSTRUCTOR

CPR346 Advanced Public Relations Writing and Design  
3 credits                                                    Fall & Spring Semester  
Preparation, execution, and production of visual messages for public relations media.  
PREREQUISITE: CPR 116, CPR 202 AND CPR 232 OR PERMISSION OF INSTRUCTOR

CPR380 Public Relations Internship  
1- 3 credits                 Fall & Spring Semester & First & Second Summer Session  
Supervised activities in public relations. No more than 3 credits of internship may be used toward the major. Not a required course.  
PREREQUISITE: AT LEAST SECOND-SEMESTER JUNIOR, ADMISSION TO THE MAJOR, AND PERMISSION OF PROGRAM DIRECTOR.

CPR416 Public Relations Ethics  
3 credits                                              Offered By Announcement Only  
Ethical concepts and issues pertaining to individuals and society with application to advertising and public relations. Case studies focus on professional and personal ethics based on traditional teaching, modern codes, and other guidelines.  
PREREQUISITE: ADMISSION TO MAJOR AND PERMISSION OF INSTRUCTOR

CPR436 Public Relations Campaigns  
3 credits                                                    Fall & Spring Semester  
The capstone course for seniors in their last year of study. Theory and principles, audience research, strategic planning, and targeted communication are applied in developing a campaign to influence attitudes and behavior on behalf of a real client. A written plan, professional presentation, and teamwork are emphasized.  
PREREQUISITE: ADMISSION TO MAJOR; CPR 311, CPR 346, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR

CPR490 Special Topics in Public Relations  
3 credits                                                    Fall & Spring Semester  
This course subject matter varies according to announced special topic. See class schedule for details.  
PREREQUISITE: ADMISSION TO MAJOR, JUNIOR STANDING, PERMISSION OF INSTRUCTOR AND PROGRAM DIRECTOR

CPR499 Projects and Directed Research in Public Relations  
1- 3 credits                 Fall & Spring Semester & First & Second Summer Session  
Individual study. No more than three credits may be counted toward a Communication major or minor.  
PREREQUISITE: ADMISSION TO MAJOR, JUNIOR STANDING, PERMISSION OF INSTRUCTOR AND PROGRAM DIRECTOR
CPR517 Media Relations
3 credits  Fall & Spring Semester & First Summer Session
The practice of media relations within the public relations milieu.
PREREQUISITE: ADMISSION TO MAJOR, CPR 311, SENIOR STANDING OR PERMISSION OF INSTRUCTOR

CPR582 International Public Relations
3 credits  Fall & Spring Semester
History, theory, and practice of public relations in a global, multi-cultural environment.
PREREQUISITE: ADMISSION TO MAJOR, SENIOR STANDING OR PERMISSION OF INSTRUCTOR

CPR584 Public Relations Management
3 credits  Spring Semester
Principles and practice of public relations management in a variety of contexts including agency, consultancy, corporate, and nonprofit.
PREREQUISITE: ADMISSION TO MAJOR, CPR 311, AND SENIOR STANDING OR PERMISSION OF INSTRUCTOR

CPR590 Special Projects: Public Relations
3 credits  Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: ADMISSION TO THE MAJOR, CPR 311, SENIOR STANDING, PERMISSION OF INSTRUCTOR, AND PERMISSION OF PROGRAM DIRECTOR

CPR599 Advanced Projects and Directed Research in Public Relations
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Individual study. May be repeated to a maximum of six credits.
PREREQUISITE: ADMISSION TO MAJOR, CPR 311, SENIOR STANDING, PERMISSION OF SUPERVISING INSTRUCTOR, AND PERMISSION OF PROGRAM DIRECTOR

VISUAL JOURNALISM
CVJ106 Visual Design
3 credits  Fall & Spring Semester
This course is a project-based introduction to design. Emphasis will be placed on visual concepts and graphic design for multimedia. Students will be introduced to various software packages to design and integrate interaction into their projects. Topics covered include preparing existing content for multimedia journalism, animation, layout for interactive media, typography, photography, and usability.

CVJ209 Introduction to Multimedia Storytelling
3 credits  Fall & Spring Semester
This course is a lab-lecture course that introduces students to the concepts of visual storytelling and teaches skills needed to gather information in the visual storytelling process. Students work in teams with still photography, video, and audio-gathering devices to document community life.
PREREQUISITE: CVJ 106; COREQUISITE: CVJ 221

CVJ221 Introduction to Documentary Photography
3 credits  Fall & Spring Semester
Introduction to photojournalism is a course designed to help you develop the skills needed to produce successful images and recognize what makes good photographs in terms of content, composition, and technical quality. The course will help you acquire and develop the intellectual, analytical, and technical skills needed to become strong visual storytellers. Students are required to have a 35 mm camera.
PREREQUISITE: CVJ 106 OR PERMISSION OF INSTRUCTOR; COREQUISITE: CEM 245 OR CMP151
CVJ309 Database Journalism
3 credits
Spring Semester
This course teaches data analysis and interactive deployment of the World Wide Web and other digital platforms. Students will learn to analyze data for journalistic work and will be expected to create and deploy database-driven applications.
PREREQUISITE: CVJ 106, CVJ 209, CVJ 221, CVJ 341, OR PERMISSION OF INSTRUCTOR

CVJ331 Information Graphics and Visualization
3 credits
Fall & Spring Semester
This is an introduction to informal graphic procedures and practices as they pertain to print and online media. Layout and design, typography, mechanical production techniques, and production vocabulary will be an integral part of this course.
PREREQUISITE: CVJ 106, CVJ 209, CVJ 221, CVJ 341 OR PERMISSION OF INSTRUCTOR

CVJ341 Web Design
3 credits
Fall & Spring Semester
This course covers the basic aspects of interaction design and web development, focusing on production processes. It provides an overview of web design concepts including usability, accessibility, information architecture, basic animation, and graphic design; all discussed in the context of the web environment. This course further offers an introduction to fundamental and emerging web trends.
PREREQUISITE: CVJ 106 OR CAD 102 OR CPR 202, OR PERMISSION OF INSTRUCTOR

CVJ361 Advanced Documentary Photography
3 credits
Fall & Spring Semester
Advanced Photojournalism is a class designed to improve the visual storytelling, newsgathering, and photographic technical skills introduced in the intro to Photojournalism class. Students will be expected to integrate into the community to make contacts and develop story ideas worthy of visual documentation. The class will explore how quality photojournalism has the potential to affect change in a community, a country, and beyond.
PREREQUISITE: CVJ 221, CEM 245 OR CMP 151, OR PERMISSION OF INSTRUCTOR

CVJ396 Special Topics in Visual Journalism
3 credits
Fall & Spring Semester
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CVJ409 Advanced Feature Design
3 credits
Fall Semester
Advanced newspaper, magazine, and electronic design. Students will develop the skills necessary to produce strong visual packages combining type, photography, artwork, and white space. The course will cover advanced design and traditional reproduction techniques for art and copywriting as well as on-line presentations.
PREREQUISITE: CVJ 106, CVJ 209, CVJ 221, CVJ 341, CVJ 331

CVJ419 Interactive Storytelling
3 credits
Fall & Spring Semester
This course explores how storytelling is reinventing itself utilizing the new digital communication tools available. It will cover linear and non-linear storytelling techniques and production processes. (Capstone)
PREREQUISITE: CVJ 106, CVJ 209, CVJ 221, CVJ 341
CVJ422 Programming for Interactivity
3 credits  Fall & Spring Semester
This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories. Programming taught in this class caters specifically for non-programmers who want to learn how to present their work online in an interactive manner.
PREREQUISITE: CVJ 209, CVJ 341, CVJ 419, OR PERMISSION OF INSTRUCTOR

CVJ435 Video Journalism
3 credits  Fall Semester
An advanced visual journalism course to develop skills in video pre-production, production, and post-production with special emphasis on documentary approaches for on-line media.
PREREQUISITE: CVJ 209, CVJ 106, CVJ 221, CVJ 341, CVJ 361

CVJ496 Internship in Visual Journalism
1-3 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: JUNIOR STANDING AND PERMISSION OF INSTRUCTOR

CVJ499 Projects and Directed Research
1-3 credits  Fall & Spring Semester
PREREQUISITE: SENIOR STANDING AND PERMISSION OF INSTRUCTOR

CVJ519 Interactive Storytelling
3 credits  Spring Semester
Digitization allows us to merge several forms of media that were not connected in the past. This course is intended as an exploration of how storytelling is re-inventing itself utilizing the new digital communication tools available to us today. This course will cover linear and non-linear storytelling techniques and production processes.
PREREQUISITE: CVJ 521, CVJ 522, CVJ 530, OR PERMISSION OF INSTRUCTOR

CVJ521 Seminar in Visual Storytelling
3 credits  Fall Semester
An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR

CVJ522 Interaction Design and Information Visualization
3 credits  Fall Semester
The course will require an advanced use of typography, architecture of design, and creative style for layout and design for the print or online media. This is a portfolio design class. Each student will concentrate on an area of specialty within print or electronic design. All portfolios will be reviewed by outside art and design directors.
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR

CVJ530 Programming for Interactivity
3 credits  Fall Semester
This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories.
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR
CVJ531 Database Journalism
3 credits Fall Semester
This course teaches data analysis and interactive deployment of data of the World Wide Web and other digital platforms.
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR

CVJ541 Advanced Audio Video Narratives
3 credits Spring Semester
This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.
PREREQUISITE: CVJ 521 OR PERMISSION OF INSTRUCTOR

CVJ550 3D Design and Graphics
3 credits Spring Semester
This course develops informational graphic procedures and practices as they pertain to print and online media, specifically in the context of news and journalism.
PREREQUISITE: GRAD STATUS OR PERMISSION OF INSTRUCTOR

CVJ551 Advanced Programming
3 credits Second Summer Session
This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zend and Symfony will also be covered in the class.
PREREQUISITE: CVJ 530, CVJ 521, CVJ 522, PERMISSION OF INSTRUCTOR

CVJ560 Team Multimedia Project
1- 3 credits Second Summer Session
Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, infographic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.
PREREQUISITE: CVJ 530, CVJ 521, CVJ 522, COM 601, COM 603, CNJ 614 OR PERMISSION BY INSTRUCTOR

CVJ596 Special Topics in Visual Journalism
1- 6 credits Fall & Spring Semester
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR
CVJ599 Advanced Projects and Directed Research

3 credits

PREREQUISITE: PERMISSION OF SUPERVISING INSTRUCTOR

Fall & Spring Semester
EPS201 Psychosocial Change and Well-being  
3 credits  
Fall & Spring Semester  
Explores the integration of individual, organizational, and community approaches to the promotion of health and well-being. Emphasis will be placed on real-life applications in multiple settings such as schools, workplaces, government, and non-government institutions.

EPS270 Lifespan Human Development  
3 credits  
Fall & Spring Semester  
Processes and theories of human development from birth to old age are explored. Areas to be covered include: physical development, cognitive development, social and personality development, moral development, and language development. Emphasis is placed on development as a life-long process and its importance in understanding human behavior.

EPS280 Introduction to Family Studies: Dating, Coupling, Parenting  
3 credits  
Fall & Spring Semester  
Theory and practice of romantic relationships and parent-child relationships, including discussion and skills building. Research based information on how to maximize the quality of these interpersonal relationships will be examined.

EPS291 Community and Character Development  
3 credits  
Spring Semester  
The course covers moral and psychological dimensions pertaining to character development as it occurs in communities. Topics include contemporary theory and research regarding perspectives on virtue and morality, states of character, ethical decision making, and character development. The reciprocal relationships between character and community will be a central theme in exploring ethical issues that arise in working with individuals, institutions, and communities. Theory and research will be linked to relevant applications.

EPS304 Mentored Research Studies  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Under the guidance of EPS faculty and graduate students, undergraduate students will have an opportunity to get involved in various components of research study; gain valuable knowledge and research experience; and expand their undergraduate academic experience.  
PREREQUISITE: SIGNED PERMISSION OF HSD FACULTY MEMBER AGREEING TO SERVE AS A RESEARCH MENTOR. SOPHOMORE STANDING OR ABOVE (CAN BE WAIVED AT THE DISCRETION OF THE SUPERVISOR)

EPS306 Insanity and Humanity: Mental Illness, Society, Stigma and Services  
3 credits  
First Summer Session  
The genesis for this course was the generally poor, inaccurate and stigmatized understanding of mental illness in society based on portrayals in popular media including Hollywood produced films. However, over the past several years the depth and accuracy of awareness and knowledge has changed, as the depiction of mental illness and treatment services in films has improved and the availability of narrative accounts has increased. This course is designed to allow Human and Social Development majors, with a particular interest in wellness and human services, to explore varying portrayals of mental illnesses in popular media. The course will foster critical analysis of narrative and film depictions of illness, as well as connect these depictions to a broader narrative on stigma, social determinants of illness and wellness, prevention and intervention.  
PREREQUISITE: TBD
EPS311 Group Processes and Development
3 credits
Fall Semester
Research findings concerning the nature of small groups and patterns of behavior associated with them are explored. Students experience an ongoing group process to which theories and concepts can be applied. Emphasis is placed on learning to be a participant observer of group behavior and processes, learning about one's own behavior in groups, and developing skills to be a more effective member and leader in task groups.

EPS321 Understanding Human Service Organizations
3 credits
Fall Semester
Focus on unique role of community-based human service organizations in society with an overview and history of community organizations, which provide services, support, advocacy, and organizing in today's communities. Review of the systems, cultures, structures, and processes of community organizations with a special emphasis on promoting well-being in communities. This course has a 10 hour field research experience requirement.
PREREQUISITE: EPS 201. PREREQUISITE OR COREQUISITE: EPS 311

EPS340 Psychology and Sociology of Sexual Identity
3 credits
Fall & Spring Semester
History, psychology, and sociology of gay, lesbian, and transgendered populations.
PREREQUISITE: PSY 110 OR SOC 101.

EPS351 Introduction to Statistics and Research Design
3 credits
Fall Semester
The course will cover basic statistics relevant to the social sciences (e.g., central tendency, variation, t-tests, and correlations), with emphasis on real world applications employing commonly used research designs. Students will acquire the tools necessary to interpret elementary statistical analyses and a foundation in the basic analytic methods used in conducting quantitative research in the behavioral sciences.
PREREQUISITE: MTH 101 OR ABOVE; EPS 201 (PREREQUISITE OR COREQUISITE)

EPS360 Educational Psychology
3 credits
Fall & Spring Semester & First & Second Summer Session
A review of basic educational psychology principles including cognitive and language development, personal, social and moral development, learning theories, and motivation. A review of basic concepts that contribute to effective learning and other aspects of education.
PREREQUISITE: SOPHOMORE STANDING OR PSY 110.

EPS361 Community Psychology & Development
3 credits
Fall Semester
Community psychology is about the prevention of psychosocial problems and the promotion of mental health and wellbeing through the creation of equitable and just social settings, neighborhoods, communities, and societies. Course topics include: stress & social support; oppression and human diversity; primary prevention, social intervention and health promotion; self-help; mediating structures; community mental health; alternative settings; community development and social change.
PREREQUISITE: EPS 201
EPS362 Introduction to Multiple Intelligence
3 credits  First & Second Summer Session
Students will be provided with an awareness of both the Multiple Intelligence Model and Brain Based Learning, through lectures, discussions, and exercises. The student will identify their learning styles in order to discuss strengths and deficits. Activities will be provided to enhance teaching and learning experiences. Creative writing exercises will be provided.

EPS420 Introduction to Counseling and Psychotherapy
3 credits  Spring Semester
This course is a survey of the theories and practical applications of counseling and psychotherapy. Students will acquire an understanding of a variety of theories of psychotherapy, the basic requirements and skills for effective, ethical counseling, and an appreciation for the role of values and human differences in counseling and psychotherapy. This course does not prepare students for practice in mental health professions.
PREREQUISITE: PSY 110 OR EPS 201; EPS 270 OR EQUIVALENT (PREREQUISITE OR COREQUISITE); SOPHOMORE STANDING OR ABOVE.

EPS422 Foundation of Human service Work and Program Administration
3 credits  Fall Semester
An overview of populations and professional roles in human services and mental health settings. The skills, processes and outcomes for developing and sustaining healthy human services settings are reviewed. Students will learn about prevention, resilience, and multicultural issues and acquire skills for becoming effective workers and leaders in community-based agencies. The course will consist of readings, presentations and role-playing related to social and institutional dynamics.
PREREQUISITE: EPS 201; EPS 311; EPS 321; PREREQUISITE OR COREQUISITE: EPS 361

EPS452 Applied Research and Program Evaluation
3 credits  Spring Semester
This course will cover the scholarly knowledge and skills required to engage in applied community research. Topics will cover applied research theories, practices and designs: quantitative, qualitative, and mixed methods; and program evaluation and needs assessment. Students will learn how to conduct applied research and how to evaluate programs and social interventions in organizations and communities.
PREREQUISITE: EPS 201; EPS 351

EPS462 Community Consultation and Leadership
3 credits  Fall Semester
This course will cover strength based, preventive, empowering approaches to institutional and community change, and will address related skills, stages, processes and outcomes; Conflict resolution, facilitation, strategic planning, visioning, advocacy, change management, and community mobilization will be studied and practiced in class.
PREREQUISITE: EPS 201; EPS 311; EPS 321. PREREQUISITE OR COREQUISITE: EPS 361

EPS470 Listening and Helping Skills.
3 credits  Fall Semester
Listening and Helping Skills is an introductory course to the foundational skills used in helping relationships. Through lectures, discussions and role-plays, students will learn the rationale behind basic helping skills and their application to diverse settings and contexts.
PREREQUISITE: EPS 201 OR PSY 110; EPS 270 OR EQUIVALENT (PREREQUISITE OR CO-REQUISITE); SOPHOMORE STANDING OR ABOVE
EPS471 Human and Social Development Practicum  
3-6 credits  
Spring Semester  
The practicum serves an integrative function: it allows students to apply their academic training, to further develop their career goals, and to hone their skills while gaining experience in real-world settings. Practica are unpaid, supervised experiences. Students choose from a menu of settings that have been approved as HSD practicum sites and spend a minimum of 100 hours (3 credits) or 200 hours (6 credits) at their chosen setting over the course of the semester. Must be taken concurrently with EPS 481.  
PREREQUISITE: EPS 201; EPS 311; EPS 321; EPS 361; EPS 422. CO-REQUISITES: EPS 481; JUNIOR STANDING OR ABOVE.

EPS481 Human and Social Development Practicum Seminar  
3 credits  
Spring Semester  
The practicum seminar brings theory and research to bear on the students' practicum experiences, and provides a forum for further professional skill development and growth. Students will complete a major project integrating their experiences.  
PREREQUISITE: EPS 201; EPS 311; EPS 321; EPS 361; EPS 422. COREQUISITE: EPS 471. JUNIOR STANDING OR ABOVE.

EPS499 INDIVIDUAL STUDY  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Individual work on a special project under faculty guidance.  
PREREQUISITE: PERMISSION OF DIRECTING FACULTY MEMBER AND DEPARTMENT CHAIRMAN.

EPS505 Lifespan Human Development  
3 credits  
Spring Semester  
Theories and research relating to the biophysical, cognitive, and psychosocial domains of human lifespan development.  
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

EPS506 Foundations of Mental Health Counseling  
3 credits  
Offered By Announcement Only  
Students will learn basic concepts and skills for mental health counselors in a multicultural world.  
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING.

EPS509 Field Studies in Education  
1-6 credits  
Fall & Spring Semester  
Individual study of a school or school system, identifying its strengths and weaknesses, and making positive recommendations.  
PREREQUISITE: APPROVAL OF ADVISOR.

EPS510 Professional, Legal and Ethical Issues in Counseling  
3 credits  
First Summer Session  
Professional, legal, ethical, and licensing issues in the counseling profession.  
PREREQUISITE: GRADUATE STANDING IN THE COUNSELING PROGRAM.

EPS511 Lifestyle and Career Counseling  
3 credits  
Spring Semester  
An introductory course in career development and career counseling, focusing on theories of career development, counseling tools, strategies, and sociological, economic, and psychological influences on the American worker.  
PREREQUISITE: EPS 513 OR PERMISSION OF INSTRUCTOR.
EPS512 Assessment Strategies for Counselors I
3 credits  
Spring Semester
This course places emphasis on diagnosis, appraisal, assessment, and testing for individual and interpersonal disorders. It addresses statistical procedures and psychometric principles necessary for responsible test use and exposes the student to a variety of test and non-test assessment techniques in marriage and family, and mental health counseling.
PREREQUISITE: GRADUATE STANDING IN COUNSELING PROGRAM.

EPS513 Counseling Process and Practice
3 credits  
Fall Semester
The development of basic communication and clinical skills necessary for establishing the counseling relationship and conducting therapy.
PREREQUISITE: GRADUATE STANDING IN COUNSELING PROGRAM.

EPS514 Psychosocial Bases of Social and Cultural Diversity
3 credits  
Fall Semester
Interrelationship between psychology and sociology in understanding development of diversity in human social systems. Implications for counseling and therapy.
PREREQUISITE: EPS 505 OR EQUIVALENT OR PERMISSION OF INSTRUCTOR.

EPS515 Dynamics of Marriage and Family Systems
3 credits  
Fall Semester
Introduction to the history and development of marriage and family systems theory as a method for understanding individuals' behavior and functioning. Introduction to several modes of family therapy. Throughout the course, lectures will also be integrated with other topics including race, culture, gender, sexual orientation, ability.
PREREQUISITE: GRADUATE STANDING IN COUNSELING PROGRAM OR PERMISSION OF INSTRUCTOR.

EPS526 Counseling in Community Settings
3 credits  
Fall Semester
Exploration of a variety of perspectives on community services relevant to mental health counselors. Topics include: the variety of community settings; community, national, and international diversity in mental health services; diversity of clients (e.g., cultures, religions, GLBT, elderly, social classes, disabilities); mental health funding; the role of politics, policy, advocacy, and research; interviewing across cultures.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

EPS531 Organization Development
3 credits  
Offered By Announcement Only
Techniques, strategies, and models of Organizational Development as they relate to various kinds of institutions. Simulations and actual interventions are stressed.

EPS533 Organization and Administration of Higher Education I
3 credits  
Fall Semester
Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.
EPS534 Theories of Supervision
3 credits
Offered By Announcement Only
Examination of the elements of human behavior involved in successful supervision of instruction. Survey of current supervisory practices in the schools. Consideration of leadership theory.

EPS539 Effective Teaching, Learning, Assessment & Curriculum in Higher Education
3 credits
Fall Semester & Second Summer Session
Provides an overview of current theories, research, and best practices in effective teaching, learning, assessment, and curricular design.
PREREQUISITE: PERMISSION OF INSTRUCTOR

EPS543 The Community College
3 credits
Offered By Announcement Only
An overview of American community colleges including historical evolution, purposes and functions, characteristics of students and faculty, organization and administration, curricula, current issues, and trends.

EPS544 Assessing Learning in the Community College
3 credits
Offered By Announcement Only
Assessment and analysis of learning processes and outcomes in higher education. Formative and summative assessment, data analysis and interpretation are included. Class activities include: lectures, group projects, collaborative learning experiences, reports, participation in assessment strategies, role playing, and demonstration of assessment techniques.

EPS545 Administration of Student Affairs
3 credits
First Summer Session
History and philosophy of student affairs will be addressed as well as principles and organization of student affairs administration, current problems, procedures, and recent developments.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EPS550 Educational Measurement and Evaluation
3 credits
Offered By Announcement Only
Basic principles of measurement as they apply to the construction of teacher-made tests and the selection and use of standardized tests. Attention is also given to the use of measurement instruments in connection with both formative and summative evaluation. Behavioral objectives are considered in the context of criterion-referenced and mastery tests.
PREREQUISITE: TAL 260 OR PERMISSION OF INSTRUCTOR.

EPS553 Introductory Statistics
3 credits
Fall Semester & Second Summer Session
Basic Statistical procedures will be discussed including measures of central tendency, variability and relationship, sampling, and basic tests of statistical significance.

EPS554 Essentials of Research in Social and Behavioral Sciences
3 credits
Fall Semester
Study of the standards methods and techniques of research in the behavioral and social sciences. Brief orientation to quantitative and qualitative procedures used in the analysis and interpretation of research data are emphasized.

EPS558 Community Youth Development
3 credits
First Summer Session
EPS565 Family Therapy with Ethnic Minority Families
3 credits
Offered By Announcement Only
A course in special issues and strategies in family therapy with minority populations focusing on African American and Hispanic clients.
PREREQUISITE: EPS 280 OR 515 OR 612 OR PERMISSION OF INSTRUCTOR.

EPS568 Computer Applications in Educational and Behavioral Science Research
3 credits
Offered By Announcement Only
An introduction to the use of microcomputer statistical packages in social science research, with emphasis given to SPSS for Windows. Course content will cover a broad range of activities encountered in the data analytic process including planning and creating a database, data coding, file manipulation tasks, data screening, and statistical analysis.
PREREQUISITE: EPS 553 OR EQUIVALENT WITH PERMISSION OF INSTRUCTOR.

EPS570 Basic skills in Counseling and Interviewing
3 credits
Spring Semester
Introductory course on essential skills used in counseling and interviewing. Through lectures, discussions, and small group exercises, students will explore their natural style of helping and learn effective listening and communication skills. This course is not intended to train students to become a professional counselor.
PREREQUISITE: ADMISSION IN THE HIGHER EDUCATION PROGRAM OR PERMISSION OF INSTRUCTOR

EPS590 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS591 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS592 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS593 Workshop in Education
3 credits
Fall & Spring Semester
Study in special interest areas in education.

EPS594 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS595 Workshop in Education
3 credits
Fall & Spring Semester
Study in special interest areas in education.

EPS596 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS597 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.
EPS598 Workshop in Education
1-3 credits offered by announcement only
Study in special interest areas in education.

EPS599 Workshop in Education
1-3 credits offered by announcement only
Study in special interest areas in education.

KINESIOLOGY & SPORTS SCIENCES
KIN100 Leadership, Management, and Ethics in Sports
3 credits second summer session
Students will gain an understanding of skills and philosophies of leadership, management, and ethic necessary for a position in the sport industry.
PREREQUISITE: SUMMER SCHOLAR STUDENTS ONLY.

KIN105 Introduction to Athletic Training and Sports Medicine
3 credits second summer session
In this practical, hands-on course, the students will learn to identify basic sport injuries that afflict the major joints of the body, and review basic methods to treat these injuries. The student will also learn how nutrition, improper biomechanics, and poor training can all impact sport performance. Plus, participants will be given the opportunity to learn and practice techniques or procedures (such as athletic taping or bracing) that may be useful in minimizing the incidence of injury.

KIN110 Explorations in Sports Medicine
3 credits second summer session
This class will consist of an introduction to the field of Sports Medicine and Exercise Science. Basic information relevant to appropriate exercise prescription, proper nutritional habits, implications on health, longevity and performance will be addressed. Hands-on practical experiences will supplement theoretical concepts learned in the classroom setting.

KIN120 Tennis
2 credits fall & spring semester
Theory, knowledge, skills, and practice in tennis. There is a $25.00 fee for balls, racquets and equipment associated with this class. For credit only.

KIN123 Swimming and Lifeguard Training
2 credits fall & spring semester
Theory and practice in teaching techniques in swimming and professional lifeguarding, including First Aid and CPR. Upon successful completion, students will be eligible for an American Red Cross Lifeguarding Certificate. There is a $60.00 fee associated with this class for American Red Cross Certification, books, and equipment. Credit only.
PREREQUISITE: PASS SWIMMING PRE-TEST. CREDIT ONLY.

KIN124 SCUBA
3 credits fall & spring semester
Basic scuba and open water "I" certification. Includes theory, practical instruction, open water dives, and NAUI certification. For credit only. There is a $65.00 scuba rental fee associated with this class.
PREREQUISITE: KIN 123 (FROMALLY ESS 123) OR EQUIVALENT.
KIN140 Introduction to Athletic Training
2 credits  Fall Semester
The application of athletic training practices in selected clinical education settings. The student must complete 150 hours of documented clinical educational hours, which apply toward the graduation requirement of 1000 hours. Clinical education hours will emphasize emergency procedures, first aid, and protective equipment. Successful completion of the retention process and formal admittance into the clinical portion of the Athletic Training Program.
PREREQUISITE: ATHT MAJORS ONLY. STUDENTS MUST HAVE A SOPHOMORE STATUS.

KIN141 Introduction to Athletic Training Lab
1 credit  Fall Semester
Introduction to clinical athletic training for the first year athletic training major. Hands on experience for the entry level athletic training student. Students will be required to complete a competencies check list with a passing grade. Clinical hours in the athletic training room will give the student the opportunity to use the knowledge, skills, and techniques learned in this course. The student must complete 70 clinical hours which are required for the application process to the Athletic Training Education Program. Student must be additionally enrolled in ESS 140. Fee $65.00 required for Lab.
PREREQUISITE: ATHT MAJORS ONLY. STUDENTS MUST HAVE A SOPHOMORE STATUS.

KIN145 Responding to Emergencies
2 credits  Fall Semester
Students will become familiar with accident, injury, and illness situations, techniques for immediate first aid, and legal parameters involved when administering emergency care. Certification in adult CPR will be obtained. A $40 lab fee will be required for this class.
PREREQUISITE: ATHT MAJORS ONLY. STUDENTS MUST HAVE A SOPHOMORE STATUS.

KIN150 General Nutrition for Health and Performance
3 credits  Fall & Spring Semester
Fundamentals and theories of nutrition with a specific focus on nutrition for both sports and fitness.
PREREQUISITE: FOR NON-SCIENCE MAJORS ONLY

KIN155 Biological Bases for Physical Activity and Health
3 credits  Fall & Spring Semester
This course serves as an introduction to the field of exercise physiology. Students will learn the biological need for physical activity, discuss specific mechanisms on how physical activity reduces disease risk and understand the relationship between physical activity and chronic diseases such as coronary heart disease, obesity, diabetes, cancer, aging and mental health.

KIN156 Laboratory Applications to Exercise Physiology
1 credit  Fall Semester
This laboratory will incorporate clinical testing for fitness evaluations, strength assessment, and risk assessment. Students will have the opportunity to perform hands-on testing and assessment using sophisticated laboratory equipment with guidance for analysis and interpretation of results.
PREREQUISITE: KIN 155 (FORMALLY ESS 155).
KIN184 Athletic and Sport Injuries
3 credits  Fall & Spring Semester
Athletic injuries in sports that occur over the principal joints in the body and the inclusion of anatomical structures that are frequently damaged. Operational treatments and rehabilitation program after surgery.

KIN200 Survey of Sports Administration
3 credits  Second Summer Session
Students will examine the employment opportunities and skills needed in professional, collegiate, and amateur sports as well as the health and fitness industry.
PREREQUISITE: SUMMER SCHOLAR STUDENTS ONLY.

KIN201 Introduction to Sport Administration
3 credits  Fall & Spring Semester & First & Second Summer Session
Basic overview of the fields of sport management. Majors must receive a grade of B- or higher.

KIN202 Applied Nutrition for Health and Performance
3 credits  Fall & Spring Semester
The study of nutrition, diet analysis, biochemical processes in energy metabolism, nutrition and health problems, and nutrition as it relates to physical performance. The class will have 3 sections: 1) nutritional links to chronic disease; 2) nutrition before, during and after exercise bout; and 3) nutritional supplements for health and performance.

KIN203 Introduction to Gaming and Casino Management
3 credits  Fall & Spring Semester

KIN204 Sports Personnel/ Career Management
3 credits  Fall & Spring Semester
This course will expose students to the employment opportunities in the sport industry through the following modalities: Lecture, videos, speakers and visitation. Students will also learn the techniques of resume writing and the job interview.
PREREQUISITE: OPEN ONLY TO SPAD MAJORS AND MINORS. MUST HAVE TAKEN KIN 201 (FORMALLY ESS 201) AND EARNED A C+ OR BETTER.

KIN206 Sport Facilities and Event Management
3 credits  Fall & Spring Semester
This course is an overview of the policy and procedures necessary to organize and develop sport events and facilities. In depth review of all programs, functions and procedures necessary for the operation of events and facilities are examined.
PREREQUISITE: MUST HAVE TAKEN KIN 201 (FORMALLY ESS 201) AND EARNED A C+ OR BETTER.

KIN210 Foundations in Athletic Training
2 credits  Spring Semester
Introduction to Sports Medicine/Athletic Training with emphasis on study of the sports medicine team, legal concerns, nutrition, and pre-participation physicals. Course will discuss the basic principles of injury prevention including the role of conditioning, equipment, and protective padding. Additionally, students will be introduced to the study of etiology and mechanisms of injury, pathology, and recognition of clinical signs and symptoms of athletic injury. The student must complete 50 clinical observation hours, which are required for the retention process of the Athletic Training Education Program. Prerequisites: Must have sophomore status.
PREREQUISITE: MUST HAVE SOPHOMORE STATUS.
KIN212 Elements of Sports Psychology
3 credits                                    Fall & Spring Semester
Introduction to the field of sport and exercise psychology by examination of psychological theories and research related to sport and exercise behavior.

KIN221 Exercise Physiology
3 credits                                    Fall & Spring Semester & First & Second Summer Session
This course discusses the structure and function of human skeletal muscle as a biological machine, biological energy systems as they function during exercise, fatigue and recovery, the contractile process in skeletal muscle, and the specific changes resulting from variations in the training stimulus. Majors must receive a grade of B- or higher.
PREREQUISITE: RECOMMENDED: KIN 202, KIN 233, KIN 234, KIN 246, OR ONE SEMESTER OF ANATOMY IS REQUIRED.

KIN222 Exercise Physiology Laboratory: Neuromuscular
2 credits                                     Fall Semester
This course examines the nature of data collection in exercise physiology. Students will receive information on collection theory and its application to the measurement of a number of physiological systems during exercise. The course is designed to establish a clear linkage between the chronic and acute changes that occur during exercise and the laboratory methods that are used to assess those changes. Co-requisite: ESS 221.

KIN230 Medical Terminology and Documentation
1 credit                                        Fall & Spring Semester
Terminology, note writing, and documentation techniques in sports medicine. A treatment cycle model will be introduced.
PREREQUISITE: OPEN ONLY TO ATHT MAJORS. MUST HAVE COMPLETED KIN 140 AND 141 (FORMALLY ESS 140 AND 141) AND EARNED A GRADE OF B OR BETTER FOR BOTH COURSES.

KIN232 Basic Human Physiology
3 credits                                    Fall & Spring Semester & First & Second Summer Session
This course presents a general overview of the major systems of the human organism with an examination of how they function in the human body. Majors must receive a grade of B- or higher.

KIN233 Basic Anatomy Lab
2 credits                                     Fall Semester
This course presents a general overview of the anatomy of the major body systems, such as the skeletal, muscular, cardiovascular, nervous, digestive, respiratory and reproductive systems as well as the integumentary system and special senses.

KIN234 Functional Human Anatomy
3 credits                                    Fall & Spring Semester
The study of human anatomy specifically for the sports medicine practitioner

KIN235 Personal and Community Health
2 credits                                    Fall Semester
Overview of current strategies and practices for healthy living, including health maintenance and disease prevention.
PREREQUISITE: OPEN ONLY TO ATHT MAJORS. MUST HAVE COMPLETED KIN 140 AND 141 (FORMALLY ESS 140 AND 141) AND EARNED A GRADE OF B OR BETTER FOR BOTH COURSES.
KIN246 Gross Anatomy for Kinesiology and Sport Sciences
3 credits  Fall & Spring Semester
Human dissection of the major muscles, arteries and nerves of the body. Course is held at the University of Miami cadaver laboratory. There is a $100.00 lab fee associated with this class.
PREREQUISITE: Human Anatomy

KIN250 Orthopedic Assessment: Lower Extremity
3 credits  Fall Semester
Common types of orthopedic/sports dysfunctions to lower extremity will be discussed. Injuries will be discussed from the following viewpoints: etiology and mechanism of injury, pathology, recognition and valuation techniques, protocols, and prevention. Co requisite: ESS 251.
PREREQUISITE: ATHT MAJORS ONLY. STUDENTS MUST HAVE SOPHOMORE STATUS. MUST HAVE COMPLETED KIN 140 AND 141 (FORMALLY ESS 140 AND 141) AND EARNED A GRADE OF B OR BETTER IN BOTH COURSES. COREQUISITE: KIN 251 (FORMALLY ESS 251).

KIN251 Orthopedic Assessment: Lower Extremity Lab
1 credit  Fall Semester
Techniques used to evaluate orthopedic and sports injuries occurring to the lower extremity. The student must complete 100 clinical education hours, which apply toward the graduation requirement of 1000 hours. Clinical education hours will emphasize lower extremity orthopedic assessment, goniometry, manual muscle testing techniques, and gait evaluations. Students must be additionally enrolled in ESS 250.
PREREQUISITE: ATHT MAJORS ONLY.

KIN260 Orthopedic Assessment: Upper Extremity
3 credits  Offered By Announcement Only
Common types of orthopedic/sports dysfunctions to the upper extremity will be discussed. Injuries will be discussed from the following viewpoints: etiology and mechanism of injury, pathology, recognition and evaluation techniques, protocols, and prevention. Co requisite: ESS 261.
PREREQUISITE: ESS 246. OPEN ONLY TO ATHT MAJORS. MUST HAVE COMPLETED ESS 140 AND 141 AND EARNED A GRADE OF B OR BETTER FOR BOTH. COREQUISITE: ESS 261.

KIN261 Orthopedic Assessment: Upper Extremity Lab
1 credit  Spring Semester
Techniques used to evaluate orthopedic and sports injuries occurring to the upper extremity. The student must complete 100 clinical education hours, which apply toward the graduation requirement of 1000 hours. Clinical education hours will emphasize upper extremity orthopedic assessment, goniometry, and manual muscle testing techniques. Students must be additionally enrolled in ESS 260.
PREREQUISITE: NONE. CO-REQUISITE: ESS 260

KIN264 General Medical Conditions Evaluation
1 credit  Fall Semester
This class is the study of the clinical signs and symptoms of General Medical conditions that will present to the Certified Athletic Trainer. Emphasis will be placed on the techniques and instrumentation used for performing appropriate evaluation procedures.
PREREQUISITE: ATHLETIC TRAINING MAJORS ONLY. ESS 235, 245, 246.
KIN301 Athletic Injuries & Sport First Aid
3 credits                                                        Spring Semester
Course will help coaches, camp counselors, teachers, personal trainers, and athletes of all levels to fulfill the role of being a competent first responder to athletic injuries and illnesses. Upon completion of this course, students will have knowledge of basic sport first aid skills, anatomy and sport injury terminology, and knowledge of specific athletic injuries and illnesses. These will include head injuries, sudden illnesses, weather-related problems, upper and lower body musculoskeletal injuries, respiratory emergencies and illnesses, and internal injuries. Students will also learn basic hands-on skills such as splinting, taping, and bracing as it relates to preventing and treating athletic injuries.

KIN302 SPORT MARKETING
3 credits                                                    Fall & Spring Semester
This course is designed as a marketing course that deals exclusively with Sport Marketing. Students are expected to develop comprehensive marketing and sponsorship plans. This course will require moderate to heavy computer knowledge. This course is designed to maximize the practical applications of marketing theory to the sport business environment.
PREREQUISITE: MUST HAVE TAKEN KIN 201 (FORMALLY ESS 201) AND EARNED A C+ OR BETTER

KIN306 Essential Leadership in Sports and the Professions
3 credits                                                    Fall & Spring Semester
A variety of leadership and management skills will be examined, including communication, problem solving, conflict management, group dynamics, and leadership theory. Practical application to sport and allied professions will be included. Self-assessment opportunities and exercises will be utilized. Open to majors only.
PREREQUISITE: OPEN TO SPORTS ADMINISTRATION MAJORS ONLY WITH JUNIOR OR HIGHER STANDING

KIN308 Ethical Decision Making in Sport and the Professions
3 credits                                             Fall & Spring Semester & First & Second Summer Session
This course will examine ethical dilemmas in decision-making and other contemporary issues in sports management and campus and community environment. Real and hypothetical situations will be utilized.
PREREQUISITE: OPEN TO SPORT ADMINISTRATION MAJORS ONLY WITH JUNIOR OR HIGHER STANDING

KIN310 Adolescent Growth and Maturation
3 credits                                                        Fall & Spring Semester
This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation processes that impact physical performance. Additionally, students will learn the basis of training pediatric populations.

KIN317 Sports Sales and Promotion
3 credits                                             Fall & Spring Semester & First & Second Summer Session
This course is designed to introduce students to various sales and promotional tactics utilized in the sport industry. The course will focus on items which generate revenue for sport organizations including event tickets, merchandise, concessions, advertising and corporate sponsorship and hospitality. Students will have the opportunity to develop pricing structures, sales plans, and proposals and participate in negotiations as it relates to these various items.
KIN321 Introduction to Systemic Exercise Physiology
3 credits  Spring Semester
The structure, function, and training of the cardio respiratory system. Special emphasis on structural changes in the systems with exercise and their influence on cardiovascular performance, body composition, exercise efficiency and health.
PREREQUISITE: KIN 221 OR PERMISSION OF THE INSTRUCTOR.

KIN322 Exercise Physiology Laboratory: Cardio respiratory
2 credits  Spring Semester
This course concentrates on collection of cardio respiratory data. In addition, the application of these data to exercise prescription for specific athletic and non-athletic populations will be covered. Co requisite: ESS 321.

KIN340 Strength and Conditioning
3 credits  Fall Semester
Introduction to Sport Specific Strength Training. Students will learn the practice of Olympic Weight Lifting and related exercise techniques.
PREREQUISITE: KIN 221

KIN345 Kinesiology
3 credits  Fall & Spring Semester
Study of the structure and function of the skeletal, joint, and muscular systems. Emphasis is placed on the mechanics of the movement of the human body and its relationship to sport and physical performance.

KIN365 Principles of Exercise Prescription: Cardiovascular
3 credits  Spring Semester
This class is the study of the theory and principles behind the development of exercise programs. Students will learn how to accurately evaluate and develop individual exercise prescription based upon sound scientific research. Exercise prescriptions will be developed in accordance with the guidelines set forth by the National Strength and Conditioning Association and the American College of Sports Medicine.
PREREQUISITE: KIN 233, KIN 234, KIN 246, OR ONE SEMESTER OF ANATOMY IS REQUIRED

KIN366 Exercise Physiology Laboratory: Assessment
3 credits  Fall & Spring Semester
This lab course is designed to complement the ESS 365 lecture course (Principles of Exercise Prescription): Cardiovascular. Students will apply practical field assessments for body composition, aerobic capacity, muscular fitness, and joint range of motion, and will employ exercise strategies to improve each of the assessed fitness components. Students will also prescribe exercises to improve performance-based fitness, such as coordination, balance, agility, speed and power while learning proper exercise training techniques. Must be a declared Exercise Physiology (EXPH) major and receive a grade of "C" or better to satisfy requirements.

KIN401 Legal Aspects of Sport
3 credits  Fall & Spring Semester & First & Second Summer Session
This course will focus on legal issues applicable to sport administration, including tort law, risk management, negligence, and constitutional law. Relevant legal cases and concepts will be incorporated.
PREREQUISITE: OPEN TO MAJORS AND MINORS ONLY.

KIN402 Sport Sponsorship and Promotion
1-3 credits  First Summer Session
KIN403 Sport Information Management  
3 credits  
Fall Semester  
This course centers upon the development of those skills that are necessary for Sport Information Directors. Specifically, these traditionally include marketing, media, promotion, and public relations. This course hopes to provide detailed knowledge to allow the student to participate in these activities in a professional manner.  
PREREQUISITE: MUST HAVE TAKEN ESS 201 AND EARNED A C+ OR BETTER.

KIN405 Finance and Budget in Sport Administration  
3 credits  
Fall Semester  
This course seeks to develop those financial skills necessary to understand a wide variety of financial concepts that impact sport managers. Such topics would include but not be limited to: Sport franchise value/valuations; economic impact of sport; risk-return models; financial statement analysis, and budgeting.  
PREREQUISITE: MUST HAVE TAKEN ESS 201 AND EARNED A C+ OR BETTER.

KIN410 Problems and Issues in Sport Administration  
3 credits  
Fall Semester  
This course is designed as a seminar course. Topical issues in high school, collegiate and professional sport are presented and discussed in detail. A number of student-centered activities are introduced to aid in the development of the student.  
PREREQUISITE: SPAD MAJORS ONLY. SENIOR STANDING.

KIN412 Psychophysicsology  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular system, and the pulmonary system. Students will be able to understand and interpret terminology and research literature published in the field.

KIN421 Advanced Systemic Exercise Physiology  
0-3 credits  
Spring Semester  
This course examines the short and long term physical responses to exercise and provides a general overview of the field of exercise physiology with reference to the latest trends in modern physiological research.  
PREREQUISITE: KIN 321, KIN 246

KIN431 Laboratory Experiences in Systemic Exercise Physiology  
2 credits  
Fall & Spring Semester  
This class will present laboratory experiences relevant to theory and exercise physiology information presented in class. The laboratory experiences will sequentially follow lecture material presented in the classroom. Co requisite: ESS 421.  
PREREQUISITE: KIN 321, KIN 246

KIN435 Clinical Biomechanics for Sport Medicine Professionals.  
3 credits  
Fall Semester & First Summer Session  
A lecture course stressing biomechanical of joints and pathomechanics of orthopedic injuries.  
PREREQUISITE: ESS 245 OR ESS 488 KINESIOLOGY.
KIN443 Clinical Athletic Training Lab I  
2 credits  
Fall & Spring Semester  
The application of athletic training practices in selected clinical education settings.  
The student must complete 150 hours of documented clinical education hours, which  
apply toward the graduation requirement of 1000 hours. Clinical education hours  
will emphasize emergency procedures, first aid, and protective equipment. Successful  
completion of the retention process and formal admittance into the clinical portion  
of the Athletic Training Program.  
PREREQUISITE: SUCCESSFUL COMPLETION OF THE RETENTION PROCESS AND FORMAL ADMITTANCE  
INTO THE CLINICAL PORTION OF THE ATHLETIC TRAINING EDUCATIONAL PROGRAM.

KIN444 Clinical Athletic Training Lab II  
2 credits  
Spring Semester  
The application of athletic training practices in selected clinical and educational  
settings. The student must complete 150 hours of documented clinical education  
hours, which apply toward the graduation requirement of 1000 hours. Clinical  
education hours will emphasize general medical conditions, nutritional issues,  
psychosocial intervention, and injury prevention and risk management. Prerequisite:  
A grade of "B" or better in KIN 443 (Formally ESS 443).  
PREREQUISITE: A GRADE OF "B" OR BETTER IN KIN 443 (FORMALLY ESS 443).

KIN455 Clinical Athletic Training Lab III  
2 credits  
Fall Semester  
The application of athletic training practices in selected clinical and educational  
settings. The student must complete 180 hours of documented clinical education  
hours, which apply toward graduation requirement of 1000 hours. Clinical education  
hours will emphasize acute care of injuries and illnesses, lower extremity orthopedic  
assessment, and risk management and injury prevention. Prerequisite: A grade of  
"B" or better in KIN 443 and KIN 444 (formally ESS 443 and ESS 444).  
PREREQUISITE: A GRADE OF "B" OR BETTER IN KIN 443 AND KIN 444 (FORMALLY ESS 443  
AND ESS 444).

KIN456 Clinical Athletic Training Lab IV  
2 credits  
Spring Semester  
The application of athletic training practices in selected clinical and educational  
settings. The student must complete 180 hours of documented clinical education  
hours, which apply toward the graduation requirement of 1000 hours. Clinical  
education hours will emphasize upper extremity orthopedic assessment, conditioning  
and rehabilitation, and therapeutic and therapeutic modalities. Prerequisite:  
A grade of "B" or better in KIN 140, KIN 141, KIN 443, KIN 444, KIN 455 (formally  
ESS 140, ESS 141, ESS 443, ESS 444, ESS 455).  
PREREQUISITE: A GRADE "B" OR BETTER IN KIN 140, KIN 141, KIN 443, KIN 444, KIN  
455 (FORMALLY ESS 140, ESS 141, ESS 443, ESS 444, ESS 455).

KIN457 Practicum in Kinesiology and Sport Sciences  
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session  
A comprehensive program of observation and supervised experience under the direction  
of a professional in the field for one semester. Supervised by University faculty.  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRPERSON.
KIN 458 Practicum in Kinesiology and Sport Sciences  
3 credits 
Fall & Spring Semester  
A comprehensive program of supervised experience conducted under the direction of a professional in the field. Must culminate in research or hands-on experience conducted in the exercise science field.  
PREREQUISITE: KIN 221, 321. OPEN TO ALL HONORS PROGRAM STUDENTS OR OTHER STUDENTS RECEIVING SPECIAL PERMISSION OF THE INSTRUCTOR (FORMALLY ESS221, 321).

KIN 461 Therapeutic Modalities  
2 credits 
Fall Semester  
Students will acquire the theoretical knowledge necessary for the clinical application of therapeutic modalities. Principles of electrophysics and biophysics, specific physiological effects and therapeutic indications and contraindications associated with cyotherapy, paraffin, ultrasound, electrotherapeutic and hydrotherapeutic modalities, intermittent compression, message, and other contemporary modalities will be discussed. Prerequisite: Open only to ATHT majors. Must have completed KIN 140 and 141 and earned a grade of B or better for both courses, Co requisite: KIN 462 (Formally ESS 140 and 141 and ESS 462).

KIN 462 Therapeutic Modalities Laboratory  
1 credit 
Fall & Spring Semester & First & Second Summer Session  
This laboratory will help students apply the techniques and clinical skills related to the application of therapeutic modalities. Clinical education hours will give the student the opportunity to use the knowledge, skills, and techniques learned in this course. Students must complete 40 hours of documented clinical education hours, which apply toward the graduation requirement of 1000 hours. Students must be additionally enrolled in KIN 461 (Formally ESS 461).

KIN 463 Therapeutic Rehabilitation  
2 credits 
Spring Semester  
This course enables students to acquire the theoretical knowledge for the clinical application of a rehabilitation program, physical examination, principles of therapeutic exercise, open and closed chain exercise, muscle re-education, and special therapeutic techniques such as aquatic therapy.  
PREREQUISITE: OPEN ONLY TO ATHT MAJORS. MUST HAVE COMPLETED KIN 140 AND KIN 141 AND EARNED A GRADE OF B OR BETTER FOR BOTH COURSES (FORMALLY ESS 140 AND ESS 141).

KIN 464 Therapeutic Rehabilitation Laboratory  
1 credit 
Fall Semester  
This laboratory will place emphasis on the techniques and clinical skills relating to the rehabilitation of athletic injuries. Clinical education hours in a therapeutic rehabilitation facility will give the students the opportunity to use the knowledge, skills, and techniques learned in this course. The student must complete 100 hours of documented clinical education hours, which apply toward the clinical education requirement for graduation. Students must be additionally enrolled in KIN 463 (Formally ESS 463).  
PREREQUISITE: STUDENTS MUST BE ADDITIONALLY ENROLLED IN KIN 463 (FORMALLY ESS 463).
KIN465 Pharmacology  
**2 credits**  
*Fall Semester*  
Introduction to the basic principles of pharmaceutical intervention and the implications for rehabilitation as related to the Certified Athletic Trainer.  
PREREQUISITE: KIN 210, 230, 264 (FORMALLY ESS 210, 230, 264) OPEN ONLY TO ATHT MAJORS. MUST HAVE COMPLETED KIN 140 AND 141 (FORMALLY ESS 140 AND 141) AND EARNED A GRADE OF B OR BETTER FOR BOTH COURSES.

KIN466 Neuromuscular Basis for Training  
**3 credits**  
*Spring Semester*  
The study of specific techniques to enhance neuromuscular performance in sport and everyday activity. Students will examine current training strategies and understand their strengths and weaknesses as applied to specific populations.  
PREREQUISITE: EXPH MAJORS ONLY.

KIN470 Administrative Aspects of Athletic Training  
**2 credits**  
*Fall Semester*  
Basic concepts of legal liability, budget, financial management, inventory control, facilities design and maintenance will be addressed. Additionally, the student will discuss the day to day supervision, scheduling and general administration of the athletic training room. Open only to ATHT majors. Must have completed KIN 140 and 141 and earned a grade of B or better for both courses (Formally ESS 140 and ESS 141).  
PREREQUISITE: ATHT MAJORS ONLY. STUDENTS MUST HAVE SOPHOMORE STATUS.

KIN473 Sports Governance  
**3 credits**  
*Fall Semester*  
This course provides the students with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and Olympic levels. In addition, policy development in sport management will be explored.

KIN475 Organization and Administration of Athletic Training  
**3 credits**  
*Fall Semester*  
Basic concepts of legal liability, budget, financial management, inventory control, facilities design and maintenance will be addressed. Additionally, the student will discuss the day to day supervision, scheduling and general administration of the athletic training room.  
PREREQUISITE: OPEN ONLY TO ATHT MAJORS. MUST HAVE COMPLETED KIN 140 AND 141 AND EARNED A GRADE OF B OR BETTER FOR BOTH COURSES (FORMALLY ESS 140 AND ESS 141).

KIN476 Seminar in Athletic Training  
**2 credits**  
*Fall Semester*  
Topics in Athletic Training with discussions covering the NATA competencies and objectives in written and oral practical formats.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR. ATHLETIC TRAINING MAJORS ONLY. OPEN ONLY TO ATHT MAJORS. MUST HAVE COMPLETED KIN 140 AND 141 AND EARNED A GRADE OF B OR BETTER FOR BOTH COURSES (FORMALLY ESS 140 AND ESS 141).
KIN477 Advanced Nutrition for Health and Fitness  
3 credits Fall & Spring Semester & First & Second Summer Session  
This course is an in-depth study of nutritional concerns of today's athlete. From dehydration to classic carbohydrate loading and from the Female Athlete Triad to ergogenic aids in sports, this course provides state of the art information on the latest nutritional issues for the exercising individual and for the athlete. 
PREREQUISITE: KIN 202

KIN478 Laboratory Experiences in Nutrition  
2 credits Spring Semester  
Students will learn how to calculate hydration needs for various sports, electrolyte concentrations of various commercial drinks, classic carbohydrate menus for endurance activities. Students will learn how to enter and interpret dietary food logs and records using computerized dietary analysis systems. Students will also learn more about energy density composition of various foods so that menu plans and dietary plans can be better understood. Co requisite: KIN 477 (Formally ESS 477). 

KIN480 The Scientific Bases for Training Prescription: Neuromuscular  
3 credits Fall & Spring Semester  
An examination of the scientific bases of modern training techniques designed to optimize performance, their functional application and potential impact on performance in sport and everyday activity. 
PREREQUISITE: ESS 221

KIN488 Gross Anatomy  
3 credits Fall & Spring Semester & First & Second Summer Session  
The essentials of Myology, Osteology, and Arthrology. Major nerves and arteries are also dissected. Many of the dissection areas are injury sites in sports such as the knee, shoulder, elbow, neck, and spinal nerves. There is a laboratory fee requirement for this course ($100.00). 
PREREQUISITE: OPEN TO EXPH AND ATHT MAJORS ONLY.

KIN490 Special Topics in Kinesiology and Sport Sciences  
3 credits Fall & Spring Semester  
This course is designed for students wishing to focus on a specific area of study within the umbrella of the field of Kinesiology. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting. 
PREREQUISITE: MUST HAVE TAKEN KIN 201 AND EARNED A C+ OR BETTER (FORMALLY ESS 201).

KIN495 Individual Study  
1- 3 credits Fall & Spring Semester & First Summer Session  
The Application for Admission to Advanced Individual Study Form will be required. 
PREREQUISITE: APPLICATION FOR ADMISSION TO ADVANCED INDIVIDUAL STUDY FORM REQUIRED.

KIN496 Individual Study  
1- 3 credits Fall & Spring Semester & Second Summer Session  
The Application for Admission to Advanced Individual Study Form will be required. 
PREREQUISITE: APPLICATION FOR ADMISSION TO ADVANCED INDIVIDUAL STUDY FORM REQUIRED.
KIN497 Internship in Sport Administration
1-9 credits  
Fall Semester
KIN 497: Internship in Sport Administration Filed Experience that requires the student to participate in the work environment (Formally ESS 497).
PREREQUISITE: KIN 201. MUST HAVE EARNED A GRADE OF C OR BETTER IN KIN 201 (FORMALLY ESS 201). SENIOR STANDING. OPEN ONLY TO SPAD MAJORS.

KIN498 Seminar in Sport Administration
3 credits  
Spring Semester
Professional seminar to accompany internship in sport administration. Students will be required to interact with other internship students and supervisors on a regular basis and additionally, students will be required to submit comprehensive reports regarding their internship experiences.
PREREQUISITE: SENIOR STANDING. OPEN ONLY TO SPAD MAJORS. MUST HAVE TAKEN KIN 201 AND EARNED A C+ OR BETTER (FORMALLY ESS 201).

KIN502 Sport Sponsorship and Promotion
1-3 credits  
First Summer Session

KIN515 Nutrition Diet and Exercise
3 credits  
First Summer Session
Students will learn the latest concepts in weight management, physical fitness, and healthy eating. They will be able to understand the complex interplay of carbohydrates, protein, fat, water, fiber, vitamins, and minerals in the nourishment of their body and overall well-being. They will also examine serious health issues such as the use/misuse of anabolic steroids, weight control, and eating disorders.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN520 Cellular Exercise Physiology
3 credits  
Spring Semester
The course examines Bioenergetics and Muscular Physiology in training and detraining. Topics include the energy systems and their functional application during exercise, muscle structure and function, cellular and sub-cellular modifications of organelles and contractile mechanisms as result of training and physiological bases of training techniques.

KIN521 Systemic Exercise Physiology
0-3 credits  
Fall Semester
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular and the pulmonary systems. Students will be able to understand and interpret terminology and research literature published in the field.
PREREQUISITE: ONE YEAR OF UNDERGRADUATE CHEMISTRY AND ONE YEAR OF UNDERGRADUATE HUMAN BIOLOGY.

KIN522 Basic Statistics in Kinesiology and Sport Sciences
3 credits  
Fall Semester & First & Second Summer Session
Introduction to basic statistical techniques commonly used in the Exercise and Sport Sciences. Designed as a prerequisite for KIN 646 (Formally ESS 646).
KIN523 Athletic Training Techniques - Assessment
3 credits  Fall Semester
This course will introduce the basic concepts related to injury evaluation. With this information, and with the development of basic skills, the student should be able to form an impression of the nature of most musculoskeletal injuries.
PREREQUISITE: KIN 525 AND 588 (FORMALLY ESS 525 AND ESS 588).

KIN524 Athletic Training Techniques - Rehabilitation
3 credits  Fall Semester
This course will introduce theoretical concepts that must be understood in order to be able to rehabilitate a musculoskeletal injury. Regarding actual rehabilitation techniques, the emphasis will be on therapeutic exercise with only a brief introduction to therapeutic modalities.
PREREQUISITE: KIN 525 AND 588 (FORMALLY ESS 525 AND ESS 588).

KIN525 Advanced Kinesiology
3 credits  Fall & Spring Semester
In-depth study of the human skeletal and muscular systems with a focus on the mechanics of movement as related to physical activity, sports, and athletics.
PREREQUISITE: ESS 245 OR PERMISSION OF INSTRUCTOR.

KIN527 Community and Global Nutrition
3 credits  Fall & Spring Semester
This course is designed to provide an overview of nutritional issues & related aspects of infectious and chronic disease impacting the health and performance of athletes, individuals & groups domestically & globally. Economic and environmental issues which impact nutritional status and deficiency in the Western societies & third world countries will be addressed. An international and cultural perspective on food, eating behaviors and customs will be explored.

KIN530 Laboratory Techniques in Functional Evaluation of Skeletal Muscle
3 credits  Spring Semester
This course examines the theories of data collection and collection techniques used to evaluate musculo-skeletal and neuromuscular function. The application of both computerized and non-computerized collection systems for performance evaluation is covered. The course is also designed to establish a clear linkage between the acute and chronic musculo-skeletal and neuromuscular changes that occur during exercise and the laboratory methods used to assess those changes. Collection theory, musculoskeletal and neuromuscular function, methods of strength evaluation, anaerobic power testing, electromyography, and a number of other functional parameters will be discussed.
PREREQUISITE: KIN 520 (FORMALLY ESS 520).

KIN531 Laboratory Experiences in Systemic Exercise Physiology
3 credits  Fall Semester
This course provides a laboratory assessment of physiological principles and theories learned in the classroom setting. Focus will be on systemic application to exercise as an acute or chronic stressor. Co requisite: ESS 521.
PREREQUISITE: COREQUISITE ESS 521

KIN532 Sports Injuries: Prevention and Treatment
3 credits  Fall & Spring Semester
Prevention, diagnosis, treatment and rehabilitation of sports injuries. Anatomical and Kinesiological application to sports injuries.
KIN534 Integrative & Functional Medicine
3 credits Fall Semester
This course will discuss integrative and functional medicine and how it emerged.
This course will analyze the healthcare models that include personalized care and
the whole-person perspective. In this course we will discuss various factors that
influence disease including diet and nutrition, stress, activity level, pharmaceuticals
and environmental pollutants. Alternative approaches to treatment will also be
discussed.

KIN535 Clinical Biomechanics for Sport Medicine Professionals
3 credits Fall Semester & First Summer Session
A lecture course stressing biomechanics of joints and pathomechanics of orthopedic
injuries.
PREREQUISITE: ESS 245 OR ESS 488 KINESIOLOGY

KIN536 Strength and Conditioning I
3 credits Fall & Spring Semester
This course serves as the practical/technical foundation for major compound movements
and Olympic lifts. It also provides comprehension of movement specific dynamic
warm-ups, advanced stretching techniques, methods for identifying movement compensations
and underlying issues as well as evaluating Olympic techniques. Due to the practical
nature of the course, all the sections of this course are held in the Hecht Athletic
Center (HAC).

KIN537 Strength and Conditioning II
3 credits Fall & Spring Semester
This course is the continuation of Strength and Conditioning I (KIN 536). It provides
more advanced Olympic weightlifting techniques and ballistic training, alongside
a continued focus on corrective exercises to ensure a reduced risk of injury.
The course also provides an introduction to exercise programming including specialized
training techniques for athletic development. Due to the practical nature of the
course, all sections of this course are held in the Hecht Athletic Center (HAC).
PREREQUISITE: KIN 536

KIN538 Nutrition during the Lifecycle
3 credits Fall Semester
This course is designed to examine the changes in nutrition requirements during
the life cycle, particularly as related to growth, development and aging. Psychosocial,
cultural, and economic issues related to food intake at various life stages will
be reviewed.
PREREQUISITE: AN INTRODUCTORY NUTRITION COURSE THAT INCLUDED DIGESTION, ABSORPTIONS
AND TRANSPORT OF NUTRIENTS, MACRO AND MICRONUTRIENTS AND ENERGY METABOLIS
IS REQUIRED.

KIN540 Exercise Psychobiology
3 credits Fall & Spring Semester
This course is designed primarily for graduate level Exercise and Sport science
students who are interested in the biochemical basis of personality as affected
by exercise and sport. The course involves interdisciplinary integration and comprehensive
reviews of ancient and current literature dealing with exercise, stress, emotional,
personality, immune system function and neuroendocrine function.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).
KIN542 STRENGTH AND CONDITIONING
3 credits Fall & Spring Semester
A comprehensive overview of strength and conditioning.
PREREQUISITE: ESS245 OR KIN 345 - KINESIOLOGY (FORMALLY ESS 345).

KIN543 Professional Training and Counseling for Integrative Health
3 credits Fall Semester
Students will learn the integrative health care model, theories, behavior change models, approaches & techniques used in nutritional counseling to help athletes, individuals and groups implement and sustain behaviors, lifestyles, and attitudes to achieve optimal health. Lecture & personal application will allow for the development of skills in each of these areas.
PREREQUISITE: PRE-OR CO-REQUISITE: NUTRITION ASSESSMENT & LAB OR PERMISSION OF INSTRUCTOR

KIN545 Special Sport Populations
3 credits Spring Semester
This course presents an in-depth examination of chronic conditions and medical problems commonly observed in athletes. Students will learn about the etiology of the medical condition, how exercise affects the condition, and the most recent therapeutic treatments prescribed for the condition.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).

KIN546 Elite Conditioning I
3 credits Fall & Spring Semester
Elite Conditioning I provides an introduction to evaluation techniques catered specifically to the athletic population including tests for strength, power, speed, agility, balance and stability. The course also provides instruction on how to apply these evaluations to their respective sports/positions. These evaluation techniques provide data that students will use in the process of corrective exercise prescription. Students are taught how to implement corrective strategies to improve athletic performance. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center (HAC).

KIN547 Elite Conditioning II
3 credits Fall & Spring Semester
Elite Conditioning II is the continuation of Elite Conditioning I (KIN 546). This course provides students with an understanding of the design and implementation of periodized conditioning programs for athletes based on the testing, evaluation, and applications to specific sports learned in Elite Conditioning I. The course focuses on speed agility and quickness for sports. It also includes practical implementation of ballistic, plyometric, speed, and conditioning drills emphasizing evidence based methods and training techniques. Due to the practical nature of the course, all sections of this course are held in Hecht Athletic Center (HAC).
PREREQUISITE: KIN 546

KIN549 Nutrition Assessment and Lab
3 credits Fall Semester
Application of the principles of normal and therapeutic nutrition, nutrition assessment, evaluation and intervention as related to sports performance and the management and treatment of disease states. Laboratories will allow for the development of skills in each of these areas.
PREREQUISITE: STUDENTS ARE EXPECTED TO BE FAMILIAR WITH BASIC PRINCIPLES OF NUTRITION, HAVE COMPLETED BIOCHEMISTRY, DIET THERAPY, AND PSYCHOLOGY OR RECEIVE PERMISSION FROM INSTRUCTOR.
KIN550 Nutrition Biochemistry and Integrative Metabolism
3 credits Fall & Spring Semester
To learn the fundamental biochemical structure and pathways governing nutrient intake and utilization. Students will learn how major forms of nutrients (macronutrients, vitamins, minerals and trace elements) are processed and utilized by different organs with a particular emphasis on muscle metabolism. Students will also learn how to relate their newly acquired knowledge to health and disease outcomes with focus on lifestyles disease related to metabolism such as diabetes and obesity.
PREREQUISITE: STUDENTS ARE EXPECTED TO BE FAMILIAR WITH BASIC PRINCIPLES OF NUTRITION, ANATOMY AND PHYSIOLOGY, HAVE COMPLETED BIOCHEMISTRY, OR RECEIVE PERMISSION FROM INSTRUCTOR.

KIN557 Diagnostic Imaging Techniques In Sports Medicine
3 credits Spring Semester
This course is designed as an elective for undergraduate KIN students or graduate students. The basic physics of radiological imaging will be covered including radiology, fluoroscopy, CT scan, ultrasound, MRI, and nuclear medicine including image archiving. Normal anatomy will be compared to the corresponding radiographic anatomy. Common sports injuries will be evaluated by multiple radiographic modalities and will be correlated with the clinical condition. Discussion will include bony pathology as well as soft tissues such as ligaments, tendons, and menisci.
PREREQUISITE: ANATOMY, PHYSIOLOGY, OR PERMISSION OF INSTRUCTOR.

KIN561 Facility Management
3 credits Fall & Spring Semester
Facility management provides students with an understanding of fitness entrepreneurship, giving students a comprehensive understanding of the, laws, regulations, policies, and work involved in setting up a fitness facility such as a gym, wellness center, or athletic training center. Students are responsible for developing a viable sports or fitness complex including all aspects of administrative and facility management.

KIN562 Fiscal Management in Sport Administration
3 credits Fall Semester
Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.
PREREQUISITE: BACKGROUND AND EXPERIENCE IN EXERCISE SCIENCE OR PERMISSION

KIN563 Facilities and Event Management
3 credits Spring Semester
This course is designed to introduce students to principles and practices of planning, funding and managing facilities associated with sports participation including professional sport venues, college sports, parks, recreational sport and health/fitness clubs. Students will gain an understanding of promoting, marketing, and maintaining sport facilities.
PREREQUISITE: KIN 566 (FORMALLY ESS 566)

KIN564 Principles of Sport Marketing
3 credits Fall & Spring Semester
This course will focus on the vast world of sports marketing. The basic principles of marketing and marketing management will be introduced and integrated with application of these principles to sport and sports-related organizations.
PREREQUISITE: ESS 301 OR PERMISSION OF INSTRUCTOR.
KIN565 Legal Aspects of Sports and Exercise Science  
3 credits Spring Semester  
Legal liability, personal injury, negligence and other related legal aspects of sports and exercise science.  
PREREQUISITE: BACKGROUND AND EXPERIENCE OR PERMISSION.

KIN566 Organization and Administration of Sports Programs  
3 credits Fall Semester  
Administrative and organizational procedures and problems specific to athletic administration, recreation and leisure sports administration, and physical education.  
PREREQUISITE: BACKGROUND AND EXPERIENCE IN EXERCISE SCIENCE OR PERMISSION.

KIN567 Elements of Sports Psychology  
1- 3 credits Fall & Spring Semester & First & Second Summer Session  
Introduction to the study of sport and exercise psychology including theory, current research and practical application.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN568 Developmental Sports Psychology  
3 credits Offered By Announcement Only  
Examination of the concept of sport psychology which includes but is not limited to performance, enhancement, student performance and academic application.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN570 Advanced Programming  
3 credits Fall & Spring Semester  
Advance programming allows students to dissect sports by movement, metabolism and limitation. The course investigates current trends and evidenced based applications of specific training techniques for optimal sport performance. Students will perform complete sports analysis and develop periodized programs for major sports.

KIN571 Sport Industry in South Florida  
3 credits Spring Semester  
This course will examine the various sport based organizations/events that are part of the sport industry in South Florida. Study of these organizations/events will include (a) products/services produced, (b) organizational structure, (c) economic impact on the local community, (d) key management personnel, (e) physical facilities, and (f) internship/employment opportunities.

KIN572 Creative Approaches to Problem Solving and Conflict Management  
3 credits Spring Semester  
This hands-on course will examine the concepts of problem solving and conflict management from both personal and organizational perspectives. Students will have the opportunity to study in-depth both of these concepts (and the relationship between them) through a combination of lecture, theory, individual and group activities, readings, practical exercises, and self-assessment tools.

KIN573 ADVANCED SPORT GOVERNANCE  
3 credits Spring Semester & Second Summer Session  
This course provides the student with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and Olympic levels. In addition, policy development in sport management will be explored.  
PREREQUISITE: GRADUATE STANDING.
KIN574 Ethical Decision Making in Sports and the Professions
3 credits  Fall & Spring Semester
This course will examine ethical decision-making in a variety of environments with an emphasis on sport professions. Real and hypothetical situations will be utilized, and the course will combine theory with practical application. The case method in sport ethics will be incorporated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN575 Essential Leadership in Sport and the Professions
3 credits  Fall & Spring Semester
This course will examine the concept of leadership as it pertains to sports and other professions. Various leadership and management skills will be included with a focus on practical applications in a work environment. Theory and self-assessment strategies will be incorporated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN576 Practical Approach to Motivation and Ethical Decision Making
1-3 credits  Spring Semester
A critical study of practical problems of professionals in Exercise and Sport Sciences.
PREREQUISITE: BACKGROUND AND EXPERIENCE OR PERMISSION.

KIN577 Advanced Nutrition for Health and Fitness
3 credits  Fall & Spring Semester & First & Second Summer Session
This course presents an in-depth study of the nutritional concerns of today's Recreational and competitive athlete. Topics include dehydration, classic carbohydrate loading, protein needs, ergogenic aids, and more. State-of-the-art research in the field is provided. This is also a writing intensive course. Thus, writing skills will represent an integral part of one's grade.
PREREQUISITE: KIN 155 AND 221 OR 521 (FORMALLY ESS 155, 221 AND 521).

KIN578 Pharmacology for Allied Health Professionals
3 credits  Spring Semester
The study of drug families and drugs in common use across spectra of age, illness, disease, and disability. Students will understand body systems treated with current pharmaceuticals over-the-counter (OTC) medications, and neutratechuals. Actions, key adverse effects, and influences on individuals undergoing physical activity will be emphasized.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).

KIN579 Principles of Exercise Prescription/Assessment: Cardiovascular
3 credits  Spring Semester
This course presents a comprehensive overview of the physical, physiological and metabolic responses of the human body to exercise testing and training both in health and disease. The successful student will gain an understanding of the process involved in prescribing safe and effective therapeutic exercise in healthy individuals as well as patients with heart and lung disease, diabetes and obesity. An overview of environmental and legal considerations in the prescriptive process will also be discussed.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).
KIN580 Principles of Exercise Prescription: Neuromuscular

3 credits  
Spring Semester
An examination of the scientific bases of modern training techniques designed to optimize performance, their functional application and potential impact on performance in sport and everyday activity.
PREREQUISITE: KIN 520 AND 521 OR PERMISSION OF THE INSTRUCTOR (FORMALLY ESS 520 AND 521).

KIN581 Development and Maturation of Athletes.

3 credits  
Spring Semester
This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes as it impacts physical performance. Additionally, students will learn the bases of pediatric exercise physiology in order to understand the concepts of motor development, strength, aerobic and anaerobic performance in the pediatric population.

KIN585 Advanced Topics in Kinesiology and Sport Sciences

3 credits  
Spring Semester & First & Second Summer Session
This course will provide a synthesis of essential concepts in specialty subjects relevant to one's field of interest.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN586 Exercise Prescription/Assessment Laboratory

3 credits  
Fall Semester
This course presents an overview of the laboratory techniques used to assess cardiovascular endurance and general fitness, pulmonary function and anaerobias observed during competition.
PREREQUISITE: KIN 579 (FORMALLY ESS 579).

KIN587 Laboratory Experience in Sports Nutrition

3 credits  
Spring Semester
This laboratory class provides case study analyses and computerized nutrient analysis systems designed to evaluate nutrition and hydration needs of the recreational and competitive athlete. From urinalysis and blood work to body composition and computerized nutrient data base systems, this laboratory provides a clinical approach to evaluating the nutrition status of the exercising individual. Co requisite: ESS 577.
PREREQUISITE: COREQUISITE ESS 577.

KIN588 Advanced Gross Anatomy in Kinesiology and Sport Sciences

3 credits  
Spring Semester
Human dissection of the major muscles, arteries and nerves of the body. Course is held at the University of Miami, Medical Campus, and cadaver laboratory. Special consideration is given to injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. Students are required to pay a $100 laboratory fee for the class. This course is to be taken by undergraduate Athletic Training majors and for the 5-year Sports Medicine with a Concentration in Athletic Training program students only.
PREREQUISITE: MUST BE ATHLETIC TRAINING MAJORS OR IN THE 5-YEAR SPORTS MEDICINE WITH A CONCENTRATION IN ATHLETIC TRAINING PROGRAM.
KIN589 Directed Readings in Kinesiology and Sport Sciences
3 credits                           Fall & Spring Semester & First & Second Summer Session
Directed Readings focusing on research and contemporary trends in the field.
PREREQUISITE: PERMISSION OF CHAIRPERSON.

KIN590 Special Topics in Kinesiology and Sport Sciences
1-3 credits                         Fall & Spring Semester & First & Second Summer Session
This course is designed for students wishing to focus on a specific area of study within the umbrella of the Kinesiology and Sport Sciences curriculum. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.
PREREQUISITE: BACKGROUND AND EXPERIENCE OR PERMISSION.

KIN599 Advanced Programming for Endurance Athletes
3 credits                           Fall & Spring Semester
This course provides students with training techniques to improve aerobic capacity, endurance, and lactate threshold for optimal performance. Students will review evidenced based principles of sports nutrition, strategies to ensure proper hydration, thermoregulation, and fuel (substrate) availability during prolonged exercise as well as develop programs for competitive sports including triathlon, marathon, and cycling.

TEACHING AND LEARNING
TAL101 Social and Technological Foundations of Education.
3 credits                           Fall & Spring Semester
Interdisciplinary overview of the historical development of education in the United States. Topics include history of education, schooling as a social institution, school funding, ethics, legal issues, racism, social class, sexism, homophobia and heterosexism, language-based discrimination and religion. This course emphasizes the interdependent nature of school and culture; it critically analyzes issues facing children, parents, and educators using this larger cultural framework.

TAL102 Educational Technology Laboratory
1 credit                            Fall & Spring Semester
Applications of technology to education, including use of technology in instruction, assessment, and productivity. Field based. Co requisite: TAL 101.

TAL103 Psychological Foundations of Education
3 credits                           Fall & Spring Semester
Overview of major frameworks in psychology that inform teaching and learning within classroom settings. Major theories of development related to language, affect and cognition across the life span and within diverse settings. Attention is drawn to contributions from social and personality psychology, cognitive science, testing and psychometrics to promote learning through classroom instruction and assessment.

TAL107 American Sign Language I
3 credits                           Fall Semester
This course is designed to allow participants to learn about Deaf Culture and be able to sign with sufficient fluency to discuss work, social, and family topics using two to four sentence responses.

TAL191 Developmental Reading for College Students
3 credits                           Fall & Spring Semester
Instruction in college level reading strategies based on individual student needs. Emphasis on vocabulary, comprehension and techniques of test preparation.
TAL203 Children's Literature
3 credits  
Fall & Spring Semester
History, trends, and genres of children's literature with emphasis on children's literature as a curriculum resource.

TAL204 Building Positive Relationships in Diverse Inclusive Secondary Schools.
3 credits  
Fall & Spring Semester
Course is designed to assist general education teachers in meeting the needs of diverse secondary school students. Emphasis is placed on language and culture in the classroom, as well as students with disabilities.
PREREQUISITE: TAL 101.

TAL207 American Sign Language II
3 credits  
Spring Semester
This course is designed to allow participants to learn about Deaf Culture and be able to sign with sufficient fluency to discuss work, social, and family topics using four to six sentence responses. Students will be able to independently participate in a signed conversation without the use of voicing.
PREREQUISITE: TAL 107 (ASL I).

TAL304 Content Area Reading and Learning Strategies
3 credits  
Fall & Spring Semester
Essentials of literacy instruction in different subject areas for middle, junior, and senior high schools; instructional methods and materials for development of language arts, reading, and study skills. Emphasis is placed on selecting appropriate materials, motivating students, and helping students with exceptional needs and students who are English language learners. Field experience required.

TAL305 Classroom and Behavior Management
3 credits  
Fall & Spring Semester
The principles of behavior analysis and classroom management strategies, both preventative and problem solving. Special emphasis includes effective communication with students, parents and other stakeholders; meeting the needs of all learners based on individual differences, cultural and linguistic diversity; knowledge of research-based strategies that support intellectual, personal and social well-being and development of all students; planning and conducting lessons in a safe, efficient and supportive learning environment. Field experience required.
PREREQUISITE: TAL 101

TAL308 Language Development for Linguistically and Culturally Diverse Children
3 credits  
Fall & Spring Semester
Course provides an introduction to theories of linguistics as well as first and second language acquisition. Readings and lectures serve to highlight the development of language and language challenges faced by students for whom Standard English is a second language and/or a second dialect. Theories of linguistics are used to identify, explain and assess literacy challenges. Field experience required. This course counts as one of two required stand-alone ESOL courses.
PREREQUISITE: TAL 103
TAL320 Introduction to Literacy Assessment and Instruction in Elementary School.
3 credits  Fall & Spring Semester
Multidisciplinary survey of reading and writing acquisition in the elementary school. Assessment and instruction in the major components of reading: phonological awareness, word identification and phonics, fluency, vocabulary, and comprehension. PREREQUISITE: TAL 308 OR TAL 506; APPLICATION TO TEACHER CANDIDACY. COREQUISITE: TAL 321

TAL321 Language Arts in the Elementary School.
3 credits  Fall & Spring Semester
This course focuses on competencies in reading, writing, listening, speaking, viewing and visual representation. Children's literature is infused. Emphasis on research-based practices and multicultural awareness. Field experience required. PREREQUISITE: TAL 308 OR TAL 506; APPLICATION TO TEACHER CANDIDACY. COREQUISITE: TAL 320

TAL322 Mathematics Instruction in the Elementary School
3 credits  Fall & Spring Semester
TAL323 Science and Social Studies Instruction in the Elementary School
3 credits  Fall & Spring Semester
TAL324 Education and the Arts
3 credits  Fall & Spring Semester
Exploration of the fine and performing arts and their relation to Pre-K to 12 educations. Emphasis is placed on experiential learning and methods of incorporating the arts in school curricula. The course also includes a focus on the value of the arts to the individual and society. PREREQUISITE: SOPHOMORE STANDING AND ABOVE.

TAL330 Introduction to the Education of Exceptional Individuals
3 credits  Fall & Spring Semester
A survey course providing a general orientation to Exceptional Individual Education as an integral part of the general education structure. Includes an introduction to appropriate educational programs for exceptional individuals.

TAL332 Assessment of Exceptional Students
3 credits  Spring Semester
Assessment process and techniques used in the identification, assessment, and instruction of exceptional students. PREREQUISITE: TAL 101, 102, 202, 205, 330.

TAL341 Introduction to Models of Curriculum Development in TESOL
3 credits  Offered By Announcement Only
This course is designed to provide participants with professional training in developing multicultural curricula and instructional materials for students in the process of learning English as a new language. PREREQUISITE: TAL 101; 102; 243 OR PERMISSION OF INSTRUCTOR.
TAL360 The Teacher in American Society
3 credits Fall & Spring Semester
This course focuses on the historical development of teaching in the US, contemporary educational reform and social change, issues involving teacher work, the impact of technology on schooling, ethical and legal issues in teaching, topics involving Race, Gender, Social Class and Equity. Popular Culture sources are emphasized in the course's content.

TAL390 Topics in Education
3 credits Spring Semester
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.

TAL420 Introduction to Literacy, Assessment, and Instruction in Elementary School
3 credits Fall & Spring Semester
Literacy instruction in the elementary school with emphasis on curriculum, methods and materials for teaching reading, writing, listening, speaking, and viewing. Field experience is required. Co requisite: TAL 421.
PREREQUISITE: TAL 308; APPLICATION TO TEACHER CANDIDACY; COREQUISITE: TAL 421

TAL421 Language Arts in the Elementary School
3 credits Fall & Spring Semester
A continuation of TAL 420 with an emphasis on assessment, and adaptation. Field experience is required. Co requisite: TAL 420.
PREREQUISITE: TAL 308; APPLICATION TO TEACHER CANDIDACY; COREQUISITE: TAL 420

TAL422 Mathematics Instruction in the Elementary School
3 credits Fall & Spring Semester
Principles and practices in the teaching of elementary-school mathematics. Attention is paid to infusion of technology, linguistic and cultural diversity, students with exceptionalities, and the origins of gender bias. Field experience required.
PREREQUISITE: APPLICATION TO TEACHER CANDIDACY.

TAL425 Inclusive Classrooms in the Elementary School
3 credits Fall & Spring Semester
The course prepares elementary school teachers to meet the individual needs of students with exceptionalities who have been integrated into the general education classroom. Field experience required.

TAL426 Practicum in Reading
3 credits Fall & Spring Semester
Supervised practicum in reading and writing. Emphasis is on assessment and interventions for elementary students with a range of academic, linguistic and cultural challenges in becoming proficient readers.
PREREQUISITE: TAL 320 AND 321.
TAL428 ESOL Curriculum and Methods and Assessments
3 credits Fall & Spring Semester
The course addresses the application of TESOL theories, principles, and current research to the use of curriculum, methods, and assessment. In doing so, the course focuses on an understanding of the differences between curriculum, methods, and assessment designed for children who are native speakers of Standard English and those designed for ESOL. Specific TESOL modifications appropriate for content areas are also addressed. Field experience required. This course counts as the second of two required ESOL specific courses.
PREREQUISITE: TAL 308 OR TAL 506

TAL432 Curriculum and Instruction in Exceptional Student Education for K-6 Settings
3 credits Fall Semester
Instructional strategies and materials appropriate for teaching students enrolled in Exceptional Student Education programs in K-6 settings. Students must be enrolled concurrently in TAL 434. 50 hours of field experience required in an assigned K-6 ESE setting.
PREREQUISITE: TAL 101, 102, 202, 205, 330, 332, AND ADMISSION TO TEACHER CANDIDACY.

TAL434 Curriculum and Instruction in Exceptional Student Education for Grades 7-12 Set
3 credits Fall Semester
Instructional strategies and materials appropriate for teaching students enrolled in Exceptional Student Education programs in grades 7-12 settings. Students must be enrolled concurrently in TAL 432. 50 hours of field experience required in an assigned K-6 ESE setting.
PREREQUISITE: TAL 101, 102, 202, 205, 330, 332, AND ADMISSION TO TEACHER CANDIDACY.

TAL444 Instruction in Secondary Science
2-3 credits Fall Semester
Analysis of methods, materials, and content appropriate for teaching science in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL446 Methods of Teaching Theatre
3 credits Offered By Announcement Only
Analysis of methods, materials, and content appropriate for teaching the theatre arts in elementary and secondary school.

TAL460 Teaching and Learning in Context
3 credits Offered By Announcement Only
This capstone course, taken just prior to Associate Teaching, provides an in-depth treatment of theories and practices in teaching and learning from cognitive and sociocultural perspectives. Includes classroom applications of modern learning theories; ethical, cultural, and legal issues in teaching. The course reviews and reinforces observation skills and reflective teaching practices. The course emphasizes the relationship of theory and practice as students prepare for associate teaching.
PREREQUISITE: CO-REQUISITE: APPLICATION TO ASSOCIATE TEACHING IS PENDING.

TAL470 Associate Teaching in the Elementary School (Semester-Long)
6-9 credits Fall & Spring Semester
A comprehensive semester-long program in observation and supervised teaching in the elementary school. The student spends full time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel.
PREREQUISITE: ACCEPTANCE TO ASSOCIATE TEACHING. COREQUISITE: TAL 480
TAL471 Associate Teaching in the Elementary Schools for K-12 Areas

3-6 credits  
Fall & Spring Semester

A comprehensive program in observation and supervised teaching in the elementary school. The student spends full-time for one half a semester in an elementary school, participating in all activities of the teacher under the guidance of school and university personnel.

PREREQUISITE: APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

TAL473 Associate Teaching in the Secondary School for K-12 Areas

3-6 credits  
Fall & Spring Semester

A comprehensive program in observation and supervised teaching in the secondary school. The student spends full time for one half a semester in a secondary school, participating in all activities of the teacher under the guidance of school and university personnel.

PREREQUISITE: APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

TAL477 Field Experience in Education

1-9 credits  
Offered By Announcement Only

Placement in government agencies, medical centers, adult education centers, public and private school classrooms, community agencies, and local businesses related to academic course work or area of interest. A minimum of 30 hours per credit of supervised field experience. One hour bi-weekly integrative seminars with faculty supervisors to focus on personal meaning derived from and given to the experience, self-evaluation, group sharing, and discussion of commonalities of experiences is required.

PREREQUISITE: PERMISSION OF ADVISOR.

TAL478 Associate Teaching in Elementary School (Year-Long)

4-8 credits  
Offered By Announcement Only

A comprehensive year-long program in observation and supervised teaching in the elementary school. The student spends full time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel following the calendar of the school system.

PREREQUISITE: APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

TAL480 Seminar on Teaching

1-3 credits  
Fall & Spring Semester

The seminar is designed to support teacher candidates during the associate teaching experience. Students receive support and assistance in completing Florida Educator Accomplished Practices (FEAP) electronic portfolios. Students share, reflect, and discuss their daily experiences in class during culminating experience in the field.

PREREQUISITE: COREQUISITE: CONCURRENT WITH ASSOCIATE TEACHING.

TAL490 Advance Topics in Education

3 credits  
Spring Semester

Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.
TAL491 Applied Research in Education
3 credits
Fall & Spring Semester
Introduction to basic research methods, ethics in education research, and the implications of research on the practice of teaching. Assist a TAL faculty member with a research project.
PREREQUISITE: FINGERPRINT CLEARANCE FROM MDCPS TAL 101 OR 103 OR PERMISSION OF INSTRUCTOR.

TAL493 Online Teaching & Leadership
3 credits
Fall & Spring Semester
Introduction to teaching-learning process in online learning environments, including asynchronous modalities, assessment and evaluation, technology and digital copyright usage.
PREREQUISITE: TBD

TAL495 Individual Study
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study will be required.
PREREQUISITE: PERMISSION OF DIRECTING FACULTY MEMBER AND DEPARTMENT CHAIRMAN.

TAL501 Classroom Based Assessment
3 credits
Fall & Spring Semester
Principles and classroom applications of educational measurement and assessment.

TAL502 Classroom Based Research
3 credits
Offered By Announcement Only
Application of research principles to evaluation and improvement of teacher effectiveness. Use of scientific methods in problem solving and decision making in the classroom. Student experiences in the planning, conduct, analysis and reporting of classroom research are included.

TAL503 Technology Applications in Education
3 credits
Fall & Spring Semester
Technology and its role in transforming teaching and learning; core academic-curriculum literacy; and education social systems.

TAL504 Building Positive Relationships in Inclusive Secondary Schools
3 credits
Fall & Spring Semester
Designed to assist general education teachers in meeting the needs of diverse secondary school students. Focus on students with disabilities, language and culture in the classroom, and developing culturally competent classroom management methods.
PREREQUISITE: TAL 101

TAL506 Issues and Strategies for ESOL
3 credits
Offered By Announcement Only
This course provides a comprehensive foundation in ESOL (English for Speakers of Other Languages) competencies based on Florida's mandates and TESOL standards. Theory and practice will be emphasized in the areas of applied linguistics, cross cultural communication and understanding, methods of teaching, assessment, and curriculum and material development.
PREREQUISITE: TAL 101 AND 204 OR PERMISSION OF INSTRUCTOR.
TAL508 Language Development for Linguistically and Culturally Diverse Students
3 credits                    Fall & Spring Semester & First & Second Summer Session
Course will provide an introduction to theories of linguistics, first and second
language acquisition, as well as foundations of English learner education. Readings
and lectures will serve to highlight the development of language and literacy,
including challenges faced by students for whom Standard English is a second language
and/or a second dialect. This course will be the first in a two-course ESOL sequence.

TAL517 Curriculum, Assessment, Teaching and Learning for Physical Science
3 credits                                                    Fall & Spring Semester
Analysis of content knowledge, pedagogy, and materials appropriate for teaching
physical science in the elementary school. The course content focuses on instructional
practice with an emphasis on developing teacher content knowledge in physical science,
pedagogy, and student literacy in physical science.

TAL518 Curriculum, Assessment, Teaching and Learning for Number, Operations, and Algeb
3 credits                                                    Fall & Spring Semester
This course examines topics that address the mathematical ideas underlying number,
operations and algebra. Related curriculum, instructional and assessment issues
will be also discussed.

TAL520 Curriculum, Assessment, Teaching and Learning for Measurement and Geometry
3 credits                    Fall & Spring Semester & First & Second Summer Session
Topics involving measurement and geometry in the K-16 mathematics curriculum, how
students learn and reason, assessment, instructional strategies.
PREREQUISITE: GRADUATE STUDENT; ADVANCED UNDERGRADUATE WITH CONSENT OF PROFESSOR.

TAL521 Curriculum, Assessment, Teaching and Learning for the Life Sciences
3 credits                                                    Fall & Spring Semester
Analysis of content knowledge, pedagogy, and materials appropriate for teaching
life science in the elementary school. The course content focuses on instructional
practice with an emphasis on developing teacher content knowledge in life science,
pedagogy, and student literacy in life science.

TAL522 Curriculum, Assessment, Teaching and Learning in the Earth Sciences
3 credits                                                    Fall & Spring Semester
Analysis of content knowledge, pedagogy, and materials appropriate for teaching
Earth science in the elementary school. The course content focuses on instructional
practice with an emphasis on developing teacher content knowledge in Earth science,
pedagogy, and student literacy in life science.
PREREQUISITE: ADMISSION TO THE GRADUATE SCHOOL

TAL523 Curriculum, Assessment, Teaching and Learning for Data Analysis and Probability
3 credits                    Fall & Spring Semester & First & Second Summer Session
Data in the elementary school: how to gather (biased and unbiased samples), store,
manage, represent, analyze. Probabilistic inferences in elementary school: chance,
ods, counting, related topics.
PREREQUISITE: GRADUATE STUDENT; ADVANCED UNDERGRADUATE WITH CONSENT OF PROFESSOR.

TAL524 Education and the Arts
3 credits                                                    Fall & Spring Semester
Exploration of the fine and performing arts and their relation to PreK-12 education.
Emphasis is placed on experiential learning and methods of incorporating the arts
in school curricula. The course also includes a focus on the value of the arts
to the individual and society.
TAL526 Practicum in Reading
3 credits  Fall & Spring Semester
Supervised practicum in reading and writing. Emphasis is on assessment and interventions for elementary students with a range of academic, linguistic and cultural challenges in becoming proficient readers.
PREREQUISITE: TAL 320, TAL 321

TAL527 Language and Assessment in ESOL
3 credits  Offered By Announcement Only
Study of language systems with a focus on understanding and applying linguistic terms. Course prepares teachers to conduct informal and formal assessment procedures with English language learners. Field experience with English language learners is required.
PREREQUISITE: TAL 531, 550 OR 620, 603, 622.

TAL528 ESOL Curriculum, Methods, and Assessment.
3 credits  Offered By Announcement Only
This course focuses on applying TESOL theories, principles, and current research to the development and use of instructional materials, curriculum, and methods. The course will enhance participant's knowledge of the regular English language arts curriculum in comparison with the ESOL curriculum.
PREREQUISITE: TAL 506.

TAL531 Educating Exceptional Students
3 credits  Fall & Spring Semester
A survey course in special education emphasizing characteristics and problems associated with various categories of exceptional learners. Policy, issues, and trends in special education will be discussed

TAL540 Instruction and Assessment in the Secondary School.
3 credits  Fall & Spring Semester
Research-based instructional processes in the secondary school.
PREREQUISITE: APPLICATION TO TEACHER CANDIDACY.

TAL541 Instruction in Secondary English.
2-3 credits  Fall Semester
Analysis of methods, materials, and content appropriate for teaching language arts in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL542 Instruction in Secondary Mathematics.
3 credits  Offered By Announcement Only
Analysis of methods, materials, and content appropriate for teaching mathematics in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL543 Instruction in Secondary Science.
3 credits  Offered By Announcement Only
Analysis of methods, materials, and content appropriate for teaching science in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
TAL544 Instruction in Secondary Social Studies.
2-3 credits Fall Semester
Analysis of methods, materials, and content appropriate for teaching the social sciences in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL550 Language and Early Reading Instruction
3 credits Fall Semester
Factors related to emergent literacy with an emphasis on diverse aspects of language that influence literacy and learning; development of emergent literacy and word perception; emergent literacy curriculum development; appropriate assessment and instructional techniques. Understanding of reading as a process of student engagement in fluent decoding and construction of meaning. Writing intensive.

TAL551 Word Perception in Reading
3 credits Offered By Announcement Only
Administration and interpretation of a standard reading inventory. An examination of the word recognition and vocabulary curriculum as well as appropriate assessment devices and instructional techniques.

TAL552 Reading Comprehension
3 credits Spring Semester
Development of comprehension, rate, and study skills; reading in the content areas; evaluation of materials, organization of programs; issues, problems, and exceptional readers. Emphasis is placed on understanding reading as a process of student engagement in fluent decoding of words and construction of meaning.

TAL553 Mentoring and Internship in Classroom Teaching
3-6 credits Fall & Spring Semester
A comprehensive program of supervised teaching in elementary or secondary classrooms.
PREREQUISITE: ONE YEAR OF TEACHING EXPERIENCE OR ATTENDANCE IN THE TAECH FOR AMERICA SUMMER INSTITUTE.

TAL554 Literacy and Learning Strategies in the Content Area
3 credits Fall & Spring Semester
Literacy instruction in content areas for grades 6 through 12; instructional methods and materials for development of language arts, reading, and study skills. Emphasis on appropriate materials, motivation, and support for students with exceptional needs and English language learners.

TAL557 Exceptional Student Education and Classroom Management
1-5 credits Fall & Spring Semester
Introduction to theories and methods of effective classroom management and learning environments, perceptions of disabilities, addressing disruptive behaviors in classrooms and behavioral assessment.

TAL558 ESOL Strategies and Classroom Management
1-5 credits Fall & Spring Semester
This course provides a general overview of foundation in ESOL (English for Speakers of Other Languages) competencies based on Florida's mandates and ESOL Standards. Theory and practice will be emphasized in the areas of applied linguistics, cross cultural communication and understanding, methods of teaching, assessment, and curriculum and material development. A Classroom Management Plan will be developed based on current issues and effective classroom strategies for diverse populations.
TAL560 The Teacher in American Society  
3 credits  
Fall & Spring Semester  
This course focuses on the historical development of teaching in the US, contemporary educational reform and social change, issues involving teacher work, the impact of technology on schooling, ethical and legal issues in teaching, topics involving Race, Gender, Social Class and Equity. Popular Culture sources are emphasized. Course designed for graduate credit.

TAL568 Reform, Politics and Social Organizations of Schooling  
3 credits  
Fall & Spring Semester

TAL569 Teaching and Management for Diverse Classrooms  
3 credits  
Fall & Spring Semester  
This course will emphasize building a classroom culture and community that meets the needs of all students, including learners with disabilities and learners with culturally and linguistically diverse backgrounds. A history of major legal requirements for diverse populations is examined, including the meaning of learning differences, definitions and causes of disabilities, language acquisition processes, and methods for teaching diverse populations. An introduction to theories and methods of effective classroom management for building learning communities is integrated throughout the course.  
PREREQUISITE: CO-REQUISITE(S): GRADUATE ADMISSION TO THE EDUCATION AND SOCIAL CHANGE PROGRAM TRACK

TAL570 Associate Teaching in the Elementary School.  
6-9 credits  
Offered By Announcement Only  
A comprehensive semester-long program in observation and supervised teaching in the elementary school. The student spends full-time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel.  
PREREQUISITE: ACCEPTANCE TO ASSOCIATE TEACHING.

TAL572 Associate Teaching in the Secondary School.  
6-9 credits  
Offered By Announcement Only  
A comprehensive program in observation and supervised teaching in the secondary school. The student spends full-time in a secondary school participating in all activities of the teacher under the guidance of school and university personnel.  
PREREQUISITE: ACCEPTANCE TO ASSOCIATE TEACHING.

TAL577 Human Development, Learning and Schooling  
3 credits  
Fall & Spring Semester  
PREREQUISITE: STUDENT IN GOOD STANDING IN THE MASTERS OF SCIENCE IN EDUCATION DEGREE PROGRAM IN ADVANCED EDUCATIONAL STUDIES: EDUCATION AND SOCIAL CHANGE

TAL580 Seminar on Teaching  
1-3 credits  
Offered By Announcement Only  
Topical seminar to accompany associate teaching

TAL584 Topics in the Professional Development and Supervision of Teachers.  
3 credits  
Offered By Announcement Only  
Topics include the preparation of clinical teachers to induct, guide, and supervise the field experiences of students and associate teachers; techniques in the observation and supervision of in-service teachers; creation and implementation of professional development plans; reading in the research on teacher development across the career.  
PREREQUISITE: TEACHING EXPERIENCE.
TAL590 Topics in Education
3 credits
Spring Semester
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.

TAL591 Workshop in Education
1-6 credits
Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL592 Seminar in Teaching English as a Foreign Language
3 credits
Offered By Announcement Only
This course is designed to provide prospective international teachers of English as a new language with essential strategies and multiple models of teaching techniques; and the theoretical framework to apply these strategies and techniques.
PREREQUISITE: ADMISSION TO GRADUATE PROGRAM

TAL593 Online Teaching and Leadership
3 credits
Fall & Spring Semester
Introduction to teaching-learning process in online learning environments, including asynchronous modalities, assessment and evaluation, technology and digital copyright usage.
PREREQUISITE: TBD

TAL594 Workshop in Education
1-6 credits
Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL595 Workshop in Education
1-6 credits
Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL596 Workshop in Education
1-6 credits
Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL597 Workshop in Education
1-6 credits
Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.
TAL598 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL599 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.
BME100 Introduction to Biomedical Engineering for Summer Scholars
3 credits  First & Second Summer Session
This introductory course is designed to expose high school students to biomedical engineering. The program is designed for the exemplary high school student interested in applied mathematics and science. The students will be provided with an understanding and some hands-on experience on topics relative to the discipline of Biomedical Engineering. The course content changes throughout the 3-week duration and includes topics on lasers, medical imaging, biomaterials, bioelectricity and biomechanics. The students will be able to understand the challenges associated with the design, testing and FDA clearance of biomedical devices and the importance of the scientific methods in engineering... The laboratory and field trip experiences will deal with the design and testing of a bioelectric device. Summer Scholar Students only.
PREREQUISITE: SUMMER SCHOLAR STUDENTS ONLY.

BME111 Introduction to Engineering I
3 credits  Fall & Spring Semester
Use of engineering tools for problem solving is discussed. Topics include the use of computer techniques for data acquisition, analysis, presentation, software design, computer aided drafting, and development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.

BME112 Introduction to Engineering II
0-2 credits  Fall & Spring Semester
Introduction to biomedical engineering analysis, design, and manufacturing processes. Ethics, regulatory factors, and biomedical engineering design tools (mechanical, electrical and computer tools) are introduced. Hands on experience is provided through a project in which the students design, assemble, program, and test biomedical devices.
PREREQUISITE: BME 111.

BME265 Medical Systems Physiology
3 credits  Spring Semester
Human physiological processes from a bioengineering and medical point of view. Pertinent aspects of anatomy, biophysics, biochemistry, and disease mechanisms are also included.
PREREQUISITE: BIL 150, 151, CHM 112.

BME302 Cellular Engineering
3 credits  Spring Semester
PREREQUISITE: BIL 160, CHM 111

BME305 Biomedical Technology
3 credits  Spring Semester
Non-mathematical introduction to technical and clinical aspects of biomedical engineering. Biomedical signals and instrumentation, sensors, transducers, physiological measurements, laboratory instrumentation, implants, cardiac assist devices, radiology, ultrasound, CT, MRI, transmission, and scanning electron microscopy. Field trips to clinical and research laboratories are included. Open only to non-BME students.
PREREQUISITE: BIL 150, CHM 111.
BME310 Mathematical Analysis in Biomedical Engineering  
3 credits  
Fall & Spring Semester  
Mathematical modeling of physiological and other biomedical engineering systems and devices. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological regulation and control in biosystems.  
PREREQUISITE: MTH 311

BME311 MATLAB for Biomedical Engineers  
1 credit  
Fall & Spring Semester  
Laboratory course for applications of Matlab in biomedical engineering. Upon the completion of this course, students will be able to write Matlab scripts to solve engineering problems and perform basic analysis and processing of biomedical signals. The course includes Matlab programming environment; Metlab variables; FOR, IF and WHILE statements, plotting and advance graphics, user defined functions, symbolic computation, data file management and graphical user interfaces. The course concludes with a final project focused in biomedical applications.  
PREREQUISITE: EEN 118; PREREQUISITE OR COREQUISITE BME 310

BME320 The Evolution of Technology  
3 credits  
Spring Semester  
Organized and taught by an interdisciplinary team, this innovative course is designed for juniors and seniors. An experimental elective, the course uses multimedia to explore the ways in which innovation is driven by the needs of society and individuals, and nurtured by improvements in tools and production. Five broad subject areas will receive special attention: survival, communication, transportation, entertainment and medicine.  
PREREQUISITE: JUNIOR STANDING OR HIGHER, OR PERMISSION OF THE INSTRUCTORS.

BME330 Foundations of Medical Imaging  
3 credits  
Fall Semester  
Physical and biological principles of medical imaging, including ultrasound, X-ray, nuclear, magnetic resonance, electrical impedance and optical imaging. Propagation and interaction of ultrasonic waves, light waves, X-ray photons, and nuclear radiation in hard and soft biological tissue. Co requisite: BME 310.  
PREREQUISITE: PRE OR CO-REQUISITE: BME 310

BME335 Biomaterials  
3 credits  
Fall & Spring Semester  
Introduction to the field of Biomaterials. Review of materials science for four main types of biomaterials: ceramics, metals, polymers, and composites. Lectures on special topics given by guest lecturers who are active in their specific areas, under supervision of the instructor.

BME375 Fundamentals of Biomechanics  
3 credits  
Fall & Spring Semester  
Application of solid and fluid mechanics to describe the mechanical behavior of human motion, mechanical behavior of soft and hard biological tissues, cells and biofluids. Review of fundamental concepts and techniques of mechanics (stress, strain, constitutive relations). Focus on mechanical properties of specific tissues, including tendon, skin, smooth muscle, heart muscle, cartilage, and bone. Cellular and biofluid mechanics will be presented.
BME395 Undergraduate Research in Biomedical Engineering
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR

BME399 Cooperative Education
1 credit  Fall & Spring Semester & First & Second Summer Session
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. May be repeated.

BME401 Senior Project I
0-2 credits  Fall & Spring Semester
Planning Phase of an individual or group project for seniors, to be taken during the penultimate semester to graduation.
PREREQUISITE: SENIOR STANDING

BME402 Senior Project II
1-2 credits  Fall & Spring Semester
Completion of individual or group project for seniors, to be taken during the final semester before graduation. A total of 3 credits in this 401-402 sequence.
PREREQUISITE: BME 401

BME403
3 credits  Fall & Spring Semester
Completion of individual or group project for seniors, to be taken during the final semester before graduation.
PREREQUISITE: BME 402

BME440 Biomedical Measurements
0-4 credits  Fall & Spring Semester
Introduction to the principles of measurements in physiological and biological systems, as well as a discussion of measurable parameters, transducers, sensors, signal conditioning, and processing. Laboratory experiments are conducted in parallel with the course.
PREREQUISITE: BIL 150, 151

BME450 Biomedical Transport Phenomena
3 credits  Fall & Spring Semester
PREREQUISITE: BME 310

BME460 Introduction to Physiological Fluid Mechanics
3 credits  Spring Semester
The role of transport processes in biological systems, mathematical modeling of physiological fluid transport, conservation of mass and momentum rheology of blood flow in large and small vessels, approximation methods for the analysis of complex physiological flow, fluid flow in the circulation and tissue. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological fluid flow.
PREREQUISITE: BME 310 AND PHY 206

BME470 Biomedical Signal Analysis
3 credits  Fall & Spring Semester
PREREQUISITE: EEN 118, PRE OR CO: BME 440
BME480 Biomedical Instrumentation
3 credits  Fall & Spring Semester
Analysis and design of systems and electronic circuitry in medical and biological instrumentation. Treatment of bioelectric potentials electrodes, transducers, high gain-low noise input circuits, timing and switching circuits, biotelemetry, bioelectrodes, and bioelectric systems are discussed. Co requisite: BME 440.
PREREQUISITE: PRE OR COREQUISITE: BME 440

BME501 Unified Medical Sciences I
3 credits  Fall Semester
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry and certain aspects of clinical medicine are unified with an emphasis on cellular and sub cellular systems. Not open to BME undergraduates.
PREREQUISITE: PERMISSION OF COURSE COORDINATOR.

BME502 Unified Medical Sciences II
3 credits  Fall Semester
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on cardiovascular, renal, digestive, endocrine, and reproductive systems. Not open to BME undergraduates.
PREREQUISITE: PERMISSION OF COURSE COORDINATOR.

BME503 Unified Medical Science III
3 credits  Spring Semester
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on neural, sensory, and muscular systems. Not open to BME undergraduates.
PREREQUISITE: PERMISSION OF COURSE COORDINATOR.

BME506 Computer Aided Design in Biomedical Engineering
1 credit  Spring Semester
Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.
PREREQUISITE: BME 112, EEN 118

BME507 LabView Applications for Biomedical Engineering
1 credit  Spring Semester
Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.
PREREQUISITE: BME 112, EEN 118.

BME512 Regulatory Control of Biomedical Devices
3 credits  Spring Semester
Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.
BME520 Medical Imaging Systems
3 credits
Engineering and scientific principles of medical imaging systems. The concepts of instrumentation and diagnostic applications of different techniques and systems are presented. Demonstrations or exhibitions of medical systems are given in the visits to clinic and research laboratories. Topics include digital image and image processing fundamentals, radiographic (X-ray, CT), magnetic resonance (MRI) and radio-isotopic (PET) systems, and associated image reconstruction techniques. Basic concepts and simulation of imaging systems are emphasized.
PREREQUISITE: EEN 118, 201; COREQUISITE 470 OR EQUIVALENT.

BME521 Medical Imaging Applications
3 credits
Medical applications of imaging systems and image processing techniques. Topics include image fundamentals (resolution, format, and storage), image processing fundamentals (transformation, compression, enhancement, segmentation, registration, and reconstruction), and image analysis fundamentals (calibration, quantification, correlation, linearity and depiction). Course includes dedicated computer laboratory projects and demonstrations given in clinical and research laboratories at the medical campus. Co requisite: BME 570 or equivalent.
PREREQUISITE: EEN 118, 201; COREQUISITE: BME 470 OR EQUIVALENT.

BME522 Scanning Electron Microscopy in Biomedical Devices
3 credits
Physics and operating principles of scanning electron microscope (SEM), transmission electron microscope (TEM), and optical light microscope. Biological tissue preparation, storage, fixation and digital image storage. Each student will learn to use the SEM in the design and/or analysis of a biomedical device.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BME525 Special Problems
1- 3 credits
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: SENIOR OR GRADUATE STANDING; PERMISSION OF INSTRUCTOR.

BME526 Special Problems
1- 3 credits
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

BME529 Special Problems
1- 3 credits
Research and/or design projects. Individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.
BME531 Technical Entrepreneurship I
1 credit  Fall & Spring Semester
The first half of a two-semester sequence that simulates the work of a product development team to gain experience in technical entrepreneurship. The students propose product ideas, assess those collectively, select a few, form teams, define the product, and perform market analysis. The course is concluded with a business and technical development plan for the team's project. Lectures are presented on a variety of entrepreneurial topics.
PREREQUISITE: JUNIOR OR HIGHER STANDING.

BME532 Technical Entrepreneurship II
2 credits  Fall & Spring Semester
The second half of a two-semester sequence that simulates the work of a product development team to gain experience in technical entrepreneurship. The students complete the development of a working prototype and refine their marketing and business plan based on experience gained during the development phase. Lectures are presented on relevant entrepreneurial topics.
PREREQUISITE: JUNIOR OR HIGHER STANDING.

BME535 Advanced Biomaterials
3 credits  Offered By Announcement Only
Applications of biomaterials in different tissue and organ systems. Relationship between physical and chemical structure of materials and biological system response are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.
PREREQUISITE: BME 335 OR PERMISSION OF INSTRUCTOR.

BME540 Microcomputer-Based Medical Instrumentation
3 credits  Offered By Announcement Only
Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.
PREREQUISITE: EEN 304 AND 315, OR PERMISSION OF INSTRUCTOR.

BME541 Medical Electronic Systems Laboratory
2 credits  Spring Semester
PREREQUISITE: COREQUISITE: BME 540.

BME545 Biomedical Optical Instruments
3 credits  Fall Semester
Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, and ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.
PREREQUISITE: PHY 207, MTH 311 OR PERMISSION OF THE INSTRUCTOR.
BME546 Medical Applications of Lasers  
3 credits  
Spring Semester  
Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.  
PREREQUISITE: PHY 207, MTH 311 OR PERMISSION OF THE INSTRUCTOR.

BME550 Rehabilitation Engineering  
3 credits  
Fall Semester  
Principles of rehabilitation engineering with emphasis on currently used assistive devices for ambulation and hand motion. Human neural and muscle physiology, electromyography, functional electrical stimulation, artificial and biological sensors, control, and design aspects of active assistive devices for the handicapped are discussed.  
PREREQUISITE: EEN 305 OR PERMISSION OF INSTRUCTOR.

BME555 Fundamentals of Computational Neuroscience  
3 credits  
Spring Semester  
Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.  
PREREQUISITE: BME 265 OR PERMISSION. COREQUISITE: BME 470

BME565 Principles of Cellular and Tissue Engineering  
3 credits  
Fall Semester  
Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.  
PREREQUISITE: BIL 150, BME 335 OR PERMISSION OF INSTRUCTOR.

BME566 Cell and Tissue Engineering Laboratory  
1 credit  
Fall Semester  
PREREQUISITE: CO-REQ: BME 565

BME570 Biomedical Signal Processing  
3 credits  
Spring Semester  
Course topics include quantitative description, analysis, and processing of biophysical and physiological (cardiovascular, neural, sensory, muscular, respiratory and other) signals using computers. Survey of time-frequency representations, correlation, convolution, coherence, filtering, averaging, and classification is also included.  
PREREQUISITE: EEN 118, 470

BME571 Introduction to Biosignal Processing Lab  
1 credit  
Fall & Spring Semester  
Laboratory course in conjunction with BME 570 course. Co requisite: BME 570.  
PREREQUISITE: COREQUISITE: BME 570.
BME575 Biomechanics II
3 credits
Offered By Announcement Only
Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.
PREREQUISITE: BME 375.

BME581 Radiation Biology and Physics
3 credits
Fall Semester
The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BME 502 OR PERMISSION OF THE INSTRUCTOR.

BME582 Radiation Dosimetry
3 credits
Spring Semester
The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.
PREREQUISITE: BME 310, 581.

BME587 Finite Element Analysis for Engineers
3 credits
Fall & Spring Semester
Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electro-magnetic, optical, and fluid flow problems.
PREREQUISITE: MTH311 OR PERMISSION OF INSTRUCTOR

BME595 Graduate Research in Biomedical Engineering
1- 3 credits
Fall & Spring Semester & First & Second Summer Session
Research and design projects consisting of an individual investigation of current problems. Subject and credit to be arranged with the instructor.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BME599 Cooperative Education
1 credit
Offered By Announcement Only
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student’s field of study. Course may be repeated. Periodic reports and conferences are required.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
CAE100 Introduction to Civil, Architectural, and Environmental Engineering
3 credits                                 Second Summer Session
This introductory course is designed to expose high school students to a variety of specific disciplines within the civil engineering arena to assist them in making informed decisions about possible college majors. The program is designed for the exemplary high school student interested in applied mathematics and science. All students enrolled in this course will gain experience in problem solving, engineering mechanics, computer simulation, and laboratory activity. The course content changes throughout the 3-week duration and includes topics on civil engineering, environmental engineering, and architectural engineering. The students will be provided with an understanding and some hands-on experience on topics relative to the disciplines of civil, architectural, and environmental engineering. Via an introduction to several case histories, the students will be able to understand the challenges associated with the design and construction and importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with bridge building, material testing, water purification, and building systems.
PREREQUISITE: SUMMER SCHOLAR STUDENTS ONLY

CAE111 Introduction to Engineering I
3 credits                                                    Fall & Spring Semester
Use of engineering tools for problem solving. Computer techniques for data acquisition, analysis and presentation, software design, and computer aided drafting are covered. Development of design skills is achieved through several design and building competitions. Introduction to professional ethics and intellectual property rights, MATLAB, AutoCAD, and programming in C++ is also included.

CAE112 Introduction to Engineering II
2 credits                                                           Spring Semester
Hands-on applications of various surveying instruments for leveling, angles and distance measurements, and other engineering applications. Hands on application of Geographic Information Systems, including ArcView and extensions.
PREREQUISITE: CAE 111 OR PERMISSION OF INSTRUCTOR

CAE210 Mechanics of Solids I
3 credits                             Fall & Spring Semester & First Summer Session
Vectors, force systems, equilibrium, analysis of frames, machines, trusses for internal forces, friction, centroids, moment of inertia, and shear and bending moment diagrams are discussed.
PREREQUISITE: MTH 110 OR 111; OR COREQUISITE PHY 205; OR PERMISSION OF INSTRUCTOR.

CAE211 Mechanics of Solids II
3 credits                                                    Fall & Spring Semester
Flexural, shear, principal, and torsional stresses are discussed as well as displacements and instability. An introduction to statically indeterminate analysis is also included.

CAE212 Structural Laboratory
1 credit                                                     Fall & Spring Semester
Laboratory techniques, tests for tension, compression, shear, bending, and torsion are discussed. Models, similitudes, buckling of columns, and review of current research are also included. Laboratory 3 hours. Co requisite: CAE 211.
PREREQUISITE: CAE210, ENG107, IEN 311.  CO-REQUISITE OR PRE-REQUISITE: CAE 211
CAE213 Behavior of Structural Systems I
3 credits Fall Semester
Design and testing of experimental models of qualitative and quantitative prediction of full scale structural behavior. Investigation of single and multi-story rectangular frames, curved structures and longspan buildings. Application of graphical and analytical techniques to determine basic system layout and preliminary dimensioning of key subsystems and members is also included.
PREREQUISITE: ARC 231.

CAE240 Environmental Pollution
3 credits Spring Semester
Exploration of contemporary environmental issues. Introduction to engineering approaches for protecting and cleaning up the environment, techniques for assessing the impact of human activity on the environment, strategies for pollution control and implementation of environmental mitigation measures.
PREREQUISITE: SOPHOMORE STANDING.

CAE310 Structural Analysis
3 credits Fall & Spring Semester
Analysis of statically determinate and indeterminate structures for internal forces, external reactions, displacements, including influence lines.
PREREQUISITE: CAE 210, PHY 206.

CAE313 Behavior of Structural Systems II
3 credits Spring Semester
Overall analysis of simple and multi-story frame structures. Consideration of flat plates, prestressed concrete flat slabs, slab and beam, joist and girder, waffle and space truss systems, columns, wall and rigid frame subsystems under vertical and horizontal loads. Application of structural model analysis to supplant or supplement mathematical analysis is included.
PREREQUISITE: CAE 213.

CAE320 Concrete Structures
3 credits Fall & Spring Semester
Course topics include design of concrete beams, columns, structural systems one-way slabs, and isolated footings by ultimate design methods.
PREREQUISITE: CAE 310(CAE 310 IS A PREREQUISITE OR CO-REQUISITE FOR THIS COURSE)

CAE321 Steel Structures
3 credits Fall & Spring Semester
Design of tension, compression, flexural members, and beam columns using load and resistance factor design are discussed. Introduction to design and detailing of welded and bolted connections is also included.
PREREQUISITE: CAE 310.

CAE330 Fluid Mechanics
3 credits Fall & Spring Semester
Properties of fluids, gas systems, pressure distribution in static fluids, and hydrostatic forces on plane and curved surfaces are discussed. Kinematics and dynamics of fluid motion, dimensional analysis and similitude, flow in closed conduits, pumps, design of water distribution systems, and an introduction to flow in open channels is also included.
PREREQUISITE: CAE 210, PHY 206.
CAE340 Introduction to Environmental Engineering
3 credits Fall & Spring Semester
Environmental mass and energy balances, introduction to environmental chemistry, air pollution, water pollution, sustainable solid waste management, risk assessment, and global atmospheric change are discussed.
PREREQUISITE: MTH 112, CHM 111 OR 151 OR PERMISSION OF INSTRUCTOR.

CAE345 Environmental Laboratory
0-3 credits Fall Semester
Laboratory-based course focusing on the analysis of environmental samples including water, wastewater, air, and solids. Basic analytical techniques and quality control are also included as well as an introduction to advanced analytical measurements.
PREREQUISITE: CHM 112, CAE 340.

CAE350 Transportation Engineering I
3 credits Fall Semester
PREREQUISITE: MTH 211 (CALCULUS III) AND JUNIOR STANDING.

CAE370 Geotechnical Engineering I
3 credits Fall & Spring Semester
Soil composition and classification, excavation, grading, fill compaction, stress distribution in soils, one-dimensional flow of water through soil, laboratory, and field permeability, effective stress concept, calculation of consolidation, field settlement, bearing capacity, and design and analysis of shallow foundations are discussed.
PREREQUISITE: CAE 211. COREQUISITE: CAE 371.

CAE371 Geotechnical Laboratory
1 credit Fall & Spring Semester
Evaluation of physical and mechanical properties of soils, and preparation of reports. Three hours.
PREREQUISITE: ENG 107, IEN 311. COREQUISITE: CAE 370.

CAE380 Electrical and Illumination Systems for Buildings
3 credits Spring Semester
Typical electrical systems for buildings including electrical circuits, protective devices and code requirements. Illumination and lighting design.
PREREQUISITE: PHI 207 (UNIVERSITY PHYSICS III)

CAE381 Mechanical Systems for Buildings
3 credits Spring Semester
Principles and procedures for the analysis and design of heating, ventilating, and air conditioning (HVAC) systems in buildings. Topics include moist air properties and conditioning processes, heating and cooling load calculations, building energy consumption, thermal comfort, indoor air quality, air distribution and diffusion, HVAC systems and component selection.
PREREQUISITE: MAE 303 (THERMODYNAMICS I) OR PERMISSION OF INSTRUCTOR
CAE395 Undergraduate Research
1-3 credits  
Spring Semester
Designed for the undergraduate student who wishes to engage in research. Not for graduate credit or for baccalaureate graduation credit. Subject and credit to be arranged with the instructor.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CAE399 Internship
1 credit  
Fall & Spring Semester & First & Second Summer Session
Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Courses may be repeated.

CAE400 Preparation for FE Exam
1 credit  
Spring Semester
Review of material in preparation for the Fundamentals of Engineering (FE) examination. For credit only.
PREREQUISITE: SENIOR STANDING.

CAE402 Professional Engineering Practice
3 credits  
Fall & Spring Semester
Principles of engineering economics and economic evaluation of engineering projects. A discussion of professional practice issues including the philosophy and methodology of engineering, professional licensure and ethics. Discussion of the business aspects of engineering including business organization, management, contracts and legal issues. Engineering leadership in the formulation of public policy.
PREREQUISITE: SENIOR STANDING.

CAE403 Senior Design Project I - Civil & Architectural
1 credit  
Fall Semester
Two-semester comprehensive design project based on the knowledge and skills acquired in earlier coursework and incorporating engineering standards and realistic constraints. The faculty coordinator and several practicing engineers/architects provide consultation, guidance, and recommendations on aspects such as problem definition, evaluation of design approaches, design development, and the preparation of construction documents.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

CAE404 Senior Design Project II - Civil & Architectural
2 credits  
Spring Semester
Second semester of a two-semester comprehensive design project based on the knowledge and skills acquired in earlier coursework and incorporating engineering standards and realistic constraints. The faculty coordinator and several practicing engineers/architects provide consultation, guidance and recommendations on aspects such as problem definition, evaluation of design approaches, design development and the preparation of construction documents. Prerequisite: CAE 403.
PREREQUISITE: CAE 403.

CAE430 Water-Resources Engineering I
3 credits  
Spring Semester
Basic principles of open channel flow. Computation of water surface profiles. Design of hydraulic structures, design of lined and unlined open channels, and design of sanitary sewer systems. Introduction to hydrology and analysis of hydrologic data. Rainfall characteristics and peak runoff models.
PREREQUISITE: CAE 330
CAE440 Water Quality Control Systems
3 credits Spring Semester
Principles of domestic wastewater treatment, design of biological and chemical waste treatment processes, design and sizing of small scale treatment units, and design of water treatment processes are discussed. An introduction to industrial waste treatment.
PREREQUISITE: CAE 330, 340 OR PERMISSION OF INSTRUCTOR.

CAE450 Transportation Engineering II
3 credits Spring Semester
Transportation system planning and design. Advanced geometric design for highway and railway/transit. Human, vehicle, and environmental factors affecting the design, operation, and safety of transportation systems. Planning and design of both landside/airside aspects of airport facilities. Water port and multi-modal facilities design.
PREREQUISITE: CAE 350.

CAE460 Construction Management
3 credits Spring Semester
An introduction to the management of construction projects including legal considerations as well as the techniques of management science applied to construction. The course includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, network planning techniques, including CPM and PERT are introduced. The management principles of time and cost control are also explored. Computer application of project management tools are included.
PREREQUISITE: SENIOR LEVEL STANDING.

CAE470 Foundations and Earth Retaining Systems
3 credits Fall Semester
Natural soil deposits and subsoil exploration. Geotechnical analysis and design of shallow and deep foundations. Theories of lateral earth pressure. Design and analysis of earth-filled retaining systems.
PREREQUISITE: CAE 330, 370, 371

CAE480 Design of Environmental Systems for Buildings
3 credits Fall Semester
Design of building environmental systems, including water supply and waste removal, space air diffusion, fans, air supply and waste removal, space air diffusion, fans, air distribution systems, building fire safety, and smoke control. Building automation and control are also included.
PREREQUISITE: CAE 330, CAE 380, CAE 381

CAE510 Structural Mechanics
3 credits Offered By Announcement Only
Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.
PREREQUISITE: CAE 310 AND SENIOR STANDING.

CAE511 Advanced Structural Analysis
3 credits Fall Semester
General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional and composite members. Basic flexural and stiffness methods and matrix development are also included.
PREREQUISITE: CAE 310.
CAE520 Advanced Design of Concrete Structures  
3 credits  
Spring Semester  
Design of reinforced concrete flat plates, flat slabs, two-way slabs, long columns, and slab-column connections are discussed. Deflections, crack widths, and background of current ACI Building Code are also included.  
PREREQUISITE: CAE 320.

CAE521 Advanced Design of Steel Structures  
3 credits  
Fall Semester  
Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.  
PREREQUISITE: CAE 321.

CAE522 Design of Prestressed Concrete Structures  
3 credits  
Offered By Announcement Only  
Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included. Prerequisite: CAE 320.  
PREREQUISITE: CAE 320.

CAE523 Design of Masonry Structures  
3 credits  
Offered By Announcement Only  
Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included.  
PREREQUISITE: CAE 320.

CAE524 Design of Bridge Structures  
3 credits  
Offered By Announcement Only  
Engineering principles of analysis and design of highway bridges. Topics include load types, failure modes, and design philosophies. Computation of design force envelopes via influence lines. Design of slabs, rolled beam, plate girder, reinforced concrete, and prestressed concrete bridges.  
PREREQUISITE: CAE 310, 320, 321 OR PERMISSION OF INSTRUCTOR.

CAE525 Timber Structural Systems  
3 credits  
Offered By Announcement Only  
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included.  
PREREQUISITE: CAE 310.

CAE530 Water Resources Engineering II  
3 credits  
Fall Semester  
Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water are discussed.  
PREREQUISITE: CAE 430.

CAE531 Surface-Water Hydrology  
3 credits  
Offered By Announcement Only  
Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of storm water-management systems, evapotranspiration, and regional water-management is also included as well as case studies.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: CAE 430.
CAE532 Ground-Water Hydrology

3 credits

Offered By Announcement Only

PREREQUISITE: CAE 330.

CAE533 Water-Quality Control in Natural Systems

3 credits

Offered By Announcement Only

Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.

PREREQUISITE: CAE 430 (CAE 430 IS A PREREQUISITE OR CO-REQUISITE FOR THIS COURSE)

CAE540 Environmental Chemistry

3 credits

Spring Semester

Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.

PREREQUISITE: CHM 112 OR PERMISSION OF INSTRUCTOR.

CAE541 Environmental Microbiology

3 credits

Spring Semester

Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.

PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE542 Solid and Hazardous Waste Engineering

3 credits

Fall Semester

Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.

PREREQUISITE: CAE 340.

CAE543 Air Pollution Control Engineering

3 credits

Spring Semester

Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.

PREREQUISITE: MAE 303 AND CAE330 OR MAE 309 OR PERMISSION OF INSTRUCTOR.

CAE550 Advanced Highway Design

3 credits

Fall Semester

Functional classification and design volumes; Reviews of traffic, vehicle and roadway characteristics; Design controls, criteria and standards; Vertical alignments; horizontal alignments; compound curves; cross sections; climbing lanes; earthwork computation; at-grade intersection; interchange; Design consistency; GeoPak software implementation; Use of traffic simulation software as a design aid.

PREREQUISITE: CAE 450 OR EQUIVALENT.
CAE560 Sustainable Construction
3 credits
Offered By Announcement Only
PREREQUISITE: SENIOR STANDING IN ARCHITECTURE OR ENGINEERING AND PERMISSION OF INSTRUCTOR

CAE570 Advanced Foundation Engineering
3 credits
Spring Semester
PREREQUISITE: CAE 470 OR PERMISSION OF INSTRUCTOR.

CAE580 Hospital and Health Care Facility Design
3 credits
First Summer Session
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE581 Energy-Efficient Building Design
3 credits
Offered By Announcement Only
Concepts and methods of energy-efficient and environmentally-friendly building design. Topics include energy and sustainable design strategies, climate, passive and active solar design, passive cooling systems, day lighting, and computer simulation of energy flows in buildings. A quantitative understanding of energy fundamentals, examples from practice, and design exercises using computer simulation programs are emphasized.
PREREQUISITE: MAE 303 OR PERMISSION OF INSTRUCTOR.

CAE590 Special Topics
1-3 credits
Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE591 Special Topics
1-3 credits
Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE592 Special Topics
1-3 credits
Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.
CAE593 Special Topics
1-3 credits Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE594 Special Topics
1-3 credits Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE595 Special Problems
1-4 credits Offered By Announcement Only
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

CAE599 Cooperative Education
1 credit Offered By Announcement Only
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

ELECTRICAL & COMPUTER ENGINEERING
EEN100 Introduction to Electrical and Computer Engineering
3 credits First & Second Summer Session
Introduction to Electrical and Computer Engineering (ECE) for high school students interested in science and technology. The course covers important thematic units of the discipline: electronics, digital design, computer programming and signal processing. Emphasis on hands-on experience in the use of laboratory instrumentation, circuit construction and computer simulation.
PREREQUISITE: UNIVERSITY OF MIAMI SUMMER SCHOLAR STUDENTS ONLY

EEN111 Introduction to Engineering I
3 credits Fall & Spring Semester
Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions is included as well as an introduction to professional ethics, intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.

EEN112 Introduction to Engineering II
0-2 credits Spring Semester
Course is designed to provide first-year undergraduate students with an introduction to some key electrical and computer engineering concepts and topics by discussing their roles in some of the commonly used electrical and computer engineering systems. Numerical examples, circuit simulations, and computer programming are introduced through the use of MATLAB, microcontroller programming languages, and PSpice. Hands-on experience are provided through a project where the students design, assemble, program, and test a microcontroller-based mobile robot with a variety of sensing devices. Should be taken as a freshman only; otherwise to be replaced by a technical elective.
PREREQUISITE: EEN 111 OR INSTRUCTOR PERMISSION
EEN118 Introduction to Programming
0-3 credits  Fall & Spring Semester
Introduction to computing, problem solving, program design, C++ language fundamentals, and software engineering principles. Software design projects are included.

EEN201 Electrical Circuit Theory
3 credits  Fall & Spring Semester & First Summer Session
Fundamentals of DC-AC circuit laws, including steady state and transient analysis. Lecture, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 112.

EEN204 Electrical Circuits Laboratory
1 credit  Fall & Spring Semester & Second Summer Session
Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.
PREREQUISITE: EEN 201.

EEN205 Principles of Electrical Engineering--I
3 credits  Fall & Spring Semester
Fundamentals of DC and AC Circuits and a survey of Electrical Machinery and Electronics. Not open to students with credits in EEN 201. Lecture, 3 hours.
PREREQUISITE: PREREQUISITE OR COREQUISITE: MTH 112.

EEN218 DATA STRUCTURE
3 credits  Fall & Spring Semester
Continuation of Programming with emphasis on C++ and the skills required of a capable programmer. Essential data structures and algorithms, and introducing algorithm analysis. Basic sorting, searching, and data management. Dynamic and static memory management. Object oriented programming.
PREREQUISITE: EEN 118 OR EQUIVALENT.

EEN301 Electromagnetic Field Theory
3 credits  Fall Semester
Vector analysis, static and time-varying fields, Maxwell's equations, propagation of electromagnetic waves, and transmission line theory and applications are discussed.

EEN304 Logic Design
0-3 credits  Fall & Spring Semester & First Summer Session
Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.
PREREQUISITE: EEN 118 OR CSC 120.

EEN305 Electronics I
3 credits  Fall & Spring Semester & First Summer Session
Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.
PREREQUISITE: EEN 201.
EEN306 Electronics II
3 credits  Fall & Spring Semester & Second Summer Session

EEN307 Linear Circuits and Signals
0-3 credits  Fall & Spring Semester & First Summer Session
Second-order transient circuit analysis, Laplace transforms, circuits and waveform analysis using Laplace transform, convolution, Fourier series, and integrals are discussed.
PREREQUISITE: EEN 201.

EEN308 Linear Control Systems
3 credits  Fall Semester
Introduction to system theory, transfer function and state variable modeling of linear continuous time systems, root locus, Bode plot, Nyquist criterion, analysis and controller design using root locus and frequency domain techniques, proportional-integral-derivative controllers.
PREREQUISITE: EEN 307, MTH 210, 311 OR EQUIVALENT.

EEN310 Introduction to Engineering Probability
3 credits  Fall & Spring Semester
Axioms of probability, discrete and continuous random variables, probability density functions. Expectation, conditioning, independence, functions of random variables, characteristic functions, multiple random variables. Sums of random variables, limit theorems, probability bounds, convergence concepts. Introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with IEN 310.
PREREQUISITE: MTH 112 AND JUNIOR STANDING.

EEN311 Electronics Laboratory
1 credit  Fall & Spring Semester & First Summer Session
Laboratory course in conjunction with courses EEN 305 and 306.
PREREQUISITE: EEN 204. PREREQUISITE OR COREQUISITE: EEN 306.

EEN312 Microprocessor
0-4 credits  Fall & Spring Semester & Second Summer Session
Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience.
Lecture, 3 hours; laboratory, 3 hours.
PREREQUISITE: EEN 304.

EEN315 Digital Design Laboratory
1 credit  Fall & Spring Semester & First Summer Session
Familiarization with properties and use of logic gates, flip-flops, digital standard components, and programmable logic devices. Design and implementation of combinational and synchronous digital systems and Computer Aided Engineering (CAE) tools for design and simulation of digital systems are also included.
PREREQUISITE: EEN 304.
EEN316 Structured Digital Design
1 credit Fall & Spring Semester & Second Summer Session
VHDL (VHSIC (very high speed integrated circuits) hardware description language) introduction and syntax. Functional and behavioral models of VHDL for design, testing, and simulation of digital circuits and programmable logic devices. Design and implementation of combinational and sequential digital systems using VHDL is also included.
PREREQUISITE: PREREQUISITE OR COREQUISITE: EEN 315.

EEN318 Advanced Computer Programming
3 credits Spring Semester
Continuation of the programming sequence. Object oriented programming with C++, emphasizing the skills required of a professional programmer. Essential data structures and algorithms: trees, graphs, hash tables, parsing and text processing. Advanced sorting and data management algorithms. Advanced features of C++; effective programming with C.
PREREQUISITE: EEN 218.

EEN336 Signals and Systems
3 credits Fall Semester
Continuous and discrete-time transform analysis techniques. Linear time-invariant signals and systems, continuous and discrete-time Fourier transforms, and Z-transform are discussed. Sampling and reconstruction of signals, frequency response, transfer functions, and applications are also included.
PREREQUISITE: EEN 307.

EEN341 Networks: Friends, Money, and Bytes
3 credits Fall Semester
PREREQUISITE: MTH 210 OR PERMISSION OF INSTRUCTOR

EEN368 Internet Computing I
3 credits Spring Semester
Principles and practices used in creating interactive Internet sites. Extensive object oriented programming in Java is taught. Use of eXtensible Markup Language (XML) to provide content description. Use of GUI components and graphics to create web based applications.
PREREQUISITE: EEN 218

EEN395 Undergraduate Research in Electrical and Computer Engineering
1-3 credits Fall & Spring Semester & First & Second Summer Session
Research and/or design projects consisting of an individual investigation of real-world contemporary problems. Offered by special arrangement and under the supervision of a faculty member.

EEN399 Cooperative Education
1 credit Fall & Spring Semester & First & Second Summer Session
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated.
EEN402 Electrical Energy Conversion
3 credits Fall Semester
Introduction to sources of energy; theory of electromechanical energy conversion, covering transformers, DC and AC rotating machines; introduction to photovoltaic energy conversion, wind energy conversion and fuel cells; and associated laboratory experiments.
PREREQUISITE: EEN 307.

EEN404 Communication Systems
3 credits Spring Semester
Introduction to digital communication, including binary and Mary baseband and band pass modulation over additive white Gaussian noise channels. Optimal receivers, pulse shaping for band limited channels, synchronization, multiple access.
PREREQUISITE: EEN 336 AND EEN/IEN 310.

EEN405 Solid-State Electronics
3 credits Spring Semester
Principles of semiconductor electronics, energy bands of semiconductors, Fermi level, carrier distribution, and transport mechanisms are discussed. Application of semiconductor theory to various junction and field effect devices are included.
PREREQUISITE: EEN 301 AND PHY 207.

EEN414 Computer Organization and Design
3 credits Fall & Spring Semester
Organization and design of computers, hardware description language, instruction set architecture, control unit implementation, microprogramming, memory organization, and high speed arithmetic unit are discussed.
PREREQUISITE: EEN 312

EEN415 Senior Project I
0-1 credits Fall & Spring Semester
Topics cover tasks in project planning including scheduling, documentation, communication (written and oral), financial constraints, and ethics. Students are required to present project proposals to serve as the basis for the follow-up course, EEN 416.
PREREQUISITE: SENIOR STANDING

EEN416 Senior Project II
2 credits Fall & Spring Semester
The capstone design course for Electrical Engineering majors. An electrical system is designed, implemented, and documented.
PREREQUISITE: EEN 415

EEN417 Embedded Microprocessor System Design
2 credits Fall Semester
Study of microcomputer system design, scientific methods for quantifying system performance, embedded controller applications using high level languages, and debugging strategies. Lecture, 1 hour; laboratory, 3 hours.
PREREQUISITE: EEN 218, 315, AND 414.
EEN418 Senior Project Planning
0-1 credits  Fall & Spring Semester
The creative process of devising a product to meet customers' needs including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project.
PREREQUISITE: SENIOR STANDING.

EEN419 Senior Project
2 credits  Fall & Spring Semester
The purpose of this course is to integrate the student's knowledge in hardware, software, and project management. A major digital system is designed, implemented, debugged, and documented.
PREREQUISITE: EEN 418, 417, 454.

EEN421 Introduction to 3D Computer Modeling and Animation
2 credits  Fall Semester
Introduction to the fundamental principles of computer animation with hands-on experience. Focus on 3D modeling, texture mapping, lighting, character animation, inverse kinematics, dynamics, rendering and compositing.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

EEN422 Advanced 3D Character Design and Motion Capture for Computer Games
2 credits  Spring Semester
Introduction to game development pipeline, from design, conception, modeling, texture mapping, rigging, motion capture and animation, special effects to level design and the pipeline flow control.
PREREQUISITE: EEN 421.

EEN424 SYSTEMS PROGRAMMING
3 credits  Fall Semester
Practical hands-on experience with UNIX systems programming and administration. Programming using shell-scripting languages. File systems features, multiprocessing, inter-process communication, and systems programming fundamentals are discussed.
PREREQUISITE: EEN 218.

EEN435 Communication Electronics
3 credits  Offered By Announcement Only
Design of communication circuits including oscillators, mixers, phase-locked loops, and tuned networks; AM and FM transmitters and receivers.
PREREQUISITE: EEN 306.

EEN436 Introduction to Digital Signal Processing
3 credits  Offered By Announcement Only
Basic principles of digital signal processing are discussed including discrete time systems and signals, z-transform, sampling, frequency response, discrete Fourier transform, Finite and Infinite Impulse Response digital filters, and applications in related fields.
PREREQUISITE: EEN 336.
EEN437 Real-Time Digital Signal Processing Laboratory  
1 credit  
Fall Semester  
Digital signal processing hardware for real-time operation, software development tools, instruction set, and DSP experiments with audio and speech application are discussed.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: EEN 436.

EEN454 Digital System Design and Testing  
2 credits  
Spring Semester  
Functional building blocks and concepts of control and timing in digital design.  
Descriptive techniques for digital systems and design for testability.  
PREREQUISITE: EEN 316.

EEN455 Design-for-Testability Laboratory  
1 credit  
Fall & Spring Semester  
Project laboratory demonstrating the techniques necessary to design, implement, and debug and test a large system. The process is carried through from conceptual design, implementation, integration, simulation, and synthesis on a FPGA chip.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: EEN 454.

EEN499 Senior-Junior Cooperative Education  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Analysis and design experience obtained in industry or government. Approved project jointly supervised and assessed by department faculty and external partner. Note: A maximum of three credits could be used to satisfy degree requirement as Technical Elective. See Bulletin for more information.  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIR.

EEN500 Engineering Analytical Techniques  
3 credits  
Offered By Announcement Only  
Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.  
PREREQUISITE: MTH 311.

EEN502 Engineering Acoustics  
3 credits  
Fall Semester  
Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered.  
PREREQUISITE: EEN 336 OR PERMISSION OF INSTRUCTOR.

EEN503 Principles of Electro-optics  
3 credits  
Fall Semester  
Principles of optics, optical fibers, electro-optics, and light wave propagation in anisotropic and periodic media, guided waves, and integrated optics are discussed.  
Electro-optic devices including sources and detectors, optical fiber communication, and optics for medical and biomedical applications are also covered.  
PREREQUISITE: PHY 206, 207 AND EEN 301 OR EQUIVALENT.
EEN504 Optics and Fiber Communication
3 credits
Spring Semester
Introduction to optics and fiber communication, light propagation in free space and waveguides, imaging, wave phenomena and diffraction, interferometer, spectrometer, holography, fiber coupling, and fiber communication are covered. Lecture, 1 1/2 hours; laboratory, 3 hours.
PREREQUISITE: EEN 301 OR PREREQUISITE OR COREQUISITE: BME 545.

EEN507 Active Filter Design
3 credits
Spring Semester
Active low pass filter design, gain-tuning and passive-tuning, immittance calculations, high-frequency lowpass filters, frequency and time domain analysis of lowpass, highpass, bandpass, and bandstop filters are discussed. Classical filters and Active filter classification including gain-sensitivity limitations are also included.
PREREQUISITE: EEN 307.

EEN508 Digital Control Systems
3 credits
Offered By Announcement Only
Basic concepts relevant to the analysis and design of digital computer controlled systems. Sampling, z-transform, discrete transfer functions, discrete-time state space modeling, stability, reachability, and observability are discussed. Analysis and design in time and frequency domains, state feedback and observers, optimal control, estimation, and linear quadratic Gaussian design are also included.
PREREQUISITE: EEN 308.

EEN510 Passive Filter Design
3 credits
Offered By Announcement Only
Design of RLC passive filters, properties of positive-real functions, and Brune test are discussed. Design of driving-point and transfer immittances of RC, RL, LC, and RLC one-port and two-port networks are also covered as well as the design of Butterworth, Chebyshev, and elliptic ladder filters.
PREREQUISITE: EEN 307.

EEN511 Software Engineering
3 credits
Spring Semester
Software Development: Specification and analysis, methodologies, management and control. Advanced programming techniques: dynamic programming, fast data retrieval and sorting, enumerators, data structures, and data management. The limits of software engineering, computability and complexity analysis.
PREREQUISITE: EEN 318.

EEN512 Software Engineering and Architecture
3 credits
Spring Semester
PREREQUISITE: EEN 318.

EEN513 Software Design and Verification
3 credits
Spring Semester
PREREQUISITE: EEN 318 AND SENIOR STANDING.
EEN514 Computer Architecture
3 credits                               Spring Semester & First Summer Session
Computer data and instruction types, survey of existing architectures, and the interaction between hardware and software sub-systems are discussed. Advanced topics in computer architecture.
PREREQUISITE: EEN 414.

EEN516 Analog Integrated Circuits
3 credits                               Fall Semester
Analysis and design of analog integrated circuits with emphasis on MOS technology. Design of operational amplifiers, comparators, sample and hold circuits, and voltage references are discussed. Fundamentals of data converters and CAD methods for analog integrated circuits are also covered.
PREREQUISITE: EEN 306.

EEN519 Design of Computing Languages
3 credits                               Offered By Announcement Only
Major features of modern programming languages with emphasis on design and software efficiency. Interaction between language design and the design of its compiler are included.
PREREQUISITE: EEN 218.

EEN521 Computer Operating Systems
3 credits                               Fall Semester
The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.
PREREQUISITE: EEN 318

EEN532 VLSI Systems
3 credits                               Fall Semester
Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, mask making, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered.
PREREQUISITE: EEN 304 AND 305.

EEN533 Random Signals and Noise
3 credits                               Fall Semester
Probability models, Bayes' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationary and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.
PREREQUISITE: IEN 310 OR EEN 310.

EEN534 Communication Networks
3 credits                               Fall Semester
Principles of digital communications, Local Area Networks (LANs), Wide Area Networks (WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed.
PREREQUISITE: EEN 310 OR IEN 310.
University of Miami Bulletin, 2012-2013
Undergraduate Course Listing
COLLEGE OF ENGINEERING
ELECTRICAL & COMPUTER ENGINEERING

EEN536 Digital Signal Processing
3 credits Offered By Announcement Only
Fast Fourier transform, design, implementation, realization of digital filters, finite word length effects, decimation, interpolation, multirate signal processing, and Discrete Hilbert transform are covered. 
PREREQUISITE: EEN 436.

EEN537 Principles of Artificial Intelligence
3 credits Fall Semester
Search techniques, game trees, exhaustive vs. cutoff search, natural language processing, augmented transition networks, knowledge representation, cognitive aspects, semantic networks, problem-solving, expert systems, and AI machines are covered. 
PREREQUISITE: EEN 218.

EEN538 Introduction to Digital Image Processing
3 credits Fall Semester

EEN539 Digital Communications
3 credits Offered By Announcement Only
Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications. 
PREREQUISITE: EEN 404

EEN540 Digital Speech and Audio Processing
3 credits Spring Semester
Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered. 
PREREQUISITE: EEN 436 OR CONSENT OF INSTRUCTOR.

EEN542 Digital Integrated Circuits
3 credits Spring Semester
Design and operation of state-of-the art digital integrated circuits. Circuit simulation methods using CAD programs, various TTL, CMOS, ECL, and I2L families are discussed. 
PREREQUISITE: EEN 304, 306.

EEN543 BioNanotechnology
3 credits Spring Semester
PREREQUISITE: MTH 210 OR PERMISSION OF INSTRUCTOR

EEN546 Reliable Digital System Design
3 credits Offered By Announcement Only
Topics include descriptive technique for digital systems, synchronizer failure and metastability estimation, design for testability, and estimating digital system reliability. Computer-Aided Engineering (CAE) tools are also covered. Not open to students with credit in EEN 454. Offered only for Graduate students. 
PREREQUISITE: EEN 316.
EEN548 Machine Learning
3 credits  Offered By Announcement Only
Fundamentals of intelligent system design and strategies of learning capability simulation. Selected case studies of learning systems for engineering applications are included.
PREREQUISITE: EEN 218 AND MTH 309 OR PERMISSION OF INSTRUCTOR.

EEN552 Power Electronics
3 credits  Fall Semester
Analysis and design of solid-state power electronic circuits including DC/DC, AC/DC and DC/AC converters, controller design, power electronics applications, and associated laboratory experiments.
PREREQUISITE: EEN 306, EEN 311

EEN553 Neural Networks
3 credits  Offered By Announcement Only
Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.
PREREQUISITE: IEN 310 OR EEN 310.

EEN555 Microwave Transistor Amplifier Design
3 credits  Fall Semester
Analysis and design of transistor amplifiers and oscillators at microwave frequencies. Scattering parameter methods, stability considerations, matching networks, and narrowband and broadband techniques are discussed. Computer aided design methods for microwave transistor amplifiers are also included.
PREREQUISITE: EEN 306.

EEN562 Wireless and Cellular Communication
3 credits  Fall Semester
Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beam forming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.
PREREQUISITE: EEN 404.

EEN563 Wireless Communication Lab
1 credit  Offered By Announcement Only
Computer simulation of path loss, shadowing and fading in wireless channels, performance of various digital modulation methods in both Gaussian and wireless channels, diversity methods, equalization methods including zero-forcing, minimum mean-square error (MMSE) and decision-feedback equalization (DFE), co-channel interfacing in cellular systems, space-time coding. Orthogonal Frequency Division Multiplexing (OFDM) systems, spreading codes for Code Division Multiple Access (CDMA) systems, and matched-filter receiver and multiuser detector for CDMA systems. Measurement of wireless signals in various environments.
PREREQUISITE: PREREQUISITE OR COREQUISITE: EEN 562.
EEN564 Wireless Networks
3 credits
Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.
PREREQUISITE: EEN 534 OR 575 OR PERMISSION OF THE INSTRUCTOR

EEN565 Introduction to Information Theory and Coding
3 credits
Offered By Announcement Only
Entropy, conditional entropy, mutual information, source coding, Huffman code arithmetic code, channels and channel capacity, error detection, error correction, and Hamming codes are discussed. An introduction to linear block codes and cyclic codes is included.
PREREQUISITE: IEN 310 OR EEN 310.

EEN567 Database Design and Management
3 credits
Spring Semester
Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.
PREREQUISITE: EEN 218

EEN568 Internet Computing II
3 credits
Fall Semester
Java programming for client/server networking, multi-threading, database connectivity, and servlets. Principles and practices used for accessing back-end databases through web applications. Use of eXtensible Markup Language (XML) for processing.
PREREQUISITE: EEN 368

EEN570 Network Client-Server Programming
3 credits
Spring Semester
Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.
PREREQUISITE: EEN 218 OR EQUIVALENT

EEN571 Interactive Multimedia Computing
3 credits
Spring Semester
Multimedia fundamentals including hardware, software, standards, concepts and issues, compression, decompression, user interface design, query by content and multimedia indexing are discussed.
PREREQUISITE: EEN 318

EEN572 Object-Oriented and Distributed Database Management Systems
3 credits
Offered By Announcement Only
PREREQUISITE: EEN 567 OR EQUIVALENT.
EEN573 Network Computing
3 credits
Spring Semester
PREREQUISITE: EEN 368 AND 567.

EEN574 Agent Technology
3 credits
Offered By Announcement Only
Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agents, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.
PREREQUISITE: EEN 537 OR EQUIVALENT.

EEN575 Data Network Design and Management
3 credits
Spring Semester
Networking fundamentals and current technologies. Data network planning, analysis, design, and management techniques. Different network technologies are addressed and contrasted in terms of topology, performance, and scope of real applications. Network management systems are investigated including fault, configuration, security, and performance management. Network management information bases, protocols, and hands-on experience with network equipment and network management systems are also included.
PREREQUISITE: EEN 310 OR IEN 310.

EEN576 Internet and Intranet Security
3 credits
Fall Semester
Security issues and applications for securing internet and intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.
PREREQUISITE: EEN 368.

EEN577 Data Mining
3 credits
Offered By Announcement Only
Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.
PREREQUISITE: EEN 567 OR EQUIVALENT.

EEN578 E-Commerce Technology
3 credits
Offered By Announcement Only
Tools and techniques providing the foundation for the design, implementation, and deployment of e-commerce systems. Search engines, information retrieval for e-commerce, e-commerce interfacing design, and e-commerce systems case studies are also included.
PREREQUISITE: EEN 368
EEN579 Mobile Computing
3 credits Offered By Announcement Only
Mobile computing and proxy architectures, mobile web protocols, mobile user interfaces, applications, systems-ware adaptations, mobile databases, transactions, data synchronization, privacy, authentication, and security are covered.
PREREQUISITE: EEN 368.

EEN580 Electrical and Computer Engineering Internship
1-3 credits Fall & Spring Semester
Analysis, design, and research experience obtained at an operating and recognized industry. Approved project jointly supervised and assessed by departmental faculty and industrial partner.
PREREQUISITE: PERMISSION OF ADVISOR.

EEN581 Special Problems
1-3 credits Fall Semester
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN582 Special Problems
1-3 credits Spring Semester
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN583 Special Problems
1-3 credits First Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN584 Special Problems
1-3 credits Second Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN585 Special Problems
1-3 credits Offered By Announcement Only
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN586 Multimedia Networking
3 credits Fall Semester
PREREQUISITE: EEN 534 OR 575.
EEN587 Multimedia Databases
1-3 credits
Fall Semester
Introduction to the fundamental concepts and techniques pertinent to multimedia databases. Introduction to a variety of techniques and emerging innovative solutions to represent, store, index, retrieve, integrate, and manipulate data in various media type(s) to construct multimedia databases.
PREREQUISITE: EEN 567 OR PERMISSION OF INSTRUCTOR. PREREQUISITE OR COREQUISITE: EEN 571.

EEN590 Special Topics in Information Technology
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Information Technology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN591 Special Topics in Information Technology
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Information Technology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN592 Special Topics in Audio Engineering
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Audio Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN593 Special Topics in Audio Engineering
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Audio Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN594 Special Topics in Computer Engineering
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Computer Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR - 1 COUPON

EEN595 Special Topics in Computer Engineering
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Computer Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN596 Special Topics in Computer Engineering
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Computer Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN597 Special Topics in Electrical Engineering
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Electrical Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN598 Special Topics in Electrical Engineering
1-3 credits
Offered By Announcement Only
Lecture courses in selected areas of specialization within Electrical Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
EEN599 Special Topics in Electrical Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Electrical Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

INDUSTRIAL ENGINEERING
IEN100 Introduction to Industrial Engineering
1 credit First & Second Summer Session
This introductory course is designed to expose high school students to a variety of specific disciplines within the industrial engineering arena to assist them in making informed decisions about possible college majors. The program is designed for the exemplary high school student interested in applied mathematics and science. All students enrolled in this course will gain experience in problem solving, engineering mechanics, computer simulation, and laboratory activity. The course content changes throughout the 3-week duration and includes topics on methods analysis, time studies, engineering financial analysis, energy conservation, human factors engineering, and ergonomics. The students will be provided with an understanding and some hands-on experience on topics relative to the discipline of industrial engineering. Via an introduction to several case histories, the students will be able to understand the challenges associated with the design of systems and processes within different industries and importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with manufacturing processes, biomechanics analysis, simulation, energy conservation, and supply chain processes. Summer Scholar Students only.
PREREQUISITE: SUMMER SCHOLAR STUDENTS ONLY.

IEN111 Introduction to Engineering I
3 credits Fall & Spring Semester
Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions. Introduction to professional ethics, intellectual property, ethics, intellectual property rights, and an introduction to use of MATLAB, AutoCAD, and programming in C++.

IEN112 Introduction to Engineering II
2 credits Spring Semester
Continuation of IEN 111. An overview of Industrial Engineering concepts and issues important to the design and operation of industrial and service systems. Students will learn the use of software tools developed to enhance the Industrial Engineer's ability such as database management, high level programming languages, electronic spreadsheets, and computer graphics.
PREREQUISITE: IEN 111.

IEN201 Methods Analysis and Work Measurement
3 credits Fall & Spring Semester
Design of improved methods for doing work based on effective human effort. Time standardization of productive operations by work measurement, predetermined time systems, and activity sampling are discussed. Tools and charts for methods analysis are discussed and use of Microsoft Visio is emphasized and reviewed.
PREREQUISITE: IEN 111
IEN306 Manufacturing Processes
3 credits  Fall Semester
Basic and applied sciences in processing of materials. Effects of processing on the manufactured parts, selection of processing methods, and their relation with material properties. Contemporary and non-traditional processes used in manufacturing are also covered.
PREREQUISITE: (CHM 111 OR CHM 151) AND PHY 205

IEN310 Introduction to Engineering Probability
3 credits  Fall & Spring Semester
Axioms of probability, discrete and continuous random variables, probability density functions, cumulative distribution function, expectation, conditioning, independence, functions of random variables, multiple random variables, sums of random variables, introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with EEN 310.
PREREQUISITE: (MTH 162 OR EQUIVALENT) AND JUNIOR STANDING.

IEN311 Applied Probability and Statistics
3 credits  Fall & Spring Semester
Descriptive statistics, basic probability and distribution theory, point and interval estimation, testing hypothesis, simple linear regression, correlation, and quality control charts are discussed. Examples are drawn from various disciplines. Cross-listed with MAS 311.
PREREQUISITE: MTH 162 OR EQUIVALENT

IEN312 Applied Statistical Methods
3 credits  Spring Semester
Linear regression, multiple regression, analysis of variance, and design of experiments are discussed. Cross-listed with MAS 312.
PREREQUISITE: IEN 310 (EEN 310) OR IEN 311 (MAS 311) OR EQUIVALENT.

IEN320 Entrepreneurship for Engineers
3 credits  Offered By Announcement Only
Entrepreneurship as it affects engineering students. How to identify business opportunities, how to obtain financing and sustain a business, and how to take charge of the individual's entrepreneurial goals are covered.

IEN351 Industrial Safety Engineering
3 credits  Fall Semester
Basic principles of accident prevention and safety engineering approach to the design of mechanical equipment, facilities, and manufacturing processes. Analysis and design of fire prevention procedures and accident control procedures in industry are included.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN360 Productivity Engineering
3 credits  Spring Semester
Definitions and scope of productivity engineering and management. The productivity cycle. Productivity measurement, evaluation, improvement--discussion and examples. Productivity planning and improvement through the application of industrial and systems engineering techniques. Discussion of individual techniques with examples. Application potential of the course in real life situations.
PREREQUISITE: MTH 162 OR EQUIVALENT.
IEN361 Industrial Cost Analysis
3 credits
Spring Semester
Analysis of financial statements and cost factors in manufacturing and service systems. Cost accounting methods, job order costing and process costing approaches. Deterministic and probabilistic estimates of cost.
PREREQUISITE: MTH 162 OR EQUIVALENT

IEN363 Project Management for Engineers
3 credits
Spring Semester
This course will help students develop a basic understanding of the key concepts, theories, tools, and methodologies of project management. Students will be introduced to the different phases of managing projects from conception to termination with particular emphasis on planning, scheduling, resource allocation, monitoring and control. The course will utilize a case-study-based approach in analyzing the techniques and methods of project management.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

IEN380 Engineering Economy
3 credits
Fall Semester
Engineering Economy Fundamentals. Interest and money-time relationship, methods of making economic decisions, risk and uncertainty, sensitivity analysis, selections among multiple alternatives, depreciation, benefit-cost analysis, replacement studies, minimum cost analysis, and related topics.
PREREQUISITE: MTH 162 OR EQUIVALENT.

IEN399 Internship
1 credit
Fall & Spring Semester & First & Second Summer Session
Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Course may be repeated.

IEN406 Computer-Aided Manufacturing
3 credits
Spring Semester
A comprehensive view of manufacturing with a focus on design, automation, and the use of computers in manufacturing. The topics include computer-aided design, communications, programmable logic controllers, CNC machining, industrial robots, process planning, and computer-integrated manufacturing. Laboratory projects are an integral part of the course.
PREREQUISITE: (CHM 111 OR CHM 151) AND PHY 205.

IEN407 Product Design for Manufacturing
3 credits
Spring Semester
The different phases of engineering design process. Guided Iteration Methodology for product design. Topics include design for manufacturing (DFM), best practices of product realization, solid modeling using SolidWorks, quality in design, issues in patents, liability and ethics. Engineering design specifications, evaluation methods for design alternatives.
PREREQUISITE: IEN 406.

IEN441 Deterministic Models in Operations Research
3 credits
Fall Semester
Introduction to deterministic mathematical models with applications to operational problems. Topics include the methodology of operations research, mathematical programming, game theory, network flow-theory, and dynamic programming. Cross-listed with MAS 441.
IEN442 Stochastic Models in Operations Research
3 credits
Spring Semester
Probabilistic models in operations research. Topics include probabilistic inventory models, queuing theory, Markov chains, and probabilistic dynamic programming. Cross-listed with MAS 442.
PREREQUISITE: (IEN 310 (EEN 310) OR IEN 311 (MAS 311)) AND IEN 441 (MAS 441).

IEN462 Production Systems Design
3 credits
Offered By Announcement Only
Recent advances in design and manufacturing including concurrent engineering, design for manufacturability, robust design - Taquchi methods, computer integrated manufacturing, integrated production control, Just-in-Time production systems, group technology, focused factories, flexible manufacturing systems, and agile manufacturing.
PREREQUISITE: IEN 310 (EEN 310) OR IEN 311 (MAS 311).

IEN465 Production and Inventory Control
3 credits
Fall Semester
Production and inventory management techniques such as forecasting methods, inventory control subject to both known and uncertain demand, aggregate planning, introduction to scheduling, materials requirement planning (MRP), just-in-time (JIT) manufacturing, and introduction to scheduling are covered.
PREREQUISITE: IEN 310 (EEN 310) OR IEN 311 (MAS 311).

IEN470 Engineering Professionalism
3 credits
Offered By Announcement Only
Engineering design and configuration management, product warranties and safety, environmental responsibilities, ethics, professionalism, proposal preparation, contracts, execution, project scheduling, engineering economic analysis including present value, net present value, depreciation methods, costs, and financial statements are covered.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN490 Undergraduate Research
1- 3 credits
Fall Semester
Research projects. Individual investigation of current problems

IEN494 Senior Project
0- 3 credits
Fall & Spring Semester
Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems. Course includes preparation of project proposal, data collection, analysis, reporting, and formal presentations.
PREREQUISITE: SENIOR STANDING.

IEN501 Manufacturing Analysis and Design I
3 credits
Offered By Announcement Only
Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN502 Manufacturing Analysis and Design II
3 credits
Offered By Announcement Only
Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
IEN505 Robotics
3 credits
Fall Semester
Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies. Building your own robot is an integral part of hands-on laboratory exercises. Matlab control toolbox and image analysis toolbox will be extensively used for design and analysis.
PREREQUISITE: IEN 406.

IEN507 Design of Manufacturing Systems
3 credits
Spring Semester
State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems.
PREREQUISITE: IEN 465 OR PERMISSION OF INSTRUCTOR.

IEN509 Automated Assembly
3 credits
Fall Semester
Fundamentals of automated assembly including parts transfer systems and feeders, parts orientation and grasping techniques, product design for automated assembly (DFA), assembly robots, and performance and economics of assembly systems.
PREREQUISITE: IEN 406 OR PERMISSION OF INSTRUCTOR.

IEN512 Statistical Quality Control and Quality Management
3 credits
Spring Semester
This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advance topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.
PREREQUISITE: IEN 311 (MAS 311) OR IEN 312 (MAS 312).

IEN513 Quality Management in Service Organizations
3 credits
Fall Semester
Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN524 Decision Support Systems in Industrial Engineering
3 credits
Spring Semester
Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN547 Computer Simulation Systems
3 credits
Spring Semester
Computer simulation and the development of simulation models. Application of discrete and continuous system simulation languages to systems studies is also included.
PREREQUISITE: IEN 442 (MAS 442) OR PERMISSION OF INSTRUCTOR.
IEN551 Accident Prevention Systems
3 credits
Spring Semester
Introduction to the basic principles of accident prevention and how to apply the safety engineering approach to the design of industrial accident prevention systems.
PREREQUISITE: IEN 351 OR PERMISSION OF INSTRUCTOR.

IEN557 Ergonomics and Human Factors Engineering
3 credits
Fall Semester
The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.
PREREQUISITE: IEN 312 (MAS 312) OR PERMISSION OF INSTRUCTOR.

IEN558 Industrial Hygiene I
3 credits
Fall Semester
Recognition of occupational chemical health hazards. Evaluation methods and analytical procedures used to determine level of exposure to chemical and toxic hazards. Control measures and compliance with OHSA requirements with special emphasis on industrial ventilation, and other methods of control are included.
PREREQUISITE: ((CHM 111 OR CHM 151) AND SENIOR STANDING) OR PERMISSION OF INSTRUCTOR.

IEN559 Industrial Hygiene II
3 credits
Spring Semester
Recognition of physical occupational health hazards and evaluation methods and instruments used in measuring exposure levels with special emphasis on physical hazards. Protective measures and compliance with OHSA requirements is also included. Lecture, 3 hours.
PREREQUISITE: ((CHM 111 OR 151) AND SENIOR STANDING) OR PERMISSION OF INSTRUCTOR.

IEN565 Design of Integrated Manufacturing Systems
3 credits
Offered By Announcement Only
The design of integrated manufacturing systems including concepts of production planning and control, forecasting techniques, inventory systems, production planning and scheduling methods, material requirement planning, plant layout and facility location, design principles of material handling, new trends in batch, and discrete-parts are discussed.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN568 Materials Handling and Facilities Planning
3 credits
Spring Semester
Analysis and design of production and service facilities, emphasis on material handling requirements. Capacity requirements, facility location, layout, storage systems and warehousing are discussed.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN570 Engineering Management
3 credits
Spring Semester
Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed.
PREREQUISITE: IEN 311 (MAS 311) OR IEN 312 (MAS 312) OR PERMISSION OF INSTRUCTOR.
IEN571 Engineering Entrepreneurship  
3 credits  
Fall Semester  
The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment.  
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN572 Management of Technological Innovation  
3 credits  
Fall Semester & Second Summer Session  
Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological, planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing.  
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN590 Special Topics in Industrial Engineering  
1-3 credits  
Offered By Announcement Only  
Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics".  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN591 Dean's Seminar: Entrepreneurship  
1 credit  
Offered By Announcement Only  
Weekly seminar given by guest speakers on topics including process of management, marketing, planning, R & D, financing, taxation, governmental regulations, and international commerce.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN594 Master's Capstone Design Project  
0-3 credits  
Fall Semester  
A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.  
PREREQUISITE: METHODS ANALYSIS, APPLIED PROBABILITY AND STATISTICS AND SENIOR STANDING.

IEN595 Special Problems  
1-3 credits  
Offered By Announcement Only  
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

IEN596 Special Problems  
1-3 credits  
Offered By Announcement Only  
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
IEN599 Cooperative Education
1 credit Offered By Announcement Only
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

MECHANICAL & AEROSPACE ENGINEERING

MAE100 Introduction to Mechanical and Aerospace Engineering
3 credits Second Summer Session
Basic principles of automobile engines and engine efficiency. Introduction to robots and controls. Basic concepts of solar engineering and solar energy utilization. Principles of fuel cells and hydrogen energy. Introduction to aerospace engineering including the aspects of aerodynamics, propulsion and flight dynamics. Introduction to Aerodynamics of air planes and rockets.
PREREQUISITE: SUMMER SCHOLAR STUDENTS ONLY

MAE111 Introduction to Engineering I
3 credits Fall & Spring Semester
Use of engineering tools and computer techniques for problem solving. Data acquisition, analysis, presentation, software design, and computer aided drafting are covered. Development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights. Introduction to use of MATLAB, AutoCAD, and programming in C++.

MAE112 Introduction to Engineering II
0-2 credits Fall & Spring Semester
Introduction to engineering design and the design process. Course topics include safety, reliability, human and environmental factors, economic analysis, and cost estimation. Professional ethics, product liability, solid modeling, machine shop orientation, and practice are also included. Group design projects.
PREREQUISITE: MAE 111.

MAE119 Energy and Environment
3 credits Fall Semester
Conventional energy systems; environmental problems caused by energy carriers and energy consumption; the greenhouse effect, acid rain, and pollution; need for cleaner energy sources; environmental and other characteristics of unconventional energy sources; synthetic energy carriers and their environmental characteristics; possible solutions to energy available and related environmental problems; solar-hydrogen energy system.
PREREQUISITE: FRESHMAN STANDING.

MAE202 Dynamics
3 credits Fall & Spring Semester
Discussion of motion description and analysis, application of Newton's laws, energy, and momentum principles to mechanical systems. Introduction to mechanical vibrations. Co requisite: PHY 205.

MAE207 Mechanics of Solids II
3 credits Fall & Spring Semester
Discussion of displacements, instability, flexural, shear, torsional, and principle stresses. Introduction to statically indeterminate analysis.
MAE241 Measurements Laboratory
0-3 credits Fall Semester
Introduction to experimental mechanical engineering. Basic principles of measurement, data interpretation, and uncertainty analysis are covered. Laboratory exercises in mechanical engineering areas are included. Co requisite: EEN 201 or 205.
PREREQUISITE: MAE 207, IEN 311, ENG 107.

MAE301 Engineering Materials Science
3 credits Fall & Spring Semester & First Summer Session
Introduction to the physics and chemistry of the solid state including the structure and properties of metals, polymers, and ceramics. Co requisite: PHY 207.
PREREQUISITE: PHY 207

MAE302 Mechanical Behavior of Materials
0-3 credits Fall Semester
Application of metallurgy and mechanics to the study of the plastic deformation and fracture of metals, ceramics, and plastics. Lecture, 2 hours; laboratory, 3 hours.
PREREQUISITE: MAE 207.

MAE303 Thermodynamics I
3 credits Fall & Spring Semester & First Summer Session
Thermodynamic properties of materials; the first and second laws of thermodynamics; application to thermodynamic processes; introduction to heat transfer.
PREREQUISITE: PHY 206, MTH 112 OR 132

MAE304 Kinematic Design
3 credits Spring Semester
Fundamentals of kinematic analysis and design of motion of linkages, cams, and gears are discussed. Analysis of forces in linkages, cams and gears is also included.

MAE308 Thermodynamics II
3 credits Spring Semester
Course topics include cycle irreversibility, availability of energy, power and refrigeration cycles, behavior of mixtures and solutions, chemical thermodynamics, and compressible fluids.
PREREQUISITE: MAE 303.

MAE309 Fluid Mechanics
3 credits Fall & Spring Semester & First Summer Session
Course topics include fluid statics, fluid flow concepts, dynamics of inviscid and viscous fluids, closed and open channel flow, and compressibility effects.
PREREQUISITE: CAE 210, PHY 206.

MAE310 Heat Transfer
3 credits Fall & Spring Semester
Application of elementary methods of solution to heat transfer problems involving steady and unsteady state conduction, radiation, and convection. Introduction of meaningful experimental data is also included.
PREREQUISITE: MAE 303.
MAE311 Mass Transfer I  
3 credits  
Offered By Announcement Only  
Introduction to mass transfer phenomena and mass transfer operations in gas-liquid systems. Derivation and application of mass transfer rate equations and simultaneous heat and mass transfer phenomena are also included.  
PREREQUISITE: MAE 303, 309.

MAE341 Mechanical Design I  
3 credits  
Fall Semester  
Concepts and software for kinematics, solid modeling, and project management. Fundamentals of mechanical design: stresses in and failure of mechanical elements. Individual and group design projects.  
PREREQUISITE: MAE 202, 207.

MAE342 Mechanical Design II  
3 credits  
Spring Semester  
Review of the design process and creativity in design. Topics include design and reliability oars, shafts, etc. Individual and group design projects are included.  
PREREQUISITE: MAE 341.

MAE351 Mechanics Laboratory  
0-2 credits  
Spring Semester  
Exercises in the experimental determination of the mechanical properties of materials and the static and dynamic characteristics of mechanical and structural elements. Lecture, 1 hour; laboratory, 3 hours.  

MAE362 Computer Analysis of Mechanical and Aerospace Engineering Problems  
3 credits  
Spring Semester  
Exploration of physical systems behavior using discrete models. Topics include numerical analysis, solid modeling, and software evaluation. Students solve engineering problems using student-developed and existing software. Co requisite: MAE 310.  
PREREQUISITE: MAE 111, 341 AND MTH 211. COREQUISITE: MAE 310.

MAE371 Aerodynamics  
3 credits  
Spring Semester  
Course discusses the history of flight. Topics include fundamental variables, the atmosphere, basic equations, their approximations, compressibility, viscosity, flow regimes potential flow, and aerodynamics of airfoil and wing.  
PREREQUISITE: MAE 309.

MAE399 Cooperative Education  
1 credit  
Fall & Spring Semester & First & Second Summer Session  
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated.

MAE404 Experimental Engineering Laboratory  
0-2 credits  
Fall Semester  
Experimental analysis of problems in fluid mechanics, thermodynamics, and other areas of engineering. Lecture, 1 hour; laboratory, 3 hours.  
PREREQUISITE: MAE 303, 309, 310.
MAE405 Thermal Environmental Engineering
3 credits Fall Semester
An extension of basic thermodynamics to the design of engineering systems exposed to various thermal environments. Topics include fundamentals of air conditioning, special refrigeration systems, solar radiation, and thermal analysis of engineering components.
PREREQUISITE: PREREQUISITE OR COREQUISITE: MAE 308, 310.

MAE408 Heating, Ventilating, and Air Conditioning
3 credits Spring Semester
Principles and procedures for the analysis and design of heating, ventilating and air conditioning (HVAC) systems, including moist air properties and conditioning processes, heating and cooling load calculations, building energy consumption, thermal comfort, and indoor air quality. Not available for students having taken MAE 405.
PREREQUISITE: MAE 303.

MAE410 Engineering Administration
2 credits Fall Semester
Course topics include engineering economics, cost determination, legal phases of engineering, and engineering procedures. Lecture, 2 hours.
PREREQUISITE: IEN 311 AND JUNIOR STANDING.

MAE412 System Dynamics
3 credits Fall Semester
Course topics include dynamic modeling of mechanical and thermo-fluid systems. Laplace transforms, transfer functions, energy concepts, causality, linearity, linear graph models, energy transducing system elements, frequency domain methods.
PREREQUISITE: EEN 201 OR 205, MAE 202, 309.

MAE415 Automatic Control
3 credits Spring Semester
Introduction to system theory, transfer functions, and state space modeling of physical systems. Course topics include stability, analysis and design of PID, Lead/Lag, other forms of controllers in time and frequency domains, root locus Bode diagrams, gain and phase margins, Nichols chart, Nyquist criterion, and systems with time delay.
PREREQUISITE: SENIOR STANDING

MAE420 Applied Thermodynamics
3 credits Spring Semester
PREREQUISITE: MAE 303.

MAE441 Design of Fluid and Thermal Systems
3 credits Fall & Spring Semester
Course topics include thermal and fluid systems design fundamentals, piping systems, selection of pumps, piping system design practices, classification of heat exchanges. Basic design methods of heat exchange equipment is also included.
PREREQUISITE: MAE 309, 310.
MAE442 Capstone Design Project-I
0-1 credits
Fall & Spring Semester
Lectures and classroom discussions cover (i) legal, ethical, and societal responsibilities of engineers, (ii) design factors such as product safety, reliability, life cycle costs, and manufacturability, and (iii) other aspects such as global market, contemporary issues, and continuous learning process. Students are required to select group design projects from the breadth of mechanical engineering activity and present project to serve as the basis for MAE 443.
PREREQUISITE: SENIOR STANDING IN MECHANICAL ENGINEERING.

MAE443 Capstone Design Project-II
0-2 credits
Fall & Spring Semester
Continuation of the Capstone Design Project-I course. A mechanical system is designed, implemented, documented, and presented.
PREREQUISITE: MAE 442.

MAE444 Capstone Aerospace Design Project-I
0-1 credits
Fall & Spring Semester
Lectures and classroom discussions cover (i) legal, ethical and societal responsibilities of engineers, (ii) design factors such as product safety, reliability, life cycle costs and manufacturability, and (iii) other aspects such as global market, contemporary issues and continuous learning process. Students are required to select group design projects from the breadth of aerospace engineering activity and present project proposals to serve as the basis for MAE 445.
PREREQUISITE: SENIOR STANDING IN AEROSPACE ENGINEERING.

MAE445 Capstone Aerospace Design Project-II
2 credits
Fall & Spring Semester
Continuation of the Capstone Aerospace Design Project-I course. An aerospace system/subsystem is designed, implemented, documented and presented.
PREREQUISITE: MAE 444.

MAE446 Aircraft Design
3 credits
Fall Semester
Concepts of aircraft design emphasizing on design layout including the airfoil geometry selection, propulsion integration, configuration layout, payload and landing gear system. Co requisite: MAE 471.
PREREQUISITE: PRE- OR CO-REQUISITE: MAE 471

MAE470 Introduction to Aerospace Structures
3 credits
Spring Semester
Course topics include mechanics of thin-walled aerospace structures, load analysis, virtual work, energy principles, stability of aerostructures, and finite element methods.
PREREQUISITE: MAE 207.

MAE471 Flight Dynamics
3 credits
Fall Semester
Course topics include aerodynamic performance, stability, control, propulsion systems, and structures. Case Studies of Aerospace Systems are also included.
PREREQUISITE: MAE 371.
MAE472 Design of Aerospace Structures
3 credits Fall Semester
Design Philosophy and principles of aerospace structures. Detailed design of wing box structure, fuselage, landing gear mechanism, fasteners and structural joints. Application of composite materials.
PREREQUISITE: MAE 470.

MAE490 Undergraduate Research
1-3 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

MAE501 Methods of Engineering Analysis
3 credits Fall Semester
Analysis of engineering systems in equilibrium and motion. Examples considered from mechanical, electrical, thermal and fluids engineering. Mathematical theory and computer methods for obtaining numerical solutions are developed for various cases involving discrete and continuous systems. Lecture, 3 hours.
PREREQUISITE: MAE 412, MTH 311 OR PERMISSION OF THE INSTRUCTOR

MAE502 Vibrations
3 credits Fall Semester
Basic theory of free and forced vibrations of mechanical systems with and without damping. Applications to systems with one and several degrees of freedom are included.
PREREQUISITE: MAE 202, 207, 412 OR PERMISSION OF INSTRUCTOR

MAE503 Internal Combustion Engines
3 credits Fall Semester
Course discusses engine types, characteristics, and operation. Topics include performance factors, fuel combustion, power cycles, knock and engine variables, exhaust emissions, fuel metering, compressors, and turbines.
PREREQUISITE: MAE 303, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR.

MAE505 Design for Manufacturability
3 credits Offered By Announcement Only
Manufacturing concerns at design stage. Design theory and methodology. Statistical considerations in geometric dimensioning, tolerances, reliability-based design, and quality control. Producibility, design for assembly, and value engineering. Life cycle costs and optimum design using nonlinear programming and Taguchi approaches. Hands on projects on machine tools.
PREREQUISITE: MAE 341 AND 342 OR CONSENT OF INSTRUCTOR

MAE506 Nuclear Engineering
3 credits Offered By Announcement Only
Course topics include a review of neutron physics, chain reactions, reactor theory, steady state operation, and reactor kinetics. Control, long term reactivity changes, materials, heat transfer, and shielding are also included. Lecture, 3 hours.
PREREQUISITE: SENIOR STANDING IN MECHANICAL AND AEROSPACE ENGINEERING OR PERMISSION OF INSTRUCTOR

MAE507 Advanced Mechanics of Solids
3 credits Spring Semester
Course discusses the basic elements of elasticity, plasticity, and viscoelasticity. Application to mechanical systems at rest and in motion are included.
PREREQUISITE: MAE 202, 207, SENIOR STANDING OR PERMISSION OF INSTRUCTOR.
MAE508 Intermediate Heat Transfer

3 credits
Spring Semester
Course discusses steady and unsteady heat transfer by conduction, convective heat transfer in laminar and turbulent fluid flow, natural convection, and heat transfer by radiation.
PREREQUISITE: MAE 310.

MAE509 Hydrogen Energy

3 credits
Fall Semester
Evaluation of new energy sources, need for an intermediary system, hydrogen energy system, hydrogen as energy carrier, hydrogen production methods, hydrogen storage and distribution, utilization of hydrogen by residential, commercial, transportation, and industrial sectors are discussed as well as environmental, safety, and economical considerations.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

MAE510 Fundamentals of Solar Energy Utilization

3 credits
Spring Semester
Fundamentals basic to the design and performance analysis of thermal systems for the capture and utilization of Solar Energy.
PREREQUISITE: MAE 303, MTH 211 AND PHY 207.

MAE511 Engineering Fracture Mechanics

3 credits
Offered By Announcement Only
Course addresses the consequence of fracture including some illustrative applications of fracture mechanics, Griffith’s fracture theory, review of relevant results from solid mechanics, the three basic modes of fracture, stress intensity factor, introduction to elasto-plastic and dynamic fracture, fatigue crack propagation, fracture and non-destructive evaluation procedures.
PREREQUISITE: MAE 207, SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

MAE512 Intermediate Fluid Mechanics

3 credits
Fall Semester
Course topics include conservation of mass, momentum, and energy, potential flow, viscous laminar and turbulent flows, the Reynolds analogy, and Boundary-layer approximations. Gas dynamics are also discussed.
PREREQUISITE: MAE 309.

MAE513 Kinematics for Robotics

3 credits
Offered By Announcement Only
Geometry of unconstrained plane motion with applications to linkage design. Topics include type and number synthesis, introduction to 3-D mechanism with applications to robotics, graphical, analytical, and computer techniques, including the use of analysis software.
PREREQUISITE: MAE 202, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR.

MAE514 Advanced Internal Combustion Engines Experimental Studies

3 credits
Spring Semester
Experimental mechanical engineering as it pertains to internal combustion engines. The principal measurements necessary to analyze the operation of an internal combustion engine are covered. Emphasis is placed on experiment planning, data interpretation, and error analysis.
PREREQUISITE: MAE 503 OR PERMISSION OF INSTRUCTOR.
MAE516 Introduction to Composite Materials
3 credits
Offered By Announcement Only
Course provides an introduction to composite materials and terminology. Topics include advantages offered by composite materials, current aerospace, automotive, and bio-mechanics applications, experimental results, analytical models, and effects of impact and fatigue loads. The environment's impact on composite materials' performance and design procedures are discussed. Case studies examining composite materials as efficient replacements are also included.
PREREQUISITE: MAE 207, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR.

MAE517 CAD Applications Using Interactive Computer Graphics
3 credits
Offered By Announcement Only
Computer methods and graphics in the engineering design process. Introduction to available engineering analysis codes, principles of computer graphics, and interactive graphical methods in problem solving. Mathematics for 2-D and 3-D graphical manipulation. Programming project work is required.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

MAE518 Chemical and Process Engineering A
3 credits
Offered By Announcement Only
Course analyzes single and multi-stage concentration processes in the liquid-solid systems such as crystallization and drying. Processes apart from equilibrium, controlled diffusion, mathematical treatment, and equipment design are also discussed.
PREREQUISITE: MAE 310, 311. COREQUISITE: MAE 508.

MAE519 Chemical and Process Engineering B
3 credits
Offered By Announcement Only
Stagewise equilibrium separation processes in liquid-liquid systems such as distillation, rectification, absorption, and extraction. Application of phase equilibria and balance equations, mathematical treatment, and equipment design.
PREREQUISITE: MAE 310, 311, 308.

MAE520 Air Pollution
3 credits
Spring Semester
Course topics include fundamentals of air pollution, air quality, properties of air pollutants, effect of pollutants on the environment, analysis and modeling, diffusion of pollutants, and air pollution control.
PREREQUISITE: MAE 303, 309/CAE 330 OR PERMISSION OF INSTRUCTOR.

MAE521 Exhaust Emission Control
3 credits
Spring Semester
Course topics include automotive emissions, air pollution, combustion of homogeneous mixtures, emission control systems, Federal emission standards, and emission instrumentation and measurement. Lecture, 2 hours; Laboratory, 3 hours.
PREREQUISITE: SENIOR ENGINEERING STANDING OR PERMISSION OF INSTRUCTOR.

MAE528 Fuel Cells
3 credits
Spring Semester
Introduction to fuel cells, thermodynamics of fuel cells, electrochemical kinetics in fuel cells, transport phenomena in fuel cells, introduction to various types of fuel cells.
PREREQUISITE: CHM 151 AND MAE 303
MAE538 Computer-Aided Air Conditioning Design and Energy Management
3 credits Offered By Announcement Only
Course topics include equipment and components, air conditioning system, all-air systems, air-and-water systems, all water systems, heat recovery systems, cogeneration systems, heat pump systems, central heating and cooling, energy management, and computer applications.
PREREQUISITE: MAE 405 OR 408 OR PERMISSION OF INSTRUCTOR.

MAE539 Heating, Ventilating and Air Conditioning System Design
3 credits Fall Semester
Course topics include basic HVAC systems, multizone systems, dual-duct systems, terminal reheat systems, variable air volume systems, induction and induction reheat systems, special applications, hydronic systems, unitary and heat pump systems, hydronic heat recovery systems, cooling and heating load calculation duct and piping design, overall system design, and integration.
PREREQUISITE: MAE 405 OR 408 OR PERMISSION OF INSTRUCTOR.

MAE540 Energy Conversion
3 credits Spring Semester
Course topics include energy conversion, utilization, present and projected consumption of energy, thermodynamic principles, nuclear energy, fission and fusion reactions, hydroelectric power, and solar energy. Alternative energy sources, the hydrogen economy, and the energy-environment-economy system are also discussed.
PREREQUISITE: SENIOR STANDING IN MECHANICAL AND AEROSPACE ENGINEERING OR PERMISSION OF INSTRUCTOR.

MAE541 Two-Phase Flow Fundamentals and Design
3 credits Offered By Announcement Only
Course topics include two-phase flow fundamentals for thermal design, heat transfer, and pressure drop analysis of two-phase flows in tube and around tube bundles, heat transfer design correlations in boiling, evaporation, and condensation. Classifications of heat vapor generation and vapor condensation, heat exchangers for air-conditioning and refrigeration, enhancement of boiling; condensation, evaporation heat transfer, and fouling of heat exchangers are also discussed. Design examples are included.
PREREQUISITE: MAE 303 AND 310 OR PERMISSION OF INSTRUCTOR.

MAE550 Product Safety Engineering
3 credits Offered By Announcement Only
Product safety for the designer and the design review process. Topics include hazard analysis of products including use of regulatory and voluntary standards and analytical tools such as fault tree analysis. Constraints imposed by product liability law, design techniques, and process requirements to minimize hazards are also discussed.
PREREQUISITE: SENIOR STANDING IN ENGINEERING OR PERMISSION OF INSTRUCTOR.

MAE551 Special Problems
1-3 credits Fall & Spring Semester & First & Second Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
MAE552 Special Problems
1-3 credits Fall & Spring Semester & First & Second Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAE570 Aero Propulsion
3 credits Fall Semester
Definition of the atmosphere, propulsion basics, rocket fundamentals, turbine fundamentals, gas turbine cycles, component matching, math and computer models, aircraft missions, cycle section, reliability, and durability are analyzed.
PREREQUISITE: MAE 303, 309.

MAE571 Introduction to Aerospace Control
3 credits Spring Semester
Course topics include modeling of Aerospace systems, properties of state space realizations, coordinate transforms solution of state equations, controllability, observability, equivalent realizations, model reduction, stability, optimal control, and estimation.
PREREQUISITE: MAE 415 OR PERMISSION OF INSTRUCTOR

MAE590 Special Topics
1-4 credits Fall Semester
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE591 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE592 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE593 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE594 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MAE595 Special Topics
1- 4 credits
Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE596 Special Topics
1- 4 credits
Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE597 Special Topics
1- 4 credits
Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE598 Special Topics
1- 4 credits
Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE599 Cooperative Education
1 credit
Fall & Spring Semester & First & Second Summer Session
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
### ATM102 Introduction to Weather and Climate
3 credits  
Spring Semester

### ATM103 Survey of Modern Meteorology
3 credits  
Fall Semester  
PREREQUISITE: MTH 108

### ATM118 Current Weather Topics
1 credit  
Spring Semester

### ATM120 Topics in Broadcast Meteorology
1 credit  
Fall Semester  
PREREQUISITE: MSC/ATM 103 AND 118 OR PERMISSION OF INSTRUCTOR

### ATM220 Global Climate Change
3 credits  
Fall Semester  
PREREQUISITE: MSC/ATM 103, GSC110 OR GEG 120

### ATM243 Weather Forecasting
3 credits  
Fall Semester  
PREREQUISITE: MSC/ATM 103, MTH 108

### ATM303 Meteorological Instrumentation
3 credits  
Spring Semester  
PREREQUISITE: MSC/ATM 103; PHY 101 OR 205

### ATM305 Atmospheric Thermodynamics
3 credits  
Fall Semester  
PREREQUISITE: MSC/ATM 103; PHY205; COREQUISITE MTH310

### ATM306 Advanced Principles in Broadcast Meteorology
3 credits  
Spring Semester  
PREREQUISITE: MSC/ATM 120 OR PERMISSION OF INSTRUCTOR

### ATM307 Introduction to the Physics of Climate
3 credits  
Spring Semester  
PREREQUISITE: MSC/ATM 305

### ATM321 Scientific Programming in the Atmospheric Sciences
3 credits  
Spring Semester  
PREREQUISITE: MSC/ATM 103 OR CSC 120; MTH 162; MTH 210

### ATM371 Readings in Atmospheric Science
1- 2 credits  
Fall & Spring Semester  
PREREQUISITE: PERMISSION OF FACULTY

### ATM405 Atmospheric Dynamics I
3 credits  
Spring Semester  
PREREQUISITE: MSC/ATM 305; COREQ MTH 513

### ATM406 Atmospheric Dynamics II
3 credits  
Fall Semester  
PREREQUISITE: MSC/ATM 405
ATM407 Weather Analysis
3 credits
PREREQUISITE: MSC/ATM 305
Fall Semester

ATM409 Physical Meteorology
3 credits
PREREQUISITE: MSC/ATM 305
Spring Semester

ATM411 Projects in Atmospheric Science
1-3 credits
PREREQUISITE: ATM 371, PERMISSION OF COORDINATOR
Fall & Spring Semester

APPLIED MARINE PHYSICS

AMP402 Introduction to Ocean Engineering
3 credits
Fall Semester
History and development of major fields within Ocean Engineering. Introduction to analytical and experimental techniques in coastal and harbor engineering, offshore structures, ships and ship dynamics, underwater technology, and underwater acoustics. Lectures will be supplemented by films.
PREREQUISITE: MTH 311, OR PERMISSION.

AMP509 Coastal Physics and Engineering
3 credits
Spring Semester
Course addresses linear wave theory, wave statistics, wave generation, tides, wind-driven currents, nearshore circulation, sediment transport by waves and currents, bedforms, bedload, and suspended load. Other topics include longshore and cross-shore transport, equilibrium beach profiles, coastal processes models, Pelnard-Considere model for shoreline change, and Escoffier model for inlet stability.
PREREQUISITE: CAE 330 OR AMP 575.

AMP531 Ocean Measurements
3 credits
Spring Semester
Course topics include instrumentation, automatic data acquisition and analysis, time series analysis, signals and noise, filtering, and applied statistics.
PREREQUISITE: MTH 311.

AMP535 Introduction to Underwater Acoustics
3 credits
Spring Semester
Course topics include sound waves and pulses, harmonic analysis, sound propagation in the ocean, sonar systems, scattering and absorption, acoustic measurement of marine life and sea-floor properties, sound transmission in waveguides, ambient noise, transducers, and hydrophones.
PREREQUISITE: MTH 311.

AMP551 Special Topics
1-3 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Applied Marine Physics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP553 Special Topics
1-3 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Applied Marine Physics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
AMP554 Special Topics
1-3 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Applied Marine Physics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP575 Applied Ocean Hydrodynamics
3 credits Fall Semester
The equations governing the dynamics of homogeneous fluids are derived. The concepts of deformation rates, vorticity, stream function, and ideal fluid flow are introduced and demonstrated in applications describing flows in the marine environment. Semi-empirical methods for analyzing viscous flows, boundary layers, and turbulence are presented. Eddy viscosity and more advanced turbulence closure schemes are discussed in the context of coastal circulation, bottom boundary layers and sediment transport.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP576 Wave Propagation in the Ocean Environment
3 credits Fall Semester
Wave equation models, acoustic and other elastic waves, surface gravity waves, boundary conditions, ray tracing, dispersion, diffraction, reflection attenuation, and radiation transport laws are discussed.
PREREQUISITE: MTH 311.

AMP590 Sustainable Fisheries - Assessment and Conservation
3 credits Spring Semester
This is the second of a three course series. This course will focus on advanced stock assessment techniques using acoustics and optics. It will cover, for example:
- History of sampling fish stocks - "from catching to measuring fish" - Measuring with underwater sound and light - Sounds and echoes in marine ecosystem - Survey of fish stocks and their habitat.
PREREQUISITE: MSC 471, OR EQUIVALENT.

MARINE AFFAIRS & POLICY

MAF501 Political Ecology of Marine Management
3 credits Spring Semester
Course provides grounding in political ecology as an important theoretical approach to resource policy and management. The social analysis of resource use, social change, and development are discussed. Models of development and concepts of nature relate to resource use and policy formation is also included. Within this framework, ethnicity, class, and the politics of conservation are explored.
PREREQUISITE: MAF 505.

MAF502 Economics of Natural Resources
3 credits Fall Semester
Course brings together the approaches of natural resource and environmental economics to provide a comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout the course is the concept of sustainable development, defined as maximizing the net benefit to economic development while maintaining the services and quality of natural resources over time. Economic reasoning is used to examine the causes and consequences of environmental and resource problems and measures for dealing with them.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MAF503 Marine Resource Economics

3 credits                                              Offered By Announcement Only
This course surveys the economics of international and global marine resource problems, with particular emphasis on biodiversity loss and climate change. The mainstream economics focus on efficiency--getting the most welfare out of a given endowment of resources--in complemented with a range of social science and natural science interdisciplinary linkages. Three themes stand out. First, economic efficiency may not be the only or even dominant concern in the provision of environmental assets. Issues of fairness and access to those assets, both within a time frame period and over time, may be of greater importance to both individuals and societies. Second, if habitats and their non-human occupants have some form of "intrinsic" value unrelated to human preferences, then we face the problem of how to account for those values. Third, economics lacks a "sustainability" theorem that would ensure whatever economy we might devise would be ecologically sustainable. To be sure of sustainability, economic models must have sustainability conditions built into them.
PREREQUISITE: MAF 502, ECO 345, OR PERMISSION OF INSTRUCTOR.

MAF504 Fieldwork in Coastal Management

3 credits                                                           Spring Semester
The field portion of this course will occur in Bocas del Toro, Panama, on the northwest Caribbean coast of Panama where the University of Miami has been involved in the development of a Coastal Management plan since 2004. The Bocas del Toro Archipelago of over 20 near-shore islands boasts a rich diversity of cultures, as well as high quality coastal environments. The region is currently experiencing rapid tourist growth, as well as residential development projects for foreigners. The cultural and biological diversities of the region, as well as the development pressures they face, provide an excellent opportunity to study the socio-economic and environmental impacts of tourist development; regional attempts to create land use and coastal plans; conflicts among different uses and users; and various cultural perspectives on the current and evolving situation. The course allows students to develop projects tailored to their interests and skills.
PREREQUISITE: MAF 518 IS HIGHLY RECOMMENDED.

MAF505 Fieldwork in Coastal Cultures

3 credits                                                           Spring Semester
Field course in which the student participates in a social and economic analysis of a coastal culture (i.e., stone crab fishermen in Everglades City, spiny lobster fishermen in Key West, boat builders and commercial divers in the Abacos, Bahamas). Preliminary lectures and reading introduce the theory and method which the student then practices during a week-long field trip.
PREREQUISITE: MSC 310 OR PERMISSION OF INSTRUCTOR.

MAF506 Advance Fieldwork in Coastal Cultures

3 credits                                                           Spring Semester
Advanced field course in which the students participate in the social and economic analysis of a coastal culture (e.g. Louisiana bayou fishermen, Abacos boat builders, Tarpon Spring spongers). Students utilize field research techniques learned in MAF 505 and develop skills in framing a research problem. Students examine a coastal issue from an anthropological perspective, structuring a field research paper.
PREREQUISITE: MAF 505.
MAF510 Environmental Planning and the Environmental Impact Statement
3 credits
Spring Semester
Course takes a broad view of environmental planning and analysis while focusing specifically on the preparation of environmental impact statements. Statutory requirements and procedures at the federal level are examined. Judicial opinions are studied that reflect environmental disputes and controversies. The course also considers some of the substantive requirements of environmental impact analyses such as the assessment of physical and biological environment and socioeconomic impacts.

MAF512 Aquaculture Management
3 credits
Fall Semester
Course examines the various strategies of resource exploitation and utilization in developing aquaculture projects. Resources include environmental, technological, social, economical, and administrative aspects encountered in commercial aquaculture development. The course covers all stages of planning and development, with emphasis on determining the technical and economic feasibility of aquaculture projects.

MAF513 Aquaculture Management II
3 credits
Spring Semester
Course is a complement to Aquaculture Management (MAF 512) and examines advanced aquaculture management techniques and strategies with emphasis on commercial operations. Course requires a background in either aquaculture or business. Prerequisite: MAF 512 or permission of instructor.
PREREQUISITE: MAF 512 OR PERMISSION OF INSTRUCTOR.

MAF514 Field Techniques in Prehistoric Underwater Archaeological Excavation
3 credits
First Summer Session
An introduction to specialized techniques of underwater excavation applicable to the excavation of Little Salt Spring (LSS), a prehistoric site owned and operated by Rosenstiel School of Marine and Atmospheric Science. All students participate in a one-week intensive lecture course in the prehistory of Florida and general techniques of underwater excavation. The field course begins after that. All students must be present for all of the field course in order to complete the basic requirements. Activities include daily underwater excavation in depths of 10-30 feet of water, as well as surface support activities relating to diving and the recording and basic conservation of recovered ecofacts and artifacts dating before 9,000 radiocarbon years before present.
PREREQUISITE: STUDENTS WHO INTEND TO DIVE (NOT REQUIRED) MUST HAVE ALREADY BEEN QUALIFIED AS RSMAS SCIENTIFIC DIVERS (BASIC), UNDER GUIDELINES ESTABLISHED BY THE AMERICAN ACADEMY OF UNDERWATER SCIENCES (AAUS) IN ORDER TO PARTICIPATE IN COURSE-RELATED SCUBA-DIVING ACTIVITIES.

MAF515 Techniques of Marine Archaeological Survey and Recording
3 credits
Offered By Announcement Only
The location and study of underwater archaeological sites is undergoing fundamental changes because of application of advanced technologies developed for other fields, notably remote sensing, and the general availability of computer power for individual users. This course introduces the student to the latest techniques of survey and recording, focusing on hardware and software that can greatly increase the efficiency of any underwater excavation.
PREREQUISITE: PREVIOUS COURSES IN ARCHAEOLOGY OR MARINE ARCHAEOLOGY OR PERMISSION OF INSTRUCTOR.
MAF516 Ocean Policy and Development and Analysis
3 credits
Fall Semester
Ocean policy development and analysis of issues such as: offshore oil drilling, fisheries resource conflicts, marine mammal protection, ocean dumping and incineration, multiple use conflicts in marine protected areas, pollution from land based sources, and oil spill contingency planning.

MAF517 Aquaculture and the Law
3 credits
Offered By Announcement Only
This course examines the substantive legal issues concerning Aquaculture and the Coastal Zone. Legal aspects of Aquaculture related to ownership and boundaries in the coastal zone, legal and regulatory constraints, international consideration private and public rights, risks and incentives. Fish and shellfish as personal property and conservation laws affecting the fish farmer.

MAF518 Coastal Zone Management
3 credits
Fall Semester
Development of a framework for formulation and assessment of coastal zone policy. Analysis of issues and conflicts in coastal zone management (CZM), such as: zoning and planning, coastal and beach protection, ecosystem protection, the federal flood insurance program, adaptations to sea level rise, coastal pollution from land-based sources, and tourism impacts.

MAF519 Aquaculture Management III (Fieldwork)
3 credits
First Summer Session
Students will conduct fieldwork on environmental, technological, social, economical, and administrative aspects encountered in commercial aquaculture operations. This field course will complement Aquaculture Management I and II. Students will be able to apply most of the topics taught in MAF 512 and MAF 513. They will participate in all stages of the production process, including maturation, spawning, larval husbandry, nursery and grow out techniques, as well as harvesting, processing and exporting. Students will visit several large commercial hatcheries, farms and processing plants currently producing processing, packing and exporting shrimp and fish (both marine and freshwater) for US and European and Asian markets. PREREQUISITE: MAF 512, 513 OR PERMISSION FROM THE INSTRUCTOR.

MAF520 Environmental Law
3 credits
Fall Semester
An introductory course focusing on environmental problems. The study of Regulatory legislation, common law, and administrative law. Topics include toxic substances, air and water pollution, and habitat and species protection. PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF525 Fisheries Socioeconomics and Management
3 credits
Fall Semester
This course applies microeconomic theory to fisheries resource problems and policies. Economic models with the value of production as their objective, will contrast economists’ and biologists’ definitions of maximum yield and show why an unregulated fishery will not operate at either level. We will use economic reasoning to examine causes and consequences of fisheries problems and measures for dealing with them.
MAF526 Marine Cultural Resource Management

3 credits  
Spring Semester

Submerged archaeological sites as exhaustible resources of a country's cultural heritage. Policies and procedures for their protection or mitigation will be surveyed using as examples the statutes and regulations of foreign states, the federal government, and the US states.

PREREQUISITE: APY 340.

MAF530 Port Operations and Policy

3 credits  
Offered By Announcement Only

The course will include: Introduction to ports; port geography; port operations; port administration; Federal port policy; free ports/free zones; port investment/tariffs; port marketing; Coastal Zone Management and ports; case studies, CZM; fostering economic development; and Port planning and development.

PREREQUISITE: JUNIOR STANDING.

MAF560 Introduction to Marine Geographic Information Systems

3 credits  
Fall Semester

Marine Geographic Information Systems are emerging as a distinct subset of GIS, due to fundamental differences between terrestrial and underwater spatial information (2-D vs. 3-D, multiresolution, synoptic data collection, time depth (4-D) modeling). Approximately the first half of this course is a brief review of basic GIS, and the second half concentrates on aspects of marine data acquisition and manipulation in the GIS context.

MAF561 Introduction to Marine Geographic Information Systems - Laboratory

0 credit  
Fall Semester & First Summer Session

Introduction to Marine Geographic Information Systems - Laboratory introduces students the basic methods and technology in Marine Geographic Information Systems. The course is taught with hands-on laboratory exercises following the evolution of Marine Geographic Information Systems, from basic cartography to topological and network modeling to internet access and application.

MAF562 Spatial Analysis: Intermediate Course in Marine GIS

3 credits  
Spring Semester

Course provides a general survey of available quantitative methods for spatial analysis using Geographic Information Systems (GIS). Although GIS has been widely used for mapping and database management, this course is focused on the functionality of GIS as an effective tool for modeling and analyzing complex spatial relationships. Quantitative methods suitable for analyzing different features types are discussed. Applications for such methods are also presented.

PREREQUISITE: MAF 560, 561 OR PERMISSION OF THE INSTRUCTOR.

MAF570 Conservation and Management of Marine Mammals

3 credits  
Spring Semester

This course emphasizes on the notion that proper conservation and management of large marine vertebrates (i.e., marine mammals, sea turtles, sharks and rays) require the understanding and integration of some important aspects of the (comparative) biology and ecology of these groups of animals with the multifaceted nature (e.g., social, economical, ethical and cultural dimensions) of these concerns.

PREREQUISITE: JUNIOR STANDING
MAF576 Special Topics
1- 4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF577 Special Topics
1- 4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs. Prerequisite: Permission of instructor.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF578 Special Topics
1- 4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF579 Special Topics
1- 4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF580 Special Topics
1- 4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MARINE & ATMOSPHERIC CHEMISTRY
MAC503 Principles of Marine and Atmospheric Chemistry
3 credits Fall Semester
Introduction to the chemical aspects of the sea and atmosphere chemical composition, physico-chemical properties and relationships, methodology of study, fundamental aspects of marine and atmospheric chemistry.
PREREQUISITE: CHM 111 OR PERMISSION OF INSTRUCTOR.

MAC510 Biogeochemical Exploration of the Major Ocean Basins
3 credits Fall Semester
This course will have students explore the basic hydrography and biochemistry of the major ocean basins through use of several publicly available global ocean data sets. Each ocean basin will be assessed for biogeochemical features that are unique to that system. By the end of the course, students will have the skills necessary to investigate and interpret marine biogeochemical processes throughout the global ocean.
PREREQUISITE: PERMISSION OF INSTRUCTOR

MAC560 Tropospheric Chemistry I
3 credits Spring Semester
Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.
PREREQUISITE: MPO 552 OR AN UNDERGRADUATE METEOROLOGY COURSE, OR PERMISSION OF INSTRUCTOR.
MAC581 Special Topics in Marine and Atmospheric Chemistry
1-4 credits Offered By Announcement Only
Lectures, research projects or direct readings in special topics of marine and atmospheric chemistry.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAC584 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics of Marine and Atmospheric Chemistry.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MARINE BIOLOGY & FISHERIES
MBF504 Biology of Marine Mammals
3 credits Fall Semester
The purpose of this class is to introduce students to the biology, evolution, taxonomy, physiology, natural history, behavior, conservation, and management of marine mammals.
PREREQUISITE: ONE-YEAR OF GENERAL BIOLOGY

MBF505 Marine Mammal Disease and Medicine
3 credits Spring Semester
This course will cover the basics (theory and application) of marine mammal disease and medicine. Applications will focus on the medical management of managed care and wild populations.
PREREQUISITE: PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF507 Marine Mammal Applied Behavior Analysis and Managed Care
3 credits Fall Semester
This course involves a thorough examination of specific aspects of marine mammal managed care and conservation programs, with an emphasis on behavior management, analysis, and modification as a basis for adaptive response to changing environments both in-situ and ex-situ. Coursework will also focus on health management and assessment, emergency handling and transportation, government regulations, and wildlife conservation.

MBF508 Biometrics in Marine Science
3 credits Fall Semester
Applied statistical analysis in marine biology and biological oceanography. Descriptive statistics, probability distributions, and hypothesis testing are discussed. Concepts of analysis of variance, simple linear regression, and computer statistical distribution-free methods are also included as well as principles and procedures with computer statistical packages for data analysis. Lecture and laboratory.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF511 Aquaculture
3 credits Offered By Announcement Only
Focus on techniques to culture marine organisms. The growth and physiology of early life stages, the culture of food organisms for larval stages, food requirements of larval and juvenile stages, water quality measurement, disease control, tank design, grow out, composition of artificial feeds and artificial spawning are discussed in detail. Applications of these techniques in commercial aquaculture, culture of animals for research, and for stock enhancement programs are examined. Practical examples are presented for laboratory and hands on rearing of fish larvae. Commercial aquaculture facilities are visited in field trips during the laboratory. Lecture, 2 hours; laboratory, 2 hours.
MBF512 Aquaculture Laboratory
2 credits Offered By Announcement Only
Determining and monitoring water quality, culturing food organisms, larval rearing of shrimp and fish, feeding techniques, identifying parasites and diseases, and avoiding causes of mortality are discussed. Visits to local fish and shrimp hatcheries and farms are included. Co requisite: MBF 511.
PREREQUISITE: COREQUISITE MBF 511.

MBF513 Biology and Ecology of Mangroves
3 credits Spring Semester
Recent research advances in the study of mangroves as a dynamic interface between terrestrial and marine systems. Topics include taxonomy, biogeography, morphology and physiognomy, water relations and mineral nutrition, and physiology and reproduction with emphasis on how mangroves modify tropical coastal environments and how they are affected by external stressors including global climate change. Lecture, 2 hours; field trips, 1 hour; field and laboratory work, minimum 2 hours.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF514 Tropical Marine Biology: A Field Course
3 credits Spring Semester
General survey of marine flora and fauna of tropical marine ecosystems. Inhabitants and communities of the sandy shore, rocky shore, and sea grass meadows, mangrove shoreline, coral and artificial reefs are collected, identified, maintained. Life histories of representatives are presented. Concepts of island biology and geology such as shore zonation local reef formation and the geological history of the lagoon are also discussed. The 10 day course involves 90 contact hours and approximately 40 hours of formal lectures. Grades are based on a laboratory practicum and written final exam. The course is given in its entirety at the University's field station at Bimini, Bahamas.
PREREQUISITE: BY PERMISSION OF INSTRUCTOR.

MBF515 Tropical Marine Ecology
3 credits Offered By Announcement Only
Marine ecology with emphasis on tropical ecosystems and local habitats. Physical environmental and biotic adaptations, population, and community ecology are discussed. Field exercises in mangrove, sea grass, and coral reef ecosystems are also included.
PREREQUISITE: INVERTEBRATE ZOOLOGY AND ECOLOGY OR PERMISSION OF INSTRUCTOR.

MBF518 Ecology and Physiology of Coral Reef Systems
3 credits Offered By Announcement Only
Coral reefs as integrated systems are examined from geological, ecological, and biological perspectives. The roles of global and local environmental fluctuations, physical disturbance, and biotic interactions in controlling reef formation and community structure is emphasized. The physiology of scleractinian corals and their algal symbionts is described and the prevalence of algal-invertebrate symbiosis on coral reefs related to nutrient cycling, productivity, and food webs on coral reefs.
PREREQUISITE: PERMISSION OF INSTRUCTORS.

MBF519 Tropical Marine Ecology Lab
1 credit Offered By Announcement Only
Combined field-laboratory exercises in mangrove, sea grass, and coral reef ecosystems.
MBF520 Tropical Marine Ecology: A Short Course
2 credits Spring Semester
This tropical Marine Biology course established primarily for Florida high school marine biology teachers is taught from an interactive point of view where students are afforded the opportunity to both learn in the conventional way of classroom lectures, and more importantly to learn by involvement and participation. Students are exposed to the major marine communities found in Bimini and South Florida such as: 1) coral reef; 2) artificial reef; 3) mangrove; 4) sea grass flats; and intertidal zones. Students learn about the uniqueness of each of these ecosystems and the plants and animals which inhabit them. Lectures are divided up by habitat and are given in the morning. In the afternoon students go into the field and traverse on foot or snorkel in each ecosystem. Specimens are collected and identified at night and students are required to learn and identify 50 organisms found in six ecosystems. Field guides are used as reference material. A written exam and laboratory practical is given on the last day of class.
PREREQUISITE: COLLEGE BIOLOGY.

MBF521 Field Techniques and Instrumentation in Tropical Marine Ecology
3 credits Spring Semester
This course covers the instrumentation and field techniques commonly used to characterize the structure and function of the three dominant ecosystems in the tropics and subtropics, i.e. coral reefs, sea grass beds and mangroves.
PREREQUISITE: MPS STATUS/PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF525 Biology of Elasmobranch Fishes: A Field Course
2 credits Offered By Announcement Only
Course discusses the first aspects of elasmobranch biology including systematics of the major taxa, paleontology, and the evolutionary history of sharks as well as anatomical aspects. Course also addresses the physiology and biochemistry of sharks, circulatory, respiratory, developmental, skeletal, and sensory systems involving behavior, ecology, and life history strategies. Factors such as feeding, reproduction and social and swimming behavior are also discussed. The relation between man and shark: overexploitation as it affects shark conservation, survival, and biodiversity is included. Course is given in its entirety at Bimini, Bahamas.
PREREQUISITE: By permission of instructor.

MBF531 Plankton
3 credits Spring Semester
Course topics include the drifting organisms, their central role in the economy of the sea, the influence of the environment, and their adaptations to it. The dynamic and productivity of the plant and animal plankton, the ecology and physiology of animal plankton, especially in connection with special distribution and nutrition, and an introduction to the taxonomy, and quantitative enumeration of the animal plankton is included. Lecture, 3 hours.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MBF539 Oceanic Productivity
3 credits Spring Semester
History, methods, and current topics relevant to studies of marine primary production. Magnitude and fate of primary production in the sea is essential to understand secondary production, the success of fisheries recruitment, and global climate.
MBF540 Introduction to Ecological Modeling

3 credits

Offered By Announcement Only

An introduction to conceptual and mathematical model building methods for ecological processes at population, community, ecosystem, and landscape/seascape-level scales. Other topics include mathematical foundations, numerical modeling, holistic and structured population models, and demography, density-independent and -dependent models, linear and nonlinear systems, community composition, competition, succession, and ecosystem structure and function are discussed. Gap-phase, process-based, compartmental, and coupled biological-physical ecosystem models at landscape scales are also examined.

PREREQUISITE: CALCULUS AND PERMISSION OF INSTRUCTOR.

MBF542 Oceans and Human Health

3 credits

Fall Semester

The objective of this interdisciplinary course is to provide students with introductory knowledge of the broad and relatively young field of Oceans and Human Health. The focus is the present, future, and potential effects of oceanic processes and aquatic organisms on human health, and vice versa. These diverse factors reflect the physical, chemical, biotic and social processes which require an integration of information and knowledge from the medical, marine and social sciences. The course covers harmful algal blooms, marine microbes, and global climate change as well as an overview of coastal impacts and remedies (e.g. drugs from the sea and marine models) through a series of coordinated lectures and case studies on human health, physical environment, and oceanographic processes. Prerequisite: Permission of instructor.

PREREQUISITE: PERMISSION OF INSTRUCTOR

MBF545 Fisheries Sampling and Analysis

3 credits

Spring Semester

Students will learn about experimental sampling concepts and designs, instrumentation, survey implementation and statistical methods to assess fishery-independent size-structured population abundance of exploited and non-target species.

PREREQUISITE: MBF 508 OR PERMISSION FROM INSTRUCTOR-PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF546 FISHERIES POPULATION BIOLOGY

3 credits

Spring Semester

Students will learn conceptual aspects and estimation methods for the main population processes such as growth, survival, reproduction and feeding. There will be an emphasis on data requirements and statistical validation of the data and model fitting, such that students will develop an ability to integrate and summarize complex biological knowledge under a set of well defined protocols.

PREREQUISITE: MBF 508 OR PERMISSION FROM INSTRUCTOR. PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF547 Fisheries Ecosystems: Management and Conservation

3 credits

Spring Semester

Students will learn about the biological, social, economic and legal aspects of fisheries management. Case studies will be used to demonstrate why the success and failures of some fisheries management systems.
**MBF550 Analytical Techniques in Marine Biology**

2 credits  
Offered By Announcement Only  
Theory and applications of selected analytical techniques necessary to conduct quantitative research in marine biology (e.g., electrophoresis, metabolite assays, enzyme assays, radioisotope methodology). One hour lecture followed by three hour laboratory per week.

**MBF555 Graduate Physiology**

3 credits  
Spring Semester  
Broad overview of concepts important for physiology. Topics include discussions of genomes, molecular evolution and functional genetics (metabolism), cell biology and cell communication, and organism-environmental interactions. Readings from the primary literature are included with an emphasis on seminal papers. 
PREREQUISITE: NONE

**MBF565 Fisheries Ecology and Oceanography**

3 credits  
Fall Semester

**MBF570 Special Topics**

1-4 credits  
Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**MBF571 Special Topics**

1-4 credits  
Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**MBF572 Special Topics**

1-4 credits  
Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**MBF573 Special Topics**

1-4 credits  
Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**MBF574 Special Topics**

1-4 credits  
Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**MBF575 Current Applications of Ecological Theory**

3 credits  
Offered By Announcement Only  
Course examines current applications of ecological theory. Topics include issues of stress ecology, methodologies for evaluating stress responses, methodologies for ecological risk assessment, general systems theory, and human/environmental interactions. Lecture, 3 hours. 
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.
MBF576 Diseases of Marine Organisms
3 credits Offered By Announcement Only
Infectious, genetic, and environmentally induced diseases of marine fishes and invertebrates as well as diagnostic methods, cellular, and molecular pathology. Lecture, 3 hours.
PREREQUISITE: GRADUATE STANDING; OR BIL 150, 160, 255 AND PERMISSION OF THE INSTRUCTOR.

MBF578 Evolutionary Genetics
3 credits Fall Semester
A Graduate course that presents and overview from "New Evolutionary Synthesis" (1900) to Evolutionary Genomics. The critical points to emphasize is the importance of standing genetic variation, the role of neutral evolutionary process versus evolution by natural selection and how a evolution perspective provides meaning insights into the biology.

MBF586 Environmental Biology of Fishes
3 credits Offered By Announcement Only
Ecology, dispersal, and modes of life of fishes. Adaptations by larvae and adults to various habitats are covered as well as the effects of man on fish faunas and the importance of fishes to various ecological systems. Lecture, 3 hours.

MBF590 Acoustic Measurement of Nekton, Plankton and Underwater Habitat.
3 credits Fall Semester
MBF 590 is an introductory course on the theory, history and applications of acoustics to measure nekton, plankton and underwater habitat. It was designed for those students who wish to learn how to make quantitative measures of organisms and structure underwater. It is a prerequisite for MBF 690, Advance Measurement of Nekton, Plankton and Underwater Habitat, which focuses on data acquisition in the field and laboratory signal processing. This course is essential for students who need to make precise and accurate underwater measurements for their research.
PREREQUISITE: PERMISSION FROM THE INSTRUCTOR.

MARINE GEOLOGY & GEOPHYSICS
MGG501 Oceanography I (Geological)
2 credits Fall Semester
The first section of the core course curriculum designed as an integrated and multidisciplinary view of ocean processes, covering the major disciplines of marine science and their applications to the study of the marine environment. To be taken in sequence with Oceanography II - Physical (MPO 502), Oceanography III - Chemical (MAC 501), and Oceanography IV - Biological (MBF 502). This course is for non-MGG majors only.
PREREQUISITE: UNDERGRADUATES REQUIRE PERMISSION OF INSTRUCTOR.

MGG511 Earth Surface Systems
3 credits Fall Semester
An introduction to the elements of the earth surface environment and their interactions with an emphasis on the application to understanding the geologic record. Course includes discussions of the processes and agents that influence and shape the character of the earth's surface, the attributes of the resultant sedimentary features, and the use of these features to unravel geologic and geomorphic history. Focus is placed on systems dynamics and interactions among sedimentologic, geomorphic, biotic, and hydrologic processes.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MGG512 Marine Micropaleontology
3 credits
Fall Semester
An introduction to the field of marine micropaleontology with an emphasis on applications in biostratigraphy, biochronology, paleoecology, and paleoceanography. Topics include morphology, taxonomy, ecology, and geologic record of the major microfossil groups, methods of environmental inference, and stable isotope and trace element geochemical studies. Lab work includes a survey of the most important taxonomic groups. Lecture, 3 hours; laboratory, 2 hours.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG513 Introductory Geochemistry
3 credits
Fall Semester
Fundamentals of atomic structure and quantum mechanics applied to Chemistry. Topics include origin and distribution of the elements, chemical bonding and substitution, basic thermodynamics of solids, liquids, and gases. Applications of these concepts to such geochemical processes as magmatic differentiation, rock-water interactions, low temperature aqueous geochemistry, and the geochemical cycling of the elements is also included.

MGG514 Geophysics
3 credits
Fall Semester
Course topics include seismology, gravity, heat flow, thermal history, geomagnetism, plate tectonics, and their importance in understanding the Earth's crust, mantle, and core.
PREREQUISITE: ONE YEAR OF CALCULUS AND ONE YEAR OF PHYSICS.

MGG515 Environmental Hydrology
3 credits
Fall Semester
Course offers an introduction to the physical processes of hydrological science. The mechanisms of evaporation, condensation, precipitation, infiltration, groundwater flow, overland flow, and stream flow are described. Areas of interrelation with environmental science, marine science, and geophysical science are emphasized. Description of appropriate measurement techniques and data interpretation methods are important parts of the course.
PREREQUISITE: PHYSICS.

MGG520 Igneous Petrology
3 credits
Fall Semester
Origin and differentiation of magmas in oceanic and continental settings. Igneous systems traced from the mantle and magma chambers to the eruptive stage. What we can tell from textures and mineralogy of igneous rocks. Use of trace-element and isotopes to understand igneous processes and magma source compositions. Magma types and plate-tectonic cycle. Magmatism when the Earth was young. Extra-terrestrial igneous rocks.

MGG525 Applied Environmental Geophysics
3 credits
Offered By Announcement Only
Application of subsurface geophysical tools to environmental problems. Course includes the theory and application of shallow refraction and reflection seismology, conducting field experiments and processing both marine and land seismic data, other marine survey techniques such as side-scan sonar surveying, potential field techniques (gravity, magnetics, EM), ground penetrating radar, and borehole geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MGG533  Environmental Geology  
3 credits  
Offered By Announcement Only  

MGG541  Field Evaluation of Fossil Platforms, Margins, and Basins  
2 credits  
Offered By Announcement Only  
Field investigation of classic rock sequences formed within ancient platform, margin, and basin environments. The use of ancient exposures as a guide to the interpretation of modern marine environments.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG550  Mathematical Methods for Geoscientists  
3 credits  
Fall Semester  
Background mathematics needed to solve problems in the geosciences. Applications in tectonics, geodynamics, structural geology, seismology, and hydrology. Topics include linear inverse problems, least squares, linear algebra, matrix theory, vectors, dimensional analysis, probability and scientific inference, continuum mechanics, transform and numerical methods to solve differential, and partial differential equations. 
PREREQUISITE: ONE YEAR OF CALCULUS AND ONE YEAR OF PHYSICS.

MGG570  Continental Tectonics  
3 credits  
Spring Semester  
Reviews major research techniques used in the study of the structure and evolution of continental crust and topical discoveries, with an emphasis on the Neogene to Recent time. The course begins with brief introductions to the fields of structural geology, seismology, and geodesy as they relate to continental tectonics. New research in areas such as the rheology of the lithosphere, plate motion models, deformation of continental crust in plate boundary zones, oblique subduction, and earthquake hazard assessment are also discussed. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG579  Plate Tectonics  
3 credits  
Fall & Spring Semester  
The theory of plate tectonics, sea floor spreading, and continental drift. Mathematical description of plate motions, finite and instantaneous rotation poles, consequences of plate tectonics, mountain building, rifting, erosion, and recycling of continental materials are also discussed. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MGG580 Geological and Environmental Remote Sensing

3 credits
Spring Semester
This one semester course will cover major remote sensing techniques used in the geological and environmental sciences. The course will begin with an introduction to the basic physics of remote sensing, followed by a review of major remote sensing techniques used in aircraft and satellite platforms, including IR and near IR, optical and microwave systems. We will then discuss specific terrestrial and coastal applications using a case history approach, including geologic, soil and biomass mapping, environmental monitoring, and natural hazard assessment. The course is aimed at graduate students and senior undergraduates with some background in math and physics. Grades are based on problems sets (a minimum of three), a mid-term test, and a report or lab exercise involving image processing, due at the end of the semester.
PREREQUISITE: CALCULUS AND PHYSICS.

MGG581 Image Analysis and Interpretation

3 credits
Offered By Announcement Only
Course provides a hands-on approach to learning how to use aerial photography, satellite imagery, and other remotely sensed data to derive information about the physical environment. This course enables the student to process, interpret, and analyze remotely sensed data for use in environmental research. Image Analysis and Interpretation complements the course, MGG 580.

MGG583 Scanning Electron Microscopy

2 credits
Spring Semester
Theory and practical application of the SEM and the electron probe to research problems. Lectures and laboratory with emphasis on independent operation of the SEM, special preparation techniques, and interpretation of results are included. Course is designed to provide students with a broad and thorough background in scanning electron microscopy.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG584 Special Topics

1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG585 Special Topics

1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG586 Special Topics

1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MGG587 Special Topics
1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG588 Special Topics
1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MARINE & PHYSICAL OCEANOGRAPHY

MPO502 Oceanography II (Physical)
2 credits
Offered By Announcement Only
Fall Semester
The second section of the course core curriculum designed as an integrated and multidisciplinary view of ocean processes, covering the major disciplines of marine science and their applications to the study of the marine environment. To be taken in sequence with Oceanography I - Geological (MGG 501), Oceanography III - Chemical (MAC 501), and Oceanography IV - Biological (MBF 502). This course is for non-MPO majors only.
PREREQUISITE: UNDERGRADUATES REQUIRE PERMISSION OF INSTRUCTOR.

MPO503 Physical Oceanography
3 credits
Offered By Announcement Only
Fall Semester
Introduction to properties of seawater, instruments and methods, heat budget, general ocean circulation, formation of water masses, dynamics of circulation, regional oceanography, waves, tides, and sea level. A mathematical and problem solving course for majors in MPO.
PREREQUISITE: PHY 202 OR 206, MTH 310 OR 311, OR PERMISSION OF INSTRUCTOR.

MPO511 Geophysical Fluid Dynamics I
3 credits
Offered By Announcement Only
Fall Semester
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.
PREREQUISITE: MPO 551, OR PERMISSION OF INSTRUCTOR.

MPO518 Remote Sensing of the Atmosphere
3 credits
Offered By Announcement Only
Methods and techniques for remote sensing of the earth’s atmosphere. Absorption and scattering of radiation by atmospheric constituents, molecular line or band absorption, and radiative transfer equation are discussed. Application to microwave radar, laser, and optical radar, ground and satellite and optical radar and radiometry, scattering of acoustic waves by turbulence, and to acoustic echo sounding methods are also included.
PREREQUISITE: EEN 533 AND/OR PERMISSION OF INSTRUCTOR.

MPO531 Physical Meteorology
3 credits
Offered By Announcement Only
Electromagnetic and acoustic wave propagation, absorption, and emission. Application to remote sensing, basic physics of dry aerosols, clouds and precipitation, fundamentals of atmospheric electricity, charge separation processes, and electrical field effects are also discussed. Other topics include air pollution physics, dispersal, and removal of particulate and gaseous materials from natural and anthropogenic sources.
PREREQUISITE: BASIC CALCULUS AND ORDINARY DIFFERENTIAL EQUATIONS.
MPO532 Broadcast Meteorology
3 credits
Spring Semester
Students will learn the proper techniques involved in preparing and presenting
a complete and professional weathercast with a heavy emphasis on communication
skills, computer graphics, and on-camera delivery.
PREREQUISITE: MPO 551 OR CONSENT OF INSTRUCTOR

MPO542 Physics of Remote Sensing I - Passive Systems
3 credits
Fall Semester
Course discusses basic physical principles of remote sensing. Topics include an
introduction, sampling issues, fundamental laws of electromagnetic waves, passive
sensing, active sensing, and a brief survey of satellite sensors.
PREREQUISITE: PERMISSION OF INSTRUCTOR

MPO551 Introduction to Atmospheric Science
3 credits
Fall Semester
Thermodynamics of dry and moist processes; elementary dynamical meteorology; description
of weather systems and phenomena on all scales; structure and mechanics
of the general circulation. Co requisite: MPO 552.
PREREQUISITE: PHY 206, MTH 310 OR 311, OR PERMISSION OF INSTRUCTOR.

MPO552 Synoptic Meteorological Laboratory
1 credit
Fall Semester
Analysis of the structure of atmospheric systems.
PREREQUISITE: PHY 206, MTH 310 OR 311, OR PERMISSION OF INSTRUCTOR.

MPO561 Tropical Atmosphere and Ocean
3 credits
Spring Semester
Observed structure of large-scale tropical circulations, including the Trades,
the intertropical Convergence Zone, the Walker circulation, and equatorial wave
disturbances. An overview of tropical climate, including El Nino/Southern Oscillation,
and tropical monsoons is included as well as the formation, structure, and dynamics
of tropical cyclone interactions between tropical convection and large-scale circulations,
equatorial waves, and flow instabilities.
PREREQUISITE: MPO 511, 551, OR PERMISSION OF INSTRUCTOR.

MPO562 Synoptic Scale Meteorology
3 credits
Offered By Announcement Only
Course topics include the structure and behavior of cyclones, anticyclones, and
other temperate latitude synoptic scale disturbances. Objective analysis of synoptic
observations, perturbation, stability analysis of large scale synoptic motions,
and barotropic and baroclinic waves are also analyzed.
PREREQUISITE: MSC 405 OR MPO 551 AND PERMISSION OF INSTRUCTOR.

MPO563 Mesoscale Meteorology and Severe Storms
3 credits
Offered By Announcement Only
Course topics include the structure and dynamics of clouds, thunderstorms, and
mesoscale convective systems, radar and satellite observations of clouds and precipitation,
severe storm forecasting, mesoscale disturbances, frontal and orographic clouds,
and precipitation.
PREREQUISITE: MSC 405 OR MPO 551 AND PERMISSION OF INSTRUCTOR
MARINE & ATMOSPHERIC SCIENCE

MARINE & PHYSICAL OCEANOGRAPHY

MPO581 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO582 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO583 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO584 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO585 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MARINE SCIENCE

MSC100 Ecology of Fishes
2 credits Second Summer Session
Ecology and population dynamics of the major zooplankton groups in open ocean and coastal habitats. Lecture, lab and field trip.

MSC101 Survey of Oceanography
3 credits Fall & Spring Semester & First Summer Session
Introduction to the oceans and their significance to mankind, encompassing geological, physical, chemical, and biological processes; man's role in and on the sea, including fisheries, pollution, and ocean management. Not for major or minor.

MSC102 Introduction to Weather and Climate
3 credits Spring Semester
The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change.

MSC103 Survey of Modern Meteorology
3 credits Fall Semester
Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to majors or minors with permission of instructor.
PREREQUISITE: MTH 108.
MSC105 Introduction to Aquaculture
1 credit
Second Summer Session
The laboratory explores the basic tools and techniques of aquaculture; selection of species, water quality, life cycles and growth dynamics. Practical projects and data presentation required.

MSC106 Hurricanes and Society
3 credits
Fall & Spring Semester
An interdisciplinary course on the meteorology of hurricanes, a review of historically-significant storms, forecasting methods, and the societal and economic impact of the storms.
PREREQUISITE: MSC 102 OR MSC 103

MSC111 Introduction to Marine Science
0-3 credits
Fall Semester
Geological, physical, chemical and biological processes of the world's oceans.
The role of the oceans in global dynamics and man's role in and on the sea, including fisheries, pollution and ocean management. This course replaces MSC 115 and MSC 116. Enrollment limited to Marine Science/Marine Affairs majors. Lecture and discussion, 3 hours. Field trips.

MSC115 Marine Environments of South Florida
2 credits
Offered By Announcement Only
A field and lecture study of selected marine environments around South Florida, with emphasis on the interaction between organisms and the geological substrate. Field trips. Fee required.
PREREQUISITE: SUMMER SCHOLARS PROGRAM

MSC118 Current Weather Topics
1 credit
Spring Semester
Weather-and Climate-related phenomena such as hurricanes, severe storms, global warming, and acid rain. (Notes and analysis materials provided)

MSC120 Topics in Broadcast Meteorology
1 credit
Fall Semester
Broadcast Meteorology, including the production of weather briefings and weather news for TV, radio and print media.
PREREQUISITE: MSC 102 OR MSC 103 OR PERMISSION OF INSTRUCTOR

MSC172 Special Topics in Marine Science
2-6 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

MSC201 Introduction to Research Diving Laboratory
2 credits
Fall Semester
Skills required for using SCUBA as a tool for research. Introduction to biological, geological, archaeological and physical oceanography methods for underwater data collection.
PREREQUISITE: RECREATIONAL SCUBA CERTIFICATION, ABILITY TO PASS A DIVING PHYSICAL EXAMINATION AND SWIMMING TEST. MSC 101 OR 111

MSC204 Environmental Statistics
3 credits
Fall & Spring Semester
This introductory course provides an overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data.
PREREQUISITE: MTH 103 OR HIGHER, PLUS 6 CREDITS IN MSC.
MSC210 The Dynamic Oceans
3 credits
Fall Semester
PREREQUISITE: CO-REQUISITE MTH 161

MSC215 Chemical Oceanography
3 credits
Spring Semester
An introduction to the chemistry of the oceans. Descriptive chemical oceanography of the components of ocean waters (metals, gases, organic compounds and nutrients). Biogeochemical cycles in oceanic systems.
PREREQUISITE: CHM 111 AND 112. COREQ: MSC 216.

MSC216 Chemical Oceanography Laboratory
1 credit
Spring Semester
Chemical and physical methods in chemical oceanography. Analytical and instrumental techniques used to determine density, salinity, chlorinity, dissolved oxygen, nutrients and components of the carbonate system. Co requisite: MSC 215.
PREREQUISITE: COREQUISITE MSC 215.

MSC220 Climate and Global Change
3 credits
Fall Semester
The Earth's climate system and the role of natural and anthropogenic processes in shaping climate change.
PREREQUISITE: 3 CREDITS IN NATURAL SCIENCE

MSC230 Introduction to Marine Biology
3 credits
Fall Semester
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORIES.

MSC232 Introduction to Marine Biology Laboratory
1 credit
Fall Semester
Ecology, physiology, and behavior of marine organisms in south Florida marine habitats. Laboratory Techniques.
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORIES. COREQUISITE: MSC 230.

MSC243 Weather Forecasting
3 credits
Fall Semester
Application of physical principles to weather forecasting. Use and interpretation of computer-generated forecast guidance products of the U.S. Weather Service.
PREREQUISITE: MSC 103; MTH 108.

MSC300 Water Resources: History, Management, and Policy
3 credits
First & Second Summer Session
This course is intended to develop an overview of the issues and problems surrounding the management of aquatic resources in the broadest sense including water quality of natural waters, drinking water, water pollution, water quantity and supply issues, watershed management, wetland protection, and coastal management. We will explore the available strategies to wisely manage the various aquatic resources, policy options and their socio-economic aspects, legal frameworks, and institutional arrangements. The examples and cases discussed in the course will largely come from China, Vietnam, and the US.
MSC301 Introduction to Physical Oceanography  
3 credits  
Spring Semester  
Application of the laws of physics to the study of the properties and circulation of the world's oceans and atmosphere.

MSC303 Meteorological Instrumentation  
3 credits  
Spring Semester  
Techniques for measuring meteorological variables at the ground and in the free atmosphere. (Selected readings)  
PREREQUISITE: MSC 103; PHY 101 OR 205.

MSC305 Atmospheric Thermodynamics  
3 credits  
Fall Semester  
Equation of State; water vapor and moist air thermodynamics; phase changes and latent heat; buoyancy and atmospheric convection; thermodynamic diagrams.  
PREREQUISITE: MTH 310 AND PHY 206.

MSC306 Advanced Principles in Broadcast Meteorology  
3 credits  
Fall & Spring Semester  
Broadcast meteorology including the production of professional weather briefings and weather news for on camera delivery. Emphasis on accurately communicating complex meteorological concepts, use of computer graphics, and on-camera delivery.  
PREREQUISITE: MSC 103 OR PERMISSION OF INSTRUCTOR.

MSC307 Introduction to the physics of climate  
3 credits  
Spring Semester  
The physical mechanisms which govern the earth's climate and climate variability.  
PREREQUISITE: PRE: MSC 305

MSC310 Living Resources of the Ocean  
3 credits  
Spring Semester  
Marine fish and shellfish of major commercial and recreational value: biology, techniques of harvesting, and resource management.  
PREREQUISITE: MSC 230.

MSC313 Coastal Law  
3 credits  
Fall Semester  
Basic doctrines and public policy related to the use and regulation of the United States coastal zone and seabed.  
PREREQUISITE: JUNIOR STANDING.

MSC314 Ocean Law  
3 credits  
Spring Semester  
The principles of international ocean law regarding ocean management; ocean delimitation and issues of environmental ocean regulation within international legal framework.  
PREREQUISITE: JUNIOR STANDING.

MSC315 Marine Biota and Biogeochemical Cycles  
3 credits  
Spring Semester  
The distribution of dissolved and particulate materials in the sea is not uniform in time and space. This variability reflects the diverse sources, transformations, and sinks of chemical constituents in the sea. This course focuses on the role of marine organisms in marine biogeochemical cycling and the marine carbon cycle and its interaction with the terrestrial biosphere and atmosphere.  
PREREQUISITE: MSC 215 OR PERMISSION OF INSTRUCTOR
MSC316 Global Primary Production
3 credits Offered By Announcement Only
Photosynthesis supports the vast majority of life on planet earth. Although terrestrial and aquatic photoautotrophs share the same basic photosynthetic mechanism, it is clear that the physical environment and the fate of primary production differ drastically on land and in the sea. This course reviews the magnitude and the processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.
PREREQUISITE: BIL 160

MSC321 Scientific Programming in the Atmospheric Sciences
3 credits Fall Semester
An introduction to scientific programming in a Linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.
PREREQUISITE: (MSC 103 OR CSC 120), MTH 112, AND MTH 210.

MSC323 Invertebrate Zoology
4 credits Offered By Announcement Only
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY

MSC324 The Biology of Fishes
3 credits Offered By Announcement Only
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY

MSC325 Biological Oceanographic Techniques
3 credits Spring Semester
Field sampling for plankton biomass and productivity; benthic biomass, and of selected physical parameters. Applications of molecular techniques and remote sensing to oceanographic problems.
PREREQUISITE: MSC 230.

MSC326 Marine Genomics
3 credits Spring Semester
Intensive lecture/laboratory course with emphasis on using genomic tools to address an independent research project of importance in the marine sciences.
PREREQUISITE: BIL 250

MSC340 Ocean Policy
3 credits Spring Semester
Analysis of ocean policy issues in US fisheries, marine conservation and marine protected areas, marine pollution, coastal management and regulation of offshore oil and gas activities.
PREREQUISITE: MSC 111 OR PERMISSION OF INSTRUCTOR

MSC345 Economics of Natural Resources and the Environment
3 credits Spring Semester
A comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout is sustainable development defined as "maximizing the net benefits of economic development while maintaining the services and quality of natural resources over time". We will use economic reasoning to examine causes and consequences of environmental and resource problems, and measures for dealing with them.
PREREQUISITE: ECO 211
MSC350 Survey of Marine Mammals
3 credits Fall Semester
The evolution and ecology of the cetaceans, pinnipeds, manatees, and allies: Natural history, zoogeography, physiology, husbandry, and biomedical aspects.
PREREQUISITE: BIL 150, MSC 230.

MSC364 Life in Moving Fluids
3 credits Fall Semester
The physical characteristics of air and water are described in relation to various flow phenomena that play a part in life functions. Adaptations of form and function reflect the very different properties of the media (air and water) of terrestrial and aquatic life. Energy conversion and transfer limit form and function and enable a wide variety of survival strategies.
PREREQUISITE: PHY 101, MSC 230, OR BIL 265

MSC371 Readings in Marine Science
1-2 credits Fall & Spring Semester & First & Second Summer Session
Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project.

MSC372 Special Topics in Marine Science
2-6 credits Offered By Announcement Only

MSC400 Water Quality Assessment and Environmental Forensics
3 credits First & Second Summer Session
This course is intended to provide the scientific basis for understanding water quality issues and how water pollution can adversely affect the health of humans and ecosystems. Following basic introduction to the scientific concepts we will investigate numerous case studies using a forensic approach to unravel the mystery surrounding "how, why, and who" was responsible for specific water pollution cases that caused adverse human and/or ecological health effects. The course will have a capstone research project that will involve both laboratory and field investigations into a specific pollution problem.

MSC403 Introduction to Ocean Engineering
3 credits Fall Semester
PREREQUISITE: MTH 311

MSC405 Atmospheric Dynamics I
3 credits Spring Semester
Derivation and scaling of the equations of atmospheric motion; hydrostatic and geostrophic balance; circulation and vorticity.
PREREQUISITE: MSC 305. PREREQUISITE OR COREQUISITE: MTH 513.

MSC406 Atmospheric Dynamics II
3 credits Fall Semester
Baroclinic and barotropic instability; boundary layer dynamics; mathematical principles of numerical weather prediction; maintenance of the general circulation.
PREREQUISITE: MSC 405. MTH 311
MSC407 Weather Analysis
4 credits
Spring Semester
Three-dimensional analysis of synoptic-scale weather systems; application of the fundamental laws of atmospheric dynamics to observed weather patterns; practical questions of worldwide data exchange and display.
PREREQUISITE: MSC 305.

MSC409 Physical Meteorology
3 credits
Spring Semester
Atmospheric radiation; absorption and scattering principles of remote sensing of the atmosphere; cloud microphysics; nucleation, coalescence, ice crystal growth, atmospheric electricity and lightning.
PREREQUISITE: MSC 305.

MSC410 Marine Conservation Science
3 credits
Offered By Announcement Only
Nature of marine biodiversity, what threatens it, and what can be done to recover the biological integrity of estuaries, coastal seas, and oceans. Topics include: distinctive aspects of marine populations and ecosystems; threats to marine biological diversity, singly and in combination; place-based management of marine ecosystems; and the human dimensions of marine conservation.
PREREQUISITE: MSC 230.

MSC411 Projects in Marine Science
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Individual, independent research projects with faculty supervision. A formal written report is required.
PREREQUISITE: MSC 371, AND PERMISSION OF THE COORDINATOR DURING THE SEMESTER PRECEEDING REGISTRATION.

MSC412 Advanced Meteorological Instrumentation
1 credit
Fall & Spring Semester & First & Second Summer Session
Includes lectures and labs involving field experience during a one-week cruise on the Royal Caribbean Explorer of the Seas.
PREREQUISITE: MSC 303, PHY 205.

MSC415 Coral Reef Science and Management
3 credits
Spring Semester
The interdisciplinary nature of coral reef science and management: biological, environmental, ecological and socioeconomic aspects of coral reef science, coral reef management problems and approaches at local to global scales, and the implications of climate change for coral reef science and management.
PREREQUISITE: MSC 230.

MSC420 Political Ecology of the Galapagos
3 credits
Spring Semester
This field course in the Galapagos National Park offers a rare chance to examine the human interactions in this highly politicized landscape of conservation. Students practice the political ecology approach for doing ethnographic fieldwork and explore how it can lead to wiser resource management.
PREREQUISITE: PERMISSION OF INSTRUCTOR
MSC421 Terrestrial Biology and Adaptations of the Galapagos.

3 credits  
This course will examine the terrestrial plant and animal life of Isabela Island; discuss the biology and how it adapted to life on Isabela. Through field and laboratory exercises we will explore the power of organisms' DNA in shaping life into unique forms like those famously present in today's Galapagos. 
PREREQUISITE: BIL 160 AND PERMISSION OF INSTRUCTOR.

MSC422 Marine Ecology of the Galapagos

3 credits  
This course focuses on marine ecosystems of the Galapagos, emphasizing near-shore environments. Topics will include how the unique location and oceanography of the Galapagos have shaped the species composition of resident and migrant marine animals. The role of genetic drift, local habitat characteristics and natural selection on marine ecosystems will be examined. This is a field intensive course with time spent in intertidal, near-shore and off-shore island environments. 
PREREQUISITE: BIL 160 OR MSC 230 AND PERMISSION OF INSTRUCTOR.

MSC423 Marine Conservation Biology & Fisheries of the Galapagos

3 credits  
The Galapagos are located in a uniquely productive area of the sea, which has allowed the development of a rich and unique marine biota. The first week of the course will carry the students through the dynamic, climatic, and oceanographic circumstances that determine the unique character of the Galapagos. The second week will cover scientific evaluation of the threats to the marine biodiversity of the Galapagos, focusing on sharks, penguins, sea turtles and other at-risk species and habitats.

MSC424 Origin and Geology of the Galapagos Islands.

3 credits  
This course will explore the origin and geology of volcanic oceanic islands, using the Galapagos Islands as a natural laboratory. Though all share a common origin in plate tectonic theory, each island presents a host of environments that originate in the processes of volcanic action, erosion and hydrology. Individual islands therefore develop distinctive ecosystems within which organisms interact and evolve. The emphasis of this course will be to lay out the underlying geological processes that have led to the formation of the islands and to their present state, and then to explore the ways the physical environment has influenced adaptation and biodiversity. 
PREREQUISITE: GSC 110 AND PERMISSION OF INSTRUCTOR.

MSC460 Spatial Applications in Marine Science

3 credits  
The concepts and marine applications of Geographic Information Systems. Every class period will entail short class lectures and hands on computer based GIS exercise on marine science related issues. Students will learn how to use ArcGIS 9.2 and create simple GIS models primarily using vector data. 
PREREQUISITE: JUNIOR OR SENIOR STANDING
MSC466 Environmental Physiology: Oxygen, Water and Ionoregulatory Stress  
3 credits  
Fall Semester  
This is an intensive laboratory course that combines and elaborates on concepts learned in BIL 265. Topics will include homeostasis, interactions with the external environment, and life with limited oxygen and water. Lectures will be highly discussion-based; students will be expected to read primary research articles as suggested by the professor before lecture to foster participation in those discussions and form hypotheses about accompanying laboratory. Each lab will be written up as a formal laboratory report (i.e., Introduction, Materials and Methods, Results and Discussion).  
PREREQUISITE: BIL 265 AND PERMISSION OF INSTRUCTOR.

MSC490 Special Studies in Marine Science  
1- 3 credits  
Offered By Announcement Only  
Interdisciplinary capstone course in Marine Science. Content of course will vary by semester. Content in any semester will be expressed in parentheses following "Special Studies" in the class schedule.  
PREREQUISITE: JUNIOR OR SENIOR STANDING AND PERMISSION OF INSTRUCTOR.

MSC491 Special Studies in Marine Science  
1- 3 credits  
Fall & Spring Semester  
Interdisciplinary capstone course in Marine Science. Content of course will vary by semester. Content in any semester will be expressed in parentheses following "Special Studies" in the class schedule.  
PREREQUISITE: JUNIOR OR SENIOR STANDING AND PERMISSION OF INSTRUCTOR.

RSMAS-GENERAL  
RSM500 Research Diving Techniques  
3 credits  
Offered By Announcement Only  
This course is designed to introduce students to the practices and policies of scientific diving. The objective is to prepare students to use SCUBA as a research tool for the marine sciences. The course content will qualify students as RESEARCH DIVERS under the UM/RSMAS Scientific Diving Program and will meet the standards set by the American Academy of Underwater Sciences (AAUS).

RSM510 Environmental Ethics  
3 credits  
Fall Semester  
This course will introduce students to a variety of key issues and concepts in environmental ethics. The course will be a joint scientific and philosophic collaboration, exploring the ethical dimensions of controversial and emerging issues in biotechnology and the environment. After students are exposed to the scientific background of various actual case studies focusing on current environmental and social impact, the ethical and philosophical issues raised by the discussions will be explored using the tools and methods of analytic philosophy. The course will develop the student's ability to construct and evaluate philosophical arguments in the field of environmental ethics, and to reason philosophically on numerous questions in contemporary applied ethics.  
PREREQUISITE: ALTHOUGH THERE ARE NO PHILOSOPHY PREREQUISITES FOR THIS COURSE, PERMISSION OF INSTRUCTOR IS REQUIRED.

RSM512 Statistics for Environmental Management  
3 credits  
Fall Semester  
This course covers the statistical theory, tools, and methods required for management analysis and improvement, emphasizing marine science applications.
RSM520 Climate and Society  
3 credits  
Spring Semester  
This course is designed to provide students from different disciplinary backgrounds with an overview of physical processes, general concepts and policy debates surrounding climate issues.

RSM545 Scientific Communication  
3 credits  
Spring Semester  
PREREQUISITE: MPS STATUS OR PERMISSION FROM INSTRUCTOR/PREFERENCE WILL BE GIVEN TO MPS STUDENTS

RSM560 Investigating Nature through Science Teacher Active Research (INSTAR)  
2 credits  
First & Second Summer Session  
This is a graduate level marine science course that provides a hands-on approach to education focused on geological and meteorological research in South Florida environment. The course provides training in marine science content, field techniques, state-of-the-art field, computer technology, and science educational reform measures. Participants work collaboratively with marine and atmospheric scientists to bring cutting edge marine science content and research to the classroom focusing on the following coastal themes: geology, hydrology and meteorology. The course will be applicable to all graduate and qualified undergraduate marine science students, per-service teachers in colleges of education, and in-service teachers in school systems throughout the country.

RSM561 INSTAR for Physical Sciences Follow-up  
1 credit  
First & Second Summer Session  
This is a follow-up course for participants in MGG 560 and is designed to test the application of the methods learned in MGG 560 to the teaching of high school students. Participants are expected to show evidence of teaching material learned in MGG 560.  
PREREQUISITE: RSM 560.

RSM562 Investigating Nature through Science Teacher Active Research in Biological Sci  
2 credits  
First & Second Summer Session  
This is a graduate level marine science course that provides a hands-on approach to education focused on marine science research and technology in South Florida coastal environments. The course provides training in marine science content, field techniques, state-of-the-art field and computer technology, and science educational reform measures. Participants work collaboratively with marine scientists to bring cutting edge marine science content and research to the classroom focusing on the following coastal themes: coral reefs and marine fisheries. The course will be applicable to all graduate and qualified undergraduate marine science students, per-service teachers in colleges of education, and in-service teachers in school systems throughout the country.

RSM563 INSTAR Biological Sciences Follow-up  
1 credit  
First & Second Summer Session  
This is a follow-up course for participants in RSM 562 and is designed to test the application of the methods learned in RSM 562 to the teaching of high school students. Participants are expected to show evidence of teaching material learned in RSM 562.  
PREREQUISITE: RSM 562.
RSM565 Fish Ecology and Oceanography
3 credits  Fall Semester
This course is intended to introduce students to key biological, ecological, oceanographic, and climatic processes of direct relevance to fishery species, with a view toward development of an ecosystem perspective.

RSM570 Carbon and Climate
3 credits  Offered By Announcement Only
This course is designed to provide students from different disciplinary backgrounds with an overview of the underlying processes, concepts, and policy debates surrounding the issue of carbon emissions and climate change. Individual faculty from RSMAS and elsewhere will lecture on cutting-edge research areas. Topics covered include: climate modeling; and climate policy.
PREREQUISITE: GRADUATE OR SENIOR STANDING AT RSMAS, OR PERMISSION OF INSTRUCTOR.

RSM571 Special Topics
1-4 credits  Offered By Announcement Only
Lectures and research projects in special topics related to Marine and Atmospheric Science.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

RSM572 Special Topics
1-4 credits  Fall & Spring Semester & First & Second Summer Session
Lectures and research projects in special topics related to Marine and Atmospheric Science.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
DAN101 Aerobic Dance  
1 credit 
Fall & Spring Semester  
The use of dance movement as a cardiovascular fitness activity.

DAN102 Stretching and Body Work  
1 credit 
Fall & Spring Semester & First & Second Summer Session  
Stretching techniques and examination of various body therapy concepts.

DAN103 Fitness Dance: Low Weight/High Rep  
1 credit 
Fall & Spring Semester & First Summer Session  
Use of wrist and ankle weights and high repetition through dance movements to increase muscular strength.

DAN104 Fitness Dance Level 2  
1 credit 
Fall & Spring Semester  
A Personal approach to fitness through the use of low impact aerobic dance movements to condition, tone, and shape the body.

DAN111 Modern Dance, Level One  
2 credits 
Fall & Spring Semester & First & Second Summer Session  
Introduction to the discipline of modern dance designed to develop understanding and skill in the basic vocabulary. Open to all students. (Repeatable up to four times).

DAN121 Ballet, Level One  
2 credits 
Fall & Spring Semester  
Introduction to the discipline of classical ballet designed to develop understanding and skill in the basic vocabulary. Open to all students. (Repeatable up to four times).

DAN130 Orientation to Dance  
2 credits 
Offered By Announcement Only  
Introduction to dance as an art form for those interested in career opportunities in dance education. Required for prospective dance minors. Open to all students.

DAN140 Theatre Dance Forms  
2 credits 
Fall Semester  
Introduction to movement skills and stylistic elements of theatrical forms of dance. (Repeatable).

DAN190 Improvisation  
2 credits 
Offered By Announcement Only  
Experience in selective and basic processes of movement involvement both individual and group. Course may be repeated.

DAN211 Modern Dance, Level Two  
3 credits 
Fall & Spring Semester & First & Second Summer Session  
Continuing exploration of modern dance techniques and theoretical concepts. Open to all students. Course may be repeated up to 4 times.

DAN221 Ballet, Level Two  
3 credits 
Fall & Spring Semester  
Study of ballet designed to extend technical skill and prepare student for advanced level work. Open to all students. Course may be repeated up to 4 times.
DAN235 Folk Dance  
2 credits  
Beginning study of folk and ethnic dance forms.  

DAN240 Cultural Dance Forms  
2 credits  
Introduction to movement skills and stylistic elements of dance forms from various cultures. Course may be repeated.  

DAN250 World History of the Dance  
3 credits  
Introductory exploration of dance history in relation to life, thought, and culture.  

DAN280 Dance Composition Level 1  
3 credits  
PREREQUISITE: DAN 211  

DAN285 Creative Dance for Children  
2 credits  
Introduction to theories and methods of teaching dance to children of elementary school age.  

DAN286 Teaching Dance to Children  
2 credits  
Theory and practice of teaching dance to preschool and school age children.  

DAN290 Introduction to Dance-Movement Therapy  
2 credits  
Introduction to dance-movement therapy theory and practice.  

DAN291 Dance Movement Therapy  
3 credits  
PREREQUISITE: INTRODUCTION TO DANCE MOVEMENT THERAPY (DAN 290)  

DAN311 Modern Dance, Level Three  
3 credits  
Study of modern dance techniques and theoretical concepts. Course may be repeated for credit.  

DAN321 Ballet Level Three  
3 credits  
Study of classical ballet at intermediate/advanced level. Open to all students. Course may be repeated for credit.  
PREREQUISITE: DAN 221 OR PERMISSION  

DAN335 Folk and Ethnic Dances: Forms and Teaching Methods  
2 credits  
Beginning study of folk and ethnic dance forms and teaching methods.  

DAN340 Specialized Ballet Forms  
2 credits  
Introduction to movement skills and stylistic elements of specialized ballet forms. Course may be repeated.  
PREREQUISITE: CONSENT OF INSTRUCTOR
DAN380 Dance Composition Level 2  
3 credits  
Spring Semester  
PREREQUISITE: DAN 280 OR DAN 311

DAN385 Methods of Teaching Dance (K-12)  
3 credits  
Fall & Spring Semester  
Content for teaching dance in a variety of settings including public school grades K-12.  
PREREQUISITE: PERMISSION.

DAN411 Modern Dance; Level Four  
3 credits  
Fall & Spring Semester  
Study of modern dance technique and theoretical concepts. Open to dance minors and by permission.  
PREREQUISITE: DAN 311 OR PERMISSION.

DAN421 Ballet, Level Four  
3 credits  
Fall & Spring Semester  
Study of classical ballet at an advanced level. Course may be repeated for credit.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

DAN450 History of Modern Dance  
3 credits  
Offered By Announcement Only  
Study of development, philosophies, and theories of American and European modern dance.  
PREREQUISITE: DAN 250.

DAN550 Women in Theatrical Dance  
3 credits  
Offered By Announcement Only  
Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.  
PREREQUISITE: DAN 250 OR 450 OR GRADUATE STUDENT.

DAN585 Methods of Teaching Dance K-12 (Advanced)  
3 credits  
Offered By Announcement Only  
An advanced study of the Dance curriculum content in a variety of settings including public schools, grades K-12.  
PREREQUISITE: DAN 411 OR 450 AND PERMISSION.

DAN593 Special Topics Dance  
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session  
Supervised topics and other activities in specific areas of Dance  
PREREQUISITE: NONE

INSTRUMENTAL PERFORMANCE  
MIPBAA Bassoon  
1- 2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Vivaldi Concerto, Bourdeau - Premier solo, Galliard, Handel, Marcello, Nino Rota Procaccini.  
PREREQUISITE: AUDITION FOR LEVEL A. SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.
MIPBAB Bassoon
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Vivaldi Concerto, Bourdeau - Premier solo, Galliard, Handel, Marcello, Nino Rota Proacci.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBAC Bassoon
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Bourdeau - Second Solo, David, Domenico, Dubois, Fasch, Kozeluh, Pierne, Telemann, Vivaldi.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBAD Bassoon
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Bourdeau - Second Solo, David, Domenico, Dubois, Fasch, Kozeluh, Pierne, Telemann, Vivaldi.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBAE Bassoon
1- 2 credits  
Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBAF Bassoon
1- 2 credits  
Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBAH Bassoon
1- 2 credits  
Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MIPBHA Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MIPBHB Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MIPBHC Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bordogni-Rochut, Peters, Jones, Vivaldi.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBHD Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bordogni-Rochut, Peters, Jones, Vivaldi.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBHE Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Fink Stevens, Maxime-Alphones, Jacob, Hartley.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBHF Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Fink Stevens, Maxime-Alphones, Jacob, Hartley.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MIPBHG Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Charlier, Bozza, Uber, Horovitz Bellstedt; band and orchestral excerpts.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPBHH Baritone Horn
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Charlier, Bozza, Uber, Horovitz Bellstedt; band and orchestral excerpts.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPCDA Conducting
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MIPCDB Conducting
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MIPCDC Conducting
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MIPCDD Conducting
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

1 credit                                Fall & Spring Semester
The study and performance of literature for small ensembles of similar or mixed brass instruments.

MIP140 Flute Choir
1 credit                                Fall & Spring Semester
Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets).

MIP141 Saxophone Ensemble
1 credit                                Fall & Spring Semester
The study and performance of classical and jazz literature for small saxophone ensembles.

MIP143 Woodwind Chamber Music
1 credit                                Fall & Spring Semester
Exploring the woodwind chamber music repertoire as represented by various combinations of instruments.

MIP144 Woodwind Chamber Ensemble
1 credit                                Fall & Spring Semester
Woodwind chamber ensemble is designed to give students knowledge of the most important literature for woodwinds through practice, rehearsal, and performance of major works for woodwind chamber ensemble.

MIP145 String-Keyboard Chamber Music
1 credit                                Fall & Spring Semester
The study and performance of literature from the Baroque Period through the 20th Century for two or more players for string instrumentalists and strings with keyboard.

MIP170 Marching Band
1 credit                                Fall Semester
The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.
MIP171 Symphonic Winds
1 credit
Fall & Spring Semester
Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.

MIP172 University Band
1 credit
Spring Semester
University Band is a large ensemble offering students the opportunity to play standard repertoire of the wind band. This group is open to all wind and percussion players throughout the university, regardless of major.

MIP174 Brass Choir
1 credit
Fall & Spring Semester
Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.

MIP176 Wind Ensemble
1 credit
Fall & Spring Semester
This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.

MIP180 Symphony Orchestra
1 credit
Fall & Spring Semester
The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified undergraduate students by audition.

MIP181 Instrumental Conducting I
1 credit
Fall Semester
This course provides practical procedures and materials for beginning instrumental conducting students. Students demonstrate basic conducting patterns, preparations, and releases in all meters.
PREREQUISITE: MTC 112 OR MTC 241 OR EQUIVALENT

MIP182 Instrumental Conducting II
1 credit
Spring Semester
This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.
PREREQUISITE: MIP 181.

MIP191 Tuba Ensemble
1 credit
Fall & Spring Semester
The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.

MIP192 Classical Guitar Ensemble
1 credit
Fall & Spring Semester
This course focuses on sightreading, rhythm recognition, and ensemble performance through the study of exercises, scales, and diverse repertoire.
MIP199 Contemporary Music Ensemble
1 credit Offered By Announcement Only
An in-depth study and performance of new and standard classical music of the 20th century.

MIP220 Class Guitar II for Non-music Majors
1 credit Fall & Spring Semester

MIP221 Class Guitar II for Jazz Majors
1 credit Fall & Spring Semester

MIP281 Instrumental Conducting III
1 credit Fall Semester
This course provides a synthesis of the skills demonstrated in Instrumental Conducting I and II while developing error detection skills in common performance errors.
PREREQUISITE: MIP 182

MIP282 Instrumental Conducting IV
1 credit Spring Semester
Students demonstrate knowledge of instruments, instrumentation of the wind band and orchestra, and analyze scores for conception, interpretation, rehearsal, and performance.
PREREQUISITE: MIP 281.

MIP307 Skills Ensemble V: Classical Improvisation
1 credit Fall & Spring Semester
Introduce students to the process of improvisation in all styles of classical music.
PREREQUISITE: MTC 212 OR MTC 241

MIP308 Skills Ensemble VI: Composition as Applied Improvisation
1 credit Spring Semester
PREREQUISITE: MIP 307 SKILLS ENSEMBLE V: CLASSICAL IMPROVISATION

MIP317 Basic Conducting
1 credit Fall & Spring Semester
A study of the basic techniques of all rhythms, patterns, subdivisions of beats, dynamics, starting, stopping, and giving cues. Course provides an elementary study of scores as to form and harmonic intent.
PREREQUISITE: MTC 211 OR MTC 240

MIP399 Junior Recital
1 credit Fall & Spring Semester
A public recital of one half-hour or more. Course is required of all instrumental performance majors.

MIP407 Skills Ensemble VII: Basic Conducting/Arranging
1 credit Fall Semester
PREREQUISITE: MIP 308 SKILLS ENSEMBLES VI, MTC 416 ORCHESTRATION

MIP408 Skills Ensemble VIII: Culminating Project
1 credit Spring Semester
PREREQUISITE: MIP 407 SKILLS ENSEMBLE VII: BASIC CONDUCTING/ARRANGING
MIP418 Instrumental Conducting
1 credit
Spring Semester
Course covers Baton technique, score reading, and interpretation. Actual experience in rehearsing instrumental ensembles is included.
PREREQUISITE: MIP 317.

MIP493 Special Projects
1- 3 credits
Fall & Spring Semester
Supervised readings and other activities in specific areas of Instrumental Performance.
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MIP499 Senior Recital
1 credit
Fall & Spring Semester
A public recital of one hour or more. Required of all performance majors.

MIP539 Brass Chamber Music Institute
2 credits
Offered By Announcement Only
Institute offers opportunities for brass players to perform in all forms of chamber music--from trios to Brass Choir. Included are master classes on each instrument plus the availability of private instruction from an excellent faculty. The material covered spans the musical periods including recent brass publications.

MIP541 Bassoon Repertoire and Pedagogy
1- 2 credits
Fall Semester
Solo and small ensemble literature of the bassoon since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP542 Clarinet Repertoire and Pedagogy
1- 2 credits
Fall Semester
Solo and small ensemble literature of the clarinet since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP543 Flute Repertoire and Pedagogy
1- 2 credits
Fall Semester
Solo and small ensemble literature of the flute since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP544 Oboe Repertoire and Pedagogy
1- 2 credits
Fall Semester
Solo and small ensemble literature of the oboe since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP545 Brass Repertoire and Pedagogy
1- 2 credits
Spring Semester
Solo and small ensemble literature of brass instruments since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP546 Percussion Repertoire and Pedagogy
1- 2 credits
Spring Semester
Solo and small ensemble literature of percussion instruments since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.
MIP547 Saxophone Repertoire and Pedagogy  
1-2 credits  
Fall Semester  
Solo and small ensemble literature of the saxophone since 1600.  
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.  

MIP548 Guitar Repertoire and Pedagogy  
1-2 credits  
Fall Semester  
Solo and small ensemble literature of the guitar since 1600.  
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.  

MIP549 String Repertoire and Pedagogy  
1-2 credits  
Fall Semester  
An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.  
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.  

MIP550 Bach Cello Suites  
1 credit  
Spring Semester  
The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.  

MIP580 Orchestral Audition Preparation  
1 credit  
Fall & Spring Semester  
The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for credit.  

MIP593 Special Topics MIP  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Supervised topics and other activities in specific areas of Instrumental Performance.  
PREREQUISITE: PERMISSION OF THE DEAN  

KEYBOARD PERFORMANCE  

MKPHCA Harpsichord  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.  
PREREQUISITE: INTEREST IN BASIC INSTRUCTION ON HOW TO APPROACH THE HARPSICHORD, IN USING HISTORICAL EVIDENCE FOR EARLY FINGERINGS, HAND POSITION AND ARTICULATION REPERTOIRE DRAWN FROM VARIOUS 16TH CENTURY ITALIAN, GERMAN AND FRENCH SOURCES. SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.  

MKPHCB Harpsichord  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.  
PREREQUISITE: SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B. BOX ALL FINGER STUDIES BASED ON BRITISH LIBRARY MSS. SOURCES FOR 16TH & 17TH CENTURY FINGERS. REPERTOIRE DRAWN FROM FERGUSON "STYLE & INTERPRETATION" 2 VOLS.  

MKPHCC Harpsichord  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.  
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MKPHCD Harpsichord
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY. REPETROIRE FROM THE REMAINDER OF PIECES NOT COVERED EARLIER VIA FERGUSON "STYLE & INTERPRETATION" EMBELLISHMENTS.

MKPHCE Harpsichord
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY. REPETROIRE DRAWN FROM BACH INVENTIONS & SINFONIAS, OTHER PIECES APPROPRIATE TO THE STUDENT'S ABILITIES-FROM FRENCH, ITALIAN, GERMAN & ENGLISH COMPOSERS, ADVANCED EMBELLISHMENTS.

MKPHCF Harpsichord
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY. SELECTIONS APPROPRIATE TO THE STUDENT'S ABILITIES FROM BACH'S ETC, COUPERIN'S ORDERS, PURCELL SUITES, ETC. POSSIBLE CONTEMPORARY REPERTOIRE.

MKPHCG Harpsichord
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY. SELECTIONS APPROPRIATE TO STUDENT'S LEVEL OF ADVANCEMENT; E.G., BACH FRENCH SUITES, SCARLATTI SONATAS & FURTHER CONTEMPORARY REPERTOIRE.

MKPHCH Harpsichord
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY. SUITABLE REPERTOIRE AT THIS LEVEL INCLUDES BACH PARTITAS, VARIATIONS, TOCCATAS, SOLER SONATAS & FANDANGO, CONCERTI BY BACH, HANDLE, THE BACH SONS & HAYDN.

MKPORA Organ
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique and Pedal Technique. Repertoire: Gleason, Method of Organ Playing: Compositions for Manuals, Studies and Compositions for Manuals and Pedal; selected chorale preludes and smaller-scale preludes and fugues by Bach, Buxtehude, Brahms, and others; basics of hymn playing.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.
MKPORB Organ
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique and Pedal Technique. Repertoire: Gleason, Method of Organ Playing: Compositions for Manuals, Studies and Compositions for Manuals and Pedal; selected chorale preludes and smaller-scale preludes and fugues by Bach, Buxtehude, Brahms, and others; basics of hymn playing.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY

MKPORC Organ
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique, Pedal Exercises and Scales. Repertoire: Gleason, Method of Organ Playing: selected Compositions for Manuals and Pedals; intermediate-level works by Bach, Mendelssohn, Franck, and others; Additional hymn playing techniques.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPORD Organ
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique, Pedal Exercises and Scales. Repertoire: Gleason, Method of Organ Playing: selected Compositions for Manuals and Pedals; intermediate-level works by Bach, Mendelssohn, Franck, and others; Additional hymn playing techniques.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPORE Organ
1- 2 credits  Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPORF Organ
1- 2 credits  Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MKPORG Organ
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Nilson, A System of Technical Studies in Pedal Playing for the Organ; selected exercises. Repertoire: Selected works by composers from all style periods, with an emphasis on the French Romantic and Modern French schools. Advanced service-playing techniques. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPORH Organ
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Nilson, A System of Technical Studies in Pedal Playing for the Organ; selected exercises. Repertoire: Selected works by composers from all style periods, with an emphasis on the French Romantic and Modern French schools. Advanced service-playing techniques. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPPIA Piano
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required. PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MKPPIB Piano
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY

MKPPIC Piano
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPPID Piano
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPPIE Piano
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Junior Recital as required. Repertoire: Appropriate repertoire as required. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MKPPIF Piano
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Junior Recital as required. Repertoire: Appropriate repertoire as required. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPPIG Piano
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Senior Recital as required. Repertoire: Appropriate repertoire as required. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKPPIH Piano
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Senior Recital as required. Repertoire: Appropriate repertoire as required. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MKP006 Piano Forum
0 credit Fall & Spring Semester
A non-credit performance class for all piano majors and principals. Majors are required to perform once each semester with the approval of the applied teacher.

MKP111 Non-Major Class Piano I
1 credit Fall & Spring Semester
This course is designed for the adult beginner who has an interest in playing keyboard instruments for pleasure. Students with no previous musical or keyboard experience learn the fundamentals of music theory and apply them to playing the keyboard at the beginning level.

MKP112 Non-Major Class Piano II
1 credit Fall & Spring Semester
Designed for the adult beginner who has an interest in playing keyboard instruments for pleasure; this course builds on the concepts introduced in MKP 111. Students continue to learn the fundamentals of music theory and apply them to playing the keyboard. PREREQUISITE: MKP 111 OR AUDITION.

MKP140 Keyboard Studies I
1 credit Fall Semester
Major and minor five finger patterns, beginning repertoire, major scales and arpeggios, basic chord progressions, for types of triads, dominant seventh chords, beginning sight reading, harmonization, transposition, and improvisation skills. PREREQUISITE: PLACEMENT EXAM AND CURRENTLY ENROLLED IN MTC 140 OR HIGHER

MKP141 Keyboard Studies II
1 credit Spring Semester
Minor scales and arpeggios, modal scales, five types of seventh chords and inversions, and more extensive chord progressions. Study of repertoire and the development of sight-reading, harmonization, transposition, and improvisation skills are continued. PREREQUISITE: MKP 140 OR PLACEMENT AUDITION
MKP185 Musical Theatre Accompanying  
1 credit  
Fall & Spring Semester  
A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.

MKP186 Vocal Accompanying I  
1 credit  
Fall & Spring Semester  
Pianists will attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

MKP187 Vocal Accompanying II  
1 credit  
Fall & Spring Semester  
Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

MKP189 Accompanying, Level I  
1 credit  
Fall & Spring Semester  
Development of sightreading skills and score preparation.

MKP190 Accompanying, Level II  
1 credit  
Fall & Spring Semester  
Progressive development of individual vocal/instrumental and ensemble accompanying, sightreading, score reading, and improvising from a lead sheet.  
PREREQUISITE: MKP 189 OR PERMISSION OF INSTRUCTOR.

MKP191 Accompanying, Level III  
1 credit  
Fall & Spring Semester  
Progressive development of all types of accompaniment skills including; clef and score reading, transposition,; possible recital, opera theater, choral ensemble, and/or orchestral accompanying.  
PREREQUISITE: MKP 190

MKP220 Computers, Keyboards, and Music  
2 credits  
Fall & Spring Semester  
An introduction to basic computing skills for the musician that explores computers, keyboards, and other MIDI- (Musical Instrument Digital Interface) related instruments as tools for the musician. Topics include electronic keyboards, computer hardware and software, MIDI sequencing, computer-assisted musical notation, and teaching strategies using new technologies. Students gain hands-on experience while completing projects in each of the above areas.  
PREREQUISITE: MKP 102

MKP240 Keyboard Studies III  
1 credit  
Fall Semester  
Dominant seventh arpeggios, secondary dominates, and work more extensively with chord progressions. Students also learn Theme and Variation form, Sonata form, and characteristics of the musical style periods. Study of repertoire and the development of sight-reading, harmonization, and the improvisation skills are continued. Transposition of instrumental music to concert pitch, and beginning choral and instrumental score reading are introduced. Students will continue playing major and minor scales at an increased level of difficulty.  
PREREQUISITE: MKP 141 OR PLACEMENT AUDITION
MKP241 Keyboard Studies IV
1 credit  
Spring Semester
Diminished seventh arpeggios, augmented, and Neapolitan sixth chords, Three-Part
Rondo forms, extended chord structures, and a variety of chord Progressions that
modulate. Study of repertoire and the development of sight-reading, harmonization,
transposition, and improvisation skills are continued. Choral and instrumental
score reading, modal scales, and major and minor scales are performed at an increased
level of difficulty.
PREREQUISITE: MKP 240 OR PLACEMENT AUDITION

MKP399 Junior Recital
1 credit  
Fall & Spring Semester
A public recital of one half-hour or more. Course is required of all performance
majors.

MKP493 Special Projects
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session
Supervised readings and other activities in specific areas of Keyboard Performance.
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE
REQUIRED.

MKP499 Senior Recital
1 credit  
Fall & Spring Semester
A public recital of one hour or more. Course is required of all performance majors.

MKP547 Keyboard Pedagogy
3 credits  
Fall Semester
Methods and materials for teaching keyboard instruments with a focus on private
lesson instruction. Topics include teacher profile, general teaching considerations,
the business of teaching, the beginning student, second- and third-year students,
teaching materials, and an introduction to new technology in piano teaching.

MKP548 Intermediate to Advanced Repertoire
3 credits  
Spring Semester
PREREQUISITE: PIANO MAJORS AT OR ABOVE JUNIOR-STANDING OR PERMISSION OF INSTRUCTOR

MKP549 Keyboard Pedagogy II:Keyboard Pedagogy Diagnostics
3 credits  
Fall Semester
PREREQUISITE: PIANO MAJORS AT OR ABOVE JUNIOR-STANDING OR PERMISSION OF INSTRUCTOR

MKP550 Keyboard Pedagogy III: Practice Strategies
3 credits  
Fall & Spring Semester
PREREQUISITE: PIANO MAJORS AT OR ABOVE JUNIOR-STANDING OR PERMISSION OF INSTRUCTOR

MKP589 Keyboard Accompanying Program in Salzburg, Austria
2- 4 credits  
Spring Semester
Course is conducted at Salzburg College, Austria. Students receive comprehensive
and intensive coaching in piano and accompanying from Dr. Posnak and other internationally
acclaimed guest artists. Piano students study piano (2 cr.) and accompanying (1
cr.).
PREREQUISITE: BY AUDITION ONLY.
MKP593 Special Topics MKP
1-3 credits Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Keyboard Performance.
PREREQUISITE: PERMISSION OF THE DEAN

MUSIC EDUCATION & THERAPY

MED010 Music Therapy Forum
0 credit Fall & Spring Semester
The course provides a weekly forum for sharing information about issues, current developments, and other matters related to music therapy as a field of study and as a profession.

MED015 Music Education Forum
0 credit Fall & Spring Semester
The course provides a weekly forum for sharing information about issues, current developments, and other matters related to music education as a field of study and as a profession. The course is required for all undergraduate MED majors during each semester, except during the semester of the internship.

MED149 Functional Techniques in Music Therapy I
1 credit Fall & Spring Semester
Students acquire functional guitar and piano skills while learning repertoire and techniques for leading and accompanying music therapy experiences.
PREREQUISITE: MKP 104 OR MKP 241, MED 245

MED159 Introduction to Music Therapy
2 credits Fall Semester
An overview of the field of music therapy, including history, theory and clinical practice. Includes field observations.
PREREQUISITE: NONE - OPEN TO ALL MAJORS

MED240 Woodwind Techniques
1 credit Fall & Spring Semester
Course provides group instruction in woodwind instruments with emphasis on basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy. Course may be repeated for credit.

MED241 Brass Techniques
1 credit Fall & Spring Semester
Group instruction in brass instruments with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy. Course may be repeated for credit.

MED242 Percussion Techniques
1 credit Fall & Spring Semester
Group instruction in percussion (snare drum, mallet-keyboard percussion, timpani, drum set, and small accessory instruments) with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy. Course may be repeated for credit.
MED243 String Techniques
1 credit  Fall & Spring Semester
The study of stringed instruments (violin, viola, cello, bass) in a heterogeneous
class with emphasis on general principles of string playing and teaching methods
for use in beginning and intermediate instruction in the schools. Course may
be repeated for credit.

MED244 Vocal Techniques
1 credit  Fall & Spring Semester
Class instruction in fundamentals of singing, breath control, tone production,
and solo singing for music majors.

MED245 Functional Music Techniques
1 credit  Fall & Spring Semester
Group instruction in the functional use of the guitar, autoharp, and recorder for
classroom or music therapy uses. Functional skills, teaching methods, and materials
are emphasized.

MED249 Functional Techniques in Music Therapy II
1 credit  Fall Semester
Students acquire functional piano skills while learning repertoire and techniques
for leading and accompanying music therapy experiences. Vocal skills are also emphasized.
PREREQUISITE: MKP 104 OR MKP 241, MED 149, MED 245

MED259 Music Therapy Pre-Practicum
2 credits  Spring Semester
Students will learn a treatment-planning model for clinical practice. Topics include:
assessment, goal setting, intervention design and data collection.
PREREQUISITE: MED 159

MED340 Marching Band Fundamentals
1 credit  Fall Semester
A study of all types of marching band activities and methods of presentation.

MED359 Music Therapy Practicum 1A
1 credit  Fall & Spring Semester
Structured clinical experience in music therapy under supervision of a music therapist
in varying health-related settings. Focus of the 1A practicum is to observe and
assist the on-site music therapist and to engage in limited co-leading.
PREREQUISITE: MED 259; MUSIC THERAPY PRE-PRACTICUM; MUSIC THERAPY MAJORS ONLY

MED360 Music Therapy Practicum 1B
1 credit  Fall & Spring Semester
Structured clinical experience in music therapy under supervision of a music therapist
in varying health-related settings. Focus of the 1B practicum is to observe and
assist the on-site music therapist and to co-lead for half of all sessions.
PREREQUISITE: MED 259 MTY PRE-PRACTICUM; MED 359 MTY PRACTICUM 1A; MUSIC THERAPY
MAJORS ONLY
MED361 Music Therapy Practicum 2A
1 credit  Fall & Spring Semester
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 2A practicum is to observe and assist the on-site music therapist and to co-lead for 60% of all sessions.
PREREQUISITE: MED 259 MTY; PRE-PRACTICUM: MED 359 MTY; PRACTICUM 1A: MED 360 MTY; PRACTICUM 1B; MUSIC THERAPY MAJORS ONLY

MED362 Music Therapy Practicum 2B
1 credit  Fall & Spring Semester
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 2B practicum is to observe and assist the on-site music therapist and to co-lead for 75% of all sessions.
PREREQUISITE: MED 259 MTY; PRE-PRACTICUM: MED 359 MTY; PRACTICUM 1A; MED 360 MTY; PRACTICUM 1B, MED 361 MTY PRACTICUM 2A; MUSIC THERAPY MAJORS ONLY

MED363 Music Therapy Practicum 3A
1 credit  Fall & Spring Semester
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 3A practicum is to observe and assist the on-site music therapist and to co-lead all sessions following one initial observation.
PREREQUISITE: MED 259; MED 359 MTY; PRACTICUM 1A; MED 360 MTY; PRACTICUM 1B, MED 361 MTY PRACTICUM 2A; MED 362 MTY PRACTICUM 2B; MUSIC THERAPY MAJORS ONLY

MED364 Music Therapy Practicum 3B
1 credit  Fall & Spring Semester
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 3B practicum is to independently design and lead all sessions.
PREREQUISITE: MED 259; MED 359; MED 360 MTY PRACTICUM 1B, MED 361 MTY PRACTICUM 2A; MED 362 MTY PRACTICUM 2B, MED 363 MTY PRACTICUM 3B; MTY MAJORS ONLY

MED430 Teaching Jazz/Popular Music in Secondary Schools
2 credits  Fall Semester
A survey of materials, methods, and techniques for instructing jazz and popular music in secondary schools. Review of standard literature, program organization, and in-class performance is emphasized. Designed specifically for music education majors.

MED433 Seminar for Teaching Associates.
1 credit  Fall & Spring Semester
Discussion of teaching, rehearsal techniques, and the organization and presentation of music materials related to the internship experiences. Course is required of all Music Education majors. To be taken in conjunction with Internship, MED 471.

MED450 Introduction to Research Methods in Music
3 credits  Fall Semester
This course is designed to help undergraduate students integrate research findings into their clinical and/or educational practice, implement research techniques into their work (e.g. through data collection or scholarly writing) and gain exposure to research if needed for future graduate students.
PREREQUISITE: MED 562.
SCHOOL OF MUSIC
MUSIC EDUCATION & THERAPY

MED471 Associate Teaching in Elementary School Music
6 credits  Fall & Spring Semester
A comprehensive program in observation and supervised teaching in elementary school music. The student spends full time for one half a semester in an elementary school, participating in all activities of the music teacher under the guidance of school and university personnel.
PREREQUISITE: ADMISSION TO TEACHER CANDIDACY AND APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

MED473 Associate Teaching in Secondary School Music
6 credits  Fall & Spring Semester
A comprehensive program in observation and supervised teaching in secondary school music. The student spends full time for one half a semester in a secondary school, participating in all activities of the music teacher under the guidance of school and university personnel.
PREREQUISITE: ADMISSION TO TEACHER CANDIDACY AND APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

MED475 Student Teaching in Music
12 credits  Fall & Spring Semester
PREREQUISITE: ADMISSION TO TEACHER CANDIDACY AND APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES

MED493 Special Projects
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised readings and other activities in specific areas of Music Education.
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN’S APPROVAL AND SIGNATURE REQUIRED.

MED541 Musical Instrument Maintenance
0 credit  Fall & Spring Semester
Mechanical development, care, and maintenance of musical instruments. Separate sections for wind, percussion, string, and keyboard instruments.

MED542 Teaching Elementary General Music (K-5)
3 credits  Fall Semester
Curriculum, methods, and materials designed for elementary music, K-6. Observation, planning, and teaching experience are emphasized.
PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

MED543 Teaching Elementary and Secondary Instrumental Music
3 credits  Spring Semester
A study of elementary and secondary instrumental music instruction including program organization, teaching techniques, materials, and field experiences of music instruction in schools.
PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

MED544 Teaching Secondary General Music (7-12)
3 credits  Spring Semester
Curriculum, methods, and materials designed for junior/senior high school general music programs.
PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

1257
MED545 Music in Rehabilitation
3 credits Spring Semester
Review of development and functioning for neurologically-based sensorimotor behavior. Survey of disabilities and diseases that typically result in sensorimotor deficits and deficits is included. Demonstration and practice of therapeutic techniques for sensorimotor deficits are also covered.

MED546 Music Psychotherapy
3 credits Spring Semester
Survey and practical application of music as therapy in the treatment of psychiatric disorders and in promoting mental health.

MED548 Music for Special Learners
3 credits Spring Semester
This course is designed for music educators who will be working in schools with children and youth who have various disabilities. The purpose of MED 548 is to acquaint students with the characteristics of children and youth with disabilities, and introduce adaptive strategies in music education, K-12, for instructing children and youth with disabilities.

MED549 Teaching Secondary Choral Music
3 credits Fall Semester
Course covers curriculum, vocal/rehearsal techniques, and literature. Teaching music in secondary schools through the medium of choral performance.
PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

MED555 Elementary Music Workshop
3 credits First Summer Session
Course is designed for in-service elementary school classroom teachers and music supervisors. Survey and experience with contemporary methodology and materials in elementary school music education is emphasized.

MED556 Secondary General Music Workshop
3 credits First Summer Session
Course is designed for teachers of general music classes in middle, junior high, and senior high schools. Practical experience with methods and materials designed for non-performance music classes, grades 7-12 is emphasized.

MED559 Internship in Music Therapy
3 credits First & Second Summer Session
Course provides students with a six month opportunity as a music therapy intern in an approved training facility.
PREREQUISITE: COMPLETION OF ALL OTHER COURSEWORK REQUIREMENTS FOR MUSIC THERAPY CERTIFICATION

MED560 Internship in Music Therapy II
0 credit First & Second Summer Session
PREREQUISITE: MED 559

MED562 Psychology of Music I
3 credits Spring Semester
Psychological foundations of music with an emphasis on problems of perception, experimental esthetics, functional music, and measurement and diagnosis of musical ability and achievement. Related literature of experimental investigation is reviewed.
MED575 Preschool Music Workshop
1-3 credits Offered By Announcement Only
Workshop is designed to prepare class members to initiate, administer, and teach music programs for preschool children. Materials which address the teacher, the child, and the parent are used. The daily schedule includes demonstration classes with children, lectures, and active participation of and discussion with class members. Emphasis is placed on working with a planning guide for teachers which offers articles on the major areas of the curriculum and clear, succinct statements focusing on the central issues of each lesson.

MED576 Music and Development
3 credits Fall Semester
Review of development in cognitive, communication, and musical domains. Survey of developmental disabilities most commonly found in child populations is included as well as demonstration and practice of therapeutic techniques for cognitive and communication deficits.

MED581 Teaching Classroom Guitar I
2 credits First Summer Session
This class is designed for students and teachers, guitarist or non-guitarist, who wishes to initiate, enhance, and teach guitar in a multi-level classroom setting. The course includes demonstration classes with elementary and secondary students. Topics include organization and teaching performance materials in a hands-on setting.

MED593 Special Topics MED
1-3 credits Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Music Education.
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED

MUSIC MEDIA & INDUSTRY

MMICBA Contemporary Bass
1-2 credits Fall & Spring Semester
1 hour lesson for students enrolled for 2 credits; 1/2 hour lesson for students enrolled for 1 credit. Technical Requirements: Basic grooves and bass line construction. Analysis of different styles of rock, pop, rhythm & blues, and funk music. Introduction to acoustic, six-string electric and fretless electric basses. Knowledge of beginning functional harmony and sight-reading skills will also be addressed.
PREREQUISITE: AUDITION FOR LEVEL A

MMICBB Contemporary Bass
1-2 credits Fall & Spring Semester
One hour lesson for students enrolled for 2 credits, 1/2 hour lesson for students enrolled for 1 credit. Technical requirements: Basic grooves and bass line construction. Analysis of different styles of rock, pop, rhythm & blues, and funk music. Introduction to acoustic, six-string electric and fretless electric basses. Knowledge of beginning functional harmony and sight-reading skills will also be addressed.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MMICBC Contemporary Bass
1- 2 credits  
Fall & Spring Semester
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of important bass players and styles, including Carol Kaye, James Jamerson, Larry Graham, Jack Bruce and others. Studies in intermediate harmony and introduction to standard American popular repertoire. Sight-reading, chart reading, and basic rhythm section arranging.  
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICBD Contemporary Bass
1- 2 credits  
Fall & Spring Semester
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of important bass players and styles, including Carol Kaye, James Jamerson, Larry Graham, Jack Bruce and others. Studies in intermediate harmony and introduction to standard American popular repertoire. Sight-reading, chart reading, and basic rhythm section arranging.  
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS

MMICBE Contemporary Bass
1- 2 credits  
Fall & Spring Semester
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of classic rhythm sections recorded throughout the last 50 years, including concentration on important and influential drummers in different styles of rock, pop, R&B, funk, latin, and jazz idioms. Live performance skills and studio techniques. Studies in jazz and modal harmony. Introduction to improvisation.  
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICBF Contemporary Bass
1- 2 credits  
Fall & Spring Semester
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of classic rhythm sections recorded throughout the last 50 years, including concentration on important and influential drummers in different styles of rock, pop, R&B, funk, latin, and jazz idioms. Live performance skills and studio techniques. Studies in jazz and modal harmony. Introduction to improvisation.  
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICBG Contemporary Bass
1- 2 credits  
Fall & Spring Semester
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Advanced jazz harmony and improvisation. World music and odd meter studies, including non-traditional styles and grooves. Advanced concepts of recording and performance, including starting and working within the context of an original band project. Elements of professionalism in the music business.  
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY
MMICBH Contemporary Bass
1- 2 credits
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Advanced jazz harmony and improvisation. World music and odd meter studies, including non-traditional styles and grooves. Advanced concepts of recording and performance, including starting and working within the context of an original band project. Elements of professionalism in the music business.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICDA Contemporary Drumset
1- 2 credits
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Sticking techniques, basic hand/foot patterns. Analysis of rock, pop, rhythm and blues, Latin and jazz styles. Basic chart reading.
PREREQUISITE: AUDITION FOR LEVEL A

MMICDB Contemporary Drumset
1- 2 credits
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Sticking techniques, basic hand/foot patterns. Analysis of rock, pop, rhythm and blues, Latin and jazz styles. Basic chart reading.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICDC Contemporary Drumset
1- 2 credits
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced sticking techniques, advanced hand/food patterns. Transcription/analysis of important drumset artists in major styles. Advanced chart reading.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICDD Contemporary Drumset
1- 2 credits
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced sticking techniques, advanced hand/food patterns. Transcription/analysis of important drumset artists in major styles. Advanced chart reading.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICDE Contemporary Drumset
1- 2 credits
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Tools to enhance soloing and executing grooves. Transcription/analysis of important drumset artists in major styles. Basic studio performance techniques and relationship to singer/songwriter. Basic jazz performance elements. Basic world music rhythms.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY
MMICDF Contemporary Drumset
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Tools to enhance soloing and executing grooves. Transcription/analysis of important drumset artists in major styles. Basic studio performance techniques and relationship to singer/songwriter. Basic jazz performance elements. Basic world music rhythms.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICDG Contemporary Drumset
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Tools to enhance soloing and executing grooves. Transcription/analysis of important drumset artists in major styles. Basic studio performance techniques and relationship to singer/songwriter. Basic jazz performance elements. Basic world music rhythms.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICDH Contemporary Drumset
1- 2 credits  
Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICGA Contemporary Guitar
1- 2 credits  
Fall & Spring Semester
PREREQUISITE: AUDITION FOR LEVEL A

MMICGB Contemporary Guitar
1- 2 credits  
Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICGC Contemporary Guitar
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced harmony. Advanced accompanying. Transcription/analysis of important guitar artists in major styles. Advanced chart reading and capoing techniques. Beginning alternate tunings.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY
SCHOOL OF MUSIC
MUSIC MEDIA & INDUSTRY

MMICGD Contemporary Guitar
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students
Transcription/analysis of important guitar artists in major styles. Advanced chart
reading and capoing techniques. Beginning alternate tunings. Successful completion
of Level D to move to Level E.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICGE Contemporary Guitar
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Advanced Rock/pop improvisation.
Beginning functional jazz harmony. Basic jazz performance elements. Transcription/analysis
of important guitar artists in major styles. Basic studio performance techniques
and relationship to singer/songwriter. Advanced acoustic guitar techniques. Guitar
equipment, maintenance.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICGF Contemporary Guitar
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Advanced Rock/pop improvisation.
Beginning functional jazz harmony. Basic jazz performance elements. Transcription/analysis
of important guitar artists in major styles. Basic studio performance techniques
and relationship to singer/songwriter. Advanced acoustic guitar techniques. Guitar
equipment, maintenance.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICGG Contemporary Guitar
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Advanced improvisational concepts.
Advanced jazz harmony. Advanced jazz performance elements. Advanced studio performance
techniques and relationship to the singer/songwriter. Advanced world music rhythms.
Development of individual voice in music. Advanced alternate tunings. Guitar equipment,
maintenance.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICGH Contemporary Guitar
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Advanced improvisational concepts.
Advanced jazz harmony. Advanced jazz performance elements. Advanced studio performance
techniques and relationship to the singer/songwriter. Advanced world music rhythms.
Development of individual voice in music. Advanced alternate tunings. Guitar equipment,
maintenance.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY
MMICKA Contemporary Keyboard
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning Gospel harmony (triads in all inversions), basic add-nine pop harmony. Beginning accompanying. Analysis of rock, pop, rhythm and blues, Latin, and jazz styles. Basic chart reading.
PREREQUISITE: AUDITION FOR LEVEL A

MMICKB Contemporary Keyboard
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning Gospel harmony (triads in all inversions), basic add-nine pop harmony. Beginning accompanying. Analysis of rock, pop, rhythm and blues, Latin, and jazz styles. Basic chart reading.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICKC Contemporary Keyboard
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced Gospel harmony. Advanced accompanying. Transcription/analysis of important keyboard artists in major styles. Advanced chart reading.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICKD Contemporary Keyboard
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced Gospel harmony. Advanced accompanying. Transcription/analysis of important keyboard artists in major styles. Advanced chart reading.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICKE Contemporary Keyboard
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning pop improv. Beginning functional jazz harmony (thirds and sevenths). Basic jazz performance elements. Transcription/analysis of important keyboard artists in major styles. Basic studio performance techniques and relationship to singer/songwriter. Keyboard equipment, maintenance, patch libraries and sound editors.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICKF Contemporary Keyboard
1- 2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning pop improv. Beginning functional jazz harmony (thirds and sevenths). Basic jazz performance elements. Transcription/analysis of important keyboard artists in major styles. Basic studio performance techniques and relationship to singer/songwriter. Keyboard equipment, maintenance, patch libraries and sound editors.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY
SCHOOL OF MUSIC
MUSIC MEDIA & INDUSTRY

MMICKG Contemporary Keyboard
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Advanced improvisational concepts.
Advanced jazz harmony, advanced jazz performance elements. Advanced studio performance
techniques and relationship to singer/songwriter. Advanced world music rhythms.
Development of individual voice in music. Keyboard equipment, maintenance, patch
libraries and sound editors.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICKH Contemporary Keyboard
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Advanced improvisational concepts.
Advanced jazz harmony, advanced jazz performance elements. Advanced studio performance
techniques and relationship to singer/songwriter. Advanced world music rhythms.
Development of individual voice in music. Keyboard equipment, maintenance, patch
libraries and sound editors.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICMA Contemporary Media
1- 2 credits  Fall & Spring Semester
PREREQUISITE: AUDITION FOR LEVEL A

MMICMB Contemporary Media
1- 2 credits  Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICMC Contemporary Media
1- 2 credits  Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICMD Contemporary Media
1- 2 credits  Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICME Contemporary Media
1- 2 credits  Fall & Spring Semester

PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICMH Contemporary Media
1- 2 credits  Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OR PREVIOUS LEVELS OF STUDY
MMICVA Contemporary Voice
1-2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Warm-ups, Cool downs and introductory exercises for breath management. Attack in phonation, registration, resonance, articulation, coordination, microphone technique, key selection and vocal hygiene and maintenance. Beginning chart writing. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
PREREQUISITE: AUDITION FOR LEVEL A

MMICVB Contemporary Voice
1-2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Warm-ups, Cool downs and introductory exercises for breath management. Attack in phonation, registration, resonance, articulation, coordination, microphone technique, key selection and vocal hygiene and maintenance. Beginning chart writing. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICVC Contemporary Voice
1-2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Basic knowledge of musical styles and historical periods of contemporary music, effective communication of songs in a variety of contemporary styles. Intermediate chart writing. Beginning improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICVD Contemporary Voice
1-2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Basic knowledge of musical styles and historical periods of contemporary music, effective communication of songs in a variety of contemporary styles. Intermediate chart writing. Beginning improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICVE Contemporary Voice
1-2 credits  
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate evidence of upper range extension with fully supported sound and appropriate modification of resonators, ability to self-prepare a song, advance knowledge of music styles and historical periods of contemporary music, effective communication of original songs. Advanced chart writing. Intermediate improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY
MMICVF Contemporary Voice
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate evidence of upper range extension with fully supported sound and appropriate modification of resonators, ability to self-prepare a song, advance knowledge of music styles and historical periods of contemporary music, effective communication of original songs. Advanced chart writing. Intermediate improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICVG Contemporary Voice
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required contemporary styles, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performance with accuracy in pitch, rhythm, good posture, breath management, phonation, resonance, and microphone technique. Advanced chart writing and studio vocal arranging techniques. Advanced improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMICVH Contemporary Voice
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required contemporary styles, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performance with accuracy in pitch, rhythm, good posture breath management, phonation, resonance, and microphone technique. Advanced chart writing and studio vocal arranging techniques. Advanced improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVELS OF STUDY

MMI013 Music Engineering Forum
0 credit Fall & Spring Semester
A weekly forum for all Music Engineering Technology and Audio Engineering majors, both undergraduate and graduate. Presentations include faculty lectures, guest lectures by industry professionals, as well as dissemination of information pertaining to audio studios and laboratories.

MMI014 Music Industry Forum
0 credit Fall & Spring Semester
A weekly forum for all Music Industry majors, both graduate and undergraduate, for the purpose of updating current teaching material with the latest developments, presentations of guest speakers from the industry, lectures, and reports from faculty on current employment opportunities.

MMI015 Creative American Music Forum
0 credit Fall & Spring Semester
MMI102 Record Company Practicum  
1 credit  
Fall & Spring Semester  
The course focuses on practical techniques and procedures employed by record companies.  
PREREQUISITE: INSTRUCTOR APPROVAL

MMI103 Introduction to Film Sound Recording  
1 credit  
Offered By Announcement Only  
Introduction to the concepts and technologies involved with audio production for visual media.  
PREREQUISITE: NONE/SUMMER SCHOLAR PROGRAM ONLY.

MMI107 Contemporary Skills Ensemble I  
1 credit  
Fall Semester  
A Contemporary Performance musical skills ensemble focusing on ear training, transcription, notation, and interactive musicianship for songwriters.

MMI108 Contemporary Skills Ensemble II  
1 credit  
Spring Semester  
A Contemporary Performance musical skills ensemble focusing on ear training, transcription, notation, and interactive musicianship for songwriters.  
PREREQUISITE: MMI 107

MMI139 Small Contemporary Ensemble  
1 credit  
Fall & Spring Semester  
A performing ensemble of student-generated contemporary musical repertoire.  
PREREQUISITE: A PERFORMING ENSEMBLE OF STUDENT-GENERATED CONTEMPORARY MUSICAL REPERTOIRE.

MMI140 Audio Workshop I  
1 credit  
Offered By Announcement Only  
Introduction to recording studio techniques. Demonstrations and projects study microphone type and placement, console operation, digital multitrack recording, and stereo mixdown.  
PREREQUISITE: MMI 150. INSTRUCTOR’S PERMISSION REQUIRED.

MMI141 Audio Workshop II  
1 credit  
Offered By Announcement Only  
Hands-on study of advanced recording techniques. Topics include signal processing, automated mixdown, synchronization, and hard disk recording. Open to EAN Majors only.  
PREREQUISITE: MMI 140.

MMI150 Recording Studio Workshop  
1 credit  
Offered By Announcement Only  
Introduction to the recording studio. Projects cover microphone technique, signal flow, console architecture, multitrack recording, overdubs, and mixdown.  
PREREQUISITE: OPEN TO MUE AND MEC MAJORS ONLY.

MMI151 Desktop Audio Production  
1 credit  
Spring Semester  
Introduction to MIDI technology and computer based tools for music production.
MMI160 Ensemble Recording Workshop I
1 credit  Fall Semester
Assisting recording and sound reinforcement engineers in the assigned performance ensemble in both rehearsal and performance. Students also perform in a studio ensemble where they act as both recording engineer and musician.
PREREQUISITE: OPEN TO MUE AND MEC MAJORS ONLY.

MMI161 Ensemble Recording Workshop II
1 credit  Spring Semester
Students are responsible for the audio needs of an assigned ensemble in both rehearsal and performance. Lectures address audio equipment and practices. Students also perform in a studio ensemble where they act as the recording engineer and musician.
Open to MUE majors only.
PREREQUISITE: MMI 160

MMI162 Ensemble Recording Workshop III
1 credit  Offered By Announcement Only
Computer-based editing of digital audio and digital signal processing. Projects involve sampling, editing, and synchronization of digital media. In addition, students work in the recording studio, engineering digital multitrack recordings and mixdowns of advanced jazz and composition ensembles. Open to MUE and MEC Majors only.
PREREQUISITE: MMI 161. OPEN TO MUE AND MEC MAJORS ONLY.

MMI163 Ensemble Recording Workshop IV
1 credit  Offered By Announcement Only
Hardware and software aspects of MIDI studio technology. Projects involve computer-based sequencer control of synthesizers and signal processors. In addition, students work in the recording studio, engineering digital multitrack recordings and mixdowns of advanced jazz and composition ensembles. Open to MUE Majors only.
PREREQUISITE: MMI 162.

MMI170 Audio Design Workshop I
1 credit  Offered By Announcement Only
Fundamentals of audio system design and architecture including basic audio signal analysis and theory, electronics fundamentals, equipment specifications, and studio installation techniques. Students will design and troubleshoot audio projects including audio adapters, direct-injection devices, and passive audio circuits. Open to MUE Majors only.

MMI171 Audio Design Workshop II
1 credit  Fall Semester
Analog audio system design and architecture including dynamics processing, amplifier and filter theory, balanced and single-ended systems, circuits, and advanced equipment specifications. Students design and troubleshoot audio projects including microphone pre-amps, equalizers, noise-gates, and power amplifiers. Open to MUE and MEC Majors only.
PREREQUISITE: EEN 201. OPEN TO MUE AND MEC MAJORS ONLY.
**MMI172 Audio Design Workshop III**
1 credit  
Spring Semester  
Digital audio system design and architecture including analog-digital conversion, digital I/O hardware specifications, audio effects processors and digital audio recorder alignment techniques. Students design and troubleshoot audio projects including A/D converters, S/PDIF I/O, and DAT recorders. Open to MUE and EAN Majors only.  
PREREQUISITE: MMI 171.

**MMI173 Multinational Recorded Music Industry**
3 credits  
Fall Semester  
An introductory course presenting a structural overview of the music business and entertainment industries and the Music Industry Program. Historical development of music as a business and the development of the market place for both music and musicians. Emphasis is placed on contemporary music business practices. Topics include songwriting, publishing, musical instrument sales, artist management, arts management, professional organizations, copyright law, record industry, unions and guilds, and career development.

**MMI178 Entertainment Industry Survey**
3 credits  
Spring Semester  
An overview of the entertainment industry. Concentration on the legal, marketing and financial aspects of different areas of the industry including film, television, music, broadcasting, cable, publishing, video games, sports, performing arts, and theme parks.  
PREREQUISITE: OPEN ONLY TO MBEI AND MBEC MAJORS, AND MBEI MINORS

**MMI201 Introduction to Music Recording**
0-3 credits  
Fall Semester  
An overview study of the theory and practice of music recording, with emphasis on modern recording studio practices. Topics include physics of sound, psychoacoustics, studio design, microphones, loudspeakers, consoles, signal processing, digital audio, MIDI, and synchronization.  
PREREQUISITE: OPEN TO MUE AND MEC MAJORS ONLY.

**MMI207 African-American Song Workshop**
1 credit  
Fall Semester  
A learning ensemble focusing on the various African American song traditions from early plantations songs, shouts, hollers, and spirituals, to the development of blues traditions, to gospel. Students will develop a portfolio of original works in traditional African-American styles.  
PREREQUISITE: BY AUDITION ONLY. CO-REQUISITE: MCY 211

**MMI208 Anglo-American Song Workshop**
1 credit  
Spring Semester  
A learning ensemble focusing on the various Anglo-American song traditions from English and Irish folk ballads, to shape-note and Sacred Harp hymnody, to early folk, country and bluegrass. Students will develop a portfolio of original works in traditional Anglo-American styles.  
PREREQUISITE: BY AUDITION ONLY. CO-REQUISITE- MCY 212
MMI240 Music Technology Studies I  
1 credit  
Fall Semester  
Basic digital audio principles. Basic audio and midi projects from set up to final
mixdown. Recording of live instruments, MIDI sequencing, software synthesizers,
basic editing, and audio looping. Basic microphone techniques.

MMI241 Music Technology Studies II  
1 credit  
Spring Semester  
Configuring personal studios and DAWQ sessions, external controllers, managing
sessions and tracks, understanding timescales, virtual instruments and plug-ins,
editing MIDI and audio, understanding automation, use of sends, returns, and plug-ins.
PREREQUISITE: MMI 240

MMI273 Artist Development and the Live Entertainment Industry  
3 credits  
Spring Semester  
Views of the live entertainment industry from the perspective of the performing
artist, artist manager, talent agent, attorney, and concert promoter. Consideration
is given to the interpersonal, business, and contractual relationships and their
impact on the performing artist's career. Strategies for career development are
addressed and the ground rules of publicity, public relations, and promotion explored
and applied in practical situations through special individual and team projects.
PREREQUISITE: OPEN TO MBEI MAJORS, MBEI MINORS, AND MBEM MAJORS ONLY.

MMI274 Introduction to Music Copyright Law  
3 credits  
Spring Semester  
A study of essential provisions of the 1976 Copyright Act and the Protection of
Intellectual Property, covering the principles and practices of modern music publishing
and international co-publishing. Students examine the complexities of copyright
right law as it relates to the music industry.
PREREQUISITE: OPEN ONLY TO MBEI AND MBEC MAJORS, AND MBEI MINORS

MMI301 Audio for Film and Video  
3 credits  
Offered By Announcement Only  
Course provides fundamentals of audio control, recording, microphone use, transducer
theory, signal modification, audio aspects of videotape and film, location recording,
synchronization, and principles of digital audio.
PREREQUISITE: PERMISSION OF FILM DEPARTMENT.

MMI307 Modern American Pop Workshop I  
1 credit  
Fall Semester  
A learning ensemble focusing on American Popular Music from the late-1950s to the
late-1970s. Students will develop a portfolio of original songs in modern American
styles.
PREREQUISITE: BY AUDITION ONLY. CO-REQUISITE: MCY 311

MMI308 Modern American Pop Workshop II  
1 credit  
Spring Semester  
A learning ensemble focusing on American Popular Music from the 1980s to the present.
Students will develop a portfolio of original songs in modern American styles.
PREREQUISITE: BY AUDITION ONLY. CO-REQUISITE: MCY 312
MMI310 Music Business Essentials
3 credits  Fall & Spring Semester
An introductory course presenting a structural overview of the music industry and related entertainment business. Emphasis is placed on contemporary music business practices. Topics include music publishing and licensing, musical products, the live music industry, unions and guilds, the recording industry, marketing and promotion of recorded music, music in the media, and music in the digital age.
PREREQUISITE: OPEN ONLY TO MUSIC STUDENTS

MMI320 Contemporary Lyric Writing
3 credits  Fall Semester
This course explores modern lyric writing techniques, song lyric theory, and song form. Students will analyze a variety of lyrics by top modern songwriters, focusing on their use of literary devices, imagery and metaphors. Students will compose a number of original lyrics for the course.
PREREQUISITE: ENG 106, AND CAM MINORS ONLY

MMI361 Acoustics
3 credits  Fall Semester
A study of the theoretical principles of acoustics. Principle topics include basic properties, acoustical phenomena, superposition, Fourier Theorem, symmetry, vibrating strings and columns, and musical instruments; a study of architectural acoustics such as growth and decay, absorption coefficients, normal modes, diffusion, isolation, and mass law; design applications such as structural techniques and materials, live end-dead end, room geometry, tuning, TDS and other measurement techniques.
PREREQUISITE: MTH 112 OR MTH 162, AND PHY 102 OR PHY 205

MMI377 Royalties in the Music Publishing Industry
1 credit  Spring Semester
A practical study of royalty payment formulas and procedures used in the music publishing industry.
PREREQUISITE: MBEI MAJORS ONLY.

MMI378 Entertainment Industry Contract Basics
3 credits  Fall Semester
Business relations between the record company, artist, producer and licensees, both domestic and foreign. Analysis of actual contracts between parties, implications of newer technology on the industry.
PREREQUISITE: MMI 178 AND MMI 274; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI401 Audio Electronics
0-3 credits  Fall Semester
An introductory course in audio electronics theory and professional audio applications such as recording studio equipment and audio effects design. Coursework includes basic electronic components and theories, passive filtering, transformers, operational amplifiers, vacuum tubes, non-linear elements including diodes and JFETs, graphic, parametric and shelving equalizers, compressors, limiters, gates, microphone preamps, analog effects including reverb, flanging, and chorusing. Students will design custom audio circuits and use computer simulations to understand theory of operation.
PREREQUISITE: MMI 201. OPEN TO MUE AND MEC MAJORS ONLY.
MMI436 Audio Postproduction
3 credits  Spring Semester
Basic audio for video and film postproduction, including the study of time code, synchronization, electronic editing, video and film transports, dolby stereo, equipment interfacing, and future developments.

MMI445 Senior Project/Portfolio
1 credit  Spring Semester
This course is the capstone of the Creative American Music Program. Students will develop a portfolio of recordings of original songs. Students will also be required a public performance of their original songs.
PREREQUISITE: PERMISSION FROM INSTRUCTOR AND CAM MINORS ONLY

MMI454 Entertainment Industry Practicum
1 credit  Fall & Spring Semester
Practical experience in an entertainment industry organization.

MMI455 Internship in Entertainment Industry
2 credits  Fall & Spring Semester & First & Second Summer Session
Practical experience in different areas of the entertainment industry under the supervision of professional firms and the faculty advisor.
PREREQUISITE: MBEI AND MBEC MAJORS ONLY

MMI456 Internship in Entertainment Industries II
0 credit  Fall & Spring Semester & First & Second Summer Session
Continuation of MMI 455.
PREREQUISITE: MMI 455.

MMI460 Recital Recording and Sound Reinforcement
1 credit  Fall & Spring Semester
Practical experience in live concert recording, editing and mastering, and sound reinforcement, under supervision of professional on-campus engineers.
PREREQUISITE: OPEN ONLY TO MUE AND MEC MAJORS ONLY.

MMI465 Internship in Music Engineering
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Practical experience in the music engineering industry such as work in a recording studio, broadcast company, hardware or software manufacturer, under professional supervision.
PREREQUISITE: OPEN ONLY TO MUE AND MEC MAJORS ONLY.

MMI493 Special Projects
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised readings and other activities in specific areas of Music Media and Industry.
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.
MMI501 Transducer Theory  
3 credits  
Spring Semester  
Course covers the fundamentals of electromagnetism and audio transducer theory including loudspeaker and microphone systems. Classical electro-acoustical analysis of transducers including acoustic suspension, bass-reflex, transmission line, electrostatic and horn loudspeakers, dynamic, ribbon and condenser pressure, and pressure-gradient microphones. Students use computer-aided design programs and Thiele-Small parameterization to model loudspeakers and measure loudspeaker responses. Open to MUE and EAN Majors only.  
PREREQUISITE: EEN 201, PHY 102 OR PHY 205.

MMI502 Digital Audio I  
0-3 credits  
Fall Semester  
A study of the theory and practice of digital audio topics including discrete time sampling, quantization, dithering, PCM, A/D and D/A conversion, digital filtering, oversampling, modulation codes, time base, error correction codes, magnetic storage, DAT, and optical storage.  
PREREQUISITE: MMI 501.

MMI503 Digital Audio II  
3 credits  
Spring Semester  
A study of the theory and practice of digital audio topics including fiber optics and networks, compact disc, interconnection, psychoacoustics, low bit-rate perceptual coding, MPEG, digital audio broadcasting, sigma-delta conversion, noise shaping, digital video, and emerging technologies. Open to MUE and EAN Majors only.  
PREREQUISITE: MMI 502.

MMI504 Audio Analysis and Synthesis  
3 credits  
Offered By Announcement Only  
Theory, design, and development of computer audio synthesizers and analyzers. Students implement software synthesizers including analog and physical modeling, wave-table, wave-shaping, and FM designs. Classical and modern theories of timbre and time-frequency analysis are included.  
PREREQUISITE: MMI 503, OPEN TO MUE AND MEC MAJORS ONLY.

MMI505 Advanced Audio Signal Processing  
3 credits  
Spring Semester  
Theory, design and development of audio signal processing techniques. Topics include DSP architectures, systems design, algorithm development, and applications. DSP development tools used to write, debug, and test programs including time-domain based effects such as reverb, chorus, flanging, and digital delay as well as frequency-domain projects such as FIR, IIR, and FFT filters and vocoders.  
PREREQUISITE: MMI 504, OPEN TO MUE MAJORS ONLY.

MMI520 Audio Technology for Musicians  
0-3 credits  
Fall Semester  
Introduction and overview of audio technology with emphasis on music recording, production equipment, and techniques. Topics include microphones, loudspeakers, mixing consoles, interconnection, amplifiers, digital processing, time code, and surround sound. Open to non-MUE majors.  
PREREQUISITE: JUNIOR STANDING AND PERMISSION OF INSTRUCTOR.
MMI530 Entrepreneurship for Musicians
3 credits
Spring Semester
Course explores a wide range of options for musicians who want to pursue music business careers in their regional music markets. Students examine opportunities in performance, recording, composition, education, and more. Emphasis is placed on the packaging of musical skills in the marketplace and on the financial management of a small proprietary music business. As a result, the student musician will be prepared to make career decisions with foresight and planning.
PREREQUISITE: OPEN ONLY TO MUSIC STUDENTS

MMI537 Recorded Music Operations
3 credits
Spring Semester
A study of the activities involved in commercially exploiting recorded music. Includes an analysis of activities involved in the production, manufacturing, distribution, and marketing of a recorded music product; as well as related royalty accounting, mechanical licensing and master-use licensing activities.
PREREQUISITE: MMI 274 AND MMI 378; OPEN TO MBEI AND MBEC MAJORS, AND MBEI MINORS

MMI540 Music Supervision
3 credits
Fall & Spring Semester
A study of the principles and practices of combining music with visual images. The history, theory, tools, relationships and legalities of the field of Music Supervision will be explored.
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI541 Tour Management and Production
3 credits
Fall & Spring Semester
Students will become familiar with the responsibilities of a tour planner. Individual tour planning projects are assigned which will give the students insight into the management and production of a tour.
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI542 The Music Products Industry
3 credits
Fall & Spring Semester
The course is designed to give the students an overview of the music products industry. Special attention is given to the trade associations and their role regionally, nationally, and internationally. The importance of relationships as part of the business foundation is discussed at length. Students present promotion/marketing plans applicable to the products industry.
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI543 Marketing and Promotion in the Entertainment Industry
3 credits
Fall & Spring Semester
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI573 International Music Publishing
2 credits
Spring Semester
An in-depth study of the international publishing industry with an emphasis on catalog development and exploitation.
PREREQUISITE: MMI 178 AND MMI 274; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY
MMI578 Royalties in the Recorded Music Industry
1 credit Fall Semester
A practical study of royalty payment formulas and procedures used in the recorded music industry.
PREREQUISITE: MMI 178 AND MMI 274; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI593 Special Topics MMI
1-3 credits Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Music Media and Industry.
PREREQUISITE: DEAN’S APPROVAL AND SIGNATURE REQUIRED

MUSIC THEORY & COMPOSITION

MTC012 Composition Forum
0 credit Fall & Spring Semester
A weekly forum for all Music Theory/Composition majors, both undergraduate and graduate. Course involves guest lectures by visiting composers and performers, presentations of faculty compositions, and group discussions of important compositional and theoretical issues.

MTC015 Media Writing and Production Forum
0 credit Fall & Spring Semester
This course provides a weekly forum for sharing information about issues, current developments, and other matters related to commercial music composition and production as a field of study and as a profession. The course is required for all undergraduate MWP majors during each semester.

MTC101 Composition I
2 credits Fall Semester
Course covers elementary principles of composition; class performance of composition projects is also included. Required of theory-composition majors.

MTC102 Composition II
2 credits Spring Semester
Continuation of MTC 101.
PREREQUISITE: MTC 101.

MTC107 Skills Ensemble I
1 credit Fall Semester
Chamber-music ensemble (vocal or instrumental) for intensive work on aural skills (transcription, sight-singing, etc.), analysis of literature in and through performance, and improvisation, with focus on music of the Baroque and Classical periods.
PREREQUISITE: APPROPRIATE ACHIEVEMENT ON PLACEMENT EXAM.

MTC108 Skills Ensemble II
1 credit Spring Semester
Chamber-music ensemble (vocal or instrumental) for intensive work on aural skills (transcription, sight-singing, etc.), analysis of literature in and through performance, and improvisation, with focus on music of the Baroque and Classical periods.
PREREQUISITE: MTC 107
MTC109 Music Theory Skills I
3 credits  Fall Semester
A first course in music theory and musicianship for non-music majors; covers basic literacy, fundamentals, tonal harmony, and elements of musical form in a wide variety of traditional and contemporary styles and genres. Includes intensive training in aural and singing skills.
PREREQUISITE: NONE; COURSE FOR NON-MUSIC MAJORS ONLY

MTC110 Music Theory Skills II
3 credits  Spring Semester
Course is designed for students deficient in the knowledge of the basic fundamentals of music. Includes the study of notation, keys, scales, and chord construction. Credits do not count toward music degree requirements.
PREREQUISITE: MTC 109, APPROPRIATE ACHIEVEMENT ON A PLACEMENT EXAMINATION, OR PERMISSION OF THE INSTRUCTOR. COURSE FOR NON-MUSIC MAJORS ONLY.

MTC125 The Nature of Music
3 credits  Fall & Spring Semester
A study of sound, pitch, rhythm, meter, melody, scales, intervals, tempo, expression terms, and highlights of music in history. Enrollment is limited to honors students who are non-music majors.
PREREQUISITE: ADMISSION TO HONORS PROGRAM.

MTC140 Music Theory I
2 credits  Fall Semester
Study of tonal harmony, voice leading, and elements of musical form, covering diatonic procedures and basic modulation, using the chorales of J.S. Bach, with other repertoire, as models for composition.
PREREQUISITE: APPROPRIATE ACHIEVEMENT ON PLACEMENT EXAM.

MTC141 Music Theory II
2 credits  Spring Semester
PREREQUISITE: MTC 140

MTC148 Electronic Music Ensemble
1 credit  Fall & Spring Semester

MTC182 Composition Workshop
1 credit  Fall & Spring Semester

MTC197 Studio Rhythm Section
1 credit  Fall & Spring Semester

MTC199 The Other Music Ensemble
1 credit  Fall & Spring Semester
An in-depth study and performance of 20th century music.

MTC201 Composition III
2 credits  Fall Semester
Principles of composition with special emphasis on stylistic considerations.
PREREQUISITE: MTC 102
MTC202 Composition IV
2 credits
Spring Semester
Continuation of MTC 201.
PREREQUISITE: MTC 201.

MTC203 Pop Composition I
2 credits
Fall Semester
Introduces students to the concept of form in commercial music through a survey
of representative past and current works. Emphasis is placed on acoustic repertoire.
Assignments include lead sheet transcriptions and an introduction to the 3, 4,
and 5-piece rhythm section.
PREREQUISITE: MTC 212 OR MTC 241

MTC204 Pop Composition II
2 credits
Spring Semester
Continuation of MTC 203. Survey of lyrics from different pop genres. Compositional
assignments are for rhythm section and vocalist, and include the writing and setting
of lyrics.
PREREQUISITE: MTC 203

MTC207 Skills Ensemble III
1 credit
Fall Semester
Chamber-music ensemble for intensive work on aural skills (transcription, sight-singing,
sight-reading, etc.), analysis of literature excerpts in performance, and improvisation,
with focus on tonal music of the Classical period and the nineteenth century.
PREREQUISITE: MTC 108

MTC208 Skills Ensemble IV
1 credit
Spring Semester
Chamber-music ensemble for intensive work on aural skills (transcription, sight-singing,
sight-reading, etc.), analysis of literature excerpts in performance, and improvisation,
with focus on selected music of the twentieth century.
PREREQUISITE: MTC 207

MTC240 Music Theory III
2 credits
Fall Semester
Continuation of MTC 141; study of advanced tonal harmony, voice leading, and larger
musical forms, based primarily on music of the Classical period and the nineteenth
century.
PREREQUISITE: MTC 141

MTC241 Music Theory IV
2 credits
Spring Semester
Continuation of MTC 240; study of materials and techniques in composition of music
from the early and middle twentieth century, based on works by Debussy, Stravinsky,
Schoenberg, Bartok, and other models.
PREREQUISITE: MTC 240

MTC301 Composition V
2 credits
Fall & Spring Semester
Individual compositional projects with an emphasis on smaller formal structure.
PREREQUISITE: MTC 202
MTC302 Composition VI
2 credits  Fall & Spring Semester
Individual compositional projects including all media with an emphasis on extended formal structures.
PREREQUISITE: MTC 301.

MTC303 Music for Media
3 credits  Fall Semester
Project-based lecture course designed to provide students the opportunity to compose and realize a varied array of music projects for media applications including music branding "logos" radio/television ID packages, and 30-second television ads. Particular emphasis is placed on technical considerations, aesthetic issues and the psychology of music as they relate to advertising on radio and television.
PREREQUISITE: MTC 204

MTC304 Multimedia Projects.
3 credits  Spring Semester
Project-based lecture course designed to provide students the opportunity to compose and realize the music for a series of commercial multimedia including television program themes/bumpers, sound design and FX, film trailers, and corporate/industrial videos. Emphasis is placed on making appropriate stylistic and compositional choices, as well as developing real-world deadline/time-management skills.
PREREQUISITE: MTC 303

MTC311 Analysis and Expert
3 credits  Fall & Spring Semester & First Summer Session
Musical analysis and its relationship to listening and performance. An introduction to musical aesthetics is also included.
PREREQUISITE: MTC 212 OR MTC 241

MTC312 Twentieth Century Techniques
3 credits  Fall & Spring Semester
Analysis of twentieth century compositional resources. Topics include Impressionism, expanded tonal resources, Neo-classicism, serialism, post-serialism, aleatoric procedures, minimalism, and other recent trends.
PREREQUISITE: MTC 212 OR MTC 241

MTC313 18th Century Counterpoint
3 credits  Fall & Spring Semester
Two-part keyboard counterpoint in the style of J. S. Bach, beginning with a modified species approach and including composition of dance-suite movements and inventions. Introduction to three-part writing is also included.
PREREQUISITE: MTC 211 OR MTC 240

MTC401 Composition VII
2 credits  Fall & Spring Semester
Individual compositional projects including all media with an emphasis on advanced problems in composition.
PREREQUISITE: MTC 302

MTC402 Composition VIII
2 credits  Fall & Spring Semester
Advanced Composition. Continuation of MTC 401.
PREREQUISITE: MTC 401
MTC403 Advanced Music Editing.

3 credits  Fall Semester
Project-based practicum course designed to provide students the opportunity to compose record and reproduce a wide variety of music projects that combine the use of pre-existing as well as new musical elements. Particular emphasis is placed on technical considerations, aesthetic issues, and the commercial viability of the end product.
PREREQUISITE: MTC 304

MTC404 Live Performance Musical Direction

3 credits  Spring Semester
Project-based practicum course in collaboration with other Performance department, designed to provide students the opportunity to prepare music for a live concert and serve as Musical Director (MD) thereof. Particular emphasis is placed on musical material (repertoire, arrangements, score/parts preparation), rehearsal techniques, and real-time/live performance direction/conducting.
PREREQUISITE: MTC 403

MTC416 Orchestration

3 credits  Fall & Spring Semester & Second Summer Session
The uses and possibilities of orchestral instruments as well as scoring for various instrumental groups, including the symphony orchestra.
PREREQUISITE: MTC 211 OR MTC 240

MTC452 Media Production Project Lab

2 credits  Spring Semester
Laboratory component to MTC 404. Course can only be taken concurrently with MTC 404.

MTC493 Special Projects

1-3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised reading, composition, and other activities in specific areas.
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MTC499 Senior Recital

1 credit  Fall & Spring Semester
A public recital of original compositions required of all Music Composition majors.

MTC501 The Aesthetics of Music

3 credits  Spring Semester
Survey of thought and discourse about the nature, roles, values, experiences, and meanings of music. Variety of perspectives, including those of the listener, performer, and composer are addressed. Application to musical interpretation and criticism is included.
PREREQUISITE: MTC 311 OR 312 OR GRADUATE STANDING.
MTC505 Analysis and History of Electroacoustic and Acousmatic Music
2 credits
Fall Semester
Introduction to electroacoustic music and the digital electronic music studio. Computer and MIDI based applications in performance and composition including sequencing, music notation, and electronic orchestration are addressed. Theoretical and aesthetic issues relating to music technology, study of important figures and works. Lectures, reading, listening, and studio assignments leading to individual projects are also included.
PREREQUISITE: MTC 312 OR PERMISSION

MTC506 Digital Editing and Sequencing
2 credits
Spring Semester
Computers as control devices for music synthesis. Topics include interfacing microcomputers and synthesizers, programming of controllers, sequencers, patch librarians, sound editors, and other applications. Computer assisted composition and performance techniques, lectures, reading, listening, and studio assignments leading to individual projects are also included.

MTC507 Studio Licensing
2 credits
Fall & Spring Semester
Software-based techniques of digital audio recording and editing, sound synthesis/design, audio signal processing, and sound analysis. Lectures, reading, listening, and studio assignments leading to individual projects in synthesis, composition, performance, or programming are included.
PREREQUISITE: MTC 506

MTC511 Film Scoring I
2 credits
Fall Semester
Seminar in the aesthetics and psychology of mood music, sound-film synchronization, timing techniques, and scoring procedures. Analysis and performance of student projects is included.
PREREQUISITE: MTC 302

MTC512 Film Scoring II
2 credits
Spring Semester
Adaptation of previous semester's techniques to television scripts and performed music. Pre-recording, direct recording, and dubbing procedures are included as well as preparation and performance of complete film cues. Each student is required to conduct his/her project.
PREREQUISITE: MTC 511.

MTC513 16th Century Counterpoint
3 credits
Offered By Announcement Only
Two- and three-voice vocal counterpoint based on Palestrina's style, beginning with studies of strict species and including composition of two- and three-voice texted motets.
PREREQUISITE: MTC 211 OR MTC 240

MTC515 Choral Arranging
3 credits
Spring Semester
Arranging for choir and vocal groups with and without instrumental accompaniment in all styles.
PREREQUISITE: MTC 212 OR MTC 241
MTC516 Advanced Orchestration
3 credits
Spring Semester
Scoring for the symphonic orchestra with an emphasis on recent techniques.
PREREQUISITE: MTC 416

MTC517 Analysis of Popular Music Since 1950
3 credits
Offered By Announcement Only
Course examines popular music in the second half of the Twentieth Century from a music analytical perspective. Critical skills needed for this analysis are identified and developed. Analytical techniques for understanding the determination and utilization of musical elements and structures in contemporary popular music are applied. Various contemporary genres and some precursors are examined and particular stylistic determinants of their compositional and performance models are discussed.
PREREQUISITE: GRADUATE STANDING OR MTC 311 OR 312, OR PERMISSION OF THE INSTRUCTOR.

MTC518 Advanced Counterpoint
3 credits
Spring Semester
Three-voice fugal writing in Bach's style, followed by compositional projects in a variety of twentieth-century contrapuntal styles.
PREREQUISITE: MTC 313

MTC521 Multimedia for Musicians
3 credits
Offered By Announcement Only
Presents an overview and introduction to the creation of multimedia projects for presentation on the Web. Focus is placed on building websites, and the creation of multimedia content for online delivery. Software tools for the manipulation of digital media, including audio and video, are utilized in the realization of course projects.
PREREQUISITE: MTC 212 AND MKP 220, OR MTC 241 AND MMI 240 AND 241, OR GRADUATE STANDING.

MTC567 Electronic and Computer Music Seminar
1-3 credits
Fall & Spring Semester
Advanced techniques and applications in electronic and computer music. Topics may include electronic projects in composition, performance, research, programming, or other as approved by instructor.
PREREQUISITE: MTC 505, 506, 507

MTC593 Special Topics MTC
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Music Theory-Composition.
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED

MUSICOLOGY
MCY007 B.A. in Music Forum
0 credit
Fall & Spring Semester
Forum for this major will provide programs on and discussion of the role of the musical arts in society for people in a wide range of careers.
PREREQUISITE: NONE

MCY016 Musicology Forum
0 credit
Offered By Announcement Only
A weekly forum for all Musicology majors. This course involves guest lectures by local and visiting scholars, presentations of student and faculty research, and group discussions centered on principal ideas, methods, and approaches in the field.
MCY124 The Evolution of Jazz  
3 credits  
Fall & Spring Semester & First Summer Session  
A study of the origin, development, and styles of jazz music and its exponents.

MCY127 Evolution of Rock  
3 credits  
Fall & Spring Semester & Second Summer Session  
Rock music from its sources to the present. Aural recognition of rock styles and selected performing artists are included.

MCY131 Understanding Music  
3 credits  
Fall & Spring Semester  
A general introduction to the musical elements and the history of music from antiquity to the present. Primarily focuses on classical music, but also includes exposure to pop, jazz, and music traditions.  
PREREQUISITE: NONE

MCY140 Experiencing Music  
2 credits  
Fall Semester  
A broad introduction to musical elements, genres, periods, styles, and composers in the classical, jazz, popular, and world music traditions.  
PREREQUISITE: MUSIC MAJORS ONLY.

MCY141 Musical Trends and Traditions  
2 credits  
Spring Semester  
A study of genres, periods, styles, and composers in the classical, jazz, and popular music traditions.  
PREREQUISITE: MCY 140

MCY211 African-American Song Traditions  
3 credits  
Fall Semester  
A study of the origins, development, and styles of African American song traditions from early plantation songs, shouts, hollers, and spirituals, to the development of blues traditions, to gospel. Areas to be explored include the development of an African American cultural consciousness and the political and socio-economic influences on the content and musical styles.  
PREREQUISITE: NONE

MCY212 Anglo-American Song Traditions  
3 credits  
Spring Semester  
A study of the origins, development, and styles of Anglo-American song traditions from English and Irish folk ballads, to shape-note and Sacred Harp hymnody, to early folk, country and bluegrass. Areas to be explored include the development of an American cultural identity and the political and socio-economic influences on the content and musical styles.  
PREREQUISITE: NONE

MCY311 Modern American Pop Music I  
3 credits  
Fall Semester  
A study of the development and styles of American Popular Music from the late-1950s to the late-1970s. Areas to be explored include influential songwriters and performers and stylistic development in their political and socio-economic context.  
PREREQUISITE: NONE
MCY312 Modern American Pop Music II  
3 credits  
Spring Semester  
A study of the development and styles of American Popular Music from the early-1980s to the present. Areas to be explored include influential songwriters and performers and stylistic development in their political and socio-economic context.  
PREREQUISITE: NONE

MCY313 Music of Latin America  
3 credits  
Fall & Spring Semester  
An introduction to the music of Latin America, with special emphasis on Mexico, Brazil, Argentina, the Andes, and the Caribbean. Covers folk, popular, and classical music traditions. Open to non-music majors.  
PREREQUISITE: NONE

MCY324 Music in Hebrew Culture  
3 credits  
Spring Semester  
A study of the folk, traditional, liturgical, and art music of the Jews. Particular attention is given to music on Jewish subjects, music employing traditional Jewish resources, and music by contemporary Jewish and Israeli composers.

MCY333 Introduction to Cuban Music  
3 credits  
Fall & Spring Semester  
A survey of Cuban Music from the early European settlement to the present. Course addresses African and Caribbean influences and the amalgamation into new national styles, as well as current musical activity on the island and in expatriate communities.

MCY493 Special Projects  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Supervised readings and other activities in specific areas of Musicology.  
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN’S APPROVAL AND SIGNATURE REQUIRED.

MCY520 History and Literature of the Wind Band  
3 credits  
Fall Semester  
An historical survey of wind band literature, the evolution of the military band, the wind band, and the wind orchestra.

MCY521 Symphonic Literature  
3 credits  
Spring Semester  
A survey of orchestral music from the end of the seventeenth century to the present.

MCY522 Operatic Literature  
3 credits  
Spring Semester  
The history and literature of opera from the end of the sixteenth century to the present.

MCY524 Contemporary Music  
3 credits  
Fall Semester  
Music of the 20th century, with emphasis on developments since 1945.

MCY525 Art Song Literature  
3 credits  
Spring Semester  
A survey of the solo vocal literature from the 16th century to the present, with particular emphasis on the 19th-century French and German repertoire.
MCY526 Keyboard Literature I
3 credits  Fall Semester
A survey of keyboard literature from its beginning to approximately 1750 emphasizing changes in styles of writing and expression, development of techniques suited to the primary instruments in use (including the early organ, clavichord, harpsichord and fortepiano), ornamentation both specified and improvised, forms, and ideas for interpretation based on historical sources.

MCY527 Keyboard Literature II
3 credits  Spring Semester
A survey of solo keyboard literature from approximately 1750 to the present emphasizing changes in styles of writing and expression, development of technique suited to the primary instruments in use (including the clavichord, harpsichord, fortepiano and modern piano), embellishment both specified and improvised, forms, and ideas for interpretation based on historical sources (including facsimiles, printed scores, written records and sound recordings, particularly those by the composers themselves).

MCY528 Music Bibliography
3 credits  Fall Semester
Course presents research materials, including dictionaries, encyclopedias, historical collections, scholarly editions, complete works, books, articles, and lists dealing with specialized areas of music history and literature.
PREREQUISITE: GRADUATE STANDING, OR PERMISSION OF INSTRUCTOR.

MCY529 Music of the Baroque Period
3 credits  Spring Semester
Literature and history of music from the end of the sixteenth to the middle of the eighteenth centuries.
PREREQUISITE: SIX CREDITS OF UNDERGRADUATE MUSIC HISTORY.

MCY530 Music of the Classical Period
3 credits  Fall Semester
The musical styles which developed between the mid-eighteenth century and the nineteenth century.

MCY532 History of Chamber Music
3 credits  Fall Semester
Styles and forms in chamber music literature from the seventeenth century to the present.

MCY533 Music of the Romantic Period
3 credits  Spring Semester
The musical styles which developed during the nineteenth century.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

MCY535 Choral Literature I
2 credits  Fall Semester
Choral music of the sixteenth through the eighteenth centuries. A combination of lecture-discussion and class performance.

MCY536 Choral Literature II
2 credits  Fall Semester
Choral music of the nineteenth and twentieth centuries. A combination of lecture-discussion and class performance.
MCY537 Music in the United States

3 credits  
Spring Semester

A survey of music in the United States from colonial times to the present, with emphasis on the social, economic, and political conditions which affected it. Art music (sacred and secular), popular music in all idioms, the music industry as it evolved in the U.S., and the influence of American music on the music of other countries.

MCY538 Music, Gender, and Sexuality

3 credits  
Spring Semester

An exploration of music from around the world from the perspective of women. We will examine the roles women have played, and still play, as creators and performers in art music and popular music traditions. Representations of women and gender ideologies will also be discussed.

MCY541 Music of the Mediaeval, Renaissance, and Baroque Periods

3 credits  
Fall Semester & First Summer Session

A comprehensive, in-depth study of the musical styles and genres of the Mediaeval, Renaissance, and Baroque Eras. Important musical figures of these periods and analytical studies of important pieces of music from these periods are addressed.

MCY542 Music of the Classical, Romantic, and Modern Periods

3 credits  
Spring Semester & Second Summer Session

A comprehensive, in-depth study of the musical styles and genres of the Classical, Romantic, and Modern Eras of important musical figures of these periods, and analytical studies of important pieces of music from these periods.

MCY553 Miami’s Musical Heritage

3 credits  
Spring Semester & First Summer Session

A study of the musical traditions and practices of the various cultures that are part of Miami’s unique multi-ethnic society.

MCY554 Music Cultures of the World: Argentina and Brazil

3 credits  
Offered By Announcement Only

A study of music culture of the region including the music of folk societies, popular artists, and classical musicians. Open to non-majors. PREREQUISITE: UPPERCLASS STANDING OR PERMISSION OF THE INSTRUCTOR.

MCY562 Music of Argentina and Brazil

3 credits  
Spring Semester

An in-depth study of Argentine and Brazilian musical cultures covering folk, popular, and classical traditions. Open to non-majors.

MCY564 Seminar in Latin American Music Collections

3 credits  
Fall Semester

Examines Latin American music materials at the Cuban Heritage Collection and Special Collections at the Richter Library. Focuses on interpreting original documents and acquiring archival techniques. PREREQUISITE: MINIMUM JUNIOR STANDING. READING KNOWLEDGE OF SPANISH.
MCY583 History of the American Musical Theatre
3 credits Fall Semester
An examination of the development of musical theatre from its European opera and operetta background to an indigenous American art form. The areas to be explored include the rise and fall of various genre of musical shows, integration of story, song and dance, important producers, directors, lyricists, composers, and new fields such as director-choreographer. The development of an American cultural consciousness and political and socio-economic trends of various decades that greatly influenced the content and form of musical shows is also examined.

MCY593 Special Topics MCY
1- 3 credits Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Musicology.
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED

STUDIO MUSIC & JAZZ

MSJJBA Jazz Bass
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Basic techniques, sight-reading. Major, minor, diminished, and whole tone scales. Chord structure and analysis. Bass line construction, basis of walking lines. Voice leading for bass lines and improvisation. Etudes and studies in all styles. Repertoire: Standards and Jazz.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MSJJBB Jazz Bass
1- 2 credits Fall & Spring Semester
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY

MSJJBC Jazz Bass
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to solo bass techniques. Advanced arpeggios and scales. Pentatonic theory and applications. Improvisational vocabulary (traditional).
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJBD Jazz Bass
1- 2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to solo bass techniques. Advanced arpeggios and scales. Pentatonic theory and applications. Improvisational vocabulary (traditional).
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MSJJBE Jazz Bass  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to advanced harmonic applications. Expanding traditional improvisational vocabulary. Creating original vocabulary. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJBF Jazz Bass  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to advanced harmonic applications. Expanding traditional improvisational vocabulary. Creating original vocabulary. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJBG Jazz Bass  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to recital preparation. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJBH Jazz Bass  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to recital preparation. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJDA Jazz Drumset  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Sticking technique, basic hand/foot patterns. Analysis of styles, history of drum set. Rhythm section interaction. Basic transcription, chart reading. PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MSJJDB Jazz Drumset  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Sticking technique, basic hand/foot patterns. Analysis of styles, history of drum set. Rhythm section interaction. Basic transcription, chart reading. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJDC Jazz Drumset  
1-2 credits  
Fall & Spring Semester  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced analysis or major drum set artists. Advanced transcription. Soloing over form using motives, dynamics, and subdivision, comping patterns. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MSJJDD Jazz Drumset
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced analysis or major drum set artists. Advanced transcription. Soloing over form using motives, dynamics, and subdivision, comping patterns.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJDE Jazz Drumset
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced jazz styles and comping, odd note groupings, advanced chart reading, advanced hand/foot patterns.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJDF Jazz Drumset
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced jazz styles and comping, odd note groupings, advanced chart reading, advanced hand/foot patterns.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJDG Jazz Drumset
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Displacement, metric modulation, preparation for recital, developing an individual voice.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJDH Jazz Drumset
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Displacement, metric modulation, preparation for recital, developing an individual voice.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJGA Jazz Guitar
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Left and right hand development. Basic fretboard theory including arpeggios, voice leading (2 string studies), blues and bebop scales. Accompanying: 3-note voicing. Introduction to transcription. Application of the concepts studied to basic repertoire.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MSJJGB Jazz Guitar
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Left and right hand development. Basic fretboard theory including arpeggios, voice leading (2 string studies), blues and bebop scales. Accompanying: 3-note voicings. Introduction to transcription. Application of the concepts studied to basic repertoire.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY
MSJJGC Jazz Guitar
1- 2 credits  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further development of repertoire and continuation of technical studies. Improvisation using arpeggios with tension substitutions. Application of major and melodic minor modes. More advanced transcriptions and refinement of time feel. 
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJGD Jazz Guitar
1- 2 credits  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further development of repertoire and continuation of technical studies. Improvisation using arpeggios with tension substitutions. Application of major and melodic minor modes. More advanced transcriptions and refinement of time feel. 
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJGE Jazz Guitar
1- 2 credits  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Works by Bach, Galbraith and others. Building of standard/jazz repertoire including works by Arlen, Porter, Kern, Parker, Ellington, etc. Improvisation and harmonic studies based on the foregoing. Ear training as required. Use of Jamey Aebersold play-along series. 
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJGF Jazz Guitar
1- 2 credits  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Works by Bach, Galbraith and others. Building of standard/jazz repertoire including works by Arlen, Porter, Kern, Parker, Ellington, etc. Improvisation and harmonic studies based on the foregoing. Ear training as required. Use of Jamey Aebersold play-along series. 
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJGG Jazz Guitar
1- 2 credits  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. More advanced repertoire (works by Corea, Hancock, etc.). Continued expansion of harmonic concepts and exploration of chord voicings and applications. Use of Aebersold series. Assistance with senior recital preparation. 
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJGH Jazz Guitar
1- 2 credits  
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. More advanced repertoire (works by Corea, Hancock, etc.). Continued expansion of harmonic concepts and exploration of chord voicings and applications. Use of Aebersold series. Assistance with senior recital preparation. 
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MSJJPA Jazz Piano
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technique: Major and melodic minor scales in all keys and diminished and blues scales in all keys, in both hands in at least two octaves with a swing (triplet) subdivision. Student should demonstrate the ability to solve fingering problems when ascending and descending the keyboard diatonically. Introduction to the ii-V7-I chord progression in all keys as applied to tunes which have a harmonic rhythm of one change per bar such as Cherokee (Noble) and I Love You (Porter). Literature: Study of the twelve-bar blues progression, including tunes such as "Now's The Time" (Parker), Billie's Bounce (Parker), Blue Monk (Monk). Memorization of at least two tunes per lesson in their original key, at least 75% of which should be tunes in the "American standard" format featuring composers such as Berlin, Porter, Kahn, Gershwin, etc. All of the above to be performed with bass accompaniment. Introduction to the use of Aebersold recordings.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MSJJPB Jazz Piano
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. MSJJSA Jazz Saxophone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Introduction to principals of saxophone acoustics; introduction to tone production, intonation, tonal color, and blend; basic technique, chords and scale studies; jazz phrasing; establishment of a "tune list" (repertoire); study of improvised Solos through transcription; major scales full range, thirds, diatonic seventh chords in level A and in level B, melodic minor scales full range, thirds, diatonic seventh chords. PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.
University of Miami Bulletin, 2012-2013
Undergraduate Course Listing
SCHOOL OF MUSIC
STUDIO MUSIC & JAZZ

MSJJSB Jazz Saxophone
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Introduction to principals of saxophone
acoustics; introduction to tone production, intonation, tonal color, and blend;
basic technique, chords and scale studies; jazz phrasing; establishment of a "tune
list" (repertoire); study of improvised Solos through transcription; major scales
full range, thirds, diatonic seventh chords in level A and in level B, melodic
minor scales full range, thirds, diatonic seventh chords.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJSC Jazz Saxophone
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Continuation of earlier levels
as needed; diminished scales; pentatonic scales/patterns; extended range exercises;
application of melodic minor/pentatonic scales; chromatic scale extensions; tritone
substitutions.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJJSB Jazz Saxophone
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Continuation of earlier levels
as needed; diminished scales; pentatonic scales/patterns; extended range exercises;
application of melodic minor/pentatonic scales; chromatic scale extensions; tritone
substitutions.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJSE Jazz Saxophone
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Continuation of tone and technique
as needed; augmented scale; rhythmic exercises from drum methods; continue extended
range studies; a cappella improvisation; studies in melodic/rhythmic development.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJSSF Jazz Saxophone
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students
enrolled for 1 credit. Technical Requirements: Continuation of tone and technique
as needed; augmented scale; rhythmic exercises from drum methods; continue extended
range studies; a cappella improvisation; studies in melodic/rhythmic development.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJSSG Jazz Saxophone
1-2 credits Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students
enrolled for 1 credit. Recital Preparation. Building of repertoire; concentration
on selected influential composers: Ellington, Shorter, Hancock, Miller, Silver,
Jobim, Golson, Lieberman, etc. Review of teaching methods, materials. Advanced
technique studies: Bozza Etudes Caprices, Lacour 8 Difficult studies. Topics of
interest as decided by student in consultation w/teacher. Total 80 tunes (minimum)
by end of H level.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MSJJSH Jazz Saxophone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Recital Preparation. Building of repertoire; concentration on selected influential composers: Ellington, Shorter, Hancock, Miller, Silver, Jobim, Golson, Lieberman, etc. Review of teaching methods, materials. Advanced technique studies: Bozza Etudes Caprices, Lacour 8 Difficult studies. Topics of interest as decided by student in consultation w/teacher. Total 80 tunes (minimum) by end of H level.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTBA Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Daily routine/classical etudes. Major, melodic minor, diminished scales, Dorian and Mixolydian modes, dominant 7th arpeggios, minor 7th arpeggios. All major and minor 3rds followed by respective dominant 7ths.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MSJTBB Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Daily routine/classical etudes. Major, melodic minor, diminished scales, Dorian and Mixolydian modes, dominant 7th arpeggios, minor 7th arpeggios. All major and minor 3rds followed by respective dominant 7ths.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTBC Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to blues and rhythm changes in 12 keys. Voice Leading (3rds and 7ths). Transcription techniques/assigned transcriptions. Standard tunes (1 per week).
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTBD Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to blues and rhythm changes in 12 keys. Voice Leading (3rds and 7ths). Transcription techniques/assigned transcriptions. Standard tunes (1 per week).
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTBE Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material, in addition to standard tunes (2 per week). 251 licks in major and minor. Diminished patterns.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MSJTBF Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material, in addition to standard tunes (2 per week). 251 licks in major and minor. Diminished patterns. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTBG Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to augmented scales and patterns. Pentatonic scales and patterns. Recital preparation. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTBH Jazz Trombone
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to augmented scales and patterns. Pentatonic scales and patterns. Recital preparation. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTPA Jazz Trumpet
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Concentration on basic trumpet skills, utilizing the Arbans and Clarke technical studies book. Proper breathing techniques. Major and diminished whole tone scales. Jazz tonguing. Standard jazz repertoire. PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MSJTPB Jazz Trumpet
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Concentration on basic trumpet skills, utilizing the Arbans and Clarke technical studies book. Proper breathing techniques. Major and diminished whole tone scales. Jazz tonguing. Standard jazz repertoire. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTPC Jazz Trumpet
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of basic skills in addition to range studies utilizing the Wedge breath. Transcribing jazz trumpet solos. A cappella blues in all keys. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTPD Jazz Trumpet
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of basic skills in addition to range studies utilizing the Wedge breath. Transcribing jazz trumpet solos. A cappella blues in all keys. PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MSJTPE Jazz Trumpet
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of range studies in addition to advanced etudes such as Bitsch and Charlier. Advanced jazz repertoire. Diminished and augmented scales. Studio techniques.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTPF Jazz Trumpet
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of range studies in addition to advanced etudes such as Bitsch and Charlier. Advanced jazz repertoire. Diminished and augmented scales. Studio techniques.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTPG Jazz Trumpet
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Study of advanced jazz repertoire. Recital preparation.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJTPH Jazz Trumpet
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Study of advanced jazz repertoire. Recital preparation.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJVOA Jazz Voice
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirement: Warm-ups, Cool downs and introductory exercises for breath management. Attack in phonation, registration, resonance, articulation, coordination, microphone technique, key selection and vocal hygiene and maintenance. Repertoire: 25 Songs: 6 swing, 6 traditional ballad, 5 bossa/samba, 2 blues/funk, contemporary ballad, 4 student choice.
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MSJVOB Jazz Voice
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirement: Warm-ups, Cool downs and introductory exercises for breath management. Attack in phonation, registration, resonance, articulation, coordination, microphone technique, key selection and vocal hygiene and maintenance. Repertoire: 25 Songs: 6 swing, 6 traditional ballad, 5 bossa/samba, 2 blues/funk, contemporary ballad, 4 student choice.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MSJVOC Jazz Voice
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 24 Songs: 16 selections from Swing, Ballad, Jazz Waltz and Latin idioms. 4 Rock/Funk/R&B arrangements in coordination with MSJ 301. Mini-Concert (4 song set) Note: Sophomore proficiency.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJVOE Jazz Voice
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 15 Songs, continuation of standard repertoire at more advance and complex level, including bebop, original material, modal tunes and selections of harmonic and melodic complexity with improvisation.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJVOF Jazz Voice
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 15 Songs, same styles as above, Recital preparation, review of repertoire list and audition preparation.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJVOG Jazz Voice
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 15 Songs, same styles as above, Recital preparation, review of repertoire list and audition preparation.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJVOH Jazz Voice
1- 2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 15 Songs, same styles as above, Recital preparation, review of repertoire list and audition preparation.
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MSJ003 Jazz Forum
0 credit  Fall & Spring Semester
A weekly meeting of jazz students and faculty for performance, master classes, clinics presented by students, faculty and guest artists.
MSJ011 Saxophone Forum
0 credit  Fall & Spring Semester
Course provides a weekly forum for all saxophone principals. Student performances, guest artists, master classes, and listening to selected recordings are part of the curriculum.
PREREQUISITE: SAXOPHONE PRINCIPAL.

MSJ018 Jazz Vocal Forum
0 credit  Fall & Spring Semester
A weekly meeting of the jazz vocal students and faculty dedicated to student performances, ensemble performances, and guest artist performances and workshops.

MSJ088 Jazz Piano Forum
0 credit  Fall & Spring Semester
Jazz Piano Forum is a weekly performance venue for jazz piano principals and majors which may include guest clinicians and artists.

MSJ107 Skills Ensemble I
1 credit  Fall Semester
Chamber music performance of selected repertoire with a concentration in Bebop and the music of Charlie Parker, Dizzy Gillespie, and Thelonius Monk, along with secondary figures from the Be-Bop era 1945-1955. Additional repertoire from a list of American standards will also be assigned. Class sessions will cover historical/stylistic performance practice, aural skills, (transcription, analysis, sight-reading, etc.) and Jazz arranging for small ensembles.

MSJ108 Skills Ensemble II
1 credit  Spring Semester
Chamber music performance of selected repertoire with a concentration in Jazz and popular music in America in the 1950's, including the repertoire of prominent popular music composers such as George Gershwin, Cole Porter, Richard Rodgers, and others. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.) and Jazz arranging for small ensembles.
PREREQUISITE: MSJ 107

MSJ111 Jazz Vocal Techniques I
1 credit  Fall Semester
Analysis and application of singing styles and attendant skills, techniques and repertoire required in performance and recording of jazz, popular music, and other current idioms.

MSJ112 Jazz Vocal Techniques II
1 credit  Spring Semester
Vocational Coaching of swing and traditional ballad styles with emphasis on communication of lyric content and phrasing.
PREREQUISITE: MSJ 111

MSJ113 Analysis and Evolution of Jazz Styles I
3 credits  Spring Semester
An overview of the musical styles and genres of the late nineteenth and early twentieth century leading to the development of Jazz music. Then an in-depth study of early Jazz in America and its innovators, including Louis Armstrong, Jelly Roll Morton, and Duke Ellington. Also, a survey of the major style periods of Modern Jazz from 1945 to the present, including prominent artists from each style period.
PREREQUISITE: NONE.
MSJ124 Introduction to Jazz Improvisation
3 credits          Fall & Spring Semester
Introduction to the harmonic, melodic, and rhythmic techniques of Jazz Improvisation.

MSJ125 Introduction to Jazz Vocal Improvisation.
3 credits                             Spring Semester
Introduction to the harmonic, melodic, and rhythmic techniques of Jazz Improvisation.

MSJ134 E.C.M. Ensemble
1 credit                          Fall & Spring Semester
This ensemble performs music typical of the contemporary European jazz styles such as those characterized by the Edition of Contemporary Music (E.C.M.) Recording Company.

MSJ138 Vocal Recording Ensemble
1 credit                          Offered By Announcement Only
Weekly recording sessions and instruction in recording studio performance techniques including skill training in sight reading, vocal production, and diction applied to group and solo singing styles.

MSJ139 Small Jazz Vocal Ensemble
1 credit                             Fall & Spring Semester

MSJ140 Small Jazz Ensemble
1 credit                             Fall & Spring Semester

MSJ141 Small Jazz Ensemble I
1 credit                             Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.

MSJ142 Small Jazz Ensemble II
1 credit                             Fall & Spring Semester
This ensemble focuses on sectional playing, blend, and musical interpretation. Students will be required to perform in sections of four to eight trombones with a rhythms section. The literature also requires the student to improvise. Students are encouraged to write for the ensemble.

MSJ143 Small Jazz Ensemble III
1 credit                             Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.

MSJ144 Small Jazz Ensemble IV
1 credit                             Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
MSJ145 Small Jazz Ensemble V
1 credit  Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.

MSJ146 Small Jazz Ensemble VI
1 credit  Fall & Spring Semester
Freshmen level group that focuses on the music of Charlie Parker, Dizzy Gillespie, and Thelonious Monk. Issues of modern jazz harmony and rhythm as well as cultivating Bebop vocabulary for improvisation are discussed.

MSJ147 Small Jazz Ensemble VII
1 credit  Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.

MSJ150 Studio Jazz Band
1 credit  Fall & Spring Semester
This ensemble performs music in the recent big band tradition, from leaders such as Duke Ellington, Count Basie, Buddy Rich, Bob Brookmeyer, and Thad Jones. The group performs on campus with an emphasis on studio recording.

MSJ151 Concert Jazz Band
1 credit  Fall & Spring Semester
The Concert Jazz Band is the premiere big band at the Frost School of Music. Students are required to perform at an advanced level, and work with a variety of guest artists. Requirements include the ability to sight read difficult material, and to improvise in various styles.

MSJ153 Jazz Band III
1 credit  Fall & Spring Semester
Big Band designed for freshmen and sophomores to gain experience with classic Big Band repertory.

MSJ155 Monk/Mingus Ensemble
1 credit  Fall Semester
This ensemble is dedicated to the study and performance of the music of the influential jazz composers Charles Mingus and Thelonius Monk.

MSJ156 Funk/Fusion Ensemble
1 credit  Fall & Spring Semester
Small jazz ensemble focusing on contemporary electric jazz/rock/fusion/Latin styles. Emphasis is placed on original compositions by the members of the ensemble. The most common instrumentation is bass, drums, piano/synthesizer, guitar, and saxophone.

MSJ157 Horace Silver Ensemble
1 credit  Spring Semester
This ensemble is dedicated to the study and performance of the music of Horace Silver.
MSJ158 Bebop Ensemble
1 credit  Fall & Spring Semester
This is the top instrumental small group and performs frequently both locally and nationally. The ensemble performs exclusively original compositions provided by the members of the group. The styles presented are varied and based on the interests of the participants, but includes bebop, blues, and world music.

MSJ159 Rhythm and Blues Ensemble
1 credit  Fall & Spring Semester
Mid-level ensemble for both instrumentalists and vocalists designed to familiarize students with classic Rhythm and Blues material from the 50's, 60's, and 70s, while preparing for a series of concerts throughout the semester. Students are guided through the process of putting a working band together and preparing it for performances and recordings, including what is expected of and from instruments, vocalists, producers, promoters, and other industry personnel.

MSJ160 Avant Garde Ensemble
1 credit  Fall Semester
This ensemble offers students the opportunity to develop the "free form" improvisation in either the bebop based style of Ornette Coleman or the fusion oriented style as typified by Bill Laswell.

MSJ161 Electric Bass Ensemble
1 credit  Offered By Announcement Only
Ensemble that develops a thorough foundation in basic techniques and bass line creation. The fall semester focuses on the acoustic bass and related styles. The spring semester focuses on the electric bass.

MSJ162 Jazz Saxophone Ensemble
1 credit  Fall & Spring Semester
An intermediate level reading ensemble comprised of five saxophones and rhythm section, designed to reinforce fundamental principles of playing in the typical big band saxophone section. Skills addressed include sight-reading, blend, intonation, phrasing, rhythmic accuracy, etc. Rhythm section players gain reading experience and learn the basics of providing a foundation for big band type arrangements. Repertoire includes both published and selected original charts from student arrangers.

MSJ164 Contemporary Rhythm Section Techniques I
1 credit  Fall Semester
Introduces students to various styles of rhythm section playing--from swing and modern Jazz through Rock, Funk, R&B, and other commercial styles of music. Concepts of sound, groove, balance and blend, repertory, and accompaniment are also discussed.

MSJ165 Contemporary Rhythm Section Techniques II
1 credit  Spring Semester
Fundamentals of rhythm section playing for guitarists, pianists, bassists, and drummers. It covers a variety of contemporary styles within the rock, jazz, Latin, and pop idioms. Students are grouped into ensembles which perform in class weekly.
MSJ166 Small Jazz Ensemble Lab
0 credit Fall & Spring Semester
Performance Lab designed to work in conjunction with all of the 140 level ensembles. Provides and environment in which students are required to perform on a regular rotating schedule throughout the semester. These performances are critiqued by the institution and other faculty, as well as students, in order to nurture a critical but positive atmosphere.

MSJ167 Salsa Ensemble
1 credit Spring Semester
An ensemble of instrumentalists and singers performing a wide variety of Salsa and Latin jazz styles with emphasis on improvisation.

MSJ169 Jazz Guitar Ensemble I
1 credit Fall & Spring Semester
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.

MSJ170 Jazz Guitar Ensemble II
1 credit Fall & Spring Semester
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.

MSJ171 Jazz Guitar Ensemble III
1 credit Fall & Spring Semester
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.

MSJ172 Jazz Guitar Ensemble (Workshop I)
1 credit Fall Semester
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles.

MSJ173 Jazz Guitar Ensemble (Workshop II)
1 credit Spring Semester
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles.

MSJ195 Jazz Vocal Ensemble I
1 credit Fall & Spring Semester
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.

MSJ196 Jazz Vocal Ensemble II
1 credit Fall & Spring Semester
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.

MSJ197 Jazz Vocal Ensemble III
1 credit Fall & Spring Semester
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.
MSJ203 Jazz Piano Class I
1 credit Fall & Spring Semester
This class covers the rudiments of jazz piano. Students will learn to play basic II V I progressions in major and minor. These progressions will be utilized while learning basic jazz standards.

MSJ204 Jazz Piano Class II
1 credit Fall & Spring Semester
A continuation of MSJ 203, alternate versions of the II V I progression are discussed. Students will also learn to play the "blues" and "rhythm changes" progressions with a walking bass line. Jazz standards will be played as solo melody with choral accompaniment.

MSJ207 Skills Ensemble III
1 credit Fall Semester
Chamber music performance of selected repertoire with a concentration in the music of Miles Davis in the 1950's. Additional repertoire from a list of American standards will also be assigned. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.) and Jazz arranging for small ensembles.
PREREQUISITE: MSJ 108

MSJ208 Skills Ensemble IV
1 credit Spring Semester
Chamber music performance of selected repertoire from the Hard Bop period (1955-1962) including Blue Note artists. Additional repertoire from a list of American standards will also be assigned. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.) and Jazz arranging for small ensembles.
PREREQUISITE: MSJ 207 OR PERMISSION OF INSTRUCTOR.

MSJ209 Jazz Guitar Theory I
2 credits Offered By Announcement Only
A study of modern jazz harmony as related to the electric guitar.

MSJ210 Jazz Guitar Theory II
2 credits Offered By Announcement Only
Continuation of MSJ 209.
PREREQUISITE: MSJ 209.

MSJ211 Jazz Vocal Techniques III
1 credit Fall Semester
Course provides performance experience in the Rock/Funk and Rock Ballad idioms that require strong vocal projection and presentation.

MSJ212 Jazz Vocal Techniques IV
1 credit Spring Semester
Advanced techniques for the Jazz/Pop Vocalist in live performance.
PREREQUISITE: MSJ 301 OR PERMISSION OF INSTRUCTOR
MSJ213 Analysis & Evolution of Jazz Styles II.
3 credits  Spring Semester
An overview of the musical styles and genres of the middle and late twentieth century encompassing the evolution of Modern Jazz music including an in-depth study of each period of Modern Jazz and its innovators. Also included is a survey of the major style periods of Rock music from 1945 to the present with prominent artists from each style period.
PREREQUISITE: MSJ 113

MSJ220 Basic Drumset Styles and Techniques (Part 1)
3 credits  Fall Semester
This course explores the basic sticking, swing, backbeat drumset techniques, basic world drumset styles, and chart reading.

MSJ227 Jazz Rhythm Section Techniques
1 credit  Offered By Announcement Only
A jazz ensemble for piano, bass, drums, and horns that offers advanced concepts in small group interactive performance.
PREREQUISITE: MSJ MAJORS

MSJ240 Jazz Skills I
3 credits  Fall Semester
Jazz Skills I covers the fundamentals of Jazz theory and performance. The class is keyboard based. Material includes the basics of melody, harmony and rhythm in the tradition of the Jazz art form. Specific topics include chord construction, chord voicings, progressions, voice leading, rhythmic interpretation and aural recognition.
PREREQUISITE: MTC 141

MSJ241 Jazz Skills II
3 credits  Spring Semester
Jazz Skills II is a continuation of Jazz Skills I. Material includes a more in-depth study of chord/scale theory, polyrhythmic studies, expansion of keyboard skills via increasingly longer or complicated progressions, aural recognition and transcription.
PREREQUISITE: MSJ 240

MSJ305 Jazz Piano Class III
1 credit  Fall & Spring Semester
PREREQUISITE: MSJ 204

MSJ306 Jazz Piano Class IV
1 credit  Fall & Spring Semester
PREREQUISITE: MSJ 305

MSJ307 Skills Ensemble V
1 credit  Fall Semester
Chamber music performance of selected repertoire of the Post Bop era (1960's) with in-depth analysis of the music of John Coltrane, Wayne Shorter, Herbie Hancock, the 1960's Miles David Quintet, and others. Additional repertoire from a list of American standards will also be assigned... Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.) and Jazz arranging for small ensembles.
PREREQUISITE: MSJ 208
MSJ308 Skills Ensemble VI
1 credit    Spring Semester
Chamber music performance of selected repertoire including Avant Garde, Free Jazz and the fusion Movement. Additional repertoire from a list of American standards will also be assigned. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sightreading, etc.) and Jazz arranging for small ensembles.
PREREQUISITE: MSJ 307

MSJ320 Basic Drumset Styles and Techniques (Part 2)
3 credits    Spring Semester
This course is a continuation of MSJ 220. It explores advanced sticking, swing, backbeat drumset techniques, advanced world drumset styles, and chart reading.
PREREQUISITE: MSJ 220.

MSJ340 Jazz Skills III
3 credits    Fall Semester
Jazz Skills III continues to build on skills acquired in the previous two semesters. Material includes continued development of keyboard skills and aural recognition through expansion of repertoire, modal and non-dominant/tonic harmonic schemes, bass lines and counterpoint, harmonization of melodies, and re-harmonization of basic progressions and transcription.
PREREQUISITE: MSJ 241

MSJ341 Jazz Skills IV
3 credits    Spring Semester
Jazz Skills IV is the culmination of the four level Jazz Skills sequence. Students are expected to understand and aurally recognize advanced harmonic, melodic, and rhythmic material. New material may include Latin and other straight-eighth rhythms, multi-voice counterpoint, advanced re-harmonization, and improvising at the keyboard. Keyboard skills run concurrent with Jazz Arranging II techniques (MSJ 520).
PREREQUISITE: MSJ 340

MSJ342 Technology Skills III
2 credits    Fall & Spring Semester
Music Technology III is a continuation of MMI 240 Technology Skills I and MMI 241 Technology Skills II. Recording projects combining acoustic instruments with software based instruments in a Digital Audio Workstation. Studio recording techniques including microphone placement will be demonstrated in a lab environment. Projects will be based on student compositions and/or arrangements. Post-production will include mixing, mastering and CD manufacturing.
PREREQUISITE: MMI 241

MSJ371 Jazz Improvisation I
3 credits    Fall & Spring Semester
Fundamentals of jazz harmony with emphasis on simple chord progressions, altered scales, and modes.

MSJ372 Jazz Vocal Improvisation I
3 credits    Spring Semester
Fundamentals of jazz harmony with emphasis on complex harmonic progressions and tunes.
PREREQUISITE: MSJ 371
SCHOOL OF MUSIC
STUDIO MUSIC & JAZZ

MSJ493 Special Projects
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised readings and other activities in specific areas of Studio Music and Jazz.
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MSJ499 Senior Recital
1 credit  Fall & Spring Semester
A public recital of one hour or more. Course is required of all performance majors.

MSJ509 Jazz Composition I
2 credits  Fall Semester
Application of advanced composition techniques to various contemporary Jazz styles making extensive use of analysis of established compositions. Emphasis is placed on small group performance.
PREREQUISITE: MTC 211 OR MTC 240

MSJ510 Jazz Composition II
2 credits  Spring Semester
This course is a continuation of MSJ 500 with an emphasis on melody writing, reharmonization techniques, pentatonic/blues composition, and an introduction to advanced harmonic materials.

MSJ516 Jazz Vocal Arranging
2 credits  Spring Semester
Analysis and techniques of jazz vocal writing.

MSJ519 Advanced Modern Arranging I
3 credits  Fall Semester
Advanced arranging and composition for the Jazz and studio ensemble.

MSJ520 Advanced Modern Arranging II
3 credits  Spring Semester
Advanced arranging and composition for the Jazz and studio ensemble.

MSJ521 Advanced Modern Arranging III
3 credits  Spring Semester
Course addresses scoring for large jazz ensemble, utilizing chord scale voicings and line writing techniques. Emphasis is placed on orchestration styles such as Duke Ellington, Gil Evans, and Thad Jones.

MSJ522 Introduction to Midi Sequencing and Digital Workstations
2 credits  Fall & Spring Semester
An introduction to Midi Sequencing with hands-on experience working with a computer sequencing workstation. Topics include sequencing, quantizing, editing, mixing, and effects processing.
PREREQUISITE: MSJ 519/520

MSJ544 Jazz Pedagogy and Administration
3 credits  Spring Semester
The philosophy, methods, and materials of instruction pertinent to the teaching and management of a jazz and commercial curriculum at the high school and college level. Includes preparation of model curricula and supervised instruction.
PREREQUISITE: MSJ 565
MSJ560 Advanced Jazz Improvisation Theory
3 credits
Fall Semester
Review of fundamentals and introduction of advanced topics in jazz harmony and scale resources for improvisation.
PREREQUISITE: PLACEMENT AUDITION

MSJ565 Advanced Improvisation I
3 credits
Spring Semester
Use of stylistic nuance with emphasis on melodic development, complex harmonies, time-feel, and phrasing. Open only to senior or graduate majors in Studio Music and Jazz.
PREREQUISITE: MSJ 372

MSJ566 Advanced Improvisation II
3 credits
Fall Semester
Refinement of improvisation concepts leading towards the establishment of a personal style of playing. Open only to senior or graduate majors in Studio Music and Jazz.
PREREQUISITE: MSJ 565

MSJ589 Jazz Accompanying
2 credits
Offered By Announcement Only
A comprehensive study in accompaniment concepts for pianists/guitarists reflecting contemporary and traditional jazz styles.

MSJ593 Special Topics MSJ
1- 3 credits
Fall & Spring Semester
Supervised topics and other activities in specific areas of Studio Music and Jazz.
PREREQUISITE: DEAN’S APPROVAL AND SIGNATURE REQUIRED

VOCAL PERFORMANCE

MVPVOA Voice
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate a beginning concept of breath management, legato connection for moderate length phrases, clear articulation and projection of vowels and consonants in English, emotional connection to and communication of text, release of vibrato in sustained singing, and jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
PREREQUISITE: AUDITION FOR LEVEL A; SUCCESSFUL COMPLETION OF LEVEL A TO MOVE TO LEVEL B.

MVPVOB Voice
1- 2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate a beginning concept of breath management, legato connection for moderate length phrases, clear articulation and projection of vowels and consonants in English, emotional connection to and communication of text, release of vibrato in sustained singing, and jury repertoire, language, and performance requirements (See Guidelines for Voice Study).

MVPVOG Voice
1-2 credits
Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required lyric languages, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performing with accuracy in pitch, rhythm, good posture, breath management, phonation, and resonance in addition to jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.
MVPVOH Voice
1-2 credits  Fall & Spring Semester
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required lyric languages, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performing with accuracy in pitch, rhythm, good posture, breath management, phonation, and resonance in addition to jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
PREREQUISITE: SUCCESSFUL COMPLETION OF PREVIOUS LEVEL OF STUDY.

MVP008 Voice Forum
0 credit  Fall & Spring Semester
A weekly informal recital setting and performance class for voice principals and majors with guest artists, master classes, and faculty presentations. Required for all two, three, and four credit applied voice students.

MVP101 Voice Class for Voice Principals
1-2 credits  Fall Semester
Class instruction for beginning voice principals. Fundamentals of singing, breath control, and tone production are taught. Appropriate solo repertoire is assigned.

MVP144 Vocal Techniques for Non-Majors
1 credit  Fall & Spring Semester
Class instruction in fundamentals of singing, breath control, tone production, diction, and solo singing for non-music majors. Basic music reading skills are taught.

MVP147 Men's Chorale
1 credit  Fall & Spring Semester
This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.

MVP148 Women's Chorale
1 credit  Fall & Spring Semester
This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.

MVP167 Music Theatre Workshop
1 credit  Fall & Spring Semester
Participation in a fully-staged production or supervised class work and projects which integrate the skills of the musical theatre singer/actor.

MVP180 Symphonic Choir
1 credit  Fall & Spring Semester
Study and performance of choral literature appropriate for large choir, including choral orchestral masterworks.

MVP181 Choral Conducting I
1 credit  Fall Semester
This course provides practical procedures and materials for beginning conducting students. Students demonstrate basic conducting patterns, preparations, and releases in all meters.
SCHOOL OF MUSIC

VOCAL PERFORMANCE

MVP182 Choral Conducting II
1 credit  Spring Semester
This course provides practical procedures and materials for advanced conducting students. Students demonstrate refined skills in conducting musical style s and independence of gesture. A strong emphasis is placed on conducting of mixed meters.
PREREQUISITE: MVP 181 OR MIP 317.

MVP184 Chamber Singers
1 credit  Fall & Spring Semester
An ensemble of eighteen to twenty undergraduate and graduate students, the ensemble performs challenging chamber choir repertoire from the Renaissance through the Twentieth Century.

MVP185 UM Chorale
1 credit  Fall & Spring Semester
This ensemble performs significant choral literature with an emphasis on music of the Twentieth-Century and on choral/orchestral works including opera. Open to all qualified undergraduate students, regardless of major.

MVP188 Opera Theater I
1 credit  Fall Semester
Typically taken in the first semester of freshman year by vocal performance majors. Basic stage techniques will be studied and mastered. The learning process repertoire, basic acting and performance techniques will be addressed. Methods of communication of text and emotion will be studied and applied. Emphasis will be on solo repertoire with possible participation in fall opera production.

MVP189 Opera Theater II
1 credit  Spring Semester
Typically taken in the second semester of the first year by vocal performance majors. Further research, development and application of stage deportment, character development, acting skills, communication of emotion and text. Repertoire will include solo songs, arias and small ensembles and possible participation in spring opera production.

MVP196 Singing for the Stage I-A
1 credit  Spring Semester
The selection, learning process, and performance of Musical Theatre Songs with emphasis on tone production and style.

MVP197 Singing for the Stage I-B
1 credit  Spring Semester
Continuation of MVP 196.
PREREQUISITE: MVP 196.

MVP205 Acting for Opera
2 credits  Fall Semester
This course is designed to combine acting techniques with singing, dealing specifically with challenges presented to the singing actor and including musical styles and periods, period fashion and props, movement, and stage techniques for recitative, aria and ensemble performance.

MVP206 Acting for Opera - Intermediate
2 credits  Spring Semester
Course designed to continue to develop acting and character development skills for operatic performance.
MVP210 Score Reading for Stage Management Majors
1 credit  Fall Semester
Course designed to teach stage managers to read a piano/vocal score in order to call light and sound cues. Students will study time signatures, rhythms, and tempo indications as well as understand the basic forms of music.
PREREQUISITE: ENROLLMENT IN STAGE MANAGEMENT PROGRAM

MVP250 English Diction for Singers
1 credit  Fall Semester
Class designed for voice majors and principals, focus on development of pronunciation skills for teaching and singing in English. International Phonetic Alphabet is presented as a learning tool.

MVP251 Italian Diction for Singers
1 credit  Spring Semester
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching in Italian and Latin. International Phonetic Alphabet is presented as a learning tool.
PREREQUISITE: MVP 250.

MVP252 German Diction for Singers
1 credit  Fall Semester
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching and singing in German. International Phonetic Alphabet is presented as a learning tool.
PREREQUISITE: MVP 250.

MVP253 French Diction for Singers
1 credit  Spring Semester
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching and singing in French. International Phonetic Alphabet is presented as a learning tool.
PREREQUISITE: MVP 250.

MVP281 Choral Conducting III
1 credit  Fall Semester
This course provides a synthesis of the skills demonstrated in Choral Conducting I and II, while developing error detection skills in musical scores.
PREREQUISITE: MVP 182 OR MIP 418.

MVP282 Choral Conducting IV
1 credit  Spring Semester
This course focuses on quality choral literature for middle school and high school ensembles.
PREREQUISITE: MVP 281 OR MIP 281.

MVP288 Opera Theater III
1 credit  Fall Semester
Taken by vocal performance majors in the first semester sophomore year, this course is designed to combine acting techniques with singing, dealing specifically with challenges unique to the singing actor and including musical styles and periods, period fashion and props, movement, and stage technique for recitative, aria and ensemble performances. Movement will be more specific to stage requirements, but include dance steps and period movement.
MVP289 Opera Theater IV
1 credit  Spring Semester
Typically taken in the 2nd semester, sophomore year by vocal performance majors. Course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater I, II, and III.

MVP294 Singing for Actors
1 credit  Fall Semester
The preparation of song literature and audition material for actors (can be repeated for credit).

MVP296 Singing for the Stage II-A
1 credit  Spring Semester
Instruction in auditioning methods and materials for American musical theatre.
PREREQUISITE: THA 197.

MVP297 Singing for the Stage II-B
1 credit  Fall Semester
Instruction in preparing vocal material for musical scenes drawn from American musical theatre.
PREREQUISITE: THA 296.

MVP388 Opera Theater V
1 credit  Fall Semester
Typically taken in the first semester, junior year vocal performance majors. Course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater I, II, III and IV.

MVP389 Opera Theater VI
1 credit  Fall Semester
Typically taken in the 2nd semester, junior year by vocal performance majors. Course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater I-V.

MVP399 Junior Recital
1 credit  Fall & Spring Semester
A public recital of one half-hour or more. Course required of all Vocal Performance majors.

MVP415 Auditioning I
2 credits  Fall Semester
Students prepare three to five audition pieces, photos, and resumes. Income tax, unions, opportunity, and methods of searching for and obtaining work is included. Course culminates in a seven to ten day trip to New York attending auditions.
PREREQUISITE: SENIOR STANDING IN BACHELOR OF MUSIC, MUSICAL THEATRE DEGREE.

MVP416 Auditioning II
2 credits  Spring Semester
Continuation of MVP 415.
PREREQUISITE: MVP 415.
MVP420 Musical Theatre Studio  
3 credits  
Spring Semester  
Participation in a full production to be directed, choreographed, acted and designed by faculty or students.  
PREREQUISITE: SENIOR MUSICAL THEATRE MAJORS ONLY

MVP431 Musical Theatre Styles I  
3 credits  
Fall Semester  
Course topics include creating a character through song and dialogue, making transition from songs into and out of scenes, and becoming comfortable and familiar with the style and performance unique to musical theatre.

MVP432 Musical Theatre Styles II  
3 credits  
Spring Semester  
Continuation of MVP 431.  
PREREQUISITE: THA 431

MVP488 Opera Theater VII  
1 credit  
Fall Semester  
Typically taken by Vocal Performance majors in the first semester, senior year.  
Course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater 1-VI.

MVP489 Opera Theater VIII  
1 credit  
Spring Semester  
Typically taken by Vocal Performance majors in the 2nd semester, senior year. course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater I-VIII.

MVP493 Special Projects  
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session  
Supervised readings and other activities in specific areas of Vocal Performance.  
PREREQUISITE: UNDERGRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MVP499 Senior Recital  
1 credit  
Fall & Spring Semester  
A public recital of one hour or more. Course is required of all performance majors.

MVP508 Choral Score Study  
2 credits  
Fall Semester  
In depth study of selected choral or choral/orchestral works related to literature being performed by university ensembles during the academic year.

MVP538 Vocal Pedagogy  
2- 3 credits  
Fall Semester  
Course covers methods and concepts in the teaching of singing. Emphasis is placed on psychological, physiological, and acoustical principles involved in voice production with practical application, observing and teaching individual and class voice in a supervised environment.  
PREREQUISITE: SENIOR STANDING IN MUSIC
MVP552 Vocal Performance Preparation
1 credit  
Fall & Spring Semester
Musical preparation of a wide range of assigned vocal literature from all periods for performance in forums, juries, and recitals. Special emphasis is on musical values, styles, translations of texts, diction, pronunciation of Italian, German, French, and English, and memorization.

MVP580 Opera Production
1 credit  
Fall & Spring Semester
Opera production for main stage production, scenes, and other productions. Open only to students that are cast in productions, as determined by audition and faculty decision. Typically taken by vocal performance majors.

MVP588 Voice Performance in Salzburg, Austria
2-4 credits  
First & Second Summer Session
Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive vocal training from University of Miami faculty as well as distinguished guest artists. A class in vocal repertoire is also included.

MVP593 Special Topics MVP
1-3 credits  
Fall & Spring Semester
Supervised topics and other activities in specific areas of Vocal Performance. PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED
HST300 Introduction to Theory and Research
3 credits
Fall Semester
The introduction to the function of theory and research in nursing practice. Emphasis is on the development of an understanding of scientific problem solving using a multicultural perspective.

HST310 Using Research in Clinical Practice
3 credits
Fall Semester
Introduction to basic research skills for individuals interested in health research. Emphasis is on the identification of health problems, reading research articles, and research issues such as research in health, ethics of health, privacy issues and the process of informed consent.

HST312 Health Disparities Practicum
3 credits
Offered By Announcement Only
This course will focus on providing students with the required skills to conduct research projects. Students will be provided with "hands-on" experience on the management team of an El Centro study to gain practical experience in the conduct of clinical trials and basic studies.

HST313 Global Health Disparities
3 credits
Offered By Announcement Only
This course will emphasize the health disparity issues that globally impact on all populations. Content may include health disparity issues associated with gender, infection, prevention, immunizations, child welfare policy (WHO, NAFTA, etc.) WRITING COURSE

HST536 U.S. Health Care Crisis: Politics and Policies
3 credits
Spring Semester
This course will explore key health policy issues within the U.S., along with the politics and interest groups which shape them. Fundamental concerns within the health care system such as: cost, quality and access to care will be analyzed. Major topics of discussion will include: Medicare, Medicaid, private insurance, the nursing shortage, and prescription drugs. The politics and policies surrounding issues such as bioethics, globalization, and infectious disease will also be considered.
PREREQUISITE: JUNIORS AND SENIORS ONLY (JUNIORS MUST HAVE JUNIOR STANDING THE SEMESTER THEY TAKE THE CLASS)

HEALTHCARE SCIENCES
HCS202 Introductory Statistics in Health Care
3 credits
Fall & Spring Semester
Application of descriptive and inferential statistics. Principles and methods of summarizing data including tables, graphs, percentile ranks, central tendency, variability, normal distribution. Basic concepts of probability, hypothesis testing, and analysis of variance. Examples and problems from nursing and health sciences.
PREREQUISITE: MTH 101

HCS205 Personal Nutrition
3 credits
Spring Semester
Principles of nutrition integrated with cultural dietary patterns across the lifespan.

HCS206 Introduction to Public Health
3 credits
Fall & Spring Semester
Introduction to all aspects of public health, including health services administration and health policy.
HCS207 Introduction to Pharmacology
3 credits  Fall Semester
Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included. Emphasis is on the understanding of the different classes of drugs and their application in various health care settings.
PREREQUISITE: BIL 150, CHM 103 OR CHM 111, HCS 212, HCS 215.

HCS208 Introductory Epidemiology
3 credits  Fall & Spring Semester
This course is a general introduction to epidemiology, definition of concepts and natural history of disease and levels of prevention. It also covers measures of morbidity and mortality. Epidemiologic aspects of infectious and chronic diseases.

HCS212 Human Anatomy
3 credits  Fall & Spring Semester
Emphasis is on the understanding of the anatomical compartments of the human body and the ability to identify the bony skeleton, musculatures, blood vessels and internal organs of each compartment.
PREREQUISITE: BIL 150.

HCS213 Human Anatomy Laboratory
1 credit  Fall & Spring Semester
PREREQUISITE: CO-REQUISITE OR PRE-REQUISITE HCS 212

HCS215 Principles of Systemic Physiology
3 credits  Fall & Spring Semester
Emphasis is on the understanding of the Physiology and selected Pathophysiology of various organs and systems.
PREREQUISITE: PRE-REQUISITE OR CO-REQUISITE CHM 111/113 OR CHM 103/105

HCS216 Principles of Systemic Physiology Laboratory
1 credit  Fall & Spring Semester
Laboratory to accompany HCS 215
PREREQUISITE: PRE-REQUISITE OR CO-REQUISITE HCS 215

HCS301 Human Sexuality and Vulnerable Populations
3 credits  Fall & Spring Semester
The study of human sexuality via multidisciplinary theoretical perspectives and research. Students will examine the complex relationships of the physiological, psychological, cultural, gender, religious, historical, and political aspects of human sexuality. Human sexuality in the context of health disparities will form the foundation for the course. WRITING COURSE
PREREQUISITE: HCS 206 OR JUNIOR STANDING IN THE BSN

HCS303 HIV/AIDS and Health Maintenance for Health Care Providers
3 credits  Spring Semester
Definition, diagnosis, management, and care of diverse patient populations with HIV infection and AIDS. Course is presented and discussed from an interdisciplinary health care perspective.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
HCS305 Issues in Health Disparities  
3 credits  
Spring Semester  
This course will be an introduction to the general research on health systems and health disparities. Emphasis will be placed on social, biological, economic and social policy issues that impact on the health of minority populations. Concepts associated with epidemiology, poverty, racism, public policy and international politics will be explored. WRITING COURSE  
PREREQUISITE: HCS 206 OR JUNIOR STANDING IN THE BSN  

HCS306 Principles of nutrition integrated with cultural dietary patterns for client ad  
3 credits  
Fall Semester  
PREREQUISITE: SOPHOMORE STANDING OR PERMISSION OF INSTRUCTOR.  

HCS309 Health and Environment  
3 credits  
Fall & Spring Semester  
This course examines health issues, scientific understanding of causes and possible future approaches to control of the major environmental health problems. Topics include how the body reacts to environmental pollutants; physical, chemical, and biological agents of environmental contamination; vectors for dissemination; susceptible populations; the scientific bases for policy decisions and emerging global environmental health problems.  
PREREQUISITE: HCS 206  

HCS310 Global Health  
3 credits  
Fall & Spring Semester  
PREREQUISITE: HCS 206  

HCS313 Global Health Disparities  
3 credits  
Offered By Announcement Only  
This course will provide an introduction to the health disparity issues that globally impact all populations. The content will be directed toward health systems, world health indicators, policy issues, immigration, health care provider accessibility, research, country development and the role that international organizations play in global health disparities.  
PREREQUISITE: PERMISSION OF INSTRUCTOR  

HCS317 Theories in Growth and Development  
3 credits  
Fall & Spring Semester  
Exploration of growth and development through theories related to its five major components: physiologic, cognitive, psychosocial, moral and spiritual across the lifespan with discussion of developmental theories as they relate to nursing.  
PREREQUISITE: PERMISSION OF INSTRUCTOR  

HCS319 Contemporary Issues in Bioethics for Health Care  
3 credits  
Offered By Announcement Only  
This course will cover bioethical issues in the health care environment, including ethical principles, theories and decision making strategies. WRITING COURSE  
PREREQUISITE: PERMISSION OF INSTRUCTOR
HCS320 Introduction to Health Policy  
3 credits  
Fall & Spring Semester  
This course provides an introduction to the organization, delivery, and financing of health care in the United States. We will consider policy challenges created by the structure of the health care system, including access to care, quality of care, and cost growth. Major areas of focus will include public insurance programs (medicare, Medicaid/CHIP), private insurance, the uninsured, health disparities, and implementation of health care reform legislation.

HCS321 Health Promotion and Disease Prevention  
3 credits  
Fall & Spring Semester  
The focus of this course is on the understanding and implementation of strategies aimed at promoting health and preventing disease. It also focuses on optimal health maintenance and wellness support for individuals, families and communities. The content of the course includes health across the lifespan and resources associated with health promotion. Common health alterations will be discussed, as well as sociocultural perceptions of health and illness.  
PREREQUISITE: HCS 206

HCS408 Nursing Care in the Genomic Era  
3 credits  
Fall Semester  
Exploration of basic knowledge in genomics, understanding of social, cultural and psychological implications of genetic services, health prevention and promotion.

HCS414 Contemporary Health Issues in South Florida  
3 credits  
Fall & Spring Semester  
This course provides students with an in-depth look at public health topics relevant to communities in South Florida. Emphasis will be placed on the social, cultural, and policy issues that impact the health of vulnerable population in our community. Interdisciplinary research/ knowledge and practice from UM and other relevant institutions will be highlighted.  
PREREQUISITE: HCS 206 AND HCS 208

HCS415 Field Experience in Community Health  
3 credits  
Fall & Spring Semester  
This Course provides students with field experience in community health. During the didactic portion of the course, students will be introduced to the basic principles and methods used in community health assessment, program development, program implementation, and evaluation. During the field experience component of the course, students will work under the supervision of lead faculty.  
PREREQUISITE: HCS 206: HCS 208: HCS 309: HCS 310

HCS419 Contemporary Health Issues in South Florida  
3 credits  
Fall & Spring Semester  
PREREQUISITE: HCS 206

HCS487 Global Health Practicum  
3 credits  
Offered By Announcement Only  
Collaborative clinical venture between UM/SON and an International School of Nursing. Students will exchange supervised western clinical experiences, knowledge and skills for the care of clients and families in specialty areas, including MedSurg, Surgery, ICU and/or Emergency nursing units. Students will apply and synthesize basic science knowledge and skills that foster ethical, legal and culture specific health care.  
PREREQUISITE: PERMISSION OF INSTRUCTOR
HCS490 Field Practicum in Community Health
3 credits
Fall & Spring Semester
PREREQUISITE: ALL REQUIRED COURSEWORK FOR BSPH (HCS 206, HCS 208, HCS 309, HCS 310, HCS 321, HST 536, OR OTHER HEALTH POLICY COURSE.)

HCS499 Selected Topics
0-6 credits
Fall & Spring Semester & First Summer Session
PREREQUISITE: PERMISSION OF INSTRUCTOR

NURSING

NUR100 Introduction to Nursing
3 credits
Offered By Announcement Only
This is an introductory course to explore the various roles and responsibilities of the professional nurse in American health care. Major issues within health care today will be discussed and the impact they have on professional nursing will be explored.

NUR200 Summer Scholars Program
3 credits
Second Summer Session
Course focuses on current health care issues and the health care system as well as future directions of health care.
PREREQUISITE: PERMISSION OF INSTRUCTOR

NUR201 Writing as a Learning Strategy
2 credits
First & Second Summer Session
The anxiety and apprehension associated with writing can become a significant deterrent to learning. Through experiential work, students learn the mechanics of scholarly writing as well as using writing as a learning strategy. (2)

NUR202 Introductory Statistics in Health Care
3 credits
Fall & Spring Semester
Application of descriptive and inferential statistics. Principles and methods of summarizing data including tables, graphs, percentile ranks, central tendency, variability, normal distribution. Basic concepts of probability, hypothesis testing, and analysis of variance. Examples and problems from nursing and health sciences.
PREREQUISITE: MTH 101

NUR205 Personal Nutrition
3 credits
Spring Semester
Principles of nutrition integrated with cultural dietary patterns across the lifespan. Not for nursing majors or minors. (3)

NUR207 Introduction to Pharmacology
3 credits
Offered By Announcement Only
Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included. Emphasis is on the understanding of the different classes of drugs and their application in various health care settings.
PREREQUISITE: BIL 150, CHM 103 OR CHM 111, HCS 215
NUR301 Human Sexuality and Vulnerable Populations
3 credits
Fall & Spring Semester
The study of human sexuality via multidisciplinary theoretical perspectives and research. Students will examine the complex relationships of the physiological, psychological, cultural, gender, religious, historical, and political aspects of human sexuality. Human sexuality in the context of health disparities will form the foundation for the course. WRITING COURSE
PREREQUISITE: PERMISSION OF INSTRUCTOR

NUR303 HIV/AIDS and Health Maintenance for Health Care Providers
3 credits
Offered By Announcement Only
Definition, diagnosis, management, and care of diverse patient populations with HIV infection and AIDS. Course is presented and discussed from an interdisciplinary health care perspective. (3)
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR304 Adult Health I: Fundamentals of Nursing Practice
0-6 credits
Fall & Spring Semester
This clinical course emphasizes the supervised application of health assessment skills, nursing process, and clinical nursing techniques in the clinical laboratory, community, and acute care settings. (4:2)
PREREQUISITE: JUNIOR LEVEL NURSING STUDENTS

NUR305 Issues in Health Disparities
3 credits
Spring Semester
This course will be an introduction to the general research on health systems and health disparities. Emphasis will be placed on social, biological, economic and social policy issues that impact on the health of minority populations. Concepts associated with epidemiology, poverty, racism, public policy and international politics will be explored. WRITING COURSE
PREREQUISITE: PERMISSION OF INSTRUCTOR

NUR306 Principles of Nutrition
3 credits
Fall Semester
Principles of nutrition integrated with cultural dietary patterns for client adaptation across the lifespan. (2)
PREREQUISITE: SOPHOMORE STANDING OR PERMISSION OF INSTRUCTOR.

NUR307 Pharmacology
3 credits
Fall & Spring Semester & First Summer Session
Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included. (3)
PREREQUISITE: JUNIOR LEVEL NURSING STUDENTS

NUR308 Adult Health II
0-8 credits
Fall & Spring Semester & First Summer Session
This course focuses on the nursing management of the client throughout the adult life cycle who experiences alterations and/or adaptations in physiologic defense mechanisms. Teaching strategies to be utilized include lecture, discussion, critical thinking exercises. (5:2)
PREREQUISITE: JUNIOR LEVEL NURSING STUDENT
NUR310 Global Health
3 credits
Fall & Spring Semester
Introduction to the concepts of global health and the critical links between public
health and social and economic development. Determinants of health and patterns
der of disease and health outcomes across the globe are critically examined. The course
reviews the determinants of health status in terms of biology, demography, epidemiology,
culture, sociology, economics, and politics. Key concerns regarding reproductive
health, child survival, nutrition, communicable diseases, and chronic diseases
are examined. Health care delivery in developed vs. undeveloped regions of the
world are emphasized.

NUR311 Theories and Concepts of Nursing
2 credits
Fall Semester
An introductory nursing course explaining the philosophy of baccalaureate nursing
using the major concepts of person, environment, health, and nursing with a multicultural
focus. Writing Credit. (2)
PREREQUISITE: JUNIOR LEVEL NURSING STUDENT

NUR312 Health Disparities Practicum
3 credits
Offered By Announcement Only
This course will focus on providing students with the required skills to conduct
research projects. Students will be provided with "hands-on" experience on the
management team of an El Centro study to gain practical experience in the conduct
of clinical trials and basic studies.

NUR313 Global Health Disparities
3 credits
Offered By Announcement Only
This course will emphasize the health disparity issues that globally impact on
all populations. Content may include health disparity issues associated with gender,
Infection, prevention, immunizations, child welfare policy (WHO, NAFTA etc.) WRITING
COURSE
PREREQUISITE: PERMISSION OF INSTRUCTOR

NUR314 Health Assessment
0-4 credits
Fall & Spring Semester & First Summer Session
Introduction to health assessment using a lifespan approach. Emphasis is on the
development of data collection and basic decision-making using health assessment
findings.
PREREQUISITE: JUNIOR LEVEL NURSING STUDENT

NUR315 Pathophysiology
3 credits
Fall & Spring Semester & First Summer Session
The study of the physiologic and biologic manifestations of disease and disease
processes. Emphasis is placed on physiology of altered health within the context
of disruptions of structure and function of the human body as a whole. (3)
PREREQUISITE: JUNIOR LEVEL NURSING STUDENT

NUR317 Theories in Growth and Development
3 credits
Fall & Spring Semester
Application of growth and development theories through the lifespan with a case
study approach to issues commonly encountered nursing practice in a variety of
clinical settings. (2)
PREREQUISITE: PERMISSION OF INSTRUCTOR
NUR318 Maternal Health Nursing.  
0-4 credits  Fall & Spring Semester & First Summer Session  
This course focuses on the nursing process in the care of pediatric clients and families, the obstetrical client and woman's health. Emphasis is on the use of the nursing process to assist clients to adapt to health alterations requiring care in secondary health care settings.  
PREREQUISITE: JUNIOR LEVEL NURSING STUDENT  

NUR319 Contemporary Issues in Bioethics for Health Care  
3 credits  Offered By Announcement Only  
This course will cover bioethical issues in the health care environment, including ethical principles, theories and decision making strategies. WRITING COURSE  
PREREQUISITE: PERMISSION OF INSTRUCTOR  

NUR320 Pediatric Health Nursing.  
0-4 credits  Fall & Spring Semester & First Summer Session  
This course focuses in the use of the nursing process to develop and implement nursing management strategies for children and their families experiencing acute, chronic, and critical multi-system health alterations within a multicultural content. Use of the nursing process to expand and develop appropriate clinical interventions and a member of the health care team. Students will build on foundational skills in critical thinking, collaboration, and leadership in the provision of nursing care.  
PREREQUISITE: JUNIOR LEVEL NURSING STUDENT  

NUR350 Career Pathway: Assessment and Development  
3 credits  Offered By Announcement Only  
This nursing course focuses on the assessment and development of a career pathway for RNs seeking a BSN for professional nursing practice. Students will assess their personal and professional assets and the need to further develop their career in nursing. There will be a focus on concepts of professionalism, rules in nursing, nursing education diversity and cultural influences in a dynamic health care environment.  
PREREQUISITE: RN/BSN STUDENTS  

NUR390 Advanced Placement Practice I for RN/BSN Students  
10 credits  Offered By Announcement Only  
Nursing Management of the client throughout adulthood who experiences alterations and/or adaptations/maladaptions in physiologic defense mechanisms; complex alteration and/or adaptations in organ system function. The client in this course is identified as the individual, family or significant others. Course content emphasizes concepts of infection, the surgical client, immunity and altered cell growth, utilizing the nursing theories and the nursing process. Assists adult clients to adjust to multisystem alterations/adaptations/maladaptions in the endocrine, cardiovascular, respiratory, immunological and hemopoietic, nervous, musculoskeletal, digestive, and renal urinary systems. Specific models are utilized to enhance the teaching of critical thinking. Research findings are utilized to support nursing interventions.  
PREREQUISITE: COMPLETION OF RN/BSN COURSE REQUIREMENTS
NUR400 Theories, Research and Evidence-Based Practice
3 credits  Fall & Spring Semester
Course emphasis is placed on developing an understanding of the research process and application of research findings in community-based practice in multicultural settings. Course focuses on the relationship between theory, research, practice, and the development of competencies to become an informed consumer of research. Writing Credit. (2)
PREREQUISITE: SENIOR LEVEL NURSING STUDENTS

NUR401 Evidence-Based Nursing Practice.
3 credits  Fall Semester & First Summer Session
This course examines evidence-based practice in nursing. Focuses on the research process; location, critical appraisal, and evaluation of evidence; application and evaluation of evidence-based practice changes; and quality improvement.
PREREQUISITE: SENIOR LEVEL NURSING STUDENTS

NUR403 Advanced Placement Practice II for RN/BSN Students
10 credits  Offered By Announcement Only
This course focuses on the nursing process in the care of pediatric clients and families, the obstetrical client, and women's health. Emphasis is on the use of the nursing process to assist clients to adapt to health alterations requiring care in secondary health care settings. This course covers care of the pediatric client and the childbearing client and women's health.
PREREQUISITE: COMPLETION OF RN/BSN COURSE REQUIREMENTS

NUR405 Professional Development
3 credits  Offered By Announcement Only
This nursing course focuses on enhancement of the nursing career beyond the entry to practice. It explores the opportunities with graduate nursing education, advanced practice careers, and a critical analysis of legal, ethical, and political dimensions of nursing and advanced practice. Collaborative practice and the changing client populations are also a focus for examination.
PREREQUISITE: NUR 350

NUR408 Genetics and Healthcare
3 credits  Offered By Announcement Only
Exploration of basic knowledge in genomics, understanding of social, cultural and psychological implications of genetic services, health prevention and promotion.
(3)
PREREQUISITE: PERMISSION OF INSTRUCTOR

NUR411 Adult Health III
0- 5 credits  Fall & Spring Semester
This course focuses on the adult experiencing complex multisystem alteration/adaptations in organ and system function. Emphasis is on the use of the nursing process to assist adult clients to adapt to system related insults. (5:2)
PREREQUISITE: SENIOR LEVEL NURSING STUDENTS
NUR414 Advanced Placement Practice III for RN/BSN students
10 credits Offered By Announcement Only
Content emphasizes concepts and themes of families and communities and the use of the nursing process to assist in promoting and maintaining health. The behavioral health focuses on psychotherapeutic processes across the life span. Emphasis is on planning nursing care for individuals, families, and groups and professional and therapeutic communication skills and techniques. Explores the influence of neuro-physiology and psychopharmacology on the development of psychiatric and mental health services and the evolution of the role of the psychiatric nurse.
PREREQUISITE: COMPLETION OF RN/BSN COURSE REQUIREMENTS

NUR415 Perianesthesia Nursing
3 credits First & Second Summer Session
The focus of this course is on the use of the nursing process to develop and implement nursing management strategies for patients and families undergoing a surgical and/or special procedure. Emphasis is placed on the use of a multicultural nursing perspective to plan and implement nursing interventions. This course highlights Perianesthesia nursing care of surgical patients. (2:3)
PREREQUISITE: SENIOR STANDING

NUR426 Leadership & Management in Nursing
6 credits Offered By Announcement Only
Analysis and synthesis of the application of professional concepts in a variety of multicultural health care delivery systems. Emphasis is placed on personal, professional, and organizational growth. Individualized and integrated clinical experiences are provided through direct clinical supervision by preceptors.
PREREQUISITE: FINAL SEMESTER OF RNBSN PROGRAM

NUR430 Leadership In Nursing
3 credits Fall & Spring Semester
Course focuses on the use of the nursing process to develop and implement nursing management strategies for children and their families experiencing acute, chronic, and critical multisystem health alterations within a multicultural context. The use of the nursing process to expand and develop appropriate clinical interventions as a member of the health care team is emphasized. Students build on foundational skills in critical thinking, collaboration, and leadership in the provision of nursing care. (3:9)
PREREQUISITE: NUR 304; NUR 307; NUR 314; NUR 315. CO-REQUISITE: NUR 308

NUR440 Population Focused Nursing
0-4 credits Fall & Spring Semester
The focus is on population-focused nursing and community-oriented approaches to understanding and addressing major public health concerns across the life span. Emphasis is on assessing, planning, implementing and evaluating programs for a variety of communities both domestically and internationally. Health and disease is conceptualized as a complex interaction between individual, relationship, community and socio-economic-politic level factors. Epidemiology, sociology, behavioral sciences and nursing theory and practice are integrated throughout. Special attention is given to addressing the unique needs of vulnerable populations and cultural groups, the elimination of health disparities, and social justice.
PREREQUISITE: SENIOR LEVEL NURSING STUDENTS
NUR448 Psychiatric Mental Health Nursing.  
0-4 credits  
Fall & Spring Semester  
The focus is on psychotherapeutic processes across the life span. Emphasis is on planning nursing care for individuals, families, and communities with a variety of psychiatric and mental health problems in various settings (inpatient, outpatient, community). Professional and therapeutic communication skills and techniques are important components of this course. In addition, this course will explore the influence of genetics, neurophysiology and psychopharmacology on the development of psychiatric and mental health services and the evolution of the role of the psychiatric nurse. Emphasis is on the development of inter-personal and interdisciplinary collaborative skills as a means of assisting persons, families and groups in active problem solving in community based settings. The formulation of nursing diagnoses and management strategies in multicultural settings is a focus. Socio-political environmental aspects of nursing management are integrated throughout.  
PREREQUISITE: SENIOR LEVEL NURSING STUDENTS

NUR450 Role Transition  
8 credits  
Fall & Spring Semester  
Theoretical and applied concepts of transition to the nursing role within the health care setting are explored in this course. The focus is on practice issues and responsibilities in contemporary professional nursing practice. Emphasis is placed on the transition to practice and nursing care systems with increasing responsibility through discussion of practice theory and styles, empowering, mentoring, managing change and striving for excellence. Seminar discussion topics will focus on the issues of successful transition to the practice environment as new nurse.  
PREREQUISITE: SENIOR LEVEL NURSING STUDENTS

NUR453 Role Transition  
5 credits  
Fall & Spring Semester  
Interactions of children, caretakers, and the environment which influence development in the first three years of life. Observation of the child's response to the environment and caretaker's role. Specific interventions/teaching strategies will be formulated and methods to enhance communication with parents and other caregivers will be presented. Prerequisite: Upper division standing or consent of faculty.  

NUR487 Global Health Practicum  
3 credits  
Offered By Announcement Only  
Collaborative clinical venture between the University of Miami, School of Nursing and an International School of Nursing. Students will exchange supervised western clinical experiences, knowledge and skills for the care of clients and families in specialty areas including Medical-Surgical, Surgery, Intensive Care and/or Emergency nursing units. This course will allow students to apply and synthesize basic science knowledge and skills that foster ethical, legal and culture specific health care. (3)  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

NUR497 Selected Topics  
0-6 credits  
Fall & Spring Semester & First Summer Session  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
NUR498 Selected Topics  
0-6 credits  
Fall & Spring Semester & First Summer Session  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR499 Selected Topics  
0-6 credits  
Fall & Spring Semester & First Summer Session  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR502 Nursing in the International Context  
2-3 credits  
Offered By Announcement Only  
The concept and process of international nursing in the context of world health are discussed. Analysis of the role of nursing in relation to various national health care systems, theories of national development and global strategies for international health are also included. Emphasis is placed on nursing education and service in various nations with a focus on less developed countries. (2-3)

NUR507 Clinical Nutrition in Nursing Practice  
2 credits  
Spring Semester  
Application of clinical nutrition in the assessment, diagnosis, planning, implementation, and evaluation of nursing care of multicultural clients in primary and secondary care settings. (2)  
PREREQUISITE: NUR 306, JUNIOR LEVEL STATUS.

NUR536 U.S. Health Care Crisis: Politics and Policies  
3 credits  
Spring Semester  
This course will explore key health policy issues within the U.S., along with the politics and interest groups which shape them. Fundamental concerns within the health care system such as: cost, quality and access to care will be analyzed. Major topics of discussion will include: Medicare, Medicaid, private insurance, the nursing shortage, and prescription drugs. The politics and policies surrounding issues such as bioethics, globalization, and infectious disease will also be considered.  
PREREQUISITE: JUNIORS AND SENIORS ONLY (JUNIORS MUST HAVE JUNIOR STANDING THE SEMESTER THEY TAKE THE CLASS.)

NUR551 Teaching and Learning Theory in Clinical Nursing Education  
3 credits  
Fall & Spring Semester  
The focus of this course is the exploration of principles and practice of teaching and learning integral to clinical nursing education. Identification of the role of the faculty in teaching students with diverse learning styles and needs within a variety of clinical settings.  
PREREQUISITE: EDUCATION CERTIFICATE STUDENTS. ADMISSIONS TO PROGRAM

NUR553 Methods for Clinical Nursing Education  
3 credits  
Fall & Spring Semester  
The focus of this course is the organization and management of instruction for clinical nursing education. Emphasis is on effective strategies for development of learning opportunities in diverse clinical settings.  
PREREQUISITE: NUR 551, RN; PERMISSION OF INSTRUCTOR

NUR555 Evaluation in Clinical Nursing Education  
1-3 credits  
Fall & Spring Semester  
The focus of this course is the exploration of principles and practices of evaluation integral to clinical nursing education.  
PREREQUISITE: NUR 551, 553 AND/OR PERMISSION OF INSTRUCTOR.
NUR558 Practicum in Clinical Nursing Education  
1- 5 credits  
Fall & Spring Semester  
The focus of this course is laboratory and clinical application of principles of teaching and learning. Emphasis is on the operationalization of the clinical faculty role.  
PREREQUISITE: NUR 551, 553, 555, AND/OR PERMISSION OF INSTRUCTOR.

NUR594 Selected Topics  
0- 3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title “Selected Topics”. Also open to continuing education students. (2-3)  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR595 Selected Topics  
2- 3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title “Selected Topics”. Also open to continuing education students. (2-3)  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR596 Selected Topics  
2- 3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title “Selected Topics”. Also open to continuing education students. (2-3)  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

UNIVERSITY OF MIAMI EXPERIENCE

UMX100 The Ultimate University Experience
1 credit
Fall Semester
The Ultimate University Experience (UMX 100) is a comprehensive course specifically designed to assist the first year student in making a successful transition to the University of Miami. The course creates opportunities for students to become self-managed, knowledgeable of others, and an integral part of the community.

UMX101 University Experience - General
1 credit
Fall Semester
This course is designed to promote a positive transition to UM; to give students the information they will need to maximize their UM experience; to foster community building and networking.

UMX102 University of Miami Experience - Athletes
1 credit
Fall Semester
This course is designed to facilitate student-athletes in the development and enhancement of academic and life skills for success in the University setting and beyond. Students will learn how to utilize existing campus resources to achieve their academic and personal goals.

UMX104 University of Miami Experience - Psychology and Neurobiology Majors
1 credit
Fall Semester
This course is designed to ease the transition to college life, give freshman the information they will need to maximize their undergraduate experience, and foster community building and networking within the department.

UMX105 University of Miami Experience - International Students
1 credit
Fall Semester
To promote a positive adjustment to University life; to promote and facilitate a positive UM experience; to foster community building and networking; to provide information about campus resources and how to use them to achieve success at UM and beyond, with a particular emphasis on the needs of an international student.
UMX106 University of Miami Experience - Nursing/Health Science Majors
1 credit Fall Semester
To promote a positive adjustment to University life; to promote and facilitate a positive UM experience; to foster community building and networking; to provide information about campus resources and how to use them to achieve success at UM and beyond, with a particular emphasis on the needs of a nursing/health science major.

UMX107 University of Miami Experience - Education Majors
1 credit Fall Semester
To promote a positive adjustment to University life; to promote and facilitate a positive UM experience; to foster community building and networking; to provide information about campus resources and how to use them to achieve success at UM and beyond, with a particular emphasis on the needs of an education major.

UMX109 University of Miami Experience - Sports and Wellness
1 credit Fall Semester
To promote a positive adjustment to University life; to promote and facilitate a positive UM experience; to foster community building and networking; to provide information about campus resources and how to use them to achieve success at UM and beyond, with a particular emphasis on sports and wellness.

UMX110 University Experience - Undecided Arts and Sciences
1 credit Fall Semester
This course is designed to maximize the student's potential to achieve academic success, to adjust responsibly to the individual and interpersonal challenges of life at UM, and foster community building and networking within the University.

UMX111 University of Miami Experience - Business Majors
1 credit Fall Semester
To promote a positive adjustment to University life; to promote and facilitate a positive UM experience; to foster community building and networking; to provide information about campus resources and how to use them to achieve success at UM and beyond, with a particular emphasis on business majors.

UMX112 University of Miami Experience - Business Majors, Pre-Law/Pre-MBA
1 credit Fall Semester
To promote a positive adjustment to University life; to promote and facilitate a positive UM experience; to foster community building and networking; to provide information about campus resources and how to use them to achieve success at UM and beyond, with a particular emphasis on business majors who want to pursue law school or an MBA.
UMI105 University Internship Part-time
0-1 credits Fall & Spring Semester & First & Second Summer Session
A part-time zero credit internship (minimum of 320 hours) designed to provide opportunities for career exploration, skill development, and exposure to career field. Completion of at least one semester of coursework at UM is required.
PREREQUISITE: COMPLETION OF AT LEAST ONE SEMESTER OF COURSEWORK AT UM

UMI110 University Internship Full-time
0-1 credits Fall & Spring Semester & First & Second Summer Session
A full-time zero credit internship (minimum of 160 hours) designed to provide opportunities for career exploration, skill development, and exposure to career field. Completion of at least one semester of coursework at UM is required.
PREREQUISITE: COMPLETION OF AT LEAST ONE SEMESTER OF COURSEWORK AT UM

UMI205 University Internship Part-time
0-1 credits Fall & Spring Semester & First & Second Summer Session
A part-time zero credit internship (minimum of 320 hours) designed to provide opportunities for career exploration, skill development, and exposure to career field. Completion of at least one semester of coursework at UM is required.

- Nursing

**International Exchange and Language Programs**
- Study Abroad Program

**University Internship**

ARC500 Architecture Theory  
3 credits Fall Semester  

ARC501 Architecture Design and Theory I  
6 credits Fall Semester  
Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.  
PREREQUISITE: GRADUATE STANDING.

ARC502 Architecture Design and Theory II  
6 credits Spring Semester  
Technology component; materials, structure, and environmental control systems as a framework for architectural design. Construction materials and methods, structural systems, mechanical systems.  
PREREQUISITE: ARC 501.

ARC503 Architectural Design and Theory III  
6 credits Fall Semester  
Legal and economic component; government and finances as active constituents of architecture design. Zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.  
PREREQUISITE: ARC 502.

ARC504 Architecture Design  
6 credits Fall Semester  
Architecture Design: Comprehensive Component. Topics include zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.  
PREREQUISITE: ARC 503 OR GRADUATE STANDING.

ARC507 Architecture Design  
6 credits Fall & Spring Semester & First & Second Summer Session  
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.  
PREREQUISITE: ARC503

ARC509 Architecture Design IX  
6 credits Fall & Spring Semester & First & Second Summer Session  
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.  
PREREQUISITE: ARC 408.

ARC510 Architecture Design X  
6 credits Fall & Spring Semester & First & Second Summer Session  
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.  
PREREQUISITE: ARC 509.
ARC511 Drawing
3 credits Fall Semester
Graphic representation and exploration of visual ideas through increased awareness of visual and graphic vocabulary, stressing projections, light, shade and shadow, perspective, and freehand sketching.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ARC512 Advanced Visual Analysis
3 credits Offered By Announcement Only
Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.
PREREQUISITE: ARC 204, 112.

ARC513 Computing
3 credits Spring Semester
An introduction to new electronic design tools and technology available to architects today. Lectures on the history and future of computing in the profession.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ARC514 Michelangelo
3 credits Fall Semester
Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.
PREREQUISITE: ARC 306, 112, 213 OR PERMISSION OF THE INSTRUCTOR.

ARC515 Computer Modeling
3 credits Fall & Spring Semester
Three-dimensional, computer modeling and rendering. Lecture, problem solving exercises and laboratory.
PREREQUISITE: ARC 213, 513 OR PERMISSION OF THE INSTRUCTOR.

ARC516 Architectural Watercolor Renderings
3 credits Fall Semester
This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).
PREREQUISITE: ARC 306 OR PERMISSION OF THE INSTRUCTOR.

ARC517 Construction Documents
3 credits Fall Semester
Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.
PREREQUISITE: ARC 204 AND 261.

ARC518 Documentation of Historic Architecture
3 credits First & Second Summer Session
Principles of preservation and restoration, research methods, measured drawings, surveying methods, case studies.
PREREQUISITE: ARC 204.
ARC519 Architecture and Color
3 credits                                             First & Second Summer Session
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.
PREREQUISITE: ARC 306 OR PERMISSION OF THE INSTRUCTOR.

ARC523 Interior Architecture Design
3 credits                                                             Fall Semester
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC524 Selected Topics in Interior Architecture Design
3 credits                                                           Spring Semester
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC525 Landscape Arch Design I
3 credits                                                    Fall & Spring Semester
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC526 Landscape Arch Design II
3 credits                                              Offered By Announcement Only
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC527 Architecture Photography
3 credits                                              Offered By Announcement Only
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.
PREREQUISITE: ARC 204.

ARC528 Historic Preservation
3 credits                                                           Spring Semester
Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior’s Standards for rehabilitation.
PREREQUISITE: ARC 204.

ARC529 Research in Design-Methods and Procedures
3 credits                                             Fall & Spring Semester
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.
ARC530 Building Technology II: Materials & Methods.
3 credits  Fall & Spring Semester
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes, assembles, detailing and basic building code concepts.

ARC531 Building Technology II: Structural Systems
3 credits  Spring Semester
Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.
PREREQUISITE: PHYSICS OR PERMISSION OF THE INSTRUCTOR

ARC532 Building Structures I
3 credits  First Summer Session
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.
PREREQUISITE: ARC 531.

ARC533 Building Structures II
3 credits  Fall Semester & Second Summer Session
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
PREREQUISITE: ARC 532.

ARC534 The Palazzo in Italian Architecture
3 credits  Fall & Spring Semester
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.
PREREQUISITE: ARC 382.

ARC535 Historic Italian Urbanism
3 credits  Fall & Spring Semester
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.
PREREQUISITE: ARC 382.

ARC536 Italian Gardens
3 credits  Fall & Spring Semester
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.
PREREQUISITE: ARC 382.

ARC537 Research in Rome
3 credits  Fall & Spring Semester
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.
PREREQUISITE: ARC 382.
ARC541 Seminar on Town Design
3 credits  
Fall Semester  
Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.

ARC542 Seminar on Housing
3 credits  
Offered By Announcement Only  
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.  
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC543 Seminar on Retrofit of Suburbia
3 credits  
Offered By Announcement Only  
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.  
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC544 The Architecture of Palladio
3 credits  
Fall Semester  
On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ARC545 Urban Composition
3 credits  
Offered By Announcement Only  
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.  
PREREQUISITE: ARC 306, 502, OR PERMISSION OF INSTRUCTOR.

ARC546 Studies of Havana
3 credits  
Spring Semester  
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

ARC547 Architecture and Urban Identity
3 credits  
Offered By Announcement Only  
Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.  
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC548 Seminar in Community Development
3 credits  
Offered By Announcement Only  
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.  
PREREQUISITE: ARC 305, 502, OR PERMISSION OF INSTRUCTOR.
ARC550 Professional Lecture Series

3 credits  
Fall & Spring Semester
Exposure to the various professional disciplines in South Florida that make contributions to the design process. Case study analysis and evaluation of current building project, from time of initial formulation through completion, including research, diagrammatic studies, site visits and lectures.

ARC551 Contemporary Theories of Architecture

3 credits  
Offered By Announcement Only
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.
PREREQUISITE: ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC553 Structural Design Theory

3 credits  
Offered By Announcement Only
Relationship of structural systems to architectural design. Case studies in theories of structure, form and construction.
PREREQUISITE: ARC 306 AND CAE 313.

ARC554 Architecture of South Florida

3 credits  
Offered By Announcement Only
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC557 Design and Fabrication Techniques: Carved Panels

3 credits  
First & Second Summer Session
Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.

ARC558 Theories of Landscape Architecture

3 credits  
Fall Semester
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design.
PREREQUISITE: ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC561 Building Technology I: Materials and Methods.

3 credits  
Fall Semester
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.
PREREQUISITE: NONE
COREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC562 Environmental Building Systems I

3 credits  
First Summer Session
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.
PREREQUISITE: ARC 561 OR PERMISSION OF INSTRUCTOR.
ARC563 Environmental Building Systems II

3 credits  
Spring Semester

Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design. 
PREREQUISITE: ARC 562 OR PERMISSION OF INSTRUCTOR.

ARC567 History of Architecture I: Ancient, Medieval and Renaissance

3 credits  
Fall Semester

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Co-requisite: ARC 501.

ARC568 History of Architecture II: Baroque through Contemporary

0-3 credits  
Spring Semester

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Co-requisite: ARC 502.

ARC569 Directed Readings

3 credits  
Fall & Spring Semester & First & Second Summer Session

A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC570 Modern Architecture

3 credits  
Spring Semester

History of architecture, landscape, and city design in the modern era.

ARC571 Ancient Architecture

3 credits  
Fall Semester

History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC572 Selected Topics in World Architecture

3 credits  
Fall Semester

History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC573 Early Christian, Byzantine, and Medieval Architecture

3 credits  
Fall Semester

History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.
ARC574 Renaissance Architecture
3 credits Fall Semester
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC575 Colonial Architecture
3 credits Fall Semester
History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC576 19th and 20th Century Architecture
3 credits Fall Semester
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC577 The Architecture of Alvar Aalto
3 credits Fall Semester
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ARC578 Italian Rationalist Architecture
3 credits Offered By Announcement Only
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
PREREQUISITE: ARC 305 OR PERMISSION OF THE INSTRUCTOR.

ARC581 Special Problems
3 credits Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ARC582 Special Problems
3 credits Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ARC583 Special Problems
3 credits Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.
ARC584 Special Problems
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC585 Special Problems
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC586 Special Problems
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC590 History of Cities
3 credits  Fall & Spring Semester
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC593 Computer Animation
3 credits  Spring Semester
Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.
PREREQUISITE: ARC 415 OR PERMISSION OF INSTRUCTOR.

ARC594 Geographic Information Systems in Urban Design
3 credits  Spring Semester
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.
PREREQUISITE: ARC 213 OR 513 OR PERMISSION OF INSTRUCTOR.

ARC596 Interactive Multimedia in Design
3 credits  Spring Semester
Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.
PREREQUISITE: ARC 213 OR 513 OR PERMISSION OF INSTRUCTOR.

ARC601 Urban Design I: Urban Form and Types/Form-Based Codes
6 credits  Second Summer Session
Introduction to urban principles, documentation, lexicon of urbanism, urban codes, and architectural guidelines (Studio Format - Rome Program).

ARC602 Urban Design II: General Urban to Urban Core.
6 credits  Fall Semester
Studio projects focusing on urban retrofit and the repair of suburbia. Design topics may include typo-morphological studies, sustainable development, downtown redevelopment, neighborhood retrofit, urban agriculture, etc.
PREREQUISITE: ARC 601.
University of Miami Bulletin, 2012-2013
Graduate Course Listing
SCHOOL OF ARCHITECTURE
ARCHITECTURE

ARC603 Urban Design III: Regional/Informal Urbanism.
6 credits Spring Semester
Studio projects focusing on regional design, everyday urbanism, informalities and other urbanisms. Design topics may include open space and rural design, informal communities, affordable and manufactured housing, etc.
PREREQUISITE: ARC 602.

ARC607 Architecture Design
6 credits Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
PREREQUISITE: ARC 503.

ARC608 Architecture Design
6 credits Fall & Spring Semester & First & Second Summer Session
Specialization component: student and faculty select areas of in-depth study in housing. Low-income housing, elderly housing, suburban housing, housing types, etc.
PREREQUISITE: ARC 607.

ARC609 Architecture Design
6 credits Fall & Spring Semester & First & Second Summer Session
Comprehensive project. Programming, design development, formulation of alternative solutions, detailing, presentation.
PREREQUISITE: ARC 608.

ARC610 Architecture Design Degree Project
6 credits Fall & Spring Semester & First & Second Summer Session
Special component: student/faculty selected area of special study.
PREREQUISITE: ARC 609.

ARC611 Architecture Design and Research
6 credits Fall Semester
Documentation, investigation and research of the stylistic and constructive characteristics of Roman buildings and monuments. Focus on factual documentation.

ARC612 Architecture Design and Research
6 credits Spring Semester
Research and investigation of urbanism and the construction of the city through compositional exercises.

ARC615 Visualization Techniques
1 credit Second Summer Session
Survey of digital and analogue representation techniques for urban designers.

ARC621 History-Theory II: Housing, Transportation and Infrastructure.
3 credits Fall Semester
Part I: Survey of housing theories and projects with emphasis on morphological context, typology and composition - focus on topics of modernity. Part II: Introduction to thoroughfare design and walkability principles; description of urban, suburban, rural and regional infrastructure.
3 credits  
**Spring Semester**  
Advanced survey of urban design theories in print and practice - emphasis on issues of modernity. (Seminar Format)

ARC623 Public Participation Methods - Charrette with MRED+U Program.  
3 credits  
**Spring Semester**  
Introduction to planning and public participation methods. Design workshop in collaboration with students in the master in Real Estate and Urbanism program. (Some travel may be required)

ARC624 Architecture Theory  
3 credits  
**Spring Semester**  
Review and criticism of current theoretical work in architecture. Design theory, language, typology, image, form, context. 
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF THE INSTRUCTOR.

ARC625 Roman Architecture and Urbanism I  
3 credits  
**Fall Semester**  
Historical overview of architecture and town planning in ancient Rome, from the Etruscan period through the Imperial period.

ARC652 Management of Professional Practice  
3 credits  
**Fall Semester**  
Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships, disputes and risk management. 
PREREQUISITE: ARC 502. LIMITED TO ARCHITECTURE STUDENTS.

ARC696 Advanced Topics  
3 credits  
**Spring Semester**  
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics will be shown in the printed class schedule, following the title "Advanced Topics". 
PREREQUISITE: PERMISSION OF THE PROGRAM DIRECTOR.

ARC699 Directed Research  
1-6 credits  
**Fall & Spring Semester & First & Second Summer Session**  
Individually supervised projects. Required 6 credit course for all Master of Architecture in Computing students who exercise final project rather than thesis option. 
PREREQUISITE: ARC 529 OR EQUIVALENT, APPROVED THESIS OR FINAL PROJECT PROPOSAL AND PERMISSION OF INSTRUCTOR.

ARC701 Masters Final Project  
6 credits  
**Fall & Spring Semester & First & Second Summer Session**  
Individually supervised projects. Required as a 6 credit course for all Master of Architecture in Computing students electing a final project. 
PREREQUISITE: AN APPROVED FINAL PROJECT PROPOSAL AND PERMISSION OF SUPERVISING FACULTY.
ARC710 Master's Thesis
1-6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
PREREQUISITE: PERMISSION OF THE PROGRAM DIRECTOR.

ARC720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis or final project for the master's degree after the student has enrolled for the permissible cumulative total in ARC 699 or ARC 710 (usually six credits). Credit not granted. May be regarded as full-time residence.
PREREQUISITE: PERMISSION OF THE PROGRAM DIRECTOR.

REAL ESTATE DEVELOPMENT

RED601 Introduction to Real Estate Development and Urbanism.
3 credits Fall Semester
Fundamentals of real estate development of urban places, including the many challenges of the development process such as analyzing market sectors and development opportunities, comprehending the development context of regulation, public policy and politics, raising investment capital, assembling land, program formulation, building types, construction management, marketing, and sales.

RED610 Financing Urban Real Estate Development
3 credits Fall Semester
Concepts and techniques for analyzing financial decisions in property development and investment including: real estate economics and investment performance measurement, leasing and property income streams, pro forma analysis, basics of equity and debt valuation, income tax and leverage considerations, mortgages, and deal structures. Emphasis financing individual projects.

RED620 Real Estate Law
3 credits Fall Semester
Fundamentals of law and the entitlement process, including contractual aspects of real estate development, finance, management and ethical issues and a real-world overview of the review and approvals process.

RED630 Market Analysis for Urban Markets
3 credits Fall Semester
Identification of critical market factors that determine development opportunities. Topics include business and construction cycles, regional and urban growth trends, commercial and industrial location theories, and advanced demographic analysis and projection techniques to project and analyze occupancy, rental growth, absorption, and competitive supply.

RED640 National Charrette Institute (NCI)
1 credit Spring Semester
RED650 Complex Urban Real Estate Transactions
3 credits
Spring Semester
Real estate finance, law, and deal structuring from the perspective of developers.
Using the case study method, the course explores the legal components and the skills
needed for drafting the documentation involved in sophisticated real property transactions,
as well as complex original financings. prerequisite: Successful completion of
Real Estate Finance and Real Estate Law.
PREREQUISITE: REAL ESTATE FINANCE AND REAL ESTATE LAW

RED660 Urban infill, Preservation & Mixed Use Development.
3 credits
Spring Semester
Builds students' competencies for infill and redevelopment practice focusing on:
mixed-use development, transit oriented development, barriers and solutions for
urban infill development, urban site analysis, repositioning of urban land, vacant
and underutilized properties, long-term land leases, tax incentives, historic preservation,
public-private partnerships, business improvement districts, tax increment financing,
community (re)development districts, parking strategies, and urban housing types.

RED670 construction and Project Management
3 credits
Spring Semester
Management of construction projects including legal considerations and techniques
of management science applied to construction. Includes engineering methods of
cost and time estimating, and exercises in applications of engineering economics,
flow charts, tracking progress, construction contracts, indemnity agreements, and
network planning techniques including CPM and PERT.

RED680 Entrepreneurship: Building A Real Estate Development Company
3 credits
Spring Semester
Focuses on management and business practices for building new urban real estate
firms capable of leading the industry and assuming competitive advantages over
conventional models.

RED690 Integrated Real Estate Development Case Studies Practicum
3 credits
First & Second Summer Session
Students integrate and apply their learning and skills to complex problem-solving
involving a series of intensive real world cases of urban real estate development.
Focuses on project feasibility and helps hone the required set of development skills.

RED699 Capstone: Real Estate Development and Urbanism Charrette
3 credits
First & Second Summer Session
An intensive real estate development and urban design studio in which students
are part of a multi-disciplinary team on an urban development project. Focuses
on comprehensive analysis, project planning, feasibility and program development
through the application of advanced development skills in an urban context.
AMS501 SENIOR PROJECT
3 credits  
Spring Semester
All majors must complete either an individual research project or an internship at a local cultural or civic institution. Either option must be approved by the program director.
PREREQUISITE: SENIOR STANDING

AMS505 HONORS THESIS
3 credits  
Spring Semester
American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS505: honors thesis. Candidates for departmental honors are responsible for finding a faculty member to serve as the thesis advisor. Students would take AMS 501 in the fall semester or the senior year and AMS 505 in the spring to complete the honors thesis.
PREREQUISITE: SENIOR STANDING, MINIMUM GPA 3.5. PERMISSION OF PROGRAM DIRECTOR

ANTHROPOLOGY

APY501 Methods of Anthropological Research
3-6 credits  
Spring Semester
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE.

APY502 Field Studies in Anthropology
3-6 credits  
Fall & Spring Semester & First Summer Session
Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE AND WRITTEN PERMISSION FROM INSTRUCTOR.

APY505 Museum Internship
3 credits  
Fall & Spring Semester
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY506 Workshop in Anthropology
3-6 credits  
Fall & Spring Semester
This course is designed for upper level and graduate students to participate in special topics in Anthropology and related fields.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY512 Advanced Medical Anthropology
3 credits  
Fall & Spring Semester
Applications of theories and methods of medical anthropology to problems in human health and disease.
PREREQUISITE: APY 413, OR THREE CREDITS IN NURSING, OR THREE CREDITS IN EPIDEMIOLOGY AND PUBLIC HEALTH, OR PERMISSION OF THE INSTRUCTOR.
ANTHROPOLOGY

APY518 Advanced Seminar in Anthropology
3 credits Fall & Spring Semester
Specialized topics in Anthropology to involve students into current research specializations.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE OR PERMISSION OF INSTRUCTOR.

ART

ART501 Advanced Painting III
1-6 credits Fall & Spring Semester
Course content decided between student and professor.
PREREQUISITE: ART 402.

ART502 Advanced Painting IV
1-6 credits Fall & Spring Semester
Continuation of ART 501.
PREREQUISITE: ART 501

ART503 Advanced Painting V
1-6 credits Fall & Spring Semester
Course content decided between student and professor. An independent study course may be repeated.
PREREQUISITE: ART 502

ART504 Advanced Painting VI
1-6 credits Offered By Announcement Only
Course content decided between student and professor. An Independent Study course may be repeated.
PREREQUISITE: ART 503

ART505 Advanced Painting VII
1-6 credits Offered By Announcement Only
Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.
PREREQUISITE: ART 504

ART509 Independent Study in Other Media
1-6 credits Fall & Spring Semester
Course content decided between student and professor. Independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART510 Advanced Photography III
3 credits Fall & Spring Semester
Course content decided between student and professor.
PREREQUISITE: ART 411.

ART511 Advanced Photography IV
3 credits Fall & Spring Semester
Continuation of ART 510.
PREREQUISITE: ART 510.

ART512 Independent Study in Photography
1-6 credits Fall & Spring Semester
Course content decided between student and professor. An independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
ART517 Advanced Sculpture III
3 credits Fall & Spring Semester
Examination of ongoing work in relationship to historical and contemporary interpretations
issues.
PREREQUISITE: ART 418 AND PERMISSION OF INSTRUCTOR

ART518 Advanced Sculpture IV
3 credits Fall & Spring Semester
Continuation of ART 517.
PREREQUISITE: ART 517.

ART519 Independent Study in Sculpture
1-6 credits Fall & Spring Semester
Course content decided between student and professor. An Independent Study course
may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART551 Intaglio/Relief IV
3 credits Offered By Announcement Only
Advanced work in intaglio/relief processes: course requirements decided between
student and professor.
PREREQUISITE: ART 451.

ART552 Lithography IV
3 credits Offered By Announcement Only
Advanced work in lithography: course requirements decided between student and professor.
PREREQUISITE: ART 452.

ART553 Silkscreen IV
3 credits Offered By Announcement Only
Advanced work in silkscreen.
PREREQUISITE: ART 453.

ART554 Computer Assisted Printmaking
3 credits Offered By Announcement Only
Advanced work in computer assisted printmaking; course requirements decided between
student and professor.
PREREQUISITE: ART 454 OR PERMISSION OF INSTRUCTOR.

ART555 Topics in Printmaking
1-6 credits Offered By Announcement Only
Current readings and/or technical concerns not covered in the regular curriculum.
Course content will vary each semester.
PREREQUISITE: ANY 400 LEVEL PRINTMAKING CLASS.

ART562 Contemporary Ceramic Art
3 credits Fall & Spring Semester
Development of artistic style and technical abilities in relation to contemporary
trends in ceramic art.
PREREQUISITE: ART 462 OR ART 463 OR PERMISSION OF INSTRUCTOR
ART563 Independent Study in Ceramics/Glass
1-6 credits    Fall & Spring Semester
Course content decided between student and professor. An Independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART564 Directed Research and Projects in Ceramics/Glass
3 credits                                                    Fall & Spring Semester
Ceramic/glass approaches from early history to contemporary period, and the development of technical ability.
PREREQUISITE: ART 561 OR PERMISSION OF INSTRUCTOR.

ART591 Portfolio/Business of Design
3 credits                                              Offered By Announcement Only
Individually supervised graphic design portfolio. Professional practices in design.
PREREQUISITE: ART 491.

ART592 Special Projects/Multimedia/Portfolio
3 credits                                              Offered By Announcement Only
Video Art, print design, illustration or multimedia portfolio preparation.
PREREQUISITE: ART 292

ART593 Seminar in Professional Practices
1-6 credits    Fall & Spring Semester
Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.
PREREQUISITE: SENIOR STANDING.

ART599 Exhibition Preparation
3 credits                                                    Fall & Spring Semester
A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART601 Advanced Painting VIII
1-6 credits    Fall & Spring Semester
Professional and concentrated experiences in media and subject matter decided in conference between candidate and instructor.
PREREQUISITE: ART 504

ART602 Advanced Painting ix
1-6 credits    Fall & Spring Semester
Continuation of ART 601.
PREREQUISITE: ART 601

ART603 Problems in Studio Art
1-6 credits    Fall & Spring Semester
Course content will be decided in conference between candidate and instructor. This course may be repeated for credit.
PREREQUISITE: PERMISSION OF CHAIRMAN.
ART604 Seminar in Studio Art
3 credits
Spring Semester
Special topics in selected area of studio art.
PREREQUISITE: PERMISSION OF CHAIRMAN.

ART610 Photography
3 credits
Fall & Spring Semester
Content decided in conference between candidate and instructor.
PREREQUISITE: COMPLETION OF 500 LEVEL PHOTOGRAPHY COURSES.

ART611 Photography
3 credits
Fall & Spring Semester
Continuation of ART 610.
PREREQUISITE: ART 610.

ART617 Sculpture
3 credits
Fall & Spring Semester
Content decided in conference between candidate and instructor.
PREREQUISITE: COMPLETION OF 500 LEVEL SCULPTURE COURSES

ART618 Sculpture
3 credits
Fall & Spring Semester
Continuation of ART 617.
PREREQUISITE: ART 618.

ART651 Intaglio/Relief V
3 credits
Offered By Announcement Only
Advanced intaglio/relief processes: course requirements decided between candidate and professor.
PREREQUISITE: COMPLETION OF 500 LEVEL INTAGLIO/RELIEF COURSE.

ART652 Lithography V
3 credits
Offered By Announcement Only
Advanced lithography. Course requirements decided between candidate and professor.
PREREQUISITE: COMPLETION OF 500 LEVEL LITHOGRAPHY COURSE

ART653 Silkscreen V
3 credits
Offered By Announcement Only
Advanced work in silkscreen.
PREREQUISITE: ART 553.

ART654 Computer Assisted Printmaking
3 credits
Offered By Announcement Only
Advanced work in computer assisted printmaking; course requirements decided between candidate and professor.
PREREQUISITE: ART 554 OR PERMISSION OF INSTRUCTOR.

ART661 Ceramics
3 credits
Fall & Spring Semester
Content to be decided in conference between candidate and instructor.
PREREQUISITE: COMPLETION OF 500 LEVEL CERAMICS COURSES.
ART

ART662 Ceramics
3 credits  Fall & Spring Semester
Continuation of ART 661.
PREREQUISITE: ART 661 OR PERMISSION OF INSTRUCTOR.

ART681 Writing About Art
3 credits  Fall Semester
Writing about art on a professional level.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART691 Graphic Design
3 credits  Fall & Spring Semester
Advanced graduate projects in graphic design.
PREREQUISITE: GRADUATE STANDING.

ART692 Multimedia
3 credits  Fall & Spring Semester
Advanced graduate projects in multimedia.
PREREQUISITE: GRADUATE STANDING.

ART710 Master's Thesis
1-6 credits  Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

ART720 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ART 710 (usually six credits). Credit not granted. May be regarded as full time residence.

ARABIC

ARB591 Directed Readings
1-3 credits  Offered By Announcement Only
PREREQUISITE: ONE ARB COURSE AT 200-LEVEL OR HIGHER AND PERMISSION OF THE INSTRUCTOR.

ART HISTORY

ARH505 Problems in Art History
3 credits  Fall & Spring Semester
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.
PREREQUISITE: ANY 300-LEVEL OR 400-LEVEL COURSE IN ART HISTORY AND PERMISSION OF INSTRUCTOR.

ARH506 Problems in Art History
3 credits  Fall & Spring Semester
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.
PREREQUISITE: ANY 300-LEVEL OR 400-LEVEL COURSE IN ART HISTORY AND PERMISSION OF INSTRUCTOR.
ARH507 Museum Studies Seminar
3 credits
Offered By Announcement Only
Administrative functions of local art museums; researching selected art works in their permanent collections.
PREREQUISITE: 6 CREDITS IN HISTORY

ARH508 Museum Exhibition
3 credits
Offered By Announcement Only
Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.
PREREQUISITE: 6 CREDITS OF ART HISTORY

ARH509 Museum Internship
1-3 credits
Fall & Spring Semester
UM sponsored internship with Miami-area museum.
PREREQUISITE: BY PERMISSION OF HEAD OF ART HISTORY.

ARH510 Arts Administration Internship
1-3 credits
Fall & Spring Semester
UM sponsored internship with Miami-area arts institution.
PREREQUISITE: BY PERMISSION OF HEAD OF ART HISTORY.

ARH511 ARTLAB @ THE LOWE
3 credits
Spring Semester
Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.
PREREQUISITE: 9 CREDITS IN ART HISTORY, GRADUATE STANDING, OR BY PERMISSION OF INSTRUCTOR

ARH530 Seminar in Art History
3 credits
Offered By Announcement Only
Special topics in western and nonwestern art. Semester's topic will be announced.
PREREQUISITE: PERMISSION OF INSTRUCTOR

ARH540 Seminar in The History of Museums and Collecting
3 credits
Offered By Announcement Only
History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.
PREREQUISITE: 9 CREDITS IN ART HISTORY, GRADUATE STANDING, OR BY PERMISSION OF INSTRUCTOR

ARH550 Seminar in Theory and Methodology in the History of Art
3 credits
Offered By Announcement Only
Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.
PREREQUISITE: 9 CREDITS IN ART HISTORY, GRADUATE STANDING OR BY PERMISSION OF INSTRUCTOR

ARH560 Seminar in Nineteenth and Twentieth Century Art
3 credits
Offered By Announcement Only
Special topics including museum practices and theory, women’s art and contemporary issues.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
ARH570 Seminar in Non-European Art
3 credits
Offered By Announcement Only
Special Topics in African, Oriental, Oceanic, Native North or South American art traditions.
PREREQUISITE: ARH 133, 134, OR PERMISSION OF INSTRUCTOR.

ARH598 Seminar in Contemporary American Art
3 credits
Fall Semester
Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
PREREQUISITE: ARH 344. UNDERGRADUATES MUST HAVE PERMISSION OF INSTRUCTOR.

ARH605 Problems in Art History
3 credits
Fall & Spring Semester
Course content will be decided in joint conference between student and instructor.

ARH606 Problems in Art History
3 credits
Fall & Spring Semester
Course content will be decided in joint conference between student and instructor.

ARH681 Directed Reading and Research
1- 3 credits
Offered By Announcement Only
Individual supervised research project on a specific artist, work of art, or period.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARH682 Directed Reading and Research
1- 3 credits
Offered By Announcement Only
Individual supervised research project on a specific artist, work of art, or period.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARH710 Master's Thesis
1- 6 credits
Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

BIOLOGY

BIL511 Biometry
3 credits
Offered By Announcement Only
Descriptive and analytical statistics as used in biology. Emphasizes sampling, presentation of quantitative data, probability theory applications, distributions, parametric and non-parametric test procedures.
PREREQUISITE: ONE SEMESTER OF STATISTICS AND ONE YEAR OF CALCULUS.

BIL520 Evolution
3 credits
Offered By Announcement Only
Evolutionary mechanisms and pathways: sources of hereditary variation, evolutionary forces, origins of adaptations, speciation, macroevolution, origin of life and humankind.
PREREQUISITE: BIL 250.
BIL521 Systematics
3 credits  
Offered By Announcement Only
Concepts and methods in phylogenetic systematics. Lectures, discussions, and computer labs, 3 hours.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL523 Advanced Biology of Marine Invertebrates
4 credits  
Offered By Announcement Only
Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.
PREREQUISITE: BIL 235 AND 321.

BIL525 Advanced Herpetology
3 credits  
Offered By Announcement Only
Systematics, biogeography, and evolutionary biology of amphibians and reptiles, with emphasis on modern families. Lecture, 2 hours; laboratory, 3 hours.
PREREQUISITE: BIL 250: BIL 360 STRONGLY RECOMMENDED

BIL526 Studies in the Biology of Mycorrhizae
2 credits  
Offered By Announcement Only
Readings, discussions and laboratory exercises concerning the biology of mutualistic root-inhabiting fungi and their plant hosts. Topics will vary by semester, may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL527 Biology of Fungi
5 credits  
Spring Semester
Physiology and ecology of the major groups of fungi, especially those of importance as pathogens or mutualists. Combined lecture and laboratory.
PREREQUISITE: BIL 250: BIL 360 STRONGLY RECOMMENDED

BIL531 Advanced Field Ecology
5 credits  
Offered By Announcement Only
Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory and field, 10 hours alternate Saturdays plus projects.
PREREQUISITE: ONE SEMESTER OF ECOLOGY AND BIL 511 OR ANOTHER STATISTICS COURSE.

BIL532 Stable Isotope Ecology
3 credits  
Offered By Announcement Only
Stable isotope analysis applied to ecological questions such as nutrient cycling, photosynthesis and trophic level studies.
PREREQUISITE: BIL 235 OR PERMISSION OF INSTRUCTOR

BIL535 Molecular Ecology
3 credits  
Offered By Announcement Only
Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA barcodes, and gene expression from a population biological perspective.
PREREQUISITE: BIL 250
BIL536 Molecular Ecology Laboratory
1 credit Offered By Announcement Only
Laboratory techniques, molecular tools, applications, and analysis methods commonly used by researchers in the areas of molecular ecology and population genetics.
PREREQUISITE: BIL 535

BIL537 Ecosystem Ecology
3 credits Offered By Announcement Only
Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.
PREREQUISITE: BIL 235 OR PERMISSION OF INSTRUCTOR.

BIL539 Wildlife Resource Philosophy and Policy
3 credits Offered By Announcement Only
Attitudes, philosophy, and policies that govern management of wildlife resources worldwide. Methods to influence public support for implementation of sound wildlife resource management.
PREREQUISITE: BIL 332.

BIL540 Ethology and Behavioral Ecology
3 credits Offered By Announcement Only
Evolutionary and comparative approach to concepts in animal behavior emphasizing function and mechanism. Topics include genetics of behavior, orientation, foraging, communication, and social behavior.
PREREQUISITE: BIL 235 AND EITHER BIL 241 OR 341 OR PERMISSION OF INSTRUCTOR.

BIL548 Bioinformatics Algorithms
3 credits Offered By Announcement Only
PREREQUISITE: (CSC120 OR CSC210) AND (BIL150 OR BIL104 OR BIL352 OR BIL552)

BIL552 Bioinformatics Tools
3 credits Offered By Announcement Only
Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure- function analysis and various applications.
PREREQUISITE: BIL 250 OR BIL 150 AND PERMISSION OF INSTRUCTOR.

BIL553 Concepts in Cell Biology
3 credits Fall Semester
A comprehensive and updated view of biology based on the Cell Theory through infusion of new genetics, pan-genomics, proteomics, photonics, bioinformatics and molecular engineering.
PREREQUISITE: BIL 255 OR GRADUATE STANDING

BIL554 Electron Microscopy
4 credits Fall Semester
Techniques in transmission electron microscopy including tissue preparation, use of the electron microscope, photography, and interpretation of micrographys. Lecture, 1 hour; laboratory, 6 hours.
PREREQUISITE: BIL 255 OR 361 AND PERMISSION OF INSTRUCTOR.
BIL555 Projects in Electron Microscopy
2 credits  Spring Semester
Individual research projects in transmission electron microscopy, 6 hours.
PREREQUISITE: BIL 554. PERMISSION OF INSTRUCTOR.

BIL556 Ecological and Evolutionary Genomics
3 credits  Offered By Announcement Only
PREREQUISITE: BIL 250, BIL 255 OR PERMISSION FROM INSTRUCTOR

BIL557 Evolution and Development
3 credits  Offered By Announcement Only
PREREQUISITE: BIL 250 AND BIL 255

BIL564 Advanced Developmental Biology
3 credits  Offered By Announcement Only
Comprehensive survey of the principles of development and methods of experimental
analysis. Lecture, discussion and demonstration, 3 hours.
PREREQUISITE: BIL 364.

BIL565 Evolution and Development
3 credits  Offered By Announcement Only
The hypothesis and data relating to the biological basis of aging in invertebrates
and vertebrates including humans. Prerequisite: Senior or graduate status in a
biological science.
PREREQUISITE: BIL 250

BIL568 Evolution and Development of Nervous Systems
3 credits  Offered By Announcement Only
Mechanisms/pathways/modules underlying formation of the nervous system during development.
How some properties of nervous systems have resisted change while others have diverged
dramatically during evolution.
PREREQUISITE: BIL 268 OR BIL 355 OR PERMISSION OF INSTRUCTOR

BIL569 Biology of Aging
3 credits  Offered By Announcement Only
The hypotheses and data relating to the biological basis of aging in invertebrates
and vertebrates, including humans.
PREREQUISITE: SENIOR OR GRADUATE STATUS IN A BIOLOGICAL SCIENCE

BIL571 Advanced Special Studies in Biology
1-6 credits  Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated
via subtitle in the class schedule.

BIL572 Advanced Special Studies in Biology
1-6 credits  Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated
via subtitle in the class schedule.

BIL573 Advanced Special Studies in Biology
1-6 credits  Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated
via subtitle in the class schedule.
BIL574 Advanced Special Studies in Biology
1-6 credits  Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL575 Advanced Special Studies in Biology
1-6 credits  Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

BIL582 Borderless Science
3 credits  Offered By Announcement Only
Students from various scientific disciplines will be introduced to new technologies and resources from wide-ranging fields of science and learn to apply them in their own fields. Students will engage in mutual exchange of discipline-specific practices and novel ideas for research in biology, neuroscience, psychology, chemistry, physics, mathematics, engineering, etc.
PREREQUISITE: PERMISSION FROM INSTRUCTOR

BIL585 Advanced special topics in biology
3 credits  Offered By Announcement Only
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: SENIOR OR GRADUATE STUDENT STATUS

BIL586 Advanced Special Topics in Biology
4 credits  Offered By Announcement Only
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: SENIOR OR GRADUATE STUDENT STATUS

BIL610 Lab Group Meeting
1 credit  Fall Semester
Weekly seminar meeting for discussion of research projects and other academic issues in the research laboratories of graduate faculty in biology.
PREREQUISITE: PERMISSION FROM INSTRUCTOR

BIL611 Lab Group Meeting
2 credits  Spring Semester
PREREQUISITE: PERMISSION OF INSTRUCTOR

BIL612 Graduate Core Module
1 credit  Fall Semester
PREREQUISITE: PERMISSION FROM INSTRUCTOR

BIL613 Graduate Core Module
1 credit  Fall Semester
A two-term sequence of modules that addresses core principles across Biology in a format that is based on and fosters trans-disciplinary thought. Each module is one credit, taught dually by two faculty for 15 hours per module over a period of three weeks, and graded independently of other modules. Five modules are taught sequentially each term, for a total of ten credits for the year. Different modules may take place in different years. Offered in Fall semesters.
PREREQUISITE: PERMISSION OF INSTRUCTOR
BIL614 Professional Writing and Grantsmanship
3 credits
Offered By Announcement Only
Elements of argumentative writing, reader-oriented writing strategies, fundability of submitted grants, and techniques for mastering presentation venues such as posters and talks.
PREREQUISITE: PERMISSION OF INSTRUCTOR

BIL622 Topics in Arthropod Biology
2 credits
Offered By Announcement Only
Areas of current interest will be covered in weekly two-hour seminar-discussions.
PREREQUISITE: BIL 323 OR PERMISSION OF INSTRUCTOR.

BIL623 Birds of the World
4 credits
Offered By Announcement Only
Classification, evolution, distribution, and natural history of the major taxa of birds.
PREREQUISITE: A COURSE IN ORNITHOLOGY OR BACKGROUND IN VERTEBRATE BIOLOGY.

BIL629 Advanced Tropical Botany
8 credits
Offered By Announcement Only
A 7-8 week course on the anatomy, morphology, taxonomy, physiology, evolution and adaptation of tropical plants. Offered on main campus, utilizing the Fairchild Tropical Garden and the United States Plant Introduction Station collections or in Costa Rica under the Organization of Tropical Studies.
PREREQUISITE: APPROVAL OF INSTRUCTORS.

BIL630 Population and Community Ecology: Theory
3 credits
Offered By Announcement Only
Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.
PREREQUISITE: CONSENT OF INSTRUCTOR.

BIL631 Population and Community Ecology: Empirical Studies
3 credits
Offered By Announcement Only
Experimental and multivariate approach to the study of the community including the analysis of data sets and the design of field studies.
PREREQUISITE: BIL 630 OR PERMISSION OF INSTRUCTOR.

BIL632 Population and Community Ecology: Theory II
3 credits
Offered By Announcement Only
Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL636 Tropical Biology: An Ecological Approach
8 credits
Offered By Announcement Only
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies. Lecture, laboratory, and fieldwork.
BIL637 Ecología de Poblaciones
7 credits Offered By Announcement Only
PREREQUISITE: ONE SEMESTER OF ECOLOGY OR FIELD BIOLOGY.

BIL638 Tropical Managed Ecosystems
8 credits Offered By Announcement Only
Application of ecological principles to problems in agriculture, forestry, conservation and natural resource management in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies.
PREREQUISITE: ONE SEMESTER OF ECOLOGY OR FIELD BIOLOGY.

BIL641 Hormones and Behavior
2 credits Offered By Announcement Only
Mediation of specific behaviors by hormones and other chemical messengers.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

BIL649 Seminar in Behavior
1 credit Fall & Spring Semester

BIL651 Genomes
3 credits Offered By Announcement Only
Genome organization and evolution in various cell types. Structure, organization, and evolution, including sex chromosomes.
PREREQUISITE: ONE UNDERGRADUATE GENERAL GENETICS COURSE FOR SCIENCE MAJORS.

BIL652 Seminar in Population Genetics
1- 2 credits Offered By Announcement Only
Discussion of current literature in Population Genetics. This course may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL653 Seminar in Cell Biology
1 credit Offered By Announcement Only

BIL655 Techniques in Scanning Electron Microscopy
3 credits Offered By Announcement Only
Tissue preparation, use of the scanning electron microscope, photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL664 Seminar in Developmental Biology
1 credit Offered By Announcement Only

BIL671 Advanced Study in Plant or Animal Sciences
1- 6 credits Fall & Spring Semester & First & Second Summer Session
Content of course will vary by semester. Content in any semester will be expressed in parenthesis following title "Advanced Study" in the printed class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
BIL672 Advanced Study in Plant or Animal Sciences
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Content of course will vary by semester. Content in any semester will be expressed in parenthesis following title "Advanced Study" in the printed class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL673 Advanced Study in Plant or Animal Sciences
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Content of course will vary by semester. Content in any semester will be expressed in parenthesis following title "Advanced Study" in the printed class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL674 Advanced Study in Plant or Animal Sciences
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Content of course will vary by semester. Content in any semester will be expressed in parenthesis following title "Advanced Study" in the printed class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL675 Advanced Study in Plant or Animal Sciences
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Content of course will vary by semester. Content in any semester will be expressed in parenthesis following title "Advanced Study" in the printed class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL676 Current Topics in Biological Research
1-2 credits  Fall & Spring Semester & First & Second Summer Session
Content will vary by semester. Readings and discussions with eminent scholars temporarily resident in the department's Distinguished Visiting Professor program.

BIL678 Current Topics in Biological Research
1 credit  Fall & Spring Semester & First & Second Summer Session
Content will vary by semester. Readings and discussions with eminent scholars temporarily resident in the department's Distinguished Visiting Professor program.

BIL680 Research Ethics
0 credit  Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

BIL681 Ecologia da Floresta Amazonica
4 credits  Offered By Announcement Only
One-month field course focusing on the ecological characteristics of the tropical forests of Brazil. An Organization for Tropical Studies course conducted near Manaus, Brazil, and offered to students fluent in Portuguese. Offered annually.
PREREQUISITE: GRADUATE STANDING; FLUENCY IN PORTUGUESE.

BIL682 Ecosistemas Amazonicas
4 credits  Offered By Announcement Only
Intensive one-month field course focusing on the unique ecological characteristics of the flooded and upland forests of the Amazon region of Peru. Conducted in Peru for Spanish-speaking students by the Organization for Tropical Studies.
PREREQUISITE: GRADUATE STANDING; FLUENCY IN SPANISH.
BIL684 Ecologia de Ecosistemas Costeros Tropicales
6 credits  Offered By Announcement Only
Six week Field course introducing the ecology and management of tropical coastal ecosystems of the Gulf of Mexico. Course offered in Spanish in Mexico by the Organization for Tropical Studies.
PREREQUISITE: GRADUATE STANDING; FLUENCY IN SPANISH.

BIL691 Biology Seminar
0 credit  Fall & Spring Semester
Research seminars by distinguished biologists.

BIL710 Master’s Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

BIL720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in BIL 710 (usually six credits). Credit not granted. May be regarded as full time residence.

BIL730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of BIL 730 may be taken in a regular semester, nor more than six in a summer session.

BIL740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of BIL 740 may be taken in a regular semester, nor more than six in a summer session.
PREREQUISITE: PH.D CANDIDATE STATUS

BIL750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

CHEMISTRY
CHM510 Enzyme Kinetics and Mechanism
3 credits  Fall & Spring Semester
Detailed coverage of chemistry of enzyme-catalyzed reactions.
PREREQUISITE: CHM 201 AND CHM 202
CHM515 Makings of a Scientist
3 credits  Offered By Announcement Only
By analyzing achievements and advice of few successful scientists, chemists in particular will highlight what qualities are needed to be a successful scientist. Importance of motivation, perseverance, communication skills, adhering to ethical guidelines and ability to deal with colleagues and co-workers will be brought out. Career options available for a trained chemist and how different each one is will be pointed out. Overall this is a course in multi-mentoring of graduate students who are aiming for a career in science and hope to be successful researchers in science, particularly in chemistry.
PREREQUISITE: REGISTERED GRADUATE STUDENTS OR UNDERGRADUATES IN THEIR SENIOR YEAR

CHM520 Physical Organic Chemistry
3 credits  Fall Semester
Aspects of chemical bonding, acids and bases, stereochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bimolecular reactions.
PREREQUISITE: CHM 202 AND 360.

CHM521 Polimer Chemistry
3 credits  Offered By Announcement Only
Fundamental concepts in polymer chemistry. Course will cover the terminology and chemistry of polymers and polymerizations. Students will be required to synthesize several different types of polymers. This will reinforce concepts learned during lecture and give students hands-on experience.
PREREQUISITE: CHM 201 AND CHM 202

CHM522 Synthetic Organic Chemistry
3 credits  Fall Semester
Functional group transformations, Synthon approach. Retrosynthetic analyses, multistep syntheses.

CHM523 Contemporary Total Synthesis
3 credits  Spring Semester
New methods strategies and perspectives for the total synthesis based on the modern literature.
PREREQUISITE: CHM 201, CHM 202, AND CHM 522

CHM524 Supramolecular Chemistry
3 credits  Offered By Announcement Only
Complexation, recognition, and catalysis as applied to bioorganic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.
PREREQUISITE: CHM 365 AND 520.

CHM525 Structural Organic Chemistry
3 credits  Spring Semester
CHM530 Fluorescence Spectroscopy and Microscopy
3 credits  Fall & Spring Semester
The photo physical properties of organic compounds that illustrates the fundamental
principles of fluorescence. It also explains how fluorescence spectra and images
can be recorded and how these powerful analytical techniques can be used to address
significant problems in biology and medicine.
PREREQUISITE: CHM 304 AND CHM 360

CHM535 Molecular and Supramolecular Photochemistry
3 credits  Offered By Announcement Only
Generation of a model that will help rationalize/predict excited state reactions.
A brief background on physical aspects of photochemistry will be given. Exploring
and understanding of reactions that are triggered by light. Importance of light
in life will be highlighted.
PREREQUISITE: CHM 201 AND CHM 202

CHM541 Principles of Bonding and Reactivity in Inorganic Chemistry
3 credits  Fall Semester
Bonding principles necessary to understand the structure, stability, and fundamental
reactivity of main group and transition metal inorganic compounds.
PREREQUISITE: CHM 365

CHM553 Modern Quantum Chemistry
3 credits  Offered By Announcement Only
Many-electron wave functions and operators. Hartee-Fock approximation, density
functional theory, configuration interaction, and many-body perturbation theory.
PREREQUISITE: CHM 365

CHM555 Modern Statistical Mechanics
3 credits  Offered By Announcement Only
The statistical foundation of thermodynamics; ensemble averages and fluctuations;
partition functions for ideal and non-ideal systems; Monte Carlo methods, classical
fluids, and nonequilibrium statistical mechanics.
PREREQUISITE: ONE SEMESTER OF PHYSICS, MTH 112 OR 132, CHM 360, OR PERMISSION OF
INSTRUCTOR; COREQUISITE(S): CHM 365

CHM556 Self-Assembly and Surface Chemistry
3 credits  Offered By Announcement Only
Methods of preparation of self-assembly monolayers and surface chemistry properties.
PREREQUISITE: CHM 365.

CHM563 Electronic Structure Methods
3 credits  Fall Semester
Basis sets, post-SCF methods, and potential energy surfaces. Thermodynamic, structural,
and vibrational predictions, excited states, solvation and hybrid Hamiltonians.
PREREQUISITE: CHM 365

CHM564 Molecular Simulations
1 credit  Offered By Announcement Only
Classical dynamics, force-fields, sampling, periodic and stochastic boundaries,
Monte-Carlo and molecular dynamics simulations, and free energy perturbation.
PREREQUISITE: PERMISSION OF DEPARTMENT.
CHM565 Principles of Spectroscopic Techniques
3 credits Offered By Announcement Only
Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.
PREREQUISITE: CHM 365.

CHM570 Advanced Physical Chemistry Topics
3 credits Offered By Announcement Only
PREREQUISITE: CHM 365.

CHM575 Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy
3 credits Offered By Announcement Only
Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time-domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy.
PREREQUISITE: ONE SEMESTER OF PHYSICS, MTH 112 OR 132, CHM 304, OR PERMISSION OF INSTRUCTOR. COREQUISITE(S): CHM 360

CHM579 Special Topics: Chemistry Internship
1-3 credits Offered By Announcement Only

CHM580 Special Topics: Chemistry Internship
1-3 credits Offered By Announcement Only

CHM591 Topics in Chemistry
1-3 credits Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
PREREQUISITE: 20 CREDITS IN CHEMISTRY.

CHM592 Topics in Chemistry
1-3 credits Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry."
PREREQUISITE: 20 CREDITS IN CHEMISTRY.

CHM593 Readings in Chemistry
1-3 credits Offered By Announcement Only
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
PREREQUISITE: 20 CREDITS IN CHEMISTRY AND PERMISSION OF THE DEPARTMENT CHAIRMAN.

CHM594 Readings in Chemistry
1-3 credits Offered By Announcement Only
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
PREREQUISITE: 20 CREDITS IN CHEMISTRY AND PERMISSION OF THE DEPARTMENT CHAIRMAN.

CHM603 Structure and Reactivity of Inorganic Compounds
3 credits Offered By Announcement Only
Current theories of bonding, stereochemistry, and reaction mechanisms as applied to the structures and reactions of inorganic compounds.
CHM604 Coordination Chemistry  
2 credits  
Fall Semester  
Bonding Theory, vibrational and electron spectra of coordination compounds; enumeration, recognition, and spectra of isomers.

CHM626 Advanced Organic Topics  
1- 3 credits  
Offered By Announcement Only  
Special topics in organic chemistry.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM640 Introduction to Crystallography  
1 credit  
Offered By Announcement Only  
Crystals, Crystal Systems, 2-d and 3-d Space Groups and Diffraction (5h)  
Diffraction Principles (3h)  
Structure solution (direct and Patterson methods) and refinement (3h)  
Hands-on experiences: SMART 1000 CCD operation and SHELXTL calculation (4h)  

CHM641 Inorganic Reaction Mechanism  
3 credits  
Offered By Announcement Only  
Substitution reactions  
Electron transfer reactions  
Reaction of coordinated ligands  
Stereochemical Change.

CHM646 Organometallics  
3 credits  
Offered By Announcement Only  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM647 Advanced Inorganic Topics  
1- 3 credits  
Offered By Announcement Only  
Selected topics in inorganic chemistry.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM649 Advanced Inorganic Topics  
2- 3 credits  
Offered By Announcement Only  
Study of selected topics in inorganic chemistry.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM650 Chemical Thermodynamics  
1 credit  
Offered By Announcement Only  
Thermodynamic equations from basic laws and definitions, and their applications to chemical problems.  
PREREQUISITE: PERMISSION OF DEPARTMENT.

CHM651 Optical Spectroscopy  
1 credit  
Offered By Announcement Only  
Techniques in Ultraviolet, Visible, and Infrared Spectrosopies. Fluorescence Measurements.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM652 Chemical Kinetics  
1 credit  
Offered By Announcement Only  
Rate laws and rate constants, integrated rate law mechanisms and reaction rates, transition state theory methods for conventional and fast kinetic determinations.
CHM655 Electrochemistry
3 credits Offered By Announcement Only
Modern electrochemical techniques including voltammetry, chronocoulometry, rotating disk electrode, and ultramicroelectrodes.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM665 Physical Supramolecular Chemistry
3 credits Offered By Announcement Only
Intramolecular host-guest complex formation; characterization of supramolecular assemblies.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM670 Advanced Physical Chemistry Topics
1-3 credits Offered By Announcement Only
Special topics in advanced physical chemistry.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CHM679 Chemistry Seminar
1 credit Fall & Spring Semester
Participation in the departmental seminar program. Required each semester the student is in residence and not enrolled in CHM 680 (excluding summer sessions).

CHM680 Chemistry Seminar
1 credit Fall & Spring Semester
Participation in the chemistry department seminar program, including an oral presentation of special topics.

CHM685 Introduction to Research
2 credits Offered By Announcement Only
Research principles and practices, independent study in selected subject areas, and/or oral presentation of a proposed research topic. Open only to graduate students working toward the M.S. or Ph.D. in chemistry.
PREREQUISITE: PERMISSION OF DEPARTMENT.

CHM688 Problems in Research Planning
2 credits Offered By Announcement Only
Formulation of a research program for investigating an original problem not related to the candidate's major laboratory research. A brief written summary and an oral defense of the plan will be required.
PREREQUISITE: AT LEAST 10 CREDITS OF RESEARCH AND SUCCESSFUL COMPLETION OF THE EVALUATION EXAMINATIONS.

CHM693 Directed Readings in Chemistry
1-3 credits Offered By Announcement Only

CHM694 Directed Readings in Chemistry
1-3 credits Offered By Announcement Only

CHM705 Research Practices
1-3 credits Fall & Spring Semester
Research experiences in special techniques. For students electing the non-thesis M.S. option. May be repeated for a total not to exceed six credits.
University of Miami Bulletin, 2012-2013
Graduate Course Listing
COLLEGE OF ARTS AND SCIENCES
CHEMISTRY

CHM710 Master's Thesis
1-6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

CHM715 Post-candidacy thesis.
1-6 credits Fall & Spring Semester & First & Second Summer Session
For students seeking the MS Degree. Credit is not awarded until the thesis has been accepted.

CHM720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in CHM 710 (usually six credits). Credit not granted. May be regarded as full time residence.

CHM730 Doctoral Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

CHM740 Post-candidacy Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session

CHM750 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

CHM751 Research in Residence
0 credit Fall Semester

CLASSICS
CLA505 Seminar in Ancient Studies
3 credits Fall & Spring Semester & First & Second Summer Session
Topics in Greek and Roman studies.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

COMPUTER SCIENCE
CSC506 Logic
3 credits Offered By Announcement Only
PREREQUISITE: MTH 230 OR 309 OR PERMISSION OF THE INSTRUCTOR.

CSC507 Data Security and Cryptography
3 credits Offered By Announcement Only
PREREQUISITE: (CSC 517 OR 527)
CSC517 Data Structures and Algorithm Analysis
3 credits  Fall & Spring Semester
Distributed algorithms. Cryptographic algorithms. Geometric algorithms.
PREREQUISITE: MTH 309, AND CSC 220.

CSC518 Interpreters and Compiler Theory
3 credits  Offered By Announcement Only
Translation of higher-level languages into machine language. Grammars, parsing,
scanners, precedence relations. Run-time storage and symbol table organization.
implementation.
PREREQUISITE: CSC 519.

CSC519 Program Languages
3 credits  Fall Semester
Models of execution control. Declaration, modularity, and storage management. Programming
language semantics. Programming paradigms.
PREREQUISITE: CSC 517.

CSC521 Principles of Computer Operating Systems
3 credits  Fall Semester
Process management. Scheduling and dispatch. Interprocess communication. Memory
for UNIX.
PREREQUISITE: (CSC 314 OR 350), (CSC 322 OR PERMISSION OF INSTRUCTOR).

CSC523 Database Systems
3 credits  Fall Semester
Information models and systems. Database systems. Data modeling. Relational databases.
Relational database design. Database query languages. Database Mining concepts,
Web database programming.
PREREQUISITE: CSC 517.

CSC524 Computer Networks
3 credits  Spring Semester
Computer networks and network applications. The protocol stack. Routing, switching
and bridging technologies. Models of network computing. Internet standards and
protocols.
PREREQUISITE: (CSC 314 OR 350), (CSC 322 OR PERMISSION OF INSTRUCTOR).

CSC527 Theory of Computing
3 credits  Spring Semester
Sets, relations, and languages. Automata theory. Basic computability theory. Turing
machines. The complexity classes P and NP.
PREREQUISITE: CSC 220, MTH 309

CSC528 Introduction to Parallel Computing
3 credits  Offered By Announcement Only
Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory
parallel programming, software with open MPI software package. Applications: vector
and matrix operations, sorting, image processing.
PREREQUISITE: CSC 517
CSC529 Introduction to Computer Graphics

3 credits

Offered By Announcement Only

PREREQUISITE: CSC 220, MTH 210

CSC531 Introduction to Software Engineering

3 credits

Spring Semester

PREREQUISITE: CSC 322 OR 517.

CSC540 Algorithm Design and Analysis

3 credits

Offered By Announcement Only

Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.

PREREQUISITE: CSC 517.

CSC545 Introduction to Artificial Intelligence

3 credits

Offered By Announcement Only

PREREQUISITE: CSC 220 AND MTH 309.

CSC547 Computational Geometry

3 credits

Offered By Announcement Only

Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.

PREREQUISITE: CSC 517

CSC548 Bioinformatics Algorithms

3 credits

Fall Semester

PREREQUISITE: (CSC120 OR CSC210) AND (BIL150 OR BIL104 OR BIL352 OR BIL552 OR CSC 552)

CSC552 Bioinformatics Tools

3 credits

Fall Semester

Databases and tools of bioinformatics, as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, and protein structure-function analysis, and various applications.

PREREQUISITE: BIL 250 OR (BIL 150 AND PERMISSION OF INSTRUCTOR)

CSC555 Multimedia Systems

3 credits

Offered By Announcement Only

PREREQUISITE: CSC 517.
CSC595 Topics in Computer Science
1-3 credits   Offered By Announcement Only

CSC596 Topics in Computer Science
1-3 credits   Offered By Announcement Only

CSC597 Topics in Computer Science
1-3 credits   Offered By Announcement Only

CSC598 Topics in Computer Science
1-3 credits   Offered By Announcement Only

CSC599 Topics in Computer Science
1-3 credits   Offered By Announcement Only

CSC606 Logic Programming
3 credits   Offered By Announcement Only
Programming in Prolog, Fix-point semantics, Declarative semantics, Completeness of SLD-resolution, Negation, Implementation of logic programming languages. Deductive databases.
PREREQUISITE: MTH 506 AND CSC 517.

CSC609 Data Security and Cryptography
3 credits   Offered By Announcement Only
PREREQUISITE: CSC 517 OR 527.

CSC612 Complexity Theory
3 credits   Offered By Announcement Only
Models of computations, Blum's axioms, intractability, NP-completeness.
PREREQUISITE: CSC 527.

CSC623 Theory of Relational Databases
3 credits   Offered By Announcement Only
PREREQUISITE: CSC 523.

CSC624 Mobile Wireless Systems
3 credits   Offered By Announcement Only
Cellular Systems, multiple access techniques, wireless networking, mobile IP, power management, user location information management, TDMA, CDMA, and GSM systems, data broadcasting.
PREREQUISITE: CSC 524.

CSC628 Parallel Algorithms
3 credits   Fall Semester
Parallel computation models; sorting networks; parallel algorithms for sorting, searching, graph problems, prefix computation, pattern matching, and fast Fourier transforms; theory of P-completeness, the class NC.
PREREQUISITE: CSC 517.
CSC645 Introduction to Expert Systems
3 credits
Offered By Announcement Only
Overview of expert systems, architecture of expert systems, knowledge base and representation, inference engine, expert system tools, reasoning under uncertainty, explaining the reasoning, evaluation of expert systems.
PREREQUISITE: CSC 545.

CSC646 Neural Computing
3 credits
Offered By Announcement Only
PREREQUISITE: CSC 517.

CSC647 Computational Geometry
3 credits
Offered By Announcement Only
Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.
PREREQUISITE: CSC 517.

CSC648 Automated Reasoning
3 credits
Offered By Announcement Only
PREREQUISITE: CSC 517 OR 545.

CSC655 Advanced Multimedia Systems
3 credits
Offered By Announcement Only
PREREQUISITE: CSC 555.

CSC670 Directed Reading
2-4 credits
Fall & Spring Semester

CSC685 Topics in Computer Science
1-3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC686 Topics in Computer Science
1-3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC687 Topics in Computer Science
1-3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CSC688 Topics in Computer Science
1-3 credits
Offered By Announcement Only

CSC689 Topics in Computer Science
1-3 credits
Offered By Announcement Only
CSC692 Seminar
  1-2 credits   Offered By Announcement Only

CSC693 RESEARCH PROJECT
  1-6 credits   Fall & Spring Semester
  Supervised research project preceding dissertation research for the Ph.D.

CSC694 Research Project
  1-6 credits   Fall & Spring Semester
  Supervised research project preceding dissertation research for the Ph.D.

CSC710 Master's Thesis
  1-6 credits   Fall & Spring Semester
  The student working on his/her master's thesis enrolls for the number of credits
as determined by his/her advisor. Credit is not awarded until the thesis has been
accepted.

CSC725 Continuous Registration--Master's Study
  0 credits   Fall & Spring Semester
  To establish residence for non-thesis master's students who are preparing for major
examinations. Credit not granted. Regarded as full time residence.

CSC730 Pre-Candidacy DOCTORAL DISSERTATION
  1-12 credits   Fall & Spring Semester & First & Second Summer Session
  Required of all candidates for the Ph.D. The student will enroll for credit as
determined by his/her advisor, but for not less than a total of 12 hours. Up to 12
hours may be taken in a regular semester, but not more than six in a summer session.

CSC740 Post-Candidacy Doctoral Dissertation
  1-12 credits   Spring Semester
  Required of all candidates for the Ph.D. who have advanced to candidacy. The student
will enroll for credit as determined by his/her advisor, but not for less than
a total of 12. Not more than 12 hours of CSC 740 may be taken in a regular semester,
nor more than six in a summer session.

CSC750 RESEARCH IN RESIDENCE
  0 credit   Fall & Spring Semester & First & Second Summer Session
  Used to establish research in residence for Ph.D. students after the student has
enrolled for permissible cumulative total in appropriate doctoral research. Regarded
as full-time residence.

ECOSYSTEM SCIENCE & POLICY

ECS501 Interdisciplinary Environmental Theory
  3 credits   Fall Semester
  Theoretical approaches in environmental and social science fields, including conservation
biology, ecology, geography, economics, sociology, anthropology, philosophy, and
interdisciplinary approaches. Themes include human ecology, historical ecology,
landscape ecology, environmental law and ethics, perception of risk and uncertainty,
vulnerability and adaptation, and environmental valuation.
PREREQUISITE: SENIOR OR GRADUATE STANDING IN ECS
ECS503 Interdisciplinary Environmental Methods
3 credits Fall Semester
Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.
PREREQUISITE: SENIOR OR GRADUATE STANDING IN ECS

ECS507 Interdisciplinary Environmental Decision Analysis
3 credits Fall Semester
Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm. Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economic, political science, and anthropology.
PREREQUISITE: SENIOR OR GRADUATE STANDING IN ECS.

ECS572 Special Topics in ECS
0-3 credits Fall & Spring Semester & First & Second Summer Session
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

ECS580 Field Studies
1-4 credits Offered By Announcement Only
This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.
PREREQUISITE: ADVANCED UNDERGRADUATE STANDING OR PERMISSION OF INSTRUCTOR

ECS605 Interdisciplinary Environmental Law & Policy
3 credits Fall & Spring Semester
Analysis of science-based environmental decision-making and policy implementation at the federal and state levels in the United States, with comparative international perspectives, and an introduction to international institutions that fashion and carry out environmental policy. Case studies will cover authorization, appropriations and over-sight functions of Congress and state legislatures; the role of the executive, federal and state, in initiating and implementing statutes by regulation and other means; and the role of negotiation, litigation, mediation and consensus-building in resolving disputes and advancing or thwarting environmental policy.
PREREQUISITE: GRADUATE STANDING IN ECS

ECS608 Interdisciplinary ECS Seminar
2 credits Fall Semester
Seminar centering on research and case studies illustrating cutting edge human-environment research, and including both qualitative and quantitative methods. Intensive reading and writing related to relevant topics in the field.
PREREQUISITE: GRADUATE STANDING
ECS625 Problems in Environmental Science and Policy
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.
PREREQUISITE: GRADUATE STUDENT IN ECS

ECS690 Directed Readings
1-3 credits    Fall & Spring Semester
PREREQUISITE: PERMISSION OF INSTRUCTOR

ECS730 Doctoral Dissertation
1-12 credits    Fall Semester
Required for all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12 credits. Not more than 12 hours of ECS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

ECS750 Research in Residence
0 credit    Fall Semester
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full-time residence as determined by the Dean of the Graduate School.

ENGLISH
ENG504 Form in Poetry
3 credits    Offered By Announcement Only
Poetic works as literary objects, with attention to poetic trends and the creative process.
PREREQUISITE: PERMISSION OF INSTRUCTOR. SIX CREDITS IN LITERATURE OR GRADUATE STANDING.

ENG505 Form in Fiction
3 credits    Offered By Announcement Only
Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.
PREREQUISITE: GRADUATE STUDENTS: PERMISSION OF INSTRUCTOR. UNDERGRADUATES: SIX CREDITS IN LITERATURE AND PERMISSION OF INSTRUCTOR.

ENG560 Creative Writing: Fiction I
3 credits    Offered By Announcement Only
Advanced work in the writing of fiction.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND, FOR UNDERGRADUATE, SIX CREDITS IN ENGLISH AT THE 200 LEVEL OR ABOVE

ENG561 Creative Writing: Fiction II
3 credits    Offered By Announcement Only
Advanced work for students displaying superior ability for prose fiction writing. Admission by recommendation or demonstration of skills.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
ENG562 Creative Writing: Poetry
3 credits Offered By Announcement Only
Advanced work in the writing of poetry.
PREREQUISITE: AT LEAST SIX CREDITS IN ENGLISH AT THE 200 LEVEL OR ABOVE OR GRADUATE STANDING.

ENG591 Graduate Practicum I: Teaching College Writing
0 credit Fall Semester
Methods and problems in teaching English composition and college writing.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG592 Graduate Practicum II: Teaching College Literature
0 credit Spring Semester
Methods and problems in teaching introductory literature courses.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG595 Special Topics
3 credits Offered By Announcement Only
PREREQUISITE: FOR UNDERGRADUATES, SIX CREDITS IN LITERATURE OR PERMISSION OF INSTRUCTOR; FOR GRADUATE STUDENTS, PERMISSION OF DIRECTOR OF GRADUATE STUDIES.

ENG601 Creative Writing: Fiction III
3-6 credits Offered By Announcement Only
Advanced M.F.A. workshop in the techniques of writing fiction.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ENG602 Creative Writing: Poetry II
3-6 credits Offered By Announcement Only
Advanced M.F.A. workshop in the techniques of writing poetry.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ENG610 Studies in Old English Language and Literature
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG611 Beowulf
3 credits Offered By Announcement Only
In-class analysis and translation of Beowulf; consideration of text-related problems such as paleography, editing, emendation, and translation.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG615 Studies in Chaucer
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG616 Studies in Middle English Language and Literature
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG620 Studies in Shakespeare
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.
ENG621 Studies in Elizabethan and Jacobean Drama
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG622 Studies in 16th Century Literature
3 credits Offered By Announcement Only
A survey of predominantly non-dramatic Renaissance literature, with an emphasis on the Sixteenth Century.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG623 Studies in Spenser
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG624 Studies in 17th Century Literature
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG625 Studies in Milton
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG630 Restoration and 18th-Century Drama
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG631 Studies in Restoration and 18th Century Literature
3 credits Offered By Announcement Only
Special topics in British Literature from 1660-1800.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG633 The Eighteenth-Century British Novel
3 credits Offered By Announcement Only
Survey of the British novel from Defoe to Austen.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF GRADUATE DIRECTOR.

ENG640 Studies in Romanticism
3 credits Offered By Announcement Only
A study of writers and genres between the late eighteenth and the mid-nineteenth century, through an investigation of questions of canonicity, epistemological orientation, colonialism, and the revolutionary context.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG645 Studies in Victorian Poetry and Prose
3 credits Offered By Announcement Only
Victorian poetry and prose exclusive of the novel. Poems by Tennyson, Browning, Arnold, Rossetti, and others. Prose works by writers such as Carlyle, Newman, Mill, Ruskin, and Pater.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG646 Nineteenth-Century British Novel
3 credits Offered By Announcement Only
Survey of the British novel from Austen to Conrad.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.
ENG648 Studies in the Novel
3 credits
Topics in eighteenth-, nineteenth-, and twentieth-century fiction.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG650 Studies in Modern British Literature
3 credits
Intensive coverage of a limited topic in twentieth-century British or Irish literature.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG651 Studies in Joyce
3 credits
Close readings of Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and Finnegans Wake; extensive review of Joyce criticism.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG652 Studies in Irish Literature
3 credits
Intensive coverage of a selected topic in Irish Literature.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG654 Contemporary British Literature
3 credits
Studies in British prose, poetry, and drama since 1939.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG655 Contemporary American Poetry and Poetics
3 credits
Poetry and poetics from 1945 to present, focusing on Black Mountain Poetics, the New York School, the Black Arts Movement, Language Poetry and more recent writers and movements.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG658 Studies in Transatlantic Literature
3 credits
Literature on transatlantic themes and/or by transatlantic writers. Border crossing; ships; sailors; and other travelers; movement of people, things, and ideas in the Atlantic world.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG660 Studies in American Literature: Beginnings to 1800
3 credits
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG661 Studies in American Literature: 1800–1865
3 credits
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG662 Studies in American Literature: 1865–1914
3 credits
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG663 Studies in American Literature: 1914 to 1950
3 credits
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.
ENG664 Studies in American Literature: 1950 to the present
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG665 Studies in African-American Literature
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG666 Caribbean Literature
3 credits Offered By Announcement Only
Caribbean literature and cultural theory; Caribbean aesthetic.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG667 Caribbean Popular Culture
3 credits Offered By Announcement Only
Special topics on the relations among politics, popular culture, and literature in the Caribbean region.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG668 Studies in Race and Diasporic Literatures
3 credits Offered By Announcement Only
Analysis of race, ethnicity, immigration, and transnationalism in literature and cultural theory.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG669 Studies in Women’s Literature
3 credits Offered By Announcement Only
Topic varies by semester. Analysis of gender issues and literary production by women.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG670 The Classical Tradition and English Literature
3 credits Offered By Announcement Only
A study of classical authors such as Homer, Aeschylus, Sophocles, Euripides, Virgil, Ovid, Horace, and Catullus, who have been seminal for English writers from the Middle Ages to the present.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG672 Comparative Studies in Renaissance and Baroque Literature
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG673 Eighteenth-Century European Literature
3 credits Offered By Announcement Only
Major literary and aesthetic works of the European Enlightenment.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG674 The Romantic Movement in Europe
3 credits Offered By Announcement Only
A study of the forces and influences of the Romantic Movement in Europe as these intersect English Romanticism.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.
ENG675 European Novel
3 credits  Offered By Announcement Only
Major authors and trends in the development of the European novel as a unified literary tradition.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG677 Studies in Modern Literature
3 credits  Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG678 Studies in Contemporary Literature
3 credits  Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG680 History of Literary Criticism
3 credits  Offered By Announcement Only
A survey of literary criticism and theory from the ancient Greeks to the early twentieth century.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG681 Introduction to Literary Theory
3 credits  Offered By Announcement Only
Twentieth-century literary theory beginning with the New Criticism and including topics such as semiotics, hermeneutics, deconstruction, feminism, and neopragmatism.

ENG682 Contemporary Criticism and Theory
3 credits  Offered By Announcement Only
Topics in recent criticism and theory.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG683 Literature and Psychoanalysis
3 credits  Offered By Announcement Only
The interrelations between literary theory, textual analysis, and psychoanalytic theory.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG684 Theory of Narrative
3 credits  Offered By Announcement Only
Analysis of narrative theories, ancient to contemporary.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG685 Feminist Theory
3 credits  Offered By Announcement Only
Feminist writing and criticism from the nineteenth century to the present. Supplementary readings in anthropological, psychoanalytic, and socio-political criticism, as well as in theories of poetic tradition and the poetic process.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG686 Theories of Gender and Sexuality
3 credits  Offered By Announcement Only
Queer theory and its relationship with gender studies, critical race studies, and emerging directions in the field.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.
ENG687 Studies in Literature and Culture since 1950
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG688 Studies in Latino/a Literatures and Cultures
3 credits Offered By Announcement Only
Comparative and interdisciplinary approaches to art, film, music and literature.
Topics may include: borderlands, postcolonial and "Americas" methodologies; ethnicity, race and mestizage; immigration and the "Latinization" of the U.S.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG689 Comparative Americas Studies
3 credits Offered By Announcement Only
Comparative, interdisciplinary and transnational approaches to literatures and cultures of the Americas.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG691 Rhetorical Traditions
3 credits Offered By Announcement Only
Rhetorical traditions from antiquity to the nineteenth century in light of recent scholarship, with special emphasis on the use of rhetoric in education.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG692 Modern Rhetorical Theory
3 credits Offered By Announcement Only
A study of rhetorical theory in the twentieth century, concentrating on the epistemological and ideological essence of discourse.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG693 Teaching College Composition
3 credits Fall Semester
Rhetorical and literary theory related to composition instruction. Designed primarily for Teaching Assistants in the English Department, but open to all students planning to teach writing.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG695 Special Topics
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG696 Directed Readings
1- 3 credits Fall & Spring Semester
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG697 Readings for the Qualifying Examination
1- 3 credits Fall & Spring Semester
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF ENGLISH DEPARTMENT GRADUATE DIRECTOR.

ENG710 Master's Thesis
1- 6 credits Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
ENG720 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ENG 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

ENG730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

ENG740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of ENG 740 may be taken in a regular semester, nor more than six in a summer session.

ENG750 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

FRENCH

FRE501 Capstone
3 credits  Fall & Spring Semester
Course with a broad-based topic designed to integrate high-level linguistic, critical and analytical skills with the body of knowledge acquired during the course of study toward the major. Topics vary. Open only to undergraduates in the last semester of their French major. Course is writing intensive; fulfills writing credit requirement.
PREREQUISITE: TO BE TAKEN IN THE LAST SEMESTER OF THE MAJOR.

FRE591 Directed Readings
1-3 credits  Offered By Announcement Only
May be repeated for credit if topic is different.
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.

FRE592 Directed Readings
1-3 credits  Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.

FRE593 Directed Readings
1-3 credits  Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND PERMISSION OF INSTRUCTOR.

FRE594 Senior honors Thesis I
3 credits  Fall & Spring Semester
Directed research for honors thesis.
PREREQUISITE: MUST HAVE COMPLETED AT LEAST TWELVE CREDITS AT THE 300-LEVEL OR ABOVE TOWARDS FRENCH MAJOR, MUST MEET ELIGIBILITY FOR HONORS IN FRENCH.
FRE595 Senior Honors Thesis II
3 credits
Directed writing of honors thesis.
PREREQUISITE: FRE 594.

FRE611 Topics in French Medieval Literature
3 credits
Recent topics: exile, the epic, orientalism, imperialism, monsters.

FRE612 Topics in French Renaissance Literature
3 credits
Specific genres, works, authors, and movements. Possible topics: Melancholy and Madness; Montaigne; Rabelais; Marguerite de Navarre; lyric poetry.

FRE613 Topics in 17th Century French Literature
3 credits
Recent topics: Racine, Moliere, Corneille: Pascal and the Moralist tradition, the birth of the psychological novel, love and war.

FRE614 Topics in 18th Century French Literature
3 credits
Recent topics: Diderot, Rousseau, Sade; exoticism as related to political theory; the epistolary novel; the Enlightenment and postcolonial theory.

FRE615 Topics in 19th Century French Literature
3 credits
Recent topics: Balzac, Stendhal, Flaubert; Dandysm and Decadence; the Symbolist movement.

FRE616 Topics in 20th-21st Century French Literature
3 credits
Recent topics: Paris 1913; Surrealism; Artaud, Beckett, Ionesco, Genet; the Noveau Roman.

FRE621 Special Topics in French Studies
3 credits

FRE625 Elementary French for Graduate Research
0 credit
Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

FRE675 Topics in Francophone Studies
3 credits
Recent topics: travel narratives, literary historiography, discourses of race, colonialism, multilingualism and literacy, nationalism and culture.

FRE691 Writing Practicum
1 credit
The writing of a publishable research paper under faculty guidance.

FRE692 Directed Readings
1-3 credits
FRE730 Pre-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. Prior to admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 730 may be taken in a regular semester, nor more than six in a summer session. Students who have not passed their qualifying examinations yet, but are not taking any courses, may enroll in FRE 730.

FRE740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. After admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 740 may be taken in a regular semester, nor more than six in a summer session. Students who have passed their qualifying examinations, but are not taking courses any more, may enroll in FRE 740. Where a student has passed his/her(a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

FRE750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined the Dean of the Graduate School.

GEOGRAPHY

GEG501 Place, Region, Nature
3 credits                                             Offered By Announcement Only
Introductory seminar for Graduate students about geographic thought and geographical traditions.
PREREQUISITE: AT LEAST 6 CREDITS IN GEOGRAPHY OR PERMISSION FROM INSTRUCTOR.

GEG510 Survey Research in Geography
3 credits                                             Offered By Announcement Only
The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.

GEG511 Field Studies in Geography
1- 6 credits   Offered By Announcement Only
One to six weeks of intensive geographic field studies outside the Miami area. Lectures will be given prior to departure. The locations and topics of study will vary.
PREREQUISITE: GEG 105 OR ANY 200-LEVEL GEOGRAPHY COURSE.

GEG515 Human Dimensions of Global Environmental Change
3 credits                                             Fall Semester
Explores the human dimensions of global environmental change using an interdisciplinary approach. The course is reading and writing intensive. Special attention is given to the central role that land-use/cover change plays in the larger realm of global environmental change.
PREREQUISITE: GEG 105 AND JUNIOR/SENIOR STANDING.

GEG520 Immigration to the United States
3 credits                                             Fall Semester
A description and analysis of current immigration patterns in the United States.
PREREQUISITE: ANY 100 OR 200 LEVEL COURSE OR PERMISSION FROM INSTRUCTOR.
GEG521 Global Trade
3 credits Offered By Announcement Only
Geographic analysis of the distribution of economic activities and capabilities, with emphasis on contemporary trade patterns and policies.

GEG522 Urbanization in the Developing World
3 credits Spring Semester
Patterns and processes in large cities in the developing world are examined.
PREREQUISITE: ANY 100 OR 200 LEVEL COURSE IN GEOGRAPHY OR PERMISSION FROM INSTRUCTOR.

GEG523 Seminar in Urban Management
3 credits Fall Semester
Identification of and responses to urban problems in large cities in European and Latin American metropolitan areas. Emphasis is on demographic, cultural/ethnic, service-provision, environmental, transportation, and land-use problems. Approach is via case studies, theory applications, and planning practicalities.

GEG525 Problems in Geography
1-6 credits Fall & Spring Semester
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.
PREREQUISITE: GEOGRAPHY GRADUATE STUDENT, MAJOR, OR MINOR ONLY.

GEG530 Resources and Society
3 credits Offered By Announcement Only
This course examines the relations between human society and material nature from within a broad theoretical perspective, relating questions of science, culture, and technology to the politics and economics of natural resources, focusing particularly on water, food, and petroleum.
PREREQUISITE: 300-LEVEL COURSE IN HUMAN GEOGRAPHY OR PERMISSION OF INSTRUCTOR.

GEG535 Internship in Geography
1-4 credits Fall & Spring Semester
Students are assigned to work for a local public or private agency.
PREREQUISITE: 15 CREDITS IN GEOGRAPHY AND PERMISSION OF DEPARTMENT.

GEG545 Special Topics
3 credits Fall & Spring Semester
PREREQUISITE: NINE CREDITS IN GEOGRAPHY.

GEG552 Seminar on the Geography of South Florida
3 credits Offered By Announcement Only
Human and physical geography of South Florida.
PREREQUISITE: NINE CREDITS IN GEOGRAPHY.

GEG555 Field Methods and Geospatial Analysis
3 credits Fall & Spring Semester

GEG570 Gender and Development
3 credits Offered By Announcement Only
Theoretical and empirical examination of gender and development processes through exploration of gender and development evolution as an academic discipline and application in development practice.
PREREQUISITE: GRADUATE STUDENTS OR PERMISSION OF INSTRUCTOR.
GEG580 Introductory Quantitative Methods for Geographical Analysis.
3 credits
Spring Semester
Basic quantitative methods for geographic analysis.
PREREQUISITE: GRADUATE STANDING

GEG582 Advanced Quantitative Methods
3 credits
Offered By Announcement Only
Continuation of GEG 481. The use of statistical methods and techniques in the solution of geographic research problems.
PREREQUISITE: GEG 481 OR GEG 580 OR PERMISSION OF INSTRUCTOR

GEG585 Advanced Cartography
3 credits
Fall & Spring Semester

GEG591 Introduction to GIS (Geographic Information Systems) for graduate students
0-3 credits
Offered By Announcement Only
Overview of basic concepts in GIS (Geographic Information Systems) for students wishing to get graduate credit. This class involves a student project using GIS.

GEG592 Advanced Environmental Remote Sensing
3 credits
Fall & Spring Semester
PREREQUISITE: GEG 199 OR EQUIVALENT

GEG593 Intermediate GIS
3 credits
Fall & Spring Semester
PREREQUISITE: GEG 591 OR EQUIVALENT OR PERMISSION OF INSTRUCTOR

GEG594 GIS and Environmental Modeling
3 credits
Fall & Spring Semester
PREREQUISITE: GEG 591 OR EQUIVALENT

GEG595 Web GISd Seminar on South Asia
3 credits
Fall & Spring Semester
Seminar on development-related issues in South Asia.
PREREQUISITE: GEG 391 OR EQUIVALENT

GEG603 Advanced Research Design in Geography
3 credits
Spring Semester
Designing and proposing geographic research projects based upon a critical reading of the geographical literature. Students will prepare a master's thesis (master's students) or dissertation (doctoral students) project proposal.
PREREQUISITE: GEG 503.

GEG625 Advance independent study in geography I
1-6 credits
Fall & Spring Semester & First & Second Summer Session
Advanced independent study for Two-Paper Option for first paper.
PREREQUISITE: PI

GEG637 Development Studies
3 credits
Offered By Announcement Only
Advanced seminar on issues in contemporary development studies.
PREREQUISITE: ANY 100 OR 200 LEVEL GEOGRAPHY COURSE OR PERMISSION FROM INSTRUCTOR
GEG645 Advanced Independent Study in Geography II
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Advanced independent study for Two-Paper Option for second paper.
PREREQUISITE: PI

GEG651 Geopolitics and Geoculture
3 credits  Offered By Announcement Only
Advanced graduate seminar about the cultural context of geopolitics and foreign policy.
PREREQUISITE: ANY COURSE IN GEOGRAPHY OR PERMISSION FROM INSTRUCTOR.

GEG661 Advanced Urban Geography
3 credits  Offered By Announcement Only
Analysis of the spatial structure of urban centers, the development of and interaction between functional zones, and the movement of goods and people in urban areas.

GEG672 Environmental Monitoring and Assessment
0 credit  Spring Semester
Geographic monitoring and assessment of contaminated regions; important background legislation and government actions; pollution monitoring; superfund site remediation; geographic sampling of environmental populations; and, selected case studies.
PREREQUISITE: GEG 591, 592.

GEG681 Advanced Spatial Statistics
3 credits  Offered By Announcement Only
Social and environmental science applications of spatial statistical analysis illustrated with data and numerical (simulation experiments) examples employing interactive software. This course's focus is on spatial autocorrelation.
PREREQUISITE: GEG 582, 591.

GEG710 Master’s Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

GEG720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in GEG 710 (usually six credits). Credit not granted. May be regarded as full time residence.

GEG725 Continuous Registration--Master’s Study
0 credit  Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master’s students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

GERMAN

GER521 Advanced German Studies
3 credits  Offered By Announcement Only
German language, literature, culture of the 18th-20th centuries. Involves independent research. WRITING CREDIT May be repeated for credit if topic is different.
PREREQUISITE: GER 363, 364, OR 365.
GER522 Special Topics in German Literature
3 credits  Offered By Announcement Only
WRITING CREDIT. May be repeated for credit if topic is different.
PREREQUISITE: TWO COURSES ON THE 300-LEVEL; PERMISSION OF THE INSTRUCTOR.

GER566 German Literature of the Twentieth Century
3 credits  Offered By Announcement Only
WRITING CREDIT. Major literary movements: prose, poetry, and drama.
PREREQUISITE: GER 363 OR 364.

GER591 Directed Readings
1-3 credits  Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER592 Directed Readings
1-3 credits  Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER593 Directed Readings
1-3 credits  Offered By Announcement Only
PREREQUISITE: TWO 300-LEVEL COURSES AND PERMISSION OF THE INSTRUCTOR.

GER594 Senior Honors Thesis I
3 credits  Fall & Spring Semester
Directed research for honors thesis.
PREREQUISITE: MUST HAVE COMPLETED AT LEAST NINE CREDITS AT THE 300-LEVEL OR ABOVE TOWARDS GERMAN MAJOR, MUST MEET ELIGIBILITY FOR HONORS IN GERMAN.

GER595 Senior Honors Thesis II
3 credits  Fall & Spring Semester
Directed writing of honors thesis.
PREREQUISITE: GER 594.

GER625 German for Graduate Research
0 credit  Offered By Announcement Only
Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor.)

GEOLOGICAL SCIENCES

GSC515 Applied Environmental Geology
3 credits  Spring Semester
An advanced undergraduate/graduate course providing knowledge and methods for effective environmental site surveys, to be presented in a weekly 3-hour lecture and discussion. The course will cover policies and regulation including applied practice to comply with safe environmental conduct and valid assessment. Case study, best management practice, and appropriate field equipment and approaches will complement two one-day field trips associated with this course.
PREREQUISITE: PERMISSION OF INSTRUCTOR OR DEPARTMENT CHAIR.

GSC520 Geology of Florida and the Caribbean
3 credits  Fall Semester
The land and marine geologic history, the natural resources and geologic hazards of Florida and the Caribbean region.
PREREQUISITE: GSC 110, 111, 260.
GSC540 Geophysics  
3 credits  
Spring Semester  
PREREQUISITE: PHY 205, 206.

GSC545 Introduction to Isotope and Nuclear Geology  
4 credits  
Offered By Announcement Only  
Radioactivity and particle counting. The geological time scale. Isotope fractionation in natural systems. Mass spectrometry and the measurements of relative isotopic abundances in the ocean, the atmosphere, and the solid earth. Lecture, 2 hours; laboratory, 4 hours.

GSC550 Hydrogeology  
3 credits  
Fall Semester  
Movement of subterranean water. The mechanical, chemical and thermal interaction of water with porous solids, and the transport of energy and chemical constituents. The origin of porosity and permeability. The controls exerted on aquifers by the lithology, stratigraphy and structure of geologic deposits and formations.  
PREREQUISITE: 8 CREDITS IN GEOLOGICAL SCIENCES AND PERMISSION OF INSTRUCTOR.

GSC555 Mathematical Methods for Geoscientists  
3 credits  
Fall Semester  
Background mathematics needed to solve problems in the geosciences. Applications in tectonics, structural geology, geochemical systems, seismology and hydrology.  
PREREQUISITE: MTH 112 OR 132, 211 OR 310, OR 312, AND PHY 206, OR EQUIVALENT.

GSC556 Complexity in Coastal Systems  
4 credits  
Offered By Announcement Only  
Different aspects of the coastal system and their interactions using inquiry-based learning; will include remote sensing data as a tool for data analysis and visualization.  
PREREQUISITE: SIX CREDITS IN BIOLOGY OR GEOLOGICAL SCIENCES.

GSC560 Colloquium - Current Topics in the Geosciences  
1 credit  
Fall Semester  
Weekly presentations and discussions. Written and oral presentations required.  
PREREQUISITE: SENIOR STANDING.

GSC561 Colloquium - Current Topics in the Geosciences  
1 credit  
Spring Semester  
Weekly presentations and discussions. Written and oral presentations required.  
PREREQUISITE: SENIOR STANDING.

GSC565 Fluxes of Energy and Matter in the Earth Systems  
3 credits  
Offered By Announcement Only  
Transport phenomena, motions, and deformation in Earth Systems.  
PREREQUISITE: GSC 110, 360.

GSC574 Special Studies  
1-4 credits  
Fall & Spring Semester & First & Second Summer Session  
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.  
PREREQUISITE: PERMISSION OF DEPARTMENT.
University of Miami Bulletin, 2012-2013
Graduate Course Listing
COLLEGE OF ARTS AND SCIENCES
GEOLOGICAL SCIENCES

GSC575 Special Studies
1-4 credits  Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.
PREREQUISITE: PERMISSION OF DEPARTMENT.

GSC576 Special Studies
1-4 credits  Fall & Spring Semester & First & Second Summer Session
Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.
PREREQUISITE: PERMISSION OF DEPARTMENT.

GSC580 Summer Field Geology
4 credits  Spring Semester & First & Second Summer Session
An intensive four-week summer field laboratory study of modern geological processes and ancient rock sequences. Mapping, description and interpretation of rock and structural sequences, paleoenvironmental reconstruction, interpretation of tectonic history. Reports required. Touring course. Travel fee required.
PREREQUISITE: 18 CREDITS IN GEOLOGICAL SCIENCES AND/OR PERMISSION OF INSTRUCTOR.

GSC581 Summer Field Environmental Geology
2 credits  Spring Semester & First & Second Summer Session
Field evaluation of environmental geology problems in marine, coastal, wetland and terrestrial environments. Effects of human alteration of landscape, natural hazards, pollution of ground water, surface water and soils. Role of climate change on surficial environments. Reports required. Touring course. Travel fee required.
Corequisite: GSC 580.
PREREQUISITE: COREQUISITE GSC 580.

GSC582 Field Studies
1-4 credits  Offered By Announcement Only
Conducted field trips to selected geological sites in the United States and abroad. Report required.
PREREQUISITE: GRADUATE OR ADVANCED UNDERGRADUATE STANDING AND PERMISSION OF DEPARTMENT.

GSC596 Research in Geology
1-4 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HAITIAN
HAI625 Haitian Creole for Graduate Research I
0 credit  Fall Semester

HAI626 Haitian Creole for Graduate Research II
0 credit  Spring Semester
PREREQUISITE: HAI 625 OR ITS EQUIVALENT

HISTORY
HIS501 Studies in African History
3 credits  Offered By Announcement Only
Selected topics in African history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.
HIS511 Studies in Asian History
3 credits
Selected topics in Asian history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS515 Studies in Chinese History
3 credits
Selected topics in Chinese history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS531 Studies in European History
3 credits
Selected topics in European history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS534 Studies in Ancient History
3 credits
Selected topics in Ancient history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS536 Studies in Medieval History
3 credits
Selected topics in medieval history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS538 Studies in Early Modern European History
3 credits
Selected topics in European history before the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS544 Studies in Modern European History
3 credits
Selected topics in European history after the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS551 Studies in Latin American History
3 credits
Selected topics in Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.
HIS553 Studies in Colonial Latin American History
3 credits Offered By Announcement Only
Selected topics in the colonial period of Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL

HIS554 Studies in Modern Latin American History
3 credits Offered By Announcement Only
Selected topics in Latin-American history before and after Independence. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL

HIS561 Studies in United States History
3 credits Offered By Announcement Only
Selected topics in United States history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL

HIS564 Studies in American Intellectual and Cultural History
3 credits Offered By Announcement Only
Selected topics in American intellectual and cultural history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL

HIS565 Studies in American Political and Diplomatic History
3 credits Offered By Announcement Only
Selected topics in American political and diplomatic history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL

HIS569 Studies in African-American History
3 credits Offered By Announcement Only
Selected topics in African-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL

HIS570 Studies in Public History
3 credits Offered By Announcement Only
Selected topics in public history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL

HIS591 Studies in Comparative History
3 credits Offered By Announcement Only
Selected topics in Comparative History. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL
HIS595 Studies in Visual History
3 credits
Offered By Announcement Only
Selected topics in the use of photographs and other visual evidence for historical purposes. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: THREE CREDITS IN HISTORY AT THE 300-LEVEL.

HIS599 Independent Research
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HIS601 Directed Readings in African History
1-3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HIS622 Directed Readings in Asian History
1-3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HIS631 Directed Readings in European History
1-3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HIS633 Seminar in European History
3 credits
Offered By Announcement Only
Selected topics in European History.

HIS634 Seminar in Ancient History
3 credits
Offered By Announcement Only

HIS636 Seminar in Medieval History
3 credits
Offered By Announcement Only

HIS641 Field Preparation: Colonial Latin America
3 credits
Offered By Announcement Only
An introduction to central historical issues and historiographical debates in the field of Colonial Latin America.

HIS642 Field Preparation: Modern Latin America
3 credits
Offered By Announcement Only
An introduction to central historical issues and historiographical debates in the field of Modern Latin America.

HIS643 Field Preparation: Colonial and Revolutionary America
3 credits
Offered By Announcement Only
An introduction to central historical issues and historiographical debates in the field of Colonial and Revolutionary America.

HIS644 Field Preparation: Modern America
3 credits
Offered By Announcement Only
An introduction to central historical issues and historiographical debates in the field of Modern America.
HIS645 Field Preparation: Early Modern Europe
3 credits  Offered By Announcement Only
An introduction to central historical issues and historiographical debates in the field of Early Modern Europe.

HIS646 Field Preparation: Modern Europe
3 credits  Offered By Announcement Only
An introduction to central historical issues and historiographical debates in the field of Modern Europe.

HIS651 Directed Readings in Latin-American History
1-3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HIS653 Seminar in Latin-American History
3 credits  Offered By Announcement Only

HIS661 Directed Readings in American History
1-3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HIS663 Seminar in United States History
3 credits  Offered By Announcement Only

HIS691 Directed Readings in Comparative History
1-3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

HIS693 Seminar in Comparative History
3 credits  Offered By Announcement Only

HIS695 Historiography
3 credits  Offered By Announcement Only
The philosophy, theory, and practice of history.

HIS696 History as a Profession
3 credits  Fall & Spring Semester
Practical experience for graduate students in designing courses; preparing lectures, conference papers and scholarly publications; and in applying for jobs and research grants
PREREQUISITE: COMPLETION OF GRADUATE SEMINAR PAPER OR EQUIVALENT

HIS710 Master's Thesis
1-6 credits  Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

HIS720 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in HIS 710 (usually six credits). Credit not granted. May be regarded as full time residence.
HIS725 Continuous Registration--Master's Study  
0 credit  
Fall & Spring Semester  
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

HIS730 Doctoral Dissertation  
1-12 credits  
Fall & Spring Semester  
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

HIS740 Post-Candidacy Doctoral Dissertation  
1-12 credits  
Fall & Spring Semester  
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of HIS 740 may be taken in a regular semester, nor more than six in a summer session.  
PREREQUISITE: ABD STATUS

HIS750 Research in Residence  
0 credit  
Fall & Spring Semester  
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
IGS517 Practicum in International Administration
3 credits                    Fall & Spring Semester & First & Second Summer Session
The practicum gives students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students first complete an approved internship in an appropriate organization and then present a report/case study analysis under the supervision of the MAIA faculty.
PREREQUISITE: PERMISSION OF PROGRAM COORDINATOR

IGS545 Global Warming Policy in European Union
3 credits                                                      First Summer Session
This course studies the EU, and especially the French, efforts to ecologically modernize their advanced economies particularly in regards to global warming emissions and energy usage. Class is centered in Paris with excursions to Strasbourg and Freiburg.

IGS599 Special Topics
0- 3 credits   Not Offered; Transfer Credit Only
The UM/MAIA program has a cooperation and student exchange program with St. Petersburg State University in St. Petersburg, Russia, Charles University in Prague, Czech Republic and Belgrano University in Argentina.
PREREQUISITE: PERMISSION OF PROGRAM COORDINATOR

IGS611 International Organizations
3 credits                                                           Spring Semester
Covers the entire spectrum of international organizations and the theoretical and practical issues relating to international organizations including peace and security, human rights, and economic development.
PREREQUISITE: GRADUATE STUDENTS ONLY

IGS612 International Administration
3 credits                                                           Spring Semester
Presents a broad overview of concepts, theories, processes, and practical global challenges confronting professional public/nonprofit managers; discusses contemporary issues facing multi-national corporations, non-government organizations, and public agencies; and analyzes the similarities and differences between public, non-profit and private management.
PREREQUISITE: GRADUATE STUDENTS ONLY

IGS613 World Cultures, Religions and Communications
3 credits                                                             Fall Semester
The course will overview the world religions and cultures as a backdrop of effective communication for international professionals. The study of comparative religions and cultures will make students aware of special challenges in international and intercultural communications, and the role of mass media in international relations.
PREREQUISITE: GRADUATE STUDENTS ONLY

IGS614 World Affairs
3 credits                                                    Fall & Spring Semester
This course introduces the conceptual basics of international relations and trains students in analytical and critical thinking skills through familiarity with the broad palette of issues and actors that make up today's world politics. Topics include the origins of the state and its changing role in today's world and an examination of the actors in international relations and the issues before them.
PREREQUISITE: GRADUATE STUDENTS ONLY
GRADUATE SCHOOL
INTERDISCIPLINARY GLOBAL STUDIES

IGS615 International Economics for MAIA
  3 credits          Spring Semester
Reviews the essentials of International Economics. It then provides students with
an operational understanding of the theory of comparative advantage and its application
to policy issues.
PREREQUISITE: GRADUATE STUDENTS ONLY

IGS616 Administration of Organizations
  3 credits          Fall Semester
Explores organizations from the strategic perspective of the leader, identifying
common elements of thinking, structure, measures, outcomes, issues, and challenges
faced by those who seek leadership roles in international administration.
PREREQUISITE: GRADUATE STUDENTS ONLY

IGS699 Directed Readings
  3 credits          Fall & Spring Semester & First & Second Summer Session
There are no special notes for this course.
PREREQUISITE: PERMISSION OF PROGRAM COORDINATOR

IGS720 MAIA Masters Project
  0-9 credits      Fall & Spring Semester & First & Second Summer Session
For students conducting additional research, practica, field experience or special
projects as part of their graduate experience.
PREREQUISITE: PERMISSION OF THE PROGRAM DIRECTOR ONLY.
INS503 Int Relations Topics
3 credits Offered By Announcement Only
Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

INS504 Int Rel Topics II
3 credits Offered By Announcement Only
Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

INS510 ISSUES IN INS
3 credits Offered By Announcement Only
Analysis of current issues of international importance.

INS511 Issues in INS II
3 credits Offered By Announcement Only
Analysis of current issues of international importance.

INS512 International Administration
3 credits Fall Semester
Introductory course for the Master of Arts in International Administration.
PREREQUISITE: GRADUATE STUDENTS ONLY.

INS513 Information and Communication in International Relations
3 credits Fall Semester
First semester offering for students in the Master of Arts in International Administration program.
PREREQUISITE: GRADUATE STUDENTS ONLY.

INS514 World Affairs
3 credits Fall Semester
Explores the complexity of world affairs in relation to international administrative fields. First semester offering for students in the Master of Arts in International Administration program.
PREREQUISITE: GRADUATE STUDENTS ONLY.

INS515 Independent Study
1-6 credits Fall & Spring Semester & First & Second Summer Session
Advanced level research done under the guidance of a selected faculty member. This course can be used as one of the two 500-level requirements for International Studies majors.

INS516 Str Thinking, Neg and Bargaining
3 credits Spring Semester
Second semester offering for students in the Master of International Administration program.
PREREQUISITE: GRADUATE STUDENTS ONLY.
INS517 Practicum in International Administration

3 credits Offered By Announcement Only

Each student in the Master of Arts in International Studies (with a specialization in International Administration) is required to complete a three (3) credit practicum/internship during the summer months subsequent to their completion of the fall and spring semester. The purpose of the practicum is to give each student the necessary skills to help advance their professional careers.

PREREQUISITE: PERMISSION OF PROGRAM COORDINATOR.

INS519 Internship

1-3 credits Fall & Spring Semester & First & Second Summer Session

A research paper is required for this course. The student works with a selected faculty member who determines the length and scope of the project. The Student is responsible for finding the internship position.

INS520 Microeconomics for INS

3 credits Offered By Announcement Only

Microeconomics for students of international studies. Topics will include rationality, market failure and comparative advantage.

PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS521 INT'L ECON TOPICS II (International Economic System Topics)

3 credits Offered By Announcement Only

Selected topics in International Economics. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS522 Latin American Political Economy

3 credits Offered By Announcement Only

Latin American political economy including analysis of market reform and integration of the region into the world economy.

PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS523 Economics of Terrorism

3 credits Spring Semester

Economic resources of terrorist movements today: their financing, acquisition of tools, recruitment, and operations.

PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS524 INTL ECON Topics

3 credits Offered By Announcement Only

PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS530 Comparative Analysis

3 credits Offered By Announcement Only

Advanced overview of the comparative method. Required for students specializing in Comparative Studies at the graduate level.

PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.
INS531 Dictatorship and Human Rights
3 credits
Offered By Announcement Only
How have societies coped with traumatic pasts, and how have they faced the tension between remembering and forgetting? This course will explore these issues with a view to various approaches and scenarios.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS532 Globalization and Human Rights
3 credits
Offered By Announcement Only
The integration of markets has many concerns for the political and economic rights of the common citizen. This course examines the effect of globalization on the human rights standards throughout the world.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS533 Transnational Social Movements
3 credits
Offered By Announcement Only
Focuses on global civic activism and contentious politics, with particular attention to transnational non-state actors - NGOs, social movements, environmental protection, and the emergence of a global civil society.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS534 Military, State and Society
3 credits
Offered By Announcement Only
The role of the military in state formation; questions of military rule, civilian control, and social structures in contemporary world politics.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS536 Comparative Political Regimes
3 credits
Offered By Announcement Only
Literature concerned with the transition from authoritarianism to democracy in various parts of the world.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS537 Comparative Political Economy
3 credits
Fall Semester
Compares how domestic politics and macroeconomic policies interact with globalization. Case studies include welfare states in the U.S. and Europe, East Asian development, post-communist transitions and market restructuring in Latin America and Africa.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS540 National Security
3 credits
Offered By Announcement Only
The central issues concerning European security since World War II, with emphasis on the period since the end of the Cold War.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS541 The Role of Intelligence in U.S. National Security
3 credits
Offered By Announcement Only
Required alternate for students concentrating in Strategic Studies. Explains what intelligence is, how it is collected and analyzed, and what it contributes to U.S. national security. Discusses the issue of secret intelligence activities in a democratic society.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.
INS542 Drug-Trafficking in the Americas
3 credits
Fall Semester
The political economy of the U.S.-Latin American drug trade in the 20th Century along with the dynamics of the U.S.-led war on drugs through the first years of the Twenty First Century.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS543 National Security and Foreign Policy
3 credits
Second Summer Session
Explores alternative conceptualizations of "security" and the new challenges to U.S. national security that have emerged in the Post-Cold War era.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS550 Non-Western Regional Topics
3 credits
Offered By Announcement Only
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS551 Regional Topics II
3 credits
Offered By Announcement Only
Selected topics in International Business. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS560 US Foreign Policy
3 credits
Spring Semester
The leading approaches to the analysis of American foreign policy. Particular emphasis will be placed on the post-Cold War period and the new challenges to U.S. foreign policy of the 21st century.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS561 Negotiation and Bargaining
3 credits
Spring Semester
Examines the nature of diplomatic negotiation through readings and discussion of international negotiation and through the case method, selecting several cases of high-level policy issues in which the United States has been a principal actor.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS562 International Peace and Conflict Resolution
3 credits
Offered By Announcement Only
The major sources of conflict, and what resources are available for making and keeping the peace? This class introduces students to the most fundamental concerns of the field of International Relations (IR), and especially of its subfield IPCR.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS563 International Organizations
3 credits
Offered By Announcement Only
The role, function, and impact on states of international governmental and non-governmental organizations in critical areas like peace and security, human rights, economic development, and environmental degradation.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.
INS564 International Law
3 credits Fall Semester
How international law affects the conduct of states. Issues include jurisdiction, diplomatic immunity, the use of armed force, peaceful dispute settlement among states, human rights, and the International Criminal Court.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS565 The World Before European Domination
3 credits Spring Semester
The historical roots of the contemporary international system. Its objective is to question the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.
PREREQUISITE: 15 CREDITS IN ADVANCED LEVEL SOCIAL SCIENCES OR PERMISSION OF INSTRUCTOR.

INS566 US-Latin American Relations
3 credits Fall Semester
Political, economic and strategic aspects of U.S.-Latin American relations; the historical experience and contemporary issues, including the influence of extra-regional parties such as Europe and China.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS567 Foreign Policy Topics
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS570 Globalization and Health
3 credits Fall Semester
Globalization and its benefits and threats to public health; the relationship between global economic, political, social, cultural, environmental and technological changes and their impact on human health.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS571 International Development and Human Welfare
3 credits Spring Semester
Health and development links; macroeconomic policies and their impact on social equity; poverty and structural inequities; and other key issues that influence human development.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS572 Global Health Policy and Ethics
3 credits Fall & Spring Semester
National, regional and global health policies with special consideration to ethical and human rights issues; policies and the moral considerations that shape public health policy.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS573 Disasters, Terrorism and Global Public Health
3 credits Spring Semester
The historical processes and present trends of disasters, terrorism, humanitarian emergencies and their impact on human health, safety and security.
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.
INS580 Latin American Comparative Politics  
3 credits  
Fall Semester  
The major intellectual debates shaping the field of comparative politics including: (1) development, (2) military politics, (3) democratization and (4) the emergence of new social movements.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS581 Politics and Ideology in Latin America  
3 credits  
Offered By Announcement Only  
The roles played by both "class" and the "new social movements" in the emergence of new modes of political representation.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS582 Problems of Latin American Democracies  
3 credits  
Offered By Announcement Only  
The Left and the Right, business, and indigenous movements along with issues such as transitional justice, state reform, public security, human rights and the politics of memory.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS583 Chile: Politics and Society  
3 credits  
Offered By Announcement Only  
Changes in Chilean politics and society. The three chronological parts of Chilean history: pre-1973, the years of dictatorship and the contemporary transition to democracy since 1990.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS584 Latin American Thought  
3 credits  
Spring Semester  
The evolution of Latin American thought through political and intellectual history; the classical writings of the main "pensadores", and a comparative analysis of contemporary ideological trends.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS585 Dilemmas of Mexical Democracy  
3 credits  
Offered By Announcement Only  
Contemporary politics in Mexico and US-Mexican relations first-hand during visits to Mexico City and Oaxaca. Meetings with Mexican scholars and civil society leaders are included.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS586 Brazil in Transition  
3 credits  
Offered By Announcement Only  
The social, economic, cultural transformations shaping Brazilian politics. In addition to visiting Rio de Janeiro and Salvador, there will be seminars with Brazilian academics and social and political activists.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS587 Politics in Central America  
3 credits  
Offered By Announcement Only  
The domestic issues of the Central American republics and their relationships with the United States, other western hemisphere countries and the global system.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.
INS588 Politics in the Andes  
3 credits  Offered By Announcement Only  
The domestic issues of the Andean republics and their relationships with the United States, other western hemisphere countries and the global system.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS589 Argentine Politics and Society  
3 credits  Offered By Announcement Only  
Seminar offered in Buenos Aires covering dilemmas of democratic consolidation, social justice, and market reform. Students will meet with Argentine social scientists and leaders of major social, economic, and political movements.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS591 The European Union  
3 credits  Fall & Spring Semester  
The European Union's history, institutions, policies and contemporary issues.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS592 European Union and the World  
3 credits  Spring Semester  
The European Union's development, its main institutions and policies followed by an analysis of the main features of the European Union's external relations.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS593 European Security  
3 credits  Spring Semester  
Regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy, and related issues.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS594 European Topics  
3 credits  Offered By Announcement Only  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS595 European Social Movements  
3 credits  Offered By Announcement Only  
The major social movements active today throughout Europe including those concerned with the environment, agriculture, poverty, racism, defending social democracy, the rights of workers, minorities, and women.  
PREREQUISITE: GRADUATE STUDENT, UPPER LEVEL UNDERGRADUATE OR PERMISSION OF INSTRUCTOR.

INS599 Special Topics  
3 credits  Offered By Announcement Only

INS601 IR Theory  
3 credits  Spring Semester  
Introduces students to key historic events, themes, concepts, and theories that have animated the practice and scholarship of international relations.  
PREREQUISITE: GRADUATE STANDING.

INS603 Dissertation Proposal  
3 credits  Spring Semester  
A workshop designed to assist doctoral students in the preparation of a proposal for their dissertation research projects.  
PREREQUISITE: GRADUATE STANDING.
INS610 Graduate Seminar in INS
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING.

INS611 INT RELATNS METH II (International Relations Methodology II)
3 credits Spring Semester
Introduces graduate students to issues of research design and research methods in International Relations. The course will focus on three main methodological approaches in political science: qualitative case study, quantitative research and formal modeling. Apart from examining the principles guiding the choice of methods (and the tradeoffs involved in that choice), the course will examine how these methods have been applied to the study of three major sub-fields of international relations: international political economy, security studies, and international environmental regimes. It also aims to provide the students with basic knowledge on how to apply these methods to their own research.
PREREQUISITE: GRADUATE STANDING.

INS615 Independent Study
1-3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING.

INS620 Economics of the International System
3 credits Offered By Announcement Only
The essentials of International Economics providing students with an operational understanding of the theory of comparative advantage and its applications to policy issues.
PREREQUISITE: GRADUATE STANDING.

INS621 Economics Development
3 credits Offered By Announcement Only
International economics; rigorous but nontechnical presentation of international trade theory; globalization; commercial policy; determination of exchange rates; the international monetary system.
PREREQUISITE: GRADUATE STANDING.

INS622 Advanced Seminar in International Economics
3 credits Offered By Announcement Only
This is a seminar in International Economics at the graduate level. The first part consists of a rigorous but nontechnical presentation of international trade theory, followed by a discussion of the main arguments for protection and their validity. The third part of the course analyzes the process of globalization; its meaning, measurement and effects. A final brief section is devoted to the determination of exchange rates and the international monetary system.
PREREQUISITE: GRADUATE STANDING.

INS630 Advanced Seminar in Comparative Studies
3 credits Fall Semester
PREREQUISITE: GRADUATE STANDING.

INS640 Conflict and its Alternatives
3 credits Offered By Announcement Only
Historical, theoretical, and empirical analyses of violent conflict. Alternatives to violent conflict are explored including the prevention and control of war, preventive diplomacy, crisis management and conflict transformation.
PREREQUISITE: GRADUATE STANDING.
INS641 Advanced ISC Seminar
3 credits Offered By Announcement Only

INS650 Advanced Regional Seminar
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING.

INS660 Foreign Policy Analysis
3 credits Offered By Announcement Only
Develops skills in conceptualization, description, explanation, evaluation and
prescription, concentrating on leading foreign policy issues, sources, and research
techniques.
PREREQUISITE: GRADUATE STANDING.

INS670 Advanced Seminar in International Health
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING.

INS680 Advanced Seminar on Latin America
3 credits Offered By Announcement Only
PREREQUISITE: GRADUATE STANDING.

INS692 ADV SEMINAR - EUROPE (Advanced Seminar on Europe)
3 credits Offered By Announcement Only

INS699 Readings in International Studies
1-3 credits Fall & Spring Semester & First & Second Summer Session

INS710 Master's Thesis
1-6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments
not to exceed six, as determined by his/her advisor. Credit is not awarded until
the thesis has been accepted.

INS720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree
after the student has enrolled for the permissible cumulative total in INS 710
(usually six credits). Credit not granted. May be regarded as full time residence.

INS725 Continuous Registration--Master's Study
0 credit Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master's students who are preparing for major
examinations. Credit not granted. Regarded as full time residence.

INS730 Doctoral Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
A total of 12 hours of INS 730 is required of all candidates for the Ph.D. Not
more than 12 dissertation credits may be taken during the Fall or Spring semesters,
nor more than six in a summer session.
INS740 Post-candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of INS 740 may be taken in a regular semester, nor more than six in a summer session.

INS750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

ITALIAN
ITA591 Directed Readings
1-3 credits   Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ITA592 Directed Readings
1-3 credits   Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ITA593 Directed Readings
1-3 credits   Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ITA625 Italian for Graduate Research
0 credit                                               Offered By Announcement Only
Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

LATIN
LAT625 Elementary Latin for Graduate Research
0 credit                                               Offered By Announcement Only
Grammatical structures, verb tenses, and word families necessary for reading texts with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

LATIN AMERICAN STUDIES
LAS501 Interdisciplinarity in Latin American and Caribbean Studies.
3 credits                                                             Fall Semester
Interdisciplinary methods and politics of Latin American and Caribbean area Studies.
PREREQUISITE: SIX CREDITS IN LAS OR LAS-APPROVED COURSES AT OR ABOVE THE 300-LEVEL

LAS502 Research Design in Latin American Studies
3 credits                                                           Spring Semester
Interdisciplinary research methods and skills in Latin American and Caribbean studies.
PREREQUISITE: LAS 501 OR PERMISSION OF INSTRUCTOR

LAS503 Program Seminar in Latin American Studies and Caribbean Studies
3 credits                                                    Fall & Spring Semester
Content of course will vary by semester.
PREREQUISITE: LAS 501 OR SIX CREDITS IN LAS OR LAS-APPROVED COURSES AT OR ABOVE THE 300-LEVEL.
LAS504 Interdisciplinary Topics in Latin American and Caribbean Studies - Travel Course
3 credits   Spring Semester
Topics vary. Interdisciplinary focus is thematic and regional (e.g.: tourism in Yucatan; civil society in Chile, Haiti-Dominican Republic relations, cultural policy in the Caribbean, environmental policy in Panama.) Course involves travel during Spring Break and it has a program fee.
PREREQUISITE: LAS 101 AND SENIOR STATUS AND PERMISSION OF INSTRUCTOR

LAS505 Internship in Latin American and Caribbean Studies
1-3 credits  Fall & Spring Semester & First & Second Summer Session
On-site experience in business, governmental organization, or non-profit organization dealing with Latin America and/or the Caribbean.
PREREQUISITE: DECLARED MAJOR OR MINOR IN LATIN AMERICAN STUDIES; SIX CREDITS IN LAS OR LAS-APPROVED COURSES AT OR ABOVE THE 300-LEVEL, AND PERMISSION OF LAS DIRECTOR.

LAS520 Interdisciplinary Topics in Latin American and Caribbean Environments
3 credits   Fall & Spring Semester
Topics vary. Interdisciplinary focus on policies and impact of globalization on the environment.
PREREQUISITE: LAS 101 AND SENIOR STATUS

LAS521 Latin American Environmental Issues
3 credits   Fall Semester
PREREQUISITE: LAS 101 AND SENIOR STATUS, OR LAS 501, OR PERMISSION OF INSTRUCTOR

LAS594 Directed Readings in Latin America and Caribbean
3 credits   Fall & Spring Semester
Independent Study leading to an original piece of research, or creative project on a Latin American or Caribbean interdisciplinary topic.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF LAS DIRECTOR

LAS597 Readings for the Comprehensive Exam
3 credits   Fall & Spring Semester
Readings for M.A. students who are preparing for comprehensive examinations.
PREREQUISITE: PERMISSION OF ADVISOR AND PROGRAM DIRECTOR

LAS710 Pre-candidacy thesis credits
3 credits   Fall & Spring Semester
the student working on his/her master's thesis enrolls for credit, not to exceed three, before student has been admitted to candidacy. Credit is not awarded until the thesis has been accepted.

LAS715 Post-candidacy thesis credits
3 credits   Fall & Spring Semester
the student working on his/her master's thesis enrolls for credit, not to exceed six, after student has been admitted to candidacy. Credit is not awarded until the thesis has been accepted.
PREREQUISITE: ADMISSION TO CANDIDACY.

LAS720 Research in residence.
0 credit   Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in LAS 710 (usually six credits). Credit not granted. May be regarded as full time residence.
MLS595 Special Topics
3 credits                                                    Fall & Spring Semester

MLS596 Special Topics
3 credits                                              Offered By Announcement Only

MLS597 Special Topics
3 credits                                              Offered By Announcement Only

MLS601 Aspects of Creative and Reflective Thought
3 credits                                                    Fall & Spring Semester
Selected aspects of creative and reflective thought, based on materials from the
arts, the humanities, the sciences, the social sciences and history. The focus
will be on themes and issues represented in a variety of cultural traditions.

MLS602 Perspectives on Human Nature
3 credits                                                    Fall & Spring Semester
Basic theories of human nature proposed by the humanities, the sciences, and the
social sciences. The course deals with fundamental issues regarding the concept
of human nature, such as the nature of the self and its relation to society, the
impact of culture on self perception and the relation of thought to human action.

MLS603 Theories of the Physical Universe
3 credits                                                    Fall & Spring Semester
Various understandings of the nature of the universe and their impact on human
culture. The course will deal with critical issues addressed in the various attempts
to understand the physical world, such as fundamental structures and processes,
the limitation of human perception, and the interaction between the human species
and its environment.

MLS611 Studies in the Humanities
3 credits                                                    Fall & Spring Semester
Interdisciplinary study of selected topics in the Humanities.

MLS612 Studies in the Social Sciences
3 credits                                              Offered By Announcement Only
Interdisciplinary study of selected topics in the Social Sciences.

MLS613 Studies in the Sciences
3 credits                                              Offered By Announcement Only
Interdisciplinary study of selected topics in the sciences.

MLS621 Studies in the Humanities
3 credits                                              Offered By Announcement Only

MLS622 Studies in the Social Sciences
3 credits                                              Offered By Announcement Only

MLS623 Studies in the Sciences
3 credits                                              Offered By Announcement Only

MLS631 Studies in the Humanities
3 credits                                              Offered By Announcement Only
MLS696 Directed Readings
1-3 credits   Fall & Spring Semester
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF THE DIRECTOR OF THE PROGRAM.

MLS697 Directed Readings
1-3 credits   Fall & Spring Semester
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF THE DIRECTOR OF THE PROGRAM.

MLS698 Seminar in Liberal Studies
3 credits   Offered By Announcement Only

MLS699 Seminar in Liberal Studies
3 credits   Offered By Announcement Only

MLS710 Master's Thesis
1-6 credits   Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MLS715 MALS Project
1-6 credits   Fall & Spring Semester
The student working on his/her MALS project enrolls for credit, not to exceed 6, as determined by his/her advisor. Credit is not awarded until the project has been accepted.

MLS720 Research in Residence
0 credit   Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in PSY 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MLS725 Continuous Registration-Master's Study
0 credit   Offered By Announcement Only
To establish residence for non-thesis students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

MATHEMATICS

MTH501 Place, Region, Nature
3 credits   Fall Semester
PREREQUISITE: 6 CREDITS IN GEG OR PERMISSION OF INSTRUCTOR

MTH502 History of Mathematics
3 credits   Fall Semester
The development of mathematics from its earliest beginnings through the first half of the twentieth century. Numeral systems, geometry, algebra, analysis and set theory.
PREREQUISITE: TWO COURSES IN MATHEMATICS AT THE 200 LEVEL OR ABOVE.

MTH504 Foundations of Geometry
3 credits   Fall Semester
Axiom systems and models of Euclidean and Non-Euclidean geometry.
PREREQUISITE: MTH 230 OR 309.
MTH505 Theory of Numbers
3 credits Spring Semester
Divisibility, primes; congruencies, quadratic residues and reciprocity; Diophantine
equations. Applications to cryptography.
PREREQUISITE: MTH 210 OR 504.

MTH506 Mathematical Logic
3 credits Offered By Announcement Only
Logics, truth, proof, logical consequence, model theory, formalization, and computation.
Meta-theory of first-order logic, computability theory, and Godel’s incompleteness
theorems. Related results by Church, Turing, and Tarski. Discussion of their philosophical
significance.
PREREQUISITE: MTH 230

MTH510 Linear Algebra
3 credits Spring Semester
Abstract vector spaces, bases and dimensions, linear maps, eigenvalues and eigenvectors,
inner product spaces, operators, spectral theorems, canonical forms.
PREREQUISITE: MTH 210; TRANSITION COURSE IN LOGICAL REASONING SUCH AS MTH 230 OR
309 RECOMMENDED BUT NOT REQUIRED.

MTH512 Elementary Complex Analysis
3 credits Spring Semester
Complex variables; conformal mapping, contour integration.
PREREQUISITE: MTH 211 OR 310.

MTH513 Partial Differential Equations I
3 credits Fall Semester
Derivation, well posedness, and qualitative properties of initial value and boundary
value problems for the heat, wave and Laplace equations. Energy methods, causality,
maximum principles, heat kernels, Fourier series, and potential theory.
PREREQUISITE: MTH 210, 311 AND EITHER MTH 211 OR 310.

MTH514 Partial Differential Equations II
3 credits Spring Semester
Continuation of MTH 513. Approximations of solutions, distributions and integral
transform methods, spectral theory and scattering. Applications to physical problems.
Nonlinear equations and phenomena.
PREREQUISITE: MTH 513 OR PERMISSION OF THE INSTRUCTOR.

MTH515 Ordinary Differential Equations
3 credits Fall Semester
Linear systems, equilibria and periodic solutions, stability analysis, bifurcation,
phase plane analysis, boundary value problems, applications to engineering and
physics.
PREREQUISITE: MTH 311 AND EITHER MTH 211 OR 310.

MTH516 Dynamics and Bifurcations
3 credits Spring Semester
Bifurcation of equilibria and periodic solutions, global theory of planar systems,
planar maps, nonlinear vibrations, forced oscillations, chaotic solutions, Hamiltonian
systems, applications to engineering and physics.
PREREQUISITE: MTH 515 OR PERMISSION OF INSTRUCTOR.
MTH517 Data Structures and Algorithm Analysis
3 credits
Offered By Announcement Only
Data abstraction, formal specification, trees, B-trees, balanced binary trees, graphs, searching and sorting. Algorithm analysis. Memory management.
PREREQUISITE: MTH 309 (OR 230) AND CSC 220

MTH520 Numerical Analysis I
3 credits
Spring Semester
Topics from numerical linear algebra including solving systems of equations, LU, QR, and SVD factorizations, eigenvalues and eigenvectors, interactive methods and applications.
PREREQUISITE: MTH 320 OR PERMISSION OF DEPARTMENT CHAIRMAN.

MTH521 Numerical Analysis II
3 credits
Offered By Announcement Only
Numerical solution of ordinary and partial differential equations.
PREREQUISITE: MTH 320 OR 520 OR PERMISSION OF DEPARTMENT CHAIRMAN.

MTH524 Introduction to Probability Theory
3 credits
Fall Semester
Probability spaces, random variables, expectation, limit theorems.
PREREQUISITE: MTH 224 AND 310

MTH525 Introduction to Mathematical Statistics
3 credits
Spring Semester
Probability distributions, theory of sampling and hypothesis testing.
PREREQUISITE: MTH 524.

MTH527 Theory of Computing
3 credits
Offered By Announcement Only
Finite-state automata, context-free grammars, pushdown automata, Turing machines and computability.
PREREQUISITE: MTH 309 OR MTH 461

MTH528 Combinatorics
3 credits
Offered By Announcement Only
Permutations and combinations, generating functions, enumerative analysis.
PREREQUISITE: MTH 461 OR MTH 561

MTH531 Topology I
3 credits
Fall Semester
Set theory, topological spaces, compactness, connectedness, separation properties, quotient spaces, Tychonoff Theorem, compactification, Urysohn Lemma and Tietze Extension Theorem, function spaces.
PREREQUISITE: MTH 230

MTH532 Topology II
3 credits
Spring Semester
Differential and topological manifolds, classical groups and associated manifolds, tangent and tensor bundles, vector fields, differential forms, transversality, Sard's theorem, Stokes' Theorem.
PREREQUISITE: MTH 210 AND 531.
MTH533 Introduction to Real Analysis I
3 credits
Fall Semester
Sequences and series in Euclidean space; sequences and series of functions; Fourier series; continuity, differentiation, and integration of functions between Euclidean spaces; implicit and inverse function theorems.
PREREQUISITE: MTH 230 AND MTH 310

MTH534 Introduction to Real Analysis II
3 credits
Spring Semester
Continuation of MTH 533.
PREREQUISITE: MTH 533.

MTH540 Algorithm Design and Analysis
3 credits
Offered By Announcement Only
Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.
PREREQUISITE: MTH 517 OR CSC 517

MTH542 Statistical Analysis
3 credits
Fall Semester
Statistical inference about one or two populations from interval, ordinal and categorical data; analysis of variance; simple and multiple linear regression; designing research studies.
PREREQUISITE: MTH 210, 224

MTH551 Introduction to Differential Geometry
3 credits
Fall Semester
Geometry of curves and surfaces in Euclidean space. Local space curve theory, intrinsic and extrinsic curvature of surfaces, geodesics, parallelism, and differential forms.
PREREQUISITE: MTH 210 AND EITHER MTH 211 OR 310

MTH561 Abstract Algebra I
3 credits
Fall Semester
Groups; rings; linear algebra; modules.
PREREQUISITE: MTH 210 AND PERMISSION OF DEPARTMENT CHAIRMAN.

MTH562 Abstract Algebra II
3 credits
Spring Semester
Continuation of MTH 561.
PREREQUISITE: MTH 561.

MTH571 Directed Readings in Mathematics
1- 3 credits
Fall & Spring Semester
Readings in special topics.
PREREQUISITE: GRADUATE STANDING; PERMISSION OF DEPARTMENT CHAIR.

MTH572 Directed Readings in Mathematics
1- 3 credits
Fall & Spring Semester
Readings in special topics.
PREREQUISITE: GRADUATE STANDING; PERMISSION OF DEPARTMENT CHAIR.

MTH591 Topics in Mathematics
1- 3 credits
Offered By Announcement Only
MTH592 Topics in Mathematics
1-3 credits Offered By Announcement Only

MTH593 Topics in Mathematics
1-3 credits Offered By Announcement Only

MTH594 Topics in Mathematics
1-3 credits Offered By Announcement Only

MTH609 Data Security and Cryptography
3 credits Offered By Announcement Only
Encryption algorithms; cryptographic techniques; access, information flow and inference controls.
PREREQUISITE: MTH 517 OR CSC 517 OR MTH 527 OR CSC 52

MTH612 Complexity Theory
3 credits Offered By Announcement Only
Models of computations, Blum's axioms, intractability, NP-completeness.
PREREQUISITE: MTH 527

MTH621 Mathematical Probability
3 credits Offered By Announcement Only
Development of the measure-theoretic approach to probability. Random variables, central limit theory, laws of large numbers, martingales.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MTH625 Multivariate Analysis
3 credits Offered By Announcement Only
Sampling theory for multivariate normal populations. Component and factor analysis. Stochastic difference equations.
PREREQUISITE: MTH 525.

MTH630 Real Variables
3 credits Offered By Announcement Only
First semester of two semester sequence: General measure theory, Lebesgue measure and integration, Lp spaces, Fourier series in one and many variables, Fourier transforms, distributions, Sobolev spaces, applications to partial differential equations.
PREREQUISITE: MTH 533.

MTH631 Real Variables
3 credits Offered By Announcement Only
Second semester of a two semester sequence: General measure theory, Lebesgue measure and integration, Lp spaces, Fourier series in one and many variables, Fourier transforms, distributions, Sobolev spaces, applications to partial differential equations.
PREREQUISITE: MTH 630.

MTH632 Complex Variables
3 credits Offered By Announcement Only
First semester of a two semester sequence: Analytic functions, conformality, Cauchy's Theorem, representation theorems, harmonic functions, calculus of residues, Riemann Mapping Theorem, entire and meromorphic functions, analytic continuation, normal families.
PREREQUISITE: MTH 531.
MTH633 Complex Variables
3 credits
Offered By Announcement Only
Second semester of a two semester sequence: Analytic functions, conformality, Cauchy's Theorem, representation theorems, harmonic functions, calculus of residues, Riemann Mapping Theorem, entire and meromorphic functions, analytic continuation, normal families.
PREREQUISITE: MTH 632.

MTH638 Stochastic Processes
3 credits
Offered By Announcement Only
PREREQUISITE: MTH 631.

MTH640 Algebraic Topology
3 credits
Offered By Announcement Only
First semester of a two semester sequence: Homotopy and homotopy type, fundamental group, covering spaces, higher homotopy groups, simplicial singular and cellular homology, Eilenberg-Steenrod axioms, cohomology, universal coefficient theorem, products, Kunneth formula, duality theorems for manifolds, computations and applications.
PREREQUISITE: MTH 532.

MTH641 Algebraic Topology
3 credits
Offered By Announcement Only
Second semester of a two semester sequence: Homotopy and homotopy type, fundamental group, covering spaces, higher homotopy groups, simplicial singular and cellular homology, Eilenberg-Steenrod axioms, cohomology, universal coefficient theorem, products, Kunneth formula, duality theorems for manifolds, computations and applications.
PREREQUISITE: MTH 640.

MTH647 Computational Geometry
3 credits
Offered By Announcement Only
Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.
PREREQUISITE: MTH 517 OR PERMISSION OF INSTRUCTOR.

MTH651 Differential Geometry
3 credits
Offered By Announcement Only

MTH652 Differential Geometry
3 credits
Offered By Announcement Only

MTH657 Lie Groups
3 credits
Offered By Announcement Only

MTH661 Abstract Algebra
3 credits
Offered By Announcement Only
First semester of a two semester sequence: Group theory, ring theory, module theory, linear algebra.
PREREQUISITE: MTH 562.

MTH662 Abstract Algebra
3 credits
Offered By Announcement Only
Second semester of a two semester sequence: Group theory, ring theory, module theory, linear algebra.
PREREQUISITE: MTH 661.
MTH670 Directed Readings or Research
2-4 credits  Offered By Announcement Only

MTH680 Topics in Analysis
3 credits  Offered By Announcement Only

MTH681 Topics in Analysis
3 credits  Offered By Announcement Only

MTH682 Topics in Topology
3 credits  Offered By Announcement Only

MTH683 Topics in Topology
3 credits  Offered By Announcement Only

MTH685 Topics in Algebra
3 credits  Offered By Announcement Only

MTH686 Topics in Mathematics
3 credits  Offered By Announcement Only

MTH687 Topics in Mathematics
3 credits  Offered By Announcement Only

MTH692 Seminar
1-2 credits  Offered By Announcement Only

MTH720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
To establish a residence for non-thesis master's students who are preparing for
major examinations. Credit not granted. Regarded as full-time residence.

MTH730 Pre-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Credits earned in this course apply towards the 12 credit hour dissertation research
requirement of the graduate school. The student will enroll for credit as determined
by his/her dissertation advisor. Up to 12 hours may be taken in a regular semester,
but not more than six in a summer session.

MTH735 Research Project
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Doctoral of Arts degree. Student enrolls for
credit as determined by his/her advisor. Credit is not awarded until the doctoral
project has been accepted. Total enrollment may not exceed six credits.

MTH740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Credits earned in this course apply towards the 12 credit hour dissertation research
requirement of the graduate school. The student will enroll for credit as determined
by his/her dissertation advisor. Up to 12 hours may be taken in a regular semester,
but not more than six in a summer session.
MTH745 Research in Residence
0 credit                      Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for DA, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MTH750 Research in Residence
0 credit                      Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MODERN LANGUAGES & LITERATURES

MLL597 Readings for the Ph.D. Examinations
1-3 credits                  Offered By Announcement Only
For Ph.D. students who are preparing for exams.
PREREQUISITE: PERMISSION OF DIRECTOR OF GRADUATE STUDIES

MLL599 Internship
1 credit                        Offered By Announcement Only
Students work in a community or business setting on issues related to language, culture, and/or teaching.

MLL601 Intro to Second Language Teaching: Theory and Practice
3 credits                      Fall Semester
Current trends in foreign language teaching with emphasis on introductory Latin language courses. Topics include: linguistic and psychological foundations, teaching methodologies, language skills development.
PREREQUISITE: GRADUATE STANDING

MLL602 Bilingualism
3 credits                        Offered By Announcement Only
Historical and Comparative study of phonology, syntax and semantics from Latin to the early stages of Romance languages. Philological readings of selected texts. Topics may vary.
PREREQUISITE: GRADUATE STANDING

MLL603 Topics in Critical Studies of Language
3 credits                        Offered By Announcement Only
Second language acquisition theory with emphasis on classroom-based research.
PREREQUISITE: GRADUATE STANDING

MLL604 Sociocultural Theory and Second Language Development
3 credits                        Offered By Announcement Only
The basic principles of the Sociocultural theory of Mind in the field of Foreign Language Teaching. How the teaching and learning of foreign/second languages can be explained utilizing sociocultural psychology. Focusing on Applied Linguistics, the seminar will explore the pedagogical implications of the theory, centering on Concept-Based Teaching and Dynamic Assessment in the Foreign Language Classroom.
PREREQUISITE: GRADUATE STANDING
MLL611 Introduction to Literary Theory
3 credits
Fall Semester
An introduction to the major concepts, issues, and debates that inform contemporary literary criticism.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR

MLL612 Topics in Early Modern Comparative Literature
3 credits
Offered By Announcement Only
Specific genres, works, authors and movements in comparative perspective in the early modern period (1300-1750). Topics may include: Trans-Atlantic Baroque; Grotesque Literature; Petrarchan Poetry in Italy, France, and England; The Emergence of Professional Theatre in Western Europe.

MLL614 Readings in Literary Theory
3 credits
Spring Semester
Representative works of critical theory as related to philosophy, sociology of culture, psychoanalysis, hermeneutics, deconstruction, etc. May be repeated for credit if topics are different.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR

MLL621 Special Topics in Literature
3 credits
Offered By Announcement Only
May be repeated for credit, if topics are different.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR

MLL626 Topics in Comparative Literature
3 credits
Offered By Announcement Only
May be repeated for credit, if topics are different.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR

MLL693 Teaching Practicum
3 credits
Offered By Announcement Only

PHILOSOPHY
PHI506 Mathematical Logic
3 credits
Offered By Announcement Only
Logics, truth, proof, logical consequences, model theory, formalization, and computation. Meta-theory of first-order logic, computability theory, and Goedel's Incompleteness theorems. Related results by church, Turing, and Tarski. Discussion of their philosophical significance.
PREREQUISITE: PHI 210 OR PHI 510

PHI510 Formal Logic
3 credits
Spring Semester
First and second-order quantification theory; metalogic.

PHI530 Ethical Theory
3 credits
Offered By Announcement Only
G. E. Moore to the present.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 330.

PHI533 Political Philosophy
3 credits
Offered By Announcement Only
A survey of some central issues and developments in political philosophy.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 330.
PHI540 Epistemology
3 credits
Offered By Announcement Only
A survey of the basic topics and questions in epistemology: knowledge acquisition and justification, perception, fallibilism, and skepticism.

PHI541 Mind and Language
3 credits
Offered By Announcement Only
Philosophical problems about signs, linguistic and mental representations, intentionality, action, and consciousness.

PHI543 Induction, Probability, and Scientific Method
3 credits
Offered By Announcement Only
Foundations of inductive reasoning and role of experiment in science.

PHI545 Metaphysics
3 credits
Offered By Announcement Only
A selection of topics dealing with the main problems of metaphysics: existence, modality, universals, identity and persistence through time, causation, the self and physicalism.

PHI546 Evidence and Knowledge in Medicine
3 credits
Spring Semester
Basic methodologies in medicine in the context of philosophical theories of evidence.
PREREQUISITE: 2 COURSES IN PHI, OR PERMISSION FROM INSTRUCTOR

PHI555 Philosophy of Education
3 credits
Fall Semester
Problems concerning the nature and aims of education.

PHI560 History of Logic
3 credits
Fall & Spring Semester
Aristotle, the Stoics, the Scholastics, Leibniz, Boole, DeMorgan, Peirce, Frege, and Russell and Whitehead.

PHI562 History of Ethics
3 credits
Offered By Announcement Only
A selection of ethical theories from Aristotle to Rawls.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 330.

PHI570 Pre-Socratics and Plato
3 credits
Offered By Announcement Only
Fragments from the Pre-Socratic and the dialogues of Plato.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 271.
PHI571 Aristotle and Hellenistic Philosophy
3 credits Offered By Announcement Only
A survey of central philosophical topics in Aristotle and Hellenistic Philosophers (Epicureans, Stoics, and Skeptics).
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 271.

PHI572 Medieval Philosophy
3 credits Offered By Announcement Only
The patristic period through the scholasticism of the late middle ages.

PHI573 Early Modern Philosophy
3 credits Offered By Announcement Only
An examination of early modern philosophy from Hobbes and Descartes to Hume.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 272.

PHI575 Kant
3 credits Offered By Announcement Only
An examination of selected issues in Kant's theoretical or practical philosophy.
PREREQUISITE: THREE COURSES AT THE 200 LEVEL OR ABOVE, INCLUDING PHI 210 AND 272.

PHI581 Pragmatism
3 credits Offered By Announcement Only
Peirce, James, Dewey, and others.

PHI582 History of Analytic Philosophy
3 credits Offered By Announcement Only
The development of analytic philosophy from its beginnings in the work of Frege and Russell through logical positivism to contemporary philosophy.

PHI583 The Phenomenological Tradition
3 credits Offered By Announcement Only
An examination of the phenomenological movement (Edmund Husserl, Martin Heidegger, Maurice Merleau-Ponty, and others) and of its impact on contemporary thought.

PHI591 Special Topics
3 credits Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING.

PHI592 Special Topics
3 credits Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING.
PHI593 Special Topics
3 credits
Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit. Prerequisite: Six credits in Philosophy and junior standing.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING

PHI594 Independent Study in Philosophy
1-3 credits
Offered By Announcement Only
Directed reading on a topic or philosopher. May be repeated for credit.
PREREQUISITE: SIX CREDITS IN PHILOSOPHY AND JUNIOR STANDING.

PHI601 Proseminar (First Semester)
3 credits
Offered By Announcement Only
Covers the core texts from the history of analytic philosophy. First semester of the year-long proseminar for first-year graduate students in Philosophy.

PHI602 Proseminar (Second Semester)
3 credits
Offered By Announcement Only
Covers the core texts and issues of analytic philosophy in the second half of the twentieth century. Second semester of the year-long proseminar for first-year graduate students in Philosophy.
PREREQUISITE: PHI 601

PHI610 Topics in Logic
3 credits
Offered By Announcement Only
Problems in philosophical logic; non-standard logics.

PHI630 Seminar in Ethics
3 credits
Spring Semester
Problems in normative ethics, meta-ethics, and value theory.

PHI633 Seminar in Social and Political Philosophy
3 credits
Offered By Announcement Only
Morality and politics, rights and obligations, sources and limits of political obligation, and the function of the state.
PREREQUISITE: GRADUATE STANDING.

PHI636 Values, Norms, and Actions
3 credits
Offered By Announcement Only
The role of values and norms in practical reasoning and decision making.

PHI640 Seminar in Epistemology
3 credits
Offered By Announcement Only
Problems concerning knowledge: skepticism, belief, certainty, truth, and justification.

PHI641 Seminar in Philosophy of Language
3 credits
Offered By Announcement Only
Nature and uses of language; concepts of reference, truth, and meaning.

PHI643 Philosophy of Science
3 credits
Offered By Announcement Only
Selected topics in the philosophy of science, such as realism, explanation, and conceptual and methodological issues in the special sciences.
PHI644 Seminar in Philosophy of Mind
3 credits Offered By Announcement Only
Problems concerning mental phenomena: theories of perception, action, consciousness.

PHI645 Seminar in Metaphysics
3 credits Offered By Announcement Only
Problems related to the nature and kinds of being.

PHI651 Seminar in Philosophy of Art
3 credits Offered By Announcement Only
Problems related to beauty and the philosophy of art.

PHI652 Seminar in Philosophy of Religion
3 credits Offered By Announcement Only
Problems in philosophy of religion: the existence and attributes of God, the rationality of theistic belief, the problem of evil.

PHI671 Seminar in Ancient Philosophy
3 credits Offered By Announcement Only
A discussion of selected topics in ancient philosophy.

PHI675 Seminar in Modern Philosophy
3 credits Offered By Announcement Only
A discussion of selected topics in modern philosophy from Hobbes and Descartes to Kant.

PHI676 Idealism
3 credits Offered By Announcement Only
An examination of Idealism, both contemporary and historical.
PREREQUISITE: GRADUATE STANDING

PHI682 The Origins of Contemporary Continental and Analytic Philosophy
3 credits Offered By Announcement Only
A study of selected topics in the philosophical tradition originating from Franz Brentano and his contemporaries and students.

PHI691 Seminar in Special Topics
3 credits Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit.

PHI692 Seminar in Special Topics
3 credits Offered By Announcement Only
A selected philosopher or philosophical problem. May be repeated for credit.

PHI694 Independent Study in Philosophy
1-3 credits Offered By Announcement Only
Directed reading on a topic or philosopher. May be repeated for credit.

PHI710 Master’s Thesis
1-6 credits Fall & Spring Semester
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
PHI730 Doctoral Dissertation
1-12 credits Fall & Spring Semester
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

PHI740 Post-candidacy doctoral dissertation
1-6 credits Fall & Spring Semester
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PHI 740 may be taken in a regular semester, nor more than six in a summer session.

PHI750 Research in Residence
0 credit Fall & Spring Semester
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

PHYSICS

PHY500 Research
1-3 credits Offered By Announcement Only
Project course introducing methods of research, individual investigation of current problems.

PHY505 Advanced Laboratory
1-2 credits Fall Semester
Advanced experiments such as properties of the electron, optical spectra, electrical measurements, radioactive decay, absorption, etc.
PREREQUISITE: PHY 208. PREREQUISITE OR COREQUISITE: PHY 360.

PHY506 Advanced Laboratory
1-2 credits Spring Semester
Advanced experiments such as properties of the electron, optical spectra, electrical measurements, radioactive decay, absorption, etc.
PREREQUISITE: PHY 208. PREREQUISITE OR COREQUISITE: PHY 360.

PHY515 Mathematical Techniques in Physics
3 credits Spring Semester
Complex variables and applications. Infinite series and their uses, particularly in differential equations. Multiple integrals and Fourier series.
PREREQUISITE: PHY 206, 207; MTH 311, AND 310 OR 312.

PHY516 Readings in Physics
1-3 credits Fall & Spring Semester
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PHY517 Readings in Physics
1-3 credits Spring Semester
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
COLLEGE OF ARTS AND SCIENCES  

PHYSICS

PHY518 Readings in Physics
1-3 credits Offered By Announcement Only
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PHY520 Solid State Physics
3 credits Offered By Announcement Only
Crystal structure, quantum theory of the electronic structure of solids, mechanical, electric, magnetic and optical properties of solids. PREREQUISITE: PHY 560.

PHY530 Plasma Physics I
3 credits Offered By Announcement Only
Kinetic theory of plasmas, adiabatic motion of charged particles magnetofluid dynamics, transport properties of plasmas in electromagnetic fields. PREREQUISITE: PHY 340, 351, 360.

PHY540 Classical Mechanics II
3 credits Fall Semester
Lagrangian formulation, rigid body dynamics. Topics selected from fluid dynamics, non-linear oscillations, normal modes, phase plane analysis. PREREQUISITE: PHY 340.

PHY545 Introduction to Astrophysics
3 credits Offered By Announcement Only
Celestial mechanics, solar models, galaxies, distance scales, instruments. PREREQUISITE: PHY 360 AND ANOTHER 3 CREDIT 300 LEVEL PHYSICS COURSE.

PHY552 Optical Physics
3 credits Offered By Announcement Only
Geometric optics, interference and diffraction, polarized light, optical pumping, coherence phenomena, applications to modern physical research. PREREQUISITE: PHY 351, 360.

PHY560 Quantum Mechanics and Modern Physics I
3 credits Fall Semester
Introductory theory with applications to simple systems. Perturbation theory and atomic structure. PREREQUISITE: PREREQUISITE OR COREQUISITE: PHY 350.

PHY561 Quantum Mechanics and Modern Physics II
3 credits Spring Semester
Applications of quantum mechanics to atomic and molecular spectroscopy, quantum statistical mechanics, and nuclear physics. PREREQUISITE: PHY 560.

PHY601 Condensed Matter Physics Seminar
1 credit Fall & Spring Semester

PHY602 Optical Physics Seminar
1 credit Fall & Spring Semester

PHY603 Particle Physics Seminar
1 credit Offered By Announcement Only
PHY604 Plasma Physics Seminar
1 credit Offered By Announcement Only

PHY610 Special Topics in Physics
1-3 credits Offered By Announcement Only
Topics are typically selected from fluid dynamics, applied mathematics, particle theory, nuclear physics.

PHY611 Special Topics in Physics
1-3 credits Offered By Announcement Only
Topics are typically selected from fluid dynamics, applied mathematics, particle theory, nuclear physics.

PHY612 Special Topics in Physics
1-3 credits Offered By Announcement Only
Topics are typically selected from fluid dynamics, applied mathematics, particle theory, nuclear physics.

PHY615 Methods of Mathematical Physics I
3 credits Offered By Announcement Only
A continuation of PHY 515.
PREREQUISITE: PHY 515.

PHY616 Methods of Mathematical Physics II
3 credits Offered By Announcement Only
A continuation of PHY 515. Different topics from PHY 615.
PREREQUISITE: PHY 515.

PHY620 Advanced Solid State Physics
3 credits Offered By Announcement Only
Electronic structure, electron-electron interactions, phonons, many-body problems, transport properties, magnetism, superconductivity.
PREREQUISITE: PHY 520, 560.

PHY623 Statistical Mechanics I
3 credits Offered By Announcement Only
Equilibrium state, irreversibility, statistical description of an ensemble, entropy, partition functions.
PREREQUISITE: PHY 321, 561.

PHY624 Statistical Mechanics II
3 credits Offered By Announcement Only
Statistical description of many body problems, specific heats, Brownian motion in liquids and fields, nonequilibrium states, super-conductivity.
PREREQUISITE: PHY 623.

PHY630 Plasma Physics II
3 credits Offered By Announcement Only
Plasmas oscillations and waves, interaction of electromagnetic waves, with plasmas in magnetic fields, plasma turbulence, beam-plasma interactions, methods of experimental investigation.
PREREQUISITE: PHY 530.
PHY650 Electromagnetic Theory 1
3 credits Offered By Announcement Only
Electrostatics, magnetostatics, Maxwell's equations, continuous media, waves, antennas, resonant cavities, wave guides.
PREREQUISITE: PHY 351, 515.

PHY651 Electromagnetic Theory II
3 credits Offered By Announcement Only
Relativistic effects, interaction of radiation with matter, multipole radiation, radiation reaction.
PREREQUISITE: PHY 650.

PHY654 General Relativity Theory
3 credits Offered By Announcement Only
Einstein's theory of gravitation. Includes basic differential geometry and tensor analysis, the Einstein field equations, the motion of particles in gravitational fields, tests of general relativity, black holes, and cosmology.

PHY666 Elementary Particles
3 credits Offered By Announcement Only
The Standard Model of elementary particles. Classical theory of fields for spin 0, 1/2, 1; Feynman rules. The Standard Model Lagrangian is postulated, and some of its basic consequences are explored.
PREREQUISITE: PHY 540, 561, 650.

PHY670 Quantum Theory I
3 credits Offered By Announcement Only
Transformation theory, linear operators and vector spaces. Schrodinger's equation, rotation group and angular momentum, statistics (Bose-Einstein and Fermi-Dirac), isotopic spin, multiplet structure of levels, approximation methods.
PREREQUISITE: PHY 540, 561, 615.

PHY671 Quantum Theory II
3 credits Offered By Announcement Only
One particle relativistic theory; Lorentz group; symmetries of particles; elementary scattering theory; many body problems; Greens's function techniques; S-matrix.
PREREQUISITE: PHY 670.

PHY672 Quantum Field Theory
3 credits Offered By Announcement Only
Canonical and path-integral quantization; renormalization; gauge theories.
PREREQUISITE: PHY 540, 651, 671.

PHY680 Directed Readings or Research
1-4 credits Fall & Spring Semester

PHY710 Master's Thesis
1-6 credits Offered By Announcement Only
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
PHY720 Research in Residence
0 credit
Offered By Announcement Only
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in PHY 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

PHY725 Continuous Registration--Master's Study
0 credit
Offered By Announcement Only
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.

PHY730 Pre-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PHY 730 may be taken in a regular semester, nor more than six in a summer session.

PHY740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PHY 740 may be taken in a regular semester, nor more than six in a summer session.
PREREQUISITE: ADMISSION TO CANDIDACY FOR PHD

PHY750 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

POLITICAL SCIENCE

POL501 Budget and Financial Management and Administration
3 credits  Spring Semester
Role of the budget in shaping public policy; managing public revenues; budgetary theory, politics, and fiscal management. Examples from state, municipal and federal governments.
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

POL510 Political Analysis
3 credits  Fall Semester
Introduction to the tools used to investigate empirical questions relevant to politics, policy and public administration. Students apply statistical concepts to contemporary social phenomena. Examines the impact of minority-majority redistricting, the fairness of the butterfly ballot, and the sources of political realignment.
PREREQUISITE: POL 201 OR POL 202 OR POL 203 OR POL 380 OR GRADUATE STANDING

POL512 Advanced Political Analysis
3 credits  Offered By Announcement Only
This course teaches students how to do social science research using the applied techniques of statistics and case study analysis while exposing them to research in the leading sub-fields of political science. Students will produce an original paper that evaluates an academic question using empirical social science evidence.
PREREQUISITE: POL 380 OR POL 510
POL513 Models of Politics
3 credits
Hands-on examination of the process by which quantitative and qualitative models are constructed in political science. The course focuses on the creative aspect of model building and diverse forms of theory construction.
PREREQUISITE: POL 201, POL 202, OR POL 203

POL515 Media Content Analysis
3 credits
Fall Semester
There are few facets of our lives which are not directly affected by media content. From cell phones to televisions, the media is with us all the time. But what messages are contained in the mass media? What methods can we employ to study media content scientifically? This course will explore methods of analyzing media sources including movies, newspapers, magazines, and television. Course topics will include political bias, campaign coverage, and news content. Students will design their own projects and implement their own coding strategies.
PREREQUISITE: FOR POLITICAL SCIENCE MAJORS: POL 201. FOR NON-POLITICAL SCIENCE MAJORS, JUNIOR, SENIOR, OR GRADUATE STUDENT STANDING.

POL520 Internship
3 credits
Fall & Spring Semester & First & Second Summer Session
Provides advanced political science majors with an opportunity to participate in a structured, supervised internship. 25-35 page research paper required.
PREREQUISITE: JUNIOR OR SENIOR STANDING; OPEN TO POLITICAL SCIENCE MAJORS ONLY, WITH MINIMUM GPA OF 3.5 IN THE MAJOR, 3.3 OVERALL; PERMISSION OF SUPERVISING INSTRUCTOR AND DEPARTMENT CHAIR.

POL521 Public Affairs Internship
3 credits
Fall & Spring Semester & First & Second Summer Session
Opportunity for the advanced student specializing in public administration to participate in an administrative capacity in an agency of state or local government. Periodic conferences with adviser and paper required.
PREREQUISITE: JUNIOR OR SENIOR STANDING; OPEN TO POLITICAL SCIENCE MAJORS ONLY. NEED MINIMUM GPA OF 3.5 IN THE MAJOR, 3.3 GPA OVERALL. PERMISSION OF SUPERVISING INSTRUCTOR AND DEPARTMENT CHAIR.

POL522 Introduction to Graduate Public Administration
3 credits
Fall & Spring Semester
Introduction to concepts, issues, problems, theories and process in the field of public administration and/or public management.
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

POL523 Problems in Public and Non-Profit Management
3 credits
Offered By Announcement Only
Nature of the power vested in administrative bodies and problems involved in management procedures. Special emphasis on local or non-profit administration.
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING. PERMISSION OF INSTRUCTOR.
POL524 Non-Profit Organizations: Law, Policy, and Management
3 credits
Fall Semester
This course teaches students the essential requirements for creation and operation of tax-exempt nonprofit organization in accordance with state and federal law. The course covers a wide range of relevant topics including guidelines for charitable giving and charitable solicitation, pitfalls that can result in personal liability for officers and directors, and statutory constraints on legislative lobbying and political activities.
PREREQUISITE: JUNIOR OR SENIOR STATUS, GRADUATE STANDING, OR PERMISSION OF THE INSTRUCTOR

POL525 Comparative Public Policy and Administration
3 credits
Offered By Announcement Only
Comparison and analysis of the organizational and managerial policy problems of developed and developing nations. The administrative process will be considered within the institutional and cultural framework of each nation. Case studies will be used to focus on transition from traditional to modern techniques of public management.
PREREQUISITE: POL 202

POL526 Administrative Law
3 credits
Fall Semester
Administrative law is the study of the legal relationship of government agencies to legislatures, courts, and private parties. The course examines the legal dimensions of bureaucratic power and procedures as well as constitutional and statutory constraints on regulators and administrators. Topics include rulemaking, adjudication, investigation and enforcement, political controls on agencies, judicial review of agency decisions, governmental liability and immunity, public records and open meetings laws. Both federal law and Florida law are covered. The course assumes a basic knowledge of the American legal system, constitutional law and bureaucracy.
PREREQUISITE: FOR POLITICAL SCIENCE MAJORS: POL 201 AND POL 321. FOR NON-POLITICAL SCIENCE MAJORS, JUNIOR, SENIOR, OR GRADUATE STANDING.

POL528 Advanced Seminar on Electoral Behavior
3 credits
Offered By Announcement Only
This seminar examines the opinions that Americans have and how those opinions are expressed through participation in elections. At the end of the semester we will also examine other forms of political participation (e.g., interest groups).
PREREQUISITE: POL 201.

POL529 Voting in the US: Access, Fairness, and Reform
3 credits
Fall Semester
Fair and free democratic elections are the heart of US democracy. This course will examine who gets to vote, whether election laws and rules are fair (and fairly implemented), and proposals to reform the way elections are run.
PREREQUISITE: POL 201
POL530 Intelligence and National Security Decision Making

3 credits Offered By Announcement Only
This course will study the US national security community structure and decision making process. The course will look at the National Security Council, the principal national security agencies (such as the CIA, Defense Department, and State Department), how they interact, and their roles in devising and executing policy. We will also examine the role and function of senior policy decision makers such as the President. We will study recent policy challenges such as Iraq and Afghanistan as examples of National Security policy.
PREREQUISITE: POL 201 AND POL 203

POL531 Global Environmental Politics

3 credits Offered By Announcement Only
Examination of the environment within the context of economic globalization. Contrasts the international trading regime and those regimes designed to protect the environment, with specific attention to the issues of global warming and bio-diversity.
PREREQUISITE: POL 203

POL535 Comparative Legal Systems

3 credits Fall & Spring Semester
Considers the institutional and political roles of Courts from a comparative perspective. With a focus on judicial independence and judicial review, will consider the juridical systems of a variety of countries and regions including the US, the EU, Germany, France, Great Britain, Chile, Argentina, Russia, The Asian-Pacific Rim, South Africa, Israel, Central America and the Middle East.
PREREQUISITE: POL 202 OR GRADUATE STANDING.

POL536 U.S. Health Care Crisis: Politics and Policies

3 credits Spring Semester
This seminar will explore the politics and policies of healthcare in the United States. Our examination of the current crisis in cost and coverage will draw on experience from the debates on comprehensive and incremental reform over the past decade. In addition, we will explore the politics and policies of other health and science issues. Students will be expected to attend every class and be actively involved in class discussions. There will be two examinations, one at mid-term and a final based on readings and course discussions.
PREREQUISITE: JUNIORS AND SENIORS ONLY (JUNIORS MUST HAVE JUNIOR STANDING THE SEMESTER THEY TAKE THE CLASS.)

POL541 Philosophy of Law

3 credits Offered By Announcement Only
Case-based study of jurisprudence designed to illuminate and explain philosophies of law. Examination of theories of free expression; bioethical matters; theories of punishment and legal responsibility; and the placement of religious discourses in liberal systems of law. Special attention to cases involving fundamental rights and liberties; the role of the individual and the state in civil society; and the capacities of individual to be legally competent in contemporary systems of law.
PREREQUISITE: POL 201, 212 OR POL 203 OR GRADUATE STANDING.
POL543 Urban Politics
3 credits
Offered By Announcement Only
Examination of sources of political power in urban areas and how they influence the policies pursued in those areas. Analysis of the role of economic power, protest actions, neighborhood groups, and voting to evaluate whether there is a bias in urban politics that systematically favors some groups over other and, if so, how likely it is that the bias can be overcome.
PREREQUISITE: POL 201 OR GRADUATE STANDING.

POL544 Chinese Foreign Policy
3 credits
Fall Semester
PREREQUISITE: POL 203

POL545 Environmental Policymaking
3 credits
Spring Semester
Examination of different ethical approaches to the environment; the federal government's management of natural resources; selected environmental policies; international environmental policy issues. Topics include federal management of national grazing lands, national forests, and minerals in the public domain. Analyzes environmental policies such as air, water, toxic wastes, energy, and environmentally-related issues in international trade and national security.
PREREQUISITE: POL 201 OR POL 203

POL547 Congressional Representation
3 credits
Not Offered; Transfer Credit Only
This course examines how and when citizens influence legislators' behavior. More specifically, we examine how legislators' floor behavior reflects citizens' preferences and how these preferences influence the manner in which legislators build electoral coalitions.
PREREQUISITE: POL 201

POL548 Civic Participation and Democracy
3 credits
Fall Semester
Citizens participate in the governing process by communicating their preferences and pressuring the government to respond. In this course we examine these various mechanisms of "civic participation", and discuss the meaning and consequences of participatory democracy. The course focuses on the contemporary United States, but we will devote some time to discuss civic participation in other countries as well.
PREREQUISITE: POL 201

POL550 Advanced Seminar on American Politics
3 credits
Fall Semester
This seminar provides students with a survey of significant research on major topics in American Politics. We will read influential works of the past, as well as recent cutting-edge research. Particular attention will be paid to discussing the methods and theories used in the research we will read. The purpose of the course is to acquaint students with the literature on American Politics, while also providing an opportunity for students to develop skills in critically assessing and skillfully conducting social science research.
PREREQUISITE: POL 201
POL551 Productivity in the Public and Non-Profit Sectors
3 credits  First Summer Session
Definitions and measures of productivity. Evaluation of government programs, and
methods of productivity improvement.
PREREQUISITE: POL 201

POL553 The Environmental Movement: Groups, Beliefs and Values
3 credits  Fall Semester
Exploration of the origins and political impact of environmentalism in the United
States and, to a lesser extent, in the global context. Impact of democratic participation
on environmental politics.
PREREQUISITE: POL 201

POL555 Total Quality Public Service Management: Achieving High Performance Government
3 credits  Fall Semester
Examination of the theory and practice of Total Quality Management (TQM) in the
government and non-profit sector. Focuses on budgetary, customer service, employee
and process improvements that facilitate increased public and non-profit performance.
Special emphasis to TQM's contribution to improved service delivery.
PREREQUISITE: POL 201

POL556 Politics and Ethics
3 credits  Offered By Announcement Only
Personal, professional, organizational, and societal levels of ethical analysis.
Ethical theories will be reviewed and applied to actual cases that focus on public
policy and/or the officials who create and implement it. Profiles of moral exemplars
in public life will be examined.
PREREQUISITE: POL 201 OR GRADUATE STANDING

POL557 Ethical and Managerial Issues in Government, Business and Non-Profit Organizati
3 credits  Offered By Announcement Only
Governments at all levels in this country-national (Larry Craig, David Vitter,
Mark Foley, Bill Clinton, Randy Cunnigham, Tom DeLay, William Jefferson, James
Traficant, Robert Torricelli, Jack Abramoff), state (former Illinois, Louisiana,
New York, Ohio and Arizona governors), and local (Miami, Providence city officials;
Miami-Dade, Broward, and Palm Beach counties) have encounter scandals involving
ethical wrongdoing. Business (Enron, Worldcom) and nonprofit organizations (Boy
Scouts, United Way) have faced similar problems. Countless less visible examples
of unethical and ethical behavior occur in organizations daily. This course examines
the causes and consequences of such actions and the managerial strategies and competencies
needed to effectively cope with the ethical issues confronting individuals and
organizations.
PREREQUISITE: POL 201 OR GRADUATE STANDING

POL558 From Electronic Government to Digital Governance
3 credits  Fall Semester
Explores the transition from electronic government to digital governance, emphasizing
citizen participation and citizen-centric public administration; examines the economic
and political consequences of new information technologies; studies the shift from
bureaucracy-centered to customer-centric service orientation as a means to reduce
costs, restore public trust, and improve service quality.
PREREQUISITE: POL 201
POL563 Senior Thesis
3 credits  Fall Semester
General reading, preparation of research design and collection of information for senior thesis.
PREREQUISITE: ADMISSION BY APPLICATION ONLY. SEE THE DIRECTOR OF UNDERGRADUATE STUDIES FOR DETAILS.

POL564 Senior Thesis II
3 credits  Spring Semester
Continuation of POL 563: writing and defense of the theses.
PREREQUISITE: ADMISSION BY APPLICATION ONLY. SEE THE DIRECTOR OF UNDERGRADUATE STUDIES FOR DETAILS.

POL570 Uniting States in International Perspective
3 credits  Fall Semester
How states form and fragment; The main actors in nation formation; the elements of continuity and change; the impact outsiders can have on the process.
PREREQUISITE: POL 211 AND POL 212

POL577 Security in South Asia: The Conflicts of Afghanistan, Pakistan and India
3 credits  Fall & Spring Semester
The security system of South Asia's northern reaches and the current conflict involving Afghanistan, Pakistan, and India: considerations of sovereignty and the role of frontiers in world politics.
PREREQUISITE: POL 203

POL578 Energy and Security in the Caspian and Black Sea Regions
3 credits  Fall & Spring Semester
The intersection of energy and security within the contested geopolitical and geocultural space of the Caspian and Black Sea basins. It is concerned with these two, interconnected, sub-regions for what they tell us about ideas and acts, identities and interests, in a notoriously fluid period in international politics.
PREREQUISITE: POL 203

POL579 The politics of post-communist transactions
3 credits  Fall Semester
Examination of the creation, breakdown, and aftermath of communist governments in Eastern Europe and the USSR. Develops a theoretical framework for understanding cross-national patterns of post-communist development in the context of country-specific experiences.
PREREQUISITE: POL 202

POL580 Ethnicity, Nationalism and Secession
3 credits  Spring Semester
Examination of the creation, breakdown, and aftermath of communist governments in Eastern Europe and the Soviet Union. Using empirical evidence from four case studies, develops a theoretical framework for understanding cross-national patterns of post-communist development in the context of country-specific experiences.
PREREQUISITE: POL 202 OR POL 203
POL581 Comparative Political Economy of Post-Industrial Democracies
3 credits  Fall Semester
This seminar examines four key turning points in the development of capitalism: the industrial revolution, the aftermath of the depression and world wars, the oil crisis of the 1970's, and today's "globalization". We will compare the relationships between government and the economy in Western Europe, Canada, the U.S., Australia, New Zealand, and Japan in each period, and attempt to evaluate why these countries react similarly or differently to identical changes in world economy.
PREREQUISITE: POL 202

POL582 Political Economy of Development
3 credits  Offered By Announcement Only
Overview of the principal theoretical paradigms of the development process Comparative analysis of issues such as the role of the state, strategies of industrialization, changes in social structure, basic needs and the trade-offs between growth and equity.
PREREQUISITE: POL 202 OR GRADUATE STANDING.

POL584 Contemporary Latin American Politics
3 credits  Fall & Spring Semester
This course assumes a basic knowledge of Latin American politics, and is designed to foster deeper understanding of political processes in the region and to provide an overview of key debates among political scientists specializing in Latin America. We discuss issues related to democratic consolidation, political participation, representation and governance.
PREREQUISITE: POL202, POL 385 IS STRONGLY RECOMMENDED

POL586 Conflict in the Middle East and Africa
3 credits  Fall Semester
Introduction to major paradigms for the explanation of war and conflict in two of the most unstable regions of the world. Reading and class discussions on select cases of current and past conflicts in each region in order to discern patterns of conflict within and across regions, gain a clearer understanding of what drives violent conflict, and assess strategies of resolution.
PREREQUISITE: POL 203.

POL588 Politics in China
3 credits  Spring Semester
Development and nature of Chinese domestic politics in theory and practice; problems of political stability and conflict; the role of historical and cultural traditions, institutions, social, economic and personality factors in Chinese politics; process of change and problems of leadership succession; the significance of changes in the character and style of Chinese leadership.
PREREQUISITE: POL 202 OR HIS 121 OR HIS 122 OR GRADUATE STANDING.

POL591 International Security
3 credits  Offered By Announcement Only
Analysis and evaluation of approaches to international conflict, resolution, reduction and stabilization such as international organization, law, collective security, balance of power, functionalism, world government, morality, and conscience. Special emphasis on recent problems and efforts at institutionalizing social control.
PREREQUISITE: POL 203 OR GRADUATE STANDING.
POL592 International Political Economy
3 credits
Offered By Announcement Only
This course provides an analysis of the changing trade and financial structures of the international economy and the differing approaches that developed and developing states have taken in adapting to them. Special emphasis will be placed on the political implications of economic strategies, the challenges and opportunities posed by the increasingly free mobility of capital and goods across borders, and the ability of states to shape domestic economic outcomes.
PREREQUISITE: POL 203

POL593 International Relations of the Middle East
3 credits
Offered By Announcement Only
Regional and interregional analysis of the foreign relations of Middle Eastern nations, domestic and geopolitical factors.
PREREQUISITE: POL 203, 387 OR GRADUATE STANDING.

POL599 Special Topics
1-3 credits
Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: POL 201, POL 202 OR 203

POL601 Seminar in Political Theory
3 credits
Offered By Announcement Only

POL602 Seminar in Public Law
3 credits
Offered By Announcement Only

POL603 Seminar in the Political Process
3 credits
Offered By Announcement Only

POL604 Seminar in International Law and Relations
3 credits
Offered By Announcement Only

POL605 Seminar in Comparative Government
3 credits
Offered By Announcement Only

POL606 Seminar in Administration
3 credits
Spring Semester
Examination of theory and behavior in public and nonprofit organizations. Focus on the importance of understanding the behavior, motivations, and actions of individuals in public service and on the distinctiveness of management and leadership in public organizations.

POL607 Seminar in U.S. Government
3 credits
Offered By Announcement Only

POL621 Group Structure, Group Process and Organizational Change in Criminal
3 credits
Offered By Announcement Only
Measurement of the institutional climate of criminal justice institutions, strategies for change; relationships between the organizational structure and outcomes.
POL643 Seminar on Urban Development Policy
3 credits  Offered By Announcement Only
The course will employ a problem approach to selected policy issues, ranging from interdisciplinary theories of urbanization in conjunction with politico-educational to scientific-technological developments. Consideration will be given to appropriate research techniques, field work and case studies of public action for guiding urban development, including intergovernmental relations and national urban policy.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL644 Seminar on Urban Development Policy
3 credits  Offered By Announcement Only
Continuation of POL 643.
PREREQUISITE: POL 643 OR PERMISSION OF INSTRUCTOR.

POL646 Public Policy Analysis and Administration
3 credits  Spring Semester
Examination of public policy issue areas including education, health, welfare, urban mass transit. Limits to effectiveness of federal, state and local governments in providing services. Techniques for analyzing the effectiveness of public policies; research techniques for the assessment of future policy alternatives.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL647 Personnel Administration
3 credits  Fall Semester
Modern personnel administration: job analysis and design, evaluation and appraisal, recruitment and interviewing, training and development, wages and benefits, and health and safety. Unionization, regulation of wages, hours and working conditions, financial security for workers, and job anti-discrimination legislation. Manpower planning.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL648 Community Participation and Organization
3 credits  Offered By Announcement Only
Examination of citizen participation in administrative affairs of governmental organizations and its impact on the efficiency of public agencies.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL652 Public Sector Collective Bargaining and Labor-Management Relations
3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL653 Seminar in Public Sector Personnel Problems
3 credits  Offered By Announcement Only
Human resource planning, performance, evaluation, recruitment and staffing, training and development, motivation, and personnel management. A workshop utilizing simulation, games, role playing and other skill building devices.
PREREQUISITE: MGT 602 AND PERMISSION OF INSTRUCTOR.
COLLEGE OF ARTS AND SCIENCES
POLITICAL SCIENCE

POL655 Public Policy and Health
3 credits First Summer Session
Development of public policy at the federal, state and local level. Policy process, models of policy analysis, policy development in several government service areas, and plans for policy change. Special emphasis on health policy formulation, implementation and the use of epidemiological tools in health policy analysis.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL656 Public Service Internship
3-6 credits Fall & Spring Semester & First & Second Summer Session
Individual on-the-job work experience; arranged and monitored by a faculty member.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

POL671 Political Environment of Business
3 credits Fall & Spring Semester & First & Second Summer Session
Examines government-business-society relations with emphasis on the social, economic, political, technological, ethical, and ecological environment.

POL672 Program Planning, Research and Evaluation in Criminal Justice and Corrections,
3 credits Offered By Announcement Only
Identification of long-term goals and intermediate objectives in the criminal justice process. Formulation of operations, evaluation techniques and the relationships among research, evaluation and management decisions.
PREREQUISITE: GRADUATE STANDING.

POL673 Program Planning, Research and Evaluation in Criminal Justice and Corrections,
3 credits Offered By Announcement Only
Continuation of POL 672. Topics include types of evaluation and the design of evaluative studies. POL 672 and POL 673 are designed to facilitate the formulation and execution of a thesis.
PREREQUISITE: POL 672 OR PERMISSION OF INSTRUCTOR.

POL681 Seminar: Political Dynamics in Communist China
3 credits Offered By Announcement Only

POL683 Seminar: Topics in the Comparative Study of the Foreign Policy of China
3 credits Offered By Announcement Only

POL685 Seminar in the Dynamics of Soviet Society
3 credits Offered By Announcement Only
Forces and factors that shape and continue to influence the development of social, political and economic institutions in the Former Soviet Union and their evolving role in decision making.

POL690 Topics in Urban Studies
3 credits Offered By Announcement Only

POL699 Directed Readings
1-3 credits Fall & Spring Semester & First & Second Summer Session

POL710 Master's Thesis
3 credits Offered By Announcement Only
Designed for student working on masters' theses. Not to exceed six credit hours, as determined by student's advisor. Credit is not awarded until the thesis has been accepted.
POL720 Research in Residence
0 credit  Offered By Announcement Only
Research in residence for thesis or master's degree after the student has enrolled for the permissible cumulative total in POL 710 (usually six credits). Credit not granted; regarded as full time residence.

PORTUGUESE

POR591 Directed Readings in Portuguese
1-3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

POR592 Directed Readings in Portuguese
1-3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

POR593 Directed Readings in Portuguese
1-3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

POR625 Portuguese for Graduate Research
0 credit  Offered By Announcement Only
Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

POR635 Portuguese Language Skills for Graduate Studies
3 credits  Fall Semester
Portuguese 635 is designed to enhance graduate student's communication skills in the Portuguese language, at the low advanced level of proficiency. It is intended principally for those students who will be carrying out research in areas related to the Lusophone world.
PREREQUISITE: PREVIOUS STUDY/KNOWLEDGE OF PORTUGUESE AT THE BASIC LEVEL

PSYCHOLOGY

PSY501 History and Systems of Psychology
3 credits  Offered By Announcement Only
Development of psychology as a science.
PREREQUISITE: 12 CREDITS IN PSYCHOLOGY.

PSY502 Culture, Values, Religiosity, and Mental Illness
3 credits  Offered By Announcement Only
Cultural differences in the manifestation, course, and outcome of serious mental disorders; the relationship between chronic mental disorders and ethnicity, religious values, family cohesion, attributions of control, and world view; cultural differences in societies' reactions to and treatment of mentally ill patients.
PREREQUISITE: PSY 110; 316; 352.

PSY590 Special Topics
1-3 credits  Offered By Announcement Only
PREREQUISITE: SENIOR UNDERGRADUATE OR GRADUATE STUDENT STATUS OR PERMISSION OF DIRECTOR OF UNDERGRADUATE STUDIES.

PSY600 Sensory Processes
3 credits  Offered By Announcement Only
Mechanisms of vertebrate sensation, with emphasis on the structure and function of the peripheral organs. Lecture, 2 hours; laboratory, 2 hours.
PREREQUISITE: GRADUATE STANDING.
PSY601 Issues in Professional Development and Research.
1 credit  Fall Semester
Seminar addressing issues such as structure of academic systems and progress through them, time management, library search systems, professional journals, how to structure curriculum vitae, procedures and rules in human subject research, professional meetings and presentations, extramural funding opportunities, professional writing style, ethical issues.
PREREQUISITE: GRADUATE STANDING IN PSYCHOLOGY.

PSY602 Scientific writing and grantsmanship
3 credits  Offered By Announcement Only
Writing and organizational skills for professional development in social and behavioral sciences. Mechanism of extramural funding and grant review, including grantsmanship.
PREREQUISITE: GRADUATE STANDING.

PSY603 NEUROANATOMY
3 credits  Fall Semester
PREREQUISITE: GRADUATE STANDING

PSY604 Cognition and Emotion
3 credits  Spring Semester
Study of basic cognitive processes of attention and memory, the function of emotions, and the role of cognitive mechanisms in the processing of affective information.

PSY605 Cognitive Neuroscience
3 credits  Fall Semester
Brain mechanisms in cognition and behavior, including sensory encoding and perception, attention, motivation, emotion, learning/memory, language, executive functions, and mental disorders.
PREREQUISITE: GRADUATE STANDING.

PSY606 Biobehavioral Processes and Disease in Health Psychology
3 credits  Spring Semester
Psychological and behavioral processes on health, well-being, and disease. Basic mechanisms of physiological regulation and dysregulation of cardiovascular, endocrine, and immune systems with specific reference to issues in cardiovascular behavioral medicine and psychoneuroimmunology.
PREREQUISITE: PSY 610

PSY607 Neurosciences I: Neuronal Mechanisms
3 credits  Offered By Announcement Only
Biophysical, biochemical and morphological approaches at the cellular level to nervous integration as a basis for behavior. Lecture, 3 hours.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
PSY608 Neurosciences II: Nervous System Integration
3 credits
Offered By Announcement Only
Survey of neural control mechanisms underlying behavior. Organization and synaptic connections of specific invertebrate, brain and spinal cord control systems using neurohistological, neurophysiological and neuro-pharmacological procedures.
PREREQUISITE: BIL 660 OR PSY 607 OR PERMISSION OF INSTRUCTOR.

PSY609 Psychopharmacology
3 credits
Offered By Announcement Only
Basic methods and current issues in psychopharmacology.
PREREQUISITE: PSY 605 OR PERMISSION OF INSTRUCTOR.

PSY610 Behavioral Medicine: Overview of Basic Science, Public Health & Clinical Trial
3 credits
Fall Semester
Psychological factors in the etiology, pathogenesis, diagnosis, prevention and treatment of physical disorders.

PSY611 Social Psychology of Health and Illness
3 credits
Offered By Announcement Only
Topics in behavioral medicine, including social and personality factors affecting disease susceptibility, health related beliefs and behaviors; the doctor-patient relationship; evaluation of health care systems and patient compliance.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

PSY612 Stress, Emotions, and Motivation
3 credits
Spring Semester
PREREQUISITE: PSY 605 OR EQUIVALENT.

PSY613 Psychoneuroimmunology
3 credits
Spring Semester
Structural and functional aspects of the immune system that are sensitive to neural and psychological processes. Interactions between the nervous and immune systems are examined in relation to empirical associations between psychological factors (i.e., stress) and immune-mediated processes in diseases such as cancer and AIDS.
PREREQUISITE: PSY 605 OR PERMISSION OF INSTRUCTOR.

PSY614 Diversity issues in psychology
3 credits
Spring Semester
Overview of diversity issues including race, religion, gender, age, sexual orientation, physical disability and socioeconomic status as they relate to psychological research and clinical practice.
PREREQUISITE: GRADUATE STANDING.

PSY615 Foundations of neuropsychology
3 credits
Spring Semester
Mechanisms of neurological and psychiatric disorders, including developmental disorders, dementia, aphasia, amnesia, stroke, traumatic brain injury, and loss of general intelligence. Clinical tools for neuropsychological assessment, forensics, and genetic screening.
PREREQUISITE: GRADUATE STANDING

PSY616 Biobehavioral Processes and Clinical Research Applications in Health Psychology
3 credits
Fall Semester
PREREQUISITE: PSY 606, PSY 610
PSY620 Developmental Psychology
3 credits
Offered By Announcement Only
Emphasis on applied research and interventions.

PSY621 Theories of Development
3 credits
Fall Semester
Theoretical aspects of psychological development throughout the life span.
PREREQUISITE: PSY 620.

PSY622 Deviant Intellectual Development
3 credits
Offered By Announcement Only
Disorders of intellectual development: Mental retardation, learning problems, and language delays (etiology, epidemiology, and prognosis). Does not include clinical applications.

PSY623 Deviant Communicative Development
3 credits
Offered By Announcement Only
The nature of deviant acquisition of communication systems. Specific language and speech problems of developmentally disabled, sensorial impaired and physically handicapped children. Intervention methods utilizing traditional and nonverbal approaches.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF THE INSTRUCTOR.

PSY624 Atypical Social Development
3 credits
Spring Semester
The theoretical and empirical literature on social development in children with psychopathology, mental retardation, and/or those who have experienced trauma.
PREREQUISITE: PSY 620.

PSY625 Social Psychology
3 credits
Fall Semester
Overview of the major substantive areas and theories of social psychology. Emphasis on applications to health-related concerns.

PSY626 Social Influence Processes
3 credits
Offered By Announcement Only
The major elements reviewed are source, message and target. The various processes include persuasion threats, promises and activation of normative commitments. Sub-areas of social psychology included are conformity, leadership, propaganda, social conflicts, decision theory, and social power.
PREREQUISITE: PSY 625.

PSY627 Interpersonal Attraction
3 credits
Offered By Announcement Only
A review of theories, methods and empirical findings related to the study of interpersonal affiliation and affect.
PREREQUISITE: PSY 625.
PSY628 Theories of Personality
3 credits Offered By Announcement Only
A thorough comparative study of the major theoretical positions in the field of personality in terms of units of analysis, the structure of personality, the development of personality, the relation of personality to other fields of Psychology, the relation of personality to fields of knowledge outside psychology, (biology, sociology, anthropology) and the heuristic value of the theory.
PREREQUISITE: PSY 640.

PSY630 Research Methods in Psychology.
1-3 credits Fall Semester
Fundamentals of behavioral research including experimental, and non-experimental design, clinical trial methodology, measurement theory, and statistical methods.
Computer applications of univariate statistical techniques.
PREREQUISITE: PSY 631

PSY631 Psychological Statistics, Research Methods and Design
3 credits Fall Semester
Statistics for experimental design with uncorrelated independent variables. Review of t-tests; designs and applications of analysis of variance; including one-way, factorial, repeated-measures, and mixed designs; post hoc comparisons among means.
PREREQUISITE: PSY 630 OR PERMISSION OF INSTRUCTOR.

PSY632 Multiple Regression and Multivariate Statistics
3 credits Spring Semester
Techniques for the analysis of multiple quantitative measurements including multiple regression, multivariate analysis of variance, discriminant analysis and canonical correlation. Computer application of these techniques to the behavioral sciences.
PREREQUISITE: PSY 630 OR EPS 568 AND 653 OR PERMISSION OF INSTRUCTOR.

PSY633 Structural Equation Modeling
3 credits Fall Semester
Structural equation modeling. Specific and testing explicit theory based models of covariances among variables. Structural models, path analysis, measurement models, and confirmatory factor analysis, particularly related to hypotheses about causal relations, change over time, and comparisons across diverse populations.
PREREQUISITE: PSY 632.

PSY634 Hierarchical Linear Evaluation
3 credits Spring Semester
Hierarchical linear modeling. Multi-level modeling of nested and non-independent data. Application of multi-level modeling to social science and behavioral data, including computer laboratory exercises.
PREREQUISITE: PSY 632

PSY635 Data-Base Management Systems in the Psychological Sciences
3 credits Offered By Announcement Only
Management of large data sets in the psychological sciences, including evaluation research, clinical client data, epidemiological studies, demographic studies and laboratory research.
PREREQUISITE: GRADUATE STANDING IN PSYCHOLOGY OR PERMISSION OF THE INSTRUCTOR.
PSY636 Developmental Methodology
3 credits
Fall Semester
Concepts and research design problems for the analysis of developmental data from infancy through adolescence.
PREREQUISITE: PSY 620 OR EQUIVALENT.

PSY637 Methods in Social Psychology
3 credits
Offered By Announcement Only
Methodology of experimental research in social psychology, including problems of research setting, sampling, experimenter-subject relationships, and methods of collecting social psychological data. Lecture, seminar, and laboratory.
PREREQUISITE: PSY 625.

PSY638 Psychology of Infant Development
3 credits
Offered By Announcement Only
Theory, research, and methodology pertaining to psychological development in the first two years of life. Applied research on infancy as it pertains to individual differences in cognitive, social, and emotional development.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

PSY639 Psychology of Mental Retardation and Developmental Disabilities
3 credits
Offered By Announcement Only
Learning disabilities, autism and other developmental disabilities with an emphasis on mental retardation. Definitions, causal factors, societal attitudes and services from an historical perspective.

PSY640 Adult Psychopathology
3 credits
Fall Semester
Theories, models, history, and research relevant to various patterns of problematic behavior, with a focus on adults. The influences of family systems as well as cultural and other diversity factors (e.g., ethnicity, sexual orientation) are included.

PSY641 Child and Adolescent Psychopathology
3 credits
Fall Semester
Theories, models, and research relevant to the development and the course of behavioral disorders and other problems (e.g., maltreatment, exposure to violence and poverty) that emerge in childhood and adolescence. The influences of family and peer systems as well as cultural and other diversity factors (e.g., ethnicity, sexual orientation) are included.

PSY642 Advanced Adult Psychopathology
3 credits
Fall Semester
Theory and research on risk factors and etiological models of mental disorders. Socioenvironmental (cultural, social support, life events), psychological (temperament, cognitive biases), and biological (genes, neurotransmitters) models of risk, research methodology, and design are discussed.
PREREQUISITE: GRADUATE STANDING IN PSYCHOLOGY OR PERMISSION OF INSTRUCTOR.

PSY643 Behavioral Medicine and Developmental Disabilities
3 credits
Fall & Spring Semester
Processes influencing diagnosis and management of developmental disabilities: genetics, embryology/fetology, physical growth and development, nutrition, hearing and speech pathology, family dynamics, cognition and psycho-educational assessment.
PSY645 Introduction to Psychological Evaluation
3 credits  Fall Semester
Measurement theory; introduction to the administration and interpretation of widely-used intelligence and personality tests, with attention to issues of ethics and diversity.
PREREQUISITE: PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY646 Psychological Evaluation of Adults
3 credits  Spring Semester
Issues of diversity, ethics, and personality theory as they pertain to psychological evaluation of adults. Emphases on the use of projective and objective personality assessment methods.
PREREQUISITE: PSY 645 AND PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY647 Psychological Evaluation of Children and Families
3 credits  Spring Semester
Clinical and developmental theory and methods pertaining to the evaluation of children, adolescents, and families including intelligence tests, structured diagnostic instruments, personality and behavioral check lists, observational formats, interviewing, and projective assessment. Attention to issues of ethics and diversity.
PREREQUISITE: PSY 645 AND PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY648 Psychological Evaluation in Physical Disorders
3 credits  Spring Semester
Administration, interpretation, and psychometric evaluation of psychological tools and procedures used in the evaluation of physical disorders. Attention to issues of ethics and diversity.
PREREQUISITE: PSY 610 OR 645 OR PERMISSION OF INSTRUCTOR.

PSY649 Evaluation of the Mentally Retarded and Brain-Damaged Child
3 credits  Offered By Announcement Only
Special diagnostic and evaluative procedures and techniques used with the intellectually inefficient child. Laboratory required.
PREREQUISITE: PSY 441, 645 OR EQUIVALENT.

PSY650 Laboratory in Clinical Psychology
0 credit  Fall & Spring Semester
Practical training in clinical skills such as assessment, interviewing, and case conceptualization. Laboratory to be used in conjunction with courses such as PSY 640 and PSY 645
PREREQUISITE: PERMISSION OF THE DIRECTOR OF THE CLINICAL TRAINING PROGRAM

PSY651 Infant Assessment
3 credits  Offered By Announcement Only
Background, history, purpose, and utility of infant assessments. Evaluation of various methods of assessing cognitive, social, language, and emotional development on conceptual, psychometric, empirical and practical grounds.

PSY655 Counseling and Psychotherapy
3 credits  Offered By Announcement Only
Theory and research on traditional and modern therapeutic methods.
PREREQUISITE: PSY 604 OR PERMISSION OF INSTRUCTOR.
PSY656 Introduction to Evidence-Based Psychological Treatments
1-3 credits   Fall Semester
Theories, history, and techniques of psychological and behavioral therapies, with emphasis on evidence-based approaches.
PREREQUISITE: PSY 640.

PSY657 Introduction to Psychotherapy, Ethics, and Professional Issues
3 credits   Spring Semester
Introductory experience in clinical interviewing, therapeutic communication, ethics, and case conceptualization. Consideration of client-and-therapist culture, gender, and diversity are also emphasized.
PREREQUISITE: PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY658 Introduction to Clinical Methods II
3 credits   Offered By Announcement Only
Continuation of PSY 657.
PREREQUISITE: PSY 657 AND PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY659 Evidence-Based Psychological Treatments for Adults
3 credits   Offered By Announcement Only
Continuation of PSY 656 with emphasis on a broad range of research pertaining to the efficacy and effectiveness of psychological treatments for adults.
PREREQUISITE: PSY 656 AND PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY660 Evidence-Based Psychological Intervention with Children and Families
3 credits   Fall Semester
Theories, history, and techniques of psychological and behavioral therapies, with emphasis on evidence-based approaches with children, adolescents, and families. Understanding normative and deviant development, with attention to issues of diversity, ethics, and domestic violence.
PREREQUISITE: PSY 656 OR PERMISSION OF INSTRUCTOR.

PSY661 Interventions in Pediatric Psychology
3 credits   Spring Semester
Pediatric psychology and basic learning theory. Medical and behavioral aspects of child and adolescent health disorders, psychological assessment, and evidence-based treatment approaches.
PREREQUISITE: PSY 656 AND PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY662 Health Psychology Interventions
3 credits   Fall Semester
Clinical interventions and research relevant to health problems and lifestyle, with emphasis on critical evaluations of past research and the design and implementation of intervention protocols. The origins of health psychology and the role of the health psychologist in medical systems.
PREREQUISITE: PSY 610 OR 656 OR PERMISSION OF INSTRUCTOR.
PSY663 Cognitive Behavior Therapy
3 credits
Offered By Announcement Only
Theory, history, research, and practice in cognitively oriented forms of therapy, including cognitive restructuring, rational emotive therapy, and cognitive behavior modification.
PREREQUISITE: PSY 656 AND PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY664 Group Psychotherapy
3 credits
Offered By Announcement Only
Procedures, techniques, and theoretical perspectives.
PREREQUISITE: PSY 656 OR PERMISSION OF DIRECTOR OF CLINICAL TRAINING.

PSY665 Family Therapy
3 credits
Offered By Announcement Only
History of family therapy, including theoretical perspectives, methods, and techniques associated with each. Includes behavioral, cognitive, dynamic, interpersonal, and systems family therapeutic approaches, in addition to a focus on family developmental process. Attention to ethics and diversity.
PREREQUISITE: PSY 656 OR PERMISSION OF DIRECTOR OF CLINICAL TRAINING.

PSY666 Research and Theory of Early Intervention
3 credits
Fall Semester
Theories, models, methods, purposes, and utility of intervention in young children. Includes illustrative examples from contemporary intervention research literature.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

PSY670 Practicum in Clinical Psychology
1-3 credits Fall & Spring Semester & First & Second Summer Session
Supervised experience in evaluating and treating psychological problems of children, adolescents, families, and/or adults behavior. For students placed at the U.M. Psychological Services Clinic there is a weekly case conference that focuses on ethics case conceptualization. Course may be repeated for credit.
PREREQUISITE: PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY671 Practicum in Clinical Psychology II
0 credit
Fall Semester
Continuation of PSY 670.
PREREQUISITE: PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.
COREQUISITE(S): PSY 645

PSY672 Advanced Practicum in Clinical Psychology
1-3 credits Fall & Spring Semester
Advanced experience in special clinical techniques and clinical supervision. Primarily for post-internship clinical students. The advisor may direct that PSY 672 be repeated, but no more than six credits may be applied toward a degree.
PREREQUISITE: PSY 671 AND PERMISSION OF DIRECTOR OF CLINICAL PSYCHOLOGY TRAINING PROGRAM.

PSY673 Advanced Practicum in Professional Psychology I
1-3 credits Fall & Spring Semester
Advanced experience in special clinical techniques, supervision and/or teaching. No more than a total of six credits in PSY 673 and 674 may be counted toward the required 90 credits for the Ph.D. degree.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
PSY674 Advanced Practicum in Professional Psychology II
1-3 credits    Fall & Spring Semester
A continuation of PSY 673. No more than a total of six credits in PSY 673 and 674 may be counted toward the required 90 credits for the Ph.D. degree.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PSY675 Field Experience in Behavioral Medicine
3 credits                                              Offered By Announcement Only
Observation, assessment, and/or health psychology intervention opportunities in physical health care settings.
PREREQUISITE: PSY 605, 640. COREQUISITE: PSY 612 OR 623.

PSY676 Practicum on Mental Retardation
3 credits                                              Offered By Announcement Only
Specialized practicum especially in the evaluation or counseling, both individual and group with retardates.
PREREQUISITE: PSY 670.

PSY680 Research
1-4 credits    Fall & Spring Semester & First & Second Summer Session
Investigation of an original problem.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PSY681 Research
1-4 credits    Fall & Spring Semester & First & Second Summer Session
Investigation of an original problem.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PSY682 Special Projects
2-4 credits    Fall & Spring Semester
Designed to allow students to earn credit in special projects of educational nature which do not fit readily into existing course offerings. Not to be used as a substitute for other courses.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF CHAIRMAN.

PSY683 Special Topics
3 credits                                              Fall & Spring Semester
Topics in selected areas of specialization.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

PSY684 Readings in Psychology
3 credits                                              Fall & Spring Semester
Supervised readings in selected topics.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

PSY685 Seminar in Clinical Psychology
3 credits                                              Fall & Spring Semester

PSY686 Seminar in Clinical Psychology
3 credits                                              Fall & Spring Semester

PSY687 Seminar in Clinical Psychology
3 credits                                              Offered By Announcement Only

PSY710 Master's Thesis
1-6 credits  Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

PSY720 Research in Residence
0 credit  Fall & Spring Semester
Research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in PSY 710 (usually six credits). Credit not granted. May be regarded as full time residence.

PSY725 Continuous Registration--Master's Study
0 credit  Fall & Spring Semester
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

PSY730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

PSY740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PSY 740 may be taken in a regular semester, nor more than six in a summer session.
PREREQUISITE: ADMISSION TO PH.D. CANDIDACY

PSY750 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

RELGIOUS STUDIES

REL501 Supervised Reading in Religious Literature or Texts
1-3 credits  Offered By Announcement Only
Independent study to enable students to read extensively in an area of personal interest in religious literature or texts.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL502 Supervised Reading in Religious or Historical Traditions
1-3 credits  Offered By Announcement Only
Independent study to enable students to read extensively in an area of personal interest in religious or historical traditions.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

REL503 Supervised Reading in Religious Issues or Problems
1-3 credits  Offered By Announcement Only
Independent study to enable students to read extensively in an area of personal interest in religious issues or problems.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
REL505 Seminar in Ancient Studies  
3 credits 
Offered By Announcement Only  
Various topics in Greek and Roman Studies.  
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR.

REL510 Seminar in Hebrew Bible and Ancient Judaism  
3 credits 
Offered By Announcement Only  
Selected topics in Hebrew Bible and Ancient Judaism.  
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF THE INSTRUCTOR.

REL520 Seminar in New Testament and Early Christianity  
3 credits 
Offered By Announcement Only  
Selected topics in New Testament and Early Christianity.  
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF THE INSTRUCTOR.

REL530 Seminar in Religious or Historical Traditions  
1-3 credits 
Offered By Announcement Only  
Selected topics in religious or historical traditions.  
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF INSTRUCTOR.

REL550 Seminar in Religious Ethics  
3 credits 
Offered By Announcement Only  
Selected issues in religious ethics and their social implications.  
PREREQUISITE: SIX CREDITS IN RELIGIOUS STUDIES AND JUNIOR STANDING.

REL560 Seminar in Contemporary Religious Issues  
1-3 credits 
Offered By Announcement Only  
Selected topics in contemporary religious issues.  
PREREQUISITE: JUNIOR STANDING AND SIX CREDITS IN RELIGIOUS STUDIES; PERMISSION OF INSTRUCTOR.

SOCIOLOGY  
SOC601 Classical Sociological Theory  
3 credits 
Offered By Announcement Only  
Major orientations of modern sociology with emphasis upon structural and functional theories.  
PREREQUISITE: SOC 611, GRADUATE STATUS AND INSTRUCTOR PERMISSION

SOC602 Contemporary Sociological Theory  
3 credits 
Offered By Announcement Only  
PREREQUISITE: SOC 611, GRADUATE STATUS AND INSTRUCTOR PERMISSION

SOC603 Selected Topics in Social Theory  
3 credits 
Offered By Announcement Only  
PREREQUISITE: SOC 601, 602. GRADUATE STATUS OR CONSENT OF INSTRUCTOR
SOC604 Proseminar in Sociology
1 credit  Fall Semester
Introduction to Sociology: the research process, departmental resources, and the graduate program. 
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC610 Advanced Research Methods
3 credits  Offered By Announcement Only
Quantitative techniques for the measurement of theoretical constructs, the consequences of technique selection, and the relationships between method and underlying theory. 
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR.

SOC611 Advanced Sociological Statistical Analysis I
3 credits  Fall Semester
Introduction to the general linear model for continuous variables in sociological research. Foundations of the model and computerized applications. 
PREREQUISITE: SOC 611, GRADUATE STATUS AND INSTRUCTOR PERMISSION

SOC612 Sociological Statistics II
3 credits  Offered By Announcement Only
Multiple linear regression and regression diagnostics, analysis of categorical dependent variables, count dependent variables, simultaneous equations, and panel data models. 
PREREQUISITE: SOC 611, GRADUATE STATUS AND INSTRUCTOR PERMISSION

SOC613 Qualitative Research Methods
3 credits  Offered By Announcement Only
Qualitative methods, based in a grounded theory orientation, focusing on participant observation and interviewing; methods for the collection of data in naturalistic social settings, with simultaneous data analysis; the history of such approaches; ties between methods and theory; the basic methods used in qualitative research, and typical analytic approaches; current issues and debates relevant to this set of approaches to generating knowledge. 
PREREQUISITE: SOC 611, GRADUATE STATUS AND CONSENT OF INSTRUCTOR

SOC614 Evaluation Research
3 credits  Offered By Announcement Only
Conceptualizing, designing, conducting, and interpreting the results of evaluation research programs in health and human service agencies. 
PREREQUISITE: SOC 610, 611, GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC615 Class Structure and Social Stratification
3 credits  Offered By Announcement Only
Theoretical and research approaches to class structure and social stratification, with a focus on the U.S. Examines the conflict perspective(s) and major alternative views including economic class, status and power, gender and race. 
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

SOC616 Social Psychology: Sociological Perspectives
3 credits  Offered By Announcement Only
Sociological theories and research explaining the influence of human groups and social processes on personality and human social behavior. 
PREREQUISITE: SOC 611, GRADUATE STATUS AND INSTRUCTOR PERMISSION
SOC617 Social Organization
3 credits
Offered By Announcement Only
Effects of industrial downsizing on occupational structure, family income, and social mobility are examined and related to changes in class, ethnic, and racial identity.
PREREQUISITE: SOC 611, GRADUATE STATUS AND INSTRUCTOR PERMISSION

SOC620 Social Epidemiology
3 credits
Offered By Announcement Only
Theories, issues and methods of study pertinent to health and illness in society. Social factors implicated in patterns of disease occurrence.
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC622 Teaching Seminar in Sociology
3 credits
Fall Semester
Pedagogical techniques for teaching Sociology at the college/university level.
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC632 Social Psychology of Health and Illness
3 credits
Offered By Announcement Only
Social and psychological factors affecting susceptibility to illness, health related beliefs and behaviors: the doctor-patient relationship: evaluation of health care systems and patient compliance.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR

SOC635 Medical Sociology: Issues in Research and Theory.
3 credits
Offered By Announcement Only
Examination of health, illness, and health care from sociological perspectives. Includes social-structural, interpretive, and critical approaches, as various authors have used these to address specific issues. Phenomena to be examined range from macro (e.g. population patterns of mortality and morbidity, health care policy) to micro (e.g. the subjective experience of illness). Related theories and methodologies discussed. Focus varies somewhat by instructor and as issues emerge in the discipline.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

SOC650 Social Analysis of Race Relations
3 credits
Offered By Announcement Only
The impact of race relations research on the discipline of sociology.
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC651 Race Relations: Social Psychological Perspectives
3 credits
Offered By Announcement Only
Social psychological perspectives on the nature, causes, and consequences of racial inequality in American society.
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC652 Theories of Race and Ethnic Relations
3 credits
Offered By Announcement Only
Micro- and macro-level theories of race and ethnic relations.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR
SOC653 RACE, IDEOLOGY, AND FRAMING INEQUALITY
3 credits
Offered By Announcement Only
Examines the various ideologies that have emerged on the limited states to describe and, at times, resist racial inequality. PREREQUISITE: GRADUATE STATUS AND INSTRUCTOR PERMISSION

SOC671 Seminar on Criminology
3 credits
Offered By Announcement Only
Selected issues, topics, theories, and recent research in criminology. PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC672 Research in Crime and Delinquency
3 credits
Offered By Announcement Only
Measurement issues; effects of race, gender, age, and socio-economic status on criminality; extra-legal factors affecting criminal justice decision making. PREREQUISITE: SOC 610 AND 611, GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC673 Theories of Criminology
3 credits
Offered By Announcement Only
Review and critique of central criminological theories. Evaluation of these theories in view of recent criminological research. PREREQUISITE: NONE

SOC675 Theories of Criminology
3 credits
Offered By Announcement Only
Review and Critique of central criminological theories. Evaluation of these theories in view of recent criminological research. PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC690 Directed Studies
1-3 credits
Offered By Announcement Only
Individually supervised readings or research on special topics. Offered by arrangement with the instructor. PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC691 Special Topics and Current Issues in Medical Sociology
1-3 credits
Offered By Announcement Only
Seminar topics will be announced in schedule of classes. PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR

SOC692 Special Topics and Current Issues in Criminology
1-3 credits
Offered By Announcement Only
Seminar topics will be announced in schedule of classes. PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR

SOC693 Special Topics and Current Issues in Race/Ethnic Relations
1-3 credits
Offered By Announcement Only
Seminar topics will be announced in schedule of classes. PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR
SOC710 Master's Thesis
1-6 credits Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC720 Research in Residence
0 credit Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in SOC 710 (usually six credits). Credit not granted. May be regarded as full time residence.
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SOC730 Pre-Candidacy Doctoral Dissertation
1-12 credits Fall & Spring Semester
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

SOC740 Post-Candidacy Doctoral Dissertation
1-12 credits Fall & Spring Semester
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of SOC 740 may be taken in a regular semester, nor more than six in a summer session.

SOC750 Research in Residence
0 credit Fall & Spring Semester
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
PREREQUISITE: GRADUATE STATUS OR CONSENT OF INSTRUCTOR

SPANISH

SPA501 CAPSTONE
3 credits Fall & Spring Semester
Course with a broad-based topic designed to integrate all the high-level linguistic, critical and analytical skills with the body of knowledge acquired during the course of study towards the major. Topics vary. Open only to undergraduates completing their Spanish major. Writing Credit. To be taken in the last semester of the major.
PREREQUISITE: TO BE TAKEN IN THE LAST SEMESTER OF THE MAJOR.

SPA591 Directed Readings
1-3 credits Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND THE PERMISSION OF THE INSTRUCTOR.

SPA592 Directed Readings
1-3 credits Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND THE PERMISSION OF THE INSTRUCTOR.

SPA593 Directed Readings
1-3 credits Offered By Announcement Only
PREREQUISITE: ONE 500-LEVEL COURSE AND THE PERMISSION OF THE INSTRUCTOR.
SPA594 Senior Honors Thesis I
3 credits
Fall & Spring Semester
Directed research for honors thesis.
PREREQUISITE: MUST HAVE COMPLETED AT LEAST 12 CREDITS AT THE 300-LEVEL OR ABOVE TOWARDS SPANISH MAJOR, MUST MEET ELIGIBILITY FOR HONORS IN SPANISH.

SPA595 Senior Honors Thesis II
3 credits
Fall & Spring Semester
Directed writing of honors thesis.
PREREQUISITE: SPA 594.

SPA611 Topics in Spanish Medieval Literature
3 credits
Offered By Announcement Only
Recent topics: Libro de Buena mor, the epic, Berceo, cancionero poetry.

SPA613 Topics in the Golden Age
3 credits
Offered By Announcement Only
Recent topics: culteranismo and conceptismo, La Celestina, Cervantes, the picaresque, sixteenth-century theatre.

SPA615 Topics in 18th-19th Century Spanish Literature
3 credits
Offered By Announcement Only
Recent topics: neoclassicism, romantic theatre, Spain and the European Enlightenment, Galdos, realism, post romantic poetry.

SPA616 Topics in 20th Century Spanish Literature
3 credits
Offered By Announcement Only
Recent topics: the generation of 1898, Garcia Lorca, the post-war novel, contemporary theater.

SPA621 Special Topics in Hispanic Studies
3 credits
Offered By Announcement Only

SPA633 Topics in Colonial Literature
3 credits
Offered By Announcement Only
Recent topics: the chroniclers, Sor Juana Ines de la Cruz, Baroque of the Indies.

SPA635 Topics in 19th Century Latin American Literature
3 credits
Offered By Announcement Only
Recent topics include: romanticism, modernist poetry, anti-slavery novel.

SPA636 Topics in 20th Century Latin American Literature
3 credits
Offered By Announcement Only
Recent topics: modernism, magic realism, the short story, the novel of the Mexican Revolution, the Boom and post-Boom.

SPA691 Writing Practicum
1 credit
Offered By Announcement Only
The writing of a publishable research paper under faculty guidance.

SPA692 Directed Readings
1-3 credits
Offered By Announcement Only

SPA693 Teaching Practicum
3 credits
Offered By Announcement Only
SPA730 Pre-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. Prior to admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of SPA 730 may be taken in a regular semester, nor more than six in a summer session. Students who have not passed their qualifying examinations yet, but are not taking any courses, may enroll in SPA 730.

SPA740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. After admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of SPA 740 may be taken in a regular semester, nor more than six in a summer session. Students who have passed their qualifying examinations, but are not taking courses any more, may enroll in SPA 740. Where a student has passed his/her(a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

SPA750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

WOMEN'S & GENDER STUDIES
WGS501 Senior Research Project
3 credits                    Fall & Spring Semester & First & Second Summer Session
A student initiated research project with a faculty member of the student's choice and approved by the Program director. Writing Credit.
PREREQUISITE: WGS MAJOR OR MINOR, SENIOR STATUS, AND WGS 201 AND 301.

WGS505 Senior Thesis
3 credits                    Fall & Spring Semester & First & Second Summer Session
Women's and Gender Studies majors with a cumulative GPA of at least 3.5 in WGS courses and an overall GPA of at least 3.0 may earn departmental honors by completing an honors thesis instead of the senior research project. Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as thesis adviser and then must complete a thesis proposal of approximately 400 words which must be approved by the thesis adviser and then the program director. Most students will take this course twice, for a total of six credits. Writing Credit.
PREREQUISITE: WGS MAJOR OR MINOR, SENIOR STATUS, WGS 201 AND 301, AND APPROVAL OF PROGRAM DIRECTOR.

THEATRE ARTS
THA561 Advanced Directing I
3 credits                    Offered By Announcement Only
Continuation of THA 462. Developing a philosophy of theatrical production. Case studies in practical directing problems. The student directs a short play.
PREREQUISITE: THA 462 OR PERMISSION OF INSTRUCTOR.
ACC501 Advanced Cost Accounting
3 credits
Offered By Announcement Only
The latest developments in cost and managerial accounting are studied. Using case studies, the course focuses on activity based product cost allocation methodology in terms of: (1) basic concepts and rationale, (2) applicability in both manufacturing and service industries, (3) strategic cost analyses, and (4) applicability in total quality management programs. Other topics include cost pools, two stage costing methodologies, and the behavioral aspects of cost systems. Finally, students implement an activity based cost system using commercially developed software.
PREREQUISITE: ACC 301 AND SENIOR STATUS.

ACC505 Accounting Controls in Information Technology
3 credits
Offered By Announcement Only
Course develops a student's understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
PREREQUISITE: ACC 212 AND PERMISSION OF INSTRUCTOR; SENIOR STATUS.

ACC506 Internal Auditing
3 credits
Offered By Announcement Only
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
PREREQUISITE: ACC 402 AND SENIOR STATUS.

ACC511 Advanced Accounting
3 credits
Fall & Spring Semester
The primary focus on the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships. This meets the requirement for accounting students who are required to take Accounting 411.
PREREQUISITE: ACC 312 AND SENIOR STATUS.

ACC522 Advanced Issues in Auditing
3 credits
Fall Semester
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
PREREQUISITE: ACC 402 AND ACCEPTED INTO THE ACCOUNTING ACCELERATED PROGRAM OR GRADUATE STATUS.

ACC523 International Accounting and Taxation
3 credits
Offered By Announcement Only
Course covers tax accounting and business considerations in the global business environment. U.S. issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering, and uses of accounting information in managing an international business.
PREREQUISITE: ACC 212 AND SENIOR STATUS.
ACC524 Accounting for Governmental and Not-for-Profit Entities
2 credits  
Fall Semester
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities.
PREREQUISITE: ACC 312 AND ACCEPTED INTO THE ACCOUNTING ACCELERATED PROGRAM OR GRADUATE STATUS.

ACC525 Trends in Present Day Accounting
3 credits  
Offered By Announcement Only
Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of financial data to meet the needs of third parties, and surveys accounting literature.
PREREQUISITE: ACC 312 AND SENIOR STATUS.

ACC530 International Financial Reporting Standards
1 credit  
Fall Semester
This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).
PREREQUISITE: ACC 312 AND ACCEPTED INTO THE ACCOUNTING ACCELERATED PROGRAM OR GRADUATE STATUS.

ACC550 Accounting Internship
0- 3 credits  
Fall & Spring Semester & First & Second Summer Session
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman is required at time of registration.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

ACC555 Accounting Honors Research Project
0- 3 credits  
Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors Accounting.
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

ACC599 Directed Readings
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project is required at time of registration.
PREREQUISITE: SENIOR STANDING AND PERMISSION OF DEPARTMENT CHAIR.
ACC600 Accounting for Decision-Making and Control
3 credits Offered By Announcement Only
The course focuses on the use and understanding of basic financial and managerial accounting reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirements needed to sit for the CPA exam in Florida.

ACC601 Trends in Present Day Accounting
3 credits Offered By Announcement Only
Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of third financial data to meet the needs of third parties, and surveys accounting literature.
PREREQUISITE: ACC 312.

ACC602 Analysis of Financial Statements
3 credits Spring Semester
Course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis (including ratio analysis) and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions.
PREREQUISITE: ACC 312.

ACC603 Studies in Financial Reporting Issues
3 credits Spring Semester
An exploration of complex financial reporting issues using the case method.
PREREQUISITE: ACC 312.

ACC604 Seminar in Cost Accounting
2 credits Fall Semester
Course covers four major segments. First, it reviews the basic concepts and tools associated with management control systems. Second, it underscores the importance of decentralization and the impact it has on decision making. Third, it examines the strategic place for cost management. Examples include the adoption of the balanced score card, quality control, productivity, and environmental cost management. Fourth, the course brings costing and control tools into the discussion of decision making.
PREREQUISITE: ACC 301 OR PERMISSION OF INSTRUCTOR.

ACC605 Enterprise Resource Planning (ERP) Financial Systems
3 credits Offered By Announcement Only
Course emphasizes the use of Enterprise Resource Planning Systems to collect, monitor, and evaluate financial and managerial data. Students are introduced to how data is captured from the purchasing function through the sales function and how business activities impact the financial statements. The course also utilizes the Enterprise Resource Planning Systems to evaluate managerial performance and financial performance using concepts such as Activity Based Costing, Data Warehousing, and Key Performance Indicators. ERP systems installations are introduced using case materials.
PREREQUISITE: ACC 212.
ACC606 Internal Auditing

3 credits
Offered By Announcement Only
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
PREREQUISITE: ACC 402.

ACC607 Financial Accounting & Reporting

3 credits
Spring Semester & Second Summer Session
Basic concepts of accounting designed to increase understanding of the function of accounting statements and their limitations. The generally accepted principles governing the preparation of financial reports and the use of accounting information in investment and credit decisions. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
PREREQUISITE: LIMITED TO EXECUTIVE MBA ONLY.

ACC608 Managerial Accounting

3 credits
Offered By Announcement Only
Current managerial accounting techniques and theories. Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
PREREQUISITE: ACC 607 OR EQUIVALENT.

ACC610 Accounting Research and Theory

3 credits
Fall Semester
This course is an introduction to research in financial accounting. In this course, students will become familiar with the foundations of accounting research, including hypothesis development, data collection, and data analysis. To this end, students will become familiar with empirical research in accounting, learn to construct a dataset for hypothesis testing, and conduct some basic statistical analysis (e.g., Ordinary Least Squares regressions). Accounting topics covered will include accounting information and the capital markets, financial restatements, accounting method choice, earnings management, earnings quality, and international accounting.
PREREQUISITE: ACC 312.

ACC611 Auditing Seminar

2 credits
Fall Semester
Practical applications of auditing and research into audit matters. Emphasis of the course is placed on cases involving audit failures, appropriate auditing procedures, reporting, and exercise of audit judgment.
PREREQUISITE: ACC 402.

ACC612 Contemporary Issues in Financial Accounting

3 credits
Offered By Announcement Only
Doctoral seminar investigating financial reporting issues and their implications in the behavior of users and preparers of the financial statements. Course focuses on research methodologies used to investigate these issues and discuss alternative approaches.
PREREQUISITE: LIMITED TO DOCTORAL STUDENTS USING ACCOUNTING AS A MAJOR OR MINOR FIELD OF STUDY OR PERMISSION OF INSTRUCTOR.
ACC614 Contemporary Issues in Cost/Managerial Accounting

3 credits Offered By Announcement Only
Doctoral seminar investigating the use and implications of cost and managerial accounting systems in an organizational context. Course emphasizes the behavioral aspects of accounting systems.
PREREQUISITE: LIMITED TO ACCOUNTING DOCTORAL STUDENTS OR PERMISSION OF INSTRUCTOR.

ACC616 CPA Review I

3 credits Second Summer Session
Course covers the fundamentals of insurance and retirement planning including tax and investment implications. In addition, various types of employee plans available are discussed.
PREREQUISITE: STUDENTS MUST HAVE RECEIVED THEIR UNDERGRADUATE DEGREE FROM THE UNIVERSITY OF MIAMI AND COMPLETED THE REQUIREMENTS OF THE ACCELERATED ACCOUNTING PROGRAM DURING THEIR SENIOR YEAR

ACC617 CPA Review II

3 credits Second Summer Session
PREREQUISITE: STUDENTS MUST HAVE RECEIVED THEIR UNDERGRADUATE DEGREE FROM THE UNIVERSITY OF MIAMI AND COMPLETED THE REQUIREMENTS OF THE ACCELERATED ACCOUNTING PROGRAM DURING THEIR SENIOR YEAR

ACC620 Accounting Controls in Information Technology

3 credits Offered By Announcement Only
Course develops students' understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting systems elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
PREREQUISITE: ACC 306

ACC621 Advanced Cost Accounting

2 credits Offered By Announcement Only
PREREQUISITE: ACC 301

ACC622 Advanced Issues in Auditing

3 credits Fall Semester
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact in audit practice. Not open to students with credit in ACC 522.
PREREQUISITE: ACC 402

ACC623 International Accounting and Taxation

3 credits Fall Semester & First Summer Session
Course covers tax accounting and business considerations in the global business environment. U.S. tax issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering and uses of accounting information in managing an international business. Not open to students with credit for ACC 523.
PREREQUISITE: ACC 670 AND 671 OR EQUIVALENT.
ACC624 Accounting for Governmental and Not-for-Profit Entities
3 credits  
Spring Semester & First Summer Session
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities. Not open to students with credit for ACC 524.
PREREQUISITE: ACC 312 OR PERMISSION OF INSTRUCTOR.

ACC631 Advanced Financial Accounting Topics
3 credits  
Fall Semester
Coverage of the Generally Accepted Accounting Principles governing business combinations, the preparation of consolidated financial statement including local and foreign subsidiaries, and other financial reporting topics.
PREREQUISITE: ACC 312, NOT OPEN TO STUDENTS WHO HAVE TAKEN ACC 411.

ACC632 Intermediate Accounting I
2 credits  
Second Summer Session
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
PREREQUISITE: ACCOUNTING 211

ACC633 Intermediate Accounting II
2 credits  
Second Summer Session
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
PREREQUISITE: INTERMEDIATE ACCOUNTING I

ACC634 Cost Accounting
2 credits  
Second Summer Session
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. This course does not count towards the credits needed to graduate.
PREREQUISITE: ACCOUNTING 211

ACC635 Auditing
2 credits  
Second Summer Session
Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This course does not count towards the credits needed to graduate.
PREREQUISITE: ACCOUNTING 211
ACC636 Accounting Systems
2 credits  Second Summer Session
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool. This course does not count towards the credits needed to graduate.
PREREQUISITE: ACCOUNTING 212

ACC639 Income Taxation and Business Entitles
2 credits  Fall Semester
This course is designed to be the second tax course students who are interested in the business applications of federal income tax laws, as they affect corporations, partnerships, and their owners. Emphasis is placed on tax planning aspects of formation, operation, liquidation, and distributions of corporations and partnerships. Not open to students with credit in ACC 404 or equivalent.
PREREQUISITE: ACC 673 OR EQUIVALENT.

ACC640 CORPORATE TAXATION I
2 credits  Fall Semester
Course covers treatment of the corporate form of organization, its related opportunities, and problem areas, including formation, tax formula, non-liquidating and liquidating distributions, capital structure, redemptions, alternative minimum tax, S corporation election, and operation.
PREREQUISITE: ACC 404 OR PERMISSION OF INSTRUCTOR.

ACC641 CORPORATE TAXATION II
2 credits  Fall Semester
An in-depth study of taxable and nontaxable corporate reorganizations. An introduction to affiliated corporations, requirements for consolidated returns, and their associated problems and opportunities are discussed.
PREREQUISITE: ACC 640 OR PERMISSION OF INSTRUCTOR.

ACC642 SEMINAR IN TAXATION
2 credits  Spring Semester
Investigation of current topical areas in taxation.
PREREQUISITE: ACC 404 OR PERMISSION OF INSTRUCTOR.

ACC643 Tax Research
2 credits  Spring Semester
Study of the tax practice environment including the Treasury Department, the Courts, and the legislative history of the Internal Revenue Code. Ethics in tax practice are also examined. Course includes training in the use of tax services such as RIA Checkpoint and LEXIS, in performing tax research. A research methodology for solving tax problem cases is studied and cases to be researched are assigned.
PREREQUISITE: ACC 404 AND SENIOR/MACC OR GRADUATE STATUS.

ACC645 PARTNERSHIP TAXATION
2 credits  Fall Semester
Taxation of partners and partnerships, formation, termination, distributions, liquidations, and sales of partnership interests are covered. Limited partnerships in conjunction with their use as tax shelters are discussed as well as family partnerships, limited liability companies, and LLPs.
PREREQUISITE: ACC 404 OR PERMISSION OF INSTRUCTOR.
ACC647 Estates and Gift Taxes
3 credits First Summer Session
Estate and gift planning for shifting wealth from one individual to another by
death, gift, or by the use of trusts. Property included in the decedent's gross
estate valuation methods, gifts in contemplation of death, jointly held property,
life insurance, transfers with retained life estates, bequests, revocable transfers,
the marital deduction, powers of appointment, gifts of present and future interest,
and gifts to minors are covered.
PREREQUISITE: ACC 404 OR PERMISSION OF INSTRUCTOR.

2 credits Fall Semester
This course is designed to provide the foundation necessary to understand the financial
accounting and reporting of book-tax differences. The course will cover the preparation
of the income tax provision and related financial statement disclosures in conformity
with U.S. GAAP (FASB ASC 740)
PREREQUISITE: ACC 312 AND ACC 404 OR EQUIVALENT.

ACC649 ISSUES IN TAX POLICY
2 credits First Summer Session
This course looks at the process through which our tax laws are created and the
important policy issues inherent in individual and corporate income taxes, consumption
taxes, and wealth transfer taxes. Topics in this course are not limited to U.S.
taxation and include an examination of systems used in other countries (such as
the VAT) as possible alternatives to our current tax.

ACC650 Accounting Internship
1-3 credits Fall & Spring Semester & First & Second Summer Session
Student is individually assigned to operating business firm or other organization
to gain insight into management practice in area of career interest. Periodic reports
and conferences required.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

ACC660 Managerial Accounting in Healthcare Organizational
3 credits Offered By Announcement Only
This course covers Managerial Accounting concepts applied to healthcare organizations.
Topics include cost allocation and management control systems.
PREREQUISITE: NONE

ACC662 Taxation of Multinational Corporations
2 credits Fall Semester
This course introduces the fundamental tax concepts underlying U.S. taxation of
international transactions. Topics include the taxation of U.S. corporations with
income from foreign sources, intercompany pricing, anti-tax avoidance provisions,
and tax treaties.
PREREQUISITE: ACC 640 OR PERMISSION OF THE INSTRUCTOR.
ACC670 Financial Reporting and Analysis
2 credits Fall & Spring Semester & Second Summer Session
The course focuses on the analysis and use of financial accounting information in the evaluation of corporate performance. The course initially demonstrates the accounting process and resulting generation of financial statements. Building on these core accounting concepts, the course emphasizes the understanding of financial statements prepared under U.S. and International Accounting Standards and the analysis of these financial statements including common size analysis, ratio analysis, the impact of taxes, and credit analysis. Completion of the course enhances the student's ability to read, interpret, and analyze financial statements for making investment, credit, acquisition, and other evaluation decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida.
PREREQUISITE: LIMITED TO MBA STUDENTS AND EXECUTIVE MBA STUDENTS.

ACC671 Accounting for Decision Making
2 credits Fall & Spring Semester
The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, break-even analysis and pricing, including the impact of taxes. Completion of the course will enhance the student's ability to understand managerial accounting reports and use this information in making business decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.
PREREQUISITE: ACC 670.

ACC672 Advanced Financial Analysis
2 credits Fall Semester
Advanced Financial Analysis and Valuation builds on the analytical techniques developed in the basic financial statement analysis course, Accounting 670: Financial Reporting and Analysis, to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk.
This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.
PREREQUISITE: ACC 670 AND 671

ACC673 Taxation for Business and Investment Decisions
2 credits Spring Semester
This course is designed to be the first tax course for students who are interested in acquiring the basic knowledge that all executives and investors should have about our federal income tax system. The primary focus of this course is on business entities (including C corporations, S corporations, partnerships and sole proprietorships) with individuals covered in their role as employees and investors. A sample of topics includes choice of business organizational form, deductible business expenses, employee fringe benefits and retirement planning capital gains and losses, and tax-deferred exchanges. Completion of this course will enhance the students' appreciation of the role of taxation in making investment, employment-related, and business decisions. Not open to students with credit in ACC 403 or equivalent. Prerequisite: ACC 670 or Equivalent.
PREREQUISITE: ACC 670 OR EQUIVALENT.
ACC675 Compensation, Incentives and Strategic Control
2 credits Fall Semester
Internal control is the process by which owners influence manager's of organization to implement the organization's strategies. They key idea is that different organizations typically have different strategies which in turn require different control systems for effective implementation. Internal control involves both formal systems and informal processes. Accounting 675 will begin by describing the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation. We will then explore the economic and financial reporting consequences (perhaps unintended) of various performance measurement mechanisms. In particular, we will focus on issues of short-termism, earnings, management, and attendant control failures that plague Corporate America today. Finally, we will discuss some of the regulatory changes brought about in recent times (e.g., Sarbanes Oxley) to address the apparent widespread control system failures.
PREREQUISITE: ACC 301 OR ACC 672 OR PERMISSION OF INSTRUCTOR

ACC677 Forensic Accounting
2 credits Fall & Spring Semester
This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. You will learn how to investigate and quantify fraud, and how it can be detected and prevented as well as the accountants' role in litigation, such as acting as expert witness.
PREREQUISITE: ACC 312 AND ACC 402

ACC697 Ph.D. Colloquium
0 credit Offered By Announcement Only
Doctoral colloquium required of all Ph.D. students. Course serves as a forum for faculty, Ph.D. students, and visiting researchers to present their research and for Ph.D. students to critique and evaluate such research. Open only to Ph.D. students.
PREREQUISITE: OPEN ONLY TO PH.D. STUDENTS.

ACC698 Selected Topics
3 credits Offered By Announcement Only
Topics in selected areas of specialization.

ACC699 Directed Readings
1-3 credits Fall & Spring Semester & First & Second Summer Session
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration.

ACC723 Topics in Empirical Accounting Research I
3 credits Fall Semester
This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.
ACC724 Topics in Empirical Accounting Research II  
3 credits  
Spring Semester  
This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst forecasts and stock recommendations, industry research in accounting, and empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies. PREREQUISITE: ACC 723 TOPICS IN EMPIRICAL ACCOUNTING RESEARCH I, OR PERMISSION FROM THE INSTRUCTOR.

ACC730 Doctoral Dissertation  
1-12 credits  Offered By Announcement Only  
Required of all candidates for the PhD. The student will enroll for credit as determined by their advisor, but not for less than a total of 24. Not more than 12 hours of ACC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed their (a) qualifying examinations, and (b) is engaged in an assistantship, they may still take the maximum allowable credit stated above.

ACC750 Research in Residence  
0 credit  Offered By Announcement Only  
Used to establish research in residence for the PhD after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

BUSINESS

BUS598 SPECIAL TOPICS IN BUSINESS  
1-3 credits  Fall Semester  
Topics in selected areas of Business. PREREQUISITE: PERMISSION OF INSTRUCTOR

BUS600 Fundamentals of Critical Thinking and Effective Writing  
1 credit  Fall Semester  
Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical issues, developing reasoned positions, and making compelling written arguments.

BUS602 Critical Thinking and Effective Writing  
1 credit  Fall Semester  
Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical questions, developing reasoned positions, and making compelling written arguments.

BUS603 Critical Thinking and Effective Speaking  
1 credit  Fall & Spring Semester  
Builds on critical thinking and writing skills acquired in BUS 602. Topics include oral persuasion, prepared and impromptu speeches and dealing with the media, defending one's view before adversarial audiences, display of data, and effective use of visual aids. PREREQUISITE: BUS 600 OR BUS 602
BUS604 MBA Career Development and Enrichment  
0-1 credits    Fall & Spring Semester  
This course will expose students to a variety of academic and industry career lectures, events, and workshops to enhance their MBA experience. The focus is to establish added-value to an MBA student through real world and relevant access to information and resources beyond the traditional curriculum.

BUS605 Residential Session Abroad  
1-6 credits    Fall Semester  
One two-week session of the Global Executive MBA program is held abroad. During this corporate and international experience students attend lectures and institutional visits. This experience exposes students to other cultures and different perspectives on business issues, and widens international networking opportunities.

BUS620 Exchange Program- IE Business School- Madrid Spain  
1-16 credits    Fall Semester  
Course enrollment will vary based on student selection.  
PREREQUISITE: 2ND YEAR MBA STUDENT

BUS621 Exchange Program- Fudan University- Shanghai China  
1-16 credits    Fall Semester  
Course enrollment will vary based on student selection.  
PREREQUISITE: 2ND YEAR MBA STUDENT

BUS622 Global Business Project (GBP) - CIBER  
1-6 credits    Fall & Spring Semester  
The Global Business Project (GBP) is a collaborative course offered by participating CIBER schools to their MBAs and other interested graduate students. Students in related disciplines work in teams both virtually and in person on real business issues with multinational and local businesses and not-for-profits. Project supervision and final grade provided by Country Lead Professor CIBER.

BUS623 European Business Environment- International Trip  
1-4 credits    Fall & Spring Semester  
Course content, dates and location will vary from semester to semester at selected universities.

BUS624 Asian/Pacific Business Environment- International Trip  
1-4 credits    Fall & Spring Semester  
Course content, dates and location will vary from semester to semester at selected universities.

BUS625 Latin America Business Environment - International Trip  
1-4 credits    Fall & Spring Semester  
Course content, dates and location will vary from semester to semester at selected universities.

BUS626 Exchange Program- Tel Aviv University - Tel Aviv Israel  
1-16 credits    Fall Semester  
Course enrollment will vary based on students selection.  
PREREQUISITE: 2ND YEAR MBA STUDENT
BUS627 Exchange Program - IESE Business School - Barcelona Spain
1-16 credits    Fall Semester
Course enrollment will vary based on student selection.
PREREQUISITE: 2ND YEAR MBA STUDENT

BUS655 Public Policy and Health
3 credits                                                      First Summer Session
PREREQUISITE: LIMITED TO FMBA STUDENTS AND MD/MBAS

BUS698 Selected Topics
1- 6 credits    Fall & Spring Semester
Topics in selected areas of business.
PREREQUISITE: NONE.

BUSINESS LAW
BSL550 Business Law Internship
2- 3 credits   Offered By Announcement Only
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman required at time of registration. PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

BSL555 Business Law Honors Research Project.
0- 3 credits   Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors in Business Law. PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

BSL575 Advanced Business Law
3 credits                                                           Spring Semester
Legal problems encountered by Certified Public Accountants, Finance, Management and Marketing Executives, including agency, commercial paper, bank deposits and collections, secured transactions, suretyship, bankruptcy, partnership, corporations, contracts, anti-trust, insurance, property, wills and estates, SEC law, and accountants' legal responsibility. Special attention is given to the commercial law segment of the Uniform Public Accountant Examination. PREREQUISITE: BSL 212 OR EQUIVALENT AND SENIOR STANDING. NOT FOR LST MAJORS OR BSL MINORS.

BSL612 Legal Aspects of International Business
3 credits                                                           Spring Semester
International legal framework, transactional legal issues in finance, marketing, management, distribution, and a review of theory and practice of negotiations. Case studies on such topics as legal implications of GATT, European Competition, C.I.S.G., and Export Import Rules are also included.

BSL685 Legal Aspects of Health Administration
3 credits                                                           Fall Semester
Derivation of rule of law governing health providers, vicarious liability of administrative and medical personnel, informed consent, and other related problems are discussed.
BSL690 Legal and Ethical Implications of Business Decision Making  
2 credits  
Fall & Spring Semester  
The course provides an introduction to our legal and governmental regulatory system, as well as a review of constitutional considerations for businesses. Morality and ethics are defined and distinguished. Applied philosophy is then introduced, to give the student a foundation upon which to analyze the ethical dimensions of common business questions. The relationship between the letter and the spirit of the law is examined. Specific business topics and their legal and ethical aspects are then addressed. This includes, but is not limited to, discussion of the following areas: consumer relationships; business organizations; the balancing of corporate vs. individual power (employee rights and responsibilities, employment discrimination); and the emerging ethic of a global economy.

BSL691 The Public Corporation: Legal Perspectives  
2 credits  
Fall Semester  
The Public Corporation: Legal Perspectives reviews the laws governing the formation, operation, regulation, and governance of the public corporation with the objective of providing the graduate business student a sophisticated examination of the legal and social aspects of managing the money of others. Further, the course examines the rules and regulations governing the raising of capital from the public through the sale of securities for the development of and investment in a private enterprise.

BSL692 Legal Implications of International Business Transactions  
2 credits  
Fall Semester  
International legal framework, transactional legal issues in finance, marketing, management, and distribution. Case studies in substantive international legal topics such as international sales contracts, international documentary sale, international terms of trade, legal implications and substantive rules governing international finance, collections, payments, and letter of credit, the resolution of international disputes with a particular emphasis and examination upon the management of litigation, enforcement of foreign judgments, and alternative dispute resolution are also included.

BSL693 Legal Principles of Commercial Contracting  
2 credits  
Offered By Announcement Only  
Course examines the fundamentals of all business dealings including the law of contracts. Reported court cases are presented and analyzed in order to assist the student's understanding of basic commercial contracting principles. This methodology is intended to develop the graduate student's critical thinking process as well as their skills in oral and written communication.

BSL694 Real Estate Law  
2 credits  
Fall Semester  
Real Estate Law focuses on the U.S. legal system as it relates to the buying, selling, and financing of real property. In addition to traditional text material, the analysis of U.S. court cases is used to detail the legal factors of ownership rights and liabilities, specific interests in real property, contracting issues related to the purchase and sale of real property, as well as financing and closing the real estate transaction. The course provides a problem-solving experience, which is intended to develop graduate students' critical thinking process as well as their skills in oral and written communication.
BSL695 Legal Implications in Executive Decision Making

3 credits  Offered By Announcement Only

Law and legal process are examined as they mix with the politics and ethics of business, including the weight given to legal implications in the executive decision-making process.

BSL696 Legal and Ethical Implications in Executive Decision Making

3 credits  Offered By Announcement Only

Business and public administration cases requiring identification of the legal, ethical, and social elements as well as the determination of the weight such elements should have in setting policy are discussed. Integration of law and ethics with public and business administration is also included.

BSL698 Selected Topics

1- 3 credits  Offered By Announcement Only

Topics in selected areas of specialization.

PREREQUISITE: PERMISSION OF DEPARTMENT CHAIR.

COMPUTER INFORMATION SYSTEMS

CIS550 Computer Information Systems Internship

1- 3 credits  Fall & Spring Semester & First & Second Summer Session

Student is individually assigned to operating business firm or other organization to gain insight in information technology practice in the area of career interest. Periodic reports and conferences are required.

PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN. FOR CREDIT ONLY.

CIS555 Computer Information System Honors Research Project.

0- 3 credits  Offered By Announcement Only

Research project to fulfill requirements for Departmental Honors in Computer Information Systems.

PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

CIS590 Topics in Computer Information Systems

1- 3 credits  Offered By Announcement Only

Topics in selected areas of specialization.

CIS591 Topics in Computer Information Systems

1- 3 credits  Offered By Announcement Only

Topics in selected areas of specialization.

CIS592 Topics in Computer Information Systems

1- 3 credits  Offered By Announcement Only

Topics in selected areas of specialization.

CIS593 Topics in Computer Information Systems

1- 3 credits  Offered By Announcement Only

Topics in selected areas of specialization.

CIS594 Topics in Computer Information Systems

1- 3 credits  Offered By Announcement Only

Topics in selected areas of specialization.

CIS595 Topics in Computer Information Systems

1- 3 credits  Offered By Announcement Only

Topics in selected areas of specialization.
CIS596 Topics in Computer Information Systems
1-3 credits Offered By Announcement Only
Topics in selected areas of specialization.

CIS597 Topics in Computer Information Systems
1-3 credits Offered By Announcement Only
Topics in selected areas of specialization.

CIS598 Topics in Computer Information Systems
1-3 credits Offered By Announcement Only
Topics in selected areas of specialization.

CIS599 Topics in Computer Information Systems
1-3 credits Offered By Announcement Only
Topics in selected areas of specialization.

CIS610 Foundations of Management Information Systems
2 credits Spring Semester
Course is designed to provide the foundations in management information systems information systems required to understand and effectively use an enterprise wide information system. Topics include the role of the CIO, managing Information Technology (IT) as a strategic resource, business process reengineering, IT planning, IT governance and communication, the Internet, and eBusiness.

CIS612 Enterprise Technologies
2 credits Offered By Announcement Only
Course addresses the needs of business students who wish to expand their understanding of information technology fundamentals. Focusing upon their use in today's enterprises, the course aims to provide students with knowledge of a variety of technological concepts commonly used in the IT Organization's systems development initiatives and enables students to understand the implications of deploying such technologies within the enterprise.

CIS613 Business Intelligence Technologies
2 credits Offered By Announcement Only
Course facilitates business decision makers in their understanding of data analysis tools that operate over data warehouses and 'data marts' more commonly referred to as Business Intelligence. Course focuses upon using technologies to drive effective data driven decision making through effective mining of corporate data warehouses, thus improving operational efficiency and ultimately increasing profitability. Students are exposed to the concepts, analysis techniques, data cubes, and manipulation of information extracted from a data warehouse that enables the formulation and execution of business strategies. Data analysis case studies are used to reinforce students' understanding and strategic use of results to accomplish business objectives.

CIS616 IT Systems Modeling
2 credits Offered By Announcement Only
Overview of the systems development life cycle (SDLC). Topics include concepts, tools, and techniques of systems analysis modeling with an emphasis on data and process modeling. Modeling is accomplished by using both structured and object-oriented tools and techniques. Students work in groups to model an application system for a business related problem using CASE tools.
CIS617 Information Technology Project Management
2 credits Fall Semester
Course covers the identification and development of information technology plans for projects supporting the organization's business objectives and all activities required in the initiating, planning, executing, controlling, and closing phases of the project's lifecycle. Course is intended to provide the body of knowledge and best practices necessary for a new Consultant, Business Analyst or Project Manager to successfully perform his/her responsibilities on a wide variety of IT enterprise projects.

CIS618 IT Security for Managers
2 credits Offered By Announcement Only
This course provides a systematic and practical approach for establishing, managing and operating a comprehensive Information Assurance (IA) program. It is designed to provide INFOSEC managers, IT managers, CIOs, Business owners, organizations that provide the outsourcing of IT, organizational senior and general managers with an understanding of the essential issues required to develop and apply a targeted information security posture for both public and private corporations and government-run agencies.

CIS620 Information Systems Analysis and Design
3 credits Offered By Announcement Only
Overview of the systems development life cycle (SDLC). Topics include concepts, tools, techniques of systems analysis and design, data modeling, process modeling, prototyping, file/database design, physical process modeling, CASE tools, and the role of the system analyst in the organization. Students work in groups to analyze and design an application system for a business related problem.
PREREQUISITE: KNOWLEDGE OF A HIGH LEVEL PROGRAMMING LANGUAGE.

CIS621 Management Information Systems
3 credits Offered By Announcement Only
Course is designed to give prospective managers a foundation in MIS sufficient to understand and effectively use information systems. Topics include types of information systems, role of MIS in organizations, CIO issues, ERP systems, and electronic commerce.

CIS630 Fundamentals of Local and Wide Area Networks
3 credits Offered By Announcement Only
Course provides the graduate student the necessary knowledge to understand the design, integration, technologies, and services of local and wide area networks (LANs and WANs) in the business environment. Topics include signal transmission and propagation, standards and protocols, data communications media and devices, layered/encapsulated communications based on the hybrid TCP/IP-OSI standards, small and large-site PC LANs, Frame Relay, ATM, Virtual Private Networking (VPN), Telephony, Internet technologies, and network security.

CIS631 Computer and Network Security
3 credits Offered By Announcement Only
Protection of computers and networks against unauthorized access, access control, encryption, firewalls, proxy, digital certificates, and software security are discussed.
PREREQUISITE: A HIGH-LEVEL PROGRAMMING LANGUAGE COURSE WITH A GRADE OF C OR BETTER AND CIS 630 (OR EQUIVALENT).
CIS640 Data Communications and Networking
3 credits Offered By Announcement Only
Course addresses advanced topics in computer networks from the perspective of a business decision-maker. The course begins with a focus on signal propagation, media characteristics, and digital and analog encoding techniques. It continues with a study of datalink, network, and transport layer functions as defined by the OSI and TCP/IP models. The architecture of the Internet is explored and routing algorithms for wired, wireless, and peer-to-peer networks are introduced. Course concludes with a high-level overview of the top OSI layers. After taking the class the students should be able to critically evaluate network solutions based on the capabilities and limitations of the equipment.
PREREQUISITE: CIS 630 (OR EQUIVALENT) OR PERMISSION OF INSTRUCTOR.

CIS646 IT Planning and Project Management
3 credits Offered By Announcement Only
Course covers the development of information technology strategic and tactical plans for projects supporting the organization's business objectives and project management as applied to planning, implementing, controlling networking, information systems and e-commerce projects. Course is intended to provide a body of knowledge necessary for a new Consultant or Project Manager to successfully initiate, plan, manage, control, and report on a variety of project types. People skills required in the areas of team selection, structure, conflict resolution, and leadership is also covered.
PREREQUISITE: A PRIOR GRADUATE LEVEL CIS OR IT COURSE.

CIS650 Advanced Topics in Database
3 credits Offered By Announcement Only
In depth treatment of database design and performance, data administration, dictionaries, distributed database, database machines, and other current database topics.
PREREQUISITE: CIS 423 OR EQUIVALENT.

CIS660 Computer Information Systems Graduate Internship
1- 3 credits Offered By Announcement Only
Student is individually assigned to an operating business firm or other organization to gain insight and experience in information technology practice in area of career interest. Periodic reports and conferences are required. This course can only be taken as "satisfactory/unsatisfactory."
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

CIS661 Introduction to Expert Systems for Management
3 credits Offered By Announcement Only
An introduction to the fundamental techniques of Artificial Intelligence (AI) that are used in the creation of expert systems. The techniques include problems as game trees and knowledge engineering and management of expert system projects.
PREREQUISITE: A HIGH-LEVEL PROGRAMMING LANGUAGE COURSE WITH A GRADE OF C OR BETTER OR PERMISSION OF INSTRUCTOR.

CIS680 Topics in Computer Information Systems
3 credits Offered By Announcement Only
Topics in selected areas of specialization.

CIS681 Topics in Computer Information Systems
3 credits Offered By Announcement Only
Topics in selected areas of specialization.
CIS682 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS683 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS684 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS685 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS686 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS687 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS688 Topics in Computer Information Systems
3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS689 Topics in Computer Information Systems
1-3 credits
Topics in selected areas of specialization.  
Offered By Announcement Only

CIS690 Directed Study in Computer Information Systems
1-3 credits
Investigation and research in special areas of interest. Offered by special arrangement.  
PREREQUISITE: APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.

CIS691 Directed Study in Computer Information Systems
1-3 credits
Investigation and research in special areas of interest. Offered by special arrangement.  
PREREQUISITE: APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.

CIS692 Directed Study in Computer Information Systems
1-3 credits
Investigation and research in special areas of interest. Offered by special arrangement.  
PREREQUISITE: APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.

CIS699 Directed Study
1-3 credits
Offered by special arrangement.  
PREREQUISITE: APPROVAL OF SUPERVISING PROFESSOR AND DEPARTMENT CHAIRMAN.
CIS710 Master's Thesis
1-6 credits Offered By Announcement Only
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

CIS725 Continuous Registration--Master's Study
0 credit Offered By Announcement Only
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

CIS730 Doctoral Dissertation
1-12 credits Offered By Announcement Only
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of CIS 730 may be taken in a regular semester, or more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

CIS750 Research in Residence
0 credit Offered By Announcement Only
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

ECONOMICS
ECO507 Taxation and Government Expenditure
3 credits Offered By Announcement Only
The incentive and equity effects of taxation and public expenditures. Efficiency aspects of various tax and expenditure programs and the application of cost-benefit analysis to such areas as health, education, and welfare programs, both domestic and foreign, are discussed.
PREREQUISITE: ECO 302.

ECO510 Mathematical Economics
3 credits Fall Semester
Introduction to mathematical techniques commonly employed in economic analysis. Topics include simultaneous linear equation systems, linear algebra, and expansions of polynomials, logarithmic and exponential equations, differential calculus, and optimization theory. A substantial part of the course focuses on the comparative static analysis of both macroeconomic and microeconomic problems.
PREREQUISITE: A SEMESTER COURSE IN CALCULUS, ECO 301 AND 302.

ECO511 Labor Economics (II)
3 credits Spring Semester
A theoretical and empirical analysis of how labor markets operate. A survey of the literature, problems, and methodology of modern labor economics. Human capital analysis, the wage structure, job search and job-matching models, time-allocation models, the economic impact of labor unions, labor market discrimination, the determinants of labor demand and supply, and the factors affecting government policy relating to the labor sector is also included.
PREREQUISITE: ECO 302.
ECO512 Mathematical Economics (II)  
3 credits  
Spring Semester
Economics 512 will be sequential to the introductory Mathematical Economics I (ECO 510). Topics include integral calculus, differential equations, difference equations, Kuhn-Tucker conditions, and solutions to general equilibrium systems, optimization under uncertainty, and an introduction to dynamic optimization. Applications of mathematical techniques to economic analysis will be stressed.  
PREREQUISITE: ECO 510 OR ITS EQUIVALENT.

ECO520 Econometrics  
3 credits  
Fall Semester
Statistical methods of estimating and testing mathematical model of economic relationships. 
PREREQUISITE: ECO 301 AND 302, A COURSE IN STATISTICS AND PERMISSION OF INSTRUCTOR.

ECO521 Graduate Macroeconomic Theory  
3 credits  
Fall Semester
The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models. 
PREREQUISITE: INTERMEDIATE MACROECONOMIC THEORY AND PERMISSION OF INSTRUCTOR.

ECO532 History of Economic Thought  
3 credits  
Offered By Announcement Only
Historical development of economic doctrines and theory. Topics and individuals discussed include mercantilism, physiocracy, Adam Smith, Thomas Malthus, David Ricardo, J. S. Mill, Karl Marx, marginal analysis, Alfred Marshall, and J. M. Keynes. Special emphasis is placed on the effect of historical insights upon the contemporary core of economic theory. 
PREREQUISITE: ECO 301 AND 302.

ECO533 Advanced Microeconomic Theory  
3 credits  
Fall Semester
An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory. 
PREREQUISITE: ECO 302, AND PERMISSION OF INSTRUCTOR.

ECO545 Natural Resources Economics II  
3 credits  
Offered By Announcement Only
This course surveys the economics of natural resource use, and is targeted to upper-division undergraduate and graduate students in economics. Topics include the economics of pollution control, the application of cost/benefit analysis to the marine environment, the economics of non-renewable and renewable resource extraction, and international environmental problems. 
PREREQUISITE: ECO 345 or MAF 502.

ECO555 Economics Honors Research Project  
0-3 credits  
Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors in Economics. 
PREREQUISITE: 3.9 GPA, SENIOR STANDING, PERMISSION OF INSTRUCTOR AND DEPARTMENT.
ECO586 Economics of Health
3 credits
Offered By Announcement Only
A survey of the literature on the health care market. Economic theory is used to analyze public policy alternatives.
PREREQUISITE: ECO 302 OR 691, OR CONSENT OF INSTRUCTOR.

ECO603 Monetary Theory and Policy
3 credits
Fall Semester
Current monetary theory and its use and application in fiscal and monetary policymaking. Topics include the rational expectations hypothesis, time inconsistency, and the role of the government budget constraint.
PREREQUISITE: ECO 621.

ECO604 Topics in Applied Macroeconomics
3 credits
Offered By Announcement Only
Course acquaints students with current, substantive issues in macroeconomics. Topics include consumption determination, savings behavior, bequest behavior, fiscal policy effects on interest rates, consumption, real exchange rates, trade balances, and inflation.
PREREQUISITE: GRADUATE LEVEL MICROECONOMICS AND MACRO-ECONOMICS, AND AT LEAST ONE COURSE IN ECONOMETRICS OR CONSENT OF INSTRUCTOR.

ECO611 Labor Economics (III)
3 credits
Offered By Announcement Only
The formulation and testing of models of labor markets. The application of the tools of microeconomics and econometrics to the analysis of labor markets. Leading contributions in the areas of dynamic analysis of labor markets, human capital investment, the determinants of the wage structure, time allocation and search models, dual and internal labor market models, and analysis of government policy are discussed.
PREREQUISITE: ECO 520, 633 AND 511 OR THE PERMISSION OF THE INSTRUCTOR

ECO620 Advanced Econometrics
3 credits
Spring Semester
Advanced econometric methods including advanced techniques in multiple regression, Bayesian methods, maximum likelihood estimators, distributed lag models, spectral analysis, and Monte Carlo studies are discussed.
PREREQUISITE: ECO 520 OR PERMISSION OF INSTRUCTOR.

ECO621 Advanced Macro Analysis
3 credits
Spring Semester
Theory of the determination of national income, employment, and price levels. Course emphasizes mathematical solutions of Classical, Keynesian, and other economic models.
PREREQUISITE: ECO 301 AND 302. A COURSE IN CALCULUS REQUIRED.

ECO625 Applied Econometrics
3 credits
Fall Semester
Practical applications of econometrics are surveyed. Computer packages are used to examine economic data. Topics include the series analysis, limited dependent variable modes, pooling cross section and time series data, model selection, and rational expectations models.
PREREQUISITE: ECO 620.
ECO633 Advanced Micro Analysis
3 credits
Spring Semester
Theory of the behavior of firms and households and the determination of prices and resource allocation in a decentralized economy.

ECO634 Advanced Micro Analysis II
3 credits
Fall Semester
Continuation of ECO 633. Advanced analysis of theory of the household and firm emphasizing recent approaches. Analysis of decisions over time, duality relationships, advanced demand theory, risk and uncertainty, behavioral theories of the firm, and technological change are covered.
PREREQUISITE: ECO 633.

ECO635 Special Topics in Advanced Microeconomic Theory
3 credits
Spring Semester
Examination of situations where welfare economics associated with a perfectly competitive market must be modified and where non-market rationing devices are often used. Emphasis is placed on allocation structures that may supplement the market mechanism, such as: government, non-profit enterprises, and the family.
PREREQUISITE: ECO 621 AND 633.

ECO641 Problems of Economic Development
3 credits
Offered By Announcement Only
Economic change and growth in relation to theory and empirical evidence. Emphasis is placed on problems of actual vs. potential output and income of developing countries. Discussion of policies associated with promoting the full use of productive resources under various internal and external constraints is also included.

ECO642 Inflation and Financial Markets in Developing Countries
3 credits
Offered By Announcement Only
Monetary and financial aspects of economic development and stabilization policies in the Third World. Topics include rural financial markets, savings mobilization, effects of interest rate restrictions, and the political economy of financial policies in Third World countries.
PREREQUISITE: INTERMEDIATE ECONOMICS; ECO 301; 302; OR PERMISSION OF INSTRUCTOR.

ECO660 International Trade
3 credits
Offered By Announcement Only
The theory and practice of international trade. Comparative advantage, tariffs, quotas, non-tariff barriers (NTBs) to trade, and the regulatory framework (GATT/WTO, the US Harmonized Tariff Schedule, customs clearance procedures, special trade regimes free-trade zones, bonded warehouses, and letters of credit) are discussed.
PREREQUISITE: ECO 660 OR EQUIVALENT BY WAIVER.

ECO661 International Economics II
3 credits
Spring Semester
Continuation of ECO 660. Modern developments in pure trade theory, international factor movements, the external adjustment mechanism, policies for external and internal balance, trade and growth, and recent developments in international monetary relations are discussed.
PREREQUISITE: ECO 660.
ECO665 Economic Analysis of Law
3 credits
Offered By Announcement Only
Economic analysis of the evolution, nature, and consequences of the law, including liability rules, contractual and exchange relations, and remedies.

ECO675 Economic Problems of Latin America
3 credits
Offered By Announcement Only
Analysis of the economic, political, and social forces at work in the changing economies in Latin America.

ECO680 Essentials of Economics
2 credits
Fall Semester
Course provides an introduction to the core concepts of economics. Topics include allocation of scarce resources by the laws of supply and demand, use of the market place as the principle organizing and distribution tool of the economy, externalities, and market failure. Pollution of the environment is treated as a needed correction to be done by public regulation through taxation and legislation. The principal forms of firm organization and dissolution are also discussed. Applications of the laws of supply and demand are made to forecasting demand and analyzing cost structure. The entry and exit of firms and the valuation of the firm is also covered.

ECO681 Directed Readings
1-3 credits
Offered By Announcement Only

ECO682 Macroeconomics
1 credit
Offered By Announcement Only
Course topics include the definition and measurement of full employment, price stability, economic growth, and Gross National Product. The definition and rationale for anti-inflationary and anti-recessionary fiscal and monetary policy is also covered.
PREREQUISITE: EXECUTIVE MBA ONLY.

ECO685 Managerial Decisions in a Global Economy
2 credits
Fall Semester
Modern techniques of economic analysis and decision science are applied management of the firm in a global environment. Business planning and the determinants of supply and demand are an integral part of the course. The principal forms of business organization and dissolution are reviewed. The major issues confronted by the firm: Principal-agent problem (or how to motivate managers to act in the best interest of the owners, the shareholders), moral hazard, discounting of free cash flow and terminal value, economies of scale and scope, and strategic management decision making are covered.

ECO687 Health Care Organization, Economics, and Ethics
3 credits
Offered By Announcement Only
Course provides insight into organizational and behavioral aspects of various sectors and agents within the health care industry. Understanding how such aspects affect performance measured in terms of both economic and ethical criteria is included.
PREREQUISITE: FOR MBA HEALTH ADMINISTRATION STUDENTS.
ECO690 Essentials of Economic Theory
3 credits Fall & Spring Semester & First & Second Summer Session
An economic study of the environment in which the decision making process takes place in management and the functional areas. Structured especially for students without an undergraduate background in economics. Credit not applicable toward 36-credit professional MBA component.

ECO691 Managerial Economics
3 credits Fall & Spring Semester & First & Second Summer Session
Application of economic analysis to the formulation and solving of management problems and the determination of business policy.
PREREQUISITE: ECO 690 OR EQUIVALENT AND MAS 110 OR EQUIVALENT.

ECO695 Global Economics
2 credits Spring Semester & First Summer Session
This is a course in global economics with focus on economic policies and country risk. We study the aggregate behavior of macroeconomics variables that are relevant for business decisions. We take into account the interaction of the national economy with the rest of the world. In other words, we do global economics and study the roles of monetary and fiscal policies in an open economy, foreign direct investment, and the exchange rate.

ECO698 Selected Topics
3 credits Fall & Spring Semester & First & Second Summer Session
Topics in selected areas of specialization.

ECO710 Master’s Thesis
1-6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

ECO720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in ECO 710 (usually six credits). Credit not granted. May be regarded as full time residence.

ECO725 Continuous Registration--Master’s Study
0 credit Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master’s students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

ECO730 Doctoral Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ECO 730 may be taken in a regular semester, or more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
ECO740 Research Project  
1-6 credits Fall & Spring Semester & First & Second Summer Session  
Required of all candidates for the Doctor of Arts degree. Student enrolls for credit as determined by advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed six credits.

ECO750 Research in Residence  
0 credit Fall & Spring Semester & First & Second Summer Session  
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

ECO760 The Theory of International Trade  
3 credits Fall Semester  
PREREQUISITE: ECO 533, 633.

EXECUTIVE & SPECIAL PROGRAMS  
ESP500 Review Module  
0 credit Fall Semester  
A non-credit review session to provide students with the skills necessary to prepare for the successful completion of the common body of knowledge courses.

ESP501 Fundamentals of Accounting  
3 credits Spring Semester  
The generally accepted principles governing the preparation of financial reports, the use of accounting information systems in collecting financial, and cost data used in investment decisions and controlling an enterprise are discussed. PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP510 Introduction to Business Statistics  
3 credits First Summer Session  
Data analysis, probability concepts, distributions, sampling, estimation, hypothesis testing, simple and multiple regression, and correlation analysis are discussed. PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP521 Introduction to Information Systems  
3 credits Offered By Announcement Only  
Computer information system concepts, including spreadsheets, data management, and word processing. PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP551 Organizational Behavior  
3 credits Spring Semester  
Exploration of relevant concepts, research findings and pragmatic implications of the behavioral sciences for the management of complex socio-technical systems. PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP560 Fundamentals of Marketing  
3 credits Fall Semester  
Marketing problems experienced by top executives are examined. Fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution, and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project. PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.
ESP590 Macro- and Microeconomics
3 credits  First Summer Session
An economic study of the environment in which the decision-making process takes 
place in management and the functional areas. Course is structured especially 
for students without an undergraduate background in economics.
PREREQUISITE: LIMITED TO STUDENTS IN OVERSEAS PROGRAMS.

ESP601 MBA Math Module
0-3 credits  Offered By Announcement Only
This course provides the student with the necessary mathematical skills to progress 
toward an MBA degree. The course begins with a review of algebra and continues 
with the fundamentals of differential and integral calculus. The focus is on applying 
these concepts in solving business problems.
PREREQUISITE: LIMITED TO STUDENTS IN THE EXECUTIVE M.B.A. PROGRAMS.

ESP700 Internship Directed Research
3 credits  Offered By Announcement Only
This course consists of a directed research done by the student within the company/country 
where his/her internship is practiced. The study will be supervised and graded 
by a faculty member. Project requires in-depth research into the company, its role 
in globalization, and the culture's role in the company structure and purpose.

ESP730 Doctoral Dissertation.
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Required for all candidates for the Ph.D. program. The student will enroll for 
credit as determined by his/her advisor, but not for less than a total of 12. Not 
more than 12 hours of ESP 730 may be taken in a regular semester, nor more than 
six in a summer session.
PREREQUISITE: NONE

ESP734 Research Project
1-6 credits  Fall & Spring Semester & Second Summer Session
Individually supervised research project in selected field. Scope of work must 
be approved by supervision instructor prior to registration. Total enrollment may 
not exceed six credits.

ESP735 Research Project
1-6 credits  Offered By Announcement Only
Required of all candidates for the Add-On Master of Business Administration degree. 
Credit is not awarded until the project has been accepted. Total enrollment may 
not exceed six credits (option 1). Available to those students who have selected 
option 1 curriculum.
PREREQUISITE: MUST HAVE COMPLETED THE MASTER OF SCIENCE IN PROFESSIONAL MANAGEMENT 
PROGRAM.

ESP736 Research Project
1-6 credits  Offered By Announcement Only
Required of all candidates for the Add-On Master of Business Administration degree. 
Credit is not awarded until the project has been accepted. Total enrollment may 
not exceed six credits. May be regarded as full-time residence as determined by 
the Dean of the Graduate School. Available to those students who have selected 
option 2 curriculum.
PREREQUISITE: MUST HAVE COMPLETED THE MASTER OF SCIENCE IN PROFESSIONAL MANAGEMENT 
PROGRAM.
FIN546 Introduction to ARGUS for Real Estate Analysis  
1 credit  
**Fall Semester**  
Introduction to real estate ownership analysis using proprietary ARGUS assumptions for different property types, purchase and resale assumptions and preparing reports for buyers and investors.  
PREREQUISITE: UNDERGRADUATE SENIOR OR GRADUATE STATUS

FIN547 Advanced ARGUS and Excel for Real Estate Application  
2 credits  
**Spring Semester**  
Advanced topics in real estate analysis using Excel and ARGUS, including discounted cash flow and leverage models, modeling hard and soft development costs, partnership analysis and depreciation waterfalls.  
PREREQUISITE: FIN 546, UNDERGRADUATE SENIOR, OR GRADUATE

FIN555 Finance Honors Research Project  
0-3 credits  
Offered By Announcement Only  
Research project to fulfill requirements for Departmental Honors in Finance.  
PREREQUISITE: 3.9 GPA, SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

FIN590 Internship  
1 credit  
Offered By Announcement Only  
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of department is required at time of registration. Note: FIN 590 is an elective and is not for credit toward the major.  
PREREQUISITE: FIN 303, 320 AND PERMISSION OF DEPARTMENT CHAIRMAN. REQUIRES DEPARTMENTAL APPROVAL. NOTE: DOES NOT COUNT AS CREDIT TOWARDS MAJOR.

FIN599 Directed Study  
3 credits  
Offered By Announcement Only  
Individually supervised research projects in selected finance topics. Approval of the Chairperson and advisor is required prior to registration.  
PREREQUISITE: FIN 302, 320. REQUIRES DEPARTMENTAL APPROVAL.

FIN602 Fundamentals of Finance  
3 credits  
**Fall & Spring Semester & First Summer Session**  
This is a core MBA course, devoted primarily to the area of finance. No prior background in finances is assumed. The course objective is to provide students with a conceptual framework for appreciating and understanding the problems facing the financial manager.  
PREREQUISITE: PRINCIPLES OF ECONOMICS, STATISTICS AND FINANCIAL ACCOUNTING.

FIN603 Advanced Corporate Finance  
3 credits  
**Fall & Spring Semester & First Summer Session**  
Applications in corporate finance. This class builds on the core MBA courses in our executive MBA program, especially Fundamentals of Finance (Finance 602). Topics include working capital management, financial planning, basic option valuation, agency theory, capital structure management, mergers and acquisitions, liabilities management and leasing. Note: required for Finance concentration.  
PREREQUISITE: FIN 602.
FIN620 Investment Analysis
3 credits Fall Semester
This course deals with theory and application of investment analysis. Topics include general stock trading, portfolio and risk-return theory, models of stock valuation, portfolio diversification, market efficiency, options and futures, bond valuation and bond portfolio strategy, general commodity investing, and personal financial planning.
PREREQUISITE: FIN 602.

FIN621 Portfolio Construction and Management
3 credits Offered By Announcement Only
The evolution of portfolio theory and practice and its role in modern investment management. Individual constraint models within the general capital market theory are included as well as empirical evidence, theoretical discussion, and practical exercises.
PREREQUISITE: FIN 602, 620.

FIN622 Financial Options and Futures
3 credits Offered By Announcement Only
Study of the theoretical development of models for pricing contingent claims in the field of finance. Application of theoretical results to the hedging of current and future assets and liabilities and to speculative strategies for the risk-averse, profit-maximizing entity are included.
PREREQUISITE: FIN 602, 620.

FIN630 International Finance
3 credits Offered By Announcement Only
The financing of international trade and capital placements. Restrictions on capital retrieval and problems of international liquidity related to the U.S. and non-U.S. firms are discussed as well as current developments in international banking, theory, and policy. Cases involving foreign capital commitments and transactions, especially Latin America are also included.
PREREQUISITE: FIN 602.

FIN631 International Financial Management
3 credits Offered By Announcement Only
Sources and uses of long and short term capital for international business applications and foreign currency markets. Financial decisions associated with international cash and capital budgeting, capital repatriation and taxation strategies, capital exposure and coverage, and multinational firm financial strategies are discussed. Lectures and cases are included.
PREREQUISITE: FIN 630.

FIN641 Valuation and Financial Decision Making
2 credits Fall & Spring Semester
Basic financial valuation. This is one of the core classes in finance for our regular MBA program. Topics include the financial environment; the time value of money; capital market efficiency; basic security valuation; risk, return and asset pricing; cost of capital; and an introduction to capital budgeting.
FIN642 The Financial Environment
2 credits  
Fall & Spring Semester
A continuation of FIN 641. Topics include an introduction to the global securities markets and foreign exchange, basic derivatives, real options, the security trading process, fixed income securities markets, the term structure, investment banking, and short-term financial management and planning.
PREREQUISITE: FIN 641.

FIN644 Real Estate Investment and Appraisal
3 credits  
Fall Semester
This course will introduce you to the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market.
PREREQUISITE: FIN641 OR SCORE OF 80% OR ABOVE ON FIN641 WAIVER EXAM

FIN645 Real Estate Finance
3 credits  
Spring Semester
This course will introduce you to the theoretical concepts and analytical techniques used to make a decision to loan money for the purchase or development of a commercial real estate project.
PREREQUISITE: FIN641 OR SCORE OF 80% OR ABOVE ON FIN641 WAIVER EXAM

FIN650 Financial Investment
2 credits  
Fall & Spring Semester
This course builds on FIN 641 and FIN 642 to provide a more advanced knowledge of the field of investments, particularly the fixed income markets, portfolio construction, asset pricing, and behavioral biases affecting financial decisions.
PREREQUISITE: SECOND YEAR MBA STATUS. FIN 641

FIN651 Advanced Topics in Investments
2 credits  
Fall & Spring Semester
This course is about applying finance theory to the practice of investments. Topics include building a term structure model, building a fixed income portfolio, performance standards and measurement, and the role of futures and options in portfolios.
PREREQUISITE: FIN 650. SECOND YEAR MBA STATUS.

FIN660 International Finance
2 credits  
Fall & Spring Semester
Finance 660 builds on Finance 641 and 642, and introduces students to the concepts that are important in today's dramatically changing global economy. The course covers the international monetary system; the interrelationship between national economies through the balance of payments; the economic relationships that determine a currency's value relative to other currencies and real goods; the markets and instruments of international finance; currency crises and contagion; the hedging of international risk exposure; and international portfolio investment.
PREREQUISITE: FIN 641,642. SECOND YEAR MBA STATUS.
FIN661 Advanced Topics in International Finance  
2 credits  
Fall & Spring Semester  
Finance 661 builds directly on Finance 660 and on the MBA core classes, Finance 641 and 642, using a variety of techniques, including group projects and class discussion. A number of special topics are covered including measuring and managing the many additional risk exposures faced by a multi-national enterprise, investment decisions in a global framework, and financing the multi-national firm.  
PREREQUISITE: FIN 641, 642. SECOND YEAR MBA STATUS.

FIN670 Corporate Finance  
2 credits  
Fall & Spring Semester  
Finance 670 builds on Finance 641 and 642 and focuses on financial decision making from a corporation's perspective. Issues addressed include capital structure, management of corporate liabilities, leasing and other asset-based financing techniques, advanced treatment of capital budgeting and some of the complex issues involved, and corporate mergers and acquisitions.  
PREREQUISITE: FIN 641 AND 642. SECOND YEAR MBA STATUS.

FIN671 Advanced Topics in Corporate Finance  
2 credits  
Fall & Spring Semester  
This course builds directly on Finance 670 and on the MBA core classes, Finance 641 and Finance 642, and relies mainly on the analysis and vigorous class discussion of a variety of real-world cases. The cases cover a broad range of topics, including short-and long-term financing, capital budgeting decisions, corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, and other current issues in corporate finance.  
PREREQUISITE: FIN 670. SECOND YEAR MBA STATUS.

FIN674 Financial analysis of mergers and acquisitions  
2 credits  
Spring Semester  
This course is designed to develop an understanding of (1) the economic and financial issues involved in the acquisition of a company; (2) the analytical valuation tools used to evaluate an acquisition; and (3) potential and empirical stock market reaction to an acquisition. Students are then asked to apply their understanding of the issues to analyze cases involving various aspects of acquisition.  
PREREQUISITE: FIN 670, FIN 642, FIN 641

FIN681 Financial Institutions  
2 credits  
Fall & Spring Semester  
Finance 681 builds on Finance 641 and 642 and focuses on the management of financial institutions, such as banks. Topics include risk management, deposits and deposit insurance, liquidity, reserve requirements, capital adequacy, liability management, investment interest rate risk, and current issues connected with financial institutions.  
PREREQUISITE: FIN 641,642. SECOND YEAR MBA STATUS.

FIN683 Financial Modeling  
2 credits  
Fall Semester  
This course takes a variety of finance topics and implements them using practical spreadsheet models. Students will use the intent and financial databases to obtain input data for their models. Students will learn Visual Basic for Applications (VBA) to design functions and macros that will enhance their models. In addition to class time, this course will meet in a "computer lab" (a classroom) for hands-on instruction. Students are presumed to have a working knowledge of Windows and Excel.  
PREREQUISITE: FIN 641, FIN 642
FIN685 Mathematics of Financial Derivatives  
2 credits  
Fall & Spring Semester  
Finance 685 builds on Finance 650, 660, and 670. This course provides an in-depth mathematical treatment of derivatives and is divided into three parts: (1) options; (2) futures and forwards; and (3) other derivative instruments, which include options on futures, foreign currency derivatives, swaps, exotic options, and financial engineering. The emphasis is placed on equity instruments, although there is also some coverage of short- and long-term interest bearing instruments.  
PREREQUISITE: FIN 650, 660, 670. SECOND YEAR MBA STATUS.

FIN698 Selected Topics in Finance  
1- 3 credits  Offered By Announcement Only  
Topics in selected areas of specialization.  
PREREQUISITE: FIN 602.

FIN699 Directed Readings and Study  
1- 3 credits  Offered By Announcement Only  
Individually supervised research or reading projects in selected fields. Evaluation of project and subject by the supervising professor is required at the time of registration.  
PREREQUISITE: FIN 602.

FIN700 Doctoral Seminar in Finance Theory  
3 credits  
Offered By Announcement Only  
The purpose of this seminar is to provide doctoral students in economics and business with a rigorous introduction to the theory of finance.  
PREREQUISITE: MBA, MS OR APPROVAL OF DEPARTMENT.

FIN705 Doctoral Seminar in Corporate Finance  
3 credits  
Offered By Announcement Only  
The purpose of this seminar is to provide doctoral students with a comprehensive review of theory, empirical methods, and results in the area of corporate finance.  
PREREQUISITE: MBA, MS OR APPROVAL OF DEPARTMENT.

FIN720 Doctoral Seminar in Investments  
3 credits  
Offered By Announcement Only  
The purpose of this seminar is to provide doctoral students with a comprehensive review of theory, empirical methods, and results in the area of investments.  
PREREQUISITE: MBA, MS OR APPROVAL OF DEPARTMENT.

MANAGEMENT SCIENCE  
MAS547 Computer Simulation Systems  
3 credits  
Fall Semester  
Introduction to discrete-event computer simulation and hands-on development of simulation models. Topics include introduction to queuing theory, input and output analysis, random number generation, and variance reduction techniques. Students practice their modeling skills using commercial state-of-the-art simulation software. Assigned readings of real-life simulation projects complement the material learned in the classroom. Lecture, 3 hours.  
PREREQUISITE: MAS/IEN 311 OR EQUIVALENT.
MAS548 Data Mining and Knowledge Acquisition  
3 credits  
Spring Semester  
This course provides an introduction to the principles and techniques of data mining. Topics covered include the data mining process, data preprocessing, data mining techniques and data mining evaluation. The course will involve a combination of lectures, labs, projects and case studies. 
PREREQUISITE: MAS 201 & MAS 202

MAS550 Management Science Internship  
1- 3 credits  
Fall & Spring Semester & First Summer Session  
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Permission of department chair is required prior to registration. 
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN. FOR CREDIT ONLY.

MAS555 Management Science Honors Research Project.  
0- 3 credits  
Offered By Announcement Only  
Research project to fulfill requirements for Departmental Honors in Management Science. 
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR AND DEPARTMENT.

MAS595 Topics in Management Science  
1- 3 credits  
Fall & Spring Semester & First Summer Session  
Topics in selected areas of specialization.

MAS596 Topics in Management Science  
1- 3 credits  
Fall & Spring Semester & First Summer Session  
Topics in selected areas of specialization.

MAS601 Applied Regression Analysis  
3 credits  
Fall Semester  
Theory and practical application of regression modeling and analysis. Computer control language, text editing, data base manipulation, and use of various data scales are covered. Understanding the role and responsibility of a statistician is also included. 
PREREQUISITE: CALCULUS, LINEAR ALGEBRA AND MAS 311 OR EQUIVALENT.

MAS602 Applied Multivariate Statistics  
3 credits  
Spring Semester  
Statistical analysis of simultaneous measurements on many variables. Topics include principle components, factor analysis, canonical correlation analysis, multivariate general linear model, discriminant analysis, clustering, multidimensional scaling, and statistical inference about mean vectors. Extensive use of computer packages is required. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAS603 Design of Experiments  
3 credits  
Spring Semester  
Statistical design, analysis of experimental data, randomized blocks, Latin Squares, factorial designs, response surfaces, and analysis of covariance are covered. Extensive use of computer packages is required. 
PREREQUISITE: MAS 311 OR EQUIVALENT.
MAS606 Nonparametric Statistics
3 credits Offered By Announcement Only
Nonparametric techniques for testing hypotheses concerning proportions, attributes (enumeration statistics), two-sample and K-sample tests of location. Nonparametric correlation methods, two-sample variance tests, tests for runs and randomization, multiple comparisons, and linear and non-linear trend are also included. Emphasis is placed on utilization of techniques in research, and not formal theory.
PREREQUISITE: MAS 311 OR EQUIVALENT.

MAS607 Survey Sampling
3 credits Offered By Announcement Only
Course topics include random, stratified, systematic, and cluster sampling, applications in survey sampling design, and ratio estimation. Questionnaire design and administration including nonresponse problems, data analysis and presentation are also included.
PREREQUISITE: MAS 610 OR EQUIVALENT.

MAS610 Statistical Analysis for Managerial Decision Making
3 credits Fall & Spring Semester & First Summer Session
Data analysis, probability concepts, distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation analysis. Required of all MBA students unless satisfied by a waiver examination or equivalent undergraduate course or courses.

MAS611 Principles of Quality Management
3 credits Fall Semester
The definition of quality management, its history, and comparison of various schools of thought. An introduction to the theories of systems, variation, knowledge, and psychology as they relate to quality management. Deming's fourteen points for management are studied through examples and cases.
PREREQUISITE: MAS 610.

MAS612 Advanced Quantitative Analysis
3 credits Fall & Spring Semester & First Summer Session
The application of probability theory to the formulation and analysis of mathematical models for decision making. Applications are taken from inventory control, forecasting, waiting lines, quality control, production, and operations management.
PREREQUISITE: MAS 201 AND 302 OR THEIR EQUIVALENTS.

MAS615 Statistical Methodology in Business Research I
3 credits Offered By Announcement Only
Foundations of statistical methods used in business research. Topics include distribution theory, estimation theory, point estimates, methods and properties, interval estimates, hypothesis testing, relationship between interval estimation and hypothesis testing, fundamental normal tests, decision theory, Bayesian inference. The use of the SAS computer package is required. The first of two required core courses in Statistical Methodology for Ph.D. students in Business.
PREREQUISITE: MAS 311 AND MTH 112 OR EQUIVALENTS.
MAS616 Statistical Methodology in Business Research II
3 credits
Offered By Announcement Only
Advanced Statistical techniques as applied to Business Research. Topics include
analysis of variance and covariance, multiple regression, correlation, discriminant
analysis, factor analysis, canonical correlation, and nonparametric statistical
methods. The second of two required core courses in Statistical Methodology for
Ph.D. students in Business.
PREREQUISITE: MTH 210 AND MAS 615 OR EQUIVALENTS.

MAS630 Quality Management in Practice
3 credits
Fall Semester
This course presents administrative systems necessary for an organization or an
individual to pursue quality management. The course presents a functional model
for quality management.
PREREQUISITE: MAS 611.

MAS631 Statistics for Managerial Decision Making
2 credits
Fall Semester
This course aims to familiarize the student with statistical theory, tools, and
methods required for business systems analysis and improvement. Topics include
descriptive methods, elementary probability, random variables and the distributions,
hypothesis testing, confidence intervals, statistical modeling, and regression.

MAS632 Management Science Models for Decision Making
2 credits
Spring Semester
This course aims to familiarize the student with Management Science tools for business
systems analysis and improvement. The coverage includes linear and integer programming
models, project management, simulation, queuing, and decision analysis. Some widely
used software are illustrated through examples and case studies derived from business
applications.
PREREQUISITE: MAS 631.

MAS633 Introduction to Quality Management
2 credits
Fall Semester
Introduction to the major elements of Dr. Deming's theory of management, including
Dr. Deming's System of Profound Knowledge and Fourteen Points for Management. Additionally,
participants are introduced to "Six Sigma" tools and methods. These tools and methods
have been adopted with great success by many of the largest organizations in the
world, for example, General Electric, Allied Signal, Dupont, American Express,
and J.P. Morgan. Additionally, the course is a prerequisite for the "Six Sigma"
Green Belt certification examination.
PREREQUISITE: MAS 631 OR PERMISSION OF INSTRUCTOR OR ADVISOR

MAS634 Administrative Systems for Quality Management
2 credits
Fall Semester
This course presents a model to pursue quality management (QM). It features administrative
systems and structures necessary for Quality Management. The administrative systems
and structures presented in this course are required to sit for the Six Sigma Management
"Green Belt" certification examination.
PREREQUISITE: SECOND YEAR MBA STATUS AND MAS 633.
MAS635 Design of Experiments
2 credits  Fall Semester
This course presents tools and methodology useful in conducting experiments that provide valid answers to questions of interest to the experimenter. The course discusses an overall approach to obtaining and analyzing experimental data, the advantages of using structured multi factor experiments to screen for important factors, ways of minimizing the amount of data points needed to obtain desired information, and how to identify values of experimental factors that optimize the value of measured responses. Factorial designs, fractional factorial designs, screening designs, and response surface designs are presented. Emphasis is placed on the knowledge required for proper application of these methods through many examples in business and quality management.
PREREQUISITE: MAS 631. SECOND YEAR MBA STATUS.

MAS636 Statistical Process Control and Reliability
2 credits  Fall Semester
This course aims to introduce some fundamental concepts of statistical process control and reliability with an emphasis on business applications. The first part of the course focuses on control charts and other tools that are used to monitor and improve business processes. The second part of the course introduces some basic ideas of reliability models and presents methods used in identifying failure modes in products and in business systems.
PREREQUISITE: MAS 631. SECOND YEAR MBA STATUS.

MAS637 Applied Regression Analysis and Forecasting
2 credits  Fall Semester
This course aims to familiarize the student with statistical prediction. It covers simple and multiple regression methods as well as time series and forecasting models in business. Instead of theoretical development, the course emphasizes the application of these methods in business systems analysis and improvement.
PREREQUISITE: MAS 631. SECOND YEAR MBA STATUS.

MAS638 Management Science Consulting
2 credits  Offered By Announcement Only
The purpose of this course is to enhance students' consulting skills in management science. In addition to skills of modeling and choosing appropriate tools for analysis, these include the communication skills of presenting quantitative and analytical material in business settings. The course is structured around a set of case studies that are based on real applications of management science models and methods discussed in MAS 631 and MAS 632.
PREREQUISITE: MAS 631 AND 632.

MAS641 Operations Research Models in Management
3 credits  Fall & Spring Semester & First Summer Session
The application of Operations Research techniques in Management. Topics include linear programming, PERT/CPM, queuing theory, forecasting, inventory models, statistical quality control, decision theory, and Simulation.
PREREQUISITE: MAS 610.
MAS642 Linear Programming and Extensions
3 credits
Fall Semester
Formulation, solution, and postoptimality analysis of linear programming problems. Topics include revised simplex, parametric programming, and decomposition large-scale systems. The use of computer packages is required. Introduction to integer programming, network flows, and nonlinear programming applications is also included.
PREREQUISITE: LINEAR ALGEBRA OR EQUIVALENT.

MAS643 Integer Programming and Network Flows
3 credits
Spring Semester
Solutions and applications of network flow problems, shortest path, maximum spanning tree, single, and multi-commodity flows are discussed. Computationally effective approaches to integer optimization, cutting planes, and implicit enumeration are also covered.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MAS644 Nonlinear and Dynamic Programming
3 credits
Offered By Announcement Only
Solution of nonlinear optimization problems by classical procedures and search algorithms. Recursive optimization using computationally effective techniques is also addressed.
PREREQUISITE: MTH 112 OR EQUIVALENT.

MAS645 Stochastic Processes
3 credits
Fall Semester
Introduction to discrete state Markov processes and renewal processes with applications to queuing, replacement, and reliability problems.
PREREQUISITE: MAS 311 OR MTH 524 OR EQUIVALENT.

MAS657 Supply Chain Management
3 credits
Spring Semester
This course covers models and techniques for design and implementation of distribution and supply chain networks, and how they relate to manufacturing. Topics include inventory management, resource and capacity planning, material planning, forecasting, routing and scheduling, and plant location. An overview of how these are incorporated in an integrated ERP system is provided.
PREREQUISITE: MGT 653 OR EQUIVALENT.

MAS661 Forecasting Methods
3 credits
Offered By Announcement Only
Business and economic forecasting, time series analysis, regression, classical decomposition, smoothing, Box-Jenkins methodology, use of index numbers, other indicator variables, and forecasting in functional business areas are discussed. The use of case studies and interactive computer packages is also included.
PREREQUISITE: MAS 610 OR EQUIVALENT.

MAS663 Project Management and Modeling
2 credits
Spring Semester
This course considers the various methods, techniques, and software tools of project management and modeling with special emphasis on real estate projects and development. Topics include: project selection and strategy, risk assessment, conflict and negotiation, budgets, costs, and resource allocation, monitoring and information systems, project control and auditing, and project closure. The course is designed to show the integration of the various roles of owners, developers, builders, architects, and engineers in the project management process.
MAS693 Directed Study in Operations Research
1-3 credits Offered By Announcement Only
Investigation and research in special areas of interest. Offered by special arrangement.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAS694 Directed Study in Operations Research
1-3 credits Offered By Announcement Only
Investigation and research in special areas of interest. Offered by special arrangement.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAS695 Directed Study in Operations Research
1-3 credits Offered By Announcement Only
Investigation and research in special areas of interest. Offered by special arrangement.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAS696 Directed Study in Statistics
1-3 credits Offered By Announcement Only
Investigation and research in special areas of interest. Offered by special arrangement.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAS699 Directed Study
1-3 credits Offered By Announcement Only
Offered by special arrangement.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAS710 Master's Thesis
1-6 credits Offered By Announcement Only
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MAS720 Research in Residence
0 credit Offered By Announcement Only
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MAS725 Continuous Registration--Master's Study
0 credit Offered By Announcement Only
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

MAS730 Doctoral Dissertation
1-12 credits Offered By Announcement Only
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MAS 730 may be taken in a regular semester, or more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
MAS750 Research in Residence
0 credit                                               Offered By Announcement Only
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MANAGEMENT

MGT540 Behavioral Aspects of Productivity
3 credits                                              Offered By Announcement Only
Productivity management impacts organizational strategy, efficiency, quality, and survival. Course examines these varied impacts and discusses the managerial issues related to productivity measurement, organizational values, incentives, gain sharing, motivation, organizational change, gain sharing, motivation, organizational change, and organizational politics. Course is taught from behavioral and systems theory viewpoints, focusing on how behavioral change impacts system productivity. Course is multidisciplinary and supplemented with examples of corporate applications.

MGT545 Self-Assessment and Career Development
3 credits                                              Offered By Announcement Only
Course provides a framework for individuals facing the complex process of making career decisions. Emphasis is placed on self-assessment to help students better understand their career motivations. Additional topics include job searches, interviewing, analyzing, choosing job offers, managing the first year on the job, developmental relationships such as mentoring, the early career experience, and managing a career over time.
PREREQUISITE: MGT 304 + SENIOR STANDING.

MGT550 MGT Internship
1 credit                     Fall & Spring Semester & First & Second Summer Session
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Cannot be used toward major requirements.
PREREQUISITE: MAJOR/SPECIALIZATION IN MGT DEPARTMENT, MINIMUM 3.0 GPA, AND DEPARTMENT CHAIR APPROVAL PRIOR TO REGISTRATION.

MGT598 Selected Topics
3 credits                    Fall & Spring Semester & First & Second Summer Session
Topics in selected areas of specialization.

MGT599 Directed Study
1-6 credits     Fall & Spring Semester & First & Second Summer Session
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration. Only open to undergraduate students.
PREREQUISITE: SENIOR STANDING + MAJOR IN MGT DEPARTMENT.

MGT600 Managing Responsible Behavior in Organizations
3 credits                    Fall & Spring Semester & First & Second Summer Session
For Executive MBA students only. Course covers organizational behavior and utilizes cases and lectures to explore topics such as personality, motivation, leadership, group processes, organizational structure/design, and social responsibility.
PREREQUISITE: EXECUTIVE MBA STATUS.
MGT602 Human Resource Management
3 credits Fall & Spring Semester
Modern personnel administration: job analysis and design, evaluation and appraisal, recruitment and interviewing, training and development, wages and benefits, and health and safety. Unionization, regulation of wages, hours and working conditions, financial security for workers, job anti-discrimination legislation, and manpower planning is also discussed.

MGT603 Leading Teams
3 credits Fall & Spring Semester
The objectives of this course are to develop interpersonal communication and conflict management skills necessary to work in teams and/or exercise leadership in teams. Topics include team development, decision making, and diagnosing team process issues. PREREQUISITE: MGT 651.

MGT620 Managing Through People
2 credits Fall & Spring Semester
This core course in the MBA program introduces students to some of the key behavioral topics necessary to manage oneself and others in organizations. Specifically, the topics covered include individual attributes (personality, perception, motivation, relationship building), group processes (norms, roles, and team basics), leadership views, and organizational culture/change. An understanding of the relationship between each of these areas and organizational outcomes is enhanced through lecture, cases, and interactive exercises. PREREQUISITE: FULL-TIME MBA STATUS.

MGT621 High Performance Leadership
2 credits Fall & Spring Semester
Leadership skills are critical for high performing organizations. Course utilizes lecture, cases, exercises, self-assessments, and contemporary reading materials to present leadership approaches that both motivate and enable employees to perform beyond normal or ordinary expectations. Topics include followership and organizational culture, power, influence, rewards and punishments, path-goal and exchange theories, participation and empowerment, charismatic and transformational leadership, and contingency and cognitive resources theory. PREREQUISITE: FULL-TIME MBA STATUS, SPECIALIZATION IN LEADING THE HIGH PERFORMANCE ORGANIZATION.

MGT622 High Performance Teams
2 credits Fall & Spring Semester
This elective course highlights how to manage and construct effective teams to achieve strategic goals. Team-based organizations have been created to enhance organizational performance. The benefits of effective team leadership are performance beyond expectations and enhancement of learning for employees. Topics covered include team decision-making, team leadership, diversity in teams, conflict resolution, and team creativity. PREREQUISITE: FULL-TIME MBA STATUS, SPECIALIZATION IN LEADING THE HIGH PERFORMANCE ORGANIZATION.
MGT623 Human Resource Systems
2 credits  Fall & Spring Semester
Leaders must manage their human resource assets effectively to achieve high performance organizations. Course topics include recruitment and selection of high performance employees, designing performance appraisal systems, implementing policies to satisfy legal issues impacting human resources, and instituting training/development systems. PREREQUISITE: FULL-TIME MBA STATUS; SPECIALIZATION IN LEADING THE HIGH PERFORMANCE ORGANIZATION.

MGT624 Negotiation Strategies
2-3 credits  Fall & Spring Semester
PREREQUISITE: MGT 620

MGT625 Entrepreneurship: Creating New Ventures
2 credits  Fall & Spring Semester
This is a two-credit course for MBA students (only). The course is designed to help students understand the basic essentials for creating a new venture. Among some of the topics covered will be: preparation of a business plan, securing sources of capital, choosing and creating appropriate distribution channels, and understanding the complexities of selecting a management team. Students will be required to critique and develop business plans as a key evaluation component for this course. PREREQUISITE: MBA STANDING.

MGT628 Global Entrepreneurship
6 credits  Fall Semester
This seminar-type course is an advanced elective specially designed for graduate students either interested in starting their own firms or developing the skills with which to submit business plans within the corporate world (i.e., corporate entrepreneurship) in today's global, interdependent economy. Students will learn to assess the new venture opportunities that he/she may have considered and choose the one that seems most attractive and viable and develop a unique business model which enhances the plan's viability in the short term, and ensures the development of sustainable advantages in the long term. Each student will draft a comprehensive business plan after working on its functional components (e.g., marketing, finance, human and intellectual capital plans) to be developed throughout nine classes and several individual meetings along the program's academic calendar. At the end, students will present their business plans to a panel of new venture investors who will assess all projects, give individual feedback, and choose the best project(s).

MGT643 Principles of Operations Management
2 credits  Fall & Spring Semester
Introduction to operations management, forecasting, process analysis, aggregate planning, capacity management, waiting line management, system design, quality management, and inventory management. PREREQUISITE: FULL-TIME MBA STATUS.
MGT645 Principles of Supply Chain Management
2 credits  Fall & Spring Semester
Course introduces students to the business discipline of Supply Chain Management (SCM) which centers on concepts and techniques that enables firms to better coordinate material and information flows, and non-material activities associated with logistical and marketing processes that occur within and across organizations. Course also discusses concepts and recent influential innovations in SCM (e.g., Cross-Docking, Vendor Managed Inventory (VMI), Third-Party Logistics (3PL), Efficient Consumer Response (ECR), and Quick Response (QR)).
PREREQUISITE: MGT 643, MAS 632. SECOND YEAR MBA STATUS.

MGT651 Behavioral and Organizational Systems
3 credits  Fall & Spring Semester
Exploration of relevant concepts, research findings, and pragmatic implications of the behavioral sciences for the management of complex socio-technical systems.

MGT653 Operations Management
3 credits  Fall & Spring Semester
Introduction to major managerial problems and decision processes of operations management. Topics include the design of operations, planning, scheduling, quality control, systems analysis and evaluation, resource allocation, materials requirement planning, and integration of operations management with the other functional areas.

MGT654
3 credits  Fall & Spring Semester
PREREQUISITE: MGT 653.

MGT655 Research Methods
3 credits  Offered By Announcement Only
Course addresses the fundamentals of research in business including exploratory designs, correlational and multivariate designs, experimental and non-experimental studies, measurement theory, internal and external validity considerations, and ethical requirements in conducting organizational research.
PREREQUISITE: MGT 656 AND DOCTORAL STUDENT STANDING.

MGT656 Seminar: Organizational Behavior
3 credits  Offered By Announcement Only
Seminar addresses the current research and theoretical foundations in organizational behavior. Topics include individual attributes, job attitudes, leadership, motivation, and group processes.
PREREQUISITE: DOCTORAL STUDENT OR PERMISSION OF INSTRUCTOR.

MGT658 Strategic Management
3 credits  Fall & Spring Semester
The formulation and implementation of strategy, from a domestic and international perspective, is explored through cases, readings, and decision simulation. An integration of all the core areas of business is emphasized. This core course is required of all MBA students.
PREREQUISITE: GRADUATING SEMESTER MBA STUDENTS ONLY.
MGT659 Management of Multinational Enterprise
3 credits  Fall & Spring Semester
Analysis of the management tasks confronting managers operating in the international arena presented from both an environmental and an operational perspective. Alternatives for overall corporate policy and strategy that accommodate global operations is also included.

MGT660 Leadership and Motivation in Organizations
3 credits  Fall & Spring Semester & First Summer Session
Selected topics pertaining to leadership, motivation, and individual processes are surveyed through selected readings, class discussions, and a guided research project. Students' ability to conceptualize, integrate, and apply diverse approaches to the leadership and motivation of people in organizations is emphasized.
PREREQUISITE: MGT 600 OR MGT 651 OR EQUIVALENT.

MGT661 Influence, Power and Politics in Organizations
3 credits  Offered By Announcement Only
One of the basic realities of organizational life is that people continually attempt to control the actions of others and to successfully influence their behavior. This reality leads to a wide array of organizational politics aimed at enhancing one's own or one's group's personal agendas. This course focuses on preparing graduate business students for the challenges and "realities" they will ultimately face as managers. Given that most business students will eventually be leading the efforts of others, it is essential that they understand how to acquire power and exercise power within ethical bounds.
PREREQUISITE: MGT 651 OR EQUIVALENT.

MGT662 Managerial Judgment and Decision Making
3 credits  Offered By Announcement Only
Decision-making methods are explored with an emphasis on the natural way managers make predictive judgments and exercise choice. The goal is to help students learn to make better decisions.

MGT675 Business Policy and Strategy
2 credits  Fall & Spring Semester
The objectives of the course are to improve the student's ability to think strategically and to provide an intellectual framework that enhances understanding of the MBA program. The course focuses on relationships among the firm, its strategy, and its environment; why firms choose certain businesses; which business strategies are successful; and how firms can change in response to a dynamic environment. Models for strategic formulation, implementation, and control are developed that facilitate an integrated understanding of the courses that comprise the MBA curriculum. Readings and lectures illustrate strategic management theories and frameworks while case discussions, experiential exercises, and team projects provide opportunities for application.
PREREQUISITE: FULL-TIME MBA STATUS.
MGT677 Corporate Strategy and Organization
2 credits  Fall & Spring Semester
This capstone course focuses on the perspective and skills of the general manager. Its purpose is to provide practice in diagnosing and identifying realistic solutions to complex strategic and organizational problems. Course builds on previous coursework by providing an opportunity to integrate various functional areas by providing a total business perspective. Since the course focus is on pragmatic, action-oriented general management skills, the course is taught primarily through the case method and requires both written analyses and case presentations.
PREREQUISITE: FULL-TIME MBA STATUS.

MGT679 Merger and Acquisition Strategies
0-2 credits  Fall Semester & Second Summer Session
This course examines the merger and acquisition growth of two sets of actors. First, it focuses on "financial buyers" (hedge funds, leveraged buy-out groups, private equity funds) that acquire with the intention of divesting the asset at a profit in the near or medium term. Second, it focuses on "strategic buyers" (corporations or companies) that acquire with the intention of operating the acquired asset as a stand-alone business or by integrating it into an on-going operation or set of businesses. The course utilizes lectures, case discussions, presentations, and guest speakers to examine issues of strategy formulation and subsequent execution.

MGT680 DOING BUSINESS IN CHINA
2 credits  Fall & Spring Semester
This course explores various business and management issues faced by international executives who are interested or active in various industries and markets in China, aiming to improve their understanding of this largest emerging market in the world. Several case studies of business organizations and industries are used throughout the course. Emphasis of the course material and class discussion is on critical thinking, solutions to problems, and evaluation different options.

MGT681 Essentials of Health Care Management and Policy
3 credits  Offered By Announcement Only
This course develops an understanding of the basic elements of the health Services industry in the United States. A systems approach will be used utilizing a historical perspective as a basis and moving on to current and potential future system dynamics. The various components of the health care system will be examined, including physician services, hospital and hospital systems, long-term care providers, mental health services, and pharmaceutical services. Various elements associated with the financing of health services will be examined as well as indemnity insurance, capitation, and the role of managed care and consumer driven health care in theory and practice. The role of government and its impact on our health care system will be explored as well.

MGT682 Issues in Health Care Administration
3 credits  Offered By Announcement Only
A seminar on current problems and issues in health care administration.

MGT684 Analysis of Health Care Delivery and Policy
3 credits  First Summer Session
This course examines theoretical and operational incentive structures which guide health care consumers, providers and health care organization toward decisions both efficient and inefficient.
MGT685 Economic Models in Operations and Supply Chain Management  
3 credits  
Fall & Spring Semester  
In this course we will study the academic literature that is based on analytical models of supply chain and channel management. In particular, we will be concerned with models that capture the economics that govern the interaction among the firms in a supply chain/distribution channel. Since this topic is of interest to both the marketing and operations management communities, we will draw upon readings from both areas. One of our objectives will be to identify opportunities for building bridges between these two bodies of knowledge.  
PREREQUISITE: PH.D. STUDENTS. BACKGROUND IN GAME THEORY AND STOCHASTIC PROCESSES IS REQUIRED.

MGT687 Health Care Organization, Economics, and Ethics  
3 credits  
Offered By Announcement Only  
Course provides the student insight into organizational and behavioral aspects of the various sectors and agents within the health care industry and understanding of how such aspects in turn affect performance measured in terms of both economic and ethical criteria.  
PREREQUISITE: FOR MBA HEALTH ADMINISTRATION STUDENTS.

MGT688 Individual and Interpersonal Processes  
3 credits  
Offered By Announcement Only  
Basic Overview of many topics relevant to studying individuals and dyads in organizations. Course will introduce students to a variety of topics related to individual and interpersonal differences, processes, and behaviors in organizations. Students will begin to see how to link research designs with a theoretical framework for empirical testing.  
PREREQUISITE: DOCTORAL STUDENTS ONLY

MGT689 Doctoral Seminar in Leadership and Group Processes  
3 credits  
Offered By Announcement Only  
This seminar examines the theory and research that focuses on individual leadership and examines implications for individual and group behaviors as well as bridging the micro-macro divide. You will perform a critical in-depth examination of the primary research literature, focusing on appropriateness of design, analysis, interpretation, contribution and future research directions.  
PREREQUISITE: DOCTORAL STUDENTS ONLY

MGT691 International Management  
2 credits  
Fall & Spring Semester  
Course is designed to provide an overview of management problems and issues for organizations and executives operating internationally. Students learn how multinational enterprises are different, why they behave as they do, and how to apply management principles to problem-solving in such contexts.
MGT692 Theories in Management and Organization
3 credits  Fall Semester
This course provides an in-depth review of major theories in the broad field of management and organization. It covers a multitude of management and organization theories that are derived not only from general management but from economics, sociology, ecology, and the like. The course will use several techniques, including lectures, article presentations and discussions, theory development, research project, and manuscript preparation. By the end of the term, students are expected to understand the central notions of each theory being discussed, comment on various arguments in these theories, improve the skills in applying these theories to their specific research questions, and sharpen their ability to develop theoretical models.
PREREQUISITE: CO-REQUISITE/ BUSINESS PH.D. STUDENTS

MGT693 Theories and Research in Global Strategic Management.
3 credits  Fall & Spring Semester
This course is designed to provide doctoral students an in-depth review of major theories, paradigms, and perspectives in global strategy and international business. We'll also explore how to apply existing theories and perspectives to new contextual settings, such as emerging markets and outsourcing. Furthermore, we'll do all this while reading and critiquing the major branches and works within the strategic management and international business literature. The course is intended for doctoral students in business or related fields. There are no formal prerequisites for the course although some basic knowledge of global business is expected.
PREREQUISITE: CO-REQUISITES/ BUSINESS PH.D. STUDENTS

MGT694 Ph.D Seminar in Strategic Management
3 credits  Spring Semester
This course is designed to provide doctoral students an in-depth review of major theories, perspectives, and methods in strategic management. The course is intended for doctoral students in business or related fields.
PREREQUISITE: DOCTORAL STUDENTS ONLY

MGT695 Ph.D Seminar in Emerging Market Research
3 credits  Fall Semester
This course is designed to provide doctoral students an in-depth review and study of major theories, perspectives, methods, findings, and future research issues in business and management involving emerging economies. It encompasses both macro- (e.g., strategic management, international business, entrepreneurship), and micro- (e.g., culture, human resources management, leadership, and organizational behavior) levels.
PREREQUISITE: DOCTORAL STUDENTS ONLY

MGT698 Selected Topics
1- 6 credits  Offered By Announcement Only
Topics in selected areas of specialization.

MGT699 Directed Study
1- 6 credits  Fall & Spring Semester & First & Second Summer Session
Individually supervised research project in selected field of management. Approval of supervising professor of the topic/scope of work/evaluation is required prior to registration.
PREREQUISITE: SPECIALIZATION IN MGT DEPARTMENT.
MGT725 Comprehensive Test Preparation
0-3 credits  Fall & Spring Semester & First Summer Session
PREREQUISITE: DOCTORAL STUDENTS ONLY; ALL CORE COURSEWORK COMPLETED

MGT730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Course is required of all candidates for the Ph.D. The student enrolls for credit as determined by his/her advisor.

MGT750 Research in Residence
0-12 credits  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MARKETING

MKT555 Marketing Honors Research Project
3 credits  Offered By Announcement Only
Research project to fulfill requirements for Departmental Honors in Marketing.
PREREQUISITE: 3.9 GPA. SENIOR STANDING. PERMISSION OF INSTRUCTOR OR DEPARTMENT.

MKT640 Foundations of Marketing Management
2 credits  Fall & Spring Semester
Course introduces students to the analytical concepts and tools of marketing management. Special emphasis is placed on the relationships between marketing and overall company strategy, the development of a customer orientation, the integration of marketing throughout the organization, and the implementation of systems for planning and controlling the marketing effort. Students consider problems of consumer analysis, product planning, integrated communication, distribution, and pricing. The discovery and application of marketing management skills are developed through the use of readings, case exercises, and class discussions.

MKT641 Marketing Research
2 credits  Fall & Spring Semester
The objective of the course is to allow students to understand functional analysis of consumer and market behaviors utilizing statistical tools. The course will cover topics of secondary sources of data, sampling, questionnaire design, and analysis and interpretation of data. Project and case analysis methods will be used for instruction.

MKT643 Consumer Insights
2 credits  Spring Semester
This course focuses on understanding consumers through several tools available. The aim is to enable you to develop the ability to be a good listener to your customers and potential customers. This course is aimed at the manager who is the ultimate user of marketing research conducted by the company and who is responsible for determining the scope and direction of research conducted on his/her behalf.
MKT644 Services Marketing
2 credits
Fall & Spring Semester
Course develops skills necessary to manage companies in an increasingly service-oriented and technology-driven economy and to gain sustainable competitive advantage through delivering superior quality services. Course covers the special marketing challenges posed by the unique characteristics of services and discusses their managerial implications. The need and strategies for synergistic management of operations, systems, and people to satisfy customers in order to achieve marketing excellence and superior financial performance is also included.

MKT645 International Marketing
2 credits
Fall & Spring Semester
Course analyzes the theories and practice of international marketing management. Course allows students to understand markets and aid in the development of marketing plans based on the nature of national as well as international markets. Issues of globalization, standardization, intermarket segments, trading blocks, global marketing strategies, local branding, global branding in the context of customer movements, product development, pricing, distribution, communication, and segmentation in global markets are also discussed.

MKT646 Consumer Behavior
2 credits
Fall & Spring Semester
Overview of psychological and normative principles of consumer decision-making and judgment through focusing on underlying behavioral research and theory. How people process information, make decisions involving risk and uncertainty, conflicting objectives, and imperfect information is discussed. The implications of consumer behavior on marketing strategy are highlighted.

MKT647 Advertising and Communications Management
2 credits
Fall & Spring Semester
Billions of dollars are wasted every year on ineffective advertising and communication campaigns. This problem is due to an absence of a compelling strategy to serve as a foundation for developing creative executions and media plans. The course provides a balanced analysis of strategy and execution of integrated marketing communication campaigns. The effectiveness of existing and emerging communication vehicles to attain strategic marketing goals are assessed. Special emphasis is placed on advertising, sales promotions, and online communications. Current and historical campaigns are also reviewed. Course requirements include case reports, projects, and class participation.

MKT648 New Product Development
2 credits
Fall Semester
This course enables students to appreciate the systematic approach that goes into the creation and marketing of new products. Practical aspects of developing and marketing new products are included through two assignments and one class project.
MKT649 Strategic Brand Marketing
2 credits Spring Semester
More and more firms have come to realize that their brands are among their most valuable assets. The goal of this course is to teach students the strategic significance of brands in creating shareholder value. Students should develop fluency with the core principles associated with branding including: an understanding of how to develop a brand positioning; managing total brand experience; how to manage the brand relevancy over time; familiarity with the various qualitative and quantitative methodologies that are used to evaluate brand equity; how to achieve growth through brand extension; brand design and brand messaging. The basic philosophy for this course is to blend theory and practice of brand management. Branding is both an art and a science. Few branding situations have a definitive, unqualified “right” answer as to what is the best approach. However, when armed with relevant and comprehensive theories, appropriate frameworks and models, and familiarity with past successful and unsuccessful branding strategies, managers can make better and more informed decisions that are more likely to yield successful implementation.

MKT650 Strategic Marketing
2 credits Fall & Spring Semester
Course develops the skills necessary to strategically manage business-unit level marketing activities in a multi-brand firm. This necessitates examining all marketing mix elements, R&D, financial and production considerations simultaneously in the context of the many markets, products, and services that may concern a typical firm. The emphasis is placed on understanding internal capabilities, market competitors, and customers. Market simulation exercise, cases, and readings are utilized.
PREREQUISITE: MKT 640.

MKT660 Foundations of Marketing Management
3 credits Fall & Spring Semester
Marketing problems experienced by top executives are examined and fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.

MKT665 International Marketing
3 credits Fall & Spring Semester
Analysis of major U.S. foreign markets, marketing policies, and techniques are discussed.
PREREQUISITE: MKT 660.

MKT672 Services Marketing
3 credits Fall & Spring Semester
Course develops the skills necessary to manage services marketing and compete through delivering quality service. The unique characteristics of services and their managerial implications are examined. Importance of the synergistic management of operations, environment, systems and people to satisfy the customer is highlighted.
PREREQUISITE: MKT 660.
MKT686 Behavioral Decision Theory in Consumer Research.

3 credits  
Spring Semester  
The objective of this seminar is to acquaint students with important theories and findings regarding consumer behavior and to stimulate research. Students will learn how to identify important research problems, ask interesting research questions, develop theories and hypotheses, and design experiments.
PREREQUISITE: NONE

MKT687 Marketing Strategy

3 credits  
Fall Semester  
Marketing Strategy is a vast, exciting and exploding literature that almost defies classification. However despite this difficulty one common theme unifies and distinguishes this stream of research: it is marketing as seen through the eyes of a manager. Is it worth fighting for market share? How do we analyze competitors? Is it more profitable to introduce a new product or enter a new market? Should we build on existing relationships or seek new customers? Does loyalty management pay? Do consumers understand product quality? Can we quantify the effects of advertising and promotions? What metrics should we use to evaluate the effectiveness of marketing effort? Can we run policy simulations before committing to marketing action? These are some of the questions that marketing managers need to address. Often the questions are very broad and complex reflecting the bewildering range of techniques that have been used to address those questions. The seminar will try to impart an appreciation of how to define and solve research problems in marketing strategy.

MKT688 Ph.D. Seminar in Consumer Behavior and Decision Making

3 credits  
Fall Semester  
This course is designed to provide students with a background regarding a wide set of topics in consumer behavior focusing on theoretical models. In addition to developing a knowledge base in several extant consumer behavior literatures, this course has several additional goals. Students will 1) become familiar with the content and style of consumer behavior research published within the marketing field, 2) develop an understanding of many methodologies and paradigms that can be used to investigate theoretical issues, 3) have several opportunities to explicate research ideas that they will hopefully be able to pursue in the remainder of the program or early in their career, and 4) learn to critically evaluate the research of others to aide in strengthening their thinking and ultimately their own research activities.

MKT695 Topics in Marketing

1-3 credits  Offered By Announcement Only  
Topics in selected areas of Marketing.

MKT696 Topics in Marketing

1-3 credits  Offered By Announcement Only  
Topics in selected areas of Marketing.

MKT697 Topics in Marketing

1-3 credits  Offered By Announcement Only  
Topics in selected areas of Marketing.

MKT698 Topics in Marketing

1-3 credits  Offered By Announcement Only  
Topics in selected areas of Marketing.
MKT699 Directed Study
1-6 credits Offered By Announcement Only

MKT730 Doctoral Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as
determined by his/her advisor but not for less than a total of 24. Not more than
12 hours of MKT 730 may be taken in a regular semester, nor more than six in a
summer session. Where a student has passed his/her (a) qualifying examinations,
and (b) is engaged in an assistantship, he/she may still take the maximum allowable
credit stated above.

MKT750 Research in Residence
0 credit Offered By Announcement Only
Used to establish research in residence for the Ph.D. after the student has been
enrolled for the permissible cumulative total in appropriate doctoral research.
Credit not granted. May be regarded as full-time residence as determined by the
Dean of the Graduate School.
COM598 Special Topics in Communication
3 credits Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: 12 CREDITS IN COMMUNICATION AT 300 LEVEL OR ABOVE OR EQUIVALENT, PERMISSION OF INSTRUCTOR

COM601 Theories of Communication
3 credits Fall Semester
Comparison of theories dealing with the processes and effects of communication is discussed.
PREREQUISITE: PROGRAM DIRECTORS MAY REQUIRE STUDENTS TO ENROLL IN A SPECIFIC SECTION OF COM 601 DEPENDING ON THEIR PROGRAM OF STUDY.

COM602 Methods of Communication Research
3 credits Fall Semester
A comprehensive survey of communication research methods. Qualitative and quantitative approaches will be explained and practiced.
PREREQUISITE: PROGRAM DIRECTORS MAY REQUIRE STUDENTS TO ENROLL IN A SPECIFIC SECTION OF COM 602 DEPENDING ON THEIR PROGRAM OF STUDY.

COM603 Qualitative Research Methodologies
3 credits Spring Semester
Research methods and theories for participant-observation, phenomenology, symbolic interactionism, ethnomethodology, content analysis, and historical-critical interpretation.
PREREQUISITE: PROGRAM DIRECTORS MAY REQUIRE STUDENTS TO ENROLL IN A SPECIFIC SECTION OF COM603 DEPENDING ON THEIR PROGRAM OF STUDY.

COM604 Advanced Communication Research Methods and Statistics
3 credits Offered By Announcement Only
Provides an advanced examination of the problems and methods found in quantitative communication research.
PREREQUISITE: COM 601 and 602.

COM605 Theories and Methods for Mass Communication Research
3 credits Spring Semester
PREREQUISITE: GRADUATE STANDING

COM609 Special Topics in Communication
3 credits Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

COM610 Doctoral Colloquium
0 credit Fall Semester
This course will introduce students to the nature and scope of doctoral study.

COM613 History of Communication
3 credits Fall & Spring Semester
Course will cover the historical analysis of the entire field of communication (interpersonal, intercultural, mass, etc.) from the pre-Aristotle period to the present.

COM615 Social Effects of Mass Communication
3 credits Fall Semester
Roles, functions, and consequences of mass communication in American society.
PREREQUISITE: COM 601.
COM672 Seminar in Persuasive Communication
3 credits Offered By Announcement Only
This course is designed to provide students with a basic understanding of the role of communication in the persuasion process. This will be achieved by exploring historical and contemporary theories of persuasion as well as examining research that has focused on persuasion.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

COM695 Directed Readings
1- 3 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: PERMISSION OF INSTRUCTOR.

COM698 Seminar in Communication
3 credits Fall & Spring Semester
An in-depth, hands-on course in which students conduct a research project using the specified research method. May include experimental design, advanced qualitative methods, content analysis, or survey methods. Repeatable up to 6 credits.
PREREQUISITE: COM 602, 603.

COM710 Master's Thesis
1- 6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

COM720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in COM 710 (usually six credits). Credit not granted. May be regarded as full time residence.

COM725 Continuous Registration--Master's Study
0 credit Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

COM730 Doctoral Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours.

COM750 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

COMMUNICATION STUDIES
COS545 Intercultural Communication: International Perspectives
3 credits Offered By Announcement Only
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.
PREREQUISITE: PERMISSION OF INSTRUCTOR
COS546 Intercultural Communication: Domestic Perspectives
3 credits Offered By Announcement Only
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS560 The Executive Communicator
3 credits Offered By Announcement Only
Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.
PREREQUISITE: JUNIOR STANDING OR PERMISSION OF INSTRUCTOR

COS591 Advanced Special Topics in Communication Studies
3 credits Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS599 Advanced Projects and Directed Research
1-6 credits Fall & Spring Semester & First & Second Summer Session
Individual study. Course may be repeated to a maximum of six credits.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS674 Seminar in Interpersonal Communication
3 credits Offered By Announcement Only
This course focuses on theoretical approaches to interpersonal communication. Emphasis is placed on current research including fundamentals of relationships, developmental issues, interaction management, and interpersonal competence.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS682 Seminar in Organizational Communication
3 credits Offered By Announcement Only
This course explores theoretical perspectives and the impact of communication in organizations. Critical analysis includes management styles, decision-making, group interaction, conflict resolution, and diffusion of innovations.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS684 Organizational Communication Audit Procedures
3 credits Offered By Announcement Only
Measurement of communication variables in the organization focusing on analyses using message diffusion, cross-section survey, communication network, and communication audit procedures.
PREREQUISITE: PERMISSION OF INSTRUCTOR

COS690 Communication Studies Practicum
1-3 credits Fall & Spring Semester
Prescribed graduate study and supervised work with practitioners in organizations.
PREREQUISITE: COM 601, COM 602, COM 603, AND 9 HOURS IN COMMUNICATION STUDIES PROGRAM; PERMISSION OF PROGRAM DIRECTOR

ELECTRONIC MEDIA

CEM517 Television News Reporting
3 credits Fall & Spring Semester
PREREQUISITE: CEM 245 AND CEM 317 FOR UNDERGRADUATE STUDENTS. PERMISSION OF INSTRUCTOR FOR GRADUATE STUDENTS.
CEM527 Television Newscast
3 credits                                                    Fall & Spring Semester
PREREQUISITE: CEM 417 OR CEM 517

CEM531 Audio Production Techniques
3 credits                                              Offered By Announcement Only
Writing, preparation, and production of material for auditory presentation, live or recorded, broadcast on open or closed circuit radio systems. Familiarization with magnetic and optical recording procedures, both double and single system sound, in television and motion picture production is discussed. Lecture and laboratory are included.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CEM534 Practicum in Communication
3 credits                                              Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

CEM535 Telecommunication Systems
3 credits                                              Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

CEM592 Special Topics in Electronic Media
3 credits                                              Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND PROGRAM DIRECTOR

CEM599 Advanced Projects and Directed Research
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Individual study. Course may be repeated for a maximum of six credits.
PREREQUISITE: PERMISSION OF SUPERVISING INSTRUCTOR

CEM605 News Technologies.
3 credits                                                             Fall Semester
This course emphasizes how television, digital, and multimedia technologies contribute to the storytelling process. Understanding of production theories and news processes will be gained through hands on work with television and multimedia projects.
PREREQUISITE: NONE

CEM606 Writing and Reporting Across Platforms
3 credits                                                             Fall Semester
An introduction to professional operating practices in multimedia journalism with emphasis on news writing and news production skills.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CEM607 Broadcast Journalism
3 credits                                                           Spring Semester
Advanced instruction in techniques of news writing and field reporting, including conducting research for stories, preparing complete field packages for newscasts, filing live remotes, and conducting interviews.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CEM608 Long-Form Public Affairs Programming
3 credits                                                      First Summer Session
Development and production of longer form news, information magazine, and documentary style programming.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
CEM609 Internship in Electronic Media journalism
1-3 credits  Fall & Spring Semester & First & Second Summer Session
The internship program is a supervised activity in which graduate students advance their skills and acquire professional experience by working with a sponsoring organization. Students learn through observation, discussions with supervising personnel, & performance of professional activities.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CEM630 Topics in Electronic Communication
3 credits  Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CEM635 The Broadcasting, Cable, and Electronic Media Industry
3 credits  Spring Semester
Examination of broadcasting, cable, and related electronic media from a business perspective.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CEM641 Information Processing for Video-Audio Systems
3 credits  Offered By Announcement Only
Use of non-print media, by corporate, social, political, and educational institutions to convey information to internal and external audiences.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CEM643 Managing Video-Audio Information Systems
3 credits  Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CEM653 Producing Television News
1-3 credits  Fall & Spring Semester & First Summer Session
The mechanics of planning and executing professional style newscast and/or long-form television news program.
PREREQUISITE: CONCURRENT ENROLLMENT IN CEM 606, 607 OR 608.

CEM725 Journalism Internship
3 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR

JOURNALISM

CNJ510 Comparative Media Systems
3 credits  Offered By Announcement Only
This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ511 Global Media
3 credits  Offered By Announcement Only
An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ513 Computer-Assisted Reporting
3 credits  Offered By Announcement Only
Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.
PREREQUISITE: CNJ 216 OR PERMISSION OF INSTRUCTOR
CNJ515 Reporting and the Internet
3 credits          Offered By Announcement Only
Overview of uses of online computer services for newsgathering and distribution
with emphasis on the Internet.
PREREQUISITE: CNJ 216 OR PERMISSION OF INSTRUCTOR

CNJ517 International Journalism
3 credits          Offered By Announcement Only
PREREQUISITE: COM 601

CNJ522 Principles of Interactive Design
3 credits          Fall Semester
This is an advanced multimedia design course that focuses on techniques and methods
to create the best user experience in multimedia journalism projects.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ523 Sports Reporting
3 credits          Offered By Announcement Only
An analysis of sports journalism that will develop students' skills in sports reporting
and sports writing. Discussions range across the entire field of sports reporting,
including broadcasting, but the greatest emphasis is concentrated on sports reporting
and writing for newspapers and magazines.
PREREQUISITE: CNJ 216 OR PERMISSION OF INSTRUCTOR

CNJ544 Feature Writing
3 credits          Offered By Announcement Only
Analyzing and writing feature articles for magazines, newspapers, and other news media.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ595 Special Topics in Journalism
3 credits          Offered By Announcement Only
This course subject matter varies according to announced special topic. See class
schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CNJ599 Advanced Projects and Directed Research
1-6 credits       Fall & Spring Semester & First & Second Summer Session
Individual study. Course may be repeated to a maximum of six credits.
PREREQUISITE: PERMISSION OF SUPERVISING INSTRUCTOR

CNJ609 Graduate Internship in Print Journalism
1-3 credits       Fall & Spring Semester & First & Second Summer Session
Prescribed study and supervised work with professionals in newspapers, magazines,
web sites or related news media.
PREREQUISITE: GRADUATE STANDING, CNJ 611, 614 AND 619, OR SIGNIFICANT JOURNALISM
EXPERIENCE, CUMULATIVE GPA OF 3.0 IN ALL GRADUATE COURSES TAKEN, AND/OR
PERMISSION OF THE PROGRAM DIRECTOR.

CNJ611 Newswriting and Reporting Seminar
3 credits          Fall Semester
Development of newswriting and reporting skills for news media.

CNJ612 History of Journalism Seminar
3 credits          Offered By Announcement Only
The development and impact of journalism in America traced through industry leaders and events.
CNJ614 Media Law and Ethics Seminar
3 credits
Offered By Announcement Only
A survey of legal and ethical issues concerning First Amendment theories and practices regarding defamation, privacy, freedom of information, free press vs. fair trial, reporter privilege, access to media, intellectual property, obscenity, broadcasting, and new media.

CNJ617 International Journalism
3 credits
Offered By Announcement Only
News gathering, transmission, and distribution outside the United States, with emphasis on Latin America.
PREREQUISITE: COM 601.

CNJ619 Advanced Newsgathering and Writing Seminar
3 credits
Spring Semester
Refining news writing and reporting skills for the media.
PREREQUISITE: CNJ 611.

CNJ620 Online Journalism (in Spanish)
3 credits
Spring Semester
This course should help journalism students develop the necessary skills to work online, including posting breaking news, writing for the Web, gathering and uploading multimedia content and creating/writing blogs. This course is taught in Spanish.
PREREQUISITE: THIS COURSE IS TAUGHT IN SPANISH.

CNJ622 Seminar in News Ethics and Problems
3 credits
Offered By Announcement Only
Critical analysis of ethical issues and problems facing practicing journalists. Discussion of differences in philosophical ethics and practical ethics in journalism.
PREREQUISITE: CNJ 611.

CNJ624 Seminar in Editing and Design for Print and Websites
3 credits
Offered By Announcement Only
Theory and practice in news media copy editing, layout, and design.
PREREQUISITE: CNJ 611.

CNJ626 Specialized Writing and Reporting Seminar
3 credits
Offered By Announcement Only
Techniques in writing and reporting about specialized and complex subjects for news media.
PREREQUISITE: CNJ 611.

CNJ654 Writing for Publication
1-3 credits
Fall & Spring Semester & First Summer Session
This course focuses on writing principles and practices of the news media. It is designed to give the student exposure and practical experience in writing for the print media.
PREREQUISITE: CONCURRENT ENROLLMENT IN CNJ 611, 619 OR COMPLETION OF BOTH.

CNJ655 Media Management and Entrepreneurship (in Spanish)
3 credits
Spring Semester
This course is designed to give students an understanding of the major trends in the news media business and to give them the tools to initiate and manage media projects. This course is taught in Spanish.
PREREQUISITE: THIS COURSE IS TAUGHT IN SPANISH.
CMP501 Principles of Aesthetics and Analysis
3 credits                                              Fall Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP503 Film Directors
3 credits                                              Fall Semester
This course will address the conditions of authorship in film through an intensive
study of the films of two or more directors, whose careers will serve as case studies.
These directors will be historically important and their work will represent significant
achievements in the art of film.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

CMP504 Aspects of Contemporary Cinema
3 credits                                              Offered By Announcement Only
The study of the ways in which film communicates. Intensive analysis and criticism
of cinematic techniques exemplified through particular films.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

CMP506 Genres
3 credits                                              Offered By Announcement Only
A study of selected movie genres from a variety of critical perspectives. Issues
pertaining to selfhood, sexual difference, and other concerns of present-day film
criticism will be examined.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

CMP507 National Cinemas
3 credits                                              Spring Semester
Selected films from Europe, Asia, Africa and Latin America will be studied in relation
to their diverse social/political and cultural contexts.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

CMP509 Legal Aspects of Motion Pictures
3 credits                                              Spring Semester
The law, contracts, and negotiating techniques of the business affairs aspects
of the production of motion pictures.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF THE DIRECTOR OF THE MOTION PICTURE PROGRAM

CMP510 Foundation of Screenwriting
3 credits                                              Fall Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP511 Writing the Short Film
3 credits                                              Offered By Announcement Only
PREREQUISITE: CMP 510, LIMITED TO MFA CANDIDATES

CMP520 Cinematography
3 credits                                              Fall Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP529 Nonfiction Film
3 credits                                              Offered By Announcement Only
An examination of American and world nonfiction films.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

CMP530 Introduction to Editing
3 credits                                              Spring Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES
SCHOOL OF COMMUNICATION

MOTION PICTURES

CMP550 Production Workshop I - Narrative
3 credits  
Spring Semester
Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design and green screen.
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP551 Advanced Motion Graphics and Compositing
3 credits  
Spring Semester
Extend the 2D skills of students who have taken CMP 550 to 3D motion graphics and animation. Emphasis on title design and animation.
PREREQUISITE: CMP 550 OR PERMISSION OF INSTRUCTOR.

CMP552 Motion Picture Marketing and Distribution
3 credits  
Fall Semester
Economic and marketing considerations in the production and distribution of motion pictures.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF THE DIRECTOR OF THE MOTION PICTURE PROGRAM

CMP553 Advanced Motion Picture Marketing
3 credits  
Offered By Announcement Only
Advanced marketing considerations in the distribution of motion pictures.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

CMP558 Documentary Production
3 credits  
Offered By Announcement Only
An introduction to the documentary genre including the production of a documentary from start to finish.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

CMP560 Directing the Actor
3 credits  
Fall Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP566 Character and Dialogue
3 credits  
Offered By Announcement Only
An examination of the craft and techniques of creating original characters and dialogue.
PREREQUISITE: MFA SCREENWRITING STATUS OR PERMISSION OF INSTRUCTOR

CMP570 Producing the Motion Picture
3 credits  
Spring Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP586 Online Screenwriting
3 credits  
Fall & Spring Semester & First & Second Summer Session
The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CMP594 Special Topics in Motion Picture
3 credits  
Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
CMP595 Directing Techniques
3 credits  
Fall & Spring Semester
To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.
PREREQUISITE: CMP 251 OR PERMISSION OF INSTRUCTOR

CMP605 Production Management
3 credits  
Spring Semester
A comprehensive examination of the skills and techniques employed by line producers and production managers in the preproduction, production, and post-production of motion pictures.

CMP610 Writing the Feature-Length Screenplay
3 credits  
Fall Semester
PREREQUISITE: CMP 510

CMP611 Rewriting the Feature Screenplay
3 credits  
Spring Semester
PREREQUISITE: CMP 610

CMP612 Writing for Episodic Television
3 credits  
Spring Semester
PREREQUISITE: CMP 611

CMP627 Scriptwriting
3 credits  
Fall & Spring Semester
Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character.
PREREQUISITE: LIMITED TO MFA SCREENWRITING CANDIDATES.

CMP630 Advanced Editing
3 credits  
Spring Semester
PREREQUISITE: CMP 530

CMP638 Writing the Short Film
3 credits  
Spring Semester
A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film.
PREREQUISITE: LIMITED TO MFA PRODUCTION CANDIDATES.

CMP640 Sound Design
3 credits  
Spring Semester
An historical examination of the theatrical exhibition of motion pictures. Focus is placed on contemporary business practices within the exhibition industry, with particular attention to a definition of good programming practices.
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP650 Production Workshop II - Individual Projects
3 credits  
Fall Semester
A concentration on four distinctive film directors and their work. Utilization of techniques from film theory, film criticism, and film history to arrive at a definition of their unique cinematic styles.
PREREQUISITE: CMP 550
CMP652 Advanced Cinematography
3 credits
Spring Semester
Advanced technical and photographic principles begun in CMP 651. Preparation for the filming of the MFA project film.
PREREQUISITE: CMP 651.

CMP653 Documentary Production
3 credits
Spring Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP656 Motion Picture Post-Production Procedures
3 credits
Fall Semester
An examination of the esthetics of editing, recording, re-recording, and laboratory procedures following completion of principal photography.
PREREQUISITE: LIMITED TO MFA PRODUCTION CANDIDATES.

CMP660 Directing Performance and Creative Collaboration
3 credits
Fall Semester
PREREQUISITE: LIMITED TO MFA CANDIDATES

CMP661 Directing the Camera
3 credits
Fall & Spring Semester
Directorial techniques and methods in the narrative film: conceptualizing scripted material, staging, and directing the performer.
PREREQUISITE: CMP 660

CMP670 The Business of Motion Pictures
3 credits
Fall Semester
PREREQUISITE: CMP 570

CMP671 Production Management
3 credits
Fall Semester

CMP672 Marketing and Distribution
3 credits
Spring Semester

CMP694 Motion Picture Internship
1-3 credits
Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MINIMUM 24 CREDITS IN THE MFA

CMP695 Special Topics in Motion Pictures
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR

CMP699 Advanced Projects and Directed Research
1-6 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF SUPERVISING INSTRUCTOR

CMP715 MFA Thesis
1-6 credits
Fall & Spring Semester & First & Second Summer Session
University of Miami Bulletin, 2012-2013
Graduate Course Listing
SCHOOL OF COMMUNICATION
MOTION PICTURES

CMP734 MFA Thesis
1- 6 credits Fall & Spring Semester & First & Second Summer Session
Film production in which the student functions as a minimum, in the capacity of a producer, director, or a screenwriter. Course may be repeated to a maximum of six credits.

PUBLIC RELATIONS

CPR517 Media Relations
3 credits Fall & Spring Semester & First Summer Session
The practice of media relations within the public relations milieu.
PREREQUISITE: ADMISSION TO MAJOR, CPR 311, SENIOR STANDING OR PERMISSION OF INSTRUCTOR

CPR582 International Public Relations
3 credits Fall & Spring Semester
History, theory, and practice of public relations in a global, multi-cultural environment.
PREREQUISITE: ADMISSION TO MAJOR; SENIOR STANDING OR PERMISSION OF INSTRUCTOR

CPR584 Public Relations Management
3 credits Spring Semester
Principles and practice of public relations management in a variety of contexts including agency, consultancy, corporate, and nonprofit.
PREREQUISITE: ADMISSION TO MAJOR, CPR 311, AND SENIOR STANDING OR PERMISSION OF INSTRUCTOR

CPR590 Special Projects: Public Relations
3 credits Offered By Announcement Only
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: ADMISSION TO THE MAJOR, CPR 311, SENIOR STANDING, PERMISSION OF INSTRUCTOR, AND PERMISSION OF PROGRAM DIRECTOR

CPR599 Advanced Projects and Directed Research in Public Relations
1- 6 credits Fall & Spring Semester & First & Second Summer Session
Individual study. May be repeated to a maximum of six credits.
PREREQUISITE: ADMISSION TO MAJOR, CPR 311, SENIOR STANDING, PERMISSION OF SUPERVISING INSTRUCTOR, AND PERMISSION OF PROGRAM DIRECTOR

CPR620 Public Relations Fundamentals
3 credits Fall Semester
A seminar to explore the theories and methodologies of public relations encompassing writing, principles and campaigns.
PREREQUISITE: GRADUATE STUDENTS AND PERMISSION OF INSTRUCTOR

CPR625 Seminar in Public Relations Administration
3 credits Spring Semester
Course analyzes organizational principles, internal budgeting, and evaluation of public relations departments and counseling firms.
PREREQUISITE: GRADUATE STUDENTS, CPR 620 OR PERMISSION OF INSTRUCTOR

CPR629 Public Relations Seminar
3 credits Offered By Announcement Only
A seminar to Identify and discuss the role of fundraising in the not-for-profit sector.
PREREQUISITE: COM 601 AND 602 OR 603.
CPR632 Seminar in Public Relations and Political Campaigns
3 credits  Offered By Announcement Only
A seminar to examine the role of public relations in American political campaigns.
PREREQUISITE: COM 601 AND 602 OR 603 OR PERMISSION OF INSTRUCTOR.

CPR633 Seminar in Public Relations: Lobbying and Pressure Groups
0-1 credits  Offered By Announcement Only
3 credits. A seminar to focus on public relations by lobby groups, pressure groups, and corporate institutions.
PREREQUISITE: COM 601 AND 602 OR 603, CPR 620 OR PERMISSION OF INSTRUCTOR.

CPR634 Seminar in Public Relations: Non-profit Groups and Governmental Institutions
3 credits  Offered By Announcement Only
A public seminar that focuses on non-profit organizations and governmental institutions.
PREREQUISITE: COM 601 AND 602 OR 603, CPR 620 OR PERMISSION OF INSTRUCTOR.

CPR644 Seminar in Public Relations Ethics
3 credits  Offered By Announcement Only
To explore through readings, discussion and research contemporary ethical issues in public relations.
PREREQUISITE: COM 601 AND 602 OR 603, CPR 620 OR PERMISSION OF INSTRUCTOR.

CPR690 Public Relations Practicum I
3 credits  Fall & Spring Semester
Professional functions related to public relations requirements in a professional environment acting as an account executive.
PREREQUISITE: COM 601, 602 OR 603; CPR 620 AND 12 HOURS IN PUBLIC RELATIONS SEQUENCE; PERMISSION OF INSTRUCTOR AND DIRECTOR.

VISUAL JOURNALISM
CVJ519 Interactive Storytelling
3 credits  Spring Semester
Digitization allows us to merge several forms of media that were not connected in the past. This course is intended as an exploration of how storytelling is re-inventing itself utilizing the new digital communication tools available to us today. This course will cover linear and non-linear storytelling techniques and production processes.
PREREQUISITE: CVJ 521, CVJ 522, CVJ 530, OR PERMISSION OF INSTRUCTOR.

CVJ521 Seminar in Visual Storytelling
3 credits  Fall Semester
An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR.

CVJ522 Interaction Design and Information Visualization
3 credits  Fall Semester
The course will require an advanced use of typography, architecture of design, and creative style for layout and design for the print or online media. This is a portfolio design class. Each student will concentrate on an area of specialty within print or electronic design. All portfolios will be reviewed by outside art and design directors.
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR.
CVJ530 Programming for Interactivity  
3 credits  
Fall Semester  
This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories.  
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR

CVJ531 Database Journalism  
3 credits  
Fall Semester  
This course teaches data analysis and interactive deployment of data of the World Wide Web and other digital platforms.  
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF INSTRUCTOR

CVJ541 Advanced Audio Video Narratives  
3 credits  
Spring Semester  
This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.  
PREREQUISITE: CVJ 521 OR PERMISSION OF INSTRUCTOR

CVJ550 3D Design and Graphics  
3 credits  
Spring Semester  
This course develops informational graphic procedures and practices as they pertain to print and online media, specifically in the context of news and journalism.  
PREREQUISITE: GRAD STATUS OR PERMISSION OF INSTRUCTOR

CVJ551 Advanced Programming  
3 credits  
Second Summer Session  
This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zend and Symfony will also be covered in the class.  
PREREQUISITE: CVJ 530, CVJ 521, CVJ 522, PERMISSION OF INSTRUCTOR

CVJ560 Team Multimedia Project  
1-3 credits  
Second Summer Session  
Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, info graphic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.  
PREREQUISITE: CVJ 530, CVJ 521, CVJ 522, COM 601, COM 603, CNJ 614 OR PERMISSION BY INSTRUCTOR
CVJ596 Special Topics in Visual Journalism
1- 6 credits    Fall & Spring Semester
This course subject matter varies according to announced special topic. See class schedule for details.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CVJ599 Advanced Projects and Directed Research
3 credits                                                    Fall & Spring Semester
PREREQUISITE: PERMISSION OF SUPERVISING INSTRUCTOR

CVJ606 Multimedia Design
3 credits                                                             Fall Semester
This is a project-based course in multimedia design, with emphasis on visual concepts and graphics development. Students will be learning about the various software packages to design and integrate interaction into their projects. Topics covered include preparing existing content for multimedia journalism, animation, layout for interactive media, typography, photography and usability.
PREREQUISITE: OPEN ONLY TO SPANISH-LANGUAGE M.A., IN JOURNALISM MAJORS

CVJ607 Audiovisual Production
3 credits                                                           Spring Semester
A lab/lecture course focusing on the concepts of visual storytelling and on the skills needed to gather information in the visual storytelling process. Students work in teams with still photography, video and audio-gathering devices to document community life.
PREREQUISITE: OPEN ONLY TO SPANISH-LANGUAGE M.A., IN JOURNALISM MAJORS

CVJ649 Team Multimedia Project
3 credits                                             First & Second Summer Session
PREREQUISITE: CVJ 521, CVJ 522, CVJ 530, COM 605, CNJ 614, OR PERMISSION OF INSTRUCTOR

CVJ715 Multimedia Project
1- 6 credits    Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: COMPLETION OF ALL REQUIRED COURSE WORK

CVJ738 M.A. Multimedia Project
1- 6 credits    Fall & Spring Semester & First & Second Summer Session
Students, in consultation with program faculty, will complete a final project that reflects in-depth knowledge and analysis of a subject and professional competence in multimedia storytelling. Course may be repeated to a maximum of six credits.
PREREQUISITE: COMPLETION OF COURSE WORK PER PROGRAM REQUIREMENTS
CO-REQUISITE: DISSERTATION TOPIC
SCHOOL OF EDUCATION

EDUCATIONAL & PSYCHOLOGICAL STUDIES

EPS505 Lifespan Human Development
3 credits
Spring Semester
Theories and research relating to the biophysical, cognitive, and psychosocial domains of human lifespan development.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

EPS506 Foundations of Mental Health Counseling
3 credits
Offered By Announcement Only
Students will learn basic concepts and skills for mental health counselors in a multicultural world.
PREREQUISITE: ADVANCED UNDERGRADUATE OR GRADUATE STANDING.

EPS509 Field Studies in Education
1- 6 credits
Fall & Spring Semester
Individual study of a school or school system, identifying its strengths and weaknesses, and making positive recommendations.
PREREQUISITE: APPROVAL OF ADVISOR

EPS510 Professional, Legal and Ethical Issues in Counseling
3 credits
First Summer Session
Professional, legal, ethical, and licensing issues in the counseling profession.
PREREQUISITE: GRADUATE STANDING IN THE COUNSELING PROGRAM

EPS511 Lifestyle and Career Counseling
3 credits
Spring Semester
An introductory course in career development and career counseling, focusing on theories of career development, counseling tools, strategies, and sociological, economic, and psychological influences on the American worker.
PREREQUISITE: EPS 513 OR PERMISSION OF INSTRUCTOR.

EPS512 Assessment Strategies for Counselors I
3 credits
Spring Semester
This course places emphasis on diagnosis, appraisal, assessment, and testing for individual and interpersonal disorders. It addresses statistical procedures and psychometric principles necessary for responsible test use and exposes the student to a variety of test and non-test assessment techniques in marriage and family, and mental health counseling.
PREREQUISITE: GRADUATE STANDING IN COUNSELING PROGRAM

EPS513 Counseling Process and Practice
3 credits
Fall Semester
The development of basic communication and clinical skills necessary for establishing the counseling relationship and conducting therapy.
PREREQUISITE: GRADUATE STANDING IN COUNSELING PROGRAM

EPS514 Psychosocial Bases of Social and Cultural Diversity
3 credits
Fall Semester
Interrelationship between psychology and sociology in understanding development of diversity in human social systems. Implications for counseling and therapy.
PREREQUISITE: EPS 505 OR EQUIVALENT OR PERMISSION OF INSTRUCTOR
EPS515 Dynamics of Marriage and Family Systems  
3 credits  
Fall Semester  
Introduction to the history and development of marriage and family systems theory as a method for understanding individuals' behavior and functioning. Introduction to several modes of family therapy. Throughout the course, lectures will also be integrated with other topics including race, culture, gender, sexual orientation, ability.  
PREREQUISITE: GRADUATE STANDING IN COUNSELING PROGRAM OR PERMISSION OF INSTRUCTOR

EPS526 Counseling in Community Settings  
3 credits  
Fall Semester  
Exploration of a variety of perspectives on community services relevant to mental health counselors. Topics include: the variety of community settings; community, national, and international diversity in mental health services; diversity of clients (e.g., cultures, religions, GLBT, elderly, social classes, disabilities); mental health funding; the role of politics, policy, advocacy, and research; interviewing across cultures.  
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR

EPS531 Organization Development  
3 credits  
Offered By Announcement Only  
Techniques, strategies, and models of Organizational Development as they relate to various kinds of institutions. Simulations and actual interventions are stressed.

EPS533 Organization and Administration of Higher Education I  
3 credits  
Fall Semester  
Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.

EPS534 Theories of Supervision  
3 credits  
Offered By Announcement Only  
Examination of the elements of human behavior involved in successful supervision of instruction. Survey of current supervisory practices in the schools. Consideration of leadership theory.

EPS539 Effective Teaching, Learning, Assessment & Curriculum in Higher Education  
3 credits  
Fall Semester & Second Summer Session  
Provides an overview of current theories, research, and best practices in effective teaching, learning, assessment, and curricular design.  
PREREQUISITE: PERMISSION OF INSTRUCTOR

EPS543 The Community College  
3 credits  
Offered By Announcement Only  
An overview of American community colleges including historical evolution, purposes and functions, characteristics of students and faculty, organization and administration, curricula, current issues, and trends.
EPS544 Assessing Learning in the Community College

3 credits Offered By Announcement Only
Assessment and analysis of learning processes and outcomes in higher education. Formative and summative assessment, data analysis and interpretation are included. Class activities include: lectures, group projects, collaborative learning experiences, reports, participation in assessment strategies, role playing, and demonstration of assessment techniques.

EPS545 Administration of Student Affairs

3 credits First Summer Session
History and philosophy of student affairs will be addressed as well as principles and organization of student affairs administration, current problems, procedures, and recent developments.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EPS550 Educational Measurement and Evaluation

3 credits Offered By Announcement Only
Basic principles of measurement as they apply to the construction of teacher-made tests and the selection and use of standardized tests. Attention is also given to the use of measurement instruments in connection with both formative and summative evaluation. Behavioral objectives are considered in the context of criterion-referenced and mastery tests.
PREREQUISITE: TAL 260 OR PERMISSION OF INSTRUCTOR.

EPS553 Introductory Statistics

3 credits Fall Semester & Second Summer Session
Basic Statistical procedures will be discussed including measures of central tendency, variability and relationship, sampling, and basic tests of statistical significance.

EPS554 Essentials of Research in Social and Behavioral Sciences

3 credits Fall Semester
Study of the standards methods and techniques of research in the behavioral and social sciences. Brief orientation to quantitative and qualitative procedures used in the analysis and interpretation of research data are emphasized.

EPS558 Community Youth Development

3 credits First Summer Session

EPS565 Family Therapy with Ethnic Minority Families

3 credits Offered By Announcement Only
A course in special issues and strategies in family therapy with minority populations focusing on African American and Hispanic clients.
PREREQUISITE: EPS 280 OR 515 OR 612 OR PERMISSION OF INSTRUCTOR.

EPS568 Computer Applications in Educational and Behavioral Science Research

3 credits Offered By Announcement Only
An introduction to the use of microcomputer statistical packages in social science research, with emphasis given to SPSS for Windows. Course content will cover a broad range of activities encountered in the data analytic process including planning and creating a database, data coding, file manipulation tasks, data screening, and statistical analysis.
PREREQUISITE: EPS 553 OR EQUIVALENT WITH PERMISSION OF INSTRUCTOR.
EPS570 Basic skills in Counseling and Interviewing
3 credits
Spring Semester
Introductory course on essential skills used in counseling and interviewing. Through lectures, discussions, and small group exercises, students will explore their natural style of helping and learn effective listening and communication skills. This course is not intended to train students to become a professional counselor.
PREREQUISITE: ADMISSION IN THE HIGHER EDUCATION PROGRAM OR PERMISSION OF INSTRUCTOR

EPS590 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS591 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS592 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS593 Workshop in Education
3 credits
Fall & Spring Semester
Study in special interest areas in education.

EPS594 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS595 Workshop in Education
3 credits
Fall & Spring Semester
Study in special interest areas in education.

EPS596 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS597 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS598 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS599 Workshop in Education
1-3 credits
Offered By Announcement Only
Study in special interest areas in education.

EPS601 Philosophy of Education
3 credits
Offered By Announcement Only
Analysis of the works of major educational theorists—both historical and contemporary. The role of education in shaping and defining people and culture will be emphasized.
EPS602 Psychosocial Change and Well-Being in Education
3 credits  
Second Summer Session
PREREQUISITE: GRADUATE ADMISSION

EPS603 Higher Education in the United States: From Harvard to Present
3 credits  
Fall Semester
Broad view of issues and problems in higher education. Fundamental ideas and significant literature are analyzed from historical, philosophical, and societal perspectives.

EPS604 Group Dynamics and Communication Skills
3 credits  
Offered By Announcement Only
Emphasis on group dynamics, group procedures and communication skills.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EPS605 Psychological Bases of Education
3 credits  
Fall Semester
Review and extension of basic principles of psychology underlying educational practice. Basic concepts of educational psychology which contribute to effective education will be discussed.
PREREQUISITE: TAL 260 OR EQUIVALENT.

EPS606 Community Well-being and Change: Theory and Practice
3 credits  
Fall Semester
This course is designed to promote an understanding of the factors associated with healthy communities. It provides a comprehensive overview of the relevant skills and theories including: ecological/systems theory/models; community theories (sense of community, social capital, environmental psychology); and critical social theory, social justice, and social determinants of well-being.
PREREQUISITE: ENROLLMENT IN COMMUNITY & SOCIAL CHANGE MASTERS DEGREE PROGRAM OR PERMISSION OF INSTRUCTOR.

EPS607 Advanced Individual Study
1-6 credits  
Fall & Spring Semester
Individual work on a special project under faculty guidance.
PREREQUISITE: APPLICATION FOR ADVANCED INDIVIDUAL STUDY FORM REQUIRED.

EPS608 Advanced Individual Study
1-3 credits  
Fall & Spring Semester
Individual work on a special project under faculty guidance.
PREREQUISITE: APPLICATION FOR ADVANCED INDIVIDUAL STUDY FORM REQUIRED.

EPS609 Managing Community Organizations
3 credits  
First Summer Session
This course is designed to develop leadership skills for individuals engaged with community based organizations. Topics will include administrative, management, and fiscal issues. Grant writing, fund-raising, organizational communication, program planning, marketing, innovation, strategic planning, and accountability issues will be examined from a nonprofit organizational perspective.
PREREQUISITE: ENROLLMENT IN COMMUNITY & SOCIAL CHANGE MASTER'S DEGREE PROGRAM OR PERMISSION OF INSTRUCTOR.
EPS610 Therapeutic Group Procedures
3 credits First Summer Session
This course examines both the theory and practice of group counseling. The course covers therapist issues, patient selection criteria, group structuring as well as basic therapeutic techniques. The course prepares students to design structured counseling groups, to prepare group counseling materials, and to lead counseling groups of various types.
PREREQUISITE: EPS 612 OR EQUIVALENT.

EPS611 Assessment Strategies for Counselors II
3 credits First Summer Session
This course emphasizes use of procedures that facilitate preparation for, and evaluation of, mental health interventions. This course involves intensive study of theory and research relating to various models and processes of clinical assessment and practice in the performance of psychological evaluations.
PREREQUISITE: EPS 612 AND 613 OR EQUIVALENT.

EPS612 Counseling Theories and Practice
3 credits Spring Semester
Study of theories and concomitant practices in counseling and therapy.
PREREQUISITE: EPS 510 OR EQUIVALENT.

EPS613 Psychopathology for Counselors
3 credits Fall Semester
In depth introduction to abnormal human behavior patterns of concern to mental health professionals. Clinical conditions will be examined within the context of currently most viable theory and research relating to etiology, assessment, diagnosis and treatment.
PREREQUISITE: GRADUATE STANDING IN COUNSELING PROGRAM

EPS614 Counseling and Sexuality
3 credits Second Summer Session
Emphasis is placed on self-awareness and acceptance of all dimensions of human sexuality. Readings and classroom activities focus on biological aspects of sexuality, an understanding of sexual dysfunctions, and their treatment.
PREREQUISITE: EPS 505 AND 513

EPS615 Family Therapy
3 credits Spring Semester
Concentrated study of several approaches to family therapy including systemic and psychosocial perspectives. Theory and techniques of family therapy are taught in lecture, videotape, and simulation.
PREREQUISITE: EPS 515 OR PERMISSION OF INSTRUCTOR.

EPS616 Therapy for Couples
3 credits First Summer Session
Theory and technique linked to working with couples, in marriage and in other relationships.
PREREQUISITE: EPS 515 AND 612 OR PERMISSION OF INSTRUCTOR

EPS617 Seminar in Counseling Psychology
2-9 credits Offered By Announcement Only
A rotating-topic seminar in which various special topics will be presented. The particular topic being covered in a particular semester will be announced in the published class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
EPS618 Practicum in Counseling I  
1- 3 credits  Fall & Spring Semester  
Supervised experience at the Institute for Individual and Family counseling and other appropriate clinical settings relating theoretical formulations to intervention strategies appropriate to specialization.  
PREREQUISITE: PERMISSION OF PROGRAM COORDINATOR

EPS619 Practicum Laboratory I  
1- 3 credits  Fall & Spring Semester & First & Second Summer Session  
Individual, dyad, and small group supervision.  
PREREQUISITE: PERMISSION OF PROGRAM COORDINATOR

EPS620 Counseling Psychology: Theory, Research and Practice  
3- 6 credits    Fall & Spring Semester  
Orientation to counseling psychology as a discipline including theories, research methodology, contemporary research, lifestyle and career development theory, and professional issues. Required of all first year counseling psychology students. May be taken for 3 or 6 credits to a maximum of 12 credits.  
PREREQUISITE: ADMISSION TO COUNSELING PSYCHOLOGY DOCTORAL PROGRAM.

EPS621 Psychological Appraisal I  
3 credits  Fall Semester  
Orientation to psychological appraisal with emphasis on development of skill in assessment of intellectual functioning.  
PREREQUISITE: DOCTORAL STUDENT IN COUNSELING OR CONSENT OF INSTRUCTOR.

EPS622 Psychological Appraisal II  
3 credits  Spring Semester  
Orientation to psychological appraisal with emphasis on use of procedures which facilitate preparation for, and evaluation of, intervention efforts in the personality and social-behavioral areas.  
PREREQUISITE: EPS 621.

EPS623 Substance Abuse and Addictions: Theories and Counseling  
3 credits  Fall Semester  
Theories and research on individual, systemic causes, and outcomes of substance abuse, and concomitant practices in counseling and therapy.  
PREREQUISITE: EPS 612 OR PERMISSION OF INSTRUCTOR.

EPS624 Theory and Practice with Children and Adolescents  
3 credits  Second Summer Session  
Course prepares students to provide preventive and therapeutic interventions with children and adolescents including theory, research, and practice.  
PREREQUISITE: EPS 612 OR PERMISSION OF INSTRUCTOR

EPS625 Research and Program Evaluation in Counseling  
3 credits  Spring Semester  
Course focuses on the interpretation and application of research data as applied to clinical practice. Skills in using behavioral research-based literature to identify, evaluate and interpret appropriate interventions are also emphasized.  
PREREQUISITE: EPS 510, 512, 514, 612 AND 613 OR EQUIVALENTS OR PERMISSION OF INSTRUCTOR.
EPS626 Bereavement and Attachment Factors for Children and Families
1-3 credits  First Summer Session
This course will focus on attachment and development of factors as they relate to the bereavement and loss experience of children, adolescents, young adults, and families. Effective methodology in the care of these populations will be explored. Content will include the trajectory of grief in childhood development, manifestation of loss and grief, risk factors in the loss experience, attachment issues, types of loss, popular notions of loss and treatment, and best practice in bereavement work.

EPS628 Doctoral Practicum I
1-9 credits  Fall & Spring Semester
Supervised counseling experiences with clients at the Institute for Individual and Family Counseling. Individual and small group supervision by program faculty.
PREREQUISITE: ADMISSION TO COUNSELING AND PSYCHOLOGY DOCTORAL PROGRAM

EPS629 Doctoral Practicum II
1-9 credits  Fall & Spring Semester
Supervised counseling and assessment experience in outside agencies, hospitals and community settings. Small group case conference conducted by program faculty.
PREREQUISITE: EPS 628

EPS630 Advanced Practicum in Counseling Psychology
1-9 credits  Fall & Spring Semester & First & Second Summer Session
Supervised experience appropriate to the work of the counseling psychologist.
PREREQUISITE: EPS 629 AND PERMISSION OF INSTRUCTOR

EPS631 Student Diversity in American Higher Education
3 credits  Fall Semester
Emphasis on the diversity of today’s undergraduate students. An examination of the sociological context and philosophical orientation of contemporary college students is included.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EPS632 Preparing Future Faculty Seminar
1-3 credits  Fall & Spring Semester
The goal of this course is to introduce you to the larger role of university professor. The class is designed to give you some general sense of university structure and of the breadth of opportunities in higher education, to think through your own vision of “being a professor” particularly the part of that role that focuses on teaching, and to help you on the job search by preparing a professional portfolio that will help you get that first job and, hopefully, set you on a smooth career path. The PFF seminar will provide you with contextual and interdisciplinary knowledge of professoriate. Each seminar will be designed to aid you in your goal to become an outstanding faculty member. PFF will give you an overview of life on the academic job market and the pre-tenure years. It is your responsibility to tailor that information to fit your needs. It is expected that you take the information you learn in PFF and speak with mentors in your discipline to glean further insights into faculty life.

EPS633 Organization of Higher Education II: Governance, Leadership and Finance
3 credits  Fall Semester
Provides an overview of selected topics in governance, administrative leadership and finance in higher education.
PREREQUISITE: EPS 533 OR PERMISSION OF INSTRUCTOR.
EPS634 Supervision in Counseling Psychology  
3 credits  
Fall & Spring Semester  
The course includes a didactic presentation of theories of supervision and consultation. Application of supervision theories with opportunities to practice beginning supervisor skills.  
PREREQUISITE: EPS 628

EPS635 College Student Development: Theory, Research and Practice  
3 credits  
Spring Semester  
Emphasis on student growth and development during college and an analysis of the factors which affect development along cognitive and affective dimensions. An in-depth examination of college student development theories is included.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EPS636 Critical Issues in Student Affairs  
3 credits  
Offered By Announcement Only  
Emphasis on the most pressing issues facing the profession of student affairs today including diversity, funding, staff retention and the law and student affairs.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EPS637 Seminar in Curriculum and Supervision  
3 credits  
Offered By Announcement Only  
Laboratory course for developing curriculum materials and making curriculum changes. Students will develop materials and plans needed in their institutions.

EPS640 Enrollment Management: Theory and Practice  
3 credits  
Fall Semester  
Comprehensive overview of principles and practices of a strategic process that begins with recruitment and continues through graduation.

EPS641 Advanced Seminar in Enrollment Management  
3 credits  
Spring Semester  
In-depth exploration of topics in enrollment management, including market research, market testing, pricing strategies, strategic planning, and development of a future vision.  
PREREQUISITE: EPS 640.

EPS642 Curricula in Higher Education  
3 credits  
Offered By Announcement Only  
Consideration of the philosophical, psychological, and social bases of general, liberal, and graduate education. Analytical review of research on collegiate curriculums, programmatic innovations, and their effect are also included.

EPS643 Nature of Collegiate Instruction  
3 credits  
Offered By Announcement Only  
Role of the college professor, academic freedom, and tenure. Organization and presentation of knowledge in one's discipline will be emphasized. Use of micro-teaching and other advanced techniques as well as the development of course outlines and evaluation of self-instructional procedures will also be covered.
EPS644 Development & Change in Community Organizations: Theory & Practice
3 credits
Spring Semester
This course focuses on the unique role of non-profit, community-based organizations in promoting human and community development. Students will engage in an analysis of the range of functions that organizations serve and the various organizational strategies used in community settings.

EPS646 Seminar in Higher Education/Enrollment Management: Contemporary Issues
3 credits
Fall Semester

EPS647 Seminar in Higher Education Administration: Contemporary Issues
3 credits
Spring Semester
ONLINE course: Special refund policies apply. No refunds given after the start of the course. Open to only students admitted to the Online Graduate Certificate Program. Please contact Carol Wilson at umiamionline@miami.edu regarding registration. PREREQUISITE: ADMISSION TO DOCTORAL OR SPECIALIST PROGRAM OR PERMISSION OF INSTRUCTOR.

EPS648 Multicultural Communities in a Globalized Society
3 credits
Fall Semester
This course examines the relationship between multiculturalism and globalization and how these concepts impact education and the world at large. Topics include dimensions of human diversity, identities and acculturation; race and class; gender and power; children and youth; social inclusion and social justice; health disparities; poverty and work; racism and inequality. PREREQUISITE: ENROLLMENT IN COMMUNITY & SOCIAL CHANGE MASTERS DEGREE PROGRAM OR PERMISSION OF INSTRUCTOR

EPS650 Meta-analytic methods for research synthesis.
3 credits
Fall Semester
Meta-analysis is the general practice of combining, comparing, and interpreting statistics across a set of studies that investigate the same (or similar) phenomena using a properly motivated theoretical framework. Meta-analysis has become a popular tool in a variety of research disciplines, including the social sciences, education, medicine, and business. This course provides a thorough introduction to the theoretical foundations of meta-analysis, discusses commonly used statistical techniques, and analyzes several examples of the existing meta-analysis. Emphasis is placed on application, so that students are trained to independently perform a meta-analysis, from start to finish, in whatever substantive area interests students the most. PREREQUISITE: EPS 671 (ANOVA) AND EPS 672 (REGRESSION ANALYSIS), OR EQUIVALENT COURSES.

EPS651 Survey Research Methods
3 credits
Fall Semester
Focus on standards and practical strategies for designing different types of survey instruments and conducting survey research. Students are required to develop a proposal for survey research, develop a survey instrument, and conduct small pilot study by collecting, analyzing, and reporting survey data. PREREQUISITE: EPS 670 AND 533 OR EQUIVALENTS.
EPS652 Nonparametric Methods for Quantitative Analysis
3 credits
Offered By Announcement Only
A course in univariate nonparametric statistical techniques for applications in the behavioral and social sciences. These "sturdy" statistical methods will be developed by analogy with the corresponding parametric models. The SPSS-X statistical package will be used to analyze data sets provided by the instructor.
PREREQUISITE: EPS 553.

EPS653 Advanced Statistical Methods
3 credits
Offered By Announcement Only
A course in univariate parametric statistical inference, topics included are hypothesis testing, estimation, sampling, analysis of variance, correlation analysis, simple, and multiple regression.
PREREQUISITE: A BASIC COURSE IN STATISTICS AND A BASIC COURSE IN MEASUREMENT.

EPS654 Program Evaluation
3 credits
Fall Semester
Terminology, models, standards, practices, and common problems associated with program evaluation in Educational and Social Service settings. Prerequisite: EPS 670 and 553 or equivalents.
PREREQUISITE: EPS 670 AND 553 OR EQUIVALENTS.

EPS658 Seminar in Community & Social Change
3 credits
Fall & Spring Semester & First & Second Summer Session

EPS659 Field Experience in Educational Research
2-6 credits
Fall & Spring Semester
A total of 125 hours of supervised practical experiences in educational research. Emphasis is placed on actual participation in a wide variety of on-going research projects through associations with an approved educational R & D center. Normally taken in two or three credit blocks.
PREREQUISITE: PERMISSION OF ADVISOR.

EPS661 Measurement and Psychometric Theory
3 credits
Spring Semester
This course provides an introduction to the theory and application of measurement and psychometric models used in the behavioral sciences.
PREREQUISITE: EPS 672 OR EQUIVALENT COURSE ON REGRESSION ANALYSIS.

EPS662 Item Response Theory
3 credits
Fall Semester
The purpose of the course is to provide training in the theory and application of item response theory (IRT) as it pertains to educational and psychological measurements. Focus will be given to discussing IRT as a measurement model used to measure the properties of items and individuals. Particular attention will be given to contrasting the properties of the IRT model to the classical test theory, and the application of IRT to actual data sets.
PREREQUISITE: EPS 672, EPS 661

EPS663 Professional Psychological Spanish
3 credits
Second Summer Session
Acquisition of Spanish language skills necessary for functioning as a psychologist or mental health professional. Implications of language for the therapy process. Professional roles of bilingual counselors and psychologists.
PREREQUISITE: SPANISH FLUENCY.
EPS664 Hispanic and Latino Psychology
3 credits
Offered By Announcement Only
Human psychological functioning from an Hispanic and Latino perspective with a focus on Hispanic and Latino scholars in psychology.
PREREQUISITE: MULTICULTURAL COUNSELING OR EQUIVALENT.

EPS665 Psychological Interventions with Hispanic/Latino Populations
3 credits
Fall Semester
Explores the diversity of experiences among Hispanics and their implications for therapy. Topics include: racial diversity among Hispanics, sociopolitical factors in mental health, the impact of immigration on mental health, special psychological treatments: trauma treatment, family interventions and bilingual counseling.
PREREQUISITE: COURSE IN MULTICULTURALISM OR DIVERSITY OR PERMISSION OF INSTRUCTOR.

EPS667 Seminar in Educational Research
3-6 credits
Offered By Announcement Only
Seminar providing intensive study of contemporary advanced research methodologies in education for example, multivariate statistical models, qualitative analysis, latent trait theory, and causal models. Topics and faculty rotate. Students can enroll in this course for two semesters.
PREREQUISITE: ADMISSION TO DOCTORAL PROGRAM OR PERMISSION OF INSTRUCTOR.

EPS670 Introduction to Research Methods
3 credits
Fall Semester
The nature of disciplined inquiry in behavioral and social sciences. Includes philosophy of science, quantitative and qualitative research, basic concepts in sampling and measurement, and systematic searches of the research literature. Students required to complete literature search on a topic of their interest and submit a report of their findings.
PREREQUISITE: PREREQUISITE OR COREQUISITE: EPS 553 OR EQUIVALENT.

EPS671 General Linear Models
3 credits
Fall & Spring Semester
Group comparative designs, univariate parametric and nonparametric methods and statistical inference will be discussed. Topics include probability, sampling, estimation, ANOVA, ANCOVA. Students will be required to use computer packages (SAS/SPSS).
PREREQUISITE: EPS 553 OR EQUIVALENT

EPS672 Regression Methods
3 credits
Spring Semester
This course will provide: (1) a conceptually-oriented introduction to regression methods and (2) opportunities to learn related data-analytic techniques.
PREREQUISITE: EPS 553; EPS 671

EPS673 An Introduction to Structural Equation Modeling for Multivariable Data
3 credits
Spring Semester
This course will provide (1) a conceptually-oriented introduction to Structural Equation Modeling for multivariate data and (2) opportunities to learn related data-analytic techniques.
PREREQUISITE: EPS 670; 671 AND 672.
EPS674 Introduction to Multilevel Modeling
3 credits  Fall Semester
This course will provide: (1) a conceptually-oriented introduction to multilevel modeling and (2) opportunities to learn related data-analytic techniques.
PREREQUISITE: EPS 671 & EPS 672 OR PSY631 & PSY632

EPS675 Qualitative Methods I
3 credits  Fall Semester
An overview of the history, nature, characteristics, strategies, and ethics of qualitative research methods. Critical analysis and evaluation of various types of qualitative studies, including design, sampling, processes of data collection and analysis, and reporting results.
PREREQUISITE: EPS 670 AND (671 OR 672) OR EQUIVALENTS OR PERMISSION OF INSTRUCTOR.

EPS676 Qualitative Methods II: Case Studies and Grounded Theory
3 credits  Spring Semester
Types and designs of case studies, development of protocol, field work, data analysis, and report writing. Practical procedures and techniques for conducting grounded theory studies, including data coding and analysis, and reporting of results.
PREREQUISITE: EPS 675 OR EQUIVALENTS.

EPS677 Qualitative Methods II: Interviews and Content Analysis
3 credits  Spring Semester
Sociological and oral history interview methods, including methodological issues, computer-based coding, decoding, and interpreting data. Visual and text based content analysis, scoring schemas, and inter-rated reliability are also covered.
PREREQUISITE: EPS 675 OR EQUIVALENT.

EPS678 Applied Multivariate Statistics
3 credits  Spring Semester
The aim of this course is to provide a solid foundation in the basic concepts of multivariate statistics, and its application to practical research questions. This course extends the content of EPS 671 (ANOVA methods) and EPS 672 (regression methods) to cover methods used when there are multiple dependent variables to be modeled simultaneously. This course focuses on the traditional multivariate methods (as opposed to the contemporary models of structure equation modeling) that see wide use in the behavioral sciences. The general topics covered in the course include, but are not limited to: introductory matrix algebra, multivariate analysis of variance (MANOVA), factorial MANOVA, discriminate function analysis, and exploratory factor analysis. In all cases, this course is intended to provide a solid conceptual background of these topics, as well as a thorough description/practice of the application of these topics to real data scenarios.
PREREQUISITE: EPS 671, EPS 672

EPS679 Research Practicum
1- 6 credits  Fall & Spring Semester
Hands on experience in various aspects and processes in research.
PREREQUISITE: DOCTORAL STANDING OR PERMISSION OF INSTRUCTOR.
EPS680 Cultural Diversity and Mental Health
3 credits  Fall Semester
Advanced training in conceptualizing the individual within cultural and sociopolitical contexts with purpose of creating more reflective and intentional clinicians. Includes learning skills for improving the lives of clients in these areas.
PREREQUISITE: ADMISSION TO THE COUNSELING PSYCHOLOGY DOCTORAL PROGRAM OR PERMISSION OF THE INSTRUCTOR.

EPS685 Dissertation Seminar
3 credits  Offered By Announcement Only
The development and analysis of dissertation proposals will be required. Detailed coverage of the research process, proposal elements, dissertation writing and all aspects of doctoral research will be emphasized. Extensive feedback on research ideas and writing is involved.
PREREQUISITE: COMPLETION OF RESEARCH COMPETENCIES AND/OR MAJOR PORTION OF ALL COURSES IN DOCTORAL PROGRAM.

EPS687 Internship in College Teaching
3 credits  Fall & Spring Semester
A program in observation and supervised teaching in the community junior or liberal arts college. The student spends 15-20 hours per week. Included is a seminar held with the college supervisor which meets several times during the semester.
PREREQUISITE: APPROVAL OF COMMITTEE ON INTERNSHIP.

EPS688 Practicum: Administration of Higher Education
1-6 credits  Fall & Spring Semester & First & Second Summer Session
This course is designed to provide students with an opportunity to develop professional competencies while they apply theory to practice. Opportunities can be pursued in enrollment management or student affairs related offices either on campus or at other higher education institutions. Students will contract for the type of experience desired and a formal research paper and presentation will culminate this activity.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EPS698 Advanced Individual Study
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Individual work on a special project under faculty guidance.
PREREQUISITE: APPLICATION FOR ADMISSION TO ADVANCED INDIVIDUAL STUDY FORM REQUIRED

EPS699 Advanced Individual Study
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Individual work on a special project under faculty guidance.
PREREQUISITE: APPLICATION FOR ADMISSION TO ADVANCED INDIVIDUAL STUDY FORM REQUIRED

EPS702 Advanced Practicum in Counseling
1-6 credits  Fall & Spring Semester
Group supervision meetings in which students present case conceptualizations, review information from professional sources regarding their clients, and discuss the supervisory and organizational dynamics of their outplacements settings.
PREREQUISITE: EPS618

EPS703 Internship in Counseling Psychology
1-6 credits  Fall & Spring Semester
Supervised internship in Counseling Psychology in an approved facility.
PREREQUISITE: PERMISSION OF PROGRAM FACULTY.
EPS710 Master's Thesis
1-6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

EPS720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in EPS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

EPS725 Continuous Registration--Master's Study
0 credit Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

EPS730 Pre-Candidacy to Dissertation Research
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of EPS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
PREREQUISITE: ADMISSION TO DOCTORAL PROGRAM

EPS735 Doctor of Education Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ed.D. The student enrolls for credit as determined by his/her advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed 12 credits.
PREREQUISITE: ADMISSION TO DOCTORAL PROGRAM

EPS740 Post-Candidacy Dissertation Research
1-12 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: ADMISSION TO DOCTORAL PROGRAM

EPS750 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and Ed.D, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

KINESIOLOGY & SPORT SCIENCES

KIN502 Sport Sponsorship and Promotion
1-3 credits First Summer Session
KIN515 Nutrition Diet and Exercise
3 credits
First Summer Session
Students will learn the latest concepts in weight management, physical fitness, and healthy eating. They will be able to understand the complex interplay of carbohydrates, protein, fat, water, fiber, vitamins, and minerals in the nourishment of their body and overall well-being. They will also examine serious health issues such as the use/misuse of anabolic steroids, weight control, and eating disorders.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN520 Cellular Exercise Physiology
3 credits
Spring Semester
The course examines Bioenergetics and Muscular Physiology in training and detraining. Topics include the energy systems and their functional application during exercise, muscle structure and function, cellular and sub-cellular modifications of organelles and contractile mechanisms as result of training and physiological bases of training techniques.

KIN521 Systemic Exercise Physiology
0-3 credits
Fall Semester
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular and the pulmonary systems. Students will be able to understand and interpret terminology and research literature published in the field.
PREREQUISITE: ONE YEAR OF UNDERGRADUATE CHEMISTRY AND ONE YEAR OF UNDERGRADUATE HUMAN BIOLOGY.

KIN522 Basic Statistics in Kinesiology and Sport Sciences
3 credits
Fall Semester & First & Second Summer Session
Introduction to basic statistical techniques commonly used in the Exercise and Sport Sciences. Designed as a prerequisite for KIN 646 (Formally ESS 646).

KIN523 Athletic Training Techniques - Assessment
3 credits
Fall Semester
This course will introduce the basic concepts related to injury evaluation. With this information, and with the development of basic skills, the student should be able to form an impression of the nature of most musculoskeletal injuries.
PREREQUISITE: KIN 525 AND 588 (FORMALLY ESS 525 AND ESS 588).

KIN524 Athletic Training Techniques - Rehabilitation
3 credits
Fall Semester
This course will introduce theoretical concepts that must be understood in order to be able to rehabilitate a musculoskeletal injury. Regarding actual rehabilitation techniques, the emphasis will be on therapeutic exercise with only a brief introduction to therapeutic modalities.
PREREQUISITE: KIN 525 AND 588 (FORMALLY ESS 525 AND ESS 588).

KIN525 Advanced Kinesiology
3 credits
Fall & Spring Semester
In-depth study of the human skeletal and muscular systems with a focus on the mechanics of movement as related to physical activity, sports, and athletics.
PREREQUISITE: ESS 245 OR PERMISSION OF INSTRUCTOR.
KIN527 Community and Global Nutrition
3 credits Fall & Spring Semester
This course is designed to provide an overview of nutritional issues & related aspects of infectious and chronic disease impacting the health and performance of athletes, individuals & groups domestically & globally. Economic and environmental issues which impact nutritional status and deficiency in the Western societies & third world countries will be addressed. An international and cultural perspective on food, eating behaviors and customs will be explored.

KIN530 Laboratory Techniques in Functional Evaluation of Skeletal Muscle
3 credits Spring Semester
This course examines the theories of data collection and collection techniques used to evaluate musculo-skeletal and neuromuscular function. The application of both computerized and non-computerized collection systems for performance evaluation is covered. The course is also designed to establish a clear linkage between the acute and chronic musculo-skeletal and neuromuscular changes that occur during exercise and the laboratory methods used to assess those changes. Collection theory, musculoskeletal and neuromuscular function, methods of strength evaluation, anaerobic power testing, electromyography, and a number of other functional parameters will be discussed.
PREREQUISITE: KIN 520 (FORMALLY ESS 520).

KIN531 Laboratory Experiences in Systemic Exercise Physiology
3 credits Fall Semester
This course provides a laboratory assessment of physiological principles and theories learned in the classroom setting. Focus will be on systemic application to exercise as an acute or chronic stressor. Corequisite: ESS 521.
PREREQUISITE: COREQUISITE ESS 521

KIN532 Sports Injuries: Prevention and Treatment
3 credits Fall & Spring Semester
Prevention, diagnosis, treatment and rehabilitation of sports injuries. Anatomical and Kinesiological application to sports injuries.

KIN534 Integrative & Functional Medicine
3 credits Fall Semester
This course will discuss integrative and functional medicine and how it emerged. This course will analyze the healthcare models that include personalized care and the whole-person perspective. In this course we will discuss various factors that influence disease including diet and nutrition, stress, activity level, pharmaceuticals and environmental pollutants. Alternative approaches to treatment will also be discussed.

KIN535 Clinical Biomechanics for Sport Medicine Professionals
3 credits Fall Semester & First Summer Session
A lecture course stressing biomechanics of joints and pathomechanics of orthopedic injuries.
PREREQUISITE: ESS 245 OR ESS 488 KINESIOLOGY
KIN536 Strength and Conditioning I

3 credits  
Fall & Spring Semester

This course serves as the practical/technical foundation for major compound movements and Olympic lifts. It also provides comprehension of movement specific dynamic warm-ups, advanced stretching techniques, methods for identifying movement compensations and underlying issues as well as evaluating Olympic techniques. Due to the practical nature of the course, all the sections of this course are held in the Hecht Athletic Center (HAC).

KIN537 Strength and Conditioning II

3 credits  
Fall & Spring Semester

This course is the continuation of Strength and Conditioning I (KIN 536). It provides more advanced Olympic weightlifting techniques and ballistic training, alongside a continued focus on corrective exercises to ensure a reduced risk of injury. The course also provides an introduction to exercise programming including specialized training techniques for athletic development. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center (HAC).

PREREQUISITE: KIN 536

KIN538 Nutrition during the Lifecycle

3 credits  
Fall Semester

This course is designed to examine the changes in nutrition requirements during the life cycle, particularly as related to growth, development and aging. Psychosocial, cultural, and economic issues related to food intake at various life stages will be reviewed.

PREREQUISITE: AN INTRODUCTORY NUTRITION COURSE THAT INCLUDED DIGESTION, ABSORPTIONS AND TRANSPORT OF NUTRIENTS, MACRO AND MICRONUTRIENTS AND ENERGY METABOLISM IS REQUIRED.

KIN540 Exercise Psychobiology

3 credits  
Fall & Spring Semester

This course is designed primarily for graduate level Exercise and Sport science students who are interested in the biochemical basis of personality as affected by exercise and sport. The course involves interdisciplinary integration and comprehensive reviews of ancient and current literature dealing with exercise, stress, emotional, personality, immune system function and neuroendocrine function.

PREREQUISITE: KIN 521 (FORMALLY ESS 521).

KIN542 STRENGTH AND CONDITIONING

3 credits  
Fall & Spring Semester

A comprehensive overview of strength and conditioning.

PREREQUISITE: ESS245 OR KIN 345 - KINESIOLOGY (FORMALLY ESS 345).

KIN543 Professional Training and Counseling for Integrative Health

3 credits  
Fall Semester

Students will learn the integrative health care model, theories, behavior change models, approaches & techniques used in nutritional counseling to help athletes, individuals and groups implement and sustain behaviors, lifestyles, and attitudes to achieve optimal health. Lecture & personal application will allow for the development of skills in each of these areas.

PREREQUISITE: PRE-OR CO-REQUISITE NUTRITION ASSESSMENT & LAB OR PERMISSION OF INSTRUCTOR
KIN545 Special Sport Populations  
3 credits 
Spring Semester  
This course presents an in-depth examination of chronic conditions and medical problems commonly observed in athletes. Students will learn about the etiology of the medical condition, how exercise affects the condition, and the most recent therapeutic treatments prescribed for the condition.  
PREREQUISITE: KIN 521 (FORMALLY ESS 521).

KIN546 Elite Conditioning I  
3 credits 
Fall & Spring Semester  
Elite Conditioning I provides an introduction to evaluation techniques catered specifically to the athletic population including tests for strength, power, speed, agility, balance and stability. The courses also provides instruction on how to apply these evaluations to their respective sports/positions. These evaluation techniques provide data that students will use in the process of corrective exercise prescription. Students are taught how to implement corrective strategies to improve athletic performance. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center (HAC).

KIN547 Elite Conditioning II  
3 credits 
Fall & Spring Semester  
Elite Conditioning II is the continuation of Elite Conditioning I (KIN 546). This course provides students with an understanding of the design and implementation of periodized conditioning programs for athletes based on the testing, evaluation, and applications to specific sports learned in Elite Conditioning I. The course focuses on speed agility and quickness for sports. It also includes practical implementation of ballistic, plyometric, speed, and conditioning drills emphasizing evidence based methods and training techniques. Due to the practical nature of the course, all sections of this course are held in Hecht Athletic Center (HAC).  
PREREQUISITE: KIN 546

KIN549 Nutrition Assessment and Lab  
3 credits 
Fall Semester  
Application of the principles of normal and therapeutic nutrition, nutrition assessment, evaluation and intervention as related to sports performance and the management and treatment of disease states. Laboratories will allow for the development of skills in each of these areas.  
PREREQUISITE: STUDENTS ARE EXPECTED TO BE FAMILIAR WITH BASIC PRINCIPLES OF NUTRITION, HAVE COMPLETED BIOCHEMISTRY, DIET THERAPY, AND PSYCHOLOGY OR RECEIVE PERMISSION FROM INSTRUCTOR.

KIN550 Nutrition Biochemistry and Integrative Metabolism  
3 credits 
Fall & Spring Semester  
To learn the fundamental biochemical structure and pathways governing nutrient intake and utilization. Students will learn how major forms of nutrients (macronutrients, vitamins, minerals and trace elements) are processed and utilized by different organs with a particular emphasis on muscle metabolism. Students will also learn how to relate their newly acquired knowledge to health and disease outcomes with focus on lifestyles disease related to metabolism such as diabetes and obesity.  
PREREQUISITE: STUDENTS ARE EXPECTED TO BE FAMILIAR WITH BASIC PRINCIPLES OF NUTRITION, ANATOMY AND PHYSIOLOGY, HAVE COMPLETED BIOCHEMISTRY, OR RECEIVE PERMISSION FROM INSTRUCTOR.
KIN557 Diagnostic Imaging Techniques In Sports Medicine
3 credits  Spring Semester
This course is designed as an elective for undergraduate KIN students or graduate students. The basic physics of radiological imaging will be covered including radiology, fluoroscopy, CT scan, ultrasound, MRI, and nuclear medicine including image archiving. Normal anatomy will be compared to the corresponding radiographic anatomy. Common sports injuries will be evaluated by multiple radiographic modalities and will be correlated with the clinical condition. Discussion will include bony pathology as well as soft tissues such as ligaments, tendons, and menisci.
PREREQUISITE: ANATOMY, PHYSIOLOGY, OR PERMISSION OF INSTRUCTOR.

KIN561 Facility Management
3 credits  Fall & Spring Semester
Facility management provides students with an understanding of fitness entrepreneurship, giving students a comprehensive understanding of the, laws, regulations, policies, and work involved in setting up a fitness facility such as a gym, wellness center, or athletic training center. Students are responsible for developing a viable sports or fitness complex including all aspects of administrative and facility management.

KIN562 Fiscal Management in Sport Administration
3 credits  Fall Semester
Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.
PREREQUISITE: BACKGROUND AND EXPERIENCE IN EXERCISE SCIENCE OR PERMISSION

KIN563 Facilities and Event Management
3 credits  Spring Semester
This course is designed to introduce students to principles and practices of planning, funding and managing facilities associated with sports participation including professional sport venues, college sports, parks, recreational sport and health/fitness clubs. Students will gain an understanding of promoting, marketing, and maintaining sport facilities.
PREREQUISITE: KIN 566 (FORMALLY ESS 566)

KIN564 Principles of Sport Marketing
3 credits  Fall & Spring Semester
This course will focus on the vast world of sports marketing. The basic principles of marketing and marketing management will be introduced and integrated with application of these principles to sport and sports-related organizations.
PREREQUISITE: ESS 301 OR PERMISSION OF INSTRUCTOR.

KIN565 Legal Aspects of Sports and Exercise Science
3 credits  Spring Semester
Legal liability, personal injury, negligence and other related legal aspects of sports and exercise science.
PREREQUISITE: BACKGROUND AND EXPERIENCE OR PERMISSION.

KIN566 Organization and Administration of Sports Programs
3 credits  Fall Semester
Administrative and organizational procedures and problems specific to athletic administration, recreation and leisure sports administration, and physical education.
PREREQUISITE: BACKGROUND AND EXPERIENCE IN EXERCISE SCIENCE OR PERMISSION
KIN567 Elements of Sports Psychology
1- 3 credits Fall & Spring Semester & First & Second Summer Session
Introduction to the study of sport and exercise psychology including theory, current research and practical application.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN568 Developmental Sports Psychology
3 credits Offered By Announcement Only
Examination of the concept of sport psychology which includes but is not limited to performance, enhancement, student performance and academic application.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN570 Advanced Programming
3 credits Fall & Spring Semester
Advance programming allows students to dissect sports by movement, metabolism and limitation. The course investigates current trends and evidenced based applications of specific training techniques for optimal sport performance. Students will perform complete sports analysis and develop periodized programs for major sports.

KIN571 Sport Industry in South Florida
3 credits Spring Semester
This course will examine the various sport based organizations/events that are part of the sport industry in South Florida. Study of these organizations/events will include (a) products/services produced, (b) organizational structure, (c) economic impact on the local community, (d) key management personnel, (e) physical facilities, and (f) internship/employment opportunities.

KIN572 Creative Approaches to Problem Solving and Conflict Management
3 credits Spring Semester
This hands-on course will examine the concepts of problem solving and conflict management from both personal and organizational perspectives. Students will have the opportunity to study in-depth both of these concepts (and the relationship between them) through a combination of lecture, theory, individual and group activities, readings, practical exercises, and self-assessment tools.

KIN573 ADVANCED SPORT GOVERNANCE
3 credits Spring Semester & Second Summer Session
This course provides the student with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and Olympic levels. In addition, policy development in sport management will be explored.
PREREQUISITE: GRADUATE STANDING.

KIN574 Ethical Decision Making in Sports and the Professions
3 credits Fall & Spring Semester
This course will examine ethical decision-making in a variety of environments with an emphasis on sport professions. Real and hypothetical situations will be utilized, and the course will combine theory with practical application. The case method in sport ethics will be incorporated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
KIN575 Essential Leadership in Sport and the Professions
3 credits  Fall & Spring Semester
This course will examine the concept of leadership as it pertains to sports and other professions. Various leadership and management skills will be included with a focus on practical applications in a work environment. Theory and self-assessment strategies will be incorporated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN576 Practical Approach to Motivation and Ethical Decision Making
1-3 credits  Spring Semester
A critical study of practical problems of professionals in Exercise and Sport Sciences. PREREQUISITE: BACKGROUND AND EXPERIENCE OR PERMISSION.

KIN577 Advanced Nutrition for Health and Fitness
3 credits  Fall & Spring Semester & First & Second Summer Session
This course presents an in-depth study of the nutritional concerns of today's recreational and competitive athlete. Topics include dehydration, classic carbohydrate loading, protein needs, ergogenic aids, and more. State-of-the-art research in the field is provided. This is also a writing intensive course. Thus, writing skills will represent an integral part of one's grade.
PREREQUISITE: KIN 155 AND 221 OR 521 (FORMALLY ESS 155, 221 AND 521).

KIN578 Pharmacology for Allied Health Professionals
3 credits  Spring Semester
The study of drug families and drugs in common use across spectra of age, illness, disease, and disability. Students will understand body systems treated with current pharmaceuticals over-the-counter (OTC) medications, and neutraceuticals. Actions, key adverse effects, and influences on individuals undergoing physical activity will be emphasized.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).

KIN579 Principles of Exercise Prescription/Assessment: Cardiovascular
3 credits  Spring Semester
This course presents a comprehensive overview of the physical, physiological and metabolic responses of the human body to exercise testing and training both in health and disease. The successful student will gain an understanding of the process involved in prescribing safe and effective therapeutic exercise in healthy individuals as well as patients with heart and lung disease, diabetes and obesity. An overview of environmental and legal considerations in the prescriptive process will also be discussed.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).

KIN580 Principles of Exercise Prescription: Neuromuscular
3 credits  Spring Semester
An examination of the scientific bases of modern training techniques designed to optimize performance, their functional application and potential impact on performance in sport and everyday activity.
PREREQUISITE: KIN 520 AND 521 OR PERMISSION OF THE INSTRUCTOR (FORMALLY ESS 520 AND 521).
KIN581 Development and Maturation of Athletes.  
3 credits  
Spring Semester  
This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes as it impacts physical performance. Additionally, students will learn the bases of pediatric exercise physiology in order to understand the concepts of motor development, strength, aerobic and anaerobic performance in the pediatric population.

KIN585 Advanced Topics in Kinesiology and Sport Sciences  
3 credits  
Spring Semester & First & Second Summer Session  
This course will provide a synthesis of essential concepts in specialty subjects relevant to one's field of interest.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

KIN586 Exercise Prescription/Assessment Laboratory  
3 credits  
Fall Semester  
This course presents an overview of the laboratory techniques used to assess cardiovascular endurance and general fitness, pulmonary function and anaerobieses observed during competition.  
PREREQUISITE: KIN 579 (FORMALLY ESS 579).

KIN587 Laboratory Experience in Sports Nutrition  
3 credits  
Spring Semester  
This laboratory class provides case study analyses and computerized nutrient analysis systems designed to evaluate nutrition and hydration needs of the recreational and competitive athlete. From urinalysis and blood work to body composition and computerized nutrient data base systems, this laboratory provides a clinical approach to evaluating the nutrition status of the exercising individual. Corequisite: ESS 577.  
PREREQUISITE: COREQUISITE: ESS 577.

KIN588 ADVANCED GROSS ANATOMY in Kinesiology and Sport Sciences  
3 credits  
Spring Semester  
Human dissection of the major muscles, arteries and nerves of the body. Course is held at the University of Miami, Medical Campus, and cadaver laboratory. Special consideration is given to injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. Students are required to pay a $100 laboratory fee for the class. This course is to be taken by undergraduate Athletic Training majors and for the 5-year Sports Medicine with a Concentration in Athletic Training program students only.  
PREREQUISITE: MUST BE ATHLETIC TRAINING MAJORS OR IN THE 5-YEAR SPORTS MEDICINE WITH A CONCENTRATION IN ATHLETIC TRAINING PROGRAM.

KIN589 Directed Readings in Kinesiology and Sport Sciences  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Directed Readings focusing on research and contemporary trends in the field.  
PREREQUISITE: PERMISSION OF CHAIRPERSON.
KIN590 Special Topics in Kinesiology and Sport Sciences
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
This course is designed for students wishing to focus on a specific area of study within the umbrella of the Kinesiology and Sport Sciences curriculum. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.
PREREQUISITE: BACKGROUND AND EXPERIENCE OR PERMISSION.

KIN599 Advanced Programming for Endurance Athletes
3 credits  Fall & Spring Semester
This course provides students with training techniques to improve aerobic capacity, endurance, and lactate threshold for optimal performance. Students will review evidenced based principles of sports nutrition, strategies to ensure proper hydration, thermoregulation, and fuel (substrate) availability during prolonged exercise as well as develop programs for competitive sports including triathlon, marathon, and cycling.

KIN602 Athletics in the United States
3 credits  Fall Semester
An Assessment of athletics in the United States. Focus on historical perspectives, contemporary issues, interface with international athletics, and future trends.
PREREQUISITE: BACKGROUND AND EXPERIENCE IN ATHLETICS OR PERMISSION OF INSTRUCTOR

KIN603 Contemporary Issues in Kinesiology and Sport Sciences
3 credits  Spring Semester
Problem identification, investigation, analysis, and problem solving approaches in Kinesiology and Sport Sciences.

KIN604 Recreation in the United States
3 credits  Offered By Announcement Only
An assessment of recreation and leisure in the United States. Focus on past, present, and future trends, problems, and issues.
PREREQUISITE: BACKGROUND AND EXPERIENCE IN RECREATION OR PERMISSION OF INSTRUCTOR

KIN610 Advanced Adolescent Growth and Maturation
3 credits  Spring Semester
This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes that impact physical performance. Additionally, students will learn the basis of training pediatric populations.

KIN612 Applied Sport Psychophysiology
3 credits  Fall Semester
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular system, and the pulmonary system. Students will be able to understand and interpret terminology and research literature published in the field.
PREREQUISITE: KIN 541 (FORMALLY ESS 541).

KIN615 Evidence-Based Sports Medicine
3 credits  Spring Semester
Introduction to clinical epidemiology and the evaluation of the efficacy of prevention, diagnostic, and treatment strategies or orthopedic injuries in sports medicine.
KIN 616 Advanced Rehabilitation Techniques in Sports Medicine
3 credits                              Spring Semester
This is an advanced athletic training course designed to enhance the athletic trainer's ability to plan and implement a comprehensive sports injury rehabilitation program based on the sequential events of musculoskeletal tissue healing. Discussion focuses on the development of a conceptual model for sports injury rehabilitation which incorporates rehabilitation phases, intervention goals, and progression criteria. Application of the problem-oriented approach to the management of athletic injuries is a predominant theme throughout this course.

KIN 617 Advanced Evaluation Techniques in Sports Medicine
3 credits                              Fall Semester
A lecture/lab course stressing clinical techniques involved in the use of posture evaluation, back evaluation, advanced orthopedic evaluation, and gait analysis, in conjunction with the scientific foundations of physiology and biomechanical principles associated with advanced evaluation techniques.

KIN 620 Practicum in Athletic Training
2 credits                              Fall Semester
Field experience at the athletic training setting through working with collegiate athletes to expose students to the role and function of athletic training as certified athletic training and accredited clinical instructor as well.

KIN 621 Independent Study I
1 credit                              Fall Semester
This course is an advanced study of a particular theme or topic in the athletic training field such as students' research topic, current issues of relevance to certified trainers and other professionals in the sports health care profession. Students will prepare for class discussion by reviewing assigned readings from professional journals and other pertinent sources. Class sessions will consist of lectures, laboratories, and discussion sessions.
PREREQUISITE: NONE

KIN 622 Practicum in Athletic Training 2
2 credits                              Spring Semester
Field experience at that athletic training setting through working with collegiate athletes to expose students to the role and function of athletic training as certified athletic training and accredited clinical instructor as well.

KIN 623 Independent Study 2
1 credit                              Spring Semester
This course is an advanced study of a particular theme or topic in the athletic training field such as students' research topic, current issues of relevance to certified athletic trainers and other professionals in the sports health care professions. Students will prepare for class discussion by reviewing assigned readings from professional journals and other pertinent sources. Class sessions will consist of lectures, laboratories, and discussion sessions.

KIN 624 Practicum in Athletic Training III
2 credits                              Fall & Spring Semester & First & Second Summer Session
Field experience at the athletic training setting through working with collegiate athletes to expose students to the role and function of athletic training as certified athletic training and accredited clinical instructor as well.
PREREQUISITE: COREQUISITE: KIN 625
KIN625 Independent Study III
1 credit  Fall & Spring Semester & First & Second Summer Session
This course is an advanced study of a particular theme or topic in the athletic
training field such as students' research topic, current issues of relevance to
certified athletic trainers and other professionals in the sports health care professions.
Students will prepare for class discussion by reviewing assigned readings from
professional journals and other pertinent sources. Class sessions will consist
of lectures, laboratories, and discussion sessions.
PREREQUISITE: COREQUISITE KIN 624

KIN626 Practicum in Athletic Training IV
2 credits  Spring Semester
PREREQUISITE: KIN 535 CLINICAL BIOMECHANICS FOR SPORTS MEDICINE PROFESSIONAL

KIN627 Independent Study IV
1 credit  Spring Semester
PREREQUISITE: KIN 535 CLINICAL BIOMECHANICS FOR SPORTS MEDICINE PROFESSIONAL

KIN635 Methods in Biomechanical Analysis
3 credits  Spring Semester
PREREQUISITE: KIN 535 CLINICAL BIOMECHANICS FOR SPORTS MEDICINE PROFESSIONAL

KIN640 Neurophysiology in Exercise Science
3 credits  Spring Semester
Examination of the functions of the central, peripheral, and autonomic nervous
systems in regulating exercise homeostasis and the structural and functional modifications
to the systems through training. NOTE: This course is a writing intensive course.
This means that all examinations and papers include a critical evaluation of the
student’s ability to convey information using the written word.
PREREQUISITE: KIN 520 (FORMALLY ESS 520)

KIN641 Aging: Physiological Changes and Their Implications of Training
3 credits  Spring Semester
The physiological changes that occur due to aging and their impact on fall prevention,
independence and the application of prophylactic exercise prescriptions.
PREREQUISITE: KIN 520 (FORMALLY ESS 520) OR PERMISSION OF THE INSTRUCTOR.

KIN642 Fundamentals of Cardiology
3 credits  Spring Semester
This course represents an in-depth review and evaluation of the field of cardiology.
Students must understand the etiology of coronary artery diseases, assessment techniques
in the evaluation of cardiac pathologies, the latest risk factors, and most recent
trends in treatment and rehabilitation. Phase I through Phase IV review of Cardiac
Rehabilitation will be fully examined.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).

KIN643 Laboratory Experiences in Cardiac Rehabilitation
3 credits  Spring Semester
This class provides hands-on clinical experiences in preparation of patient for
testing, assessment of pre-existing medical conditions and risk factors as well
as appropriate procedures for stress testing. Student will, in addition, have the
opportunity to view Thallium stress tests, echocardiography and cardiac surgical
procedures such as angioplasty and bypass surgery.
PREREQUISITE: KIN 521 (FORMALLY ESS 521).
KIN644 Interpretation of the ECG
3 credits
First Summer Session
This class will provide information of the electrophysiology of the heart, medicines used to improve heart function, and critical examination of waveform analyses in interpreting the electrocardiogram. Prerequisite: KIN 642 (Formally ESS 642) or permission of the instructor.
PREREQUISITE: KIN 642 (FORMALLY ESS 642) OR PERMISSION OF THE INSTRUCTOR.

KIN646 Research Methods in Kinesiology and Sport Sciences
3 credits
Fall Semester
This Course reviews the approach and research methods used to evaluate quantitative research questions in the field of Kinesiology and Sport Sciences.

KIN647 Analytic Methods in Kinesiology and Sport Sciences
3 credits
Spring Semester
Methods of analyzing research data in Kinesiology and Sport Sciences. PREREQUISITE: KIN 646 (FORMALLY ESS 646) OR PERMISSION.

KIN655 Exercise Biochemistry
3 credits
Fall Semester
This course presents an in-depth examination of the biochemical basis of exercise. Topics include carbohydrate and lipid metabolism at rest and during exercise, integration of metabolism, the use of stable isotopes in the characterization of substrate kinetics, and metabolic bases of fatigue. Both the instructor and the students will incorporate current peer-reviewed research in the field.

KIN679 Optional Internship—Strength and Conditioning
1 credit
Fall & Spring Semester & First & Second Summer Session
This 1 credit internship allows students to pursue professional internships in the field of strength and conditioning/fitness entrepreneurship. Students will be provided with contact information and a number of opportunities by Dr. Biagioli, respective to their interests.

KIN681 Issues Specific to Women's Health
3 credits
Spring Semester
This course focuses upon clinical health issues relevant to women. Students will acquire a body of knowledge concerning the specific biological and physiological changes women experience from birth to maturity, and from the pre- to postmenopausal state. Women will learn significant issues related to women's health and be able to make more educated decisions regarding their health and treatment options. PREREQUISITE: KIN 521 (FORMALLY ESS 521) OR PERMISSION OF THE INSTRUCTOR.

KIN682 Psychosocial Issues in Women's Health
3 credits
Spring Semester
This course covers a broad perspective of women and their self-esteem, their femininity, and their role in family household. Attention will be paid to the historical, cultural, and anthropological development of women and their role in society. The influence of gender will explore several areas which include a) pregnancy, b) menopause, c) menstrual cycle, d) stress and career vs. family, e) depression, and f) body image.
KIN683 Sports Medicine for the Female Athlete
3 credits  Fall Semester
This course focuses upon the physiological effects of exercise on the female athlete as it relates to her performance and health. Physiological differences between male and female will be examined as it impacts the women's performance capabilities and potential. Gender specific problems regarding the exercising female will be explored.
PREREQUISITE: KIN 521 (FORMALLY ESS521).

KIN684 SCIENCE AND ETIOLOGY OF OBESITY
3 credits  Spring Semester
This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis, as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition, and management of the overweight patient. The course will also examine adipocyte morphology and the health implications of being overweight and obese. Students will examine the impact of both diet and exercise on long-term weight management.

KIN690 Strength and Conditioning Internship Experience
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

KIN691 Practicum in Kinesiology and Sport Sciences/Master's students
1 credit  Fall & Spring Semester & First & Second Summer Session
The course presents graduate students with the theoretical and practical tools necessary for expanding their critical thinking and argumentative skills in order to present their scientific research results in an evaluative, logical and analytical manner. The course consists of weekly presentations of related literature, results, and findings on various Master's projects.
PREREQUISITE: NONE

KIN693 Research Colloquium.
1- 3 credits  Fall & Spring Semester
This course presents graduate students with the theoretical and practical tools necessary for presenting their scientific research in an organized, logical, and analytical manner.
PREREQUISITE: KIN 646 (FORMALLY ESS 646).

KIN694 Advanced Individual Study
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
The Application for Admission to Individual Study Form will be required. PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN AND FACULTY MEMBER INVOLVED.

KIN695 Graduate/Clinical Field Experience in Kinesiology and Sport Sciences
1- 9 credits  Fall & Spring Semester & First & Second Summer Session
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.
PREREQUISITE: PERMISSION OF CHAIRPERSON
KIN696 Field Experience in Sport Administration I
1- 9 credits Fall Semester
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.
PREREQUISITE: PERMISSION OF CHAIRPERSON.

KIN697 Field Experience In Sport Administration II
1- 3 credits Fall Semester & First Summer Session
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.
PREREQUISITE: PERMISSION OF CHAIR

KIN698 Field Experience in Sport Administration III
1- 3 credits First & Second Summer Session
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.
PREREQUISITE: PERMISSION OF CHAIR

KIN699 Special Project
1- 3 credits Fall & Spring Semester & First & Second Summer Session
This course represents the capstone course in a student's field and should represent a culmination of all information learned in class.
PREREQUISITE: NONE

KIN710 Master's Thesis
1- 6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

KIN720 Research in Residence
0 credit Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ESS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

KIN725 Continuous Registration--Master's Study
0 credit Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

KIN730 Pre-Candidacy to Dissertation Research
1-10 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 10. Not more than 10 hours of ESS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
PREREQUISITE: DOCTORAL STUDENTS ENROLLED FOR CREDIT AS DETERMINED BY ADVISOR CREDIT IS AWARDED WHEN DISSERTATION IS ACCEPTED.
KIN735 PRACTICUM
1-2 credits  Fall & Spring Semester & First & Second Summer Session
The course presents graduate students with the theoretical and practical tools necessary for expanding their critical thinking and argumentative skills in order to present their scientific research results in an evaluative, logical and analytical manner. The course consists of weekly presentations of related literature, results, and findings on various Doctoral projects.
PREREQUISITE: ESS 646. RSCH METH IN ESS. CO-REQUISITE: MUST BE TAKEN CONCURRENTLY WITH ESS 730

KIN740 Post-Candidacy Dissertation Research
1-12 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: ADMISSION TO CANDIDACY IN DOCTORAL PROGRAM. REQUIRES APPROVAL OF ADVISOR AND DEPARTMENT CHAIR.

KIN750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. Student, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

TEACHING AND LEARNING
TAL501 Classroom Based Assessment
3 credits                                                    Fall & Spring Semester
Principles and classroom applications of educational measurement and assessment.

TAL502 Classroom Based Research
3 credits                                              Offered By Announcement Only
Application of research principles to evaluation and improvement of teacher effectiveness. Use of scientific methods in problem solving and decision making in the classroom. Student experiences in the planning, conduct, analysis and reporting of classroom research are included.

TAL503 Technology Applications in Education
3 credits                                                    Fall & Spring Semester
Technology and its role in transforming teaching and learning; core academic-curriculum literacy; and education social systems.

TAL504 Building Positive Relationships in Inclusive Secondary Schools
3 credits                                                    Fall & Spring Semester
Designed to assist general education teachers in meeting the needs of diverse secondary school students. Focus on students with disabilities, language and culture in the classroom, and developing culturally competent classroom management methods.
PREREQUISITE: TAL 101

TAL506 Issues and Strategies for ESOL
3 credits                                              Offered By Announcement Only
This course provides a comprehensive foundation in ESOL (English for Speakers of Other Languages) competencies based on Florida's mandates and TESOL standards. Theory and practice will be emphasized in the areas of applied linguistics, cross cultural communication and understanding, methods of teaching, assessment, and curriculum and material development.
PREREQUISITE: TAL 101 AND 204 OR PERMISSION OF INSTRUCTOR.
TAL508 Language Development for Linguistically and Culturally Diverse Students  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Course will provide an introduction to theories of linguistics, first and second language acquisition, as well as foundations of English learner education. Readings and lectures will serve to highlight the development of language and literacy, including challenges faced by students for whom Standard English is a second language and/or a second dialect. This course will be the first in a two-course ESOL sequence.

TAL517 Curriculum, Assessment, Teaching and Learning for Physical Science  
3 credits  
Fall & Spring Semester  
Analysis of content knowledge, pedagogy, and materials appropriate for teaching physical science in the elementary school. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in physical science, pedagogy, and student literacy in physical science.

TAL518 Curriculum, Assessment, Teaching and Learning for Number, Operations, and Algebra  
3 credits  
Fall & Spring Semester  
This course examines topics that address the mathematical ideas underlying number, operations and algebra. Related curriculum, instructional and assessment issues will be also discussed.

TAL520 Curriculum, Assessment, Teaching and Learning for Measurement and Geometry  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Topics involving measurement and geometry in the K-16 mathematics curriculum, how students learn and reason, assessment, instructional strategies.  
PREREQUISITE: GRADUATE STUDENT; ADVANCED UNDERGRADUATE WITH CONSENT OF PROFESSOR

TAL521 Curriculum, Assessment, Teaching and Learning for the Life Sciences  
3 credits  
Fall & Spring Semester  
Analysis of content knowledge, pedagogy, and materials appropriate for teaching life science in the elementary school. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in life science, pedagogy, and student literacy in life science.

TAL522 Curriculum, Assessment, Teaching and Learning in the Earth Sciences  
3 credits  
Fall & Spring Semester  
Analysis of content knowledge, pedagogy, and materials appropriate for teaching Earth science in the elementary school. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in Earth science, pedagogy, and student literacy in life science.  
PREREQUISITE: ADMISSION TO THE GRADUATE SCHOOL

TAL523 Curriculum, Assessment, Teaching and Learning for Data Analysis and Probability  
3 credits  
Fall & Spring Semester & First & Second Summer Session  
Data in the elementary school: how to gather (biased and unbiased samples), store, manage, represent, analyze. Probabilistic inferences in elementary school: chance, odds, counting, related topics.  
PREREQUISITE: GRADUATE STUDENT; ADVANCED UNDERGRADUATE WITH CONSENT OF PROFESSOR

TAL524 Education and the Arts  
3 credits  
Fall & Spring Semester  
Exploration of the fine and performing arts and their relation to PreK-12 education. Emphasis is placed on experiential learning and methods of incorporating the arts in school curricula. The course also includes a focus on the value of the arts to the individual and society.
TAL526 Practicum in Reading
3 credits  Fall & Spring Semester
Supervised practicum in reading and writing. Emphasis is on assessment and interventions for elementary students with a range of academic, linguistic and cultural challenges in becoming proficient readers.
PREREQUISITE: TAL 320, TAL 321

TAL527 Language and Assessment in ESOL
3 credits  Offered By Announcement Only
Study of language systems with a focus on understanding and applying linguistic terms. Course prepares teachers to conduct informal and formal assessment procedures with English language learners. Field experience with English language learners is required.
PREREQUISITE: TAL 531, 550 OR 620, 603, 622.

TAL528 ESOL Curriculum, Methods, and Assessment.
3 credits  Offered By Announcement Only
This course focuses on applying TESOL theories, principles, and current research to the development and use of instructional materials, curriculum, and methods. The course will enhance participant's knowledge of the regular English language arts curriculum in comparison with the ESOL curriculum.
PREREQUISITE: TAL 506.

TAL531 Educating Exceptional Students
3 credits  Fall & Spring Semester
A survey course in special education emphasizing characteristics and problems associated with various categories of exceptional learners. Policy, issues, and trends in special education will be discussed

TAL540 Instruction and Assessment in the Secondary School.
3 credits  Fall & Spring Semester
Research-based instructional processes in the secondary school.
PREREQUISITE: APPLICATION TO TEACHER CANDIDACY.

TAL541 Instruction in Secondary English.
2-3 credits  Fall Semester
Analysis of methods, materials, and content appropriate for teaching language arts in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL542 Instruction in Secondary Mathematics.
3 credits  Offered By Announcement Only
Analysis of methods, materials, and content appropriate for teaching mathematics in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL543 Instruction in Secondary Science.
3 credits  Offered By Announcement Only
Analysis of methods, materials, and content appropriate for teaching science in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
TAL544 Instruction in Secondary Social Studies.
2-3 credits Fall Semester
Analysis of methods, materials, and content appropriate for teaching the social sciences in the secondary school.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL550 Language and Early Reading Instruction
3 credits Fall Semester
Factors related to emergent literacy with an emphasis on diverse aspects of language that influence literacy and learning; development of emergent literacy and word perception; emergent literacy curriculum development; appropriate assessment and instructional techniques. Understanding of reading as a process of student engagement in fluent decoding and construction of meaning. Writing intensive.

TAL551 Word Perception in Reading
3 credits Offered By Announcement Only
Administration and interpretation of a standard reading inventory. An examination of the word recognition and vocabulary curriculum as well as appropriate assessment devices and instructional techniques.

TAL552 Reading Comprehension
3 credits Spring Semester
Development of comprehension, rate, and study skills; reading in the content areas; evaluation of materials, organization of programs; issues, problems, and exceptional readers. Emphasis is placed on understanding reading as a process of student engagement in fluent decoding of words and construction of meaning.

TAL553 Mentoring and Internship in Classroom Teaching
3-6 credits Fall & Spring Semester
A comprehensive program of supervised teaching in elementary or secondary classrooms. PREREQUISITE: ONE YEAR OF TEACHING EXPERIENCE OR ATTENDANCE IN THE TEACH FOR AMERICA SUMMER INSTITUTE.

TAL554 Literacy and Learning Strategies in the Content Area
3 credits Fall & Spring Semester
Literacy instruction in content areas for grades 6 through 12; instructional methods and materials for development of language arts, reading, and study skills. Emphasis on appropriate materials, motivation, and support for students with exceptional needs and English language learners.

TAL557 Exceptional Student Education and Classroom Management
1-5 credits Fall & Spring Semester
Introduction to theories and methods of effective classroom management and learning environments, perceptions of disabilities, addressing disruptive behaviors in classrooms and behavioral assessment.

TAL558 ESOL Strategies and Classroom Management
1-5 credits Fall & Spring Semester
This course provides a general overview of foundation in ESOL (English for Speakers of Other Languages) competencies based on Florida's mandates and ESOL Standards. Theory and practice will be emphasized in the areas of applied linguistics, cross cultural communication and understanding, methods of teaching, assessment, and curriculum and material development. A Classroom Management Plan will be developed based on current issues and effective classroom strategies for diverse populations.
TAL560 The Teacher in American Society
3 credits  Fall & Spring Semester
This course focuses on the historical development of teaching in the US, contemporary educational reform and social change, issues involving teacher work, the impact of technology on schooling, ethical and legal issues in teaching, topics involving Race, Gender, Social Class and Equity. Popular Culture sources are emphasized. Course designed for graduate credit.

TAL568 Reform, Politics and Social Organizations of Schooling
3 credits  Fall & Spring Semester

TAL569 Teaching and Management for Diverse Classrooms
3 credits  Fall & Spring Semester
This course will emphasize building a classroom culture and community that meets the needs of all students, including learners with disabilities and learners with culturally and linguistically diverse backgrounds. A history of major legal requirements for diverse populations is examined, including the meaning of learning differences, definitions and causes of disabilities, language acquisition processes, and methods for teaching diverse populations. An introduction to theories and methods of effective classroom management for building learning communities is integrated throughout the course.
PREREQUISITE: CO-REQUISITE(S): GRADUATE ADMISSION TO THE EDUCATION AND SOCIAL CHANGE PROGRAM TRACK

TAL570 Associate Teaching in the Elementary School.
6-9 credits  Offered By Announcement Only
A comprehensive semester-long program in observation and supervised teaching in the elementary school. The student spends full-time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel.
PREREQUISITE: ACCEPTANCE TO ASSOCIATE TEACHING.

TAL572 Associate Teaching in the Secondary School.
6-9 credits  Offered By Announcement Only
A comprehensive program in observation and supervised teaching in the secondary school. The student spends full-time in a secondary school participating in all activities of the teacher under the guidance of school and university personnel.
PREREQUISITE: ACCEPTANCE TO ASSOCIATE TEACHING.

TAL577 Human Development, Learning and Schooling
3 credits  Fall & Spring Semester
PREREQUISITE: STUDENT IN GOOD STANDING IN THE MASTERS OF SCIENCE IN EDUCATION DEGREE PROGRAM IN ADVANCED EDUCATIONAL STUDIES: EDUCATION AND SOCIAL CHANGE

TAL580 Seminar on Teaching
1-3 credits  Offered By Announcement Only
Topical seminar to accompany associate teaching

TAL584 Topics in the Professional Development and Supervision of Teachers.
3 credits  Offered By Announcement Only
Topics include the preparation of clinical teachers to induct, guide, and supervise the field experiences of students and associate teachers; techniques in the observation and supervision of in-service teachers; creation and implementation of professional development plans; reading in the research on teacher development across the career.
PREREQUISITE: TEACHING EXPERIENCE.
TAL590 Topics in Education
3 credits  
Spring Semester
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.

TAL591 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL592 Seminar in Teaching English as a Foreign Language
3 credits  Offered By Announcement Only
This course is designed to provide prospective international teachers of English as a new language with essential strategies and multiple models of teaching techniques; and the theoretical framework to apply these strategies and techniques. 
PREREQUISITE: ADMISSION TO GRADUATE PROGRAM.

TAL593 Online Teaching and Leadership
3 credits  Fall & Spring Semester
Introduction to teaching-learning process in online learning environments, including asynchronous modalities, assessment and evaluation, technology and digital copyright usage.
PREREQUISITE: TBD

TAL594 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL595 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL596 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL597 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.
TAL598 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL599 Workshop in Education
1-6 credits  Offered By Announcement Only
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.

TAL601 Instructional Leadership
3 credits  Offered By Announcement Only
An examination of the components of effective supervision of instruction. Leadership theories which apply to educational settings; legal rights and responsibilities of students, teachers and administrators will be covered, as well as the examination of various models of teaching.

TAL602 Effective Teaching
3 credits  Offered By Announcement Only
A study of the theory and practice of effective teaching grades K-12. Attention is given to those teaching behaviors supported by research, and emphasis placed on the development of effective teaching behaviors.
PREREQUISITE: GRADUATE STANDING.

TAL603 Teacher in American Society
3 credits  Spring Semester
An historical, philosophical, and sociological analysis of the teaching profession in American society. The role and status of teachers in American culture will be discussed. Contemporary issues such as the union movement, status assignment, rewards and incentives, and the role of the teacher as an instrument in the definition of the culture will also be covered.

TAL604 Theoretical and Psychological Bases of Teacher Education
3 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL STANDING

TAL605 Seminar in Human Resource Development
3-12 credits  Offered By Announcement Only
Contemporary topics in human resource development and technology. Rotating topics and faculty. Open only to advanced graduate students in human resource development programs pursuing the masters, specialist, or doctoral degrees. Course may be repeated for a total of twelve credits. Subtitles describing the topics to be offered will be shown in parentheses in the printed schedule, following the title.
PREREQUISITE: ADMISSION TO MASTERS, SPECIALISTS, OR DOCTORAL STUDY OR PERMISSION OF INSTRUCTOR.

TAL606 Issues and Trends in Teacher Education
3 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL STUDENT STANDING OR INSTRUCTORS APPROVAL

TAL607 professional Seminar
1-3 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL STUDENT STANDING
TAL608 Practicum in Education and Social Change
3 credits                                                    Fall & Spring Semester
This practicum course is the culminating project for the Education and Social Change
Master's Program. Participants will review the literature, design, and present
an action project within the context of a school or community setting.
PREREQUISITE: NONE

TAL609 Practicum in Reading
3 credits                                                    Fall & Spring Semester
Practicum in an educational setting. Participants will apply effective practices
in teaching Reading.
PREREQUISITE: TAL 550, 552, 651, AND 652.

TAL610 Early Childhood Curriculum Development
3 credits                                                      First Summer Session
Development of curriculum for children from birth to eight years of age. Emphasis
on application of research findings. 20 hours of field experience required.

TAL611 Issues and Trends in Early Childhood Education
3 credits                                                           Spring Semester
Current practices in early childhood education in relation to historical perspectives
and contemporary research. Analysis of issues and problems in early childhood education.

TAL614 Typical and Atypical Child Development
3 credits                                                           Spring Semester
Theories and research in the development of children from conception through eight
years of age. Factors which influence development and the relationship of typical
development to patterns of delayed and atypical development. Writing intensive
course.

TAL615 Evaluation and Assessment in Infant and Early Childhood Special
3 credits                                                    Fall Semester
Students will become familiar with a variety of formal and informal screening,
evaluation, assessment instruments, and procedures currently in use with children
birth to eight. They will learn criteria for selecting and using developmentally
and culturally appropriate instruments and become familiar with the multi-, inter-, and trans-disciplinary team approaches. Students will write formal reports and
develop an IEP and an IFSP. May require field experience.
PREREQUISITE: TAL 614, OR PERMISSION OF INSTRUCTOR

TAL616 Intervention Strategies in Infant and Early Childhood Special Education
3 credits                                                           Spring Semester
The focus of this course will be the implementation of IEPs and IFSPs through the
use of developmentally appropriate curriculum, methods, and intervention strategies
for infants, toddlers, and young children with special needs. This will include
implementation and adaptation of existing curriculum and materials for young children
to meet the special needs of this population. May require field experience. Writing
Intensive course.
PREREQUISITE: TAL 615, OR PERMISSION OF INSTRUCTOR
### TAL617 Working with Children who Exhibit Challenging Behaviors
3 credits  
Fall & Spring Semester  
Challenging behaviors in young children; influences of culture, language, ethnicity; applying Response to Intervention in Preschool settings; evidence-based classroom and behavior management strategies; planning intensive individualized interventions; applying positive behavioral support.  
PREREQUISITE: GRADUATE STATUS

### TAL620 Reading in the Elementary School
3 credits  
First Summer Session  
Extending competencies in teaching reading, including exceptional children in the regular classroom, with emphasis on applying findings from research in reading to classroom practices. 20 hours of field experience required for all students who are not currently teaching.

### TAL621 Language Arts and Culture in the Classroom
3 credits  
Spring Semester  
Extending competencies in the language arts including linguistic and cultural diversity and children with disabilities in elementary classrooms. Emphasis on research applications. 20 hours of field experience required for all students who are not currently teaching. Writing intensive course.

### TAL622 Mathematics in the Elementary School
3 credits  
Spring Semester  
Content, methods, and research appropriate for teaching mathematics in the elementary school, including exceptional children in the regular classroom. Content is defined as a pre-algebra mathematics. 20 hours of field experience required for all students who are not currently teaching. Writing intensive course.

### TAL623 Science in the Elementary School
3 credits  
First Summer Session  
Extending competencies of elementary school teachers in teaching science to children, including exceptional children in the regular classroom. Development of science programs based on research which has classroom applications. 20 hours of field experience required for all students who are not currently teaching.

### TAL624 Social Studies in the Elementary School
3 credits  
Fall Semester  
Extending competencies in teaching social studies to children, including exceptional children in the regular classroom, with an emphasis on research applications. 20 hours of field experience required for all students who are not currently teaching.

### TAL625 Literature for Children and Adolescents.
3 credits  
Fall Semester  
Study of literature for children and adolescents emphasizing multicultural literature and use of literature across the curriculum. Twenty hours of field experience required.  
PREREQUISITE: GRADUATE STANDING.

### TAL626 Instructing Students Who Have Literacy Challenges
3 credits  
Fall & Spring Semester  
Administration and interpretation of instructional assessments with instructional strategies and materials based upon scientifically based reading research for the prevention and remediation of reading difficulties.  
PREREQUISITE: TAL 550 AND 552 OR 620 AND 621.
TAL628 Seminar in Elementary Education
3-12 credits   Offered By Announcement Only
Study in special interest areas in elementary education. May be taken for up to 12 credits.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

TAL629 Language and Reading Instruction
3 credits                                                    Fall & Spring Semester
Extending competencies of K-12 school teachers in teaching reading to children, including exceptional children in the regular classroom. Emphasis on applying findings from research in reading and writing to classroom practices.
PREREQUISITE: ADMISSION TO GRADUATE STUDIES AT THE UNIVERSITY OF MIAMI.

TAL630 Learning Disabilities
3 credits                                                             Fall Semester
A comprehensive study of theoretical issues, research, diagnosis, planning, and organization of instruction for children with learning problems. Curriculum adjustment, development of programs of differential instruction, specialized methods of evaluation, and team relationships will be emphasized. This is a writing intensive course.
PREREQUISITE: TAL 531 OR EQUIVALENT.

TAL631 Theory and Instructional Practices for Exceptional Student Education
3 credits                                                           Spring Semester
Theoretical issues, research, diagnosis, planning, and organization of instruction for exceptional students. Programs of differential instruction, ongoing assessment, and team relationships will be covered.
PREREQUISITE: TAL 531 OR EQUIVALENT, OR PERMISSION OF INSTRUCTOR.

TAL632 Classroom and Behavior Management
3 credits                                                           Spring Semester
An examination of the principles of various theoretical perspectives of classroom management and discipline. Applications to the management of behavior problems of children and adolescents. Contemporary research analyzed and discussed. Writing intensive course.

TAL633 Theories and Models of Teaching Students with Behavior/Emotional Disorders
3 credits                                                           Spring Semester
Characteristics, issues, research, diagnosis, planning, and organization of instruction for children with behavior disorders. Curriculum design evaluation methods and instructional strategies are also included.
PREREQUISITE: TAL 531 OR EQUIVALENT.

TAL634 Prescriptive Teaching of Exceptional Students
3 credits                                                             Fall Semester
Techniques for individualization of instruction for exceptional students, including educational prescription, and curriculum adaptation.
PREREQUISITE: TAL 630 OR 631, 633 OR PERMISSION OF INSTRUCTOR

TAL635 Seminar in Special Education
3-12 credits   Offered By Announcement Only
Study in special interest areas in special education. May be taken for up to 12 credits.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
TAL636 Cognitive Psychology in Special Education
3 credits                                                    Fall & Spring Semester
This course will focus on the immediate and long-term effects of prenatal substance
exposure and other risk factors on the development and learning of infants and
toddlers. May require field experience. Prerequisite: Graduate standing or permission
of instructor.
PREREQUISITE: DOCTORAL STUDENT STANDING

TAL637 Assessment in Exceptional Student Education
3 credits                                                             Fall Semester
Administration and interpretation of assessment tools used to assess and evaluate
reading and learning difficulties; includes a survey of instructional strategies
and materials for the prevention and remediation of reading difficulties based
on the results of the assessments.

TAL638 Communication and Consultation Skills in Exceptional Student Education
3 credits                                                           Spring Semester
A course for professionals who will be teaching, counseling, or interacting directly
or indirectly with exceptional students. An overview of community agencies, organizations,
and services, counseling and consulting models, skills associated with various
educator roles; and techniques for interacting with parents.

TAL641 Principles of Curriculum Development and Classroom Management for TESOL
3 credits                                                           Spring Semester
Components of curriculum and instructional management in ESOL classrooms. Pupil/teacher
interaction, curriculum organization, student assessment and evaluation, materials
development and adoption, utilization of resources, and classroom organization
will be covered.

TAL642 Equity in STEM Education.
3 credits                                                             Offered By Announcement Only
Issues of unequal student achievement, course taking, degree-seeking, and careers
that rely on mathematics, science, and technology. Focus is on social-demographic
groups defined along lines of race, ethnicity, social class, gender, language,
and their interactions. Historical and social antecedents, current day policies
and practices, extant research consequences and future trends.
PREREQUISITE: GRADUATE STUDENT STATUS.

TAL643 Introduction to Theories and Practice of Teaching English to Speakers of Other
3 credits                                                      First Summer Session
Introduction to theories and practice of ESOL.

TAL645 Language Assessment
3 credits                                                    Fall Semester
Nature and methodologies of language assessment within a framework of psychometric
and linguistic criteria.
PREREQUISITE: TAL 643.

TAL646 Principles of First and Second Language Acquisition
3 credits                                                          Spring Semester
Theories and principles of language acquisition. Phenomena of language interference
related to linguistic and cultural criteria.
PREREQUISITE: TAL 643 AND/OR 640.
TAL647 Understanding Culture in the Classroom  
3 credits  
Spring Semester  
This course explores the conflicts and the strategies for resolution between the patterns of culture in the classroom and the patterns of culture that school children bring to the classroom - patterns which are learned in their families and communities.

TAL648 Educational Issues in Immigration  
3 credits  
Spring Semester  
An historical, philosophical, and sociological analysis of issues involving education and immigration, cultural identity, diversity, and congruity. A topical approach is emphasized.

TAL649 Language, Literacy and Cultural of Policy  
3 credits  
Fall & Spring Semester  
PREREQUISITE: REQUIRES DOCTORAL STANDING

TAL650 Topics in Language and Literacy Learning  
1-3 credits  
Fall & Spring Semester  
Seminar providing study of contemporary topics and professional issues in teacher education.  
PREREQUISITE: DOCTORAL STANDING AND PERMISSION OF INSTRUCTOR

TAL651 Assessment of Reading and Related Learning Disabilities  
3 credits  
Fall Semester  
Theories and procedures for screening, diagnosis, and progress-monitoring of reading and related learning disabilities. Includes instruction and supervised clinical experiences in administration and interpretation of assessments with an emphasis on prevention, identification, and remediation of reading and related learning disabilities.  
PREREQUISITE: TAL 550, 552

TAL652 Intervention for Reading and Related Learning Disabilities  
3 credits  
Spring Semester  
Theories and procedures for screening, diagnosis, and progress-monitoring of reading and related learning disabilities. Includes instruction and supervised clinical experiences in administration and interpretation of assessments with an emphasis on prevention, identification, and intervention of reading and related learning disabilities.  
PREREQUISITE: TAL 651 (OR COULD BE TAKEN CONCURRENTLY).

TAL653 Applied Linguistics in Education  
3 credits  
Fall & Spring Semester  
Survey of phonology, morphology, and syntax of language system, especially as they apply to learning disabilities, common language disorders, programs in preschool, reading, and bilingual education.  
PREREQUISITE: DOCTORAL STANDING OR INSTRUCTOR'S APPROVAL
TAL655 Seminar in Reading/Learning Disabilities
3-12 credits   Offered By Announcement Only
Contemporary topics in reading and learning disabilities. Rotating topics and faculty. Open only to advanced graduate students in reading and learning disabilities pursuing specialist or doctoral degrees. Specialist students enroll for a total of six hours, and doctoral students for a total of 12 hours. Course may be repeated for a total of 12 credits. Subtitles describing the topics to be offered will be shown in parentheses in the printed schedule, following the title.
PREREQUISITE: ADMISSION TO SPECIALIST OR DOCTORAL STUDY OR PERMISSION OF INSTRUCTOR.

TAL656 Seminar in Reading
3 credits                                                    Fall & Spring Semester
Seminar providing intensive study of contemporary topics in reading. Open to advanced graduate students in reading.
PREREQUISITE: TAL 550/552

TAL657 Theory and Research in Reading
3 credits                                                    Fall & Spring Semester
Provides an overview of the historical roots and current state of the learning sciences, as they apply to the study of learning in science and mathematics. Organized around reading, discussion and synthesis of research. Prerequisite: Acceptance to Ph.D. program or approval of instructor.
PREREQUISITE: DOCTORAL STANDING

TAL658 Theory and Research in Writing
3 credits                                                    Fall & Spring Semester
Study of mathematics and science curricula and the competing forces that shape them, including standards documents, state and national policy, conceptions of the disciplines, modern and postmodern analyses of curriculum theory. Prerequisite: Admission to graduate studies.
PREREQUISITE: REQUIRES DOCTORAL STANDING

TAL660 Theories and Analyses of Instruction
3 credits                                                    Offered By Announcement Only
A survey of current instructional theories with; a consideration of the relationship to what is known about learning and a selection, examination, and discussion of the techniques derived from them.
PREREQUISITE: EPS 605 (OR EQUIVALENT) OR PERMISSION OF INSTRUCTOR

TAL661 The Social and Cultural Foundation of Education
3 credits                                                    Fall & Spring Semester
Doctoral seminar on the philosophical, theoretical, and psychological bases of teacher education pertaining to the student's area of concentration (TESOL, Special Education or Reading). Subtitles describing the topics to be offered will be provided in the printed schedule.
PREREQUISITE: DOCTORAL STUDENT STANDING OR INSTRUCTORS APPROVAL. FULFILL THE SOCIAL FOUNDATIONS REQUIREMENT FOR DOCTORAL STUDENTS.

TAL662 Issues and Trends in Multicultural Education
3- 6 credits   Offered By Announcement Only
The study and critical examination of the theory and practice of multicultural education. Development of a personal theory of effective education for pluralism is included.
PREREQUISITE: DOCTORAL STATUS.
TAL663 Disability and Diversity: Critical Views
3 credits  Fall & Spring Semester
Seminar providing study of contemporary topics in teacher education. Consideration is given to the philosophical, psychological, and sociological bases of teacher education. Analytic review of research on teacher education curricula, program innovations, policy issues, and their effects will also be covered. Open only to doctoral students.
PREREQUISITE: DOCTORAL STUDENT STANDING. HAVING TAKEN ONE OF TAL 636, 668 OR 662

TAL664 Curriculum and Computing
3 credits  Offered By Announcement Only
Curriculum history and theory in the context of educational technologies from the spoken work, to text and textbook, and finally computing.
PREREQUISITE: DOCTORAL STATUS.

TAL665 Seminar in Special Education Research
3 credits  Offered By Announcement Only
Critical analysis of empirical research studies in selected areas of special education research, focusing on research designs, data analysis methods, and interpretation of findings.

TAL666 Research in Special Education
3 credits  Fall & Spring Semester
PREREQUISITE: ADMISSION TO PH.D. PROGRAM

TAL667 Seminar in Current Special Education Issues
3 credits  Offered By Announcement Only
Critical examination of selected current issues in special education from historical, social, policy, practice and research perspectives.

TAL668 Current Issues in Special Education
3 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL STUDENT STANDING

TAL669 Topics in Special Education
1-3 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL STUDENT STANDING AND PERMISSION OF INSTRUCTOR

TAL674 Internship in the Elementary School
3-6 credits  Offered By Announcement Only
A comprehensive program of supervised teaching in a K-6 classroom in the elementary school. The student spends a full semester employed as a full-time teacher while under the guidance of school and university personnel.
PREREQUISITE: APPROVAL OF THE OFFICE OF STUDENT SERVICES.

TAL675 Internship in the Secondary School
3-6 credits  Offered By Announcement Only
A comprehensive program of supervised teaching in the secondary school. The student spends two full semesters employed as a full-time teacher while under the guidance of school and university personnel.
PREREQUISITE: APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.
TAL676 Internship in Special Education Settings
3- 6 credits   Offered By Announcement Only
A comprehensive program of supervised teaching in special education settings. The student spends two full semesters employed as a full-time teacher while under the guidance of school and university personnel.
PREREQUISITE: APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

TAL677 Practicum/Internship with Infants and Toddlers with Disabilities (0-3 yrs.)
1- 6 credits   Offered By Announcement Only
A comprehensive program in observations and supervised teaching in a school/center for infants and toddlers with disabilities (0-3 yrs.). The student spends full time in the school/center participating in all activities of the teacher under the guidance of school and university personnel.
PREREQUISITE: APPROVAL OF THE OFFICE OF STUDENT SERVICES.

TAL678 Practicum/Internship with Children with Disabilities (3-5 yrs.)
1- 6 credits   Offered By Announcement Only
A comprehensive program in observation and supervised teaching in a school/center for children with disabilities (3-5 yrs.). The student spends full time in the school/center participating in all activities of the teacher under the guidance of school and university personnel.
PREREQUISITE: APPROVAL OF THE OFFICE OF STUDENT SERVICES.

TAL679 Specialized Placements in Exceptional Student Education
1- 6 credits   Offered By Announcement Only
An alternative internship placement with specialists in non-classroom based and/or non-education based exceptional student education settings. The student spends full time in the program participating in all activities of the specialist under the guidance of program and university personnel.
PREREQUISITE: APPROVAL OF THE OFFICE OF STUDENT SERVICES.

TAL680 Working with Families of Young Children with Disabilities: Strategies and
3 credits                                              Fall Semester
This course will address issues related to working with families of young children with special educational and health needs. This will include strategies for effective communication and collaboration with all members of the interdisciplinary team. This is a writing intensive course.

TAL681 Methods for Communications and Language in Young Children with Disabilities
3 credits                                              Spring Semester
This course will focus on language theories, models, and methods for birth through eight-year olds. The course will present an overview of normal development in communication and discuss conditions that might impede progress as well as signs that would suggest a problem is present. This course may require field experience.

TAL682 Adaptive Technology and Computers in Early Childhood
1 credit                                               First Summer Session
Applications of adaptive technology and computers in the education of young children with special needs.
TAL683 Teaching and Teacher Education in Mathematics and Science  
3 credits  
Fall & Spring Semester  
3 cr. The focus of this course is on assessment and intervention strategies for young handicapped children. Presented will be specific assessment and intervention methods and strategies across the cognitive and effective domains. May require field experience.  
PREREQUISITE: ADMISSION TO PH.D. PROGRAM OR INSTRUCTOR APPROVAL

TAL684 Research on Learning in Mathematics and Science  
3 credits  
Fall & Spring Semester  
Interdisciplinary considerations in assessment and management of developmental disabilities in young handicapped children. Focus on impact of medicine, OT/PT psychology, social work, nutrition, and other disciplines on educational programming in early childhood special education. Prerequisite: Graduate standing; permission of instructor.  
PREREQUISITE: ADMISSION TO PH.D. PROGRAM OR INSTRUCTORS APPROVAL

TAL685 Mathematics and Science Curriculum  
3 credits  
Fall & Spring Semester  
This course will address health issues ranging from preventive health considerations to the management of medically complex children in early intervention settings.  
PREREQUISITE: ADMISSION TO PH.D. PROGRAM OR INSTRUCTORS APPROVAL

TAL686 Assessment in Mathematics and Science  
3 credits  
Fall & Spring Semester  
Holistic view of the motor development in infants and toddlers.  
PREREQUISITE: ADMISSION TO PH.D. PROGRAM OR INSTRUCTORS APPROVAL

TAL687 Mathematics and Science Education Research Practicum  
3 credits  
Fall & Spring Semester  
Overview of curriculum, teaching, care giving, and a developmentally appropriate environment for birth to two. Emphasis on matching caregiver strategies and child development. Observation required. Prerequisite: Graduate standing.  
PREREQUISITE: DOCTORAL STUDENT IN MATHEMATICS AND SCIENCE EDUCATION, COMPLETION OF AT LEAST 2 MATH/SCIENCE EDUCATION CORE DOCTORAL COURSES OR CONSENT OF INSTRUCTOR

TAL688 Topics in Math and Science Education  
1-3 credits  
Fall & Spring Semester  
This special two-day workshop will cover issues regarding the family, community, values, and culture of preschool handicapped youngsters from different cultural and ethnic groups. Special emphasis on how teachers can respond appropriately to youngsters from varying backgrounds will be emphasized. How cultural and ethnic diversity influences the following areas will be presented: assessment, parent-professional partnership, delivering interventions, curricula development, and social/affective skills.  
PREREQUISITE: ADMISSION TO PH.D. PROGRAM OR INSTRUCTOR APPROVAL

TAL690 Advance Topics in Education  
1-3 credits  
Spring Semester  
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.
TAL693 Advanced Individual Study
1-3 credits Fall & Spring Semester & First & Second Summer Session
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study form will be required.
PREREQUISITE: PERMISSION OF THE DIRECTING FACULTY MEMBER AND DEPARTMENT CHAIRMAN.

TAL694 Advanced Individual Study
1-3 credits Fall & Spring Semester & First & Second Summer Session
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study form will be required.
PREREQUISITE: PERMISSION OF THE DIRECTING FACULTY MEMBER AND DEPARTMENT CHAIRMAN.

TAL696 Practicum/Internship: Elementary Exceptional Student Education Classroom
1-6 credits Fall & Spring Semester
A comprehensive program of observations and supervised teaching in an elementary exceptional student education classroom. The student spends full time in the classroom participating in all activities of the teacher under the guidance of school and university personnel.
PREREQUISITE: APPROVAL OF THE OFFICE OF STUDENT SERVICES.

TAL697 Practicum/Internship: Secondary Exceptional Student Education Classroom
1-6 credits Fall & Spring Semester
A comprehensive program of observations and supervised teaching in a secondary exceptional student education classroom. The student spends full time in the classroom participating in all activities of the teacher under the guidance of school and university personnel.
PREREQUISITE: APPROVAL OF THE OFFICE OF STUDENT SERVICES.

TAL710 Master's Thesis
1-6 credits Fall & Spring Semester
The student working on his/her masters or Ed.D. thesis enrolls for credit. In most departments no to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
PREREQUISITE: GRADUATE STANDING.

TAL715 Post-Candidacy Thesis Research
1-12 credits Offered By Announcement Only
Masters-degree and Ed.D. students enrolled for credit as determined by advisor. Credit awarded when thesis is accepted.
PREREQUISITE: ADMISSION TO CANDIDACY IN EITHER MASTER'S DEGREE OR ED.S.PROGRAM. REQUIRES APPROVAL OF ADVISOR AND DEPARTMENT CHAIR.

TAL720 Research in Residence - Masters
0 credit Offered By Announcement Only
Masters-degree and Ed.D. students enrolled for credit as determined by advisor. Credit awarded when thesis is accepted.
PREREQUISITE: GRADUATE STANDING

TAL725 Continuous Registration - Master's Study.
0 credit Fall & Spring Semester
To establish residence for non-thesis master's study who are preparing for major examinations or working on culminating project. Credit not granted. Regarded as full time residence.
PREREQUISITE: GRADUATE STANDING.
TAL730 Pre-Candidacy to Dissertation Research.
1-12 credits  Fall & Spring Semester
Doctoral students enrolled for credit as determined by advisor. Credit is awarded when dissertation is accepted.
PREREQUISITE: ADMISSION TO DOCTORAL PROGRAM. REQUIRES APPROVAL OF ADVISOR AND DEPARTMENT CHAIR.

TAL735 Doctor of Education Dissertation
1-12 credits  Offered By Announcement Only
Required of all candidates for the Ed.D. The student enrolls for credit as determined by his/her advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed 12 credits.
PREREQUISITE: ADMISSION TO DOCTORAL PROGRAM.

TAL740 Post-Candidacy Dissertation Research.
1-12 credits  Fall & Spring Semester
Doctoral students enrolled for credit as determined by advisor. Credit is awarded when dissertation is accepted.
PREREQUISITE: ADMISSION TO CANDIDACY IN DOCTORAL PROGRAM. REQUIRES APPROVAL OF ADVISOR AND DEPARTMENT CHAIR.

TAL750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Doctoral students enrolled for credit as determined by advisor. Credit awarded when dissertation is accepted.
PREREQUISITE: ADMISSION TO CANDIDACY IN DOCTORAL PROGRAM. FULFILLMENT OF OTHER RESEARCH REQUIREMENTS. REQUIRES APPROVAL OF ADVISOR AND DEPARTMENT CHAIR.
BME501 Unified Medical Sciences I  
3 credits  
Fall Semester  
Treatment of the basic biological and medical elements in physiological systems.  
The anatomy, physiology, biophysics, biochemistry and certain aspects of clinical  
medicine are unified with an emphasis on cellular and sub cellular systems. Not  
open to BME undergraduates.  
PREREQUISITE: PERMISSION OF COURSE COORDINATOR.

BME502 Unified Medical Sciences II  
3 credits  
Fall Semester  
Treatment of the basic biological and medical elements in physiological systems.  
The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical  
medicine are unified with an emphasis on cardiovascular, renal, digestive, endocrine,  
and reproductive systems. Not open to BME undergraduates.  
PREREQUISITE: PERMISSION OF COURSE COORDINATOR.

BME503 Unified Medical Science III  
3 credits  
Spring Semester  
Treatment of the basic biological and medical elements in physiological systems.  
The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical  
medicine are unified with an emphasis on neural, sensory, and muscular systems.  
Not open to BME undergraduates.  
PREREQUISITE: PERMISSION OF COURSE COORDINATOR.

BME506 Computer Aided Design in Biomedical Engineering  
1 credit  
Spring Semester  
Laboratory course for computer based two and three dimensional drawing and design  
based on ProEngineer. Parametric design, parts, features, assemblies for complex  
modeling. Applications in biomedical engineering design.  
PREREQUISITE: BME 112, EEN 118

BME507 LabView Applications for Biomedical Engineering  
1 credit  
Spring Semester  
Laboratory course for computer based instrumentation and design based on Labview.  
Virtual instrumentation, data acquisition and display, GPIB instrument control,  
biomedical applications in biosignal recording, and monitoring are discussed.  
PREREQUISITE: BME 112, EEN 118.

BME512 Regulatory Control of Biomedical Devices  
3 credits  
Spring Semester  
Regulatory agencies and requirements, Food and Drug Administration, 510(k) and  
premarket approval (PMA), international regulatory requirements, ISO 9000 series,  
CE, UL, product and process validation, quality engineering, quality improvement  
programs, rapid prototyping, packaging and sterilization, and project management  
are discussed.
BME520 Medical Imaging Systems  
3 credits  Fall Semester 
Engineering and scientific principles of medical imaging systems. The concepts of instrumentation and diagnostic applications of different techniques and systems are presented. Demonstrations or exhibitions of medical systems are given in the visits to clinic and research laboratories. Topics include digital image and image processing fundamentals, radiographic (X-ray, CT), magnetic resonance (MRI) and radio-isotopic (PET) systems, and associated image reconstruction techniques. Basic concepts and simulation of imaging systems are emphasized. 
PREREQUISITE: EEN 118, 201; CO-REQUISITE 470 OR EQUIVALENT 

BME521 Medical Imaging Applications  
3 credits  Offered By Announcement Only 
Medical applications of imaging systems and image processing techniques. Topics include image fundamentals (resolution, format, and storage), image processing fundamentals (transformation, compression, enhancement, segmentation, registration, and reconstruction), and image analysis fundamentals (calibration, quantification, correlation, linearity and depiction). Course includes dedicated computer laboratory projects and demonstrations given in clinical and research laboratories at the medical campus. Co-requisite: BME 570 or equivalent. 
PREREQUISITE: EEN 118, 201; COREQUISITE: BME 470 OR EQUIVALENT. 

BME522 Scanning Electron Microscopy in Biomedical Devices  
3 credits  Fall & Spring Semester 
Physics and operating principles of scanning electron microscope (SEM), transmission electron microscope (TEM), and optical light microscope. Biological tissue preparation, storage, fixation and digital image storage. Each student will learn to use the SEM in the design and/or analysis of a biomedical device. 
PREREQUISITE: PERMISSION OF INSTRUCTOR 

BME525 Special Problems  
1- 3 credits  Fall & Spring Semester & First & Second Summer Session 
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only. 
PREREQUISITE: SENIOR OR GRADUATE STANDING, PERMISSION OF INSTRUCTOR 

BME526 Special Problems  
1- 3 credits  Fall & Spring Semester 
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only. 
PREREQUISITE: PERMISSION OF THE INSTRUCTOR 

BME529 Special Problems  
1- 3 credits  Fall & Spring Semester & First & Second Summer Session 
Research and/or design projects. Individual investigation of current problems. Offered by special arrangement only. 
PREREQUISITE: PERMISSION OF THE INSTRUCTOR
BME531 Technical Entrepreneurship I
1 credit  Fall & Spring Semester
The first half of a two-semester sequence that simulates the work of a product
development team to gain experience in technical entrepreneurship. The students
propose product ideas, assess those collectively, select a few, form teams, define
the product, and perform market analysis. The course is concluded with a business
and technical development plan for the team's project. Lectures are presented on
a variety of entrepreneurial topics.
PREREQUISITE: JUNIOR OR HIGHER STANDING.

BME532 Technical Entrepreneurship II
2 credits  Fall & Spring Semester
The second half of a two-semester sequence that simulates the work of a product
development team to gain experience in technical entrepreneurship. The students
complete the development of a working prototype and refine their marketing and
business plan based on experience gained during the development phase. Lectures
are presented on relevant entrepreneurial topics.
PREREQUISITE: JUNIOR OR HIGHER STANDING.

BME535 Advanced Biomaterials
3 credits  Offered By Announcement Only
Applications of biomaterials in different tissue and organ systems. Relationship
between physical and chemical structure of materials and biological system response
are discussed as well as choosing, fabricating, and modifying materials for specific
biomedical applications.
PREREQUISITE: BME 335 OR PERMISSION OF INSTRUCTOR.

BME540 Microcomputer-Based Medical Instrumentation
3 credits  Offered By Announcement Only
Principles and design of microcomputer-based biomedical instruments, analog and
digital signal conversion, microcomputer hardware and software design, algorithm
development for medical applications, medical signal processing with microcomputers,
software safety in life support systems, and current applications are discussed.
PREREQUISITE: EEN 304 AND 315, OR PERMISSION OF INSTRUCTOR.

BME541 Medical Electronic Systems Laboratory
2 credits  Spring Semester
Laboratory course for BME 540. Design of medical instruments integrated with microcomputers
PREREQUISITE: COREQUISITE: BME 540.

BME545 Biomedical Optical Instruments
3 credits  Fall Semester
Introduction to geometrical optics, light sources, detectors, and fiber optics
with an emphasis on engineering aspects and medical applications. Fiber-optic delivery
systems for medical applications, optics of the eye and visual instruments, and
optical instruments used in medicine (microscopes, endoscopes, and ophthalmic
instruments) are discussed. Hands-on sessions in the laboratory are included.
PREREQUISITE: PHY 207, MTH 311 OR PERMISSION OF THE INSTRUCTOR.
BME546 Medical Applications of Lasers
3 credits
Spring Semester
Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.
PREREQUISITE: PHY 207, MTH 311 OR PERMISSION OF THE INSTRUCTOR.

BME550 Rehabilitation Engineering
3 credits
Fall Semester
Principles of rehabilitation engineering with emphasis on currently used assistive devices for ambulation and hand motion. Human neural and muscle physiology, electromyography, functional electrical stimulation, artificial and biological sensors, control, and design aspects of active assistive devices for the handicapped are discussed.
PREREQUISITE: EEN 305 OR PERMISSION OF INSTRUCTOR.

BME555 Fundamentals of Computational Neuroscience
3 credits
Spring Semester
Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.
PREREQUISITE: BME 265 OR PERMISSION. COREQUISITE BME 470

BME565 Principles of Cellular and Tissue Engineering
3 credits
Fall Semester
Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.
PREREQUISITE: BIL 150, BME 335 OR PERMISSION OF INSTRUCTOR.

BME566 Cell and Tissue Engineering Laboratory
1 credit
Fall Semester
PREREQUISITE: CO-REQ: BME 565

BME570 Biomedical Signal Processing
3 credits
Spring Semester
Course topics include quantitative description, analysis, and processing of biophysical and physiological (cardiovascular, neural, sensory, muscular, respiratory and other) signals using computers. Survey of time-frequency representations, correlation, convolution, coherence, filtering, averaging, and classification is also included.
PREREQUISITE: EEN 118, 470

BME571 Introduction to Biosignal Processing Lab
1 credit
Fall & Spring Semester
Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.
PREREQUISITE: COREQUISITE BME 570.
BME575 Biomechanics II
3 credits
Offered By Announcement Only
Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.
PREREQUISITE: BME 375.

BME581 Radiation Biology and Physics
3 credits
Fall Semester
The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis. Corequisite or prerequisite: BME 502 or permission of instructor.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BME 502 OR PERMISSION OF THE INSTRUCTOR.

BME582 Radiation Dosimetry
3 credits
Spring Semester
The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.
PREREQUISITE: BME 310, 581.

BME587 Finite Element Analysis for Engineers
3 credits
Fall & Spring Semester
Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electro-magnetic, optical, and fluid flow problems.
PREREQUISITE: MTH311 OR PERMISSION OF INSTRUCTOR

BME595 Graduate Research in Biomedical Engineering.
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Research and design projects consisting of an individual investigation of current problems. Subject and credit to be arranged with the instructor.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BME599 Cooperative Education.
1 credit
Offered By Announcement Only
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student’s field of study. Course may be repeated. Periodic reports and conferences are required.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

BME605 Master’s Design Project I
3 credits
Fall & Spring Semester & First & Second Summer Session
Comprehensive M.S. design project in biomedical engineering. Open to students in the BS/MS and MS programs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
BME606 Master's Design Project II  
3 credits          Fall & Spring Semester & First & Second Summer Session  
Comprehensive M.S. design project in biomedical engineering. Open to students in the BS/MS.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BME613 Application of Computers in Medicine  
3 credits                                              Offered By Announcement Only  
Applications in the clinical and medical research laboratories for physiological data acquisition, analysis, and management of patient records. Differences among computer systems and languages for clinical and research activities are also covered.  
PREREQUISITE: KNOWLEDGE OF PROGRAMMING AND PERMISSION OF INSTRUCTOR.

BME623 Neural Engineering  
3 credits                                                    Fall & Spring Semester  
Biophysics of neural communication, quantitative electroencephalography and evoked potentials, sleep, seizure, anesthesia and intraoperative monitoring, neural stimulation, artificial and biological neural networks, cochlear and visual implants, brain and muscle stimulation.  
PREREQUISITE: BME 503, 570 OR CONSENT OF INSTRUCTOR.

BME625 Special Problems  
1- 3 credits     Fall & Spring Semester & First & Second Summer Session  
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

BME626 Special Problems  
1- 3 credits     Fall & Spring Semester  
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

BME628 Advanced Topics  
1- 3 credits     Fall & Spring Semester  
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BME629 Advanced Medical Imaging  
3 credits                                              Offered By Announcement Only  
Analysis of contemporary medical imaging systems and the associated technologies. The course focuses on principles of advanced medical imaging systems. Topics include multimodality imaging, three-dimensional image reconstruction and visualization, clinical and research applications, and derivation and comparison of algorithms.  
PREREQUISITE: BME 520 OR EQUIVALENT.

BME631 Advanced Topics  
1- 3 credits     Fall & Spring Semester  
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
BME632 Advanced Topics
1- 3 credits    Fall & Spring Semester
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BME640 Implantable Biomedical Devices
3 credits                                              Offered By Announcement Only
Development and advances in implantable materials and devices especially those used as electrically driven prostheses. Topics include pacemakers, defibrillators, catheters, neurological stimulators, heart assist, bone repair, and other diagnostic and therapeutic devices. The historical, medical significance, business, economic, and technical aspects of these devices and the associated instruments for monitoring are discussed. Fundamentals of electrochemical corrosion and stimulation as well the technology of implantable power sources are reviewed.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BME 502 OR 503.

BME645 Biomedical Optical Imaging and Diagnostics
3 credits                                              Offered By Announcement Only
Review of geometrical optics, fiber optics, and tissue optics. Introduction to physical optics: interference, diffraction, and polarization; optical imaging resolution limits, super-resolution imaging, advanced optical microscopy, and optical coherence tomography (OCT). Imaging through scattering tissue, imaging and diagnostics with polarized light, fluorescence, infrared, and Raman spectroscopy and applications are also discussed. Optical diagnostics using scattered light: laser Doppler flowmetry, and dynamic light scattering; and opto-chemical and evanescent wave sensors are also covered.
PREREQUISITE: BME 545 OR 546, AND PERMISSION OF THE INSTRUCTOR.

BME650 Advanced Biomedical Transport Phenomena
3 credits                                              Offered By Announcement Only
Continuum mixture theory and applications to mass transport in biological tissues, hydrogels, and other porous media. Mechano-electrochemical coupling phenomena in biological tissues and cells.
PREREQUISITE: BME 450 OR PERMISSION OF INSTRUCTOR

BME660 Fundamentals of Cellular and Tissue Engineering
3 credits                                              Spring Semester
Principles and advanced topics on cellular and tissue engineering. Topics include biodegradable and non-biodegradable biomaterials, cytokines, the traditional and stem cell-based tissue engineering approaches, bioreactors and special topics such as bone, cartilage and other tissues.
PREREQUISITE: BME 501 OR PERMISSION OF INSTRUCTOR

BME680 Biomedical Engineering Seminar
0 credit                                              Fall & Spring Semester
Presentation of biweekly seminars by selected speakers and graduate students on current topics of interest in biomedical engineering. Attendance is required of all graduate students registered in biomedical engineering graduate programs.
PREREQUISITE: GRADUATE STANDING.
BME681 Radiation Therapy Physics

3 credits  Fall & Spring Semester

Application of radiation physics in the field of radiation therapy. The course will cover the relevant subjects of modern physics, the basic modalities and basic instrumentations of radiation therapy, the principles of particle transport and radiation dose computation and quality assurance of radiation therapy instruments. The subject of radiation protection will also be discussed.

PREREQUISITE: BME 581.

BME683 Radiation Therapy Physics Clinical Rotation

3 credits  Fall & Spring Semester

Students will observe clinical activities at a designated radiation therapy center for ten hours per week. Rotation includes observation of daily treatment, simulation; dose planning, physics quality assurance and routine physics support activities (special physics consultation, weekly physics chart check, monitoring radiation safety activities, support of brachytherapy procedures). Students will meet with the course instructor one and a half hours/week to discuss the schedule and the progress of the rotation activities. Students need to submit reports on each radiation therapy category.

PREREQUISITE: BME 681 OR PERMISSION OF INSTRUCTOR.

BME710 Master's Thesis

1-6 credits  Fall & Spring Semester & First & Second Summer Session

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

BME720 Research in Residence

0 credit  Fall & Spring Semester & First & Second Summer Session

Used to establish research in residence for the thesis for the master's degree and after the student has enrolled for the permissible cumulative total in BME 710 (usually six credits). Credit not granted. May be regarded as full time residence.

BME725 Continuous Registration--Master's Study

0 credit  Fall & Spring Semester & First & Second Summer Session

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

BME730 Pre-candidacy Doctoral Dissertation

1-12 credits  Fall & Spring Semester & First & Second Summer Session

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of BME 730 may be taken in a regular semester, nor more than six in a summer session.

BME740 Post-Candidacy Doctoral Dissertation

1-12 credits  Fall & Spring Semester & First & Second Summer Session

Doctoral dissertation credits taken after Ph.D. student have been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in BME 740 may be taken in a regular semester, nor more than six credits in a summer session.

PREREQUISITE: ADMISSION TO CANDIDACY
BME750 Research in Residence

0 credit  Fall & Spring Semester & First & Second Summer Session

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research.

Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

CIVIL, ARCHITECTURAL, & ENVIRONMENTAL ENGINEERING

CAE510 Structural Mechanics

3 credits  Offered By Announcement Only

Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.

PREREQUISITE: CAE 310 AND SENIOR STANDING.

CAE511 Advanced Structural Analysis

3 credits  Fall Semester

General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional and composite members. Basic flexural and stiffness methods and matrix development are also included.

PREREQUISITE: CAE 310.

CAE520 Advanced Design of Concrete Structures

3 credits  Spring Semester

Design of reinforced concrete flat plates, flat slabs, two-way slabs, long columns, and slab-column connections are discussed. Deflections, crack widths, and background of current ACI Building Code are also included.

PREREQUISITE: CAE 320.

CAE521 Advanced Design of Steel Structures

3 credits  Fall Semester

Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.

PREREQUISITE: CAE 321.

CAE522 Design of Prestressed Concrete Structures

3 credits  Offered By Announcement Only

Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included. Prerequisite: CAE 320.

PREREQUISITE: CAE 320.

CAE523 Design of Masonry Structures

3 credits  Offered By Announcement Only

Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included.

PREREQUISITE: CAE 320.
CAE524 Design of Bridge Structures
3 credits
Offered By Announcement Only
Engineering principles of analysis and design of highway bridges. Topics include load types, failure modes, and design philosophies. Computation of design force envelopes via influence lines. Design of slabs, rolled beam, plate girder, reinforced concrete, and prestressed concrete bridges.
PREREQUISITE: CAE 310, 320, 321 OR PERMISSION OF INSTRUCTOR.

CAE525 Timber Structural Systems
3 credits
Offered By Announcement Only
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included.
PREREQUISITE: CAE 310

CAE530 Water Resources Engineering II
3 credits
Fall Semester
Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water are discussed.
PREREQUISITE: CAE 430

CAE531 Surface-Water Hydrology
3 credits
Offered By Announcement Only
Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies.
PREREQUISITE: PREREQUISITE OR COREQUISITE: CAE 430.

CAE532 Ground-Water Hydrology
3 credits
Offered By Announcement Only
PREREQUISITE: CAE 330.

CAE533 Water-Quality Control in Natural Systems
3 credits
Offered By Announcement Only
Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.
PREREQUISITE: CAE 430 (CAE 430 IS A PREREQUISITE OR CO-REQUISITE FOR THIS COURSE)

CAE540 Environmental Chemistry
3 credits
Spring Semester
Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.
PREREQUISITE: CHM 112 OR PERMISSION OF INSTRUCTOR.
CAE541 Environmental Microbiology
3 credits  
Spring Semester
Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE542 Solid and Hazardous Waste Engineering
3 credits  
Fall Semester
Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.
PREREQUISITE: CAE 340.

CAE543 Air Pollution Control Engineering
3 credits  
Spring Semester
Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.
PREREQUISITE: MAE 303 AND CAE330 OR MAE 309 OR PERMISSION OF INSTRUCTOR.

CAE550 Advanced Highway Design
3 credits  
Fall Semester
Functional classification and design volumes; Reviews of traffic, vehicle and roadway characteristics; Design controls, criteria and standards; Vertical alignments; Horizontal alignments; Compound curves; Cross sections; Climbing lanes; Earthwork computation; At-grade intersection; Interchange; Design consistency; GeoPak software implementation; Use of traffic simulation software as a design aid.
PREREQUISITE: CAE 450 OR EQUIVALENT.

CAE560 Sustainable Construction
3 credits  
Offered By Announcement Only
PREREQUISITE: SENIOR STANDING IN ARCHITECTURE OR ENGINEERING AND PERMISSION OF INSTRUCTOR

CAE570 Advanced Foundation Engineering
3 credits  
Spring Semester
PREREQUISITE: CAE 470 OR PERMISSION OF INSTRUCTOR
CAE580 Hospital and Health Care Facility Design  
3 credits  
First Summer Session  
Planning, design, and construction of modern hospital and health care facilities.  
Design criteria for functional services, and required structural and patient safety.  
Design standards. Discussion of construction related topics and problems.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE581 Energy-Efficient Building Design  
3 credits  
Offered By Announcement Only  
Concepts and methods of energy-efficient and environmentally-friendly building  
design. Topics include energy and sustainable design strategies, climate, passive  
and active solar design, passive cooling systems, day lighting, and computer simulation  
of energy flows in buildings. A quantitative understanding of energy fundamentals,  
examples from practice, and design exercises using computer simulation programs  
are emphasized.  
PREREQUISITE: MAE 303 OR PERMISSION OF INSTRUCTOR.

CAE590 Special Topics  
1-3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in  
the printed class schedule, following the title "Special Topics."  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE591 Special Topics  
1-3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in  
the printed class schedule, following the title "Special Topics."  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE592 Special Topics  
1-3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in  
the printed class schedule, following the title "Special Topics."  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE593 Special Topics  
1-3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in  
the printed class schedule, following the title "Special Topics."  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE594 Special Topics  
1-3 credits  
Offered By Announcement Only  
Sub-titles describing the topics to be offered will be shown in parentheses in  
the printed class schedule, following the title "Special Topics."  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE595 Special Problems  
1-4 credits  
Offered By Announcement Only  
Project course introducing methods of research through an individual investigation  
of current problems. Offered by special arrangement only.  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
CAE599 Cooperative Education
1 credit Offered By Announcement Only
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

CAE602 Finite Element Methods
3 credits Offered By Announcement Only
Variational principles and their application to finite element methods. Applications to: plane stress and plane strain, three-dimensional stress analysis, bending of plates, and axi-symmetric shells. Lecture, 3 hours.
PREREQUISITE: 500 LEVEL STRUCTURAL MECHANICS COURSE AND PERMISSION OF INSTRUCTOR.

CAE603 Master's Design Project I
3 credits Fall & Spring Semester & First & Second Summer Session
Comprehensive design project in civil, architectural, or environmental engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE604 Master's Design Project II
3 credits Fall & Spring Semester & First & Second Summer Session
Continuation of CAE 603.
PREREQUISITE: CAE 603.

CAE605 Master's Project
3 credits Fall & Spring Semester & First & Second Summer Session
Project in civil, architectural, and environmental engineering. Course is required for the non-thesis master's student.
PREREQUISITE: PERMISSION OF ADVISORY COMMITTEE.

CAE611 Theory of Elasticity
3 credits Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE612 Structural Reliability
3 credits Offered By Announcement Only
Development of structural safety concepts, design code applications, load process analysis, and interaction of load and resistance variability. Consideration is given to structural system serviceability and safety.
PREREQUISITE: IEN 311 AND PERMISSION OF INSTRUCTOR.

CAE613 Stability of Structures
3 credits Offered By Announcement Only
Elastic and inelastic buckling of columns, frames and plates, lateral buckling of beams, beam-columns, and built-up columns. Energy methods (stability) background of various buckling provisions in the AISC and AISI specifications are discussed. Lecture, 3 hours.
PREREQUISITE: CAE 321, MTH 311.
CAE614 Structural Dynamics
3 credits
Offered By Announcement Only
Dynamic responses of structural elements in both the elastic and inelastic ranges. Lagrange's equations, energy models, numerical and analytical methods, vibrations of continuous systems (beams and plates) are discussed. Assigned readings.
PREREQUISITE: 500 LEVEL STRUCTURAL MECHANICS COURSE AND PERMISSION OF THE INSTRUCTOR.

CAE616 Fracture Mechanics
3 credits
Offered By Announcement Only
Theory of fracture mechanics for linear elastic and nonlinear material behavior, energy release rate, stress intensity factor, and J-integral with practical application to brittle fracture and fatigue. Case studies involving civil infrastructure such as bridges, buildings, pipelines and ships. Metallurgical aspects of fatigue and fracture.
PREREQUISITE: PERMISSION OF INSTRUCTOR

CAE630 Environmental Hydrology
3 credits
Offered By Announcement Only
Principles of ecohydrology, agricultural hydrology, impacts of climate change, fundamentals of remote sensing and geographic information systems for hydrologic applications, statistical applications in hydrology.
PREREQUISITE: CAE 530

CAE631 Wastewater Treatment and System Design
3 credits
Offered By Announcement Only
Characterization of domestic wastewater and flows. Sources of wastewater and health considerations. Unit processes for treatment of wastewater including screening, sedimentation, filtration, flocculation floatation, activated sludge, disinfection, sludge digestion, and sludge disposal.
PREREQUISITE: CAE 440, 540, AND 541 OR PERMISSION OF INSTRUCTOR.

CAE632 Water Treatment and System Design
3 credits
Offered By Announcement Only
Drinking water treatment standards, philosophy of setting standards, public health aspects of organic and inorganic contaminants, basis for design of treatment facilities, design of unit processes for aeration, sedimentation, coagulation, filtration, softening, disinfection, and oxidation are covered. Theory of membrane processes, ion exchange, and water treatment plant residuals are also included.
PREREQUISITE: CAE 440, 540, AND 541 OR PERMISSION OF INSTRUCTOR.

CAE640 Treatment Kinetics and Unit Operations
4 credits
Offered By Announcement Only
A study of unit operations in which students test various water and waste treatment processes in the laboratory. Lecture material focuses on data interpretation and description of rate mechanisms.
PREREQUISITE: CAE 540, 542.

CAE643 Risk Analysis
3 credits
Offered By Announcement Only
PREREQUISITE: PERMISSION OF INSTRUCTOR.
CAE680 Indoor Environmental Modeling
3 credits  Offered By Announcement Only
Prediction of indoor environment using computational fluid dynamics techniques. Advanced topics in thermal comfort and indoor air quality. Basic concepts of turbulence modeling and numerical methods for natural, forced, and mixed convection and jet flow indoors. Simulation of air velocity, temperature, and contaminant concentrations in buildings. Comparison of the simulated results with measured data.
PREREQUISITE: CAE 330 OR PERMISSION OF INSTRUCTOR.

CAE690 Special Problems
1- 3 credits  Offered By Announcement Only
Research and/or design projects. Individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE695 Advanced Topics
1- 3 credits  Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE696 Advanced Topics
1- 3 credits  Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE697 Advanced Topics
1- 3 credits  Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE698 Advanced Topics
1- 3 credits  Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

CAE710 Master's Thesis
1- 6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her Master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

CAE720 Research in Residence
0- 6 credits  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the Master's degree after the student has enrolled for the permissible cumulative total in CAE 710 (usually six credits). Credit not granted. May be regarded as full-time residence.
CAE725 Continuous Registration--Master's Study
0 credit                     Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.

CAE730 Pre-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of CAE 730 may be taken in a regular semester, nor more than six in a summer session.

CAE740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken after Ph.D. student have been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in CAE 740 may be taken in a regular semester, nor more than six credits in a summer session.
PREREQUISITE: ADMISSION TO CANDIDACY

CAE750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

ELECTRICAL & COMPUTER ENGINEERING

EEN500 Engineering Analytical Techniques
3 credits                                                             Offered By Announcement Only
Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.
PREREQUISITE: MTH 311.

EEN502 Engineering Acoustics
3 credits                                                             Fall Semester
Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered.
PREREQUISITE: EEN 336 OR PERMISSION OF INSTRUCTOR

EEN503 Principles of Electro-optics
3 credits                                                             Fall Semester
Principles of optics, optical fibers, electro-optics, and light wave propagation in anisotropic and periodic media, guided waves, and integrated optics are discussed. Electro-optic devices including sources and detectors, optical fiber communication, and optics for medical and biomedical applications are also covered.
PREREQUISITE: PHY 206, 207 AND EEN 301 OR EQUIVALENT.
EEN504 Optics and Fiber Communication
3 credits  
Spring Semester
Introduction to optics and fiber communication, light propagation in free space and waveguides, imaging, wave phenomena and diffraction, interferometer, spectrometer, holography, fiber coupling, and fiber communication are covered. Lecture, 1 1/2 hours; laboratory, 3 hours.
PREREQUISITE: EEN 301 OR PREREQUISITE OR COREQUISITE: BME 545.

EEN507 Active Filter Design
3 credits  
Spring Semester
Active low pass filter design, gain-tuning and passive-tuning, immittance calculations, high-frequency low pass filters, frequency and time domain analysis of low pass, high pass, bandpass, and bandstop filters are discussed. Classical filters and Active filter classification including gain-sensitivity limitations are also included.
PREREQUISITE: EEN 307.

EEN508 Digital Control Systems
3 credits  
Offered By Announcement Only
Basic concepts relevant to the analysis and design of digital computer controlled systems. Sampling, z-transform, discrete transfer functions, discrete-time state space modeling, stability, reachability, and observability are discussed. Analysis and design in time and frequency domains, state feedback and observers, optimal control, estimation, and linear quadratic Gaussian design are also included.
PREREQUISITE: EEN 308.

EEN510 Passive Filter Design
3 credits  
Offered By Announcement Only
Design of RLC passive filters, properties of positive-real functions, and Brune test are discussed. Design of driving-point and transfer immittances of RC, RL, LC, and RLC one-port and two-port networks are also covered as well as the design of Butterworth, Chebyshev, and elliptic ladder filters.
PREREQUISITE: EEN 307.

EEN511 Software Engineering
3 credits  
Spring Semester
Software Development: Specification and analysis, methodologies, management and control. Advanced programming techniques: dynamic programming, fast data retrieval and sorting, enumerators, data structures, and data management. The limits of software engineering, computability and complexity analysis.
PREREQUISITE: EEN 318.

EEN512 Software Engineering and Architecture
3 credits  
Spring Semester
PREREQUISITE: EEN 318.

EEN513 Software Design and Verification
3 credits  
Spring Semester
PREREQUISITE: EEN 318 AND SENIOR STANDING.
EEN514 Computer Architecture
3 credits  Spring Semester & First Summer Session
Computer data and instruction types, survey of existing architectures, and the interaction between hardware and software sub-systems are discussed. Advanced topics in computer architecture.
PREREQUISITE: EEN 414.

EEN516 Analog Integrated Circuits
3 credits  Fall Semester
Analysis and design of analog integrated circuits with emphasis on MOS technology. Design of operational amplifiers, comparators, sample and hold circuits, and voltage references are discussed. Fundamentals of data converters and CAD methods for analog integrated circuits are also covered.
PREREQUISITE: EEN 306.

EEN519 Design of Computing Languages
3 credits  Offered By Announcement Only
Major features of modern programming languages with emphasis on design and software efficiency. Interaction between language design and the design of its compiler are included.
PREREQUISITE: EEN 218.

EEN521 Computer Operating Systems
3 credits  Fall Semester
The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.
PREREQUISITE: EEN 318

EEN532 VLSI Systems
3 credits  Fall Semester
Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, mask making, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered.
PREREQUISITE: EEN 304 AND 305.

EEN533 Random Signals and Noise
3 credits  Fall Semester
Probability models, Bays' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationary and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.
PREREQUISITE: IEN 310 OR EEN 310.

EEN534 Communication Networks
3 credits  Fall Semester
Principles of digital communications, Local Area Networks (LANs), Wide Area Networks (WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed.
PREREQUISITE: EEN 310 OR IEN 310.
EEN536 Digital Signal Processing
3 credits  
Offered By Announcement Only
Fast Fourier transform, design, implementation, realization of digital filters, finite word length effects, decimation, interpolation, multirate signal processing, and Discrete Hilbert transform are covered.
PREREQUISITE: EEN 436.

EEN537 Principles of Artificial Intelligence
3 credits  
Fall Semester
Search techniques, game trees, exhaustive vs. cutoff search, natural language processing, augmented transition networks, knowledge representation, cognitive aspects, semantic networks, problem-solving, expert systems, and AI machines are covered.
PREREQUISITE: EEN 218.

EEN538 Introduction to Digital Image Processing
3 credits  
Fall Semester

EEN539 Digital Communications
3 credits  
Offered By Announcement Only
Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.
PREREQUISITE: EEN 404

EEN540 Digital Speech and Audio Processing
3 credits  
Spring Semester
Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.
PREREQUISITE: EEN 436 OR CONSENT OF INSTRUCTOR.

EEN542 Digital Integrated Circuits
3 credits  
Spring Semester
Design and operation of state-of-the art digital integrated circuits. Circuit simulation methods using CAD programs, various TTL, CMOS, ECL, and I2L families are discussed.
PREREQUISITE: EEN 304, 306.

EEN543 BioNanotechnology
3 credits  
Spring Semester
PREREQUISITE: MTH 210 OR PERMISSION OF INSTRUCTOR

EEN546 Reliable Digital System Design
3 credits  
Offered By Announcement Only
Topics include descriptive technique for digital systems, synchronizer failure and metastability estimation, design for testability, and estimating digital system reliability. Computer-Aided Engineering (CAE) tools are also covered. Not open to students with credit in EEN 454. Offered only for Graduate students.
PREREQUISITE: EEN 316.
EEN548 Machine Learning

3 credits

Offered By Announcement Only

Fundamentals of intelligent system design and strategies of learning capability simulation. Selected case studies of learning systems for engineering applications are included.

PREREQUISITE: EEN 218 AND MTH 309 OR PERMISSION OF INSTRUCTOR.

EEN552 Power Electronics

3 credits

Fall Semester

Analysis and design of solid-state power electronic circuits including DC/DC, AC/DC and DC/AC converters, controller design, power electronics applications, and associated laboratory experiments.

PREREQUISITE: EEN 306, EEN 311

EEN553 Neural Networks

3 credits

Offered By Announcement Only

Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.

PREREQUISITE: IEN 310 OR EEN 310.

EEN555 Microwave Transistor Amplifier Design

3 credits

Fall Semester

Analysis and design of transistor amplifiers and oscillators at microwave frequencies. Scattering parameter methods, stability considerations, matching networks, and narrowband and broadband techniques are discussed. Computer aided design methods for microwave transistor amplifiers are also included.

PREREQUISITE: EEN 306.

EEN562 Wireless and Cellular Communication

3 credits

Fall Semester

Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beam forming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.

PREREQUISITE: EEN 404.

EEN563 Wireless Communication Lab

1 credit

Offered By Announcement Only

Computer simulation of path loss, shadowing and fading in wireless channels, performance of various digital modulation methods in both Gaussian and wireless channels, diversity methods, equalization methods including zero-forcing, minimum mean-square error (MMSE) and decision-feedback equalization (DFE), co-channel interfacing in cellular systems, space-time coding. Orthogonal Frequency Division Multiplexing (OFDM) systems, spreading codes for Code Division Multiple Access (CDMA) systems, and matched-filter receiver and multiuser detector for CDMA systems. Measurement of wireless signals in various environments.

PREREQUISITE: PREREQUISITE OR COREQUISITE: EEN 562.
EEN564 Wireless Networks  
3 credits  
Spring Semester  
Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.  
PREREQUISITE: EEN 534 OR 575 OR PERMISSION OF THE INSTRUCTOR

EEN565 Introduction to Information Theory and Coding  
3 credits  
Offered By Announcement Only  
Entropy, conditional entropy, mutual information, source coding, Huffman code arithmetic code, channels and channel capacity, error detection, error correction, and Hamming codes are discussed. An introduction to linear block codes and cyclic codes is included.  
PREREQUISITE: IEN 310 OR EEN 310.

EEN567 Database Design and Management  
3 credits  
Spring Semester  
Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.  
PREREQUISITE: EEN 218

EEN568 Internet Computing II  
3 credits  
Fall Semester  
Java programming for client/server networking, multi-threading, database connectivity, and servlets. Principles and practices used for accessing back-end databases through web applications. Use of eXtensible Markup Language (XML) for processing.  
PREREQUISITE: EEN 368

EEN570 Network Client-Server Programming  
3 credits  
Spring Semester  
Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.  
PREREQUISITE: EEN 218 OR EQUIVALENT

EEN571 Interactive Multimedia Computing  
3 credits  
Spring Semester  
Multimedia fundamentals including hardware, software, standards, concepts and issues, compression, decompression, user interface design, query by content and multimedia indexing are discussed.  
PREREQUISITE: EEN 318

EEN572 Object-Oriented and Distributed Database Management Systems  
3 credits  
Offered By Announcement Only  
PREREQUISITE: EEN 567 OR EQUIVALENT.
EEN573 Network Computing  
3 credits  
Spring Semester  
PREREQUISITE: EEN 368 AND 567.

EEN574 Agent Technology  
3 credits  
Offered By Announcement Only  
Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agents, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.  
PREREQUISITE: EEN 537 OR EQUIVALENT.

EEN575 Data Network Design and Management  
3 credits  
Spring Semester  
Networking fundamentals and current technologies. Data network planning, analysis, design, and management techniques. Different network technologies are addressed and contrasted in terms of topology, performance, and scope of real applications. Network management systems are investigated including fault, configuration, security, and performance management. Network management information bases, protocols, and hands-on experience with network equipment and network management systems are also included.  
PREREQUISITE: EEN 310 OR IEN 310.

EEN576 Internet and Intranet Security  
3 credits  
Fall Semester  
Security issues and applications for securing internet and intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.  
PREREQUISITE: EEN 368.

EEN577 Data Mining  
3 credits  
Offered By Announcement Only  
Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.  
PREREQUISITE: EEN 567 OR EQUIVALENT.

EEN578 E-Commerce Technology  
3 credits  
Offered By Announcement Only  
Tools and techniques providing the foundation for the design, implementation, and deployment of e-commerce systems. Search engines, information retrieval for e-commerce, e-commerce interfacing design, and e-commerce systems case studies are also included.  
PREREQUISITE: EEN 368
EEN579 Mobile Computing
3 credits  Offered By Announcement Only
Mobile computing and proxy architectures, mobile web protocols, mobile user interfaces, applications, systems-ware adaptations, mobile databases, transactions, data synchronization, privacy, authentication, and security are covered.
PREREQUISITE: EEN 368.

EEN580 Electrical and Computer Engineering Internship
1-3 credits  Fall & Spring Semester
Analysis, design, and research experience obtained at an operating and recognized industry. Approved project jointly supervised and assessed by departmental faculty and industrial partner.
PREREQUISITE: PERMISSION OF ADVISOR.

EEN581 Special Problems
1-3 credits  Fall Semester
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN582 Special Problems
1-3 credits  Spring Semester
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN583 Special Problems
1-3 credits  First Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN584 Special Problems
1-3 credits  Second Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN585 Special Problems
1-3 credits  Offered By Announcement Only
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

EEN586 Multimedia Networking
3 credits  Fall Semester
PREREQUISITE: EEN 534 OR 575.
EEN587 Multimedia Databases
1-3 credits Fall Semester
Introduction to the fundamental concepts and techniques pertinent to multimedia databases. Introduction to a variety of techniques and emerging innovative solutions to represent, store, index, retrieve, integrate, and manipulate data in various media type(s) to construct multimedia databases.
PREREQUISITE: EEN 567 OR PERMISSION OF INSTRUCTOR. PREREQUISITE OR COREQUISITE: EEN 571.

EEN590 Special Topics in Information Technology
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Information Technology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN591 Special Topics in Information Technology
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Information Technology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN592 Special Topics in Audio Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Audio Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN593 Special Topics in Audio Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Audio Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN594 Special Topics in Computer Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Computer Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR - 1 COUPON

EEN595 Special Topics in Computer Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Computer Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN596 Special Topics in Computer Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Computer Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN597 Special Topics in Electrical Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Electrical Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN598 Special Topics in Electrical Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Electrical Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
Graduate Course Listing

COLLEGE OF ENGINEERING
ELECTRICAL & COMPUTER ENGINEERING

EEN599 Special Topics in Electrical Engineering
1-3 credits Offered By Announcement Only
Lecture courses in selected areas of specialization within Electrical Engineering.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN615 M. S. Design Project I
3 credits Fall & Spring Semester
Comprehensive M.S. design project in electrical or computer engineering. Open only to students in the BS/MS dual-degree program.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN616 M.S. Design Project II
3 credits Fall & Spring Semester
Continuation of EEN 615. Open only to students in the BS/MS dual-degree program.
PREREQUISITE: EEN 615.

EEN634 Modeling and Analysis of Computer Networks
3 credits Offered By Announcement Only
Elements of queuing theory, performance analysis of protocols, flow and congestion control, random access schemes, routing algorithms, and integrated services digital networks (ISDN) are discussed.
PREREQUISITE: EEN 534.

EEN635 Advanced Electronics
3 credits Offered By Announcement Only
Current topics in electronic design including filter design using striplines and microstrip structures, switching, mixing, and modulation using microwaves transistors. Advanced computer aided design methods are also included.
PREREQUISITE: EEN 555.

EEN638 Computer Vision
3 credits Spring Semester
Principles of computer vision. Segmentation, shape and texture analysis, 3D scene analysis, polyhedral scenes, time-varying image analysis, parallel processing algorithms, matching, and recognition are covered.
PREREQUISITE: EEN 538 OR PERMISSION OF INSTRUCTOR

EEN653 Pattern Recognition and Neural Networks
3 credits Offered By Announcement Only
Statistical pattern classification, feature extraction, cluster analysis, neural net models, Hopfield net, competitive learning, multi-layer perceptron, and the Boltzmann machine are discussed.
PREREQUISITE: EEN 538 OR PERMISSION OF INSTRUCTOR.

EEN656 Information Theory
3 credits Offered By Announcement Only
Measure of uncertainty and entropy, two dimensional sources, noisy channels, mutual and transinformation, equivocation, efficiency and channel capacity, minimum redundancy coding, error-detecting, error-correcting codes, continuous channel without memory. Gaussian additive noise, sampling theorem, and vector space are covered.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
EEN671 Advanced Interactive Multimedia Information Systems
3 credits  Fall Semester
Multimedia data models, advanced content-based retrieval, indexing, architecture
design, management of networked multimedia systems, simultaneous access, and display
of audio, video, and graphics information in centralized and distributed environments
are covered.
PREREQUISITE: EEN 571.

EEN681 Advanced Problems
1- 3 credits  Fall Semester
Research and/or design projects through an individual investigation of current
problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN682 Advanced Problems
1- 3 credits  Spring Semester
Research and/or design projects through an individual investigation of current
problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN683 Advanced Problems
1- 3 credits  First Summer Session
Research and/or design projects through an individual investigation of current
problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN684 Advanced Problems
1- 3 credits  Second Summer Session
Research and/or design projects through an individual investigation of current
problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN685 ADVANCED PROBLEMS.
1- 3 credits  Offered By Announcement Only
Research and/or design projects through an individual investigation of current
problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN694 Advanced Topics in Computer Engineering
1- 3 credits  Offered By Announcement Only
Subject matter offerings in computer engineering based upon student demand and
availability of faculty. Subtitles describing the topics to be offered will be
shown in parentheses in the printed class schedule, following the title "Advanced
Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN695 Advanced Topics in Computer Engineering
1- 3 credits  Offered By Announcement Only
Subject matter offerings in computer engineering based upon student demand and
availability of faculty. Subtitles describing the topics to be offered will be
shown in parentheses in the printed class schedule, following the title "Advanced
Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.
EEN696 Advanced Topics in Computer Engineering
1-3 credits   Offered By Announcement Only
Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN697 Advanced Topics in Electrical Engineering
1-3 credits   Offered By Announcement Only
Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN698 Advanced Topics in Electrical Engineering
1-3 credits   Offered By Announcement Only
Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN699 Advanced Topics
1-3 credits   Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

EEN710 Master's Thesis
1-6 credits   Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

EEN720 Research in Residence
0 credit   Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in EEN 710 (usually six credits). Credit not granted. May be regarded as full time residence.

EEN725 Continuous Registration--Master's Study
0 credit   Fall & Spring Semester
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

EEN730 Pre-Candidacy Doctoral Dissertation
1-12 credits   Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of EEN 730 may be taken in a regular semester, nor more than six in a summer session.
EEN740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in EEN 740 may be taken in a regular semester, nor more than six credits in a summer session.
PREREQUISITE: ADMISSION TO CANDIDACY

EEN750 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

INDUSTRIAL ENGINEERING
IEN501 Manufacturing Analysis and Design I
3 credits  Offered By Announcement Only
Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN502 Manufacturing Analysis and Design II
3 credits  Offered By Announcement Only
Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN505 Robotics
3 credits  Fall Semester
Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies. Building your own robot is an integral part of hands-on laboratory exercises. Matlab control toolbox and image analysis toolbox will be extensively used for design and analysis.
PREREQUISITE: IEN 406.

IEN507 Design of Manufacturing Systems
3 credits  Spring Semester
State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems.
PREREQUISITE: IEN 465 OR PERMISSION OF INSTRUCTOR.

IEN509 Automated Assembly
3 credits  Fall Semester
Fundamentals of automated assembly including parts transfer systems and feeders, parts orientation and grasping techniques, product design for automated assembly (DFA), assembly robots, and performance and economics of assembly systems.
PREREQUISITE: IEN 406 OR PERMISSION OF INSTRUCTOR.
IEN512 Statistical Quality Control and Quality Management
3 credits  Spring Semester
This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advance topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.
PREREQUISITE: IEN 311 (MAS 311) OR IEN 312 (MAS 312).

IEN513 Quality Management in Service Organizations
3 credits  Fall Semester
Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN524 Decision Support Systems in Industrial Engineering
3 credits  Spring Semester
Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN547 Computer Simulation Systems
3 credits  Spring Semester
Computer simulation and the development of simulation models. Application of discrete and continuous system simulation languages to systems studies is also included.
PREREQUISITE: IEN 442 (MAS 442) OR PERMISSION OF INSTRUCTOR.

IEN551 Accident Prevention Systems
3 credits  Spring Semester
Introduction to the basic principles of accident prevention and how to apply the safety engineering approach to the design of industrial accident prevention systems.
PREREQUISITE: IEN 351 OR PERMISSION OF INSTRUCTOR.

IEN557 Ergonomics and Human Factors Engineering
3 credits  Fall Semester
The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.
PREREQUISITE: IEN 312 (MAS 312) OR PERMISSION OF INSTRUCTOR.

IEN558 Industrial Hygiene I
3 credits  Fall Semester
Recognition of occupational chemical health hazards. Evaluation methods and analytical procedures used to determine level of exposure to chemical and toxic hazards. Control measures and compliance with OSHA requirements with special emphasis on industrial ventilation, and other methods of control are included.
PREREQUISITE: ((CHM 111 OR CHM 151) AND SENIOR STANDING) OR PERMISSION OF INSTRUCTOR.
IEN559 Industrial Hygiene II
3 credits  
Spring Semester  
Recognition of physical occupational health hazards and evaluation methods and instruments used in measuring exposure levels with special emphasis on physical hazards. Protective measures and compliance with OHSA requirements is also included. Lecture, 3 hours. 
PREREQUISITE: ((CHM 111 OR 151) AND SENIOR STANDING) OR PERMISSION OF INSTRUCTOR.

IEN565 Design of Integrated Manufacturing Systems
3 credits  
Offered By Announcement Only  
The design of integrated manufacturing systems including concepts of production planning and control, forecasting techniques, inventory systems, production planning and scheduling methods, material requirement planning, plant layout and facility location, design principles of material handling, new trends in batch, and discrete-parts are discussed. 
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN568 Materials Handling and Facilities Planning
3 credits  
Spring Semester  
Analysis and design of production and service facilities, emphasis on material handling requirements. Capacity requirements, facility location, layout, storage systems and warehousing are discussed. 
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN570 Engineering Management
3 credits  
Spring Semester  
Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed. 
PREREQUISITE: IEN 311 (MAS 311) OR IEN 312 (MAS 312) OR PERMISSION OF INSTRUCTOR.

IEN571 Engineering Entrepreneurship
3 credits  
Fall Semester  
The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment. 
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN572 Management of Technological Innovation
3 credits  
Fall Semester & Second Summer Session  
Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological, planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing. 
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

IEN590 Special Topics in Industrial Engineering
1- 3 credits  
Offered By Announcement Only  
Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics". 
PREREQUISITE: PERMISSION OF INSTRUCTOR.
IEN591 Dean's Seminar: Entrepreneurship
1 credit Offered By Announcement Only
Weekly seminar given by guest speakers on topics including process of management, marketing, planning, R & D, financing, taxation, governmental regulations, and international commerce.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN594 Master's Capstone Design Project
0-3 credits Fall Semester
A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.
PREREQUISITE: METHODS ANALYSIS, APPLIED PROBABILITY AND STATISTICS AND SENIOR STANDING.

IEN595 Special Problems
1-3 credits Offered By Announcement Only
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

IEN596 Special Problems
1-3 credits Offered By Announcement Only
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

IEN599 Cooperative Education
1 credit Offered By Announcement Only
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

IEN601 Advanced Industrial Engineering Concepts
3 credits Fall Semester
The application of advanced concepts of Industrial Engineering to modern systems with an emphasis on the solution of real world problems.
PREREQUISITE: IEN 301 OR PERMISSION OF INSTRUCTOR.

IEN607 New Product Development and Introduction
3 credits Fall Semester
Dynamics of converting ideas into marketable products, selecting products, and defining their specifications to achieve competitive advantage. Product development steps are examined critically in the context of real case studies. Topics include the process of fostering a creative environment for new products and processes, planning for innovation, process of product patenting, organizing the technical effort, integration of functions, risk assessment and evaluation, and management techniques for improving manufacturing operations.
PREREQUISITE: GRADUATE STANDING.
IEN612 Design of Experiments
3 credits
Design and analysis of experiments, randomized blocks, Latin Squares, factorials, multiple correlation and regression, and application to response surfaces are discussed. 3 hours.
PREREQUISITE: IEN 311 OR MAS 311 OR EQUIVALENT.

IEN613 Quality Through Planned Experimentation
3 credits
Sequential experimentation and guidance on how to build the sequence and use graphical methods to ascertain how much the planned change contribute to the variation in the data. Experimentation is presented as a system in the context of a model to improve quality, and integrate statistical process control (SPC) with methods of design. Examples presented contain problems often encountered in actual experimentation in a manufacturing or a service facility. Not open to students with credit in IEN 612.
PREREQUISITE: IEN 311 OR PERMISSION OF INSTRUCTOR.

IEN614 Advanced Quality Control
3 credits
PREREQUISITE: IEN 512.

IEN617 Quality Through Design
3 credits
The integrated processes and teamwork essential to success with products are presented. All activities of product development are covered. Topics include concept of a new region, concurrent engineering, competitive benchmarking, and house of quality, robust design, and production preparation. Special emphasis is placed on the integration of quality function deployment and Taguchi's quality engineering into total development.
PREREQUISITE: IEN 612 or MAS 603.

IEN641 Applied Operations Research
3 credits
Inventory theory, queuing theory, optimization models, and linear and dynamic programming for deterministic and probabilistic cases. Emphasis is placed on applications.
PREREQUISITE: IEN 441 OR PERMISSION OF INSTRUCTOR.

IEN642 Linear Programming and Extensions
3 credits
Formulation, solution, post optimality analysis of linear programming problems; revised simplex, parametric programming, decomposition of large-scale systems. Use of computer packages. Introduction to integer programming, network flows, and nonlinear programming applications.
PREREQUISITE: LINEAR ALGEBRA OR EQUIVALENT.

IEN643 Integer Programming and Network Flows
3 credits
Computationally effective approaches to integer optimization, cutting planes, implicit enumeration, network flows, single commodity, and multi-commodity flows are covered.
PREREQUISITE: MAS 647/ IEN642.
IEN644 Nonlinear and Dynamic Programming

3 credits  
Offered By Announcement Only
Solution of nonlinear optimization problems by classical procedures and search algorithms. Recursive optimization using computationally effective techniques is also included.
PREREQUISITE: MTH 112 OR EQUIVALENT.

IEN645 Stochastic Processes

3 credits  
Fall Semester
Introduction to discrete state Markov processes and renewal processes with applications to queuing, replacement, and reliability problems.
PREREQUISITE: MAS 311, IEN 311, MTH 524 OR EQUIVALENT.

IEN646 Queuing Models

3 credits  
Offered By Announcement Only
Formulation, solution, and application of models useful in the analysis of waiting lines.
PREREQUISITE: MAS 311, IEN 311, OR MTH 524 OR EQUIVALENT.

IEN651 System Safety Engineering

3 credits  
Fall Semester
Understanding system safety, evaluating a system for its state of safety over its life cycle, determining if that state is acceptable, and evaluating counter-measures for their effectiveness in bringing the system to an acceptable state are discussed. Presenting quantitative methods that may be used in safety data analysis is also included.
PREREQUISITE: IEN 311 AND 351.

IEN655 Human Factors in Management of Technology

3 credits  
Offered By Announcement Only
Implications of the influx of computer and automation technologies into work settings for behavior within organizations. Human factors issues associated with the implementation of technology including hardware and software design, job design, and workplace design. Organizational issues such as decision-making, communication, and human centered design of products.

IEN656 Human Information Processing and System Design

3 credits  
Spring Semester
Understanding the capabilities of humans as information processors in relation to system design, including job and equipment (hardware and software) design. Course topics include attentional capacity, vigilance, mental workload, verbal and non-verbal perception, speech recognition, decision making, skilled performance, human reliability, and process control.
PREREQUISITE: IEN 557.

IEN657 Ergonomics and Occupational Biomechanics

3 credits  
Spring Semester
Effects of human factors in the improvement of performance of systems. Human capacities, capabilities, and limitations as derived from anatomical, physiological, and psychological principles are applied to the design of tools and equipment. Incorporation of all factors into systems design to achieve better system performance is emphasized.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
IEN658 Ergonomics and Special Populations
3 credits
Spring Semester
Ergonomic issues relevant to design for older adults and special populations such as the handicapped. Primary emphasis is placed on work environments, transportation and communication systems, and home environments. Topics include cognitive and physiological characteristics of special populations, workplace design, job and equipment design, rehabilitation engineering, clinical ergonomics, and legislation such as the ADA. Lecture, 3 hours.
PREREQUISITE: IEN 557.

IEN659 Work Physiology
3 credits
Offered By Announcement Only
Physiological responses to occupational work including aspects of endurance, fatigue, recovery, and the energy cost of work. Application of work physiology to job design and personnel assignment is included.
PREREQUISITE: IEN 557 OR PERMISSION OF INSTRUCTOR.

IEN660 Productivity Measurement and Evaluation
3 credits
Fall Semester
Basic concepts. Productivity measurement approaches at international, national, industry, and company levels. Latest measurement models for manufacturing companies. Relationships between total and partial productivities, profit and total productivity. Productivity evaluation: theory and methodology.
PREREQUISITE: IEN 360 OR PERMISSION.

IEN661 Engineering Cost Management
3 credits
Fall Semester
Issues of cost management, including activity based costing of engineering projects. A detailed study of how to separate, identify, understand and manage the major activities performed, and how these activities relate to customer needs. Overall view of costs associated with products, processes, and customers.
PREREQUISITE: Graduate standing.

IEN662 Productivity Planning and Improvement
3 credits
Fall Semester
Planning and improvement as part of the productivity cycle. Concepts and tools. Productivity planning and improvement in manufacturing and non-manufacturing companies: technology, materials, employee, product, and task based techniques. The PIP package.
PREREQUISITE: IEN 360 OR PERMISSION.

IEN663 Project Management Techniques
3 credits
Fall Semester
Techniques and Tools in Project Management. Use of network flow techniques including PERT/CPM, planning, systems concepts, time management, conflicts, cost and resource control, tradeoff analysis.
PREREQUISITE: IEN 311 OR EQUIVALENT.
IEN664 Supply Chain Management
3 credits
Offered By Announcement Only
Supply Chain Management focuses on the flow of products, information, and money throughout the supply chain. An overview of issues, opportunities, tools, and approaches is provided. Emphasis is placed on business processes, system dynamics, control, design and re-engineering, and on the relationship between the supply chain and the company's strategic position relative to its clients and its competition. The dimensions of inter-corporate relationships with partners, including decision-making, incentives, and risk are also covered.
PREREQUISITE: IEN 465 OR PERMISSION OF INSTRUCTOR.

IEN665 Advanced Production Systems
3 credits
Spring Semester
PREREQUISITE: IEN 465 OR PERMISSION OF INSTRUCTOR.

IEN672 Strategic Management of Technological Innovation.
3 credits
Fall & Spring Semester
Advanced topics in the management of technology emphasizing the relationship between technology and competitiveness in the global marketplace. Technology development in the U.S., Japan, and Europe, industrial R & D, strategic technological planning, and conditions for successful implementations. Case studies are used with individual and group assignments. Prerequisite: IEN 572 - Management of Technology or permission of Instructor.
PREREQUISITE: IEN 572 OR PERMISSION OF INSTRUCTOR.

IEN691 Industrial Engineering Seminar
0 credit
Spring Semester
Oral presentation and discussion of current topics in Industrial Engineering.

IEN692 Industrial Engineering Seminar II
0 credit
Spring Semester
Oral presentation and discussion of current topics of Industrial Engineering.

IEN694 Master's Project
3 credits
Fall & Spring Semester
A capstone project for M.S. students in the non-thesis option.

IEN695 Special Problems
1-3 credits
Offered By Announcement Only
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN696 Special Problems
1-3 credits
Offered By Announcement Only
Research and/or design projects through an individual investigation. of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
IEN699 Advanced Topics
1-3 credits   Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty.
Subtitles describing the topics to be offered will be shown in parentheses in
the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

IEN710 Master's Thesis
1-6 credits   Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments
not to exceed six, as determined by his/her advisor. Credit is not awarded until
the thesis has been accepted.

IEN720 Research in Residence
0 credit   Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree
after the student has enrolled for the permissible cumulative total in IEN 710
(usually six credits). Credit not granted. May be regarded as full time residence.

IEN725 Continuous Registration--Master's Study
0 credit   Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master's students who are preparing for major
examinations. Credit not granted. Regarded as full time residence.

IEN730 Pre-Candidacy Doctoral Dissertation
1-12 credits   Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student
will enroll for credit as determined by his/her advisor. Not more than 12 hours
of IEN 730 may be taken in a regular semester, nor more than six in a summer session.

IEN740 Post-Candidacy Doctoral Dissertation
1-12 credits   Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken after Ph.D. student have been admitted to candidacy.
The student will enroll for credit as determined by his/her advisor. Not more than
12 credits in IEN 740 may be taken in a regular semester, nor more than six credits
in a summer session.
PREREQUISITE: ADMISSION TO CANDIDACY

IEN750 Research in Residence
0 credit   Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.A., after the student
has been enrolled for the permissible cumulative total in appropriate doctoral
research. Credit not granted. May be regarded as full-time residence as determined
by the Dean of the Graduate School.

MECHANICAL & AEROSPACE ENGINEERING
MAE501 Methods of Engineering Analysis
3 credits   Fall Semester
Analysis of engineering systems in equilibrium and motion. Examples considered
from mechanical, electrical, thermal and fluids engineering. Mathematical theory
and computer methods for obtaining numerical solutions are developed for various
cases involving discrete and continuous systems. Lecture, 3 hours.
PREREQUISITE: MAE 412, MTH 311 OR PERMISSION OF THE INSTRUCTOR.
MAE502 Vibrations
3 credits  Fall Semester
Basic theory of free and forced vibrations of mechanical systems with and without
damping. Applications to systems with one and several degrees of freedom are included.
PREREQUISITE: MAE 202, 207, 412 OR PERMISSION OF INSTRUCTOR.

MAE503 Internal Combustion Engines
3 credits  Fall Semester
Course discusses engine types, characteristics, and operation. Topics include performance
factors, fuel combustion, power cycles, knock and engine variables, exhaust emissions,
fuel metering, compressors, and turbines.
PREREQUISITE: MAE 303, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR.

MAE505 Design for Manufacturability
3 credits  Offered By Announcement Only
Manufacturing concerns at design stage. Design theory and methodology. Statistical
considerations in geometric dimensioning, tolerances, reliability-based design,
and quality control. Production, design for assembly, and value engineering.
Life cycle costs and optimum design using nonlinear programming and Taguchi approaches.
Hands on projects on machine tools.
PREREQUISITE: MAE 341 AND 342 OR CONSENT OF INSTRUCTOR.

MAE506 Nuclear Engineering
3 credits  Offered By Announcement Only
Course topics include a review of neutron physics, chain reactions, reactor theory,
steady state operation, and reactor kinetics. Control, long term reactivity changes,
materials, heat transfer, and shielding are also included. Lecture, 3 hours.
PREREQUISITE: SENIOR STANDING IN MECHANICAL AND AEROSPACE ENGINEERING OR PERMISSION
OF INSTRUCTOR.

MAE507 Advanced Mechanics of Solids
3 credits  Spring Semester
Courses discusses the basic elements of elasticity, plasticity, and viscoelasticity.
Application to mechanical systems at rest and in motion are included.
PREREQUISITE: MAE 202, 207, SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

MAE508 Intermediate Heat Transfer
3 credits  Spring Semester
Course discusses steady and unsteady heat transfer by conduction, convective heat
transfer in laminar and turbulent fluid flow, natural convection, and heat transfer
by radiation.
PREREQUISITE: MAE 310.

MAE509 Hydrogen Energy
3 credits  Fall Semester
Evaluation of new energy sources, need for an intermediary system, hydrogen energy
system, hydrogen as energy carrier, hydrogen production methods, hydrogen storage
and distribution, utilization of hydrogen by residential, commercial, transportation,
and industrial sectors are discussed as well as environmental, safety, and economical
considerations.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.
MAE510 Fundamentals of Solar Energy Utilization
3 credits  Spring Semester
Fundamentals basic to the design and performance analysis of thermal systems for the capture and utilization of Solar Energy.
PREREQUISITE: MAE 303, MTH 211 AND PHY 207.

MAE511 Engineering Fracture Mechanics
3 credits  Offered By Announcement Only
Course addresses the consequence of fracture including some illustrative applications of fracture mechanics, Griffith’s fracture theory, review of relevant results from solid mechanics, the three basic modes of fracture, stress intensity factor, introduction to elasto-plastic and dynamic fracture, fatigue crack propagation, fracture and non-destructive evaluation procedures.
PREREQUISITE: MAE 207, SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

MAE512 Intermediate Fluid Mechanics
3 credits  Fall Semester
Course topics include conservation of mass, momentum, and energy, potential flow, viscous laminar and turbulent flows, the Reynolds analogy, and Boundary-layer approximations. Gas dynamics are also discussed.
PREREQUISITE: MAE 309.

MAE513 Kinematics for Robotics
3 credits  Offered By Announcement Only
Geometry of unconstrained plane motion with applications to linkage design. Topics include type and number synthesis, introduction to 3-D mechanism with applications to robotics, graphical, analytical, and computer techniques, including the use of analysis software.
PREREQUISITE: MAE 202, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR.

MAE514 Advanced Internal Combustion Engines Experimental Studies
3 credits  Spring Semester
Experimental mechanical engineering as it pertains to internal combustion engines. The principal measurements necessary to analyze the operation of an internal combustion engine are covered. Emphasis is placed on experiment planning, data interpretation, and error analysis.
PREREQUISITE: MAE 503 OR PERMISSION OF INSTRUCTOR.

MAE516 Introduction to Composite Materials
3 credits  Offered By Announcement Only
Course provides an introduction to composite materials and terminology. Topics include advantages offered by composite materials, current aerospace, automotive, and bio-mechanics applications, experimental results, analytical models, and effects of impact and fatigue loads. The environment’s impact on composite materials’ performance and design procedures are discussed. Case studies examining composite materials as efficient replacements are also included.
PREREQUISITE: MAE 207, SENIOR STANDING, OR PERMISSION OF INSTRUCTOR.

MAE517 CAD Applications Using Interactive Computer Graphics
3 credits  Offered By Announcement Only
Computer methods and graphics in the engineering design process. Introduction to available engineering analysis codes, principles of computer graphics, and interactive graphical methods in problem solving. Mathematics for 2-D and 3-D graphical manipulation. Programming project work is required.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.
MAE518 Chemical and Process Engineering A
3 credits
Offered By Announcement Only
Course analyzes single and multi-stage concentration processes in the liquid-solid systems such as crystallization and drying. Processes apart from equilibrium, controlled diffusion, mathematical treatment, and equipment design are also discussed.
PREREQUISITE: MAE 310, 311. COREQUISITE: MAE 508.

MAE519 Chemical and Process Engineering B
3 credits
Offered By Announcement Only
Stagewise equilibrium separation processes in liquid-liquid systems such as distillation, rectification, absorption, and extraction. Application of phase equilibria and balance equations, mathematical treatment, and equipment design.
PREREQUISITE: MAE 310, 311, 308.

MAE520 Air Pollution
3 credits
Spring Semester
Course topics include fundamentals of air pollution, air quality, properties of air pollutants, effect of pollutants on the environment, analysis and modeling, diffusion of pollutants, and air pollution control.
PREREQUISITE: MAE 303, 309/CAE 330 OR PERMISSION OF INSTRUCTOR.

MAE521 Exhaust Emission Control
3 credits
Spring Semester
Course topics include automotive emissions, air pollution, combustion of homogeneous mixtures, emission control systems, Federal emission standards, and emission instrumentation and measurement. Lecture, 2 hours; Laboratory, 3 hours.
PREREQUISITE: SENIOR ENGINEERING STANDING OR PERMISSION OF INSTRUCTOR.

MAE528 Fuel Cells
3 credits
Spring Semester
Introduction to fuel cells, thermodynamics of fuel cells, electrochemical kinetics in fuel cells, transport phenomena in fuel cells, introduction to various types of fuel cells.
PREREQUISITE: CHM 151 AND MAE 303

MAE538 Computer-Aided Air Conditioning Design and Energy Management
3 credits
Offered By Announcement Only
Course topics include equipment and components, air conditioning system, all-air systems, air-and-water systems, all water systems, heat recovery systems, cogeneration systems, heat pump systems, central heating and cooling, energy management, and computer applications.
PREREQUISITE: MAE 405 OR 408 OR PERMISSION OF INSTRUCTOR.

MAE539 Heating, Ventilating and Air Conditioning System Design
3 credits
Fall Semester
Course topics include basic HVAC systems, multizone systems, dual-duct systems, terminal reheat systems, variable air volume systems, induction and induction reheat systems, special applications, hydronic systems, unitary and heat pump systems, hydronic heat recovery systems, cooling and heating load calculation duct and piping design, overall system design, and integration.
PREREQUISITE: MAE 405 OR 408 OR PERMISSION OF INSTRUCTOR.
MAE540 Energy Conversion
3 credits
Spring Semester
Course topics include energy conversion, utilization, present and projected consumption of energy, thermodynamic principles, nuclear energy, fission and fusion reactions, hydroelectric power, and solar energy. Alternative energy sources, the hydrogen economy, and the energy-environment-economy system are also discussed.
PREREQUISITE: SENIOR STANDING IN MECHANICAL AND AEROSPACE ENGINEERING OR PERMISSION OF INSTRUCTOR.

MAE541 Two-Phase Flow Fundamentals and Design
3 credits
Offered By Announcement Only
Course topics include two-phase flow fundamentals for thermal design, heat transfer, and pressure drop analysis of two-phase flows in tube and around tube bundles, heat transfer design correlations in boiling, evaporation, and condensation. Classifications of heat vapor generation and vapor condensation, heat exchangers for air-conditioning and refrigeration, enhancement of boiling, condensation, evaporation heat transfer, and fouling of heat exchangers are also discussed. Design examples are included.
PREREQUISITE: MAE 303 AND 310 OR PERMISSION OF INSTRUCTOR.

MAE550 Product Safety Engineering
3 credits
Offered By Announcement Only
Product safety for the designer and the design review process. Topics include hazard analysis of products including use of regulatory and voluntary standards and analytical tools such as fault tree analysis. Constraints imposed by product liability law, design techniques, and process requirements to minimize hazards are also discussed.
PREREQUISITE: SENIOR STANDING IN ENGINEERING OR PERMISSION OF INSTRUCTOR.

MAE551 Special Problems
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAE552 Special Problems
1-3 credits
Fall & Spring Semester & First & Second Summer Session
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAE570 Aero Propulsion
3 credits
Fall Semester
Definition of the atmosphere, propulsion basics, rocket fundamentals, turbine fundamentals, gas turbine cycles, component matching, math and computer models, aircraft missions, cycle section, reliability, and durability are analyzed.
PREREQUISITE: MAE 303, 309.

MAE571 Introduction to Aerospace Control
3 credits
Spring Semester
Course topics include modeling of Aerospace systems, properties of state space realizations, coordinate transforms solution of state equations, controllability, observability, equivalent realizations, model reduction, stability, optimal control, and estimation.
PREREQUISITE: MAE 415 OR PERMISSION OF INSTRUCTOR
MAE590 Special Topics
1-4 credits Fall Semester
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE591 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE592 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE593 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE594 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE595 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE596 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE597 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE598 Special Topics
1-4 credits Offered By Announcement Only
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MAE599 Cooperative Education
1 credit Fall & Spring Semester & First & Second Summer Session
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.

MAE601 Advanced Heat Transfer--Conduction and Radiation
3 credits Spring Semester
Advanced analytical methods of solutions of boundary value problems of steady, periodic, and unsteady heat conduction. Topics include techniques of transient point, line, and plane sources and sinks, thermodynamics of radiative equilibrium, radiative exchange, geometrical factors, network, and other methods. Lecture, 3 hours.
PREREQUISITE: MAE 508 OR PERMISSION OF INSTRUCTOR.

MAE602 Advanced Heat Transfer--Convection
3 credits Spring Semester
The analogy between heat, mass, and momentum transfers. Topics include the transfer mechanism, heat transfer to liquid metals, boiling and condensation mechanisms, heat transfer in two-phase flow, ablation heat transfer, transpiration, film cooling, and heat exchanges. Lecture, 3 hours.
PREREQUISITE: MAE 508 OR PERMISSION OF INSTRUCTOR.

MAE605 Finite Element Methods in Mechanical and Aerospace Engineering
3 credits Spring Semester
Finite-element analysis methods for static and dynamic analysis of mechanical and aerospace structures, heat transfer analysis, and fluid flow applications. Primary emphasis is placed on underlying mechanics and numerical techniques. Consideration is also given to the use of existing programs, such as ANSYS, NASTRAN and FIDAP, designing proper meshes, and choosing the proper element. A term project is included.
PREREQUISITE: MAE 501, 507 OR PERMISSION OF INSTRUCTOR.

MAE606 Experimental Methods in Fluid Mechanics
3 credits Offered By Announcement Only
Course topics include methods of flow visualization, laser techniques in measurement of wall motions, conduit compliance, Newtonian and non-Newtonian properties of fluids, measurement of unsteady flow and pressure, laser Doppler anemometry, ultrasound Doppler velocimetry, electro-magnetic flowmetry, measurement of steady and unsteady wall shear stresses and boundary layers.
PREREQUISITE: ADVANCED STANDING IN FLUID MECHANICS.

MAE610 Fluid Dynamics in Porous Media
3 credits Offered By Announcement Only
Course discusses the properties and principles of flow in porous media. Topics include groundwater flow, with reference to transpiration cooling, use of flow nets for the computation of the velocity field, and how geohydrology affects groundwater flow. Groundwater resource evaluation, groundwater contamination, and discussion of field data are included.
PREREQUISITE: MAE 512, OR CAE 630.
MAE611 Gas Dynamics
3 credits
Offered By Announcement Only
Course analyzes one-dimensional compressible flow with effects of area change, friction, heat transfer, and combustion. Supersonic diffusers, wind tunnels, compression shocks, and methods of small perturbations are also discussed.
PREREQUISITE: MAE 512.

MAE612 Viscous Fluid Flow
3 credits
Spring Semester
Course discusses derivations and exact solutions of Navier-Stokes equations, approximations at low Reynolds numbers and low Mach numbers, boundary layer theory, stability, and turbulence. Lecture, 3 hours.
PREREQUISITE: MAE 512.

MAE613 Transport Phenomena
3 credits
Offered By Announcement Only
Course topics include laws of molecular transfer, the kinetic theory explanation of molecular transfer phenomena, introduction to turbulence, and molecular transfer in laminar and turbulent flows with experimental results. A unified treatment of salient aspects of momentum, heat, and mass transfer including the relationship between rate and conservation equations are also discussed.
PREREQUISITE: MAE 309, MTH 311 OR PERMISSION OF INSTRUCTOR.

MAE614 Computational Fluid Dynamics
3 credits
Spring Semester
Incompressible flow equations in rectangular co-ordinates. Topics include basic computational methods for incompressible flow, three dimensional flows, compressible flow equations in rectangular coordinates, basic computational methods for compressible flows, treatment of shocks, artificial viscosities, convergence, other mesh systems, programming, testing, and information processing.
PREREQUISITE: MAE 512.

MAE615 Turbulence
3 credits
Offered By Announcement Only
The nature and origin of turbulence. Topics include turbulent transport of momentum and heat, dynamics of turbulence, Boundary-free shear flows, Wall-Bounded shear flows, statistical description of turbulence, turbulent transport, Spectra dynamics, and methods and techniques of measurements in turbulent flows.
PREREQUISITE: MAE 512.

MAE620 Linear Robust Control
3 credits
Offered By Announcement Only
Analysis of multivariable systems in the frequency domain. Topics include norms on signals and systems, uncertainty models, closed loop transfer matrices for performer specifications, role of weighting matrices, and synthesis of Robust controllers in State-Space.
PREREQUISITE: EEN 518 OR PERMISSION OF INSTRUCTOR.
MAE625 Advanced Aerospace Structures
3 credits
Offered By Announcement Only
Elastic analysis of aerospace structures. Topics include failure modes and criteria, buckling, matrix methods for analysis, plane truss design, Energy and Castigliano methods for statically indeterminate structures, and torsion and bending of asymmetrical thin-walled open and closed sections. The use of computer packages to solve moderately sized problems of analysis and design of trusses, plane frames, torsion, plane stress, and combinations structures is also included.
PREREQUISITE: MAE 470 OR 507 OR PERMISSION OF INSTRUCTOR.

MAE630 Mechanical Systems Optimization
3 credits
Spring Semester
Optimization as an element of the engineering design process. Topics include comparative examination of unconstrained algorithms, as well as development and application of methods for constrained optimization problems. Case studies which demonstrate the theory and application of mathematical programming as a design tool are also included.
PREREQUISITE: MAE 501 OR PERMISSION OF INSTRUCTOR.

MAE635 Expert Systems in Mechanical and Aerospace Engineering
3 credits
Offered By Announcement Only
Application of artificial intelligence techniques to problem solving in Mechanical Engineering. Coverage of AI programming languages and paradigms, expert systems technology, as well as applications of expert system to the processes of design, operations, maintenance, and simulation are included.
PREREQUISITE: MAE 501 OR PERMISSION OF INSTRUCTOR.

MAE640 Continuum Mechanics
3 credits
Fall Semester
Course discusses concepts that are common to all continuous media. Topics include elements of tensor analysis, motion, deformation, vorticity, material derivatives, mass and the continuity equation, and balance of linear and angular momentum as well as energy. Stress and its geometric characterization, constitutive equations of solid and fluid type behavior, virtual work, fundamental applications, and the Clausius-Duhem inequality are also covered.
PREREQUISITE: MAE 507 OR 512 OR PERMISSION OF THE INSTRUCTOR.

MAE641 Vibration of Continuous Systems
3 credits
Offered By Announcement Only
PREREQUISITE: MAE 502 OR CONSENT OF INSTRUCTOR.

MAE651 Master's Project
3 credits
Fall & Spring Semester & First & Second Summer Session
A required project for M.S. students in the non-thesis option.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE652 Master's Capstone Project
4 credits
Fall & Spring Semester & First & Second Summer Session
A required project for the five year BSME/MSME program.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MAE680 Graduate Colloquium
0 credit    Fall & Spring Semester
Presentations by selected speakers of weekly programs dealing with topics of interest in Mechanical Engineering. Attendance is required of all students registered in Mechanical Engineering graduate programs.
PREREQUISITE: GRADUATE STANDING.

MAE692 Special Problems
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Research and/or design projects consisting of individual investigation of current problems. Offered by special arrangement only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE697 Advanced Topics
1-3 credits  Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE698 Advanced Topics
1-3 credits  Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAE710 Master's Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MAE720 Research in Residence
0 credit    Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAE 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MAE725 Continuous Registration--Master's Study
0 credit    Fall Semester

MAE730 Pre-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of MAE 730 may be taken in a regular semester, nor more than six in a summer session.

MAE740 Post-Candidacy Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in MAE 740 may be taken in a regular semester, nor more than six credits in a summer session.
PREREQUISITE: ADMISSION TO CANDIDACY
MAE750 Research in Residence

0 credit  Fall & Spring Semester & First & Second Summer Session

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
IDS500 Research Methods and Topics  
4 credits  Fall & Spring Semester & First & Second Summer Session  
Disciplined laboratory experiences for selected undergraduate students placed in various laboratories on the medical, main and marine campuses under the mentorship of faculty researchers. Includes a series of class lectures and demonstrations of scientific equipment.  
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

IDS699 Directed Study  
1-6 credits  Fall & Spring Semester & First & Second Summer Session  
PREREQUISITE: APPROVAL OF THE DEAN OF THE GRADUATE SCHOOL

IDS715 Research Activities  
0 credit  Fall & Spring Semester & First & Second Summer Session  
Students conducting research, practica, field experience or special projects as part of their graduate experience. Regarded as full-time residence. May be repeated.  
PREREQUISITE: PERMISSION OF THE PROGRAM DIRECTOR.

IDS725 Master Study  
1-6 credits  Spring Semester & Second Summer Session  
PREREQUISITE: NONE

IDS730 Doctoral Dissertation for IDS students  
1-12 credits  Fall & Spring Semester  
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of IDS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

IDS740 Post-Candidacy Dissertation  
0 credit  Fall Semester & Second Summer Session

IDS750 Dissertation: Research and Residency  
0 credit  Fall & Spring Semester & First & Second Summer Session  
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

RESEARCH TRAINING

RST501 Responsible Conduct of Research  
0 credit  Fall & Spring Semester  
Online research ethics training via CITI Program Responsible Conduct of Research course.

RST502 Responsible Conduct of Research  
0 credit  Fall & Spring Semester  
Research ethics training via Ethics Programs Responsible Conduct of Research classroom course.
RST720 Research Ethics

Course focuses on topics related to what is sometimes called the "responsible conduct of research" (RCR). It covers the landscape of "scientific integrity" - both the principles and day-to-day practicalities of research ethics. The course is inter-disciplinary in its approach. Readings and other materials used as part of the course draw on the examples from many academic fields, and are intended to have application to any academic or professional area of study in which research is conducted.
AMP509 Coastal Physics and Engineering  
3 credits Spring Semester  
Course addresses linear wave theory, wave statistics, wave generation, tides, wind-driven currents, near shore circulation, sediment transport by waves and currents, bedforms, bedload, and suspended load. Other topics include long shore and cross-shore transport, equilibrium beach profiles, coastal processes models, Peirce-Considine model for shoreline change, and Escoffier model for inlet stability.  
PREREQUISITE: CAE 330 OR AMP 575.

AMP531 Ocean Measurements  
3 credits Spring Semester  
Course topics include instrumentation, automatic data acquisition and analysis, time series analysis, signals and noise, filtering, and applied statistics.  
PREREQUISITE: MTH 311.

AMP535 Introduction to Underwater Acoustics  
3 credits Spring Semester  
Course topics include sound waves and pulses, harmonic analysis, sound propagation in the ocean, sonar systems, scattering and absorption, acoustic measurement of marine life and sea-floor properties, sound transmission in waveguides, ambient noise, transducers, and hydrophones.  
PREREQUISITE: MTH 311.

AMP551 Special Topics  
1-3 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Applied Marine Physics.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP553 Special Topics  
1-3 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Applied Marine Physics.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP554 Special Topics  
1-3 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Applied Marine Physics.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP575 Applied Ocean Hydrodynamics  
3 credits Fall Semester  
The equations governing the dynamics of homogeneous fluids are derived. The concepts of deformation rates, vorticity, stream function, and ideal fluid flow are introduced and demonstrated in applications describing flows in the marine environment. Semi-empirical methods for analyzing viscous flows, boundary layers, and turbulence are presented. Eddy viscosity and more advanced turbulence closure schemes are discussed in the context of coastal circulation, bottom boundary layers and sediment transport.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
AMP576 Wave Propagation in the Ocean Environment

3 credits

Wave equation models, acoustic and other elastic waves, surface gravity waves, boundary conditions, ray tracing, dispersion, diffraction, reflection attenuation, and radiation transport laws are discussed.

PREREQUISITE: MTH 311.

AMP590 Sustainable Fisheries - Assessment and Conservation

3 credits

This is the second of a three course series. This course will focus on advanced stock assessment techniques using acoustics and optics. It will cover, for example:
- History of sampling fish stocks - "from catching to measuring fish" - Measuring with underwater sound and light - Sounds and echoes in marine ecosystem - Survey of fish stocks and their habitat.

PREREQUISITE: MSC 471, OR EQUIVALENT.

AMP601 Analytical Methods in Marine Physics

3 credits

PREREQUISITE: CONSENT OF INSTRUCTOR.

AMP610 Environmental Optics and Electromagnetic Wave Propagation

3 credits

The course will allow students to understand the physical background of geophysical optical and microwave measurements, to learn how to carry out and interpret optical measurements, and how to work with microwave passive/active remote sensing platforms. The student will leave with a thorough understanding of existing physical background of optical instrumentation for underwater measurements as well as active/passive optical and microwave remote sensing.

PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

AMP631 Air-Sea Interaction

3 credits

Course topics include the flux of momentum, heat, moisture, and salt, vertical distribution of energy sources and sinks near the interface, surface waves, mixed layers, and large scale interactions. (Same as MPO 631.)

PREREQUISITE: AMP 575 OR 576 AND PERMISSION OF INSTRUCTOR.

AMP640 Numerical Modeling in Applied Marine Physics

3 credits

Techniques and applications of numerical modeling in one of the following topical areas: sound propagation and scattering in the ocean; surface gravity wave propagation and scattering in regions of shallow and intermediate depths; and hydrodynamics in the coastal ocean environment. Emphasis (sound propagation versus gravity wave propagation or hydrodynamics) alternates from one year to the other.

PREREQUISITE: AMP 535, 575 OR 576 AND PERMISSION OF INSTRUCTOR.
AMP650 Coastal Ocean Circulation
3 credits  Spring Semester
Circulation and stratification in the coastal ocean, including the dynamics of wind-driven, tidally-driven, and buoyancy-driven mean and transient flows over variable topography with density stratification. Design of numerical models and observing systems for coastal ocean circulation is also included.
PREREQUISITE: MPO 503, 511 OR AMP 575, AND 601 OR EQUIVALENT, CONSENT OF INSTRUCTOR.

AMP672 Advanced Underwater Acoustics
3 credits  Spring Semester
Analysis and numerical modeling of sound propagation in the ocean: geometrical acoustics, normal mode theory, and the parabolic equation method. Recent advances in underwater acoustics: effects of oceanic variability, signal fluctuations, random medium propagation, ocean bottom interactions, and shallow water propagation are also examined.
PREREQUISITE: AMP 535.

AMP690 Mechanics and Thermodynamics of the Air-Sea Interface
3 credits  Spring Semester
This course deals with the theory and practice of air-sea interaction. Two hours of lectures and one hour in the wind-wave laboratory provide an appropriate mix of theory and experiment. The topics covered include: thermodynamics of the interface; conservation equations; wave generation, propagation, and dissipation; boundary layer turbulence; heat, mass, and momentum transfer; energy dissipation, intermittency; turbulence closure; and wave prediction models.
PREREQUISITE: AMP 575 OR PERMISSION OF INSTRUCTOR.

AMP691 Sustainable Fisheries - Advanced Acoustic Surveying
3 credits  Spring Semester
This is the third and final course in the three course series. It addresses graduate students with a strong research interest in measuring fish and their habitat on the stock and population level. This course will focus on advanced stock assessment techniques using acoustics and optics. It will cover, for example: - A critical review of classical and current research papers - Signal processing and laboratory experiments - Field surveys and stock assessment reports.
PREREQUISITE: AMP/MBF 590.

AMP694 Advanced Studies
1- 3 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP698 Advanced Studies
1- 3 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

AMP700 Practical Training and Internship
1- 6 credits  Offered By Announcement Only
Supervised internships or off-campus employment for students pursuing the M.A., M.S., or Ph.D. degree. Consists of work related to research in progress.
AMP705 Special Project
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Supervised project for students pursuing the Master of Arts degree. Consists of a paper which is researched and written on a topic approved by the student's advisory committee, and presented as a seminar to the student's division. Six credits are required for graduation.
PREREQUISITE: COMPLETION OF 24 GRADUATE COURSE CREDITS.

AMP710 Master's Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

AMP715 Master's Thesis-Post Candidacy
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Used to establish student has been admitted to candidacy for the MS degree. The student working on his/her Master's Thesis enrolls for credit not to exceed 6 combined with 710. Credit is not awarded until the Thesis has been accepted.

AMP720 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in AMP 710 (usually six credits). Credit not granted. May be regarded as full time residence.

AMP730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of AMP 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

AMP750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MARINE AFFAIRS & POLICY
MAF501 Political Ecology of Marine Management
3 credits  Spring Semester
Course provides grounding in political ecology as an important theoretical approach to resource policy and management. The social analysis of resource use, social change, and development are discussed. Models of development and concepts of nature relate to resource use and policy formation are also included. Within this framework, ethnicity, class, and the politics of conservation are explored.
PREREQUISITE: MAF 505.
MAF502 Economics of Natural Resources
3 credits Fall Semester
Course brings together the approaches of natural resource and environmental economics to provide a comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout the course is the concept of sustainable development, defined as maximizing the net benefit to economic development while maintaining the services and quality of natural resources over time. Economic reasoning is used to examine the causes and consequences of environmental and resource problems and measures for dealing with them.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF503 Marine Resource Economics
3 credits Offered By Announcement Only
This course surveys the economics of international and global marine resource problems, with particular emphasis on biodiversity loss and climate change. The mainstream economics focus on efficiency--getting the most welfare out a given endowment of resources--in complemented with a range of social science and natural science interdisciplinary linkages. Three themes stand out. First, economic efficiency may not be the only or even dominant concern in the provision of environmental assets. Issues of fairness and access to those assets, both within a time frame period and over time, may be of greater importance to both individuals and societies. Second, if habitats and their non-human occupants have some form of "intrinsic" value unrelated to human preferences, then we face the problem of how to account for those values. Third, economics lacks a "sustainability" theorem that would ensure whatever economy we might devise would be ecologically sustainable. To be sure of sustainability, economic models must have sustainability conditions build into them.
PREREQUISITE: MAF 502, ECO 345, OR PERMISSION OF INSTRUCTOR.

MAF504 Fieldwork in Coastal Management
3 credits Spring Semester
The field portion of this course will occur in Bocas del Toro, Panama, on the northwest Caribbean coast of Panama where the University of Miami has been involved in the development of a Coastal Management plan since 2004. The Bocas del Toro Archipelago of over 20 near shore islands boasts a rich diversity of cultures, as well as high quality coastal environments. The region is currently experiencing rapid tourist growth, as well as residential development projects for foreigners. The cultural and biological diversities of the region, as well as the development pressures they face, provide an excellent opportunity to study the socio-economic and environmental impacts of tourist development; regional attempts to create land use and coastal plans; conflicts among different uses and users; and various cultural perspectives on the current and evolving situation. The course allows students to develop projects tailored to their interests and skills.
PREREQUISITE: MAF 518 IS HIGHLY RECOMMENDED

MAF505 Fieldwork in Coastal Cultures
3 credits Spring Semester
Field course in which the student participates in a social and economic analysis of a coastal culture (i.e., stone crab fishermen in Everglades City, spiny lobster fishermen in Key West, boat builders and commercial divers in the Abacos, Bahamas). Preliminary lectures and reading introduce the theory and method which the student then practices during a week-long field trip.
PREREQUISITE: MSC 310 OR PERMISSION OF INSTRUCTOR.
MAF506 Advance Fieldwork in Coastal Cultures
3 credits  
Spring Semester
Advanced field course in which the students participate in the social and economic analysis of a coastal culture (e.g. Louisiana bayou fishermen, Abacos boat builders, Tarpon Spring spongers). Students utilize field research techniques learned in MAF 505 and develop skills in framing a research problem. Students examine a coastal issue from an anthropological perspective, structuring a field research paper.
PREREQUISITE: MAF 505.

MAF510 Environmental Planning and the Environmental Impact Statement
3 credits  
Spring Semester
Course takes a broad view of environmental planning and analysis while focusing specifically on the preparation of environmental impact statements. Statutory requirements and procedures at the federal level are examined. Judicial opinions are studied that reflect environmental disputes and controversies. The course also considers some of the substantive requirements of environmental impact analyses such as the assessment of physical and biological environment and socioeconomic impacts.

MAF512 Aquaculture Management
3 credits  
Fall Semester
Course examines the various strategies of resource exploitation and utilization in developing aquaculture projects. Resources include environmental, technological, social, economical, and administrative aspects encountered in commercial aquaculture development. The course covers all stages of planning and development, with emphasis on determining the technical and economic feasibility of aquaculture projects.

MAF513 Aquaculture Management II
3 credits  
Spring Semester
Course is a complement to Aquaculture Management (MAF 512) and examines advanced aquaculture management techniques and strategies with emphasis on commercial operations. Course requires a background in either aquaculture or business. Prerequisite: MAF 512 or permission of instructor.
PREREQUISITE: MAF 512 OR PERMISSION OF INSTRUCTOR.

MAF514 Field Techniques in Prehistoric Underwater Archaeological Excavation
3 credits  
First Summer Session
An introduction to specialized techniques of underwater excavation applicable to the excavation of Little Salt Spring (LSS), a prehistoric site owned and operated by Rosenstiel School of Marine and Atmospheric Science. All students participate in a one-week intensive lecture course in the prehistory of Florida and general techniques of underwater excavation. The field course begins after that. All students must be present for the entire field course in order to complete the basic requirements. Activities include daily underwater excavation in depths of 10-30 feet of water, as well as surface support activities relating to diving and the recording and basic conservation of recovered ecofacts and artifacts dating before 9,000 radiocarbon years before present.
PREREQUISITE: STUDENTS WHO INTEND TO DIVE (NOT REQUIRED) MUST HAVE ALREADY BEEN QUALIFIED AS RSMAS SCIENTIFIC DIVERS (BASIC), UNDER GUIDELINES ESTABLISHED BY THE AMERICAN ACADEMY OF UNDERWATER SCIENCES (AAUS) IN ORDER TO PARTICIPATE IN COURSE-RELATED SCUBA-DIVING ACTIVITIES.
MAF515 Techniques of Marine Archaeological Survey and Recording
3 credits
Offered By Announcement Only
The location and study of underwater archaeological sites is undergoing fundamental changes because of application of advanced technologies developed for other fields, notably remote sensing, and the general availability of computer power for individual users. This course introduces the student to the latest techniques of survey and recording, focusing on hardware and software that can greatly increase the efficiency of any underwater excavation.
PREREQUISITE: PREVIOUS COURSES IN ARCHAEOLOGY OR MARINE ARCHAEOLOGY OR PERMISSION OF INSTRUCTOR.

MAF516 Ocean Policy and Development and Analysis
3 credits
Fall Semester
Ocean policy development and analysis of issues such as: offshore oil drilling, fisheries resource conflicts, marine mammal protection, ocean dumping and incineration, multiple use conflicts in marine protected areas, pollution from land based sources, and oil spill contingency planning.

MAF517 Aquaculture and the Law
3 credits
Offered By Announcement Only
This course examines the substantive legal issues concerning Aquaculture and the Coastal Zone. Legal aspects of Aquaculture related to ownership and boundaries in the coastal zone, legal and regulatory constraints, international consideration private and public rights, risks and incentives. Fish and shellfish as personal property and conservation laws affecting the fish farmer.

MAF518 Coastal Zone Management
3 credits
Fall Semester
Development of a framework for formulation and assessment of coastal zone policy. Analysis of issues and conflicts in coastal zone management (CZM), such as: zoning and planning, coastal and beach protection, ecosystem protection, the federal flood insurance program, adaptations to sea level rise, coastal pollution from land-based sources, and tourism impacts.

MAF519 Aquaculture Management III (Fieldwork)
3 credits
First Summer Session
Students will conduct fieldwork on environmental, technological, social, economical, and administrative aspects encountered in commercial aquaculture operations. This field course will complement Aquaculture Management I and II. Students will be able to apply most of the topics taught in MAF 512 and MAF 513. They will participate in all stages of the production process, including maturation, spawning, larval husbandry, nursery and grow out techniques, as well as harvesting, processing and exporting. Students will visit several large commercial hatcheries, farms and processing plants currently producing processing, packing and exporting shrimp and fish (both marine and freshwater) for US and European and Asian markets.
PREREQUISITE: MAF 512, 513 OR PERMISSION FROM THE INSTRUCTOR.

MAF520 Environmental Law
3 credits
Fall Semester
An introductory course focusing on environmental problems. The study of Regulatory legislation, common law, and administrative law. Topics include toxic substances, air and water pollution, and habitat and species protection.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MAF525 Fisheries Socioeconomics and Management
3 credits  Fall Semester
This course applies microeconomic theory to fisheries resource problems and policies. Economic models with the value of production as their objective, will contrast economists' and biologists' definitions of maximum yield and show why an unregulated fishery will not operate at either level. We will use economic reasoning to examine causes and consequences of fisheries problems and measures for dealing with them.

MAF526 Marine Cultural Resource Management
3 credits  Spring Semester
Submerged archaeological sites as exhaustible resources of a country's cultural heritage. Policies and procedures for their protection or mitigation will be surveyed using as examples the statutes and regulations of foreign states, the federal government, and the US states.
PREREQUISITE: APY 340.

MAF530 Port Operations and Policy
3 credits  Offered By Announcement Only
The course will include: Introduction to ports; port geography; port operations; port administration; Federal port policy; free ports/free zones; port investment/tariffs; port marketing; Coastal Zone Management and ports; case studies, CZM; fostering economic development; and Port planning and development.
PREREQUISITE: JUNIOR STANDING.

MAF560 Introduction to Marine Geographic Information Systems
3 credits  Fall Semester
Marine Geographic Information Systems are emerging as a distinct subset of GIS, due to fundamental differences between terrestrial and underwater spatial information (2-D vs. 3-D, multiresolution, synoptic data collection, time depth (4-D) modeling). Approximately the first half of this course is a brief review of basic GIS, and the second half concentrates on aspects of marine data acquisition and manipulation in the GIS context.

MAF561 Introduction to Marine Geographic Information Systems - Laboratory
0 credit  Fall Semester & First Summer Session
Introduction to Marine Geographic Information Systems - Laboratory introduces students the basic methods and technology in Marine Geographic Information Systems. The course is taught with hands-on laboratory exercises following the evolution of Marine Geographic Information Systems, from basic cartography to topological and network modeling to internet access and application.

MAF562 Spatial Analysis: Intermediate Course in Marine GIS
3 credits  Spring Semester
Course provides a general survey of available quantitative methods for spatial analysis using Geographic Information Systems (GIS). Although GIS has been widely used for mapping and database management, this course is focused on the functionality of GIS as an effective tool for modeling and analyzing complex spatial relationships. Quantitative methods suitable for analyzing different features types are discussed. Applications for such methods are also presented.
PREREQUISITE: MAF 560, 561 OR PERMISSION OF THE INSTRUCTOR.
MAF570 Conservation and Management of Marine Mammals
3 credits Spring Semester
This course emphasizes on the notion that proper conservation and management of large marine vertebrates (i.e., marine mammals, sea turtles, sharks and rays) require the understanding and integration of some important aspects of the (comparative) biology and ecology of these groups of animals with the multifaceted nature (e.g., social, economical, ethical and cultural dimensions) of these concerns.
PREREQUISITE: JUNIOR STANDING

MAF576 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF577 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs. Prerequisite: Permission of instructor.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF578 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF579 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF580 Special Topics
1-4 credits Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to marine affairs.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF610 International Ocean Law
3 credits Spring Semester
Course analyses how international and municipal law deals with navigation, pollution, fisheries, exploitation of natural resources, and other uses of the ocean. In addition to jurisdictional issues, sources of international law and scientific research in ocean areas are examined.

MAF620 Coastal Law and Policy
3 credits Fall Semester
Course examines the authority of different levels and agencies of government to make decisions affecting the coastal zone. Course also explores the coastal problems of shoreline use and development, uses of water areas and the seabed, and the related questions of environmental protection.
MAF670 Advanced Studies
1-4 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF671 Advanced Studies
1-4 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF672 Advanced Studies
1-4 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF673 Advanced Studies
1-4 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF674 Advanced Studies
1-4 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAF705 M.A. Internship
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The M.A. student must complete an approved six credit internship with an organization engaged in activities associated with marine affairs. Credits are not awarded until the internship has been successfully completed, a written report approved and a formal letter of evaluation received from the cooperating institution.
PREREQUISITE: COMPLETION OF ALL OTHER REQUIREMENTS FOR M.A. DEGREE IN MARINE AFFAIRS.

MAF710 Master's Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MAF720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAF 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MAF725 Continuous Registration--Master's Study
0 credit  Fall & Spring Semester & First & Second Summer Session
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

MARINE BIOLOGY & FISHERIES
MBF504 Biology of Marine Mammals
3 credits  Fall Semester
The purpose of this class is to introduce students to the biology, evolution, taxonomy, physiology, natural history, behavior, conservation, and management of marine mammals.
PREREQUISITE: ONE-YEAR OF GENERAL BIOLOGY.
MBF505 Marine Mammal Disease and Medicine

3 credits

Spring Semester

This course will cover the basics (theory and application) of marine mammal disease and medicine. Applications will focus on the medical management of managed care and wild populations.

PREREQUISITE: PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF507 Marine Mammal Applied Behavior Analysis and Managed Care

3 credits

Fall Semester

This course involves a thorough examination of specific aspects of marine mammal managed care and conservation programs, with an emphasis on behavior management, analysis, and modification as a basis for adaptive response to changing environments both in-situ and ex-situ. Coursework will also focus on health management and assessment, emergency handling and transportation, government regulations, and wildlife conservation.

MBF508 Biometrics in Marine Science

3 credits

Fall Semester

Applied statistical analysis in marine biology and biological oceanography. Descriptive statistics, probability distributions, and hypothesis testing are discussed. Concepts of analysis of variance, simple linear regression, and computer statistical distribution-free methods are also included as well as principles and procedures with computer statistical packages for data analysis. Lecture and laboratory.

PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF511 Aquaculture

3 credits

Offered By Announcement Only

Focus on techniques to culture marine organisms. The growth and physiology of early life stages, the culture of food organisms for larval stages, food requirements of larval and juvenile stages, water quality measurement, disease control, tank design, grow out, composition of artificial feeds and artificial spawning are discussed in detail. Applications of these techniques in commercial aquaculture, culture of animals for research, and for stock enhancement programs are examined. Practical examples are presented for laboratory and hands on rearing of fish larvae. Commercial aquaculture facilities are visited in field trips during the laboratory. Lecture, 2 hours; laboratory, 2 hours.

MBF512 Aquaculture Laboratory

2 credits

Offered By Announcement Only

Determining and monitoring water quality, culturing food organisms, larval rearing of shrimp and fish, feeding techniques, identifying parasites and diseases, and avoiding causes of mortality are discussed. Visits to local fish and shrimp hatcheries and farms is included. Corequisite: MBF 511.

PREREQUISITE: COREQUISITE MBF 511.

MBF513 Biology and Ecology of Mangroves

3 credits

Spring Semester

Recent research advances in the study of mangroves as a dynamic interface between terrestrial and marine systems. Topics include taxonomy, biogeography, morphology and physiognomy, water relations and mineral nutrition, and physiology and reproduction with emphasis on how mangroves modify tropical coastal environments and how they are affected by external stressors including global climate change. Lecture, 2 hours; field trips, 1 hour; field and laboratory work, minimum 2 hours.

PREREQUISITE: PERMISSION OF INSTRUCTOR.
**MBF514 Tropical Marine Biology: A Field Course**

3 credits  
Spring Semester  
General survey of marine flora and fauna of tropical marine ecosystems. Inhabitants and communities of the sandy shore, rocky shore, seagrass meadows, mangrove shoreline, coral and artificial reefs are collected, identified, maintained. Life histories of representatives are presented. Concepts of island biology and geology such as shore zonation local reef formation and the geological history of the lagoon are also discussed. The 10 day course involves 90 contact hours and approximately 40 hours of formal lectures. Grades are based on a laboratory practicum and written final exam. The course is given in its entirety at the University's field station at Bimini, Bahamas.  
PREREQUISITE: BY PERMISSION OF INSTRUCTOR.

**MBF515 Tropical Marine Ecology**

3 credits  
Offered By Announcement Only  
Marine ecology with emphasis on tropical ecosystems and local habitats. Physical environmental and biotic adaptations, population, and community ecology are discussed. Field exercises in mangrove, sea grass, and coral reef ecosystems are also included.  
PREREQUISITE: INVERTEBRATE ZOOLOGY AND ECOLOGY OR PERMISSION OF INSTRUCTOR.

**MBF518 Ecology and Physiology of Coral Reef Systems**

3 credits  
Offered By Announcement Only  
Coral reefs as integrated systems are examined from geological, ecological, and biological perspectives. The roles of global and local environmental fluctuations, physical disturbance, and biotic interactions in controlling reef formation and community structure is emphasized. The physiology of scleractinian corals and their algal symbionts is described and the prevalence of algal-invertebrate symbiosis on coral reefs related to nutrient cycling, productivity, and food webs on coral reefs.  
PREREQUISITE: PERMISSION OF INSTRUCTORS.

**MBF519 Tropical Marine Ecology Lab**

1 credit  
Offered By Announcement Only  
Combined field-laboratory exercises in mangrove, sea grass, and coral reef ecosystems.

**MBF520 Tropical Marine Ecology: A Short Course**

2 credits  
Spring Semester  
This tropical Marine Biology course established primarily for Florida high school marine biology teachers is taught from an interactive point of view where students are afforded the opportunity to both learn in the conventional way of classroom lectures, and more importantly to learn by involvement and participation. Students are exposed to the major marine communities found in Bimini and South Florida such as: 1) coral reef; 2) artificial reef; 3) mangrove; 4) seagrass flats; and intertidal zones. Students learn about the uniqueness of each of these ecosystems and the plants and animals which inhabit them. Lectures are divided up by habitat and are given in the morning. In the afternoon students go into the field and traverse on foot or snorkel in each ecosystem. Specimens are collected and identified at night and students are required to learn and identify 50 organisms found in six ecosystems. Field guides are used as reference material. A written exam and laboratory practical is given on the last day of class.  
PREREQUISITE: COLLEGE BIOLOGY.
MBF521 Field Techniques and Instrumentation in Tropical Marine Ecology  
3 credits  
Spring Semester  
This course covers the instrumentation and field techniques commonly used to characterize 
the structure and function of the three dominant ecosystems in the tropics and 
subtropics, i.e. coral reefs, seagrass beds and mangroves.  
PREREQUISITE: MPS STATUS/PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF525 Biology of Elasmobranch Fishes: A Field Course  
2 credits  
Offered By Announcement Only  
Course discusses the first aspects of elasmobranch biology including systematics 
of the major taxa, paleontology, and the evolutionary history of sharks as well 
as anatomical aspects. Course also addresses the physiology and biochemistry of 
sharks, circulatory, respiratory, developmental, skeletal, and sensory systems 
involving behavior, ecology, and life history strategies. Factors such as feeding, 
reproduction, and social and swimming behavior are also discussed. The relation 
between man and shark: overexploitation as it affects shark conservation, survival, 
and biodiversity is included. Course is given in its entirety at Bimini, Bahamas.  
PREREQUISITE: By permission of instructor.

MBF531 Plankton  
3 credits  
Spring Semester  
Course topics include the drifting organisms, their central role in the economy 
of the sea, the influence of the environment, and their adaptations to it. The 
dynamic and productivity of the plant and animal plankton, the ecology and physiology 
of animal plankton, especially in connection with special distribution and nutrition, 
and an introduction to the taxonomy, and quantitative enumeration of the animal 
plankton is included. Lecture, 3 hours.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

MBF539 Oceanic Productivity  
3 credits  
Spring Semester  
History, methods, and current topics relevant to studies of marine primary production. 
Magnitude and fate of primary production in the sea is essential to understand 
secondary production, the success of fisheries recruitment, and global climate.

MBF540 Introduction to Ecological Modeling  
3 credits  
Offered By Announcement Only  
An introduction to conceptual and mathematical model building methods for ecological 
processes at population, community, ecosystem, and landscape/seascape- level scales. 
Other topics include mathematical foundations, numerical modeling, holistic and 
structured population models, and demography, density-independent and -dependent 
models, linear and nonlinear systems, community composition, competition, succession, 
and ecosystem structure and function are discussed. Gap-phase, process-based, compartmental, 
and coupled biological-physical ecosystem models at landscape scales are also examined.  
PREREQUISITE: CALCULUS AND PERMISSION OF INSTRUCTOR
MBF542 Oceans and Human Health
3 credits
Fall Semester
The objective of this interdisciplinary course is to provide students with introductory knowledge of the broad and relatively young field of Oceans and Human Health. The focus is the present, future, and potential effects of oceanic processes and aquatic organisms on human health, and vice versa. These diverse factors reflect the physical, chemical, biotic and social processes which require an integration of information and knowledge from the medical, marine and social sciences. The course covers harmful algal blooms, marine microbes, and global climate change as well as an overview of coastal impacts and remedies (e.g. drugs from the sea and marine models) through a series of coordinated lectures and case studies on human health, physical environment, and oceanographic processes. Prerequisite: Permission of instructor.

PREREQUISITE: PERMISSION OF INSTRUCTOR

MBF545 Fisheries Sampling and Analysis
3 credits
Spring Semester
Students will learn about experimental sampling concepts and designs, instrumentation, survey implementation and statistical methods to assess fishery-independent size-structured population abundance of exploited and non-target species.
PREREQUISITE: MBF 508 OR PERMISSION FROM INSTRUCTOR-PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF546 FISHERIES POPULATION BIOLOGY
3 credits
Spring Semester
Students will learn conceptual aspects and estimation methods for the main population processes such as growth, survival, reproduction and feeding. There will be an emphasis on data requirements and statistical validation of the data and model fitting, such that students will develop an ability to integrate and summarize complex biological knowledge under a set of well defined protocols.
PREREQUISITE: MBF 508 OR PERMISSION FROM INSTRUCTOR. PREFERENCE WILL BE GIVEN TO MPS STUDENTS

MBF547 Fisheries Ecosystems: Management and Conservation
3 credits
Spring Semester
Students will learn about the biological, social, economic and legal aspects of fisheries management. Case studies will be used to demonstrate why the success and failures of some fisheries management systems.

MBF550 Analytical Techniques in Marine Biology
2 credits
Offered By Announcement Only
Theory and applications of selected analytical techniques necessary to conduct quantitative research in marine biology (e.g., electrophoresis, metabolite assays, enzyme assays, radioisotope methodology). One hour lecture followed by three hour laboratory per week.

MBF555 Graduate Physiology
3 credits
Spring Semester
Broad overview of concepts important for physiology. Topics include discussions of genomes, molecular evolution and functional genetics (metabolism), cell biology and cell communication, and organismal-environmental interactions. Readings from the primary literature are included with an emphasis on seminal papers.
PREREQUISITE: NONE

MBF565 Fisheries Ecology and Oceanography
3 credits
Fall Semester
MBF570 Special Topics  
1-4 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF571 Special Topics  
1-4 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF572 Special Topics  
1-4 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF573 Special Topics  
1-4 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF574 Special Topics  
1-4 credits Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF575 Current Applications of Ecological Theory  
3 credits Offered By Announcement Only  
Course examines current applications of ecological theory. Topics include issues of stress ecology, methodologies for evaluating stress responses, methodologies for ecological risk assessment, general systems theory, and human/environmental interactions. Lecture, 3 hours.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MBF576 Diseases of Marine Organisms  
3 credits Offered By Announcement Only  
Infectious, genetic, and environmentally induced diseases of marine fishes and invertebrates as well as diagnostic methods, cellular, and molecular pathology. Lecture, 3 hours.  
PREREQUISITE: GRADUATE STANDING; OR BIL 150, 160, 255 AND PERMISSION OF THE INSTRUCTOR.

MBF578 Evolutionary Genetics  
3 credits Fall Semester  
A Graduate course that presents an overview from "New Evolutionary Synthesis" (1900) to Evolutionary Genomics. The critical points to emphasize is the importance of standing genetic variation, the role of neutral evolutionary process versus evolution by natural selection and how a evolution perspective provides meaning insights into the biology.
MBF586 Environmental Biology of Fishes
3 credits
Offered By Announcement Only
Ecology, dispersal, and modes of life of fishes. Adaptations by larvae and adults
to various habitats are covered as well as the effects of man on fish faunas and
the importance of fishes to various ecological systems. Lecture, 3 hours.

MBF590 Acoustic Measurement of Nekton, Plankton and Underwater Habitat.
3 credits
Fall Semester
MBF 590 is an introductory course on the theory, history and applications of acoustics
to measure nekton, plankton and underwater habitat. It was designed for those students
who wish to learn how to make quantitative measures of organisms and structure
underwater. It is a prerequisite for MBF 690, Advance Measurement of Nekton, Plankton
and Underwater Habitat, which focuses on data acquisition in the field and laboratory
signal processing. This course is essential for students who need to make precise
and accurate underwater measurements for their research.
PREREQUISITE: PERMISSION FROM THE INSTRUCTOR.

MBF602 Biological Oceanography Seminar
1 credit
Fall & Spring Semester
Participation is required of all students in Marine Biology and Fisheries department
every semester they are in residence whether or not they are registered for the
course. Students past their second semester must give one 20-minute presentation
per year, on their research or other acceptable topic. Dates are be assigned by
lottery. Course may be taken for credit only once.

MBF604 Biological Oceanography
3 credits
Fall Semester
A comprehensive course in Biological Oceanography, including energy flow, biogeochemical
cycles, planktonic and benthic ecosystem structure, evolutionary ecology, adaptations
of marine organisms, and paleoceanography. Course is required of all MBF students
and should be taken in sequence with Oceanography I (MPO 501), Oceanography II
(MAC 502), and Oceanography IV (MGG 504).
PREREQUISITE: NON-MARINE BIOLOGY MAJORS NEED PERMISSION OF INSTRUCTOR.

MBF607 Biochemical Toxicology
3 credits
Offered By Announcement Only
Biochemical mechanisms of absorption, distribution, metabolism, and excretion of
natural and synthetic environmental toxicants. Methods for evaluation of acute
and chronic toxicity, carcinogenesis, mutagenesis, and teratogenesis including
in vivo, isolated organ, tissue culture, and subcellular approaches to toxicity
testing are included.
PREREQUISITE: BMB 506 OR PERMISSION OF INSTRUCTOR.

MBF610 The Physical Environment of Marine Organisms
3 credits
Spring Semester
The fluid environment of the sea influences the growth, distribution, and survival
of marine organisms. The physical processes that affect organisms occur in space
and time, ranging from the molecular properties of water to basin-wide linkages
between oceanic regime and climate shifts are discussed. Course emphasis is placed
on how physical processes affect the life of plankton to nekton. Students are required
to present reviews based on the literature.
MBF613 Marine Population Dynamics
3 credits
Spring Semester
The concepts of stocks, sub-populations, and populations as biological systems in the marine environment. Quantitative studies of growth, mortality, recruitment, and abundance of marine populations are discussed. Data requirements, experimental design, sampling, and mathematical procedures for estimating population parameters are included. Lecture and laboratory.
PREREQUISITE: MBF 508, 510 OR PERMISSION OF INSTRUCTOR.

MBF614 Population Modeling and Management
3 credits
Fall Semester
Mathematical and computer-intensive models of exploited populations fish, shellfish, marine mammals, and sea turtles. Stock production (surplus production), structured analytical yield (yield-per-recruit and age-size structured assessments), stock and recruitment, simulation modeling, adaptive control theory, risk assessments, and decision theoretic analyses are discussed. Techniques of management, concepts of resource allocation, and fishery management institutions with case studies are also included. Lecture and computer-based laboratory.
PREREQUISITE: MBF 613 OR PERMISSION OF INSTRUCTOR.

MBF615 Advanced Biometrics in Marine Science
3 credits
Spring Semester
An introduction to advanced statistical analysis of multivariate empirical observations with primary emphasis on applications in the assessment and interpretation of the dynamics of marine populations and communities in marine biology, biomedical sciences, fisheries, and biological oceanography. Advanced methods in linear, multiple and nonlinear regression analysis, probability and estimation theory, multiple partial correlation, ANCOVA, GLIM, general additive models, nonlinear optimization, multivariate statistics (classification and ordination), and sampling techniques. Exploratory data analysis and modeling are emphasized using the software SAS, S-PLUS, and MATLAB.
PREREQUISITE: MBF 508 OR PERMISSION OF INSTRUCTOR.

MBF633 Physiological and Biochemical Adaptations of Marine Organisms
2 credits
Fall Semester
Biochemical processes unique to marine organisms. Topics include ion transport and regulation, biochemical adaptations to high pressures and low temperatures, bioluminescence, biochemical aspects of migration and behavior, marine toxins and prostaglandins, and symbiotic associations.
PREREQUISITE: BMB 506 OR BIL 255.

MBF640 Marine Phytoplankton and Primary Productivity
3 credits
Offered By Announcement Only
Ecology of marine photoplankton and overview of major taxa including cyanobacteria. Distribution and magnitude of primary production in the sea and relationship to marine food webs and biogeochemical cycling is included.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MBF671 Advanced Studies
1-4 credits
Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF DIVISION ACADEMIC COMMITTEE.
MBF672 Advanced Studies
1-4 credits   Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF DIVISION ACADEMIC COMMITTEE

MBF673 Advanced Studies
1-4 credits   Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF DIVISION ACADEMIC COMMITTEE

MBF674 Advanced Studies
1-4 credits   Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF DIVISION ACADEMIC COMMITTEE

MBF675 Advanced Studies
1-4 credits   Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF DIVISION ACADEMIC COMMITTEE

MBF687 Biology and Systematics of Fishes
3 credits                                              Offered By Announcement Only
Lectures and laboratories on comparative evolution, morphology, physiology, and
ecology of fishes. Laboratory emphasis is placed on family level taxonomy and
systematics of marine and estuarine fishes.
PREREQUISITE: GENERAL BIOLOGY; COMPARATIVE ANATOMY DESIRABLE; PERMISSION OF INSTRUCTOR

MBF690 Advance Measurement on Nekton, Plankton, and Underwater habitat.
3 credits                                                           Spring Semester
MBF 690 is the second course in a series on the acoustic measurement of nekton,
plankton and underwater habitat. It follows in the introductory course MBF 590.
In this course, we will focus more on the acquisition and processing of plankton,
nekton and marine habitat data using sonar hydrophones. We will also spend time
reviewing and discussing the classic papers that have been published on this topic.
This class was designed for those students who wish to learn how to make quantitative
measures of organisms and underwater habitat structure for their research.
PREREQUISITE: MBF 590

MBF700 Practical Training and Internship
1-6 credits   Offered By Announcement Only
Supervised internship or off-campus employment for students pursuing the M.A.,
M.S., or Ph.D. degree. Consists of work related to research in progress.

MBF705 Special Project
1-6 credits   Fall & Spring Semester & First & Second Summer Session
Supervised project for students pursuing the Master of Arts degree in Marine Studies.
Consists of a paper, researched, and written on a topic approved by the student's
advisory committee, and presented as a seminar to the student's division. Six credits
are required for graduation.
PREREQUISITE: COMPLETION OF 24 GRADUATE COURSE CREDITS.
MBF710 Master's Thesis  
1- 6 credits  Fall & Spring Semester & First & Second Summer Session  
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MBF715 Master's Thesis-Post Candidacy  
1- 6 credits  Fall Semester  
Used to establish student has been admitted to candidacy for the MS Degree. The student working on his/her Master's Thesis enrolls for credit not to exceed 06 combined with 710. Credit is not awarded until the Thesis has been accepted.

MBF720 Research in Residence  
0 credit  Fall & Spring Semester & First & Second Summer Session  
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MBF 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MBF730 Doctoral Dissertation  
1-12 credits  Fall & Spring Semester & First & Second Summer Session  
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of MBF 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MBF750 Research in Residence  
0 credit  Fall & Spring Semester & First & Second Summer Session  
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MARINE GEOLOGY & GEOPHYSICS  
MGG501 Oceanography I (Geological)  
2 credits  Fall Semester  
The first section of the core course curriculum designed as an integrated and multidisciplinary view of ocean processes, covering the major disciplines of marine science and their applications to the study of the marine environment. To be taken in sequence with Oceanography II - Physical (MPO 502), Oceanography III - Chemical (MAC 501), and Oceanography IV - Biological (MBF 502). This course is for non-MGG majors only.  
PREREQUISITE: UNDERGRADUATES REQUIRE PERMISSION OF INSTRUCTOR.

MGG511 Earth Surface Systems  
3 credits  Fall Semester  
An introduction to the elements of the earth surface environment and their interactions with an emphasis on the application to understanding the geologic record. Course includes discussions of the processes and agents that influence and shape the character of the earth's surface, the attributes of the resultant sedimentary features, and the use of these features to unravel geologic and geomorphic history. Focus is placed on systems dynamics and interactions among sedimentologic, geomorphic, biotic, and hydrologic processes.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MARINE AND ATMOSPHERIC SCIENCE

MARINE GEOLOGY & GEOPHYSICS

MGG512 Marine Micropaleontology
3 credits  
Fall Semester
An introduction to the field of marine micropaleontology with an emphasis on applications in biostratigraphy, biochronology, paleoecology, and paleoceanography. Topics include morphology, taxonomy, ecology, and geologic record of the major microfossil groups, methods of environmental inference, and stable isotope and trace element geochemical studies. Lab work includes a survey of the most important taxonomic groups. Lecture, 3 hours; laboratory, 2 hours. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG513 Introductory Geochemistry
3 credits  
Fall Semester
Fundamentals of atomic structure and quantum mechanics applied to Chemistry. Topics include origin and distribution of the elements, chemical bonding and substitution, basic thermodynamics of solids, liquids, and gases. Applications of these concepts to such geochemical processes as magmatic differentiation, rock-water interactions, low temperature aqueous geochemistry, and the geochemical cycling of the elements is also included.

MGG514 Geophysics
3 credits  
Fall Semester
Course topics include seismology, gravity, heat flow, thermal history, geomagnetism, plate tectonics, and their importance in understanding the Earth's crust, mantle, and core. 
PREREQUISITE: ONE YEAR OF CALCULUS AND ONE YEAR OF PHYSICS.

MGG515 Environmental Hydrology
3 credits  
Fall Semester
Course offers an introduction to the physical processes of hydrological science. The mechanisms of evaporation, condensation, precipitation, infiltration, groundwater flow, overland flow, and stream flow are described. Areas of interrelation with environmental science, marine science, and geophysical science is emphasized. Description of appropriate measurement techniques and data interpretation methods are important parts of the course. 
PREREQUISITE: PHYSICS.

MGG520 Igneous Petrology
3 credits  
Fall Semester
Origin and differentiation of magmas in oceanic and continental settings. Igneous systems traced from the mantle and magma chambers to the eruptive stage. What we can tell from textures and mineralogy of igneous rocks. Use of trace-element and isotopes to understand igneous processes and magma source compositions. Magma types and plate-tectonic cycle. Magmatism when the Earth was young. Extra-terrestrial igneous rocks.

MGG525 Applied Environmental Geophysics
3 credits  
Offered By Announcement Only
Application of subsurface geophysical tools to environmental problems. Course includes the theory and application of shallow refraction and reflection seismology, conducting field experiments and processing both marine and land seismic data, other marine survey techniques such as side-scan sonar surveying, potential field techniques (gravity, magnetics, EM), ground penetrating radar, and borehole geophysics. 
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MGG533 Environmental Geology  
3 credits  
Offered By Announcement Only  

MGG541 Field Evaluation of Fossil Platforms, Margins, and Basins  
2 credits  
Offered By Announcement Only  
Field investigation of classic rock sequences formed within ancient platform, margin, and basin environments. The use of ancient exposures as a guide to the interpretation of modern marine environments.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG550 Mathematical Methods for Geoscientists  
3 credits  
Fall Semester  
Background mathematics needed to solve problems in the geosciences. Applications in tectonics, geodynamics, structural geology, seismology, and hydrology. Topics include linear inverse problems, least squares, linear algebra, matrix theory, vectors, dimensional analysis, probability and scientific inference, continuum mechanics, transform and numerical methods to solve differential, and partial differential equations.  
PREREQUISITE: ONE YEAR OF CALCULUS AND ONE YEAR OF PHYSICS.

MGG570 Continental Tectonics  
3 credits  
Spring Semester  
Reviews major research techniques used in the study of the structure and evolution of continental crust and topical discoveries, with an emphasis on the Neogene to Recent time. The course begins with brief introductions to the fields of structural geology, seismology, and geodesy as they relate to continental tectonics. New research in areas such as the rheology of the lithosphere, plate motion models, deformation of continental crust in plate boundary zones, oblique subduction, and earthquake hazard assessment are also discussed.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG579 Plate Tectonics  
3 credits  
Fall & Spring Semester  
The theory of plate tectonics, sea floor spreading, and continental drift. Mathematical description of plate motions, finite and instantaneous rotation poles, consequences of plate tectonics, mountain building, rifting, erosion, and recycling of continental materials are also discussed.  
PREREQUISITE: PERMISSION OF INSTRUCTOR
MGG580 Geological and Environmental Remote Sensing
3 credits
Spring Semester
This one semester course will cover major remote sensing techniques used in the geological and environmental sciences. The course will begin with an introduction to the basic physics of remote sensing, followed by a review of major remote sensing techniques used in aircraft and satellite platforms, including IR and near IR, optical and microwave systems. We will then discuss specific terrestrial and coastal applications using a case history approach, including geologic, soil and biomass mapping, environmental monitoring, and natural hazard assessment. The course is aimed at graduate students and senior undergraduates with some background in math and physics. Grades are based on problems sets (a minimum of three), a mid-term test, and a report or lab exercise involving image processing, due at the end of the semester.
PREREQUISITE: CALCULUS AND PHYSICS.

MGG581 Image Analysis and Interpretation
3 credits
Offered By Announcement Only
Course provides a hands-on approach to learning how to use aerial photography, satellite imagery, and other remotely sensed data to derive information about the physical environment. This course enables the student to process, interpret, and analyze remotely sensed data for use in environmental research. Image Analysis and Interpretation complements the course, MGG 580.

MGG583 Scanning Electron Microscopy
2 credits
Spring Semester
Theory and practical application of the SEM and the electron probe to research problems. Lectures and laboratory with emphasis on independent operation of the SEM, special preparation techniques, and interpretation of results are included. Course is designed to provide students with a broad and thorough background in scanning electron microscopy.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG584 Special Topics
1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG585 Special Topics
1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG586 Special Topics
1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG587 Special Topics
1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MGG588 Special Topics

1-4 credits  Offered By Announcement Only

Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.

PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG601 Seminar in Marine Geology and Geophysics

1 credit  Fall & Spring Semester

Oral presentation and discussion of research and special topics by students, faculty, and visiting scientists. Students receiving credit are required to present a seminar.

MGG620 Satellite Radar Interferometry in the Earth Sciences

3 credits  Fall Semester

Spaceborne interferometric Synthetic Aperture Radar is an important technique for various disciplines in the Earth Sciences, such as geodesy, glaciology and hydrology. This course reviews the principles of radar, synthetic aperture radar of interferometric and differential radar interferometric techniques.

PREREQUISITE: PERMISSION OF INSTRUCTOR

MGG622 Geophysical Onverse Theory

3 credits  Spring Semester

This course covers the principles of geophysical inverse theory as applies to problems in the Earth Sciences. Inverse theory is a set of mathematical techniques used to obtain inferences about the Earth from physical measurements. The focus of this class will be on formulating and solving inverse problems, and understanding the non-uniqueness and resolution associated with inversions. The emphasis will be on geodetic data (obtained from GPS and InSAR measurements).

PREREQUISITE: 514 AND/OR PERMISSION OF INSTRUCTOR

MGG650 Stable Isotopes in Biogeochemical Processes

3 credits  Offered By Announcement Only

Theory of stable isotope fractionation, methods of measurement, and application of results to geological, biological, and oceanographic processes. Hands-on experience in the stable isotope laboratory is provided utilizing a range of techniques. A project chosen either by the student or instructor is required. All students who wish to use the stable isotope facility should take this course. Lecture, 2 hours; laboratory, 3 hours. Prerequisite: Permission of instructor.

PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG660 GIS Programming

1 credit  Spring Semester

Course provides a hands-on approach to learning GIS programming using Avenue for ArcView GIS (ESRI). Avenue is an object-oriented programming language used to create customized graphical user interfaces, automated tasks, and spatially enabled applications. Students learn how to employ object-oriented programming techniques and modeling methods to develop spatially explicit applications. Prerequisite: MAF 561 or permission from the instructor.

PREREQUISITE: MAF 561 OR PERMISSION FROM THE INSTRUCTOR.

MGG661 Sedimentary Petrology

3 credits  Fall Semester

Composition, texture, fabric, and structures of sediments and sedimentary rocks. The occurrence and properties of the major classes of detrital and chemical sediments from a petrologic and historical perspective is discussed.

PREREQUISITE: MGG 520.
MGG662 Comparative Sedimentology
3 credits
Spring Semester
The use of modern sediments to decipher processes of origin, accumulation, and early diagenesis as the basis for interpreting environments and architecture of ancient deposits in outcrop and in the subsurface. Evaluation of the sedimentary record of climate and sea level changes is included as well as the application of facies models for interpretation of seismic and log data.
PREREQUISITE: MGG 511.

MGG663 Deep Sea Sedimentation
3 credits
Offered By Announcement Only
Course topics include classification and major constituents of deep-sea sediments, origin of red clay, production, dissolution, deposition of pelagic carbonate and silica, turbidite sedimentation, hemipelagic deposits, interpretation of the record (plate tectonics and plate stratigraphy, ancient deep-sea sediments and ancient oceans).
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MGG668 Isotopic Processes in Earth Sciences
3 credits
Offered By Announcement Only
The use of isotopic methods in geology, geochemistry, and geophysics, including oceanography and meteorology. General laws governing isotopic effects in chemical and physical processes are discussed. Specific problems in dating, tracing, and paleotemperatures are also included.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG669 Advanced Geophysics
3 credits
Offered By Announcement Only
The application of geophysical methods, including seismic refraction, seismic reflection, heat flow, gravity, magnetic field and paleomagnetism, to the study of the structure of oceanic crust.
PREREQUISITE: MGG 514.

MGG670 Seismic Exploration
3 credits
Spring Semester
Elementary theory of seismic waves. Topics include techniques of seismic data acquisition and processing, methods of geophysical and geological interpretation of seismic data, application to hydrocarbon exploration, principles of seismic stratigraphy, and other geophysical methods related to hydrocarbon exploration.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG671 Diagenesis of Carbonate Sediments
3 credits
Spring Semester
Application of geochemical, mineralogical, and petrological principles to the behavior of carbonate minerals in sediments. Physical and chemical conditions responsible for cementation, dolomitization, and aragonite-calcite phase transitions are emphasized. Types of depositional and diagenetic information which may be preserved in carbonate sediments. Laboratory studies of sediments are included.
PREREQUISITE: MGG 513; PERMISSION OF INSTRUCTOR.
MARINE AND ATMOSPHERIC SCIENCE
MARINE GEOLOGY & GEOPHYSICS

MGG672 Basin Analysis and Seismic Interpretation  
3 credits Spring Semester  
The processes of basin formation and filling. The principles of seismic facies analysis, seismic sequence stratigraphy, and their applications in basin analysis, groundwater management, and exploration for hydrocarbons are discussed.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG676 Paleoclimatology  
3 credits Fall Semester  
Climatic variables and their effects on geological and biological processes. The development of the paleoclimatic record, modeling of present climate, and the extrapolation to past and future climates are discussed.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG677 Submarine Volcanism and Its Products  
3 credits Fall Semester  
Course topics include classification of volcanoes, their activity and products, submarine versus subaerial volcanoes, historical submarine eruptions, and hydrothermal activities, origin and differentiation of magmas, petrology of submarine, volcanic rocks, geographic distribution of volcanoes, and their tectonic setting are also discussed..  
PREREQUISITE: MGG 520 OR PERMISSION OF INSTRUCTOR.

MGG678 Modeling of Marine Biogeochemical Processes  
3 credits Offered By Announcement Only  
Diagenesis models, including bioturbation and dissolution in the CaCO3 and SiO2 systems. Energy balance climate models and oscillatory states of a simple air-water-ice system are discussed as well as modeling of sedimentation and transport processes.

MGG681 Advanced Studies  
1- 4 credits Offered By Announcement Only  
Special study in areas of special interest to graduate students.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG682 Advanced Studies  
1- 4 credits Offered By Announcement Only  
Special study in areas of special interest to graduate students.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG683 Advanced Studies  
1- 4 credits Offered By Announcement Only  
Special study in areas of special interest to graduate students.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG684 Advanced Studies  
1- 4 credits Offered By Announcement Only  
Special study in areas of special interest to graduate students.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MGG685 Advanced Studies  
1- 4 credits Offered By Announcement Only  
Special study in areas of special interest to graduate students.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MGG700 Practical Training and Internship
1-6 credits Offered By Announcement Only
Supervised internship or off-campus employment for students pursuing the M.A., M.S., or Ph.D. degree. Consists of work related to research in progress.

MGG705 Special Report
1-6 credits Fall & Spring Semester & First & Second Summer Session
Supervised project for students pursuing the Master of Arts degree in Marine Studies. Course consists of a research paper, researched, and written on a topic approved by the student's advisory committee, and presented as a seminar to the student's division. Six credits are required for graduation.
PREREQUISITE: COMPLETION OF 24 GRADUATE COURSE CREDITS.

MGG710 Master's Thesis
1-6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MGG720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MGG 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MGG730 Doctoral Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of MGG 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MGG750 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MARINE & ATMOSPHERIC CHEMISTRY
MAC503 Principles of Marine and Atmospheric Chemistry
3 credits Fall Semester
Introduction to the chemical aspects of the sea and atmosphere chemical composition, physico-chemical properties and relationships, methodology of study, fundamental aspects of marine and atmospheric chemistry.
PREREQUISITE: CHM 111 OR PERMISSION OF INSTRUCTOR.
MAC510 Biogeochemical Exploration of the Major Ocean Basins
3 credits
Fall Semester
This course will have students explore the basic hydrography and biochemistry of the major ocean basins through use of several publicly available global ocean data sets. Each ocean basin will be assessed for biogeochemical features that are unique to that system. By the end of the course, students will have the skills necessary to investigate and interpret marine biogeochemical processes throughout the global ocean.
PREREQUISITE: PERMISSION OF INSTRUCTOR

MAC560 Tropospheric Chemistry I
3 credits
Spring Semester
Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.
PREREQUISITE: MPO 552 OR AN UNDERGRADUATE METEOROLOGY COURSE, OR PERMISSION OF INSTRUCTOR.

MAC581 Special Topics in Marine and Atmospheric Chemistry
1-4 credits
Offered By Announcement Only
Lectures, research projects or direct readings in special topics of marine and atmospheric chemistry.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAC584 Special Topics
1-4 credits
Offered By Announcement Only
Lectures, research projects or directed readings in special topics of Marine and Atmospheric Chemistry.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAC605 Chemical Oceanography
3 credits
Spring Semester
Course consists of lecture and discussions with renowned experts in the major disciplinary foci and topical issues dominating the field of Chemical Oceanography. Topics include the chemistry and biogeochemical processes of the carbon cycle, ocean tracers, photochemistry, and specific marine environments (geothermal vents, anoxic waters, sediments, air/sea interface).
PREREQUISITE: MAC 503 OR PERMISSION OF INSTRUCTOR.

MAC615 Tracers of Oceanographic Processes
3 credits
Spring Semester
Course describes the various tracer techniques used by oceanographers to understand water transport and mixing, sedimentation, gas exchange, nutrient recycling, and transport. Tracers used are both natural occurring and anthropogenic. This course is of interest to students from various disciplines.

MAC620 Marine Physical Chemistry
3 credits
Spring Semester
Physical-chemical principles applied to the marine environment, based on thermodynamics and the study of rate processes.
PREREQUISITE: TWO SEMESTERS OF PHYSICAL CHEMISTRY, CALCULUS THROUGH DIFFERENTIAL EQUATIONS.
MARINE & ATMOSPHERIC CHEMISTRY

MAC625 Marine Biochemical Cycles  
3 credits  
Spring Semester  
Course discusses the roles of bacteria in the transformation of compounds in the marine environment, their functions in the carbon, nitrogen, sulfur, and phosphorus cycles, and transformation of metals. Bacterial activities in the deep-sea environment and their involvement in corrosion and fouling is also discussed.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAC650 Reaction Kinetics and Molecular Dynamics  
3 credits  
Spring Semester  
Theories and experimental techniques for studying kinetics in the gas-phase, association, unimolecular and bimolecular reactions, chain reactions, flames, statistical theories, potential energy surfaces, collision dynamics, kinetics in solution and the solid-state, experimental methods, diffusion-controlled processes, transition state theory, thermal decomposition, and nucleation are discussed.  
PREREQUISITE: THERMODYNAMICS, ELEMENTARY STATISTICAL MECHANICS.

MAC661 Tropospheric Chemistry II  
3 credits  
Fall Semester  
Chemical and physical properties of tropospheric aerosols. Topics include properties of aerosols, dynamics of single aerosol particles, thermodynamics of aerosols, nucleation theory, aerosol growth, heterogeneous processes, dynamics of aerosol populations, and radiative properties of atmospheric aerosols.  
PREREQUISITE: TROPOSPHERIC CHEMISTRY I.

MAC662 Environmental Photochemistry  
3 credits  
Offered By Announcement Only  
Introduction to the principles of photochemistry and their application to understanding sunlight initiated processes in the region of the ocean-atmosphere interface. Organic and inorganic photochemical reactions and subsequent thermal reactions in solution, gas, and solid media are discussed.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAC665 Chemistry of Middle and Upper Atmosphere  
3 credits  
Fall Semester  
Course addresses the structure of the stratosphere, mesosphere, and ionosphere, ion chemistry, aurorae, meteoritic chemistry, the ozone layer and anthropogenic influences, techniques for making atmospheric observations, and development of chemical models with simple transport.  
PREREQUISITE: ELEMENTARY GAS-PHASE KINETICS, THERMODYNAMICS

MAC670 Seminar in Marine and Atmospheric Chemistry  
0-1 credits  
Fall & Spring Semester  
Oral presentation of research and special topics by students, faculty, and visiting scientists.

MAC671 Diagenesis of Carbonate Sediments  
3 credits  
Offered By Announcement Only  
Application of geochemical and mineralogic principles to the behavior of carbonate minerals in sediments. Physical and chemical conditions responsible for cementation, dolomitization, and aragonite-calcite phase transitions are emphasized. Types of depositional and diagenetic information which may be preserved in carbonate sediments are also examined. Laboratory studies of sediments is included. Identical to MGG 671.  
PREREQUISITE: MGG 511 AND 513 (OR 514).
MARINE AND ATMOSPHERIC SCIENCE

MAC681 Advanced Studies
1-4 credits  Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MAC700 Practical Training and Internship
1-6 credits  Offered By Announcement Only
Supervised internships or off-campus employment for students pursuing the M.A., M.S., or Ph.D. degree. Consists of work related to research in progress.

MAC705 Special Report
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Supervised project for students pursuing the Master of Arts degree in Marine Studies. Consists of a paper, researched, and written on a topic approved by the student's advisory committee, and presented as a seminar to the student's division. Six credits are required for graduation.
PREREQUISITE: COMPLETION OF 24 GRADUATE COURSE CREDITS.

MAC710 Master's Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MAC720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAC 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MAC730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of MAC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MAC750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MARINE & PHYSICAL OCEANOGRAPHY

MPO502 Oceanography II (Physical)
2 credits  Fall Semester
The second section of the course core curriculum designed as an integrated and multidisciplinary view of ocean processes, covering the major disciplines of marine science and their applications to the study of the marine environment. To be taken in sequence with Oceanography I - Geological (MGG 501), Oceanography III - Chemical (MAC 501), and Oceanography IV - Biological (MBF 502). This course is for non-MPO majors only.
PREREQUISITE: UNDERGRADUATES REQUIRE PERMISSION OF INSTRUCTOR.
MPO503 Physical Oceanography
3 credits  
Fall Semester
Introduction to properties of seawater, instruments and methods, heat budget, general ocean circulation, formation of water masses, dynamics of circulation, regional oceanography, waves, tides, and sea level. A mathematical and problem solving course for majors in MPO.
PREREQUISITE: PHY 202 OR 206, MTH 310 OR 311, OR PERMISSION OF INSTRUCTOR.

MPO511 Geophysical Fluid Dynamics I
3 credits  
Fall Semester
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.
PREREQUISITE: MPO 551, OR PERMISSION OF INSTRUCTOR.

MPO518 Remote Sensing of the Atmosphere
3 credits  
Offered By Announcement Only
Methods and techniques for remote sensing of the earth's atmosphere. Absorption and scattering of radiation by atmospheric constituents, molecular line or band absorption, and radiative transfer equation are discussed. Application to microwave radar, laser, and optical radar, ground and satellite and optical radar and radiometry, scattering of acoustic waves by turbulence, and to acoustic echo sounding methods are also included.
PREREQUISITE: EEN 533 AND/OR PERMISSION OF INSTRUCTOR.

MPO531 Physical Meteorology
3 credits  
Offered By Announcement Only
Electromagnetic and acoustic wave propagation, absorption, and emission. Application to remote sensing, basic physics of dry aerosols, clouds and precipitation, fundamentals of atmospheric electricity, charge separation processes, and electrical field effects are also discussed. Other topics include air pollution physics, dispersal, and removal of particulate and gaseous materials from natural and anthropogenic sources.
PREREQUISITE: BASIC CALCULUS AND ORDINARY DIFFERENTIAL EQUATIONS.

MPO532 Broadcast Meteorology
3 credits  
Spring Semester
Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on communication skills, computer graphics, and on-camera delivery.
PREREQUISITE: MPO 551 OR CONSENT OF INSTRUCTOR

MPO542 Physics of Remote Sensing I - Passive Systems
3 credits  
Fall Semester
Course discusses basic physical principles of remote sensing. Topics include an introduction, sampling issues, fundamental laws of electromagnetic waves, passive sensing, active sensing, and a brief survey of satellite sensors.
PREREQUISITE: PERMISSION OF INSTRUCTOR

MPO551 Introduction to Atmospheric Science
3 credits  
Fall Semester
Thermodynamics of dry and moist processes; elementary dynamical meteorology; description of weather systems and phenomena on all scales; structure and mechanics of the general circulation. Corequisite: MPO 552.
PREREQUISITE: PHY 206, MTH 310 OR 311, OR PERMISSION OF INSTRUCTOR.
MPO552 Synoptic Meteorological Laboratory
1 credit  
Analysis of the structure of atmospheric systems.  
PREREQUISITE: PHY 206, MTH 310 OR 311, OR PERMISSION OF INSTRUCTOR.

MPO561 Tropical Atmosphere and Ocean
3 credits  
Spring Semester
Observed structure of large-scale tropical circulations, including the Trades, the intertropical Convergence Zone, the Walker circulation, and equatorial wave disturbances. An overview of tropical climate, including El Nino/Southern Oscillation, and tropical monsoons is included as well as the formation, structure, and dynamics of tropical cyclone interactions between tropical convection and large-scale circulations, equatorial waves, and flow instabilities.  
PREREQUISITE: MPO 511, 551, OR PERMISSION OF INSTRUCTOR.

MPO562 Synoptic Scale Meteorology
3 credits  
Offered By Announcement Only
Course topics include the structure and behavior of cyclones, anticyclones, and other temperate latitude synoptic scale disturbances. Objective analysis of synoptic observations, perturbation, stability analysis of large scale synoptic motions, and barotropic and baroclinic waves are also analyzed.  
PREREQUISITE: MSC 405 OR MPO 551 AND PERMISSION OF INSTRUCTOR.

MPO563 Mesoscale Meteorology and Severe Storms
3 credits  
Offered By Announcement Only
Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.  
PREREQUISITE: MSC 405 OR MPO 551 AND PERMISSION OF INSTRUCTOR.

MPO581 Special Topics
1-4 credits  
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO582 Special Topics
1-4 credits  
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO583 Special Topics
1-4 credits  
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO584 Special Topics
1-4 credits  
Offered By Announcement Only
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
**MPO585 Special Topics**  
1-4 credits, Offered By Announcement Only  
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**MPO601 Seminars in Meteorology and Physical Oceanography**  
1 credit, Fall & Spring Semester

**MPO611 Geophysical Fluid Dynamics II**  
3 credits, Spring Semester  
The focus of this course is on the effects of stratification, on time variable phenomena, and on the interaction between large-scale circulation and mesoscale eddies. Course topics include quasi-geostrophic scale analysis, Rossby waves, barotropic and baroclinic instability, wave-mean flow interaction and non-geostrophic waves.  
PREREQUISITE: MPO 511.

**MPO612 Large Scale Ocean Circulation: Models and Observations**  
3 credits, Spring Semester  
Course topics include theoretical models of the oceanic current systems, wind-driven and thermohaline circulation, effects of bottom topography, and lateral bounding.  
PREREQUISITE: MPO 611 OR PERMISSION OF INSTRUCTOR.

**MPO615 Numerical Weather Prediction**  
3 credits, Offered By Announcement Only  
Review of fundamental equations and principal wave solutions. Course topics include finite differences, the filtering problem, the equivalent-baratropic model, multi-level primitive equation models, model initialization and verification, and models currently used by the weather service.  
PREREQUISITE: MPO 551.

**MPO621 Waves and Tides I**  
3 credits, Fall Semester  
Systematic development of equations governing long waves in the ocean. Course topics include tidal dynamics and tide-generating forces, inertio-gravity, planetary, and longs, presurface waves, waves trapped and scattered by topography, and equatorial waves.  
PREREQUISITE: MPO 511 OR PERMISSION OF INSTRUCTOR.

**MPO623 Statistical Analysis of Geophysical Data**  
3 credits, Spring Semester  
Review of statistical methods. Course topics include statistical description of wave fields, especially inertio-gravity waves, processing methods for general and hydrodynamically conditioned signals, time series analysis, objective analysis, and empirical spectral analysis.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**MPO624 Statistical Modeling of Geophysical Fields**  
3 credits, Spring Semester  
An advanced course in statistical modeling, analysis, and assimilation of geophysical data. Emphasis is placed on practical applications, computer software, and new nonstandard techniques.  
PREREQUISITE: ONE LINEAR ALGEBRA CLASS AND MPO 623 OR PERMISSION OF INSTRUCTOR.
MPO631 Air-Sea Interaction  
3 credits  
Spring Semester  
PREREQUISITE: MPO 611 OR PERMISSION OF INSTRUCTOR.

MPO632 Climate Dynamics  
3 credits  
Offered By Announcement Only  
Basic understanding of the Earth's Climate System and its variability on time scales ranging from weeks to millennia. Topics include internal atmospheric variability, coupled ocean-atmosphere interactions, and the theory, observations and modeling of climate change.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: MPO 551.

MPO633 The Marine Atmospheric Boundary Layer  
3 credits  
Spring Semester  
The marine atmospheric boundary layer plays a key role in the two-way interaction between the atmosphere and the ocean. This course will focus on describing and explaining marine atmospheric boundary layer structure and its evolution. This will include an emphasis on the cloud-topped boundary layer (marine stratocumulus) and the trade-wind boundary layer. Thus, in addition to turbulence, the physical processes considered in this treatment of the marine boundary layer will include shallow moist convection and radiation. The course will start with a basic description of the atmospheric boundary layer that will include a review of the relevant dynamics and thermodynamics. More advance topics will be covered in the second half of the course. Although the course will be a series of formal lectures, students will independently research selected topics, prepare a short review paper, and give an oral summary class.  
PREREQUISITE: STUDENTS ENROLLING IN THIS CLASS SHOULD HAVE A BASIC KNOWLEDGE OF ATMOSPHERIC THERMODYNAMICS AND DYNAMICS (MPO 511 OR 551 OR EQUIVALENT).

MPO650 Coastal Ocean Circulation  
3 credits  
Spring Semester  
Circulation and stratification in the coastal ocean, including the dynamics of wind-driven, tidally-driven, and buoyancy-driven mean and transit flows over variable topography with density stratification are discussed. Design of numerical models and observing systems for coastal ocean circulation are also in included. (AMP 650).  
PREREQUISITE: AMP 535, 575 OR 576 AND PERMISSION OF INSTRUCTOR.

MPO651 Dynamic and Modeling of Weather and Climate Systems  
1 credit  
Fall & Spring Semester  
This course will cover a number of advanced topics not currently covered in other courses, such as mesoscale meteorology, mesoscale modeling, cloud physics, and storm dynamics.  
PREREQUISITE: MPO 551.

MPO662 Computer Models in Fluid Dynamics  
3 credits  
Spring Semester  
Course topics include numerical techniques of dealing with dynamic problems in meteorology and oceanography. Dynamic prediction models, initial data conditioning, computational stability, and error estimates are also included.  
PREREQUISITE: MPO 611 AND KNOWLEDGE OF COMPUTER PROGRAMMING.
MPO663 Convective and Mesoscale Meteorology
3 credits
Spring Semester
This course begins by establishing the dynamics, thermodynamics, and cloud microphysics fundamentals needed to understand convective clouds and storms. We also review the types of observations, both in situ and remote sensing, available for studying these storms. Observations of both tropical convection and more-vigorous midlatitude severe storms are presented and compared to numerical modeling results, with an emphasis on scientific understanding.
PREREQUISITE: MPO 551 OR EQUIVALENT.

MPO664 Atmospheric and Oceanic Turbulence
3 credits
Spring Semester
Structure and dynamics of planetary boundary layers, turbulent transport processes, Fickian and statistical theories of turbulence, influence of stratification, and rotation on turbulent motion are discussed.
PREREQUISITE: MPO 611 OR PERMISSION OF INSTRUCTOR.

MPO665 General Circulation of the Atmosphere
3 credits
Spring Semester
Course topics include structure and behavior of planetary scale motions, energy, momentum, and moisture budgets of the general circulation, and models of the general circulation and climatic change.
PREREQUISITE: MPO 611 OR PERMISSION OF INSTRUCTOR.

MPO668 ENSO Dynamics, Prediction and Predictability
3 credits
Fall Semester
This course will provide students with a comprehensive observational and mechanistic understanding of the El Nino and the Southern Oscillation (ENSO) phenomena and how ENSO impacts the natural variability of the global climate system. Topics will include: Observations and theories of the seasonal and interannual changes in the ocean circulation and temperature, and interactions with the atmosphere; equations of motion and theories of tropical ocean and atmosphere circulation; tropical wave dynamics; large scale air-sea coupling; mechanisms for ENSO: delayed oscillator theory, recharge oscillator theory, slow SST modes; ENSO prediction and predictability; ENSO-monsoon-Indian Ocean intersections; Global climate response to ENSO; decadal ENSO variability; ENSO in a changing climate. This course has a phenomenological focus, which complements current MPO course offerings. In particular, students who have taken dynamic and physical meteorology, ocean general circulation or geophysical fluid dynamics will be exposed to how general theory (e.g., wave dynamics) relates to particular phenomena and current research foci. In addition, student will have the opportunity to design and implement numerical hypothesis testing experiments.
PREREQUISITE: MPO 511 OR EQUIVALENT

MPO671 Advanced Studies in Meteorology and Physical Oceanography
1-4 credits Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO672 Advanced Studies
1-4 credits Offered By Announcement Only
Supervised study of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
MARINE AND ATMOSPHERIC SCIENCE
MARINE & PHYSICAL OCEANOGRAPHY

MPO673 Advanced Studies in Meteorology and Physical Oceanography
1-4 credits   Offered By Announcement Only
Supervised study in areas of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO674 Advanced Studies
1-4 credits   Offered By Announcement Only
Supervised study of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO675 Advanced Studies
1-4 credits   Offered By Announcement Only
Supervised study of special interest to graduate students.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MPO700 Practical Training and Internship
1-6 credits   Offered By Announcement Only
Supervised internship or off-campus employment for students pursuing the M.A.,
M.S., or Ph.D. degree. Consists of work related to research in progress.

MPO705 Special Project
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Supervised project for students pursuing the Master of Arts degree. Consists of
a paper, researched and written on a topic approved by the student's advisory
committee, and presented as a seminar to the student's division. Six credits are
required for graduation.
PREREQUISITE: COMPLETION OF 24 GRADUATE COURSE CREDITS.

MPO706 Special Project-Post Candidacy
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Used to establish student has been admitted to candidacy for the MA degree. The
student working on his/her research paper enrolls for credit not to exceed 6 combined
with 705. No credit is awarded until final paper has been accepted.

MPO710 Master's Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments
not to exceed six, as determined by his/her advisor. Credit is not awarded until
the thesis has been accepted.

MPO715 Master's Thesis-Post Candidacy
1-6 credits  Fall & Spring Semester & First & Second Summer Session
Used to establish student has been admitted to candidacy for the MS degree. The
student working on his/her Master's Thesis enrolls for credit not to exceed 6
combined with 710. Credit is not awarded until the Thesis has been accepted.

MPO720 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree
after the student has enrolled for the permissible cumulative total in MPO 710
(usually six credits). Credit not granted. May be regarded as full time residence.
MPO730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as
determined by his/her advisor but not for less than a total of 12. Not more than
12 hours of MPO 730 may be taken in a regular semester, nor more than six in a
summer session. Where a student has passed his/her (a) qualifying examinations,
and (b) is engaged in an assistantship, he/she may still take the maximum allowable
credit stated above.

MPO740 Doctoral Dissertation-Post Candidacy
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Used to establish student has been admitted to candidacy for the Ph.D degree. The
student working on his/her Doctoral Dissertation enrolls for credit for a minimum
of 12 combined with 730. Credit is not awarded until Dissertation has been accepted.

MPO750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been
enrolled for the permissible cumulative total in appropriate doctoral research.
Credit not granted. May be regarded as full-time residence as determined by the
Dean of the Graduate School.

RSMAS-GENERAL
RSM500 Research Diving Techniques
3 credits                                              Offered By Announcement Only
This course is designed to introduce students to the practices and policies of
scientific diving. The object is to prepare students to use SCUBA as a research
tool for the marine sciences. The course content will qualify students as RESEARCH
DIVERS under the UM/RSMAS Scientific Diving Program and will meet the standards
set by the American Academy of Underwater Sciences (AAUS).

RSM510 Environmental Ethics
3 credits                                                             Fall Semester
This course will introduce students to a variety of key issues and concepts in
environmental ethics. The course will be a joint scientific and philosophic collaboration,
exploring the ethical dimensions of controversial and emerging issues in biotechnology
and the environment. After students are exposed to the scientific background of
various actual case studies focusing on current environmental and social impact,
the ethical and philosophical issues raised by the discussions will be explored
using the tools and methods of analytic philosophy. The course will develop the
student's ability to construct and evaluate philosophical arguments in the field
of environmental ethics, and to reason philosophically on numerous questions in
contemporary applied ethics.
PREREQUISITE: ALTHOUGH THERE ARE NO PHILOSOPHY PREREQUISITES FOR THIS COURSE, PERMISSION
OF INSTRUCTOR IS REQUIRED.

RSM512 Statistics for Environmental Management
3 credits                                                             Fall Semester
This course covers the statistical theory, tools, and methods required for management
analysis and improvement, emphasizing marine science applications.

RSM520 Climate and Society
3 credits                                                             Spring Semester
This course is designed to provide students from different disciplinary backgrounds
with an overview of physical processes, general concepts and policy debates surrounding
climatic issues.
RSM545 Scientific Communication
3 credits                      Spring Semester
PREREQUISITE: MPS STATUS OR PERMISSION FROM INSTRUCTOR/PREFERENCE WILL BE GIVEN TO MPS STUDENTS

RSM560 Investigating Nature through Science Teacher Active Research (INSTAR)
2 credits                      First & Second Summer Session
This is a graduate level marine science course that provides a hands-on approach to education focused on geological and meteorological research in South Florida environment. The course provides training in marine science content, field techniques, state-of-the-art field, computer technology, and science educational reform measures. Participants work collaboratively with marine and atmospheric scientists to bring cutting edge marine science content and research to the classroom focusing on the following coastal themes: geology, hydrology and meteorology. The course will be applicable to all graduate and qualified undergraduate marine science students, per-service teachers in colleges of education, and in-service teachers in school systems throughout the country.

RSM561 INSTAR for Physical Sciences Follow-up
1 credit                      First & Second Summer Session
This is a follow-up course for participants in MGG 560 and is designed to test the application of the methods learned in MGG 560 to the teaching of high school students. Participants are expected to show evidence of teaching material learned in MGG 560.
PREREQUISITE: RSM 560.

RSM562 Investigating Nature through Science Teacher Active Research in Biological Science
2 credits                      First & Second Summer Session
This is a graduate level marine science course that provides a hands-on approach to education focused on marine science research and technology in South Florida coastal environments. The course provides training in marine science content, field techniques, state-of-the-art field and computer technology, and science educational reform measures. Participants work collaboratively with marine scientists to bring cutting edge marine science content and research to the classroom focusing on the following coastal themes: coral reefs and marine fisheries. The course will be applicable to all graduate and qualified undergraduate marine science students, per-service teachers in colleges of education, and in-service teachers in school systems throughout the country.

RSM563 INSTAR Biological Sciences Follow-up
1 credit                      First & Second Summer Session
This is a follow-up course for participants in RSM 562 and is designed to test the application of the methods learned in RSM 562 to the teaching of high school students. Participants are expected to show evidence of teaching material learned in RSM 562.
PREREQUISITE: RSM 562.

RSM565 Fish Ecology and Oceanography
3 credits                      Fall Semester
This course is intended to introduce students to key biological, ecological, oceanographic, and climatic processes of direct relevance to fishery species, with a view toward development of an ecosystem perspective.
RSM570 Carbon and Climate
3 credits Offered By Announcement Only
This course is designed to provide students from different disciplinary backgrounds with an overview of the underlying processes, concepts, and policy debates surrounding the issue of carbon emissions and climate change. Individual faculty from RSMAS and elsewhere will lecture on cutting-edge research areas. Topics covered include: climate modeling; and climate policy.
PREREQUISITE: GRADUATE OR SENIOR STANDING AT RSMAS, OR PERMISSION OF INSTRUCTOR.

RSM571 Special Topics
1- 4 credits Offered By Announcement Only
Lectures and research projects in special topics related to Marine and Atmospheric Science.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

RSM572 Special Topics
1- 4 credits Fall & Spring Semester & First & Second Summer Session
Lectures and research projects in special topics related to Marine and Atmospheric Science.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

RSM600 Research Ethics
0 credit Fall Semester
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. The University of Miami Rosenstiel School has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.

RSM610 Marine and Atmospheric Science Colloquia
0 credit Fall & Spring Semester
An interdisciplinary series of seminars presented by various faculty on current research projects. Course consists of one 1-hour seminar per week. All students are required to register for this course at least once and be expected to attend two consecutive semesters.

RSM620 Object-oriented Programming and Agent-based Modeling
3 credits Spring Semester
Basics of object-oriented programming using Java, including Java statistical packages, and hands-on development of agent-based simulation models for social, economic, biological and physical sciences. Includes introductions to automaton and individual-based models.
PREREQUISITE: STUDENTS MUST BE COMMITTED TO RAPID LEARNING TO ADVANCED LEVELS IN A SHORT TIME. ONLY 8 STUDENTS PER CLASS DUE TO FACILITY LIMITATIONS.

RSM671 Advanced Studies
1- 4 credits Offered By Announcement Only
Supervised study or advanced special topics.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
BMB501 Senior Seminars
1 credit  
Fall & Spring Semester
Students attend seminars of their own choice by visitors. Faculty or graduate students on recent research topics in Biochemistry and Molecular Biology or any other discipline in the basic biomedical sciences. Students write short reports on these seminars and critically evaluate the presentations. This course can be taken more than once.  
PREREQUISITE: BMB 506

BMB506 Principles of Biochemistry and Molecular Biology
0-3 credits  
Fall Semester
Protein structure and function, enzyme mechanism and kinetics, and metabolism, focusing on energy metabolism and central concepts of metabolic regulation and of molecular biology including nucleic acid structure, protein synthesis, and DNA replication. (Not open to students with credit in BMB 401 or 406; for undergraduate honors credit or graduate student not majoring in biochemistry.  
PREREQUISITE: A GRADE OF B- OR HIGHER IN CHM 202 IS A PREREQUISITE

BMB507 Proteins and Enzymes
3 credits  
Spring Semester
Course analyzes the folding and binding of proteins, kinetics and mechanisms of enzyme action. For honors undergraduates. Not open to students in BMB 407.  
PREREQUISITE: BMB 406 OR 506 OR PERMISSION OF INSTRUCTOR; FOR UNDERGRADUATE HONORS CREDIT OR GRADUATE STUDENTS NOT MAJORING IN BIOCHEMISTRY.

BMB509 Molecular Biology of the Gene I
3 credits  
Fall Semester
Biochemical processes involved in the propagation and expression of genetic information in both prokaryotes and eukaryotes. Basic cellular processes of DNA replication, repair, genetic recombination, RNA transcription and processing, protein synthesis, control of gene expression, cell differentiation, and recombinant DNA technology. Reading includes both textbook assignments and original research papers.  
PREREQUISITE: BMB 506 OR PERMISSION OF INSTRUCTOR

BMB511 Topics in Applied BCH and Molecular Biology
1-3 credits  
Fall & Spring Semester & First & Second Summer Session
Selected topics from the fields of applied and pure biochemistry and molecular biology taught as a tutorial. Permission from Dr. Richard Myers is required for this course.  
PREREQUISITE: BMB 406 OR 506 AND PERMISSION OF INSTRUCTOR.

BMB545 Research Problems in Biochemistry and Molecular Biology
2-3 credits  
Fall & Spring Semester & First & Second Summer Session
Laboratory research problems in various fields of biochemistry, including literature search, experiment design, data gathering, and evaluation or results. Permission from Dr. Richard Myers is required for this course.  
PREREQUISITE: BMB545 (IN THE FIELD, REQUIRES PERMISSION OF THE INSTRUCTOR TO REGISTER, BUT NOT LIMITED TO ONLY ONE STUDENT).

BMB601 Research Journal Club.
1 credit  
Fall & Spring Semester
All registered BMB students must participate in the Journal Club/Seminar. Students are required to critically review published paper(s) of their choice and describe in detail the findings described therein. Senior students will present their own research.  
PREREQUISITE: NONE
BMB609 Advanced Biochemistry and Molecular Biology
3 credits
Fall Semester
This course is a continuation course for BMB 616. It covers essentially the same topics as BMB 616 but at a more advanced level. It brings the student to the forefront of research in Molecular Biology. The course material is discussed exclusively in the form of original research papers. Based on this experience, students are required to propose experimental approaches to biological problems and defend them.
PREREQUISITE: BMB 616.

BMB610 Advanced Topics in Biochemistry
1-5 credits
Fall & Spring Semester
Senior seminars designed to cover in depth recent developments in the field of biochemistry with the purpose of keeping advanced graduate students abreast with new theoretical and experimental findings. General subjects such as mechanisms of enzyme action, oxidative phosphorylation, active transport, metabolic controls and disorders, steroid biochemistry, and biochemical genetics are discussed. The detailed program is announced annually. Majors in Biochemistry and Molecular Biology are expected to take this course each semester in their second and third years.
PREREQUISITE: BMB 506 AND DEPARTMENTAL PERMISSION.

BMB614 Molecular Genetics
2 credits
Spring Semester
This course deals with mechanisms and fundamental concepts of genetic inheritance. The first part of the course is devoted to the genetics of bacteria and bacteriophages. Topics include genetic complementation, recombination, suppression, transposition, conjugation, transformation, transduction, and regulation of prokaryotic gene expression. The second part of the course covers selected topics in eukaryotic genetics (including molecular genetics of yeast, mitochondria, Drosophila, mice and humans). Problem solving is emphasized in homework and exams. The objective of the course is to provide students with an appreciation of the value of molecular genetics as a tool they can use to solve a wide variety of problems in biomedical research.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BMB615 Structural biology and applications to drug discovery
2 credits
Spring Semester
This course focuses on the relationships between structure and function in biological macromolecules, and how this knowledge has led to the discoveries of new drugs.

BMB616 Macromolecular Biophysics and Drug Design
4 credits
Spring Semester
This course focuses on the relationships between structure and function in biological macromolecules. The topics discussed fall into three general areas: nucleic acid-protein interactions; membrane proteins; and components of the immune system.

BMB617 Readings in Molecular Biology
1 credit
Fall Semester
Discussion of classical papers in molecular biology beginning with the concept of the gene and continuing into modern studies. Format consists of student presentations and group discussions.
PREREQUISITE: BMB 506 OR EQUIVALENT, OR PERMISSION OF INSTRUCTOR.
BMB631 Special Work
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Special work, lecture, or laboratory or a combination of these, as determined by advisor in accord with student's individual interest.
PREREQUISITE: APPROVAL OF COMMITTEE.

BMB645 Research Problems in Biochemistry, Cell and Molecular Biology
2-3 credits  Fall & Spring Semester & First & Second Summer Session
Laboratory research problems in various areas of biochemistry, cell biology, and molecular biology, including literature search, experimental design, data gathering, and evaluation of results. This course is the mechanism by which graduate laboratory rotations are done in preparation for selection of Ph.D. mentor.
PREREQUISITE: BMB 506 OR EQUIVALENT OR PERMISSION OF INSTRUCTOR.

BMB680 Research Ethics
0 credit  Fall Semester
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.
PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR.

BMB710 Master's Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

BMB720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in BMB 710 (usually six credits). Credit not granted. May be regarded as full time residence.

BMB730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BMB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

BMB740 Doctoral Dissertation- Post Candidacy
1-12 credits  Fall Semester
PREREQUISITE: NONE
BMB750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

BIOSTATISTICS

BST510 Introduction to Statistical Collaboration
4 credits                  Fall & Spring Semester
This course will introduce students to the art of statistical collaboration. The class will be highly interactive and will include an orientation to the process of statistical collaboration, individual and group assessment of the same consulting projects, and the completion of an individual "live" statistical collaboration project. For the final, live collaboration project, students will meet with the faculty and/or staff of the University of Miami who contributed their particular assigned consulting project(s). Students will need to research different statistical methods to find the best, feasible approach to address the particular consulting project. Students will present their plans for their own consulting projects in class and also help in the discussion/exploration of approaches for other student's consulting projects during class time. After finalization of the analysis plan the student will complete the statistical analyses described within the plan and create a final report.
PREREQUISITE: COMPLETE OF EPH 501, 502 OR PERMISSION OF INSTRUCTOR/PROGRAM

BST525 Survey of Statistical Computing
3 credits               Spring Semester
This three credit course aims to familiarize students with the basic use of SAS and R for routine statistical analysis and prepare them for more advanced courses and/or thesis research. Statistical computation will be illustrated with examples in medical research, biological study and business. The focus of the course is on the computing environment, therefore a thorough discussion of statistical theories will not be provided. It is expected that students will already be prepared statistically.
PREREQUISITE: EPH 501, 502, 603 (OR PERMISSION OF INSTRUCTOR)

BST575 Introduction to Generalized Linear Models
3 credits               Spring Semester
GLM's are an extension of the standard linear model to permit more general outcomes. In this class, we will study GLM's in detail. By the end of the course, we will examine recent extensions of GLMs. We will provide a unifying framework for formulation, estimation and inference. Throughout the course, real data applications from medicine will be used and extensive use of the R programming language will be made to implement ideas discussed.
PREREQUISITE: EPH 501, 502, 603

BST630 Longitudinal and Multilevel Data
3 credits            Fall Semester
PREREQUISITE: EPH 501 AND 502 AND INSTRUCTOR PERMISSION

BST640 Modern Numerical Multivariate Methods
3 credits            Spring Semester
PREREQUISITE: COMPLETION OF EPH 603/605 OR BST 525 OR BST 575, PERMISSION OF INSTRUCTOR
BST650 Topics in Biostatistical Research
1 credit  Fall & Spring Semester
PREREQUISITE: MS IN BIOSTATISTICS & PHD IN BIOSTATISTICS STUDENTS (BST) OR PERMISSION OF INSTRUCTOR

BST730 Doctoral Dissertation (pre-candidacy)
1-12 credits  Fall & Spring Semester & First & Second Summer Session

BST740 Doctoral Dissertation (Post-Candidacy)
1-12 credits  Fall & Spring Semester & First & Second Summer Session

BST750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session

CANCER BIOLOGY

CAB601 CAB Student Seminar
1 credit  Fall Semester
This course offers instruction about the fundamental elements of scientific speaking. The ability to communicate effectively is essential for scientists. Using a series of sample-based lectures and discussion groups, students will be exposed to various oral presentations. In addition, during the first year, all students will be asked to present a 20 minute seminar following each of their rotation projects. Once students enter a research laboratory, students will be required to present their research each year as a one hour seminar.

CAB602 Approaches to Understanding Cancer
2 credits  Fall Semester
This interactive lecture course will teach students specific methodologies used to solve problems in cancer research. By using specific examples of basic and clinical avenues of research students will be taught the use of various approaches to address problems in cancer biology, i.e., reasoning and logic. The overall goal is to expose students to how different approaches are used and integrated to solve specific research questions and the critically interpret experimental design and data. The use and advantages of various approaches, e.g., biochemical, molecular, genetic, immunological, epidemiology, and the use of model systems e.g., cell and animal models will be discussed. Methods used in clinical trials will be presented. Emphasis will be placed on research strategy and design, limitations and strengths of various techniques.

CAB603 CAB Clinical Oncology
2 credits  Fall Semester
Year 1: During the first year students will attend a series of lectures by CAB physician mentors that will discuss clinical aspects of cancer treatment for specific patients with an emphasis on continuity of care of newly diagnosed patients between disciplines. Students will attend existing Sylvester Cancer Center tumor boards on a rotating monthly basis to understand how the treatment of cancers varies depending on histology.
CAB604 Scientific Reasoning and Logic in Cancer Biology: Bench to Bedside
3 credits Spring Semester
One aspect of the Cancer Biology PhD Program is to train students in the application of basic research to clinical problems i.e., translational research. The goal of this course is to expose students to the scientific reasoning the logic behind solving problems in clinical cancer research. The philosophy of this course is to teach students how knowledge obtained from basic research laboratories is applied to clinical problems including prevention, diagnosis, prognosis and therapeutic treatment of cancer. This course has 11 weekly segments, each of which has a different theme plus student presentations.

CAB605 Tumor Boards
1 credit Fall Semester
In the spring of their first year, students will attend Tumor Boards at UM/ Sylvester. This treatment planning approach in which a number of oncologists who are experts in different specialties review and discuss the medical condition and treatment options of a patient. It will allow the students to interact with physicians and learn how pathologists, surgeons, medical oncologists and radiation oncologists review specific cases and create customized treatment plans. Examples of cases include patients with Solid tumors (i.e., Breast, Colon, Liver, Prostate), Hematologic tumors (i.e., Leukemia, Lymphoma), and Sarcomas (i.e., osteosarcoma, soft tissue).

CAB606 Seminar Courses I
1 credit Fall & Spring Semester
FIRST YEAR students must attend the Program seminars and will be graded pass/ fail based on their attendance.

CAB611 Accelerated Basic Science Medical Curriculum
1-18 credits Fall Semester
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. Single grade will be entered on the graduate transcript for this course.
PREREQUISITE: ADMISSION TO THE COMBINED M.D. /PH. D. DEGREE PROGRAM

CAB612 Special Topics in Cancer Research - Viral Oncology and Tumor Immunology Module
2 credits Spring Semester
This module emphasized state of the art knowledge of each discipline, student participation in a problem based learning context. Topics include viral carcinogenesis and epidemiology, Hepatitis, Herpes, Epstein Barr and Human Papilloma Viruses, Kaposi's Sarcoma, viral induced lymphomas, viral oncolysis, and mechanisms of anti-tumor immunity.
PREREQUISITE: NONE

CAB613 Special Topics in Cancer Research - Molecular Cancer Therapeutics Module
2 credits Spring Semester
This module explores the signal transduction pathways critical for cancer cell proliferation and survival that may provide new therapeutic targets, approaches for identification and validation of molecular targets within these pathways. Students are introduced to the strategies used in the discovery and design of biological and drug based therapies, and the implementation of clinical trials.
PREREQUISITE: NONE
CAB614 Special Topics in Cancer Research - Cancer Epidemiology, Prevention & Behaviora
2 credits  
Spring Semester
This module explains the goals and techniques of researchers in the fields of cancer epidemiology and biobehavioral oncology. These include understanding the social, environmental, and biological reasons for cancer disparities among different populations. Cancer epidemiologists seek to define the molecular and genetic mechanisms of cancer risk and progression with the aim of developing predictive models in treatment response. The following themes in biobehavioral oncology are explored: psychosocial intervention, biobehavioral and psychosocial intervention to the community; health behavior change and biobehavioral mechanisms in persons at risk for and diagnosed with cancer; predictors of QOL and late effects of cancer treatment and development of preventative interventions.
PREREQUISITE: NONE

CAB615 Special Topics in Cancer Research - Breast and Genitourinary Cancers Module
2 credits  
Spring Semester
This module highlights key aspects of the cellular and molecular mechanisms of breast, prostate, renal and bladder cancers as well as providing an overview of cancer detection, diagnosis, and therapy. Emerging research opportunities are identified. Topics include estrogen receptor and androgen receptor signaling, cancer progression, endocrine therapies and resistance. Key signaling pathways and the biology of metastasis will be discussed.
PREREQUISITE: NONE

CAB617 Advance Course on Viruses, Immunity, and Cancer
3 credits  
Spring Semester
This is an advanced course on Viral Oncology and Tumor Immunology and Immunotherapy that emphasizes state of the art knowledge of each discipline, student active participation in a problem based learning-like context, and national expert visitor teaching. The structure of the classes is based on the concept of Problem Based Learning.
PREREQUISITE: OPEN TO 2ND YEAR STUDENTS FROM ANY GRADUATE PROGRAM

CAB620 Dialogues with Cancer Clinicians (PIBS Module)
1 credit  
Fall & Spring Semester
This module features physician mentors of the Cancer Biology Graduate Program who will discuss clinical aspects of cancer treatment with an emphasis on continuity of care of newly diagnosed patients between disciplines and will articulate unmet clinical needs and questions. Mentors will provide clinical perspectives on their areas of specialization as it relates to patient care including diagnosis, staging, therapy, and outcomes.
PREREQUISITE: NONE

CAB630 Colloquia in Clinical Cancer Research
2 credits  
Fall Semester
Students will attend Colloquia at which faculty members present seminars on their current clinical research topics and methods of investigation. Here students will learn the rationale and methodologies that researchers are using to approach a problem in clinical cancer research. Topics will cover the areas of prevention, control, diagnosis (molecular and microscopic pathology), prognosis and therapeutics.
CAB631 Lab Rotations  
1-6 credits Fall Semester  
During the first year students will be required to carry out three research rotations. The students will then select their PhD advisor in June of their first year. The evaluation will be based on an oral presentation (20 minutes and 10 minutes for questions) by the student to a committee consisting of three faculty members, other than the rotation advisor. The rotation mentor will submit a confidential written evaluation of the student in a standard format to be designed by the Curriculum committee. It will include a statement regarding the willingness of the mentor to accept the student into the lab for their thesis research.

CAB650 Logic and Reasoning in Translational Cancer Research: Bench to Bedside Part 1  
3 credits Spring Semester  
An important facet of the Cancer Biology PhD Program is the training of students in the interrelationships between basic research and clinical medicine i.e., translational research. The goal of this advanced course is to expose students to the scientific reasoning and logic underlying problem solving in clinical cancer research. This course will instill in students the ability to integrate information and develop the thought processes necessary to critically evaluate information in the literature and experimental approaches, conceptualize problems in the field and identify areas for scientific exploration. This course is divided into two parts. In Part I Bench to bedside, students learn how the knowledge obtained from basic research laboratories is applied to clinical problems including prevention, diagnosis, prognosis and therapeutic treatment of cancer. Specific examples of translational research, i.e., laboratory to clinic will be emphasized. In part II Bedside to Bench, students learn the key role of clinical observation in identifying basic research problems. PREREQUISITE: MDB 665, MINIMUM OF TWO SPECIAL TOPICS MODULES (CAB 612, 613, 614, 615), CAB 605, CAB 620

CAB651 Logic and Reasoning in Translational Cancer Research: Bedside to Bench Part 2  
3 credits Fall & Spring Semester  
An important facet of the Cancer Biology PhD Program is the training of students in the interrelationships between basic research and clinical medicine i.e., translational research. The goal of this advanced course is to expose students to the scientific reasoning and logic underlying problem solving in clinical cancer research. This course will instill in students the ability to integrate information and develop the thought processes necessary to critically evaluate information in the literature and experimental approaches, conceptualize problems in the field and identify areas for scientific exploration. This course is divided into two parts. In Part I Bench to bedside, students learn how the knowledge obtained from basic research laboratories is applied to clinical problems including prevention, diagnosis, prognosis and therapeutic treatment of cancer. Specific examples of translational research, i.e., laboratory to clinic will be emphasized. In part II Bedside to Bench, students learn the key role of clinical observation in identifying basic research problems. PREREQUISITE: MCP 665, MINIMUM OF TWO CAB 610 MODULES, CAB 605, CAB 620
CAB680 Research Ethics
0 credit  Fall Semester
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.
PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR.

CAB710 Master's Thesis
1-6 credits  Fall & Spring Semester & First Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

CAB720 Master's Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in CAB 710 (usually six credits). Credit not granted. May be regarded as full time residence.

CAB730 Dissertation Research
1-12 credits  Fall Semester
Required of all candidates for the Ph.D. The student will enroll for credits as determined by the Office of Graduate Studies but not less than a total of 24. Not more than six in the summer. If a student has a) passed qualifying exam(s) and (b) is engaged in an assistantship, he/she may still take the maximum allowable credits.

CAB740 Doctoral Dissertation- Post Candidacy
1-5 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: CAB 730

CAB750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit is not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
PREREQUISITE: CAB 740

EPIDEMIOLOGY & PUBLIC HEALTH

EPH501 Medical Biostatistics I
3 credits  Fall Semester
Introduction to probability and statistics including descriptive statistics, tests of hypothesis, regression analysis, contingency tables, nonparametric tests, and life tables. Students gain hands-on experience in the analysis of medical data using several computer systems and at least one of the different statistical packages such as: BMDP, SAS, PSTAT, SYSTAT, and Minitab.
PREREQUISITE: ABILITY TO USE A SPREADSHEET PROGRAM ON A PERSONAL COMPUTER. OPEN ONLY TO EPH MAJORS.
EPH502 Biostatistics II
3 credits
Spring Semester
Continuation and elaboration of EPH 501. Topics include design of factorial experiments, analysis of variance and variance components, multiple linear regression, and life tables.
PREREQUISITE: EPH 501 OR PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH503 Applied Data Management and Analysis
3 credits
First & Second Summer Session
The course is designed to introduce students to applied quantitative methods through both lecture-based and experimental strategies. Emphasis will be placed on data collection, data management, and conceptual use of various analytic techniques.
PREREQUISITE: EPH 501, EPH 502 OR PERMISSION OF INSTRUCTOR

EPH512 Global Health
3 credits
Fall Semester
This seminar examines current global public health issues, governance and decision-making challenges for the 21st Century across developing, transitioning, and developed countries. Topics of discussion include new actors for world health in the era of globalization; linking human development, poverty and health inequities; social, cultural and ethical considerations for health planning; role of industry, trade and public health; evidence based research for improved global health initiatives; foreign policy and health security challenges associated with emergence and re-emergence of infectious diseases and public and private partnerships in global health. Open only to EPH majors.
PREREQUISITE: OPEN ONLY TO EPH MAJORS.

EPH513 International Health Systems
3 credits
Spring Semester
Students will study international health from a broad prospective of global health issues and international health systems. This course will include a critical analysis of health systems in both developing and developed countries through comparison with the World Health Organization's model and the health system in the United States. A variety of health factors will be examined including the role of public health and public health funding.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR OR ADMINISTRATOR FOR REGISTRATION

EPH514 Mental Health and Mental Illness: Public Health Perspective
3 credits
Fall Semester
The purpose of this course is to give an overview of mental health and illness as a public health issue. This will include an analysis of how mental illness became a major public health concern both in the United States and Globally. The use of population-based epidemiological studies to inform the development of public policy will also be explored. In addition, an analysis of mental health programs in various community settings such as schools, the workplace and in the context of disasters will provide an opportunity to understand how theories regarding the etiology of mental illness are applied in the development of prevention and intervention programs.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR FOR NON-EPH MAJORS.

EPH520 Health Education and Behavior
3 credits
Spring Semester
Educational processes with special emphasis on the social and cultural determinants of health behavior, health education as a process of social change, and community based health education organizations. Open only to EPH majors.
PREREQUISITE: OPEN ONLY TO EPH MAJORS.
EPH521 Fundamentals of Epidemiology
3 credits Fall Semester
Principles and methods of epidemiology. Descriptive epidemiology, environmental and other risk factors, detection of outbreaks, basic demography, and etiologic studies.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH522 Applied Health Education
3 credits Fall Semester
The goal of this course is to introduce students to the principals of Applied Health Education utilizing the theoretical background they received in the course prerequisite, EPH 520. Means of affecting health behavior change will be examined as well as methods of health communication, needs assessment and issues of cultural competency. Students will explore various settings in which health educational material is distributed including clinical settings, the Internet and through the mass media. Students will develop their own binder of high quality health educational information and develop their own educational material on a topic of their choice.
PREREQUISITE: EPH 520. OPEN ONLY TO EPH MAJORS.

EPH525 Ethical Issues in Epidemiology
3 credits Fall Semester
The course identifies and analyzes ethical issues in epidemiologic practice and research. Issues include data acquisition and management, confidentiality, valid consent, advocacy, public policy, subgroup stigma, research sponsorship, conflicts of interest, communication of risk, and international and intercultural difference.
PREREQUISITE: EPH 501 AND 521 OR PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH540 Urban Environment and Public Health
3 credits Spring Semester
PREREQUISITE: PERMISSION OF INSTRUCTOR

EPH541 Integrated Aspects of Environmental Health
3 credits Spring Semester
Interdisciplinary scope of environmental health problems. Development of a practical, dynamic model for integrating fundamental concepts from a variety of environmental disciplines. Open only to EPH majors.
PREREQUISITE: OPEN ONLY TO EPH MAJORS.

EPH542 Oceans and Human Health
3 credits Fall Semester
This course provides students with introductory knowledge of the broad and relatively young field of Oceans and Human Health. The focus is the present, future, and potential effects of oceanic processes and marine organisms on human health and wellbeing. These diverse factors reflect the physical, chemical, biotic and social processes which require an integration of information and knowledge from the medical, marine, and social sciences. Of growing concern in this rapidly-developing area of study is the human health effects from exposure to substances that occur widely in marine ecosystems including synthetic organic chemicals, polycyclic aromatic hydrocarbons (PHAs), metals (both introduced and anthropogenic), marine toxins, and pathogens.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.
EPH561 Public Health Nutrition
3 credits Spring Semester
This course provides a dynamic, interactive approach to public health designed to prepare students in basic policy, epidemiology, and health education related to nutrition. Recognizing the multiple social, cultural, environmental, and physiological factors leading to nutritional disease. The course includes experts from a variety of disciplines. Public health nutrition addresses issues germane to the public's health by elucidating their extent, determinants and consequences, and the policies and programs to address them. Open only to EPH majors.
PREREQUISITE: OPEN ONLY TO EPH MAJORS.

EPH562 Child Policy
3 credits Spring Semester
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR

EPH571 Maternal and Child Health
3 credits Spring Semester
Preventative and therapeutic concepts pertinent to the reduction of morbidity and mortality among mothers and their children.
PREREQUISITE: EPH 521 OR PERMISSION OF THE INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH572 Public Health Law
3 credits Fall & Spring Semester
This course is designed for non-law students studying in epidemiology and public health. The course will begin with a general overview of the fundamental principles and processes of the US legal system, focusing on public health law and ethics. Topics will include privacy, communications, screening and vaccinations, economic regulations and public health reform.
PREREQUISITE: PERMISSION OF INSTRUCTOR(S). OPEN ONLY TO EPH MAJORS.

EPH580 Ecology and Control of Vector-Borne Diseases
3 credits Spring Semester
PREREQUISITE: PERMISSION OF EPH PROGRAM TO REGISTER

EPH581 Advanced Topics
0-4 credits Offered By Announcement Only
Subject matter offering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title "Advanced Topics".
PREREQUISITE: CORE REQUIREMENTS FOR MPH PROGRAM OR PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH584 Special Topics
3 credits Fall & Spring Semester & First & Second Summer Session
This course is designed to allow the listing of special topics within the Department of Epidemiology and Public Health and cross-list topics with other departments' offerings.
PREREQUISITE: PERMISSION OF GRADUATE PROGRAM DIRECTOR. COURSE PRE-REQUISITES WILL VARY DEPENDING ON THE COURSE TOPIC ASSIGNED.
EPH585 Perinatal Epidemiology
3 credits  Fall & Spring Semester
This survey course includes vital statistics data and sources, prenatal care, the influence of maternal and paternal age, maternal obesity, smoking, and alcohol use in pregnancy outcomes, infertility and assisted conceptions - including multiple births, birth defects, cerebral palsy, prematurity, preeclampsia and maternal and infant mortality.
PREREQUISITE: EPH 521 AND PERMISSION OF INSTRUCTOR.

EPH600 Research Seminar
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
Course consists of bi-weekly research seminars. Seminar format is individual student-led presentations and discussions with faculty supervision. Topics may include epidemiologic methods, analytic strategies, study design, conduct of human subjects research, bio-ethics, and other pertinent topics. Ph.D. students are required to complete 3 credit hours of EPH 600 prior to graduation.
PREREQUISITE: ADMISSION TO THE PH.D. IN EPIDEMIOLOGY PROGRAM. OPEN ONLY TO EPH MAJORS.

EPH603 Statistical Methods in Epidemiology
3 credits  Fall Semester
Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Mantel-Haenszel chi-square, interaction, standardization of rates, incidence density, logistics regression, and other special topics.
PREREQUISITE: EPH 501 AND 521. OPEN ONLY TO EPH MAJORS.

EPH604 Clinical Trials
3 credits  Spring Semester
Planning, design, analysis, and data management for clinical therapeutic and prophylactic trials. Illustrations are provided through case examples.
PREREQUISITE: EPH 502 AND PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH605 Statistical Methods in Epidemiology II
3 credits  Spring Semester
Continuation and elaboration of EPH 603. Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Kappa statistics, life tables, survival analyses, logistic regression, Poisson regression, log linear models, clusters, meta-analysis, and other special topics.
PREREQUISITE: EPH 603 AND PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH609 Tobacco Control and Health: Consumption, Health Effects and Policy
3 credits  Spring Semester
PREREQUISITE: PERMISSION OF EPH PROGRAM TO REGISTER

EPH610 Public Health Surveillance Systems
3 credits  Fall Semester
The goal of this course is to make students aware of all aspects that must be considered when designing or working with a Public Health Surveillance System (PHSS). The lectures will concentrate on the different types of PHSS, data base structures, practical design elements, data gathering strategies, quality control and evaluation considerations and the role of PHSS within the public health community. Additionally, students will be given the opportunity to utilize their analytical skills and demonstrate their mastery of statistical software packages by performing three preliminary analysis of a real PHSS data set.
PREREQUISITE: EPH 501 AND 521 OR PERMISSION OF PROGRAM DIRECTOR
EPH611 Cancer Epidemiology
3 credits Spring Semester
This course covers the basic epidemiology of cancer. Major sites and exposures are stressed, highlighting descriptive, etiologic and preventive aspects. A major course project and one final exam are included.
PREREQUISITE: PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH612 Energy Balance I: Foundations of Nutrition and Physical Activity
3 credits Fall Semester
This course will examine the foundations of Nutrition and Physical Activity Epidemiology, including; population patterns and trends, epidemiological theories, assessment and research methods, bio-psychosocial and ecological determinants, major epidemiological studies, and interventions to promote healthy eating and physical activity. The course pre-requisite is successful completion of EPH 521 Fundamentals of Epidemiology or an equivalent course determined by the instructor.
PREREQUISITE: EPH 521 FUNDAMENTALS OF EPI

EPH613 Energy Balance II: Energy Balance and Health
3 credits Spring Semester
This course will build upon the Energy Balance I course content (EPH 612), focusing on health outcomes associated with positive and negative energy balance, including obesity, chronic diseases, and other related topics, such as energy balance across the lifespan (children, younger adults, and older adults). As in Energy Balance I, major epidemiological studies and theories will be examined throughout the course. The course pre-requisites include successful completion of EPH 521 Fundamentals of Epidemiology (or an equivalent course) and successful completion of EPH 612 Energy Balance I.
PREREQUISITE: EPH 612 ENERGY BALANCE I AND EPH 521 FUNDAMENTALS OF EPI

EPH614 Introduction to Disease Prevention and Health Promotion
3 credits Fall & Spring Semester
This course will introduce students to the science of prevention and health promotion. More specifically, through didactic presentations, group discussions, article readings and critiques, and a term project, this course will focus on providing students with an overview of: the top preventable causes of disease in the U.S., the etiology of disease (with a focus on the top preventable causes of disease in the U.S.) across the lifespan, the role of prevention theories in the development of preventive interventions, and the role of methodology in prevention science. The course will also provide an overview of efficacious/effective preventive interventions, including (but not limited to): family community and school level interventions. Examples from the fields of obesity, drug use, smoking, and HIV will be used to illustrate the course learning objectives detailed below.
PREREQUISITE: COMPLETION OF EPH 520 OR PERMISSION FROM PROGRAM TO ENROLL

EPH615 Determinants of Health and Health Disparities Across the Life Course
3 credits Spring Semester
PREREQUISITE: EPH 614 OR PERMISSION OF EPH PROGRAM TO REGISTER

EPH620 Cardiovascular Disease Epidemiology and Prevention
3 credits Fall Semester
Course aims to teach and train MPH students in the epidemiology and prevention of cardiovascular and cerebrovascular diseases which are the leading causes of morbidity and mortality among the adult U.S. population. Essential knowledge for those working in the area of public health is emphasized.
PREREQUISITE: EPH 501 AND 521 OR PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.
EPH621 Chronic Disease Epidemiology
3 credits  Spring Semester
The major chronic diseases (e.g. Heart Disease, Cancer, diabetes) their population impact and methods of prevention. Specialized problems associated with chronic disease studies are also included.
PREREQUISITE: EPH 521. OPEN ONLY TO EPH MAJORS.

EPH622 Common Pathways: Infectious Diseases
3 credits  Fall Semester
This course emphasizes surveillance, investigation, control and global health problems related to infectious diseases. Emphasis will be on the biology of infectious disease systems, development of study designs, epidemiological and biostatistical methods, and the employment of epidemiological methods for addressing major public health issues in international research.
PREREQUISITE: EPH 501 AND 521. OPEN ONLY TO EPH MAJORS.

EPH623 Epidemiology and Public Health Aspects of Diabetes Mellitus
3 credits  Spring Semester
This course presents an overview of the epidemiology and public health impact of an important chronic disease, diabetes mellitus (DM). Topics include the classification and descriptive epidemiology of DM and associated health complications, disease screening, evaluation of risk factors, methodological issues associated with DM research, DM among special populations, and the public health impact of DM in the U.S.
PREREQUISITE: EPH 521 OR PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH624 Advanced Applied Epidemiology
3 credits  Spring Semester
Principles and methods of analytical studies including case-control, cohort, and clinical trials. Emphasis is placed on quantization of influences of change, bias, and confounding in design, conduct, analyses, and interpretation of epidemiologic studies. Evaluation of cause-effect relationships is included.
PREREQUISITE: EPH 521 OR PERMISSION OF THE INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH625 Molecular and Genetic Epidemiology.
3 credits  Spring Semester
The course is the study of demography in relation to epidemiology, health and illness, including basic population structure, composition and trends and population methods and measures. The implications of demographic trends and policies for delivery of public health services are explored. Topics include population growth, emigration (especially to and from Florida), fertility, and the relation of demography to health and illness. Prerequisite: EPH 501 and 521 or permission of instructor.
PREREQUISITE: COMPLETION OF EPH 521 AND PERMISSION FROM PROGRAM DIRECTOR.
EPH628 Social Epidemiology of Drug Abuse
3 credits  
Spring Semester
This intersession course will provide students with a systematic and selective overview of conceptual approaches and research findings related to the impact of social context on substance use behavior. We will consider the social factors that shape the population distribution of drug use, abuse, and addiction and the related consequences. Each session will highlight a different area of research on the frontier of this nascent field. Through a combination of lectures and discussions, the course will focus on describing and understanding the association between social class, race and ethnicity, psychosocial factors, neighborhood and community characteristics, place, and life-course processes to the incidence and progression of drug use, abuse, and addiction and related health consequences.
PREREQUISITE: EPH 521 OR INSTRUCTOR PERMISSION

EPH630 Drug Abuse Epidemiology
3 credits  
Fall Semester
The purpose of this course is to educate students how to design, implement, and conduct studies of drug abuse epidemiology and its related scientific disciplines.
PREREQUISITE: EPH 501 AND 521. OPEN ONLY TO EPH MAJORS.

EPH631 Public Health Administration
3 credits  
Fall Semester
An overview of the historical background, philosophy, and purpose of public health. Relationship between government, law, and public health. Organization, management, and intergovernmental relationships of public health agencies in the United States at the federal, state, and local level. Basic principles of management, decision making, and prioritizing in public health are discussed. Overview of programs and services provided by public health organizations with emphasis on current public health issues and problems are also included. Open only to EPH majors.
PREREQUISITE: OPEN ONLY TO EPH MAJORS.

EPH639 Health Disparities in America
3 credits  
Fall Semester
This course will examine the social and societal factors that are fundamental in creating disparities in health. In addition, the course will focus on the formulation of public policy objectives to reduce and ultimately eliminate health disparities.
PREREQUISITE: PERMISSION FROM EPH PROGRAM ADMINISTRATION

EPH640 Basic Pathology and Patho-physiology
3 credits  
Fall Semester
The course emphasizes basic patho-physiological mechanisms and diseases of particular interest to students of public health. Students obtain an understanding of basic pathological processes, nomenclature of pathological findings, and common natural and unnatural diseases affecting various body systems. Observations of autopsies and the gross pathology of selected organs are also incorporated in the course.
PREREQUISITE: EPH 521 AND PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.
EPH641 Research Methods

3 credits  Fall Semester
Purpose of the course is to provide students with a sound understanding of the fundamental concepts and methods for conducting public health research. After a brief introduction to the philosophy of science, the major emphasis in the early portion of the course is on research conceptualization, design and measurement, with a particular focus on the logic of minimizing rival alternative explanations of finding for experimental and quasi-experimental studies.
PREREQUISITE: EPH 501, 521 OR PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH642 Survey Methods: Planning and Conducting Health Surveys

3 credits  Spring Semester
The purpose of this class is to introduce students to theories, principles, methods, and best practices of survey design, measurement, and sampling as applied to health surveys. Students develop an understanding of the survey research process including problem definition, strengths and limitations of survey research, survey design, survey sampling techniques, data entry and management, data analysis, and proper reporting of results.
PREREQUISITE: EPH 501, 521, AND 641 OR PERMISSION OF INSTRUCTOR. OPEN ONLY TO EPH MAJORS.

EPH644 Fundamentals of Program Evaluation

3 credits  Spring Semester
Fundamentals of Program Evaluation was developed as a survey course directed specifically at providing an overview of the broad area of program evaluation. At its base, program evaluation is the investigator of a program's characteristics and merits. In context of health care, the purpose of program evaluation is to provide information in the effectiveness of programs or interventions so as to optimize the outcomes, efficiency and quality of health care. Evaluation of a program is an essential part of the successful implementation and conduct of any health care project or intervention, and should ideally be designed along with the project itself. Program evaluation activities can use a wide range of methodologies (e.g., qualitative, quantitative), analyze different aspects of a program (e.g., structure, activities, organization), and have a large number of intended outcomes (e.g., achievement or program's goals objectives, extent of program impact, program cost).
PREREQUISITE: SUCCESSFUL COMPLETION OF EPH 501 AND EPH 521

EPH645 Behavioral Epidemiology

3 credits  Fall Semester
A sub-discipline of epidemiology with a principal focus on lifestyle behaviors that are health-enhancing or health-compromising. With a focus on health behavior rather than disease endpoints, behavioral epidemiology has a primary prevention orientation. This course explores epidemiologic approaches to description/intervention upon dietary behaviors, exercise, substance use behaviors (cigarettes, alcohol, illicit drugs), and sexual behaviors.
PREREQUISITE: EPH 521 AND PERMISSION OF THE INSTRUCTOR. OPEN ONLY TO EPH MAJORS.
EPH647 Community-based Participatory Research
3 credits Fall Semester
Community-based participatory research (CBPR) is methodology, increasingly popular in public health and other disciplines, which invites community collaboration throughout the research process from conceptualization of study focus to dissemination of findings. This course will provide an opportunity for medical and graduate students to better understand the process by which community members and academic researchers work collectively to address health disparities and influence social change.
PREREQUISITE: EPH 521 FUNDAMENTALS OF EPIDEMIOLOGY

EPH648 Multicultural Communities in a Globalized Society
3 credits Fall Semester
This course examines the relationship between multiculturalism and globalization and how these concepts impact education and the world at large. Topics include dimensions of human diversity, identities and acculturation; race and class; gender and power; children and youth; social inclusion and social justice; health disparities; poverty and work; racism and inequality.
PREREQUISITE: ENROLLMENT IN COMMUNITY & SOCIAL CHANGE MASTERS DEGREE PROGRAM OR PERMISSION OF INSTRUCTOR

EPH650 Health Economics for Evaluation and Policy
3 credits Spring Semester
This course centers on a discussion of the criteria used to evaluate the allocation of resources and analyze the behavior of two of the principal actors-consumers and firms. The principles of microeconomics are presented in the context of health care systems and markets. Numerous real-world issues and case studies are used to demonstrate economic decision-making techniques, especially for health care organizations and consumers.
PREREQUISITE: EPH 501 AND 521. OPEN ONLY TO EPH MAJORS.

EPH651 Survival Analysis in Clinical Trials
3 credits Fall Semester
Statistical methods for analysis and interpretation of survival data arising from clinical trials. Topics include survival curves, estimation of sample size, survival curves, proportional-hazard models, time dependent variables, and prognostic indices. PREREQUISITE: PERMISSION OF THE INSTRUCTOR AND EPH 501 AND 502. OPEN ONLY TO EPH MAJORS.

EPH652 Health Policy
3 credits Spring Semester
Part I will examine seven models encompassing different perspectives on public health: philosophy, political theory and politics, law, economic, science and information culture and religion, and organization and management, including how they relate and their relevance in formulating, implementing, and evaluating public policy. Part II will examine the policy making process including how issues reach the government agenda, how laws are formulated, and how the process affects substance. Part III describes the core elements of policy analysis including: problem definition; background; political, economic, and social landscape; development of policy options; and recommendation. It will also include discussions of how to find and analyze documents and data as well as discuss the financing of health care.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR
EPH674 Advanced Epidemiologic Methods I
3 credits  Fall Semester
The fundamental concepts, principles, and methods of epidemiologic study designs will be presented at an advanced level. In addition, the practical issues in the design, conduct and analysis of epidemiologic studies and interpretation of research findings will be discussed. The emphasis will also include on application of the epidemiologic methods in the forms of journal article critique and research proposal development. The goal of this course is to present the advanced epidemiologic methods and their theoretical backgrounds to PhD students in fulfilling part of the PhD in Epidemiology degree.
PREREQUISITE: EPH 521 AND EPH 502; COREQUISITES EPH 603

EPH676 Advanced Epidemiological Methods II
3 credits  Spring Semester
This is the second course of 2-part course in advance epidemiologic methods. The fundamental concepts, principles, and methods of epidemiologic study designs will be presented at an advanced level. In addition, the practical issues in the design, conduct and analysis of epidemiologic studies and interpretation of research findings will be discussed. The emphasis will also include on application of the epidemiologic methods in the forms of journal article critique and research proposal development. The goal of this course is to present the advanced epidemiologic methods and their theoretical backgrounds to PhD students in fulfilling part of the PhD in Epidemiology degree.
PREREQUISITE: EPH 674 OR PERMISSION FROM THE INSTRUCTOR

EPH680 Practical Field Experience
1- 6 credits  Fall & Spring Semester & First & Second Summer Session
Practical field experience for MSPH/MPH students, e.g. an internship with a physician, public health department, clinic, school system, Health Center, or an ongoing epidemiological project.
PREREQUISITE: CORE REQUIREMENTS FOR MPH PROGRAM. OPEN ONLY TO EPH MAJORS.

EPH681 Geographic Information Systems in Public Health
3 credits  Spring Semester
Learn GIS techniques to interpret, analyze, and understand spatial patterns utilizing the software Arc View.
PREREQUISITE: OPEN ONLY TO EPH MAJORS.

EPH682 Advanced Individual Study
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
Individual work on a special project under faculty guidance.
PREREQUISITE: PERMISSION OF THE DIRECTING FACULTY MEMBER AND THE DIRECTOR OF GRADUATE PROGRAMS. OPEN ONLY TO EPH MAJORS.

EPH699 Public Health Projects
1- 6 credits  Fall & Spring Semester & First & Second Summer Session
Research and/or design projects. Individual investigation of current public health problems. Required of all MPH students.
PREREQUISITE: PERMISSION OF MASTER'S PROGRAMS DIRECTOR AND COMPLETION OF AT LEAST 12 CREDITS IN EPH. OPEN ONLY TO EPH MAJORS.

EPH725 Continuous Registration--Master's Study
0 credit  Fall & Spring Semester & First & Second Summer Session
To establish residence for MPH students who are preparing for project presentation. Credit not granted. Regarded as full time residence.
EPH730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of EPH 730 may be taken in a regular semester, nor more than six in a summer session.

EPH740 Doctoral Dissertation- Post Candidacy
1-12 credits  Fall & Spring Semester & First & Second Summer Session

EPH750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

HUMAN GENETICS & GENOMICS
HGG601 Seminar/Journal Club
1 credit                                                     Fall & Spring Semester
All registered students must participate in the Seminar/Journal Club. Students are required to review published papers and discuss in detail the findings described therein.
PREREQUISITE: NONE

HGG611 Accelerated Basic Science Medical Curriculum
1-18 credits    Fall & Spring Semester
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. A single grade will be entered on the graduate transcript for this course.
PREREQUISITE: ADMISSION TO THE COMBINED M.D./PH.D. PROGRAM

HGG620 Fundamentals of Human Genomics
2 credits                                                           Spring Semester
This course offers a survey of topics in human genomics, with an emphasis on the diversity of genetic variation, both normal and pathological, that is observed within modern populations. An overview of key molecular processes, mechanisms of mutation, and primate genome architecture is provided. Students are also introduced to select topics in microevolution and population genetics that are relevant to the study of human genetic disorders. The course is primarily lecture-based, with some supplemental readings from primary literature.
PREREQUISITE: NONE

HGG621 Fundamentals of Genetic Epidemiology
3 credits                                                           Spring Semester
This course provides an overview of genetic epidemiology. Basic concepts and methods will be covered including phenotype definition, evaluating evidence a trait in genetic, basic study designs (family and population-based), introduction to genetic linkage and association, candidate gene analysis and genome-wide studies, and approaches to localizing genetic variations associated with traits of interest. The course is primarily lecture-based with some discussions from primary scientific literature.
HGG630 Variation and Disease  
2 credits  
Spring Semester  
This course provides an overview of the science of genetics, including historical and modern approaches, with emphasis on the underlying mechanisms of human genomic variation and their relation to human disease. After taking this course the student will be able to list the different types of human genomic variation, explain the mechanism by which each occurs, and discuss the consequences of the variation. Where appropriate, specific examples of human disorders will be related to the variation. Topics include: chromosomal, biochemical, and DNA sequence variation, mitochondrial genome variation and epigenetic effects. The course structure consists of a combination of lectures and discussion of primary literature.

HGG631 Genes in Populations  
3 credits  
Fall Semester  
The course explores the relevant history and principals governing the behavior of genes in human populations. Topics include Hardy-Weinberg equilibrium; Mendelian, complex and quantitative traits; principals of selection and change in populations, neutral theory; and molecular evolution of gene families. The course is lecture combined with supplemental readings.

HGG640 Family Studies and Genetic Analysis  
2 credits  
Spring Semester

HGG650 Advanced Topics in Molecular Genetics  
3 credits  
Spring Semester  
Topics include human microRNAs, the neurobiology of aging, structural variation, modern genome technology, among others. The course structure consists of discussions and analysis of primary literature.  
PREREQUISITE: HGG 630 OR PERMISSION FROM INSTRUCTOR

HGG660 Topics in Bioinformatics  
1 credit  
Fall Semester  
This course will cover provide students with a basic introduction to standard bioinformatics methods and applications, with a particular focus on 2nd generation sequence data sets. The course will be taught in a laboratory setting, and students will be directly working with software applications during class time. Topics covered will include genomic annotation resources, fundamentals of sequence alignment and assembly, detection of genomic variation, RNA expression analysis, ChIP-Seq data analysis, and functional genomic element prediction. The course is lecture-based, but will include readings from the text and primary literature. There will be homework assignments, one midterm exam, and one final exam. Details on the assignments will be posted to BlackBoard.

HGG661 Advanced Topics in Bioinformatics  
1 credit  
Spring Semester  
PREREQUISITE: HGG 660

HGG680 Genome Ethics and Public Policy  
3 credits  
Fall & Spring Semester
HGG681 Human Genetics Clinical Rotation  
1 credit  
Fall & Spring Semester

HGG689 Human Genetics and Genomics Teaching Practicum  
1 credit  
Fall & Spring Semester & First & Second Summer Session

HGG730 Doctoral Dissertation- Pre Candidacy.  
1-12 credits  
Fall & Spring Semester  
1 - 12 credit course for Doctoral candidates working on pre-candidacy dissertation.  
PREREQUISITE: NONE

HGG740 Doctoral Dissertation - Post Candidacy  
1-12 credits  
Fall & Spring Semester & First & Second Summer Session  
1-12 credit course for Doctoral Candidates working on dissertation post candidacy.

HGG750 Research in Residence  
0 credit  
Fall & Spring Semester & First & Second Summer Session

INTERDISCIPLINARY BIOMEDICAL STUDIES

IBS602 Interdisciplinary Biomedical Studies II  
4 credits  
Spring Semester  
A continuation of IBS 602. Topics include cell organization, membrane structure, signal transduction, transport across cell membranes, protein sorting, nerve signaling, microfilaments and microtubules, cell-cell and cell-matrix interactions, cell cycle, cancer, and immunity.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

IBS603 Interdisciplinary Biomedical Studies II  
1-4 credits  
Fall Semester  
PREREQUISITE: IBS 601 OR PERMISSION OF THE INSTRUCTOR

IBS611 Accelerated Basic Science Medical Curriculum  
1-18 credits  
Fall & Spring Semester  
The following accelerated and intensive basic science medical curriculum is offered: Biochemistry, Genetics and Cell Biology, Medical Microbiology and Immunobiology, Gross Anatomy, Histology and Pathology, Physiology and Pharmacology, Neuroscience and Behavioral Science, and the Cardiovascular System. A single grade will be entered on the graduate transcript for this course.  
PREREQUISITE: ADMISSION TO THE COMBINED M.D./PH.D. PROGRAM

IBS612 Accelerated Basic Science Medical Curriculum II  
1-18 credits  
Fall & Spring Semester & First & Second Summer Session  
Beginning in the latter part of June each year, extending to the middle of May of the ensuing year, the following accelerated and intensive medical curriculum is offered: Respiratory System, Renal System, Dermatology and Ophthalmology, Gastrointestinal System and Human Nutrition, Human Anatomy, Problem based learning/Rheumatology, Hematology and Oncology. A single grade will be entered on the graduate transcript for this course.  
PREREQUISITE: ADMISSION TO THE COMBINED M.D./PH.D. PROGRAM.
IBS620 Scientific Writing I
2 credits Fall & Spring Semester
This course will help students to strengthen their scientific writing skills. We will review the standards and expectations of scientific discourse, focusing on the scientific paper as a refined tool for conveying research findings in a clear, objective fashion and positioning the author/s within a specific research community. Sequenced writing assignments will address the functions and conventions of the various forms of scientific communication, from short correspondences to full research reports to review articles. The proper use and presentation of graphs and illustrations will also be covered.

IBS631 Laboratory Research
1-6 credits Fall & Spring Semester & First & Second Summer Session
Laboratory rotations to gain experience with a variety of modern techniques in molecular and cellular biology.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

IBS680 Research Ethics
0 credit Fall Semester
0 Credits. The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the department or program. This is a six-hour course and will be given in two sessions of three hours each.
PREREQUISITE: PERMISSION OF ADVISOR.

IBS683 Professional Skills and Ethics I
1-3 credits Fall & Spring Semester & First & Second Summer Session
Two-day intensive workshop involves a combination of lectures, discussions, readings and writing to enhance the professional development of beginning graduate students. Topics include strategies for selecting mentors, professional writing, giving oral presentations and research ethics.

IBS684 Professional Skills and Ethics II
1-3 credits Fall & Spring Semester & First & Second Summer Session
Two-day intensive workshop involves a combination of lectures, discussions, readings and writing exercises, and practical experiences to enhance the professional development of advanced graduate students, postdoctoral fellows and junior faculty. Topics include career choices, job search strategies and skills, fellowship/grant applications and research ethics.

IBS700 Practical Training & Internship
1-3 credits Fall Semester

MICROBIOLOGY & IMMUNOLOGY

MIC501 Medical Microbiology
5 credits Offered By Announcement Only
Course discusses the nature of microbial agents of infectious disease as well as relationship of virulence to host resistance and fundamental immunologic concepts. Microbial physiology and genetics, the structure, design, and mechanism of action on antimicrobials are also.
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
MIC523 Mechanisms of Microbial Virulence
2 credits       Spring Semester
This course will focus on the mechanisms employed by bacterial and viral pathogens to produce disease in animals and humans. The course is divided into two 3 week modules. The first module will cover bacterial pathogens with an emphasis on the bacteria-host cell interaction. Specific topics will include: bacterial attachment and invasion of eukaryotic cells, virulence gene regulation, and secretion of virulence factors, bacterial toxins and obligate intracellular bacterial pathogens. The second module will cover viruses and human viral diseases with an emphasis on viral replication, gene expression, virus-host cell interactions and viral oncology. Classes will consist of a mixture of lectures and discussions of recent or classic papers. There will be 2 exams.

MIC605 Faculty Research and Discussions
1 credit       Fall Semester
Forum for the discussion of the current research projects and interests of the faculty. This course provides students with the opportunity to exchange ideas about important scientific questions and the technologies being applied to experimentally address the hypotheses being tested.

MIC611 Accelerated Basic Science Medical Curriculum
1-18 credits    Fall & Spring Semester
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. single grade will be entered on the graduate transcript for this course.
PREREQUISITE: ADMISSION TO THE COMBINED M.D./PH.D. PROGRAM.

MIC616 Advanced Molecular Biology
3 credits       Fall Semester
The molecular basis of cellular function and regulation in both procaryotic and eucaaryotic systems. The molecular genetics and biochemistry of the genetic material and its utilization during replication, transcription, translation, cellular growth, division, and differentiation. Recombinant DNA technology and molecular genetics are discussed. This course is designed for graduate students in biological sciences. A good background in biology or biochemistry is recommended.

MIC626 Laboratory Experimentation
4 credits       Fall Semester
One or two laboratory training sessions of 6-12 weeks each. Each student rotates through faculty research laboratories in the areas of immunology, molecular biology, and microbiology, (bacteriology, virology, parasitology) where they receive "hands on" experience by participating in ongoing research projects.
PREREQUISITE: MIC 501 AND PERMISSION OF CHAIRMAN OF GRADUATE STUDIES COMMITTEE.

MIC627 Laboratory Experimentation
6 credits       Spring Semester
Two or three laboratory training sessions of 6-12 weeks each. Each student rotates through faculty research laboratories in the areas of immunology, molecular biology and microbiology, (bacteriology, virology, parasitology) where they receive "hands on" experience by participating in ongoing research projects.
PREREQUISITE: MIC 501 AND PERMISSION OF CHAIRMAN OF GRADUATE STUDIES COMMITTEE.
MIC628 Principles of Immunology
3 credits
Spring Semester
This team-taught course will present immunological concepts and reasoning in immunological research. The course is divided into 7 weekly modules. Each module has a common theme and consists of 3 lectures on immunological concepts and one session where students present and discuss a research paper related to the theme of each module. The paper discussion session will include use of disease models as a portal to understand the function of immune system in health and disease. The module topics are (a) lymphoid cell development, (b) antigen recognition, (3) initiation of immune responses, (4) T lymphocyte effector development and function, (5) T cell immunity versus tolerance, (6) B cell immunity, and (7) innate immunity. There will be one exam following the first 4 modules and the second exam after the remaining 3 modules.

MIC631 Special Work
1-5 credits
Fall Semester
Special work, lecture, laboratory or a combination of these, as determined by advisor in accord with student's individual interest. Course is offered only on demand.
PREREQUISITE: PERMISSION OF ADVISOR AND DEPARTMENT CHAIRMAN.

MIC651 Advanced Molecular Immunology
3 credits
Fall Semester
The molecular mechanisms for generation of antigen specific receptor diversity and the specific gene activation during lymphocyte differentiation.
PREREQUISITE: MIC 628.

MIC655 Infectious Agents and the Immune System
3 credits
Spring Semester
This course is intended to explore, at an advanced level, the dynamic equilibrium that exists between microbial pathogens and host immune systems with emphasis on factors that influence progression to disease or sterilizing immunity. Mechanisms employed by the host and pathogen to shift that equilibrium in their favor will be discussed taking into account interactions at the cell system, cellular, and sub-cellular levels. To facilitate interaction between the two fields, both an immunological and a microbial/viral faculty member will be present at all classes.
PREREQUISITE: MIC 523 OR PERMISSION OF INSTRUCTOR.

MIC661 Advanced Topics in Molecular Biology of Animal Viruses
2 credits
Offered By Announcement Only
This course is organized around four major themes of virological studies: (i) viral genome transcription, replication, and virus assembly; (ii) viral pathogenesis; (iii) virus cell interactions; and (iv) antiviral strategies. Most recent research developments in these areas are covered through lectures by participating faculty members as well as paper presentations by students.
PREREQUISITE: MIC 523 OR PERMISSION ON INSTRUCTOR.

MIC675 Advanced Microbiology and Immunology
3 credits
Fall Semester
This course will explore in depth the current and advanced concepts and topics in selected areas of Microbiology and Immunology. The classes will consist of a mixture of lectures and discussions of recent papers. Besides covering recent advances and cutting edge experimental approaches in cellular and molecular immunology and microbiology, this course will also expose students to breakthrough concepts and themes that link the disciplines of immunology, microbiology and virology.
PREREQUISITE: MIC 628 OR MIC 523
MIC680 Research Ethics  
0 credit  
Fall Semester  
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and is given in two sessions of three hours each.  
PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR.

MIC699 Advanced Topics  
1-3 credits  
Offered By Announcement Only  
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".  
PREREQUISITE: PERMISSION FROM INSTRUCTOR.

MIC710 Master's Thesis  
1-6 credits  
Offered By Announcement Only  
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MIC720 Research in Residence  
0 credit  
Offered By Announcement Only  
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MIC 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

MIC730 Doctoral Dissertation  
1-12 credits  
Fall & Spring Semester & First & Second Summer Session  
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MIC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MIC740 Doctoral Dissertation - Post Candidacy  
1-12 credits  
Fall Semester  

MIC750 Research in Residence  
0 credit  
Fall & Spring Semester & First & Second Summer Session  
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MOLECULAR CELL & DEVELOPMENTAL BIOLOGY  
MDB601 Seminar  
1-2 credits  
Fall & Spring Semester & First & Second Summer Session  
For graduate students in Cell Biology and Anatomy, Graduate Program in Molecular Cell and Developmental Biology. Departmental Faculty and graduate student research seminars.  
PREREQUISITE: PERMISSION OF DEPARTMENT CHAIRMAN.
MDB606 Computer Applications in Research
2 credits Offered By Announcement Only
Microcomputer programs beneficial to a wide variety of biomedical research applications.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND DEPARTMENT CHAIRMAN.

MDB610 Readings in Cell Biology
1-6 credits Fall & Spring Semester
Current and classical research papers in cell, developmental, and molecular biology. Critical evaluation of papers and the methodologies used is included.
PREREQUISITE: PERMISSION OF COURSE SUPERVISOR AND DEPARTMENT CHAIRMAN.

MDB613 Topics in Cell Biology
1-6 credits Fall & Spring Semester & First & Second Summer Session
Formal seminar course in which each student presents a lecture relating to a specific theme. Topic areas include cell, developmental, and molecular biology with the subject changing each term.
PREREQUISITE: PERMISSION OF COURSE SUPERVISOR AND DEPARTMENT CHAIRMAN.

MDB617 Advanced Techniques in Molecular Biology
2-3 credits Fall Semester
Method/techniques type course.
PREREQUISITE: BMB 506 OR EQUIVALENT, OR PERMISSION OF INSTRUCTOR.

MDB618 Cell Membranes
2 credits Offered By Announcement Only
Cell membrane structure and function including recent developments in intracellular targeting of membrane vesicles, mechanisms of exocytosis, receptor-mediated endocytosis, and regulation of intercellular recognition by cell surface molecules.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND DEPARTMENT CHAIRMAN.

MDB620 Introduction to Research in Cell Biology
1-6 credits Fall & Spring Semester
Direct laboratory experience as determined by the Departmental Graduate Committee.
PREREQUISITE: PERMISSION OF COORDINATOR AND DEPARTMENT CHAIRMAN.

MDB645 Research Problems in Biochemistry, Cell and Molecular Biology
2-3 credits Fall & Spring Semester & First & Second Summer Session
Laboratory research problems in various areas of biochemistry, cell biology, and molecular biology. A literature search, experimental design, data gathering, and evaluation of results is included. Course is the mechanism by which graduate laboratory rotations are done in preparation for selection of Ph.D. mentor.
PREREQUISITE: BMB 506 OR EQUIVALENT OR PERMISSION OF INSTRUCTOR.

MDB651 Advanced Molecular Cell Biology
3 credits Spring Semester
Structure, function, biogenesis of cellular organelles, and the cytoskeleton including its regulation and dynamic interactions are discussed.
PREREQUISITE: BIL 255 AND BMB 401 OR 506 AND PERMISSION OF DEPARTMENT CHAIRMAN.
MDB652 Current Topics in Mammalian Development
2-3 credits    Fall Semester
The course will cover central emerging topics in mammalian development today including embryonic stem cells, micro RNA gene regulation, and organogenesis. The class will have an interactive format, starting with basic lecture in mammalian development; subsequent sessions will include an overview of the selected topic by faculty, followed by round table discussions of current paper(s) in the field.
PREREQUISITE: SUCCESSFUL COMPLETION OF MDB 651 AND PERMISSION OF DEPARTMENT CHAIRMAN.

MDB653 Histology
1 credit    Fall Semester
This course will offer the student a virtual slide collection of histology with interactive lectures to support image-based learning. The course covers basic tissues, organs, and systems (vascular; heart; pancreas; eyes; brain; spinal cord; liver; lung; mouse embryo; GI track). The course will meet once a week for one hour.
PREREQUISITE: 2ND. YEAR GRADUATE STUDENT, IBS

MDB654 Methods in Cell Biology
2 credits    Offered By Announcement Only
Introduction to the basic biochemical and cytochemical laboratory techniques used in cell biological and biomedical research.
PREREQUISITE: BASIC BIOLOGY AND CHEMISTRY AND PERMISSION OF INSTRUCTOR AND DEPARTMENT CHAIRMAN.

MDB663 Development and Regeneration of the Nervous System
3 credits    Fall Semester
Development of the nervous system in all its aspects: origins of neurons and glia; nerve cell differentiation; cellular interactions during neurogenesis; formation of synaptic connections and neuronal circuits; development of nervous functions and ontogeny of behavior; mechanisms of repair and reorganization in the nervous systems; and theories of neuronal plasticity.
PREREQUISITE: PERMISSION OF COURSE COORDINATOR AND DEPARTMENT CHAIRMAN.

MDB665 Tumor Biology
2-3 credits    Fall Semester
Tumor Biology is intended to provide an overview and update of the most important topics in modern molecular and cellular aspects of cancer biology and research. The sessions are topical and include both lectures and discussions of current papers in the topic areas. A list of the topics is attached.
PREREQUISITE: NONE. REGISTRATION IS OPEN TO ANYONE ENROLLED IN A UM GRADUATE PROGRAM OR BY PERMISSION OF THE INSTRUCTORS.
MDB666 Advanced Microscopy and Image Analysis
2 credits
Fall Semester
This course will cover the acquisition, use and maintenance of advanced research microscopes including data analysis using the equipment and software already available in the instructors' labs. Topics to be covered include types, function and choice of optical and electron microscopes; sample preparation and synthesis of fluorescent and particle-labeled probes; transmitted light microscopy; fluorescent microscopy; confocal microscopy; real time cell and particle tracking; digital image analysis and quantitative fluorescence analysis; transmission and scanning electron microscopy, and digital image data interpretation. The course will meet twice a week for one hour, with one lecture and one hands-on laboratory session per week. Class registration is limited to 4-6 students.
PREREQUISITE: IBS 601 AND 601, AND SOME LABORATORY EXPERIENCE IN CELL BIOLOGY AND BASIC MICROSCOPY. ADMISSION IS WITH PERMISSION OF THE INSTRUCTORS.

MDB680 Research Ethics
0 credit
Fall Semester
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.
PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR.

MDB710 Master's Thesis
1-6 credits
Offered By Announcement Only
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MDB720 Research in Residence
0 credit
Offered By Announcement Only
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MDB 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MDB730 Doctoral Dissertation
1-12 credits
Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MDB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MDB740 Doctoral Dissertation- Post Candidacy
1-12 credits
Fall & Spring Semester & First & Second Summer Session
MOLECULAR CELL & DEVELOPMENTAL BIOLOGY

MDB750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been
enrolled for the permissible cumulative total in appropriate doctoral research.
Credit not granted. May be regarded as full-time residence as has determined by
the Dean of the Graduate School.

MOLECULAR & CELLULAR PHARMACOLOGY

MCP601 Seminar
1 credit  Fall & Spring Semester
Review of the literature and discussion of specific topics. Course may be repeated
for a total of four credits.
PREREQUISITE: CONSENT OF INSTRUCTOR.

MCP604 Mechanisms of Drug Action
2 credits  Fall Semester
Mechanisms underlying the therapeutical and pharmacodynamic properties of pharmacological
agents. Emphasis is placed on cellular and molecular aspects and the quantitative
factors governing equilibration within multicompartment systems and drug control
of nervous and muscular function in relation to therapeutic action.
PREREQUISITE: CONSENT OF INSTRUCTOR.

MCP605 Eukaloryotic Model Systems of Human Disease and Drug Development
3 credits  Spring Semester
This course provides the students with a comprehensive overview of the eukaryotic
model systems used in biomedical research with a specific focus on human disease
and drug design. The lecture sessions discuss in detail the advantages of yeast,
C. elegans, Drosophila, Xenopus oocytes, zebra fish, chick and mice, the unique
biological processes that each of these models are able to tackle, and their technical
application. The problem solving sessions discuss specific examples where each
of the models is utilized to address a biological question and/or a specific drug
development.
PREREQUISITE: N/A

MCP607 Toxicology, Its Principles and Environmental Application
2 credits  Offered By Announcement Only
The principles of toxicology, toxicity, and carcinogenic testing procedures, and
their interpretation. Relevance to man is stressed. Application of these principles
to environmental problems with the heavy metals, pesticides, poisonous plants,
animal toxins, environmental carcinogens, radioisotopes, the abuse of drugs, alcohol,
and mycotoxins is covered in detail.
PREREQUISITE: CONSENT OF INSTRUCTOR.

MCP608 Drug Metabolism
2 credits  Offered By Announcement Only
Factors affecting the absorption, metabolic rate, excretion of drugs, chemicals,
and toxic substances.
PREREQUISITE: CONSENT OF INSTRUCTOR.

MCP610 Membrane Biophysics Seminar
1 credit  Offered By Announcement Only
The student may be required to submit a term paper.
PREREQUISITE: PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.
MCP611 Accelerated Basic Science Medical Curriculum
1-18 credits  Fall & Spring Semester
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neuropsychology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. A single grade will be entered on the graduate transcript for this course.
PREREQUISITE: ADMISSION TO THE COMBINED M.D./PH.D. PROGRAM

MCP612 Pathobiology I
3 credits  Offered By Announcement Only
Required for Physician Scientist Program students; open to graduate students. Two, three-hour sessions (first hour at multi-headed scope followed by two hours of laboratory) per week for eight weeks in the fall semester (September and October; days and times to be arranged). The purpose of the pathobiology course is to provide graduate students with knowledge of basic principles for understanding normal histomorphology and pathologic lesions associated with experimentally induced and naturally occurring diseases. The keystone of this innovative, short course is the small group's Socratic study of a series of autopsy cases--each represented by a set of microscopic slides. The cases are preselected to allow the students to focus on specific, basic concepts early and organ-system lesions later. Students spend the first hour of the biweekly sessions at a multi-headed scope creating a profile of the patient--including age, sex, race, and chief disease. At the end of the first hour deliberations, students receive feedback regarding their conclusions by being provided with a summary of the patient's history and autopsy findings. Students review relevant gross specimens and kodachromes during the biweekly two-hour laboratory sessions.
PREREQUISITE: ADMISSION TO THE PHYSICIAN SCIENTIST PROGRAM OR THE GRADUATE PROGRAM OF ONE THE FIVE BASIC SCIENCE DEPARTMENTS LOCATED AT THE SCHOOL OF MEDICINE.

MCP620 Design and Evaluation of Drug Studies
1 credit  Offered By Announcement Only
Practical experience in the design and evaluation of drug studies making use of data from actual field trials conducted in the clinical facilities of the department. Drug evaluation studies in the literature are examined.
PREREQUISITE: MCP 604, 605 AND PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

MCP621 Clinical Pharmacology
2 credits  Offered By Announcement Only
The application of pharmacologic principles of clinical situations. Basic concepts such as drug uptake, distribution, and mechanics of action, metabolism, and elimination are discussed as they apply to proper therapeutic use of drugs. Clinical cardiovascular pharmacology is covered in particular depth.
PREREQUISITE: MCP 604, 605 AND PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

MCP624 Research Opportunities in Human Disease
1 credit  Offered By Announcement Only
The course presents human diseases from a research perspective, with each disease forming the basis for four lecture/discussion sections (2 hrs/session; 1 session/wk.). Each disease is discussed with respect to: 1) Clinical presentation, epidemiology, and therapeutics, 2) Cellular and Molecular mechanisms, 3) Current treatment strategies, and 4) Prospects, challenges, and opportunities for research efforts.
MCP631 Special Topics  
1-6 credits  Spring Semester  
Directed readings on subjects not ordinarily treated in depth in specific courses. Course may also consist of special laboratory problems.

MCP632 Cardiovascular Pharmacology  
2-3 credits  Spring Semester  
A course for advanced students covering the mechanism of action of drugs on the cardiovascular system.  
PREREQUISITE: CONSENT OF INSTRUCTOR.

MCP635 Biophysical Chemistry  
2 credits  Offered By Announcement Only  
This course teaches the physico-chemical principles basic to life science and complements MCP 641, "Principles in Membrane Physiology and Biophysics". The course is designed so that a student lacking previous exposure to physical chemistry can take the two courses concurrently. Topics include equilibrium and thermodynamics, mathematical descriptions of multiple equilibrium, electrolyte theory, rate theory, mathematical descriptions of the rates of enzymatic reactions, diffusion and permeation, mechanistic aspects of ion transport, and the application of fluorescent probe methods to the study of membrane phenomena. The courses uses a problem-solving approach.  
PREREQUISITE: CONSENT OF INSTRUCTOR.

MCP641 Principles of Membrane Physiology and Biophysics I  
2 credits  Offered By Announcement Only  
Course emphasizes chemical and physical structure of membranes, model systems, permeability and transport, membrane potential, ionic channels, excitability in nerve and muscle, ionophores, active transport, and membrane receptors. Identical to Physiology and Biophysics 641.  
PREREQUISITE: CHM 365; BMB 506; AND PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

MCP642 Principles of Membrane Physiology and Biophysics II  
2 credits  Offered By Announcement Only  
Course discusses osmosis and cell volume, tracer analysis of permeability and compartmentation, theory of channels and carriers, and cable properties. The Hodgkin-Huxley formalism; Na, K, and Ca ion channels; regulation of cellular Na and Ca activities; single-channel analysis; chemical synapses; membrane receptors; cell junctions; excitation; and E-C coupling in muscle are also covered. Identical with Physiology and Biophysics 642.  
PREREQUISITE: MCP 641.

MCP643 Methods in Membrane Research  
3 credits  Fall Semester  
Introduction to research and laboratory techniques. Molecular and membrane pharmacology, radio-tracers, cardiovascular, and neuropharmacology are covered.  
PREREQUISITE: PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

MCP644 Methods in Membrane Research  
3 credits  Spring Semester  
Introduction to research and laboratory techniques. Molecular and membrane pharmacology, radio-tracers, cardiovascular, and neuropharmacology are covered.  
PREREQUISITE: PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.
MCP645 Topics in Membrane Physiology and Biophysics
3 credits Offered By Announcement Only
In-depth examination of selected topics introduced in MCP 641, 642. A term paper is required.
PREREQUISITE: MCP 641, AND PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

MCP651 Cell Biology I
2 credits Offered By Announcement Only
The dynamics of eukaryotic cells examined from the standpoint of structure and function, regulation of function and interactions of the subcellular organelles.
Identical to PHS 651.

MCP652 Cell Signaling I: Intracellular Signal Transduction.
3 credits Fall Semester
Most therapeutic drugs exert their action by influencing cellular signal transduction processes. This course provides an in-depth molecular level review of the fundamental signal transduction mechanisms that regulate cell growth, cell proliferation, checkpoint response to cell stressors, cell morphogenesis and differentiation, and their role in the onset of disease.
PREREQUISITE: CONSENT OF INSTRUCTOR.

MCP653 Cell Signaling 2: Cell-to-Cell Communication and Development.
3 credits Spring Semester
This course focuses on receptors and signaling pathways that govern cellular responses to extrinsic signals. It concentrates on specifics of signaling events in selected biological systems such as CNS, endocrine system, cardiac and hematopoietic stem cells.
PREREQUISITE: CONSENT FROM INSTRUCTOR

MCP668 Neuropharmacology
2- 3 credits Fall Semester
A course for advanced students covering the mechanism of action of drugs on neural processes, including action potentials, neurotransmission (storage, release, reception, and metabolism of transmitters), and central nervous system activity.
PREREQUISITE: CONSENT OF INSTRUCTOR

MCP680 Research Ethics
0 credit Fall Semester
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.
PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR.

MCP710 Master’s Thesis
1- 6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
MCP720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MCP 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

MCP730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MCP 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MCP740 Doctoral Dissertation- Post Candidacy
1-12 credits  Fall & Spring Semester & First & Second Summer Session

MCP750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

NEUROSCIENCE

NEU600 Seminar in Neuroscience
1 credit  Fall & Spring Semester
Students are required to present a short talk on a research area of interest. All students in the Neuroscience Program are required to register for this seminar, which also includes journal presentations. For other registrants, permission of the Departmental Graduate Studies Committee is required.

NEU601 Introduction to Neuroscience Techniques
1 credit  Fall & Spring Semester
Hands-on exercises in research laboratories introduce first-year Neuroscience students to methodologies commonly used in the Neurosciences. The course includes selected techniques from electrophysiology, immunocytochemistry, fluorescence microscopy, recombinant DNA, protein immunoblotting, and functional imaging. Students are required to complete a lab notebook of each exercise. There is also a segment on database searches.

NEU609 Research
1-5 credits  Fall & Spring Semester & First & Second Summer Session
Students work with individual members of the program faculty on research problems. Provides orientation as to the areas of research in the field and the techniques used.
PREREQUISITE: PERMISSION OF THE PROGRAM STEERING COMMITTEE OR ITS CHAIRMAN.
NEU611 Accelerated Basic Science Medical Curriculum
1-18 credits    Fall & Spring Semester
From late June to mid-February, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. A single grade will be entered on the graduate transcript for this course.
PREREQUISITE: ADMISSION TO THE M.D./PH.D. DEGREE PROGRAM

NEU631 Advanced Topics in Neuroscience
1-5 credits  Fall & Spring Semester & First & Second Summer Session
Special work, lecture, laboratory, reading, seminar, or a combination of these as determined by advisor in accordance with student's interest.
PREREQUISITE: PERMISSION OF THE PROGRAM STEERING COMMITTEE.

NEU641 Statistics in Neuroscience
1 credit                                               Offered By Announcement Only
This course will provide basic information necessary to appropriately design experiments and analyze and interpret data in the behavioral and biological sciences. A lecture/discussion format will be used. The course will cover research methodology, basic statistical concepts, and an in-depth discussion of descriptive (measures of central tendency, variability and correlation) and inferential statistics (both parametric and non-parametric tests of significance). In addition, various statistical computer programs will be reviewed. Specific topics include: 1. Statistical terminology; 2. Measurement scales; 3. Plotting your data for initial interpretation; 4. Measures of central tendency and variability; 5. Type I and Type II errors and controlling power; 6. Which statistical test do I use for my data? 7. What can I conclude from my data and does it mean anything? Students will be evaluated based on their understanding of statistical design and data interpretation.

NEU650 Modeling CNS injury and Repair
1 credit                                                     Fall & Spring Semester
This course provides an overview of a number of complex modeling systems using in CNS injury and Repair biomedical research. The course examines models, such as spinal cord injury, traumatic brain injury, ischemic/stroke injury, experimental autoimmune encephalomyelitis (EAE) model of multiple sclerosis, axon regeneration in retinal nerve and spinal cord, and drosophila models of degeneration. The course will consist of both lectures and hands-on laboratory components.
PREREQUISITE: NEU 697

NEU661 Neuroscience I
2 credits                                                           Spring Semester
An introduction to neuronal physiology, including synaptic transmission and integration, sensory neurobiology, and cellular learning and memory. 2 credits.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NEU662 Neuroscience II--Neural Systems
4 credits                                                 Fall Semester
This course is designed to teach Neuroscience to individuals engaged in basic neuroscience research. The course provides comprehensive coverage of Neuroscience. Neuroscience II covers Network Neurobiology and Higher Nervous System Function. The course concentrates on the experimental basis for our understanding of nervous system function. Course utilizes both didactic lectures and discussions of current research literature.
PREREQUISITE: PHS 641, PHS 642, NEU 661 OR CONSENT OF INSTRUCTOR
**NEU663 Developmental Neuroscience.**  
*2 credits  Spring Semester*  
This course will explore nervous system development from early neural induction and neurogenesis to the construction of neural circuits. Cellular and molecular mechanisms of neural migration, neurite growth and guidance, and synaptogenesis will be covered.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

**NEU680 Research Ethics**  
*0 credit  Fall Semester*  
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Program. This is a six-hour course and will be given in two sessions of three hours each.  
PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR OR PROGRAM DIRECTOR.

**NEU697 Neuroanatomy**  
*3 credits  Fall Semester*  
This course is designed to teach functional neuroanatomy to individuals engaged in basic neuroscience research. Therefore, most of the emphasis will be placed upon gross anatomy, identification of pathways and circuits, and a description of the physiological functions of neuroanatomical systems. To the extent that it may help to explain functional aspects of the nervous system, each lecture will contain some clinical examples and/or case histories. An important feature of each class period will be a laboratory segment in which the student will study human and sheep brains, examine models of the brain, and use internet neuroanatomy websites containing pictures, text, clinical examples, and 3-dimensional rotations of the nervous system.  
PREREQUISITE: UNDERGRADUATES REQUIRE PERMISSION OF INSTRUCTOR.

**NEU710 Master's Thesis**  
*1-12 credits  Offered By Announcement Only*

**NEU720 Research in Residence**  
*0 credit  Fall & Spring Semester & First & Second Summer Session*  
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in Master's Thesis (usually six credits). Credit not granted. May be regarded as full time residence.

**NEU730 Doctoral Dissertation**  
*1-12 credits  Offered By Announcement Only*  
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of NEU 730 may be taken in regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

**NEU740 Doctoral Dissertation- Post Candidacy**  
*1-12 credits  Fall Semester*  
PREREQUISITE: NONE
NEU750 Research in Residence

0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research.
Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

PHYSICAL THERAPY

PTS505 Physical Therapy Private Practice Management

1 credit  Fall Semester
Course focuses on establishing a private physical therapy practice, including initial development through marketing and management.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR.

PTS506 Issues in Women's Health: Gynecology

1 credit  First & Second Summer Session
Introduction to physical therapy practice for evaluation and treatment of pelvic floor dysfunction.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR.

PTS507 Issues in Women's Health: Obstetrics, Osteoporosis and Breast Health

1 credit  Fall Semester
Introduction to physical therapy practice for evaluation and treatment of problems related to pregnancy, osteoporosis, and other disorders specific to women.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR.

PTS508 Rape Aggression Defense for Women (RAD)

1 credit  Fall Semester
A comprehensive self defense course for women including awareness, prevention, risk reduction and avoidance, and the basics of hands-on defense training.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR.

PTS509 Exercise for Persons with Spinal Cord Injuries

1 credit  First & Second Summer Session
Course provides a review of etiology and pathology of spinal cord injury as well as current methods of exercise and electrical stimulation systems and their physiological effects on the individual.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR.

PTS511 Advanced Clinical Practice: Topics in Pediatrics

1 credit  Fall Semester
The course will focus on advanced topics in pediatric physical therapy. Through lecture, seminar discuss and lab experiences, topics will include: typical and atypical development over the first year, and both motor and sensory integration examination and intervention strategies.
PREREQUISITE: PTS 614, PTS 630

PTS512 Sports Physical Therapy

1 credit  Spring Semester
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR.
PTS513 Advanced Clinical Practice: Evaluation and Treatment of the Foot and Ankle
1 credit  Offered By Announcement Only
Introduction to the roles and responsibilities of being a clinical instructor to physical therapy students. Course material is adapted from the Clinical Instructor Workshop of the Florida Consortium of Clinical Educators.
PREREQUISITE: FOR PHYSICAL THERAPY GRADUATE STUDENTS ONLY

PTS514 Certified Strength and Conditioning Specialist Preparation (NSCA)
1 credit  First Summer Session
Evaluation and exercise planning of athletes to help them achieve their maximum physical performance without incurring injury. Case studies, a problem-solving approach, and integration of previously learned material are emphasized. Classroom instruction, exercise performance, video analysis, and case studies.
PREREQUISITE: ENROLLMENT IN THE DPT PROGRAM

PTS515 Advance Clinical Practice: Taping for the Orthopedic Population.
1 credit  Fall Semester
This seminar course is designed to introduce the participant to the concepts of taping for various musculoskeletal pathologies commonly seen in the athletic population. Athletic taping and kinesiotaping principles and uses in rehabilitation will be introduced. A lab component will allow participants to practice the various taping techniques demonstrated.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY

PTS516 Clinical Research I
3 credits  Fall Semester
Principles, concepts, and basic skills required to conduct clinical research in physical therapy. Topics include research design, sampling, bias, reliability and validity, questionnaire design, statistical computing, conceptual review of literature, and the preparation of a research proposal.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY

PTS517 Abdominal Anatomy
1 credit  First & Second Summer Session
Course analyzes abdominal anatomy emphasizing structure and function. Cadaver dissection is included. Prerequisite: For Physical Therapy majors only or with permission of the instructor.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR

PTS519 Pelvic Anatomy
1 credit  First & Second Summer Session
Course analyzes the anatomy of the human pelvic area. Cadaver dissection is included.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR

PTS520 Spanish for Physical Therapists I
1 credit  First & Second Summer Session
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY OR WITH PERMISSION OF THE INSTRUCTOR
PTS522 Introduction to Functional Capacity Evaluations
1 credit     Spring Semester
The intent of this course is to introduce essential components of functional capacity
evaluations and establish entry-level proficiency. The emphasis will be on cardiovascular
clearance and testing, material handling testing, positional tolerance testing,
spinal inclinometry, and isometric reliability measures as identified through
evidence-based practice and current research.
PREREQUISITE: FOR PHYSICAL THERAPY GRADUATE STUDENTS ONLY

PTS523 Myofascial Release
1 credit     Fall Semester
Introduction to Myofascial Release technique in rehabilitation.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY, WITH PERMISSION OF INSTRUCTOR.

PTS524 Myofascial Release II.
1 credit     Spring Semester
A follow up to the introductory course MFR I (PTS 523). This course focuses on
a review of bioenergy followed by practice of myofascial release techniques for
trunk, extremities and head and neck. Cranial techniques and rebounding are also
taught.
PREREQUISITE: FOR PHYSICAL THERAPY GRADUATE STUDENTS ONLY.

PTS525 Introduction to dry needing theory and technique
1 credit     First Summer Session
Course analyzes the stages of development of the motor, cognitive, sensory/perception,
and behavioral systems from conception to old age. Prerequisite: Open to Physical
Therapy majors only; others with permission of instructor.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY. OTHERS WITH PERMISSION OF INSTRUCTOR.

PTS526 Introduction to Pilates Rehabilitation I
1 credit     Fall Semester
Course provides historical development, and evidence-based approach to Pilates
rehabilitation.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY; OTHERS WITH PERMISSION OF INSTRUCTOR.

PTS527 Introduction to Pilates Rehabilitation II
1 credit     Spring Semester
Introduction to the Pilates Environment.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY; OTHERS WITH PERMISSION OF INSTRUCTOR.

PTS528 Int Pilates Rehb III
1 credit     First & Second Summer Session

PTS530 Foundations of Physical Therapy
3 credits     Second Summer Session
Historical development, philosophical foundations and contemporary practice of
physical therapist as educator, consultant, administrator, and model of healthy
behaviors. Health as indicated by global fitness measures will be demonstrated
and experienced. Medical terminology mastered.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.
PTS531 Gross Anatomy for Physical Therapy
3 credits First Summer Session
Gross anatomy with emphasis on the musculoskeletal systems and a survey of other systems that are relevant to physical therapy practice.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS532 Gross Anatomy for Physical Therapy
3 credits Spring Semester
Gross Anatomy with emphasis on the musculoskeletal systems and a survey of other systems that are relevant to physical therapy practice.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS533 Communication in Physical Therapy Practice
2 credits First Summer Session
Course provides an analysis of communication skills in physical therapy clinical practice. Emphasis is placed on instruction of patients and their families, supportive staff, and health care team members. In-depth examination of patient-therapist interactions is included.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS540 Neuroscience I
3 credits Fall Semester
The human central nervous system with emphasis on structure-function relationships, and clinical applications. The brain, spinal cord, cranial nerves, tracts, and nuclei of major systems. Central nervous systems lesions and their clinical significance are discussed. Lecture and human dissection are included.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS541 Neuroscience II
3 credits First & Second Summer Session
The central, peripheral, and autonomic nervous systems and their physiological responses to environmental stimuli. Normal systems are contrasted with abnormal systems. The clinical significance of altered neurophysiological states is discussed.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS542 Electrotherapy
3 credits First & Second Summer Session
Course provides an evaluation of nerve and skeletal muscle by classical electrical means. The therapeutic application of selected modalities is discussed.
PREREQUISITE: PHYSICAL THERAPY MAJORS ONLY.

PTS543 Medical Pathology Seminar I
1 credit Fall Semester
Lectures and seminar discussion of pathological conditions with particular emphasis on musculoskeletal disorders.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS544 Medical Pathology Seminar II
1 credit Spring Semester
Lectures and seminar discussion of pathological conditions with particular emphasis on neuromuscular disorders.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.
PTS545 Medical Pathology Seminar III
1 credit  First & Second Summer Session
Lectures and seminar discussion of pathology conditions with particular emphasis on integumentary disorders.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS546 Medical Pathology Seminar IV
1 credit  Fall Semester
Lectures and seminar discussion of pathological conditions with particular emphasis on cardiorespiratory disorders.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS550 Pharmacology
2 credits  Fall Semester
Basic principles of pharmacology and pharmacotherapeutics. Contemporary drug therapies and their effects on patients undergoing rehabilitation are discussed.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS570 Clinical Skills in Physical Therapy
3 credits  Spring Semester
Decision making, documentation and beginning treatment skills in functional mobility and basic exercise and massage. Indications and contraindications of massage, basic active, active assisted, active resisted range of motion and isometric exercises are learned. First aid course is also given.
PREREQUISITE: PHYSICAL THERAPY MAJORS ONLY.

PTS571 Therapeutic Physiology
2 credits  Fall Semester
Physiological effects of exercise and training for the healthy and diseased individual. The use of exercise for joint and muscle mobility, muscle strength, and cardiopulmonary function is included.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS572 Clinical Kinesiology and Biomechanics
3 credits  Fall Semester
A study of musculoskeletal structure and function, physiological and biomechanical factor, and principles underlying the kinematics and kinetic of normal and abnormal human motion.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS574 Clinical Evaluation
3 credits  Fall Semester
Basic evaluation skills for patients with various diseases and dysfunctions. Skills include clinical decision making, history taking, postural and functional assessment, surface palpation, manual muscle testing, and goniometric measurement. Classroom instruction and laboratory practice is included.
PREREQUISITE: PHYSICAL THERAPY MAJORS ONLY.

PTS575 Clinical Decision Making I
3 credits  Spring Semester
Introduction to physical therapy diagnosis, the disablement model, measurement of function screening, and the Physical Therapy Guide to Practice.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.
**PTS595 Selected Topics in Physical Therapy**
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Topics in contemporary physical therapy clinical practice with focus on specialty areas such as neonatal pulmonary care, balance/vestibular dysfunction, geriatrics, pediatrics, obstetrics, and gynecology.

**PTS599 Independent Study in Physical Therapy**
1-3 credits  Fall & Spring Semester
Each course is designed to meet special interest demands of students.
PREREQUISITE: FOR PHYSICAL THERAPISTS; PERMISSION OF THE INSTRUCTOR.

**PTS606 Neurological Evaluation**
2 credits  Fall Semester
Comprehensive evaluation of the patient with neurological dysfunction. Emphasis is placed on decision making, differential diagnosis, selection, and interpretation of examination components.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

**PTS608 Human Gait and Locomotion**
2 credits  Fall Semester
Principles of human gait and locomotion, including normal and pathological gait. Analysis of deviations, causes and specific treatments to address movement dysfunctions.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

**PTS610 Clinical Internship I**
2 credits  Fall Semester
Supervised clinical education emphasizing clinical skills. Competence is expected in areas such as analysis of normal and abnormal human motion, exercise, and evaluation and treatment for cardiopulmonary dysfunctions.
PREREQUISITE: PHYSICAL THERAPY MAJORS ONLY.

**PTS611 Clinical Internship II**
2 credits  Fall Semester
Supervised clinical education emphasizing clinical skills. Competence is expected in areas such as evaluation and treatment of extremity dysfunctions, wound care, and neuromuscular dysfunctions.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

**PTS614 Neurorehabilitation I**
3 credits  Spring Semester
The theoretical basis and clinical application of the neurophysiological approaches to treatment. Principles of motor control dynamic systems, sensori-motor development, and integration are presented to include discussion and practice of methods of evaluation and intervention. Treatment principles, approaches, and techniques as advocated by the Bobaths, Rood, Brunnstrom, Knott, and Voss are emphasized. An integrated and symptomatic approach, which reinforces the problem solving/differential diagnosis process involved in client care is utilized.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

**PTS615 Rehabilitation of the Complex Patient**
3 credits  First & Second Summer Session
Rehabilitation of the complex patient, including spinal cord injury, traumatic brain injury, multi-system, and multi-organ disease.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.
PTS617 Clinical Research II
3 credits  Fall Semester
This course is a continuation of Clinical Research I that provides the student with continued guidance in the completion of the faculty led research project begun as part of Clinical Research I. A series of lectures also provide exposure to additional topics relevant to clinical research in Physical Therapy. Potential lecture topics include data analysis, design, error, philosophy of science, and research reporting.
PREREQUISITE: PTS 616; FOR PHYSICAL THERAPY MAJORS ONLY.

PTS618 Physical Therapy Administration
3 credits  First & Second Summer Session
Course discusses physical therapy services, departmental policies and procedures, and personnel management. Issues relevant to clinical practice and the physical therapy profession are emphasized. An administrative project.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS620 Biomechanical Basis of Human Movement
3 credits  Fall Semester
A study of the basic biomechanical principles underlying the kinetics and kinematics of normal and abnormal human motion as well as the measurement of human movement.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS.

PTS621 Measurement of Impairment and Function in Human Movement
3 credits  Spring Semester
A study of measurement tools utilized in the analysis of normal and abnormal human motion.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS.

PTS622 Pathobiology of Human Function I
3 credits  Spring Semester
Pathophysiology of musculo-skeletal processes that impair human function including skeletal muscle; skin, tendons, ligaments, cartilage; bone; and cardiorespiratory.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

PTS624 Cardio-Respiratory Physical Therapy
3 credits  Spring Semester
The skills necessary for the evaluation and treatment of patients with various cardio-respiratory diseases and dysfunctions. Inpatient and outpatient cardiac and respiratory rehabilitation is included. Research on prevention of cardio-respiratory diseases and dysfunctions as it relates to evaluative, and therapeutic methods is also discussed. Course utilizes classroom instruction, individual investigation, laboratory practice, and clinical experience.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS626 Therapeutic Exercise
3 credits  Spring Semester
A holistic approach to the evaluation, treatment, and management of patients with various neuromuscular diseases and dysfunctions. Appropriate therapeutic exercises interrelated with modalities and self-help devices as well as individual investigation of respective neuromuscular diseases and dysfunctions. Classroom instruction and laboratory practice are included.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.
PTS627 Prosthetics and Orthotics  
3 credits  
Spring Semester  
A holistic approach to the evaluation and management of patients with amputations and spinal cord injuries. Appropriate therapeutic exercises interrelated with self-help appliances as well as individual investigation of respective amputation and spinal cord problems are emphasized. Classroom instruction and laboratory practice are included. 
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS628 Musculoskeletal Examination and Treatment I  
3 credits  
Spring Semester  
In-depth examination of differential diagnosis of various extremity dysfunctions with principles of examining soft tissue, bony and post-surgical problems relevant to the shoulder, elbow, wrist/hand, hip, knee, ankle, and foot. Manual therapy/joint mobilizations for each joint will also be introduced. 
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS629 Management of the Spine  
3 credits  
First & Second Summer Session  
The evaluation and treatment of various spinal dysfunctions. Review and investigation of the literature relevant to the sacro-iliac, lumbar, thoracic, cervical spines, and the head and neck. Clinical evaluation and treatment procedures is included. Course utilizes classroom instruction, laboratory practice, and clinical experience. 
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS630 Pediatric Physical Therapy  
2 credits  
Spring Semester  
An overview of factors and issues related to examination and treatment of children by physical therapists. 
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS631 Geriatric Physical Therapy  
2 credits  
Spring Semester  
An overview of factors and issues related to examination and treatment of older individuals by physical therapists. 
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS643 Measuring Health Outcomes  
3 credits  
Offered By Announcement Only  
The more common acute and chronic diseases that affect the elderly requiring physical therapy are examined, and the latest rehabilitation methods for treatment are researched and discussed. In addition to a discussion of acute vs. chronic disease and a discussion of the physiology of pain, diseases such as sensory impairment, CVA, cardiopulmonary disorders, diabetes, osteo and rheumatoid arthritis, cancer and Parkinson's disease are featured. PTS 644. Integrated Sports and Leisure 3 cr. This course is designed to promote the integration of able-bodied students with the physically challenged by working together to learn common recreational activities. The course will use sailing and camping activities as an educational tool for able-bodied students to learn the capabilities, physical resources and assistance required by physically challenged individuals. Through a cooperative effort, students will learn the skills necessary for sailing and outdoor camping and how to teach the same skills to others. 
PREREQUISITE: PT PHD STUDENT
PTS644 Integrated Sports and Leisure
1-3 credits Spring Semester
Course promotes the integration of able-bodied students with the physically challenged by working together to learn common recreational activities. Sailing and camping activities are used as an educational tool for able-bodied students to learn the capabilities, physical resources, and assistance required by physically challenged individuals.

PTS645 Integumentary Disorders and Treatment
2 credits Fall Semester
Basic and advanced principles regarding the integumentary system and related disorders, as well as principles of wound healing and wound care therapies.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS648 Musculoskeletal Examination and Treatment II
3 credits Fall Semester
Advanced examination, evaluation, functional assessment and treatment of patients in selected specialty areas of musculoskeletal physical therapy, with emphasis on functional outcomes and evidence based treatment throughout the life span.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS655 Neuromuscular Basis of Movement
3 credits Spring Semester
Concepts of neuromuscular production and regulation of movement with emphasis on neurophysiologic substrates and mechanisms underlying motor behavior.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY, OTHERS WITH PERMISSION OF INSTRUCTOR.

PTS660 Theories of Movement Science
3 credits Fall Semester
An in-depth review of classical theories and recent research in the movement sciences, to include the study and analysis of system theory and neurobiological substrates.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PTS661 Motor Learning
3 credits Spring Semester
The factors relating to, and affecting, the acquisition and performance of motor skills. Qualification of skill acquisition and performance are explored.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PTS662 Advanced Topics in Neurodevelopment
3 credits Offered By Announcement Only
Classical research and systems models of neurodevelopment is reviewed, analyzed, and related to current research on various areas of human development throughout the lifespan.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PTS664 Seminars in Neuroscience
3 credits Offered By Announcement Only
This course explores the role and organization of the key units of the central and peripheral nervous systems at the molecular and cellular levels. The integrated functional physiology of systems neuroscience and behavioral neuroscience will be studied with special emphasis on neural contributions to involuntary and voluntary motor functions, perception, cognition, and learning.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.
PTS665 Health Promotion and Disease Prevention
2 credits First & Second Summer Session
The role of physical therapists in health promotion and disease prevention.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS666 Rehabilitation of the Amputee
3 credits Offered By Announcement Only
This course examines the scientific evidence related to the evaluation, treatment and management of clients who require intervention for diabetic foot and/or dysvascular limb potentially leading to amputation, amputation surgery, prosthetic appliances, functional assessment and amputee rehabilitation. Upper limb prosthetic management will also be examined.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS667 Prosthetic Technology and Amputee Rehabilitation
3 credits Offered By Announcement Only
This course examines the current scientific evidence related to prosthetic devices with regard to evaluation, fabrication, materials, fitting and functional outcomes. Emphasis is on state-of-the-art technology and the future of prosthetic designs.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS668 Rehabilitation Engineering and Assistive Technology
3 credits Offered By Announcement Only
This course is designed for graduate students interested in developing an understanding of complementary roles of clinicians and engineers in assisting individuals with disabilities in all areas of life.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION FROM THE INSTRUCTOR.

PTS669 Seminars in Orthotics and Prosthetic Rehabilitation
3 credits Offered By Announcement Only
Examination of current scientific evidence and clinical issues related to upper and lower limb amputees, and prosthetic and orthotic componentry and related technology. Students will discuss case studies and design appropriate devices to address the needs of the individuals in the cases.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS670 Education, Direction, and Supervision in Physical Therapy
2 credits Spring Semester
Principles of education, direction and supervision pertaining to physical therapy patient care management. Prerequisite: Open to Physical Therapy majors.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS671 Complementary Therapies in Rehabilitation
2 credits Fall Semester
Historical development and evidence-based approach to complementary therapies in rehabilitation.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.
PTS674 Educational Administration in Physical Therapy  
3 credits  
Spring Semester  
Review of history and current issues in educational administration of physical therapy programs at the entry-level and post-graduate level.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PTS675 Clinical Decision Making II  
3 credits  
Fall Semester  
Integration of basic science and clinical science in developing a patient plan of care, with consideration of ethical, psychological, and economic factors.  
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS677 Instructional Methods in Physical Therapy Education  
3 credits  
Fall Semester  
Overview of research in the professional education field, with specific applications to physical therapy academic and clinical education. Emphasis is placed on curriculum development, competency-based instructional design, testing, and instructional evaluation methods.  
PREREQUISITE: ADMISSION TO THE PH.D. PROGRAM.

PTS678 Teaching Practicum  
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session  
Supervised instructional design, teaching and evaluation of entry level physical therapy students. Students participate as course instructors in entry-level master's degree physical therapy curriculum.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PTS679 Anatomy of back and limbs.  
3 credits  
Offered By Announcement Only  
Regional approach to the musculoskeletal, neural, and vascular systems of the back, upper limbs and lower limbs. For Physical Therapy graduate students with an interest in a professional career in teaching the anatomical sciences to students of the health professions including medical students.  
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS680 Anatomy of the Trunk  
3 credits  
Offered By Announcement Only  
Regional approach to the musculoskeletal, organ, and circulatory systems of the thorax, abdomen, pelvis & perineum. For Physical Therapy graduate students with an interest in a professional career in teaching the anatomical sciences to students of the health professions including medical students.  
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS681 Anatomy of the Head and Neck  
3 credits  
Offered By Announcement Only  
Regional approach to the musculoskeletal, neural, and vascular systems of the head and neck. For the Physical Therapy graduate students with an interest in a professional career in teaching the anatomical sciences to students of the health professions including medical students.  
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.
PTS682 Microscopic Anatomy.
3 credits
Offered By Announcement Only
Study of the structure and function of cells, tissues, and organ systems utilizing light microscope, electron microscopic images, and electronic media. This course is designed for Physical Therapy graduate students with an interest in a professional career in teaching the anatomical sciences to students of the health professions including medical students.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS683 Human Embryology
3 credits
Spring Semester
Study of embryologic events from fertilization to birth in the human. Consideration of the early formation of the various organ systems, on clinical problems associated with birth defects, and means of prevention.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS684 Human Neuroanatomy
3 credits
Offered By Announcement Only
Detailed exploration of the human nervous system with an emphasis on structure-function relationship and clinical applications. This course is designed for Physical Therapy graduate students with an interest in a professional career in teaching the anatomical sciences to students of the health professions including medical students.
PREREQUISITE: ACCEPTANCE INTO THE PHYSICAL THERAPY PHD STUDIES PROGRAM OR PERMISSION OF THE INSTRUCTOR.

PTS685 Medical Diagnostic Tests
2 credits
Fall Semester
Basic principles of medical diagnostic tests commonly encountered in physical therapy.
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.

PTS690 Physical Therapy Diagnosis
3 credits
Spring Semester
Study of the integration of didactic knowledge, clinical skills, and intuitive process into the formation of a clinical diagnosis which will direct treatment in physical therapy. Diagnosis as a process is compared to diagnosis in nursing, psychiatry, and medicine, and distinguished from assessment, examination, and screening.
PREREQUISITE: PRACTICING PHYSICAL THERAPIST.

PTS691 Role Seminar 1: Academic Leadership
1 credit
Offered By Announcement Only
PREREQUISITE: PT PHD STUDENT

PTS692 Role Seminar 2: Research
1 credit
Offered By Announcement Only
PREREQUISITE: PT PHD STUDENT

PTS695 Clinical Research Methods I
3 credits
Fall Semester
An overview of measurement and sampling issues pertaining to clinical research in Physical Therapy.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
PTS696 Applied Statistics in Physical Therapy  
3 credits  Fall Semester  
Basic Statistics taught from an applied perspective which includes statistical computing using SAS in a mainframe environment and interpretation of SAS output.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PTS697 Clinical Research Methods II  
3 credits  Spring Semester  
A course focusing on issues in research design and analysis pertaining to clinical research in Physical Therapy.  
PREREQUISITE: PTS 695, 696, OR PERMISSION OF THE INSTRUCTOR.

PTS698 Research Practicum  
3 credits  Fall & Spring Semester & First & Second Summer Session  
Practicum designed to familiarize the student with an area of research, to implement a pilot study in an area of interest, and to develop working relationship with a sponsoring faculty member.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

PTS699 Independent Study in Physical Therapy  
1- 3 credits  Fall & Spring Semester & First & Second Summer Session  
Each course is designed to meet the needs of graduate students for in-depth study in a particular area of special interest.  
PREREQUISITE: GRADUATE STUDENT STATUS; PERMISSION OF THE INSTRUCTOR.

PTS702 Special Internship  
1- 3 credits  Offered By Announcement Only  
Introduction to faculty role in an institution of higher education, including faculty development and evaluation systems, educational leadership, and student advising.  
PREREQUISITE: PHYSICAL THERAPY MAJORS ONLY

PTS703 Clinical Internship III  
2 credits  Spring Semester  
Initiation of research career and dynamics of research role development within an institution. Grant writing, funding sources, and proposal considerations are also covered.  
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY

PTS704 Clinical Internship IV  
0- 2 credits  Spring Semester  
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY

PTS712 Clinical Internship III  
3 credits  Fall & Spring Semester & First & Second Summer Session  
Supervised clinical education emphasizing clinical skills. Competence is expected in areas such as neurofacilitation techniques, and evaluation and treatment of amputees, central nervous system dysfunctions, and spinal cord dysfunction.  
PREREQUISITE: FOR PHYSICAL THERAPY MAJORS ONLY.
PTS713 Clinical Internship IV
1-3 credits Fall & Spring Semester & First & Second Summer Session
Supervised clinical education emphasizing skills previously taught in course sequences.
Competence is expected in areas such as conservative management of spinal dysfunctions,
growth and development neurofacilitation techniques, central nervous system dysfunctions,
clinical administrative procedures, and clinical research techniques.
PREREQUISITE: MUST BE IN THE P.T. MASTERS PROGRAM.

PTS730 Pre-candidacy Dissertation.
1-6 credits Fall & Spring Semester & First & Second Summer Session
To be used for pre-candidacy Doctorate dissertation research.

PTS740 Post-candidacy Dissertation.
1-12 credits Fall & Spring Semester & First & Second Summer Session
The student will enroll for credits as determined by his/her advisor, but not for
less than a total of 12. No more than six hours may be taken in a regular semester,
nor more than three in a summer session. When a student has passed his/her qualifying
exams and is engaged in an Assistantship, he/she may still take the maximum allowable
credit stated above.

PTS750 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
To establish residence for the PhD, or DPT, after the student has been enrolled
for the permissible cumulative total in appropriate doctoral research or clinical
practice. Credit not granted, may be regarded as full-time residence as determined
by the Dean of the Graduate School.
PREREQUISITE: PERMISSION OF THE DIRECTOR.

PHYSIOLOGY & BIOPHYSICS

PHS510 Cell Physiology Biophysics
2 credits Fall Semester
This course is designed as preparation for the study of mammalian physiology. Course
is usually intensive, adapted to the schedule of the medical curriculum and occupying
the equivalent of two to three days per week for two-three weeks. The student is
introduced to general principles of cell physiology, chemical and physical structure
of membranes, membrane transport, and electrical membrane phenomena. Topics include
excitation, contraction, energy transduction, nerve impulse conduction, and synaptic
transmission. Course utilizes lecture and laboratory.
PREREQUISITE: PERMISSION OF THE DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

PHS511 Neurophysiology
3 credits Spring Semester
Physiology of the mammalian nervous system. Course is intensive, adapted to the
schedule of the medical curriculum and comprising roughly five hours of lecture
and four hours of conference weekly for five to six weeks. A lecture course coordinated
with neuroanatomy.
PREREQUISITE: PHS 510 OR 641, OR AN EQUIVALENT; PERMISSION OF THE DEPARTMENTAL
GRADUATE STUDIES COMMITTEE. PREREQUISITE OR COREQUISITE: MDB 505.

PHS512 Systemic Physiology
5 credits Spring Semester
Physiology of the mammalian cardiovascular, respiratory, renal, digestive, endocrine,
and reproductive systems. Course is intensive and adapted to the schedule of the
medical curriculum, occupying the equivalent of about two days a week for most
of semester. Lecture and laboratory are included.
PREREQUISITE: PERMISSION OF THE GRADUATE STUDIES COMMITTEE, INCLUDING ENDOCRINOLOGY.
PHS600 Research Seminar in Membrane Biophysics and Neurobiology
1 credit Fall & Spring Semester & First & Second Summer Session
The student may be required to present a short talk on a research area of interest.
All students in the Department of Physiology and Biophysics are required to register for this seminar. For other students, permission of the Departmental Graduate Studies Committee is required.

PHS609 Research
1-5 credits Fall & Spring Semester & First & Second Summer Session
Students work with individual members of the department on research problems. Orientation to the areas of research in the field and the techniques used is included.
PREREQUISITE: PERMISSION OF THE DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

PHS620 Neurophysiology
3 credits Spring Semester
Physiology of the mammalian nervous system. The course will consist of both didactic lectures and discussions of current research literature.
PREREQUISITE: PHS 510 OR 641 AND PERMISSION OF THE DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

PHS631 Special Work
1-5 credits Fall & Spring Semester & First & Second Summer Session
Special work, lecture, laboratory, reading, seminar, or a combination of these as determined by advisor in accordance with student's interest.
PREREQUISITE: PERMISSION OF THE DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

PHS641 Principles of Membrane Physiology and Biophysics I
2 credits Fall Semester
Course discusses chemical and physical structure of membranes, model systems, permeability and transport, membrane potential, ionic channels, excitability in nerve and muscle, ionophores, active transport, and membrane receptors. Identical with MCP 641.
PREREQUISITE: CHM 361; BMB 506; AND PERMISSION OF DEPARTMENTAL GRADUATE STUDIES COMMITTEE.

PHS642 Principles of Membrane Physiology and Biophysics II
2 credits Fall Semester
Course topics include osmosis and cell volume, tracer analysis of permeability and compartmentation, theory of channels and carriers, cable properties, Hodgkin-Huxley formalism, Na, K, and Ca ion channels, regulation of cellular Na, Ca activities, single-channel analysis, chemical synapses, membrane receptors, cell junctions, excitation and E-C coupling in muscle. Identical with MCP 642.
PREREQUISITE: PHS 641.

PHS669 Nerve and Synapse
2 credits Fall Semester
An advanced seminar course in the basic mechanisms underlying the propagated nerve impulse and synaptic transmission.
PREREQUISITE: PHS 510 AND 511; CONSENT OF INSTRUCTOR AND DEPARTMENTAL GRADUATE STUDIES COMMITTEE.
PHS680 Research Ethics
0 credit  Fall Semester
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support
for National Research Service Award Training Grants are required to develop a program
in the principles of Scientific Integrity. This program should be an integral part
of the proposed training effort. The University of Miami School of Medicine has
chosen to respond to this requirement with this course. This course must be taken
during the first semester in the Department or Program. This is a six-hour course
and will be given in two sessions of three hours each.
PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR.

PHS710 Master's Thesis
1-6 credits  Offered By Announcement Only
The student working on his/her master's thesis enrolls for credit, in most departments
not to exceed six, as determined by his/her advisor. Credit is not awarded until
the thesis has been accepted.

PHS720 Research in Residence
0 credit  Offered By Announcement Only
Used to establish research in residence for the thesis for the master's degree
after the student has enrolled for the permissible cumulative total in PHS 710
(usually six credits). Credit not granted. May be regarded as full time residence.

PHS730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as
determined by his/her advisor but not for less than a total of 24. Not more than
12 hours of PHS 730 may be taken in a regular semester, nor more than six in a
summer session. Where a student has passed his/her (a) qualifying examinations,
and (b) is engaged in an assistantship, he/she may still take the maximum allowable
credit stated above.

PHS740 Doctoral Dissertation- Post Candidacy
1-12 credits  Fall & Spring Semester & First & Second Summer Session

PHS750 Research in Residence
0 credit  Offered By Announcement Only
Used to establish research in residence for the Ph.D., after the student has been
enrolled for the permissible cumulative total in appropriate doctoral research.
Credit not granted. May be regarded as full-time residence as determined by the
Dean of the Graduate School.

PROGRAM IN BIOMEDICAL SCIENCES
PIB575 Perl Programming Lab
1 credit  Fall & Spring Semester
The Perl programming lab is for students who have little or no programming experience.
The objective of the lab is to teach students to write computer code that will
automate and speed up their genetic and genomic data analysis and provide new ways
to explore the data to advance knowledge discovery in biology. Each lab will start
with a 40 minute lecture in which we discuss new syntax and programming elements
and the rest of the time will be spent on hands-on programming assignments using
real genetic/genomic/proteomic data sets. Students will be monitored and will get
help in completing their assignments. In a popular book, "Programming Perl" (published
by O'Reilly Media), the programming language is described as: "Perl is a language
for getting your job done." A stated design goal of Perl is to make easy tasks
easier and difficult tasks possible.
PIB600 Journal Club/Seminar
0 credit  Fall & Spring Semester
All PIBS students are required to attend one journal club or seminar each week.

PIB601 Advanced Biomedical Science Lectures
5 credits  Fall Semester
An interdisciplinary survey of molecular and cellular biology. Topics include protein structure and function, protein synthesis, nucleic acids, genetic code, gene technology, genetic analysis, control of cellular activity, molecular anatomy of genes and chromosomes, DNA replication, repair, and recombination, regulation of transcription, RNA processing, and post-transcriptional control.
PREREQUISITE: PERMISSION OF INSTRUCTOR

PIB602 Scientific Reasoning
3 credits  Fall Semester
Students are taught with a combination of lectures, scientific reasoning and methods classes, and small group sessions devoted to primary literature.
PREREQUISITE: PERMISSION OF INSTRUCTOR

PIB611 Accelerated Basic Science Medical Curriculum
1-18 credits  Fall & Spring Semester
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. A single grade will be entered on the graduate transcript for this course.
PREREQUISITE: ADMISSION TO THE COMBINED M.D./PH.D PROGRAM

PIB631 PIB 631 Special Work
1-6 credits  Fall & Spring Semester & First & Second Summer Session
1 - 6 credits Special work, lecture, laboratory or a combination of these, as determined by advisor in accord with student's individual interest. Course is offered only on demand.
PREREQUISITE: PERMISSION FROM ADVISOR

PIB640 The Business of Science
3 credits  Fall & Spring Semester
This survey course will introduce graduate students in the biomedical sciences and medical students to the basic principles of business to enhance their effectiveness in being professional scientists. Topics will include: Project Management, Personnel Management, Accounting and Budgeting Process, Invention Disclosures and Patents, and Developing a Business Plan. Students will develop mock projects and business plans and participate in workshops to develop practical skills.
PREREQUISITE: PERMISSION OF INSTRUCTOR AND SUCCESSFUL COMPLETION OF THE FIRST YEAR OF GRADUATE LEVEL WORK
PIB680 Research Ethics

0 credit  Fall Semester

The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the department or program. This is a six-hour course and will be given in two sessions of three hours each.

PREREQUISITE: PERMISSION OF THE GRADUATE ADVISOR

PIB730 Doctoral Dissertation

1-12 credits  Fall & Spring Semester & First & Second Summer Session
DAN550 Women in Theatrical Dance
3 credits  Offered By Announcement Only
Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.
PREREQUISITE: DAN 250 OR 450 OR GRADUATE STUDENT.

DAN585 Methods of Teaching Dance K-12 (Advanced)
3 credits  Offered By Announcement Only
An advanced study of the Dance curriculum content in a variety of settings including public schools, grades K-12.
PREREQUISITE: DAN 411 OR 450 AND PERMISSION.

DAN593 Special Topics Dance
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Dance
PREREQUISITE: NONE

INSTRUMENTAL PERFORMANCE

MIPBAI Bassoon
1- 4 credits  Fall & Spring Semester
Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.

MIPBAJ Bassoon
1- 4 credits  Fall & Spring Semester
Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP BAI.

MIPBAK Bassoon
1- 4 credits  Fall & Spring Semester & First & Second Summer Session
Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP BAJ.

MIPBAL Bassoon
1- 4 credits  Fall & Spring Semester
Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP BAK.
MIPBAM Bassoon
1-4 credits    Fall & Spring Semester
Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP BAL.

MIPBAN Bassoon
1-4 credits    Fall & Spring Semester
Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP BAM.

MIPBAO Bassoon
1-4 credits    Fall & Spring Semester
Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP BAN.

MIPBAP Bassoon
1-4 credits    Fall & Spring Semester
Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP BAO.

MIPBAQ Bassoon
1-4 credits    Fall & Spring Semester
Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP BAP.

MIPBAR Bassoon
1-4 credits    Fall & Spring Semester
Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP BAQ.

MIPBHI Baritone Horn
1-4 credits    Fall & Spring Semester
PREREQUISITE: MASTER’S LEVEL. MIP BHH.

MIPBHJ Baritone Horn
1-4 credits    Fall & Spring Semester
PREREQUISITE: MASTER’S LEVEL. MIP BHI.
SCHOOL OF MUSIC

INSTRUMENTAL PERFORMANCE

MIPBHK Baritone Horn
1- 4 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL. MIP BHJ.

MIPBHL Baritone Horn
1- 4 credits  Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MIP BHK.

MIPBHM Baritone Horn
1- 4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP BHL.

MIPBHN Baritone Horn
1- 4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP BHM.

MIPBHO Baritone Horn
1- 4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP BHN.

MIPBHP Baritone Horn
1- 4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP BHO.

MIPBHQ Baritone Horn
1- 4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP BHQ.

MIPCDI Conducting
1- 4 credits  Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MIP CDH.

MIPCDJ Conducting
1- 4 credits  Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MIP CDI.

MIPCDK Conducting
1- 4 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL. MIP CDJ.

MIPCDL Conducting
1- 4 credits  Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MIP CDK.

MIPCDM Conducting
1- 4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP CDL.

MIPCDN Conducting
1- 4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP CDM.
SCHOOL OF MUSIC

INSTRUMENTAL PERFORMANCE

MIPCDO Conducting
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP CDN.

MIPCDP Conducting
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP CDO.

MIPCDQ Conducting
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP DQ.

MIPCDR Conducting
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP DR.

MIPCLI Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: MASTER'S LEVEL. MIP CLH.

MIPCLJ Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: MASTER'S LEVEL. MIP CLI.

MIPCLK Clarinet
   1- 4 credits    Fall & Spring Semester & First & Second Summer Session
   Prerequisite: Master's level.
   PREREQUISITE: MASTER'S LEVEL. MIP CLJ.

MIPCLL Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: MASTER'S LEVEL. MIP CLK.

MIPCLM Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP CLM.

MIPCLN Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP CLN.

MIPCLO Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP Klo.

MIPCLP Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP CLP.

MIPCLQ Clarinet
   1- 4 credits    Fall & Spring Semester
   PREREQUISITE: DOCTORAL LEVEL. MIP CLQ.
MIPCLR Clarinet
1-4 credits  Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP CLQ.

MIPDBI Double Bass
1-4 credits  Fall & Spring Semester
Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.
PREREQUISITE: MASTER'S LEVEL. MIP DBH.

MIPDBJ Double Bass
1-4 credits  Fall & Spring Semester
Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.
PREREQUISITE: MASTER'S LEVEL. MIP DBI.

MIPDBK Double Bass
1-4 credits  Fall & Spring Semester & First & Second Summer Session
Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.
PREREQUISITE: MASTER'S LEVEL. MIP DBJ.

MIPDBL Double Bass
1-4 credits  Fall & Spring Semester
Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.
PREREQUISITE: MASTER'S LEVEL. MIP DBK.

MIPDBM Double Bass
1-4 credits  Fall & Spring Semester
Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.
PREREQUISITE: DOCTORAL LEVEL. MIP DBL.

MIPDBN Double Bass
1-4 credits  Fall & Spring Semester
Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.
PREREQUISITE: DOCTORAL LEVEL. MIP DBM.

MIPDBO Double Bass
1-4 credits  Fall & Spring Semester
Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.
PREREQUISITE: DOCTORAL LEVEL. MIP DBN.

MIPDBP Double Bass
1-4 credits  Fall & Spring Semester
Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.
PREREQUISITE: DOCTORAL LEVEL. MIP DBO.
MIPDBQ Double Bass  
1-4 credits  Fall & Spring Semester  
Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.  
PREREQUISITE: DOCTORAL LEVEL. MIP DBP.

MIPDBR Double Bass  
1-4 credits  Fall & Spring Semester  
Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.  
PREREQUISITE: DOCTORAL LEVEL. MIP DBQ.

MIPFHI French Horn  
1-4 credits  Fall & Spring Semester  
Emphasis will be on an assessment of students' skills, needs and repertoire experience. Materials will be explored from the standard etude and solo literature that is relevant to the students' level and skill needs. Exploration will begin to choose material for a solo recital in the Spring semester.  
PREREQUISITE: MASTER'S LEVEL. MIP FHH.

MIPFHK French Horn  
1-4 credits  Fall & Spring Semester & First & Second Summer Session  
Further exploration of solo and chamber music repertoire. Orchestral literature will take a larger role in preparation for auditions. An overview of pedagogy materials for performance and teaching use will also be explored.  
PREREQUISITE: MASTER'S LEVEL. MIP FHJ.

MIPFHJ French Horn  
1-4 credits  Fall & Spring Semester  
Focus on audition preparation and repertoire for the final Master's recital.  
PREREQUISITE: MASTER'S LEVEL. MIP FHK.

MIPFHM French Horn  
1-4 credits  Fall & Spring Semester  
Students' skill needs will be assessed and a course of study developed for any remedial needs. An in-depth study of appropriate literature for both solo and chamber recitals will be undertaken in preparation for a long-term degree plan. Advanced study of Orchestral Literature will begin, including listening and score study. Repertoire for an initial recital and the Qualifying Recital will be chosen and prepared.  
PREREQUISITE: DOCTORAL LEVEL. MIP FHL.
MIPFHN French Horn
1-4 credits    Fall & Spring Semester
The initial Doctoral Recital and the Qualifying Recital will be presented. Repertoire
for these recitals will be the main focus but the Study of Orchestral Literature
will remain a constant.
PREREQUISITE: DOCTORAL LEVEL. MIP FHM.

MIPFHO French Horn
1-4 credits    Fall & Spring Semester
Repertoire exploration for either the Solo recital or the Chamber Music recital
along with continuing Orchestral Literature study.
PREREQUISITE: DOCTORAL LEVEL. MIP FHN.

MIPFHP French Horn
1-4 credits    Fall & Spring Semester
Final preparation and presentation for either the Solo recital or Chamber Music
recital. Preparation for Orchestral auditions will also continue.
PREREQUISITE: DOCTORAL LEVEL. MIP FHO.

MIPFHQ French Horn
1-4 credits    Fall & Spring Semester
Repertoire exploration for the final recital along with Orchestral audition preparation.
An overview of pedagogical materials will be explored and prepared as possible
 teaching tools.
PREREQUISITE: DOCTORAL LEVEL. MIP FHP.

MIPFHR French Horn
1-4 credits    Fall & Spring Semester
Final preparation and presentation of remaining recital. Preparation for auditions
 should be advanced enough that the student can begin to take auditions. This will
provide the opportunity for follow up work on audition skills and techniques.
PREREQUISITE: DOCTORAL LEVEL. MIP FHQ.

MIPFLI Flute
1-4 credits    Fall & Spring Semester
Mastery of technical aspects of flute performance. Preparation of Masters recital(s)
 and oral defense. Preparation of repertoire for audition for further study or professional
 placement. Related areas such as specific individualized studies, instrumental
 maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER’S LEVEL. MIP FLH.

MIPFLJ Flute
1-4 credits    Fall & Spring Semester
Mastery of technical aspects of flute performance. Preparation of Masters recital(s)
 and oral defense. Preparation of repertoire for audition for further study or professional
 placement. Related areas such as specific individualized studies, instrumental
 maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER’S LEVEL. MIP FLI.
SCHOOL OF MUSIC

INSTRUMENTAL PERFORMANCE

MIPFLK Flute
1- 4 credits  Fall & Spring Semester & First & Second Summer Session
Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP FLJ.

MIPFLL Flute
1- 4 credits  Fall & Spring Semester
Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP FLK.

MIPFLM Flute
1- 4 credits  Fall & Spring Semester
Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP FLM.

MIPFLN Flute
1- 4 credits  Fall & Spring Semester
Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP FLM.

MIPFLO Flute
1- 4 credits  Fall & Spring Semester
Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP FLO.

MIPFLQ Flute
1- 4 credits  Fall & Spring Semester
Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP FLP.
SCHOOL OF MUSIC

INSTRUMENTAL PERFORMANCE

MIPFLR Flute
1- 4 credits    Fall & Spring Semester
Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP FLQ.

MIPGUI Guitar
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER’S LEVEL. MIP GUH.

MIPGUK Guitar
1- 4 credits    Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER’S LEVEL. MIP GUI.

MIPGUL Guitar
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER’S LEVEL. MIP GUK.

MIPGUM Guitar
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP GUK.

MIPGUN Guitar
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP GUM.

MIPGUO Guitar
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP GUN.

MIPGUP Guitar
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP GUO.

MIPGUQ Guitar
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP GUQ.

MIPHAI Harp
1- 4 credits    Fall & Spring Semester
Advanced study of solo harp literature.
PREREQUISITE: MASTER’S LEVEL. MIP HAH.
MIPHAJ Harp  
1- 4 credits  Fall & Spring Semester  
Advanced study of solo harp literature.  
PREREQUISITE: MASTER’S LEVEL. MIP HAI.

MIPHAK Harp  
1- 4 credits  Fall & Spring Semester & First & Second Summer Session  
Advanced study of solo harp literature.  
PREREQUISITE: MASTER’S LEVEL. MIP HAJ.

MIPHAL Harp  
1- 4 credits  Fall & Spring Semester  
Advanced study of solo harp literature.  
PREREQUISITE: MASTER’S LEVEL. MIP HAK.

MIPHAM Harp  
1- 4 credits  Fall & Spring Semester  
Advanced study of solo harp literature.  
PREREQUISITE: DOCTORAL LEVEL. MIP HAL.

MIPHAN Harp  
1- 4 credits  Fall & Spring Semester  
Advanced study of solo harp literature.  
PREREQUISITE: DOCTORAL LEVEL. MIP HAM.

MIPHAO Harp  
1- 4 credits  Fall & Spring Semester  
Advanced study of solo harp literature.  
PREREQUISITE: DOCTORAL LEVEL. MIP HAO.

MIPHAQ Harp  
1- 4 credits  Fall & Spring Semester  
Advanced study of solo harp literature.  
PREREQUISITE: DOCTORAL LEVEL. MIP HAP.

MIPHAR Harp  
1- 4 credits  Fall & Spring Semester  
Advanced study of solo harp literature.  
PREREQUISITE: DOCTORAL LEVEL. MIP HAQ.

MIPOBI Oboe  
1- 4 credits  Fall & Spring Semester  
Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.  
PREREQUISITE: MASTER’S LEVEL. MIP OBH.
SCHOOL OF MUSIC
INSTRUMENTAL PERFORMANCE

MIPOBJ Oboe
1-4 credits Fall & Spring Semester
Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP OBJ.

MIPOBK Oboe
1-4 credits Fall & Spring Semester & First & Second Summer Session
Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP OBJ.

MIPOBL Oboe
1-4 credits Fall & Spring Semester
Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.
PREREQUISITE: MASTER'S LEVEL. MIP OBK.

MIPOBM Oboe
1-4 credits Fall & Spring Semester
Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP OBL.

MIPOBN Oboe
1-4 credits Fall & Spring Semester
Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP OBM.

MIPOBO Oboe
1-4 credits Fall & Spring Semester
Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL. MIP OBN.
MIPOBP Oboe
1-4 credits Fall & Spring Semester
Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL MIP OBO.

MIPOBQ Oboe
1-4 credits Fall & Spring Semester
Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL MIP OBP.

MIPOBR Oboe
1-4 credits Fall & Spring Semester
Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
PREREQUISITE: DOCTORAL LEVEL MIP OBQ.

MIPPEI Percussion
1-4 credits Fall & Spring Semester
First semester of the Master's Degree in percussion performance. Emphasis on assessment of students' skills needs and repertoire experience. Materials covered to include standard solo and ensemble repertoire and technical work. First recital repertoire chosen from works supplementing students' needs.
PREREQUISITE: MASTER'S LEVEL MIP PEH.

MIPPEJ Percussion
1-4 credits Fall & Spring Semester
Second semester of the Masters Degree in percussion performance. The main area of focus is first recital; to be performed this semester. Exploration into solo and ensemble performance needs will continue through this semester.
PREREQUISITE: MASTER'S LEVEL MIP PEI.

MIPPEK Percussion
1-4 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL MIP PEJ.

MIPPEL Percussion
1-4 credits Fall & Spring Semester
Final semester of the Master's Degree in percussion performance. Main focus to be placed upon preparations for the final recital, which will be performed this semester.
PREREQUISITE: MASTER'S LEVEL MIP PEK.
SCHOOL OF MUSIC

INSTRUMENTAL PERFORMANCE

MIPPEM Percussion
1-4 credits Fall & Spring Semester
First of six semesters of study for a DMA in percussion performance. Students' needs assessed, and a course of study devised. Solo and ensemble works studied in-depth accordingly. Works for an initial and qualifying recital chosen.
PREREQUISITE: DOCTORAL LEVEL. MIP PEL

MIPPEN Percussion
1-4 credits Fall & Spring Semester
Second semester DMA. Main focus on initial and qualifying recitals, which are to be performed this semester. Ensemble and technical needs to be addressed.
PREREQUISITE: DOCTORAL LEVEL. MIP PEM

MIPPEO Percussion
1-4 credits Fall & Spring Semester
Third semester DMA. Repertoire for either solo or Chamber recital to be chosen.
PREREQUISITE: DOCTORAL LEVEL. MIP PEN

MIPPEP Percussion
1-4 credits Fall & Spring Semester
Fourth semester DMA. Either solo or chamber recital to be presented, as well as continuing ensemble studies.
PREREQUISITE: DOCTORAL LEVEL. MIP PEO

MIPPEQ Percussion
1-4 credits Fall & Spring Semester
Fifth semester DMA. Repertoire for final recital will be the focus of the semester. Ensemble work to continue, as well as pedagogical studies.
PREREQUISITE: DOCTORAL LEVEL. MIP PEP

MIPPER Percussion
1-4 credits Fall & Spring Semester
Final semester DMA. Final preparation and presentation of the final recital to be the main focus of the semester. Any remaining pedagogical and ensemble concerns are addressed.
PREREQUISITE: DOCTORAL LEVEL. MIP PEQ

MIPS Ak Saxophone
1-4 credits Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: MASTER'S LEVEL. MIP SAH.
SCHOOL OF MUSIC
INSTRUMENTAL PERFORMANCE

MIPSAJ Saxophone
1- 4 credits  Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: MASTER'S LEVEL. MIP SAJ.

MIPSAL Saxophone
1- 4 credits  Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: MASTER'S LEVEL. MIP SAK.

MIPSAM Saxophone
1- 4 credits  Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: DOCTORAL LEVEL. MIP SAL.

MIPSAN Saxophone
1- 4 credits  Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: DOCTORAL LEVEL. MIP SAM.
MIPSAO Saxophone
1- 4 credits    Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: DOCTORAL LEVEL. MIP SAN.

MIPSAP Saxophone
1- 4 credits    Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: DOCTORAL LEVEL. MIP SAO.

MIPSAQ Saxophone
1- 4 credits    Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: DOCTORAL LEVEL. MIP SAP.

MIPSAR Saxophone
1- 4 credits    Fall & Spring Semester
Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
PREREQUISITE: DOCTORAL LEVEL. MIP SAQ.

MIPTBI Trombone
1- 4 credits    Fall & Spring Semester
Advanced progressive study is chosen from the following etude books, Gabriel Masson 12 Various Etudes, Marcel Bitsch 15 Rhythmical Studies, Roger Bountry 12 Etudes for High Perfection, and Brade Edwards Lip-slurs-Exercises for Tone and Technique. Additionally, solo concerto literature and contemporary works are studied and prepared to advance the student's technical and musical mastery of the trombone. Orchestral excerpts are studied to further develop and refine an appropriate sense of orchestral style.
PREREQUISITE: MASTER'S LEVEL. MIP TBH.
**MIPTBJ Trombone**

1-4 credits    Fall & Spring Semester

PREREQUISITE: DOCTORAL LEVEL. MIP TUQ

MIPVAI Viola
1-4 credits    Fall & Spring Semester
Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: MASTER'S LEVEL. MIP VAH

MIPVAJ Viola
1-4 credits    Fall & Spring Semester
Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: MASTER'S LEVEL. MIP VAI
MIPVAK Viola
1- 4 credits  Fall & Spring Semester & First & Second Summer Session
Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: MASTER'S LEVEL MIP VAJ.

MIPVAL Viola
1- 4 credits  Fall & Spring Semester
Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: MASTER'S LEVEL MIP VAK.

MIPVAM Viola
1- 4 credits  Fall & Spring Semester
Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: DOCTORAL LEVEL MIP VAL.

MIPVAN Viola
1- 4 credits  Fall & Spring Semester
Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: DOCTORAL LEVEL MIP VAM.

MIPVAO Viola
1- 4 credits  Fall & Spring Semester
Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: DOCTORAL LEVEL MIP VAN.

MIPVAP Viola
1- 4 credits  Fall & Spring Semester
Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: DOCTORAL LEVEL MIP VAO.

MIPVAQ Viola
1- 4 credits  Fall & Spring Semester
Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: DOCTORAL LEVEL MIP VAP.

MIPVAR Viola
1- 4 credits  Fall & Spring Semester
Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.
PREREQUISITE: DOCTORAL LEVEL MIP VAQ.
MIPVCI Violoncello
  1-4 credits    Fall & Spring Semester
  PREREQUISITE: MASTER'S LEVEL. MIPVCH.

MIPV CJ Violoncello
  1-4 credits    Fall & Spring Semester
  PREREQUISITE: MASTER'S LEVEL. MIPVCI.

MIPVCK Violoncello
  1-4 credits    Fall & Spring Semester & First & Second Summer Session
  PREREQUISITE: MASTER'S LEVEL. MIPVCK.

1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP VNO.

MIPVNQ Violin
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP VNP.

MIPVNR Violin
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MIP VNQ.

MIP539 Brass Chamber Music Institute
2 credits Offered By Announcement Only
Institute offers opportunities for brass players to perform in all forms of chamber music--from trios to Brass Choir. Included are master classes on each instrument plus the availability of private instruction from an excellent faculty. The material covered spans the musical periods including recent brass publications.

MIP541 Bassoon Repertoire and Pedagogy
1-2 credits Fall Semester
Solo and small ensemble literature of the bassoon since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP542 Clarinet Repertoire and Pedagogy
1-2 credits Fall Semester
Solo and small ensemble literature of the clarinet since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP543 Flute Repertoire and Pedagogy
1-2 credits Fall Semester
Solo and small ensemble literature of the flute since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP544 Oboe Repertoire and Pedagogy
1-2 credits Fall Semester
Solo and small ensemble literature of the oboe since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.
SCHOOL OF MUSIC
INSTRUMENTAL PERFORMANCE

MIP545 Brass Repertoire and Pedagogy
1-2 credits Spring Semester
Solo and small ensemble literature of brass instruments since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP546 Percussion Repertoire and Pedagogy
1-2 credits Spring Semester
Solo and small ensemble literature of percussion instruments since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP547 Saxophone Repertoire and Pedagogy
1-2 credits Fall Semester
Solo and small ensemble literature of the saxophone since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP548 Guitar Repertoire and Pedagogy
1-2 credits Fall Semester
Solo and small ensemble literature of the guitar since 1600.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP549 String Repertoire and Pedagogy
1-2 credits Fall Semester
An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.
PREREQUISITE: ADVANCED STANDING IN MUSIC AND PERMISSION OF INSTRUCTOR.

MIP550 Bach Cello Suites
1 credit Spring Semester
The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.

MIP580 Orchestral Audition Preparation
1 credit Fall & Spring Semester
The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for credit.

MIP593 Special Topics MIP
1-3 credits Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Instrumental Performance.
PREREQUISITE: PERMISSION OF THE DEAN.

MIP601 MM Recital Program Notes Preparation
1 credit Fall Semester
Students prepare extensive, original program notes, with bibliography. These notes will be made available to the audience of the second Masters recital. The notes may focus on the historical, analytical and performance aspects of the repertoire for this recital. Required in MM two-recital degree programs.
PREREQUISITE: ENROLLMENT IN THE FROST SCHOOL OF MUSIC AS A MASTERS CANDIDATE IN INSTRUMENTAL PERFORMANCE IN THE "TWO RECITAL/PROGRAM NOTES" TRACK.
MIP610 Graduate Conducting Seminar
1-2 credits  Fall & Spring Semester
The graduate conducting seminar is an advanced study of conducting and rehearsal techniques combined with score and ensemble topics. Specific topics vary each semester. May be repeated for credit.

MIP630 Afro-Caribbean Hand Drumming, Level I
1 credit  Fall & Spring Semester
The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Class is taught as a workshop.

MIP631 Afro-Caribbean Hand Drumming, Level II
1 credit  Fall & Spring Semester
The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Level II is a performance ensemble. PREREQUISITE: MIP 630 OR AUDITION.

1 credit  Offered By Announcement Only
Steel Band/Trinidad reflects the broad musical heritage of the West Indies. Steel Drums (Pans) are combined with other indigenous instruments in the performance of both folk music and transcriptions of standard classical repertory in the tradition of the Trinidad carnival celebration. Level one of this class is taught as a workshop, level two as a performance ensemble. is taught as a performance ensemble.

MIP635 Percussion Contemporary Chamber Music
1 credit  Fall & Spring Semester
Mandatory for all classical percussionists, this course focuses on the contemporary unconducted chamber music repertoire. The goal is for students to develop and use an advanced listening/communicating skill set, while playing music with others. This course also targets to improve students' capabilities in contemporary music interpretation and performance. PREREQUISITE: PERCUSSION MAJORS; OR NON-PERCUSSION MAJORS BY PERMISSION OF THE PERCUSSION PROGRAM DIRECTOR.

MIP638 Trombone Choir
1 credit  Fall & Spring Semester
The study and performance of literature for small and large trombone ensembles. PREREQUISITE: BY AUDITION.

MIP639 Brass Chamber Music
1 credit  Fall & Spring Semester
The study and performance of literature for small ensembles of similar or mixed brass instruments. PREREQUISITE: BY AUDITION.

MIP640 Flute Choir
1 credit  Fall & Spring Semester
Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets). PREREQUISITE: BY AUDITION.
MIP641 Saxophone Ensemble  
1 credit  
Fall & Spring Semester  
The study and performance of classical and jazz literature for small saxophone ensembles.  
PREREQUISITE: BY AUDITION.

MIP643 Woodwind Chamber Music  
1 credit  
Fall & Spring Semester  
Exploring the woodwind chamber music repertoire as represented by various combinations of instruments.  
PREREQUISITE: BY AUDITION.

MIP644 Woodwind Chamber Ensemble  
1 credit  
Fall & Spring Semester  
Woodwind chamber ensemble is designed to give students knowledge of the most important literature for woodwinds through practice, rehearsal, and performance of major works for woodwind chamber ensemble.  
PREREQUISITE: BY AUDITION.

MIP645 String-Keyboard Chamber Music  
1 credit  
Fall & Spring Semester  
The study and performance of literature from the Baroque Period through the 20th Century for two or more players for string instrumentalists and strings with keyboard.  
PREREQUISITE: BY AUDITION.

MIP655 Seminar in Baroque Performance  
1 credit  
Fall Semester  
Students will present research on compositions representative of the Baroque period. Presentations will include interpretation, style, and historical context of both the composer and the work.  
PREREQUISITE: DOCTORAL STANDING AND PERMISSION OF THE INSTRUCTOR.

MIP656 Seminar in Classical Performance  
1 credit  
Spring Semester  
Students will present research on compositions representative of the classical period. Presentations will include interpretation, style, and historical context of both the composer and the work.  
PREREQUISITE: DOCTORAL STANDING AND PERMISSION OF THE INSTRUCTOR.

MIP657 Seminar in Romantic Performance  
1 credit  
Fall Semester  
Students will present research on compositions representative of the Romantic period. Presentations will include interpretation, style, and historical context of both the composer and the work.  
PREREQUISITE: DOCTORAL STANDING AND PERMISSION OF THE INSTRUCTOR.

MIP658 Seminar in Contemporary Performance  
1 credit  
Spring Semester  
Students will present research on compositions representative of the Contemporary music. Presentations will include interpretation, style, and historical context of both the composer and the work.  
PREREQUISITE: DOCTORAL STANDING AND PERMISSION OF THE INSTRUCTOR.
MIP670 Marching Band  
1 credit  Fall Semester  
The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.  
PREREQUISITE: AUDITION.

MIP671 Symphonic Winds  
1 credit  Fall & Spring Semester  
Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.  
PREREQUISITE: AUDITION.

MIP674 Brass Choir  
1 credit  Fall & Spring Semester  
Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.  
PREREQUISITE: BY AUDITION.

MIP676 Wind Ensemble  
1 credit  Fall & Spring Semester  
This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.  
PREREQUISITE: AUDITION.

MIP680 Symphony Orchestra  
1 credit  Fall & Spring Semester  
The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified graduate students by audition.  
PREREQUISITE: BY AUDITION.

MIP681 Instrumental Conducting Workshop  
1 credit  Fall & Spring Semester  
This course provides practical procedures and materials for beginning and advancing conducting students. Students enrolled in the four-semester sequence demonstrate basic conducting techniques, demonstration of instruments and instrumentation of the wind band and orchestra, and analyze scores for conception, interpretations, rehearsal, and performance.  
PREREQUISITE: MTC 112 AND 122.

MIP682 Instrumental Conducting II  
1 credit  Spring Semester  
This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.  
PREREQUISITE: MIP 681

MIP691 Tuba Ensemble  
1 credit  Fall & Spring Semester  
The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.  
PREREQUISITE: BY AUDITION.
MIP692 Classical Guitar Ensemble

1 credit  Fall & Spring Semester
This course focuses on sight-reading, rhythm recognition, and ensemble performance through the study of exercise, scales, and diverse repertoire.
PREREQUISITE: BY AUDITION.

MIP693 Special Projects

1-3 credits  Fall & Spring Semester & First & Second Summer Session
Projects in any phase of instrumental performance in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MIP694 Special Projects

1-3 credits  Fall & Spring Semester & First & Second Summer Session
Projects in any phase of instrumental performance in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MIP699 Contemporary Music Ensemble

1 credit  Fall & Spring Semester
An in-depth study and performance of new and standard classical music of the 20th century.

MIP711 Master's Recital Paper

1-3 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

MIP712 Master's Recital

1 credit  Fall & Spring Semester
The student enrolls for recital credit during the semester in which he/she presents the master's recital.

MIP713 Master's Advanced Recital

2 credits  Fall & Spring Semester
The second recital for those taking the two-recital option in the Master of Music in Instrumental Performance degree.
PREREQUISITE: MIP 712

MIP720 Research in Residence

0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MIP 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MIP731 Doctoral Essay

1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MIP 731 may be taken in a regular semester, nor more than six in a summer session.

MIP732 Doctoral Recital

1-2 credits  Fall & Spring Semester
Required of all candidates for the D.M.A.
MIP750 Research in Residence
0 credit    Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.M.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

KEYBOARD PERFORMANCE
MKPHCI Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. BY AUDITION

MKPHCJ Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MKP HCI.

MKPHCK Harpsichord
1- 4 credits    Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL. MKP HCJ.

MKPHCL Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MKP HCK.

MKPHCM Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MKPHCN Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP HCM.

MKPHCO Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP HCN.

MKPHCP Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP HCO.

MKPHCQ Harpsichord
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP HCQ.

MKPORI Organ
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.

MKPORJ Organ
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MKP ORI.
MKPORK Organ
1-4 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL. MKP ORJ.

MKPORL Organ
1-4 credits Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MKP ORK.

MKPORM Organ
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MKPORN Organ
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP ORM.

MKPORO Organ
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP ORN.

MKPORP Organ
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP ORO.

MKPORQ Organ
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP ORQ.

MKPPII Piano
1-4 credits Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.

MKPPIJ Piano
1-4 credits Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MKP PII.

MKPPIK Piano
1-4 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL. MKP PIJ.

MKPPIL Piano
1-4 credits Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MKP PIK.

MKPPIM Piano
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MKPPIP Piano
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP PIM.
SCHOOL OF MUSIC
KEYBOARD PERFORMANCE

MKPPIO Piano
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP PIO.

MKPPIP Piano
1- 4 credits    Fall & Spring Semester
Prerequisite: Doctoral level.
PREREQUISITE: DOCTORAL LEVEL. MKP PIO.

MKPPIQ Piano
1- 4 credits    Fall Semester
PREREQUISITE: DOCTORAL LEVEL. MKP PIP.

MKPPIR Piano
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MKP PIQ.

MKP547 Keyboard Pedagogy
3 credits                                                             Fall Semester
Methods and materials for teaching keyboard instruments with a focus on private lesson instruction. Topics include teacher profile, general teaching considerations, the business of teaching, the beginning student, second- and third-year students, teaching materials, and an introduction to new technology in piano teaching.

MKP548 Intermediate to Advanced Repertoire
3 credits                                                           Spring Semester
PREREQUISITE: PIANO MAJORS AT OR ABOVE JUNIOR-STANDING OR PERMISSION OF INSTRUCTOR

MKP549 Keyboard Pedagogy II:Keyboard Pedagogy Diagnostics
3 credits                                                             Fall Semester
PREREQUISITE: PIANO MAJORS AT OR ABOVE JUNIOR-STANDING OR PERMISSION OF INSTRUCTOR

MKP550 Keyboard Pedagogy III: Practice Strategies
3 credits                                                             Fall & Spring Semester
PREREQUISITE: PIANO MAJORS AT OR ABOVE JUNIOR-STANDING OR PERMISSION OF INSTRUCTOR

MKP589 Keyboard Accompanying Program in Salzburg, Austria
2- 4 credits    Spring Semester
Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive coaching in piano and accompanying from Dr. Posnak and other internationally acclaimed guest artists. Piano students study piano (2 cr.) and accompanying (1 cr.).
PREREQUISITE: BY AUDITION ONLY.

MKP593 Special Topics MKP
1- 3 credits    Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Keyboard Performance.
PREREQUISITE: PERMISSION OF THE DEAN
MKP610 Seminar in Baroque Performance  
1 credit  Fall Semester  
This course is designed as a performance class for graduate DMA piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MKP611 Seminar in Classical Performance  
1 credit  Spring Semester  
This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MKP612 Seminar in Romantic Performance  
1 credit  Fall Semester  
This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MKP613 Seminar in Contemporary Music  
1 credit  Spring Semester  
This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

MKP647 Seminar in Keyboard Pedagogy  
3 credits  Fall Semester  
Methods and materials used in the teaching of keyboard instruments with a focus on group instruction. Topics include group lessons, preschool music, college piano classes, teaching literature, learning theories and applications, and the use of educational computer software in piano teaching.  
PREREQUISITE: PIANO MAJORS OR PERMISSION OF INSTRUCTOR.

MKP650 Keyboard Pedagogy Research Seminar  
1 credit  Fall & Spring Semester  
Important topics of current interest within the field of keyboard pedagogy. Course may be repeated for credit.  
PREREQUISITE: GRADUATE PIANO MAJORS ONLY.
MKP680 Keyboard Pedagogy Internship
1 credit
Fall & Spring Semester
The student team-teaches a piano class or a private student with the instructor. The instructor observes and critiques the student, and the student videotapes themselves and offers critiques of their own teaching.
PREREQUISITE: PIANO MAJORS OR PERMISSION OF INSTRUCTOR

MKP685 Musical Theatre Accompanying
1 credit
Fall & Spring Semester
A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MKP686 Vocal Accompanying I
1 credit
Fall Semester
Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MKP687 Vocal Accompanying II
1 credit
Fall & Spring Semester
Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MKP688 Graduate Seminar in Accompanying
1 credit
Fall & Spring Semester
Study and performance of major vocal and chamber music literature as related to the accompanist and chamber musician. Course may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MKP689 Accompanying, Level I
1 credit
Fall & Spring Semester
Development of sight-reading skills and score preparation.
PREREQUISITE: AUDITION/PERMISSION OF INSTRUCTOR.

MKP690 Accompanying, Level II
1 credit
Fall & Spring Semester
Progressive development of individual vocal/instrumental and ensemble accompanying, sight-reading, score reading, and improvising from a lead sheet.
PREREQUISITE: MKP 689 OR PERMISSION OF INSTRUCTOR.

MKP691 Accompanying, Level III
1 credit
Fall & Spring Semester
Progressive development of all types of accompaniment skills including clef and score reading, transposition, possible recital, opera theater, choral ensemble, and/or orchestral accompanying.
PREREQUISITE: MKP 190/690 OR PERMISSION OF INSTRUCTOR.
MKP693 Special Projects
1-3 credits Fall & Spring Semester
Projects in any phase of keyboard performance in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MKP694 Special Projects
1-3 credits Fall & Spring Semester
Projects in any phase of keyboard performance in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MKP711 Master's Recital Paper
1-3 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

MKP712 Master's Recital
1 credit Fall & Spring Semester
The student enrolls for recital credit during the semester in which he/she presents the master's recital.

MKP713 Master's Pedagogy Project
1-3 credits Fall & Spring Semester
The student working on his/her master's pedagogy project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.

MKP720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MKP 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

MKP731 Doctoral Essay
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MKP 731 may be taken in a regular semester, nor more than six in a summer session.

MKP732 Doctoral Recital
1-2 credits Fall & Spring Semester
Required of all candidates for the D.M.A.

MKP750 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.M.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
MUSIC EDUCATION & THERAPY

MED541 Musical Instrument Maintenance
0 credits Fall & Spring Semester
Mechanical development, care, and maintenance of musical instruments. Separate sections for wind, percussion, string, and keyboard instruments.

MED542 Teaching Elementary General Music (K-5)
3 credits Fall Semester
Curriculum, methods, and materials designed for elementary music, K-6. Observation, planning, and teaching experience are emphasized. PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

MED543 Teaching Elementary and Secondary Instrumental Music
3 credits Spring Semester
A study of elementary and secondary instrumental music instruction including program organization, teaching techniques, materials, and field experiences of music instruction in schools. PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

MED544 Teaching Secondary General Music (7-12)
3 credits Spring Semester
Curriculum, methods, and materials designed for junior/senior high school general music programs. PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

MED545 Music in Rehabilitation
3 credits Spring Semester
Review of development and functioning for neurologically-based sensorimotor behavior. Survey of disabilities and diseases that typically result in sensorimotor deficits is included. Demonstration and practice of therapeutic techniques for sensorimotor deficits are also covered.

MED546 Music Psychotherapy
3 credits Spring Semester
Survey and practical application of music as therapy in the treatment of psychiatric disorders and in promoting mental health.

MED548 Music for Special Learners
3 credits Spring Semester
This course is designed for music educators who will be working in schools with children and youth who have various disabilities. The purpose of MED 548 is to acquaint students with the characteristics of children and youth with disabilities, and introduce adaptive strategies in music education, K-12, for instructing children and youth with disabilities.

MED549 Teaching Secondary Choral Music
3 credits Fall Semester
Course covers curriculum, vocal/rehearsal techniques, and literature. Teaching music in secondary schools through the medium of choral performance. PREREQUISITE: JUNIOR STANDING IN MED PROGRAM

MED555 Elementary Music Workshop
3 credits First Summer Session
Course is designed for in-service elementary school classroom teachers and music supervisors. Survey and experience with contemporary methodology and materials in elementary school music education is emphasized.
MED556 Secondary General Music Workshop
3 credits  First Summer Session
Course is designed for teachers of general music classes in middle, junior high, and senior high schools. Practical experience with methods and materials designed for non-performance music classes, grades 7-12 is emphasized.

MED559 Internship in Music Therapy
3 credits  First & Second Summer Session
Course provides students with a six month opportunity as a music therapy intern in an approved training facility.
PREREQUISITE: COMPLETION OF ALL OTHER COURSEWORK REQUIREMENTS FOR MUSIC THERAPY CERTIFICATION.

MED560 Internship in Music Therapy II
0 credit  First & Second Summer Session
PREREQUISITE: MED 559

MED562 Psychology of Music I
3 credits  Spring Semester
Psychological foundations of music with an emphasis on problems of perception, experimental esthetics, functional music, and measurement and diagnosis of musical ability and achievement. Related literature of experimental investigation is reviewed.

MED575 Preschool Music Workshop
1-3 credits  Offered By Announcement Only
Workshop is designed to prepare class members to initiate, administer, and teach music programs for preschool children. Materials which address the teacher, the child, and the parent are used. The daily schedule includes demonstration classes with children, lectures, and active participation of and discussion with class members. Emphasis is placed on working with a planning guide for teachers which offers articles on the major areas of the curriculum and clear, succinct statements focusing on the central issues of each lesson.

MED576 Music and Development
3 credits  Fall Semester
Review of development in cognitive, communication, and musical domains. Survey of developmental disabilities most commonly found in child populations is included as well as demonstration and practice of therapeutic techniques for cognitive and communication deficits.

MED581 Teaching Classroom Guitar I
2 credits  First Summer Session
This class is designed for students and teachers, guitarist or non-guitarist, who wish to initiate, enhance, and teach guitar in a multi-level classroom setting. The course includes demonstration classes with elementary and secondary students. Topics include organization and teaching performance materials in a hands-on setting.

MED593 Special Topics MED
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Music Education.
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED
MED600 Psychoacoustical Foundations of Music
2 credits Fall Semester
Production, transmission, and reception of simple and complex tones. Examination of physical properties and psychoacoustical response to tonal stimuli is also included.

MED601 Recital Paper Preparation
1 credit Fall & Spring Semester
Supervised preparation of the recital paper required for the Master of Music degree in classical performance.
PREREQUISITE: COMPLETION OF TWO FULL-TIME SEMESTERS IN THE MM PROGRAM IN PERFORMANCE.

MED602 DMA Essay Proposal
1 credit Spring Semester
Supervised preparation of the DMA proposal for the Doctor of Musical Arts in Performance, Conducting, or Accompanying and Chamber Music.
PREREQUISITE: COMPLETION OF 30 CREDITS TOWARD THE DMA.

MED610 Graduate Forum in Music Therapy
0 credit Offered By Announcement Only
Forum for graduate students to discuss topics relevant to advanced music therapy practice, engage in experiential therapeutic techniques, and to share student efforts of scholarship in the field.
PREREQUISITE: GRADUATE STANDING.

MED615 Graduate Forum
0 credit Offered By Announcement Only
Forum for masters and doctoral students to discuss various topics of relevance to music education practice and to share efforts of scholarship in the field.
PREREQUISITE: GRADUATE STANDING.

MED620 International Music Education
3 credits Spring Semester
Students study music instruction systems in other countries, including public and private school, community music programs, private music instruction, music conservatory instruction, informal instructional systems, and university work in music. Students compare music instruction systems in the United States and other countries through readings and presentations by native informants. An optional on-site field experience examining music education in another country may be arranged to coincide with this course.

MED629 Advanced Music Therapy Practice I
3 credits Spring Semester
Review of research literature in clinical topic areas, such as music and cognition, or music and affective processing. Presentation of research findings through writing and discussion is emphasized as well as the application of research findings through practice and demonstration of therapeutic techniques.

MED630 Advanced Music Therapy Practice II
3 credits Fall & Spring Semester
Review of research literature in clinical topic areas, such as music and sensorimotor processing or music in biofeedback. Presentation of research findings through writing and discussion is emphasized as well as the application of research findings through practice and demonstration of therapeutic techniques.
PREREQUISITE: MED 629.
MED632 Vocal Methods and Materials in Music Education
2 credits
Spring Semester
Survey of latest vocal methods and publications for use in public schools.

MED633 Seminar for Teaching Associates
1 credit
Fall & Spring Semester
Discussion of teaching, rehearsal techniques, and the organization of music materials related to the internship experience. To be taken in conjunction with internship, MED 771.
PREREQUISITE: ADMISSION TO TEACHER CANDIDACY

MED640 Woodwind Techniques
1 credit
Fall Semester & First & Second Summer Session
Group instruction in woodwind instruments with emphasis on basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy. Course may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MED641 Brass Techniques
1 credit
Offered By Announcement Only
Group instruction in brass instruments with emphasis on basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy. Course may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MED642 Percussion Techniques
1 credit
Offered By Announcement Only
Group instruction in percussion (snare drum, mallet-keyboard percussion, timpani, drum set, and small accessory instruments) with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy. Course may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MED643 String Techniques
1 credit
Offered By Announcement Only
The study of stringed instruments (violin, viola, cello, bass) in a heterogeneous class with emphasis on general principles of string playing and teaching methods for use in beginning and intermediate instruction in the schools. Course may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MED644 Vocal Techniques
1 credit
Offered By Announcement Only
Class instruction in fundamentals of singing, breath control, tone production, and solo singing for music majors.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MED645 Functional Music Techniques
1 credit
Fall Semester
Group instruction in the functional use of guitar, autoharp, and recorder for classroom or music therapy uses. Functional skill, teaching methods, and materials are emphasized.
PREREQUISITE: PERMISSION OF INSTRUCTOR.
SCHOOL OF MUSIC
MUSIC EDUCATION & THERAPY

MED647 Seminar in Instrumental Music Education
2 credits                                                    Fall & Spring Semester
Practical study of the development of school band programs with special consideration
given to the selection of training and concert materials, rehearsal techniques
and administrative procedures.

MED657 Music Therapy Graduate Practicum 1
2 credits                                                    Fall & Spring Semester
In a clinical setting, gain skill in observation and co-leading under the supervision
of a music therapist.

MED658 Music Therapy Graduate Practicum 2
2 credits                                                    Fall & Spring Semester
PREREQUISITE: MED 657

MED659 Music Therapy Graduate Practicum 3
2 credits                                              Offered By Announcement Only
In a clinical setting, independently design and apply therapeutic techniques based
on scientific evidence.

MED660 History and Philosophy of Music Education
3 credits                                              Offered By Announcement Only
The history of Western music education beginning with the ancient Greeks is surveyed
to the present. Incorporated in the survey is the evolution of philosophical thought
about music and its role in educational practice. From this grounding, current
philosophical views of music education are presented.

MED662 Music Learning and Curriculum
3 credits                                                             Fall Semester
Survey of theories of music learning and their application to music instruction,
curriculum development, and instructional design in music.
PREREQUISITE: GRADUATE STANDING.

MED663 Music Research Methods
3 credits                                                             Fall Semester
An introduction to descriptive, experimental, philosophical, qualitative, and historical
research in music education and music therapy, with particular reference to data
collection, research design, and effective research procedures. Students prepare
critiques of research material and are guided in designing original research projects
related to their own area of interest.
PREREQUISITE: GRADUATE STANDING.

MED664 Music Assessment
3 credits                                                             Fall Semester
Presentation of methods for assessing musical behavior in studios, classrooms,
and concert halls. Strategies for the objectification of performance quality, musical
learning, capacity, and potential uses of contemporary measurement techniques are
provided.
PREREQUISITE: GRADUATE STANDING.

MED665 Seminar in Music Education
2 credits                                              Offered By Announcement Only
Survey of literature, bibliography, and contemporary trends in music education.
Course may be repeated for credit by doctoral students with consent of instructor.
PREREQUISITE: GRADUATE STANDING.
### MED670 Seminar in Music Teacher Education  
1 credit  
**Fall Semester**  
Overview of current issues in music teacher education, teacher education research and scholarship, the study of intern supervision, music education methods course design, and undergraduate music education teaching strategies.  
**PREREQUISITE:** DOCTORAL STANDING OR PERMISSION OF INSTRUCTOR.

### MED673 Music in Early Childhood  
2 credits  
**Spring Semester**  
Course provides theoretical foundations, curriculum, methods, and materials appropriate for the teaching of Early Childhood music.

### MED674 Seminar in General Music  
2 credits  
**Spring Semester**  
Course provides curriculum, methods, and materials designed for instruction for the general music student, grades K-12.

### MED675 Practicum in Music Education  
6 credits  
**Fall & Spring Semester**  
Students enrolled in the Master of Music with Certification Option Degree may complete the required internship with this course.  
**PREREQUISITE:** MUST BE EMPLOYED FULL-TIME IN A TEACHING POSITION.

### MED676 Practicum in Teaching College Students  
1-3 credits  
**Fall & Spring Semester**  
Supervised practicum for teaching music education courses at the college level.

### MED680 Doctoral Seminar  
1 credit  
**Offered By Announcement Only**  
A seminar designed to generate ideas about contemporary theory and practice in music. Students engage in discussion of general research topics, but from the perspective of their particular discipline. Enrollment is intended for those doctoral students who have satisfactorily completed the qualifying examinations through and until receiving approval of the doctoral paper proposal. The course is open to all majors, but is required of all music education doctoral students.  
**PREREQUISITE:** DOCTORAL STANDING.

### MED684 Music Therapy Seminar  
1 credit  
**Fall & Spring Semester**  
Doctoral seminar in music therapy to address practical and professional issues pertaining to teaching and research in music therapy. Possible topics include: Teaching and Clinical Supervision, Philosophical Research, and Historical Research.  
**PREREQUISITE:** STUDENTS MUST BE ADMITTED TO THE DOCTORAL PROGRAM IN MUSIC EDUCATION, WITH MUSIC THERAPY EMPHASIS.

### MED690 Teaching Music in College  
1 credit  
**Fall Semester**  
An overview of college music curriculum, patterns of administrative organization, traditional and innovative content, styles and resources used in teaching at the college level, evaluation and grading techniques used in classes, lessons, and ensembles.
MED693 Special Projects
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Projects in any phase of music education in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MED694 Special Projects
1-3 credits  Fall & Spring Semester
Projects in any phase of music education in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MED695 Doctoral Research Project
1 credit  Fall & Spring Semester
Small scale research project in music education or music therapy, suitable for publication. This project could serve as pilot work for the dissertation.
PREREQUISITE: PH.D. STUDENTS IN MUSIC EDUCATION, MED 663, EPS 553.

MED705 Master's Project
1-3 credits  Fall Semester
Culminating project for Master of Music in music education students not completing a thesis or recital.
PREREQUISITE: MED 560, 564, 570, 665.

MED710 Master's Thesis
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
PREREQUISITE: MED 629.

MED720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MED 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MED730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MED 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MED735 Research for Specialist Project
1-6 credits  Fall & Spring Semester & First & Second Summer Session
The student working on a research project for the Music Specialist degree enrolls for credit, not to exceed six, as determined by the student’s advisor. Credit is not awarded until the project is completed.
MED750 Research in Residence  
0 credit  Fall & Spring Semester & First & Second Summer Session  
Used to establish research in residence for the Ph.D. and D.M.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

MED771 Associate Teaching in Elementary School Music  
6 credits  Fall & Spring Semester  
A comprehensive program in observation and supervised teaching in elementary school music. The student spends full time for one half a semester in an elementary school, participating in all activities of the music teacher under the guidance of school and university personnel.  
PREREQUISITE: ADMISSION TO TEACHER CANDIDACY AND APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

MED773 Associate Teaching in Secondary School Music  
6 credits  Fall & Spring Semester  
A comprehensive program in observation and supervised teaching in secondary school music. The student spends full time for one half a semester in a secondary school, participating in all activities of the music teacher under the guidance of school and university personnel.  
PREREQUISITE: ADMISSION TO TEACHER CANDIDACY AND APPROVAL OF THE COMMITTEE ON FIELD EXPERIENCES.

MUSIC MEDIA & INDUSTRY  

MMI501 Transducer Theory  
3 credits  Spring Semester  
Course covers the fundamentals of electromagnetism and audio transducer theory including loudspeaker and microphone systems. Classical electro-acoustical analysis of transducers including acoustic suspension, bass-reflex, transmission line, electrostatic and horn loudspeakers, dynamic, ribbon and condenser pressure, and pressure-gradient microphones. Students use computer-aided design programs and Thiele-Small parameterization to model loudspeakers and measure loudspeaker responses. Open to MUE and EAN Majors only.  
PREREQUISITE: EEN 201, PHY 102 OR PHY 205.

MMI502 Digital Audio I  
0-3 credits  Fall Semester  
A study of the theory and practice of digital audio topics including discrete time sampling, quantization, dithering, PCM, A/D and D/A conversion, digital filtering, oversampling, modulation codes, time base, error correction codes, magnetic storage, DAT, and optical storage.  
PREREQUISITE: MMI 501.

MMI503 Digital Audio II  
3 credits  Spring Semester  
A study of the theory and practice of digital audio topics including fiber optics and networks, compact disc, interconnection, psychoacoustics, low bit-rate perceptual coding, MPEG, digital audio broadcasting, sigma-delta conversion, noise shaping, digital video, and emerging technologies. Open to MUE and EAN Majors only.  
PREREQUISITE: MMI 502.
MMI504 Audio Analysis and Synthesis
3 credits
Offered By Announcement Only
Theory, design, and development of computer audio synthesizers and analyzers. Students implement software synthesizers including analog and physical modeling, wave-table, wave-shaping, and FM designs. Classical and modern theories of timbre and time-frequency analysis are included.
PREREQUISITE: MMI 503, OPEN TO MUE AND MEC MAJORS ONLY.

MMI505 Advanced Audio Signal Processing
3 credits
Spring Semester
Theory, design and development of audio signal processing techniques. Topics include DSP architectures, systems design, algorithm development, and applications. DSP development tools used to write, debug, and test programs including time-domain based effects such as reverb, chorus, flanging, and digital delay as well as frequency-domain projects such as FIR, IIR, and FFT filters and vocoders.
PREREQUISITE: MMI 504, OPEN TO MUE MAJORS ONLY.

MMI520 Audio Technology for Musicians
0-3 credits
Fall Semester
Introduction and overview of audio technology with emphasis on music recording, production equipment, and techniques. Topics include microphones, loudspeakers, mixing consoles, interconnection, amplifiers, digital processing, time code, and surround sound. Open to non-MUE majors.
PREREQUISITE: JUNIOR STANDING AND PERMISSION OF INSTRUCTOR.

MMI530 Entrepreneurship for Musicians
3 credits
Spring Semester
Course explores a wide range of options for musicians who want to pursue music business careers in their regional music markets. Students examine opportunities in performance, recording, composition, education, and more. Emphasis is placed on the packaging of musical skills in the marketplace and on the financial management of a small proprietary music business. As a result, the student musician will be prepared to make career decisions with foresight and planning.
PREREQUISITE: OPEN ONLY TO MUSIC STUDENTS

MMI537 Recorded Music Operations
3 credits
Spring Semester
A study of the activities involved in commercially exploiting recorded music. Includes an analysis of activities involved in the production, manufacturing, distribution, and marketing of a recorded music product; as well as related royalty accounting, mechanical licensing and master-use licensing activities.
PREREQUISITE: MMI 274 AND MMI 378; OPEN TO MBEI AND MBEC MAJORS, AND MBEI MINORS

MMI540 Music Supervision
3 credits
Fall & Spring Semester
A study of the principles and practices of combining music with visual images. The history, theory, tools, relationships and legalities of the field of Music Supervision will be explored.
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY
MMI541 Tour Management and Production
3 credits  Fall & Spring Semester
Students will become familiar with the responsibilities of a tour planner. Individual
tour planning projects are assigned which will give the students insight into the
management and production of a tour.
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI542 The Music Products Industry
3 credits  Fall & Spring Semester
The course is designed to give the students an overview of the music products industry.
Special attention is given to the trade associations and their role regionally,
nationally, and internationally. The importance of relationships as part of the
business foundation are discussed at length. Students present promotion/marketing
plans applicable to the products industry.
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI543 Marketing and Promotion in the Entertainment Industry
3 credits  Fall & Spring Semester
PREREQUISITE: MMI 178; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI573 International Music Publishing
2 credits  Spring Semester
An in-depth study of the international publishing industry with an emphasis on
catalog development and exploitation.
PREREQUISITE: MMI 178 AND MMI 274; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI578 Royalties in the Recorded Music Industry
1 credit  Fall Semester
A practical study of royalty payment formulas and procedures used in the recorded
music industry.
PREREQUISITE: MMI 178 AND MMI 274; MBEI AND MBEC MAJORS, AND MBEI MINORS ONLY

MMI593 Special Topics MMI
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Music Media and Industry.
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED

MMI601 Advanced Digital Audio Electronics
3 credits  Fall Semester
Topics in digital audio including discrete time signals, digital filters, error
digital audio processors, FFT, CIRC, and digital recorders are discussed.
PREREQUISITE: MMI 401, GRADUATE STANDING.

MMI602 Audio-Video Systems
3 credits  Spring Semester
Compatibility and interface requirements for video, analog, and digital audio systems.
Integration of disparate components for optimum systems performance is discussed.
MMI606 Current Topics in Audio Analysis and Signal Processing  
3 credits  
Spring Semester  
MMI 606 surveys recent topics related to audio analysis, synthesis, and signal processing with an emphasis in software programming and practical applications. Course material is drawn from several topics: current audio APIs and plug-in architectures, computational theories of musical timbre, machine listening, spatial audio, digital audio effects, new digital audio synthesis techniques, and machine-musician interaction modalities.  
PREREQUISITE: MMI 601.

MMI622 Tour Management and Production  
3 credits  
Fall Semester  
An introductory course designed to give the students an overview of tour management and event production in the live entertainment industry. Special attention is given to arts presenting organizations and their role in the industry regionally, nationally and internationally.

MMI626 Performing Arts Center and Facility Management  
3 credits  
Fall Semester  
Students learn the many aspects of managing a live entertainment and performing arts center facility. Logistics, management, budgeting, marketing and programming within a live entertainment and performing arts facility are addressed.

MMI630 Marketing and Promotion in the Entertainment Industry  
3 credits  
Spring Semester  
Students learn how to fulfill demand and influence consumer behavior through effective marketing techniques. The course provides the students with information on the latest technologies being employed to reach and communicate with target market consumers.

MMI634 Sponsorship and Development in the Live entertainment Industry  
3 credits  
Spring Semester  
Students learn about the importance of sponsorship programs and how they are conceived, planned, negotiated and implemented tools, templates, and techniques provide a basis for creating a productive sponsorship program. The course also focuses on development and grants in the performing arts industry.

MMI636 Financial and Risk Aspects of the Arts Presenting Industry  
3 credits  
Fall Semester  
Students learn how to write and present a line-item budget for an arts presentation event, arts presenting organization, and an arts facility. Specific techniques and methods that are used to reduce event risk and safety are discussed.  
PREREQUISITE: NONE

MMI638 Legal Aspects of the Live Entertainment Industry  
3 credits  
Fall Semester  
Students become familiar with various Artist, Client, Production, Vendor and Facility Contracts and Agreements commonly used in the industry.
MMI640 Arts Presenting Project

3 credits

Offered By Announcement Only

Students develop and produce an Arts Presenting event. Students will be responsible for all aspects of budgeting, marketing, promotion and production of the event. This will be a semester long project requiring the knowledge and skills learned throughout the Arts Presenting Program.

PREREQUISITE: COMPLETION OF FIRST AND SECOND SEMESTER COURSES.

MMI642 Sponsorship and Development in the Live Entertainment Industry

3 credits

Fall Semester

Students learn about the importance of sponsorship programs and how they are conceived, planned, negotiated and implemented. Tools, templates, and techniques provide a basis for creating a productive sponsorship program. The course also focuses on development and grants in the performing arts industry.

MMI650 Music Industry Agreements

3 credits

Fall Semester

A study of various music industry agreements and how they affect the artist and songwriter. Recording, music publishing, and personal management agreements are analyzed and discussed. Topics include negotiation considerations, deal points, record company economics, and profitability.

PREREQUISITE: GRADUATE MBEI MAJORS ONLY OR PERMISSION OF INSTRUCTOR.

MMI651 Recording Studio Workshop

1 credit

Fall Semester

Introduction to the multi track recording studio environment. Hands-on lectures and labs including tracking, overdub and mixdown session management, techniques, and philosophies are included. Topics also include audio routing, equalization, effects, and microphone technique.

PREREQUISITE: PERMISSION OF INSTRUCTOR.

MMI652 International Music Licensing

3 credits

Spring Semester

Advanced music industry concepts and problems in music licensing. Personal rights and most varieties of music licenses and international licensing concepts are covered. Students acquire practical experience utilizing licensing parameters.

PREREQUISITE: OPEN TO GRADUATE MBEI MAJORS ONLY OR PERMISSION OF INSTRUCTOR.

MMI653 Transducer Workshop

1 credit

Spring Semester

Fundamentals of electromagnetism and audio transducer theory including loudspeaker and microphone systems. Classical electro-acoustical analysis of transducers including acoustic suspensions, bass-reflex, transmission line, electrostatic and horn loudspeakers, dynamic, ribbon and condenser pressure, and pressure-gradient microphones. Students use computer-aided design programs and Thiele-Small parameterization to model loudspeakers and measure loudspeaker responses.

PREREQUISITE: PERMISSION OF INSTRUCTOR.
MMI656 Entertainment Industry Practices
3 credits  Fall Semester
An overview of entertainment industry practices. Concentration on the legal, marketing and financial aspects of different areas of the industry focusing primarily on film, television, and book publishing, while also broadly exploring additional areas such as video games, sports, and performing arts.
PREREQUISITE: OPEN TO MBEI GRADUATE STUDENTS ONLY; OTHER GRADUATE STUDENTS BY PERMISSION ONLY.

MMI660 Ensemble Recording Workshop I
1 credit  Offered By Announcement Only
Assisting recording and sound reinforcement engineers in the assigned performance ensemble in both rehearsal and performance. Students also perform in a studio ensemble where they act as both recording engineer and musician. Open to MUE majors only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MMI661 Ensemble Recording Workshop II
1 credit  Offered By Announcement Only
Students are responsible for the audio needs of an assigned ensemble in both rehearsal and performance. Lectures cover audio equipment and practices. Students also perform in a studio ensemble where they act as the recording engineer and musician. Open to MUE majors only.
PREREQUISITE: MMI 660. PERMISSION OF INSTRUCTOR.

MMI662 Ensemble Recording Workshop III
1 credit  Offered By Announcement Only
Students work in the recording studio, engineering digital multi-track recordings, and mix-downs of advanced jazz and composition ensembles. Open to MUE majors only.
PREREQUISITE: MMI 661. PERMISSION OF INSTRUCTOR.

MMI670 Audio Design Workshop I
1 credit  Offered By Announcement Only
Course covers the fundamentals of audio system design and architecture including equipment specifications and studio installation techniques. Students design and troubleshoot audio projects. Open to MUE majors only.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MMI671 Audio Design Workshop II
1 credit  Offered By Announcement Only
Analog audio system design and architecture including dynamics processing, amplifier and filter theory, balanced and single-ended systems, circuits, and advanced equipment specifications. Students design and troubleshoot audio projects including microphone pre-amps, equalizers, noise gates, and power amplifiers. Open to MUE Majors only.
PREREQUISITE: PHY 205, EEN 305. PERMISSION OF INSTRUCTOR.

MMI672 Audio Design Workshop III
1 credit  Offered By Announcement Only
Digital audio system design and architecture including analog-digital conversion, digital I/O hardware specifications, audio effects processors and digital audio reordering alignment techniques. Students design and troubleshoot audio projects including A/D converters, S/PDIF I/O, and DAT recorders. Open to MUE Majors only.
PREREQUISITE: MMI 671.
MMI673 Music Publishing Practicum  
1 credit  
Fall Semester  
The course focuses on practical techniques and procedures employed by music publishers in acquiring, exploiting and administering music copyrights.  
PREREQUISITE: MBEI GRADUATE STUDENTS ONLY.

MMI674 Music Copyright Law  
3 credits  
Fall Semester  
A study of the essential provisions of the 1976 Copyright Act and subsequent amendments and revisions. Students examine the unique complexities of copyright law as it relates to the music industry.  
PREREQUISITE: NONE. PERMISSION OF INSTRUCTOR REQUIRED FOR NON-MBEI GRADUATE STUDENTS.

MMI678 Publishing and Record Industry Royalties  
1 credit  
Fall Semester  
An in depth study of royalty payment procedures used in the music industry.  
PREREQUISITE: MBEI GRADUATE STUDENTS ONLY.

MMI682 Industry Internship  
3 credits  
Spring Semester  
The student's academic experience is enhanced by working in a professional arts presenting organization or arts facility.  
PREREQUISITE: COMPLETION OF ALL THE COURSES (27 HOURS) OFFERED IN THE FIRST THREE SEMESTERS OF THE PROGRAM.

MMI693 Special Projects  
1-3 credits  
Fall & Spring Semester  
Projects in any phase of music media and industry in which the student is interested and qualified to work.  
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MMI694 Special Projects  
1-3 credits  
Fall & Spring Semester  
Projects in any phase of music media and industry in which the student is interested and qualified to work.  
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MMI702 Internship in Music Industry  
2-3 credits  
Fall & Spring Semester & First & Second Summer Session  
Practical experience in different areas of the music industry under supervision of professional firms. Open only to Music Industry majors.  
PREREQUISITE: GRADUATE MBEI MAJORS ONLY.

MMI713 Master's Research Project  
1-3 credits  
Fall & Spring Semester & First & Second Summer Session  
The student working on his/her master's research project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.

MMI720 Research in Residence  
0 credit  
Fall & Spring Semester & First & Second Summer Session  
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MMI 710 (usually six credits). Credit not granted. May be regarded as full time residence.
MTC501 The Aesthetics of Music  
3 credits  
Spring Semester  
Survey of thought and discourse about the nature, roles, values, experiences, and meanings of music. Variety of perspectives, including those of the listener, performer, and composer are addressed. Application to musical interpretation and criticism is included.
PREREQUISITE: MTC 311 OR 312 OR GRADUATE STANDING.

MTC505 Analysis and History of Electroacoustic and Acousmatic Music  
2 credits  
Fall Semester  
Introduction to electroacoustic music and the digital electronic music studio. Computer and MIDI based applications in performance and composition including sequencing, music notation, and electronic orchestration are addressed. Theoretical and aesthetic issues relating to music technology, study of important figures and works. Lectures, reading, listening, and studio assignments leading to individual projects are also included.
PREREQUISITE: MTC 312 OR PERMISSION

MTC506 Digital Editing and Sequencing  
2 credits  
Spring Semester  
Computers as control devices for music synthesis. Topics include interfacing microcomputers and synthesizers, programming of controllers, sequencers, patch librarians, sound editors, and other applications. Computer assisted composition and performance techniques, lectures, reading, listening, and studio assignments leading to individual projects are also included.

MTC507 Studio Licensing  
2 credits  
Fall & Spring Semester  
Software-based techniques of digital audio recording and editing, sound synthesis/design, audio signal processing, and sound analysis. Lectures, reading, listening, and studio assignments leading to individual projects in synthesis, composition, performance, or programming are included.
PREREQUISITE: MTC 506

MTC511 Film Scoring I  
2 credits  
Fall Semester  
Seminar in the aesthetics and psychology of mood music, sound-film synchronization, timing techniques, and scoring procedures. Analysis and performance of student projects is included.
PREREQUISITE: MTC 302

MTC512 Film Scoring II  
2 credits  
Spring Semester  
Adaptation of previous semester's techniques to television scripts and performed music. Pre-recording, direct recording, and dubbing procedures are included as well as preparation and performance of complete film cues. Each student is required to conduct his/her project.
PREREQUISITE: MTC 511.

MTC513 16th Century Counterpoint  
3 credits  
Offered By Announcement Only  
Two- and three-voice vocal counterpoint based on Palestrina's style, beginning with studies of strict species and including composition of two- and three-voice texted motets.
PREREQUISITE: MTC 211 OR MTC 240
MTC515 Choral Arranging
3 credits  Spring Semester
Arranging for choir and vocal groups with and without instrumental accompaniment in all styles.
PREREQUISITE: MTC 212 OR MTC 241

MTC516 Advanced Orchestration
3 credits  Spring Semester
Scoring for the symphonic orchestra with an emphasis on recent techniques.
PREREQUISITE: MTC 416

MTC517 Analysis of Popular Music Since 1950
3 credits  Offered By Announcement Only
Course examines popular music in the second half of the Twentieth Century from a music analytical perspective. Critical skills needed for this analysis are identified and developed. Analytical techniques for understanding the determination and utilization of musical elements and structures in contemporary popular music are applied. Various contemporary genres and some precursors are examined and particular stylistic determinants of their compositional and performance models are discussed.
PREREQUISITE: GRADUATE STANDING OR MTC 311 OR 312, OR PERMISSION OF THE INSTRUCTOR.

MTC518 Advanced Counterpoint
3 credits  Spring Semester
Three-voice fugal writing in Bach's style, followed by compositional projects in a variety of twentieth-century contrapuntal styles.
PREREQUISITE: MTC 313

MTC521 Multimedia for Musicians
3 credits  Offered By Announcement Only
Presents an overview and introduction to the creation of multimedia projects for presentation on the Web. Focus is placed on building websites, and the creation of multimedia content for online delivery. Software tools for the manipulation of digital media, including audio and video, are utilized in the realization of course projects.
PREREQUISITE: MTC 212 AND MKP 220, OR MTC 241 AND MMI 240 AND 241, OR GRADUATE STANDING.

MTC567 Electronic and Computer Music Seminar
1-3 credits  Fall & Spring Semester
Advanced techniques and applications in electronic and computer music. Topics may include electronic projects in composition, performance, research, programming, or other as approved by instructor.
PREREQUISITE: MTC 505, 506, 507

MTC593 Special Topics MTC
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Music Theory-Composition.
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED

MTC605 Digital Art and Sound Design
2 credits  Spring Semester
Basic concepts of circuits for electronic and computer music equipment, electronic music studio design, and maintenance.
PREREQUISITE: MTC 507
MTC611 Theory Pedagogy
3 credits  Fall Semester
Seminar in methods and materials pertinent to the teaching of theory in high school and college.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MTC612 Advanced Comprehensive Theory
3 credits  Fall Semester
Melodic, harmonic, and contrapuntal devices as revealed through analysis and applied in composition.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MTC613 Twentieth Century Idioms
3 credits  Spring Semester
Relevant modes of perception, influences, and technical devices in 20th century music.

MTC615 Composition Seminar I
2 credits  Fall Semester
Creative work in composition requiring a multi-movement work scored for full orchestra, symphonic band, or chorus with orchestra or band.

MTC616 Composition Seminar II
2 credits  Spring Semester
Continuation of MTC 615.
PREREQUISITE: MTC 615.

MTC617 Analytical Techniques
3 credits  Fall & Spring Semester & Second Summer Session
Examination and practice of various techniques used in the analysis of music.

MTC619 Introduction to Schenkerian Analysis
3 credits  Fall Semester
A first course in the theory and analytical practice of Heinrich Schenker. Students will learn the principles and techniques of Schenkerian analysis and will apply them to the study of works in smaller sectional forms.
PREREQUISITE: MTC 617 OR PERMISSION OF THE INSTRUCTOR.

MTC646 Studio Production
1 credit  Offered By Announcement Only
Recording studio production procedures. Topics include artist and material selection, session planning, and analysis of the producer's role. Course may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MTC648 Electronic Music Ensemble
1 credit  Offered By Announcement Only
PREREQUISITE: BY AUDITION.

MTC652 Research Seminar II
2 credits  Offered By Announcement Only
MTC667 Advanced Electronic and Computer Music Seminar
1-3 credits    Fall & Spring Semester
Advanced techniques and applications in electronic and computer music. Topics may include electronic projects in composition, performance, research, programming, or other as approved by instructor.
PREREQUISITE: MTC 505, 506, 507, OR CONSENT OF INSTRUCTORS.

MTC668 Projects in Media Writing and Production
1-3 credits   Offered By Announcement Only
Supervised projects in specific areas of Media Writing and Production.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MTC682 Composition Workshop
1 credit                                                     Fall & Spring Semester

MTC693 Special Projects
1-3 credits    Fall & Spring Semester
Projects in any phase of theory-composition in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MTC694 Special Projects
1-3 credits    Fall & Spring Semester
Projects in any phase of theory-composition in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MTC696 Studio Production Ensemble
1 credit                                               Offered By Announcement Only
PREREQUISITE: BY AUDITION.

MTC697 Studio Rhythm Section
1 credit                                                     Fall & Spring Semester
PREREQUISITE: BY AUDITION.

MTC699 The Other Music Ensemble
1 credit                                                     Fall & Spring Semester
An in-depth study and performance of 20th century music.
PREREQUISITE: BY AUDITION.

MTC710 Master's Thesis
1-6 credits    Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MTC713 Master's Media Writing Project
1-3 credits    Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's media writing project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.
MTC720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree
after the student has enrolled for the permissible cumulative total in MTC 710
(usually six credits). Credit not granted. May be regarded as full time residence.

MTC731 Doctoral Essay
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the D.M.A. The student will enroll for credit as
determined by his/her advisor, but not for less than a total of 12. Not more than
12 hours of MTC 731 may be taken in a regular semester, nor more than six in a
summer session.

MTC750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.M.A., after the student
has been enrolled for the permissible cumulative total in appropriate doctoral
research. Credit not granted. May be regarded as full-time residence as determined
by the Dean of the Graduate School.

MUSICOLOGY
MCY520 History and Literature of the Wind Band
3 credits  Fall Semester
An historical survey of wind band literature, the evolution of the military band,
the wind band, and the wind orchestra.

MCY521 Symphonic Literature
3 credits  Spring Semester
A survey of orchestral music from the end of the seventeenth century to the present.

MCY522 Operatic Literature
3 credits  Spring Semester
The history and literature of opera from the end of the sixteenth century to the
present.

MCY524 Contemporary Music
3 credits  Fall Semester
Music of the 20th century, with emphasis on developments since 1945.

MCY525 Art Song Literature
3 credits  Spring Semester
A survey of the solo vocal literature from the 16th century to the present, with
particular emphasis on the 19th-century French and German repertoire.

MCY526 Keyboard Literature I
3 credits  Fall Semester
A survey of keyboard literature from its beginning to approximately 1750 emphasizing
changes in styles of writing and expression, development of techniques suited to
the primary instruments in use (including the early organ, clavichord, harpsichord
and fortepiano), ornamentation both specified and improvised, forms, and ideas
for interpretation based on historical sources.
MCY527 Keyboard Literature II
3 credits  
Spring Semester
A survey of solo keyboard literature from approximately 1750 to the present emphasizing changes in styles of writing and expression, development of technique suited to the primary instruments in use (including the clavichord, harpsichord, fortepiano and modern piano), embellishment both specified and improvised, forms, and ideas for interpretation based on historical sources (including facsimiles, printed scores, written records and sound recordings, particularly those by the composers themselves).

MCY528 Music Bibliography
3 credits  
Fall Semester
Course presents research materials, including dictionaries, encyclopedias, historical collections, scholarly editions, complete works, books, articles, and lists dealing with specialized areas of music history and literature.
PREREQUISITE: GRADUATE STANDING, OR PERMISSION OF INSTRUCTOR.

MCY529 Music of the Baroque Period
3 credits  
Spring Semester
Literature and history of music from the end of the sixteenth to the middle of the eighteenth centuries.
PREREQUISITE: SIX CREDITS OF UNDERGRADUATE MUSIC HISTORY.

MCY530 Music of the Classical Period
3 credits  
Fall Semester
The musical styles which developed between the mid-eighteenth century and the nineteenth century.

MCY532 History of Chamber Music
3 credits  
Fall Semester
Styles and forms in chamber music literature from the seventeenth century to the present.

MCY533 Music of the Romantic Period
3 credits  
Spring Semester
The musical styles which developed during the nineteenth century.
PREREQUISITE: SENIOR STANDING OR PERMISSION OF INSTRUCTOR.

MCY535 Choral Literature I
2 credits  
Fall Semester
Choral music of the sixteenth through the eighteenth centuries. A combination of lecture-discussion and class performance.

MCY536 Choral Literature II
2 credits  
Fall Semester
Choral music of the nineteenth and twentieth centuries. A combination of lecture-discussion and class performance.

MCY537 Music in the United States
3 credits  
Spring Semester
A survey of music in the United States from colonial times to the present, with emphasis on the social, economic, and political conditions which affected it. Art music (sacred and secular), popular music in all idioms, the music industry as it evolved in the U.S., and the influence of American music on the music of other countries.
MCY538 Music, Gender, and Sexuality
3 credits Spring Semester
An exploration of music from around the world from the perspective of women. We will examine the roles women have played, and still play, as creators and performers in art music and popular music traditions. Representations of women and gender ideologies will also be discussed.

MCY541 Music of the Mediaeval, Renaissance, and Baroque Periods
3 credits Fall Semester & First Summer Session
A comprehensive, in-depth study of the musical styles and genres of the Mediaeval, Renaissance, and Baroque Eras. Important musical figures of these periods and analytical studies of important pieces of music from these periods are addressed.

MCY542 Music of the Classical, Romantic, and Modern Periods
3 credits Spring Semester & Second Summer Session
A comprehensive, in-depth study of the musical styles and genres of the Classical, Romantic, and Modern Eras of important musical figures of these periods, and analytical studies of important pieces of music from these periods.

MCY553 Miami’s Musical Heritage
3 credits Spring Semester & First Summer Session
A study of the musical traditions and practices of the various cultures that are part of Miami’s unique multi-ethnic society.

MCY554 Music Cultures of the World: Argentina and Brazil
3 credits Offered By Announcement Only
A study of music culture of the region including the music of folk societies, popular artists, and classical musicians. Open to non-majors.
PREREQUISITE: UPPERCLASS STANDING OR PERMISSION OF THE INSTRUCTOR.

MCY562 Music of Argentina and Brazil.
3 credits Spring Semester
An in-depth study of Argentine and Brazilian musical cultures covering folk, popular, and classical traditions. Open to non-majors.

MCY564 Seminar in Latin American Music Collections
3 credits Fall Semester
Examines Latin American music materials at the Cuban Heritage Collection and Special Collections at the Richter Library. Focuses on interpreting original documents and acquiring archival techniques.
PREREQUISITE: MINIMUM JUNIOR STANDING. READING KNOWLEDGE OF SPANISH.

MCY583 History of the American Musical Theatre
3 credits Fall Semester
An examination of the development of musical theatre from its European opera and operetta background to an indigenous American art form. The areas to be explored include the rise and fall of various genre of musical shows, integration of story, song and dance, important producers, directors, lyricists, composers, and new fields such as director-choreographer. The development of an American cultural consciousness and political and socio-economic trends of various decades that greatly influenced the content and form of musical shows is also examined.
MCY593 Special Topics MCY
1-3 credits Fall & Spring Semester & First & Second Summer Session
Supervised topics and other activities in specific areas of Musicology.
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED

MCY693 Special Projects
1-3 credits Fall & Spring Semester & First & Second Summer Session
Projects in any phase of music literature and history in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MCY694 Special Projects
1-3 credits Fall & Spring Semester
Projects in any phase of music literature and history in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MCY710 Master's Thesis
1-6 credits Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

MCY720 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MCY 710 (usually six credits). Credit not granted. May be regarded as full time residence.

MCY730 Doctoral Dissertation
1-12 credits Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MCY 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

MCY750 Research in Residence
0 credit Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.M.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

STUDIO MUSIC & JAZZ
MSJBJI Jazz Bass
1-3 credits Fall & Spring Semester
Jazz Bass at the Master's level. The student will pursue a course of study that is directed toward his/her musical goals. This course will examine, through transcription and analysis, the important figures in the history of Jazz bass, and also those performances in which the student is interested.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.
STUDIO MUSIC & JAZZ

MSJJBJ Jazz Bass
1- 3 credits  Fall & Spring Semester
Continuation of MSJ JBI.
PREREQUISITE: MASTER'S LEVEL. MSJ JBI.

MSJJBK Jazz Bass
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
Continuation of MSJ JBK.
PREREQUISITE: MASTER'S LEVEL. MSJ JBK.

MSJJBL Jazz Bass
1- 3 credits  Fall & Spring Semester
This semester will focus on the student's graduate recital performance, if applicable.
PREREQUISITE: MASTER'S LEVEL. MSJ JBK.

MSJJBM Jazz Bass
1- 3 credits  Fall & Spring Semester
Jazz Bass at the Doctoral level. The student will pursue a course of study that is directed towards his/her musical goals. This course will also examine, through transcription and analysis, the important figures in the history of jazz bass, and also those performances in which the student is interested.
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MSJJBN Jazz Bass
1- 3 credits  Fall & Spring Semester
Continuation of MSJ JBM.
PREREQUISITE: DOCTORAL LEVEL. MSJ JBM.

MSJJBO Jazz Bass
1- 3 credits  Fall & Spring Semester
Continuation of MSJ JBN.
PREREQUISITE: DOCTORAL LEVEL. MSJ JBN.

MSJJBP Jazz Bass
1- 3 credits  Fall & Spring Semester
Continuation of MSJ JBO.
PREREQUISITE: DOCTORAL LEVEL. MSJ JBO.

MSJJBQ Jazz Bass
1- 3 credits  Fall & Spring Semester
Continuation of MSJ JBP.
PREREQUISITE: DOCTORAL LEVEL. MSJ JBP.

MSJJBR Jazz Bass
1- 3 credits  Fall & Spring Semester
Continuation of MSJ JBQ.
PREREQUISITE: DOCTORAL LEVEL. MSJ JBQ.

MSJJDI Jazz Drumset
1- 3 credits  Fall & Spring Semester
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.
**MSJJDJ Jazz Drumset**

1-3 credits    Fall & Spring Semester  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: MASTER'S LEVEL. MSJ JDJ.

**MSJJK Jazz Drumset**

1-3 credits Fall & Spring Semester & First & Second Summer Session  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: MASTER'S LEVEL. MSJ JDJ.

**MSJJDIL Jazz Drumset**

1-3 credits Fall & Spring Semester  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: MASTER'S LEVEL. MSJ JDJ.

**MSJJDMM Jazz Drumset**

1-3 credits Fall & Spring Semester  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

**MSJJDNN Jazz Drumset**

1-3 credits Fall & Spring Semester  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: DOCTORAL LEVEL. MSJ JDM.

**MSJJDNO Jazz Drumset**

1-3 credits Fall & Spring Semester  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: DOCTORAL LEVEL. MSJ JDN.

**MSJJDPO Jazz Drumset**

1-3 credits Fall & Spring Semester  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: DOCTORAL LEVEL. MSJ JDO.

**MSJJDQQ Jazz Drumset**

1-3 credits Fall & Spring Semester  
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.  
PREREQUISITE: DOCTORAL LEVEL. MSJ JDP.
SCHOOL OF MUSIC
STUDIO MUSIC & JAZZ

MSJJDR Jazz Drumset
1-3 credits  Fall & Spring Semester
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. MSJ JDQ.

MSJJGI Jazz Guitar
1-3 credits  Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list:
advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.

MSJJGJ Jazz Guitar
1-3 credits  Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list:
advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.

MSJJGK Jazz Guitar
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list:
advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy.
PREREQUISITE: MASTER'S LEVEL. MSJ JGJ.

MSJJGL Jazz Guitar
1-3 credits  Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list:
advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy.
PREREQUISITE: MASTER'S LEVEL. MSJ JGK.
MSJJGM Jazz Guitar
1-3 credits    Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. It is expected that a graduate student at the DMA level would be, to a large extent, self-directing and capable of original research. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy. Assistance with recital preparation will be given as appropriate and necessary. The prerequisite for the first level (JGM) is a Master's Degree and the successful completion of the audition for the DMA program.
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MSJJGN Jazz Guitar
1-3 credits    Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. It is expected that a graduate student at the DMA level would be, to a large extent, self-directing and capable of original research. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy. Assistance with recital preparation will be given as appropriate and necessary. The prerequisite for the first level (JGM) is a Master's Degree and the successful completion of the audition for the DMA program.
PREREQUISITE: DOCTORAL LEVEL. MSJ JGM.

MSJJGO Jazz Guitar
1-3 credits    Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. It is expected that a graduate student at the DMA level would be, to a large extent, self-directing and capable of original research. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy. Assistance with recital preparation will be given as appropriate and necessary. The prerequisite for the first level (JGM) is a Master's Degree and the successful completion of the audition for the DMA program.
PREREQUISITE: DOCTORAL LEVEL. MSJ JGN.
MSJJGP Jazz Guitar
1-3 credits    Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. It is expected that a graduate student at the DMA level would be, to a large extent, self-directing and capable of original research. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy. Assistance with recital preparation will be given as appropriate and necessary. The prerequisite for the first level (JGM) is a Master's Degree and the successful completion of the audition for the DMA program.
PREREQUISITE: DOCTORAL LEVEL. MSJ JGO.

MSJJGQ Jazz Guitar
1-3 credits    Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. It is expected that a graduate student at the DMA level would be, to a large extent, self-directing and capable of original research. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy. Assistance with recital preparation will be given as appropriate and necessary. The prerequisite for the first level (JGM) is a Master's Degree and the successful completion of the audition for the DMA program.
PREREQUISITE: DOCTORAL LEVEL. MSJ JGQ.

MSJJGR Jazz Guitar
1-3 credits    Fall & Spring Semester
Graduate Studies in Jazz Guitar are designed to take into account each student's talent, previous accomplishments and particular interests. It is expected that a graduate student at the DMA level would be, to a large extent, self-directing and capable of original research. After a careful assessment of the student's strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy. Assistance with recital preparation will be given as appropriate and necessary. The prerequisite for the first level (JGM) is a Master's Degree and the successful completion of the audition for the DMA program.
PREREQUISITE: DOCTORAL LEVEL. MSJ JGP.

MSJJPI Jazz Piano
1-3 credits    Fall & Spring Semester
Exploration of the jazz piano tradition with an emphasis on advanced artists. Discussion of solo piano arranging and reharmonization techniques. Improvisation on non-symmetrical forms and advanced modal compositions.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.
MSJJPJ Jazz Piano
1-3 credits  Fall & Spring Semester
Exploration of the jazz piano tradition with an emphasis on advanced artists. Discussion of solo piano arranging and reharmonization techniques. Improvisation on non-symmetrical forms and advanced modal compositions.
PREREQUISITE: MASTER'S LEVEL. MSJJP.

MSJJPK Jazz Piano
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Exploration of the jazz piano tradition with an emphasis on advanced artists. Discussion of solo piano arranging and reharmonization techniques. Improvisation on non-symmetrical forms and advanced modal compositions.
PREREQUISITE: MASTER'S LEVEL. MSJJP.

MSJJPL Jazz Piano
1-3 credits  Fall & Spring Semester
Exploration of the jazz piano tradition with an emphasis on advanced artists. Discussion of solo piano arranging and reharmonization techniques. Improvisation on non-symmetrical forms and advanced modal compositions.
PREREQUISITE: MASTER'S LEVEL. MSJJP.

MSJJPM Jazz Piano
1-3 credits  Fall & Spring Semester
Development of an individual voice and style. Composition in the solo piano and trio format: orchestrational techniques on the piano as derived from orchestra and big band, discussion of form and structure.
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MSJJPN Jazz Piano
1-3 credits  Fall & Spring Semester
Development of an individual voice and style. Composition in the solo piano and trio format: orchestrational techniques on the piano as derived from orchestra and big band, discussion of form and structure.
PREREQUISITE: DOCTORAL LEVEL. MSJJP.

MSJJPO Jazz Piano
1-3 credits  Fall & Spring Semester
Development of an individual voice and style. Composition in the solo piano and trio format: orchestrational techniques on the piano as derived from orchestra and big band, discussion of form and structure.
PREREQUISITE: DOCTORAL LEVEL. MSJJP.

MSJJPP Jazz Piano
1-3 credits  Fall & Spring Semester
Development of an individual voice and style. Composition in the solo piano and trio format: orchestrational techniques on the piano as derived from orchestra and big band, discussion of form and structure.
PREREQUISITE: DOCTORAL LEVEL. MSJJP.

MSJJPO Jazz Piano
1-3 credits  Fall & Spring Semester
Development of an individual voice and style. Composition in the solo piano and trio format: orchestrational techniques on the piano as derived from orchestra and big band, discussion of form and structure.
PREREQUISITE: DOCTORAL LEVEL. MSJJP.
MSJJPR Jazz Piano
1- 3 credits  Fall & Spring Semester
Development of an individual voice and style. Composition in the solo piano and trio format: orchestral techniques on the piano as derived from orchestra and big band, discussion of form and structure.
PREREQUISITE: DOCTORAL LEVEL. MSJ JPQ.

MSJJSI Jazz Saxophone
1- 3 credits  Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.

MSJJSJ Jazz Saxophone
1- 3 credits  Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: MASTER'S LEVEL. MSJ JSI.

MSJJSK Jazz Saxophone
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: MASTER'S LEVEL. MSJ JSJ.

MSJJSL Jazz Saxophone
1- 3 credits  Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: MASTER'S LEVEL. MSJ JSK.
MSJJSM Jazz Saxophone
1-3 credits    Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MSJJSN Jazz Saxophone
1-3 credits    Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: DOCTORAL LEVEL. MSJ JSM.

MSJJSO Jazz Saxophone
1-3 credits    Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: DOCTORAL LEVEL. MSJ JSN.

MSJJSP Jazz Saxophone
1-3 credits    Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: DOCTORAL LEVEL. MSJ JSO.
MSJSQ Jazz Saxophone
1-3 credits    Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: DOCTORAL LEVEL. MSJ JSP.

MSJSR Jazz Saxophone
1-3 credits    Fall & Spring Semester
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
PREREQUISITE: DOCTORAL LEVEL. MSJ JSQ.

MSJTI Jazz Trombone
1-3 credits    Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: MASTER’S LEVEL. BY AUDITION.

MSJTBJ Jazz Trombone
1-3 credits    Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: MASTER’S LEVEL. MSJ TBI.

MSJTBK Jazz Trombone
1-3 credits    Fall & Spring Semester & First & Second Summer Session
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: MASTER’S LEVEL. MSJ TBJ.
MSJTBL Jazz Trombone
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: MASTER'S LEVEL. MSJ TBK.

MSJTB M Jazz Trombone
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MSJTN B Jazz Trombone
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. MSJ TBM.

MSJTO B Jazz Trombone
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. MSJ TBN.

MSJTP B Jazz Trombone
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. MSJ TBO.

MSJTBQ Jazz Trombone
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. MSJ TBP.
MSJTBR Jazz Trombone
1-3 credits    Fall & Spring Semester
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. MSJ TBQ.

MSJTPJ Jazz Trumpet
1-3 credits    Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: MASTER'S LEVEL. MSJ TPJ.

MSJTPL Jazz Trumpet
1-3 credits    Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: MASTER'S LEVEL. MSJ TPK.

MSJTPM Jazz Trumpet
1-3 credits    Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.
MSJTPN Jazz Trumpet
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL MSJ TPM.

MSJTOPO Jazz Trumpet
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL MSJ TPN.

MSJTPP Jazz Trumpet
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL MSJ TPO.

MSJTPQ Jazz Trumpet
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL MSJ TPP.

MSJTPR Jazz Trumpet
1-3 credits Fall & Spring Semester
Private lessons focus on various facets of jazz trumpet performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
PREREQUISITE: DOCTORAL LEVEL MSJ TPQ.

MSJVOI Jazz Voice
1-3 credits Fall & Spring Semester
Private studio vocal study at the master of music graduate level devoted to the continued development of skills and repertoire with particular attention to discovering and nurturing the individual student's artistic direction.
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.
MSJVOJ Jazz Voice  
1- 3 credits  Fall & Spring Semester  
Private studio vocal study at the master of music graduate level devoted to the continued development of skills and repertoire with particular attention to discovering and nurturing the individual student's artistic direction.  
PREREQUISITE: MASTER'S LEVEL. MSK VOI.

MSJVOK Jazz Voice  
1- 3 credits  Fall & Spring Semester & First & Second Summer Session  
Private studio vocal study at the master of music graduate level devoted to the continued development of skills and repertoire with particular attention to discovering and nurturing the individual student's artistic direction.  
PREREQUISITE: MASTER'S LEVEL. MSJ VOJ.

MSJVOL Jazz Voice  
1- 3 credits  Fall & Spring Semester  
Private studio vocal study at the master of music graduate level devoted to the continued development of skills and repertoire with particular attention to discovering and nurturing the individual student's artistic direction.  
PREREQUISITE: MASTER'S LEVEL. MSJ VOK.

MSJVOM Jazz Voice  
1- 3 credits  Fall & Spring Semester  
Private studio vocal coaching at the doctoral level devoted to refining all skills, technique, and repertoire for professional performance and pedagogy.  
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MSJVON Jazz Voice  
1- 3 credits  Fall & Spring Semester  
Private studio vocal coaching at the doctoral level devoted to refining all skills, technique, and repertoire for professional performance and pedagogy.  
PREREQUISITE: DOCTORAL LEVEL. MSJ VOM.

MSJVOO Jazz Voice  
1- 3 credits  Fall & Spring Semester  
Private studio vocal coaching at the doctoral level devoted to refining all skills, technique, and repertoire for professional performance and pedagogy.  
PREREQUISITE: DOCTORAL LEVEL. MSJ VON.

MSJVOP Jazz Voice  
1- 3 credits  Fall & Spring Semester  
Private studio vocal coaching at the doctoral level devoted to refining all skills, technique, and repertoire for professional performance and pedagogy.  
PREREQUISITE: DOCTORAL LEVEL. MSJ VOO.

MSJVOQ Jazz Voice  
1- 3 credits  Fall & Spring Semester  
Private studio vocal coaching at the doctoral level devoted to refining all skills, technique, and repertoire for professional performance and pedagogy.  
PREREQUISITE: DOCTORAL LEVEL. MSJ VOP.
MSJVOR Jazz Voice
1-3 credits  Fall & Spring Semester
Private studio vocal coaching at the doctoral level devoted to refining all skills, technique, and repertoire for professional performance and pedagogy.
PREREQUISITE: DOCTORAL LEVEL MSJ VOQ.

MSJ509 Jazz Composition I
2 credits  Fall Semester
Application of advanced composition techniques to various contemporary Jazz styles making extensive use of analysis of established compositions. Emphasis is placed on small group performance.
PREREQUISITE: MTC 211 OR MTC 240

MSJ510 Jazz Composition II
2 credits  Spring Semester
This course is a continuation of MSJ 500 with an emphasis on melody writing, reharmonization techniques, pentatonic/blues composition, and an introduction to advanced harmonic materials.

MSJ516 Jazz Vocal Arranging
2 credits  Spring Semester
Analysis and techniques of jazz vocal writing.

MSJ519 Advanced Modern Arranging I
3 credits  Fall Semester
Advanced arranging and composition for the Jazz and studio ensemble.

MSJ520 Advanced Modern Arranging II
3 credits  Spring Semester
Advanced arranging and composition for the Jazz and studio ensemble.

MSJ521 Advanced Modern Arranging III
3 credits  Spring Semester
Course addresses scoring for large jazz ensemble, utilizing chord scale voicings and line writing techniques. Emphasis is placed on orchestration styles such as Duke Ellington, Gil Evans, and Thad Jones.

MSJ522 Introduction to Midi Sequencing and Digital Workstations
2 credits  Fall & Spring Semester
An introduction to Midi Sequencing with hands-on experience working with a computer sequencing workstation. Topics include sequencing, quantizing, editing, mixing, and effects processing.
PREREQUISITE: MSJ 519/520

MSJ544 Jazz Pedagogy and Administration
3 credits  Spring Semester
The philosophy, methods, and materials of instruction pertinent to the teaching and management of a jazz and commercial curriculum at the high school and college level. Includes preparation of model curricula and supervised instruction.
PREREQUISITE: MSJ 565
MSJ560 Advanced Jazz Improvisation Theory  
3 credits  
Fall Semester  
Review of fundamentals and introduction of advanced topics in jazz harmony and scale resources for improvisation.  
PREREQUISITE: PLACEMENT AUDITION  

MSJ565 Advanced Improvisation I  
3 credits  
Spring Semester  
Use of stylistic nuance with emphasis on melodic development, complex harmonies, time-feel, and phrasing. Open only to senior or graduate majors in Studio Music and Jazz.  
PREREQUISITE: MSJ 372  

MSJ566 Advanced Improvisation II  
3 credits  
Fall Semester  
Refinement of improvisation concepts leading towards the establishment of a personal style of playing. Open only to senior or graduate majors in Studio Music and Jazz.  
PREREQUISITE: MSJ 565  

MSJ589 Jazz Accompanying  
2 credits  
Offered By Announcement Only  
A comprehensive study in accompaniment concepts for pianists/guitarists reflecting contemporary and traditional jazz styles.  

MSJ593 Special Topics MSJ  
1- 3 credits  
Fall & Spring Semester  
Supervised topics and other activities in specific areas of Studio Music and Jazz.  
PREREQUISITE: DEAN'S APPROVAL AND SIGNATURE REQUIRED  

MSJ603 Jazz Piano Class I  
1 credit  
Fall & Spring Semester  
Group instruction in the various styles of contemporary jazz. Graduate students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.  
PREREQUISITE: PLACEMENT AUDITION.  

MSJ604 Jazz Piano Class II  
1 credit  
Fall & Spring Semester  
Group instruction in the various styles of contemporary jazz. Graduate students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.  
PREREQUISITE: MSJ 603 OR PLACEMENT AUDITION.  

MSJ605 Jazz Piano Class III  
1 credit  
Fall & Spring Semester  
Group instruction in the various styles of contemporary jazz. Graduate students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.  
PREREQUISITE: MSJ 604 OR PLACEMENT AUDITION.
MSJ606 Jazz Piano Class IV
1 credit  Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Graduate students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
PREREQUISITE: MSJ 605 OR PLACEMENT AUDITION.

MSJ614 Advanced Orchestration
3 credits  Fall Semester
Techniques for scoring for the modern symphony orchestra.
PREREQUISITE: MSJ 519, 520, MTC 416 OR BY PERMISSION OF INSTRUCTOR.

MSJ615 Jazz Composition Seminar I
2 credits  Fall Semester
Creative work in Jazz Composition.

MSJ620 Analysis of Jazz Styles
3 credits  Fall Semester
A comparative study of Jazz styles from 1900 to the present.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MSJ627 Jazz Rhythm Section Techniques
1 credit  Offered By Announcement Only
A jazz ensemble for piano, bass, drums, and horns that offers advanced concepts in small group interactive performance.
PREREQUISITE: MSJ MAJORS OR PERMISSION OF INSTRUCTOR.

MSJ634 E.C.M. Ensemble
1 credit  Fall & Spring Semester
This ensemble performs music typical of the contemporary European jazz styles such as those characterized by the Edition of Contemporary Music (E.C.M.) Recording Company.
PREREQUISITE: AUDITION.

MSJ638 Vocal Recording Ensemble
1 credit  Fall & Spring Semester
Weekly recording sessions and instruction in recording studio performance techniques including skill training in sight reading, vocal production, and diction applied to group and solo singing styles.
PREREQUISITE: BY AUDITION.

MSJ639 Small Jazz Vocal Ensemble
1 credit  Fall & Spring Semester
Small groups of vocalists with a rhythm section, dedicated to a particular style and body of literature.
PREREQUISITE: BY AUDITION.
MSJ640 Small Jazz Ensemble
1 credit
Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
PREREQUISITE: BY AUDITION.

MSJ641 Small Jazz Ensemble I
1 credit
Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.

MSJ642 Small Jazz Ensemble II
1 credit
Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.

MSJ643 Small Jazz Ensemble III
1 credit
Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.

MSJ644 Small Jazz Ensemble IV
1 credit
Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.

MSJ645 Small Jazz Ensemble V
1 credit
Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
MSJ646 Small Jazz Ensemble VI
1 credit  Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.

MSJ647 Small Jazz Ensemble VII
1 credit  Fall & Spring Semester
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.

MSJ650 Studio Jazz Band
1 credit  Fall & Spring Semester
This ensemble performs music in the recent big band tradition, from leaders such as Duke Ellington, Count Basie, Buddy Rich, Bob Brookmeyer, and Thad Jones. The group performs on campus with an emphasis on studio recording.
PREREQUISITE: BY AUDITION.

MSJ651 Concert Jazz Band
1 credit  Fall & Spring Semester
The Concert Jazz Band is the premiere big band at the Frost School of Music. Students are required to perform at an advanced level, and work with a variety of guest artists. Requirements include the ability to sight read difficult material, and to improvise in various styles. Audition is required.
PREREQUISITE: BY AUDITION.

MSJ653 Jazz Band III
1 credit  Fall & Spring Semester
Big Band designed for graduate students needing experience with classic Big Band repertory.
PREREQUISITE: BY AUDITION.

MSJ655 Monk/Mingus Ensemble
1 credit  Fall Semester
This ensemble is dedicated to the study and performance of the music of the influential jazz composers Charles Mingus and Thelonius Monk.
PREREQUISITE: BY AUDITION.

MSJ656 Funk/Fusion Ensemble
1 credit  Fall & Spring Semester
Small jazz ensemble focusing on contemporary electric jazz/rock/fusion/Latin styles. Emphasis is placed on original compositions by the members of the ensemble. The most common instrumentation is bass, drums, piano/synthesizer, guitar, and saxophone.
PREREQUISITE: AUDITION.

MSJ657 Horace Silver Ensemble
1 credit  Spring Semester
This ensemble is dedicated to the study and performance of the music of Horace Silver.
PREREQUISITE: AUDITION.
MSJ658 Bebop Ensemble
1 credit  Fall & Spring Semester
This is the top instrumental small group and performs frequently both locally and nationally. The ensemble performs exclusively original compositions provided by the members of the group. The styles presented are varied and based on the interests of the participants, but include bebop, blues and world music.
PREREQUISITE: BY AUDITION.

MSJ659 Rhythm and Blues Ensemble
1 credit  Fall & Spring Semester
Mid-level ensemble for both instrumentalists and vocalists designed to familiarize students with classic Rhythm and Blues material from the 50s, 60s, and 70s, while preparing for a series of concerts throughout the semester. Students are guided through the process of putting a working band together and preparing it for performances and recordings, including what is expected of and from instruments, vocalists, producers, promoters, and other industry personnel.

MSJ660 Avant Garde Ensemble
1 credit  Fall & Spring Semester
This ensemble offers students the opportunity to develop the "free form" improvisation in either the bebop based style of Ornette Coleman or the fusion oriented style as typified by Bill Laswell.
PREREQUISITE: AUDITION.

MSJ661 Electric Bass Ensemble
1 credit  Fall & Spring Semester
This is a 2 hour weekly ensemble that develops a thorough foundation in basic techniques and bass line creation. The fall semester concentrates on the acoustic bass and related styles. The spring semester focuses on the electric bass.
PREREQUISITE: BY AUDITION.

MSJ662 Jazz Saxophone Ensemble
1 credit  Fall & Spring Semester
An intermediate level reading ensemble comprised of five saxophones and rhythm section, designed to reinforce fundamental principles of playing in the typical big band saxophone section. Skills addressed include sight-reading, blend, intonation, phrasing, rhythmic accuracy, etc. Rhythm section players gain reading experience and learn the basics of providing a foundation for big band type arrangements. Repertoire includes both published and selected original charts from student arrangers.
PREREQUISITE: BY AUDITION.

MSJ664 Contemporary Rhythm Section Techniques I
1 credit  Fall Semester
This is an ensemble for freshmen rhythm section players. The focus of this ensemble is to introduce students to various styles of rhythm section playing--from swing and modern Jazz through Rock, Funk, R&B, and other commercial styles of music. Concepts of sound, groove, balance and blend, repertory, and accompaniment are also discussed.

MSJ665 Contemporary Rhythm Section Techniques II
1 credit  Spring Semester
Fundamentals of rhythm section playing for guitarists, pianists, bassists, and drummers. It covers a variety of contemporary styles within the rock, jazz, Latin, and pop idioms. Students are grouped into ensembles which perform in class weekly.
PREREQUISITE: BY AUDITION.
MSJ666 Small Jazz Ensemble Lab  
0 credit  Fall & Spring Semester  
Performance Lab designed to work in conjunction with all of the 140 level ensembles. Provides and environment in which students are required to perform on a regular rotating schedule throughout the semester. These performances are critiqued by the institution and other faculty, as well as students, in order to nurture a critical but positive atmosphere.  
PREREQUISITE: BY AUDITION.

MSJ667 Salsa Ensemble  
1 credit  Spring Semester  
An ensemble of instrumentalists and singers performing a wide variety of Salsa and Latin jazz styles with emphasis on improvisation.

MSJ669 Jazz Guitar Ensemble I  
1 credit  Fall & Spring Semester  
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.  
PREREQUISITE: BY AUDITION.

MSJ670 Jazz Guitar Ensemble II  
1 credit  Fall & Spring Semester  
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.  
PREREQUISITE: BY AUDITION.

MSJ671 Jazz Guitar Ensemble III  
1 credit  Fall & Spring Semester  
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.  
PREREQUISITE: BY AUDITION.

MSJ672 Jazz Guitar Ensemble (Workshop I)  
1 credit  Fall & Spring Semester  
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles.  
PREREQUISITE: BY AUDITION.

MSJ673 Jazz Guitar Ensemble (Workshop II)  
1 credit  Offered By Announcement Only  
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles.  
PREREQUISITE: BY AUDITION.

MSJ675 Jazz Writing Ensemble  
1 credit  Offered By Announcement Only  
This class is a seminar in jazz arranging and composition techniques for Studio/Jazz Writing master's students and DMA students in Jazz Composition. The class consists primarily of topics related to jazz and studio arranging and composition, recording techniques, rehearsal techniques, music technologies, music business, and entrepreneurship. Topics are examined utilizing hands-on technology, score analysis, listening, guest lectures, and long range projects.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
STUDIO MUSIC & JAZZ

MSJ693 Special Projects
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Projects in any phase of studio music and jazz in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN’S APPROVAL AND SIGNATURE REQUIRED.

MSJ694 Special Projects
1-3 credits  Fall & Spring Semester & First & Second Summer Session
Projects in any phase of studio music and jazz in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN’S APPROVAL AND SIGNATURE REQUIRED.

MSJ695 Jazz Vocal Ensemble I
1 credit  Fall & Spring Semester
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.
PREREQUISITE: PERMISSION OF CONDUCTOR.

MSJ696 Jazz Vocal Ensemble II
1 credit  Fall & Spring Semester
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.
PREREQUISITE: PERMISSION OF CONDUCTOR.

MSJ697 Jazz Vocal Ensemble III
1 credit  Fall & Spring Semester
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

MSJ711 Master's Recital Paper
1-3 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

MSJ712 Master's Recital
1 credit  Fall & Spring Semester
The student enrolls for recital credit during the semester in which he/she presents the master's recital.

MSJ713 Master's Jazz Writing Project
1-3 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her master's jazz writing project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.

MSJ720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MSJ 710 (usually six credits). Credit not granted. May be regarded as full time residence.
MSJ731 Doctoral Essay
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates of the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MSJ 731 may be taken in a regular semester, nor more than six in a summer session.

MSJ732 Doctoral Recital
1 credit                                                     Fall & Spring Semester
A formal recital displaying improvisational, interactive, and compositional skills appropriate to the doctoral level.

MSJ750 Research in Residence
0 credit                     Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the D.M.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

VOCAL PERFORMANCE

MVPCDI Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. BY AUDITION.

MVPCDJ Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MVPCDI.

MVPCDK Conducting
1- 4 credits    Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL. MVPCDJ.

MVPCDL Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MVPCDK.

MVPCDM Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. BY AUDITION.

MVPCDN Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVPCDM.

MVPCDO Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVPCDN.

MVPCDP Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVPCDO.

MVPCDQ Conducting
1- 4 credits    Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVPCDQ.
VOCAL PERFORMANCE

MVPCDR Conducting
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVP CDQ.

MVPVOI Voice
1-4 credits Fall & Spring Semester
Private lessons for providing progress towards establishing an efficient and balanced concept of posture, breath management, phonation, resonance with clarity of articulation in required languages, the ability to sustain a professional sound in the upper register and perform with established skills for vocal, physical and emotional communication in voice juries and performances of concert and opera, and the potential for a professional career as a classical singer.
PREREQUISITE: MASTER'S LEVEL. MVP VOI.

MVPVOJ Voice
1-4 credits Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MVP VOJ.

MVPVOK Voice
1-4 credits Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: MASTER'S LEVEL. MVP VOJ.

MVPVOL Voice
1-4 credits Fall & Spring Semester
PREREQUISITE: MASTER'S LEVEL. MVP VOK.

MVPVOM Voice
1-4 credits Fall & Spring Semester
Private lessons for providing progress towards establishing an efficient and balanced concept of posture, breath management, phonation, resonance with clarity of articulation and workable knowledge of required languages, the ability to sustain a professional sound in the upper register and perform with advanced skills for vocal, physical and emotional communication in voice juries and performances of concert and opera, and the potential for a professional career as a classical singer and/or teacher of music.
PREREQUISITE: DOCTORAL LEVEL. MVP VOM.

1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVP VON.

MVPVOP Voice
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVP VOP.

MVPVQQ Voice
1-4 credits Fall & Spring Semester
PREREQUISITE: DOCTORAL LEVEL. MVP VQQ.
MVPVOR Voice
1-4 credits  Fall Semester
PREREQUISITE: DOCTORAL LEVEL. MVP VOQ.

MVP508 Choral Score Study
2 credits  Fall Semester
In depth study of selected choral or choral/orchestral works related to literature being performed by university ensembles during the academic year.

MVP538 Vocal Pedagogy
2-3 credits  Fall Semester
Course covers methods and concepts in the teaching of singing. Emphasis is placed on psychological, physiological, and acoustical principles involved in voice production with practical application, observing and teaching individual and class voice in a supervised environment.
PREREQUISITE: SENIOR STANDING IN MUSIC

MVP552 Vocal Performance Preparation
1 credit  Fall & Spring Semester
Musical preparation of a wide range of assigned vocal literature from all periods for performance in forums, juries, and recitals. Special emphasis is on musical values, styles, translations of texts, diction, pronunciation of Italian, German, French, and English, and memorization.

MVP580 Opera Production
1 credit  Fall & Spring Semester
Opera production for main stage production, scenes, and other productions. Open only to students that are cast in productions, as determined by audition and faculty decision. Typically taken by vocal performance majors.

MVP588 Voice Performance in Salzburg, Austria
2-4 credits  First & Second Summer Session
Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive vocal training from University of Miami faculty as well as distinguished guest artists. A class in vocal repertoire is also included.

MVP593 Special Topics MVP
1-3 credits  Fall & Spring Semester
Supervised topics and other activities in specific areas of Vocal Performance.
PREREQUISITE: DEAN’S APPROVAL AND SIGNATURE REQUIRED

MVP610 Vocal Literature for Teaching: English
1 credit  Fall Semester
Study of the historical body of English language vocal repertoire as it relates to voice classification, age, and technical development of a singer.
PREREQUISITE: COMPLETION OF BASIC COURSE IN VOCAL PEDAGOGY

MVP611 Vocal Literature for Teaching: Italian
1 credit  Spring Semester
Study of the historical body of Italian vocal repertoire as it relates to voice classification, age, and technical development of a singer.
PREREQUISITE: MVP 251 OR THE EQUIVALENT AND THE COMPLETION OF A BASIC COURSE IN VOCAL PEDAGOGY
MVP612 Vocal Literature for Teaching: German
1 credit Fall Semester
Study of the historical body of German vocal repertoire as it relates to voice classification, age, and technical development of a singer.
PREREQUISITE: MVP 252 OR THE EQUIVALENT AND THE COMPLETION OF A BASIC COURSE IN VOCAL PEDAGOGY

MVP613 Vocal Literature for Teaching: French
1 credit Spring Semester
Study of the historical body of French vocal repertoire as it relates to voice classification, age, and technical development of a singer.
PREREQUISITE: MVP 253 OR THE EQUIVALENT AND THE COMPLETION OF A BASIC COURSE IN VOCAL PEDAGOGY

MVP630 Studio Teaching Techniques
1 credit Fall Semester
Application of the principles studied in MVP 638. Candidates will be assigned students for applied voice study, under supervision of the instructor.
PREREQUISITE: MVP 638 OR KEYBOARD PROFICIENCY.

MVP632 Teaching the Singer Actor
2 credits Spring Semester
Exploring teaching techniques for developing the skills of the singer.
PREREQUISITE: MVP 638.

MVP636 Voice Disorders
2 credits Spring Semester
Assessment and treatment of the human voice. Course promotes an understanding of the terminology, clinical assessment, and therapy protocols used in treating the dysfunctional or damaged voice.
PREREQUISITE: MVP 638 OR INSTRUCTOR PERMISSION

MVP638 Advanced Vocal Pedagogy
3 credits Fall Semester
Course addresses advanced methods and concepts in the teaching of singing. Emphasis is placed on psychological, physiological, and acoustical principles involved in voice production; historical perspectives; and comparative pedagogical publications. Includes practical application, observation and teaching individual and class voice in a supervised environment.
PREREQUISITE: UNDERGRADUATE CREDIT IN MVP 438, TRANSFERRABLE EQUIVALENT, OR PERMISSION OF THE INSTRUCTOR.

MVP639 Vocal Pedagogy Internship
1 credit Fall Semester
Observation in the field of choice, including, but not limited to studio work, medical setting or speech pathology setting.
PREREQUISITE: MVP 638 OR PERMISSION OF INSTRUCTOR.

MVP647 Men’s Chorale
1 credit Fall & Spring Semester
This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.
MVP648 Women's Chorale
1 credit  Fall & Spring Semester
This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.

MVP650 English Diction for Singers
1 credit  Fall Semester
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching and singing in English. International Phonetic Alphabet is presented as a learning tool.

MVP651 Italian Diction for Singers
1 credit  Spring Semester
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching in Italian and Latin. International Phonetic Alphabet is presented as a learning tool.
PREREQUISITE: MVP 650.

MVP652 German Diction for Singers
1 credit  Fall Semester
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching and singing in German. International Phonetic Alphabet is used as a learning tool.
PREREQUISITE: MVP 650.

MVP653 French Diction for Singers
1 credit  Spring Semester
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching and singing in French. International Phonetic Alphabet is used as a learning tool.
PREREQUISITE: MVP 650.

MVP672 Choral Conducting: Major Work Emphasis
1 credit  Fall Semester
Course focus is placed on major choral-orchestral works with particular emphasis on two or three major works. In addition, conductors preparation for choral-orchestral works, including instrument transportation, score preparation, musical line, historical context, and score marking. are included.
PREREQUISITE: DMA/MM IN CHORAL CONDUCTING STUDENT OR BY PERMISSION OF THE INSTRUCTOR.

MVP673 Choral Conducting Workshop: Smaller Choral Works
1 credit  Fall Semester
Study of smaller choral works by Poulenc, Hindemith, Ravel, Debussy, Brahms, Mendelssohn, Schubert, Schumann, etc., with emphasis on style, interpretation, and gesture.

MVP680 Symphonic Choir
1 credit  Fall & Spring Semester
Study and performance of choral literature appropriate for large choir, including choral orchestral masterworks.
PREREQUISITE: BY AUDITION
MVP684 Chamber Singers
1 credit  Fall & Spring Semester
An ensemble of eighteen to twenty undergraduate and graduate students. The ensemble performs challenging chamber choir repertoire from the Renaissance through the Twentieth Century.
PREREQUISITE: BY AUDITION.

MVP685 UM Chorale
1 credit  Fall & Spring Semester
This ensemble performs significant choral literature with an emphasis on music of the Twentieth-Century and on choral/orchestral works including opera. Open to all qualified graduate students, regardless of major.
PREREQUISITE: BY AUDITION.

MVP688 Opera Theater
1 credit  Fall & Spring Semester
Taken by Graduate Students in Vocal Performance. The preparation and public performance of staged operatic scenes and operas with supplemental classes in acting skills, stage movement and characterization.

MVP693 Special Projects
1- 3 credits  Fall & Spring Semester
Projects in any phase of vocal performance in which the student is interested and qualified to work. Prerequisite: Graduate Music students only. Dean's approval and signature required.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MVP694 Special Projects
1- 3 credits  Fall & Spring Semester
Projects in any phase of vocal performance in which the student is interested and qualified to work.
PREREQUISITE: GRADUATE MUSIC STUDENTS ONLY. DEAN'S APPROVAL AND SIGNATURE REQUIRED.

MVP711 Master's Recital Paper
1- 3 credits  Fall & Spring Semester & First & Second Summer Session
The student working on his/her recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

MVP712 Master's Recital
1 credit  Fall & Spring Semester
The student enrolls for recital credit during the semester in which he/she presents the master's recital.

MVP714 Artist Diploma Recital
1 credit  Fall & Spring Semester
The student enrolls for recital credit during the semester in which he/she presents the Artist Diploma Recital.

MVP720 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MVP 710 (usually six credits). Credit not granted. May be regarded as full time residence.
MVP731 Doctoral Essay
1-12 credits  Fall & Spring Semester & First & Second Summer Session
Required of all candidates for the D.M.A. The student will enroll for credit as
determined by his/her advisor, but not for less than a total of 12. Not more than
12 hours of MVP 731 may be taken in a regular semester, nor more than six in a
summer session.

MVP732 Doctoral Recital
1-2 credits  Fall & Spring Semester
Required of all candidates for the D.M.A.

MVP750 Research in Residence
0 credit  Fall & Spring Semester & First & Second Summer Session
Used to establish research in residence for the Ph.D. and D.M.A., after the student
has been enrolled for the permissible cumulative total in appropriate doctoral
research. Credit not granted. May be regarded as full-time residence as determined
by the Dean of the Graduate School.
HST536 U.S. Health Care Crisis: Politics and Policies  
3 credits  
Spring Semester  
This course will explore key health policy issues within the U.S., along with the 
politics and interest groups which shape them. Fundamental concerns within the 
health care system such as: cost, quality and access to care will be analyzed. 
Major topics of discussion will include: Medicare, Medicaid, private insurance, 
the nursing shortage, and prescription drugs. The politics and policies surrounding 
issues such as bioethics, globalization, and infectious disease will also be considered. 
PREREQUISITE: JUNIORS AND SENIORS ONLY (JUNIORS MUST HAVE JUNIOR STANDING THE SEMESTER 
THEY TAKE THE CLASS.)

NURSING

NUR502 Nursing in the International Context  
2-3 credits  
Offered By Announcement Only  
The concept and process of international nursing in the context of world health 
are discussed. Analysis of the role of nursing in relation to various national 
health care systems, theories of national development, and global strategies for 
international health are also included. Emphasis is placed on nursing education 
and service in various nations with a focus on less developed countries. (2-3)

NUR507 Clinical Nutrition in Nursing Practice  
2 credits  
Spring Semester  
Application of clinical nutrition in the assessment, diagnosis, planning, implementation, 
and evaluation of nursing care of multicultural clients in primary and secondary 
care settings. (2)  
PREREQUISITE: NUR 306, JUNIOR LEVEL STATUS.

NUR536 U.S. Health Care Crisis: Politics and Policies  
3 credits  
Spring Semester  
This course will explore key health policy issues within the U.S., along with the 
politics and interest groups which shape them. Fundamental concerns within the 
health care system such as: cost, quality and access to care will be analyzed. 
Major topics of discussion will include: Medicare, Medicaid, private insurance, 
the nursing shortage, and prescription drugs. The politics and policies surrounding 
issues such as bioethics, globalization, and infectious disease will also be considered. 
PREREQUISITE: JUNIORS AND SENIORS ONLY (JUNIORS MUST HAVE JUNIOR STANDING THE SEMESTER 
THEY TAKE THE CLASS.)

NUR551 Teaching and Learning Theory in Clinical Nursing Education  
3 credits  
Fall & Spring Semester  
The focus of this course is the exploration of principles and practice of teaching 
and learning integral to clinical nursing education. Identification of the role 
of the faculty in teaching students with diverse learning styles and needs within 
a variety of clinical settings.  
PREREQUISITE: EDUCATION CERTIFICATE STUDENTS. ADMISSIONS TO PROGRAM

NUR553 Methods for Clinical Nursing Education  
3 credits  
Fall & Spring Semester  
The focus of this course is the organization and management of instruction for 
clinical nursing education. Emphasis is on effective strategies for development 
of learning opportunities in diverse clinical settings.  
PREREQUISITE: NUR 551, RN, PERMISSION OF INSTRUCTOR.
NUR555 Evaluation in Clinical Nursing Education
1- 3 credits   Fall & Spring Semester
The focus of this course is the exploration of principles and practices of evaluation integral to clinical nursing education.
PREREQUISITE: NUR 551, 553 AND/OR PERMISSION OF INSTRUCTOR.

NUR558 Practicum in Clinical Nursing Education
1- 5 credits   Fall & Spring Semester
The focus of this course is laboratory and clinical application of principles of teaching and learning. Emphasis is on the operationalization of the clinical faculty role.
PREREQUISITE: NUR 551, 553, 555, AND/OR PERMISSION OF INSTRUCTOR.

NUR594 Selected Topics
0- 3 credits   Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Selected Topics". Also open to continuing education students. (2-3)
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR595 Selected Topics
2- 3 credits   Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Selected Topics". Also open to continuing education students. (2-3)
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR596 Selected Topics
2- 3 credits   Offered By Announcement Only
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Selected Topics". Also open to continuing education students. (2-3)
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR601 Advanced Pharmacology
3 credits   Fall Semester
Advanced practice nursing application of pharmacological and pharmacokinetics for the purpose of selecting appropriate drug therapies for diverse populations. (3)
PREREQUISITE: GRADUATE STATUS.

NUR608 Concepts in Advanced Practice Nursing
3 credits   Spring Semester
Major concepts necessary for advanced practice nursing. Included are: major scientific theories, health and health promotion, health policy, ethical issues, epidemiology, technology in health care, and advanced practice role competencies. Specific emphasis is placed on understanding culture and cultural diversity in health care. (3:0)
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF THE SONHS FACULTY.

NUR609 Professionalism in Advanced Practice Nursing
2 credits   First & Second Summer Session
Focuses on the synthesis of concepts and principles necessary to develop leaders in advanced practice nursing specialties. Emphasis is placed on the role of the advanced practice nurse for optimal delivery of health care to clients across the life span. (2:0)
PREREQUISITE: NUR 608 OR PERMISSION OF SONHS FACULTY.
NUR611 Foundations of Anesthesia Science for Nurse Anesthetists
3 credits  Fall Semester
Introduction to the application of basic sciences to nurse anesthesia. This course includes the application of principles of physics, molecular biology, biochemistry and medicinal chemistry.
PREREQUISITE: ADMISSION TO MSN PROGRAM (NURSE ANESTHESIA) OR PERMISSION OF THE FACULTY

NUR612 Physiology/Pathophysiology for Advanced Practice Nursing
3 credits  Fall Semester
Analysis of physiologic and pathophysiologic mechanisms of health and illness. (3)
PREREQUISITE: GRADUATE STATUS.

NUR613 Advanced Health Assessment and Diagnostic Reasoning
0-3 credits  Fall Semester
Emphasis on culturally sensitive comprehensive health assessment and diagnostic reasoning related to advanced nursing practice. Special emphasis is placed on advanced health assessment; including age appropriate health screenings; prenatal, pediatric, and geriatric assessment; and interpretation of basic laboratory tests and diagnostic studies utilized in advanced nursing practice. Specialty specific seminars address issues for individual tracks within advanced practice nursing. (2:1)
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF SONHS FACULTY.

NUR614 Basic Concepts in Anesthesia Nursing
1-6 credits  Spring Semester
Fundamental knowledge and skills for entry into advanced practice anesthesia nursing. Concepts include essential techniques, monitoring and equipment, chemical and physical properties of anesthetic agents, and pharmacologic interventions for common problems and conditions requiring routine surgical procedures in a highly structured and guided clinical learning environment. Cultural competence and interdisciplinary anesthesia care across the lifespan is emphasized.
PREREQUISITE: NUR 601, 612, 613 OR PERMISSION OF SONHS FACULTY.

NUR615 Professional Aspects of Anesthesia Nursing
2 credits  Fall Semester
Focuses on the development and current trends in nurse anesthesia practice, education, and research. Concepts include the historical, legal, legislative, and professional role issues associated with advanced practice anesthesia nursing. Professional responsibilities, ethical issues, diversity, cultural competency, quality assurance, continuing education, and professional involvement are emphasized.
PREREQUISITE: PREREQUISITE OR COREQUISITE NUR 608.

NUR616 Pharmacology for Acute Care Nursing
3 credits  Spring Semester
Focuses on foundational pharmacologic principles and associated application to clinical practice in acute care nursing. Integration of pharmacological concepts and interventions in safe, culturally competent, and interdisciplinary acute care advanced nursing practice are emphasized.
PREREQUISITE: NUR 601 OR PERMISSION OF SONHS FACULTY.
NUR617 Pharmacology for Anesthesia Nursing
3 credits  Spring Semester
Focuses on foundational pharmacological principles and associated application to clinical practice in nurse anesthesia. Integration of pharmacological concepts and interventions in safe, culturally competent, and interdisciplinary anesthesia practice are emphasized.
PREREQUISITE: NUR 601

NUR618 Applied Nursing Informatics
2 credits  Offered By Announcement Only
Concepts of nursing informatics. Course is designed to enhance the attainment of knowledge, skills, and attitudes essential for an expert practitioner in a computerized health care environment. Emphasis is placed on nursing applications of information technology. Social, ethical, and legal issues associated with computerized health care delivery systems are also analyzed. (2)
PREREQUISITE: GRADUATE STANDING.

NUR619 Advanced Concepts of Anesthesia Nursing I
0-13 credits  First & Second Summer Session
In-depth knowledge and skills of anesthesia nursing care for a variety of common problems and conditions across anesthesia specializations. Concepts include assessment techniques, planning and pharmacologic interventions for specialty surgical procedures in a highly structured and guided clinical learning environment. Cultural competence and interdisciplinary anesthesia care across the lifespan is emphasized.
PREREQUISITE: NUR 614. PREREQUISITE OR COREQUISITE NUR 617.

NUR620 Advanced Concepts of Anesthesia Nursing II
0-14 credits  Fall Semester
In-depth knowledge and skills of highly specialized problems and conditions requiring anesthesia or surgical interventions. Concepts include assessment, techniques, planning and pharmacologic interventions for regional anesthesia, pain management, care of obstetrical patients and patients with catastrophic conditions in a highly structured and guided clinical learning environment. Cultural competence and interdisciplinary anesthesia care across the lifespan is emphasized.
PREREQUISITE: NUR 619.

NUR621 Diagnostics and Nursing Interventions for Acute Care Nursing
2 credits  Fall Semester
Selected diagnostic tests and intervention techniques essential to acute care nursing. Critical thinking and decision making related to interdisciplinary assessment of acute care patients. Cultural issues related to diagnostics and intervention.
PREREQUISITE: GRADUATE STATUS OR PERMISSION OF SONHS FACULTY.

NUR622 Acute Care Nursing of Adults I
0-4 credits  First & Second Summer Session
The first of two sequential clinical practicums designed for the development of scientific knowledge and advanced practice skills in the area of acute care nursing. Involves synthesis of concepts, knowledge and skills gained in previous courses applied to the care of the acutely ill patient. Focuses on the advanced practice of acute care nursing via the nurse practitioner/clinical nurse specialist.
PREREQUISITE: NUR 616, 621 OR PERMISSION OF SONHS FACULTY
NUR623 Primary Healthcare of Infants and Children
1- 3 credits    Spring Semester
Theoretical and clinical bases for advanced practice nursing management of infants and children. Emphasis is placed on strategies for health maintenance and prevention of health problems and management of alterations. (2:6)
PREREQUISITE: NUR 601, 612, 613 OR PERMISSION OF SONHS FACULTY.

NUR624 Health Care of the Aging Adult
0- 5 credits   Offered By Announcement Only
Development of the role of the advanced practice nurse in the health care management of the aging adult in settings ranging from primary care clinics to residential and rehabilitation including assisted living, long-term, and home care. (3:6)
PREREQUISITE: NUR 601, 612, 613, 628.

NUR626 Advanced Concepts in Gynecological Health Care for Women
2 credits                                              Offered By Announcement Only
Theoretical and clinical bases for the provision of complex gynecological care of women. Emphasis is on strategies for promotion of transcultural health care needs and management of alterations according to the advanced practice roles. (2)
PREREQUISITE: NUR 601, 613, 628

NUR627 Primary Prenatal Healthcare of Women
1- 2 credits    Spring Semester
Theoretical and clinical bases for providing primary prenatal care of women. Emphasis is on management strategies for promotion of transcultural health care needs according to the advanced practice role. (1:3)
PREREQUISITE: NUR 601, 612 AND 613

NUR628 Advanced Practice Nursing of the Adult I
0- 4 credits    Fall Semester
Theoretical and clinical bases for health care management of health alterations in the adult population. Emphasis on strategies for health maintenance and prevention of health problems, management of alterations, discharge planning and rehabilitation of individuals and aggregate population. (2:2)
PREREQUISITE: PREREQUISITE OR COREQUISITE: NUR 601, 612, 613 OR PERMISSION OF SONHS FACULTY.

NUR629 Nursing Management of Common Health Conditions of Women
3 credits                                              Offered By Announcement Only
Theoretical and clinical bases for health care management across the lifespan. This includes adolescence, childbearing, mid-life, and post menopausal adaptation to disease processes such as endocrinological, pulmonary, circulatory disorders, minor trauma, and infectious processes. (1:2)
PREREQUISITE: NUR 601, 613, 626, 627.

NUR630 Research Methods and Evidence-Based Practice
3 credits                                              Spring Semester & First & Second Summer Session
Research process, research methods, and the analysis of data using quantitative and qualitative approaches. Focuses on understanding levels of evidence for implementing evidence-based practice and performance improvement in nursing practice and health care. Investigates research methods associated with health disparities, access to health care, and clinical outcomes.
PREREQUISITE: ADMISSION TO GRADUATE STATUS OR PERMISSION OF SONHS FACULTY.
NUR631 Advanced Practice Nursing of the Adult II
4-7 credits Spring Semester
Theoretical and clinical bases for health management of health alterations in the adult population. Emphasis on strategies for health maintenance and prevention of health problems, management of alterations, discharge planning and rehabilitation of individuals and aggregate population. (2:2) (2:5)
PREREQUISITE: NUR 601, 612, 613, 628 OR PERMISSION OF SONHS FACULTY.

NUR632 Women's Health Care for Special Populations
5 credits Offered By Announcement Only
Psycho-social, cultural, physiologic, and economic parameters of health care for special populations of women. Theoretically based clinical focus on the health care management of the female adolescent, reproductive age woman, including fertility and infertility, and the mature woman, in a framework of homelessness, violence, substance abuse, HIV/AIDS, and oncology. Outreach clinical sites in a variety of settings will be utilized. (2:12)
PREREQUISITE: NUR 626, 627, 629.

NUR634 Perinatal Health Care
0-5 credits Offered By Announcement Only
Continuation of the application of physiologic, psychosocial, and cultural concepts to perinatal health care management. Emphasis is placed on nurse-midwifery management of intrapartum, postpartum, and neonatal clients. (2:12)
PREREQUISITE: NUR 626, 627.

NUR639 Acute Care Nursing of Adults II
0-7 credits Fall Semester
The second of two clinical practicums designed to guide the development of scientific knowledge and advanced practice skills in the area of acute care nursing. Designed to assist the student to assume the role of the Acute Care Nurse Practitioner/Clinical Nurse Specialist. (2:5)
PREREQUISITE: NUR 622.

NUR640 Teaching and Learning Theory in Clinical Nursing Education
3 credits Offered By Announcement Only
The focus of this course is the exploration of principles and practice of teaching and learning integral to clinical nursing education. Identification of the role of the faculty in teaching students with diverse learning styles and needs within a variety of clinical settings.
PREREQUISITE: ADMISSION TO GRADUATE STATUS

NUR641 Methods for Clinical Nursing Education
3 credits Offered By Announcement Only
The focus of this course is the organization and management of instruction for clinical nursing education. Emphasis is on effective strategies for development of learning opportunities in diverse clinical settings.
PREREQUISITE: NUR 640 OR 551 OR PERMISSION OF SONHS FACULTY.

NUR642 Evaluation in Clinical Nursing Education
3 credits Offered By Announcement Only
The focus of this course is the exploration of principles and practices of evaluation integral to clinical nursing education.
PREREQUISITE: NUR 640, 641 OR 551, 555 OR PERMISSION OF SONHS FACULTY.
NUR643 Practicum in Nursing Education  
5 credits  Offered By Announcement Only  
The focus of this course is laboratory and clinical application of principles of teaching and learning. Emphasis is on the operationalization of the clinical faculty role.  
PREREQUISITE: NUR 640, 641, 642 OR 551, 553, 555 OR PERMISSION OF SONHS FACULTY.

NUR644 Leadership and Professional Development Strategies for Nursing  
4 credits  Offered By Announcement Only  
In this course, students will be exposed to the principles of organizational culture, dynamics, mission, vision, values, and goals as it impacts nursing. Additionally they will learn current theories of change management and resource management for nursing practice. They will explore change agent roles in project management and processes.

NUR645 Interdisciplinary Anesthesia Nursing  
1-14 credits  Spring Semester  
Initial integration and synthesis course of advanced knowledge and skills for interdisciplinary anesthesia nursing care. Selected topics and clinical case studies include collaborative-decision-making, effective communication, planning and evaluation for patients with complex problems and conditions across the lifespan. With continual guidance, students assume greater responsibility for culturally competent and interdisciplinary anesthesia care.  
PREREQUISITE: NUR 620.

NUR646 Interdisciplinary Anesthesia Nursing II  
0-14 credits  Spring Semester  
Second integration and synthesis course of advanced knowledge and skills for interdisciplinary anesthesia nursing care for complex problems and conditions across the lifespan. With moderate guidance students assume greater responsibility for culturally competent and interdisciplinary anesthesia care.  
PREREQUISITE: NUR 645.

NUR647 Advanced Practice Nursing Integration  
0- 7 credits  First & Second Summer Session  
Integration of the components of the Advanced Practice Nursing role to analyze advanced practice issues. (2:5)  
PREREQUISITE: NUR 623, 628, 631 AND 627

NUR648 Internship  
0- 7 credits  Fall Semester  
Integration and role synthesis of Advanced knowledge and skills in nurse midwifery care for women and infants within diverse cultural clinical settings. Selected topics include practice management and clinical case studies to include diagnosis, collaborative practice, planning and evaluations of care for normal and complex conditions for the female adolescent, reproductive age woman and infant, the mature women and their families.  
PREREQUISITE: NUR 626: NUR 627: NUR 628: NUR 631: NUR 634

NUR650 Interdisciplinary Anesthesia Nursing III  
0-14 credits  Offered By Announcement Only  
Third and final integration and synthesis course of advanced knowledge and skills of interdisciplinary anesthesia nursing care for complex problems and conditions across the lifespan. With minimal guidance students assume greater responsibility for culturally competent and interdisciplinary anesthesia care.  
PREREQUISITE: NUR 646.
NUR652 Introduction to Clinical Inquiry I
3 credits  First & Second Summer Session
Combines clinical knowledge and hands-on clinical experience in an area of the student's potential research interest. Students will practice under the supervision of an advanced practice nurse in the specialty area. Students are expected to begin the process of identifying clinical research problems. (1:2)
PREREQUISITE: ADMISSION TO THE BSN TO PHD PROGRAM

NUR653 Introduction to Clinical Inquiry II
6 credits  First & Second Summer Session
Combines clinical knowledge and hands-on clinical experience in an area of the student's potential research interest. Students will practice under the supervision of an advanced practice nurse in a specialty area. There will be a focus on health care delivery systems. Students are expected to translate clinical problems into researchable questions. (1:5)
PREREQUISITE: CO REQUISITES: NUR 652, NUR 662, EPS 553, NUR 665, EPS 671

NUR654 The Evolution of Nursing Practice and Applications of Theory in Nursing Practice
3 credits  Spring Semester
This course is an overview of the conceptual foundations of nursing science and nursing practice. Knowledge from basic and applied sciences and ethics as well as the history of the global evolution of nursing practice are examined.
PREREQUISITE: ADMISSIONS TO THE DNP PROGRAM OR PERMISSION OF THE SONHS ASSOCIATE DEAN

NUR655 Health Care Management, Economics, Financing, and Ethics
3 credits  Offered By Announcement Only
This course is an overview of health care management, financing, ethics and core and advanced concepts of health care economics. This course will also examine issues associated with health care management, economics, and ethics.
PREREQUISITE: ADMISSIONS TO THE DNP PROGRAM OR PERMISSION OF THE SONHS ASSOCIATE DEAN

NUR656 International Health
2-3 credits  First & Second Summer Session
This course covers diverse topics that affect the health of the population and advanced practice nursing internationally.
PREREQUISITE: ADMISSIONS TO THE DNP PROGRAM OR PERMISSION OF THE SONHS ASSOCIATE DEAN

NUR657 Population Based Health and Health Care Health Disparities
3 credits  Spring Semester
This course is an overview of knowledge from nursing, public health and other disciplines for population based assessment. The importance of cultural and ethical dimensions in program development is included.
PREREQUISITE: ADMISSIONS TO THE DNP PROGRAM OR PERMISSION OF THE SONHS ASSOCIATE DEAN
NUR658 Structure and Processes in Health Care Organization and Health Care Policy

3 credits  Spring Semester
An exploration of health care organizations and healthcare policy, and how change is effected in both. Health care policy and planning to address health care disparities at the local, state, and federal levels will be explored. Organizational diagnosis, organizational change, and ethical dimension of public policy formulations and implementation will be highlighted.
PREREQUISITE: ADMISSIONS TO THE DNP PROGRAM OR PERMISSION OF THE SONHS ASSOCIATE DEAN

NUR659 Technology in Health Care

0-3 credits  Offered By Announcement Only
An exploration of the various aspects of the evolving technology to improve and transform health care and advanced practice nursing. This course prepares DNP nursing students to design, select and use technology to support, manage, and improve patient care and health care systems.
PREREQUISITE: ADMISSIONS TO THE DNP PROGRAM OR PERMISSION OF THE SONHS ASSOCIATE DEAN

NUR660 Translational Science

3 credits  Fall & Spring Semester & First & Second Summer Session
Emphasis is on translational science which includes organizational readiness and promoting change in health care environment. Focus is on utilizing systematic analysis to identify, plan, execute and appraise best evidence on selected topics.
PREREQUISITE: ADMISSION TO DNP PROGRAM; PERMISSION OF INSTRUCTOR

NUR662 Nursing Epistemology

4 credits  Fall Semester
Focus on historical and philosophical perspectives in the development of knowledge and patterns of knowing with in-depth examination of the evolution of nursing science. Analysis of concepts relevant to nursing phenomena. Approaches to scientific development in nursing with emphasis on theory building and theory generation.
PREREQUISITE: ADMISSION TO PHD PROGRAM

NUR665 Quantitative Research Methods

3 credits  Fall Semester
In-depth exploration of research methods and design for quantitative research in nursing. Emphasis on development of a research problem; quantitative research design from descriptive to randomized clinical trials; epidemiologic designs; threats to validity; sampling and power analysis; measurement including psychometric theory, data collection and management; and interpretation of data. Other topics include ethics, human subjects' protection, and translation of finding into practice.
PREREQUISITE: ADMISSION TO PHD PROGRAM

NUR667 Research Practicum

1 credit  Fall Semester
Student participates in an ongoing research project under the guidance of a faculty member. Conducts the practical aspects of research including: IRB application/continuing reports, data collection and management.
PREREQUISITE: NUR 665, EPS 670
NUR670 Qualitative Methods in Research  
3 credits  
Spring Semester  
Exploration of inductive approaches to research and the use of qualitative methods including phenomenology, ethnography, and grounded theory. The techniques include focus groups, unstructured and structured interviews, and ethno science. Discussion of techniques, analysis, and the ethical and political implications of special problems in qualitative research is also included.  
PREREQUISITE: PREREQUISITE OR COREQUISITE: NUR 662, ADMISSION TO PH.D. IN NURSING OR PERMISSION OF THE INSTRUCTOR.

NUR671 Scientific and Theoretical Writing  
3 credits  
Spring Semester  
Introduction to the process of scientific writing including concept analysis and publication. Critique and respond to own and peers' writing. Challenges of making revisions. Synthesize relevant literature. Other topics include: impact factor, publication process, and techniques of writing.  
PREREQUISITE: NUR 662, NUR 665, NUR 677

NUR672 Capstone I  
0-3 credits  
First & Second Summer Session  
The capstone project is required synthesizing initiative for students to apply theory, supported by evidence and expert knowledge of nursing practice, by completing a scholarly project of the student's or agency's choice. Students may design a practice change imitative under the direction of a faculty member and preceptor. (1:2)  
PREREQUISITE: ADMISSION TO THE DNP PROGRAM OR PERMISSION OF THE SONHS ASSOCIATE DEAN

NUR673 Capstone II  
0-3 credits  
Fall Semester  
The capstone project is a required synthesizing initiative for students to apply theory, supported by evidence and expert knowledge of nursing practice, by completing a scholarly project of the student's or agency's choice. Students may design a practice change imitative under the direction of a faculty member and preceptor. (1:2)  
PREREQUISITE: NUR672

NUR675 Field Project in Qualitative Research  
4 credits  
Fall Semester  
Students conduct a field project using qualitative research methodology and techniques. Seminars related to analysis and interpretation of data are also included.  
PREREQUISITE: NUR 670.

NUR677 Applied Statistics: Analysis of Variance  
3 credits  
Fall Semester  
Overview of analysis of variance (ANOVA) for categorical predictors and continuous outcomes including one-way ANOVA, two-way ANOVA, and ANCOVA. Computer applications doing real data and standard statistical software packages  
PREREQUISITE: MASTER'S LEVEL STATISTICS COURSE E.G. EPS 553, PERMISSION OF INSTRUCTOR
NUR678 Applied Statistics: Multiple Regression
3 credits  Spring Semester
Overview of multiple regression analysis for continuous, categorical, and moderator/mediator variables and interactions. Computer applications using real data and standard statistical software pkgs.
PREREQUISITE: PERMISSION OF INSTRUCTOR

3 credits  Fall Semester
PREREQUISITE: NUR 677-ANOVA; NUR 678-REGRESSION. CO-REQUISITES: NUR 681-MEASUREMENT NURS PHENOMENON, PERMISSION OF INSTRUCTOR.

NUR680 Research Ethics
0 credit  Fall Semester
PREREQUISITE: PERMISSION OF INSTRUCTOR; PH.D. STUDENTS ONLY.

NUR681 Measurement of Nursing Phenomena
3 credits  Fall Semester
Development of instruments to measure a phenomenon of concern within the domain of nursing.
PREREQUISITE: PERMISSION OF INSTRUCTOR

NUR682 Advanced Practice Psychopharmacology
2 credits  Spring Semester
PREREQUISITE: GRADUATE STANDING PERMISSION OF INSTRUCTOR; COREQUISITES: NUR 683; NUR 684

NUR683 Theoretical Bases for Advanced Practice Psychiatric Mental Health Nursing
2 credits  Spring Semester
PREREQUISITE: GRADUATE STANDING PERMISSION OF INSTRUCTOR. COREQUISITES: NUR 682; NUR 684

NUR684 Advanced Practice Psychiatric Mental Health Nursing Therapeutic Interventions
1- 5 credits  Spring Semester
PREREQUISITE: GRADUATE STANDING PERMISSION OF INSTRUCTOR. PREREQUISITES: NUR 682 AND NUR 683

NUR685 Advanced Practice Psychiatric Mental Health Preceptorship 1
4 credits  Fall Semester & First & Second Summer Session
PREREQUISITE: GRADUATE STANDING PERMISSION OF INSTRUCTOR. PREREQUISITES: NUR 682, NUR 683 & NUR 684. COREQUISITES: NUR 686

NUR686 Advanced Practice Psychiatric Mental Health Nursing Preceptorship 2
5 credits  Fall Semester & First & Second Summer Session
PREREQUISITE: GRADUATE STANDING PERMISSION OF INSTRUCTOR. PREREQUISITES: NUR 682, NUR 683 & NUR 684. COREQUISITES: NUR 685

NUR690 Independent Study
1- 6 credits  Fall & Spring Semester
A in-depth study of a specified area in advanced nursing of special interest to the student, under faculty guidance.
PREREQUISITE: PERMISSION OF PROFESSOR REQUIRED BEFORE ENROLLMENT.
NUR697 Selected Topics
0-12 credits  Offered By Announcement Only
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing topics will be shown in class schedule in parentheses after selected topic notation.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR698 Selected Topics
0-6 credits  Fall & Spring Semester & First & Second Summer Session
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing topics will be shown in class schedule in parentheses after selected topic notation.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

NUR699 Special Topics in Nursing Research
1-3 credits  Fall & Spring Semester
Directed or independent research in collaboration with a faculty member providing opportunity for participation in ongoing nursing research. Specific requirements and credit allocation determined by contractual arrangement between student and faculty member.

NUR710 Master's Thesis
1-6 credits  Fall & Spring Semester
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

NUR720 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in NUR 730 (usually six credits). Credit not granted. May be regarded as full-time residence.

NUR725 Continuous Registration--Master's Study
0 credit  Offered By Announcement Only
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.

NUR730 Doctoral Dissertation
1-12 credits  Fall & Spring Semester
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12 credits. Not more than 12 hours of NUR 730 may be taken in a regular semester, nor more than six in a summer session. A student who has passed (a) qualifying examinations, and (b) is engaged in an assistantship, may still take the maximum allowable credit stated above.

NUR750 Research in Residence
0 credit  Fall & Spring Semester
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
SAP503 Czech Republic-Charles University
1-18 credits   Fall & Spring Semester
Czech Republic - Charles University (Grad Level)

SAP699 Study Abroad
1-12 credits   Fall & Spring Semester
In some departments it is possible to earn graduate credits for study taken abroad. Curriculum must be worked out by the student in conjunction with an advisor.
UNIVERSITY INTERNSHIP

UMI605 UNIVERSITY OF MIAMI INTERNSHIP
0-1 credits  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: N/A

UMI610 UNIVERSITY OF MIAMI INTERNSHIP
0-1 credits  Fall & Spring Semester & First & Second Summer Session
