UNIVERSITY OF MIAMI

A private, independent, international university
An equal opportunity/affirmative action employer

An announcement with information on administration, organization, admission and graduation requirements, and the courses of instruction in:

UNDERGRADUATE and GRADUATE STUDIES, 2012-2013

It is the policy of the University of Miami that no person within the jurisdiction thereof shall, on the basis of race, religion, color, sex, age, disability, sexual orientation, veterans status, or national origin, be excluded from, participation in, be denied the benefits of, or be subjected to discrimination or harassment (including sexual harassment) under any program or activity of the University. The University does not intend by this commitment to require compliance with this policy by governmental or external organizations that associate with but are not controlled by the University, except as required by law. The Executive Director of Equality Administration is responsible for coordinating the University’s effort to implement the nondiscrimination policy and Affirmative Action Programs for employees and students. The Executive Director may be contacted at the following address or telephone number: Equality Administration Office - Gables One Tower, Suite 100R; 1320 S. Dixie Highway, Coral Gables, FL 33146; 305-284-3064.

The University of Miami is authorized under Federal law to enroll non-immigrant alien students.

The University reserves the right to change any provision or requirement, including, but not limited to fees and tuition, at any time without notice. Degrees, courses, programs, activities, and like academic or non-academic offerings of the University may also be changed from time to time without notice. The University further reserves the right to require a student to withdraw at any time under University policies, as may be promulgated from time to time. Further, admission of a student to the University of Miami for any semester does not imply that such student will be enrolled in any succeeding academic semesters. It also reserves the right to impose sanctions on any student whose conduct is unsatisfactory. Any admission on the basis of false statements or documents is void when the misconduct is discovered, and the student is not entitled to any credit for work which the student may have done at the University prior to any discipline that may be taken as a result of such misconduct. When a student is dismissed or suspended from the University for cause, there will be no refund of tuition or fees paid. If a dismissed student has paid only a part of his tuition and fees, the balance due the University will be considered a receivable and will be collected.

There will be no refund of tuition, fees, charges or any other payments made to the University in the event the operation of the University is suspended at any time as a result of any act of God, strike, riot, disruption, or for any other reason beyond the control of the University.

The University of Miami is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award the baccalaureate, masters and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of Miami.

THE UNIVERSITY OF MIAMI MISSION STATEMENT

The University of Miami’s mission is to educate and nurture students, to create knowledge, and to provide service to our community and beyond. Committed to excellence and proud of the diversity of our University family, we strive to develop future leaders of our nation and the world.
ACADEMIC PROCEDURES AND INFORMATION - UNDERGRADUATE

While the University makes every effort to provide academic counseling to its students, its basic policy places the responsibility for planning an academic program upon the student.

The University of Miami relies on electronic means (email and myUM accounts) for correspondence with students. Students are required to maintain a working email address and are expected to update their personal biographical information annually via their myUM account. Students who fail to maintain a working email account may not receive critical university information.

Students are expected to familiarize themselves with the requirements of:
- the University,
- the schools in which they are enrolled, and
- their major department.

Requirements refer to those stated in the Bulletin at the time of admission to degree status, unless a student has not been continuously enrolled. In such cases, the Bulletin in effect at the time of re-admission is the one to be used. In such cases, the determination of the Bulletin in effect is made by the readmitting School or College.

Academic core requirements will not be waived for students under any circumstances.

The work of each student is under the supervision of an academic Dean and of the appropriate Scholarship Committee. A student who fails to maintain an adequate academic record may be dismissed from the University.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters. If a student whose record is unsatisfactory is for some reason permitted to continue in attendance, the appropriate scholarship committee or Dean may specify the standard that must be attained, and any other conditions to be met.

A student who graduates and plans to enter a graduate school or professional school at the University of Miami must apply for admission to the appropriate school of the University in accordance with application deadlines of respective schools.

Not all the regulations and procedures described below pertain to the Graduate School, the Law School, and the School of Medicine. The specific regulations of these schools are stated in their Bulletins.

STUDENT-RIGHT-TO-KNOW AND CAMPUS SECURITY ACT

The Student-Right-to-Know and Campus Security Act requires institutions to disclose information about graduation rates and crime statistics to current and prospective students. Students interested in obtaining this type of information should contact the Office of Admission, (305) 284-4323 or go to www.miami.edu/hea.
FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA) (BUCKLEY AMENDMENT)

The purpose of this policy is to assure that students have access to their educational records and to assure the privacy of students by restricting the disclosure of information from education records to those persons authorized under the Act.

The policy is provided to all students in the Student Life Handbook. Copies can also be printed from the website www.miami.edu/hea.

SECURITY OF STUDENT RECORDS

The Office of the Registrar is charged with the responsibility of maintaining the security and integrity of student records. Student records created before 1985 are stored on paper or have been electronically scanned. Those remaining on paper are stored in an off-site location, available only to Registrar personnel. Student records created after 1985 are housed on an electronic database.

In order to maintain confidentially, access to the student record system is limited to university personnel who have a legitimate need for this information. Each user is required to fill out an access form. A user name is created, and each user must also create a password that must be changed every 90 days. Periodic audits of records as well as reviews of who has access to the system are regularly scheduled to ensure a secure environment.

Students are assigned a UM ID number that is unique to them and they are encouraged to use it instead of their social security number. Students are required to provide their student ID or a photo ID when requesting academic record information from this office.

FERPA TRAINING

FERPA, the Family Educational Rights and Privacy Act, provides established guidelines for universities to ensure that students have access to their educational records as well as to ensure the privacy of said records by restricting the disclosure of information from educational records to those persons authorized under the Act. FERPA guidelines must be followed when dealing with the disclosure of student information.

All staff who use the student records system are required to complete an online FERPA tutorial. Periodic reviews are required; failure to complete this tutorial will lock a user out of the system. The Registrar’s Office also offers FERPA information sessions to parents of new students each fall during new student orientation.

STOPS ON STUDENT RECORDS

Schools and colleges, university administrative departments and other student related offices have the ability to put stops on student records. These stops can be financial, academic or disciplinary in nature and may delay a student's ability to register, to receive an official transcript or to receive a diploma. Stops on a student’s record normally require action on the part of the student, i.e., a payment, completion of paperwork, etc. Specific information on a stop and what is required to remove it can be obtained from the office/department that initiated the stop.
ACADEMIC CREDITS

The University operates on the semester system and, for its measure of academic course work, uses academic credits (referred to as semester credits, semester hours, credit hours, hours, or credits).

An academic credit (of work) is given for one 50-minute period a week throughout an academic semester or its equivalent per week for a semester of fifteen weeks or its equivalent in summer session. Two or three laboratory hours each week throughout a semester are considered the equivalent of one lecture hour in counting credits earned in an undergraduate laboratory or studio course.

No grades or credits are given for audited courses.

CHANGE OR DROP OF COURSE

Course changes after the completion of registration must be approved by the student’s academic dean. Forms must be fully processed to make any approved changes official.

Dropping of any course for which the student has registered is official only when the appropriate approvals are obtained and the form has been processed by the Office of the Registrar. Failure to attend classes or merely giving notice to instructors of one’s absence will not be considered as an official withdrawal and may result in failure in the course.

The last day to drop a course or make a change in credit-only option is noted on the Academic Calendar located on the Office of the Registrar’s website at www.miami.edu/registrar. Students enrolled in a course after the withdrawal date must receive a final grade in the course.

CLASS ATTENDANCE AND ABSENCES

Regular and punctual class attendance is vital for all students. Instructors will distribute course syllabi which include policies regarding class attendance and missed or late work. Any student may be dropped from a course or receive a lowered grade for unauthorized absences in excess of those permitted by the instructor. It is each student’s responsibility to know and understand the instructor’s policies. It is also the student’s responsibility to give the instructor notice one week prior to any anticipated absence and to contact the instructor within one week after any unanticipated absence.

All students are responsible for material covered during their absence. However, the instructor must allow each student who is absent for a University-approved reason either the opportunity to make up, or to be excused from, work missed, without any reduction in the student’s final course grade as a direct result of such absence.

Other than absences for a University-approved reason, the instructor determines whether or not an absence is for an acceptable reason and whether or not students shall have the opportunity to make up missed work. If the instructor does not recognize the reason as acceptable, the student may appeal to the chair of the department in which the course is offered.
The following constitute University-approved reasons for absences:

1. Participation in an activity approved by the Academic Deans Policy Council, such as musical and debate activity, R.O.T.C. function, or varsity athletic trip; participation in a special academic activity such as a field trip or other special event connected with academic coursework. Verification of a student’s participation shall be issued by the sponsor when authorized by the Office of the Executive Vice President and Provost.

2. Observance of a religious holy day as described in the Religious Holy Day Policy, below:

**Religious Holy Day Policy**

The University of Miami, although a secular institution, is determined to accommodate those students who wish to observe religious holy days. It seeks to reflect its awareness of and sensitivity to religious holy days whenever possible when scheduling University activities. The following provisions are meant to apply equitably to all religious groups and to provide opportunities to all to meet their religious obligations.

a. Except as specifically provided to the contrary, this policy is binding on all students in undergraduate programs. Schools offering graduate or professional programs, including undergraduate professional programs, are strongly encouraged to adhere to these policies to the maximum extent practicable.

b. Any student absent from class in observance of a religious holy day shall not be penalized in any way for an examination or assignment missed during the period of absence. Absence in observance of a religious holy day does not relieve students from responsibility for any part of the course work required during the period of absence. Students who are absent on days of examinations or class assignments shall be offered a reasonable opportunity to make up the work without penalty, if the student previously arranged to be absent. Nothing in this policy shall preclude faculty members from limiting the number of student absences to a reasonable number of absences for any reason. The faculty member has discretion to determine how the make-up obligation will be fulfilled. A faculty member who penalizes a student contrary to these provisions may have committed unprofessional conduct, and thus may be subject to a complaint to the Committee on Professional Conduct under the provisions of Section B4.9 of the Faculty Manual.

c. It is the student’s obligation to provide faculty members with notice of the dates they will be absent due to observance of religious holy days, preferably before the beginning of classes but no later than the end of the first three class days. For religious holy days that fall within the first three class days, students must provide faculty members with notice no later than two class days before the absence. Missing a class due to travel plans associated with a particular religious holy day does not constitute an excused absence. Absences due to observance of religious holy days that are not pre-arranged with the relevant faculty member within the first three class days may be considered unexcused, and the faculty member may therefore prevent the student from making up examinations or assignments missed during the period of absence.
d. Faculty members are encouraged to anticipate days when a substantial number of students will be absent for observance of religious holy days and should avoid scheduling examinations and assignment deadlines on those days. Faculty members are expected to reasonably assist students in obtaining class information the student missed during the period of absence in observance of a religious holy day. In that regard, faculty members are urged to allow taping or recording of the class session, with the reproduction limited to the student’s personal use, when a student misses a class due to observance of a religious holy day. To assist in identifying religious observance days, faculty members are encouraged to consult the illustrative list provided in the Interfaith Calendar (http://www.interfaithcalendar.org). Faculty members are urged to remind students of their obligation to inform faculty members within the first three class days of any anticipated absences due to observance of religious holy days and should include that information in the syllabus or course requirements document for that course.

**COURSE-NUMBERING SYSTEM**

The following course-numbering system is used:

Courses in the 100 series are primarily for freshmen.
Courses in the 200 series are primarily for sophomores.
Courses in the 300 series are primarily for juniors.
Courses in the 400 series are primarily for seniors.
Courses in the 500 series are open only to qualified undergraduates and graduate students.
Courses in the 600 and 700 series are open only to graduate students.

Courses in some departments, with the specific numbers 100, 200, 300, 400 are offered, in most instances, on an experimental or trial basis. When listed in myUM’s Course Offerings, a more descriptive title will normally be attached.

**CREDIT FOR SERVICE EXPERIENCE**

Veterans of the military services may make application for academic credit for schooling received while in the armed forces. Credit may be awarded for work that the American Council on Education Guide regards as college level. Students must have credits approved by their departmental chairperson.

Credit for military service and experience is usually in the elective area and may not take the place of subjects required for graduation. Such work is not assigned quality points and is not included in quality point computations.

**CREDIT ONLY OPTION**

The credit only option has been established to encourage students to explore academic areas outside their major and minor fields of concentration. Students may use this option with free electives and receive a CR (Credit Received) or NC (No Credit). These courses become part of a student’s record, but they do not count in the grade point average as computed by the University of Miami.
Eligibility

To be eligible to enroll for courses under the CR/NC option, a student must:

1. hold the standing of Sophomore or above, and, if a transfer, must have completed one semester of residency at the University of Miami;
2. at the time of registration have a minimum cumulative grade point average of at least 3.00;
3. elect the CR/NC option within two weeks following the last day of registration for Fall and Spring semesters. Election of CR/NC options for Summer Sessions must occur no later than the fifth class day following the last day of registration. No changes except withdrawals from the course are permitted after this time.

Regulations and Restrictions

1. Eligible students may take one course per semester for credit only, to a maximum of 9 credits.
2. Only free electives may be taken under this option. Free electives are defined as courses not taken to fulfill the requirements for the major, minor, or general education requirements (including prerequisite course work) of the University and the individual schools.
3. ENGLISH 105 and ENGLISH 106 cannot be taken for credit only.
4. Grading standards for the credit only option are the same as for students who register for the course under the regular grading system. Letter grades will be submitted by instructors to the Office of the Registrar. The Office of the Registrar will change all grades A through C (including “C-”) to CR (Credit Received) for those enrolled under the CR/NC option.
5. A grade of NC (No Credit) will be recorded by the Office of the Registrar for all grades of D and F. The student will not receive credit hours or quality points for the grade of NC.
6. Should a student subsequently change his/her major, free electives taken for credit only prior to the declaration of this major may be counted toward fulfilling major, minor, or general education requirements at the discretion of the department chairman and the academic dean.

FINAL EXAMINATION POLICY

Final Examinations may not be given during a regularly-scheduled class period.

No examination shall be permitted during the reading period.

Final Examinations may be rescheduled only with the permission of the dean.

No student shall be required to take more than two final examinations in a twenty-four hour period. A student having three or more final examinations scheduled during a twenty-four hour period may request the instructor of the course most easily rescheduled (normally the course with the smallest enrollment) to reschedule the examination for that individual. The request shall be made no later than two weeks before the last class day.

A student who has a conflict between a final examination and a religious observation may request that the instructor reschedule that student’s examination. The request shall be made no later than two weeks before the last class day.
For the resolution of any problem pertaining to the scheduling of final examinations, a student should consult with the following entities or persons in this order: the relevant instructor, the department chair, the Dean or designee. If the matter cannot be resolved at the school or college, the student should contact the Office of the Provost.

REGISTRATION

Registration dates are shown on the University Academic Calendar, and all students are expected to register on these days. If a student is permitted to register late, a fee is charged.

CANCELLATION OF COURSES

Students who select their courses and fail to make financial arrangements with the Office of Student Account Services (OSAS) will have their course schedules canceled. Once schedules are canceled, students are charged a reinstatement fee in addition to their other fees in order to reinstate their classes. These fees can only be waived by a staff member from OSAS or the Office of Financial Assistance Services. Reinstatement of classes can only occur after the cancellation stop has been removed due to payment of financial obligations.

REPEAT RULES

A student may repeat a course, but the repetition will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the chair of the department in which the course is offered or, in the case of an undepartmentalized school, by the dean.

ILLEGAL REPEAT

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

GENERAL REPEAT RULE

- If the initial grade is D+ or lower (or a C- in cases where an academic unit requires a C or higher), both the initial grade and the repeat grade are included in the computation of the student’s cumulative grade-point average (CGPA).

- If the initial grade is a D or D+ (or a C- in cases where an academic unit requires a C or higher) and the repeat grade is passing, the number of credits required for graduation will be increased by the number of credits repeated.

- Registrations that involve repeating a course in which a grade of C or higher (or C- in cases where an academic unit does not require a C or higher) has already been earned do not earn quality points or credit hours, nor count as credits attempted.

- Courses repeated after graduation will be posted to the transcript showing the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.
FRESHMAN REPEAT RULE

- A student may elect to repeat up to two courses that were taken at the University of Miami within that student's first two semesters of college work and in which the student earned a grade of D or F. Each repeated course must be taken at the University of Miami, must be the same course as the course initially taken, and must be completed within 12 months after the end of the semester (or summer session) in which the initial course was first taken.

- No course may be repeated more than once under this rule. A course repeated more than once under the University’s General Repeat Rule will not qualify under the Freshman Repeat Rule.

- Enrollment for a second time in a course constitutes a repeat of that course for the purposes of this rule, unless the student withdraws from the course on or before the University’s published Last Day to Drop a Course date.

- For each repeated course, only the second grade (whether higher, or lower, or the same as the first grade) will be used in the computation of the student's CGPA. The initial course will not count as credits attempted or earned, although the initial course grade will remain on the student’s permanent record.

- Students who plan to apply to graduate and/or professional school should be aware that such institutions may recalculate the CGPA to include the initial grade earned before the repeat.

SCHEDULES

Fifteen or sixteen semester hours constitutes a normal schedule at the University. Academic deans and advisors will determine the appropriate credit load for their students. (A schedule of charges for credits is found in the Financial Payment Policies section of this Bulletin.) The schedule of any student whose outside interests cause unsatisfactory scholastic attainment may be reduced by the dean.

TEMPORARY/PERMANENT WITHDRAWAL FROM THE UNIVERSITY

In order to withdraw officially from the University, a student must notify the Office of the Registrar and complete the withdrawal process. Veterans and children of deceased or totally disabled veterans attending the University as students under the government's educational benefit bills must also be cleared by the Veterans Affairs Certifying Official.

Varsity athletes or any athlete registered with the department of Athletics must obtain approval and be cleared by the Athletic department prior to any change in their registration status, including withdrawal from the university.

During the academic year, tuition will be refunded on a prorated basis depending on the date that is noted as the 'Total Withdrawal Date'. Tuition will be refunded on a prorated basis through 60 percent of the semester.

Dropping courses in a summer session, thereby reducing a student credit-hour load to zero, is not construed as a formal withdrawal from the University.
Title IV financial aid and tuition will be refunded on a pro rata daily basis through 60 percent of the semester. This date is determined based on the student notifying the Office of the Registrar of his/her intent to withdraw. If the student fails to notify the Office of the Registrar, federal guidelines for determining refunds will be followed. Please see the Refund Policy under the Financial Payment Policies section of this Bulletin.

MILITARY WITHDRAWAL

a. On the recommendation of the Dean of the school, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may either be awarded credit (CR) or an academic grade for any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

b. Credit granted for courses under this policy should count toward graduation.

c. There should be no refund of tuition for courses for which credit has been awarded. Refunds for courses not awarded credit should be on the same basis as complete withdrawals for military service.

d. The above recommendations are procedures for determining the awarding of credit and do not release the student from the usual withdrawal procedures.
GENERAL EDUCATIONAL REQUIREMENTS

PHILOSOPHY

The University of Miami and its faculty are committed to developing and nurturing within our students the ability to demonstrate critical thinking skills, communicate effectively, contribute knowledge, understand perspectives that differ from their own, and develop skills necessary to become effective leaders and active participants in the global society.

As an institution of higher learning in an increasingly diverse and global community our goals are to produce graduates who have been exposed to a broad spectrum of educational opportunities and to prepare them for successful participation in the world. The University’s General Education Requirements consist of coursework taken both before and in addition to students’ specialized study within their areas of concentration. The aims of the General Education Requirements are designed to ensure that graduates of the University will have acquired essential intellectual skills and exposure to a range of intellectual perspectives and academic disciplines. The University’s General Education Requirements focus on two student learning areas: 1) proficiency in English composition, writing, and mathematics and 2) knowledge of the natural world, people and society, and arts and humanities. By helping students strengthen their abilities to think with both words and numbers, they will develop the analytical skills basic to nearly all fields of advanced learning but exclusive to none. By deliberately introducing students to various intellectual achievements in major areas of human inquiry and creative endeavor, the University of Miami’s General Education Requirements provide a broad intellectual backdrop to students’ more focused studies in their majors and minors. Whereas the requirements of majors specified by Schools and Colleges within the University emphasize depth of learning, the General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge.

Some schools and colleges may designate specific coursework to fulfill the areas of knowledge requirements listed below; students should consult the specific GER requirements for their school or college in the appropriate section of this Bulletin.

These requirements may be satisfied by courses taken for a letter grade, or by credits earned through Advanced Placement (AP) or International Baccalaureate (IB) examinations taken in high school. These credits may be applied to the 120 credits required for graduation.

AREAS OF PROFICIENCY

Proficiency requirements are intended to ensure that students either already possess, or will develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

1. English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. It is the University’s expectation that our students become adept at using the English language as an effective tool for communication. Effective writing skills are representative of the educated person because they are instruments to advance ideas efficiently and persuasively. During their first year of study, students fulfill this requirement by satisfactorily completing English 105 and English 106 or the equivalent. Appropriate
Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the English 105/106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit in, ENG 105.

**Students will be able to:**
- Gather information, synthesize data, compare various points of view, and present the results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

2. **Writing Across the Curriculum (W) 5 courses**

In addition to English 105/106, students must complete five (5) courses designated as Writing Across the Curriculum (W) courses. The purpose of these courses is to help our students refine their writing abilities so that they are able to communicate their ideas clearly and effectively through the various styles of writing appropriate to the academic fields of their majors and minors. Courses designated as writing courses ("W" courses) require a substantial amount of writing and the preparation of papers that are corrected for diction, syntax, style, and content. Some courses satisfying this Writing Across the Curriculum requirement may simultaneously fulfill Areas of Knowledge requirements (described below).

**Students will be able to:**
- Demonstrate ability to write persuasively, using tools of argumentation and advocacy appropriate to subject, audience, and occasion.

3. **Mathematics**

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods in order to solve problems. The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by satisfactorily completing a course in mathematics numbered above MTH 101 (excluding MTH 107), or MAS 110, or an approved course in statistics. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics during Orientation.

**Students will be able to:**
- Select quantitative tools appropriate for the solution of problems.
- Use quantitative tools appropriate for the solution of problems.
- Interpret quantitative data in an appropriate manner for solving problems.

**AREAS OF KNOWLEDGE**

These requirements are designed to help students understand and appreciate the intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements students will explore the natural world, examine human development and behavior, and appreciate creative expression in the arts,
literature, and philosophy. Courses satisfying these requirements are identified in the Bulletin under the Requirements for Graduation sections for each school or college.

1. Natural World (formerly Natural Sciences) - 6 credits
2. People and Society (formerly Social Sciences) - 6 credits
3. Arts and Humanities - 12 credits

Schools and colleges that do not have a language requirement may allow their students to satisfy the humanities requirement by taking a modern language course numbered 101-212 or Latin or Greek, so long as the language selected differs from the student’s native language, and if, when beginning with a 101-level course, they also take the 102-level course in the same language.

No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement. There are pre-requisites for most courses above the 100-level.

The following general educational requirements are designed for general reference only. Please check with your advisor or the advising office in your school or college for specific requirements.

Natural World

The University believes a comprehensive curriculum maximizes our students’ capacity to understand the natural world through experimentation, observation, and quantitative analysis. Our purpose is to nurture our students’ curiosity regarding the natural world through the critical analysis of data as well as the evaluation of research. Students can satisfy the course requirements by selecting courses in Biology, Chemistry, Ecosystems Science and Policy, Geological Sciences, Marine Science, Physics, and Physical Science, as well as Anthropology 203, Geography 120, and Freshman Seminars in the Natural Sciences (FNS 190-199).

Students will be able to:
- Demonstrate ability to use experiment and observation quantitatively in order to analyze the natural world, to draw conclusions about it, and to understand modern scientific theories.

People and Society

This area of knowledge aims to help students understand and critically evaluate the organization of society and the patterns of social change, both in the past and in the contemporary world. Courses in the following areas may be used to fulfill this requirement: Africana Studies (AAS); American Studies (AMS); Anthropology (except APY 203); Economics (ECO); Education and Psychological Studies (EPS); Geography and Regional Studies (except GEG 120); International Studies (INS); Judaic Studies (JUS); History (HIS); Political Sciences (POL); Psychology (PSY); Sociology (SOC); Teaching and Learning (TAL); Women’s and Gender Studies (WGS), and the following courses: Broadcasting and Broadcast Journalism (CEM 102); Mass Media Communication in Society (COM 101); Communication Theory (COM 110); Interpersonal Communication (COS 112); Nonverbal Communication (COS 118); Political Communication (COS 336); Persuasion (COS 472); Freshman Seminars in the Social Sciences (FSS 190-199).
Students will be able to:

- Critically evaluate the organization of society both in the past and in the contemporary world.
- Critically evaluate patterns of social change, both in the past and in the contemporary world.

Arts and Humanities

The arts and humanities engage students in the study of some of the most enduring and influential works of art, imagination, and culture. Courses in this area help students learn to understand the deep insights and culturally formative works of philosophers, poets, novelists, artists, musicians, theologians, and playwrights. These courses will provide instruction and guidance to cultivate students’ abilities to interpret and critically evaluate the creative products of human expression. Courses in the following areas may be used to fulfill this requirement: Architecture; Music; Art and Art History; Theatre Arts; Motion Pictures and Photography; English (200-level or above); Modern Languages and Literature (300-level or above); Philosophy; Religious Studies; and the following courses: Public Speaking (COS 211); World History of the Dance (DAN 250); Freshman Seminars in the Arts and Humanities (FFA, FLT, FPR 190-199)

Students will be able to:

- Apply appropriate vocabulary and concepts for the description and analysis of artistic, literary, historical and philosophical or religious works.
- Interpret the creative products of human expression.
- Critically evaluate the creative products of human expression.

Assessment of General Education Competencies

All University of Miami students will be required to participate in a formal assessment of the General Education competencies at two points during their academic career: upon entry to UM and prior to graduation. Results will be used by the administration and faculty to ensure the continuous improvement of the educational experience provided to our students.
ACADEMIC

ACADEMIC WARNING REPORT

Academic Warning Reports are sent to students who are doing D or F work in any course before the last day to drop a course. Faculty also have the option of providing students with constructive feedback relating to their attendance and the quality of their work. Academic Warning Reports are due on the 30th class day.

ACADEMIC STANDING, PROBATION, AND DISMISSAL

At the end of each semester the University shall determine whether a student is in Good Academic Standing, on Academic Probation, or subject to Academic Dismissal. Some schools and colleges may have exceptions to the Good Academic Standing, Academic Warning, Academic Probation and Academic Dismissal policies listed below.

Good Academic Standing

To be in Good Academic Standing a student must not be on Academic Probation or subject to Academic Dismissal.

Academic Warning

A student whose semester grade-point average (SGPA) or cumulative grade-point average (CGPA) falls below 2.0 shall receive an Academic Warning. All students who receive an Academic Warning must meet with their academic advisor prior to the following semester. The advisor may require a reduced course load.

Freshmen who receive a mid-term grade of D or F in any course shall receive an Academic Warning and must meet with their academic advisor within two weeks of the distribution of mid-term Academic Warnings.

Academic Probation

Students other than first-semester freshmen whose UM cumulative grade-point average (CGPA) in University of Miami courses is below the following levels shall be placed on Academic Probation.

<table>
<thead>
<tr>
<th>Credits earned*</th>
<th>CGPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 33 credits</td>
<td>1.7</td>
</tr>
<tr>
<td>33-64 credits</td>
<td>1.8</td>
</tr>
<tr>
<td>65-96 credits</td>
<td>1.9</td>
</tr>
<tr>
<td>More than 96 credits</td>
<td>2.0</td>
</tr>
</tbody>
</table>

* Total credits earned including work taken elsewhere and accepted by the University of Miami.

First-semester freshmen who have a semester grade-point average below 1.3 shall be placed on Academic Probation. In addition, students who fail to make satisfactory progress toward meeting the degree requirements specified by their School or College may be put on Probation by the Academic Standards Committee of the School/College. Students on
Academic Probation must meet with their academic advisor prior to the following semester and shall be restricted to a 13-credit load.

**Academic Dismissal**

A student who remains on probationary status after two consecutive semesters on Academic Probation shall be subject to Academic Dismissal. A student who has been on Academic Probation for one semester and has a CGPA below 1.0 shall also be subject to Academic Dismissal. The decision to dismiss shall be made by the Academic Standards Committee of the School or College in which the student is enrolled. If a decision is made not to dismiss, the student shall be on Academic Probation.

**APPEALS AND READMISSION**

Students who wish to appeal their Academic probation or dismissal for academic reasons, must do so in writing to the School or College Academic Standards Committee within thirty days of the notice of dismissal. Those who have been dismissed for academic reasons shall not be considered for readmission to any school or college at the University until at least two regular semesters have elapsed since their dismissal.
Faculty Senate Student Affairs Committee Standard Academic Appeals Process

The Faculty Senate Student Affairs Committee (FSSAC) has responsibility for undergraduate student academic appeals. The FSSAC includes faculty representatives from all undergraduate schools as well as three non-voting *ex officio* representatives: a graduate and undergraduate student representative and the University ombudsperson. The FSSAC reviews undergraduate student academic appeals that have not been resolved at the department, school, or college levels. As noted in section II below, the FSSAC hears cases only after they have gone through the departmental and college process. The processes are the same for grade and non-grade appeals except as noted below.

I. Time Constraints

Appeals must be filed within a year of the occurrence of the academic action resulting in the appeal and prior to the completion of all degree requirements or withdrawal from the University. Exceptions to this deadline may be permitted by the FSSAC for good cause.

Each level of appeal should aim to review the appeal and arrive at judgment within a two month period from the date the appeal reaches them. The entire process should be completed within one year.

II. Order of Appeal

A student appeal regarding a faculty or administrative academic action must be addressed to the following entities or persons in this order:

A. The faculty member or administrator responsible for the course, program, or activity.

B. The department/program chair/director or administrative superior of the faculty member or administrator.

C. The Dean or designee of the school or college offering the course, program or activity.

D. If the school, college or administrative unit has a committee constituted to hear student appeals, that committee must be consulted before proceeding to the next level.

E. The ombudsperson. The student is to provide the materials listed in Section III below to the ombudsperson who will review the merits of the appeal, and attempt to resolve the matter. The ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by the FSSAC.

If the matter is the appeal of a final grade, and only after all the other steps are taken, the ombudsperson may refer the matter to the Provost who will decide whether or not to refer the appeal to the FSSAC.

For a non-grade-appeal, the student has the final authority to decide whether to take the appeal to FSSAC. If s/he chooses to do so, the ombudsperson shall forward the appeal and the accompanying documentation to the FSSAC via the Faculty Senate Office.
F. The Provost may request that the FSSAC review an appeal. If, but only if, s/he does so, the FSSAC shall have jurisdiction to review a grade-related appeal.

1. As part of the request, the Provost shall forward to the FSSAC, via the Faculty Senate office, the materials submitted by the student as indicated in Section III, below.

2. The FSSAC will review the student's written appeal (see section III below), confer with the appropriate faculty, administrators, and others as it deems necessary in making its recommendation to the Provost. The FSSAC may request an interview with the student, additional information or access to records, interviews with relevant faculty or administrators, or additional information or access to records kept by faculty or administrators.

3. The FSSAC will communicate its findings and recommendations to the Provost. Copies shall be provided to the Faculty Senate.

G. The final decision with respect to the grade-related appeal will be made by the Provost and communicated to the student in writing. Copies shall be provided to the Faculty Senate Office and to the Chair of the FSSAC.

H. For non-grade-related academic appeals:

1. The FSSAC shall act upon those appeals and report its findings and decision to the Provost. Copies shall be provided to the Faculty Senate.

2. The Provost shall communicate the decision of the FSSAC to the student in writing. Copies shall be provided to the Faculty Senate.

III. Materials for an Appeal

When bringing an appeal, the student must state in writing issues s/he wishes to have considered. The appeal must include:

A. An appeal letter clearly stating the conditions as seen by the student, and offering reasons for granting the appeal.

B. The appeal letter must indicate if the student wishes to make a personal appearance and, if so, the reasons why the appearance is necessary.

C. Documents of support (e.g., examinations, term papers, syllabi, or medical documentation of illness) that the student wishes to have examined.

D. All written decisions made at earlier levels of the appeal by individual faculty/administrators, departments/programs/administrative units, college or school committees, and deans which are available to the student or in the student’s possession.

IV. Other Notes and Special Conditions

A. If the appeal is based on or related to a charge made by the student of discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, age, or handicap, a representative of the appropriate University office will be contacted and, as appropriate, consulted in the appeal process.
B. If the appeal is based on or related to a disability:

1. The ADA Coordinating Committee shall serve in an advisory capacity.

2. The student is to include in the materials provided, the appropriate forms from the Office of Disability Services documenting:
   a. An evaluation of the disability
   b. Recommendations related to the disability

3. The FSSAC does not consider appeals based upon the grant, denial or modification of an accommodation by the Office of Disability Services. Instead, any such appeal is as prescribed by the Office of Disability Services Grievance Procedure only.
# THE GRADING SYSTEM

The following symbols are used:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent attainment</td>
</tr>
<tr>
<td>B</td>
<td>Good attainment</td>
</tr>
<tr>
<td>C</td>
<td>Fair attainment</td>
</tr>
<tr>
<td>D</td>
<td>Poor attainment (earns credit but may not fulfill requirement for a major)</td>
</tr>
<tr>
<td>F</td>
<td>Failure (effective Fall 1995)</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped on or before the last day for withdrawing from classes as published in the official calendar of the University. Credit can be earned only by successful repetition of the course.</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete work in passing status with the instructor’s permission to complete the course. An “I” will be assigned only if the instructor is satisfied that there are reasonable non-academic grounds for the student’s incomplete work. <strong>An &quot;I&quot; is not intended to be assigned in order to permit a student to repeat a course without registration or to permit a student to do additional work in order to improve upon grades earned during the semester.</strong> The student who receives an “I” must complete the course with a passing grade within the time frame specified by the professor of the course but not longer than the end of one calendar year, or prior to graduation, whichever occurs first. An Academic Dean may approve an extension initiated by the course instructor. An “I” not completed prior to the student’s graduation shall be changed to an “IE” or “IF” by action of the student’s Academic Dean.*</td>
</tr>
<tr>
<td>IP</td>
<td>Denotes in progress grade assigned upon satisfactory completion of the first-semester of a two-semester sequence, with the final grade for both courses to be submitted at the end of the second semester of the sequence. Please note that all “IP’s” must be converted to a letter grade or “IF” at graduation. “IP” will also be converted to “IF” upon any departure from the University for a period in excess of one year.*****</td>
</tr>
<tr>
<td>IF</td>
<td>Symbol indicating that an “I” grade was not appropriately completed.**** The symbol “IF” is equivalent to an “F” when computing a student’s average.</td>
</tr>
<tr>
<td>CR</td>
<td>Grade signifying that credit only is awarded based on a “C” average or better.</td>
</tr>
<tr>
<td>NC</td>
<td>Grade signifying that no credit is awarded based on a course average below a grade of “C”.</td>
</tr>
<tr>
<td>NG</td>
<td>Symbol assigned by the Office of the Registrar indicating that the instructor has not reported the student’s grade. For a student to receive credit for the course, the instructor must report a passing grade prior to the student’s graduation, or by the end of one regular academic semester, whichever comes first. An Academic Dean may approve an extension initiated by the course instructor. An “NG” not replaced by a passing grade, or by a “W”, prior to the student’s graduation shall be changed to an “F” by action of the student’s Academic Dean.***</td>
</tr>
</tbody>
</table>

---

* **An "I" is not intended to be assigned in order to permit a student to repeat a course without registration or to permit a student to do additional work in order to improve upon grades earned during the semester.**

** The student who receives an “I” must complete the course with a passing grade within the time frame specified by the professor of the course but not longer than the end of one calendar year, or prior to graduation, whichever occurs first. An Academic Dean may approve an extension initiated by the course instructor. An “I” not completed prior to the student’s graduation shall be changed to an “IE” or “IF” by action of the student’s Academic Dean.*

**** The symbol “IF” is equivalent to an “F” when computing a student’s average.

***** “IP” will also be converted to “IF” upon any departure from the University for a period in excess of one year.

****** Please note that all “IP’s” must be converted to a letter grade or “IF” at graduation.

******* “IP” will also be converted to “IF” upon any departure from the University for a period in excess of one year.

******** An Academic Dean may approve an extension initiated by the course instructor.

********* An “NG” not replaced by a passing grade, or by a “W”, prior to the student’s graduation shall be changed to an “F” by action of the student’s Academic Dean.***
GRADE POINT AVERAGE

The grade point average is used to determine:

- class rank
- graduation and honor eligibility
- good standing, probation, and dismissal status
- scholarship eligibility

Your official grade point average is based only on the work you have completed at the University of Miami. The only exception to this policy is for determining whether a student qualifies for honors or has met the minimum grade point requirement at the time of graduation. For graduation purposes, cumulative grade point average is defined as either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere whether or not the transfer work is accepted toward a degree at the University of Miami, whichever is lower.

Quality points per credit are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>1.30</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>E (Prior to Fall 1995)</td>
<td>0.00</td>
</tr>
<tr>
<td>IE**</td>
<td>0.00</td>
</tr>
<tr>
<td>F (Effective Fall 1995)</td>
<td>0.00</td>
</tr>
<tr>
<td>IF</td>
<td>0.00</td>
</tr>
</tbody>
</table>

Courses marked with an “IE” or “IF” count as credit attempted but are not counted in credits earned and do not carry quality points.*** Credits marked CR are counted as credits earned but are not counted in credits attempted and do not carry quality points. Courses marked with the symbols I, IP, W, NC, and NG do not carry credits attempted, credits earned, or quality points.

The grade point average is determined by dividing the total quality points earned by the total credits attempted.

Military service credit, some foreign university credit, correspondence course credit, credit by examination, etc., are not awarded quality points and do not enter the computation of the grade point average.

HONOR CODE

The Honor Code, initiated at the request of the Undergraduate Student Body Government, ratified by student referendum, approved by the Faculty Senate, by the President of the University, and administered by students, protects the academic integrity of the University of Miami by encouraging consistent ethical behavior among its undergraduate students. The Code provides standards that prohibit all forms of scholastic dishonesty, including cheating, plagiarism, collusion, and falsification or misrepresentation of experimental data. The Code covers all written and oral examinations, term papers, creative works, assigned computer related work, and any other academic work done at the University by an undergraduate student.

All undergraduate students are responsible for reading, understanding, and upholding the Honor Code. Signed pledges are required for written work submitted for evaluation, but the absence of a signed pledge does not free a student from the ethical standards required by the Code. Procedures for dealing with infractions of the Code, including provisions for appeals, are printed in the text of the Honor Code. Copies may be obtained from the Office of the Dean of Students or from the office of the Undergraduate Student Body Government, or on-line at www.miami.edu/honor-council.

In keeping with the traditional prerogatives of university faculties, nothing in the Code infringes on the faculty’s assignment of grades undertaken in a class. Instructors are informed when students have been found guilty of infractions involving their classes. Courses in which students have been failed for academic dishonesty may neither be dropped nor repeated under the terms of the freshman repeat rule.

The Dean’s List

The Dean’s List is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained high scholastic achievement for the semester. To attain the Dean’s List, a student must, for the semester:

1. have registered for and have completed 12 or more graded credits (excluding the credits earned in courses taken for credit only);
2. have attained a quality point average of 3.50 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Dean’s List will be announced by each college and school at the end of the semester. The Office of the Registrar will post this achievement to the student’s permanent record.

The Provost’s Honor Roll

The Provost’s Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained a high scholastic achievement for the semester. To attain the Provost’s Honor Roll, a student must, for the semester:

1. have registered for and have completed 12 or more graded credits (excluding the credits earned in courses taken for credit only);
2. have attained a quality point average of 3.75 or higher for the semester;
3. have no courses with pending grades (I or NG).
The Provost’s Honor Roll will be announced by the Provost’s Office. The Office of the Registrar will post the achievement to the student’s permanent record, and distribute the Provost’s Honor Roll Certificate.

The President’s Honor Roll

The President’s Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained the highest possible scholastic achievement for the semester. To attain the President’s Honor Roll a student must, for the semester:

1. have registered for and completed 12 or more graded credits (excluding credits earned in courses taken for credit only);
2. have attained a quality point average of 4.0 for the semester;
3. have no courses with pending grades (I or NG).

The President’s Honor Roll will be announced by the Office of the Registrar who will post the achievement to the student’s permanent record, and distribute the President’s Honor Roll Certificate.
GRADUATION

DIPLOMAS AND TRANSCRIPTS

No diplomas or official transcripts are released from the Office of the Registrar without the approval of the Office of Student Account Services.

Official transcripts are issued only upon receipt of a secure electronic request through a student’s myUM account or a written request from the student and upon payment of the appropriate transcript fee.

Unofficial transcripts are available free of charge on myUM or for a fee if ordered in the Office of the Registrar, 121 UC. Those ordered in the Office of the Registrar will be available for pick-up within one week after the request is submitted.

GRADUATION AND DEGREES

It is the responsibility of the student to be sure he/she makes satisfactory progress toward, and fulfills requirements for, the degree he/she seeks. He/she may obtain help in the office of his/her Academic Dean.

To receive a Bachelor’s degree from the University, the student must earn at least 120 semester hours of credit (more in some schools), with a C average (2.0) or better as well as a C average for all work done at the University of Miami.

Students must also meet all of the degree requirements of their respective schools and should not expect requirements in composition, mathematics, foreign languages, or other subject areas to be waived for any reason.

- Each student must complete the final 45 credits that are applied to his or her baccalaureate degree in residence at the University of Miami.
- In addition, each student must complete at least half of the credits specified for his or her major in residence at the University of Miami.
- Not more than 30 hours of correspondence work and extension work combined will be accepted toward a degree, and neither correspondence nor extension work may be credited as a part of the last 45 hours of the student’s program.
- Not more than 30 hours of credit based on military experience will be awarded toward the degree.
- Credits earned in a manner other than by course registration, i.e. proficiency examination, CLEP, placement tests, etc., may not be used to meet the final 45 credit hour residency requirement, however such credit by examination may be earned while the student is enrolled in the courses needed to meet the final 45 credit-hour residency requirement.

Dual Degree

- To obtain two different undergraduate degrees, a student must complete all the requirements for each degree.
- A second undergraduate degree on the same level requires a different major and a different minor.
- If the degrees are in two different schools, a student must meet the requirements with distinctly different majors and minors, wherever applicable, in each school.
Students must obtain approval from the Office of the Senior Vice Provost and Dean of Undergraduate Education to pursue dual degrees in different schools.

As a general rule, college credits more than 12 years old are not recognized for degree purposes. Students in this category should consult their academic deans. A student must apply for graduation on myUM during the semester in which they expect to graduate.

A diploma must be issued in the name on the student’s academic record. Addition or omission of a middle name is acceptable. The addition of a middle name will be acceptable only as it appears on the student’s application for admission. If the middle name is not on the application or if the student wants another version, documented proof of a legal name change must be presented to the Office of the Registrar located in the University Center, Room 121.

The last date on which application may be made for each graduation period is published in the Academic Calendar. The academic deans are the only officers authorized to approve placing the student’s name on the candidate degree list.

GRADUATION HONORS

University Honors (summa cum laude, magna cum laude and cum laude) will be determined by a minimum GPA unique to the school or college from which the student is graduating.

The GPA required will change each academic year and will be based on the cumulative GPA of the previous year’s graduating class.

Visit the Honors Program and Office of Academic Enhancement website at www.miami.edu/honorsprogram for specific GPA requirements each academic year to determine eligibility for graduation with University Honors.

The top 5% of the graduating class will receive summa cum laude within each individual school or college; the next 10% will receive magna cum laude, and the next 10% cum laude.

Eligibility for University honors for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

A student must meet the required GPA by the completion of the final semester within his/her school or college to be eligible to graduate with the honor.
STUDENT STATUS

ACADEMIC BANKRUPTCY

Students entering college sometimes perform at an unacceptable academic level. They either drop out or are dismissed. Some individuals with this experience re-evaluate their educational goals and desire to return to college. Their academic record, however, may present an insurmountable obstacle. In order to be considered for academic bankruptcy, a student’s combined college grade point average must be below 2.00 as calculated by the Office of Admission.

Undergraduate students in this category who want the opportunity for a fresh start at the University without this handicap may apply for admission or readmission with the request that their prior academic record be disregarded.

Application for Initial Admission to the University with Academic Bankruptcy

The applicant must apply to the Office of Admission and:

1. must have been admissible to the University as a senior in high school,
2. must have attended an accredited institution for at least one year and must not have attended any college or university for the preceding six months, and,
3. must not be admissible to the University based on his or her college-level work.

Application for Readmission to the University with Academic Bankruptcy

A University of Miami student who has dropped out or who has been dismissed may request Academic Bankruptcy on meeting these conditions:

1. The student must apply to the Office of the Registrar.
2. At least six months must have elapsed since the end of the semester in which the student was last in attendance at the University of Miami.
3. Detailed written evidence must be presented to the school in which reacceptance is sought, showing that the conditions or factors that caused the poor performance have changed sufficiently, so that there is a reasonable expectation of future satisfactory performance.

Conditions of Approval

1. If Academic Bankruptcy is approved, no course credits earned previously will be displayed on the transcript for credits attempted, credits earned, or quality points earned; however, all grades earned previously will remain on the transcript.
2. Readmission applicants with approval from the dean of the accepting school, may have Academic Bankruptcy apply only to those credits taken by the student when last in attendance at the University of Miami, so that credits earned at another institution subsequent to the date the student last attended the University are not affected.

Academic Bankruptcy can be granted only once for any student.
CERTIFICATION OF ENROLLMENT

Students who require certification of enrollment for insurance or education loan purposes may obtain an enrollment letter via their myUM account or by submitting a request in writing to the Office of the Registrar. Students will be certified as currently enrolled once they have met their financial obligations. If a student is delinquent in paying his/her tuition and fees statement balance and/or Monthly Payment Plan, the University will not process transcript and/or diploma requests. Course selection/modification will not be permitted for any previous, current or future semesters. The student is not considered enrolled during the term in question, which means that certification of enrollment cannot be provided for insurance, student loan deferment or repayment purposes. Non-payment also means the student is ineligible for financial assistance awarded for the term in question.

A late payment fee will be assessed on all delinquent accounts.

Students who require enrollment certification for scholarship purposes only, will be certified as course selected, until financial obligations are met.

CLASSIFICATION OF STUDENTS

Students are classified in three ways:

a. by course load (full- or part-time);
b. by objective (degree sought, non-degree, transient, audit, etc.);
c. by year.

By Course Load

A student is a full-time student if he/she carries not less than the minimum normal load, 12 semester hours per semester in most schools, nine semester hours in the Graduate School (please refer to the Graduate section for exceptions). The minimum semester hour credit loads in a summer session will vary for each category, according to the length of the sessions. (A typical full-time class schedule for fall and spring semesters not requiring override approval from an advisor consists of 15 semester hours. In some cases, students are recommended to enroll in fewer than 15 credits.) Please refer to the university’s full-time/half-time policy located at www.miami.edu/registrar. For spring semester, Intersession courses can be included when evaluating full-time status. It is important to note that tuition charges for Intersession courses typically are separate from and in addition to charges for the spring semester. Full-time status may vary from one college or school to another. Students should consult with the dean of his/her college or school for details.

By Objective

A degree student is one whose immediate educational objective consists wholly or principally of work normally credited to a University of Miami bachelor’s or higher degree. To qualify for this status, a student must meet the standards for admission.

A non-degree student is one who is not pursuing a degree program. Such students are those who, although eligible for degree candidacy, have requested permission to take a limited or special selection of credit courses without regard to requirements for a degree. This classification includes high school graduates and students with previous college credit
a. who do not want degree status;
b. whose applications for degree status are incomplete;
c. who are taking work toward teacher certification;
d. who are workshop applicants;
e. who are visiting summer school students.

(Students under 21 years of age who have not completed high school will not be admitted to this status.) Non-degree students are sub-classified as transient, special, etc.

An undergraduate non-degree student may petition the Director of Admissions to have his/her status changed to that of degree student. Up to 30 credits earned in non-degree status may be applied towards a degree, but only to the extent approved by the appropriate academic dean. It is therefore important that the degree student identify himself/herself as such, early in his/her program.

UNDERGRADUATES TAKING GRADUATE COURSEWORK

Undergraduates Taking Graduate Coursework. University of Miami undergraduates within 30 credits of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit for graduate courses, while completing the requirement for the baccalaureate. The application may be found at https://www6.miami.edu/grad/forms/ApplicationforUndergraduatestoTakeaGraduateCourse.pdf.

Admission to Graduate Status requires:

1. Must have a minimum of 3.000 G.P.A.
2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credits earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than six (6) hours credit may be taken in one semester, and no more than a total of twelve (12) hours credit may be taken while in Graduate Status. Students may take no more than 13 credits of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar, Whitten University Center, Room 121.
Transient Student

A transient student is one who is enrolled at the University of Miami with the sole intention of using credits earned toward graduation elsewhere.

Audit Student

An audit student is one who enrolls as an observer or listener only. Auditing is allowed only when there is space available in the class. Audit status may be restricted by the Dean in the case of laboratory, studio or performance courses where audit status is not appropriate. Audit students receive no credit, do not prepare written assignments or take examinations, are not eligible for residence in campus residence halls, and do not receive student privileges except for the use of the library. No entries are made on the permanent academic record for audited courses.

Students wishing to change from audit status to credit status must obtain all necessary approvals within two weeks following the last day of registration for Fall and Spring semesters and no later than the fifth class day following the last day of registration for Summer Sessions. No changes except withdrawals from the course are permitted after this time.

Note: Fee for auditing a course is non-refundable. Please refer to financial information section of the bulletin.

By Year

A freshman is a degree student who has earned 0 to 29 credits.
A sophomore is a degree student who has earned 30 to 59 credits.
A junior is a degree student who has earned 60 to 89 credits.
A senior is a degree student who has earned 90 credits or more.

ELIGIBILITY FOR UNIVERSITY EXTRACURRICULAR ACTIVITIES

Full participation in University-sanctioned extracurricular activities and organizations is open to all full-time students who are not on academic probation and who have been assessed the Student Activity Fee. Extracurricular activities include, but are not limited to the following: academic, athletic, dramatic, or musical organizations or teams; student organizations registered with the Committee on Student Organizations (COSO); fraternities and sororities; student publications; program boards; and University committees.

Students on probation may participate in any activity required as partial fulfillment of their degree program; may attend meetings of organizations; and may play intramural sports. They may not otherwise compete, perform, or hold a leadership position. At the beginning of each fall semester, the activity’s faculty or staff advisor or appropriate committee chairperson shall determine with the Office of the Provost the eligibility of each participating student. Some activities apply stricter standards, and may monitor academic progress and review eligibility during the academic year. Students should consult with the individual activity for specific requirements.
READMISSION

Undergraduate students who have not attended the University for at least one semester should request readmission through the Office of the Registrar no later than two weeks before the beginning of classes, in the semester they wish to re-enroll. Readmission to the University is contingent upon approval of the Dean of the school/college the student is applying to and clearance from the Office of Student Account Services.

International students who seek readmission must receive clearance from International Admission and submit a bank letter to receive an I-20 from International Student and Scholar Services.

Students who have attended another college or university since they were last enrolled at the University of Miami, will be required to provide a transcript of their work. Failure to disclose all prior institutions attended may result in disciplinary action.

A student who is placed on the bachelor’s degree candidate list for a given semester will not receive registration materials for any subsequent semester until the student applies for readmission or admission to a new program. A candidate may wish to continue his/her studies in one of the following situations:

1. If the student fails to graduate and further registration is needed, they must delete their application for graduation in myUM and within twenty-four hours, registration for subsequent semesters or sessions should be available. Students should contact the Office of the Registrar if they experience problems.
2. If the student graduates and wishes to pursue a second bachelor’s degree, the student must apply for readmission, stating his/her new degree objective.
3. If the student graduates and wishes to take additional course work without a degree objective, the student must apply for unclassified status.

Proof of immunization must be provided to the Student Health Service before readmission to the University of Miami. Failure to do so may prevent you from registering for classes.

INACTIVE STATUS

Inactive status is for undergraduate, degree-seeking students who intend, and qualify, to re-enroll at the University of Miami after leaving the university for a designated period of time. Students interested in this option may obtain further information at www.miami.edu/registrar or by visiting the Office of the Registrar.

NON-UM PROGRAMS

Students who study through a non-UM program, domestic or study abroad, and would like to have those credits applied toward their UM degree, should apply for Non-UM Program status. Students may obtain the appropriate form and information through their Academic Dean and/or advisor.
STUDENT IDENTIFICATION NUMBERS

All students at the University of Miami will receive an identification number that is unique to them. This number supplements the social security number, which is also required by the university in order to provide information to the federal government and approved agencies. Access to social security numbers is limited to staff who have a legitimate need for that information.

TRANSFERS BETWEEN SCHOOLS AND COLLEGES

Undergraduate students who have compiled fewer than sixty (60) credits may transfer between schools and colleges provided that such students:

1. demonstrate their academic admissibility to the new program (as defined by class rank and SAT scores) at the time of their original matriculation at the University;
2. satisfy any special criteria required for admission by a particular program (e.g., auditions in the arts, portfolios in architecture, etc.); and
3. obtain the approval of the Dean of the receiving school or college.

It is a general policy of the University that students admitted to degree seeking status may not transfer to an unclassified status.

Students who have compiled 60 or more credits with an average of 2.0 or higher and who have satisfied all of the above three conditions may be eligible to transfer between schools and colleges pending space availability and additional program requirements.
ADMISSION

The University of Miami is a member of the National Association for College Admission Counseling and subscribes to its Statement of Principles of Good Practice.

ADMISSION TO THE FRESHMAN CLASS

The Admission Committee reviews applications and bases admission decisions on the following factors:

- **The Secondary School Record.** The applicant must be in the process of completing graduation requirements at a regionally accredited secondary school or must be a graduate of an accredited secondary school. The applicant must have successfully completed a solid college preparatory program including English, Mathematics, natural sciences, social sciences and foreign language.

- **Standardized Tests.** Official results of the SAT or ACT must be submitted by all applicants. The results of these tests, together with the secondary school record, provide a better measure of the ability of a candidate to perform college level work successfully than can be obtained by either measure alone.

- **The Counselors Evaluation Form.** This form is to be completed by the applicant’s secondary school counselor and includes rank in class, test score information, and an evaluation of potential for academic success in the student’s area of interest.

- **The Essay.** Since each applicant is considered individually, the Essay provides the opportunity to present information that may assist the Admission Committee as it evaluates the application for admission.

See admission procedures for freshmen

Admission of transfer students

Transfer admission may be granted in most fields of study to students who have earned credit from other regionally accredited colleges or universities. Courses completed with **passing grades of C or higher** at other colleges and universities and acceptable for academic credit by the University of Miami, will be verified, and where appropriate, will be translated into University of Miami equivalents by the Office of Admission. However, the Dean of the College or School within the University from which the student plans to graduate determines which transferred courses may be counted toward meeting graduation requirements of that College or School.

**Transfer of credits to UM**

Work taken at other institutions will appear on the University of Miami transcript in separate entries as:

a. The total number of transferable credits attempted and quality points earned, regardless of grades, and

b. The total credits transferred, which shall be the total credits for which a grade of C or higher was earned.
Note: Only the transfer totals earned are added to the University of Miami totals. Total credits attempted and quality points earned elsewhere are not included in the University of Miami totals.

The University does not accept transfer credit for courses in which a grade of C- and below (or the equivalent grade) was earned. However, grades of C-, D, and F are used to calculate the transfer admission grade point average.

Credits are not transferred from institutions not accredited by the appropriate regional accrediting association. Limited exceptions may be made with the approval of the Dean in the College or School of the student’s major. Credits transferred from institutions not in existence long enough to attain regional accreditation must be validated by the attainment of a C average or better in the first 12 credits of course work taken at the University of Miami.

The University does not have a coursework forgiveness policy. The grades of any repeated courses will be averaged.

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

Upper division course requirements (300 level or above) at the University may not be satisfied with community college courses.

After being accepted and enrolling, a student must submit any final college transcripts with grades, AP, IB or CLEP examination scores for review by the end of the first semester of enrollment. Any documents listed above which are submitted after this time period will not be reviewed and credit will not be awarded.

**Required credits in residence at the University of Miami**

A student transferring credits from a 2-year community or junior college (this being the last school attended) must complete a minimum of 56 credits in residence at the University of Miami to earn an undergraduate degree.

A student transferring credits from a 4-year college or university (this being the last school attended) must complete a minimum of 45 credits in residence at the University of Miami to earn an undergraduate degree.

At least half of the credits required for the chosen Major or Minor must be completed at the University of Miami.

See [Admission procedures for transfer students](#)
ADMISSION OF UNDERGRADUATE INTERNATIONAL STUDENTS

ELIGIBILITY FOR ADMISSION

ADMISSION PROCEDURES FOR INTERNATIONAL STUDENTS

EDUCATIONAL DOCUMENTS

Diplomas, Certificates
Copies should be enclosed with the application. Students from countries following the British educational system must submit certified photocopies, or ask the examinations council to mail confidential results to the University of Miami. Reports of scores in school-leaving examinations (e.g., Baccalaureate) must also be submitted.

Transcripts, Statements of Marks
A transcript must contain the following information: subjects studied; marks (grades) awarded; length of class periods; number of periods per week for each subject; and grading scale with minimum passing mark. Year-by-year records of marks should be sent to the University of Miami directly from U.S. institutions. Certified records from foreign institutions may be submitted by applicants, but the University may sometimes insist that such transcripts be sent directly to the University of Miami from the issuing institutions. All secondary and tertiary transcripts must be submitted.

English Translations
Documents in a language other than English must be accompanied by certified English translations. Notarized translations will not be accepted. Translations supplement but do not replace original documents. Please remember to send both.

Syllabus of university study (description of each course or subject studied accompanied by certified English translations. Notarized translations will not be accepted).

A current (within the past six months) bank or government sponsorship letter guaranteeing payment for tuition and fees, books, room and board, medical insurance and personal expenses for one calendar year (two semesters and two summer sessions) is required.

EXAMINATIONS FOR INTERNATIONAL STUDENTS

All international students whose native language is not English, including those applying for transfer from U.S. institutions, are required to submit the results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The TOEFL code for the University of Miami is 5815.
The SAT score report is **not required and should not be submitted for admission consideration** from applicants who are attending schools outside the United States. Applicants should only submit an SAT score report if they qualify for merit scholarship consideration. The minimum combined score required for scholarship consideration is 1300 (critical reading and math sections only).

Please see the [TOEFL Score Requirements](#).

Conditional admission: Academically qualified applicants who are unable to take the TOEFL, or who have scored less than the required minimum, may be offered admission to undergraduate programs with the condition that they successfully complete level five of the University of Miami Intensive English Program or obtain a 550 TOEFL and higher. University of Miami TOEFL code number is 5815.

Institutional TOEFL scores are designed for academic placement use at the University of Miami. Those needing TOEFL for admission to the University of Miami or for use elsewhere should take the TOEFL iBT instead. Visit [www.ets.org/toefl/](http://www.ets.org/toefl/) for more information about the TOEFL iBT.

Please see the [IELTS Score Requirements](#).

IELTS is the International English Language Testing System. It measures ability to communicate in English across all four language skills – listening, reading, writing and speaking – for people who intend to study or work where English is the language of communication.

**PROGRAMS OF STUDY**

International students are eligible to apply for all programs offered at the University of Miami. It should be noted that medicine and law are studied at the graduate level in the United States, and it is therefore inappropriate for undergraduate international applicants to request these programs.

**FINANCIAL INFORMATION**

The University of Miami has no financial assistance for international students other than academic scholarships. International students must provide funds for all of their expenses during the entire period of study, including travel and vacations. Students who would not be able to cover their expenses are best advised not to apply for admission.
EARLY ADMISSION

A limited number of carefully selected students who are currently enrolled in high school and who have completed three years of study may be admitted to the University as freshmen. Early admission applicants typically have a very strong academic background and demonstrate a mature character.

Students who wish to apply under Early Admission must have the support of his/her parents, guidance counselor, and high school. Early applicants must also schedule an interview with the Director of Admission.

Early Admission applicants must submit official high school transcripts, SAT or ACT examination results, Counselor Evaluation Form and Essay as part of the admission process.

Early Admission applicants will be notified of an admission decision by June 1 or after receipt of grades from the final high school year completed.

Since every applicant must be appraised individually, no general qualifications can be listed. Students interested in early admission may send inquiries and requests for applications to the Office of Admission.

ADVANCED PLACEMENT AND/OR CREDIT GRANTED TOWARD GRADUATION

The University allows students to receive college credit toward graduation from the following programs: Advanced Placement, International Baccalaureate, Dual Enrollment, and College Level Examination Program. To have Advanced Placement, International Baccalaureate, or College Level Examination Program credits evaluated, the student must submit an official test result report to the Office of Admission. The University of Miami does not give credit for CLEP Foreign Language and General Examinations. Students taking Dual Enrollment courses (college courses taken while still in high school) must submit an official college transcript for review of potential transfer credit. Please refer to the transfer student section for requirements to transfer college coursework.

A student must submit AP, IB, Dual Enrollment transcripts or CLEP results no later than the end of the first semester of enrollment for review. Documents submitted after this time period will not be reviewed and credit will not be awarded.

The University will accept not more than 60 credits from these programs to count toward the 120 credits required for graduation.

SUBMITTING GED SCORES

An applicant may apply to the University upon completion of the GED in lieu of completing high school. When applying with the GED, the applicant must submit official high school transcripts up to the time of withdrawal, as well as the official GED score report and diploma.

Applicants submitting the GED must achieve the following scores to be considered for admission. These scores should be considered a guideline and do not guarantee admission to the applicant.
For exams taken in English:
Overall score of 2800
No subscore below 500

For exams taken in any language other than English:
Overall score of 3000
No subscore below 600

It is strongly suggested that applicants submitting the GED in any language other than English also submit a TOEFL score.

NON-DEGREE ENROLLMENT

ADULT STUDENT ACCESS PROGRAM (A.S.A.P.)
Students may take up to 30 credits in an undergraduate, non-degree seeking category, which may be applied to a degree program, after all application and degree-seeking requirements are met. In order to be enrolled in this category, students submit a one-page application and no other documents or transcripts; academic achievement is evaluated after 12 credits are earned. A 2.5 G.P.A. is required to continue in the program beyond 12 credits.

Students may take up to 6 credits maximum in a graduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. However, not all graduate departments participate in this program. In order to enroll in this category, students submit a one-page application and no other documents or transcripts, after securing the written permission of the participating graduate department and the Dean of the Graduate School. The application for enrollment may be found on the Web at www.miami.edu/asap.

For more information, contact: The Adult Student Access Program, Division of Continuing Studies, University of Miami, P.O. Box 248005, Coral Gables, FL 33124-1610, (305) 284-2727.
FINANCIAL ASSISTANCE

The Office of Financial Assistance Services administers federal, state, private and University financial assistance programs. Student employment, including the Miami Commitment Program, is managed by the Office of Student Employment.

FINANCIAL ASSISTANCE SERVICES

It is the purpose of the Office of Financial Assistance Services to provide needy and/or academically qualified students with financial aid in the form of scholarships, grants, loans and work programs to the extent that resources are available. In order to make the best use of limited funds, awards often consist of a combination of resources.

In addition, professional staff members are ready to help all students plan for the most efficient use of their financial resources for education.

Underlying the awarding of need-based financial assistance is the philosophy that the student and family have the primary responsibility for educational costs. Need-based financial assistance serves to supplement these primary resources.

- Students who require financial assistance in order to attend the University should apply for assistance each academic year.
- Candidates for admission should indicate their interest in financial assistance by checking the box provided for that purpose in the application for admission.
- The U.S. Department of Education’s Free Application for Federal Student Aid (FAFSA) on the Web is used to determine eligibility for assistance based on need. The FAFSA must be completed for each academic year.
- Entering freshmen should submit their FAFSA so that it is received by the federal processor by the February 1 preference date.
- Entering transfer and all graduate students should submit their regular or renewal FAFSA so that it is received by the federal processor by the March 1 preference date.
- Continuing undergraduate students should submit their regular or renewal FAFSA so that it is received by the federal processor by the February 1 preference date.
- Our office recommends the use of estimated financial information when completing the FAFSA on the Web in order to assure the February 1 preference date is met. Any estimated information must be updated by the applicant using FAFSA on the Web once final figures are available.

Financial aid applications are accepted throughout the year but it is important to note that the appropriate preference date for receipt of aid applications must be met. A new FAFSA on the Web must be submitted for EACH academic year.
STANDARDS OF ACADEMIC PROGRESS (Undergraduate and Graduate)

Federal Aid Semester Review

- In compliance with federal financial aid regulations, the University of Miami requires satisfactory progress towards a degree as an eligibility requirement for federal financial assistance.

- This policy is applicable to all undergraduate, graduate and doctoral students receiving financial aid through federal aid sources, including the Federal Parent Loan for Undergraduate Students (PLUS).

- At the end of each semester, the Office of Financial Assistance Services reviews the academic progress of all University of Miami financial aid recipients.

- If it is determined that a student is not making satisfactory academic progress at the end of the semester, a notification is sent to the student. The student will be placed on financial aid warning for one semester. Aid will not be withdrawn for the subsequent term, but at the end of that term, the student’s academic record will be reviewed by OFAS and appropriate renewal or termination actions will be taken. Notification will be sent to the student detailing information on the appeal process.

- Federal academic progress policy is subject to change based on changes made by the U.S. Department of Education.

Credit Requirements for Federal Aid

- A student must have earned at least 75% of the total hours attempted during his/her overall academic career. Undergraduate and graduate level credits cannot be combined to meet the 75% standard; however, hours transferred into the University of Miami are used in the calculation. The percentage of earned hours is calculated by dividing earned hours by all attempted hours. Rounding does not apply.

(e.g.: Student completes 18 of 24 attempted hours. Percentage complete is 18/24=75%)

- Withdrawals, incompletes, audits, and Fs are attempted but not considered earned hours.

- Hours transferred in to the University of Miami will be counted as hours attempted and hours earned.

- Reinstatement of aid eligibility can be obtained by earning additional University approved credits, achieving the 75% completion standard, or appealing as outlined later in this section. The University reviews progress at the end of each semester. Aid eligibility will be restored upon determination that the progress requirements have been met.
• Graduate students must be enrolled at least half-time in order to receive federal financial assistance. A minimum of 5 graduate hours constitutes at least half time enrollment at the graduate level. The only exception to this credit requirement is enrollment in any of the 700 level research courses. Students enrolled in any of these courses are considered full-time and are eligible for federal loans.

**UM Need-based Assistance Review**

• In compliance with federal financial aid regulations, the University of Miami requires satisfactory progress towards a degree as an eligibility requirement for financial assistance.

• This policy is applicable to all undergraduate students receiving financial aid through university sources.

• At the end of each Spring semester, the Office of Financial Assistance Services reviews the academic progress of all University of Miami financial aid recipients.

• The academic records from both the fall and spring semesters are considered. If at that time it is determined that a student is not meeting the standards of academic progress for renewal of regular financial assistance, a written notification is sent to the student. The notification includes information on the appeal process.

• Students granted a one semester conditional appeal for University of Miami Grants by the Standards of Academic Progress Committee will be reviewed at the end of that semester.

**Credit Requirements for UM Need-based Assistance**

• A student must have earned at least 75% of the total hours attempted during his/her overall academic career. Undergraduate and graduate level credits cannot be combined to meet the 75% standard; however, hours transferred into the University of Miami are used in the calculation. The percentage of earned hours is calculated by dividing earned hours by all attempted hours. Rounding does not apply. (e.g.: Student completes 18 of 24 attempted hours. Percentage complete is 18/24=75%).

• Withdrawals, incompletes, audits, and Fs are attempted but not considered earned hours.

• Hours transferred in to the University of Miami will be counted as hours attempted and hours earned.

• Reinstatement of aid eligibility can be obtained by earning additional University approved credits or appealing as outlined later in this section. The University reviews progress once a year at the end of the spring semester. A student who completes courses that meet the requirements prior to the spring semester review may request, in writing, a review of their progress in advance of the end of year review. Aid eligibility will be restored upon determination that the progress requirements have been met.

• Freshmen (0-29 credits) new to the University will be allowed a one academic year adjustment period.
Cumulative Grade Point Average Requirement for all Federal Aid and UM Need-based Assistance

Undergraduate Students
All undergraduate students must meet and maintain the University of Miami credit and cumulative grade point average (CGPA) requirements to maintain satisfactory academic progress. The criteria listed below must be met to receive federal and institutional financial assistance administered by the Office of Financial Assistance Services.

<table>
<thead>
<tr>
<th>Semester Hours Earned</th>
<th>Minimum Cumulative G.P.A.</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 32</td>
<td>1.7</td>
</tr>
<tr>
<td>33 to 64</td>
<td>1.8</td>
</tr>
<tr>
<td>65 to 96</td>
<td>1.9</td>
</tr>
<tr>
<td>97 +</td>
<td>2.0</td>
</tr>
</tbody>
</table>

** - This does not include University of Miami scholarships and State of Florida financial aid. State of Florida financial aid and University of Miami academic scholarships have their own CGPA requirements.

Graduate and Doctoral Students
All University of Miami graduate and doctoral students must maintain a minimum 3.0 cumulative grade point average (CGPA). Graduate students who fail to meet the minimum credit or cumulative grade point average requirements have failed to meet the satisfactory academic progress standards established by the University. Those in violation of the satisfactory progress eligibility requirements will be notified in writing of their eligibility status and right of appeal.

Maximum Period of Eligibility for All Financial Assistance Awards

- Degree-seeking undergraduate and graduate students receiving federal aid must complete their degrees within 150% of the normal time for completion as determined by the school or college catalog under which the student was admitted. For example, if an academic program requires 120 credit hours, the student must complete the program within 180 total credit hours. Credits used in this calculation include those accepted for transfer and those attempted at the University of Miami.

- Students receiving University scholarships and need-based grants are limited to four years of eligibility (five years for five-year degrees).

- William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Access Grant (FSAG) recipients are limited to nine semesters of eligibility.

- Graduate students entering the dissertation or thesis stage of their degree program may receive federally funded assistance for only two years. Please note that these two years are included in the maximum periods previously listed.

- Graduate students who plan to enroll in a graduate degree program should keep in mind their aggregate loan limits. For more information, go to the National Student Loan Data System (NSLDS) at www.nslds.ed.gov. This site displays information on loan amounts, outstanding balances, loan statuses and disbursements.
University Financial Assistance for Graduate Students

In order to receive a graduate assistantship, fellowship or tuition scholarship, a graduate student must:

- Be admitted unconditionally to a post-baccalaureate degree program;
- Be enrolled for full-time study; and
- Maintain a cumulative graduate grade point average of 3.0 or above.

For additional information, please visit the Graduate School Website at www.miami.edu/grad. For specific information, contact the Graduate Advisor of each program. For information regarding loan and work-study opportunities, visit the Office of Financial Assistance website at www.miami.edu/ofas.

Scholarship Review (Undergraduate only)

- At the end of each Spring semester, the Office of Financial Assistance Services reviews the academic progress of all University of Miami financial aid recipients.

- Freshmen (0-29 credits) new to the University will be allowed a one academic year adjustment period.

- Students granted a one semester conditional appeal for University of Miami Grants by the Standards of Academic Progress Committee will be reviewed at the end of that semester.

- First-time freshmen are eligible for University of Miami academic scholarships for up to eight semesters; transfer students are eligible for up to four semesters. These scholarships are good for the fall and spring semesters only. Any requests to have an academic scholarship applied to summer or mini-semester terms need to be made in writing and submitted to our office.

Credit and GPA Requirements for UM Scholarships

- Scholarship recipients must maintain a CGPA of at least 3.0 for all credits earned at the University of Miami to retain their scholarship.

- All full-time undergraduate students are required to register for and complete at least 24 (a minimum of 12 each semester) new credit hours at the University of Miami each academic year, defined as the fall and spring semesters.

- Reinstatement of academic scholarship eligibility can be obtained by earning additional University approved credits. The University reviews progress once a year at the end of the spring semester. A student who completes courses that meet the requirements prior to the spring semester review may request, in writing, a review of their progress in advance of the end of year review. Aid eligibility will be restored upon determination that the progress requirements have been met.

- Full-time undergraduate students who enroll for only one semester are required to register for and complete at least 12 new credit hours during that semester.
Withdrawals, incompletes, audits, and Fs are attempted but not considered earned hours.

Golden Drum/Ronald Hammond scholarship recipients should refer to their contract for renewal criteria provided by the Office of Multicultural Student Affairs.

 Guaranteed Scholarship

First-time freshmen awarded a University of Miami academic scholarship; automatically retain their scholarship after their first year of school. The student must maintain a minimum 3.0 CGPA and complete at least 24 University of Miami credit hours during their second academic year to guarantee their scholarship for the remaining two years of undergraduate studies.

First-year transfer students awarded a University of Miami academic scholarship is guaranteed their scholarship if they:

- have completed 24 credit hours during their first academic year,
- have maintained a minimum 3.0 CGPA, and
- have registered as a full-time student for their second year of eligibility.

Transfer students meeting these requirements will be guaranteed their scholarship for four semesters or until they graduate, whichever comes first.

Any University of Miami academic scholarship will be guaranteed for the remainder of an undergraduate student’s eligibility if they are not on probation at the end of their 4th semester (2nd semester for transfer students).

Automatic Probation and Probationary Scholarship Assistance

Freshmen that fail to meet the scholarship academic progress standards at the end of the first academic year will receive a warning and are granted an additional year of eligibility under “Freshman Forgiveness.” Sophomores that fail to meet the scholarship academic progress standards at the end of the academic year are placed on probation, and may receive the scholarship for an additional semester as a probationary award. The student’s progress is reviewed at the completion of the semester. A student that fails to meet the scholarship academic progress standards at the end of the semester loses eligibility for the award the second semester, receives notification of the loss of eligibility, and is provided information on the appeal process.

A new transfer student receiving a University of Miami academic scholarship that does not meet the scholarship academic progress requirements at the end of the 2nd semester may receive a one-year probationary award. A student that fails to meet the scholarship academic progress standards at the end of the 4th semester loses eligibility for the award, receives notification of the loss of eligibility, and is provided information on the appeal process.
A student may receive probationary scholarship assistance only once. Any student who has received a scholarship under probation must meet the standard of academic progress requirements for that scholarship assistance by the end of the probationary period in order to maintain his/her eligibility for that scholarship in the future.

STATE OF FLORIDA AID

The Florida Department of Education, Office of Student Financial Assistance, has its own standards of progress for state financial assistance.

- All Bright Futures Scholarship recipients (includes Florida Academic, Florida Medallion, and Florida Gold Seal scholarships) are eligible for up to 132 credit hours; however, eligible students may only receive up to 45 hours of credit per academic year.

- 2009-2010 high school graduates and thereafter, may receive up to 100% of his/her program of study or 120 semesters hours (or the equivalent in quarter or clock hours) toward completion of his/her first baccalaureate degree, or for up to five years from high school graduation (if the student was initially funded within three years after high school graduation), whichever comes first.

- State of Florida Aid academic progress policy is subject to change based on changes made by the Florida Department of Education.

A student must earn at least 24 credit hours (or the equivalent) if enrolled full time for the entire academic year. A student enrolled full time (12 or more semester hours or the equivalent) for only one term must earn at least 12 credit hours for that term. If a student is enrolled part time for any part of the academic year, the student must earn a prorated number of credit hours. (See below). Initial eligibility must be at least 6 credits.

<table>
<thead>
<tr>
<th>Student Funded (per term)</th>
<th>Required Earned Hours (per term)</th>
</tr>
</thead>
<tbody>
<tr>
<td>12 + credits (Full Time)</td>
<td>12</td>
</tr>
<tr>
<td>9-11 credits (Three-Quarter Time)</td>
<td>9</td>
</tr>
<tr>
<td>6-8 credits (Half Time)</td>
<td>6</td>
</tr>
</tbody>
</table>

A student that fails to meet the minimum cumulative grade point average (3.0 for Florida Academic, 2.75 for Florida Medallion and Gold Seal) will no longer be eligible for his/her Bright Futures award. Florida Academic recipients that fail to achieve a 3.0 cumulative average, but achieve at least a 2.75 cumulative average will renew at the lower Florida Medallion amount. Recipients that fail to meet the progress requirements receive notice including information on the appeal process.

- Award Reinstatement: an eligible student that did not receive scholarship funds for the last academic year (fall through spring), may request reinstatement of the award. The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA)

- Award Restoration: a student that failed to achieve a minimum 2.75 and became ineligible for funding may apply for restoration in an academic year after which the 2.75 cumulative GPA requirements was met. (The 2.75 GPA must be met before the fall term for which the student is applying.) The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at www.FloridaStudentFinancialAid.org.

- For 2009-10 and later high school graduates, if a scholarship is not renewed because of an insufficient GPA during their first year of funding, the scholarship may be restored in an academic year after the minimum cumulative GPA requirement is met. Students who do not meet the minimum earned hours requirement or who fail to meet the minimum GPA requirement after their first year of funding will NOT be permitted a restoration opportunity. * State of Florida Aid academic progress policy is subject to change based on changes made by the Florida Department of Education.

- Recipients of the William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Assistance Grant (FSAG) must complete at least 24 credit hours each academic year with a cumulative grade point average of at least 2.0. Classes taken in the previous summer may be included in calculating the completed hours (credit hours earned during summer of 2011 may be combined with the credit hours earned during the 2011-2012 academic year to meet the 24 credit hour requirement).

Students that do not meet the annual minimum 24 credit hours requirement for renewal, may not receive funding the following academic year. To be eligible for renewal in a subsequent year, the student must meet the general eligibility requirements for renewal and have maintained/earned a cumulative GPA of 2.0.

Students enrolling for only one semester must complete at least 12 new credit hours while maintaining the required CGPA.
THE APPEAL PROCEDURE

Students that do not meet the academic progress requirements may submit a written appeal to request reinstatement of eligibility to receive aid. The student must complete the University of Miami’s Academic Progress Appeal Form. This petition requires the student to:

1. Submit a written explanation as to why he/she was unable to meet or maintain the academic progress requirements; and

2. Submit documentation that substantiates the student’s circumstances, such as a letter from a doctor or copies of medical bills if a student cites medical reasons for not meeting the requirements.

The appeal form may be downloaded from the financial assistance website. Submit the Appeal Form and all documentation to the Standards of Academic Progress (SOAP) Appeal Committee, c/o the Office of Financial Assistance Services. All appeals should be submitted no later than 30 days from notice of ineligibility. All appeals submitted completely and on time will be reviewed by the committee prior to the beginning of each semester. Decisions are made using the appeal documentation provided by the student in conjunction with the student’s academic record. All decisions by the committee are final.

A general description of the major financial assistance programs available through various departments as well as the Office of Financial Assistance Services can be found at www.miami.edu/ofas.
FINANCIAL PAYMENT POLICIES

Policy
All semester charges (tuition, room, board and fees) are due by the date on the Registration Billing Notification, unless an established Monthly Payment Plan contract has been finalized with the Office of Student Account Services. Previously unbilled and new charges are due and payable when incurred. A student is responsible for his/her tuition and fees upon registration. Financial registration is considered complete only when all charges are paid or when satisfactory arrangements to pay have been finalized with the Office of Student Account Services.

Consequences of Non-Payment
There are consequences to non-payment. If a student is delinquent in paying his/her tuition and fees statement balance and/or Monthly Payment Plan, the University will not process transcript and/or diploma requests. Also, course selection/modification will not be permitted for any previous, current or future semesters. The student is not considered enrolled during the term in question, which means that certification of enrollment cannot be provided for insurance, student loan deferment or repayment purposes. Non-payment also means the student is ineligible for financial assistance awarded for the term in question.

A late payment fee will be assessed on all delinquent accounts.

Course selection will not be permitted for any past due accounts including Monthly Payment Plans. A late payment fee will be assessed on all delinquent accounts.

Finance Charges
No additional charges are imposed on an account once Account Balance payments are received by the payment due date. If, however, payment is received after the payment due date, a Finance Charge is assessed. Finance charges are computed on the average daily account balance at an Annual Percentage Rate of 16%.

Deferred Payments
If financial aid funds are not available at the time of registration, the student would normally be expected to cover these payments. However, financial aid awards will be automatically deferred under the following conditions:

- The Office of Financial Assistance Services (OFAS) is provided with a source of aid (other than College Work Study or Miami Commitment) on the student's award package.
- OFAS awards the corresponding amount on the student's award package. i.e., outside scholarship information must be provided to both the Offices of Financial Assistance and Student Account Services in order to defer payment.
- OFAS allocates the guaranteed award during the semester that the disbursement should be expected.
- Final guarantees have been processed by the appropriate alternative loan lender – preliminary approvals will not result in automatic alternative loan deferments.

Examples
*Veterans Monthly Educational Benefit Checks:* An amount not to exceed the total of the checks expected to be received during the semester (for fall and spring, this is typically three checks) may be deferred. Arrangements for this type of tuition deferment must be
initiated with a representative of Veterans Affairs through the Office of the Registrar and the Office of Student Account Services. Students with VA benefits are required to sign a promissory note with the Office of Student Accounts in order to defer anticipated payments.

*International Students with Government Sponsorships:* Payment of all or a portion of charges that can be billed directly to corresponding government agencies may be deferred upon presentation of appropriate documentation from their government or embassy. In addition, international students who receive monthly stipends for living expenses from their government may (if expenses are covered by the student’s sponsor) defer a portion of their payment of their room and board charges. However, no deferment is permitted to an international student having a previous balance at the time of registration or one receiving tuition remission. Arrangements for this type of tuition deferment must be initiated with a Third Party Advisor at the Office of Student Account Services.

**Florida Prepaid Program**

The University of Miami will assist with a student’s education expenses by billing for any available Florida Prepaid College Program funding directly to the Florida Prepaid College Board. As a Florida Prepaid participant, you may authorize the University of Miami to request various payment disbursement options that best match your needs and current savings in the plan. We encourage all participants to authorize a payment that will facilitate your overall financial planning objectives for your son or daughter’s enrollment at the University of Miami.

The University of Miami requires new students to have completed the “Florida Prepaid College Program Authorization Form”. In addition to this form, all students who plan to use their prepaid funds must contact Florida Prepaid at 1-800-552-4723 option 2, and request a separate Florida Prepaid “Transfer Form”. Upon your request, Florida Prepaid will mail the Transfer Form to you. The purchaser of the plan must complete this form and return it directly to Florida Prepaid. It is necessary that Florida Prepaid have this Transfer Form on file in order for students to use Florida Prepaid funds at the University of Miami.

Questions in reference to Florida Prepaid should be sent to saccounts@miami.edu with "Florida Prepaid" in the subject line. The required authorization form for the University of Miami and an example can be downloaded from the following web site: [www.miami.edu/osas](http://www.miami.edu/osas)

**Process**

Final arrangements for tuition deferments that do not appear on Registration Billing Statements must be made with representatives of the Office of Student Account Services. For further clarification and interpretation of the University’s tuition deferment policy, contact the Office of Student Account Services. You may e-mail Student Accounts at: saccounts@miami.edu.

**Policy on previous and unpaid balances**

**Non-Payment**

The University of Miami may declare due and payable at once the sum of all past due balances. In addition, the student will be responsible for interest accrued on all past due
and unpaid amounts at the maximum rate permitted by law and any and all costs incurred by the University of Miami in enforcing its rights. The University reserves the right to withhold transcripts, diplomas, readmission, and future registration for non-payment of outstanding balances. The University’s Collection Department may also disclose the student’s outstanding indebtedness, along with other relevant information, to credit information bureaus. A non-refundable $100 reinstatement fee will be charged to reinstate each unpaid and cancelled semester.

Refund Policy

DEFINITIONS

Title IV Financial Aid or Title IV Programs refers to the following awards:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loan, DL PLUS (Graduate Student), DL PLUS (Parent)
- Federal PELL Grant
- Federal Supplemental Educational Opportunity Grant (SEOG)
- Federal College Work Study
- State Subsidy Incentive Grants

REFUND POLICY

Students who have advised the appropriate University department of their withdrawal, through 60 percent of the semester, will receive credit for tuition and eligible financial aid refunds using a pro-rated calculation based on the percentage of the semester attended by the student. Unearned Title IV funds will be returned in accordance with the refund policy established in Section 484B of the Higher Education Act of 1965, as amended (HEA) and provided for through the Student Assistance General Provisions regulations enacted on October 7, 1998. Fees are not refundable and will not be pro-rated.

The University refund schedule does not apply to students in the following on-campus and off-campus programs: The Executive MBA, the MBA Program for Working Professionals, and the Master of Science in Professional Management. Unless the student has completed official withdrawal procedures in writing with the Graduate Business Program office prior to the beginning of a course/term, tuition will be refunded on a prorated basis based on the number of class meetings attended through the effective date of withdrawal.

No tuition refund will be granted when class attendance has exceeded 50% of class meetings. This policy supersedes any information stated in the Graduate Bulletin and other university publications.

PROCEDURE

The amount of earned tuition and financial aid will be calculated on a daily pro-rated basis. Unearned tuition will be credited to the students account. Unearned, disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid programs. Students who have not completed the verification process are ineligible to receive any financial aid and therefore no financial aid will have been earned. All disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid program.
The return of financial aid will be refunded to the following sources used in the specific order as noted below until the total amount of the school’s responsibility has been satisfied:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loans
- Federal PLUS Loans (Graduate Student)
- Federal PLUS Loans (Parent)
- Federal Pell Grant
- Federal Supplemental Opportunity Grant (SEOG - Federal Portion Only)
- Any other Title IV Assistance
- State financial aid

In the event of an overpayment of unearned Title IV grants, the University will send the student a notification letter requesting payment in full or the establishment of a satisfactory payment arrangement with the University or the Debt Collection Services of the U.S. Department of Education. This notification letter will be processed within 30 days of the date of the University’s determination that the student withdrew.

If the student does not respond to the request for repayment within 15 days, the University will notify the Department of Education of any Title IV grant overpayment. If the student does not make satisfactory repayment arrangements for the repayment of Title IV grant aid, the student will then become ineligible for federal assistance on the 46th day from the date of the University’s repayment letter.

**WITHDRAWAL EXAMPLE**

A student notifies the Registrar of withdrawal on the 50th day of the semester. If the total number of calendar days in a semester were 108, the earned tuition and financial aid ratio would be 50 divided by 108 or 46.3 percent. The University would have earned 46.3 percent of the semester tuition and the student would have earned 46.3 percent of the approved federal aid that the student was originally scheduled to receive for the term. The remaining 53.7 percent of unearned tuition would be credited to the student's account. The 53.7 percent of the student scheduled or disbursed aid remains unearned and must be returned to the Federal Program. If a student remains in school until the percentage of earned financial aid is 60% or more, then federal regulations consider the student to have earned 100% of their federal aid.

**POST WITHDRAWAL DISBURSEMENTS**

If the University determines that a student is eligible for Title IV funds that have not been disbursed, grant funds that the student is eligible for will be disbursed first. Federal aid that the student is eligible for will be credited to the students account and applied against any outstanding charges.

**ANNUAL TUITION**

In cases where tuition is assessed on an annual rather than semester basis (except for special contracted programs), the refund will be treated as though tuition were assessed in two equal halves, one for each of two semesters.
Reinstatement of cancelled classes

Classes are subject to cancellation if the student fails to complete Financial Registration at the start of the semester. A non-refundable $100.00 Reinstatement Fee will be assessed on the student account in order to reinstate canceled classes.

If the student does not reinstate his/her canceled classes prior to the end of the semester, the student will not be allowed to register for subsequent semesters. The student will be allowed to register only when he/she has paid the student account balance in full, with certified funds, and has reinstated all canceled classes.

Important Note: Students who are receiving financial assistance and have had their classes canceled for the semester may lose all or part of their financial aid for that semester. Students who wish to reinstate a canceled semester must first meet with an Advisor from the Office of Financial Assistance Services to determine the aid they are eligible to keep from the canceled semester. Once the aid has been determined, and the student knows what their out-of-pocket expenses will be, final arrangements for reinstatement of canceled classes can be made with a representative of the Office of Student Account Services.

Students must be reinstated into all classes in which they initially registered. Partial semester reinstatements will not be authorized.

Payment options

The University Cashier accepts cash, personal checks, traveler’s checks, cashier’s checks, certified checks, money orders, and checks drawn against lines of credit. Personal check and credit card payments are accepted online via myUM. Bank wire transfers are also accepted.

On-Line Payments:

Web Checking Account (ACH) Payments: Free on-line checking account payments are accepted through the myUM system. Students must sign onto myUM at (www.miami.edu/myum) and select the “Student” tab. The “Financial” link from the drop down menu should then be selected followed by clicking on the “Billing and On-Line Payment” link. Subsequent on-line instructions will then be provided. Once payment is processed, a confirmation email will be sent to the student’s email address noted in the University’s database. The student’s account will then be systematically updated with the payment. Please note that this option is only available on the myUM system and is at no charge to the student.

On-Line Credit Card Payments: Students must sign onto myUM (www.miami.edu/myum) and select the “Student” tab. The “Financial” link from the drop down menu should then be selected followed by clicking on the “Billing and On-Line Payment” link. Subsequent on-line instructions will then be provided. Once payment is processed, a confirmation email will be sent to the student’s email address noted in the University’s database. The student’s account will then be systematically updated with the payment. Please note that a non-refundable 2.5% convenience fee will be added to the amount charged by our credit card service provider.
Checks and Money Orders

Payments must be in U.S. Dollars and drawn on a U.S. bank. Payments must be made payable to the University of Miami and include the student’s identification number to ensure credit to the student’s account. Post-dated checks are not accepted. IMPORTANT NOTE: Foreign drafts must be sent through a collection process requiring a 30-day process for collection purposes. Accounts will only be credited once confirmation of deposit has been received by the University’s bank. Collection fees, charged by the bank for processing these checks, will be charged to the student’s account.

Returned checks policy

All returned checks are deposited twice, automatically, and without notice. A Returned Check Fine will be assessed to the student’s account, as listed below, after the second attempt. Check cashing privileges will be canceled for those students who have three (3) or more returned checks.

A notification letter will be mailed to the maker of the check by the University’s Collection Department detailing the amount and fine for the returned check. Check cashing privileges will be restricted until cash or certified funds (money order or cashier’s check) are presented for payment. A personal check will not be accepted to replace a dishonored check.

Returned check fines (includes on-line check payments through myUM):

Wire Transfer of Funds

Wire transfer of funds for payment on an account at the University of Miami may be processed through any full service bank. Please direct the transfer to:

Bank of America, N.A.
1500 South Dixie Highway
Coral Gables, Florida 33146

ABA Routing Number: 026009593
For Credit to: University of Miami Account 5508319094
For Further Credit to: Student Name and I.D. Number

The student’s name and the student’s identification number (C#) are required in order to properly credit funds to the student’s account.
Tuition payment plans

The Office of Student Account Services offers several tuition payment options to assist students and parents. The University’s payment options are designed to provide convenient alternative plans of budgeting and paying educational costs whether or not a financial assistance award is granted.

MONTHLY PAYMENT PLAN (MPP)

Purpose: This plan allows you to divide all or part of your annual educational expenses (tuition, fees, on-campus housing, and meal plan less financial assistance) into ten convenient monthly payments for a fall/spring combined plan; five months for a fall-only plan; and five months for a spring-only plan.

Contract length: This plan is offered on an annual basis for the fall and spring semesters combined, and the fall and spring separately as noted above. The minimum annual contract for any of these plans is $2,000.

Fee: A 3% non-refundable participation fee of the amount financed is charged and included in the established monthly payments.

Conditions: Payments are due on the 1st of each month with the exception of the first payment which is due upon signing the Monthly Payment Plan Agreement. The Monthly Payment Plan is completed online at www.miami.edu/osas/mppapp.html. This online process guarantees faster processing for financial registration purposes and automatically updates applicants via email notifications.

TUITION STABILIZATION PLAN (TSP) (Undergraduates Only)

The University of Miami Tuition Stabilization Plan (TSP) allows you to pre-pay up to four years of tuition at the current tuition rate. The TSP relieves students and parents of concerns relating to future tuition increases and may also offer substantial savings in future tuition expenses. This plan does not include mandatory fees.

The TSP is a sensible alternative for families and independent students paying for tuition from existing savings or investment accounts. With increases in tuition rates at most Universities running above current inflation rates, a participant’s savings in tuition increases may more than make up for the loss of investment income.

The TSP is designed to be used by full-time students for a minimum of two consecutive academic years and a maximum of four consecutive academic years; if a student withdraws from the University, the unused tuition will be refunded without penalty as outlined in the TSP agreement.

The TSP is designed to be used by students who are (a) are enrolled in a degree-seeking four-year program on a full-time basis and (b) do not receive any financial aid.

TUITION GUARANTEE PLAN (TGP)  (Freshmen Only)

The University of Miami Tuition Guarantee Plan (TGP) is a four-year budgeting plan for families. The TGP allows families to plan for “tuition and mandatory fees” over a four-year period.

The TGP guarantees a pre-determined tuition rate increase for each of the four years and schedules payments over 44 months without interest or finance charges. A non-refundable participation fee of 3% of the plan amount is charged and included in the monthly payments. This payment plan also requires consecutive semester enrollment.

The TGP is designed to be used by students who are (a) first semester freshman; (b) are enrolled in a degree-seeking four-year program on a full-time basis and (c) do not receive any financial aid.

Note:  A) Neither plan above (TSP/TGP) covers intersession classes, housing and/or meal plan charges. These charges must be paid separately.

B) The receipt of any awards noted above will be refunded to the account holder as long as required payments are current. Adjustments to monthly payments will not be processed on either plan as these payment plans will be fixed according to tuition rates in place at the time a contract is issued.

C) As noted below, the contracted amounts for the TGP include both tuition and fees. The TSP is inclusive of tuition only.

TUITION and FEES

Tuition

The basic undergraduate tuition rate covers the normal student load and is increased if the student carries an overload. Private instruction, e.g., music lessons, carries extra charges.

For tuition charges in special programs and sessions, see announcements that are published concerning these components of the University’s academic program.

The following list of charges is effective for the academic year 2012-2013.

<table>
<thead>

</tbody>
</table>

Undergraduate students carrying both undergraduate and graduate courses will be charged tuition at the rate in effect for undergraduate credits taken and appropriate fees. For example, tuition for a student carrying a total of 15 credits, of which 3 are graduate and 12 are undergraduate, would be charged at the $19,990.00 rate.

Undergraduate students taking graduate level coursework that is priced at a special level will be billed separately for these courses. Students should check with their advisors and/or the appropriate school’s department for more details on their course pricing requirements.

Full-time fees will be assessed according to student classification as an undergraduate or graduate.

The University reserves the right to change without notice tuition, fees, room and all other charges at the beginning of any academic year, and the right to change activities and board fees at the beginning of any semester.

</tr>
</tbody>
</table>

Certain programs are conducted by the University under contract with the State of Florida. Florida residents who have been accepted as students in those contract programs are required to pay current state tuition for each credit hour taken and the state provides the University with additional funds in accordance with the terms of the contracts. Students involved in state contract programs should contact the appropriate school/college to ascertain the state tuition charge per credit hour that they are expected to pay.

Fees

Some fees depend upon full-time status. This is usually determined by the sum total of semester credits carried by the student in all divisions or enrollment in certain special programs that are classified as full-time regardless of credit load. Intersession classes are included with regular fall and spring semester classes in determining the student’s full- or part-time status. This determination will also result in the billing of required fees. Fees are subject to change.

Undergraduate students are classified full-time if they enroll in 12 or more credits in a regular semester or five (5) or more credits in a summer session or if they are enrolled in a special program which is classified full-time regardless of credit load.

Graduate students are classified full-time if they enroll in nine (9) or more credits in a regular semester or five (5) or more credits in a summer session, or if they are enrolled in dissertation credits that are classified as full-time.

* Student Health & Counseling Centers Fee is mandatory for all full time students regardless of credit load. Also mandatory for part-time students.

SUMMER SESSION FEES (per session)

| Undergraduate (Full Time 5+ Credit Hours) | | | |
|------------------------------------------|----------------------|--------------|-----------------|----------------------------------------|--------------------|-------|
| Student Activity Fee | $11.00 | | | | | |
| Student Health and Counseling Centers Fee | $54.00 | | | | | |
| Student Center Fee | $75.00 | | | | | |
| **Total:** | **$140.00** | | | | | |
| Graduate (Full Time 5+ Credit Hours) | | | | | | |
| Student Activity Fee | $10.00 | | | | | |
| Student Health and Counseling Centers Fee | $54.00 | | | | | |
| Student Center Fee | $75.00 | | | | | |
| Rosenstiel Graduate | | | | | | |
| Student Health and Counseling Centers Fee | $54.00 | | | | | |
| Medical Graduate | | | | | | |
| Student Health and Counseling Centers Fee | $41.00 | | | | | |
| Law | | | | | | |
| Student Health and Counseling Centers Fee | $54.00 | | | | | |
| Student Center Fee | $75.00 | | | | | |
You are not required to have the University sponsored health insurance plan in order to utilize the services of the Student Health Center. During the summer sessions the Student Health & Counseling Centers Fee is mandatory and is automatically added to tuition for students enrolled for 5 or more credit hours. Students who are enrolled for fewer than five credit hours during the summer must request this fee to be charged to gain access to the Student Health & Counseling Centers.

Students who are not enrolled for the current semester but intend to enroll for the next semester and graduating seniors (who wish access for one additional week after graduation), may gain access to the services of the Student Health Service after paying the Health and Counseling Centers Fee.

ALUMNI RATE and POLICY

Special Opportunity for UM Graduates

UM graduates may take undergraduate credit courses in the College of Arts and Sciences on a space available basis, at a special alumni rate. All University of Miami graduates are eligible for this special program.

Students may take whatever courses are of interest. From Anthropology to Theatre Arts and all the disciplines in between, participants may choose a course or collection of courses (maximum two courses per discipline) to meet professional or personal goals.

Interested students may call the Division of Continuing and International Education at 305-284-4000 to inquire about the benefit and/or the current tuition rate, request an application, or enroll in the courses. They will submit a simple, no-fee, one-page application, simply select an undergraduate course (open on a space available basis) and be on their way to continued learning at UM.

Policies Governing Enrollment in University of Miami Alumni Status

The University of Miami Alumni Status includes students who are not seeking a degree and meet the following requirements. Enrollment in a non-degree program and/or satisfactory completion of courses does not imply admission to a degree program.

a) University of Miami graduates (completed degree);
b) U.S. citizens or permanent U.S. residents.

I. Conditions applying to University of Miami Alumni enrollment

a) Students may enroll in a maximum of 12 undergraduate credits per semester.
b) Students are limited to two courses per academic department.*
c) Courses may be selected from the College of Arts and Sciences only.
d) International students will not be issued I-20 forms.
e) International students in B-1 (business) or B-2 (pleasure) visa status may engage in study as long as the educational activity is secondary to the principal activity for which the visa was sought.
f) Enrollment may be completed on a space-available basis only. (Course availability determined two days prior to semester start.)
g) Courses taken for undergraduate credit (including 500 level courses) will not be considered for graduate credit at a later date.

*Note: Not all courses and/or departments may be available.

*Parking subject to change

Parking on the University of Miami’s Coral Gables campus is a privilege extended to those using the facilities of the University consistent with the terms of the University’s Motor Vehicle Parking Code and other policies of the University as they are set or amended by the Provost. Parking privileges are extended only to those eligible members of the university community including trustees, faculty, administrators, staff, students, vendors and visitors who have paid for, received and properly displayed a current and valid UM parking permit. In consideration of being allowed to use the University’s facilities for parking, the purchaser of a parking permit agrees to be bound by the rules set forth in the Motor Vehicle Parking Code, and agrees to pay to the University any fine or administrative charge assessed for non-compliance with this code.

Students, faculty, employees, and staff may not park in visitor parking spaces, and UM parking permits are not valid at parking meters.

**First year resident students (students residing on the Coral Gables campus who are attending college on a full time basis for the first time) are restricted from purchasing a parking permit to park on the University of Miami’s Coral Gables campus. This policy applies to first year students living in University of Miami student housing on the Coral Gables campus.**

For more information on Parking, please visit our Website, [www.miami.edu/parking](http://www.miami.edu/parking). Annual permits are valid August 1, 2012 through August 15, 2013.
CAMNER ACADEMIC RESOURCE CENTER

Located on the second floor of the University Center, the Camner Academic Resource Center (ARC) offers free academic assistance to all UM students. The ARC offers individual peer tutoring by appointment in most subjects, study skills instruction with a Learning Specialist, free academic workshops, and many other valuable services. Please visit www.umarc.miami.edu or call 305-284-2800 to learn more or schedule an appointment.

Peer Tutoring

At the ARC, all UM students can take advantage of free individual peer tutoring to develop a deeper understanding of course work through additional, special, or corrective content instruction. All tutoring is course specific and taught by nationally certified peer tutors. All UM students are eligible for two hours of tutoring per week for each course. Peer tutoring is available for more than 175 courses.

Academic Workshops

This free workshop series instructs students on specific academic skills and strategies to enhance academic performance. Workshop topics include reducing test anxiety, effective test-taking strategies, improving study strategies, utilizing technology, and more. Topics are updated every semester, and students may attend unlimited sessions. Please visit our website www.umarc.miami.edu for the current workshop schedule.

Learning Specialists

The Academic Resource Center provides the support of trained Learning Specialists to students experiencing difficulty with academic issues. Students may request a one-on-one meeting with a Learning Specialist to help develop the skills needed to achieve success in their academic careers. Skills covered during these appointments include time management, effective note-taking, college textbook reading, educational technologies, test taking, and other learning strategies. Students can request an appointment with a Learning Specialist through our website or by filling out a request form at the Camner Academic Resource Center. Visit the website at www.umarc.miami.edu for more information about the support services available to students.

Independent Learning Initiative

The Independent Learning Initiative is a fee-based academic support program that provides structure, support, instruction, and monitoring for students needing additional guidance during the college experience. During the semester, students will identify and understand their academic strengths and areas for growth, as well as learn strategies, skills, and technologies to enhance their academic and personal success in college. Participants learn to monitor their academic progress and critically evaluate their current skills and strategies to work towards becoming a successful independent student. For more information about the program or to apply, please visit our website at www.umarc.miami.edu
Supplemental Instruction

Small group sessions are available to help students succeed in the University’s toughest courses. Group Peer Tutoring is done on a weekly basis where students sit down to discuss course content in a small group setting with the peer tutor serving as a facilitator.

UMX: University of Miami’s Freshman Experience

This one-credit elective course is taught by UM faculty, administrators, and advisors across different disciplines as a way of providing mentoring to incoming students. The objective is to help new students transition to college life while introducing them to the many services offered by the university and in the surrounding community. UMX provides a firsthand experience in utilizing UM resources necessary for success in college and beyond. Specifically, students will be exposed to campus leadership opportunities, academic and career planning, university traditions, study abroad opportunities, personal wellness programs, as well as advising and registration. All UMX course sections meet once a week.

Office of Disability Services (ODS)

The Office of Disability Services (ODS) is the primary university office responsible for the coordination of auxiliary aids and services for students with disabilities (Please also see information listed under the Camner Academic Resource Center (ARC).

Information is available to prospective and enrolled students, their parents and/or sponsors. The Office of Disability Services (ODS) is located in the Camner Academic Resource Center in Whitten University Center N201. ODS staff can be reached at 305-284-2374 (Voice) or 305-284-1999 (Fax). Office hours are 8:30 am to 5:00 pm, Monday through Friday. Individuals may email the office staff at disabilityservices@miami.edu for quick responses to questions.

The Americans with Disabilities Act defines an individual with a disability as a person who has a physical or mental impairment which substantially limits one or more of the person’s major life activities:

a) has a physical or mental impairment which substantially limits one or more of the person’s major life activities,

b) has a record of such an impairment or

c) is regarded as having such impairment.

Students requesting services must submit current documentation to the Office of Disability Services, a written request for services, and be part of the collaborative process by participating in an intake meeting. The Office of Disability Services requires that documentation be current (within 3 years) and describe the nature of the disability, include a diagnosis by professionals in the field, outline the history of the disability and the treatment. Documentation should include a description of how the disability relates to the need for services. Auxiliary aids and services are provided on an individual basis, and may include, but are not limited to: letters to instructors
outlining accommodation needs, note takers, testing accommodations and assistance with accessibility issues. Students should submit documentation 4-6 weeks prior to the start of classes to ensure time for the coordination of services. Academic accommodations are not applied retroactively and may only be provided to students officially registered with the Office of Disability Services. Confidentiality of records is maintained by the Office of Disability Services. Students seeking services should contact the Office of Disability Services to discuss individual needs and obtain documentation guidelines specific to their disability.

The Office of Disability Services also reviews documentation for University housing accommodations. Students are required to complete all the necessary applications, pay all deposits, and meet all deadlines set forth by University Housing. Students must then submit documentation to the Office of Disability Services along with a written request for housing accommodations. Students are encouraged to submit requests early or prior to regular housing registration. Requests received after housing assignments have been published may not be considered until the following semester due to availability.

Documentation will only be reviewed once it is complete. Students are then asked to complete the collaborative process with an intake meeting. Once ODS has complete documentation and has met with the student, the student will be notified in writing of the decision. Documentation guidelines may be obtained by contacting the office or visiting our website.

Services of a personal nature (for example, readers for personal use or assistance in eating or dressing) are not provided through ODS. However, ODS counselors may make referrals, where possible, to other offices or agencies that may assist in providing nonacademic or personal services.

**ODS Internal Appeals Procedure:**

The University of Miami, through the Office of Disability Services, has adopted a grievance procedure providing for prompt resolution of complaints by persons who believe they have been subjected to discrimination based upon their disability.

All complaints must be addressed to the University of Miami, The Office of Disability Services, P.O. Box 249003, Coral Gables, Florida, 33124 or emailed to disabilityservices@miami.edu to the attention of the director.

1. All complaints must be directed to the University of Miami, Office of Disability Services, P.O. Box 249003, Coral Gables, Florida. 33124 and addressed to the Director of the Camner Academic Resource Center.
2. All complaints must be in writing and must contain the name and address of the Complainant. In the grievance, the student or individual must set forth specific facts in support of his/her complaint. All grievances must be signed by the student or individual.
3. All grievances must be filed within 90 days of the alleged discriminatory event. If the complaint involves the denial of a student's request for auxiliary aids and services or other modifications, the grievance must be filed within ten (10) days after the student receives notification that their request for auxiliary aids and services or other modifications has been denied.

4. The grievance will be reviewed and adjudicated by the Director of the Camner Academic Resource Center, or her designee (the "Director"). In no event, will the designee be the same individual who made the initial determination as to the request for auxiliary aids, services, or other modifications or accommodations.

5. An investigation, if deemed appropriate by the Director, will be conducted by the Director following receipt of the grievance. The Director may review information and documentation contained in a student's file and/or any other information an individual may submit in support of his/her grievance.

6. Within twenty (20) days of the receipt of the grievance, the grieving party will receive a written decision from the Director.

7. The decision of the Director of the Camner Academic Resource Center shall be considered the final decision on the matter.

Retaliation against a person who files a grievance, or opposes a policy he/she believes to be discriminatory is prohibited.

Persons may contact the Assistant Director of Disability Services, who is responsible for coordinating the University of Miami's 504 compliance efforts at (305) 284-2374 (P.O. Box 249003, Coral Gables, Florida, 33124), with any questions or concerns.

Individuals, who believe that they were subjected to discrimination on the basis of disability by the University of Miami, are encouraged to use the grievance procedure to resolve their concerns. Individuals may, however, wish to file a complaint directly with the U.S. Department of Education, Office for Civil Rights, 61 Forsyth Street, Suite 19T70, Atlanta, Georgia, 30303, (404) 562-6350.
CANE CARDS

The Cane Card is an on-campus student identification card. Students, faculty, and staff must present a government issued photo ID such as a driver’s license or passport when acquiring their card. The Cane Card provides access to on-campus student residences, the Otto G. Richter Library, computer laboratories, the swimming pool, the Patti and Allan Herbert Wellness Center (for those who purchase a membership), and other facilities where access has been granted. The Cane Card is also used to control lending privileges at the library, access to athletic and other events (fee required), the purchase of discounted Metrorail tickets, U-Print services, and meal plan privileges. All University of Miami students, faculty and, staff are required to carry their Cane Cards for identification purposes while on campus.

- Lost or stolen Cane Cards should be reported to the Cane Card office at 305-284-3096 during the week or anytime by accessing your MyUM account, under the financial tab.

- Lost or stolen cards may also be reported to security 24 hours per day at 305-284-6666.

- After being reported stolen or lost, a card will be deactivated to prevent unauthorized use.

- Lost or stolen cards will be replaced for a $20 fee (fee waived upon proof of police report).

- Damaged cards will be replaced for free upon exchange of the original damaged card.

- For all issues with Cane Express accounts, call Student Services at 305-284-6430.
THE DEPARTMENT OF COMMUTER STUDENT INVOLVEMENT

The Department of Commuter Student Involvement (CSI) is located on the second floor of the University Center, Room 236. This department offers a variety of services and programs for students from Miami-Dade and Broward Counties that live at home and commute to the University of Miami. For more information, please visit our site at www.miami.edu/csi.

Great Start Pre-Orientation Program for First-Year Commuter Students

Great Start is an overnight, pre-orientation program designed to promote and emphasize college adjustment and campus involvement opportunities. The program's goal is to help you feel like a part of the University and give you a chance to meet other commuter students. Students who participated in Great Start have said the program greatly contributed to a positive transition from high school to college. Commuter student leaders are needed to serve as Program Coordinators, Steering Committee members, and Counselors. Applications are available in the fall on the Great Start website, http://www.miami.edu/greatstart.

Commuter Assistant/Transfer Assistant Program

The Commuter Assistant (CA)/Transfer Assistant (TA) Program provides first-year commuter and incoming transfer students with an experience that mirrors the programs and services offered by Resident Assistants and Academic Fellows to first-year students living on-campus in a Residential College. All first-year commuter students and interested new transfer students will be assigned to a CA or TA group and will begin meeting with this group during New Student Orientation. The CA/TA serves as a mentor, plans programs that will aid commuter or transfer students in their transition to college, and works with the Department of Orientation and Commuter Student Involvement to plan, promote, and implement initiatives specifically focused on first-year commuter or incoming transfer students. CAs and TAs are hired in the spring semester. Applications are available on the CSI website, www.miami.edu/csi.

Association of Commuter Students

The Association of Commuter Students (ACS) is a second home for its members; a place to bond with fellow students and to participate in all that the University of Miami has to offer. ACS provides its members with a working knowledge of UM that gives them the opportunity to become fully involved in campus life. Brought together by a simple fact of life, commuting to school, ACS members have forged bonds that extend beyond this common circumstance. If you would like further information on joining this very active student group, please visit their website at http://www.miami.edu/studorgs/acs/.
OFF-CAMPUS HOUSING ASSISTANCE
www.miami.edu/housing

The Department of Housing and Residential Life provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

- Individual consultations & appointments
- Over-the-phone guidance
- Knowledge of the greater Miami area & specific neighborhoods where students typically reside
- Roommate search assistance

For more information about assistance with off-campus housing, please see the Department of Housing and Residential Life web page at www.miami.edu/housing. Their office telephone number is (305) 284-4505 and their e-mail address is housing@miami.edu.
COUNSELING CENTER

www.miami.edu/counseling-center

A college experience should be both productive and enjoyable; however, at times it can be stressful and overwhelming.

The Student Counseling Center has personal counselors who can help students effectively cope with the challenges of college life and facilitate learning, growing and socializing. The Counseling Center offers a wide range of services, including short-term individual counseling, career and educational counseling, outreach programs, and various groups aimed at enhancing personal growth and development. The Center is staffed by an experienced team of professionals from the fields of psychology, psychiatry, mental health counseling and social work.

Fall and Spring semesters regular appointments are available Monday, Wednesday and Friday from 9 a.m. to 5 p.m. and Tuesdays and Thursdays from 9 a.m. to 7 p.m. Students can call the Counseling Center directly at (305)284-5511 or request appointments in person. Generally, students can be seen the same day for a crisis appointment. The University Counseling Center is located in Building 21-R of the Center for Student Services. If a crisis occurs when the Center is closed, counselors can be reached by calling the University of Miami Police department at (305) 284-6666.

SEXUAL ASSAULT RESPONSE TEAM (S.A.R.T.)

The Counseling Center also coordinates the Sexual Assault Response Team (S.A.R.T.). The number is 305-798-6666.

STUDENT TRAINING

The Counseling Center participates in the graduate training programs in the Department of Psychology and the programs of the Department of Educational and Psychological Studies. Doctoral students in psychology take part in the Center’s professional activities and have first-hand contact with clinical problems. In addition, interns obtain professional training at the Counseling Center through the Dr. Jess Spirer Predoctoral Internship in Professional Psychology.
The Dean of Students Office houses several units that provide co-curricular services. Through the Honor Council, the Office advises and directs the efforts of students, faculty and administrators in academic integrity-related concerns. The administration and record keeping of all undergraduate student disciplinary infractions are also the responsibility of the Dean of Students Office.

The Center for Alcohol and Other Drug Education and the University Chaplains Association both provide opportunities for involvement, leadership, and personal exploration. The Office of Fraternity & Sorority Life coordinates and advises the efforts of the Association of Greek Letter Organizations, the National Pan-Hellenic Council, Inc., the Interfraternity Council, the Multiethnic Greek Council, and the Panhellenic Association. Rho Lambda National Leadership Recognition Society for Sorority Women, Order of Omega Greek Leadership Honor Society, Gamma Sigma Alpha National Academic Greek Honor Society, Alpha Lambda Delta Freshmen Honor Society, BACCHUS and GAMMA are advised by various Deans within the Office.

Veteran Student Services is the newest addition to the Office and serves as a centralized campus resource for UM’s veteran student population.

The Dean of Students Office coordinates efforts in response to various student crises. Along with the Deans, the staff includes a Licensed Clinical Social Worker. The entire staff is knowledgeable and prepared to assist all students in their adjustments to campus life.

The Dean of Students Office is located in Building 21 (Center for Student Services), Suite H, (305) 284-5353.
GENERAL CAREER SERVICES

TOPPEL CAREER CENTER
www.HireACane.com

The Toppel Career Center, located in the Whitten University Center, assists undergraduate students, graduate students and alumni in formulating their career plans and in pursuing graduate/professional school as well as full-time and internship opportunities.

It is the intent and desire of the University of Miami and the Toppel Career Center to provide equal employment opportunities for students and graduates regardless of race, color, national origin, religion, gender, sexual orientation, age or disabilities.

INDIVIDUAL CAREER ADVICING with professional career advisors is available to assist students with career questions, issues and concerns. Students are encouraged to meet with a professional staff member to discuss career goals and to obtain assistance in developing a career action plan (please call to make an appointment).

WALK-IN ADVISING is a service provided to students and alumni who need assistance with developing their resume, cover letter, and/or personal statement. No appointment is necessary for Walk-In Advising - simply stop by Toppel Monday through Thursday, 10am - 4:30pm. Walk-in advising is also available for quick internship questions on Mondays, 2:00-4:00 pm and Thursdays, 10:00 am to 12:00 pm.

A series of WORKSHOPS is offered throughout the academic year. Each session provides information and skill-building activities in the areas of resume development, interviewing skills, networking, securing internships, and much more. In addition, programs designed to increase awareness of specific career paths and professional opportunities are offered. These are conducted by outside speakers and panelists who are recognized specialists in their field.

THE TOPPEL INTERNSHIP PROGRAM (TIP) is designed to provide valuable career-related work experience through internships with participating employers. Students can search HireACane for hundreds of opportunities available to them. It is recommended that students complete at least two internships while in school. Students may take on an internship position beginning the second semester of their freshman year.

The TIP Program allows students who have already secured an internship a zero-credit transcript notation from the Toppel Career Center. The University of Miami Internship (UMI) course is offered fall, spring, and summer, and will allow you to have work experience related to your major, career path, or possible career path/interest and it will provide recognition of the internship experience on your official transcript. Part-time internships require at least 160 working hours while full-time internships require at least 320 working hours.

ON CAMPUS RECRUITING (OCR): Representatives from local, national and international businesses and industries, governmental agencies, non-profit organizations, military services, human services, and school systems visit the campus to meet with students and to interview and discuss career opportunities with
students. After applying to openings via HireACane, students may be scheduled for individual interviews with visiting employer representatives.

**INFORMATION SESSIONS:** Many employers also visit campus to host information sessions about their company or organization where students have the opportunity to learn more about the career tracks and corporate culture of the company.

**CAREER EXPOS AND EVENTS** are open to all students and alumni and range from general events to major-specific fairs. CAREER EXPO is held twice a year, and is inclusive of all industries and majors. Special CAREER FAIRS are held for interested students in Accounting, Architecture, Education, Nursing and Health Care, and Non-profit/Government. Students can also participate in virtual career fairs. Regardless of the focus, these EXPOS and FAIRS are intended to provide students and alumni with an opportunity to network with recruiters from a wide variety of industries.

**ONLINE CAREER RESOURCES**

**HireACane:** A career management system where students can access internships, jobs, on-campus recruiting information, career programs, and companies/organizations attending Careers Expos and Fairs. Students can only access these additional online resources by activating and logging into their HireACane account.

**TypeFocus:** Learn about your personality and explore potential career paths by using this career assessment.

**CareerShift:** Designed to assist students in searching employer websites and job boards, and to retrieve key personnel contact information.

**GoingGlobal:** Search postings for internships and jobs abroad, view country profiles, and research information on resumes and interviews.

**The Career Insider, Powered by Vault:** Access an extensive online career library to obtain industry, career, and employer information.

**UCAN (University Career Action Network):** Connects employers with talented undergraduate and graduate students who are seeking diverse career building experiences through internships. The UCAN Internship Exchange is shared among 22 of the most prestigious and elite universities in the United States:

**CAREER LIBRARY RESOURCES:** The Toppel Career Center has established a comprehensive and current career resource and research facility, which contains career-related materials for use by University students and alumni in areas such as, salary surveys and detailed information about specific careers and the preparation necessary to attain them. Resource areas include:

- Magazines
- Career Resource Books
- Internship Resources
THE CAREER TECHNOLOGY LAB enables students to work on their job and internship search. HireACane, our online Career Management System, allows students to create a career profile, upload resumes, search for jobs and internships, and sign up for on-campus interviews. In order to gain further insight about their career and personal preferences students and alumni can utilize TypeFocus and The Strong Test, which are computerized career self-assessment tests; these are excellent tools for personal career development and decision-making.

The Launch Pad at Toppel is a career guidance component of the Toppel Career Center, providing resources to entrepreneurs and inventors at the University of Miami. They provide weekly information sessions and networking events, one-on-one facilitation to help students and alumni launch their ventures or help their companies grow, a venture coaching program, and an opportunity to join the Launch Pad Network, which will help you network with fellow entrepreneurs and inventors.
THE HONOR COUNCIL – UNDERGRADUATE
www.miami.edu/honor-council

The Honor Council is a standing committee of 29 undergraduate student representatives who are responsible for educating the University community on Honor Code related issues. The members promote academic integrity through a variety of educational programs and also investigate and adjudicate alleged violations of the Undergraduate Student Honor Code.

The purpose of the Honor Code is to protect the academic integrity of the University by encouraging consistent ethical behavior in assigned course work by students. Members of the University community who would like to request Honor Council programming or investigation of alleged academic dishonesty are encouraged to call the Secretary of the Honor Council at (305) 284-5354.
International Student and Scholar Services (ISSS)

5600 Merrick Drive, Building 21-F
Coral Gables, FL 33124-5550
Telephone: 305.284.2928
Fax: 305.284.3409
Email: isss@miami.edu
Website: www.miami.edu/internationalservices

ISSS represents the needs and interests of the University of Miami international community and provides support services and programs for international students, scholars, observers and academic departments at UM. Every year, approximately 3400 international students (undergraduate and graduate), scholars (professors and researchers), and observers from more than 115 countries representing every region of the world study, teach, conduct research and observe at the University of Miami.

International students and scholars face some unique challenges as well as opportunities while pursuing their academic goals at UM. The professional and dedicated ISSS staff provides expert advice, services, programs, and information aimed at supporting their educational endeavors and enriching their U.S. experience over the entire course of their stay. ISSS support services and programs encompass:

- Pre-Arrival Information
- Immigration Advising for Students and Scholars in F-1 and J-1 Status
- Employment Information and Authorization
- GLACIER Complete International Tax Preparation Software
- Liaison with Sponsoring Embassies, Government and Agencies
- Short-Term, Small Emergency Loans
- Assistance with Personal and Adjustment Problems
- Assistance in Coping with Crises
- Advocacy
- International Student Orientation
- International Scholar Orientation
- International Spouses Club (ISC)
- Thanksgiving Day Matchup Program
- Support for the Council of International Students and Organizations (COISO)

On the ISSS website you will find detailed information regarding each of these services and programs. Please do not hesitate to contact us should you have any questions or require additional information. We look forward to assisting you.
LIBRARIES

The University of Miami Libraries provide support and services for students, faculty and staff.

Please visit http://www.library.miami.edu/about/libraries/libraries_collections.html for detailed information.
Ombudsperson and University Troubleshooters Program

www.miami.edu/ombudsperson

The Ombudsperson acts as an independent representative of the University to listen to student grievances and complaints. The Ombudsperson listens to the concern, investigates the facts and attempts to resolve situations in the best possible way. The Ombudsperson neither makes University policy nor overrides it. However, because of extensive knowledge of the University, the Ombudsperson is in a position to interpret University policy to students and make recommendations to the central administration when policy changes are needed. The Ombudsperson expedites the decision-making process within the University and ensures that the University follows its own published policies and procedures.

The Ombudsperson and University Troubleshooters Program was not established to bypass or circumvent those individuals who have responsibility for departments or classroom instruction. Nor is the Program designed to eliminate certain structured grievance and appellate mechanisms already established by the University. Each academic department and each administrative unit has established a contact person, known as a University Troubleshooter, to assist students with academic and administrative related matters. These University Troubleshooters are faculty members and administrators who serve as a resource for students seeking assistance.

When regular channels have not brought resolution to your problem and after you have spoken to the appropriate University Troubleshooter, you should contact the Office of the Ombudsperson. The Ombudsperson seeks to resolve matters informally before they become matters in a formal grievance-appeal proceeding and assists students in reestablishing communication with the person or persons with whom a complaint may have been filed.

To access the University of Miami Ombudsperson and University Troubleshooters program, contact the Office of the Vice President for Student Affairs, Ashe Administration Building Room 244, or 305-284-4922. For more information, visit www.miami.edu/ombudsperson. Concerns may be submitted through an online form located on that website.
The University of Miami offers undergraduate on-campus housing in five residential colleges and University Village, which is comprised of seven buildings and two parking garages.

Each residential college has resident faculty members (Masters and Associate Masters), a student affairs professional staff member (Area Director / Assistant Area Director) and student staff who live in the residential college with the resident students to support and promote student well-being, safety, academic achievement, student learning, and development. In addition, numerous social, educational, cultural, and recreational programs are offered throughout the academic year.

Special Interest Housing (SIH) is also available within the residential college system—these floor communities are facilitated through the Office of Academic Enhancement and center around themes related to music technologies, diversity, world cultures, healthier lifestyles, and diverse educational experiences as well as environmental awareness.

General Highlights

- The University has both single and double rooms. Singles are assigned based on seniority living on campus and, thus, entering students are typically assigned to double occupancy rooms. Effort is taken to assign roommates of similar age, class standing, and smoking preference.
- All non-local freshmen students are required to live in University housing for two academic semesters, as long as space is available. This policy does not apply to freshmen students living with parents or legal guardians in Miami-Dade or Broward Counties.
- University Village, which is an apartment-style residential community with 12-month agreements, is an available option to juniors and seniors. The apartments are fully furnished and include in-apartment washers and dryers, full-size kitchen appliances (stove, refrigerator, microwave, & dishwasher), and free reserved parking. For general information on University Village, go on the web to http://www.miami.edu/housing.
- All housing facilities are co-educational with men and women living on alternate floors or alternating separate suites or apartments.
- All residential college rooms and apartment bedrooms are air-conditioned and equipped with a bed, dresser, desk, chair, and window coverings. A 140+-channel cable television system with many HD & digital channels and local telephone service is also provided. Each residential college room and University Village bedroom is wired for internet access.
Admitted undergraduate students, following verification of acceptance to the University and payment of the enrollment deposit, can apply for housing on-line in myUM. myUM is the University’s web-based, interactive information hub.

- Students are encouraged to apply for housing as soon as possible after paying the enrollment deposit. New freshmen housing applications should be submitted by May 1, 2012; applications received from new freshmen after May 1, 2012 will be accommodated on a space available basis.

- The $250 non-refundable deposit can be paid by credit card or electronic debit from a checking account at the time of application.

- Assignments to buildings, rooms, and specific roommates are made according to the date of application and receipt of the housing deposit.

- Whenever possible, requests for specific buildings, rooms, and roommates are honored. However, if specific preferences are not available, the University reserves the right to assign students to other locations and roommates.

The 2012-2013 housing agreement is for both fall and spring semesters (12-month annual agreement for University Village), unless the applicant is:

1. applying only for spring semester housing (not available in University Village)
2. applying only for summer session housing
3. graduating in December (and May as well for University Village)
4. participating in a University of Miami study abroad experience spring semester (or summer for University Village)
5. not enrolling in the University spring semester (or for subsequent fall semester in University Village)

Housing cancellations received through May 31, 2012 will result in the forfeiture of the $250 housing deposit. Cancellations received after May 31, 2012 will result in:

- the forfeiture of the $250 housing deposit; plus
- the canceling student remaining responsible for the fall semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing

Housing cancellations for the spring semester received through December 1, 2012 will result in the forfeiture of the $250 housing deposit. Cancellations for the spring semester received after December 1, 2012 will result in:

- the forfeiture of the $250 housing deposit; plus
- the canceling student remaining responsible for the spring semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing

*Note: Written notice of cancellations must be made to the Department of Housing and Residential Life office directly.
The dates of housing availability are:

- **Fall Semester**    August 15, 2012 - December 14, 2012
- **Spring Semester**  January 9, 2013 - May 11, 2013

The Department of Housing and Residential Life also provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

- Individual consultations and appointments
- Over-the-phone guidance
- Knowledge of the greater Miami area & specific neighborhoods where students typically reside
- Roommate search assistance

For more information about housing on campus or assistance with off-campus housing, please see the Department of Housing and Residential Life web page at [www.miami.edu/housing](http://www.miami.edu/housing). Their office telephone number is (305) 284-4505 and their e-mail address is housing@miami.edu.
STUDENT HEALTH SERVICE

The Student Health Service provides primary care, specialty care and pharmacy services to eligible University of Miami students. You are not required to have the Health Center sponsored insurance plan to utilize our services. Appointments can be scheduled at mystudenthealth.miami.edu, services are also available on a “drop in” basis.

The Student Health Service is located at 5513 Merrick Drive, Coral Gables, Florida 33146, (across from the Pavia Garage).

Contact numbers are:
Telephone: (305) 284-9100/Fax: (305) 284-4098

Hours of operation:
Fall and Spring semesters: 8:30 a.m. to 5:00 p.m., Mondays, Tuesdays, Wednesdays and Fridays. On Thursdays: 9:00 a.m. to 5:00 p.m. Sundays: 11:00 a.m. until 4:00pm
Winter break, Spring break, and Summer sessions: Monday through Friday from 9:00 a.m. to 5:00 p.m.

The Health Service is closed on Saturdays and University holidays. After hours assistance is available by calling (305) 284-9100.

For sudden, severe illness or serious accident dial 911. For illnesses or injuries requiring immediate attention, students are urged to go to an Emergency Room. After hours assistance for urgent situations can be obtained by dialing (305) 284-9100. Students with United Healthcare insurance may also contact the United Healthcare Nurseline by calling (800) 436-7709 and selecting the Health Resources option. For less urgent conditions, you may visit one of the local Urgent Care Centers.

ELIGIBILITY/ACCESS

The Health & Counseling Centers Fee, is mandatory for all students first enrolled in Fall 2010 (undergraduate, graduate, and law) regardless of credit load, as well as all International students and students registered in an off-campus program but enrolled in the University sponsored student insurance plan.

The Health & Counseling Centers Fee is optional for continuing undergraduate, domestic graduate students enrolled in less than 9 credits or domestic law students enrolled in less than 12 credit hours. Graduate students enrolled in a 700 credit course are considered full time and, therefore, must pay the Health & Counseling Centers Fee.

HEALTH INSURANCE

Domestic students enrolled in six or more credit hours per semester (or considered full time) are required to obtain adequate health insurance (see exceptions). The annual premium for the health insurance plan offered through the Student Health Service is added to each student's fees. Domestic students with adequate alternative coverage may request cancellation of the insurance fee via myUM. Insurance cancellation must be renewed each year via myUM.
Deadlines to waive the insurance are:
July 25 for the Fall semester,
January 25 for the Spring semester,
April 25 for Summer I,
June 25 for Summer II.

Domestic students can check the status of their insurance waiver/cancellation request via myUM. The insurance premium will be prorated for those students entering for the first time in the Spring or Summer semesters. No waiver and/or refund will be granted after the above dates.

Students who have previously waived the insurance charge can reinstate the insurance prior to the Spring semester or first Summer session by completing the reinstatement request form and checklist. Coverage can also be reinitiated at the start of the Fall semester by choosing not to re-waive the charge, or at other times during the academic year, if within 30 days of termination of other similar coverage, by completing the reinstatement request form and checklist. Documentation of termination may be requested.

Deadline for reinstatement of insurance is January 25th for the Spring. Please do not consider your reinstatement complete until reinstatement has been verified via myUM, the charge has been posted to your student account and all charges on your account have been paid.

All international students are required to enroll in the University sponsored health insurance program. The annual premium for this coverage is added to each student's fees.

Any additional questions regarding the health insurance requirement should be directed to the Student Health Service at 305-284-9100 or to studenthealth@miami.edu.

IMMUNIZATION

All students are required to provide proof of immunization against measles, mumps and rubella; and tetanus, diphtheria and pertussis. All new students must also provide proof of immunization against hepatitis B and meningococcal meningitis or sign a waiver declining these immunizations. An immunization form must be completed and returned to the Student Health Service prior to arrival on campus. For students less than 18 years old, the meningitis/hepatitis vaccine waivers must be signed by a parent or legal guardian.

All international students must also be screened for tuberculosis by completing page two of the immunization form.

Deadlines for submission of immunization records are Fall - August 22nd, Spring - January 15th, Summer - April 15th. Failure to comply with this requirement will interfere with registration. A $50.00 processing fee will be charged for any form received after the start of the semester. Immunization information must be entered at mystudenthealth.miami.edu prior to faxing or mailing the form to the Student Health Service for verification. Immunization compliance can also be verified at mystudenthealth.miami.edu. Instructions on the use of mystudenthealth.miami.edu is available at www.miami.edu/student-health.
Most students will be able to obtain the required immunization information from their prior medical providers or from their prior high school, college or university. Students who believe that they were previously immunized but are unable to provide proof of immunization may either obtain blood tests confirming immunity or obtain the necessary immunizations. Immunizations and blood tests documenting immunity are available at the Student Health Service. All charges are in addition to processing fees for late forms.

Immunization against varicella (chicken pox) is suggested and is available at the Student Health Service for a reasonable charge.

**PHARMACY**

The pharmacy is located on the second floor of the Student Health Service, and can fill prescriptions from most local and out of town medical providers.

Prescription prices are often lower than at local drug stores, and most insurance plans are accepted. For students with the Student Health Service sponsored United Healthcare insurance plan, low cost generic medications are available at the Student Health Service Pharmacy. Non-prescription medications, vitamins, nutritional supplements, personal care products, over-the-counter medications, and condoms are also available. New prescriptions can be dropped off or called or faxed by the ordering provider. Refill requests will be handled most promptly by having your prescription number available and calling the automated refill line at (305) 284-5922. Refills can also be requested by calling (305) 284-5922 option 2.

- Students, spouses, and dependents may have their prescriptions filled at the Health Service pharmacy.
- Students with the Health Service sponsored insurance plan receive enhanced benefits if prescriptions are filled at the Health Service pharmacy.

Pharmacy telephone: (305) 284-5922; fax: (305) 284-4883.

Hours of operation:
Fall and Spring semesters are from 9:00 a.m. to 5:30 p.m., Monday through Friday.
Winter break, Spring break, and Summer sessions, 9:00 a.m. to 5:00 p.m. Monday through Friday.

The pharmacy is closed on Saturdays, Sundays, and on University holidays.
UNIVERSITY DINING SERVICES

The University of Miami Dining Services program offers students a variety of food options conveniently located throughout the campus. Among these are the:

Hurricane Food Court - featuring varied concepts including several well-known national brands

- Courtside Eatery at the Wellness Center - featuring a variety of healthy food options
- Jenkins Snack Bar – the perfect spot to grab a quick bite at the School of Business
- The Oasis – specializing in kosher deli products
- C-Store – a full service convenience store
- Starbucks at Richter Library – your favorite specialty coffee
- Carts – for your convenience around campus [Communication, Memorial, and Merrick]
- Village Marketplace – providing UV residents your convenience store needs
- Subway – enjoy a delicious sub at the Law School
- Sebastian’s Café – offers specialty sandwiches and salads at UM’s Newman Alumni Center
- GOT Spot featuring Rose’s Café – our newest addition located at the University’s Gables One Tower

The University of Miami Dining Services program offers a variety of services that meet the individual student’s schedule of classes and extracurricular activities. Five different meal plan options are offered at the Hecht/Stanford and Mahoney/Pearson Dining locations:

- 20-meal plan provides 20 meals per week
- 14-meal plan provides 14 meals per week
- 8-Kosher Plus meal plan provides 8 meals per week
- 8-meal plan provides 8 meals per week
- 5-meal plan provides 5 meals per week
- 100 Block meal plan provides 100 meals to be consumed throughout the fall and spring semesters
- 75 Block meal plan provides 75 meals to be consumed throughout the fall and spring semesters
- 50 Block meal plan provides 50 meals to be consumed throughout the fall and spring semesters

- Enrollment in any of the residential colleges (excluding University Village) requires participation in the 8, 8-Kosher Plus, 14, or 20 meal plans.
- Freshmen must choose from the 20, 14, or 8-Kosher Plus Meal Plans only.
- The 5-meal plan and block meal plans are open to Commuter and University Village students only.
- Graduate and undergraduate students who are 25 or older as of September 1 of the meal plan contract year are excluded from this requirement.
- Commuter and other students not enrolled in the residential colleges may participate in any meal plan.
- All meal plans are available seven days a week. Students have the opportunity to eat meals five times a day up to their weekly meal total.
Dining Dollars

- Dining Dollars provided with the meal plan may be used in approved food service locations for food purchases only. Usage is limited to $20 per day.
- Dining Dollars may not be used in vending machines.
- Unused Dining Dollars at the end of the Fall Semester will carry into the Spring Semester.
- Unused Dining Dollars at the end of the Spring Semester are forfeited.
- Dining Dollars may be used at the Hurricane Food Court, Carts, The Oasis, Convenience Store, Village Marketplace, Rathskeller, Subway, Jenkins Snack Bar, Starbucks, BankUnited Center, Sebastian’s Cafe and Courtside Eatery at the Wellness Center.

Dining Services Contract

- The Dining Services contract begins with the first meal of Fall Semester and extends through the last meal of Spring Semester.
- The student indicates choice of meal program on the Dining Contract or via myUM.
- The student’s signature on the Dining Contract or election via myUM signifies acceptance of that board plan for the period indicated.
- Students who do not enroll in any of the meal plans will be force enrolled onto the 14 meal plan. All terms and conditions will be binding upon the student.
- Meals are not served when the University is not in session, during official University vacation periods, or between semesters.
- The entire semester amount must be paid in full at the same time students pay other registration costs (tuition and fees) during or before the first week of classes.
- All students may make changes to their meal plan within the first week of the semester by notifying the Department of Dining Services or via myUM.
- Changes made to meal plans for the Spring Semester will be assessed a $40 processing fee.
- Charges will be prorated up to the end of the week.
- Meal plan weeks run Monday through Sunday.
- Releases will be subject to a $300 cancellation fee plus full charges through the week of cancellation, and may also result in a Dining Dollars surcharge fee.
- Approval is obtained solely through the Department of Dining Services.
- The University reserves the right to terminate the contract by written notice if a student fails to comply with any of the terms and conditions of the contract and all other University and Dining Services rules and regulations.

For more information on Dining Services write to University of Miami, Dining Services, P.O. Box 248106, Coral Gables, FL 33124-6909, call Dining Services at 305-284-3584, email diningservices@miami.edu or visit www.miami.edu/dining-services.
HONORS PROGRAMS

In 1957 the faculty of the University of Miami established the General Honors Program to provide an academically challenging course of study for outstanding students. The program was later expanded by the addition of departmental honors. Students who satisfactorily complete the requirements for general and/or departmental honors are graduated with General Honors and/or Departmental Honors; the award is noted on the graduates diploma and official transcript.

GENERAL HONORS PROGRAM

Over the past four decades since its foundation, the General Honors Program has grown. The program coordinates courses and sections each semester at the introductory through advanced levels, in a wide variety of fields in all colleges and schools of the University. In general, Honors courses are small classes taught as seminars with emphasis on interactive learning and discussion.

ADMISSION TO GENERAL HONORS

The University of Miami Honors Programs takes the initiative to invite the top 10% of the entering freshman class to join the General Honors Program. On receipt of an invitation, there is no further action required on the part of the student.

RETENTION AND REQUIREMENTS FOR GRADUATION WITH GENERAL HONORS

To remain in the General Honors Program a student must maintain an overall academic average of 3.500 and complete at least two Honors courses (six credits) per academic year.

To graduate with General Honors, a student must satisfy at least 24 credits in General Honors courses with a grade of “B” or better and have an overall grade point average of 3.500. Twelve of the 24 credits must be in courses at the 200 level or above. No more than 12 credits in the student’s major may be counted toward the 24 credits in General Honors.

WITHDRAWAL, DISMISSAL, AND REINSTATEMENT TO GENERAL HONORS

Students may withdraw from the program at any time at their discretion. They should notify the Honors Office in writing of their intention to withdraw. Honors students grade point averages and general performance are reviewed each academic year. Any student who fails to maintain the required cumulative grade point average or fails to take the required number of Honors credits will be excused from the program. Students may re-enter the program when their grade point average reaches 3.500; however, students must inform the Honors Office of the improved average and of their interest in re-entering the program.
DEPARTMENTAL HONORS PROGRAM

Among the departments offering approved programs for honors study at the junior-senior level for both majors and elective students are American studies, art and art history, biochemistry and molecular biology, biology, business administration, chemistry, computer science, engineering, English, finance, French, German, history, international finance and marketing, international studies, Judaic Studies, marine science, mathematics, meteorology, microbiology and immunology, philosophy, political science, psychology, religious studies, sociology, Spanish, and women’s and gender studies. Admission into the program is by invitation, but any student who believes himself or herself qualified may apply to the Chairman or the Departmental Honors Advisor of the major department, preferably during the sophomore or early junior year. Upon successful completion of the required program and with approval by the faculty of the department, the notation Departmental Honors in ... is included in the candidate’s diploma and transcript.

Departmental Honors Programs are designed primarily to provide an opportunity for the superior student to intensify and deepen his or her knowledge of the major, to permit closer associations with professors in the student’s area of concentration, and to prepare the student for research, thesis preparation, and other work at the graduate level in the major areas.

Minimal requirements for graduation with Departmental Honors are:
1. an over-all average of at least 3.300;
2. six credit hours or more in independent study, senior thesis, or designated advanced or special honors courses specified by the department, with grades of at least B;
3. an average in the major of at least 3.500.

Some departments specify additional requirements; the prospective Departmental Honors student should confer with the Honors Advisor within the department about specific requirements.

The College of Engineering offers a professionally oriented honors program which is described in their respective listing elsewhere in the Bulletin.

FOOTE FELLOWS PROGRAM

The Foote Fellows program, established in honor of former University of Miami President, Edward T. Foote II, each year gives a highly selected group of incoming first-year undergraduate students an opportunity to explore a wide range of academic pursuits and interests across the curriculum. Foote Fellows, who are required to fulfill certain areas of study determined by their individual school or college, are exempted from completing University general education requirements. They also receive special academic advising and mentoring as well as the opportunity to participate in cultural, social, and educational events.

HONORS PROGRAM IN EXERCISE PHYSIOLOGY (HPEP)

The Kinesiology and Sports Sciences Department offers an accelerated Masters degree program for students who have completed their 4-year undergraduate program in Exercise Physiology. It allows students to complete their Masters degree in Exercise Physiology within one year of their BS degree obtained in that major.
The additional year of study will enable students to complete all requirements leading to a Master of Science degree in Exercise Physiology in the School of Education, (M.S. Ed.), in 5 years. To be considered applicants must be in the top 10% of their high school graduating class. Students must have a minimum SAT score of 1300 or an ACT score of 30 and an Unweighted GPA of 3.75. The HPEP application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN LATIN AMERICAN STUDIES (HPLA)

The Honors Program in Latin American Studies (HPLA) is a dual degree program that allows students to receive a Bachelor of Arts and Master of Arts in five years following a rigorous, efficient, accelerated curriculum. This highly selective group of students will enjoy close faculty mentoring and the opportunity to engage in specialized research projects with faculty. Students will receive first-hand experience in their regions of focus by studying abroad. Most study abroad opportunities are for duration of six months. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Latin American Studies. The HPLA application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN MARINE GEOLOGY (HPMG)

The Honors Program in Marine Geology (HPMG) allows exceptional students to pursue an accelerated program in the undergraduate Geological Sciences and graduate Marine Geology and Geophysics programs. The degree consists of an undergraduate Bachelor of Sciences degree in Geological Sciences from the College of Arts and Sciences, combined with a graduate Master of Science degree from the Division of Marine Geology and Geophysics at the University of Miami Rosenstiel School of Marine and Atmospheric Science. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Marine Geology. The HPMG application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN MEDICINE (HPME)

The Honors Program in Medicine (HPME) provides an opportunity for outstanding high school seniors who are seeking careers in medicine or medical science to obtain the Bachelor of Science and Doctor of Medicine degrees in seven or eight years.
This program has been designed by the School of Medicine and the College of Arts and Sciences. It provides a plan whereby students entering the University of Miami are admitted simultaneously into the Honors Program and a special Privileged Studies Program in the College of Arts and Sciences which allows HPME students to participate in an enriched and challenging curricular experience without the strictures of conventional distribution requirements. HPME students are secure in the knowledge that they will have a place in the University of Miami School of Medicine as early as three years provided they maintain a cumulative grade point average of 3.700 in the sciences as well as an overall 3.700 GPA and score at least a 30 on the MCAT exam.

Applicants must have had in high school, or be in the process of completing at the time of application, four years each of English and mathematics and one year each of biology, chemistry, and physics. A course in calculus must be taken before beginning the program. Applicants who would like to be considered must have minimum scores of 1400 on the SAT I (or 32 ACT), be in the top 5% of their high school graduating class and have an unweighted GPA of 3.750. College Entrance Examination SAT II Subject Tests must be taken in mathematics, and either biology, chemistry, or physics and have a minimum score of 600. These tests must be taken no later than the October testing date of the applicant's senior year in high school. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Medicine. The HPME application form and all supporting materials must be submitted by November 1 of the applicant’s senior year. A review of completed applications will begin by the end of November. Selected applicants will be invited for an on-campus interview with a member of the HPME Admission Committee.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.

HONORS PROGRAM IN PHYSICAL THERAPY (HPPT)

The University of Miami offers the Honors Program in Physical Therapy to high school graduates with high academic ability and achievement seeking careers in physical therapy. Participants may earn both the Bachelor of Science in Health Science (B.S.H.S.) and the Doctor of Physical Therapy (DPT) degrees in a six-year accelerated program, rather than the customary seven years.

The Honors Program in Physical Therapy is a cooperative venture of the School of Nursing and Health Studies and the School of Medicine, with students majoring in Health Sciences. Students pursue an enriched and highly challenging undergraduate curriculum, secure in the knowledge that they will have a place in the graduate physical therapy program after successful completion of three years of pre-physical therapy curriculum.

Applicants must be in the top 5% of their class and have a minimum SAT I score of 1360 (or ACT 31) and an unweighted GPA of 3.75. These tests must be taken no later than the December testing date of the applicant’s senior year in high school. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Physical Therapy. The Honors Program in Physical Therapy application form and all supporting materials must be submitted no later than November 1st of the applicant’s senior year.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree.
HONORS PROGRAM IN LAW (HPLW)

The University of Miami offers the Honors Program in Law (HPLW) which allows excellent students with high academic ability to gain admission to both undergraduate study and to graduate study in the law school. Such an achievement eliminates the pressure of applying to law school and gives qualified students the chance to complete both Bachelor’s and Jurist Doctorate degree in 6 years. Applicants who wish to be considered for admission must be high school seniors in the top 5% of their class, have a minimum SAT I score of 1400 or (ACT 32) and an unweighted GPA of 3.750. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Law. The HPLW application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address. www.miami.edu/dualdegree.

COURSES OFFERED IN HONORS - Dept. Code: HON

A list of these courses varies from semester to semester; an accurate list of offerings for a particular semester may be obtained from the Honors Program website (www.miami.edu/honorsprogram) or myUM.

HONOR SOCIETIES

The following honor societies have chapters at the University of Miami:

Alpha Epsilon Delta (Pre-Med)
Alpha Epsilon Rho (Electronic Media)
Alpha Eta Mu Beta (Biomedical Engineering)
Alpha Kappa Delta (Sociology)
Alpha Lambda Delta (Freshmen General Scholarship)
Alpha Phi Sigma (Criminology)
Alpha Pi Mu (Industrial Engineering)
Alpha Psi Sigma (Criminology)
Alpha Rho Chi (Architecture)
Beta Alpha Psi (Accounting)
Beta Beta Beta (Biology)
Beta Gamma Sigma (Business)
Chi Epsilon (Civil, Architectural and Environmental Engineering)
Eta Kappa Nu (Electrical and Computer Engineering)
Golden Key National Honor Society (General Scholarship)
Honors Students’ Association (General Scholarship)
Mortar Board (General Scholarship)
Omicron Delta Kappa (General Scholarship)
Phi Alpha Theta (History)
Phi Beta Kappa (General Scholarship)
Phi Kappa Phi (General Scholarship)
Phi Lambda Pi (General Scholarship)
Phi Sigma Tau (Philosophy)
Pi Delta Phi (French)
Pi Kappa Lambda (Music and Music Education)
Pi Sigma Alpha (Political Science)
Pi Tau Sigma (Mechanical and Aerospace Engineering)
Psi Chi (Psychology)
Rho Rho Rho (Marine Science)
Sigma Delta Pi (Spanish)
Sigma Gamma Epsilon (Geological Sciences)
Sigma Tau Delta (International English)
Sigma Theta Tau (Nursing)
Tau Beta Pi (Engineering)
Tau Sigma Delta (Architecture)
Theta Alpha Kappa (Religious Studies)

The Ultimate UM EXPERIENCE (UMX) – DEPT CODE: UMX 100

This one-credit elective course is taught by University of Miami faculty, administrators, and advisors across different disciplines as a way of providing mentoring to incoming students. The objective is to help new students transition to college life while introducing them to the many services offered by the university and in the surrounding community.

UMX 100 provides a firsthand experience in utilizing UM resources necessary for success in college and beyond. Specifically, students will be exposed to campus leadership opportunities, academic and career planning, university traditions, study abroad opportunities, personal wellness programs, as well as advising and registration. UMX 100 meets once a week for 50 minutes.

The UMX 100 sections open to ALL UM freshman and transfer students are:

- Arts and Sciences General Majors
- Arts and Sciences Undeclared Students
- Sports and Wellness
- International Students

The UMX 100 sections available to students declaring majors in the following areas:

- Psychology and Neuroscience Majors
- Nursing/Health Science Majors
- Education Majors
- Business Majors (Pre-Law/Pre-MBA)

The UMX 100 sections offered to those students who represent the university through the following programs:

- Hammond Scholars
- UM Student Athletes

For any questions pertaining to UMX 100, please contact the Camner Academic Resource Center at 305-284-2800.
Freshman Seminars

FFA 190-199. Freshman Seminars in Arts
FLT 190-199. Freshman Seminars in Literature
FNS 190-199. Freshman Seminars in Natural Science
FPR 190-199. Freshman Seminars in Philosophy/Religion
FSS 190-199. Freshman Seminars in the Social Sciences

Conceived as alternatives to standard freshman survey courses, Freshman Seminars offer a limited number of students a small class focused on a specific topic. The seminars are interdisciplinary in nature and/or experimental in subject and design. Seminars are taught by distinguished faculty from a wide variety of academic disciplines. No student may take more than one. Freshman Seminars are 3 credit courses that may be used to fulfill general education requirements in natural sciences, social sciences, or humanities (literature, fine arts, philosophy, and religion).
RESEARCH AND SPONSORED PROGRAMS

OAK RIDGE ASSOCIATED UNIVERSITIES
Since 1956, students and faculty of the University of Miami have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 91 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact Dr. Helena Solo-Gabriele, ORAU Councilor for University of Miami at 305-284-2908; or contact Ms. Monnie E. Champion, ORAU Corporate Secretary, at 865-576-3306; or visit the ORAU Home Page (http://www.orau.org).

PATENT AND COPYRIGHT REGULATIONS
Discoveries or inventions, whether or not subject to patent or copyright, developed by students as a result of research done or in connection with theses, dissertations or problems pertaining thereto, or as a result of a program of research financed wholly or in part by University funds, or by funds under the control of the University shall be the exclusive property of the University except as may be otherwise required by the terms of research grants or contracts. The University Patent and Copyright policy provides for the inventor(s) to share in any royalties received for any patented or patentable discovery or invention in which the University has a property interest. Any such discovery or invention shall be so disclosed promptly, but in any event within a period of not more than two months, to the Office of Technology Transfer. For specific information regarding the Policy, contact the Office of Technology Transfer, Medical Campus, 243-5689.

USE OF HUMAN SUBJECTS IN RESEARCH
All research that involves the use of human subjects must be reviewed and approved by one of the University Institutional Review Boards for the Protection of Human Subjects in Research. This policy applies to both funded and non-funded faculty and student research. Any individual student research project, including thesis or dissertation, that involves human subjects must be approved by one of the committees prior to initiation of the research. If there are any questions on whether or not a project constitutes human subjects research, please refer to the policies and procedures on human subject research which can be found at www.hsro.miami.edu. For additional information, contact the Human Subjects Research Office at (305) 243-3195.
The University of Miami maintains a Veterans Affairs (V.A.) Office in the Office of the Registrar, 121 University Center, to assist veterans and dependents of veterans who are entitled to V.A. educational benefits under Chapter 30, 31, 32, 33, or Chapter 35 of Title 38, U.S. Code, and Chapter 1606 or Chapter 1607, Title 10, USC. Anyone needing information on Veterans Benefits is advised to contact the Office of the Registrar or visit the Registrar’s website at www.miami.edu/registrar and select “Veteran Information”.

V.A. students with previous postsecondary educational training/experience must request official transcript(s) be sent to the school. If the transcript has not been received prior to the end of the student’s initial semester, or as specified in the guidelines under the program he/she is enrolled in, the Veteran Affairs Office will not re-certify the student for V.A. educational benefits. The Veteran Affairs Office may re-certify the student after the transcript has been received.

The V.A. student’s previous training and/or experience will be evaluated by the school. Should credit(s) be accepted and/or granted, the V.A. student’s tuition and training time will be reduced proportionally. The V.A. and the student will receive a written notice of the credit(s) allowed.

STANDARDS OF PROGRESS POLICY FOR VETERANS

Satisfactory progress is indicated by a Satisfactory Progress Average (SPA), which is a variation of the Quality Point Average (QPA). The SPA is computed by the following formula:

A=4
B=3
C=2
D=1
E=0
IE=0
F=0
IF=0
NG=0

Note that “E’s”, “F’s”, “IE’s” and “IF’s” are included in the SPA.

A grade of CR will be counted as CR=2.

The SPA is determined by dividing the total quality points earned by the credits attempted.

When a course is dropped with a grade of W, the V.A. requires a student to repay any benefits received for that course unless the V.A. determines there are mitigating circumstances involved.

Benefits will not be paid for courses in which a student receives an NG or NC.

- An SPA of 2.0 or greater for undergraduate students, or 3.0 or greater for graduate students, is satisfactory progress.
• Less than 2.0 for undergraduate, and less than 3.0 for graduate students, is not satisfactory.

• Law and M.D. students will be considered to be making satisfactory progress as long as they meet the academic standards set by their schools for retention in their degree programs.

• The SPA is non-cumulative. It is computed each term on a one-term basis.

• Any term a student’s SPA is less than 2.0 for undergraduate or 3.0 for graduate, he/she will be notified that he/she is not making satisfactory progress. He/she will be certified, in a probationary status, for only one additional semester.

• If, at the end of this additional semester, his/her SPA for that semester is still below the satisfactory level, the V.A. will be notified of the unsatisfactory progress and his/her educational benefits will be terminated.

• A student whose V.A. educational benefits have been terminated for unsatisfactory progress may petition the Veteran Affairs Office, 121 University Center, to be re-certified after one semester has elapsed.

• The Veteran Affairs Office may re-certify the student for V.A. educational benefits only if there is a reasonable likelihood that the student will be able to attain and maintain satisfactory progress for the remainder of the program.

FOR V.A. PAYMENT OF BENEFITS PURPOSES

• An “I” (Incomplete) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of one calendar year unless permission for a delay is granted by the Academic Dean.

• An “NG” (no grade) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of one regular semester unless permission for a delay is granted by the Academic Dean.

• If permission is obtained, a memo signed by the Academic Dean must be given to the Veteran Affairs Office during the semester in which the “I” or “NG” was to be removed. This memo should also state period of time for which delay is approved.

• If a memo giving permission for a delay in the “I” or “NG” removal is not received by the end of the semester in which the “I” or “NG” was to be removed, the V.A. will be notified of the incomplete grade resulting in loss of educational benefits for that course.

Please consult with our office regarding regulations for ”IP’s” received in Thesis, Research, or Dissertation.

There is an official period after each registration in which a student may drop a course without a “W” appearing on his/her grade report. This period is not to be confused with the last date to drop a course with a “W” grade. Please check the academic calendar on the Registrar’s website for dates: www.miami.edu/registrar.
CLASS ATTENDANCE AND ABSENCE

- Regular and punctual class attendance is vital for all students.
- It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.
- A copy of the student’s transcript will be placed in the student’s permanent file maintained by the Veteran Affairs Office.

Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses. V.A. educational benefits will only pay for courses that are toward the program in which you are enrolled.

Veterans and children of deceased or totally disabled veterans receive training allowance in proportion to the schedule carried. The full load required to receive full training allowance is 12 in undergraduate school (nine in Graduate School).
INTRODUCTION

The School of Architecture offers a five-year, accredited professional program leading to the Bachelor of Architecture degree. The Bachelor of Architecture fulfills the educational requirements for professional registration. It offers specialized architectural study through upper-level studios and architecture electives, as well as opportunities for the study of liberal arts through the elective sequence leading to a minor.

MISSION

- Prepare students for professional leadership and lifelong learning in architecture, urbanism and related fields.
- Preserve and develop knowledge for the profession through research and practice.
- Share knowledge locally and internationally through community service.
- Promote building and community design goals of environmental responsibility, social equity and economic sustainability.

ACCREDITATION

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accrediting Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The School of Architecture’s location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals. Students have the opportunity to work with the faculty in the exploration of theoretical issues and in the resolution of practical problems. The School of Architecture values and sustains a
creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

RESOURCES

The school’s resources, including a state-of-the-art computer laboratory, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for undergraduate architecture students include: the Historic Preservation Certificate, the Master of Urban Design, the BSAE/MARCH and the BARCH/MBA.

ACADEMIC POLICIES

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the School of Architecture is selective and highly competitive. Application to the Bachelor of Architecture program is requested by January 1st. Early application is encouraged.

Freshman: Admission decisions are based on the following factors: portfolio, secondary school record, SAT/ACT score, counselor’s evaluation and the student essay.

Transfer Students: The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 G.P.A. is required for transfer admission. A portfolio is required for advanced placement in the design sequence of the Bachelor of Architecture Program. Application deadline for the School of Architecture program is March 1st.

Transfer Students

All transfer students requesting advanced placement in design must provide a portfolio of previous academic design and graphic work and three academic recommendations. Students accepted into third year design will be required to complete a transitional design course (ARC 301) during the summer prior to enrollment. The courses MTH 130 and PHY 103, or their equivalent be completed before admission into ARC 305.

Student Responsibilities

Students in the School of Architecture are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Written requests for variation from program or school requirements are reviewed by a faculty committee.
Academic Progress and Probation

The School of Architecture will review each student’s record at the end of each semester. When a student’s semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with School of Architecture policies and procedures. Students on probation are not permitted to enroll in more than 13 semester hours, shall meet on a monthly basis with their academic advisor, and may have a STOP placed upon their future enrollment until grades for work-in-progress are reviewed. First semester freshmen who have a semester grade-point average below 2.0 shall be placed on probation.

<td>2.3</td>
</tr>
</tbody>
</table>

Students must complete all Architecture Design studios with a grade of C- or higher. Students receiving two consecutive C- grades in architecture design studios will have to repeat the later course. Students receiving a grade of D+ or lower in an architecture design studio must repeat the studio and will be restricted to a 15 credit semester load. The student will meet with an academic advisor on a monthly basis and will be reviewed prior to continuation.

Academic Dismissal

A student in the School of Architecture whose CGPA or progress toward degree completion falls below the level of the minimum standards of the University of Miami may be dismissed. In the School of Architecture this includes a student who receives three grades of D+ or lower in design courses.

Class Attendance and Absences

Class attendance is mandatory for all architecture courses; three unexcused absences constitutes grounds for dismissal from the course and/or a failing grade. Students are required to be present for an entire design review, therefore, students arriving late or departing early from class will be considered absent. Excused absences require written notification and are granted by the instructor.

Failing Grades or Incompletes

A required architecture course in which a student receives a failing grade must be repeated during the first subsequent semester in which the course is offered. Incompletes can be given only for reasons of serious illness or exceptional hardship.

Student Work

The University may retain selected student work and may place it in the architecture archives for exhibition, publication, or other use as the University deems appropriate. Each student in architecture is encouraged to maintain a design portfolio of every project undertaken throughout the five-year program.
Permission to Take Courses at Another University

A form is available from the Office of Academic Services and should be completed and approved PRIOR to off-campus enrollment. Students are encouraged to provide complete documentation for each course request form. Each student requesting transfer credit must supply the University of Miami registrar with certified transcripts. Additionally, each student should review transfer evaluations to be certain that all courses are correctly evaluated for credit. The proper transmission and transfer of credits is the responsibility of the individual student. The last 45 credits towards the degree must be completed at the University of Miami.

Changes to Academic Requirements

The School reserves the right to change academic requirements.

Computer Requirement

Undergraduate and graduate students entering the program are required to purchase their own computers for use in the design studio. The School of Architecture computing resources are accessible via a wireless network with an approved device and subject to School and University policy. System requirements are published on the School of Architecture web site.

REQUIREMENTS FOR GRADUATION

The following courses are part of the required curriculum for all students pursuing the Bachelor of Architecture degree:

A. AREAS OF PROFICIENCY

English Composition: ENG 105 - English Composition I and ENG 106 - English Composition II

Mathematics: MTH 130 - Introductory Calculus

Writing across the curriculum: (minimum 15 credits required)
All required History of Architecture and Architecture Theory courses in the B.Arch. curriculum

B. AREAS OF KNOWLEDGE (24 credits required)

Arts: (6 credits required):
ARC 101 - Architecture Design I, ARC 111 Drawing I

Humanities: (6 credits required):
ARC 121 - Architecture and Culture, ARC 267 History of Architecture I: Ancient, Medieval and Renaissance

Natural World (Natural Sciences): (6 credits required):
PHY 103 - General Physics, and another course from the University’s approved master list of Natural Science courses taken as a non architecture elective.

People and Society (Social Sciences): (6 credits required):
Any History course
BACHELOR OF ARCHITECTURE MINOR REQUIREMENT

The Architecture curriculum requires a minor outside the School of Architecture, to be taken as non-architecture elective courses. The minor may not be satisfied with architecture elective courses. Many programs at the University award minors for twelve or more credits of study. Students are advised to consult the Bulletin and the chair of the appropriate department for details.

Curriculum Notes

The School reserves the right to retain all student projects done in for academic credit. MTH 130 AND ENG 105 are entry-level courses. Courses taken to achieve entry-level status cannot be considered towards the total credits required for the B.Arch. Degree.
Electives

The program requires four types of electives:

Architecture electives (7 courses)
Investigations in areas of architectural interest beyond the core requirements
Professional practice elective (1 course)
Focused examination of a topic related to practice
Non-Architecture electives (2-3 courses)
Explorations of general University offerings
Minor (4-5 courses)
Concentrated study in an area outside of architecture

A minor or its equivalent is required for all students. Areas are selected in consultation with faculty advisors.

DUAL DEGREE PROGRAMS

A six year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is also available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect. The course requirements for the BSAE/MArch program are as follows:

| Bachelor of Science in Architectural Engineering and Master of Architecture |
|---|---|---|---|---|---|---|
| Year 1 | CAE 111 Introduction to Engineering I | 3 | CAE 112 Introduction to Engineering II | 2 |

### MINOR

A minor in architecture is available to non-architecture majors as an option in the undergraduate architecture program. The purpose of the minor is to provide a general understanding and appreciation of the discipline of architecture. The minor does not satisfy professional requirements in architecture but does offer an introductory basis for further study at the undergraduate or graduate level. The program requires 12 credit hours in architecture courses.

Four architecture electives from the following list of courses: ARC 121, 122, 141, 191, 223, 267, 268, 294, 323, 371, 372, 373, 374, 390, 475, 476, 481, 521, 544, 551, 554, 584, 585, 586, 590 may be taken to complete the requirements for the minor.

### HONORS

**Henry Adams Medal**
Awarded in conjunction with the American Institute of Architects to the highest-ranking graduating student for scholarship and excellence in a professional architecture program.

**Henry Adams Certificate**
Awarded in conjunction with the American Institute of Architects to the second highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Other honors, distinctions, and awards are presented annually for excellent student performance.

[Architecture Course Listing](#)
INTRODUCTION

The College of Arts and Sciences offers courses leading to the degrees of:

Bachelor of Arts
Bachelor of Science
Bachelor of Fine Arts
Bachelor of Liberal Arts

Graduates with one of these degrees will have had a sound liberal arts introduction to the major fields of human knowledge. In addition to this background, each bachelor’s candidate has the opportunity to select an area of academic or of occupational interest. Within the degree may be built certain professional or pre-professional curricula leading to certification in teaching, or to dentistry, medicine, law, etc.

MISSION

The College of Arts and Sciences at the University of Miami is a community of scholars and students that encourages the quest for a deeper understanding of the human experience and fosters a personal commitment to lifelong learning, intellectual growth, and the enduring values of the liberal arts.

The College is dedicated to helping students develop analytical and communication skills, creative abilities, and a sense of civic responsibility needed in an increasingly complex society. It strives to provide them with a rigorous grounding in their chosen field, an awareness of the interconnectedness of disciplines, and an exposure to the discovery of new knowledge.

The College seeks to create an intellectual environment that enhances individual growth and supports scholarly activities and creative endeavors that augment human knowledge and understanding.

ACADEMIC POLICIES

The College of Arts and Sciences follows the general university academic policies outlined in the General Academic Information section of this Bulletin.

REQUIREMENTS FOR GRADUATION

BACHELOR OF ARTS AND BACHELOR OF SCIENCE DEGREES

Candidates for B.A. and B.S. degrees in the College of Arts and Sciences must complete the credit hours of work and achieve the quality point average specified for students in the University at large. These requirements are indicated in the Academic Procedures and Information section of this Bulletin.
I. Required Areas of Study. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the Areas of Study requirements of the College. In each department and program, the applicable prerequisites must be met before upper division courses can be taken. No more than six credits in any discipline may be used to satisfy the Areas of Study requirements.

A. English Composition    B.A. and B.S. degrees: 3-6 credits

Students must take English 105 and 106, or their approved equivalents, in the first year of residence. Students with an appropriate score on the Advanced Placement [AP] language and literature examination, or with an appropriate score on the International Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT verbal or ACT verbal exams may be exempted from English 105. Those with transfer credit for English 105 will take English 106 or its equivalent in the first year of residence.

B. Languages    B.A. and B.S. degrees: 3-9 credits

Students must earn at least 3 credits of a language other than English at the 200 course level or higher. Special 100- and 200-level Spanish courses are required of heritage Spanish speakers who choose to fulfill the language requirement by taking Spanish. Students may fulfill the language requirement from the following: Arabic, Chinese, French, German, Greek, Haitian Creole, Hebrew, Italian, Japanese, Latin, Portuguese and Spanish.

C. People and Society (Social Sciences)    B.A. and B.S. degree: 12 credits

B.A. and B.S. degree candidates must earn twelve credits in the following social science disciplines: Africana Studies, American Studies, Anthropology (except APY 203), Economics, Ecosystem Science and Policy – ECS 113, ECS 302 ONLY, Geography and Regional Studies (except GEG 120), History, International Studies, Judaic Studies, Latin American Studies, Political Science, Psychology, Sociology, Urban Studies and Women’s and Gender Studies. No more than six credits may be earned in any one discipline.

One approved First Year seminar course (FSS) may be taken for the Social Sciences requirement.

D. Arts and Humanities    B.A. and B.S. degree: 12 credits

B.A. and B.S. degree candidates must earn twelve credits in the three areas listed below. At least three credits must be earned in each area.

**Fine Arts:** any courses in the departments of Art and Art History, Dance (except DAN 101-104), Musicology, Music Theory, and Theatre Arts count toward this requirement.

**Literature:** Literature courses in the departments of English (200-level and higher) and Modern Languages and Literatures (300-level and higher) count toward this requirement.

**Philosophy and Religious Studies:** courses in the departments of Philosophy and Religious Studies count toward this requirement.

One approved First Year seminar course (FFA, FLT, FPR) may be taken for the Arts and Humanities requirement.
E. Mathematics

B.A. degrees: 3-6 credits
B.S. degrees: 11-15 credits

B.A. degree candidates who do not place out of MTH 101 must take MTH 101 or MTH 107 during their first year in the College. In addition, all B.A. degree candidates must earn credit in one MTH course numbered 108 or above.

B.S. degree candidates must earn 11-15 credits, consisting of a Calculus sequence: MTH 161-162, MTH 171-172 or MTH 140-141-162 and either a) a computer course approved by the major department; or b) a statistics course approved by the major department.

F. Natural World (Natural Science)

B.A. degrees: 9 credits
B.S. degrees: 4-8 credits

B.A. degree candidates must earn nine credits in two of the following disciplines: Biology, Chemistry, Ecosystem Science and Policy – ECS 111, ECS 112, ECS 202 ONLY, Geological Sciences, Marine Sciences (except MSC 313 and 314), Physical Sciences, and Physics. APY 203 and GEG 120 may also be taken for this requirement.

B.S. degree candidates minoring in one of the subjects approved as a B.S. major must earn 4 additional credits, and those minoring in other subjects must earn 8 additional credits in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credits must be taken in a department other than the major or the minor, and must be earned in courses that count toward a major in that department.

II. Writing

Every student must complete five (5) writing-oriented (W) courses beyond ENG 105 and 106. Students are required to write at least 4000 words in each W course. Writing assignments will be graded on both content and style. All literature and modern language literature courses receive writing credit. No more than 2 writing courses may be transferred and used toward the required writing intensive courses. The remaining 3 courses must be completed at the University of Miami.

III. Major

Every candidate for a degree must choose a major field. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative. The candidate for the B.A. degree may choose a major from among the disciplines offering majors in the College of Arts and Sciences, and from the Department of Economics in the School of Business Administration. The candidate for the B.S. degree must choose a major from the following areas: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Ecosystem Science and Policy, Geological Sciences, Microbiology and Immunology, Neuroscience, Physics, or Psychology. The choice of a major field should be made not later than the beginning of the junior year and must be approved by the major department. Any student making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

IV. Minor

All students (except for those majoring in Ecosystem Science and Policy) must complete a minor. For information about the selection of an appropriate minor, please see an advisor in the department of your major.
If the candidate for the B.A. degree presents Biology, Chemistry, Computer Science, Geological Sciences, or Mathematics as a major, the minor may not be selected from among these disciplines or from Biochemistry and Molecular Biology, Microbiology and Immunology, Physics, or Engineering. Subject to the foregoing, students may select a minor from any discipline in the College of Arts and Sciences, or from any School or College within the University offering a minor: College of Engineering, Schools of Architecture, Business Administration, Communication, Education, Marine and Atmospheric Science, Music or Nursing. Courses taken for the minor may also be used to satisfy the Areas of Study requirements of the College up to the limit of each area. Students planning a minor in Music should contact the School of Music for information regarding placement examinations in theory and applied music requirements.

V. Other Requirements.

Credit Only. Only free electives may be taken under this option. Courses which satisfy the major, the minor, the distribution requirements of the College and the general education requirements of the University may not be taken for credit only. Exemption. Exemption from a course or courses refers specifically to the following: a) credit by examination through the Advanced Placement (AP) or International Baccalaureate (IB) programs; b) advanced placement by proficiency examinations or test scores, with no credit earned; c) advanced standing and/or placement, with credit granted. Transfer Credits. Credits transferred from other institutions may not count towards the completion of a major or minor without the written approval of the department or program. General Electives. Sufficient for a total of 120 credits. Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses.

DEGREE PROGRAMS

BACHELOR OF FINE ARTS DEGREE

I. The candidate for the degree of Bachelor of Fine Arts must complete 120 credit hours with an overall quality point average of 2.0 or above as specified in departmental and program sections of this Bulletin.

II. The student must satisfy the College of Arts and Sciences distribution requirements for the Bachelor of Fine Arts by satisfactory completion of the General Education Requirements from the areas of study listed below:

1. Six credits of English Composition (English 105 and 106 or their equivalent).
2. MTH 101 and a course in math numbered 108 or above.
3. 5 writing oriented courses above ENG 105 and 106.
4. 6 credits in Humanities (from Literature, Philosophy, or Religious Studies)
5. 6 credits in Natural Sciences
6. 6 credits in Social Sciences

III. Students must satisfy the requirements of a major as determined by the Department of Art and Art History or the Department of Theatre Arts. Students must maintain at least a 3.0 average in their major.
BACHELOR OF LIBERAL ARTS DEGREE

I. The candidate for the degree of Bachelor of Liberal Arts must complete 120 hours with an overall quality point average of 2.0 or above.

II. He/she must satisfy the General Education Requirements of the University as set forth elsewhere in this Bulletin.

III. At least 60 of the 120 credit hours required must be in 300, 400, or 500-level courses. Of these, 30 credits must be completed in the College of Arts and Sciences.

IV. No more than 40 hours in 300-level or higher courses may be taken in any one department. No more than 52 hours (in total credits) may be earned in any one department.

V. Up to 30 of the 120 hours may be courses from other schools and colleges of the University of Miami except for those courses expressly excluded from recognition by the College. These credits include both lower and upper division courses. Students who exceed this maximum will have the number of credits required to graduate increased by the number earned over 30 credits.

VI. The student may, but is not required to, elect a major in a department. If a student fulfills the departmental requirements for the major, it will be recorded on the official transcript. No minor may be elected.

PRELAW PREPARATION

Although no specific curriculum is required in preparation for Law School, the Pre-Law Committee of the American Bar Association strongly recommends that students considering a career in Law should have a well-balanced education. This education should include courses requiring intensive writing, logical reasoning and critical thinking and reading skills.

The Office of Prelaw Advising, located in Ashe 112, provides a variety of services to all students interested in attending Law School. These services include:

1. Pre-Law Advising: confidential advising in preparation for law school (i.e. application process, general information, discussion of your concerns).
3. Pre-Law Newsletter: information about programs and events.
4. LSAT and LSDAS registration booklets (for juniors and seniors).
5. Campus-wide programs for pre-law students such as Law Day.
6. Programs and seminars in coordination with other University of Miami departments such as: School of Law Career Planning Center, School of Law Center for Ethics and Public Service, Toppel Career Planning and Placement, the Counseling Center, and the Reading and Study Skills Center.

In order to take advantage of the services listed above a student should complete a Pre-Law registration card at the beginning of the academic year.
The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available in Ungar 333 and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the Ungar Building.
UNDERGRADUATE ACADEMIC PROGRAMS

AEROSPACE STUDIES - Dept. Code: AIS
www.miami.edu/aerospace-studies

INTRODUCTION

The Department of Aerospace Studies represents the Air Force Reserve Officer Training Corps (AFROTC), at the University of Miami. Providing academic instruction and training experiences leading to commissioned service in the United States Air Force.

AFROTC is an educational program designed to provide college students the opportunity to become Air Force officers while completing a Bachelor’s degree. The AFROTC program provides superior hands-on leadership training and is designed to prepare cadets to assume positions of increasing responsibility as officers in service to their country.

Normally, the program is four years, but in some instances students can complete requirements in three years. The first two years of the program, the General Military Course (GMC), consist of a one hour class, three hours of leadership laboratory/practical military training, and two hours of organized physical conditioning each week. AFROTC cadets compete for entry into the last two years of the program, the Professional Officer Course (POC). Competition includes both quantitative and qualitative factors, such as grade-point average, unit commander’s evaluation, aptitude test scores and physical fitness test scores. If selected, cadets must complete a four-week summer Field Training Program at Maxwell Air Force Base in Montgomery, AL before entering the POC.

After earning their degree and successfully completing all Air Force ROTC requirements, cadets are commissioned as Air Force officers with a four-year active duty service commitment. Pilots, Combat Systems Officers and Air Battle Managers have longer service commitments upon completion of specialized training.

For more information, contact Detachment 155 Cadre at (305) 284-2870.

ENROLLMENT

There is no military obligation to enroll in AFROTC. To enroll students must meet the following criteria:

- Be a U.S. citizens or resident alien, or be able to become a U.S. citizen prior to attending Field Training the summer following sophomore year
- Be full-time college students, enrolled in 12 credits per semester
- Be able to participate in a demanding physical fitness program
- Be able to pass a Department of Defense Medical Examination
- Have solid moral character
- Maintain AFROTC minimum required grade point average
SCHOLARSHIPS

More than 70% of Air Force ROTC scholarships are awarded to undergraduate students in engineering or other scientific and technical disciplines. However, students in every degree program enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily. Scholarships are awarded in increments of two, three, and four years. Air Force ROTC offers several types of scholarships. Type 1 covers full tuition and most required fees. Type 2 covers tuition and fees, but is capped at $18,000 annually. Type 7 scholarships are designated for in-state tuition-level institutions. All types of awards provide an allowance for books and a monthly non-taxable stipend. All scholarship cadets are required to meet academic, military, and physical fitness standards to earn and maintain scholarship benefits.

Additionally, University of Miami undergraduates enrolled in the Air Force ROTC program are assured annual 25% subsidy of the University’s tuition for up to four years. Students must maintain continuous enrollment in the AFROTC program and full time enrollment in one of the University’s undergraduate degree program. No application required. Awards are made automatically based on information provided by the University’s AFROTC detachment.

BENEFITS

All AFROTC cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon being commissioned a Second Lieutenant in the Air Force, you will receive a starting salary and allowances worth more than $55,000 annually*. Free medical and dental care, 30 days paid annual vacation and educational benefits are also part of the compensation package.

*Based on 2011 Pay Chart and Miami FL Housing Allowance for an O-1*

EDUCATIONAL OBJECTIVES

AIS 101/102 Foundations of the United States Air Force (Lecture 1, Leadership Lab* 0)

Aerospace Studies 101/102 is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force heritage, military customs and courtesies, career opportunities, Air Force Core Values, interpersonal communications, and team building. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS 201/202 The Evolution of USAF Air and Space Power (Lecture 1, Leadership Lab* 0)

Aerospace Studies 201/202 is a survey course designed to examine general aspects of the employment of air and space power through a historical perspective. Historical examples assist in understanding the development of Air Force distinctive capabilities and missions. In addition, the students continue discussing the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders. Students also continue to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
AIS 301/302 Air Force Leadership Studies (Lecture 3, Leadership Lab* 0)

Aerospace Studies 301/302 teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

AIS 401/402 National Security Affairs and Preparation for Active Duty (Lecture 3, Leadership Lab* 0)

Aerospace Studies 401/402 is a course designed to examine national security process, regional studies, advanced leadership ethics, and Air Force Doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism with a continuing emphasis on the refinement of communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

MINOR

MINOR IN AEROSPACE STUDIES

- A minor in Aerospace Studies consists of 16 credits.
- You must take all AIS courses listed under the Aerospace Course Listing
- A grade of C- or higher, with an overall GPA of 2.0, is required in each course taken for the minor.

[Aerospace Course Listing]
AFRICANA STUDIES - Dept. Code: AAS
www.as.miami.edu/africanastudies

INTRODUCTION
The Program in Africana Studies (AAS) provides opportunities for students to learn about the experiences of people of African descent in North and South America, the Caribbean and continental Africa. Courses are presently offered leading to a major or minor in Africana Studies. Students are encouraged to pursue these courses, even if they are not majors or minors, in order to achieve a balanced education in keeping with the stated goals of the University of Miami.

EDUCATIONAL OBJECTIVES

a) To help students research, acquire, and disseminate information about the historical and social experiences of Africans and people of African descent on all sides of the Atlantic basin, but with special emphasis on the United States.

b) To facilitate students’ understanding of the multi-cultural, multi-ethnic, globalized society of our time.

c) To help students think critically about the global black experience.

d) To prepare students for graduate work and professional careers.

DEGREE PROGRAMS

Bachelor of Arts

MAJOR

MAJOR IN AFRICANA STUDIES

- A major in Africana Studies consists of 30 credits.
- Twelve of the 30 credits must be completed at the 300 level or above.
- A grade of C- or better with an overall GPA of 2.0 is required in each course taken for the major.
- Africana majors must complete the following core courses: AAS 150, AAS 490, HIS 201, and HIS 209 or HIS 210.
- Africana majors must complete one course in Caribbean Studies (ENG 361, APY 385, GEG 212, HIS 318)
- The remaining courses must be selected from the list of acceptable courses approved by the program, in any school or college within the university.
MINOR

MINOR IN AFRICANA STUDIES

- A minor in Africana Studies consists of 15 credits.
- Africana minors must complete the following courses: AAS 150 and HIS 201 or HIS 209.
- The remaining courses must be selected from the list of acceptable courses approved by the program, in any school or college within the university.
- A grade of C- or higher with an overall GPA of 2.0, is required in each course taken for the minor.
- The remaining courses must be selected from the list of acceptable courses.
- A minimum of six credits must be numbered 300 or higher.

DEPARTMENTAL HONORS

Carter G. Woodson Award - Best all-round student who combines intellectual excellence and community service.

Africana Studies Course Listing
INTRODUCTION

The Program in American Studies at the University of Miami fosters the interdisciplinary study of American culture and society, and explores the place of the United States in an increasingly interconnected world. Our faculty come from a wide range of fields, including history, literature, religion, art, philosophy, law, music, ethnic studies, anthropology, architecture, sociology, communications, and education. What unites them is the commitment to examining the U.S. from multiple perspectives, highlighting the diversity of people, cultures, and experiences that have shaped the past and present United States. The Program places analysis of globalization at its center, and encourages a hemispheric perspective that allows students and faculty to explore interests in the United States, the Caribbean, Latin America, the Pacific Rim, and other border crossings.

EDUCATIONAL OBJECTIVES

The undergraduate curriculum in American Studies encourages students to bridge the divide between disciplines by examining specific themes and topics in an engaging, dynamic, interdisciplinary manner. By exposing students to courses that place questions of cultural diversity, regional difference, ethnic and racial identity, gender and sexuality, class dynamics, and popular culture at the forefront of intellectual investigation, the Program in American Studies enables them to situate their own experiences in a wider context. It also exposes them to a multiplicity of perspectives that inform our understanding of the United States and its place in a global society. The Program strongly encourages its majors to study abroad, and faculty members help students plan their curriculum to make that option feasible.

DEGREE PROGRAMS

Bachelor of Arts

MAJOR

MAJOR in American Studies (30 credits):

A major in American Studies consists of at least 30 credits in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses. These credits must include at least 18 at the 300 level or above. All majors must complete AMS 101: Introduction to American Studies; AMS 310: The U.S., Transnationalism, and Globalization; at least two other AMS core courses; at least one course in American history, and at least one course in American literature.

Students must take three courses, chosen in consultation with an American Studies advisor, in a specialized area of American Studies (200 level or higher). Students may work in areas including, but not limited to, Ethnic Studies, Caribbean Studies, Latino/a Studies,
Environmental Studies, Communication Studies, Women's Literature, Urban Studies, Africana Studies, Religious Studies, or Material Culture Studies. At least one of these courses must be either comparative or non-U.S.-based.

Students must take courses from at least three different departments in order to fulfill the requirements for the major.

In addition, all majors must complete AMS 501: *Senior Project*. This capstone course can take the form of an individual research project or an internship at a local cultural or civic institution. For the research option, students will identify an appropriate faculty member to supervise and grade the project, and then obtain approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will be determined by the faculty member and student in consultation with the program director. For the internship option, students will partner with any number of local institutions and produce a creative and/or scholarly project for evaluation. The internship will be arranged through the program director, in consultation with the Butler Center. The final product will be evaluated by the program director.

**MINOR**

**MINOR in American Studies (15 credits)**

A minor in American Studies consists of at least 15 credits in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses. These credits must include at least 9 at the 300 level or above. All minors must complete AMS 101: *Introduction to American Studies*; AMS 310: *The U.S., Transnationalism, and Globalization*; at least one other AMS core course; and at least one course in American history or American literature.

**DEPARTMENTAL HONORS**

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505: *Honors Thesis*. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

[American Studies Course Listing](#)
INTRODUCTION

Anthropology is the scientific study of humankind, from its beginnings to the present. Of the many sciences that study aspects of humans and their behavior, only anthropology attempts to understand and integrate the entire panorama of human biology and culture in all times and places.

The Anthropology Department offers a wide range of courses for students in pursuit of the Bachelor of Arts degree, from the basic four fields of cultural anthropology, linguistics, physical anthropology, and archaeology, to advanced study of topics such as underwater archaeology, medical anthropology, Caribbean cultures, primatology, and Iron Age Europe.

The science of anthropology holds that to understand the principles of human behavior, we must compare our own behaviors with those of people from other times and places around the world. These comparisons demand evolutionary, cross-cultural studies of human behavior, constantly changing, ever intriguing us.

The field is especially suited to a multi-ethnic, multi-lingual, and multi-cultural urban center such as Miami, and the research programs of the department faculty reflect the compositions and concerns of the larger community.

Anthropological knowledge has taken an increasing role in the solution of practical problems in public health, cultural resource management, economic development in the Third World, business relations with immigrant and overseas populations, State and Federal programs, and many other areas. Anthropology majors may become professionals in the field by continuing their training in one of the many excellent graduate programs around the country.

EDUCATIONAL OBJECTIVES

Students who graduate from our program in anthropology will have achieved:

1) Basic familiarity with each of the four subfields of our discipline: archaeology, cultural anthropology, linguistic anthropology, and physical or biological anthropology.

2) Extended familiarity with one or more of these subfields in terms of knowledge of content, e.g. area ethnology in Latin America and/or the Caribbean, topical knowledge such as Drugs and Culture, Ritual and Sacrifice, Sex and Culture, Food, Primate Behavior, Iron Age Civilizations, or World Languages, or methodological skills involving field research in one or more of the subfields.

3) The ability to articulate the anthropological view of the human condition in terms of an operational definition of culture and a holistic perspective on how humans behave.

4) Sufficient skill in research to be able to produce a research paper on an anthropological topic.
DEGREE PROGRAMS

The Department of Anthropology offers a major and a minor in the University’s array of Bachelor of Arts Degrees.

MAJOR

- A major in Anthropology consists of 30 credits in Anthropology, passed with a grade of C- or higher with an overall GPA of 2.0.
- APY 201, 202, 203, 204 (or approved alternatives), and a minimum of four anthropology courses at the 300 level or higher are required. APY 208 may count as one of the six courses taken in addition to the four basic courses.
- The remainder of the program will be developed with the student’s departmental advisor.

MINOR

A minor in Anthropology consists of 15 or more credits, passed with a grade of C- or higher with an overall GPA of 2.0 including any two 200-level anthropology courses.

Any two of the following courses in other departments may be applied to the major in Anthropology; any one to the minor:

ARH 332
MCY 554
COS 545
MAF 526
MAF 501 or MAF 505.

Please check with the Anthropology department for any updates to the above list.

DEPARTMENTAL HONORS

A student with a cumulative grade point average of 3.5 or higher may earn honors in anthropology by writing a qualifying thesis paper under the direction of a member of the faculty in the Department of Anthropology.

Anthropology Course Listing
ART AND ART HISTORY - Dept. Codes: ART, ARH
www.as.miami.edu/art

EDUCATIONAL OBJECTIVES

The Department of Art and Art History provides facilities and instruction to serve equally the needs of the general student for participation in and appreciation of the visual arts and those of students with specialized interests and abilities preparing for careers in the production, teaching, utilization, and interpretation of Art and Art History.

DEGREE PROGRAMS

The Department of Art and Art History offers two degrees: the Bachelor of Arts with tracks in Art History, General Study and Studio Art and the Bachelor of Fine Arts with specializations in Painting, Sculpture, Printmaking, Photography/Digital Imaging, Graphic Design/Multimedia and Ceramics. The B.A. requires a minimum of 36 credit hours in the department with a grade of C or higher. The B. A. major is also required to have a minor outside the department. Minor requirements are specified by each department and are listed in the Bulletin. The B.F.A. requires a minimum of 72 credit hours in the department, a grade of C or higher in each course, a successful portfolio review, and at least a 3.0 average in departmental courses. The B.F.A. major is not required to have a minor outside the department.

MAJOR

DEGREE REQUIREMENTS

BACHELOR OF ARTS - ART HISTORY

Foundation Courses: 6 Credits
Any two ART courses

Art History Foundation Courses: 6 credits
ARH 131. Survey of Western Art I and
ARH 132. Survey of Western Art II

Area of Study: 24 credits
Art History: seven courses from 200 level or higher, plus one art history seminar course

Total: 36 credits

BACHELOR OF ARTS - GENERAL STUDY

Foundation Courses: 6 credits
ART 101. Introduction to Drawing I and
ART 109. Introduction to Electronic Media
Art History Courses: 9 credits
ARH 131. Survey of Western Art I AND
ARH 132. Survey of Western Art II
One course from 100, 200, or 300 level

General Study Courses: 21 credits
Any seven courses from the following areas:
Art History
Drawing
Painting
Sculpture
Printmaking
Graphic Design/Multimedia
Photography/Digital Imaging
Ceramics/Glass

Total: 36 credits

BACHELOR OF ARTS STUDIO ART

Foundation Courses: 6 credits
ART 101. Introduction to Drawing I and
ART 109. Introduction to Electronic Media

Art History Courses: 9 credits
ARH 131. Survey of Western Art I AND
ARH 132. Survey of Western Art II
One additional course at the 100, 200, or 300 level

Studio Art Courses: 21 credits
Seven Studio courses from the following areas:
Drawing
Painting
Sculpture
Printmaking
Graphic Design/Multimedia
Photography/Digital Imaging
Ceramics/Glass

Total: 36 credits

BACHELOR OF FINE ARTS

PORTFOLIO REVIEW
All students who anticipate graduating with a Bachelor of Fine Arts (BFA) degree must submit a portfolio consisting of 15-20 images of their work on either a CD/DVD or in slides for review by the faculty. Students can apply as incoming freshmen or anytime within their first years. NO STUDENT IS OFFICIALLY CONSIDERED A BFA CANDIDATE UNTIL THE PORTFOLIO IS APPROVED BY THE FACULTY. If the BFA portfolio is not submitted at the proper time or fails to be passed by the faculty, the student will be advised and registered as a Bachelor of Arts (BA) candidate.

BFA EXHIBITION
Unless otherwise instructed, each BFA candidate will take part in an exhibition of work screened and approved by a faculty member from their area of specialization, accomplished
as an art major at the University of Miami, in the Fall or Spring semester of the senior year. The BFA exhibitions are held in the College Gallery.

At the time the candidates BFA exhibition is hung, a formal critique will be arranged between the student and the art faculty.

**BFA COURSE REQUIREMENTS**

**General Foundation Courses:**
- ART 101. Introduction to Drawing I and ART 109. Introduction to Electronic Media  
  **6 credits**

**Art History Courses:**
- ARH 131. Survey of Western Art I AND ARH 132. Survey of Western Art II  
- ARH 343. Modern Art or ARH 344. Contemporary Art  
- Two courses from 100, 200, or 300 level  
  **15 Credits**

Note: ARH 346 - History of Graphic Design is required for Graphic Design/Multimedia majors. ARH 107 – History of Photography is required for Photography majors.

**Art Electives:**
- 12 Credits to be taken in the Department outside of area of specialization.  
  **12 Credits**

**Areas of Concentration (one entire sequence required):**

**Primary** concentrations can be taken in Painting, Printmaking, Graphics-Multimedia, Photo Digital, Ceramics and Sculpture.

**Secondary and Tertiary** concentrations can be taken in Painting, Printmaking, Graphics-Multimedia, Photo Digital, Ceramics, Sculpture, Introductory Art Studio (ART 102, 103, 104, 108), and Drawing (ART 102, 105, 107, 305).

**TOTAL: 72 Credits**

**BFA Minor in Art History**
All BFA studio majors automatically minor in art history. A minor outside the department is not required.

**BFA Double Specialization**
Double Specialization requires the completion of an entire sequence in a second area of specialization.

A BFA student is limited to a maximum of 21 credits in any one studio area – Painting, Printmaking, Graphics-Multimedia, Photo Digital, Ceramics, Sculpture. **Courses beyond the 21 credit primary concentration limit will not be counted toward graduation.**

A student may not exceed the required 72 credits within the Department of Art and Art History.

Students must maintain at least a 3.0 average in their major.
MINOR

A minor in Art and Art History consists of 15 credits (6 of which must be from the University of Miami) in departmental courses passed with a C or higher.

DEPARTMENTAL HONORS

Admission
Admission is by invitation from the Department Chair. Students are invited the first semester of their junior year and are required to complete the program before their date of graduation.

Requirements
Studio Art Majors - Students must have passed the B.F.A. Portfolio Review and have a GPA of 3.5 or higher in the Art major.

Art History Majors - Students must be a declared Art History major, and have a GPA of 3.5 or higher in the Art History major.

Students must complete a minimum of six credit hours in designated honors courses (ART 499 or ARH 499) with a grade of B or higher.

Students must have an overall GPA of 3.3 or higher.

Students must submit the results of their honors study for approval to a Departmental Honors Committee.

ART SCHOLARSHIPS
Partial tuition scholarships are awarded on the basis of artistic ability and academic achievement. Students must be accepted for admission to the University of Miami in order to apply for an Art Scholarship. The deadline for submission of materials is March 1.

AUDIT
Due to the nature of studio courses, it is not possible for a student to audit courses offered in the studio areas.

Art and Art History Course Listing
ASTRONOMY

For courses in Astronomy see PHYSICS, in particular PHY 110 and 545.
INTRODUCTION

Biochemistry is the chemistry of life. It includes or has large areas of overlap with molecular biology, biophysics, structural biology, cell biology, metabolism, neuroscience, nutrition, genetics, etc. It tries to explain what happens in living organisms and how biological processes are regulated. It is a relatively young science. Our understanding is still developing and students (and faculty) can learn something that is totally new every day. An Undergraduate Major in one of our two tracks, Biochemistry and Molecular Biology or Biochemistry and Nutrition, provides an excellent preparation for:

1. Medical School

2. Graduate Studies in all basic medical sciences:
   - Biochemistry
   - Molecular Biology
   - Cell Biology
   - Genetics
   - Neurobiology
   - Microbiology
   - Immunology
   - Pharmacology
   - Biophysics
   - Physiology
   - Bio-informatics
   - Biology
   - Nutrition
   - Environmental Science
   and others

3. Industry
   - Biotechnology
   - Pharmaceutical
   - Food Production
   - Food processing

4. Patent Law

5. Allied Health Professions
   - Nutrition
   - Dentistry
   - Forensics
   - Veterinary Medicine
   - Toxicology
   - Clinical Chemistry
   - Environmental Science

6. Non-Health Professions
   - Chemistry
   - Physics
   - Scientific Publishing

INTERESTING ARTICLES

EDUCATIONAL OBJECTIVES

The Department of Biochemistry and Molecular Biology intends to provide its students with the best possible opportunities to master the subject and become independent learners.
DEGREE PROGRAMS

The Department of Biochemistry and Molecular Biology offers an undergraduate B.S. degree as a member of the College of Arts & Sciences. It also offers the following graduate degrees: Ph.D. and combined M.D. and Ph.D. It offers a Molecular Medicine Pathway for medical students.

MAJOR

A major in Biochemistry and Molecular Biology leading to a Bachelor of Science degree requires a thorough foundation in chemistry and biology or microbiology and good background knowledge of physics and mathematics. Students can select one of the two following tracks.

Track 1: Biochemistry & Molecular Biology

Minimum requirements:

1. 15 credits from the courses offered by the Department of Biochemistry and Molecular Biology plus at least 16 credits in chemistry and at least 19 credits in biology. Examples of courses that can be taken for this track of the major are BMB 151, 245, 251, 260, 501, 506, 507, 509, 511 and 545. Courses printed in bold letters are absolutely required. Courses printed in italics can be taken more than once. Only in exceptional cases will BMB 401 be accepted in place of BMB 506. Students are encouraged to take at least one semester of BMB 545 (laboratory research). The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities.

A UM cumulative grade point average of 2.9 is required to declare a biochemistry major or minor. Transfer students can only declare a biochemistry major if they have a grade point average of 3.5. A grade of C or better must be earned in each Biochemistry and Molecular Biology course.

2. Required Biology and/or Microbiology courses are:
   BIL 150, 151, 160, 250, 252 or 256 or 251 (252 is preferred), 255 plus BIL 355 (Developmental Biology) or MIC 301. All the 200-level courses should be completed during the first five semesters.

3. Required Chemistry courses are CHM 111/113, 112/114, 201/205, and 202/206. These courses should be completed before the end of the sophomore year. Chemistry 304 and /or 331 are recommended.

4. Mathematics: MTH 161 and 162 or 171 and 172.

5. Physics:
   For students contemplating graduate studies: PHY 201 or 205, 202 or 206 and 207 plus laboratories or PHY 205 and 210 plus 2 physics laboratory classes. For students not contemplating graduate studies: PHY 101 and 102 plus labs are acceptable.
Track 2: Biochemistry & Nutrition

Minimum requirements:

1. 15 credits from the courses offered by the Department of Biochemistry and Molecular Biology plus at least 16 credits in chemistry and at least 19 credits in biology. Examples of courses that can be taken for this track of the major are BMB 151, 245, 251, 260, 506, 4XX (Nutrition), 501, 5XX (Nutrigenetics), 5YY (Applied Nutrition), 511 and 545. Courses printed in bold letters are absolutely required. Courses printed in italics can be taken more than once. Only in exceptional cases will BMB 401 be accepted in place of BMB 506. Students are encouraged to take at least one semester of BMB 545 (laboratory research). The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities.

A UM cumulative grade point average of 2.9 is required to declare a biochemistry major or minor. Transfer students can only declare a biochemistry major if they have a grade point average of 3.5. A grade of C or better must be earned in each Biochemistry and Molecular Biology course.

2. Required Biology and/or Microbiology courses are:
   BIL 150, 151, 160, 250, 252 or 256 or 251, 255 plus MIC 301.
   All the 200-level courses should be completed during the first five semesters.

3. Required Chemistry courses are CHM 111/113, 112/114, 201/205, and 202/206. These courses should be completed before the end of the sophomore year. Chemistry 304 and /or 331 are recommended.

4. Mathematics: MTH 161 and 162 or 171 and 172.

5. Physics:
   For students contemplating graduate studies: PHY 201 or 205, 202 or 206 and 207 plus laboratories or PHY 205 and 210 plus 2 physics laboratory classes. For students not contemplating graduate studies: PHY 101 and 102 plus labs are acceptable.

Variations of the above program are feasible for students entering with advanced standing on the basis of placement tests or for transfer students but only with the express permission of the biochemistry advisor.

Dual Degree Honors Program

The Honors Program in Biochemistry & Molecular Biology (HPBMB) is offered to mature high school seniors with strong academic ability and achievement who seek careers in biological or biomedical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Philosophy Degree (PhD) in approximately 6 years. For information see http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors/
MINOR

Minimum requirements are:

1. 9 credits in the Biochemistry and Molecular Biology track or 9 credits in the Biochemistry and Nutrition track. BMB 506 is required. Students must have all the courses that are a prerequisite for BMB 506 and a good working knowledge of chemistry and biology before they take BMB 506. The remaining credits may come from any of the courses offered by the Department. Only in exceptional cases will BMB 401 be accepted in place of BMB 506 with the permission of the undergraduate advisor. Students should become familiar with the credit sharing rules. Credits for a minor cannot be used for a major. Credits can be shared between two majors.

2. The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities. A grade of C or better must be earned in each Biochemistry and Molecular Biology course.

For graduate programs or combined Ph.D.-M.D. programs, consult the Bulletin of the Graduate School.

Registration in all 500-level courses requires permission from the Biochemistry advisor or course coordinator.

DEPARTMENTAL HONORS

Departmental honors can be earned by biochemistry majors who have:

1. successfully completed two semesters of research (5 or 6 credits of BMB 545). This research must be described in a brief thesis that needs to be approved by three BMB faculty members.

2. a 3.5 or higher grade point average in all BMB courses.

3. at least a 3.3 average for all their courses taken at the University of Miami.

For general honors see elsewhere in this Bulletin.

Biochemistry and Molecular Biology Course Listing
INTRODUCTION

The Department of Biology offers undergraduate programs for students interested in a natural science education that will prepare them for careers in biological research, medicine and other health-related fields, teaching, environmental management and other fields that require a broad base of biological knowledge.

EDUCATIONAL OBJECTIVES

The Department of Biology trains students to understand and use the scientific method, and to engage in critical thinking and experimental design. We strongly encourage original laboratory and/or field research under the mentorship of biology faculty. The Bachelor of Science in Biology prepares the student for further training in natural science, such as biology graduate school, as well as medical, veterinary, dental or other health-care professions. The Bachelor of Arts degree prepares the student for a career in more humanities-related fields such as teaching or environmental law.

DEGREE PROGRAMS

Two undergraduate degrees are available in Biology: the B.S. and B.A.
Both require a major in Biology of 34 credits with a minimum grade of C- in each course and an overall GPA of 2.0.

MAJOR

Bachelor of Science Degree

The B.S. degree is recommended in preparation for graduate schools, professional schools, marine biology, and high school or college teaching. In addition to the College of Arts and Sciences general degree requirements, the B.S. requirements are as follows:

1. BIL 150, 151, 160, 161
2. BIL 250 (Genetics) and BIL 255 (Cellular and Molecular Biology)
3. BIL 360 (General Physiology) and BIL 330 (Ecology)
4. Additional BIL electives to total 34 credits.
5. Two laboratory or field courses beyond 151, 161 are required as part of the 34 credits in BIL.

Up to eight credits toward the major, but not the minor, may be selected from the following: (1) courses numbered 300 or higher in BMB, MBF or MIC, (2) BME 305, (3) CSC 548.

- A maximum of two credits of BIL 371 and BIL 372 may be applied towards the major.
- A maximum of six credits of BIL 495, 496 and 497 may be applied towards the major.
• One course only from BIL 495, 496 or 497 may be counted towards the laboratory course requirement for the B.S. degree.
• A maximum of one credit in BIL 381 and one credit of BIL 382 may be applied towards the major, although these two courses may be taken more than once each for general elective credit.
• A maximum of one credit in BIL 481 under any single subtitle may be applied towards the major. This course may be taken more than once for general elective credit only.

In addition, students must complete the following:

1. Select one statistics course from the following: BIL 311, BIL 511, ECS 204, IEN 311, MTH 224, or PSY 204 OR one computer language/programming course from the following: CSC 120, EEN 118. This will fulfill the Mathematics-statistics/computer programming requirement under the College of Arts and Sciences General degree requirements.

2. One year of inorganic chemistry (111-112) with laboratory (113-114) (first year) one semester of organic chemistry with laboratory (201/205) (second year).

3. Two semesters of college physics with laboratory or three semesters of university physics with laboratory.

4. A minor in chemistry, ecosystem science and policy, physics, geological sciences, marine sciences, biochemistry and molecular biology, computer science, mathematics, or microbiology and immunology.

**Bachelor of Arts Degree**

The B.A. degree is recommended for students involved in interdisciplinary programs and for entrance to those professional schools and specific biological careers not requiring a B.S. degree with a major in Biology. In addition to the College of Arts and Sciences degree requirements, the B.A. requirements are as follows:

1. Biology 150, 151, 160, 161 (first year)

2. BIL electives to total 34 credits.

3. Up to eight credits toward the major, but not the minor, may be selected from the following: (1) courses numbered 300 or higher in BMB, MBF or MIC, (2) BME 305, (3) CSC 548.

4. One semester of inorganic chemistry with laboratory (111/113 or 103/105) and one semester of organic chemistry with laboratory (201/205 or 104/106).

5. A minor in a department other than natural science.
MINOR

A biology minor consists of BIL 150/151 and BIL 160/161 plus BIL electives to total 18 credits, with a minimum grade of C- in each course. (Note: All courses in the minor must be in BIL. Courses from BMB, MBF, MIC, or BME, or other natural sciences approved as a substitute for one BIL elective in the major may not be counted towards the minor.) Overall GPA in the major or minor must be a minimum of 2.0.

One half of the credits required for a Biology major or minor must be earned in residence at the University of Miami.

DEPARTMENTAL HONORS

HONORS PROGRAM

See HONORS PROGRAMS elsewhere in this Bulletin for minimal requirements. In addition to the grade point averages specified in the minimal requirements, the following program constitutes the Biology Departmental Honors Program:

1. A minimum of two of the following: Biology 495, 496, 497 (2 credits each), involving a research project carried out under the supervision of a member of the Department of Biology faculty.

2. Biology 498, a senior thesis, of superior quality, on the results of the research.

4. A minimum of two BIL credits from the following list: 253, 257, 299, 374, 375.

5. A minimum of one course in the Department of Biology at the 500 level.

6. An overall GPA of 3.3 and a biology GPA of 3.5.

Advanced placement, and in certain situations, course credit can be earned through the College Entrance Examination Board program, placement examinations, and departmental proficiency examinations.

For Graduate programs, consult the Graduate School section of this Bulletin.

Variations within the above program may be permitted by the Department Chairman in special cases.

Biology Course Listing
INTRODUCTION

Each undergraduate chemistry degree program requires the core courses CHM 111, 112, 113, 114, 201, 202, 205, 206, and 304; one year of calculus; and at least two semesters of physics. The requirements for a major are flexible and should conform to the objectives of the student. A grade of C- or higher must be earned in all courses taken for major or minor credit, and the Chemistry GPA must be 2.00 or higher. Credits earned in CHM 381 and CHM 382 do not count toward the major or minor.

EDUCATIONAL OBJECTIVES

The mission of the Bachelor's degree program in the Chemistry Department is to promote an understanding and appreciation of the role of chemistry in modern society, especially as it relates to and integrates with other biological and physical sciences and societal issues facing humanity today such as the environment, health issues and technological advances.

DEGREE PROGRAMS

Three programs lead to degrees with a chemistry major:

1. the B.A. degree
2. the B.S. degree
3. the B.S. degree with certification by the American Chemical Society Committee for Professional Training of Chemists.

MAJOR

1. The B.A. degree requires 27 credits of chemistry: the core courses; CHM 331 or 360; plus electives from the following sufficient to reach the required credit hours for the degree: CHM 316, 320, 365, CHM 401, CHM 531, 520 or BMB 401. This major is designed for premedical students, high school science teachers, and others who choose a non-science minor. It may be combined with business courses in an interdisciplinary program.

2. The B.S. degree requires 34 credits of chemistry: the core courses; CHM 360, 364, 365 and 316, 320; plus electives from the following sufficient to reach the required credit hours for the degree: CHM 401, CHM 441, 520, 563 or BMB 401 or 506. Two semesters of physics are required. This major meets the minimum entrance requirements of many graduate programs in chemistry.

3. The American Chemical Society certified B.S. degree consists of 44 credits: the core courses; 316, 320, 360, 364, 365, 441, 442, 464, BMB 506; CHM 520, and 563; at least two credits in CHM 488 or 490; either PHY 205/210; or PHY 205, 206, and 207; and both PHY 208 and 209. The Professional Chemistry Program is also available in the Engineering Science Department, College of Engineering. A senior research thesis is required by the ACS for awarding of this degree.
Variations within the above programs may be recommended by the Department. Transfer students must complete a minimum of half of the required major credits in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner. For students who plan to do graduate work in physical chemistry, a double minor is recommended: Mathematics and Computer Science through 310 and 311, Physics through 350 and 360.

**MINOR**

A minor in chemistry consists of 8 credits in chemistry courses at the 200 level or above, taken at the University of Miami, exclusive of CHM 381, 382, 488 and 490.

Credit may be earned in only one of the courses Chemistry 103, 111 or 151. Credit may not be earned in both CHM 104 and CHM 201.

**DEPARTMENTAL HONORS**

Honors in Chemistry may be earned by students who are in good standing within the University’s Honors Program. In addition to the general requirements for University Honors, a student must also complete the core courses in Chemistry; CHM 360, 364, and 365; at least six credits of CHM 490; and any three of the following: CHM 316, 441, 520, 563, BMB 502, and BMB 401 or 506, all with an average grade of at least 3.30. A written Honors Thesis and oral defense on the subject of the Honors Research must be presented by the student and approved by a Department Honors Committee.

[Chemistry Course Listing]
INTRODUCTION

Every culture and civilization has its classics: those works of art that are seen as the best of their kind, have withstood the test of time, and embody the symbolic values of their society. In the western tradition, the study of 'Classics' has focused upon the literatures and cultures of ancient Greece and Rome, and their impact on the whole subsequent history of the western world.

The significance of the study of Classics to the history of the academy would be difficult to overstate. Indeed the entire notion of a 'university,' from the days of mediaeval Paris, Bologna, Oxford, and Heidelberg on, was founded consciously and explicitly upon the study of Greek and Latin literatures and thought. The discipline has been conceived in unusually broad terms; it is intended to encompass everything that can be known about the ancient Mediterranean world. Because of this, there is room in Classics for the study of areas as disparate as literature, science, sculpture, history, architecture, religion, philosophy, theater, economics, music -- in short, the entire panorama of human endeavor. It is no wonder that the study of Classics has always tended to attract some of the liveliest and most brilliant intellects; and it is equally unsurprising that students majoring in Classics find themselves extremely well-prepared for undertaking practically any type of career, whether that be in politics, law, teaching, commercial publishing, research of all kinds, medicine, journalism, banking, or the corporate world. A degree in Classics marks the UM graduate as a man or woman of superior analytical and critical skills, one who has proved able to cope with the most rigorous academic curriculum, and who is exceptionally broadly educated in the most fundamental aspects of what it means to be human.

EDUCATIONAL OBJECTIVES

The educational objectives of the Department of Classics may be stated in a variety of ways, and on a number of levels. In terms of linguistic competency, students majoring or minoring in Classics are required to reach an appropriate level of fluency in reading ancient Greek or Latin, or both. In terms of cultural literacy, students of the Classics are educated within a rigorous curriculum exposing them to the great literary works and material cultures of ancient Greece and Rome. In terms of critical thinking, students of the Classics are trained to hone the skills of memory, analysis, and synthesis, skills that they will be able to apply for the rest of their lives in any realm of thought whatsoever.

But -- stated in the most philosophical terms -- the goal of an education in Classics is to foster and inculcate an ever-burgeoning awareness of what Cicero referred to as *humanitas* -- in short, everything it is to be human. It is the mission of Classics to expose its students to the greatest thoughts and endeavors of the human race, and to encourage them to think about what that greatness consists in, and how to enlarge upon it. The profoundest educational objective of the Department of Classics is to preserve and study all that is important or beautiful about the past, in order best to prepare for the future.
DEGREE PROGRAMS

The Department of Classics offers the Major and the Minor in Classics; for details on these, see below.

MAJOR

The undergraduate Major in Classics at UM has four possible tracks. The requirements for each of these are as follows:

Track 1: Greek (30 credits)
GRE 101, 102, 201
Five further courses in Greek (GRE 202 and above)
Two Classics-in-translation (CLA) courses

Track 2: Latin (30 credits)
LAT 101, 102, 201
Five further courses in Latin (LAT 202 and above)
Two Classics-in-translation (CLA) courses

Track 3: Latin and Greek (36 credits)
LAT 101, 102, 201 and GRE 101, 102, 201
Two further courses in Latin (LAT 202 and above) and two further courses in Greek (GRE 202 and above)
Two Classics-in-translation (CLA) courses

Track 4: Classical Civilization (30 credits)
LAT 101, 102, 201 or GRE 101, 102, 201
One further course (202 and above) in either Latin (LAT) or Greek (GRE)
Six Classics-in-translation (CLA) courses

MINOR

Students may instead elect to Minor in Classics at UM. The requirements for this are as follows;

Minor in Classics (five courses -- 15 credits). Courses that qualify for the minor in Classics are taught each semester. A grade of C-minus or better is required in each course taken for the minor, as well as an overall GPA of 2.0 or higher.

3 credits in a Greek (GRE) course or 3 credits in a Latin (LAT) course
12 credits in Greek (GRE), Latin (LAT), or Classics-in-translation (CLA) courses (in any combination desired)
GENERAL EDUCATION RUBRICS

Courses in Classics labeled 'LAT' or 'GRE' and above the 201 level -- that is, LAT 202, GRE 202, and higher -- satisfy General-Education requirements under the 'Literature' requirement of the 'Humanities' rubric.

Some courses in Classics labeled CLA satisfy General-Education requirements under the 'Literature' requirement, while others do so under the 'People and Society' requirement. These are as follows:

**LITERATURE**
- CLA 220 Greek and Roman Mythology
- CLA 223 The Ancient World on Screen
- CLA 224 The Heroic Journey
- CLA 246 Classical Rhetorical Theory
- CLA 310 Survey of Ancient Greek Literature and Culture
- CLA 311 Survey of Classical Latin Literature and Culture
- CLA 315 The Classical Epic Tradition
- CLA 340 Greek Tragedy

**PEOPLE & SOCIETY**
- CLA 221 Sports & Society in the Ancient World
- CLA 222 Sexuality and Gender in the Ancient World
- CLA 232 Ancient Law
- CLA 233 Ancient Medicine
- CLA 241 Greek Civilization
- CLA 242 Roman Civilization
- CLA 301 Ancient Greece
- CLA 302 The Hellenistic Age
- CLA 303 The Roman Republic
- CLA 304 The Roman Empire
- CLA 323 The Ancient World on Screen
- CLA 325 The Vampire in Folklore, Fiction, and Film
- CLA 370 Self and Other in the Ancient World

**DEPARTMENTAL HONORS**

Some Classics Majors may qualify to graduate with Departmental Honors in Classics. In order to earn Departmental Honors, the student must maintain a minimum average of 3.5 in all Classics courses (those labeled CLA, GRE, and LAT), plus an overall minimum GPA of 3.5. In addition, they must complete CLA 495 and CLA 496 with a grade of B or higher.

In addition, Classics Majors, Classics Minors, and other students who meet certain academic criteria are eligible for membership in Eta Sigma Phi, the National Honors Society for Classics.

[Classics Course Listing](#)
COMPUTER SCIENCE - Dept. Code: CSC
www.cs.miami.edu

INTRODUCTION
The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. The Department has faculty with strong accomplishments in the fields of algorithm engineering, automated reasoning, bioinformatics, computational complexity, computational geometry & computer graphics, cryptography & network security, data mining, molecular computation, multimedia systems, music information retrieval, scientific computing, and wireless & mobile computing.

EDUCATIONAL OBJECTIVES
The Department of Computer Science educates students in the science of software development: the analysis of domain problems, the development of algorithms and programs, the use of specialist computing techniques, the system-software and hardware platforms, and the production and deployment of efficient and robust computer software. Instruction ranges from introductory programming classes and laboratories, through to research in various areas of computer science.

DEGREE PROGRAMS
The Department of Computer Science offers a Bachelor of Science and a Bachelor of Arts, major in Computer Science. A 5-year Bachelor of Science + Master of Science program is also available.

MAJORS

Bachelor of Science in Computer Science for students in the College of Arts and Sciences

Students must complete the Core, a Track, and the Science & Ethics requirements.

Core

Computer Science (20 credits)

- CSC 120 - Computer Programming I
- CSC 220 - Computer Programming II
- CSC 314 - Computer Organization and Architecture
- CSC 517 - Data Structures and Algorithm Analysis
- CSC 527 - Theory of Computing
- CSC 531 - Introduction to Software Engineering
Mathematics (17 Credits)

- MTH 161 - Calculus I (or equivalent - MTH 140 and MTH 141, MTH 151, or MTH 171)
- MTH 162 - Calculus II (or equivalent - MTH 172)
- MTH 210 - Introduction to Linear Algebra
- MTH 224 - Introduction to Probability and Statistics
- MTH 309 - Discrete Mathematics I

Comprehensive Track (Available to all students)

- CSC 519 - Program Languages
- CSC 521 - Principles of Computer Operating Systems
- CSC 523 - Database Systems
- CSC 524 - Computer Networks
- At least 8 credits of approved electives

The Comprehensive Track provides coverage of the topics in Computer Science prescribed by the Association of Computing Machinery curriculum and the ABET Computing Accreditation Commission.

Flexible Track (Available to all students)

- At least 20 credits of approved electives

Computational Science Track

(Requires permission of the Director of Undergraduate Studies)

- CSC 210 - Computing for Scientists
- CSC 528 - Introduction to Parallel Computing
- CSC 547 - Computational Geometry
- CSC 548 Bioinformatics Algorithms
- 2 credits from CSC 410 - Computer Science Project Planning-CSC 411 - Computer Science Project Implementation
- MTH 311 - Ordinary Differential Equations or
MTH 515 - Ordinary Differential Equations
- MTH 320 - Introduction to Numerical Analysis or
MTH 520 - Numerical Analysis I
- The courses used to meet the Science requirement must include either
  - BIL150 - General Biology
  - BIL151 - General Biology Laboratory

Cryptography and Security Track

(Requires permission of the Director of Undergraduate Studies)

- CSC 507 - Data Security and Cryptography
- CSC 521 - Principles of Computer Operating Systems
- CSC 524 - Computer Networks
- 3 credits from CSC 410 - Computer Science Project Planning - CSC 411 - Computer Science Project Implementation
- MTH 505 - Theory of Numbers or
MTH 528 - Combinatorics or
MTH 561 – Abstract Algebra I or
- At least 5 credits of approved electives

Graphics and Games Track

(Requires permission of the Director of Undergraduate Studies)

- CSC 329 - Introduction to Game Programming
- CSC 529 - Introduction to Computer Graphics
- CSC 545 - Introduction to Artificial Intelligence
- 3 credits from CSC 410 - Computer Science Project Planning - CSC 411 - Computer Science Project Implementation
- At least 8 credits of approved electives. In addition to the generally approved electives, the following are approved for the Graphics and Games track:
  - EEN 596 – Maya Animation
  - MMI 504 - Audio Analysis & Synthesis
  - MMI 505 - Advanced Audio Signal Processing
- The courses used to meet the Science requirement must include either
  - PHY 101 - College Physics I or
  - PHY 205 - University Physics I

Science & Ethics Requirement

The Computer Science major requires 13 credits of Science. The Science courses must include an approved two semester sequence of courses with laboratory. Courses may be taken in Biology, Chemistry, Environmental Science, Geological Science, Marine Science, Physics, and Physical Science. The Science courses must be acceptable for the Natural Science requirements in the College of Arts and Sciences, for Bachelor of Science students. The Computer Science major requires completion of the Ethics course PHI 115. This course is acceptable for the Arts & Humanities requirements of the College of Arts and Sciences.

Approved Electives

- Any CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX (maximally 6 credits from CSC 40X - Computer Science Practicum, and maximally 6 credits from CSC481 - Undergraduate Teaching Assistant Training in Computer Science)
- CIS 360 - Analysis of Information Systems
- CIS 465 - Applied Software Project Development (instead of CSC410/CSC411)
- EEN 414 - Computer Organization and Design
- EEN 417 - Embedded Microprocessor System Design
- EEN 514 - Computer Architecture
- EEN 532 - VLSI Systems
- EEN 542 - Digital Integrated Circuits
- EEN 574 - Agent Technology
- EEN 577 - Data Mining
- MTH 320 - Introduction to Numerical Analysis
- MTH 509 - Discrete Mathematics II
- MTH 520 - Numerical Analysis I
- MTH 521 - Numerical Analysis II
- MTH 524 - Introduction to Probability Theory
- MTH 525 - Introduction to Mathematical Statistics
- MTH 528 - Combinatorics
Bachelor of Science in Computer Science for students with a Second Major in Science, in the College of Arts and Sciences

Bachelor of Arts in Computer Science for students in the College of Arts and Sciences

Students must complete the Core and Electives.

Core

Computer Science (20 credits)
- CSC 119 - Computers and Society or
  - 3 credits from CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX or
  - CIS 320 – Introduction to Programming or
  - CVJ 341 – Web Production or GEG 199 – Introduction to GIS or
  - MTH 161 - Calculus I (or equivalent - MTH 140 and MTH 141, MTH 151, or MTH 171)
- MTH 309 - Discrete Mathematics

Electives

6 approved credits from
- Any CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX
- BIL 552 - Bioinformatics Tools
- CIS 360 - Analysis of Information Systems and
- CIS 423 - Database Management Systems
- CIS 430 - Business Telecommunications
- CIS 465 - Applied Software Project Development (instead of CSC410/CSC411)
- EEN 414 - Computer Organization and Design
- EEN 514 - Computer Architecture
- EEN 368 - Internet Computing I and
  - EEN 568 - Internet Computing II or EEN 576 - Internet and Intranet Security
- EEN 567 - Database Design and Management and
  - EEN 577 - Data Mining
- MMI505 - Musician-Machine Interfaces (for Music Engineering students only)
5-year Bachelor of Science + Master of Science in Computer Science

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science, and the requirements for a 30 credit Master of Science in Computer Science with thesis. No credits may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credits towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e., CSC120, CSC220, CSC314, CSC517, CSC527, MTH161, MTH224, and MTH309.
- They have completed 3 credits of CSC410/1 in a research-oriented project.
- They have a GPA of at least 3.0 in the CSC courses taken towards their BS in Computer Science.
- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.

Students in the MS-phase must complete 3 further credits of CSC410/1 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take 600 level courses that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree. Students in the MS-phase must submit their GRE scores before they are admitted to graduate student status.

 Incoming students can be admitted to the program if their mathematics placement is MTH108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

Computer Science as a Second Major

A second major in Computer Science is available to all students. A second major in Computer Science requires completion of the requirements of either the Bachelor of Science version or the Bachelor of Arts version.
MINOR

A minor in Computer Science requires completion of the following:

- CSC 120 - Computer Programming I
- CSC 220 - Computer Programming II
- CSC 314 - Computer Organization and Architecture
- 6 credits from CSX 2XX, CSC 3XX, CSC 4XX, CSC 5XX

NOTES

- A grade of C- or better is required in all CSC courses in a major, honors, or minor.
- The overall GPA for CSC courses in a major must be 2.5 or better.
- For all Computer Science majors, at least 15 credits of CSC courses must be completed at the University of Miami.
- For the Computer Science minor, at least 9 credits of CSC courses must be completed at the University of Miami.

DEPARTMENTAL HONORS

In addition to the University’s requirements for Departmental Honors, Departmental Honors in Computer Science requires completing a major and 6 additional approved credits (all CSC 4XX and CSC 5XX courses are approved). The major or additional credits must include at least 6 credits from CSC 410 and CSC 411.

Computer Science Course Listing
CRIMINOLOGY
www.as.miami.edu/sociology

INTRODUCTION

The major in Criminology provides a comprehensive understanding of crime and the criminal justice system. The major prepares students to assume roles of leadership in this critical area of modern society. Courses are designed to review theory, research, and applications of knowledge regarding delinquency and crime, as well as to understand the manner in which offenders are processed. Students learn about the nature and extent of crime, different types of crime, and theories to explain crime. In addition, detailed analyses are made of the functions of the law, police, courts, and correctional systems and the ways in which these are linked to broader aspects of society. Students may also minor in Criminology. The Criminology major and minor are administered through the Department of Sociology.

EDUCATIONAL OBJECTIVES

CRIMINOLOGY courses have several broad objectives, including:

1. General education and development of critical thinking skills.
2. Undergraduate preparation for pursuing careers in such fields as law and society, in the local and state criminal justice systems (e.g., juvenile probation officer, pretrial services officer, crime analyst for criminal justice agencies), or in federal agencies (e.g., DEA).
3. Preparation for graduate study in criminology, criminal justice, sociology, or other social and behavioral sciences.
4. Preparation for law school.

DEGREE PROGRAMS

Students may earn a Bachelor of Arts degree in Criminology. The Department of Sociology also offers graduate degrees in Sociology (M.A., Ph.D.) with emphases in criminology and in other areas (race/ethnic relations and medical sociology).

MAJOR

The major in Criminology consists of 31 credit hours, including:

Required courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
</tbody>
</table>
One of the following two courses:

SOC 271 Criminal Justice (3 credit hours)
SOC 370 Juvenile Delinquency (3 credit hours)

Elective courses

Four other courses offered by the Department for a total of 12 credits.

Other Requirements
- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 16 credits must be earned in residency in the Department; thus, only a maximum of 15 credits can be transferred from other institutions as eligible for the CRIMINOLOGY major.

MINOR

A minor in Criminology requires a minimum of 15 credit hours, including:

Required Courses

SOC 101 Introduction to Sociology (3 credit hours)
SOC 371 Criminology (3 credit hours)

Elective Courses

Three other courses offered by the Department, of which one must be 300-level or higher, for a total of 9 credits.

Other requirements
- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 9 credits must be earned in residency in the Department; thus, only a maximum of 6 credits may be transferred from other institutions as eligible credits for the Criminology major.

1 EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education.
2 PSY 204 can be substituted for SOC 211 and SOC 212 only by students who are also majoring in Psychology.
DEPARTMENTAL HONORS

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Criminology. They must also achieve a minimum of B in all Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.

2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee in the Department of Sociology. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499 (Honors I & II). The student should have the same professor for all six credits.

3. Recruitment of eligible students is by departmental invitation at the beginning of a student’s junior year.
INTRODUCTION

Economics uses the idea of maximizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of human behavior. The program provides excellent preparation for careers in business, in government, and in international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

MAJOR

The major in economics consists of at least 24 credits, which must include:
ECO211
ECO212
ECO301
ECO302
MTH130 or MTH161 is required of all Economics majors and minors. The calculus course must be completed before enrolling in ECO302.

MINOR

Arts and Sciences students may minor in economics and are required to take ECO211, ECO212, ECO302 and two additional economics courses for a total of 15 credits.

Note: All courses submitted for the major or minor must be completed with a grade of C- or higher and with an overall grade point average of C or higher.

Academically qualified students may elect to take courses from the Departments curriculum for Honors credit.

Economics Course Listing
INTRODUCTION

The undergraduate program in Ecosystem Science and Policy (ECS) is offered by the Leonard and Jayne Abess Center for Ecosystem Science and Policy. The goal of the program is to educate the next generation of environmental leaders. The ECS program provides students with a broad background in environmental issues from a variety of perspectives, along with in-depth education in an area of specialization.

EDUCATIONAL OBJECTIVES

The ECS major offers a series of problem-based learning courses, culminating in a capstone course in the senior year. Courses emphasize integration of science and policy approaches to real-world environmental issues. This preparation gives students both the theoretical background and technical skills to pursue environmental careers in teaching and research, as well as for careers in government and private industries concerned with the environment.

DEGREE PROGRAMS

The Ecosystem Science and Policy program offers two undergraduate degree major programs: a Bachelor of Science (B.S.) and a Bachelor of Arts (B.A.). The ECS degree is a double major program. Students earning a B.S. in ECS must also complete a second major from one of the following disciplines: biology, biochemistry, chemistry, computer science, engineering, geological sciences, mathematics, microbiology, or physics. Students earning a B.A. in ECS must also complete a second major in a non-science area or the B.A. major in either geological sciences or in biology. Students are required to complete either an environmentally related internship or a research project with the Center for Ecosystem Science and Policy or with other UM faculty. Students earning dual degrees, for example from the College of Engineering and College of Arts and Sciences, must complete the ECS major and a minor in another area.

Only those courses passed with a grade of “C-” or better in the ECS core may be applied to the major or minor. All ECS majors are required to maintain an overall cumulative grade point average of 2.5 or better in order to graduate with a double major in ECS.

MAJOR

Bachelor of Science Degree: The B.S. degree is recommended for students intending to attend graduate or professional schools in pursuit of research or academic careers (including secondary or higher education). It is also suitable for those preparing for technical careers in government and private industries concerned with the environment. In addition to the College of Arts and Sciences general education requirements, the B.S. requirements are as follows:
ECS Core:
ECS 111, 112, 113, 201 or 202, 301, 302, 403, and either ECS 401 (internship) or 402 (research)

In addition, students must take the following courses, which may fulfill the College of Arts and Sciences general education or second major requirements:

Science Core:
Biology: BIL 160, 161 and 235
Chemistry: CHM 111/113, and 112/114
Environmental Pollution: CAE 240
Geological or Marine Sciences: One of GSC 110/114, or GSC 111 or MSC 111
Physics: PHY 101/106 or PHY 205, 206/208
Environmentally-related science or engineering electives to total 6 credits (at least 3 credits of which must be at the 300-level or above).

Mathematics:
As required by the College, all B.S. degree candidates must pass two semesters of calculus (MTH 151-162, MTH 161-162, or MTH 171-172) and one semester of a statistics course (e.g. ECS 204).

Social Science Core:
Economics ECO 211 and 212 or two of Political Science (POL 201, 202 or 203).
Environmentally-related social science electives to total 3 credits

Students with their second major in the College of Engineering should follow the general education and mathematics requirements of the College of Engineering.

Bachelor of Arts Degree: The B.A. degree is recommended in preparation for careers in law, government, business*, including professional schools and careers in government and private industries concerned with the environment. In addition to the College of Arts and Sciences general education requirements†, the B.A. requirements are as follows:

ECS Core:
ECS 111, 112, 113, 201 or 202, 301, 302, 403, and either ECS 401 (internship) or 402 (research)

In addition, students must take the following courses, which may fulfill the College of Arts and Sciences general education or second major requirements:

Science Core:
Ecology: ECS 232
Chemistry: CHM 101 or 111/113
Environmental Pollution: CAE 240
Geological Sciences: One of GSC 102, 103, 106 or GSC 110/114 or GSC 111
Marine Science: MSC 101 or 111
Environmentally-related science elective(s) to total 3 credits.
**Mathematics***:
As required by the College, all B.A. degree candidates must satisfactorily complete a MTH course numbered 108, or higher. All ECS majors must complete one semester of a statistics course (e.g., ECS 204).

**Social Science Core:**
Economics ECO 211 and 212 or two of Political Science (POL 201 and 202 or 203)
Environmentally-related social science* electives to total 9 credits (at least 3 credits of which must be at 300 level or above)

* Students with their second major in the School of Business Administration should follow the general education and mathematics requirements of the School of Business Administration. Environmentally-related business electives may be substituted for environmentally-related social science electives. See listing under the School of Business Administration for further information.

† Students with their second major in the School of Communication should follow the general education requirements for the School of Communication.

**MINOR**

**Minor in Ecosystem Science and Policy:**
A minor in ECS is 15 credits and includes:
ECS 111, 113, and 9 more credits in ECS (6 of which are at the 300-level or above)

[**Ecosystem Science & Policy Course Listing**](#)
EDUCATION

INTRODUCTION

Degree in Teacher Education for Elementary and Secondary Schools

The School of Education in conjunction with the College of Arts and Sciences and the School of Music offers a degree program in teacher education. Students majoring in Elementary may choose to earn their degree through the School of Education or the College of Arts and Sciences.

The program in Secondary Education enables a student to teach in a secondary school in the areas of English, Mathematics, Chemistry, Biology, Economics, Geography, History, International Studies or Political Science. Students wishing to earn certification in Secondary Education must complete a Bachelor of Arts or a Bachelor of Science degree in the College of Arts and Sciences with a major in Secondary Education. *

MINOR

TRADITIONAL EDUCATION MINOR

The requirements for a minor in education consist of 15-credits passed with a C or higher, with an overall GPA of 2.5 in courses selected from the list of acceptable TAL departmental courses. A minimum of six credits must be numbered 300 or higher. This minor does not lead to teaching credentials.

PROFESSIONAL TRAINING OPTION CERTIFICATE

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional component, one of the requirements to become a certified teacher in the State of Florida.

The PTO minor ranges from 17-18-credits. Upon completion of the program participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a Temporary Teaching Certificate in the State of Florida.

* For specific information regarding required coursework, field experiences, and State requirements, please see an academic advisor in the School of Education.
Courses for the PTO minor are:

<table>

**OTHER**

All education programs are approved by the State of Florida Department of Education.

* For specific information regarding required coursework, please see an education advisor.
ENGINEERING
www.miami.edu/engineering

MINOR

The College of Engineering offers the student in the College of Arts and Sciences a variety of 15-credit minors designed to give the student a basic understanding of the technologies that support and shape our civilization. Minors may be elected in Civil, Architectural, Environmental, Electrical, Computer, Industrial, or Mechanical Engineering. The student is given considerable freedom in choosing courses in accordance with the student’s interests.

Faculty in the College are prepared to assist students seeking Engineering minors in the preparation of programs of study.

More detailed descriptions of these minors will be found in the COLLEGE OF ENGINEERING section of this Bulletin.
ENGLISH - Dept. Code: ENG
www.as.miami.edu/english

INTRODUCTION

The English Department offers programs for students interested in a liberal arts education. While many English majors direct their studies toward careers in law, business, creative writing, secondary education, or university teaching and scholarship, an English major is just as valuable to students considering careers in any of the health professions. Students who would like to learn more about any of these programs are encouraged to consult the Director of Undergraduate Studies in the Department of English, Ashe Bldg. 321.

EDUCATIONAL OBJECTIVES

English as a discipline offers an opportunity for a general humanistic education, and it develops skills in communication and analysis essential in most careers. An education in English teaches students to write, to think critically, to weigh values, and to communicate ideas; at the same time, it affords them a sense of beauty and informs them of the heritage of their own culture as well as others.

DEGREE PROGRAMS

The major in English leads to the degree of Bachelor of Arts.

MAJOR

Students majoring in English must earn 30 credits in English courses (36 credits for Departmental Honors) and must meet the requirements for one of the tracks described below:

The English Literature Major,
The Creative Writing Concentration,
The Concentration in British Literary History, or
The Women's Literature Concentration.

Credits earned for courses in freshman composition (ENG 105, 106, 107, and 208) may not be applied toward the total number of credits required for the major. In each English course, the English major must make a grade of C- or better, with an overall GPA in the major of 2.0.

ENGLISH LITERATURE MAJOR

Requirements for the English Literature Major are as follows:

1. One of the following courses: English 201, 202, 205, 211, 212, 213, 214, 215, 260, 261. (N. B., ENG 210 may not be used toward the fulfillment of this requirement.)

3 credits
2. Four literature courses numbered 300 or above, at least two of which must be numbered 400 or above, distributed as follows: two courses in literature before 1700 and two courses in literature between 1700 and 1900.  

3. Five additional English courses other than freshman composition (i.e., any three courses designated ENG and numbered 200 or above, excluding ENG 208).

Total: 30 credits

CREATIVE WRITING CONCENTRATION
Requirements for the Creative Writing Concentration are as follows:

1. Admission to the Creative Writing Concentration is based on a writing sample submitted to the Director of Creative Writing. (For information about the writing sample, see the English Department Web site, www.as.miami.edu/English).

2. Completion of one of the following workshop tracks:

   Fiction track:  ENG 290  
                  ENG 390  
                  ENG 404 (to be taken twice) or  
                  ENG 404 (taken once) plus ENG 408  
                  3 credits  

   Poetry track:  ENG 292  
                  ENG 392  
                  ENG 406 (to be taken twice) or  
                  ENG 406 (taken once) plus ENG 408  
                  3 credits  

3. One of the following courses: English 201, 202, 205, 211, 212, 213, 214, 215, 260, 261. (N. B., ENG 210 may not be used toward the fulfillment of this requirement.)  

4. Four more literature courses numbered 300 or higher, at least two of which must cover literature earlier than 1900. Two of the four courses must be 400-level.

5. One more literature course numbered 200 or higher.

Total: 30 credits
CONCENTRATION IN BRITISH LITERARY HISTORY
Requirements for the Concentration in British Literary History are as follows:

1. English 211 and 212.  
   \[6 \text{ credits}\]

2. Eight courses numbered 300 or above, at least four of which must be numbered 400 or above, distributed as follows:
   - One course on Shakespeare;
   - One course on the history of criticism or literary theory;
   - Two additional courses in British literature (or a combination of British and other literatures) before 1800;
   - Two additional courses in British literature (or a combination of British and other literatures) after 1800;
   - Two electives.  
   \[24 \text{ credits}\]

3. Recommended: ancillary courses in Art History, Music, History Philosophy, in consultation with a departmental advisor.  
   \[\text{Total: } 30 \text{ credits}\]

WOMEN’S LITERATURE CONCENTRATION
Students considering this concentration may want to take a special Women’s Studies section of English 106 in the freshman year.
Requirements for the Women’s Literature Concentration are as follows:

1. English 215.  
   \[3 \text{ credits}\]

2. Four \textit{literature} courses numbered 300 or above, at least two of which must be numbered 400 or above, distributed as follows:
   - two courses in literature before 1700 and, two courses in literature between 1700 and 1900.  
   \[12 \text{ credits}\]

3. Five additional English courses other than freshman composition (i.e., any two courses designated ENG and numbered 200 or above, \textit{excluding} ENG 208).  
   \[15 \text{ credits}\]

4. Three of the courses in 2 and 3, above, must be chosen from the following: English 372, 373, 374, 490, 494, or any English course numbered 200 or higher (other than ENG 215) cross-listed with Women’s and Gender Studies.  

5. Recommended: ancillary courses in Women’s and Gender Studies, in consultation with a departmental advisor.  
   \[\text{Total: } 30 \text{ credits}\]
MINOR

The student minoring in English completes, with a grade of C- or better in each course and with an overall GPA in the minor of 2.0, at least 15 credits at the 200-level or above beyond the credits earned for freshman composition. The 15 credits must be distributed as follows:

1. One literature course at the 200-level;
2. A second literature course, at either the 200-level or the 300-level;
3. A third literature course, at the 400-level;
4. Two additional English courses other than freshman composition (i.e., any two courses designated ENG and numbered 200 or above, excluding ENG 208).

DEPARTMENTAL HONORS

DEPARTMENTAL HONORS IN LITERATURE
Students interested in seeking Departmental Honors in English should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the English Literature Major, the candidate for Departmental Honors must:

1. Take at least three literature courses at the 400-level or higher in fulfilling requirement 2 of the English Literature Major.
2. Complete a six-credit Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497, Senior Thesis I for the first semester of the project, and in ENG 498, Senior Thesis II, for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors.
3. Over the course of this two-semester sequence, students will be expected to participate in 3-4 workshops addressing different aspects of the writing process for independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.
5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credits

DEPARTMENTAL HONORS IN CREATIVE WRITING
To enter the program a student must have achieved by the end of the junior year a 3.5 average in English courses (including courses in creative writing) and a 3.3 average overall. In addition to meeting the requirements for the Creative Writing Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses at the 400-level or higher in fulfilling requirement 4 of the Creative Writing Concentration.
2. Complete a six-credit Senior Creative Writing Project. The student undertaking this project normally registers in ENG 497, Senior Thesis I, for the first semester of the project, and in ENG 498, Senior Thesis II, for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors.  

6 credits

3. Receive for the project a recommendation for honors by the director of the Senior Creative Writing Project and by one other faculty reader designated by the Director of Creative Writing.

4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credits

DEPARTMENTAL HONORS IN WOMEN’S LITERATURE
To enter the program a student must have achieved by the end of the junior year a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the Women’s Literature Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses at the 400-level or higher in fulfilling requirements 2 and 3 of the Women’s Literature Concentration.

2. Complete a six-credit Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497, Senior Thesis I, for the first semester of the project, and in ENG 498, Senior Thesis II, for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors.  

6 credits

3. Over the course of this two-semester sequence, students will be expected to participate in 3-4 workshops addressing different aspects of the writing process for independent research projects.

4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.

5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credits

English Course Listing
INTRODUCTION

Geography and Regional Studies is concerned with the spatial or locational dimensions of environmental phenomena and organizational patterns of human activity on the earth’s surface. Concretely, geography deals with the analysis of topics ranging from environmental problems, political boundary disputes, and ethnic conflict to applied and more localized issues such as establishing new voting districts to provide better representation for ethnic minorities, determining where the next freeway link should be built, assessing the location of oil pipelines, or various matters regarding urban planning and governance.

Traditionally, geographers have regional expertise combining topical and geographic fields of knowledge: for example, population issues in the Caribbean, sustainable development in the Amazon basin, economic and political integration in Europe, territorial conflict in the Middle East, or the growth of megacities in South Asia.

Geographers are prepared for positions in teaching, government, private business, urban and regional planning, cartography, geographic information systems (GIS), conservation, and environmental analysis. The University of Miami’s Department of Geography and Regional Studies offers a wide range of specializations that relate to the social sciences at large and especially the field of international studies. Processes of globalization have increased the importance of the geographical analysis of human society and particularly the linkages between global processes and local outcomes and the growing interconnections of places across the globe.

EDUCATIONAL OBJECTIVES

The Department of Geography and Regional Studies offers specializations in areas such as:
- International migration
- Urban geography and international urbanization
- Environmental studies
- International and regional development
- Globalization

In addition, there is a range of courses on world regions such as Europe, the Middle East, Middle America, South America, etc. Finally, the department offers a set of courses that provide training in indispensable skills for everyone entering the present-day labor market:
- Research methodology
- Statistics
- Computer cartography
- Geographic information systems
- Remote sensing of the environment

DEGREE PROGRAMS

The major in Geography and Regional Studies leads to the degree of Bachelor of Arts.
MAJOR

GEOGRAPHY AS A FIRST MAJOR
REQUIREMENTS FOR GEOGRAPHY AND REGIONAL STUDIES
Students in the College of Arts and Sciences who take Geography and Regional Studies as a major must complete the following requirements:

I. Students must take at least 30 credits in geography courses.

II. For a geography course to count towards the major, the student must achieve a grade of C- or higher.

III. The overall GPA in courses toward the major must be 2.00 or higher.

IV. Majors must successfully complete three of the following courses:
    GEG 105
    GEG 110
    GEG 120
    GEG 199

V. Majors are required to take GEG 501 (Place, Nature, and Region) as a capstone course.

GEOGRAPHY AS A SECOND MAJOR
Students who take Geography and Regional Studies as a second major must complete the following requirements:

I. Students must take at least 24 credits in geography courses.

II. For a geography course to count towards the major, the student must achieve a grade of C- or higher.

III. The overall GPA in courses counting toward the major must be 2.00 or higher.

IV. Majors must successfully complete two of the following courses:
    GEG 105
    GEG 110
    GEG 120
    GEG 199

V. Majors are required to take GEG 501 (Place, Nature, and Region) as a capstone course.

MINOR

Students in the College of Arts and Sciences who take Geography as a minor must meet the following requirements:

I. Completion of at least 15 credits in Geography courses.

II. For a Geography course to count towards the minor, the student must achieve a grade of C- or higher.
III. The overall GPA in courses counting toward the minor must be 2.00 or higher.

IV. At least 6 credits must be at the 300-level or higher.

**GIS Certificate Program**

This Certificate Program is designed to benefit students who seek to enhance their skills in geospatial technologies, especially Geographic Information Systems (GIS) and satellite remote sensing. Students will be exposed to standard software tools used in the industry, as well as satellite image data. Students who earn the Certificate will enhance their employment prospects and/or advance their careers in geospatial technology, particularly in job settings that stress the use of satellite remote sensing and vector-based GIS.

The Certificate requires a minimum of 15 credits, including three core courses and two or more electives completed with at least a C grade in each course. Students may also receive up to 6 credits toward the certificate for past course work completed at UM or other accredited colleges and universities within the past 3 years.

**CORE COURSES**

- Introduction to GIS (GEG 199)
- Intermediate GIS (GEG 391)
- Environmental Remote Sensing (GEG 392)

**ELECTIVES**

- Cartographic Design (GEG 280)
- Introduction to Microwave Imaging and Synthetic Aperture Radar (GEG 410)
- Introduction to Quantitative Methods (GEG 481 or GEG 580)
- GIS and Environmental Modeling (GEG 491)
- Internship (GEG 535)
- Advanced Quantitative Methods (GEG 582)
- Introduction to GIS for Graduate Students (GEG 591)
- Courses offered under Special Topics in Geography (GEG 545):
  - Web-GIS
  - Advanced SAR Techniques and Applications
  - Advanced Spatial Statistics
  - GIS in Public Health

**OTHER**

**INTERNSHIP CREDIT**

Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center. Upon approval, 3 to 4 credits may be earned with an internship. These credits will be included in the fulfillment of major requirements (GEG 535).

**OVERLAPPING COURSES AMONG DUAL MAJORS**

Of the coursework at the 200-level or higher in Geography and Regional Studies, no more than 6 credits may count double towards the other major.
STUDY ABROAD

Majors are strongly encouraged to study abroad for a summer, a semester, or an entire year. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

ACADEMIC STANDING

Only courses in which the grade of C- or better is attained may be counted towards the major or minor, and students must maintain a GPA of 2.00 or better in all required courses.

For more information e-mail ssr@miami.edu, come by the Department of Geography and Regional Studies at 229 Ferre, or call (305) 284-4087 to make an appointment.

Geography and Regional Studies Course Listing
GEOLOGICAL SCIENCES - Dept. Code: GSC
www.as.miami.edu/geology

INTRODUCTION

Geological Sciences is concerned with Planet Earth, its origin, evolution, structure, internal and surface processes, mineral resources, environmental preservation, global dynamics, paleoclimate reconstruction, and life history. Geologists use their knowledge of chemistry, biology, physics and mathematics to solve Earth problems.

EDUCATIONAL OBJECTIVES

Geological Sciences undergraduates are prepared for careers in industry as well as graduate study in geosciences, the environmental sciences, and marine sciences. Career paths include research and teaching, as well as employment in the petroleum and mineral industries and in industries and government organizations concerned with energy resources, geodynamics, the marine environment, conservation, and climate change.

DEGREE PROGRAMS

The Department of Geological Sciences offers three undergraduate degree major programs and two double major programs:

- Bachelor of Science (B.S.)
- Bachelor of Arts (B.A.) in Geological Sciences
- Five-year Master of Science Program (M.S.)
- Geological Sciences/Marine Science (Double Major)
- Geological Science/Ecosystem Science and Policy (Double Major)

For the Geoscience Graduate Program please see the Division of Marine Geology and Geophysics at the RSMAS campus.

MAJOR

BACHELOR OF SCIENCE (B.S.)

The B.S. in Geological Sciences is recommended as preparation for graduate school and careers in professional research and science teaching. As described in sections 3 and 4 below, a B.S. in Geological Science requires a strong foundation in mathematics and several applied sciences.

1. Students must complete a core curriculum of 34 credits (GSC 110 or 120; 114 or 115; 111; 260; 360; 380; 410 or 420; 440; 480, and 482) with a grade of C- or better and with an overall GPA of 2.0.

2. In addition, the B.S. candidates must complete a summer field course (GSC 580 or an approved field course through another university).
The field course (GSC 580 or an approved equivalent at another University) is required for B.S. students and encouraged for others in order to gain practical experience in the skills of observation, interpretation, measuring, sampling, mapping and report writing. This requirement, when completed, has proven to be a strong asset when applying for graduate work or employment.

3. As required by the College, all B.S. degree candidates must pass two semesters of calculus (MTH 161-162 or MTH 171-172) and either (a) one semester of a computer course or (b) a statistics course.

4. Students are also encouraged to take one or more of MTH 210, MTH 211, MTH 224, MTH 311, MTH 312. CHM 111 is required (CHM 112, CHM 113, and CHM 114 are all recommended). Two semesters of college physics (PHY 101-102) are required. Two semesters of university physics (PHY 205-206) are recommended in lieu of college physics.

5. All Geological Sciences majors must also complete the “Required Areas of Study” of the College (see under COLLEGE OF ARTS AND SCIENCES in this Bulletin).

6. B.S. students must choose a minor from the following:  
   Biology  
   Chemistry  
   Computer Science  
   Ecosystem Science and Policy  
   Marine and Atmospheric Science  
   Mathematics  
   Physics  

Geological Sciences B.S. students desiring a minor in Ecosystem Science and Policy must take ECS111, ECS112, ECS113, ECS(201 or 202), and 6 other science focused credits in ECS courses at the 300-level or above (ECS301, ECS380 series, and ECS580 series; and ECS372 series with approval of Departmental Chair).

**BACHELOR OF ARTS in GEOLOGICAL SCIENCES**

The B.A. in Geological Sciences is recommended for science oriented students who plan to use an understanding of Earth systems in their professional careers but desire a broader liberal arts education or are pursuing a dual major outside the sciences. B.A. students must complete a core curriculum of 24-27 credits including:

Two courses in the GSC 101, 102 or 111, 103 or 110 or 120 series; GSC 114 or 115; 260; 360; 482; and 8 additional credits at the 300 – 500 level with a grade of C- or better and with an overall GPA of 2.0.

In addition, B.A. students are strongly encouraged to take the summer field course (GSC 580) and/or field courses offered during spring break (GSC 231 or GSC 311).

**FIVE YEAR B.S. / M.S. IN GEOLOGICAL SCIENCES AND MARINE GEOLOGY**

A 5-year B.S. /M.S. in Geological Sciences and Marine Geology allows qualified students to complete a master’s degree in one year of study beyond the B.S.
The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences. The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree above with the Honors option. By the beginning of their junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor. Contact the Geological Sciences chair at the departmental office (305-284-4253) for more information.

**DOUBLE MAJOR**

Double majors are offered in cooperation with the Marine and Atmospheric Science Program and the Ecosystem Science and Policy Program.

1. Marine Science (MSC): This program consists of a major in the Geological Sciences and a major in Marine Science. Interested students should read the information under Marine and Atmospheric Science in this Bulletin and contact the Marine Science office (184 Cox Science or 284-2180) for details.

2. Ecosystem Science and Policy (ECS): This program consists of a major in Geological Sciences and a major in Ecosystem Science and Policy (ECS). Interested students should read the information under ECS in this bulletin and contact the ECS office (058 Cox).

**MINOR**

The minor in Geological Sciences consists of 16 credits in courses numbered 110 or higher. A minimum grade of “C-” must be earned in each course with an overall GPA of 2.0.

**DEPARTMENTAL HONORS**

Honors in Geological Sciences may be earned by students in good standing within the University Honors program. In addition to their general requirements, a student must have an overall GPA of 3.0 or better, and also perform research beginning prior to their senior year, resulting in a written Honor’s Thesis and oral defense approved by the student’s thesis advisor.

[Geological Sciences Course Listing]
INTRODUCTION

History is the systematic study of the past. The study of history includes training in how to gather information, how to research issues and problems, how to analyze data and construct arguments, and how to communicate ideas in writing. These are essential skills, tools that are prized in the world beyond the university. A major in history is an excellent beginning and solid stepping stone to professional school and the business world. For goals ranging from law to journalism, and from medicine to the MBA, history serves as a versatile undergraduate major. Multinational businesses demand that their executives understand the peoples and cultures around them, and be able to communicate that understanding effectively. If an occupation demands critical thinking and analysis, a background in history is invaluable.

EDUCATIONAL OBJECTIVES

All history courses expose students to historical interpretation and critical analysis. Courses at the 100 and 200 levels are intended as introductions to broad fields of history and are open to students with no previous college-level history experience. All 300 level history courses are writing intensive, are graded principally through essay examinations and short papers, and count toward the fulfillment of the University of Miami writing across the curriculum requirement. I. Courses at the 400 level are programs of individual directed study. Permission of the instructor is required in each case, and such permission is normally given only to students who have completed a lower-level course with the faculty member in question. Courses at the 500 level require a 300 level history course as prerequisite. All 500 level courses deal extensively with the historiography of their particular subjects, and all require a written research project as a major component of the work of the course.

DEGREE PROGRAMS

The major in History leads to the degree of Bachelor of Arts.

MAJOR

A major in history consists of at least 30 credits in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credits may include history courses taken for general distribution requirements, and must include at least 18 credits at the 300 level or above, of which at least 6 credits must be taken in the form of 500-level seminars. (HIS599 Independent Research does not count). All courses for majors will be selected by students in consultation with advisors designated by the department.

Credits from other institutions may be counted toward the major or minor, and to general distribution requirements as appropriate, but departmental approval is required in each case. Students who complete the Advanced Placement course in either United States or European history and pass the examination with a grade of 4 or 5 may receive credit in the
appropriate history courses. Students who complete the International Baccalaureate program and pass the higher level history examination with a grade of 6 or higher will receive 3 credits in the appropriate entry-level history course. (However, in some cases students will only receive elective credit). At least 18 credits of the major and at least 9 credits of the minor must be completed at the University of Miami.

The department offers a variety of study abroad options with credit toward the major or minor.

**MINOR**

A minor in history consists of at least 15 credits in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credits may include history courses taken for general distribution requirements, and must include at least 9 credits at the 300 level or above. Courses for minors should be selected in consultation with a departmental advisor.

**DEPARTMENTAL HONORS**

History majors with a cumulative GPA of at least 3.6 in history courses may earn departmental honors by completing a research project of 6 credits judged worthy of honors by a departmental committee, provided that at least 6 courses worth 18 credits have been completed at the University of Miami.

**OTHER**

For the requirements of the M.A. and Ph.D. degrees in history see the Bulletin of the Graduate School.
INTERNATIONAL STUDIES - Dept. Code: INS
http://www.as.miami.edu/international-studies

INTRODUCTION

The International Studies major provides a focused educational experience aimed at familiarizing students with the key structural features and dynamics of the international system and preparing them to enter the growing international job market. Processes of globalization, in part driven by global capital flows, expanding trade and the unrelenting development of communication and information technologies, have affected virtually everyone in every country, often in ways we are just beginning to understand. These developments often pose serious problems for government and other societal institutions, while also creating a demand for individuals who understand international processes. Jobs in virtually all sectors have acquired a decidedly international dimension, whether in trade, tourism, finance, public policy, government, or education. INS Graduates have moved on to the corporate world, the public sector, started their own businesses, or have continued their studies at the graduate level (i.e. Law, Business, and International Studies).

EDUCATIONAL OBJECTIVES

International Studies seeks to provide students with the ability to understand:

- International politics within the context of interstate relations and foreign policy.
- International economics and its sub-discipline international political economy, including such issues as trade and production, money and finance, and development.
- Social science research methods including qualitative, quantitative, comparative case study and formal modeling.

Students are encouraged to explore interdisciplinary options that further their understanding of international studies. This type of coursework can be taken in other disciplines offered at the university or taken outside the institution, either through exchange programs or other inter-institutional options provided by UM. Students will demonstrate the ability to synthesize the various thematic areas of the discipline through required participation in advanced seminars. Seminars will stress analytical participation, oral presentations and the ability to interpret and critique core theoretical readings.

DEGREE PROGRAMS

International Studies provides both a major and minor option for students. The flexibility of the program often allows students to double major without the need to extend their university studies. Students are encouraged to speak with the International Studies advisor to explore such possibilities. The major in International Studies leads to the degree of Bachelor of Arts.
MAJOR

Requirements for the Major in International Studies (30 credits)

The International Studies major consists of three components:
I. Core Requirements
II. Thematic Core
III. INS Electives

I. Core Requirements (12 credits)
INS 101* Global Perspectives – Introduction to International Studies.
INS 102 Global Economics.
INS 201* Globalization and Change in World Politics.
INS 202 Research Methods in International Studies.

* These courses must be completed before taking the Thematic Core courses.

II. Thematic Core (12 credits):
Students should choose at least one course from each of the following four fields. Additional classes will be counted toward the elective portion of the INS major, if taken. Other courses, including classes in other disciplines, may be taken with the approval of the INS Advisor.

International Politics, Foreign Policy and Peace Studies:
INS 341 Nationalism, Ethnicity and Conflict
INS 540 International Peace and Conflict Resolution
INS 542 Drug-Trafficking in the Americas
INS 560 US Foreign Policy
INS 561 Negotiation and Bargaining
INS 566 US-Latin American Relations

Comparative Studies of Politics and Societies in a Globalizing World:
INS 330 Introduction to Comparative Analysis
INS 335 Democratization
INS 533 Transnational Social Movements
INS 534 The Military, State and Society
INS 565 The World Before European Domination
INS 584 Latin American Thought

International Economics, Political Economy and Development:
INS 320 Global Economics II
INS 321 Global Political Economy
INS 322 Economics of Development and Environment
INS 420 Global Trade
INS 520 Environmental Economics and Policy
INS 571 International Development and Human Welfare

International Law, Organizations, and Global Governance:
INS 460 United Nations Seminar
INS 564 International Law
INS 570 Globalization and Health
INS 573 Disasters, Terrorism and Global Public Health
INS 591 The European Union
INS 595 European Social Movements
III. INS Electives and Interdisciplinary Options (6 credits):

Students are required to take a total of 6 additional credits of elective course work from INS courses at the 300 level or above. With the approval of the INS Advisor, students may take courses from other departments outside of INS such as Geography and Regional Studies, History, Anthropology, Sociology, Political Science, Economics, Religion, Art History, Foreign Languages, Environmental Science, et cetera. Appropriate study abroad courses, an approved internship (INS 519), or an honors thesis (INS 418 & 419) may also be used to fulfill elective credit requirements.

Important Advising Notes for all International Studies Majors

1) Double Counting
Of the combined courses in the Thematic Core and the INS Electives, no more than 6 credits may count double towards a second major. A student may not count any course used to fulfill the requirements of the INS major toward a minor requirement.

2) Study Abroad
Students are strongly encouraged to study abroad for a summer, a semester, or an entire year, depending on the program. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

3) Internship Credit
Students are encouraged to find a suitable internship during their undergraduate career. Upon approval by an advisor in the International Studies Undergraduate Program Office, 3 credits may be earned with an internship (INS 519), either toward the major or as elective credits (depending on the relevance of the particular internship to the INS major). The University’s Toppel Career Planning and Placement Center regularly advertises internships.

4) Academic Standing
Only courses in which a grade of C- or better is attained, may be counted towards the International Studies major and students must maintain a GPA of 2.75 or better in all major requirements (30 credits).

MINOR

Requirements for the Minor in International Studies (15 credits)
The International Studies Minor consists of two parts: (I) a 6-credit set of introductory courses; (II) 9 credits in advanced courses.

I. Base (6 credits)
Two of the following core requirements must be taken:
INS 101 — Global Perspectives - Introduction to International Studies
INS 102 — Global Economics
INS 201 — Globalization and Change in World Politics
INS 202 — Research Methods in International Studies
II. Advanced courses (9 credits).
In order to graduate with a minor in International Studies, students must take three INS courses at the 300-level or above. Advanced level courses from other departments may be taken if approved by the INS advisor.

Only courses in which a grade of C- or better is attained may be counted towards the minor in International Studies, and students must maintain a GPA of 2.75 or better in all minor requirements (15 credits).

DEPARTMENTAL HONORS

The Department of International Studies encourages its majors to intensify and deepen their knowledge of the field through its departmental honors program. The program is designed to give students the opportunity to explore various topics and problems in international studies that are of particular interest to them, to work more closely with departmental faculty, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in international studies and related fields.

Minimal requirements for the program are as follows:
1) a cumulative grade point average of at least 3.30;
2) a cumulative grade point average in international studies of at least 3.50; and
3) a thesis that is approved, with a grade of at least B+, by a member of the departmental faculty.

After reaching agreement with a member of the faculty who will serve as the honors thesis advisor, students writing a senior honors thesis will enroll in INS 418 and 419, Honors Thesis, for a total of six credits [the credits may be spread over two semesters or taken in a single semester]. The thesis itself is expected to be an extended, coherent work of scholarship on an issue of relevance in the field of international studies.

International Studies Course Listing
THE GEORGE FELDENKREIS PROGRAM IN JUDAIC STUDIES
Dept. Code: JUS
www.as.miami.edu/judaic

INTRODUCTION

The George Feldenkreis Program in Judaic Studies is a broad, flexible, non-theological interdisciplinary program designed for undergraduates to gain an understanding of Jewish civilization and its diverse cultural experiences. The program is an academic exploration of the multi-faceted, socio-historical, 4,000-year record of the Jewish people. Courses that are co-/cross-listed with the Program, highlight the variety of cultural, political, social, and religious experiences of Jews in different times and places.

EDUCATIONAL OBJECTIVES

The program is structured to provide a liberal arts education that will constitute a foundation for advanced academic study, professional careers in a variety of fields, and a more complex and rich understanding of the Jewish world. Judaic Studies courses meet distribution requirements for the Humanities and Social Sciences in the College of Arts and Sciences, the College of Engineering, the School of Communication, the School of Business, and the Frost School of Music and can be used to satisfy requirements by majors and non-majors.

MAJOR

The MAJOR (ten courses – 30 credits):

2. Survey of Jewish Literature (ENG 205).
3. A course in Hebrew at the 200-level or higher (which can be used simultaneously to fulfill the College of Arts and Sciences Language requirement).
4. One course in Ancient Jewish History and Society and one course in Modern Jewish History and Society. Courses will be designated appropriately by the Program Director each semester.
5. 15 more credits (5 courses) in classes listed in or co-/cross-listed with Judaic Studies, 12 credits of which must be completed at the 300-level or higher. Students who complete HEB 202 need only complete 9 credits at the 300-level or higher.

MINOR

The MINOR (five courses – 15 credits):

Students must complete at least one of the following 3 courses:

- JUS231 (Jewish Civilization: Society, Culture, and Religion)
- ENG205 (Survey of Jewish Literature)
- GEG300 (Jewish Geography)
Students are strongly encouraged to take Hebrew 101, at least one course designated as a "Modern Course," and at least one course designated as an "Ancient Course."

A grade of "C-" or better must be attained in each course with an overall GPA of 2.0.

NOTE: Any student who successfully completes 5 courses in the UGalilee Program shall also be awarded a minor.

DEPARTMENTAL HONORS

Honors in Judaic Studies consists of the items listed above under the Major, plus an Honors Thesis and one additional elective at the 300 level or higher.

OTHER

UGalilee Program

The Judaic Studies Program offers the UGalilee Program - A full semester each Spring at ORT-Braude College in Karmiel, a modern city in the Galilee, Israel (a bus and/or train ride away from Israel's major centers). Students earn a Judaic Studies Minor while studying in the Galilee, the birthplace of Rabbinic Judaism and Early Christianity. Students take five-six University of Miami courses taught by UM and Israeli scholars for a total of 15-18 UM credits and earn credits in Religion, History, Anthropology, Geography, Philosophy, or Judaic Studies and G.E.R. A pre-med option is in place. Students participate in faculty-led study trips to sites such as Jerusalem, Nazareth, Tel Aviv, the Golan, Caesarea, Sea of Galilee, Haifa, and Masada.

Don’t miss out on this exciting opportunity!

For more information on UGalilee visit our website at http://ugalilee.miami.edu/

Holocaust Survivors Service Internship (JUS 205/206)

Valuable, once-in-a-lifetime opportunity to meet with survivors of the Holocaust who currently reside in South Florida. Students are expected to commit to two semesters of service for 3 credits each semester. Credits may be earned for JUS, APY or Humanities requirements. About one hour a week or two hours every other week of contact is expected.

Students may be eligible, subject to availability of funds, for a Sue Miller Scholarship for the two semesters. Students will also earn a stipend of $250 per semester (to cover any transportation costs).

Students who participate in the program will assist Holocaust survivors as "friendly visitors." Student volunteers will meet six times each semester with a UM faculty member to share their experiences and to participate in enrichment activities.

The program is open to students of all denominations and backgrounds.

Judaic Studies Course Listing
LATIN AMERICAN STUDIES - Dept. Code: LAS  
www.as.miami.edu/lasp  
www.as.miami.edu/lasp/degrees/filas

INTRODUCTION

Latin American Studies offers an interdisciplinary approach to learning about the politics, economics, cultures, and societies of Latin America and the Caribbean. Undergraduate courses are offered in Africana Studies, American Studies, Anthropology, Architecture, Art and Art History, Biology, Communication, Economics, Geography, History, Journalism, International Studies, Marketing, English, Modern Languages and Literatures, Music, Musicology, Political Science, Religious Studies, Sociology, and Women’s and Gender Studies. The major in Latin American Studies is designed for the student who wants to acquire background knowledge about the area or who is interested in some aspect of Latin American and Caribbean affairs, such as government, law, business, research, journalism, or education. Students are strongly encouraged to spend at least one semester abroad on a program with a Latin American and Caribbean Studies component (see Office of International Education and Exchange Programs, 212 Allen Hall).

EDUCATIONAL OBJECTIVES

The goal of the BA in Latin American Studies is to acquire, advance and disseminate knowledge of the history, literature, culture, politics, economics, and natural and social sciences of the regions within an interdisciplinary framework, while at the same time emphasizing the languages and cultures of Hispanophone, Francophone and Lusophone Americas including the transnational study of Latin Americans, Caribbeans and their descendants in the United States. Students should leave the program with the following:

- the analytical and methodological tools needed to conduct interdisciplinary research;
- the ability to read, write and think critically about primary and secondary sources.
- a general knowledge of the different regions that comprise Latin America, the Caribbean and their Diaspora as well as a critical understanding that the geographic, political, and cultural boundaries that have traditionally defined the "area" as an object of study are not isomorphic and are connected to the interests of European and North American powers;
- a critical understanding of the competing ways in which Latin American and Caribbean peoples have represented themselves paying particular attention to race/ethnicity, class, gender and sexuality, language, religion, migration, transculturation, and other historical, social, economic, and political factors;
- a language competency in French, Spanish, Portuguese, or Haitian Creole at an intermediate level and a beginning competency in a language other than the above or in an indigenous language of Latin America and the Caribbean;
- a "Beyond the Books" experience that will bridge the gap between the university and the surrounding communities, and will help solidify a long-term interest in and commitment to the regions.
DEGREE PROGRAMS

Bachelor of Arts

MAJOR

MAJOR IN LATIN AMERICAN STUDIES (BA)
Program of Study:

1) Gateway Course in LAS (LAS101) 3 credits

2) Advanced language proficiency in Spanish, French, Portuguese, or Haitian Creole: This requirement may be met with SPA214, FRE214, POR212, or HAI201 or equivalent. 3 credits

3) Secondary language competence in another Latin American or Caribbean Language: This requirement may be met with SPA105, FRE105, POR105, HAI102 or equivalent, or by successfully completing a Latin American, Caribbean, or Indigenous language course in the DILS program. 3 credits

4) Six credits in Latin American history 6 credits

5) Eighteen (18) credits (six courses) in classes listed in LAS or cross-listed with LAS, 12 credits of which must be completed at the 300-level or higher. Courses that are not co- or cross-listed with LAS but do have a significant focus on Latin America may be taken with the approval of the degree director. A freshman seminar with a significant focus (25% or more) on Latin America or the Caribbean may be counted towards this requirement. SPA214 and FRE214 may be counted towards this requirement. 18 credits

6) Senior Seminar (LAS501) or Independent Study (LAS494) 3 credits

TOTAL 36 credits

**A C- or better for all major courses, with a GPA of 2.0

MINOR

Latin American Studies Minor
The minor in Latin American Studies may be obtained by completing 15 or more credits in courses on Latin America and the Caribbean, provided that they are selected from courses that fall outside the department of the student’s major. As part of the required 15 credits, students must successfully complete LAS501 or LAS494 to obtain a minor.
FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM's world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master's level):

- One gateway seminar in Latin American Studies
- Two History courses
- Two International Studies courses
- Two Economics courses
- Two advanced Languages and Literatures courses (SPA, POR, FRE, or HAI)
- Seven courses in Study Abroad
- One course as internship/co-op credits
- Five courses above the 300-level (third-year) in a range of disciplines
- Ten courses in one focus track
- Six thesis credits (LAS710)

150 total credits

FILAS students also write a thesis based on an original research project. In addition, they present their findings in a meeting of the UM Center for Latin American Studies in their final semester.

FILAS ADMISSION REQUIREMENTS

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in FILAS, emphasizing prior language or area study
- To continue through the Master’s level, students must maintain at least a 3.4 GPA and they must take the GRE Exam.

DEPARTMENTAL HONORS

Students with an appropriate GPA are encouraged to contact the program to apply for departmental honors.

Latin American Studies Course Listing
EDUCATIONAL OBJECTIVES

The aim of these degree programs is to provide students with a core knowledge of mathematics essential to the understanding of science and other disciplines. Students should gain substantial problem solving and critical reasoning skills and should develop an understanding of the conceptual underpinnings of mathematics. The knowledge gained through these programs should provide the necessary background in mathematics for those students planning to go on to graduate study in mathematics and related fields. This knowledge should also prepare those students who will be immediately entering careers in science, business, education or other fields which are increasingly making use of mathematics.

DEGREE PROGRAMS

Bachelor of Arts and Bachelor of Science

MAJOR

The requirements of a major in mathematics vary according to the objectives of the student. The seven courses required of all mathematics majors are 161 (or 171), 162 (or 172), 210, 230, 310, 461 (or 561), 433 (or 533). An additional four courses are required, selected from one of the following options:

- **Core Mathematics**: four of 510, 512, 531, 532, 534, 551, 562.
- **Applied Analysis**: 311, 512, 513-514 or 515-516 (course work in physics is desirable).
- **Computational Mathematics**: 320, 517 (same as CSC 517), 520-521.
- **Probability and Statistics**: 224, 524-525, 542 (or 528).
- **Secondary School Teaching**: 224, 309, and two of: 502, 504, 505 (this option is only for those obtaining a teaching credential).
- **Mathematical Economics**: MTH 524-525, ECO 512 or ECO 520 or ECO 521, ECO 533.

It would be useful for students planning to do graduate study in mathematics to complete the following courses: 531, 532, 533, 534, 561, 562.

Students interested in actuarial science should choose the Probability and Statistics option; for these students a finance minor is recommended.
Transfer students will be permitted to apply up to 14 transfer credits towards the major; however, the courses 461 (or 561) and 433 (or 533) must be completed at the University of Miami.

A grade of C- or better is required for each course applied toward the major; the overall quality point average for University of Miami courses applied toward the major must be 2.5 or above.

MINOR

A minor in mathematics requires three of the following courses which must be taken in the Department of Mathematics, University of Miami: 210, 211 (or 310), 224, 230, 309, 311, 320, 359, 433, 461; 500-level mathematics courses with departmental approval.

A grade of C- or better is required for each of the three courses applied toward the minor; the quality point average for the three courses must be 2.5 or above.

DEPARTMENTAL HONORS

Requirements for departmental honors in Mathematics:
Three two-course sequences from 513-514, 515-516, 520-521, 524-525, 531-532, 533-534, 561-562; the student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

For requirements leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees, with a major in mathematics, see the Bulletin of the Graduate School.

Mathematics Course Listing
INTRODUCTION

Microbiology and Immunology is an ancillary department in the College of Arts and Sciences. Our primary goal is to educate students in their chosen field and instill into them a desire for lifelong learning. Research opportunities and laboratory engagement help create knowledge in our students while preparing them to become active members of the scientific and public communities. A major in Microbiology and Immunology requires thorough preparation in chemistry, biology, biochemistry, physics, and mathematics.

EDUCATIONAL OBJECTIVES

1. To expose students to the various disciplines within the field of Microbiology and Immunology, including virology, parasitology, microbial genetics, immunology and medical bacteriology.
2. To introduce students to special projects and/or research opportunities in laboratories at the School of Medicine.
3. To provide laboratory experience for the development of skills required for the conduct of research.
4. To make students aware of current cutting edge research in the field of Microbiology and Immunology by attending seminars of speakers from within and outside the University.

DEGREE PROGRAMS

A Bachelor’s of Science degree is awarded to all microbiology and immunology majors upon completion of the requirements.

MAJOR

Minimum requirements are:

A. A total of 24 credits are required for the major: MIC 301 or MIC 303/304 and MIC 321 are required of all Microbiology and Immunology majors. The remaining 16 credit hours must be earned from: MIC 322, 323, 434, 436, 441, and 451-456. In addition, [BIL 352 or BIL 554] and/or [BIL 250 or BIL 255] and/or [GSC 310] may also be used. Honors students must take both the MIC 301 or MIC 303/304 and MIC 302.

B. Required courses are: Chemistry 111/113, 112/114, 201/205, 202/206; BIL 150/151, and 160/161; Biochemistry and Molecular Biology 401; Physics 101/106 and 102/108 or PHY 205, 206, 207, 208 and 209; two semesters of calculus including MTH 162 and one computer science or statistics course (CSC 120, CSC 210, MTH 224, PSY 204, SOC 211, EPS 553).
All MIC majors are required to have a minor (science or non-science). Students automatically get a CHM minor provided that they take one year of organic chemistry while in residence at UM.

Transfer students seeking a Microbiology and Immunology major must earn at least 10 credits taken in residence at UM beyond MIC 301 in the courses listed above for majors under A.

MINOR

A minor in Microbiology and Immunology consists of 12 credits. Eight for MIC 301 (or MIC 303/304), MIC 321 and at least four additional credit hours in the following courses: MIC 322, 323, 434, 436, and 441.

Variations in the above programs may, in special cases, be approved by the Microbiology and Immunology undergraduate advisor and Director. All courses in Microbiology and Immunology to be credited toward a Microbiology and Immunology major or minor must be completed with a grade of C- or better with an overall GPA of 2.0.

MIC courses 451-456 must have department Director approval before registration.

DEPARTMENTAL HONORS

See HONORS PROGRAMS elsewhere in this Bulletin for minimal requirements. In addition to the grade point averages specified in the minimal requirements, the following program constitutes the Microbiology and Immunology Honors Program.

1. Six credits of Special Projects carried out under supervision of a member of the Microbiology and Immunology faculty, culminating in a senior thesis that includes 15 references.

Microbiology and Immunology Course Listing
INTRODUCTION

The Army Reserve Officer Training Corps is a college elective that will help students succeed in their desired career, whether civilian or military. Students who complete all ROTC requirements may be commissioned second lieutenants and serve in the Army, Army National Guard or Army Reserve.

The military science department's Reserve Officers Training Corps (ROTC) program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers' educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a 31-day summer camp, normally between the junior and senior years. Nursing students may attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The department offers both a four-year and a two-year program, each with its own special advantages. Students are invited to visit or write the Department of Military Science to obtain additional information.

Core Program

The program requires four years of military science courses which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as freshmen or as sophomores.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below. Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Women are encouraged to enroll and will be commissioned as officers in the United States Army upon completion of the ROTC curriculum. Job opportunities for women officers in the Army are the same as those for men, excluding a few combat arms fields.

Basic Course

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course. Enrollment in ROTC requires proof of a doctor's physical screening.
Participation in regularly scheduled physical training is required. In addition to classroom instruction, a one and a half hour leadership laboratory period is required every other week.

**Advanced Course**

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet officers and noncommissioned officers. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (75 minutes) periods each week and a two hour (120 minutes) leadership laboratory period every week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course.

**Army Nurse Corps Option**

Students enrolled in the School of Nursing curriculum leading to the degree of Bachelor of Science in Nursing may simultaneously qualify for commissions as Second Lieutenants in the Army Nurse Corps. Nursing students qualify for entry into the Officer Development Course through satisfactory completion of the General Military Course, the Basic Camp option or equivalent training. Nursing students participate in a summer Advanced Camp training program and an Army nurse training program. They provide practical and leadership experience in the clinical setting. The focus is to provide nursing cadets an experience which integrates clinical, interpersonal and leadership knowledge and skills. Emphasis is placed on practical experience under the direct supervision of an Army Nurse Corps Officer who acts as the cadet’s preceptor throughout the camp period.

**Professional Military Education**

In addition to basic and advanced ROTC courses, cadets must complete professional military education requirements consisting of one course in each of the following areas: written and oral communication skills, U.S. military history, and computer literacy. Students should consult with the professor of military science to determine those University courses suitable for fulfilling these requirements.

**Monetary Allowances**

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of $450–$500 per month for up to 20 months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide approximately $4,800 per semester during the last two years of school. Both the United States Army Reserve and the National Guard offer additional monetary incentives for cadets who join their organizations (drill pay).

**Army ROTC College Scholarship Program**

Financial assistance is available in the form of two- or three-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive FULL Tuition and Fees. Additionally, Army scholarship recipients receive a flat-rate allowance of $1200 per year for textbooks and other expenses and $350–$500 per month stipend for up to 10 months per year. During the 32-day advanced course summer training between the junior and senior years, Army ROTC also pays attending
cadets $27 per day plus room and board. There are also numerous national and organizational scholarships that students may compete for as a member of Army ROTC. Once a student becomes a contracted scholarship recipient, they then become eligible to receive a grant from the University that equals one quarter tuition per year.

**Uniforms and Textbooks**

All uniforms and items of insignia incident to membership in the Army ROTC Program are furnished by the Department of Military Science. Textbooks are provided at no cost to students/cadets enrolled in the basic course.

**Special Activities**

Cadets have the opportunity to join and participate in a number of military affiliated organizations and activities, both on a voluntary and a selective basis. The Color Guard is a voluntary organization that functions as a military unit participating in military ceremonies and presenting the national colors at civic events. Cadets have the opportunity to qualify for and compete with cadets from other universities and colleges in a series of military events termed Ranger Challenge.

**Awards and Decorations**

Awards and decorations made available by national organizations, the University of Miami Army ROTC Alumni Association, and local and national military organizations, are presented to both basic and advanced officer course cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in Army ROTC and other University academic courses, and in outstanding campus and cadet corps leadership.

**Prerequisite for Admission to the Professional Officer Course**

1. Be at least 17 years of age at time of acceptance.
2. Be able to complete the professional officer course and graduate from the University of Miami prior to reaching the age of thirty (30) at the time of commissioning.
3. Selection by the professor of military science and acceptance by the University of Miami.
4. Execute a written agreement with the government to complete the professional officer course and accept an Army ROTC commission.
5. Enlist in the Army Reserve Component-ROTC (terminated upon receiving an Army officer commission).

Those students enrolled in the four-year Army ROTC program must complete the basic course or its equivalent, or have acceptable prior military service. Veterans and students with previous ROTC training are invited to write, visit, or call the Department of Military Science (305) 284-3329 or (305) 348-1619 to discuss their eligibility status.

Students desiring entry into the two-year Army ROTC program should contact the Department of Military Science one semester prior to the semester in which they wish to enroll in the professional officer course. This lead time is required to complete the application and a physical examination prior to enrollment in the professional officer course.
Leadership Laboratory

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for two (120 minutes) hours every week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

EDUCATIONAL OBJECTIVES

To provide a base of knowledge in the areas of ethics, leadership, Communication skills, Military Leadership, U.S Military History, Tactics and Team building to include future Officer development.

DEGREE PROGRAMS

Students can receive degrees from the university in addition to being in the Army ROTC program, as well as being eligible (once requirements are met) to receive a minor in Military Science.

Military Science Course Listing
INTRODUCTION

The study of languages is integral to education in a global university. In addition to providing access to various cultural perspectives, multilingualism fosters success in business, economics, law, medicine, education, social sciences, politics, the arts, and humanities. Language study most effectively enriches academic as well as personal experiences when students choose a language based on its relevance to possible careers, to research in particular fields, to personal heritage, or to the understanding of unfamiliar cultures. At the University of Miami, students can choose courses in Arabic, Chinese, French, German, Haitian Creole, Hebrew, Italian, Japanese, Portuguese, and Spanish.

Many students combine advanced modern language study with majors in other fields. Students majoring in a modern language often choose second majors in programs such as International Studies, Communications, History, Political Science (and other pre-law fields), Biology (and other pre-med fields), English, Finance, Latin American Studies, Anthropology, Psychology, Computer Science, Sociology, and Philosophy.

The Department has Undergraduate Advisors for each language. You are encouraged to consult with them for placement, and must consult with them if you plan to major, minor, or study abroad (contact the Department office for names and office hours). If you plan to double major, you must have an advisor from each of your fields.

Students may qualify for a wide range of departmental awards for excellence in linguistic and literary achievement. The Modern Languages and Literatures Awards Reception takes place annually during graduation week. Some awards are conferred through nomination by professors; others require an application. Students may obtain information on specific awards in the Department office. The annual deadline for applications is usually in early March.

PLACEMENT GUIDELINE FOR MLL COURSES

Most students studying a second language can determine their appropriate level by following these guidelines:

- If you have not studied Arabic, Chinese, French, German, Hebrew, Italian, Japanese, or Spanish in high school, or have completed one to two years of high school instruction, take 101; for Portuguese, take 105.
- If you have taken 101 or its equivalent at another institution, take 102.
- If you have completed three years of high school instruction in French or Spanish, or scored a 3 on the AP language exam take 105. If you have had three years of high school Arabic, Chinese, German, Hebrew, Italian, or Japanese, take 102.
- If you have taken four years of high school French or Spanish, scored a 4 on the AP exam or a 4 on the IB exam in French or Spanish, or took the equivalent of 102 or 105 at another university, take 211. If you have taken four years of high school
German, Italian or Portuguese, take 211. If you have taken four years of Arabic, Chinese, Hebrew, or Japanese, take 201.

- If you had five to six years of high school French, German, Italian, or Spanish, take 212.
- If you have taken the equivalent of 211 at another university, or scored a 5 on the AP exam, you have completed your language requirement. If you wish to continue your studies, take 212.
- If you took the equivalent of 212 in French or Spanish at another university or scored a 4 on the AP literature exam, you have completed your language requirement. If you wish to continue your studies, take 214. If you took the equivalent of 212 in German, Italian or Portuguese at another university, you have completed your language requirement. If you wish to continue your studies, take 301.
- If you scored a 5 on the AP literature exam in French, Italian or Spanish, you have completed your language requirement. If you wish to continue your studies, take 301.

The Department offers courses open to native speakers of French, German, Italian, Portuguese, and Spanish. Native speakers may not enroll in 101, 102, 105, 201, 202, 211, 212, 214, or 301 in their language. If you are a native speaker of French, German, Italian, or Portuguese, and graduated from a high school where that was the official language of instruction, you may take any course above 301 (consult with the respective Undergraduate Advisor). If you are a native speaker of Spanish and graduated from a high school where that was the official language of instruction, your first SPA course at UM must be either SPA 302 or 303 or 343 (which is a prerequisite for other literature courses).

The Department of Modern Languages & Literatures identifies as heritage learners of Spanish those students who begin their university studies of the language with little or no prior instruction in Spanish but who, because of family background or social experience, can already understand much casual spoken Spanish and have a passive knowledge of the language (though they may not usually speak the language themselves). In the great majority of cases, they have been born and fully educated in the United States, and may have grown up speaking principally English (or a ‘mix’ of Spanish and English, i.e. 'Spanglish') in the home with their grandparents, parents and siblings. Heritage learners may or may not consider themselves as “bilinguals” or “native speakers”, since both of these terms carry very different connotations—linguistic, social, and psychological—for different individuals. Some state that they “do not really speak Spanish” even though they are able to comprehend much spoken language (i.e., they are “passive bilinguals”). In the great majority of cases, they self-identify as “Hispanic” or “Latino/a”.

**HERITAGE LEARNERS OF SPANISH MUST BE PLACED IN ONE OF THE FOLLOWING FOUR COURSES:**

**SPA 143 Basic Spanish for Heritage Learners** is for those students with little or no prior instruction in Spanish who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language although they do not usually speak the language themselves. Generally, their abilities to read and write Spanish are very weak. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.
SPA 243 Intermediate Spanish for Heritage Learners is for those students WHO HAVE ALREADY TAKEN AND PASSED SPA 143 or who have studied Spanish for AT LEAST TWO YEARS IN HIGH SCHOOL. They can understand casual spoken Spanish and have some functional ability in speaking, reading and writing the language. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.

SPA 244 Advanced Spanish for Heritage Learners is for those students who have studied Spanish for four years in high school and who have developed functional abilities in speaking, reading and writing the language. Students who earned a score of 5 on the AP Spanish Language Exam should register for this course. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.

SPA 343 Introduction to Literary Studies for Native/Heritage Speakers is intended for those students who have completed secondary and/or university studies in a Spanish-speaking country and for those heritage learners who demonstrate an advanced level of productive competence (in the written and spoken modes) in Spanish because of prior formal study of the language. Many heritage learners who place directly into 343 have taken AP Spanish literature in high school and earned a score of 4 or 5.

>>> SPA 101, 102, 105, 211, 212 AND 214 ARE NOT FOR HERITAGE LEARNERS. ANY HERITAGE LEARNER WHO ENROLLS IN ONE OF THESE COURSES WILL BE OBLIGATED TO SWITCH TO A HERITAGE LANGUAGE COURSE (SPA 143, 243, 244 OR 343) DURING THE FIRST WEEK OF CLASS.

Arts and Sciences Language Requirement
The College of Arts and Sciences requires all B.A. and B.S. degree students to show competency in a language other than English by successfully completing an approved college language course at the 200-level or higher. Students wishing to fulfill the language requirement in a language not taught at UM, may take the equivalent of a 300-level course or higher at an accredited institution and submit appropriate documentation for approval.

Humanities Literature and Writing Credits
The Department offers a variety of courses that fulfill these Distribution Requirements for students in most majors (please consult the guidelines of your School or College); students can easily fulfill some or all of these requirements by majoring or minoring in a modern language. Any literature courses in French, German, Italian, Portuguese or Spanish on the 300-level or higher fulfills a Humanities Literature requirement and counts as a writing credit. In addition, all 300-, 400- and all 500-level courses, unless otherwise specified, are for writing credit. NOTE: Courses may simultaneously fulfill the Humanities Literature Requirement and Writing Credit, or the Foreign Language Requirement and Writing Credit. A course cannot simultaneously fulfill the Foreign Language Requirement and the Humanities Literature Requirement.

DEGREE PROGRAMS
Students pursuing a single major in Arts and Sciences earn a BA.
MAJOR

Goals of the major: The major is designed to allow students to gain advanced linguistic, literary and cultural competence in the given language. Students will develop analytical and critical skills. They will learn to build coherent arguments orally and in writing; to develop tools for the interpretation of various texts; to perform research and write critical papers; to find and evaluate sources of information; to heighten their sensitivity to contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Allen Hall, room 212) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit toward the major for courses taken abroad will be determined on an individual basis.

Majors in French, German, and Spanish

A major consists of at least 24 credits beyond 212/243, which must include the following distribution:

- at least 9 credits must be at the 300 level;
- at least 6 credits must be above the 300 level; of these, 3 credits must be at the 500 level (capstone course);
- Five writing intensive classes (W) in the department are required of all majors.
- Spanish majors must take one full 3-course sequence of survey courses in either Peninsular or Latin American Literature, or a combination of both that covers all three chronological periods. That is, Spanish majors must take 353 OR 363; 354 OR 364; and 355 OR 365.

Only one professional Spanish course (SPA 432 or SPA 433) will count towards the Spanish major, although students are free to take both. Students with transfer credits at the 300-level must take at least 21 graded credits at or above the 300-level at the University of Miami; i.e., up to 9 credits at the 300- and 400-level may be transferred from another institution or a study abroad program not administered by UM. Up to 12 credits taken abroad in a UM-administered program may count towards any of the majors in the Department. Students must earn a grade of C- or higher in every course counting toward the major, and maintain a minimum overall average of 2.5 in the major.

Capstone Courses

The final course in the major is the capstone course (501) which must be taken in residence. This course will:
• Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
• Incorporate interpretive as well as presentational modes of communication;
• Contain an over-arching and cohesive theme;
• Include an element of collaboration among students.

It will constitute a moment of recapitulation of, synthesis, and reflection on a student’s experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Of the 24 credits required for the major, a minimum of 12 credits must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 credits from these programs may be applied toward the major. Up to 6 transfer credits from other institutions may count toward the major; whether these are credits transferred from another U.S. institution or from non-UM study abroad programs, transferred credits must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credits shall not exceed 12 credits.

For example:

  *A student may use 3 transfer credits with UM equivalency and 9 credits from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credits must be earned in courses taught by MLL faculty.
  *A student may use 6 transfer credits with UM equivalency and 6 credits from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credits must be earned in courses taught by MLL faculty.
  *A student may use 12 credits from a UM-administered study-abroad program not led by MLL faculty and 12 credits in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12-credit rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

**MINOR**

You do not have to be a student of the College of Arts and Sciences to minor in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a minor in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Allen Hall, room 212) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit toward the major for courses taken abroad will be determined on an individual basis.
Minors in French, German, Italian, Portuguese, and Spanish

A minor in one modern language consists of a minimum of 12 credits in that language, earned according to the following guidelines: a minimum of 9 credits must be at the 300 level and at least 6 of these credits must be graded credits taught by UM faculty. A maximum of 3 credits, out of the 12, may be transferred from another institution or from a study-abroad program not administered by UM. Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

Minor in Modern Languages

The minor in two foreign languages consists of at least 24 graded credit hours with 12 credits in one language on any level and 12 credits in any other language, 6 of which must be on the 300-level or above. For example: Arabic 101, 102, 201 and 202 along with Spanish 212, 214, 301 and 322 would constitute a Minor in Modern Languages; so would French 212, 214, 301 and 332 along with Italian 101, 102, 211 and 212. Many other combinations are possible. This minor must include 6 graded credits per language from the University of Miami. Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

Minor in Arabic Studies

A minor in Arabic Studies consists of a minimum of 15 credits, passed with a "C" or higher. Courses must be distributed as follows: 1) At least 3 credits in a 200-level Arabic language course (ARB201 or ARB202 or the equivalent); 2) At least 3 credits in ARB310 Topics in Arabic Studies in Translation; 3) At least 3 additional credits in any ARB course beyond ARB 101 (to reach a total of 9 ARB credits); 4) At least 3 credits, outside of ARB courses, in humanities or social science courses focused on the Middle East, North Africa, Islam, or the Arab world. For example: REL171, ARH260, INS352, GEG242, and POL387, or another relevant course as approved by the program director; 5) 3 additional credits from either an ARB course beyond ARB 101 or any approved course focused on the Middle East, North Africa, Islam, or the Arab world.

Up to 9 credits taken abroad in an Arabic-speaking country are eligible to fulfill the requirements for the minor. Up to 6 transfer credits from an accredited university or 4-year college in another region of the world are eligible to fulfill the requirements for the minor. In all cases, whether the credits are from a UM-affiliated study abroad program or transfer credits from any institution, the credits’ UM equivalency, if any, will be determined by the UM Arabic Studies Program Director; ARB 310 must be taken within the Department of Modern Languages and Literatures at UM; and the student must fulfill the distribution of requirements and other criteria stipulated above.

If a student has studied Modern Standard Arabic (fusha) in another setting (e.g., a high school foreign language program or schooling in an Arab country), she/he may request a proficiency evaluation from the Program Director. If the student’s Modern Standard Arabic is equivalent to, or beyond, the Intermediate level, the student may be exempted from the requirement to earn 3 credits in a 200-level Arabic language course; however, the student will still be required to take at least 9 credits of ARB courses and a total of 15 credits, as stipulated above, to complete the minor.
DEPARTMENTAL HONORS

Departmental Honors in Modern Languages are possible in the three languages for which the major is offered: French, German and Spanish. In order to request admission to Departmental Honors, candidates must have completed at least twelve credits at the 300 level or above. They must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for honors will identify an honors thesis supervisor and a second reader and request admission to Departmental Honors. Admission to candidacy must also be approved by the Director of Undergraduate Studies for the appropriate language.

In addition to fulfilling the regular major requirements, students must register in their Senior year for FRE or GER or SPA 594-595, Senior Honors Thesis. This is a two-semester, six credit sequence: 594 for research and 595 for the actual writing of the honors thesis.

The honors thesis advisor and the second reader will determine whether the finished thesis merits Departmental Honors.

INTRODUCTION

Neuroscience (NEUR) is the study of the nervous system (i.e., the brain, spinal cord, and peripheral nerves), the mechanisms of behavior, and the nature of mind and consciousness. The Neuroscience major is a rigorous, interdisciplinary major offered by the Departments of Biology and Psychology in conjunction with the Neuroscience Program at the Miller School of Medicine. This major is intended for students preparing for medical school or for graduate study in such fields as neuroscience, biology, neuroscience, psychology, or behavioral medicine.

EDUCATIONAL OBJECTIVES

The Neuroscience major seeks to provide undergraduate students with exposure to and a fundamental understanding of the neural and biobehavioral sciences. It seeks to deliver an integrative educational experience by promoting interactions among faculty, graduate students, and undergraduate students in basic scientific inquiry, advising, and mentoring.

DEGREE PROGRAMS

Neuroscience is offered as a major only for the Bachelor of Science degree within the College of Arts and Sciences.

MAJOR

The total number of credit hours for the Neuroscience major is 49, distributed between the Departments of Psychology, Biology, and Neuroscience (as indicated below). The requirements for the Neuroscience major meet most of the general requirements for many medical schools.

A grade of C- or better is required in all courses to count toward the major core requirements, electives, or auxiliary courses and/or to serve as prerequisites for other courses. Students moving on to a course without the prerequisites will be dropped from the course.

The total number of credits for the degree with a Neuroscience major is 130.

There is one formal track available in the Neuroscience major. However, students can choose their electives to reflect their primary interests in either psychobiology (which emphasizes cognitive functions and behavior) or neurobiology (which emphasizes cellular and molecular approaches to understanding nervous system functions).
Core Courses

All Neuroscience majors must complete a set of core courses from Biology, Psychology, and Neuroscience. These are BIL 150/151, (or BIL 152), BIL 160/161, (or BIL 162), BIL 268, BIL 250, BIL 255, PSY 110, PSY 204*, and PSY 316, and PSY 402; and NEU 342 and NEU 403.

*UM alternates to PSY 204 include, BIL 311; SOC 211 and 212; and MTH 224. These courses are acceptable as prerequisites for PSY 316, but do not count toward the major. Thus, students opting to do these alternate courses must take another course in Psychology to total the number of credits expected for the major.

Electives

Electives in for the Neuroscience major are limited to specific courses pertinent to the major. Requirements and options are outlined below.

Choose 3 elective credits in Neuroscience from NEU 465 or an alternate course approved ahead of time by the Director of Undergraduate Studies in Psychology.

Choose 3 electives in Psychology and 3 elective credits in Biology from the list below OR choose 6 credits in Biology from the list below. Note: students interested in psychobiology should take the first option, those interested in neurobiology should choose the latter.

Choices in Psychology are limited to PSY 305, PSY 332, PSY 352, PSY 420, PSY 440, and PSY 444.

Choices in Biology are limited to BIL 210, BIL 215, BIL 241, BIL 261, BIL 330, BIL 345, BIL 355, BIL 360, BIL 365, BIL 369, BIL 511, BIL 520, and BIL 540. Biochemistry (specifically, BMB 401 or BMB 506) OR MIC 301, may also be substituted and count as a Biology elective.

Auxiliary courses

In addition to the above courses in Biology, Psychology, and Neuroscience all Neuroscience students must complete 16 credits in Chemistry including CHM 111/113 and CHM 112/114, and CHM 201/205 and CHM 202/206; 8 credits in Math including MTH 141/162 OR 161/162 or MTH 171/172; 10 credits in Physics including PHY 101/106 and PHY 102/108. (A 200-level, calculus-based physics sequence [PHY 205/206/207/208/209] can be substituted for the 100 level physics sequence and is highly recommended for any student considering pursuing Neuroscience at the Ph.D. level.) PRISM students may count the PHY 201/106 and PHY 202/108 sequence.

Grades and Scores Required to Declare and Continue

A student must have an SAT score of 1300 or above or an ACT of 30 or above to declare Neuroscience as an incoming freshman.

Thereafter, students need a 3.5 GPA after 24 credits at UM to declare the major. At least 7 of these 24 credits must have been in a BIL, CHM, or MTH course designed for majors.

Students transferring from another college or university must have a cumulative grade point average of 3.8 or above; at least 7 of these credits must have been taken in a BIL or CHM course designed for majors.
Students are strongly advised not to continue as a Neuroscience major if, after having completed 15 credits in the major, the GPA is less than 2.8. This shall include all courses in the major and in the auxiliary courses, whether listed under the major on the ACE or not. Students may repeat no more than two courses (in different disciplines) for the major or the auxiliary courses in which they have received a D or an F.

**Grades Required to Graduate**

A grade of C- or better is required in all courses applied to the Neuroscience major, and the GPA in these courses must be at least 2.6. Included in this GPA are courses in Biology, Psychology, Mathematics, Chemistry, and Physics.

**MINOR**

All Neuroscience majors must choose a minor from among Biochemistry and Molecular Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Mathematics, Microbiology and Immunology, or Physics. Neuroscience students automatically earn a Chemistry minor if they complete the year of Organic Chemistry (CHM 201 and CHM 202) with labs (CHM 205 and CHM 206) here at UM.

Neuroscience majors may have additional minors in either science or non-science disciplines. Neuroscience majors may not earn minors in Biology or Psychology.

There is no minor in Neuroscience.

**ADVISING**

The Neuroscience major is administered by the Department of Psychology's Undergraduate Academic Services for Psychology (UASP). The Director of Undergraduate Studies for Psychology is the primary advisor for all Neuroscience majors. For curricular advice and for course and transfer approval, etc., students may also consult an advisor UASP, Flipse, Room 508.

Dr. Phillip McCabe is Professor of Psychology and the Director of the Neuroscience program. pmccabe@miami.edu

Dr. Victoria Noriega is the Director of Undergraduate Studies in Psychology and Advisor for Neuroscience majors. vnoriega@miami.edu

**Freshmen**

All freshman-declared Neuroscience majors receive their advising as a part of a year-long advising, orientation, and mentoring program known as FACT FORUM. All incoming majors will be placed in a special University Experience section known as FACT (Freshman Advising Contact Term). This is a one credit general elective course designed to integrate freshmen into the major by familiarizing them with the guidelines, opportunities, and responsibilities of a Neuroscience major. During the second semester, freshmen enroll in a FORUM section (Faculty Overview of Research and Undergraduate Mentoring). This one credit general elective course helps to put the curriculum in context and stresses the importance of and
opportunities for research. Advising for the Spring and Fall semesters is also done in these courses. These courses are mandatory for all incoming Neuroscience majors.

Students wishing to declare a Neuroscience major after matriculation may be required to take part in an advising seminar prior to declaring the major.

Research Participation in PSY 110

As an introduction to behavioral science, students enrolled in PSY 110 may be required to participate as subjects in research studies being conducted by faculty and/or graduate students, or by reading and writing about selected research reports. For details, consult the course syllabus and/or contact the Psychology Department’s Undergraduate Academic Services for Psychology.

Residency Requirement

Neuroscience majors must complete all upper division Biology and Psychology courses at U.M. With prior Departmental approval, 6 of these 15 credits may be completed through the U.M. Study Abroad Program. UM’s UGalilee program offers opportunities for Neuroscience majors to complete BIL 250 and BIL 255 as part of their study abroad curriculum.

Research Experience for Course Credit

Research is considered integral to the Neuroscience major. Students may earn course credit (NEU 367, NEU 368, NEU 498, or NEU 499) to be applied toward the degree (but not toward the major), by working in a research laboratory of an approved UM faculty member.

Students wishing to do research with a neuroscientist on the medical campus should speak with the Director of the Neuroscience program. Before registration, written permission from the faculty mentor and the Director of Undergraduate studies in Psychology is required. Students may also volunteer in a research laboratory: Necessary forms must be completed before working in the lab.

Course Prerequisites

Students who have not taken a prerequisite course (or who have taken it and obtained a grade below C-) may not enroll in the course for which it is a prerequisite. Students enrolled without prerequisites may be dropped from the class roll.

Transfer courses

Transfer students wanting courses taken elsewhere to count as Neuroscience courses at U.M. must obtain written approval during their first semester at UM. This is a separate process from the Admissions Evaluation of Transfer Credit.

Regularly enrolled UM students wishing to take a Biology, Psychology, or Neuroscience course elsewhere (e.g., during the summer) must obtain prior written approval from the appropriate department if they wish it to be counted in place of a UM course. In some cases, transfer courses not approved as part of the major may still count in another discipline or as an elective.
Senior Assessment

Seniors may be required to take part in a senior assessment lasting up to four hours. Department self-assessment is mandated by SACS (The Southern Association of Colleges and Schools) and is a necessary part of accreditation. These scores will not affect the student’s graduation status.

DEPARTMENTAL HONORS

Honors in Neuroscience entails excellence in both regular classes and completion of the Senior Honors Thesis, (usually NEU 498 and NEU 499), an individual research project done under the direction of a UM faculty member. Eligibility requirements for Honors in Neuroscience include a 3.3 cumulative GPA and a 3.5 Neuroscience GPA and usually one year of previous research with the faculty mentor.

Prior to enrolling in NEU 498 and NEU 499, students must have completed PSY 316 and must obtain written approval from both the faculty mentor who will supervise the thesis and the Director of Undergraduate Studies in Psychology. These faculty members will also assess the adequacy of the thesis upon completion.

Students are expected to complete the Thesis course sequence; a grade of “IP” (i.e., incomplete in progress) is given for NEU 498 until NEU 499 is completed and approved by the Director of Undergraduate Studies in Psychology.

Neuroscience Course Listing
PHILOSOPHY - Dept. Code: PHI
www.as.miami.edu/phi

INTRODUCTION

The Philosophy Department offers a wide range of courses at the undergraduate level which cover every major area of philosophy as well as its history. Students can major or minor in the subject. In addition, the department sponsors two undergraduate philosophy organizations: the Philosophy Club, which is open to all UM undergraduates, and Phi Sigma Tau, a chapter of the National Honor Society in Philosophy. Both groups afford students regular opportunities to meet, eat, and talk philosophy with each other and with graduate students and faculty in the department. All undergraduates who are interested in philosophy are welcome to participate in these philosophical events.

EDUCATIONAL OBJECTIVES

Philosophy is the study of the most basic moral, scientific, legal, aesthetic, religious, and metaphysical concepts and theories by which we understand ourselves and our universe. It is a reasoned pursuit of fundamental truths, a quest for understanding, a study of principles of conduct. It analyzes the basic assumptions and concepts of other disciplines and the norms that govern interpersonal relations and the acquisition of knowledge. It seeks to establish standards of evidence, to provide rational methods of resolving conflicts, and to create techniques for evaluating ideas and arguments. Philosophers are dedicated to developing the following abilities: reasoning clearly, distinguishing between good and bad arguments, thinking through complicated questions, and using reason in situations that are often governed by emotions. Studies have shown that philosophy majors do extremely well on standardized tests, and in careers that require analytical abilities such as the practice of law and software development. But irrespective of career choice, philosophy deepens one's sense of the meaning and varieties of human experience, and enhances self-knowledge, foresight, and sense of direction in life.

DEGREE PROGRAMS

The major in Philosophy leads to the degree of Bachelor of Arts.

MAJOR

A major in philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Elective courses may be chosen to fit individual needs. Required courses for the major are Philosophy 210 or 215, either 271 or 272, twelve credits at the 300 level (including one course from 330-332 and two courses from 340-345), and six credits at the 500 level.

MINOR

A minor in philosophy consists of a minimum of five courses, each passed with a grade of C- or higher with an overall GPA of 2.0. At least three of the courses must be at the 200 level or above, and at least one of these three courses must be at the 300 level or above.
The major and the minor should be planned with the advice of the department.

**PRE-LAW MAJOR AND MINOR TRACKS**

The Department offers major and minor tracks for students wishing to enhance their Pre-Law studies with relevant Philosophy coursework.

A Pre-Law Major Track in Philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are either 210 (Formal Logic) or 215 (Logic and Law), either 271 or 272 (1 course in history of philosophy), either 330 (Ethics) or 331 (Social and Political Philosophy), either 332 (Philosophy of Law) or 333 (Philosophical Foundations of Criminal Law), two of either 340 (Epistemology), 341 (Philosophy of Language) or 343 (Philosophy of Science), 2 500-level courses, and any 2 additional PHI courses.

A Pre-Law Minor Track in Philosophy consists of a minimum of five courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are either 210 or 215, either 330 or 331, either 332 or 333, one of either 340, 341 or 343, and any other PHI course.

**PRE-MED MAJOR AND MINOR TRACKS**

The Department also offers major and minor tracks for students wishing to supplement their Pre-Med work with relevant Philosophy coursework.

A Pre-Med Major Track in Philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are 210 (logic), either 271 or 272 (1 course in history of philosophy), 330 (Ethics), 334 (Biomedical Ethics), 343 (Philosophy of Science), either 340 (Epistemology) or 344 (Philosophy of Mind), and 546 (Knowledge and Evidence in Medicine). Elective courses consist of one 500-level philosophy course and 2 other philosophy courses not listed above.

A Pre-Med Minor Track in Philosophy consists of a minimum of five courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Required courses for the track are 210, 334, 343, either 340 or 344, and 546.

**DEPARTMENTAL HONORS**

A program of work toward graduation with Honors in Philosophy is available for qualified students. Interested students should consult the Departmental Director of Undergraduate Studies during their sophomore or junior years. Further information may be found under the section entitled HONORS PROGRAM.

For requirements leading to the Master of Arts and Ph.D. degree, see the Bulletin of the Graduate School.

[Philosophy Course Listing](#)
PHYSICAL SCIENCES - Dept. Code: PSC

INTRODUCTION

Physical Science 101 is an interdisciplinary physical science course designed primarily for the non-science major. It may be used to satisfy a physical science requirement in some degree programs. Students should consult the degree requirements listed elsewhere in the Bulletin as well as their advisors for the appropriateness of this course for their programs. See also under PHYSICS 110.

Physical Sciences Course Listing
INTRODUCTION

The requirements for a major or minor in the Department of Physics are flexible and may be adapted to the needs of the individual student:

MAJOR

1. Pure Physics

This sequence is recommended for those intending to enter a graduate school in Physics. It consists of a minimum of 34 credits in Physics at or above the 200 level, including four credits of laboratory and the courses PHY 205, 206, 207 (or 205, 210); 360, 362; 340, 321; 350, 351; 540, 560. The physics minor consists of University Physics, two credits of laboratory work, PHY 360, another 3-credit physics lecture course (other than PHY 315) at the 300-level or above.

2. Marine Science/Physics

This is one of the interdisciplinary majors offered in conjunction with RSMAS. It includes 31 credits from the core physics courses through PHY 560 together with a group of marine science and other courses detailed in the section of this Bulletin on MARINE SCIENCE.

3. Applied Physics

This sequence is available for those intending careers in applied physics, and consists of 22 credits in Physics plus nine credits of Engineering and Computer Science courses with prior approval of the Department of Physics. The Physics courses must be at or above the 200 level and include three credits of laboratory. The major includes PHY 205, 206, 207 (or 205, 210), 208, 209, 340, 350, 360.

4. Dual Physics Majors

Physics requirements: PHY 205, 206, 207 (or 205, 210), 208, 209, 360 and at least two of the following: PHY 321, 340, 350, 351, 560. In the total of 22 credits of physics, 2 or 3 credits of advanced lab may be included, or another lecture course.

Students will have the full, normal major in Biology or Chemistry and provided that among those courses certain specific ones are included, they will also be able to have the dual major in physics. The specific courses are

Biology – Physics

Three of the courses BIL 358, 554, CHM 360, 365

Chemistry – Physics

Three of the courses CHM 360, 365, 565, BIL 358.
Note: Depending on the selection of the Physics courses in the Biology and Chemistry dual majors, more mathematics beyond two semesters of calculus is required for most of the physics courses.

5. Students in the College of Engineering who want a dual major in physics should consult the Physics Department Chairman. A major tailored to the student’s needs will be arranged. The minimum number of physics credits is the same as for the Applied Physics major.

In order to complete any Physics major sequence in four years, the student should begin elementary calculus in the first semester. The recommended mathematics sequence is MTH 151 or 161, 162 (or 171, 172); (310 or 211), 311; 210; (230, 433, 461, 510, 512 also recommended).

A grade of C- or better is required in all courses counted toward the major or minor with an overall GPA of 2.0. Any lecture course in the Physics department may be passed by means of a proficiency examination.

Requirements for the Master of Science and Doctor of Philosophy degrees will be found in the Bulletin of the Graduate School.

**MINOR**

The physics minor consists of University Physics, two credits of laboratory work, PHY 360, and another 3 credit physics lecture course (other than PHY 315) at the 300-level or above.

[Physics Course Listing](#)
INTRODUCTION

A political science major prepares students for work in a number of fields including law, politics, public policy, public administration, and international affairs, as well as employment in business and the non-profit sector.

EDUCATIONAL OBJECTIVES

Political science majors gain an understanding of American political and legal life, the workings of other countries’ political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

DEGREE PROGRAMS

Bachelor of Arts in Political Science

Five year program: Bachelor of Arts in Political Science and Masters of Public Administration

A special curriculum for students specializing in public administration enables them to complete the requirements for a Bachelor’s and Master’s degree in five years.

MAJOR

The political science major consists of at least 30 credits. At least 21 credits of these must be earned at the University of Miami.

To count toward the major, each course must be completed with a grade of C- or above, with an overall GPA of 2.0 or above.

1. Nine credits must be taken in departmental core courses, namely, POL 201, POL 202, and POL 203. POL 213 does not count toward the major.

The remaining credits must meet the following distributional requirements:

2. At least six of the credits must come from 500-level seminar courses offered by the University of Miami. This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are not seminars and do not fulfill this requirement:

   POL 520  Internship
   POL 521  Public Affairs Internship
   POL 563  Senior Thesis (I)
   POL 564  Senior Thesis (II)
POL 599 Directed Readings
(Note that POL 599: Special Topics is a seminar and does fulfill this requirement.)

3. At least one course above the 200-level must be taken in three of the following five principal sub-fields of political science:

American Politics
Comparative Politics
International Relations
Public Administration, Policy, and Law
Political Theory and Methods

These can include courses used to fulfill requirement #1 above. Please note that some courses cover more than one sub-field Students may not, however, use a single class to fill two sub-field requirements

American Politics:

POL 309 American Political Thought
POL 311 Conspiracy Theories
POL 313 The Constitution
POL 314 Legislative Process
POL 315 American Presidency
POL 332 Mass Media and Politics
POL 334 Campaigns
POL 335 Local Government
POL 342 State and Local Government and Politics
POL 343 Government in Metropolitan Areas

MINOR

A minor requires 15 credits of political science, three of which must be from POL 201, 202, or 203. To qualify for the minor at least 9 credits must be earned in residence.

To count toward a minor, each course must be completed with a grade of C- or higher, with an overall GPA of 2.0 or higher. **POL 213 does not count toward the minor.**

DEPARTMENTAL HONORS

To earn Departmental Honors a student must:

1. Graduate with an overall GPA of 3.500.
2. Graduate with a political science GPA of at least 3.700.

[Political Science Course Listing](#)
PSYCHOLOGY - Dept. Code:  PSY  
www.psy.miami.edu

INTRODUCTION

Psychology is the study of how individuals think, behave, feel, and relate to others. Because of its broad and fundamental nature, coursework in psychology is useful to students pursuing any liberal arts major. Psychology is a good major field of study for individuals who are preparing for post-graduate study in psychology or related fields such as counseling, guidance, or social work. It is also an appropriate field of study for students pursuing medicine, law, or business.

Psychology courses meet the general education requirements in the Social Sciences (People and Society). Although the vast majority of Psychology majors are enrolled in the College of Arts and Sciences, Psychology often serves as a second major for students in the School of Communication, the School of Education, the School of Nursing, etc.

While most majors sample broadly from among the Department’s offerings, students wishing to focus on a specific sub-area may select courses to provide a strong (though unofficial) specialization. There are, for instance, clusters of courses in child development, research methodology and the brain-behavior relationship that provide a basis for such a specialized major.

EDUCATIONAL OBJECTIVES

The Department of Psychology seeks to provide undergraduate students with exposure to and a fundamental understanding of the psychological sciences. It seeks to deliver an integrative educational experience by promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

DEGREE PROGRAMS

The Department of Psychology offers both a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree. In addition to completing the coursework for the particular degree specified by the College of Arts and Sciences, students must also meet the departmental requirements for each degree; these are described below.

Students in the School of Communication or the School of Education wishing to receive a major in Psychology must fulfill the departmental requirements for the Bachelor of Arts Psychology major track, in addition to their school’s degree and major requirements.

MAJOR

B.A.  Departmental Requirements

The B.A. in Psychology entails 30 credits in Psychology, including PSY 110. Students must also successfully complete a course in research design/statistics PSY 204*
(which counts toward the major and serves as a prerequisite for advanced methods
courses). Also required are 9 Psychology credits at the 300 level or higher and 6
additional credits at the 400 level or higher.

Students wishing to pursue careers in business, education, law, human resources,
religion, social work, or other related fields often choose the B.A. degree. When it
includes research-oriented courses such as PSY 204, PSY 316, PSY 418, and research
experience, the B.A. is also appropriate for students aspiring to graduate study in
many areas within Psychology. B.A. Psychology majors must choose one minor from
the list of minors published by the College of Arts and Sciences.

B.S. Departmental Requirements

The B.S. Psychology major entails 33 credits in Psychology, including PSY 110, PSY
204*, PSY 316, and PSY 418, plus 3 additional credits at the 300 level or higher and
6 additional credits at the 400 level or higher.

Psychology majors aspiring to graduate study in Psychology and related fields often
pursue the B.S. degree, as do students planning to attend medical school. B.S.
Psychology majors must elect a minor from among the following: Biochemistry,
Biology, Chemistry, Computer Science, Geology, Engineering, Mathematics, Microbiology and Immunology, or Physics.

*UM alternates to PSY 204 include BIL 311; SOC 211 and 212; and MTH 224.
These courses are acceptable as prerequisites for PSY 316, but do not count
toward the psychology major. Thus, students opting to do these alternate
courses must take another course in Psychology to total the number of credits
for that major.

Grades Required to Declare and Continue

A student must have an overall and Psychology GPA of at least 2.5 to transfer from another
major to Psychology, to declare Psychology as a second major, to change from Undeclared
status to a Psychology major.
Students transferring from another college or university must have cumulative and PSY
GPAs of at least 2.8.

Students are strongly advised not to continue as a Psychology major if, after having
completed 15 credits in Psychology, the Psychology GPA is less than 2.5 (this shall include
all courses taken in the major, not just the ones listed under the major). Additionally, at
least a C- must be earned in the MTH prerequisites prior to enrolling in PSY 204.

Grades Required to Graduate

A grade of C- or better is required in all courses applied to the Psychology major, and the
GPA in these courses must be at least 2.3.

MINOR

All Psychology majors must have a minor in another discipline. See above for the
stipulations pertaining to the B.A. and the B.S. degrees with a major in Psychology.
The minor in Psychology requires 15 credits in Psychology, with a grade of C- or better and a GPA of 2.0 or better for these 15 credits. No more than 3 of these credits may be in courses having no prerequisite, and no more than 3 credits may be in research courses (e.g., PSY 367). Of the 15 credits, 9 must have been completed at UM; with prior approval, 3 of these 9 credits may be taken through the UM Study Abroad Program.

**ADVISING**

The office of Undergraduate Services for Psychology (UASP) provides comprehensive advising services for all Psychology majors, minors, and those aspiring to become a major or minor. For curricular advice and for course transfer and approval, etc., students should consult an advisor in UASP. Flipse, Room 508.

Dr. Victoria Noriega is the Director of Undergraduate Studies in Psychology. vnoriega@miami.edu

Mr. Sean Kilpatrick is the Associate Director of Advising in UASP. smkilpatrick@miami.edu

**Freshmen**

All incoming freshmen declared Psychology majors in the College of Arts and Sciences receive their advising as a part of a year-long advising, orientation, and mentoring program known as FACT FORUM. All will be placed in a freshman experience section of FACT (Freshman Advising Contact Term). This is a one credit general elective course that is designed to integrate freshmen into the department by familiarizing them with the guidelines, opportunities, and responsibilities of a Psychology major. During the second semester, freshmen enroll in a FORUM section (Faculty Overview of Research and Undergraduate Mentoring). This one credit general elective course helps to put the curriculum in context, and stresses the importance of and opportunities for research. Advising for Spring and Fall semesters are also done in these courses. These courses are mandatory for all incoming Psychology majors.

Students wishing to declare a Psychology major after matriculation may be required to take part in an advising seminar prior to declaring the major.

**Research Participation in PSY 110**

As an introduction to behavioral science, students enrolled in PSY 110 may be required to participate as subjects in research studies being conducted by faculty and/or graduate students, or by reading and writing about selected research reports. For details, consult the course syllabus and/or contact the Department’s Undergraduate Academic Services for Psychology. Note: This introductory research participation requirement, by itself, is not sufficient for students interested in attending graduate school in psychology. See Research for Course Credit, below

**Residency Requirement**

Psychology majors must complete at least 15 upper division (300 level and above) Psychology credits in residence at UM. Additionally, the last 15 credits must be completed at UM. With prior departmental approval, 6 of these 15 may be completed through the UM Study Abroad Program.
Research Experience for Course Credit

Research is considered integral to the Psychology major. Students may earn course credit (PSY 367, PSY 368, PSY 498, and PSY 499) by working in the laboratory of a faculty member in or approved by the Department of Psychology. Before registration, written permission from the faculty mentor and the Director of Undergraduate Studies in Psychology is required. Students may also volunteer in a research laboratory: Necessary forms must be completed before working in the lab.

No more than 6 research credits (i.e., PSY 367/8 and PSY 499) may count toward the major. PSY 498 does not count toward the major or minor. Additional research credits may count toward general electives.

Course Prerequisites

All courses beyond the 100-level require students to have taken the introductory or foundation course PSY 110 or an equivalent approved by the Department of Psychology. Students who have not taken a prerequisite course (or who have taken it and obtained a D or F) may not enroll in the course for which it is a prerequisite. Students without prerequisites may be dropped from the class roll.

Transfer courses

Transfer students wanting courses taken elsewhere to count as Psychology courses at UM must obtain written Departmental approval during their first semester at UM. This is a separate process from the Admissions Evaluation of Transfer Credit. No more than one course at the 100 level (i.e., without a prerequisite) will be counted toward the major; these courses may, however, count as general electives if approved by the office of Admissions.

Regularly enrolled UM students wishing to take a Psychology course elsewhere (e.g., during the summer) must obtain prior Departmental approval if they wish it to be counted in place of a U.M. Psychology course. In some cases, transfer courses not approved as part of the major or minor may still meet other distribution or elective requirements.

Senior Assessment

Seniors will be required to take part in a senior assessment lasting up to four hours. Departmental self-assessment is mandated by SACS (The Southern Association of Colleges and Schools) and is a necessary part of accreditation. These scores will not affect the student’s graduation status.

DEPARTMENTAL HONORS

Departmental Honors in Psychology entails both excellence in regular course work and completion of a Senior Honors Thesis (PSY 498 and PSY 499), an individual research project done under the direction of a UM faculty member. Eligibility requirements for the Senior Honors Thesis in Psychology include 18 credits in psychology with a 3.3 cumulative GPA and a 3.5 Psychology GPA, completion of PSY 316 prior to enrolling in PSY 498, and usually a year of prior research with the faculty member.

To enroll in PSY 498 and PSY 499, students must obtain written approval from both the faculty mentor who will supervise the thesis and the Director of Undergraduate Studies in
Psychology. These faculty members will also assess the adequacy of the thesis upon completion.

Students are expected to complete the Thesis course sequence. A grade of “IP” (i.e., incomplete in progress) is given for PSY 498 until the PSY 499 is completed and approved by the Director of Undergraduate Studies.

Psychology Course Listing
RELIGIOUS STUDIES - Dept. Code: REL
www.as.miami.edu/religion

INTRODUCTION

The University regards the academic study of religion as an integral part of liberal, humane learning and seeks to assist students in understanding the role religion plays in human existence and culture. Instruction in the Department of Religious Studies is non-sectarian and seeks an open analysis of all points of view. Courses are designed to provide a general orientation to the academic study of religion for the undergraduate student, as well as more advanced exposure for those who wish to pursue professional careers where a study of religious ideas and institutions would be helpful, such as in psychology, sociology, history, journalism, teaching, law, medicine, the fine arts, religious education, the ministry, and the rabbinate.

The Department sponsors a wide variety of speakers and events each year, including a Religious Studies Colloquium series and a Forum on Religion and Public Life. It has enriched the existing curriculum by bringing to the campus such outstanding scholars as Elizabeth Kuebler-Ross, Joachim Jeremias, Alvin Plantinga, Harry M. Orlinsky, Anson Rainey, Abraham J. Malherbe, Alan Segal, William May, Robert Segal, Douglas Allen, Marvin Sweeney, Martin Hengel, Martin E. Marty, and Juergen Moltmann.

EDUCATIONAL OBJECTIVES

The general educational objectives of the Department are (1) to explore texts, histories, and ways in which humans from various cultures have understood their world including the beliefs, ethics, rituals, artifacts, and organizations of religions; (2) to understand the changing relationship between religion and elements of the wider culture including the dynamics of politics, art, economics, literature, and society and their relationship to religions; (3) to become familiar with the theories and methods used in the study of religion.

DEGREE PROGRAMS

The Department offers two tracks by which students may earn a major or a minor. The first track is Religious Studies, which is designed for students who are seeking a broad and comprehensive understanding of the world’s major religions and the cultures in which they are practiced. The second track is Religion and Health Care, which is designed for students who are interested in any aspect of health care or who wish to supplement their pre-med concentration with coursework in the field of Religious Studies.

MAJORS

The Religious Studies Major

For students entering the University in or after Fall 2008, a major in Religious Studies leading toward the B.A. degree requires 30 credits in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0. At least 15 credits must be earned in courses
numbered 300 or above. Six credits must be taken in each of the three following subject areas: 1) Religious Texts; 2) Historical Traditions; 3) Contemporary Issues. A major must earn writing credit (W) in at least one course in the department and must take the majors/minors seminar, REL 499.

Transfer students who major in Religious Studies must complete at least 15 credits in departmental courses numbered 300 or above in residence at the Coral Gables Campus.

The Religion and Health Care Major

For students entering the University in or after Fall 2008, a major in Religion and Health Care leading toward the B.A. degree requires 30 credits in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0. At least 15 credits must be earned in courses numbered 300 or above, and a major must earn writing credit (W) in at least one course in the department. Students must complete five Religion and Health Care courses and are required to take the majors/minors seminar (REL 499), one course in Religious Texts, and one course in Historical Traditions. The two remaining courses are electives chosen from any of the courses offered by the Department of Religious Studies.

Transfer students who major in Religion and Health Care must complete at least 15 credits in departmental courses numbered 300 or above in residence at the Coral Gables campus.

MINORS

The Religious Studies Minor

For students entering the University in or after Fall 2008, an undergraduate minor requires 15 credits, passed with a grade of C- or higher, and a GPA in the minor of 2.0. At least six credits must be earned in courses numbered 300 or above, and at least three credits must be taken in each of two of the three subject areas: 1) Religious Texts; 2) Historical Traditions; 3) Contemporary Issues. Religious Studies 101 is required of all minors. Religious Studies minors are encouraged to take the majors/minors seminar, REL 499, but are not required to do so.

Transfers who minor in Religious Studies must complete at least 6 credits in departmental courses numbered 300 or above in residence at the Coral Gables campus.

The Religion and Health Care Minor

For students entering the University in or after Fall 2008, an undergraduate minor in Religion and Health Care requires 15 credits, passed with a grade of C- or higher, and a GPA in the minor of 2.0. At least six credits must be earned in courses numbered 300 or above. The Religion and Health Care minor consists of REL 101 (Introduction to Religion), three Religion and Health Care courses, and one of the following: one course in Religious Texts, or one course in Historical Traditions, or the majors/minors seminar, REL 499.

Transfers who minor in Religion and Health Care must complete at least 6 credits in departmental courses numbered 300 or above in residence at the Coral Gables campus.
DEPARTMENTAL HONORS

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Theta Alpha Kappa, the National Honor Society for Religious Studies and Theology. Theta Alpha Kappa sponsors events that enhance the academic and social life of the department.

In keeping with its emphasis on a global approach to the study of religion and society, the Department sponsors a study abroad program known as URome. This semester-on-location program, which is open to all qualified University of Miami undergraduate students, is offered each spring semester in collaboration with the American University of Rome. A limited amount of scholarship support for the URome program is available for qualified Religious Studies majors and minors.

Religious Studies Course Listing
SOCIOMETRY - Dept. Code: SOC  
www.as.miami.edu/sociology

INTRODUCTION

The Department of Sociology offers two majors—sociology and criminology.

Course work in SOCIOMETRY is designed to provide scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other. Increasingly, sociologists are also focused on understanding the processes of globalization that are currently transforming contemporary societies.

Courses for both majors are designated SOC; see course list below. For information on Criminology please see the CRIMINOLOGY section of the Bulletin.

Students majoring in Sociology or Criminology may not minor in the reciprocal discipline.

EDUCATIONAL OBJECTIVES

The undergraduate program in Sociology has as its main objective to provide students with:

1. A strong component of a liberal arts education, training in analytical and statistical skills that are highly valued by potential employers;
2. A valuable undergraduate preparation for pursuing careers in such fields as journalism, politics, public relations, business or public administration and in other—fields that involve investigative or analytical skills or working with diverse groups;
3. An excellent and comprehensive training program for students wishing to pursue graduate work in programs leading to academic positions, research expertise, or work in the field of applied sociology.

DEGREE PROGRAMS

Students may earn a Bachelor of Arts degree in Sociology. The Department of Sociology also offers graduate programs leading to M.A. and Ph.D. degrees in the areas of:

- Medical sociology
- Race and ethnic relations
- Criminology

MAJOR

A major in SOCIOMETRY requires: a minimum of 31 credits, including:
Required Courses

SOC 101 Introduction to Sociology (3 credits)
SOC 210 Introduction to Social Research\(^1\) (3 credits)
SOC 211 Quantitative Methods for Sociologists\(^2\) (3 credits)
SOC 212 Quantitative Methods Lab (1 credit)
SOC 401 Sociological Theory (3 credits)

Two of the following three courses:
SOC 301 Social Organization (3 credits)
SOC 302 Social Psychology (3 credits)
SOC 303 Social Inequalities (3 credits)

Elective Courses

Four other courses offered by the Department for a total of 12 credits.

Other requirements

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of **16 credits must be earned in residency** in the Department; thus, only a maximum of 15 credits can be transferred from other institutions as eligible credits for the SOCIOLOGY major

MINOR

A minor in SOCIOLOGY requires a minimum of 15 credits, including:

Required Courses

SOC 101 Introduction to Sociology (3 credits)

Elective Courses

Four other courses offered by the Department, **two of which must be 300 level or higher**, for a total of 12 credits.

Other requirements

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 9 credits must be earned in residency in the Department; thus, only a maximum of 6 credits can be transferred from other institutions as eligible credits for the SOCIOLOGY minor.

\(^1\)EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education.
\(^2\)PSY 204 can be substituted for SOC 211 and SOC 212 only by students who are also majoring in Psychology.
DEPARTMENTAL HONORS

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Sociology or Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Sociology or Criminology. They must also achieve a minimum of B in all Sociology/Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.

2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499 (Honors I & II). The student should have the same professor(s) for all six credits.

3. Recruitment of eligible students is by department invitation at the beginning of a student’s junior year.

Sociology Course Listing
THEATRE ARTS - Dept. Code: THA
www.as.miami.edu/theatrearts

INTRODUCTION

The University of Miami Department of Theatre Arts offers two distinct undergraduate degrees: a liberal arts program leading to a Bachelor of Arts degree in theatre and a pre-professional conservatory-based theatre training program leading to a Bachelor of Fine Arts degree in either Acting, Musical theatre, Stage Management, Theatre Management, or Design/Production.

The Department also produces a season of plays and musicals at the Jerry Herman Ring Theatre as well as workshops and student projects in the Studio Theatre.

EDUCATIONAL OBJECTIVES

The mission of the University of Miami’s Department of Theatre Arts is to equip students to work in professional theatre, film and television or to gain admission to the best professional graduate programs.

Our graduates will be capable of applying theatrical techniques without guidance and will be capable of making independent creative judgment. Our broad aim in theatre training is professional excellence combined with depth of human understanding, freedom of expression and imagination in communication for all practitioners of the art and craft of theatre.

DEGREE PROGRAMS

THE BACHELOR OF ARTS DEGREE
THE BACHELOR OF FINE ARTS DEGREE

MAJOR

THE BACHELOR OF ARTS DEGREE
All students seeking a Bachelor of Arts degree in Theatre Arts must take the following courses with a grade of C- or higher in all Theatre Arts classes and an overall GPA of 2.0 or above. All classes listed as THA (with the exception of THA 101) are eligible to be counted towards the BA Theatre Arts degree. The student needs a minimum of 36 credits drawn from the requirements listed below.

All Bachelor of Arts Candidates have 18 credits of core classes that must be completed. The Core Classes are:
THA 105 or 106 (only one will be counted), 141/143, 142/144, 381, 481, and 482.

Additionally, students must complete 18 more credits of elective classes:
9 credits at the 200 level or higher level
6 credits at the 300 level or higher level
3 credits at the 400 level
Transfer students have a residency requirement of 18 Theatre Arts credits on campus.

Please note THA 101 (Intro to Theatre) is NOT for Theatre Arts MAJORS.

The State of Florida recognizes the Bachelor of Arts and Bachelor of Fine Arts Degrees as meeting the Theatre Arts subject area requirements for teaching at the secondary level. In addition to earning the BA or BFA degree in Theatre, students desiring to teach in the field of Theatre Arts should complete the required education credits in order to be certified by the state.

**THE BACHELOR OF FINE ARTS DEGREE**

In addition to the general requirements for admission to the University, the student seeking admission to the BFA program must meet the following requirements of the Department of Theatre Arts:

1. Submission of a special supplementary application to the Department of Theatre Arts. (This form is located on the Department of Theatre Arts website under “Prospective Students.”)

2. An audition or interview/portfolio review to determine acceptance into the program. These audition/reviews will be held three times on the University of Miami campus as well as in major cities throughout the United States.

3. Design/technical production, stage management and theatre management students will be accepted into these programs on a probationary basis following an interview/portfolio review. Permanent acceptance into these programs will be made at the end of the first year by a thorough examination of the student’s portfolio.

Transfer students must follow the same entering procedures as freshmen and should realize that placement into the program will be determined by the Theatre Arts faculty. Candidates cannot transfer into the design/technical production, stage management and theatre management BFA degree program beyond their sophomore year, unless approved by the head of the appropriate program. Transfer students are not allowed into the performance or musical BFA degree programs unless they are willing to begin on the freshman level in their conservatory curriculum.

The candidates for the degree of Bachelor of Fine Arts must satisfy the College of Arts and Sciences distribution requirements.

Each BFA student will be evaluated by the faculty at the end of each semester. This evaluation will determine if the student is invited to continue in the program. Additional evaluations will take place each time a student is involved in a project.

In Theatre Arts Department courses a cumulative 2.7 grade point average is required to remain in the BFA program. A Theatre Arts major must maintain a minimum grade of C- or higher in each required course outside the theatre. Failure to maintain satisfactory academic standing may result in the student being placed on academic probation by the Department and eventually to dismissal from the program.

Theatre Arts courses are progressive in nature and students must successfully complete each course in sequence. Failure to pass the requirements of any particular class in the conservatory may result in the student’s dismissal from the program.
Production activities and discipline within the Department will be governed by a student handbook, available on the Department website (www.miami.edu/tha).

Musical Theatre and Acting Majors will be admitted to the Bachelor of Fine Arts degree program only in the fall of each academic year.

The following pages specify the course requirements for each area of the BFA program.

### DESIGN/TECHNICAL PRODUCTION CURRICULUM

#### FRESHMAN YEAR

## Note:

1. All Stage Management majors are required to participate in a production capacity in one show per semester for all eight semesters.

2. All Stage Management majors are required to stage manage or assistant stage manage one show in each year in their Sophomore, Junior and Senior year. This management assignment doubles as their production assignment for that particular semester.

3. THA 459 Stage Management Practicum can be repeated for a maximum of 18 credits.

4. THA Elective must be a 200 level or above course unless otherwise approved by Stage Management Faculty.

## MINOR

### MINOR IN THEATRE ARTS
A minor in Theatre Arts consists of 15 credits of Theatre Arts classes with a minimum grade of C- in each course and an overall GPA of 2.0 or above.

[Theatre Arts Course Listing](#)
INTRODUCTION

The minor in Urban Studies provides undergraduate students with a flexible concentration in interdisciplinary studies of cities, urbanism, and urbanity. Urban Studies is a long established academic field, especially prominent in major cities in the United States. Course work combines a practical focus on Metropolitan Miami with more general attention to urban theory and globalization from a global perspective.

The minor has a liberal arts orientation and includes perspectives from the social sciences, architecture, and history. It is a useful complement to majors such as Geography, History, Sociology, Anthropology, Literature, International Studies, Economics, Political Science, and others. The minor is also of particular interest to students in Architecture Communication and Business. Courses in the Minor are taught in the College of Arts & Sciences and the School of Architecture. Note that there are slightly different requirements for ARC students.

MINOR

Requirements:

- Students must complete 15 credits (five courses);
- In all five courses, students must achieve a minimum grade of C- with a 2.0 overall GPA;
- All minors are required to take two core courses:
  - URB 201 Metropolitan Miami, 3 cr.
  - URB 301 Cities in Time and Space, 3 cr.

- In addition, students must select three courses from the list of Optional Courses, below. All are 3-credit courses. ARC students may select no more than one ARC course while Non-ARC students must select at least one ARC course. Note that URB 201 or URB 301 will suffice as prerequisites for any of these courses.
  - AMS 350 History and Culture of South Florida
  - ARC 390/590 History of Cities
  - ARC 541 Seminar on Town Design
  - ARC 546 Studies of Havana
  - ARC 554 Architecture of South Florida
  - ARC 584 Special Topics: On-Site Survey of European Architecture and Urbanism
  - APY 420 Archaeology, Architecture, and the City
  - ENG 395 Latino/a Metropolis
  - FIN 340 Real Estate Principles
  - GEG 430 World Cities
  - GEG 511 Spaces of Hope
  - GEG 522 Urbanization in the Developing World
  - GEG 523 Seminar in Urban Management
  - INS 504 Human Security and Urban Violence
  - SOC 304 Dynamics of Poverty in the United States
  - SOC 368 Violence in America
- SOC 386 US Immigration
- HIS 369 Introduction to Urban America
- HIS 371 Immigration, Race, and Ethnicity in American History
- POL 343 Government in Metropolitan Areas

Other courses may be approved upon request; please consult the program Director, Dr. Jan Nijman at Nijman@miami.edu.
INTRODUCTION

The Program in Women's and Gender Studies at the University of Miami seeks to encourage the rigorous investigation of gender as a significant issue in all areas of human experience. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures based on gender shape our lives. The program's core objective is to foster the examination, open discussion, and lively debate of gender issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university's academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

EDUCATIONAL OBJECTIVES

The undergraduate curriculum in Women's and Gender Studies explores the ways in which ideas about gender and sexuality shape social roles and identities, as well as the ways in which race, ethnicity, class, and nationhood influence the perception and experience of gender and sexuality within particular cultures. The curriculum is informed by recent scholarship that recognizes gender and sexuality as crucial components of human experience in social, cultural, economic, political, religious, and legal contexts. It includes courses that introduce students to feminist theory and scholarship, engaging ethical and political issues of equality and justice. The program encourages students to question their assumptions about the possible meanings of female and male through the comparative study of how different societies and historical periods have viewed manhood, womanhood, and relations between women and men. Courses in Women's and Gender Studies enable students to acquire critical and analytical skills that they can then apply in other aspects of their educational experience at UM and beyond the university in their careers and personal development.

MAJOR

A major in Women's and Gender Studies consists of at least 30 credits in Women's and Gender Studies courses (core, co-listed, and cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses. These credits must include at least 18 at the 300 level or above. All majors must complete WGS 201: Introduction to Women's and Gender Studies, WGS 301: Feminist Inquiries, and at least two other WGS core courses.

All majors must complete WGS 501: Senior Research Project, which will take the form of an individual research project with a faculty member of the student's choice; the student is responsible for finding an appropriate faculty member who is available to supervise the project and then must seek formal approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will vary according to the nature of the project.
MINOR

1. A minor in Women's and Gender Studies consists of at least 15 credits in Women's and Gender Studies courses (core, co-listed, and cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses. These credits must include at least 9 at the 300 level or above. All minors must complete WGS 201: Introduction to Women's and Gender Studies, WGS 301: Feminist Inquiries and at least one other WGS core course.

2. New Minor

I. Overview of the Program: LGBTQ (Lesbian/Gay/Bisexual/Transgender/Queer) Studies

The LGBTQ Studies minor is designed to allow students to explore sexuality and sexual minorities from a variety of perspectives. The course will provide students with an introduction to a broad array of LGBTQ issues including visual and performing arts, literature, languages, history, social science, various theories, public policy and the law, families and other types of intimate relationships, crime, popular culture, and LGBTQ identities and communities. This widely interdisciplinary field addresses work in a broad range of scholarly disciplines including biological and cultural studies, in literature and anthropology, in the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of popular culture to investigations into the development and social construction of sexual identity.

II. Requirements for the Minor:

MINOR IN LESBIAN/GAY/BISEXUAL/TRANSGENDER/QUEER (LGBTQ) STUDIES

A minor in LGBTQ Studies consists of at least 15 credits in LGBTQ Studies courses (requirements, core, and related courses, co-listed and cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in LGBTQ courses. All minors must complete WGS 202: Introduction to LGBTQ Studies and WGS 201: Introduction to Women's and Gender Studies. The remaining course work must include at least 9 credit hours at the 300 level or above and no more than 6 credit hours in any one department or program or more than 3 credit hours of individual studies without the approval of the program director.

REQUIREMENTS

WGS 202: INTRODUCTION TO LGBTQ STUDIES
An introductory examination of lesbian, gay, bisexual, transgender and queer issues from an interdisciplinary perspective. (3 credits).

WGS 201: INTRODUCTION TO WOMEN’S AND GENDER STUDIES How are our lives shaped by gender? This course introduces students to the ways in which Women’s and Gender Studies as an interdisciplinary field examines conceptions of masculinity and femininity; gender relations; gender inequalities; the intersections of gender with other categories of identity such as class, race, sexuality, and stages in the life cycle; and the broad impact of gender on society (including political, legal, economic, and religious arenas). (3 credits).

CORE COURSES (SELECT AT LEAST 6 CREDITS) WGS 210: POPULAR REPRESENTATIONS OF QUEER SEXUALITIES (3 credits).
WGS 210: POPULAR REPRESENTATIONS OF QUEER SEXUALITIES (3 credits).
WGS 350: SPECIAL TOPICS IN WOMEN’S AND GENDER STUDIES (3 credits).
WGS 450: SPECIAL TOPICS IN LGBTQ STUDIES (3 credits).
WGS 499: INDEPENDENT STUDY
WGS 501: SENIOR RESEARCH PROJECT

All minors may choose to complete an individual research project with a faculty member of the student’s choice; the student is responsible for finding an appropriate faculty member who is available to supervise the project and then must seek formal approval from the written report or research paper, the format of which will vary according to the nature of the project.

POL569: POLITICS, LAW AND SEXUAL IDENTITY (3 credits).
This course considers sexual politics by looking in depth at several issues including; restrictions on marriage, adoption, employment, military service, housing, and intimacy based on sexuality and/or gender identity. For each issue, we shall consider how the debate is constructed by politicians, academics, the media, LGBT activist organizations and law/legal theory. We will also contemplate the state and national politics at work within these issues. Finally, we will consider the topics from a comparative view as well as address the international implications arising out of that comparative consideration. In general, the goal is to learn about the current state of the politics of sexual identity in the United States and abroad. Moreover, students will engage frameworks through which politics might be assessed and determine the generalizability of the logics of politics. PREREQUISITE: POL 211 AND 212. POL 373 AND 374 RECOMMENDED.

SOC 335: SOCIOLOGY OF LGBTQ COMMUNITIES AND IDENTITIES (3 credits).
This course examines the history, methods, theory and concepts of social science research on LGBTQ topics from the last half century to the present. Prerequisite: SOC 101.

WGS 305: QUEER STUDIES (3 credits).
This course examines gay, lesbian, bisexual, transgender, transsexual, and queer identities as they shape daily lives and experiences; the construction of alternative family structures; queer theory and its implications for our understanding of key issues across a range of disciplines; and current debates over the meaning and validity of sexuality as a way of understanding human sexual desire, emotions, and behavior.

RELATED COURSES:

STUDENTS SELECT TWO APPROPRIATE AND RELEVANT COURSES IN ANY DEPARTMENT, IN CONSULTATION WITH THE DIRECTOR OF WGS.

PLEASE NOTE: Only WGS 201 (Introduction to Women's and Gender Studies) may count for BOTH the major in WGS AND the minor in LGBTQ Studies.

DEPARTMENTAL HONORS

Women's and Gender Studies majors with a cumulative GPA of at least 3.5 in WGS courses and an overall GPA of at least 3.0 may earn departmental honors by completing WGS 505: Honors Thesis instead of the senior research project. Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as thesis adviser and then must complete a thesis proposal of approximately 400 words which must be approved by the thesis adviser and then the program director. The format and length of the thesis will
vary according to the nature of the project. Most students writing an honors thesis as part of their WGS major will take WGS 505 twice (for a total of 6 credits).

Women’s and Gender Studies Course Listing
INTRODUCTION

The School of Business Administration offers courses leading to the degrees of Bachelor of Business Administration (BBA) and Bachelor of Science in Business Administration (BSBA). Undergraduate degrees in business are administered by the Vice Dean, Undergraduate Business Education.

MISSION

The mission of the University of Miami School of Business Administration is to provide an environment in which the creation and dissemination of business knowledge can flourish.

ACCREDITATION

The Bachelor of Science in Business Administration and the Bachelor and Master of Business Administration as well as the undergraduate and graduate Accounting programs are fully accredited by The Association to Advance Collegiate Schools of Business, International (AACSB – International).

ACADEMIC POLICIES

Student Responsibilities

- Students in the School of Business Administration are responsible for planning their own programs and for meeting degree requirements;
- It is the student’s responsibility to understand fully, and to comply with all the provisions of this Bulletin and written changes to their program of study;
- Students are provided assistance by academic advisors and faculty members;
- Requests for deviation from department, program, or school requirements are granted only by written approval from the Vice Dean or respective department chairperson;
- Information regarding appeal procedures and special requests relative to academic matters is available in Merrick 104, School of Business Administration, Office of Undergraduate Business Education.
- Students who are in violation of the provisions of this Bulletin may be withdrawn unilaterally by appropriate School officials from classes, deleted as Business students, and/or have a “STOP” placed upon their future enrollment;
• Students who are disruptive in class as determined by assigned faculty and the appropriate Vice Dean will be dropped from the class;

Admission to the School of Business Administration

Admission to the University for undergraduate study as a freshman is sufficient to be granted admission to the School of Business Administration. However, strong quantitative skills are typically needed for success. Admitted students may select an intended major and optional minor(s). Students who do not state an intended major are listed as undeclared in business.

Transfer Student Admission

The transfer applicant must submit a satisfactory academic record in compliance with the standards of the University of Miami, Office of Admission. All previous transfer courses must be from an accredited institution. The applicant must be in good academic standing at all institutions previously attended with a minimum cumulative grade point average of 3.0. A minimum grade of "C" (2.0) must be earned in transfer courses, unless otherwise stated, in order for credit to be awarded. All grades earned in transfer courses are used to determine the overall cumulative grade point average. This includes repeated courses under a forgiveness policy at previous institutions.

All applicants to the School of Business Administration must have completed and received college credit for a calculus course and earned a grade of “B” or better. The calculus course must be evaluated by submitting the syllabus and textbook title for review to the Director of Advising, Undergraduate Business Education in the School of Business Administration.

Any business course that is from a non-AACSB accredited institution will be accepted as electives toward the degree requirements. An applicant may appeal the decision by submitting the syllabus and textbook title to the appropriate department for review.

Transfer coursework must meet the specific curriculum requirements as determined by the Office of Undergraduate Business Education. Note that transfer students must complete 50 percent of the total Business Foundation and Professional Business Core and 50 percent of all major and all minor courses at the University of Miami.

It is strongly recommended that transfer applicants meet the following requirements at the time of transfer application:

• One semester of microeconomics (ECO 211), which may also be fulfilled by:
  o A score of "3" on the AP Microeconomics exam;
  o A score of "5" on the IB Higher Level Economics exam;
  o A course equivalent to microeconomics as determined by the Department of Economics.

• One semester of financial accounting (ACC211), which may also be fulfilled by:
  o A course equivalent to Financial Accounting as determined by the Department of Accounting.

• One semester of statistics (MAS201), which may also be fulfilled by:
  o A score of "4" on the AP Statistics exam;
A course equivalent to Introduction to Business Statistics as determined by the Department of Management Science.

It is strongly recommended that transfer applicants applying with 60 semester hours or more meet the following requirements at the time of transfer application:

- Two semesters of introductory economics, Micro and Macro (ECO211 and ECO212), which may also be fulfilled by:
  - A score of "3" on the AP Micro and/or Macroeconomics exam;
  - A score of "5" on the IB Higher Level Economics exam awards credit in Microeconomics;
  - A score of "6" on the IB Higher Level Economics exam awards credit in Micro- and Macroeconomics;
  - A course equivalent to Microeconomics or Macroeconomics as determined by the Department of Economics.

- One semester of financial accounting (ACC211), which may also be fulfilled by:
  - A course equivalent to Financial Accounting as determined by the Department of Accounting.

- One semester of managerial accounting (ACC212) which may also be fulfilled by:
  - A course equivalent to Managerial Accounting as determined by the Department of Accounting.

- One semester of statistics (MAS201), which may also be fulfilled by:
  - A score of "4" on the AP Statistics exam;
  - A course equivalent to Introduction to Business Statistics as determined by the Department of Management Science;
  - A second semester of statistics (MAS202) is strongly recommended, which may be fulfilled by a course equivalent to Intermediate Business Statistics as determined by the Department of Management Science.

**Academic Progress and Probation**

- The School of Business Administration will review each student’s record at the end of each semester;

- When a student’s semester or cumulative average is less than 2.0, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with the University’s or School of Business Administration’s policies and procedures;

- Full-time business students who are not completing sufficient courses to graduate after ten regular semesters of enrollment are deemed not to be making satisfactory academic progress;

- The extent to which a student’s record is below a 2.0 average determines the severity of the sanction, i.e., warning, academic probation, or dismissal;

- Students on probation are not permitted to enroll in more than 13 semester hours and may have a “STOP” placed upon their future enrollment until grades for work-in-progress are reviewed.
Academic Dismissal

- Business students may be dismissed in accordance with the University’s or School of Business Administration’s Dismissal Standards;

- Additionally, a student in the School of Business Administration whose grade point average or progress toward degree completion falls below the level of the minimum standards may be dismissed;

- Students will be precluded from continuing their studies in a major or courses if they do not have the specified grade point average or grades for the major or courses;

- A student who is precluded from continuing as an undergraduate business student because of failure to satisfactorily complete the required business foundation courses or to attain a high enough grade point average is not considered as having been academically dismissed from the University. Accordingly, such students may apply to another School or College and if accepted, continue as students at the University of Miami.

Freshman Repeat Rule (FRR)

The Freshman Repeat Rule (FRR) allows a student who receives a "D" or an "F" in a course taken at the University of Miami within the student's first thirty semester hours or first two regular semesters of college work, to repeat up to two such courses within the following two semesters. After the course has been repeated, only the second grade earned will be used in the computation of the student’s cumulative grade point average. However, the initial grade remains on the record, although the initial grade does not count as credits attempted or earned at the University of Miami.

The following policy is applied specifically to business students using the University’s Freshman Repeat Rule (FRR):

- The student’s academic standing is based upon the current grades being counted as credits attempted or earned;

- Students who repeat a course not under the provisions of the FRR are administered using the University General Repeat Rule;

- Students desiring to implement the policy must complete the FRR Request Form which is available in the School of Business Administration, Office of Undergraduate Business Education;

- The summer sessions are not counted as a semester in computing the two semesters in which a student may elect to repeat a course with a “D” or “F” grade. Additionally, a student who initially enters the University in the spring semester may repeat courses with a “D” or “F” grade taken in the summer sessions following initial enrollment without having the summer sessions count as one of the first two semesters;

- For additional information about the FRR, consult an Undergraduate Business Academic Advisor.
Readmission

The requirements for readmission may be viewed in the General Information section of this Bulletin. The following special conditions are in effect for the School of Business Administration:

- Students requesting readmission who were previously dismissed for academic reasons or who had below a 2.0 cumulative grade point average must present adequate evidence that the conditions and/or factors that caused their prior poor academic performance have changed sufficiently and that there is a reasonable expectation of satisfactory performance if they are permitted to resume study in the School of Business Administration;

- Additionally, students with prior unsatisfactory academic records who are readmitted may have conditions placed upon their readmission;

- Students requesting readmission who have earned 30 or more credits, unless otherwise specified, must have completed a calculus course with a grade of C or higher.

- Failure to satisfactorily accomplish the stated conditions may result in the student not being permitted to register for future semesters.

Changes to Academic Requirements

The School of Business Administration reserves the right to change academic requirements to include course offerings, grades, and grade point averages, to ensure that students are receiving the latest knowledge and are maintaining standards necessary to be professionally competitive. Changes are transmitted to students either by written or electronic notice, or by academic advisors or mentors.

REQUIREMENTS FOR GRADUATION

Residency Requirements

A candidate for the BBA or BSBA degree must complete the last 45 semester hours consecutively and exclusively in degree-seeking status in residence at the School of Business Administration, University of Miami, as well as meet the graduation requirements as listed in Degree Programs. Credit by examination may not be used to meet the residency requirement. In addition, a minimum of 120 semester hours is required for graduation, not including ENG103, or MTH099. The last 56 semester hours must be taken at a four-year institution.

Age of Credits

Credits more than 12 years old are not recognized for degree purposes.

Grade Point Average

Students must earn a cumulative grade point average of at least 2.0 on all undergraduate courses and a grade point average of at least 2.0 on all undergraduate courses taken at the
University of Miami. Some majors require a higher grade point average. It is the student’s responsibility to be familiar with the grade point requirement for their respective major.

**Percentage of Credits at UM required**

At least fifty percent of the total semester hours required in the Business Foundation, Professional Business Core, and the major and minor must be completed at the University of Miami. Considered separately, fifty percent of the semester hours required in the major only and/or minor only must be completed at the University of Miami.

**DEGREE PROGRAMS**

**BACHELOR OF BUSINESS ADMINISTRATION (BBA)**

**Areas of Study**

All BBA majors must complete areas A, B, C, D, E, F, and G as listed below. All courses except area E must be taken for graded credit.

**A. BUSINESS FOUNDATION (39 Semester Hours)**

- ACC211* Principles of Financial Accounting
- ACC212 Managerial Accounting
- BSL212 Introduction to Business Law
- CIS150* Business Analytics
- ECO211* Economic Principles and Problems – Microeconomics
- ECO212 Economic Principles and Problems – Macroeconomics
- ENG105* English Composition I
- ENG106* English Composition II
- MAS 110* Quantitative Applications in Business (Business Calculus)
- MAS201* Introduction to Business Statistics
- MAS202 Intermediate Business Statistics
- MGT100* F.I.R.S.T. Step
- MKT201 Fundamentals of Marketing

*Classes marked with an asterisk must be completed BEFORE beginning the Professional Business Core courses.

Unless otherwise specified, MAS110 and MAS201 must be completed with a “C-“ or better.

ALL Business Foundation courses must be completed before entering any business major and/or minor course work.

**B. PROFESSIONAL BUSINESS CORE (21 Semester Hours)**

- CIS410 Information Systems and Technology
- ECO302 Micro Economic Theory
- FIN302 Fundamentals of Finance
- MGT303 Operations Management
- MGT304 Organizational Behavior
- MGT401 Strategic Management (Must be taken in final semester)
CORE ELECTIVE  Any course at 300 level or higher from the School of Business Administration or any course at the 300 level or higher in a modern language.

C. GENERAL EDUCATION (30 Semester Hours)
   ENG230  Advanced Business Writing
   Fine Art
   Humanities
   Literature  From Department of English
   Natural World  (6 Semester Hours)
   People and Society  (6 Semester Hours)
   Philosophy or Religion
   General Education Elective (From outside the School of Business Administration)

D. MAJOR AND MINOR REQUIREMENTS
All students must complete the requirements for at least one major in one of the areas of specialization. Additionally, students may elect to complete a minor in an area of specialization distinctly different from their major. The minor may be in an area of specialization offered by the School of Business Administration or by another school or college of the University. The major and minor requirements are specified by each department. All specialization (major/minor) requirements must be taken for a grade and completed with a grade of “C-” or higher with an overall grade point average in all major and minor courses attempted of at least a 2.0 unless a higher grade or grade point average is prescribed for a specific major or minor.

Dual Business Majors in distinctly different areas of specialization are also possible, pending proper scheduling. The only specialized courses that can be counted toward both majors or a major and a minor are those courses specifically listed by number as required for both majors and/or minors. The courses of choice required for one major or minor may not be utilized to satisfy requirements for a second major or minor.

Business students may choose to pursue a second major (also referred to as a co-major) from the College of Arts and Sciences. No courses used to satisfy a co-major may be used to satisfy a business major or minor. Courses used to satisfy a co-major may, however, also be used to satisfy a general education requirement or the General Education Elective.

Students in other colleges and schools desiring a major in the School of Business Administration must complete all requirements for both degrees and majors. A student in another School or College at the University of Miami pursuing a business degree as a “second degree,” must meet the requirements for transfer to the School of Business.

Students are required to declare their majors and minors with the Office of Undergraduate Business Education prior to the start of their senior year. Students are advised that it often takes more than the minimum 120 semester hours to complete a minor or second major.

**Minors offered by other colleges and schools**

Please see the college, school, or department section within the Bulletin.

**E. ELECTIVES (as needed to meet the minimum 120 semester hours)**

All undergraduate courses offered by the University may be used as free electives with the following exceptions:

- Not more than eight semester hours in applied music including band may be used;
- Courses taken in the following subjects require approval of the Vice Dean: athletic, physical and recreational activity courses offered in Kinesiology, Paralegal Studies, Vocal Performance and Teaching and Learning;
- ENG103 - Basic Writing Skills and MTH099 - Intermediate Algebra are offered but do not count toward degree requirements although the grade earned in the respective course is calculated into the cumulative grade point average;
- Any science course taken as an elective and used for preparing for entrance to medical school must be taken for a grade.
F. WRITING ACROSS THE CURRICULUM
Four of five writing courses required are provided within the degree requirements by the completion of BSL212, ENG230, one literature course, and MGT401. A fifth writing course is needed to complete University writing requirements.

G. INTERNATIONAL FOCUS WITHIN THE CURRICULUM
At least one course with an international focus must be completed within the degree requirements. The acceptability of the course is determined by the academic advisor.

BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION (BSBA)

Areas of Study
The BSBA degree in the School of Business Administration emphasizes quantitative foundation courses. All BSBA majors in the School of Business must complete areas A, B, C, D, E, F, and G as listed below. All courses except area E must be taken for graded credit.

Philosophy or Religion

D. MAJOR AND MINOR REQUIREMENTS

All students must complete the requirements for at least one major in one of the areas of specialization. Additionally, students may elect to complete a minor in an area of specialization distinctly different from their major. The minor may be in an area of specialization offered by the School of Business Administration or by another school or college of the University. The major and minor requirements are specified by each department. All specialization (major/minor) requirements must be taken for a grade and completed with a grade of “C-” or higher with an overall grade point average in all major and minor courses attempted of at least a 2.0 unless a higher grade or grade point average is prescribed for a specific major or minor.

Dual Business Majors in distinctly different areas of specialization are also possible, pending proper scheduling. The only specialized courses that can be counted toward both majors or a major and a minor are those courses specifically listed by number as required for both majors and/or minors. The courses of choice required for one major or minor may not be utilized to satisfy requirements for a second major or minor.

Business students may choose to pursue a second major (also referred to as a co-major) from the College of Arts and Sciences. No courses used to satisfy a co-major may be used to satisfy a business major or minor. Courses used to satisfy a co-major may be used, however, to satisfy a general education requirement or the General Education Elective.

Students in other colleges and schools desiring a major in the School of Business Administration must complete all requirements for both degrees and majors. A student in another School or College at the University of Miami pursuing a business degree as a “second degree,” must meet the requirements for transfer to the School of Business.

Students are required to declare their majors and minors with the Office of Undergraduate Business Education prior to the start of their senior year. Students are advised that it often takes more than the minimum 120 semester hours to complete a minor or second major.
Majors and Minors for the BSBA Degree

**Major Areas of Specialization**  
**Responsible Department**

- Accounting (ACCS)  
  ACC  
- Computer Information Systems (CISS)  
  CIS  
- Economics (ECOS)  
  ECO  
- Entrepreneurship (ENTS)  
  MGT  
- Finance (FINS)  
  FIN  
- Health Sector Management & Policy (HSMP)  
  MGT  
- Human Resource Management (HRMS)  
  MGT  
- International Finance and Marketing (IFMS)  
  FIN  
- Legal Studies (LSTS)  
  BSL  
- Management (MGTS)  
  MGT  
- Management Science (MASS)  
  MAS  
- Marketing (MKTS)  
  MKT  
- Real Estate (REAS)  
  FIN

**Minor Areas of Specialization**  
**Responsible Department:**

- Accounting (ACCB)  
  ACC  
- Business Law (BSL)  
  BSL  
- Computer Information Systems (CIS)  
  CIS  
- Economics (ECOB)  
  ECO  
- Entrepreneurship (ENBH & ENBT)  
  MGT  
- Finance (FIN)

  Undergraduate Business Education  
- Management (MGTB)  
  MGT  
- Management Science (MASB)  
  MAS  
- Marketing (MKTB)  
  MKT

**Minors offered by other colleges and schools**  
Please see the college, school, or department section within the Bulletin.

**E. ELECTIVES (as needed to meet the minimum 120 semester hours)**

All undergraduate courses offered by the University may be used as free electives with the following exceptions:

- Not more than eight semester hours in applied music including band can be used;

- Courses taken in the following subjects require prior approval of the Vice Dean: athletic, physical and recreational activity courses offered in Kinesiology, Paralegal Studies, Vocal Performance and Teaching and Learning;

- ENG103 - Basic Writing Skills and MTH099 - Intermediate Algebra are offered but do not count toward degree requirements although the grade earned in the respective course is calculated into the cumulative grade point average;

- Any science course taken as an elective and used for preparing for entrance to medical school must be taken for a grade.
F. WRITING ACROSS THE CURRICULUM
Four of five writing courses required are provided within the degree requirements by the completion of BSL212, ENG230, one literature course, and MGT401. A fifth writing course is needed to complete University writing requirements.

G. INTERNATIONAL FOCUS WITHIN THE CURRICULUM
At least one course with an international focus must be completed within the degree requirements. The acceptability of the course is determined by the academic advisor.

INTERNATIONAL BUSINESS MINOR

IBUB MINOR

The International Business minor provides business students an interdisciplinary perspective of international business to augment their studies in other areas of specialization. The International Business minor consists of 12 semester hours as follows:

Core Courses - Choose two, three, or four courses from the following:
- ACC523
- FIN330
- MGT349
- MGT459
- MKT360

Breadth Elective Courses - Choose one or two courses to equal 12 total semester hours for the IBUB minor from:
- BSL412 ECO442 POL346 POL381 POL392
- ECO351 FIN431 POL347 POL384 POL544 POL591
- ECO371 MGT359 POL348 POL385 POL582 POL593
- ECO441 MKT469 POL380 POL387 POL588

The IBUB Minor may not be taken by students with the IFM major.

Student must complete all prerequisite courses before enrolling in required IBUB courses.

MINORS FOR NON-BUSINESS MAJORS (12-15 Semester Hours for Minor)

The School of Business Administration offers students in other schools and colleges of the University minors in:

<table>
<thead>
<tr>
<th>Minor Areas of Specialization</th>
<th>Responsible Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Administration (BUA)</td>

</tr>
</tbody>
</table>
The International Business minor, the Accounting minor and the Management Science minor (BSBA degree only) are offered only to majors in the School of Business Administration.

Students interested in completing a minor offered by the School of Business Administration should consult with an academic advisor in the school or college of their major to determine if a minor in business is acceptable. The student must consult with an academic advisor in the Office of Undergraduate Business Education for assistance in planning the minor. All courses within the minor must be taken for a grade and completed with a grade of “C-” or higher and with an overall grade point average of at least 2.0 in all minor courses unless a higher grade or grade point average is prescribed by the minor department. All courses in the minor department in which the student enrolls will count toward the minor grade point average.

The Business Administration Minor (BUA) consists of four courses (12 semester hours).

The required courses are:
ACC211 Principles of Financial Accounting
MGT304 Organizational Behavior
FIN300 Finance for Non-Business Majors
MKT301 Marketing Foundations

Note: A student must have 30 earned semester hours before enrolling in ACC211. Additionally, a student must have 60 earned semester hours before enrolling in the respective FIN, MGT, or MKT courses. ACC211 should be the first course taken for the BUA minor.

For a listing of the course requirements for other minors, consult the Bulletin section for the department that offers the minor.

HONORS

DEPARTMENTAL HONORS IN BUSINESS

Graduation with Departmental Business Honors requires:

- A 3.9 g.p.a. in Business School courses at the end of the junior year
- Completion of a 3-credit research project during the entire senior year on a topic that is of interest to both the faculty member supervising the research and the student responsible for completing it. The depth of the project must be consistent with the time requirements of a 3-credit upper-level class in the supervising department.
- A 3.9 g.p.a. in all Business School courses at graduation.

Students who double major can complete their research project in either major department. Students in combined majors (ENT, HSMP, IFM, REA) can complete their research project in any department within the major. Students who have a minor can complete their research project in either their major or minor departments.
The 3-credit research project class is taken for credit only and will not count towards the 120 hours required for graduation. Students who begin a research project but do not complete it will be retroactively withdrawn from the research course. Students receive credit for the project only if the work is deemed to be of exceptional quality, consistent with the workload of a 3-credit upper-level independent study course, and worthy of a designation that is only open to the top 1% of Business School undergraduates.

Deadlines and procedures for the projects are available in the Office of Undergraduate Education and in department offices.

**GENERAL HONORS PROGRAM, UNIVERSITY OF MIAMI**

Eligible students are invited to join the University’s General Honors Program. A total of 24 semester hours of designated honors credits is required. A 3.5 cumulative grade point average must also be maintained in all honors courses.

For details, consult an academic advisor in the Office of Undergraduate Business Education and the University Honors Program Office.

**GENERAL BUSINESS HONORS, SCHOOL OF BUSINESS ADMINISTRATION**

Business students who are members of the General Honors Program of the University, are completing the required 24 hours for that program, and have demonstrated superior performance in the School of Business may receive academic advantages, certain privileges, and recognition by participation in and successful completion of General Business Honors.

General Business Honors requires that 15 of the 24 semester hours are business courses taken in sections designated as “Honors.”

Strategic Management, MGT401 (at the Honors section), must be one of the 5 courses.

Examples of other business courses frequently offered in honors sections are:
- BSL212 Introduction to Business Law
- ECO211 Economic Principles and Problems (microeconomics)
- ECO212 Economic Principles and Problems (macroeconomics)
- ECO302 Micro Economic Theory
- FIN302 Fundamentals of Finance
- MGT304 Organizational Behavior
- MKT201 Foundations of Marketing

In addition, a 3.5 cumulative grade point average must be maintained in all honors business courses to receive the notation, “General Business Honors” on the diploma and transcript.

For details, consult an academic advisor in the Office of Undergraduate Business Education and the University Honors Program Office.
GRADUATION HONORS

- Students who qualify based on their cumulative grade point average and class rank will graduate with *cum laude*, *magna cum laude* or *summa cum laude* honors.

- For details consult an academic advisor in the Office of Undergraduate Business Education and the University Honors Program Office.

BUSINESS HONORS SOCIETIES

Students may be nominated for or elected into an honors society based on specific departmental criteria. Contact the department for additional information.

Beta Gamma Sigma (Highest Honors in Business) (Undergraduate Business Education)
Beta Alpha Psi (Department of Accounting)

OTHER HONORS

Omicron Delta Epsilon (Department of Economics)
Hyperion Council (Undergraduate Business Education)
ACCOUNTING - Department Code: ACC

INTRODUCTION AND EDUCATIONAL OBJECTIVES

The objective of the program of studies in accounting is to prepare students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed upon general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

DEGREE PROGRAMS

An Accounting major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

The undergraduate curriculum consists of 24 semester hours of Accounting and three semester hours of Business Law beyond the Business Foundation and the Professional Core requirements.

The following courses are required:

<table>
<thead>
<tr>
<th>ACC301</th>
<th>ACC 402</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC311</td>
<td>ACC 403</td>
</tr>
<tr>
<td>ACC 312</td>
<td>ACC 404</td>
</tr>
<tr>
<td>ACC 406</td>
<td>ACC 411</td>
</tr>
<tr>
<td>BSL 401</td>
<td></td>
</tr>
</tbody>
</table>

To continue as an accounting major, a student must have a cumulative grade point average of 3.0 or higher in accounting before enrolling in ACC312. Students who have not completed ENG 230 must register for BUS 300 concurrently with ACC 312.

MINOR

The Department of Accounting allows business students to earn a minor in accounting. In addition to the general requirements for all business minors, business students wishing to minor in accounting must complete ACC301, ACC 311 and ACC 403.

Educational Requirements to Sit for the CPA Exam

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and licensing practices are governed by state law. For example,
some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Note our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed at: http://www.myfloridalicense.com/dbpr/cpa/licensure.html

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

**Requirements to Sit for the CPA Exam:** To be eligible to take the CPA exam, you must have completed 120 semester hours including 24 semester hours of accounting (auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation) at the upper division level (300-level or above) and 24 semester hours in general business courses (including at least 6 semester hours of business law courses). One course can be at a lower lever (freshman or sophomore), the other course must be upper division (junior level or higher). The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note you do not have to have a bachelor’s degree in order to sit for the CPA exam.

**Requirements for Licensure:** In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the BOA requires that you have completed a bachelor’s degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. (This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences.) If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of accounting courses and at least 39 semester hours of general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

**Licensed in Another State:** If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.
**Accreditation:** The Board accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

**Duplicate Courses:** No credit will be given for courses which duplicate another course for which the applicant has received credit. Review courses are considered as duplicates.

For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

Many of our graduates satisfy the 30 semester hours requirement for the CPA by continuing on for a fifth year during which time they also can complete the requirements for either the Master of Accounting (MAcc) or Master of Science in Taxation (MST) degree. While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers/CFOs or financial analysts. The MST is designed for students interested in careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. Students interested in these programs should consult with the Program Director within the Department of Accounting.

**ACCELERATED MASTER’S PROGRAMS**

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor’s level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors. The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor’s and Master’s degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

**Accelerated Program Timeline**

1. Internship in summer after junior year
2. Twelve credits of work in senior year will count towards their graduate degree (only students in the accelerated programs will be permitted to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and CPA exam.
4. Complete remaining credits of graduate work in fall semester after senior year.

Prerequisites

The following must be completed before students begin their senior year:

- A minimum of 102 credit hours
- 15 credit hours of the 21-hour Professional Business Core including CIS 410, ECO 302, FIN 302, MGT 303, and MGT 304. (MGT 401 must be taken in the final semester and FIN 303 will be taken as the core elective in the senior year.)
- The following Accounting major requirements: ACC 301, ACC 311, ACC 312, ACC 402 ACC 403, and BSL401.
- All other requirements for a Bachelor's degree other than those that will be satisfied through completion of the undergraduate courses taken while in senior-graduate status.

Senior Year Curriculum (Senior-Graduate Status)

The curriculum for the senior year is the same for all tracks (except that students selecting the MAcc-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of 14 credits in the fall and 16 credits in the spring semester as follows:

Fall Semester Senior Year

Recommended Sequence:
ACC 404 Advanced Taxation (3 credits)
ACC 406 Accounting Systems (3 credits)
FIN 303 Intermediate Financial Management (3 credits)

Courses offered only in the fall:
ACC 524 Accounting for Governmental and Not-for-profit Entities (2 credits)
ACC 530 International Financial Reporting Standards (1 credit)
BSL 691 The Public Corporation (2 credits)

Spring Semester Senior Year

Recommended Sequence:
ACC 411 Advanced Accounting (3 credits)
MGT 401 Strategic Management (3 credits)
One other non-accounting undergraduate course (3 credits)

Courses offered only in the spring:
ACC 643 Tax Research (2 credits)
ACC 522 Advanced Issues in Auditing (3 credits)
BUS 602 Critical Thinking and Effective Writing (1 credit)
BUS 603 Critical Thinking and Effective Presentations (1 credit)
Students should select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

**Summer after Senior Year**

Students must take one 2 or 3-credit graduate accounting course. Accounting courses are offered based on demand and could include ACC 620: Accounting Controls in IT (offered every summer) or ACC 649: Issues in Tax Policy.

To graduate on time you are REQUIRED to take an approved CPA review course during the summer following your senior year after you graduate. If you do not take a CPA review course you will have to register and pay for an additional six graduate credits in the next spring semester and you will graduate from graduate school a semester late, in May instead of December. Students would also be expected to pass part, if not all of the CPA exam during this summer.

**Final Fall Semester**

In the final fall semester students will complete the remaining 15 or 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

**Admission to the Accelerated Programs**

**Incoming Freshmen**

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.0 or higher by their junior year in college and to maintain this GPA after their junior year.
- Students will need to have completed 102 credit hours by the start of their senior year.

**Current University of Miami Undergraduate Accounting Majors**

- Students apply to the accelerated program by February 1 of their junior year.
- Admission to the program will be primarily based on GPA and letters of recommendation. It is expected that the students admitted to the program will have GPAs exceeding 3.50, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the application pool and will be made by senior school administrators and faculty.
- After admission, students must maintain an overall GPA of 3.0 or higher and an accounting GPA of 3.0 or higher to remain eligible.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 301, ACC 311, ACC 312, ACC 402, ACC 403, and BSL 301 or 401.
International Designation Requirements

Admission to this accelerated program is expected to be more competitive given the small number of international internships that will be available.

Incoming Freshman Admission Requirements
- Applicants must meet the freshman admission requirements of the accelerated program,
- Maintain an overall GPA of 3.00 or higher and an accounting GPA of 3.25 or higher, and
- Demonstrate proficiency in a second language.

Current University of Miami Undergraduate Accounting Major Admission Requirements
- Applicants must meet accelerated program admission requirements,
- Have an overall and accounting GPA of 3.5 or higher, and
- Demonstrate proficiency in a second language.

Accounting Course Listing
BUSINESS LAW - Department Code: BSL

Introduction

The modern manager faces increasing legal implications in daily operations and in formulating business policy. Consequently, effective decision-making requires an appreciation of the social, ethical, economic, and political bases of law as it relates to business. Business law courses provide the student with fundamental insight into legal institutions, the regulatory environment, and the nature of legal discourse, as well as an array of substantive principles of law, including such areas as contracts, sales, business organizations, and domestic and international commercial relationships.

Educational Objectives

The primary goals of the Department of Business Law are to contribute to legal knowledge through conducting scholarly research, to disseminate it by publication in leading journals and law reviews, and to transmit that knowledge to students and the larger UM-wide, business, and professional communities.

These goals both inform and drive the Department’s educational objectives, which focus on:

- instilling in students a strong sense of the legal and ethical issues permeating business;
- aiding students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- developing students’ analytical and problem solving ability, as well as their oral and written presentation skills.

Degree Programs

A Legal Studies major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

Major

A student may major in Legal Studies. This course of study facilitates the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human relations, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.
The following comprises the coursework for a major in Legal Studies:

BSL212  Introduction to Business Law (required)
BSL485  Managing the Legal Factor (required in the student’s final semester)

and

Twelve (12) additional semester hours taken from the departmental offerings listed below:

BSL304  Corporate Law
BSL305  Legal and Social Aspects of Business Regulation
BSL313  Coastal Law
BSL314  Ocean Law
BSL333  Legal Aspects of Real Estate Transactions
BSL 401  The Law of Financial Transactions
BSL412  International Business Law
BSL424  Intellectual Property Law
BSL460  Health Care Law and Ethics

**MINOR**

Students in the School of Business Administration as well as students in the other schools and colleges of the University of Miami may minor in Business Law. Like the Legal Studies major, the minor is a flexible one, permitting business and non-business students alike to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student’s chosen corporate, creative, scientific, academic, professional, or personal endeavors.

Twelve semester hours are required for the minor, including BSL 212 and BSL 485, plus six (6) additional semester hours taken from departmental offerings, excluding BSL 575.

[Business Law Course Listing](#)
INTRODUCTION

The Department of Computer Information Systems serves the University as the focus for employing Information Technology / Information Management in the efficient solution of the entire range of business problems.

The administration and management of today’s business and government organizations rely heavily upon information management for the efficient achievement of their goals. Collection, storage, and retrieval of data by computers are involved in the wide range of business activities including daily operations, management decision-making, and long-range planning. As the dependence of management on Information Technology grows, so does the need for Information Technology specialists. The courses and degree programs are described below.

EDUCATIONAL OBJECTIVES

The Computer Information Systems major is designed to provide the student with the key information technology and management skills needed in today’s business environment, plus a firm grounding in the major business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as programmers, systems analysts, consultants, user support analysts, or other information management positions.

DEGREE PROGRAMS

A Computer Information Systems major can earn either a Bachelor in Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

Required Core (18 semester hours)
- CIS320 Introduction to Programming
- CIS324 Object-Oriented Programming in Java
- CIS360 Systems Analysis and Design
- CIS423 Database Management Systems
- CIS430 Business Telecommunications
- CIS465 Applied Software Project Development

Technical Electives (3 semester hours)
- CIS390-399 Topics in Computer Information Systems (with Departmental approval)
- CIS450 Introduction to Health Informatics
- CIS493 Fundamentals of IT Project Management
- CIS498 Entrepreneurship: Technology and Innovation
CIS490-498  Topics in Computer Information Systems (with Departmental approval)
CIS499  Directed Study in Computer Information Systems (with Departmental approval)
CIS550  Computer Information Systems Internship (with Departmental approval)

**Note:** All major courses must be completed with a grade of “C-” or better. In addition, an overall grade point average of 2.5 or higher is required for all courses in the major.

**MINOR**

The minor in Computer Information Systems consists of:

- CIS320  Introduction to Programming
- CIS360  Systems Analysis and Design

*and*

Six (6) additional semester hours taken from the departmental offerings listed below:

- CIS324  Object-Oriented Programming in Java
- CIS423  Database Management Systems
- CIS430  Business Telecommunications
- CIS450  Introduction to Health Informatics
- CIS493  Fundamentals of IT Project Management
- CIS498  Entrepreneurship: Technology and Innovation

[Computer Information Systems Course Listing](#)
ECONOMICS – Department Code: ECO

INTRODUCTION AND EDUCATIONAL OBJECTIVES

Economics uses the idea of maximizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of human behavior. The program provides excellent preparation for careers in business, in government, and in international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

DEGREE PROGRAMS

An Economics major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

The major in economics consists of at least 24 semester hours, which must include:

ECO211  
ECO212  
ECO301  
ECO302  
MTH130 or MAS110 or a higher calculus course is required of all Economics majors and minors. The calculus course must be completed before enrolling in ECO302.

MINOR

Business students may minor in economics by taking nine semester hours in addition to the business core courses of ECO211, ECO212, and ECO302.

Non-business students in any school or college may minor in economics. Non-business students are required to take ECO211, ECO212, ECO302 and two additional economics courses for a total of 15 semester hours.

Note: All courses submitted for the major or minor must be completed with a grade of “C-” or higher and with an overall grade point average of “C” or higher.

Academically qualified students may elect to take courses from the Department’s curriculum for Honors credit.

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may be the major of a candidate for the Master of Arts and Doctor of Philosophy degrees. Consult the Graduate Bulletin for the program general requirements.

Economics Course Listing
FINANCE - Department Code: FIN

Finance

INTRODUCTION

The finance major is designed to prepare students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

EDUCATIONAL OBJECTIVES

The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. We study these issues in a variety of contexts and industries. The three primary areas of finance are financial management, investments, and financial markets and intermediaries. Financial management focuses on how an organization can accomplish its mission. For example, a corporation seeks to create and maintain wealth, and a non-profit organization seeks to improve the world in some way. All organizations want to achieve their mission to the greatest extent possible, and that requires making the best decisions with respect to value. The area of investments studies the purchase and sale of financial securities, such as stocks, bonds, options, and futures from the point of view of an investor. Financial markets are created to facilitate the trading (buying/selling) of financial securities. Financial intermediaries sell claims on themselves to investors, such as stock, life insurance, or a bank deposit. Financial intermediaries then invest the money from such sales in other assets such as loans, real estate, or other financial securities.

DEGREE PROGRAMS

A Finance major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

Majors
Finance
International Finance and Marketing
Real Estate

Finance

FINANCE MAJOR

Important Note: To major in finance, a student must earn a grade of “B” (grade point of 3.0) or higher in FIN302 (note that a grade of “B-“ does not qualify), and have a cumulative University of Miami grade point average of 2.5 or higher, after having completed FIN302.

The Finance major consists of a minimum of 18 semester hours beyond the core course, FIN302.
Required Courses                  Prerequisites
FIN303  Intermediate Financial Management  FIN302
FIN320  Investment and Security Markets  FIN302
and

Twelve (12) additional semester hours taken from the departmental offerings, excluding FIN300. Six (6) of the semester hours must be taken at the 400 or 500 level.

Note: Students are strongly encouraged to take FIN303 and FIN320 during the same semester.

MINOR

A minor in Finance consists of 12 semester hours as follows:
FIN302
FIN303
FIN320
and

One (1) additional finance course at the 300, 400, or 500 level, excluding FIN300.

All courses must be taken within the current prerequisite structure.

Finance Course Listing
**INTERNATIONAL FINANCE AND MARKETING**  
Finance - Department Code: FIN  
Marketing - Department Code: MKT

**INTRODUCTION**

The International Finance and Marketing (IFM) major is aimed at meeting the needs of students who want to pursue a career in international business, finance, and/or marketing.

**EDUCATIONAL OBJECTIVES**

The IFM major is designed to prepare students for the most critical areas of decision making in international business. The objective is to provide students with a comprehensive curriculum based on a strong program of international courses, and create opportunities for access to multinational companies and the international business community.

**INTERNATIONAL FINANCE AND MARKETING MAJOR**

*Important Note:* To major in IFM, a student must earn a grade of “B” (grade point of 3.0) or higher in both FIN302 and MKT201/301 (note that a grade of “B-” does not qualify). The IFM major consists of a minimum of 21 semester hours beyond the core (FIN302 and MKT201/301). The IFM course requirements are:

<table>
<thead>
<tr>

</tr>
<tr>
<td>MKT469 International Marketing Management</td>
<td>MKT302 (Pre or co-requisite) and MKT360</td>
</tr>
</tbody>
</table>

*and*

One (1) additional finance course at the 400 level.  
All courses must be taken within the current prerequisite structure. Of special note: some 400 level finance courses require FIN303.
REAL ESTATE
FINANCE - Department Code: FIN

INTRODUCTION

The Real Estate major in the Business School is created for students who want to apply the theoretical and analytical concepts of finance to real estate lending, investment and development.

EDUCATIONAL OBJECTIVES

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major strengthens ties with important segments of the business community and builds on the University's strategic strengths in architecture (New Urbanism) and urban planning.

REAL ESTATE MAJOR

Important Note: To major in Real Estate, a student must earn a grade of “B” (grade point of 3.0) or higher in FIN302 (note that a grade of “B-” does not qualify). Real Estate Majors should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (For more information, contact the Director of the Urban Studies Program, Dr. Jan Nijman: 305-284-6692 or Nijman@miami.edu.)

The Real Estate Major consists of a minimum of 18 semester hours beyond the core (FIN302). The following courses beyond the School of Business Administration core are required:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Prerequisite(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select either:</td>
<td></td>
</tr>
<tr>
<td>FIN 303 Intermediate Financial Management</td>
<td>FIN302</td>
</tr>
<tr>
<td>or</td>
<td></td>
</tr>
<tr>
<td>FIN 320 Investment and Security Markets</td>
<td>FIN302</td>
</tr>
</tbody>
</table>

Note: In choosing to take FIN303 and/or FIN320, students are strongly advised to consider the prerequisites of 400 level classes they might want to take later.

Select two courses from the following:
- FIN427 Fixed Income Markets and Analysis
- FIN444 Real Estate Investment and Appraisal
- FIN445 Real Estate Finance

and
- BSL333 Real Estate Law
- ARC584 Introduction to Real Estate Development and New Urbanism

and
One (1) additional Finance or Business Law course at the 300 or 400 level available to be taken within the current pre-requisite structure.
Note: Students who do not already possess a valid real estate salespersons license may want to take Finance 340 (Principles of Real Estate) as their 300- or 400-level elective course.

Note: Students who have an interest in the marketing aspect of the real estate industry should also consider taking Marketing 340 (Personal Selling) as the upper-core elective in their program.
INTRODUCTION

The Department of Management in the School of Business Administration is the largest of the eight academic departments, and is heterogeneous with respect to both research and teaching areas. Faculty are specialized in and teach courses that span a number of fields including entrepreneurship, health care management and policy, human resources, international management, leadership, operations management, organizational behavior, strategic management, supply chain management, and teams. Given both the multinational context and diversity present in 21st century organizations, coursework in the Department of Management is focused on preparing students to be productive and effective contributors to the various communities they are embedded within or impact. Management majors pursue a variety of careers after graduation including law schools, advanced graduate degrees, starting businesses, running family businesses or accepting management positions in domestic or international organizations.

EDUCATIONAL OBJECTIVES

- Development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- Improvement of interpersonal skills and learning to work effectively in teams;
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations;
- Awareness of the ethical issues and responsibilities inherent in being a member of the global business community.

DEGREE PROGRAMS

Any major from the Department of Management may earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJORS

Note: All major and/or minor courses in the Department of Management must be completed with a grade of “C” or higher and with an overall grade point average of 2.5 or higher.
The Department of Management offers the following four majors:

**MANAGEMENT MAJOR**

The MGT major will prepare students for future careers in all areas of management, including small business and corporate levels. The MGT major provides a solid preparation for students interested in pursuing other graduate degree programs, particularly in law and business.

A major in Management consists of at least 21 semester hours, but not more than 27, in departmental courses completed with a grade of “C” or higher. Any one course may not be applied toward more than one major in the Department of Management. All majors must include:

- MGT302 Human Resource Management
- MGT303 Operations Management
- MGT304 Organizational Behavior
- MGT307 Advanced Organizational Behavior [prerequisite MGT304]

Plus nine semester hours from the Department of Management (excluding MGT100 and MGT401).

**ENTREPRENEURSHIP MAJOR**

The entrepreneurship major prepares students to engage in the process of value creation, regardless of organizational context. Students will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit), or working effectively within an existing organization. The required curriculum is a total of 18 semester hours and includes the following 4 required courses and 2 additional electives:

1. MGT353 Introduction to Entrepreneurship (FIN302 must be taken prior to or concurrently with MGT353)
2. MGT454 Business Planning for Entrepreneurs (prerequisite MGT353)
3. MGT455 Entrepreneurial Consulting (prerequisites MGT353, MGT454)
4. FIN308 Finance for Entrepreneurs (prerequisite FIN 302)

Choose at least 6 credits (2 electives) from the following:

- MGT251 (recommended), MGT349, MGT360, or MGT498/598 (if approved as selected topics in entrepreneurship ONLY);
- FIN303, FIN320, FIN410, or FIN425;
- MKT302, MKT310, MKT320, MKT340; MKT385;
- BSL424 (recommended).

All courses must be taken within the current prerequisite structure.
HEALTH SECTOR MANAGEMENT AND POLICY MAJOR

The HSMP major is designed for students who aspire to pursue a career in health management and policy, in a variety of health care organizations and public settings. The major enables students to gain skills and understanding in the specialized language of health care and to comprehend concepts of management, financing, politics, law and ethics as applied to the health care sector. The major is also ideal for students intending to seek advanced degrees in health administration, health economics, medical sociology, or public health.

The total requirements for the major are 21 semester hours. These requirements include:

<table>

HUMAN RESOURCE MANAGEMENT MAJOR

The HRM major is for students who intend to pursue a career in human resources or personnel. The total major requirement is 15 semester hours and requires:

MGT302 Human Resource Management  
(Must be taken during junior year for sequencing)

MGT307 Advanced Organizational Behavior (prerequisite MGT304)  
and

Nine semester hours from the following courses:

MGT308 Training and Development (prerequisite MGT302)  
MGT360 Effective Leadership (prerequisite MGT304)  
MGT428 Wage and Salary Administration (prerequisite MGT302)  
MGT480 Organizational Development and Change (prerequisites MGT302, MGT304)  
MGT422 Leading Teams (prerequisite MGT304)  
PSY332 Tests and Measurements (check prerequisites)

All courses must be taken within the current prerequisite structure.
MINORS

Minor in Management for Business Students
A minor in this area for business students (MGTB) consists of 12 semester hours in MGT courses beyond the required MGT courses for the BBA or BSBA degree.

Minor in Management for Non-Business Students
A minor in this area for non-business students (MGT) consists of 12 semester hours and must include the following courses:
MGT302 Human Resource Management  
MGT303 Operations Management  
MGT304 Organizational Behavior  
Plus one additional 300 level or higher course from the Department of Management.

Minor in Health Sector Management and Policy
The purpose of the minor in Health Sector Management and Policy (HSMP) is to provide the student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical and governmental policy of the health care industry. Appropriate candidates for this minor would include: students in any UM School or College interested in exploring the health care sector, working in the legal, management or policy making aspects of the health care sector or those wanting to have an augmentation to their pre-med, pre-law or pre-MBA, MPA or MPH studies as well as those pursuing a Ph.D. The minor in this area consists of the following four courses:

<table>

</table>

Minor in Entrepreneurship for Business Students
Eligible business students must have a declared business major other than Entrepreneurship. Two specialized tracks are offered for business students who are interested in minoring in Entrepreneurship. Specifically:

High Growth/Technology Ventures (ENBT)
- MGT353/Introduction to Entrepreneurship
- MGT454/Business Planning for Entrepreneurs
- FIN320/Investment and Security Markets OR FIN425/Business and Security Valuations
- MGT498/Entrepreneurship: Launching Hi-Tech Ventures OR CIS410/Information Systems and Technology (applicable only for BSBA students)

Health Care Ventures (ENBH)
- MGT353/Introduction to Entrepreneurship
- MGT454/Business Planning for Entrepreneurs
- MGT270/Introduction to Health Sector Administration
- BSL460/Health Care Law and Ethics
Minor in Entrepreneurship for Non-Business Students (ENT)

This minor is for non-business students interested in developing business plans, or learning more about how to initiate and manage small business enterprises. Eligible UM students must be enrolled, and have a declared major outside of the School of Business Administration. An Entrepreneurship minor for non-business students consists of 6 courses, 18 credits as follows:

- ACC211 Principles of Financial Accounting
- ECO211 Economic Principles and Problems
- MKT301 Marketing Foundations
- FIN300 Finance for Non-Business Majors
- MGT251 Nature and Foundations of Entrepreneurship
- MGT353 Introduction to Entrepreneurship

Management Course Listing
MANAGEMENT SCIENCE - Department Code: MAS

Management Science

INTRODUCTION

Management Science uses the ideas and methods of science, mathematics, statistics, and computing to help managers make better decisions. Management Science had its modern origins in the study of military operations during World War II; hence this field of study may also be called Operations Research. Today, Management Science/Operations Research, often referred to as Analytics, is applied in a wide variety of areas including financial modeling, marketing research, organizational theory, transportation and logistics, health care, environmental protection, and manufacturing. Almost any decision you make can benefit from the methods of Management Science.

EDUCATIONAL OBJECTIVES

The curriculum in the Department of Management Science is designed to give students the necessary educational background and experience to allow them to work as successful Management Science analysts. In addition to the general education, business, and economics courses of the Bachelor of Science in Business Administration degree program, the major in Management Science requires a solid background in the natural sciences and mathematics. Additionally, students are required to take sequences of courses in calculus-based statistics, deterministic and stochastic modeling, and computer programming. A number of the courses in the curriculum require projects that have students evaluate a real-world system or process. As the system is studied and modeled, the students apply the methods of Management Science to find ways to improve the process. The written and oral presentation of their findings is part of the learning and evaluation process. A major or minor in Management Science is recommended to qualified students as preparation for direct entry into the field of Management Science/Operations Research/Analytics or as preparation for future graduate studies.

DEGREE PROGRAMS

The Bachelor of Science in Business Administration (BSBA) is awarded for the major in Management Science by meeting the appropriate School of Business Administration requirements.

MAJOR

The Department of Management Science offers both a major and minor for students pursuing the Bachelor of Science in Business Administration degree. All required courses within the major or minor in Management Science must be completed with a grade of “C-” or higher. Additionally, the cumulative grade point average of the Management Science major or minor course work must be 2.5 or higher. The coursework for obtaining a major in Management Science is as follows:
Required Core (15 semester hours)
MAS441 Deterministic Models in Operations Research
MAS442 Stochastic Models in Operations Research
MAS452 Systems Analysis Methodology and Applications
MAS547 Computer Simulation Systems
CIS320 Introduction to Programming
and
One (1) of the following courses:
CIS323 Object-Oriented Programming in C++
CIS324 Object-Oriented Programming in Java
CIS360 Analysis of Information Systems
MAS548 Data Mining

MINOR

Available only for majors in the Bachelor of Science in Business Administration.
The coursework required for a minor in Management Science is as follows:

MAS441 Deterministic Models in Operations Research
MAS442 Stochastic Models in Operations Research
MAS452 Systems Analysis Methodology and Applications
All courses must be taken within the current prerequisite structure.

DEPARTMENTAL HONORS

Students interested in having departmental honors entered on their diploma must meet the
general requirements outlined by the School of Business Administration and must complete
the departmental course requirements with a grade of “B+” or higher. Students interested
in having departmental honors must also complete a three semester hour thesis/project
under MAS499 Directed Study, as part of their electives. This project must be approved by
the Department Chair by the end of the student’s junior year (90 semester hours) of study.
Students wishing to be considered for graduation magna cum laude or summa cum laude
are required to write an honors thesis. These students must confer with the department
chairman to select a thesis topic at the end of their junior year (90 semester hours) of study.

Management Science Course Listing
MARKETING - Department Code: MKT

INTRODUCTION

Rapidly increasing global competition, emergence of new markets, and technological advancements make today’s marketplace a highly dynamic and challenging environment for companies. Effective marketing is therefore crucial for organizations to survive and prosper in such an environment. Marketing is the process through which organizations develop and distribute products and services that satisfy the needs of customers. Customer satisfaction is critical to the profitable operations and growth of organizations and, as such, an integral component of modern-day marketing.

EDUCATIONAL OBJECTIVES

The primary goals of the Department of Marketing are: (a) to contribute to marketing knowledge through conducting scholarly research and disseminating the research findings through leading journals, (b) to excel in imparting marketing knowledge to students and honing their critical-thinking skills so as to prepare them for potentially successful careers in an increasingly competitive, dynamic, global, and service-and technology-oriented environment, and (c) to be of service to the business and professional communities at large.

The marketing curriculum offers courses and programs to undergraduate and graduate students for their professional development in domestic and world business.

A program of study in marketing offers students better understanding of and insights into:

- Marketing’s role within the organization and society;
- The various ‘markets’ for goods and services through better identification and analysis of consumer needs, wants, and interests;
- Marketing’s responsibility to society in legal, ethical, and moral matters;
- Methods, procedures and techniques used in planning and managing marketing decisions.

DEGREE PROGRAMS

A Marketing major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

MAJOR

The Marketing major provides students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major prepares students to practice marketing in a changing competitive environment. Specifically the major covers the 4 Ps of marketing (i.e., product/service, price, promotion and
place/distribution) from a managerial perspective. Additionally, the marketing major is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

A program of study in marketing offers students a comprehensive understanding of such topics as:

- Marketing’s critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies;
- Legal and ethical responsibilities of marketers.

**MAJOR**

The program of study for Marketing majors consists of the following:

**Important Note:** A student must earn a grade of "B" (*grade point average of 3.0*) or higher in MKT201/301 to continue the major or minor (a grade of “B-” does not qualify.) The overall grade point average in all Marketing courses taken must be 2.5 or higher. All Marketing courses in which a Marketing major enrolls will count toward the major.

MINOR

A minor in Marketing for business majors consists of at least 12 semester hours of marketing courses and must include the following: MKT201/301, with a grade of “B” (grade point average of 3.0) or higher (a grade of “B-” does not qualify), plus any three courses from the Department of Marketing as long as the prerequisite courses are taken. The overall grade point average in all marketing courses taken must be 2.5 or higher. All marketing courses in which a Marketing minor enrolls will count toward the minor.

MINOR FOR NON-BUSINESS MAJORS

A minor in Marketing for non-business majors consists of at least 12 semester hours of marketing courses and must include the following: MKT201/301 with a grade of “B” (grade point average of 3.0) or higher, plus any three courses from the Department of Marketing as long as the prerequisite courses are taken. Students may choose from MKT310, MKT320, MKT340, MKT360 or other electives with the permission of the department’s chair. The overall grade point average in all marketing courses must be 2.5 or higher. All marketing courses in which a Marketing minor enrolls will count toward the minor.

Marketing Course Listing
INTRODUCTION

The School of Communication houses four departments that offer courses in nine majors leading to the Bachelor of Science in Communication degree. The departments are: Cinema and Interactive Media (Motion Pictures), Communication Studies (Communication Studies), Journalism and Media Management (Broadcast Journalism, Electronic Media, Journalism, Media Management, Visual Journalism), and Strategic Communication (Advertising, Public Relations). In addition, the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees are offered in the School.

Students engage with a diverse faculty of communication scholars, artists and professionals in a variety of hands-on learning experiences embracing research, writing, production, creative problem-solving and multimedia storytelling. On-campus television and radio facilities, motion picture studios and multimedia labs are available for academic and extra-curricular student projects. Students utilize contemporary digital imaging technology and learn skills that cut across a variety of media platforms. Digital editing, recording and mixing facilities are available. New media technology is incorporated throughout the curriculum and the School has several computer labs and digitally "smart” classrooms.

Two video-conference centers with broadcast-quality interactive capability for remote interviews and programming support the School’s mission. The School also houses three TV studios, including a fiber-optic linked studio allowing real-time, broadcast-quality transmissions to sites around the world. Under Communication faculty supervision, student-produced programming is distributed through the University’s cable facility and carried throughout the community by the local cable operator and is available through online streaming. The School operates several online sites that afford students outlets for multimedia and cross-platform writing, research, reporting and creative work.

The University’s FM radio station, and student online and print newspapers and magazines, offer additional opportunities for career development. The School also operates PRADUM, a student-run advertising and public relations agency. The Bill Cosford Cinema, a 250-seat theatre, supports the motion picture program and offers film programming for the Miami community. The School’s Norton Herrick Center for Motion Picture Studies is dedicated to research into the history and aesthetics of motion pictures and their social and cultural impact.

The School’s Knight Center for International Media supports innovative research and development dedicated to a broad spectrum of interdisciplinary communication study. The Center has produced a variety of special projects including documentary motion pictures, specialized research and global issue-oriented faculty/student initiatives. Two endowed Knight Chairs bring additional expertise and international perspective to the School’s research and learning experience.

The School supports student chapters of the American Advertising Association, the Public Relations Society of America, the Society of Professional Journalists, the National Broadcasting Society, the University Film and Video Association and other professional organizations. In addition, the School sponsors a nationally competitive intercollegiate debate team, which annually produces several members of the All American Debate Team.
Internships in professional settings are available to Communication students at the junior and senior levels. Professionals at daily and weekly newspapers, magazines, news bureaus, cable systems, radio and television stations and networks, production houses and motion picture studios cooperate in the faculty-supervised internships. Executives of city and county governments, advertising agencies, public relations firms and other business and nonprofit organizations join in providing internship opportunities. Summer and semester-length study abroad opportunities are available.

MISSION

The School of Communication is dedicated to a global educational perspective and is committed to providing a socially responsible and ethically grounded learning environment guided by a diverse faculty of scholars, artists and professionals. The School is committed to quality undergraduate and graduate programs in communication that emphasize the relationship between theory and practice. We believe in freedom of expression and creativity, and encourage both collaboration and independent thinking as we prepare future scholars, professionals and leaders for a lifetime of service and learning.

ACCREDITATION

The University of Miami is accredited by the Southern Association of Colleges and Schools, 1866 Southern Lane, Decatur, GA 30033-4097.

ACADEMIC POLICIES

Admission to Major

A student entering the School of Communication as a freshman or as a transfer will enroll in Communication pre-major status. Candidates for the Bachelor of Science in Communication who have achieved sophomore standing and have satisfactorily completed the entrance requirements of one of the Communication majors (see Program Statements) will be admitted to major status in their chosen program at the School.

Internal Transfer into the School of Communication

A student enrolled at the University of Miami in a School or College other than the School of Communication may apply for admission into the School. Applications are accepted every fall and spring semester. A minimum overall grade point average of 2.5 is necessary for consideration. Applications are available in the Admissions, Academic & Alumni Services Office of the School of Communication (2037 Wolfson Building) and must be submitted prior to the end of classes in either the fall or spring semester. Admission decisions will be made promptly after semester grades are final. Students will be notified in writing of the School’s decision.

Transfer Students

A transfer student must complete in residence a minimum of 15 credits toward a Communication major or a minimum of 9 credits toward a Communication minor. Courses taken elsewhere in Communication or related disciplines are not automatically accepted.
toward a major or minor at the University of Miami. Students who have obtained the written approval of the Chair of a Communication major to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major. Students should consult a School of Communication advisor to determine whether the transfer of Communication courses will increase beyond 120 the total number of credits required for a degree. In general, transfer credit will not be accepted to satisfy requirements for any course in any major or minor at the 300-level or above. Student petitions to transfer credit will be considered on an individual basis.

Transfer credit may not be used to satisfy requirements for any major in Communication without the written approval of the Chair of the programs concerned.

**Academic Progress & Probation/Dismissal**

Students must maintain a quality point average (QPA) of 2.5 or higher in courses taken in residence and submitted for their School of Communication major. Following the first semester in which any student’s QPA in the major falls below a 2.5, the School may issue a warning to that student that his or her work does not meet School expectations. Should that student’s QPA in the major be below a 2.5 in any subsequent semester, he or she may be placed on Academic Probation. The School may dismiss from the University any student who is on probation a total of two semesters (not necessarily consecutive.) A student who has completed 45 University credits while enrolled in the School but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. A student who has been dismissed from the School may apply for admission to one of the other Schools or Colleges within the University but will not be readmitted to the School of Communication. Those who wish to appeal their probation or dismissal must do so in writing to the Dean within 30 days of the notice of probation or dismissal. See also GOOD ACADEMIC STANDING, WARNING, PROBATION, AND DISMISSAL, in this Bulletin.

**Internship Credit**

All programs allow students to complete multiple internships. However, students will be permitted no more than three credits in School of Communication internship(s) toward their majors or toward their 120-credit University degree.

**Credit Hours and Advanced Placement Credit**

Credits may be earned through Advanced Placement, IB, CLEP Examinations, and Advanced Placement by Proficiency Examinations. These credits may be applied to the appropriate General Education Required Areas of Study or as electives except: (1) where prohibited by a specific program area; or (2) if the course is remedial (e.g., ENG 103, MTH 099). To earn credit, each student must pay a recording fee and have exempted course credits entered on his or her University transcript. An exemption may be granted for ENG 105 by the Department of English, but this exemption will not earn credit toward the 120 University credits required for graduation.

**Quality Point Average**

A candidate for the B.S. in Communication must complete the credit hours and achieve the quality point average specified for students in the University at large as stated in the section
titled ACADEMIC PROCEDURES AND INFORMATION, subject to additional requirements specified in School and Program sections of this Bulletin.

**General Education Required Areas of Study**

In applying these requirements to his or her course of study, each student must carefully read School of Communication program and major requirements that follow. In many cases, these requirements will be more restrictive and more specific in describing how each of these General Education Required Areas of Study is to be satisfied.

**DEGREE PROGRAMS**

The School of Communication offers courses in nine Programs of Study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Communication Studies, Electronic Media, Broadcast Journalism, Journalism, Visual Journalism, Media Management, and Motion Pictures.

**MINORS**

The School of Communication offers minors in its nine Programs of Study and a general minor in Communication (COM). School of Communication students may complete a minor in a specific program of study but are not eligible for the general minor in Communication.

**CONCENTRATIONS**

Most degree programs offer concentrations or tracks of study in specialty areas. See the individual program sections for details on these concentrations.

**REQUIREMENTS FOR GRADUATION**

**BACHELOR of SCIENCE DEGREE in COMMUNICATION**

*Required University General Education Requirements*

**A. AREAS OF PROFICIENCY**

Proficiency requirements are intended to ensure that students either already possess, or will develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently. Superior scores on the SAT or ACT examinations may waive students from ENG 105 (requirement 1) and superior placement test scores administered by the Department of Mathematics may waive students from MTH 101 (requirement 2), but not from requirement 3, Writing Across the Curriculum.

1. **English Composition**  
   3-6 credits  
   Students fulfill this requirement by satisfactorily completing English 105 and English 106 or its equivalent. Appropriate Advanced Placement (AP) or International
Baccalaureate (IB) scores in English composition may be used to satisfy the English 105/106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit in, ENG 105.

Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit in, English 105.

Courses satisfying the English Composition requirement may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

2. Mathematics

Students fulfill this requirement by satisfactorily completing a course in mathematics numbered above MTH 101 (excluding MTH 107), or MAS 110, or an approved course in statistics. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics during orientation.

3. Writing Across the Curriculum (W)

Courses satisfying this requirement are those designated as involving a substantial amount of writing and the preparation of papers that are corrected for diction, syntax, style, and content. Some courses satisfying this Writing Across the Curriculum requirement will simultaneously fulfill a requirement under B. Areas of Knowledge (below).

B. Areas of Knowledge

These requirements are designed to help students understand and appreciate the intellectual achievements in major areas of human inquiry and creative endeavor. In satisfying these requirements students will explore the natural world, examine human development and behavior, and appreciate creative expression in the arts, literature, and philosophy.

No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement. (Note: ART and ARH are considered the same department.) Most courses above the 100-level require prerequisites.

Natural World (6 credits) Courses in the following areas: Biology; Chemistry; Ecosystems Science and Policy; Geological Sciences; Marine Science; Physics; Physical Science; and the following courses: Anthropology 203; Geography 120; Kinesiology 155; Freshman Seminars in the Natural Sciences 190-199.

People and Society (6 credits) Courses in the following areas: Africana Studies; American Studies (AMS); Anthropology (except APY 203); Economics; Educational Psychology; Geography (except GEG 120); History; International Studies; Judaic Studies (JUS); Political Sciences; Psychology; Sociology; Teaching and Learning; Urban Studies; Women and Gender Studies; and the following courses: COM 101; COM 110; COS 112; COS 336; COS 472; Freshman Seminars in the Social Sciences.

Arts and Humanities (12 credits) Courses in the following areas: Architecture; Music; Art and Art History; Theatre Arts; English (200-level or above except ENG 208); Foreign Languages and Literatures (300-level or above); Philosophy; Religious Studies; and the following courses: COS 211; CMP 103; DAN (except 101 through 104); Freshman Seminars in the Arts and Humanities FFA 190-199. Students may
Major/Minor Requirements

In addition to completing a major in the School of Communication, students must also complete a minor (or a second major) in either a second Program of Study within the School or in an academic program outside of the School. Students completing majors and/or minors in the School must complete all School of Communication courses with grades of C or higher (a grade of C- or lower is not acceptable.) Students may not enroll in a School of Communication course without grades of C or higher in prerequisite courses. Students completing a minor or second major outside the School of Communication should consult this Bulletin for minimum grade requirements.

The Major in the School of Communication 36 to 45 credits

Majors in the School of Communication leading to a Bachelor of Science in Communication require between 36 and 45 credits in School of Communication courses specified in Program Statements (below). Courses within each major must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) In addition, students must maintain a quality point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication majors.

The Minor 12 to 20 credits

Each Communication student, in addition to completing requirements for a Communication major (below), must complete a minor field in either a second Program of Study within the School or in an academic program outside the School. Each course submitted for a minor offered in the School of Communication must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) To find the requirements for a given minor, students should consult this Bulletin and confer with the appropriate department representative. School of Communication advisors will aid students in identifying appropriate minors. The candidate for a Communication degree may choose from among any of the disciplines offering minors at the University for which they may qualify. The choice of a minor should be made no later than the beginning of the junior year and must be approved by the discipline concerned. Each Communication student will be required by the time he or she has earned 60 credits to submit to his or her Communication advisor a statement of courses and other requirements for the chosen minor. This statement must be signed by the Department Chair or the Chair’s designated representative of the selected minor area.

The Second Major Option

Students may choose to complete a second major, either within the School or in an academic program outside the School, in place of the minor requirement. Some second majors are impractical within the minimum 120 credit degree program. Students should consult with a Communication advisor before selecting a second major. The choice of a second major should be made no later than the beginning of the junior year and must be approved by the discipline concerned. Each Communication student will be required, by the time he or she has earned 60 credits, to submit to his or her Communication advisor a statement of courses and other requirements for a second major. This statement must be
Double Counting

Unless Communication Program Statements otherwise restrict, a maximum of six credits from the major, the minor, or the second major may double count toward the General Education Required Areas of Study in the School of Communication (above); see Program Statements. A course listed under the Additional Requirements of a student’s major may also be used to satisfy a School General Education Required Areas of Study requirement.

Students completing a major and a minor in the School of Communication, or two majors within the School of Communication, may count only COM 101 and COM 250 toward both Programs of Study. No other course duplication is allowed. Students should consult with the Department Chair of the minor or second major for acceptable course substitutions where appropriate.

Additional Program Requirements

Most programs in the School require a student to complete specified courses in addition to the 12 to 15 courses that comprise the majors to obtain the School’s Bachelor of Science degree. These courses may, in some cases, fulfill requirements in the School’s General Education Required Areas of Study, or in a minor or second major outside the School, or may be general electives in the University.

The General Communication Minor

In addition to the School of Communication minors offered by individual Programs of Study, the School offers a General Communication minor for students in Schools or Colleges outside the School of Communication. Students majoring in the School of Communication may not use the General Communication Minor to complete their minor requirement.

- A student seeking a minor in the general area of Communication must complete 15 credits at least six of which must be at the 300-level or above.
- Courses taken for this minor must be approved in advance through the School’s office of Admissions, Academic & Alumni Services.
- Other minors are offered in Advertising; Public Relations; Communication Studies; Electronic Media; Broadcast Journalism; Journalism; Visual Journalism; Media Management; and Motion Pictures; see Program Statements.
- Each course submitted for a Communication minor must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.)

Upper Division Credits

In earning a Bachelor of Science in Communication, each School of Communication student must complete a minimum of 36 credits of course work at the 300-level or above. Upper division courses taken in General Education Required Areas of Study, in the School of Communication major, in the second major or minor, and as general electives will count toward this 36-credit minimum requirement. Upper division transfer credits also apply if completed at a four-year institution and if approved by the Department Chair.
Electives

Only Free Elective courses may be taken under the University’s Credit Only option (see CREDIT ONLY OPTION in this Bulletin). Free Electives are defined as courses not taken to fulfill the requirements of the major within the School of Communication, of the second major or minor, or of the School’s General Education Required Areas of Study. Free Electives are courses taken not to meet any of the above requirements or their prerequisites, but taken solely to meet the requirement of a minimum total of 120 credits for the degree.

General Electives  Sufficient to fulfill a minimum of 120 credits

A sufficient number of University electives must be completed to fulfill a minimum total of 120 credits. Electives may be chosen from any courses offered by the University except certain unapproved courses such as Dance 101, 102, 103, 104, and activity courses offered by the School of Education. Students should consult a School of Communication advisor before selecting elective courses. Because specific courses are required in some School of Communication majors, students are advised to read Program Statements carefully and seek the advice of a School of Communication advisor prior to taking general University electives.

Schedules

Fifteen or sixteen credits constitute a normal semester schedule in the School of Communication. Students who wish to register for more than sixteen credits must obtain prior approval from the Academic Services Office. Students who are on academic probation will be limited to a maximum of thirteen credits.

HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details about the School of Communication Honors Program.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.
UNDERGRADUATE ACADEMIC PROGRAMS

DEPARTMENT OF CINEMA AND INTERACTIVE MEDIA

The Department of Cinema and Interactive Media offers a major in Motion Pictures (CMP).

MOTION PICTURES - Dept. Code: CMP
http://com.miami.edu/programs

INTRODUCTION

The Motion Picture Program offers a complete curriculum for a new generation of media specialists, providing historical context and embracing the moving image creative process from writing and development, through production and post-production, to all forms of exhibition.

Visual storytelling requires technical skill, historical perspective and the ability to think critically in cinematic terms. The undergraduate Motion Pictures major provides the practical, collaborative and analytical skills required in today’s global and complex media environments.

The accomplished faculty is dedicated to engaging students in the discovery and development of their talents. Students are trained in innovation, creativity, critical thinking, adaptability, and the capacity to integrate theory and practice, technology and art. They are also well-equipped to understand the business and legal environments in which media industries operate.

Facilities in the Motion Picture Program include digital, 16mm and super-16 mm cameras; grip and electrical equipment; a soundstage; digital post-production image and sound facilities; and a digital animation lab. The School also operates the Bill Cosford Cinema, a state-of-the-art theater that exhibits first-run alternative, foreign and classic films. The Cosford Cinema provides an on-campus venue for various film festivals, including the annual Canes Film Festival featuring UM undergraduate and graduate work. A professional showcase screening of the best student work is held annually in Los Angeles.

The Motion Picture Program offers special summer programs in Prague (FAMU), Spain (Centro de Ciudad de la Luz), and Los Angeles (LA Experience).

EDUCATIONAL OBJECTIVES

The educational objectives of the Motion Picture Program are:

- Proficiency in the practice and process underlying the professional contemporary conception, development, production, completion, marketing and distribution of moving images.

- Proficiency in motion picture production techniques and the use of equipment necessary for entry into professional practice. Students concentrating in motion picture production will demonstrate the ability to create moving images meeting
entry-level, world-standard, professional expectations.

- Proficiency in story development, professional screenplay format and writing for media. Students concentrating in motion picture screenwriting will demonstrate writing ability at the level required for meeting entry-level professional expectations.

- Understanding of the business side of motion picture production, post-production, distribution and exhibition across a variety of platforms and global media contexts. Students concentrating in motion picture business will demonstrate an understanding of the principles and laws governing the profession, and the various ways of developing a moving image career.

- Understanding and appreciation of the history, aesthetic principles and classical and contemporary theories of moving image media. Students concentrating in motion picture critical studies will demonstrate comprehensive familiarity with major individual works, genres, national cinemas and movements, their diverse institutional, social and cultural contexts, and their significance within the global history of the moving image.

**DEGREE PROGRAMS**

The Bachelor of Science in Communication is offered in the Motion Pictures Program.

**MAJOR**

A major is offered in Motion Pictures.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Motion Pictures majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

**Admission to the Motion Picture major**

Before admission as a Motion Picture (CMP) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable.)

Students who have obtained the written approval of the Chair of Cinema and Interactive Media to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of
Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE MOTION PICTURES MAJOR

Students majoring in Motion Pictures are required to choose one of the following five areas of concentration: General, Production, Screenwriting, Business or Critical Studies.

GENERAL MOTION PICTURES CONCENTRATION

CORE COURSES

CMP 103 Survey of Motion Pictures
CMP 126 Introduction to Screenwriting
CMP 151 Introduction to Digital Production
CMP 204 History of International Cinema I
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

CMP 205 History of International Cinema II
CMP 251 Motion Picture Workshop: Storytelling

Select one of the following:

CMP 351 Introduction to Film Production
CMP 326 Intermediate Screenwriting
CMP 364 Business of Motion Pictures

Select three courses (9 credits) of the following:

CMP 329 Writing for Series Television
CMP 353 Post Production Sound Editing and Design
CMP 356 Cinematography
CMP 357 Editing
CMP 359 Motion Graphics, Compositing and Animation
CMP 386 Online Screenwriting
CMP 395 Directing Techniques I
CMP 458 Documentary Production
CMP 462 Motion Picture Marketing and Distribution
CMP 465 Producing the Motion Picture
CMP 469 Legal Aspects of Motion Pictures
CMP 494 Motion Picture Internship
CMP 499 Projects and Directed Research
Select two courses (6 credits) of the following:

CMP 394 Special Topics in Motion Pictures
CMP 401 Nonfiction Film and Digital Media
CMP 403 Film Directors
CMP 404 Aspects of Contemporary Cinema
CMP 406 Genres
CMP 407 National Cinemas
CMP 408 Women, Media and Popular Culture

Two additional Motion Picture electives (6 credits) must be selected.

Electives outside the Motion Picture major (but within the School of Communication) must be approved by the Chair.

MOTION PICTURES PRODUCTION CONCENTRATION

CORE COURSES

CMP 103 Survey of Motion Pictures
CMP 126 Introduction to Screenwriting
CMP 151 Introduction to Digital Production
CMP 204 History of International Cinema I
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

CMP 205 History of International Cinema II
CMP 251 Motion Picture Workshop: Storytelling
CMP 351 Introduction to Film Production

Select two courses (6 credits) of the following:

CMP 353 Post Production Sound Editing and Design
CMP 356 Cinematography
CMP 357 Editing
CMP 359 Motion Graphics, Compositing and Animation
CMP 364 Business of Motion Pictures
CMP 395 Directing Techniques I

Select two courses (6 credits) of the following:

CMP 451 Motion Picture Practicum
CMP 456 Advanced Cinematography
CMP 457 Advanced Editing
CMP 458 Documentary Production
CMP 459 Advanced Motion Graphics, Compositing and Animation
CMP 494 Motion Picture Internship
CMP 595 Directing Techniques II

Select one course (3 credits) of the following:

CMP 394 Special Topics in Motion Pictures
CMP 401 Nonfiction Film and Digital Media
CMP 403 Film Directors
CMP 404 Aspects of Contemporary Cinema
CMP 406 Genres
CMP 407 National Cinemas
CMP 408 Women, Media and Popular Culture

**Two additional Motion Picture electives (6 credits) must be selected.**

Electives outside the Motion Picture major (but within the School of Communication) must be approved by the Chair.

**MOTION PICTURES SCREENWRITING CONCENTRATION**

**CORE COURSES**

- CMP 103 Survey of Motion Pictures
- CMP 126 Introduction to Screenwriting
- CMP 151 Introduction to Digital Production
- CMP 204 History of International Cinema I
- COM 250 Freedom of Expression and Communication Ethics

**OTHER REQUIRED COURSES**

- CMP 205 History of International Cinema II
- CMP 251 Motion Picture Workshop: Storytelling
- CMP 326 Intermediate Screenwriting

**Select four courses (12 credit hours) of the following:**

- CMP 329 Writing for Series Television
- CMP 386 Online Screenwriting
- CMP 426 Advanced Screenwriting
- CMP 429 Advanced TV Writing
- CMP 489 Projects in Screenwriting

**Select one course (3 credits) of the following:**

- CMP 394 Special Topics in Motion Pictures
- CMP 401 Nonfiction Film and Digital Media
- CMP 403 Film Directors
- CMP 404 Aspects of Contemporary Cinema
- CMP 406 Genres
- CMP 407 National Cinemas
- CMP 408 Women, Media and Popular Culture

**Two additional Motion Picture electives (6 credits) must be selected.**

Electives outside the Motion Picture major (but within the School of Communication) must be approved by the Chair.

**MOTION PICTURES BUSINESS CONCENTRATION**

**CORE COURSES**

- CMP 103 Survey of Motion Pictures
CMP 126 Introduction to Screenwriting
CMP 151 Introduction to Digital Production
CMP 204 History of International Cinema I
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

CMP 205 History of International Cinema II
CMP 251 Motion Picture Workshop: Storytelling
CMP 364 Business of Motion Pictures

Select four courses (12 credits) of the following:

CMP 351 Introduction to Film Production
CMP 462 Motion Picture Marketing and Distribution
CMP 465 Producing the Motion Picture
CMP 469 Legal Aspects of Motion Pictures
CMP 494 Motion Picture Internship
CMP 499 Projects and Directed Research

Select one course (3 credits) of the following:

CMP 394 Special Topics in Motion Pictures
CMP 401 Nonfiction Film and Digital Media
CMP 403 Film Directors
CMP 404 Aspects of Contemporary Cinema
CMP 406 Genres
CMP 407 National Cinemas
CMP 408 Women, Media and Popular Culture

Two additional Motion Picture electives (6 credits) must be selected.

Electives outside the Motion Picture major (but within the School of Communication) must be approved by the Chair.

MOTION PICTURES CRITICAL STUDIES CONCENTRATION

CORE COURSES

CMP 103 Survey of Motion Pictures
CMP 126 Introduction to Screenwriting
CMP 151 Introduction to Digital Production
CMP 204 History of International Cinema I
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

CMP 205 History of International Cinema II
CMP 251 Motion Picture Workshop: Storytelling

Select five courses (15 credits) of the following:

CMP 394 Special Topics in Motion Pictures
CMP 401 Nonfiction Film and Digital Media
CMP 403 Film Directors
CMP 404 Aspects of Contemporary Cinema
CMP 406 Genres
CMP 407 National Cinemas
CMP 408 Women, Media and Popular Culture

Three additional Motion Picture electives (9 credits) must be selected.

Electives outside the Motion Picture major (but within the School of Communication) must be approved by the Chair.

MINOR

A Minor is offered in Motion Pictures.

The minor in Motion Pictures requires a grade of C or better in the following courses (a C- is not acceptable.)

REQUIRED COURSES

CMP 103 Survey of Motion Pictures

Four additional Motion Picture electives (12 credits) with the approval of the Chair must be selected. A minimum of 6 credits at the 300-level or above is required.

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details. Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Motion Pictures Course Listing
DEPARTMENT OF COMMUNICATION STUDIES

The Department of Communication Studies offers a major in Communication Studies (COS)

COMMUNICATION STUDIES - Dept. Code: COS
http://com.miami.edu/programs

INTRODUCTION

The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete application for particular contexts. Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in communication, law and other areas.

EDUCATIONAL OBJECTIVES

The educational objectives of the Communication Studies program require that:

- Students demonstrate a comprehensive understanding of the human communication process in a diverse society and application of communication skills through examinations, written and multimedia assignments, class discussions, group problem solving, presentations, speeches, debates, and service learning activities.

- Students demonstrate an understanding of communication contexts such as intrapersonal, interpersonal, intercultural, small group, organizational, political, and public communication.

- Students demonstrate skill development and application of communication processes including message design, message delivery, critical thinking, creative thinking, and argumentation.

- Students demonstrate the effects of communication and social interaction based on perceptions, construction of reality, relationship development, persuasion, and conflict resolution.

- Students demonstrate an understanding of generating knowledge relating to the human communication process and social interaction using appropriate methods such as qualitative analysis (observations, case studies, interviews, focus groups),
quantitative analysis (survey, experimental design, content analysis) or critical approaches (rhetorical criticism, discourse analysis, textual analysis).

**DEGREE PROGRAMS**

The Bachelor of Science in Communication degree is offered in Communication Studies.

**MAJOR**

A major is offered in Communication Studies.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Communication Studies majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

**Admission to the Communication Studies major**

Before admission as a Communication Studies (COS) major, a student must:

A) Achieve sophomore standing;

B) Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable.)

Students who have obtained the written approval of the Chair of Communication Studies to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

**THE COMMUNICATION STUDIES MAJOR**

All majors are required to complete Core Courses (12 credits), Area of Concentration (15 credits), and Other Required Courses (9 credits). A minimum of 15 credits at the 300-level or above is required within the 36-credit major.
CORE COURSES

Students majoring in Communication Studies must complete the following courses (12 credits):

COM 110 Communication Theory
COM 250 Freedom of Expression and Communication Ethics
COS 112 Interpersonal Communication
COS 210 Writing for Communication Studies

AREAS OF CONCENTRATION

Students majoring in Communication Studies are required to choose one of the following areas of concentration (15 credits): General Communication Studies, Intercultural Communication, Organizational Communication, or Public Advocacy.

CONCENTRATION IN GENERAL COMMUNICATION STUDIES

15 elective credits in Communication Studies chosen with prior approval of a COS faculty advisor.

CONCENTRATION IN INTERCULTURAL COMMUNICATION

COS 316 Small Group Communication
COS 318 Nonverbal Communication
COS 343 Introduction to Intercultural Communication
COS 545 Intercultural Communication: International Perspectives
COS 546 Intercultural Communication: Domestic Perspectives

CONCENTRATION IN ORGANIZATIONAL COMMUNICATION

COS 316 Small Group Communication
COS 333 Business Communication
COS 343 Introduction to Intercultural Communication
COS 418 Organizational Communication
COS 498 Communication Studies Internship

CONCENTRATION IN PUBLIC ADVOCACY

COS 211 Public Speaking
COS 472 Persuasion
COS 560 The Executive Communicator

Select one of the following courses:

COS 304 Intercollegiate Debate Theory and Practice (complete 3 credits)
COS 377 Argumentation and Debate

Select one of the following courses:

COS 316 Small Group Communication
COS 318 Nonverbal Communication
COS 336 American Political Campaign Communication
OTHER REQUIRED COURSES

Students majoring in Communication Studies must complete the following courses (9 credits):

COS 351 Qualitative Research Methods
COS 353 Quantitative Communication Research Methods and Analyses
COS 479 Capstone for Communication Studies

MINOR

The minor in Communication Studies requires COM 110, plus twelve additional credits in Communication Studies, at least six of which must be at the 300-level or above. The additional credits must be chosen with prior approval of a Communication Studies faculty advisor. A grade of C or better is required in all courses (a C- is not acceptable.)

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.
DEPARTMENT OF JOURNALISM AND MEDIA MANAGEMENT

The Department of Journalism and Media Management offers majors in Broadcast Journalism (CEM), Electronic Media (CEM), Media Management (CEM), Journalism (CNJ), and Visual Journalism (CVJ).

ELECTRONIC MEDIA, BROADCAST JOURNALISM AND MEDIA MANAGEMENT - Dept. Code: CEM
http://com.miami.edu/programs

INTRODUCTION

The electronic media have a profound impact on daily life and the future of local and global communities. The School of Communication Electronic Media Program is dedicated to nurturing the aspirations of men and women who seek to dedicate their professional lives to the arts, crafts and businesses of electronic mass communication and its allied fields.

Majors study all aspects of television, radio, cable, broadband, and web operations in preparation for careers as electronic media professionals. Three majors and three minors are offered in the Electronic Media Program. The program emphasizes hands-on learning within a multicultural, international context. Students consistently win first place awards in regional and national competitions.

All Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School’s facilities include state-of-the-art, all-digital television and radio studios, digital post-production stations and related capabilities.

EDUCATIONAL OBJECTIVES

Learning objectives for each of the three majors in the Electronic Media program should foster critical thinking skills. Our majors develop the intellectual capacity to analyze, evaluate and adapt to an ever-changing media environment.

The educational objectives of the undergraduate Electronic Media major require that students:

- Demonstrate knowledge of the workings of the electronic mass media and be able to identify and describe the impact of historical events, economic factors, technology, audience analysis research, content choices, and regulation of the electronic media industry. This knowledge should be understood within the context of a global and culturally diverse communications environment.

- Demonstrate the ability to identify and operate traditional and computer-based audio and video equipment and accompanying software. Students concentrating in electronic media production will demonstrate the ability to produce video programs meeting entry-level professional expectations.
• Demonstrate writing ability at the level required for meeting entry-level professional expectations.

• Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility, and expectations of the profession. In particular, students should demonstrate an understanding of the principles and laws regarding freedom of expression within a democratic society.

• Demonstrate service to the campus and larger community through participation in the creation and delivery of content for campus and community audiences.

The educational objectives of the undergraduate Broadcast Journalism major require that students:

• Demonstrate the ability to acquire information and effectively present journalistic messages in an appropriate format using basic oral, written and visual communication skills.

• Demonstrate knowledge of the workings of the electronic mass media and be able to identify and describe the impact of historical events, economic factors, technology, audience analysis research, content choices, and regulation on the electronic media industry. This knowledge should be understood within the context of a global and culturally diverse communications environment.

• Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility, and expectations of the profession. In particular, students should demonstrate an understanding of the principles and laws regarding freedom of expression within a democratic society.

• Demonstrate service to the campus and larger community through participation in the creation and delivery of content for campus and community audiences.

The educational objectives of the undergraduate Media Management major require that students:

• Demonstrate knowledge of the workings of the electronic mass media and be able to identify and describe the impact of historical events, economic factors, technology, audience analysis research, content choices, and regulation of the electronic media industry. This knowledge should be understood within the context of a global and culturally diverse communications environment.

• Demonstrate writing ability at the level required for meeting entry-level professional expectations.

• Demonstrate analytical and critical skills needed to acquire, organize and synthesize information and data in a manner consistent with professional standards; the student will demonstrate the ability to define problems, evaluate decision options and select the best course of action.

• Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility, and expectations of the profession. In particular, students should demonstrate an understanding of the principles and laws regarding freedom of expression within a democratic society.
Demonstrate service to the campus community through collaboration with School and campus media outlets.

DEGREE PROGRAMS

The Bachelor of Science in Communication is offered in Electronic Media, Broadcast Journalism, and Media Management.

MAJOR

Majors are offered in Electronic Media, Broadcast Journalism and Media Management.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Electronic Media, Broadcast Journalism and Media Management majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Electronic Media, Broadcast Journalism and Media Management majors

Before admission as an Electronic Media, Broadcast Journalism, or Media Management (CMM) major, a student must:

A) Achieve sophomore standing;

B) Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable.)

Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.
THE ELECTRONIC MEDIA MAJOR

CORE COURSES

COM 101  Mass Media Communication in Society
CEM 102  Introduction to Electronic Media
CEM 201  Writing for the Electronic Media
COM 250  Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

CEM 301  Electronic Media Research and Theories

Three credits at the 100-level or above.

Six credits at the 200-level or above.

Twelve credits at the 300-level or above.

Six credits at the 400-level or above. Only three of the six credits may be used for Internships or Projects and Directed Research.

All courses selected for the Electronic Media major must be approved by an Electronic Media faculty advisor.

ADDITIONAL REQUIREMENTS FOR THE ELECTRONIC MEDIA MAJOR

Students majoring in Electronic Media must also complete COS 211 or COS 333.

Sample Track #1: 12 Credit Core plus:

CVJ 106 Multimedia Design
CEM 245 Introduction to Electronic Media Production
CEM 301 Electronic Media Research and Theories
CEM 313 Electronic Media Sales
CEM 314 Broadcast and Cable Programming
CEM 345 Intermediate Electronic Media Production
CEM 408 International Electronic Media Systems
CEM 435 Telecommunication Systems
CEM 445 Advanced Electronic Media Production
CEM 491 Internship in Broadcasting and Allied Fields

Sample Track #2: 12 Credit Core plus:

CVJ 106 Multimedia Design
CEM 245 Introduction to Electronic Media Production
CEM 301 Electronic Media Research and Theories
CEM 302 Electronic Media Law
CEM 306 Special Topics in Electronic Media II
CEM 314 Broadcast and Cable Programming
CEM 345 Intermediate Electronic Media Production
CMP 357 Editing
CEM 445 Advanced Electronic Media Production
CEM 491 Internship in Broadcasting and Allied Fields

MINOR

The minor in Electronic Media requires:

CEM 102 - Introduction to Electronic Media, and twelve additional credits chosen with the prior approval of an Electronic Media faculty advisor. At least six of those credits must be at the 300-level or above. A grade of C or better is required in all courses (a C- is not acceptable.)

THE BROADCAST JOURNALISM MAJOR

CORE COURSES

COM 101 Mass Media Communication in Society
CEM 102 Introduction to Electronic Media
CNJ 111 Introduction to News Media Writing
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

CNJ 216 News Reporting and Writing
CEM 245 Introduction to Electronic Media Production
CEM 301 Electronic Media Research and Theories
CEM 302 Electronic Media Law
CEM 317 Broadcast Journalism
CEM 345 Intermediate Electronic Media Production
CEM 517 Television News Reporting

Nine additional credits, at least three of which must be at the 300-level or above, in School of Communication courses, chosen with the prior approval of a Broadcast Journalism faculty advisor.

ADDITIONAL REQUIREMENTS FOR THE BROADCAST JOURNALISM MAJOR

Students majoring in Broadcast Journalism are required to complete the following: COS 211 or COS 333; POL 201; and six additional credits in Political Science, History, or Economics.

MINOR

The minor in Broadcast Journalism requires:

CEM 102 Introduction to Electronic Media
CNJ 111 Introduction to News Media Writing
CNJ 216 News Reporting and Writing
CEM 245 Introduction to Electronic Media Production
CEM 317 Broadcast Journalism
Three additional credits at the 300-level or higher, chosen with the prior approval of a Broadcast Journalism faculty advisor. A grade of C or better is required in all courses (a C- is not acceptable.)

THE MEDIA MANAGEMENT MAJOR

CORE COURSES

COM 101 Mass Media Communication in Society
CEM 102 Introduction to Electronic Media
COM 250 Freedom of Expression and Communication Ethics

Select one of the following courses:

ENG 230 Business Writing
CEM 201 Writing for the Electronic Media
CPR 232 Promotional Writing

OTHER REQUIRED COURSES

CEM 301 Electronic Media Research and Theories
CEM 314 Broadcast and Cable Programming
CEM 435 Telecommunication Systems
CEM 403 Media Economics
CEM 402 Strategic Media Management

Select one of the following courses:

CEM 302 Electronic Media Law
CNJ 303 Mass Media Law
CMP 469 Legal Aspects of Motion Pictures

Twelve additional credits in School of Communication courses chosen with the prior approval of a Media Management faculty advisor. At least three of the twelve credits must be at the 300-level or above.

ADDITIONAL REQUIREMENTS FOR THE MEDIA MANAGEMENT MAJOR

Media Management students must complete ECO 211 or ECO 212. These courses may be used for the School’s People and Society requirement.

Media Management students must complete MKT 301 plus six additional credits in the School of Business Administration chosen with the prior approval of a School of Communication advisor. Three of these six credits must be at the 300-level or above. Students majoring in Media Management must also complete COS 333 or COS 418.

Students seeking a Marketing Minor from the School of Business Administration must complete MKT 301 with a grade of B or higher, plus three of the following: MKT 310, MKT 320, MKT 340, and MKT 360. Students must earn a cumulative quality point average of 2.5 or higher in the four courses submitted for the minor. Consult the School of Business Administration section of this Bulletin.
Students seeking a General Business Minor from the School of Business Administration must complete MKT 301, ACC 211, FIN 300 and MGT 304 with a cumulative quality point average of 2.0 or higher. Consult the School of Business Administration section of this Bulletin.

MINOR

The minor in Media Management requires:

CEM 102 Introduction to Electronic Media
CEM 301 Electronic Media Research and Theories
CEM 314 Broadcast and Cable Programming

Six additional credits chosen with the prior approval of a Media Management faculty advisor, at least three of which must be at the 300-level or higher.

A grade of C or better is required in all courses (a C- is not acceptable.)

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Electronic Media Course Listing
JOURNALISM - Dept. Code: CNJ
http://com.miami.edu/programs

INTRODUCTION

The program in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to web-based and online media, emphasizing effective storytelling through writing, audio and video recording, and photography. Reporting skills and writing in the context of news, commentary and features are stressed in this area of study. The program enables students to gather information, evaluate and organize that information, and then communicate it through appropriate media. As a result, the program attracts students interested in other fields in which research, analysis and writing are important, such as students planning to apply to law school or other professional or graduate schools.

The program begins with courses that survey the roles of and issues affecting the mass media in general and journalism in particular. In subsequent courses, students mix skills and theory to explore journalism, its values, history, ethics, and legal and regulatory constraints. Journalism majors learn through hands-on practice to conduct research and reporting, to verify facts, exercise news judgment, write against deadlines, edit, practice ethical decision-making, and adhere to press laws and regulations.

Small laboratory classes allow students to practice writing skills in an introductory news writing course, an advanced reporting course and upper-level courses in advanced reporting. Electives include courses in newspaper, magazine, newsletter and online writing and graphics; still photography; audio, video and web production; newspaper, magazine and web editing and design; computer-assisted reporting and the Internet; and global journalism and media. Journalism seniors participate in a news ethics and professional problems seminar to prepare them for on-the-job decision-making. While knowledge of a foreign language may be helpful, the program does not require any foreign language courses.

Students are encouraged to work for The Miami Hurricane, UM's award-winning, student-run newspaper published twice weekly in print and online; Distraction magazine; Ibis, UM's yearbook; Communiqué, the School of Communication's online newspaper; and hyper-local news sites such as Gables Home Page.

Students choose from a range of newspapers, magazines, newsletters and websites published in the Greater Miami-Fort Lauderdale area for internships and part-time employment. Students have been awarded competitive internships from The Washington Post, the Los Angeles Times, Tribune Newspapers, McClatchy Newspapers and the Poynter Institute, among others.

EDUCATIONAL OBJECTIVES

The educational objectives of the Journalism Program require that:

- Students can locate and gather information, using interpersonal interviewing skills, knowledge about domestic and global information sources and social and institutional
information processes, sophisticated reporting techniques, computer skills, and general knowledge and common sense.

- Using knowledge from broad-based liberal arts and science courses and courses in journalism practice, history, law and ethics, students can critically analyze complex information and organize it based on sound reasoning, cultural awareness, and journalistic principles.

- Students can write, visualize and otherwise accurately communicate, with knowledge of grammar, style, and journalistic principles, complex information to diverse mass audiences.

- Students can convey information in traditional and multimedia formats in the context of a dynamic and converging news media environment.

DEGREE PROGRAMS

The Bachelor of Science in Communication degree is offered in the Journalism Program.

MAJOR

A major is offered in Journalism.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Journalism majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Journalism major

Before admission as a Journalism (CNJ) major, a student must:

A) Achieve sophomore standing;

B) Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable.)

Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but
who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE JOURNALISM MAJOR

CORE COURSES

CNJ 111 Introduction to News Media Writing
CVJ 106 Multimedia Design
COM 250 Freedom of Expression and Communication Ethics
CNJ 319 History of Journalism

OTHER REQUIRED COURSES

CNJ 216 News Reporting and Writing
CNJ 303 Mass Media Law
CNJ 444 Public Affairs Reporting
CNJ 461 Seminar in News Ethics and Problems

Beyond the required courses, journalism majors must take at least 18 additional elective credits in journalism (for a total of 42 credits required to graduate with this major.) Some of these credits may be taken in other programs in the School of Communication after prior consultation with and approval by a Journalism faculty advisor. Up to 3 credits of the additional 18 elective credits may consist of internships or practicums.

As a guideline to assist students in pursuing their areas of interest, students may select one of the following tracks of specialization, though students have the option, after consultation with a Journalism faculty advisor, of tailoring their own particular course of study in journalism to suit their interests.

A. The NEWS Track

CVJ 221 Introduction to Documentary Photography
CNJ 444 Public Affairs Reporting
CNJ 445 In-Depth Journalism and Media Convergence

Select at least one of the following courses:

CNJ 513 Computer-Assisted Reporting
CNJ 515 Reporting and the Internet

Select at least one of the following courses:

CNJ 381 Newspaper Editing and Layout
CNJ 442 Online Journalism

B. The MAGAZINE/FEATURES Track

CVJ 221 Introduction to Documentary Photography
CNJ 382 Publication Planning and Editing
Select at least one of the following courses:

CNJ 513 Computer-Assisted Reporting
CNJ 515 Reporting and the Internet
CNJ 442 Online Journalism

Select at least one of the following courses:

CNJ 544 Feature Writing
CNJ 446 Travel Writing

Any additional elective credits from the School of Communication should be chosen with the prior approval of a Journalism faculty advisor.

C. The GLOBAL JOURNALISM Track

CNJ 510 Comparative Media Systems
CNJ 511 Global Media
CNJ 517 International Journalism

Students are encouraged to consider a minor or a second major in Latin American Studies, International Studies, or Comparative Politics. Other disciplines that include a significant international or cross-cultural focus can be discussed with a Journalism faculty advisor.

D. The PUBLICATION DESIGN Track

CVJ 221 Introduction to Documentary Photography
CVJ 341 Web Design

Select at least one of the following courses:

CNJ 381 Newspaper Editing and Layout
CNJ 382 Publication Planning and Editing

E. The DIGITAL NEWS Track

CVJ 106 Multimedia Design
CNJ 442 Online Journalism
CNJ 515 Reporting and the Internet

Select at least one of the following courses:

CEM 435 Telecommunication Systems
CNJ 513 Computer-Assisted Reporting

Select at least one of the following courses:

CVJ 209 Introduction to Multimedia Storytelling
CVJ 221 Introduction to Documentary Photography
CVJ 341 Web Design
CVJ 419 Interactive Storytelling
CVJ 422 Programming for Interactivity
F. The CUSTOM Track

Many students prefer to explore a number of different areas of specialization and build what amounts to a custom track. These students are required to consult with the Journalism Chair or her designated representative to design a custom track.

ADDITIONAL REQUIREMENTS FOR THE JOURNALISM MAJOR

Students majoring in Journalism must complete three credits in History, three credits in Political Science, and COS 211. These credits may be used to fulfill the School's General Education Required Areas of Study (see listing above). Any waivers of these requirements must be approved in writing by both the Chair and the Academic Services Office of the School of Communication.

MINOR

The 15 credit minor in Journalism requires:

CNJ 111
CNJ 216
CNJ 303
CNJ 381 or CNJ 382

One of the following courses is also required: CVJ 106, CNJ 319, CNJ 442, CNJ 444, CNJ 461 or CNJ 544.

A grade of C or better is required in all courses (a C- is not acceptable.)

Any waiver of these requirements must be approved in writing by both the Chair and the Academic Services Office of the School of Communication.

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Journalism Course Listing
INTRODUCTION

The Visual Journalism Program emphasizes visual storytelling that addresses meaningful content within the global community. It teaches technical literacy in traditional and cutting-edge technologies. Each course builds upon an understanding of the visual storytelling process, and each course stresses the theoretical underpinnings and ethical foundations of the journalistic tradition.

Our internationally recognized faculty is a blend of award-winning professionals and distinguished researchers and includes two Knight Chairs specializing in Visual Journalism and Cross-Cultural Journalism. Alumni of the program include award-winning journalists working with major news organizations.

EDUCATIONAL OBJECTIVES

The educational objectives of the Visual Journalism Program require that students:

• Demonstrate knowledge of the workings of the diverse global communication marketplace and be able to identify the impact of historical, technological, ethical and sociological influences in the communication evolution.

• Demonstrate the ability to gather and chronicle community-based information using research, interpersonal interviewing skills and media technology tools.

• Demonstrate the development of a professional identity through the ability to articulate and practice the values, ethics, social responsibility and expectations of the profession.

• Demonstrate the ability to critically analyze one’s own creative work as well as the work of fellow students and professionals in terms of content and aesthetics.

• Demonstrate service to the campus and community at large through participation in the creation and delivery of content for the campus and community audiences.

• Demonstrate technical proficiency in visual storytelling using both traditional and cutting-edge technology.

DEGREE PROGRAMS

The Bachelor of Science in Communication is offered in the Visual Journalism Program.

MAJOR

A Major is offered in Visual Journalism.
Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Visual Journalism majors must also complete a second major or a separate minor in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Visual Journalism major

Before admission as a Visual Journalism (CVJ) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable.)

Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student's first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student's major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE VISUAL JOURNALISM MAJOR

Core Courses

COM 250 Freedom of Expression and Communication Ethics
CNJ 111 Introduction to News Media Writing
CVJ 106 Multimedia Design
CVJ 221 Introduction to Documentary Photography
CVJ 341 Web Design

Select one of the following courses:

CVJ 209 Introduction to Multimedia Storytelling
CMP 151 Introduction to Digital Production
CEM 245 Introduction to Electronic Media Production

Select one of the following courses:

CNJ 216 News Reporting and Writing
CNJ 595 Special Topics: Social Media for Journalists
CVJ 496 Internship in Visual Journalism
MULTIMEDIA PROGRAMMING TRACK

CVJ 331 Information Graphics and Visualization
CVJ 422 Programming for Interactivity
SoC elective (200-level or above)
SoC elective (200-level or above)
CVJ elective (300-level or above)
CVJ 419 Interactive Storytelling (Capstone)

PHOTOJOURNALISM TRACK

CVJ 361 Advanced Documentary Photography
CVJ 435 Video Journalism
SoC elective (200-level or above)
SoC elective (200-level or above)
CVJ elective (300-level or above)
CVJ 419 Interactive Storytelling (Capstone)

MINOR

VISUAL JOURNALISM MINOR: CVJ 106, CVJ 209, CVJ 221, CVJ 341, and one 300-level or higher course from one of the two tracks of specialization in Visual Journalism. A grade of C or better in all courses is required (a C- is not acceptable.)

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Visual Journalism Course Listing
DEPARTMENT OF STRATEGIC COMMUNICATION

The Department of Strategic Communication offers a major in Advertising (CAD) and a major in Public Relations (CPR).

ADVERTISING - Dept. Code: CAD
http://com.miami.edu/programs

INTRODUCTION

Students majoring in Advertising learn the art, craft and business of how to promote brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development, and media planning skills. Both a major and a minor are offered in Advertising.

The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally.

The curriculum is hands-on and students learn how to create an advertising campaign that meets their client's goals.

Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School's Advertising Program also has an active alliance with the American Advertising Federation.

EDUCATIONAL OBJECTIVES

The educational objectives of the undergraduate Advertising program require that

• Students demonstrate an understanding of the history of advertising as it relates to the emergence of mass media outlets and the importance of advertising in the marketplace.

• Students apply theoretical concepts related to advertising, mass communication, consumer behavior, psychology, sociology, marketing, and other related fields to understand how advertising works in a free-market economy.

• Students analyze primary and secondary research data to create advertising strategies for a variety of products and services.

• Students demonstrate the ability to create strategic advertisements for print, broadcast, online and other media, as well as how to integrate a campaign idea across several media categories in a culturally diverse marketplace.

• Students research, create, design, write, and present an advertising campaign of their own creation and compete for an account as they would at an advertising agency.
• Students understand how advertising works in a global economy, taking into account cultural, societal, political, and economic differences that exist across countries and cultures.

• Students demonstrate an understanding and appreciation of the core ethical principles of the advertising profession.

DEGREE PROGRAMS

The Bachelor of Science in Communication is offered in the Advertising Program.

MAJOR

A major is offered in Advertising.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Advertising majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Advertising major

Before admission as an Advertising (CAD) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

Students who have obtained the written approval of the Chair of Strategic Communication to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE ADVERTISING MAJOR

Students majoring in advertising will choose one of the following three tracks: General Advertising Track, Advertising Management Track, or Advertising Creative Track.
THE GENERAL ADVERTISING TRACK

**CORE COURSES**

- COM 101 Mass Media Communication in Society
- CAD 102 Graphic Design for Advertising I
- CAD 114 Principles of Advertising
- CAD 201 Advertising Strategy Development
- COM 250 Freedom of Expression and Communication Ethics

**OTHER REQUIRED COURSES**

Students must complete both of the following writing courses:

- CAD 231 Advertising Copywriting and Concept
- CAD 233 Writing for Account Management

Students must also complete:

- CAD 312 Research Methods for Advertising
- CAD 388 Media Planning
- CAD 434 Advertising Campaigns

Five additional advertising electives (15 credits) must be selected. Electives outside the advertising major (but within the School of Communication) must be approved by the Chair of Strategic Communication.

THE ADVERTISING MANAGEMENT TRACK

**CORE COURSES**

- COM 101 Mass Media Communication in Society
- CAD 102 Graphic Design for Advertising I
- CAD 114 Principles of Advertising
- CAD 201 Advertising Strategy Development
- COM 250 Freedom of Expression and Communication Ethics

**OTHER REQUIRED COURSES**

- CAD 233 Writing for Account Management
- CAD 312 Research Methods for Advertising
- CAD 388 Media Planning
- CAD 434 Advertising Campaigns
- CAD 491 The Business of Account Management
- CAD 495 Advertising Management

Four additional advertising electives (12 credits) must be selected. Electives outside the advertising major (but within the School of Communication) must be approved by the Chair of Strategic Communication.
THE ADVERTISING CREATIVE TRACK

CORE COURSES

- COM 101 Mass Media Communication in Society
- CAD 102 Graphic Design for Advertising I
- CAD 114 Principles of Advertising
- CAD 201 Advertising Strategy Development
- COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

- CAD 202 Graphic Design for Advertising II
- CAD 231 Advertising Copywriting and Concept
- CAD 384 Advertising Creative Strategy and Execution
- CAD 390 Art Direction
- CAD 434 Advertising Campaigns
- CAD 496 Portfolio Development

Four additional advertising electives (12 credits) must be selected. Electives outside the Advertising major (but within the School of Communication) must be approved by the Chair of Strategic Communication.

ADDITIONAL REQUIREMENTS FOR THE ADVERTISING MAJOR: ALL TRACKS

Students must complete ECO 211 and POL 201. These credits may be used for the School’s General Education Required Areas of Study.

Students must complete at least one course with an international or intercultural focus. Courses that meet this requirement include: CAD 350, MKT 360, CPR 582, COS 343, and COS 545. Other courses may be used to fulfill this requirement with the approval of an Advertising faculty advisor.

Students must complete COS 211, MKT 301, and MKT 310.

MINOR

The Advertising Program offers minors in Advertising Business and Advertising Creative.

Both 18-credit minors in Advertising require a grade of C or better in all courses (a C- is not acceptable.)

Required courses for the Advertising Business minor:

- CAD 114 Principles of Advertising
- CAD 201 Advertising Strategy Development
- CAD 233 Writing for Account Management
- CAD 312 Research Methods for Advertising
- CAD 388 Media Planning
- CAD 434 Advertising Campaigns
Required courses for the Advertising Creative minor:

CAD 102 Graphic Design for Advertising I  
CAD 114 Principles of Advertising  
CAD 202 Graphic Design for Advertising II  
CAD 231 Advertising Copywriting and Concept  
CAD 384 Advertising Creative Strategy and Execution  
CAD 434 Advertising Campaigns

Students seeking a Marketing minor from the School of Business Administration must complete MKT 301 with a grade of B or higher, MKT 310, plus two additional courses in marketing (except for MKT 386). Students must earn a cumulative quality point average of 2.5 or higher in the four courses submitted for the minor. Consult the School of Business Administration section of this Bulletin.

Students seeking a General Business minor from the School of Business Administration must complete MKT 301, ACC 211, FIN 300 and MGT 304 with a cumulative quality point average of 2.0 or higher. Consult the School of Business Administration section of this Bulletin.

DEPARTMENT HONORS

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

Advertising Course Listing
INTRODUCTION

Students majoring in Public Relations learn how to promote a client’s business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their publics. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, researching and understanding target audiences, and writing and design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community.

Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The Public Relations Program has ties to the Public Relations Society of America and maintains a PRSA-affiliated chapter of the Public Relations Student Society of America.

EDUCATIONAL OBJECTIVES

The educational objectives of the program in Public Relations require that:

- Students demonstrate they understand and can apply the principles and laws of ethics and freedom of speech and the press, and understand how public relations research, theory, and tactics are used in organizations, roles and situations.
- Students produce effective, audience-sensitive communications in forms appropriate for intended audiences that demonstrate an understanding of the diversity of groups in a global society for public relations purposes.
- Students demonstrate an ability to think critically, creatively, and independently and express that through effectively written and spoken communications that are grammatically and stylistically correct.
- Students create, design, present and evaluate strategically planned campaigns that meet public relations objectives.
- Students gain a broad understanding of public relations practices through an understanding of the history and role of professionals and institutions in shaping communications.

DEGREE PROGRAMS

The Bachelor of Science in Communication degree is offered in the Public Relations Program.
MAJOR

A major is offered in Public Relations.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Public Relations majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

 Admission to the Public Relations major

Before admission as a Public Relations (CPR) major, a student must:

A) Achieve sophomore standing;

B) Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable.)

Students who have obtained the written approval of the Chair of Strategic Communication to use transfer credit to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

Upon completion of a student’s first 45 University credits while enrolled in the School of Communication, all University credits earned toward the major will be used in computing a student’s major cumulative quality point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.

A student who has completed 45 credits while enrolled in the School of Communication but who has not been admitted to one of the Communication majors may be dismissed from the School. A student who has completed 60 University credits while enrolled in the School but who has not been admitted to one of the Communication majors will be dismissed from the School. See PROBATION AND DISMISSAL.

THE PUBLIC RELATIONS MAJOR

CORE COURSES

COM 101 Mass Media Communication in Society
CPR 116 Principles of Public Relations
CPR 202 Design Principles and Techniques
CPR 232 Writing for Public Relations
COM 250 Freedom of Expression and Communication Ethics

OTHER REQUIRED COURSES

CPR 311 Public Relations Research
CPR 346 Advanced Public Relations Writing and Design
CPR 436 Public Relations Campaigns

Five additional courses (15 credits) in a concentration at the 300-level or higher must be selected, with the prior approval of a Public Relations faculty advisor. Courses chosen should
lead to professional orientation and practice. Examples of such concentrations include corporate communication, sports promotion, health communication, public affairs, international public relations, and travel and tourism.

**ADDITIONAL REQUIREMENTS FOR THE PUBLIC RELATIONS COMMUNICATION MAJOR**

Students must complete POL 201 and ECO 211. These credits may be used for the School’s General Education Required Areas of Study (People and Society).

Students must complete COS 211, which can be used toward the School’s General Education Required Areas of Study (Arts and Humanities). Students also should consider a two-course basic language sequence toward this General Education requirement.

Students must complete MKT 301 plus one additional 300-level or above course (3 credits) in the School of Business Administration chosen with the prior approval of a Public Relations faculty advisor.

Students seeking a Marketing minor from the School of Business Administration must complete MKT 301 with a grade of B or higher, plus three of the following: MKT 310, MKT 320, MKT 340, and MKT 360. Students must earn a cumulative quality point average of 2.5 or higher in the four courses submitted for the minor. Consult the School of Business Administration section of this Bulletin.

Students seeking a General Business minor from the School of Business Administration must complete MKT 301, ACC 211, FIN 300 and MGT 304 with a cumulative quality point average of 2.0 or higher. Consult the School of Business Administration section of this Bulletin.

**MINOR**

The Public Relations minor requires five courses (15 credits) with a grade of C or better in each (a C- is not acceptable.) All must be taken in residence. Required courses for the minor in Public Relations: CPR 116, CPR 232, CPR 202 and/or CPR 311 (if both, only one elective will be required), CPR elective (300 level or higher), CPR elective (300 level or higher).

Elective choices must be approved by a Public Relations faculty advisor.

**DEPARTMENT HONORS**

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students should contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS in this Bulletin.

[Public Relations Course Listing](#)
The mission of the DCIE is to provide educational programs to meet the needs of non-traditional students, including adults, pre-college students, part-time students and international students.

Our primary goal is to promote the academic excellence of the University of Miami and the expertise of the faculty through outreach programs. By developing, marketing, and administering short courses, seminars, workshops, lectures, and special events, Continuing and International Education is able to provide access to the public at large as well as to degree seeking students. In addition, Continuing and International Education coordinates weekend credit courses and provides advising services for returning adult students. Continuing and International Education is an agent for University outreach in the community and serves the corporate world with professional certificates, continuing education and workforce training.

Allen Hall, on the Coral Gables Campus is the administrative headquarters for the DCIE and the location for the Intensive English Program, the Intensive Language Institute, and programs for adults returning to school and preparing for career advancement.
BACHELOR OF GENERAL STUDIES DEGREE PROGRAM

Introduction

Under the leadership of Collegiate Studies, the DCIE offers the Bachelor of General Studies (BGS) degree program, which provides a solid and rigorous, interdisciplinary academic experience for adult, part-time students. It is designed specifically for adults who have previously attended college but have not yet completed their undergraduate degrees, as well as for those who have never had the opportunity to pursue post-secondary studies. You are eligible for admission if you graduated from high school at least four years ago, have not attended the University of Miami during the past calendar year, have a minimum of 2.2 grade-point average on previous college work, and are a U.S. citizen or permanent resident.

The BGS curriculum allows an individual the flexibility to design an area of concentration to enhance professional or personal goals. The core of the BGS is its interdisciplinary colloquia. Designed to strengthen critical thinking and writing skills of the students, each course is taught by exceptional University of Miami faculty who are committed to the adult student.

Advisors offer personalized attention in career exploration and academic advising and discuss educational alternatives with potential students. Every effort is made to ensure that the process - from admission to registration - is efficient and convenient. Students may attend day, evening, or weekend classes to complete their educational goals.

To underscore its commitment to the adults in our community, the University offers a special tuition to students in the Bachelor of General Studies program which enables the adult, part-time student to pursue this degree at an affordable tuition rate.

The admission process takes into consideration that one’s grade-point average, while significant, is only one factor in determining an applicant’s qualification for acceptance. Therefore, an admissions interview with an advisor from the DCIE will be scheduled to supplement the information you provide on the BGS application form, which may be obtained by calling Collegiate Studies at (305) 284-2727 or at www.miami.edu/bgsdegree.

Requirements for Graduation

I. Candidates for the Bachelor of General Studies (BGS) degree must complete the required credit hours and achieve the quality point average specified for students in the University at large as stated in the section Academic Regulations and Procedures. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

   A. Advanced Standing and Placement (Credit Granted);
   B. Credit by Examination;
   C. Advanced Placement (by proficiency examination);

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours for that subject as a general requirement for graduation, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied towards the 120 required for graduation.
III. Credit Only
Only free electives may be taken under this option. Courses which satisfy the major, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Required Areas of Study

A. English Composition 3-6 credits
Students must take English 105 and 106 (or their equivalent) during the first year of enrollment in the School.

Foreign Languages 3-9 credits
Students must earn at least 3 credits of foreign language at the 200 course level or higher.

B. People and Society (History/Social Sciences) 15 credits
BGS degree candidates must earn 6 credits in a single two-semester History survey sequence. In addition, BGS degree candidates must earn 9 credits in courses taught by at least two of the following disciplines: African American Studies, American Studies in Social Science, Anthropology, Communication, Economics, Education and Psychological Studies, Geography, Judaic Studies, Political Science, Psychology and Sociology.

C. Arts and Humanities 21 credits
Credits must be earned in each of the following disciplines: Art History, Literature, Philosophy and Religious Studies.

In addition, BGS degree candidates must earn 9 credits in any of the following disciplines: American Studies in Humanities, Art, Art History, Communications (Motion Pictures), Dance, Theatre Arts, Musicology, English, Italian, German, Portuguese, Spanish or French Literature, Philosophy, Religion or Women’s Studies in Humanities.

D. Mathematics/Computer Information Systems 9 credits
Math 101 or an acceptable score on the math placement test is required. In addition, students must take either Math 103 (finite mathematics) or a math course approved by the advisor. Finally, a 3-credit course in computer information systems is also mandatory.

E. Natural World (Natural Sciences) 6 credits
BGS degree candidates may fulfill the Natural Sciences requirement by taking 6 credits in one or more of the following disciplines: Biology, Chemistry, Geological Sciences, Environmental Science, Marine Sciences, Physics and Physical Sciences.

V. Area of Concentration 30 Credits
Every candidate for a degree must select an area of concentration. The candidate designs an area of concentration that meets his/her professional and personal goals. The course of study is reviewed and approved by the Dean and/or Director of the program.

VI. Interdisciplinary Courses 15 Credits
BGS Interdisciplinary courses are especially designed to foster critical thinking and taught by faculty from all departments. Candidates for the BGS degree select 5 interdisciplinary courses to meet requirements for graduation (ENG 333 IS A REQUIRED COURSE)
VII. Electives  

15 credits  

Students choose elective courses in consultation with their advisor to meet the 120-credit graduation requirement.
CREDIT CERTIFICATE PROGRAMS

Not everyone needs or wants a complete degree program. Recognizing this, the DCIE - in cooperation with several other colleges and schools of the University - offers special Credit Certificate Programs.

Focusing on a single subject, these certificate programs allow students to concentrate on courses that offer the specific knowledge and skills needed for career advancement. All courses are taught by University of Miami faculty at the undergraduate level and are taken for academic credit.

Each certificate program varies in the number of required credits. While required courses are noted, students may work with an advisor in developing an individually-designed program.

Credit certificate programs are currently available in the following subject areas:

**Certificate in Accounting**
The Undergraduate Certificate in Accounting is awarded by the Division of Continuing and International Education and the Department of Accounting. It is designed for those who hold at least an undergraduate degree (preferably in business) from an accredited college or university, and whose present interest or occupation is accounting. The program requires students to take the same 24 semester hours of accounting courses required for the undergraduate major in Accounting. To sit for the Certified Public Accountant (CPA) examination in Florida, students must have completed 120 semester hours, including 24 semester hours of accounting (above the elementary level) and 24 semester hours of business courses, including a minimum of six hours of business law. There are additional educational requirements to become licensed as a Certified Public Accountant in Florida. Students may wish to consider either the Graduate Certificate in Accounting or the Graduate Certificate in Taxation (offered by the School of Business) to meet those additional education requirements.

**Certificate in Computer Information Systems**
The Certificate in Computer Information Systems program is designed to provide a broad background in business computer information systems and to develop the technical skills one needs to stay competitive in this challenging field. The program will be of particular benefit to programmers and to management information systems analysts. The certificate is awarded by the DCIE and the Department of Computer Information Systems upon the successful completion of 18 credits.

For more information, contact: Collegiate Studies, DCIE, University of Miami, P. O. Box 248005, Coral Gables, FL 33124-1610, (305) 284-2727.
OFFICE OF PROFESSIONAL ADVANCEMENT

Dedicated to providing the highest quality, competency-based, continuing professional education, the Office of Professional Advancement offers seminars, courses and certificate programs to meet the training and professional development needs of both corporations and individuals.

For more information, specific curriculum descriptions and a listing of current seminars, courses and workshops, contact the Office of Professional Advancement, DCIE, University of Miami, 111 Allen Hall, Coral Gables, Florida 33124-1610, (305) 284-5800 or email opa@miami.edu. Additional information on the web at: www.educationmiami.com.

Personal Financial Planning Certificate Program

Designed for students preparing for professional examinations and professional practice in personal financial planning.

Our program consists of providing the highest quality CFP education through Dalton Education, a leading provider of innovative education solutions in financial planning. The founders of Dalton Education have helped thousands of financial professionals earn the CFP® certification marks with their leading CFP review course, THE DALTON REVIEW®. Students can choose from an independent, self-paced, online education program or a live, instructor – led, internet delivered program.

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.educationmiami.com/pfp.

Human Resources Management Certificate Program

This certificate provides the latest in proven techniques and strategies to effectively manage organizational challenges. The curriculum covers the following topics: Strategic Management, Legal and Regulatory Issues; Employment, Planning, and Placement; Benefits and Compensations: Development and Administration; Training and Development and Employee and Labor Relations. The HR Program is recognized by the Greater Miami Society for Human Resource Management. The comprehensive curriculum works for the newcomer as well as the seasoned professional and is especially useful to small and medium-size business owners. (6 months)

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.educationmiami.com/hrm.

Alfus Patient Advocacy

This program offers a comprehensive curriculum geared to educate students in the complex field of the US healthcare system. Patient advocates strive to maintain high individual services for clients in a system that is frequently impersonal and intimidating. Classes are taught by industry leaders. The program is offered online in cohorts of 9 modules for a period of approximately 11 months. Upon completion, students are prepared to successfully enter this promising new field.

For detailed course descriptions, calendar and tuition cost, please visit our website at http://www.educationmiami.com/en/packagedetail.aspx?p=100
Paralegal Studies Certificate program

The UM Paralegal Studies program is an intense four-month course of study which certifies the successful student as a qualified professional ready to start an exciting new career as a paralegal. Classes are taught by prominent local attorneys, Judges and Magistrates. The Paralegal Program classes are offered on the weekends, weekdays or weekday evenings at the Coral Gables campus and on weekday evenings in Broward. This program is also available online in both English and Spanish. (4 months)

For more detailed course descriptions, current schedule, and prices please visit our website at [http://www.educationmiami.com/paralegal](http://www.educationmiami.com/paralegal).

Paralegal Specialist Certificate

The Paralegal Specialist Certificates provide both beginning and experienced paralegals with expansive educational and professional opportunities. The certificate programs allow paralegals to augment current skills and focus on virtually any area of the law. Choose from over 20 Paralegal Specialist Certificates and give yourself an edge in today’s competitive job market. All specialist courses are available online so students are able to enroll at any time. (6 months)

For more detailed course descriptions, current schedule, and prices please visit our website at [http://www.educationmiami.com/paralegal](http://www.educationmiami.com/paralegal).

Coaching Certificate Training Program

This Coach Certificate Training Program is designed to support you in becoming a professional coach or in using coaching skills to enhance your leadership, management, and/or communication skills. This program has been written by master coaches and aligns with the International Coach Federation (ICF) Core Coaching Competencies. The University of Miami has designed a thorough program that will allow you to make a powerful leap into using coaching skills and becoming a professional coach. The Certified Professional Coach Program is a 140 hour, eleven month program designed for those interested in a career in coaching, who also want outstanding training in order to serve clients at the highest level. Additionally, it is designed for leaders, managers, human resource professionals, teachers, or service professionals (doctors, lawyers, counselors, consultants, etc.) who want to dramatically improve their ability to communicate, motivate, inspire, and empower others.

For more detailed course descriptions, current schedule, and prices please visit our website at [http://www.educationmiami.com/coach](http://www.educationmiami.com/coach).

Residential Design Certificate Program

Taught by industry professionals, our Certificate in Residential Design program focuses on the many different aspects of the design trade. A hands-on program, students will prepare a portfolio of their work to help them to successfully enter a competitive marketplace. The course of study includes principles and elements of design, drafting, visual communication techniques, the history of styles, currently manufactured products, color theory, furniture design and construction, floor coverings, fabrics, and window treatments.
Computer Training Programs

Computer skills are essential to get a job or even to lead a productive life in the twenty-first century. The ability to use a computer is the new literacy. We offer a wide selection of classes that cater to different skill-levels and interests including our own UM certifications. Whether you are a beginner with no previous knowledge of computers, someone who wants to enhance their efficiency in the workplace, or an IT professional seeking a specific industry certification, we can offer the computer training that you need. Courses are offered on evenings and weekends.

Courses and Programs
For more detailed course descriptions, current schedule, and prices please visit our website at http://www.educationmiami.com/computer.

Office Productivity

Classes for Beginners
A great place to start! Our UM Computer Foundation course will help you develop a solid understanding of how computers work and teach you essential Internet skills. After you have mastered the fundamentals, you will be ready to explore Microsoft Windows and Word and develop the habits and learn the computer conventions which are used in all applications. This 6 hour course is designed for students with little or no computer experience. 6 hours

University of Miami Office Professional
The UM Office Professional is a certification course created by the University of Miami to establish a nationally recognized standard of business computer skills. The UM Office Professional is an intensive, hands-on computer training course which teaches, tests and certifies all the core skills for Microsoft Windows, Word, Excel, Access, PowerPoint and Outlook.

This 40-hour course is designed for people who have some basic computer experience and want to become proficient in all the popular Microsoft office applications. The UM Office Professional certificate will demonstrate to potential employers that you are proficient in all the core computer skills required in the modern work-place. This is an invaluable tool for the job seeker to establish their computer credentials. It is also invaluable for the employer seeking qualified and productive staff. A more detailed description can be found at http://www.educationmiami.com/en/packagedetail.aspx?p=9. 40 hours (5 weeks)

Students can choose individual 8-hour section or the complete 40 hour computer training program.

UM Web Designer Certificate Program:
UM Web Designer course teaches the core skills needed to become a professional web designer. Starting from scratch, students learn to pan design, create, launch, maintain, manage and update a professional website with the latest Adobe Dreamweaver. 40 hours (5 weeks)
Photoshop for Web Design:

The 24-hour (three weeks) UM Advance We Designer 1 - Photoshop for Web Designer course teaches the advance skills needed to become a professional web designer. New Adobe Photoshop will help you create powerful images with the professional standard for your website. Not only are students taught hands-on-skills, but also theory needed to design and create a successful website. 24 hours (3 weeks)

Flash for Web Design:

The 24-hour (three week) UM Advanced Web Designer 2 - Flash for Web Designer course teaches the advance skills needed to become a professional web designer. New Adobe Flash Professional will help you create and deliver rich interactive content for your website. Not only are students taught hands-on skills, but also theory needed to design and create a successful interactive Web site.

ADULT STUDENT ACCESS PROGRAM (A.S.A.P.)

Students may take up to 30 credits in an undergraduate, non-degree seeking category, which may be applied to a degree program, after all application and degree-seeking requirements are met. In order to be enrolled in this category, students submit a one-page application and no other documents or transcripts; academic achievement is evaluated after 12 credits are attempted. A 2.5 G.P.A. is required to continue in the program beyond 12 attempted credits. The application for enrollment may be found on the Web at www.miami.edu/asap.

Students may take up to 6 credits, lifetime maximum, in a graduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. Not all graduate departments participate in this program. In order to enroll in this category, students submit a one-page application and no other documents or transcripts, after securing the written permission of the participating graduate department. The application for enrollment may be found on the Web at www.miami.edu/asap.

For more information, contact: The Adult Student Access Program, DCIE, University of Miami, P.O. Box 248005, Coral Gables, FL 33124-1610, (305) 284-2727.
INTENSIVE LANGUAGE INSTITUTE

The Intensive Language Institute offers comprehensive language instruction for academic, professional, and personal purposes. The Intensive English Program, a full-time course of study for international students who wish to pursue university studies in the United States, provides instruction in English language and academic study skills. The ILI also offers certificate programs, part-time language courses and customized language programs.

Intensive English Program

The Intensive English Program is designed to prepare students to participate successfully in the academic environment. Students are given a placement test upon arrival to determine the most appropriate level of study. Courses are offered at five levels of instruction. The skills-based curriculum integrates reading and writing, listening and speaking into one complete program of study. The focus is on English language acquisition and application in an academic setting. Specialized classes vary by level; focusing on the needs of the language learners. In Levels 1-3 students concentrate on reading skills and conversation. In Levels 4 and 5, courses on selected topics allow students to use their improving English to investigate areas of interest. Satisfactory completion of the highest level meets the English language requirement for acceptance to undergraduate programs at the University.

For more information contact:

Intensive English Program

Intensive Language Programs

Communicative language classes are offered in the evenings and on weekends in Spanish, Portuguese, Italian, French, Mandarin Chinese and ESL throughout the year. These courses focus on meaningful communication in the chosen language. Specialized classes focus on Accent Reduction, Medical Spanish or Medical Haitian Creole, and/or Business Writing. A 7-day immersion-style program in Spanish is also offered. Several non-credit certificates are available: the English for Law School Studies Certificate is a 6-week summer program for international students, the Business Communication Certificate focuses on oral and written skills necessary for the workplace, and the Teaching English as a Foreign Language Certificate teaches skills needed to teach ESL or EFL abroad. The Intensive Language Institute also develops and conducts customized language courses on or off campus tailored for individuals, groups, and organizations with specialized language training needs. For further information, or to register for classes, please call us at (305) 284-4000 or visit us on the web at: www.continue.miami.edu. Email: alc.cstudies@miami.edu.
University of Miami Global Academy
www.umga.miami.edu

University of Miami Global Academy (UMGA) offers an online middle and high school college preparatory program for both full-time and part-time students. Students have the option of either taking courses and transferring them back to their local school or completing all of their courses at UMGA and graduating from the University of Miami Global Academy. In addition, UMGA offers a summer school program where students have the opportunity to complete a semester course in 3 weeks whether for credit advancement or credit recovery. Whether taking a summer course or a full year course, students are provided with the following:

- Instruction from certified, highly qualified teachers
- Academic coaching to assist with schedules and college acceptance
- Small class size
- A highly interactive learning environment that promotes engagement
- Comprehensive curriculum offering regular, honors, Advanced Placement (AP) and world language courses including French, Latin, and Mandarin Chinese
- iESOL Program to increase English language proficiency

Additional information regarding middle school, high school, and summer school can be found at www.umga.miami.edu.
SCHOOL OF EDUCATION AND HUMAN DEVELOPMENT - UNDERGRADUATE
www.education.miami.edu

INTRODUCTION

The School of Education and Human Development offers undergraduate majors in Human and Social Development (Track I: Individual and Relational Development; Track II: Community and Program Development; Track III: Human and Social Development Studies, Athletic Training, Exercise Physiology, Sport Administration, Elementary Education (grades K-6)/Exceptional Student Education Specialization with ESOL Endorsement (K-12), Secondary English with ESOL Endorsement (K-12), and Secondary Chemistry, Biology, Mathematics and Social Science (grades 6-12).

The degrees of Master of Science in Education, Specialist in Education, and Doctor of Philosophy are available in various departments within the School. These programs are under the supervision of the Dean of the Graduate School and the School of Education and Human Development Associate Dean for Graduate Studies.

VISION/MISSION

Our vision is to be a center of excellence in the study, promotion and integration of educational, psychological, and physical well-being in multicultural communities. Our mission is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community.

ACADEMIC POLICIES

Admission

Applications for incoming freshman are processed and reviewed by the Office of Admission. Application to the Bachelor of Science in Education program is requested by February 1st. Early application is encouraged.

Transfer students: The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 GPA is recommended for transfer admission.

Application deadline for transfer students is March 1st.

Student Responsibilities

Students are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with the provisions set forth in this Bulletin and written changes to their program of study. Written requests for variation from program or school requirements are reviewed by an administrative committee.

A student advising compact specifies the dual responsibilities between students and advisors in each program.
Academic Progress and Probation

The School will review each student’s record at the end of each semester. When a student’s semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with the School of Education and Human Development policies and procedures.

Students on probation are not permitted to enroll in more than 12 semester hours, shall make arrangements to meet on a monthly basis with their academic advisor, and may have a STOP placed on their future enrollment until grades are further reviewed. The following criteria will determine probationary status.

<table>
<thead>
<tr>
<th>Credits Earned</th>
<th>CGPA</th>
<th>CGPA (Exercise Physiology majors only)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 30</td>
<td>1.7</td>
<td>2.0</td>
</tr>
<tr>
<td>30-59 credits</td>
<td>2.0</td>
<td>2.5</td>
</tr>
<tr>
<td>60+ credits</td>
<td>2.3</td>
<td>2.5</td>
</tr>
</tbody>
</table>

Note: There are different retention and probation policies for Athletic Training majors. Please see the Athletic Training website or the Athletic Training Guidelines Manual for this and other important information regarding the requirements for completion of the Athletic Training major.

Note: The minimum GPA required for graduation from a Teacher Education Program is 2.5.

Subject to Dismissal

A student who remains on academic probation twice during their undergraduate studies can be designated as “Subject to Dismissal“ and will be dismissed the following semester if not removed from probationary status. It is not required to be on this status to be dismissed from the School of Education and Human Development or from the University of Miami.

Academic Dismissal

A student in the School of Education and Human Development whose CGPA or progress toward degree completion, falls below the level of the minimum standards of the University of Miami and/or the School of Education and Human Development, may be dismissed.

ACCREDITATION

Kinesiology and Sport Sciences offers the Athletic Training Program that is accredited by the Commission on Accreditation of Athletic Training Education (CAATE); the Sport Administration Program is approved by the North American Society of Sport Management. Teacher Education Programs offered by the School of Education and Human Development are approved by the Florida Department of Education. In conjunction with the Phillip and Patricia Frost School of Music, the School of Education and Human Development offers Teacher Education Programs in Music Education at the undergraduate and graduate levels. Students who successfully complete their program of studies and submit an application to the Florida Department of Education - Bureau of Educator Certification are eligible to receive a Professional Teaching Certificate.
DEGREE PROGRAMS - UNDERGRADUATE

DEPT. of EDUCATIONAL AND PSYCHOLOGICAL STUDIES
Dept. Code: EPS

MAJOR
Bachelor of Science in Education: Human and Social Development

The major in Human and Social Development (HSD) focuses on the promotion of healthy development and well-being. It prepares students to work with people in multiple contexts and settings:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements

By exploring the scholarly and practical interconnections among individual, interpersonal, social, and community approaches to change, students learn to identify barriers to well-being and to implement effective change-oriented strategies and policies. HSD coursework emphasizes theory, research, and skills. It culminates in a practicum in a setting related to students’ area of interest and prepares them for both graduate studies and careers.

Students choose between three areas of concentration (tracks).

Track I: Individual and Relational Development (Track Code: HSDI)
This track emphasizes individual, relational, and family well-being. Focusing on context and diversity in mental health and on strength-based, preventive, and empowering approaches, courses cover family studies, counseling theories and techniques, interviewing skills, and the basics of human service work. Students are well-prepared for graduate study in the helping professions and careers in health and human services.

Track II: Community and Program Development (Track Code: HSDC)
This track promotes healthy individual and community development by emphasizing how social, institutional, and community dynamics affect personal well-being. Stressing the role of non-government agencies in fostering well-being for people with diverse backgrounds, HSDC prepares students to diagnose institutional and community challenges and offer strategies for positive change. Courses include community-focused planning, needs assessment, and change strategies and nonprofit program development, implementation, and evaluation. Students are well prepared for graduate study in community psychology and public policy and careers in community organizations.

Track III: Human and Social Development Studies (Track Code: HSDS)
This is a general track which offers a menu of courses relating to individual and community development. HSDS students are free to combine classes from the Individual (HSDI) and Community (HSDC) tracks. This track meets the needs of students who seek greater flexibility in course work and are less concerned with specializing in the individual or community tracks.

HSD students must declare an approved second major or a minor either in the School of Education or through any other school or college.
The following courses are required for the Human and Social Development major:

**HSD Track I: Individual and Relational Development (HSDI)**
EPS 201 Psychosocial Change and Well-Being  
EPS 270 Lifespan Human Development  
EPS 280 Introduction to Family Studies: Dating, Coupling, Parenting  
EPS 291 Community and Character Development  
EPS 311 Group Processes and Development  
EPS 321 Understanding Human Service Organizations  
EPS 351 Introduction to Statistics and Research Design  
EPS 361 Community Psychology and Development  
EPS 420 Introduction to Counseling and Psychotherapy  
EPS 422 Foundations of Human Service Work and Program Administration  
EPS 470 Listening and Helping Skills  
EPS 471 Human and Social Development Practicum  
EPS 481 Human and Social Development Practicum Seminar

**HSD Track II: Community and Program Development (HSDC)**
EPS 201 Psychosocial Change and Well-Being  
EPS 270 Lifespan Human Development  
EPS 291 Community and Character Development  
MGT 304 Organizational Behavior  
EPS 311 Group Processes and Development  
EPS 321 Understanding Human Service Organizations  
EPS 351 Introduction to Statistics and Research Design  
EPS 361 Community Psychology and Development  
EPS 422 Foundations of Human Service Work and Program Administration  
EPS 452 Applied Research and Program Evaluation  
EPS 462 Community Consultation and Leadership  
EPS 471 Human and Social Development Practicum  
EPS 481 Human and Social Development Practicum Seminar

**HSD Track III: Human and Social Development Studies**
EPS 201 Psychosocial Change and Well-Being  
EPS 270 Lifespan Human Development  
EPS 291 Community and Character Development  
EPS 311 Group Processes and Development  
EPS 321 Understanding Human Service Organizations  
EPS 351 Introduction to Statistics and Research Design  
EPS 361 Community Psychology and Development  
EPS 422 Foundations of Human Service Work and Program Administration  
EPS 471 Human and Social Development Practicum  
EPS 481 Human and Social Development Practicum Seminar
Three courses from the following list:

EPS 280 Introduction to Family Studies: Dating, Coupling, Parenting
EPS 420 Introduction to Counseling and Psychotherapy
EPS 470 Listening and Helping Skills
MGT 304 Organizational Behavior
EPS 452 Applied Research and Program Evaluation
EPS 462 Community Consultation and Leadership

MINOR IN HUMAN AND SOCIAL DEVELOPMENT – Code for Minor: HSDM

- The requirements of the minor are 15 credits with a grade of “C” or better.
- Nine of these 15 credits must have been completed in the Department of Educational and Psychological Studies (EPS); with prior approval, three of these nine may be taken through the UM Study Abroad Program.
- EPS 201—Psychosocial Change and Well Being is required
- Two courses must be upper division courses (at or above the 300 level)
- The undergraduate coursework in Human and Social Development is open to all qualified University of Miami students.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student’s degree granting college or school.

REQUIREMENTS FOR GRADUATION

BACHELOR OF SCIENCE IN EDUCATION

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied toward the 120 credits required for graduation.

III. Credit Only. Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of
the University or any course for which a “C” or better is required may not be taken for credit only.

IV. Transferred credit may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education and Human Development.

V. Required Areas of Study

A. English Composition 3 – 6 credits

Students fulfill this requirement by satisfactorily completing English 105 and English 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the English 105/106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit in, English 105. Courses satisfying the English Composition requirement may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

B. Mathematics

B.S.Ed. degree candidates in the Department of Educational and Psychological Studies are required to take EPS 351 – Introduction to Statistics and Research Design. This course fulfills a Math requirement for the HSD major. Prior to taking EPS 351, students must complete MTH 101 or be exempt from MTH 101 based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics.

C. Foreign Languages (not applicable)

Areas of Knowledge

D. People and Society

B.S.Ed. Degree candidates must earn 9 credits in the Social Sciences.

E. Arts and Humanities

B.S.Ed. degree candidates must earn 12 credits in the areas of 1) Fine Arts and 2) Humanities with a minimum of three credits in each area. All Humanities credits must be earned in courses from the areas of Literature or Philosophy/Religion.

F. Natural World

B.S.Ed. degree candidates may fulfill the Natural Sciences requirement by taking 6 credits in the following disciplines: Biology, Chemistry, Exercise Physiology, Geological Sciences, Marine Sciences, Physics, and Physical Sciences.

Note: No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement.
VI. Writing

Every student must complete five writing-oriented (W) courses beyond ENG 105 and 106. Students must take one approved writing course section per academic year for a minimum of five writing intensive course sections, or their equivalents. A student is required to write at least 4000 words in each W course. Writing assignments will be assessed for both content and style. A W course listed in section VII (Required Areas of Study) may be used to satisfy both the writing and Required Areas of Study criteria. Foreign language courses that meet the criteria above may be used to satisfy the writing requirement. Transfer students must satisfy at least 3 courses of the writing requirement at the University of Miami.

VII. Major in Human and Social Development

- Every candidate for the B.S.Ed. degree in the Department of Educational and Psychological Studies must choose a major in Human and Social Development.
- Students choose between three areas of concentration: Track I – Individual and Relational Development (HSDI); Track II – Community and Program Development (HSDC); Track III – Human and Social Development Studies (HSDS). To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.
- HSD majors must maintain a minimum overall grade point average of 2.0 with a grade of “C” or better in all courses in the major.
- HSD students must declare an approved second major or a minor in the School of Education and Human Development or through any other UM school or college.

VIII. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least six credits must be at the 300 level or above.

IX. Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

For further information, address all inquiries to: Associate Dean; School of Education and Human Development; P. O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3415.

See the Department of Educational and Psychological Studies for list of courses:

MAJORS

Bachelor of Science in Education, Athletic Training

The Athletic Training program at the University of Miami is an undergraduate education program that has been accredited by CAATE. The program is designed to provide a structured classroom and clinical experience to prepare students to become eligible to sit for the Board of Certification exam; Didactic courses are sequenced to maximize student learning. Please see the Athletic Training website or the Athletic Training Guidelines Manual for the course sequence form and other important information regarding the requirements for completion of the Athletic Training major.

- A degree in Athletic Training requires a major GPA of 3.0 or higher and an overall GPA of 2.3 or higher.
- Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.

The Undergraduate program at the University of Miami is designed for students to acquire a sound knowledge base in the sciences followed by the application of that knowledge base to human movement, exercise and sports performance. Clinical laboratory experiences supplement applied scientific theory in a rigorous academic setting.

Students may pursue a pre-med track concurrent with the Exercise Physiology major and should inform their advisor if selecting this track.

A degree in Exercise Physiology requires a major GPA of 2.5 or higher for below 30 credit hours and a GPA of 2.75 for 30 and above credit hours.

Students transferring from another college or university must have a CGPA of 2.75 or above to be considered for admission to the major.

A grade of C or better is required for each course applied toward the major. Students are allowed to retake a course one time.

All 100 level courses and KIN 212, 202, and 232 are open to non-majors. All other courses are open to majors and minors only.

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.

Writing Credit Courses – Exercise Physiology

Courses will be available for writing credit for Exercise Physiology pending individual request by students provided the following stipulations are met:

1. Permission of instructor
2. The course is under the direction of a full-time faculty member in Exercise Physiology
3. The student completes a writing credit agreement form and submits this form to the instructor within the first three weeks of a semester
4. The student completes assigned writing credit work by the end of the semester.
5. Assignments completed for writing credit are in addition to work normally required in the course
6. Students may be required to submit written work to the University of Miami Writing Center for review

University of Miami Honors Program – Exercise Physiology

The courses below will be available for honors credit for Exercise Physiology students provided the following stipulations are met:

1. The course is under the direction of a full-time faculty member in Exercise Physiology
2. The student completes an honors project permission form and submits this form to the instructor within the first three weeks of the semester.
3. The student completes assigned writing credit work by the end of the semester.
4. Assignments completed for honors credit are in addition to the University of Miami Writing Center for review.

The University of Miami currently has a 5-year program for undergraduate Exercise Physiology majors who want to obtain a Master’s Degree in Exercise Physiology. This can be done by taking one additional year of graduate courses. These students must take two graduate courses in Exercise Physiology in their senior undergraduate year in order to get an M.S.Ed. degree in Exercise Physiology in one extra year. Please check our website www.education.miami.edu for additional information on the “5-year program”. To be eligible you must apply for entrance into the 5-year program no later than the Fall of your junior year.
Bachelor of Science in Education, Sport Administration

- The Sport Administration major at the University of Miami is an undergraduate education program designed to prepare students for careers in the sport industry. The program is committed to the professional development of students so that competencies and skills relevant to the Sport Industry can be acquired over time. Specific competencies in organization, ethics, marketing, leadership and legal issues are emphasized.
- Field experience and internships are an essential component of the major. The KIN department is actively engaged in placing students in visible sports settings and appropriate sport environments so that students acquire relevant competencies and gain pragmatic hands-on experiences that are necessary for success in today’s sport industry.
- The Sport Administration major is a 39-credit major leading to a Bachelor of Science in Education.
- A Business Administration minor is suggested to complement the Sport Administration major and provide a well-rounded comprehensive background to the Sport Administration field. A minor in any field is required.
- Students pursuing a degree in Sport Administration must receive a grade of B- or higher in KIN 201 in order to continue with the major.
- **Students will be allowed to retake a course once.**
- A degree in Sport Administration requires a major GPA of 2.5 or higher and an overall GPA of 2.3 or higher.
- KIN 306 and 308 may not be taken in the same semester and must be taken during junior year.
- A grade of C or better is required for each course applied toward the major with the exception of KIN 201 which requires a grade of a B- or higher in the course as previously specified.

**MINORS**

A minor in any of the five areas below consists of 14-15 credits:
A minor in **Exercise Physiology** consists of KIN 155, KIN 202, KIN 232, KIN 233 and KIN 365.

A minor in **Sports Medicine** consists of KIN 155, KIN 184, KIN 230, KIN 234, KIN 235 and KIN 301.

A minor in **Sport Administration** consists of KIN 201, plus four (4) courses taken from the following: KIN 206, KIN 212, KIN 302, KIN 306 or KIN 308, KIN 401, KIN 403, KIN 405, KIN 473 or KIN 490.

- A grade of C or better is required for each course applied toward the minor; the overall quality point average for the minor must be 2.5 or above.
- The undergraduate coursework in Exercise Physiology, Sports Medicine, and Sport Administration are open to all qualified University of Miami students. A student can minor in either exercise physiology or sports medicine. Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student’s degree granting college or school.

Seniors are required to participate in the General Education Assessment as part of the SACS review process.

**REQUIREMENTS FOR GRADUATION**

**BACHELOR OF SCIENCE IN EDUCATION**

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

   A. Advanced Standing and Placement (Credit Granted);
   B. Credit by Examination;
   C. Advanced Placement (by proficiency examination);
   D. Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied toward the 120 credits required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit may not count toward the completion of a major without the written
approval of the Associate Dean of the School of Education and Human Development.

V. Required Areas of Study.

A. **English Composition.**
   Students must take English 105 and 106 (or their equivalent) during the first year of enrollment in the School. Admission to English 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

B. **Mathematics**
   B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

C. **Foreign Languages (applicable to Sport Administration majors only)**
   Students must earn at least 3 credits of a foreign language at the 200 course level or higher. Special 200-level courses are required of native speakers who choose to fulfill the language requirement.

   **Areas of Knowledge**

D. **People and Society**
   B.S.Ed. degree candidates must earn 9 credits in the History/Social Sciences. *Three of these credits must be earned in ESS 212 Elements of Sport Psychology.*

E. **Arts and Humanities**
   B.S.Ed. degree candidates must earn 12 credits, which must be earned in the areas of 1) Fine Arts; 2) Humanities with a minimum of 3 credits in each area. The literature requirement may not be fulfilled by a course that has been used to fulfill the foreign language requirement. All Humanities credits must be earned in courses from among the following:
   1. Fine Arts: *Note: COS 211 Public Speaking is required of all Sport Administration majors.
   2. Literature
   3. Philosophy/Religion

F. **Natural World**
   B.S.Ed. degree candidates may fulfill the Natural Sciences requirement by taking 6-12 credits (credits required depends on the program in which the student is enrolled) in the following disciplines: Biology, Chemistry, Geological Sciences, Marine Sciences, Physics, Physical Sciences, and designated ESS classes.

   **Note:** No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement.

VI. Writing

Every student must complete five writing-oriented (W) courses beyond ENG 105 and 106. Students must take one approved writing course section per academic year for a minimum of five writing intensive course sections, or their equivalents. A student is required to write
at least 4000 words in each W course. Writing assignments will be assessed for both content and style. A W course listed in section V (Required Areas of Study) may be used to satisfy both the writing and Required Areas of Study criteria. Foreign language courses that meet the criteria above may be used to satisfy the writing requirement. Transfer students must satisfy at least 3 courses of the writing requirement at the University of Miami.

VII. Majors

Every candidate for the B.S.Ed. degree must choose a major in Athletic Training, Sport Administration or Exercise Physiology. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.

The choice of majors should be made no later than the beginning of the junior year and must be approved by the major department. Any student making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

VIII. Minors

B.S.Ed. candidates in Sport Administration and Exercise Physiology are required to declare a minor. Sport Administration students require department approval before declaring a minor. Exercise Physiology students may choose not to declare a minor if they’re following the pre-med track, pre-physical therapy, pre-physician’s assistant or pre-chiropractic track.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least six credits must be at the 300 level or above.

For Graduate Coursework, Graduate Degree Programs Offered by The School of Education and Human Development, see the Bulletin of the Graduate School.

For further information, address all inquiries to: Dean; School of Education and Human Development; P. O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3711

Exercise and Sport Sciences Course Listing
DEPT. of TEACHING AND LEARNING
Dept. Code: TAL

The Department of Teaching and Learning offers a Bachelor of Science in Education Degree in Elementary Education (grades K-6)/Exceptional Student Education Specialization (grades K-12) with ESOL (English for Speakers of Other Languages) endorsement.

In conjunction with the College of Arts and Sciences, the Department also offers majors in Secondary Education in English with ESOL endorsement, in Chemistry, in Biology, in Mathematics, and in Social Science (grades 6-12). Students in Secondary Education programs are required to fulfill the general education requirements for the College of Arts and Sciences.

The Department offers two minors: (1) a traditional 15-credit minor, and (2) a 17-18-credit minor that fulfills the State of Florida “Professional Training Option” (PTO) for teaching in-secondary-school English, secondary school mathematics, secondary-school science, secondary-school social studies, or in other areas of certification. In order to obtain teaching credentials from the State of Florida, a PTO completer must teach in an accredited school in Florida for one academic year.

MAJORS

Elementary Education/ESE Specialization with ESOL Endorsement

The Department of Teaching and Learning offers a major in Elementary Education that leads to certification in Elementary Education (grades K-6)/ESE Specialization with ESOL endorsement. The requirements for Elementary Education are a major in Elementary Education/ESE/ESOL and a minor outside of the Department of Teaching and Learning. Students must earn a grade of “C” or better in all courses in their major. The following Education courses are required for the major:

TAL 101 Social and Technological Foundations of Education OR
TAL 103 Psychological Foundations of Education
TAL 305 Classroom and Behavior Management
TAL 308 Language Development for Linguistically and Culturally Diverse Students
TAL 322 Mathematics Instruction in the Elementary School
TAL 323 Science and Social Studies Instruction in the Elementary School
TAL 420 Introduction to Literacy Assessment and Instruction in the Elementary School
TAL 421 Language Arts in the Elementary School
TAL 426 Practicum in Reading
TAL 428 ESOL Curriculum, Methods, & Assessment
TAL 470 Student Teaching in the Elementary School (Semester-Long)
TAL 480 Seminar on Teaching

Please note: Students may not register for any classes above TAL 323 without admission to Teacher Candidacy.

Please note: Students are strongly recommended to register for TAL 203: Children’s Literature and TAL 324: Education and the Arts. Both courses meet general education requirements in the Arts and Humanities.
Area of Specialization (Required)

TAL 330 Foundations of Exceptional Student Education
TAL 332 Assessment of Exceptional Students
TAL 432 Inclusive Models of Teaching
TAL 434 Specialized Instructional Strategies/Transition

Secondary Education

The Department of Teaching and Learning offers a major in Secondary education (grades 6-12). Certification is offered in the general areas of: English/ESOL Endorsement; Mathematics; Sciences (Biology, Chemistry); Social Science (Economics, Geography, History, International Studies, or Political Science). Each student should complete a major from the appropriate department in the College of Arts and Sciences and a second major in the Department of Teaching and Learning.

The requirements for a major leading to secondary certification include

(a) a major in the appropriate field of Arts and Sciences (Biology, Chemistry, Economics, English, Geography, International Studies, History, Math or Political Science only)

and

(b) the following education courses:

TAL 101 Social and Technological Foundations of Education
TAL 103 Psychological Foundations of Education
TAL 304 Content Area Reading and Learning Strategies
TAL 305 Classroom and Behavior Management
***TAL 308 Language Development for Linguistically and Culturally Diverse Students (for Secondary English majors only)
TAL 330 Foundations of Exceptional Student Education
***TAL 428 ESOL Curriculum Methods and Assessment (for Secondary English majors only)
TAL 434 Specialized Instructional Strategies/Transition
TAL 506 Issues and Strategies for ESOL (this course is not appropriate for English majors)
TAL 540 Instruction and Assessment in the Secondary School
TAL 572 Student Teaching in the Secondary School
TAL 580 Seminar on Teaching

One course selected from the following list as appropriate for the subject area

TAL 541 Instruction in Secondary English
TAL 542 Instruction in Secondary Mathematics
TAL 543 Instruction in Secondary Science
TAL 544 Instruction in Secondary Social Studies
TAL 428 ESOL Curriculum Methods and Assessment

Please note: Students may not register for classes above TAL 304 without admission to Teacher Candidacy.
MINORS

Education Minor (not for certification)

The requirements for a minor in education consist of 15 credits passed with a “C” or higher, with an overall GPA of 2.5 in courses selected from the list of acceptable TAL departmental courses. A minimum of six (6) credits must be numbered 300 or higher. This minor does not lead to teaching credentials.

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring in a teachable area in order to participate in the program.

The PTO minor consists of 17-18 credits passed with a “C” or higher with an overall gpa of 2.5 or higher. Upon completion of the program courses, participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a 3-year Temporary Teaching Certificate in the State of Florida. There is a one year teaching requirement in a Florida public school in order to apply for a Professional Teaching Certificate.

The required courses for the PTO minor are:

TAL 101 Social and Technological Foundations of Education
TAL 103 Psychological Foundations of Education
TAL 304 Content Area Reading and Learning Strategies
TAL 305 Classroom and Behavior Management
TAL 540 Instruction and Assessment in the Secondary School

One course selected from the following list as appropriate for the subject area and approved by the advisor:
TAL 506 Issues and Strategies for ESOL
TAL 524 Education and the Arts
TAL 541 Instruction in Secondary English
TAL 542 Instruction in Secondary Mathematics
TAL 543 Instruction in Secondary Science
TAL 544 Instruction in Secondary Social Studies

PROFESSIONAL DEVELOPMENT SCHOOLS

Bel-Aire Elementary, Henry S. West Laboratory Elementary, Sunset Elementary, Ponce de Leon Middle School and Booker T. Washington Senior High School are operated by Miami-Dade County Public Schools. These schools provide the most up-to-date teaching environments, both in terms of design and curriculum, work in partnership with the University of Miami. Students are welcomed at these facilities for field experiences and student teaching, and both students and faculty have the opportunity to contribute to the high quality functioning of these professional development schools.
TEACHER Preparation PROGRAMS

Teacher Preparation Programs/majors in Elementary Education and Secondary Education that lead to a professional certification and applicable endorsements are approved by the Florida Department of Education (FLDOE). Please be advised that the State may implement new requirements for certification. These requirements will be mandatory with or without notice in this bulletin. The student is responsible for securing the application for certification and submitting the necessary documents and fees to the Florida Department of Education to obtain certification and endorsement. The DOE Certification Ombudsman in the School of Education and Human Development is available to assist with certification and re-certification matters.

ACADEMIC POLICIES

ADMISSION

SELECTION FOR THE TEACHING PROFESSION

The faculty of the School of Education and Human Development conceives its ultimate obligation to be to the children, adolescents, and adults who will be taught by teachers who have completed teacher preparation programs at the University. The quality of students admitted into the teacher education curriculum is as important as the skills, content, and concepts to be learned.

Most courses in the teacher education program require school site-based field experiences, culminating in a full-time 15-week internship. School districts require a criminal background check for field placement students and interns. Fingerprinting and FBI background check procedures are at the applicant’s expense. Students with felony arrests may wish to consider these requirements carefully and, if necessary, seek advice from an advisor in the School before applying for admission to the program. Students without a valid social security number will not be eligible for placement in the school district. The Director of Clinical Supervision and Internship Placement will assist students through these requirements.

All students who wish to be considered for admission and/or retention in curricula leading to Florida Teacher Certification will be formally screened at certain points in their program of study with respect to the following criteria:

1. Admission to Teacher Candidacy (see requirements below).
2. Acceptable grade point averages (C or better for courses in the major).
3. Acceptable evaluations by University of Miami faculty.
4. Evaluations by clinical faculty at various field experience sites.
5. Satisfactory progress toward the completion of the Florida Educators Accomplished Practices requirement.

Students who receive a grade below “C” in their Student Teaching semester will not be recommended for teacher certification.

Note: The Associate Dean of the School of Education and Human Development must approve appeals to the above policies.
REQUIREMENTS FOR ADMISSION TO TEACHER CANDIDACY

2. Completion of 45 semester hours. In addition, transfer students must have a minimum of 9 semester hours of acceptable credit earned at the University of Miami.
3. A 2.5 GPA in education core courses. No education classes lower than “C”.
4. A 2.5 GPA in the content area teaching major (for secondary education majors).
5. Completion of the Course Advisement Plan (CAP).
6. Completion of at least one Field Experience requirement.
7. Further enrollment in teacher education course work offered by the School of Education and Human Development is contingent upon the student meeting requirements 1-6 above.
8. All students must successfully complete M-DCPS fingerprinting process. Forms are available in the Office of Undergraduate Academic Services.

NOTE: Appeals to the policies stated 1-6 above must be directed to the Associate Dean of the School of Education and Human Development.

REQUIREMENTS FOR ADMISSION TO STUDENT TEACHING

Students submit a formal application to the Office of Teacher Preparation Programs and Accreditation for admission to Student Teaching. Application materials are available and are to be completed by students no later than October 15 (Fall semester) or March 15 (Spring semester).

The following requirements must be met:

1. Admission to a Teacher Preparation Program (Teacher Candidacy).
2. Completion of application for admission to Student Teaching, which includes an electronic submission to the Office of Teacher Preparation Programs and Accreditation.
3. Approval of the Associate Dean for Undergraduate Studies, the TAL Department Chair, and the Director of Accreditation.
4. Recommendations from two members of the faculty familiar with the student’s academic proficiency. One of these must be from a faculty member in the School of Education and Human Development.
5. Earned a minimum of 90 credit hours.
6. Submission of two FEAPs via Live Text to the Director of Accreditation.
7. All secondary majors must have completed approximately two-thirds of the courses in the teaching major and received departmental approval. Elementary majors must have completed TAL 308, 320, 322, 323, 330, 332, 420, 421, 432, 434, 423, 426, 428, and received departmental approval.
8. Earned a minimum of 2.5 grade point average in core courses offered by the School of Education and Human Development.
9. A grade of “C” or better is required of each course applied to the major.
10. Earned a minimum of a 2.5 grade point average overall.
11. Successfully completed pre-internship field experiences.
12. Demonstrate satisfactory progress towards the completion of the Florida Educators Accomplished Practices requirement.
13. Passed the Florida General Knowledge Test.
14. Taken the Professional Education Test and the Subject Area Exam. NOTE: A MAXIMUM OF 12 CREDITS MAY BE TAKEN DURING THE STUDENT TEACHING SEMESTER. No outside job may be held or additional classes taken during the Associate Teaching semester. NOTE: The Associate Dean of the School of Education and Human Development must approve appeals to the above policies.
REQUIREMENTS FOR GRADUATION
BACHELOR OF SCIENCE IN EDUCATION

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

A. Advanced Standing and Placement (Credit Granted);
B. Credit by Examination;
C. Advanced Placement (by proficiency examination);
D. Statement of Foreign Language Requirements;

II. Students must pass the Professional Education, General Knowledge and Subject Area tests of the Florida Teacher Certification Examination (FTCE).

III. Students must complete the Florida Educator Accomplished Practices (FEAPs) and the P-12 Student Impact requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints: Students enrolled in all teacher-education programs will submit complete portfolios at (1) application to student teaching and (2) at the end of TAL 480/TAL 580. In addition, students enrolled in:

• Elementary education will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 421 and TAL 426;
• Secondary education will submit a portfolio artifact through LiveText during or (at the latest) upon completion of TAL 540; and,
• Music education will submit a portfolio artifact through LiveText during or (at the latest) upon completion of TAL 506.

IV. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credits required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for English 105, but these credits may not be applied toward the 120 credits required for graduation.

V. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

VI. Transferred credit may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education and Human Development.
VII. Required Areas of Study

A. English Composition 3 – 6 credits

Students fulfill this requirement by satisfactorily completing English 105 and English 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the English 105/106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit in, ENG 105.

Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit in, English 105. Courses satisfying the English Composition requirement may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

B. Mathematics

B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

C. Foreign Languages (not applicable)

Areas of Knowledge

D. People and Society

B.S.Ed. Degree candidates must earn 9 credits in the Social Sciences.

E. Arts and Humanities

B.S.Ed. degree candidates must earn 12 credits, which must be earned in the areas of 1) Fine Arts and 2) Humanities with a minimum of 3 credits in each area. All Humanities credits must be earned in courses from the areas of Literature or Philosophy/Religion.

Note: TAL 203: Children’s Literature will fulfill a Literature requirement. TAL 324: Education and the Arts will fulfill a Fine Arts requirement.

F. Natural World

B.S.Ed. degree candidates may fulfill the Natural Sciences requirement by taking 6 credits (credits required depends on the program the student is enrolled) in the following disciplines: Biology, Chemistry, Geological Sciences, Marine Sciences, Physics, and Physical Sciences.

Note: No more than six credit hours may be taken in any one department to satisfy the areas of knowledge requirement.

VIII. Writing

Every student must complete five writing-oriented (W) courses beyond ENG 105 and 106. Students must take one approved writing course section per academic year for a minimum of five writing intensive course sections, or their equivalents. A student is required to write
at least 4000 words in each W course. Writing assignments will be assessed for both content and style. A W course listed in section V (Required Areas of Study) may be used to satisfy both the writing and Required Areas of Study criteria. Foreign language courses that meet the criteria above may be used to satisfy the writing requirement. Transfer students must satisfy at least 3 courses of the writing requirement at the University of Miami.

IX. Majors

Every candidate for the B.S.Ed. degree in the Department of Teaching and Learning must choose a major in Elementary Education/ESOL endorsement with an Exceptional Student Education area of specialization.

X. Minors

Every candidate for a 17-18-credit minor that fulfills the State of Florida’s Professional Training Option (PTO) must select, at the point of application to candidacy, a minor area of study: Secondary English, Secondary Mathematics, Secondary Science, or Secondary Social Studies, Exceptional Student Education or other areas of recognized certification.

XI. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least six credits must be at the 300 level or above.

Note: Common prerequisites and total length for state-approved teacher education programs are subject to revision based on legislative and State of Florida Department of Education rule changes.

XII. Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

For Graduate Coursework and Graduate Degree Programs Offered by The School of Education and Human Development, see the Bulletin of the Graduate School.

For further information, address all inquiries to: Dean; School of Education and Human Development; P. O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3711

TEACHER PREPARATION PROGRAM

One of the roles of the School of Education and Human Development is to serve as the professional school to conduct and coordinate programs for the preparation of teachers and other educational personnel at the University of Miami. Membership is held in the American Association of Colleges for Teacher Education, the National Association of State Directors of Teacher Education & Certification and in the Florida Association of Colleges for Teacher Educators. Teacher Preparation Programs (TPP) are accredited by the Florida Department of Education for the preparation of elementary teachers, secondary teachers, music teachers and other school service personnel.

LICENSURE/CERTIFICATION INFORMATION

Only students who have completed all requirements for any State approved degree or certificate program will have their transcripts stamped as meeting State approved
requirements for certification as well as appropriate endorsements. Students must meet requirements of the School of Education and Human Development as well as the college or school issuing the second major. Evidence of successful completion of all twelve Florida Educator Accomplished Practices is required to receive the FLDOE stamp on the graduate’s final transcript. Students entering the program on or after Fall 2012 will be required to evidence successful completion of all six Florida Educator Accomplished Practices. Transcript stamp is contingent upon the student taking at least half of the coursework in teacher education at the University of Miami, including the Associate Teaching component. At least half of the coursework in the students teaching content area(s) must be taken at the University of Miami in the School of Education and Human Development, School of Music, or other UM schools or colleges as determined by the program in which the student is enrolled.

For Graduate Degree Programs offered by the School of Education and Human Development, see the Bulletin of the Graduate School.

For further information, address all inquiries to: Dean; School of Education and Human Development; P.O. Box 248065; University of Miami; Coral Gables, Florida 33124; Telephone: (305) 284-3711

Teaching and Learning Course Listing
MISSION

The College of Engineering is committed to educating tomorrow’s technology leaders for career success.

The objective of the College of Engineering is to serve society by offering high quality educational programs in the professional areas that it covers, and by performing research and community service, with high professional standards. The College is dedicated to educating engineers to deal with the major issues of society over the next generation - enhancing competitiveness, advancing health care, coming into harmony with the environment, utilizing technology for humankind's benefit, and supporting a sophisticated infrastructure. The goal of the faculty is to prepare students to be employed effectively in manufacturing, consulting, construction, information technology, service industries, and those related to the medical industry and health care, in roles involving planning, design and implementation at all levels of decision making. Students are broadly prepared in technical, leadership, and management skills. Student development accrues both inside and outside the classroom, with input from faculty, employers, alumni, and other students. They are made acutely aware of environmental and international perspectives. Professional competence in the traditional sense is complemented by a broad capability to function in society. The College places great emphasis on providing students with a learning experience which will enable them to develop productive careers while creating engineering solutions to problems of our society. Learning is centered around real life experiences, which involve an understanding of science, mathematics, social values, and aesthetics, to produce economical solutions to physical problems which society encounters. Protection and enhancement of the environment is stressed at all levels, and emphasis is placed on the creative application of knowledge which will improve the quality of life.

DEPARTMENT AND PROGRAMS

The College of Engineering has five departments - Biomedical Engineering, Civil, Architectural, and Environmental Engineering, Electrical and Computer Engineering, Industrial Engineering, and Mechanical and Aerospace Engineering - offering curricula leading to Bachelor of Science degrees in the following fields: Aerospace Engineering, Architectural Engineering; Biomedical Engineering; Civil Engineering; Computer Engineering; Electrical Engineering; Engineering Science; Environmental Engineering; Industrial Engineering; and Mechanical Engineering.

Interdisciplinary areas of study, areas of specialization within departments, and study in two entirely different areas are available through options, concentrations and dual degree programs.
ACCREDITATION

The programs in Aerospace Engineering, Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. The program in Engineering Science is not accredited.

The College offers graduate programs leading to degrees both in the traditional and interdisciplinary areas of study. Programs leading to the M.S. degree may include specialization in the following areas of study: Architectural Engineering, Biomedical Engineering, Civil Engineering, Electrical and Computer Engineering, Engineering Management, Environmental Engineering, Industrial Engineering, Mechanical Engineering, Medical Informatics, Structural Engineering, Transportation Engineering, and Thermal and Fluid Sciences. A joint M.S.I.E./M.B.A. program and a M.S. program in Management of Technology are offered in conjunction with the School of Business Administration, a M.S. in Environmental Health and Safety in conjunction with the School of Medicine and a M.S. in Occupational Health and Safety in conjunction with the School of Medicine.

Combined BS/MS Program

The College offers a five-year Bachelor of Science and Master of Science BS/MS degree program in Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering. This program is specifically designed for those students who want to pursue their graduate study as they are completing their undergraduate study. The special conditions and processes for the five-year BS/MS Program are as follows:

Requirements:

You must be an undergraduate student in the College of Engineering (CoE). A master’s degree is considered the first professional degree in engineering. The Admission Committee will carefully review academic credentials for admission into our M.S. program. Students should discuss the program and possibility of entering with an academic advisor. Completed applications are due prior to the beginning of the final exams in your junior year.

Application Process:

Get the application form (It is different for US students and International students) from the CoE Office of Research and Graduate Studies, fill it out and then return it to the same office. The application fee is waived for currently enrolled students in the CoE.

Take the GRE Examination before the end of your senior year and attain a combined score of more than 1000 on the Verbal and Quantitative portions.

Financial Implications:

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree. For further information contact the CoE office of Research and Graduate Studies.
Once admitted into BS-MS program:

In your senior year when you have a fulltime undergraduate status, you may take a maximum of twelve (12) graduate credits (a maximum of six (6) credits per semester). In order to register for these classes, you must complete and submit the UM Graduate School "Application for Undergraduate to Take Graduate Course" special form.

During your last one or two semesters, when you are taking graduate course work only, register as a graduate student.

A student wishing to withdraw from the BS/MS Program without the MS degree must complete all the requirements for the BS degree.

To qualify for the MS degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA in the credits applied toward the MS degree.

The student is awarded both the BS and MS degrees at the end of the fifth year when all degree requirements are satisfied.

The Doctor of Philosophy Degree is currently offered in the area of Biomedical Engineering, Civil Engineering, Electrical and Computer Engineering, Ergonomics, Industrial Engineering, and Mechanical Engineering. The Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

The Bulletin of the Graduate School presents more detailed information on these graduate programs.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Annex is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

ENGINEERING LABORATORIES
The College of Engineering maintains a variety of well-equipped laboratories adequate for undergraduate instruction and providing for graduate and sponsored research.

COMPUTER LABORATORIES
Clarke Computational Laboratory
Computer Graphics Laboratory

BIOMEDICAL ENGINEERING LABORATORIES
Biomedical Design and Instrumentation Laboratory
Biomaterials/Circulatory Assist Device Laboratory
Biomedical Atomic Force Microscopy Laboratory
Biomedical Optics Laboratory
Diabetes Tissue Engineering Laboratory
Joint Bioengineering and Endourology Laboratory
Measurements Laboratory
Medical Imaging Laboratory
Neuroprosthetics Research Group
Neurosensorial Engineering Laboratory
Stem Cell and Mechanobiology Laboratory
Tissue Biomechanics Laboratory
Tissue Engineering Laboratory

CIVIL, ARCHITECTURAL AND ENVIRONMENTAL ENGINEERING LABORATORIES
Geotechnical Engineering Laboratory
Structural Laboratories
Environmental Engineering Laboratory
Architectural Engineering Laboratory

ELECTRICAL AND COMPUTER ENGINEERING LABORATORIES
Electronics Laboratory
Wireless Communications Laboratory
Digital Signal Processing Laboratory
Electrical Machinery Laboratory
Digital Design Laboratory
Microprocessor Laboratory
Photonics and Micro-Devices Laboratory
Distributed Decision Environments Laboratory
Underwater Imaging Laboratory
Networks Laboratory
Embedded Systems Laboratory
Computer Vision and Image Processing Laboratory
Information Technology Laboratory
Multimedia Laboratory
Digital Audio and Speech Processing Laboratory
Optics and Fiber Communications Laboratory
ECE Computer Laboratory
Nanophotonics and Devices Laboratory
MEMS and VLSI Laboratory

INDUSTRIAL ENGINEERING LABORATORIES
Computer Integrated Manufacturing Laboratory
Industrial Hygiene Laboratory
Biomechanics and Gait Laboratory
Human Factors and Aging Research Laboratory
Productivity Research Laboratory
Work Design Laboratory
Work Physiology Laboratory
Systems and Operations Research Laboratory
Industrial Ventilation Laboratory
Robotics Laboratory

MECHANICAL AND AEROSPACE ENGINEERING LABORATORIES
Aerospace Materials Simulation Laboratory
Aerodynamics and Computational Fluid Dynamics Laboratory
Design and Manufacturing Laboratory
Fuel Cells Laboratory
Thermo-Fluid Mechanics Laboratory
Integrated Nano-Bio-Systems Laboratory
Admission to the College of Engineering is covered under the section on Admission to the University in the General Information section of this Bulletin. Algebra, trigonometry, analytic geometry, chemistry, computer literacy, and physics are high school subjects that are appropriate for students planning on entering the College.

The academic work of each transfer student will be evaluated on an individual basis, and the student will be enrolled in the College at an appropriate level.

Requirements for Graduation

The College believes that emphasis should be placed on the student’s ultimate level of attainment in selected subject areas. For those students whose preparation is advanced beyond that of the average secondary school graduate, the University provides proficiency examinations and schedules the students for more advanced work. Graduation for these students may be accelerated. For those students whose secondary school preparation has not provided an adequate background, the University offers preparatory courses. Graduation for these students may be delayed accordingly.

The student’s program of study is selected jointly with an advisor, with special attention to the individual student’s needs. Flexibility is ordinarily possible within the framework of sound education in the essential fundamentals and within the development of depth in selected fields of design and analysis. An examination of a typical curriculum given under the various department sections of this Bulletin shows that there is a strong common core of studies. Therefore, students uncertain of their ultimate field of specialization retain a high degree of mobility to enable them to transfer from one curriculum to another.

Completion of any of the prescribed curricula, except Engineering Science, with an overall grade point average of at least 2.0 (C) in all course work, to include all accepted work from other institution(s), is the basic requirement for graduation in the College. An average of C
also must be attained in all work attempted at the University of Miami and the professional studies. The Engineering Science curriculum, because of its special purpose, has a higher requirement, i.e., a grade point average of 3.0 (B).

The requirements for graduation as specified by each Department and Program reflect the general education requirements of the University of Miami and the requirements of the appropriate accrediting agencies. The curricula contain required courses and elective courses. No course required for graduation may be taken under the credit-no credit (Credit-Only) option.

Students are expected to make satisfactory progress toward graduation by meeting the criteria established above. Whenever a student fails to demonstrate positive academic progress, he/she may be placed on academic probation or dismissed by the College of Engineering Scholastic Standards and Advising (SSA) Committee.

**General Educational Requirements**

People and Society and Humanities and Arts electives may be taken from a wide variety of courses. A minimum of 18 credits of people and society/humanities and arts electives is required for graduation, with a distribution of a minimum of 6 credits each in the areas of Humanities and Arts and People and Society; the other 6 credits may be taken in either Humanities and Arts or People and Society.

The College of Engineering faculty requires that the courses selected must provide both breadth and depth and not be limited to a selection of unrelated introductory courses. Courses that instill cultural values are acceptable, while written exercises and personal craft are not. Foreign language courses in a student’s native language(s) or that spoken at home are not acceptable. To provide depth, the College of Engineering Faculty requires at least two courses be at the advanced level. An advanced level course is defined as a course with at least one prerequisite or a course at the 300 or 400 levels.

To satisfy the University of Miami general education requirements on writing intensive courses, at least six credits of the People and Society/Humanities and Arts electives must be in writing sections (W) (note: all English and literature courses are considered writing courses). The remainder of the required writing is satisfied by writing within the engineering design and laboratory courses.

**COLLEGE OF ENGINEERING – HUMANITIES AND ARTS - PEOPLE AND SOCIETY ELECTIVES**

Select six courses with at least two courses in HUMANITIES AND ARTS and two in PEOPLE AND SOCIETY.

Two of these six courses must be taken in sections designated as Writing sections (W).

Also at least two of these six courses must be at the advanced level. An advanced level course is defined as a course with at least one prerequisite or a course at the 300 or 400 levels.

**People and Society**

Courses in the following areas may be used to fulfill this requirement: Africana Studies; American Studies (AMS); Anthropology (except APY 203); Economics; Educational
Psychology; Geography and Regional Studies (except GEG 120); International Studies; Judaic Studies; History; Political Sciences; Psychology (except PSY 204); Sociology; Teaching and Learning; Women’s and Gender Studies (WGS), and the following courses: BME 320; CBR 102; COM 101; COM 110; COS 112; COS 118; COS 336; COS 472; FSS 190-199.

Humanities and Arts excluding Talent and Performance Courses

Courses in the following areas may be used to fulfill this requirement: Architecture (Note: A special form must be completed prior to registration in the course ARC 323); Musicology; Art History; English (200-level or above); Modern Languages and Literature (300-level or above); Philosophy (except PHI 210 and PHI 510); Religious Studies; and the following courses: CMP 103, CMP 204, CMP 205, COS 211; DAN 250; FFA, FLT, FPR 190-199.

The following are examples of excluded Talent and Performance Courses:
1. All studio courses: ARTXXX
2. All theater courses: THAXXX
3. All Dance courses other than DAN250: DANXXX
4. All Performance courses: MIPXXX
5. All Keyboard and Vocal courses: MKPXXX and MVPXXX
6. All Music Education courses: MEDXXX
7. All Music Business and Entertainment courses: MMIXXX
8. All Music Theory & Composition courses: MTCXXX
9. All Music and Jazz Instrumental courses: MSJXXX

The student’s official records are maintained by the Office of Enrollment Services. It is the student’s obligation to take the initiative to assure that all requirements are being met in conformity with his/her own graduation plans.

DEGREE PROGRAMS

DUAL MAJORS
Dual majors are offered for engineering students with strong interest in related fields of study such as Physics or Mathematics. In order to obtain a dual major in one of these areas, the student will have to obtain, in parallel, a degree in one of the engineering programs, plus additional course work approved by the dual majors department. Further information on this dual major program may be obtained from the Dean’s Office of the College.

MINORS
Minors are offered by the College of Engineering. The departments of Civil, Architectural, and Environmental Engineering, Electrical and Computer Engineering, Industrial Engineering, and Mechanical Engineering offer minors with various areas of specialization. Details of each area of concentration and its requirements may be found under each departmental listing.

Engineering students can earn a minor offered by any other College/School within the University of Miami, including the College of Engineering. In cases where the major degree requirements satisfy some of the requirements for the minor, at least six credits beyond the
major degree requirements must be taken in the minor subject area to earn a minor. Minors in Engineering require a minimum GPA of 2.0 in the courses required for the minor.

HONORS

Students who show both promise and superior performance may receive academic advantages, certain privileges, and recognition through admission to the Honors Program of the University. Please refer to the HONORS PROGRAMS section, which appears elsewhere in this Bulletin, for information on these programs.

FOOTE FELLOWS IN CoE
The Foote Fellows Program was established in honor of former President Edward T. Foote, II. The Foote Fellows Program is intended for students who enter the University with advanced knowledge in several disciplines, who demonstrate intellectual rigor and who are highly motivated thinkers and researchers. In the College of Engineering this program offers such students the opportunity to explore their academic interests without the strictures of the People and Society and Humanities and Arts distribution requirements unless it is part of their engineering program as well as a broader choice of technical electives in their engineering program.

DEPARTMENTAL HONORS PROGRAM
A student in the College of Engineering may graduate with Departmental Honors noted upon his/her diploma and transcript upon fulfillment of the following requirements:

A. Completion of at least 18 credits of course work in honors courses and/or in courses at the 500 level, including 6 credits in independent study, senior thesis, or designated advanced or special honors courses specified by the department, with grades of at least B in these 6 credits.

B. Attainment of at least a 3.4 overall grade point average. Transfer students must also attain at least a 3.4 grade point average in all work taken at the University of Miami.

C. Attainment of at least a 3.5 average in the departmental major courses.

D. A written request from the student to the departmental faculty during his/her semester of expected graduation stating the desire to graduate with Departmental Honors, and specifying those courses taken in compliance with section (A) above.

CERTIFICATE PROGRAMS IN ENGINEERING
In cooperation with the University’s School of Continuing Studies, the College of Engineering offers practicing engineers advanced or specialized training without having to meet the stringent entrance requirements of the Graduate School. Persons holding Bachelor’s degrees, registered as Professional Engineers, or possessing equivalent qualifications can be granted Certificates of Proficiency by the University after completing fifteen semester-hours of course work in a specified field of engineering. Study programs are arranged on an individual basis by each student and his/her advisor. Detailed information on Certificate Programs can be requested from the Office of the Dean of Engineering.

THE INTERNSHIP COOPERATIVE PROGRAM
The Cooperative Program takes its name from the close cooperation that exists between the College and participating employers. This arrangement attempts to insure that each student’s academic and work experience will integrate and contribute significantly to his/her
overall growth and professional development. Interviews and screening by both the employer and Cooperative Program personnel attempt to match the needs of the employer carefully with the interests and capability of the student.

ADVANTAGES TO THE STUDENT:
1. Offers on-the-job experience to supplement the academic degree program.

2. Offers potential long term career employment with the Cooperative Program employer.

3. The experience obtained makes the student, upon graduation, potentially much more valuable to any future employer. Upon completion of an appropriate amount and level of experience, graduation in the Cooperative Program may be recognized by a special seal on the student’s diploma.

4. Helps the student to verify whether or not his/her career or specialty choice is correct.

5. Tends to increase motivation and to make academic studies more meaningful.

6. Earnings from Cooperative Program employment can cover a significant portion of the student’s college expenses.

7. Certain work experience may shorten the experience requirements, after graduation, for eligibility for professional registration.

8. Helps to develop the students understanding of human relations and the lifelong need of learning to balance appropriately the demands on ones time of multiple duties such as studying, employment, daily necessities, family obligations, etc.

ADVANTAGES TO THE EMPLOYER:
1. Offers an opportunity to recruit and screen potential employees in the fields of engineering.

2. The Cooperative Program maintains an up-to-date roster of available undergraduate and graduate students, many with previous experience. This roster offers employers means of obtaining employees to meet fluctuating work loads, on relatively short notice.

3. Students in the Cooperative Program can provide good company public relations with their classmates.

4. Participation in a Cooperative Program serves the profession by providing opportunities for many capable and well deserving young persons to attend a University, who otherwise might lack the financial ability or motivation to attend.

TYPES OF COOPERATIVE PROGRAM ARRANGEMENTS

CONTINUOUS WORK-STUDY
An arrangement involving a combination of part-time employment (15 or more hours per week) and a credit hour academic load which is appropriately reduced from the normal full-time load to balance the employment duties. Full-time employment may be undertaken during the summer period. Two students may be used during the year to share the hours of a full-time position (20 hours each student). In some instances, an individual student will hold a full-time position and carry a light academic load in evening and/or early morning classes.
ALTERNATING WORK-STUDY
An arrangement involving two students alternating full-time employment and full-time study. Students alternate positions of work and study at the end of each semester (including the summer), and thereby provide the equivalent employee time of a full-time position year-round.

STUDENT ELIGIBILITY FOR THE PROGRAM
University of Miami students enrolled in the College of Engineering are eligible to enter the Cooperative Program. Initial entry into the Program is limited to superior students. Normally, work assignments are not given until the equivalent of one or two semesters of full-time academic work is completed. Currently, most students in the Program are under continuous work-study arrangements.

STUDY ABROAD PROGRAMS
The College of Engineering encourages its students to take advantage of one of the University of Miami’s numerous study abroad options in Latin America, Europe, Asia, Australia and the Middle East. Of particular interest to Engineering students are the following: internships (unpaid and paid) in Spain, England, France, Argentina, Colombia, Chile, and Australia in which professional work experience is carried out abroad; course work at Engineering schools abroad for a semester or an academic year; summer programs in intensive Language instruction, Humanities and Social Sciences abroad. The cost of attending these programs is equivalent to University of Miami tuition and fees. Almost all University of Miami financial aid is granted. With prior approval and detailed curriculum advice, courses taken abroad will apply towards graduation.

THE MANAGEMENT OF TECHNOLOGY SUPPLEMENTAL PROGRAM
The objective of this program is to educate engineers in how to exploit their technological knowledge. This is a vital, but often neglected, link in achieving competitiveness in the global marketplace. The basic premise motivating this approach is the recognition that in today’s world, technology is the backbone of the business enterprise system and that wealth can only be created through production of goods and services. This program will educate engineers in a multitude of subjects bridging the gap between product technology, production technology and the marketplace, which is the ultimate customer of engineering contributions.

The program consists of four courses:
1. Quality in Design of Products and Production Systems
2. Entrepreneurship for Engineers
3. Production Systems Design

A project is required at the end of the program, but is threaded throughout the program starting with the first course. Upon completion of the program, the student will receive a special certificate of completion. This program is available to all qualified students in all departments of the College of Engineering.

Admission to the Program
Admission to this supplemental program will be by application submitted by the candidate or by nomination by an advisor or department chair. All applications will be reviewed by a standing committee. Students must meet the prerequisite of each course before enrolling in it.
Requirements for the Certificate
The program is an add-on to existing curriculum. Students must complete all courses designated in order to qualify for the certificate. A notation will be made on the student’s transcript recognizing their completion of the special program. No designation will be made on the diploma.

Course Sequence
Courses are recommended to be taken in the sequence indicated above.

Team Work
Students will be encouraged to work on projects in teams. Multidisciplinary teams will also be encouraged.
INTRODUCTION

Biomedical engineering is a multidisciplinary field at the interface of traditional engineering disciplines and biological sciences. Biomedical engineers apply engineering principles and techniques to solve problems in medicine and biology. Applications include the design of medical devices, implants and prostheses, the development of new biomaterials or drug delivery systems, cellular or tissue engineering, medical applications of optics and lasers, or the acquisition and interpretation of physiological signals and medical images for diagnostic and monitoring purposes. Biomedical engineering has an impact on virtually all fields of medicine.

The Department of Biomedical Engineering at the University of Miami was formally established in 1979, as a graduate program. The four-year undergraduate program leading to the B.S. degree in BME was created approximately ten years later to address the growing importance of the field and the need for professional biomedical engineers. The undergraduate BME program at the University of Miami was the first of its kind in Florida, with the first class of B.S.B.E. students graduating in 1993. It has been Accredited by the Accreditation Commission (EAC) of the Accreditation Board of Engineering and Technology (ABET) since 1997. The Department of Biomedical Engineering also offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees. In addition, qualified undergraduate students may apply for the combined BS/MS program (details are provided following the curricula for the BS degrees).

Graduates of the biomedical engineering undergraduate program find employment in industry or continue their studies either in graduate school or in a professional school in medicine and other health-related disciplines (such as dentistry, optometry, orthotics), law or business.

Some special features of the program include the small class size and open-door policy of the faculty, which facilitates student-faculty interaction. The Department has very strong ties with the University of Miami Miller School of Medicine. Undergraduate students have a wide range of research and internship opportunities in some of the leading research laboratories in their respective field. The Department strongly encourages undergraduate student participation in research and professional activities.

MISSION STATEMENT

The mission of the biomedical engineering program is to prepare students to become skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.
EDUCATIONAL OBJECTIVES

The educational objectives of the biomedical engineering program at the University of Miami are to graduate engineers who:
1. have a sound background in the fundamentals of engineering, physical and life sciences, and are prepared to solve problems at the interface of engineering and life sciences.
2. have mastered the skills and knowledge expected by the biomedical industry.
3. are prepared to enter graduate and professional degree programs, as well as other careers.

PROGRAM DESCRIPTION

Curriculum: The three educational objectives of the Biomedical Engineering program are achieved via the implementation of a curriculum with four parallel concentrations which include a common core and concentration-specific courses. The core curriculum is designed to provide a broad foundation in the basic sciences and in engineering. Concentration-specific courses provide the depth required to be proficient engineers.

The four concentrations are Electrical (E), Mechanical (M), Biomaterials and Tissue (B) and Premedical (P). The Premed concentration satisfies the requirements for admission to medical school and provides depth in the area of biomaterials and tissue engineering. The curriculum is designed to provide all graduates with the analytical and design skills required to formulate and solve problems at the interface of engineering and life sciences. Outstanding students are prepared for graduate studies or medical school.

Required courses in the humanities and social sciences provide students with an awareness of social, ethical and environmental issues related to their profession. The curriculum has been carefully designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to complete the upper level course requirements successfully. The curriculum includes two or three technical electives selected by the student based on their individual professional interests.

The curriculum places a special emphasis on written and oral communication skills. Many of the Biomedical Engineering courses, as well as the capstone design project, include a requirement for a written term paper and oral presentation on a course-related topic related to the class.

Design experience: The biomedical engineering design experience is integrated in the curriculum throughout the four years of study, starting in the freshman year with the Introduction to Biomedical Engineering course. Each semester includes classroom or laboratory courses which place a heavy emphasis on theoretical and practical biomedical engineering design concepts. The design experience culminates in the senior year with a year-long capstone Senior Design Project. The Senior Design Project is typically completed by teams of two students who build on their knowledge and previous design experience to solve one major design problem which integrates the various components of the curriculum. The senior project starts in the second semester of the junior year with a 1-credit course which covers the basic principles of biomedical engineering design.

The curriculum includes a Technical Entrepreneurship course which can serve as an alternative to the Senior Design Project. The students form entrepreneurial teams of 4 to 6 members to design and develop new products, including a business or commercialization
plan. This course was established with a grant from the National Collegiate Innovators and Inventors Alliance (NCIIA) in 1999 and it is currently supported by additional grants from NCIIA.

**Teaching and design laboratories:** Biomedical Engineering students have open access to several teaching laboratories which are used for the laboratory courses and design projects. The laboratory equipment and instructional modules are geared towards instruction in the areas of tissue mechanics, instrumentation, measurements, biomedical optics, physiological signals, among others.

**Undergraduate research and internships:** Biomedical Engineering students are strongly encouraged to gain research or professional experience through internships. Many undergraduate students conduct research in laboratories at the Department of Biomedical Engineering and at the School of Medicine, or are hired as interns by the local biomedical industry.

**DEGREE PROGRAMS**

The department offers one degree program with four concentrations: Electrical, Mechanical, Biomaterials and Tissue, and Premed. The Premed Concentration prepares graduates for admission to medical school and provides depth in the area of biomaterials and tissue engineering. A tabular listing of the course requirements for the degree Bachelor of Science in Biomedical Engineering is included below for each concentration.

* To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) electives found in this Bulletin in the College of Engineering section.

** Technical Electives are chosen from the BME course offerings (300 level and above) with the approval of the advisor. Any other courses selected need to be approved by the advisor and the chairperson.

*** Advanced Bioscience Elective is to be chosen from BMB260, BIL250, BIL255, BIL268 or MIC301.

**** Technical Elective Lab is selected from BME506, BME507, BME566 or BME395.
BACHELOR OF SCIENCE IN BIOMEDICAL ENGINEERING
(Any of the three Concentrations) AND
MASTER OF SCIENCE IN BIOMEDICAL ENGINEERING

- Juniors from any of the three BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credits to meet the requirements of the Graduate School.
- The participants are excused from BME 401/402/403 Senior Design I, II and III, but are required to complete BME 605/606 Master Design Project I and II.
- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.
- The first four years of the curriculum are altered only by the elimination of the 6 credits for BME 401/BME402/BME403. Instead, one 3 credit Technical Elective is added in the first semester of the senior year and one 3 credit Technical Elective is added in the second semester of the senior year.
- Six credits of Technical electives earned during the fourth year are counted toward the 30 credits required for the MS degree.
- The curriculum for the fifth year is shown below.

* Technical Electives are chosen from the BME course offerings (500 level and above) with the approval of the advisor.

DUAL MAJOR

The College of Engineering offers a dual major in Biomedical Engineering. In order to obtain the dual major in Biomedical Engineering, the student will have to obtain, in parallel, a major in one of the fundamental engineering programs, plus 24 credit-hours of course work, including 18 credits of required course work and 6 credits of elective course work from the lists given below. Of this total of 24 credits, at least 12 have to be at the level of 400 and above.

The required courses for the dual major are:

- BME 335. Biomaterials I 3 credits
- BME 375. Foundations of Biomechanics 3 credits
- BME 440. Biomedical Measurements 4 credits
- BME 480. Biomedical Instrumentation 3 credits
- BME 501. Unified Medical Sciences 3 credits
- BME 502. Unified Medical Sciences II 3 credits

The electives are to be chosen from the BME course list.
DEPARTMENTAL HONORS

Upon request departmental honor is noted in a student’s diploma and transcript upon fulfillment of the requirements specified in the College Bulletin.

Biomedical Engineering Course Listing
CIVIL, ARCHITECTURAL, AND ENVIRONMENTAL ENGINEERING
Dept. Code: CAE
http://www.cae.miami.edu

MISSION STATEMENT

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise

The department offers three undergraduate degrees: Bachelor of Science in Civil Engineering, Bachelor of Science in Architectural Engineering and Bachelor of Science in Environmental Engineering.

CIVIL ENGINEERING
Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

ARCHITECTURAL ENGINEERING
Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, architectural firms, government agencies, and universities.

ENVIRONMENTAL ENGINEERING
Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature’s beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.
EDUCATIONAL OBJECTIVES

The objectives of the Civil Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to civil engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Architectural Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to architectural engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Environmental Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to the water environment or
2. Pursuing a graduate or professional degree.

DEGREE PROGRAMS

Civil Engineering Curriculum

The Civil Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and civil engineering design. The first two years of the Civil Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. During the next two years of the four-year program, the Civil Engineering curriculum integrates engineering sciences with design applications in the areas of structural, environmental, geotechnical, and water resources engineering. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of civil engineering.

Graduate study is offered leading to the degrees Master of Science and Doctor of Philosophy in Civil Engineering. For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Civil Engineering is shown below:
## Architectural Engineering Curriculum

The Architectural Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and architectural engineering design. The Architectural Engineering program integrates design applications across the curriculum, beginning with building construction and architectural design in the sophomore year, and continuing with structural, building mechanical and electrical systems design, and construction management in the junior and senior years. The curriculum culminates with a major comprehensive design experience that includes applications from the major specialty areas of architectural engineering.

Graduate study is offered leading to the degree of Master of Science in Architectural Engineering. For detailed information on graduate studies, see the Graduate Studies Bulletin.
A tabular listing of the course requirements for the degree of Bachelor of Science in Architectural Engineering is shown below:

### Environmental Engineering Curriculum

The Environmental Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and environmental engineering design. The first two years of the Environmental Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. The next two years of the four-year program, integrate engineering sciences with design applications with particular emphasis in the areas of water and wastewater engineering.
Design courses emphasize an integrated approach that considers all environmental media in the prevention and control of environmental problems. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of environmental engineering.

$ Only offered once a year; * Co-requisite CAE 212 not required for EnE majors
* To be selected from approved lists of People and Society (PS)/Humanities and Arts (HA)/Biology Electives; ** CAE540, CAE 533 and CAE 542 offered on a 3-semester rotation. Students must take these three courses

Note: students must select the RSMAS course from the list of required (non-elective) courses in either the Ocean Engineering Track or the Marine Policy Track. A minor in Marine Science will be awarded for 15 credits of MSC, AMP or other RSMAS courses provided these include MSC 111, MSC 301 and at least 6 credits at the 300 level or higher. Required courses in the track count towards the 6 credits at the 300 level.

**RSMAS Track 1: Ocean Engineering**
AMP402 (Introduction to Ocean Engineering)
AMP509 (Coastal Physics & Engineering)
One 3-credit elective that can be any MSC course or any RSMAS 500-level course
RSMAS Track 2: Marine Policy*
MSC340 (Ocean Policy)
MSC313 (Coastal Law)
MSC314 (Ocean Law)
*These courses fulfill the requirements of People and Society electives for General Education

DUAL-DEGREE PROGRAMS

A dual degree program is available leading to a degree in Bachelor of Science in Environmental Engineering and a Bachelor of Science from the College of Arts and Sciences with a major in Ecosystem Science and Policy (ECS). The ECS major is offered through the Abess Center for Ecosystem Science and Policy (CESP). The goal of the ECS program is to educate the next generation of environmental scientists, policy makers, managers, and planners with grounding in the fundamentals of the natural sciences, social science, and public policy. This preparation will give students both the theoretical background and technical skills to pursue an environmental career, including teaching and research as well as for careers in government and private industries concerned with the environment. The course requirements for the dual degree program are as follows:
# Bachelor of Science in Environmental Engineering/Bachelor of Science with a major in Ecosystem Science and Policy

</tr>
</tbody>
</table>

*Classes with satisfactory AP scores may be used to satisfy these requirements. The College of Arts and Sciences requires 12 credits from People and Society courses, 12 credits from Arts and Humanities courses and 3 credits in a language other than English at the 200 course level or higher.

Note: students must select RSMAS courses from the listed tracks. A minor in one of the two listed tracks will be awarded for 15 credits of MSC or RSMAS courses provided these include MSC 111, MSC 301 and at least 6 credits at the 300 level or higher. Required courses in the track count towards the 6 credits at the 300 level.
A six year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is also available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect. The course requirements for the BSAE/MArch program are as follows:

### Bachelor of Science in Architectural Engineering and Master of Architecture

**key:** BSAE Curriculum, M. Arch Curriculum, & Shared BSAE/M. Arch Curriculum

| Year 1 | | Year 2 | | Year 3 | | Summer (REQUIRED 10 week semester) | | Year 4 | | Year 5 | | Year 6 |
| --- | --- | --- | --- | --- | --- | --- | --- | --- | --- | --- |
| Year 1 | | Year 2 | | Year 3 | | Summer (REQUIRED 10 week semester) | | Year 4 | | Year 5 | | Year 6 |
| **Bachelor of Science in Architectural Engineering and Master of Architecture** | | **Year 2** | | **Year 3** | | **Summer (REQUIRED 10 week semester)** | | **Year 4** | | **Year 5** | | **Year 6** |
| **key:** BSAE Curriculum, M. Arch Curriculum, & Shared BSAE/M. Arch Curriculum | | **Year 2** | | **Year 3** | | **Summer (REQUIRED 10 week semester)** | | **Year 4** | | **Year 5** | | **Year 6** |
| **Year 1** | | **Year 2** | | **Year 3** | | **Summer (REQUIRED 10 week semester)** | | **Year 4** | | **Year 5** | | **Year 6** |
| **Year 1** | | **Year 2** | | **Year 3** | | **Summer (REQUIRED 10 week semester)** | | **Year 4** | | **Year 5** | | **Year 6** |
| **Year 1** | | **Year 2** | | **Year 3** | | **Summer (REQUIRED 10 week semester)** | | **Year 4** | | **Year 5** | | **Year 6** |
| **Year 1** | | **Year 2** | | **Year 3** | | **Summer (REQUIRED 10 week semester)** | | **Year 4** | | **Year 5** | | **Year 6** |

* To be selected from approved lists of People and Society/Humanities and Arts, Technical and Design Electives
The department also offers 5-year programs leading to the B.S. and the M.S. degrees. These programs are open to students who are admitted to the graduate program at the end of their junior year. Students applying for this program must have a minimum grade point average of 3.0, and score more than 1000 on the Graduate Record Examination. The course requirements for the five-year BS/MS programs are as follows:

**Bachelor of Science in Civil Engineering and Master of Science in Civil Engineering**

---

* Only offered once a year; # Co-requisite CAE 212 not required for EnE majors; * To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA), Biological Science and Technical electives; ** CAE540, CAE 533 and CAE 542 offered on a 3-semester rotation. Students must take these three courses
MINOR IN CIVIL, ARCHITECTURAL OR ENVIRONMENTAL ENGINEERING
(for students in the College of Arts and Sciences and the School of Architecture)

A Minor in Civil, Architectural, or Environmental Engineering requires 15 credits passed with a grade of C or higher. Students are required to satisfy the prerequisites for all courses, and are required to complete the core course, CAE 210, plus an additional 12 or 13 credits within an area of specialization. The additional credits required for minors in civil, architectural, and environmental engineering are as follows:

Minor in Civil Engineering

GEOTECHNICAL TRACK
CAE 211 (CAE 212 optional), CAE 330, CAE 370/371, CAE 470.

STRUCTURAL TRACK
CAE 211 (CAE 212 optional), CAE 310, and any two of: CAE 320, CAE 321, CAE 520 and CAE 521

Minor in Architectural Engineering

STRUCTURAL TRACK
CAE 211 (CAE 212 optional), CAE 310, CAE 320, and CAE 321

MECHANICAL/ELECTRICAL Systems TRACK
CAE 330, CAE 380, CAE 381, and CAE 480

Minor in Environmental Engineering

CAE 330, CAE 340, CAE 430, and CAE 440

Civil, Architectural & Environmental Engineering Course Listing
MISSION STATEMENT

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

INTRODUCTION

Electrical and Computer Engineering are complementary disciplines that are at the forefront of the continuing development and evolution of our modern technological society. Electrical and computer engineers have initiated and contributed to the development of such important and diverse areas as integrated electronics and photonics, telecommunication systems and computer networks, computer hardware and software, image processing and computer vision, automation and robotics, electrical power generating and transmission systems, as well as participated in the development of significant applications to biotechnology. These technologies have significantly transformed how our evolving society will live, learn, work, communicate and do business in the 21st century and are critical to the development of a sustainable world economy. It is an exciting and challenging discipline offering a variety of rewarding career paths. The Department of Electrical and Computer Engineering offers a number of innovative academic and research programs to help prepare students to achieve a variety of career goals.

The Department offers two undergraduate degree programs:

1. Bachelor of Science in Electrical Engineering degree program (B.S.E.E.)
2. Bachelor of Science in Computer Engineering degree program (B.S.Cp.E.)

The Electrical Engineering and the Computer Engineering degree programs are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

In addition, the Department offers graduate courses leading to the Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.), and the Doctor of Philosophy degree (Ph.D.). For further information see the Bulletin of the Graduate School.
BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.)

The Electrical Engineering degree program has two options:

1- Electrical Engineering Option;
2- Audio Engineering Option;

These options require specialized courses as well as the 49 Engineering Credit Hours required in the accredited Electrical Engineering degree program.

**Electrical Engineering** is concerned with the design, analysis and implementation of a variety of systems, components and devices, primarily of an electrical or electronic nature, which form the cornerstone of our complex and technologically oriented society. This ranges from small-scale integrated electronics and photonics systems and devices, the technological drivers of the information technology revolution, to large-scale electrical power systems and power generators, which supply the nation’s energy needs and form the basis for sustained economic growth. Electrical engineering is a rapidly changing discipline. To adequately train students to meet the challenges of the future and to assume leadership roles in the practice of electrical engineering, the department has in place a modern curriculum that reflects best practices in the industries we serve and is constantly updated to incorporate new technological, scientific and economic developments. The curriculum in the first two years provides a thorough background and in-depth preparation in the physical and mathematical sciences as well as fundamental knowledge and exposure to basic engineering principles and computer programming techniques. Students then concentrate on electrical engineering courses in their junior and senior years. Because of the overwhelming computer-oriented nature of modern electrical and electronic systems, students in electrical engineering are also expected to take courses in computer hardware and software and to incorporate this knowledge into a variety of design experiences offered.

**Audio Engineering** was developed with support from the School of Music in response to the need for industry professionals with the theoretical knowledge and the analytical, technical and design skills, which can only be acquired in a formal engineering degree. The Audio Engineering option combines traditional electrical engineering studies with audio studies in areas such as acoustics, digital audio, transducers, signal processing, post production, and recording. Our Audio Engineering graduates are highly sought by industry and have been pursuing successful careers in music/entertainment and the telecommunications industries, in the analog and digital electronics industry, and in the hearing aid/medical instrumentation industry, or have chosen to pursue graduate degrees. Students enrolled in Audio Engineering have access to a variety of well-equipped laboratories, At the College of Engineering the students are expected to be involved in laboratories of electronics, computing, digital design, signal processing, and audio and speech processing. At the School of Music students have access to the Gusman Concert Hall, which houses a professional recording studio with automated console and multi-track recording. There, students can record live concerts ranging from small jazz groups to a symphony orchestra. In addition, Audio Engineering students use the Weeks Center for Recording and Performance, which also features a fully professional recording studio, analog and digital signal processing equipment and audio test equipment.
EDUCATIONAL OBJECTIVES

The educational objectives of the Electrical Engineering Degree Program are to produce graduates who have the:

1. knowledge of mathematics, physics and the engineering sciences as well as the skill needed to plan, design, and develop successful solutions to electrical engineering problems.

2. broad educational background, professional and ethical context, and communication and team skills expected from a successful and responsible practicing electrical engineer.

3. background, preparation and experience necessary to be successful in graduate and professional degree programs, and a variety of alternative career paths.

4. foundations for independent learning and commitment to life-long education to continually improve, refine, and broaden their skills and competencies in the face of evolving technological developments and global needs.

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern electrical engineering, along with the necessary skills and experiences to apply standard practices, methodologies and available tools for solving electrical engineering problems. The major areas of Electrical Engineering include electronics, analog and digital circuits, microprocessors, communications and control systems. The design sequence is spread throughout the educational experience curricula, culminating in the two-semester senior design project. Graduates are expected to keep pace with this rapidly evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

** Note that MMI504 could be substituted for MMI 436
***Select one from: MCY 124, MCY 127, MCY 131 or any MCY course approved by the academic advisor
§ Offered only in the Fall semester

**DOUBLE DEGREE PROGRAM - B.S.E.E. & B.S.B.E.**
A BME student who satisfies the requirement of the B.S.B.E. degree with electrical orientation as described in this Bulletin may also qualify for the B.S.E.E. degree by taking the following additional courses: EEN 218, 301, 306, 311, 312, 316, 336, one ECE Design Elective, two EE Core Electives, three ECE Electives as well as having an ECE Faculty as co-sponsor of the Senior Project.

**THE FIVE-YEAR B.S.E.E.-M.S.ECE. DUAL DEGREE PROGRAM**
This is a structured and integrated program with a minimum of 152 approved credits including two required courses EEN 615 & 616. At least thirty credits must be at the graduate (500 or 600 level). Of these at least 12 credits must be at the 600 level.
Note that:

- Interested EEN Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the MSECE portion of the program.
- A student wishing to drop out of the five-year program without the MSECE degree could receive the BSEE degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination before beginning their fifth-year courses.
- To qualify for the MSECE degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credits applied towards the MSECE degree.
- The student is awarded both the BSEE and the MSECE degrees after the requirements for both degrees are satisfied.

**COURSE REQUIREMENT FOR THE BSEE-MSECE FIVE YEAR DUAL DEGREE PROGRAM (152 credits)**

The first three years are the same as in the undergraduate B.S.E.E. program with 97 credits. The remaining 55 credits shown below should include at least ten graduate courses of which, at least four are at the 600 level. Also see description of electives under the Electrical and Computer Engineering Section.

*See description of electives under the Departmental Electives Section.
All courses shown in red should be taken as Graduate (G) courses.
$ Offered only in the Fall semester

Minor in Electrical Engineering

Non-ECE Students wishing to minor in Electrical Engineering should satisfy a 15 credit requirement specified as follows:

1. A core of seven credits consisting of EEN 201, EEN 204, and EEN 305.

2. Eight or more credits of Electrical Engineering Electives. It is recommended that these elective credits be taken from one of the following two sets of EEN courses:

   - Communication (EEN 306, 307, 311, 336, 404, 436, 534)

3. Students with a major in Computer Engineering wishing to add a minor in Electrical Engineering must take six Electrical Engineering course credits in addition to those needed to satisfy their degree requirements.

4. A 2.0 grade point average in all EEN courses taken.
BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (B.S.Cp.E.)

Computer engineering is concerned with the characterization, design, analysis and implementation of hardware, software and the overall architecture of computers and computer systems, and with the development of applications enabled by such configurations. This ranges from embedded microprocessors and associated software supporting a variety of familiar devices, to large-scale distributed computer systems interconnected by high-speed telecommunication networks controlled by sophisticated communication protocols. Since modern electronic computing systems are digital in nature, the program provides in-depth coverage of a range of topics dealing with digital information processing systems. Among the topics covered are digital system design, computer organization and architecture, operating systems, software engineering, database systems, image processing and computer vision, programming languages, microprocessor-based systems, digital communications, computer communication networks, wireless and mobile networks, design and implementation of very large scale integrated (VLSI) circuits and systems, artificial intelligence, data mining, agent technology, computer graphics, and multimedia systems and networks.

Computer engineering is a rapidly changing and evolving discipline driven by new technology developments and marketplace conditions. To adequately train students to meet the challenges of the future and to assume leadership roles in the practice of computer engineering, the department offers an up-to-date curriculum that reflects new technology developments that have the potential for significantly impacting professional practice in the industry. The curriculum is constantly updated to incorporate new technological, scientific and economic developments.

Alternatively, students can earn a Bachelor of Science in Computer Engineering under the Software Engineering option, which is primarily focused on the systematic and disciplined development of software systems. This option focuses on the application of computer engineering and computer science principles and practices to the creation, operation, and maintenance of software applications and systems.

EDUCATIONAL OBJECTIVES

The educational objectives of the Computer Engineering Degree Program are to produce graduates who have the:

1. knowledge of mathematics, physics and the engineering sciences as well as the skill needed to plan, design, and develop successful solutions to computer engineering problems.

2. broad educational background, professional and ethical context, and communication and team skills expected from a successful and responsible practicing computer engineer.

3. background, preparation and experience necessary to be successful in graduate and professional degree programs, and a variety of alternative career paths.

4. foundations for independent learning and commitment to life-long education to continually improve, refine, and broaden their skills and competencies in the face of evolving technological developments and global needs.
DEGREE PROGRAM

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern computer engineering, along with the necessary skills and experiences to apply standard practices, methodologies and modern tools for solving computer engineering problems. The major areas of computer engineering include digital systems, algorithms and data structures, computer architecture, microprocessors, operating systems, software engineering, databases, and artificial intelligence.

The computer engineering design sequence is spread throughout the curriculum, culminating in a two semester senior design project.

Graduates are expected to keep pace with this rapidly-evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development, by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

The Computer Engineering degree program has two options:

1. Computer Engineering Option
2. Software Engineering Option

These options require a common engineering core, along with specialized courses

COMPUTER ENGINEERING – SOFTWARE ENGINEERING OPTION

Software Engineering is concerned primarily with the systematic and disciplined approach to developing software systems. It requires the application of both computer engineering and computer science principles and practices to the creation, operation, and maintenance of software systems and applications. The Software Engineering Option of the Bachelor of Science in Computer Engineering degree at the University of Miami is a unique and interdisciplinary program developed and administered collaboratively by the Department of Electrical and Computer Engineering and the Department of Computer Science. The Software Engineering Option prepares students for successful careers in software engineering. Software systems are becoming increasingly complex, and emerging technologies are pushing the boundaries of reusable components and software quality assurance. To prepare students to meet these challenges, this option establishes a solid foundation of software system fundamentals, coupled with strong hands-on experience and an understanding of professional practice and conduct. In addition to the core curriculum in software engineering, students are introduced to the paradigms of real-time, adaptive, and collaborative software systems, through a wide range of technical elective courses in the departments of Electrical and Computer Engineering, Computer Science, and other departments in the University of Miami. The technical electives allow students to apply the knowledge they have gained to different application areas. This provides valuable hands-on experience in contemporary application areas, which enhances the students’ potential career development opportunities.

Students pursuing the Software Engineering Option of the Bachelor of Science in Computer Engineering degree must earn at least 15 credits in Computer Science as part of their degree requirements.

§ Offered only in the Fall semester

**Students must earn at least 15 credits in Computer Science (CSC)**

**Students must have at least 32 credits of Math and Science**
THE FIVE-YEAR B.S.Cp.E.-M.S.E.C.E. DUAL DEGREE PROGRAM

This is a structured and integrated program that includes seven additional courses and replaces three technical elective courses as well as one senior design course currently required under the B.S.Cp.E. Degree as follows:

- Four required courses: EEN 368, 418, 615, 616.
- Two Electrical Engineering Technical elective courses from: EEN 500, 516, 532, 533, 542, 555.
- Two Computer Engineering Software elective courses from: EEN 511, 512, 513, 519, 568.
- Five Computer Engineering Advanced elective courses from the following: Electrical Engineering Technical electives, Computer Engineering Software electives, EEN 336, 436, 534, 536, 537, 538, 540, 548, 553, 570, 571, 572, 574-577, 586, 587, 614, 634, 638, 653, 671, as well as CSC 544, 529. Computer Engineering Advanced electives are to be selected in consultation with the advisor.
- At least thirty credits must be at the graduate (500 or 600) level. Of these, at least twelve credits must be in courses open to graduate students only (600 level).
- Interested Computer Engineering juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credits applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.
## COURSE REQUIREMENT FOR THE B.S.Cp.E. – M.S.E.C.E. FIVE YEAR DUAL DEGREE PROGRAM (153 credits)

*See description of electives under the Departmental Electives Section.

All courses shown in red should be taken as Graduate (G) courses.
MINOR IN COMPUTER ENGINEERING

Students wishing to minor in Computer Engineering must satisfy the following requirements:

1. A core of thirteen credits consisting of EEN 118, 218, 304, and 312.

2. At least five credits of computer engineering electives selected from the following courses: EEN 315, 316, 318, 368, 414, 424, 454/455, 511, 512, 513, 519, 521, 534, 537, 547, 567, 571.

3. Students with a major in Electrical Engineering wishing to add a minor in Computer Engineering must take six Computer Engineering course credits in addition to those needed to satisfy their degree requirements.

4. A minimum grade point average of 2.0 in all EEN courses taken.

DEPARTMENTAL LABORATORIES

The Department maintains a variety of well-equipped laboratories and computers adequate for undergraduate instruction and graduate research. The laboratories and computer facilities include:

Electronics Laboratory
Wireless Communications Laboratory
Digital Signal Processing Laboratory
Electrical Energy Conversion Laboratory
Digital Design Laboratory
Information Technology Laboratory
Microprocessor Laboratory
Electro-Optics and Micro-Devices Laboratory
Distributed Decision Environments Laboratory
Computer Vision and Image Processing Laboratory
Embedded Systems Laboratory
Underwater Imaging Laboratory
Networks Laboratory
Multimedia Laboratory (Arnold Center for Confluent Media Studies)
Digital Audio and Speech Processing Laboratory
ECE Computing Laboratory
Optics and Fiber Communications Laboratory

DEPARTMENTAL ELECTIVES

1. Humanities and Arts/People and Society Electives: selected from the appropriate table found in this Bulletin under the Engineering section.

2. EE Core Electives: EEN 308, 402, 404, 405, 435 and 436

3. ECE Electives: All EEN classes at the 300 level or above
4. Technical electives: All ECE or CoE courses, as well as courses from Math, Physics, Chemistry, Biology, Computer Science, selected in consultation with, and with the approval of, the academic advisor.

5. EE Design Elective: Select one from EEN 435, 454 & 455, 516, 532, 542, 552, 555 or any EEN course approved by the Academic Advisor.

6. Basic Science (/Lab) Electives are selected in consultation with the Academic Advisor from courses in Biology, Chemistry, Environmental Science, Geological Science, Marine Science, or Physics.

7. Computer Engineering Technical Electives are selected in consultation with the Academic Advisor from the following list of courses: EEN 368, 511, 512, 513, 519, 532, 534, 537, 538, 542, 548, 553, 565, 568, 570, 571, 572, 574, 575, 576, 577, 578, 579, 586, and 587 or advisor-approved 300-level (or above) technical course. The EEN 421 and 422 sequence can also be used as one technical elective. In addition, one computer engineering elective course may be selected from the following computer science courses: CSC 517, 518, 527, 529, 540, and 555.

8. Software Engineering Technical Electives are selected in consultation with the Academic Advisor from the following list of courses: CSC329, CSC507, CSC527, CSC529, CSC540, CSC547, CSC555, EEN548, EEN553, EEN562, EEN568, EEN571, EEN572, EEN573, EEN574, EEN575, EEN576, EEN577, EEN579, EEN586, EEN587, (EEN534 or CSC524), (EEN537 or CSC545) or advisor-approved 300-level (or above) technical course.

**INTERNSHIP PROGRAM**

The Department of Electrical and Computer Engineering encourages its students to take advantage of the College of Engineering Internship Cooperative Program with Industry. Students could do that either on a part-time or a full-time arrangement. Students who wish to intern full-time for one semester or for twelve weeks in the summer may apply to earn as much as three credit hours that could be applied to their degree requirement as a Technical Elective. Students interested in such a possibility need to submit a proposal to the ECE Department describing the type of work they expect to accomplish approved by the industrial supervisor. If the proposal is approved the student will be assigned a Faculty Supervisor and will be able to register under EEN499. At the end of the Internship Program, the Student is expected to submit to the ECE Department a technical report with comments from the student industrial supervisor. The Faculty advisor will review the report and submit the appropriate grade for EEN499.

**NOTE 1:** An EEN course for which another EEN course is a prerequisite may not be taken unless the student has completed the EEN prerequisite course with a grade of C- or better.

**NOTE 2:** All EEN courses at the 300 level or above must be taken at UM.

**DEPARTMENTAL HONORS**

See College of Engineering section.
ENGINEERING SCIENCE

INTRODUCTION

The curricula in the engineering sciences have been designed to prepare a student to fill the gap between the pure and applied sciences. The programs have been planned to enable the graduate to meet, work, and communicate with scientists and engineers at all levels of research and development, design and production, sales and distribution and to participate in the rapid and efficient translation of the latest scientific discoveries into technological achievements.

The general curriculum outlined below has been developed to give the student a firm foundation in the engineering sciences supported by a thorough grounding and facility in mathematics, physics and chemistry. In addition, each student will choose an area of specialization in at least one of the Engineering fields of architectural, civil, biomedical, electrical, industrial, or mechanical, and mathematics, chemistry or physics. By being well grounded in both the basic and applied sciences, the student, upon graduation, will be well prepared to assume responsibilities in his/her field of specialization or continue his/her professional development through graduate studies.

The engineering science program is intended primarily for students who expect to pursue graduate studies, and it will not satisfy the licensure requirements for professional engineering registration.

Premedical Studies: When BIL 150 and 160 are added to the course sequence for engineering science, basic premedical requirements are satisfied. Additional specific courses, such as genetics or biochemistry, may be required for admission to certain medical schools. For optimum timing and course selection students who combine premedical studies and engineering science should consult the faculty advisor for engineering science and the Coordinator, Committee on Premedical Studies.

Because of the nature of the curriculum and its goals, the student must maintain a B average. The degree of Bachelor of Science Engineering Science is awarded upon successful completion of the program.

The required curriculum for the degree of Bachelor of Science in Engineering Science (General Concentration) is shown below as is a typical premed curriculum. A Professional Chemistry Concentration in the Engineering Science Program is available (the Professional Chemistry Program, approved by the American Chemical Society, is also available in the College of Arts and Sciences).

MISSION STATEMENT

The mission of the Engineering Science program is to provide excellent undergraduate and graduate education in engineering that will prepare graduates to meet Societies changing needs and aspirations.
EDUCATIONAL OBJECTIVES

The objectives of the Engineering Science program are to educate engineers who:

- have a sound background in the fundamentals of engineering science grounded in mathematics, physics and chemistry
- have abilities and knowledge expected by graduate programs
- are prepared to enter graduate programs with a strong background in pure science

* People and Society (PS)/Humanities and Arts (HA) Electives (to be selected from the appropriate table found in this Bulletin in the College of Engineering section).

** Electives are advanced courses selected in coordination with the Faculty Advisor and require his/her approval.
Mission Statement

The Department of Industrial Engineering’s mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Overview

Industrial Engineering combines science and technical knowledge with human sciences to design, plan, and analyze systems that involve people, materials, money, energy, equipment, and other resources. Industrial engineers work with personnel in research and development, accounting, engineers in other disciplines, maintenance, human resources, and production to increase organizational productivity, improve quality, reduce health care costs, conserve energy, develop public transportation systems, and improve industrial safety conditions. Industrial engineering distinguishes itself from other engineering professions because it has applications in manufacturing, service, commercial, and governmental activities. It is the major branch of engineering concerned not only with technology, but with people, making industrial engineers a prime source of management talent.

Through consultation with his/her academic advisor, a student is assisted in choosing electives which will prepare him/her for a degree of specialization compatible with his/her future goals. The available concentrations are Engineering Management and Manufacturing. Specific courses required in each concentration are described in Degree Programs Section.

The Department of Industrial Engineering offers graduate programs leading to the Master of Science in Industrial Engineering, Master of Science in Environmental Health and Safety, and Master of Science in Management of Technology. The Department also offers a Ph.D. program in Ergonomics and Human Factors and a Ph.D. in Industrial Engineering. For further information, see the Bulletin of the Graduate School.

The Department of Industrial Engineering in cooperation with the School of Business Administration offers a dual MSIE/MBA weekend executive program. For more details of this program contact the Department of Industrial Engineering.

EDUCATIONAL OBJECTIVES

BACHELOR OF SCIENCE IN INDUSTRIAL ENGINEERING

Industrial Engineering Program Educational Objectives

The major goal of the Industrial Engineering program at the University of Miami is to prepare graduates to contribute to the economy by virtue of employment in a variety of industries: manufacturing (heavy and light, traditional and high technology) and service (health care, retail, transportation, logistics, government, consulting, banking, and insurance). In striving to achieve this goal, the objective of the faculty is to provide all
graduates with the mathematical, scientific, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to clients or decision makers in a fashion that facilitates decision-making processes. In addition, superior students are prepared for graduate studies and research. Within the first several years following graduation from the Industrial Engineering program, graduates are expected to be:

1. Working as professionals by adding value in any one of the following sectors:
   - Service
   - Government
   - Consulting
   - Retail
   - Manufacturing

2. Pursuing or holding a graduate degree and/or developing professionally through continuing education, licensure, certification and seminars in a new area or their chosen areas of expertise.

The curriculum includes required courses in mathematics and the physical sciences that ensure a firm scientific background while advanced departmental courses provide specialization. Required courses in the people and society - humanities and arts give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to successfully complete upper level course requirements.

The engineering design experience is interwoven in the curriculum throughout the students’ four years of study.

- Starting with IEN 111 Introduction to Engineering I and IEN 112 Introduction to Engineering II, an introduction to Engineering graphics, Auto CAD, MATLAB, C++, advanced Excel and Access are given.
- The students then move on to take IEN 201 Methods Analysis and Work Measurement where they perform work measurement projects in industry, write reports, and make oral presentations to management. In the Spring of their Junior year, the students take IEN 363 Project Management for Engineers and they are exposed to techniques and tools in project management such as use of network flow and MS Project.
- Students take IEN 361 Industrial Cost Analysis and IEN 380 Engineering Economy where they become aware of the impact of productivity on the economic and social well-being of industry and countries. The students are also introduced to basic models of decision making such as the formulation and evaluation of an economic strategy.
- IEN 406 Computer-Aided Manufacturing introduces the students to product design in manufacturing and modern concepts of CAD/CAM/Automation.
- IEN 441 Deterministic Models in Operations Research focuses on the formulation of linear programming problems and solutions by the simplex method. Related topics include sensitivity analysis, duality theory and network programming. Engineering applications are emphasized.
- IEN 442 Stochastic Models in Operations Research focuses on basic concepts and techniques of random processes that are used to develop models for a variety of engineering and managerial problems. Topics include the Poisson Process, Markov chains, renewal theory, queuing models, and reliability.
• IEN 465 Production and Inventory Control provides a thorough treatment of modern production and inventory management policies, and their ramifications on supply chain management.
• Theory and applications of decision support systems in industrial engineering are covered in IEN 524 Decision Support Systems in IE. The topics include the study of model-based data-based, knowledge-based, and communication-based decision support systems.
• In IEN 557 Ergonomics and Human Factors Engineering both laboratory projects and real-world projects are designed, discussed, and conducted.
• Industry based projects are embedded into several other courses such as IEN 512 Statistical Quality Control and Quality Management, IEN 547 Computer Simulation Systems, and IEN 568 Materials Handling and Facilities Planning.
• IEN 494 Senior Project is a capstone project course where the students pool all of their knowledge and previous design experience into one major project integrating all components of the curriculum together. These projects are usually industry-based. Students prepare written and oral presentations. These presentations are made before top management or engineers of the organization where the projects were conducted in the presence of the faculty representatives from the department.

Real world projects are an integral part of most junior and senior level courses. In these courses, communication is emphasized through requirements for oral presentation and written technical reports. This experience provides the graduates with valuable industrial experience and communications skills while studying at the University of Miami.

The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of production system design, work methods and measurement, human factors engineering, manufacturing processes, computer applications in industrial engineering and operations research.

FIVE-YEAR BACHELOR OF SCIENCE IN INDUSTRIAL ENGINEERING AND MASTER OF SCIENCE IN INDUSTRIAL ENGINEERING (FIVE-YEAR BSIE/MSIE PROGRAM)

This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering. The special conditions for this Five-Year BSIE/MSIE Program are as follows:

1. The student must declare his/her intent to participate before the end of the Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.

2. A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.

3. To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.

4. The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all undergraduate and graduate requirements are satisfied.

* People and Society/Humanities and Arts Electives are selected from a list of approved electives maintained in the department at UM.

** IEN Electives are selected from courses at the 500- or 600-level, offered by the Department of Industrial Engineering.
MINOR

INDUSTRIAL ENGINEERING MINOR
A student majoring in another discipline who chooses to take a minor in Industrial Engineering must complete 15 credits of coursework consisting of the following:
IEN 201
IEN 351
IEN 380 and
Any two 300, 400 or 500 level IEN courses

Substitutions may be accepted with the permission of the Department Chairman.

MECHANICAL AND AEROSPACE ENGINEERING - Dept. Code: MAE
http://www.mae.miami.edu

INTRODUCTION

Engineering is the art of applying the knowledge of science for the benefit of humanity. Mechanical Engineering is the most broadly based area of engineering. It is concerned with the analysis, design, development and application of equipment for such diverse fields as energy conversion, transportation, production machinery, consumer goods, and environmental control. Today’s advanced technology is largely a result of the skill of mechanical engineers who are heavily represented in most fields of modern industry.

Because of the varied careers and opportunities which are available to the Mechanical Engineering graduates, the curriculum emphasizes education in the fundamentals of the physical, mathematical, and engineering sciences, including materials science, solid mechanics, fluid mechanics and thermodynamics. These basic subjects are followed by courses in their application to the design and analysis of engineering devices and systems. The available mini- and micro-computers are utilized for analysis and design throughout the curriculum.

Aerospace Engineering is concerned with the analysis, design and development of a wide variety of aircraft and space vehicles and systems. The undergraduate aerospace engineering program is designed to provide a broad based foundation in aeronautics and astronautics, including topics such as aerodynamics, propulsion, aerospace structures and materials, flight dynamics, control and performance.

In the junior and senior years, the student is assisted in choosing technical electives in preparation for a degree of professional specialization or for further study in engineering, law, business or medicine. With the aid of an advisor and the concurrence of the department chairman, the student may select courses compatible with a variety of career goals.

The department offers two undergraduate degrees: Bachelor of Science in Mechanical Engineering and Bachelor of Science in Aerospace Engineering. Within the Bachelor of Science in Mechanical Engineering program, sequences of courses are available to provide advanced knowledge in such traditional areas as electromechanical design, heat transfer, applied mechanics, fluid mechanics, materials science, and nuclear engineering. There are concentrations in Aerospace Engineering, Environmental Engineering, Energy Engineering, Automobile Engineering, Combustion Engines/Exhaust Emissions, and Heating, Ventilation and Air Conditioning. In addition, a Biomedical Engineering concentration is offered in conjunction with the Department of Biomedical Engineering and the Medical School.

MISSION STATEMENTS

Mission of Mechanical and Aerospace Engineering Department
The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet Society’s changing needs and aspirations.
Mission of the Mechanical Engineering Program
The mission of the Mechanical Engineering program is to provide excellent undergraduate education in Mechanical Engineering that will prepare graduates to meet society’s changing needs and aspirations.

Mission of the Aerospace Engineering Program
The mission of the Aerospace Engineering program is to provide excellent undergraduate education in Aerospace Engineering that will prepare graduates to meet society’s changing needs and aspirations.

EDUCATIONAL OBJECTIVES

The objectives of the mechanical engineering program are to educate engineers who:

(1) have a sound background in the fundamentals of engineering
(2) have the abilities and knowledge expected by industry
(3) are prepared for entry-level jobs in mechanical engineering
(4) are prepared for graduate work in mechanical engineering

The objectives of the aerospace engineering program are to educate engineers who:

(1) have a sound background in the fundamentals of engineering
(2) have the abilities and knowledge expected by industry
(3) are prepared for entry-level jobs in aerospace engineering
(4) are prepared for graduate work in aerospace engineering

GRADUATE STUDIES
Graduate programs leading to the degrees of Master of Science and Doctor of Philosophy are offered by the Department with options in various engineering and interdisciplinary fields. Detailed information is available in the Bulletin of the Graduate School.
## DEGREE PROGRAMS

## Concentrations in Mechanical Engineering

### Aerospace Engineering Concentration

The mission of the aerospace engineer is to design and manufacture payload carrying vehicles to travel distances at the lowest cost in the shortest period of time. The training of the aerospace engineer is by demand multidisciplinary and by spirit pioneering. It includes aerodynamics, propulsion, advanced materials, structures, controls, robotics, electronics and computer usage.

An option has been developed to allow students at the University of Miami to have a concentration of courses in Aerospace Engineering. This concentration in aerospace is built on the existing accredited degree program in Mechanical Engineering.

See Aerospace Engineering Concentration Curriculum.
Energy Engineering Concentration
This concentration provides the fundamentals and applications of various aspects of energy such as solar, hydrogen, electric and nuclear energy sources; energy conversion; internal combustion engines; and energy utilization in heating, ventilating, air conditioning and refrigeration systems. The technical electives related to this concentration include MAE 408, MAE 420, MAE 503, MAE 508, MAE 509, MAE 510, MAE512, MAE 514, MAE 528, MAE 538, MAE 539, and MAE 540. Students can take special project courses in Internal Combustion Engines, Dorgan Solar Energy, Pollution Control, Fluid and Thermal Sciences, and Two-Phase Flow Laboratories.

Biomedical Engineering Concentration
This concentration is built around a 9-credit course sequence which has been developed to familiarize graduate and advanced undergraduate students with the rudiments of anatomy, physiology, biochemistry, and clinical medicine. Completion of the program is intended to aid the student in pursuing a career in medicine or in engineering and design in such areas as extracorporeal life-support systems and prosthetic devices.

The student should take Chemistry 201 as a prerequisite to Biomedical Engineering 501 and 502, Unified Medical Sciences I and II. These Biomedical Engineering courses satisfy the requirements for electives in the Mechanical Engineering Program, but under current regulations, the student will require 131 credits to graduate.

Automotive Engineering Concentration (Internal Combustion Engines)
This program is designed to acquaint the mechanical engineering student with the fundamental science and engineering underlying the design of both conventional and high performance internal combustion engines and the fundamentals of emission formation in combustion systems, automobile mechanisms and structures including vibrations and noise. Included are studies of conventional fuels and synthetic fuels of the future such as hydrogen and methanol.

Technical Electives are MAE 503, 514 and 521.

Environmental Engineering Concentration
In the students junior and senior years he or she should select three People and Society/Humanities and Arts electives from List A below, including one of the 500-level courses, and two Technical Electives from List B.

<table>
<thead>
<tr>
<th>List A</th>
<th>List B</th>

</tr>
<tr>
<td>GEG 341</td>
<td>MAS 547</td>
</tr>
<tr>
<td></td>
<td>BIL 150, 160</td>
</tr>
</tbody>
</table>

HVAC Systems Concentration
This concentration is offered to specialize the mechanical engineering student with the theory and applications of HVAC systems. At least the HVAC Technical Electives MAE 408, MAE 508, and MAE 539 should be selected. The design project for MAE 442-443 will involve air-conditioning component and system design.
Sustainable Engineering Concentration
The Sustainable Engineering concentration focuses on engineering that maximizes the benefits of technology to society while it minimizes the non-renewable resources utilized and the associated impact on the environment of producing and disposing of that technology. Projects in the design courses MAE 342, MAE 441 and MAE 442-443 will focus on Sustainable Engineering, and there will be a Special Project in the laboratory course MAE 404.

Other Concentrations
Concentrations may also be elected in electro-mechanical design, heat transfer, fluid mechanics, solid mechanics, computer aided design, nuclear engineering, materials science and chemical technology by judicious selection of technical electives.

* People and Society (PS)/Humanities and Arts (HA) Electives are selected from the appropriate table found in this Bulletin in the College of Engineering section.

** Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

*** Energy Electives are selected with approval of Faculty Advisor, e.g., MAE 408, MAE 420, MAE 503, MAE 506, MAE 509, MAE 510, MAE 528, MAE 540, MAE 570.
The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of more than 1000 on the Graduate Record Examination (taken before the fifth year). The curriculum requirements for this program are as follows:

**BACHELOR of SCIENCE and MASTER of SCIENCE in MECHANICAL ENGINEERING**

MINOR

MECHANICAL ENGINEERING MINOR

A student in the College of Arts and Sciences choosing the general field of mechanical engineering as a minor must complete 15 credits consisting of the following:

1. A core of CAE 210 and MAE 111.

2. Nine additional credits of Mechanical Engineering electives. These nine credits must be chosen from one of the following areas of specialization:
   d. Thermal Engineering: MAE 303, MAE 310, MAE 408, MAE 420, MAE 441, MAE 503, MAE 508, MAE 510.

DOROTHY H. AND LEWIS ROSENSTIEL
SCHOOL OF MARINE AND ATMOSPHERIC SCIENCE
UNDERGRADUATE

www.rsmas.miami.edu/academics/undergraduate

INTRODUCTION

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School's present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired and additional buildings were constructed to accommodate new wide-ranging projects. In 1969, the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution, made through the Rosenstiel Foundation, to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the Rosenstiel School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of 100 scientists who conduct sponsored research while offering studies leading to the Bachelor of Science, Bachelor of Arts, Master of Arts, Master of Science and Doctor of Philosophy degrees.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate and undergraduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the-art catamaran, unrivaled worldwide for both shallow and deep water research. The vessel, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School, signals a new era in scientific research.

MISSION

The Rosenstiel School strives to be in the forefront of basic and applied research as it applies to the ocean, atmosphere and global environment, with particular emphasis on subjects of societal significance. Our goal is to provide excellence in graduate and undergraduate education and research training, and to be a strong force towards improved environmental understanding and management.
ACADEMIC POLICIES

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the Undergraduate Marine Science and Atmospheric Science Programs is selective and highly competitive. Admission decisions are based on the secondary school record, SAT/ACT score, counselor’s evaluation and the applicant’s essay.

Student Responsibilities

Students of the Rosenstiel School are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study.

Academic Progress

The Rosenstiel School will review each student’s record at the end of each semester. All students in the Undergraduate Marine and Atmospheric Science Program must maintain a cumulative grade point average of 2.5 or better in order to remain in the program. Only those courses passed with a grade of C- or better may be applied to the major or minor.

DEGREE PROGRAMS

The Rosenstiel School of Marine and Atmospheric Science offers degree programs on both the undergraduate and graduate levels for students interested in marine and atmospheric science as a career.

UNDERGRADUATE DEGREE PROGRAMS

The Atmospheric Science program offers a Bachelor of Science in Marine and Atmospheric Science degree in Meteorology, with a curriculum conforming to the recommendations of the American Meteorological Society. The BS in Meteorology is a single major program, though students often combine meteorology with a second major in mathematics or physics, among others. A double major combining meteorology and broadcast journalism through the School of Communications is a popular option.

The Rosenstiel School Marine Science program offers two undergraduate degree options, a Bachelor of Science in Marine and Atmospheric Science and a Bachelor of Arts in Marine Affairs. The Bachelor of Science degree program is meant for students planning to continue with graduate studies in marine science, or for those who will pursue a technical career in this area in government or private industry.

The Bachelor of Arts degree is designed for students planning either non-technical careers with government agencies or private industries directly or indirectly concerned with the ocean, or graduate studies in such areas as business, law, economics, political science, education, or communication.
In cooperation with the graduate program in Marine Affairs and Policy, a five-year BA/MPS program in Marine Affairs is available. This program enables qualified students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Affairs with only one additional year.

**GRADUATE DEGREE PROGRAMS**

Graduate courses in the marine and atmospheric sciences are offered through the Graduate School and the Rosenstiel School of Marine and Atmospheric Science and are listed under the following divisional headings of the Rosenstiel School graduate programs entry in the Bulletin:

- Applied Marine Physics
- Marine and Atmospheric Chemistry
- Marine Biology and Fisheries
- Marine Geology and Geophysics
- Meteorology and Physical Oceanography
- Marine Affairs and Policy

Courses at the 500-level may be taken for undergraduate credit with junior standing and departmental consent.
UNDERGRADUATE MAJORS

ATMOSPHERIC SCIENCE PROGRAM – Dept. Code: ATM

METEOROLOGY

Meteorology is the study of the atmosphere, including climate and climate variability, weather forecasting, cloud and precipitation physics, tropical dynamics, severe weather and hurricanes. Atmospheric scientists use computer models and sophisticated observing systems to describe and understand the atmosphere. The curriculum emphasizes math and physics basics, providing a strong foundation for an intensive study of meteorology. The curriculum, conforming to the recommendations of the American Meteorological Society, prepares students for graduate school and for jobs in industry and government.

The Rosenstiel School offers a Bachelor of Science in Marine and Atmospheric Science with a major in Meteorology. In addition to the General Education Requirements, the following courses are required for the Meteorology major:

Atmospheric Science (32 credits):
ATM103, ATM111, ATM118, ATM243, ATM303, ATM305, ATM405, ATM406, ATM407, ATM409, and either ATM220 or ATM307.

Mathematics (20 credits)*:
MTH161, MTH162, MTH210, MTH224, MTH310, and MTH311**
*Double majors in CBR must take either MTH224 or MTH311, but are not required to take both.
**Students may substitute MTH320 for MTH311.

Physics and Chemistry (14 credits):
PHY205, PHY206, PHY207, PHY208. CHM111, CHM113.

Computer Science (4 credits):
CSC120 or suitable elective.

One free elective in Atmospheric Science, Mathematics or science (3 credits).

Six credits of upper level elective, to be approved by advisor.

Although Meteorology is approved as a single major program, students often combine Meteorology with a second major in such diverse fields as mathematics, marine science or broadcast journalism. Sample curricula can be found at www.meteorology.miami.edu.
METEOROLOGY/MATHEMATICS (Applied Analysis)

A double major in Meteorology and Mathematics (Applied Analysis) provides an excellent foundation for students who want to pursue graduate degrees in meteorology and related fields. The double major curriculum is as follows:

Atmospheric Science (29 credits):
ATM103, 118, 243, 303, 305, 405, 406, 407, 409, and either 220 or 307.

Mathematics (35 credits):
MTH161 and 162 or 171 and 172, 210, 230, 310, 311, 461 (or 561), 433 (or 533), 512, and one of the following two course sequences: 513 and 514, or 515 and 516.

Physics and Chemistry (14 credits):
PHY205, PHY206, PHY207, PHY208. CHM111, CHM113.

Six credits of upper level elective, to be approved by advisor.

MINOR in Meteorology

A Bachelor of Science minor in Meteorology requires the following courses: ATM103, ATM118, ATM220, ATM243, ATM303 and ATM306. Only those courses passed with a grade of “C-” or higher may be applied to the minor.

Atmospheric Science Course Listing
MARINE SCIENCE PROGRAM – Dept. Code: MSC

Marine Science is an interdisciplinary program dealing with the study of the world’s oceans, their physical and biological constituents, the influence of oceanic resources on human society, and the conservation and future development of these resources.

The Bachelor of Science double major in Marine Science prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans. The Bachelor of Science track in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a second major in one of the sciences through the College of Arts and Sciences or the College of Engineering. Common double major combinations are marine science/biology, marine science/chemistry, marine science/geology, marine science/physics, and marine science/computer science. Second majors in Applied Physics, Biochemistry, Engineering (all disciplines), Mathematics and Microbiology are also possible. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credits for graduation.

In addition to the courses that fulfill the General Education Requirements, the required courses for each area of concentration are:

Marine Science/Biology

- Marine Science 111, 215, 216, 230, 232, 301, and 12 credits of elective in Marine Science, at least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
- Biology 150, 151, 160, 161, 250, 255, 330, 360 and 12 credits of elective as described for Biology majors
- (Marine Science 230 and one advanced biology course may fulfill requirements in both Biology and Marine Science)
- Chemistry 111, 112, 113, 114, 201, 202, 205, 206
- Geological Sciences 110 and 114, or 111
- Mathematics 161-162, one semester of a computer or statistics course. The following classes are approved to satisfy the computer/statistics requirement: MSC 204, BIL 311, CSC 120, MTH 224, or PSY 204.
- Physics 205, 206, 207, and either 208 or 209; or Physics 101, 102, 106 and 108 (University Physics is recommended)
- Six credits of upper level elective, to be approved by advisor.
Marine Science/Chemistry

- Marine Science 111, 215, 216, 230, 232, 301, and 12 credits of elective in Marine Science, at least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

- Biology 150, 151 or 160, 161

- Chemistry 111, 112, 113, 114, 201, 202, 205, 206, 304, 316, 320, 360, 364, 365, and one of CHM 401, 441, 520, 563 or BMB 401 or 506 as described for Chemistry majors

- Geological Sciences 110 and 114, or 111

- Mathematics 161-162, one semester of a computer or statistics course. The following classes are approved to satisfy the computer/statistics requirement: MSC 204, MTH 224, CSC 120 or EEN 118.

- Physics 205, 206, 207, and either 208 or 209

- Six credits of upper level elective, to be approved by advisor.

Marine Science/Geological Sciences

- Marine Science 111, 215, 216, 230, 232, 301, and 12 credits of elective in Marine Science, at least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

- Biology 150, 151 or 160, 161

- Chemistry 111, 112, 113, 114

- Geological Sciences 110, 111, 114, 260, 360, 380, 410 or 420, 440, 480, 482, 580, as described for Geological Sciences majors.

- (One course in Geological Sciences may fulfill requirements in both Marine Science and Geology.)

- Mathematics 161-162, one semester of a computer or statistics course.

- Physics 205, 206, 207, and either 208 or 209

- Six credits of upper level elective, to be approved by advisor.
Marine Science/Physics

- Marine Science 111, 215, 216, 230, 232, 301, and 12 credits of elective in Marine Science, at least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

- Biology 150, 151 or 160, 161

- Chemistry 111, 112, 113, 114

- Geological Sciences 110 and 114, or 111

- Mathematics 161-162, 210, 311, and one semester of a computer or statistics course.

- Physics 205, 206, 207, 208, 209, 321, 340, 350, 351, 360, 362, 540, 560 as described for Physics majors

- Six credits of upper level elective, to be approved by advisor.

Marine Science/Computer Science

- Marine Science 111, 215, 216, 230, 232, 301, 321 and 9 credits of elective in Marine Science, at least 6 of which must be at the 300-level or higher.

- Biology 150, 151 or 160, 161

- Chemistry 111, 112, 113, 114

- Computer Science 120, 220, 314, 322, 531 and 6 credits of approved elective, as described for Computer Science majors

- Geography 199

- Geological Sciences 110 and 114, or 111

- Mathematics 161-162 and 309

- Physics 205, 206, 207 and one semester of laboratory

- Six credits of upper level elective, to be approved by advisor.
Marine Science with a second major in one of: Applied Physics, Biochemistry, Engineering (all disciplines), Mathematics, Microbiology and Neurosciences

- Marine Science 111, 215, 216, 230, 232, 301, and 12 credits of elective in Marine Science, at least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

- Biology 150, 151 or 160, 161
- Chemistry 111, 112, 113, 114
- Geological Sciences 110 and 114, or 111
- Mathematics 161-162, and one semester of a computer or statistics course.
- Physics 205, 206, 207, and either 208 or 209; or Physics 101, 102, 106 and 108 (University Physics is recommended)
- Six credits of upper level elective, to be approved by advisor
- Plus all requirements of the second major.

MINOR in Marine Science

A Bachelor of Science minor in Marine Science requires the following courses: Marine Science 111, and 12 credits of Marine Science elective, at least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement for the minor.

Only those courses passed with a grade of “C-” or higher may be applied to the major or minor.
MARINE AFFAIRS

The ocean is acquiring an ever-increasing significance as an avenue of worldwide commerce and communication and as a source of food, energy, minerals and fuels. As nations and private concerns become more involved in the ocean, the need increases for qualified professionals to deal with the commercial and legal complexities of marine affairs. In order to meet this need, the Rosenstiel School offers a Bachelor of Arts degree with a major in Marine Affairs combined with a minor in Anthropology, General Business, Economics, Ecosystem Science and Policy, Geography, International Studies, Latin American Studies, Political Science, or General Business. Students in the School of Communication may include Marine Affairs as a second major. This program is designed for students who wish to prepare themselves for graduate studies and careers in ocean related areas of business, policy, management, law, and communication.

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Affairs are:

- Biology 150, 160
- Chemistry 111, 112
- Marine Science 111, 215, 230, 313 or 314, 310 or 340, 345, 460 and six credits of approved elective in marine affairs.
- Geological Sciences 110 or 111
- Economics 211
- One course in computer programming or statistics
- Six credits of upper level elective, to be approved by advisor.

Marine Affairs courses offered through the graduate Marine Affairs and Policy division at the Rosenstiel School may be taken by upperclass students with permission.

5 Year BA/MPS Program in Marine Affairs

The Rosenstiel School offers a 5 year BA/Master of Professional Science (MPS) Program in Marine Affairs. This program enables qualified Marine Affairs students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Affairs in one additional year. Conditional acceptance to the graduate Marine Affairs and Policy Division is based on the student's GPA at the end of the sophomore year. Students must then apply for acceptance to the graduate program at the Rosenstiel School during their junior year.
HONORS

Honors in the Marine and Atmospheric Science Program may be earned by students who have a 3.5 GPA and have completed 6 credits of independent research and a senior thesis.

REQUIREMENTS FOR GRADUATION

In addition to satisfying the course requirements for graduation with majors in Marine Science, Meteorology and Marine Affairs (specified above under “Undergraduate Majors”), students are expected to satisfy the School’s General Education Requirements. General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the General Education Requirements.

AREAS OF PROFICIENCY

A)  English Composition:  3-6 credits

Students (except those first enrolling in English 103) must take English 105 and 106, or their approved equivalents, in the first year of residence.

Students with an appropriate score on the Advanced Placement [AP] language and literature examination, or with an appropriate score on the International Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT verbal or ACT verbal exams may be exempted from English 105. Those with transfer credit for English 105 will take English 106 or its equivalent in the first year of residence.

B)  Writing Across the Curriculum

Every student must complete five (5) writing-oriented (W) courses beyond ENG 105 and 106. Students are required to write at least 4000 words in each W course. Writing assignments will be graded on both content and style. All literature and foreign language literature courses receive writing credit. Transfer students must satisfy at least three (3) courses of the writing requirement at the University of Miami.

C)  Mathematics

Bachelor of Arts in Marine Affairs:  3-6 credits
Bachelor of Science in Marine and Atmospheric Science: 11-12 credits

B.S. degree candidates must earn 11-12 credits, consisting of two semesters of Calculus: MTH 161-162, or equivalent and either a) one semester of a computer course approved by the department; or b) a statistics course approved by the department.

B.A. degree candidates who do not place out of MTH 101 must take MTH 101 or MTH 107 during their first year. In addition, all B.A. degree candidates must take one of the following MTH courses: MTH 108, MTH 113, MTH 130, or MTH 161.
AREAS OF KNOWLEDGE

A) People and Society (Social Sciences): 6 credits

Students must earn six credits in the Social Sciences. Courses in the following areas may be used to fulfill this requirement: Africana Studies (AAS); American Studies (AMS); Anthropology (except APY 203); Economics (ECO); Ecosystem Science and Policy (ECS 113 or 302 only); Education and Psychological Studies (EPS); Geography and Regional Studies (except GEG 120); International Studies (INS); Judaic Studies (JUS); History (HIS); Political Sciences (POL); Psychology (PSY); Sociology (SOC); Teaching and Learning (TAL); Women’s and Gender Studies (WGS), and the following courses: Broadcasting and Broadcast Journalism (CEM 102); Mass Media Communication in Society (COM 101); Communication Theory (COM 110); Interpersonal Communication (COS 112); Nonverbal Communication (COS 118); Political Communication (COS 336); Persuasion (COS 472).

One approved First Year Seminar course may be taken for the Social Sciences requirement.

B) Arts and Humanities: 12 credits

Students must earn twelve credits from among the four areas listed below. No more the six credits may be earned in any one area.

Fine Arts: courses in the departments of Art and Art History, Dance (DAN 250 only), Musicology, Music Theory (MTC 125 only), and Theatre Arts (THA 101 only) count toward this requirement.

Literature: literature courses in the departments of English (200-level and higher), Modern Languages and Literatures (300-level and higher) and Classics (CLA 220, CLA 310, CLA 311 and CLA 370) count toward this requirement.

Modern or Classical Languages: modern language courses numbered 101-212, or courses in Greek or Latin, count towards this requirement so long as the language differs from the student’s native language, and if, when beginning with a 101-level course, they also take the 102-level course in the same language.

Philosophy and Religious Studies: courses in the departments of Philosophy and Religious Studies count toward this requirement.

One approved First Year Seminar course may be taken for the Arts and Humanities requirement.

C) Natural World (Natural Science)

Bachelor of Arts in Marine Affairs: 9 credits
Bachelor of Science in Marine and Atmospheric Science: 4-8 credits

B.A. degree candidates must earn nine credits in two of the following disciplines: Biology, Chemistry, Ecosystem Science and Policy (except ECS 113 and 302), Geological Sciences, Marine Sciences, Physical Sciences, and Physics. APY 203 and/or GEG 120 may also be taken for this requirement.
B.S. degree candidates minoring in one of the subjects approved as a B.S. major must earn 4 credits, and those minoring in other subjects must earn 8 credits, in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credits must be taken in a department other than the major or the minor, and must be earned in courses that count toward a major in that department.

[Marine Science Course Listing]
INTRODUCTION

The University of Miami Frost School of Music awards the Bachelor of Music degree with majors in nine areas: Composition, Performance, Music Education, Music Engineering Technology, Music Business and Entertainment Industries, Music Therapy, Studio Music and Jazz, and Bachelor of Science in Music Engineering.

The Bachelor of Arts in music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and prelegal. A minor outside the Frost School of Music is required. A second major outside the School of Music can sometimes be pursued.

The Master of Music is offered with majors in Music Education, Music Therapy, Theory, Composition, Performance (voice, piano, conducting, harp, woodwind, multi-woodwinds, brass, percussion, and stringed instruments), Musicology, Accompanying and Chamber Music, Jazz Performance, Jazz Pedagogy, Music Business and Entertainment Industries, Studio Jazz Writing, Media Writing and Production. A joint Doctor of Jurisprudence (JD) and Masters in Music Business and Entertainment Industries is offered jointly with the School of Law. Music Engineering Technology is offered by the School of Music as a Master of Science Degree.

The Doctor of Philosophy degree in Music Education and the Doctor of Musical Arts degree also are offered. Refer to the appropriate section of the Graduate Bulletin for policies concerning admission, course of study, residence, research, tool requirements, examinations, candidacy, and dissertation/final project requirements.

MISSION

As one of the most comprehensive music units in American higher education, and as a free-standing school within a major research university, the Frost School of Music perpetuates a historic commitment to the values inherent in the juxtaposition of professional and general studies in undergraduate curricula. The comprehensiveness of the School’s undergraduate and graduate programs manifests a philosophy that places importance upon establishing and maintaining connections between its instructional and associated activities and the broad spectrum of music and music-related fields for which it seeks to prepare its students.

In broadest terms, the four-fold mission of the Frost School of Music is to provide a high quality music education and training for its undergraduate and graduate majors; foster advancements in music performance, creativity, scholarship, and teaching among its faculty; serve the general student population of the University; and act as an educational and cultural resource for the University, South Florida, and as appropriate, for national and international constituencies.
ACCREDITATION

The Frost School of Music has been a member of the National Association of Schools of Music since 1939. The requirements for entrance and for graduation as set forth in this Bulletin are in accordance with the published regulations of this Association.

GOALS

The primary goals are:

1. to provide music majors with a high quality pre-professional education,

2. to provide opportunities for other University students to increase their musical skill, understanding, and appreciation,

3. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and

4. to serve as an educational and cultural resource for the University, South Florida, and global communities.

PHYSICAL FACILITIES

Henry Fillmore Band Hall (1958) has a rehearsal hall, uniform and instrument storage, the band library, offices, and the Henry Fillmore Museum.

Nancy Greene Hall (1960) contains a rehearsal hall, studio-offices, and ensemble library.

The Percussion Building (1968) is the percussion teaching studio and office.

The Bertha Foster Memorial Music Building (1960, with second story addition completed in 1970), contains practice rooms and teaching studios, pipe organ studio, an electronic music laboratory, and two studios equipped for audio and video recording.

The Gusman Concert Hall (1975) houses the administrative offices, data processing center, and the Music Engineering Technology center. The 600 seat sound chamber is one of the finest concert facilities in the Southeast.

The L. Austin Weeks Center for Recording and Performance (1994) contains the 150 seat Victor E. Clarke Recital Hall, featuring adjustable acoustics, a pre-function area, a green room, and a state-of-the-art recording studio. The recording area of the building features 48-track digital recording capabilities with a computer automated console, and a multimedia workstation.

The Marta and Austin Weeks Music Library and Technology Center (2005) contains a 15,300 square-foot library which houses collections of books, scores, recordings, special collections, reference works, and computer facilities. The 5,200 square-foot advanced technology center contains six labs, each servicing a specific program for higher-level work, including a music engineering lab, two keyboard/computer labs, a multimedia instruction and learning lab, an
electronic and computer music lab, and a media-writing and production lab.

PERFORMING ENSEMBLES

Through regular rehearsals and public concerts, ensembles provide performing experience for all students on the University of Miami campus. Membership in each of these performing ensembles is based on auditions. Students interested in instrumental music may participate in any of the following:
Accompanying
American Music Ensemble (Songwriters)
Avant Garde Ensemble
“Band of the Hour” Marching Band
Bluegrass Ensemble
Blues Ensemble
Brass Chamber Music
Brass Choir
Clarinet Choir
Classical Guitar Ensemble
Concert Jazz Band
Contemporary Music Ensemble
E.C.M. Ensemble
Electronic Music Ensemble
Flute Choir
Funk/Fusion Ensemble
Horace Silver Ensemble
Jazz Bass Ensemble
Jazz Guitar Ensemble
Jazz Keyboard Ensemble
Jazz Saxophone Ensemble
Laptop Ensemble
Mallet Ensemble
Monk/Mingus Ensemble
Percussion Chamber Music
Rock Ensemble
Salsa Ensemble
Saxophone Ensemble
Small Jazz Ensembles
String-Keyboard Chamber Music
Studio Jazz Band
Studio Rhythm Section
Symphonic Winds
Symphony Orchestra
Synthesizer Ensemble
The Other Music Ensemble
Trombone Choir
Tuba Ensemble
University Band
Wind Ensemble
Woodwind Chamber Music
Jazz Band III
Vocal experience may be gained through participation in the

Chamber Singers
Jazz Vocal I-III
Men’s Chorale - Maelstrom
Musical Theatre Workshop
Opera Theater
Symphonic Choir
University Chorale
Women’s Chorale - Cantilena

PUBLIC PERFORMANCES

During the academic year, the Frost School of Music presents more than 300 student forums, student and faculty recitals, concerts, lectures, master classes, and guest artist recitals. Student ensembles and faculty present numerous master classes, recitals, and concerts throughout the United States and abroad.

Students are encouraged to attend recitals, concerts, master classes, and festivals which are presented within the Frost School of Music as well as throughout metropolitan Miami.

PROFESSIONAL SOCIETIES and STUDENT ORGANIZATIONS

In addition to other extra-curricular activities of the University, the Frost School of Music has established active chapters of Phi Mu Alpha Sinfonia, Sigma Alpha Iota, Music Educators National Conference (student), American Musicological Society, Tau Beta Sigma, Pi Kappa Lambda, Music Entertainment Industry Student Association, Audio Engineering Society, and the Society of Composers, Inc.

SCHOOL OF MUSIC SCHOLARSHIPS

The Frost School of Music grants scholarships based on musical talent. All domestic students seeking scholarship funds are encouraged to complete a Free Application for Federal Student Aid and/or other required forms. Please consult with the Office of Financial Assistance Services for further information.

SPECIAL PROGRAMS

Workshops and clinics are offered to enrich the musical knowledge of in-service teachers and professional musicians during the academic year. The program of activities continues through the summer when special workshops and seminars are offered. Opportunities for pre-college students are provided in all areas of music and dance throughout the year.

MUSIC FOR NON-MUSIC DEGREE STUDENTS

Certain music courses are available to students not enrolled in a music degree program. Pre-college students, matriculating University of Miami students, and interested community adults may enroll in these courses. Students who are not currently enrolled at the University of Miami but who wish to pursue courses will need to apply as a special student through the Frost School of Music Office of Admission.
Non-music majors wishing to enroll in performance study are required to audition and may, with the permission of the appropriate faculty member and the undergraduate or graduate dean, register for one or two credits a semester upon payment of tuition and an applied music fee of $200.00 per credit. Performance study by non-music majors is subject to teacher availability.

ACADEMIC POLICIES

REQUIREMENTS FOR ADMISSION

ADMISSION TO THE FROST SCHOOL OF MUSIC

Students admitted to the Frost School of Music must successfully complete a dual admission process. In addition to the general requirements for admission to the University, the undergraduate student must meet the following requirements of the Frost School of Music:

1. Submit a Frost School of Music Application directly to the Frost School of Music Admission Office.

2. Submit an Application for Undergraduate Study directly to the University Office of Undergraduate Admission.

3. Demonstrate performance proficiency by auditioning on campus, at designated regional audition centers, or by recording. The audition will be evaluated by appropriate faculty committees.

4. After being admitted to the University each student will be required to participate in placement auditions and exams in theory and applied music (performance). These examinations will be given immediately prior to registration in the fall.

5. Transfer students who are admitted to the University will receive a tentative evaluation of their previous work from the office of Admission. Validation of credits in music will be based on the results of auditions and placement examinations discussed above. The Assistant Dean for Undergraduate Studies of the Frost School of Music determines which transferred courses will meet specific requirements for graduation.

6. Admission is granted in Fall semesters only.

Students who are admitted to the Frost School of Music must begin a program of specialized requirements in music during their first semester.

ADMISSION TO THE UNIVERSITY (UNDERGRADUATE STUDENTS)

Application forms and bulletins for undergraduate students may be secured from the University of Miami web site at www.miami.edu. The University Office of Admission receives and processes all undergraduate applications, evaluates credentials, and mails letters of acceptance to applicants who qualify for entrance. Because of the University’s selective admissions policy and limited enrollment only those applicants are accepted who present evidence of intellectual promise, unusual talent and potential, and strong personal qualifications. Admission as a transfer student requires a 3.0 grade point average from the previous institution. Admission to the University in all cases is determined by the University Office of Admission and the Frost School of Music.
Prospective students should make formal application for admission in the fall of the senior year in high school. The Frost School of Music does not participate in the Early Decision or Early Action program.

**PLACEMENT TESTS**

Upon entering the Frost School of Music, students must demonstrate through placement auditions college-level performance on their instrument and in music theory. Results of placement tests will enable music advisors to assist students in selecting the appropriate program and level of study.

**ENGLISH and MATHEMATICS REQUIREMENTS**

Students requiring English 105, English 106, or Mathematics 101 must enroll for these classes during the first year in residence and are not permitted to drop.

**AUDIT**

Due to the nature of music courses, it is not possible for a student to audit courses offered in the Frost School of Music.

**PERFORMANCE STUDY**

**BULLETIN DESCRIPTION**
The study of a musical instrument privately or in a small group. Prerequisite: Audition.

**PERFORMANCE MAJOR**
A Performance Major aspires to a professional career in music performance.

**PRINCIPAL INSTRUMENT**
Non-Performance Majors study a principal instrument to develop their music performance skills to the fullest extent possible.

**PERFORMANCE INSTRUCTION**
The letter designations A through R classify the levels of undergraduate and graduate performance instruction. The letters A through H signify undergraduate study; letters I through L, master’s study; and letters M through R, doctoral study. Transfer students enroll in Level A for the first semester and are placed at an appropriate classification level of study based on the results of the Jury at the end of each semester.

**CREDIT FOR LESSONS**
The number of credit hours awarded for performance study is determined by the student’s curriculum. Students enrolled for two credits of performance study are required to perform a Jury at the end of each semester.

**JURY**
The purpose of the Jury is to evaluate student musicianship and technique progress. Students enrolled for 2 credits of private lessons are required to play a Jury before a panel of performance faculty at the end of each semester. Juries are held during Reading Days. Students perform technical requirements and repertoire as assigned by their performance study teacher.
The private teacher prepares a Jury Sheet that lists the repertoire covered during the semester and the studio grade, for each student. The grade is recorded on the Jury Sheet and placed in the student’s file. The final grade can be lowered as a result of poor recital attendance or other requirements specific to the student’s program of study.

**PERFORMANCE WARNING, PROBATION AND DISMISSAL**

The following applies to all majors and programs in the Frost School of Music:

Students earning a grade of C+ or lower in performance study will be placed on Performance Warning for one semester. A subsequent grade of C+ or lower in performance study will result in Performance Probation for one semester. Following Probation, an additional grade of C+ or lower in performance study will result in dismissal from the Frost School of Music.

**Students Who Fail to Successfully Complete a Music Course**

Students who fail to successfully complete a music course after the second enrollment will be dismissed from the Frost School. Courses may not be dropped during the second enrollment.

**SUMMER LESSONS**

During each of the five-week summer sessions, students may register for one credit of performance study and receive a one-hour lesson per week. Summer lessons do not fulfill degree requirements.

**SPECIAL FEES**

Students studying a secondary instrument beyond the required four semesters of secondary piano will be assessed a per-credit fee and must have the approval of the undergraduate dean and program director or department chair. Students who require an accompanist may be assessed an accompanying fee.

**REQUIREMENTS FOR GRADUATION**

The general requirements for graduation from the University of Miami are described in the General Information section of this Bulletin. These general requirements are included in the specific listing of requirements for various majors under the appropriate department in the Frost School of Music. Outlines of achievement levels in applied music for each major are available in the Office of the Dean of the Frost School of Music. The student should consult regularly with his/her advisor and download their Academic Credit Evaluations which track all courses taken to see that all requirements for his/her particular area of concentration degree requirements are being met. Changes or deviations from the printed requirements must be approved in writing by the Dean.

**WRITING COURSES**

Frost School of Music students are expected to complete five writing-intensive courses in addition to English 105 and 106. Courses designated to meet this requirement are identified in the semester course schedule.
Courses satisfying this requirement are those which involve a substantial amount of writing. The preparation of papers in these courses are corrected for diction, syntax, style, and content.

**Non Music or Free Electives**

Non – Music or Free Electives may be chosen from any courses offered by the University except ESS courses numbered below 140.

**Double Degrees**

The only courses that may count for both degrees are the general education requirements (English 105 and 106, People and Society, Natural World, Math, and Humanities). For each degree a student must have a different major and minor if a minor is required. The major for one degree may not be a minor for the other degree.

**MINORS**

**MUSIC MINOR**

Any student wishing to declare a minor in music must audition on an instrument and be approved by the Frost School of Music as a minor. The approval form can be picked up at the Undergraduate Dean’s Office at the Gusman Concert Hall. A fee is assessed for private instruction. Please note that a minor in certain instruments may not be available. Minors are not available in Jazz Instruments or Jazz Voice. Availability on other instruments and voice varies from year to year depending on studio space.

A minor in music consists of 20 credits (at least 16 credits must be earned at the University of Miami):

- Music theory (MTC) 109, 110: 6 Credits
- Music literature (MCY) 131, and 3 credit MCY elective: 6 Credits
- Music performance (Instrument/Voice, 4 semesters of 1 credit lessons): 4 Credits
- Ensembles: 2 Credits
- Music Electives: 2 Credits

**HONORS**

See general Honors program described elsewhere in Bulletin.
UNDERGRADUATE ACADEMIC PROGRAMS

DANCE – Dept. Code: DAN

There is currently no Undergraduate degree for Dance.

MINOR IN DANCE

A minor in dance is intended for students interested in developing basic teaching skills for elementary and secondary dance education. Prospective students interested in this minor are required to audition for acceptance as well as maintain a grade point average of 3.0 in dance courses. 20 credits are required.

Orientation to Dance (DAN 130) This course is a prerequisite for all students who are interested in the minor in Dance 2 credits
Advanced studio technique (DAN 311 or 411 and DAN 211 and 311 or DAN 311 and 411) 6 credits
Dance education and history (DAN 385 or DAN 585 and DAN 450 or DAN 550) 6 credits
Dance education electives (DAN 285, 286, and 290) 2 credits
Studio Electives (DAN 111, DAN 190, DAN 140, DAN 240, DAN 340, DAN 280, and DAN 380) 4 credits

Dance courses are open to all university students with the approval of their advisor. For further information, contact the Dance coordinator.

Dance Course Listing
PERFORMANCE

INTRODUCTION

The mission of the Bachelor of Music Degree is to (1) provide the highest quality of education possible in the areas of musicianship that will provide the foundation for graduate degree work which will lead toward a professional performance career as a classical artist; (2) to provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research (3) to provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

EDUCATIONAL OBJECTIVES

- Students will develop musicianship skills and technique adequate for acceptance into graduate study for fostering a professional career as a solo classical performer.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble adequate for acceptance into graduate study leading towards a professional career as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for acceptance into graduate study for fostering a professional career as a solo classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.

**Vocal Performance Course Listing**
MUSIC EDUCATION AND MUSIC THERAPY - Dept. Code: MED

INTRODUCTION

A basic premise of the Music Education program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical and practical foundation in music education. The instructional program should prepare students for teaching all areas of the instructional specialization (e.g. choral, general, instrumental music) while allowing them to develop a specialization in a given area of music teaching. The theoretical and practical foundations in our series of music education techniques and methods courses incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners.

Program Goals:

• Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.

• Enable students apply the musical and instructional skills developed in the program (and reinforced during field experience and student teaching) to teach music in elementary, middle, and senior high schools.

• Prepare students to plan and sequence music instruction at all levels.

• Help students develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.

• Help students develop skills in integrating information from the diverse professional literature into their teaching.

EDUCATIONAL OBJECTIVES

• Students must demonstrate generic competencies required by the University in general education courses.

• Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida, including 13 credits in Teaching and Learning (TAL) and a minimum of 32 credits in Music Education (MED).

• Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree, including 66 credits in music.

• Students must demonstrate teaching competencies related to the core courses in the music education specialization, including a minimum of 32 credits in Music Education.
DEGREE PROGRAMS

Bachelor of Music

MAJOR

Music Education (MED)
Music Education with Jazz Emphasis Instrumental (MEDJI)
Music Education with Jazz Emphasis Vocal (MEDJV)

The Music Education curriculum is designed to prepare students to teach music in public and private schools at both the elementary and secondary grade levels. All Music Education majors must perform at a high level either vocally or on an instrument. Students must successfully complete the Florida General Knowledge Examination (FGKE) to be admitted to teacher candidacy and the Florida Teacher Certification Examination (FCTE) to graduate.

Instrumental majors must develop knowledge of and performance ability on wind, string, and percussion instruments sufficient to teach beginning students. All choral and general music majors must develop adequate vocal skills to assure effective use of the voice in teaching.

Admission to and/or retention in the music education curriculum leading to Florida Teacher Certification requires that students be formally screened with respect to specific criteria. Following are the Requirements for Admission to Teacher Candidacy and for Admission to Associate Teaching:

Admission to Teacher Candidacy

1. Acceptance as a major in the music education program.
2. Satisfactory performance on the FGKE and the FCTE.
3. Completion of 55 semester hours of credit. (Transfer students must have at least 12 semester hours of credit earned at the University of Miami.)
4. No grade less than a C in TAL & MED courses.
6. Required Background Check completed.

Admission to Student Teaching

1. Approval of MED faculty members.
2. Completion of 90 semester hours of credit.
3. Completion of at least three-fourths of the courses in the teaching major, verified by advisor.
4. Completion of and a C or better in all MED & TAL courses

5. Completion of pre-internship field experiences with above-average evaluations.

Please be advised that the State of Florida may implement new requirements for certification.

*These requirements will be mandatory with or without notice in this bulletin.* The student is responsible for securing the application for certification and submitting the necessary documents and fees to the Florida Department of Education to obtain certification and endorsement. The DOE Certification Ombudsman in the School of Education is available to assist with certification and re-certification matters.

MUSIC THERAPY - Dept Code MTY

INTRODUCTION

The music therapy program provides students with the opportunity to develop comprehensive musicianship as well as clinical knowledge and skills within a rich musical, scholarly and communicative environment. Music therapy majors must demonstrate musical proficiency, either vocally or instrumentally, and must acquire musical competency on guitar, piano, voice and percussion.

Graduates of this program are prepared for careers as professional music therapists in a variety of health care and educational settings. Furthermore, graduates are eligible to take the Board Certification Exam in music therapy, leading to the credential, Music Therapist Board Certified (MT-BC). The music therapy curriculum is approved by the American Music Therapy Association, and is based on the clinical and research paradigm known as Neurologic Music Therapy.

The MTY/MED Double Major prepares individuals for careers working in school settings with special needs children or adolescents.

To remain in the Music Therapy program, students must earn a minimum 2.5 GPA each semester. Additionally, music therapy core courses must be completed with a grade of C or higher. All internship applications must include a written letter of recommendation from a music therapy faculty member.

EDUCATIONAL OBJECTIVES

The music therapy program is designed to address three primary objectives:

- Comprehensive musicianship: through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.

- Knowledge of human behavior: by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.

- Knowledge of Music Therapy: students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context. Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through six consecutive semesters of clinical practica in addition to a six-month, full-time clinical internship.

**NOTE:** It is recommended that students plan to take general education courses in the summer. This will reduce the academic load during the regular school year.

Minimum 2.5 GPA must be maintained in music education core courses. Must pass all courses in MED and TAL with grade of C or above.

A grade of C or above is required in all music therapy core courses.

* Must pass with a grade of C or above.

** Required if math placement is MTH 101 or lower.

*** All internship applications must include a written letter of recommendation from a music therapy faculty member.

# Must pass with a grade of C or above.
In order to apply for graduate studies in music therapy, students must complete either a bachelor’s degree in music therapy or a music therapy equivalency program.

THE MUSIC THERAPY EQUIVALENCY PROGRAM

The equivalency program is designed for the individual who has already completed a bachelor’s degree in a related discipline, including the following courses:

Music Theory I, II, III and IV; Music History I and II; Conducting, Arranging, Applied Lessons (6 semesters), Performing Ensembles (8 semesters), Piano Competency (4 semesters of either lessons or group piano) and Introduction to Psychology.

Beyond these courses, the program consists of 50 credit hours that can be completed in two years, followed by a six-month clinical internship. All internship applications must include a written letter of recommendation from a music therapy faculty member. Please contact the Music Therapy Program Director for a listing of the 50 credit hours.

If any of the prerequisite courses have not yet been completed, they can be taken at the University of Miami. Taking these additional courses, however, may lengthen the amount of time required to complete the equivalency program. In certain situations, alternate courses from other universities can substitute for the required courses. Depending on the nature of the course, this decision will be made by the undergraduate dean, in consultation with the Music Therapy Program Director.

In order to determine exactly how many credits are required to complete the equivalency program, the student should obtain official transcripts for their previous degree and meet with the music therapy program director. Following completion of the course and internship, students are then eligible to sit for the music therapy board certification exam and can become professional members of the American Music Therapy Association (AMTA).

For students wishing to pursue graduate studies in music therapy, the equivalency program can be combined with the master’s degree in music therapy.

Music Education and Music Therapy Course Listing
MUSIC MEDIA AND INDUSTRY - Dept. Code: MMI

The Department of Music Media and Industry includes two programs, Music Engineering Technology and Music Business and Entertainment Industries.

MUSIC BUSINESS AND ENTERTAINMENT INDUSTRIES

INTRODUCTION

The Bachelor of Music in Music Business and Entertainment Industries is a professional degree program designed to prepare qualified musicians for careers in the business management, financial, legal, and artistic areas of the music industry. Music, business, and music business courses are combined in an interdisciplinary curriculum which includes a minor in Marketing, Legal Studies, Business Administration, Management, Finance, Computer Information Systems, Public Relations, or other approved business-related area. The MBEI program also features a capstone music or entertainment industry internship.

EDUCATIONAL OBJECTIVES

- Students will have a conceptual understanding of the structures and interrelationships of the music and entertainment industries.
- Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
- Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
- Students will know how to promote and sell a music industry product.
- Students will have an understanding of the performing artist as a major economic factor in the marketplace.
- Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

THE BRUCE HORNSBY CREATIVE AMERICAN MUSIC PROGRAM

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a Minor in Creative American Music.

THE CONTEMPORARY PERFORMANCE PRINCIPAL

Recognizing that many talented songwriters may not always have a background in traditional performance areas, the Contemporary Performance Principal accommodates Creative American Music students who are not classical or jazz musicians. Contemporary instruments include Guitar, Voice, Bass, Keyboard, Media (Alternate Controllers), and Percussion (Drums). The Contemporary Performance Principal is restricted to songwriters who are also applying to the Creative American Music Program and to the following majors: Music Business and Entertainment Industries, Music Engineering Technology, Media Writing and Production, Music Education, and Music Therapy. Pre-screening and audition required.
## BACHELOR OF MUSIC: MUSIC BUSINESS & ENTERTAINMENT INDUSTRIES

---

1 Contemporary Performance is available in Guitar, Bass, Drums, Keyboards, Media, and Voice by audition only upon acceptance into the Creative American Music Program.

**NOTES:** Students must maintain a minimum GPA of 2.70 to remain in the MBEI Program.

* Must pass with grade of C or above.
** MTH 101 required if Math placement is MTH 101 or lower.
MUSIC ENGINEERING TECHNOLOGY

INTRODUCTION

The mission of the Music Engineering Technology program is to (1) provide the highest quality education in the field of music engineering; (2) promote advancements in the fidelity and creativity of music recording, production and reproduction; and (3) promote advancements in the invention, design and implementation of audio hardware and software. The goals of the Music Engineering Technology program are to (1) further enhance the program's national and international stature; (2) obtain teaching infrastructure and resources needed to provide contemporary education in the field of music engineering technology; (3) ensure that curricular offerings are current and able to educate students in new and future theory and practice; and (4) to help graduates find professional career positions.

EDUCATIONAL OBJECTIVES

- Understanding the theoretical basis of sound recording, processing and reproduction.
- Understanding the practice techniques used in sound recording, processing and reproduction.
- Designing and implementing original audio hardware and/or software.
- Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

DEGREE PROGRAMS

Bachelor of Science in Music Engineering Technology (MUE)

MAJORS

Music Engineering (MUE)

The Music Engineering Technology curriculum is designed for musicians interested in pursuing a career in music recording, audio hardware and software design, and related professions in the audio, audio-video, multimedia, and internet industries. The program is interdisciplinary in nature; it includes courses in music, music engineering, computer science, electrical engineering, and mathematics. This program includes a minor in Electrical Engineering or a double major in Computer Science. Freshman students are expected to enroll in calculus, which carries a prerequisite of Trigonometry and Analytical Geometry. Prospective students are expected to have a strong background in music performance and in mathematics.
### BACHELOR OF SCIENCE: MUSIC ENGINEERING TECHNOLOGY

**With Minor in Electrical Engineering and/or Computer Engineering**

**Experiential Music Curriculum**

### NOTES:

- A minimum 2.7 GPA is required to remain in the Music Engineering Technology program.
- A minimum 2.0 GPA is required in all EEN courses taken.
- * Must pass with grade of C or above.
- # For electrical engineering minor, take EEN 306.
- For computer engineering minor, take EEN 318 or EEN 424.
- For dual minor, take EEN 306 and either EEN 318 or EEN 424.
- @ Adv. Approved Mus. Eng. Tech. Elective - 12 credits to be selected
  - Approved courses at 400+ level which contain substantial technical/creative content. Some examples:
    - MMI 460 (Recital Recording & Sound Reinforcement) (max of 3 cr)
    - MMI 465 (Internship in Music Engineering) (3 cr)
    - MMI 504 (Audio Analysis & Synthesis)
    - MMI 505 (Advanced Audio Signal Processing)
    - MTC 416 (Orchestration)
    - CMP 594 (Motion Picture - Sound Design/Sound Theory)

Students may use one of the above electives to satisfy a minor in either Electrical or Computer Engineering.
MUSICOLOGY – Dept. Code: MCY

Undergraduate students who are interested in musicology, music history or ethnomusicology are encouraged to enroll in the Bachelor of Arts in Music degree, through which they can pursue these and related subjects within a liberal arts music curriculum. [There is no Bachelor of Music degree in Musicology.]

BACHELOR OF ARTS IN MUSIC

INTRODUCTION

The mission of the Bachelor of Arts in Music is to provide students with the highest quality education possible in music, provide a broad education in the liberal arts, and provide in-depth study in an academic area outside of the Frost School of Music.

EDUCATIONAL OBJECTIVES

- Students will acquire a thorough knowledge of music theory and music history, and develop advanced competence in musical performance.
- They will develop the ability to think, speak, and write clearly with the capacity to explain and defend their views effectively and rationally based on substantive knowledge of the liberal arts.
- The student will acquire competency in a selected non-music academic area that includes a broad understanding of the area and contemporary thought within the area.

DEGREE PROGRAMS

Bachelor of Arts in Music

MAJOR

Bachelor of Arts in Music (BAM)

The Bachelor of Arts in music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and prelegal. A minor outside the Frost School of Music is required. Students in the BA in Music Program must earn a minimum 2.5 GPA each semester to remain in the program.

### NOTE:
- Many students take 2 credits of Instrumental/Voice in order to receive a full hour lesson per week (1 credit lessons are a half hour per week).
- * Must pass with grade of C or above.
- ** Required if Math placement is MTH 101 or lower
- *** Music courses can count for Arts courses
- Courses for Minor (or second Major) depend upon requirements of the department

[Musicology Course Listing](#)
INTRODUCTION

The Bachelor of Music in Composition is designed to (1) provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition, production, and performance; (2) to provide student access varied composition communities; (3) to continue to build upon the Frost School of Music's reputation as an innovative, forward-thinking, and first-rate center for advanced study; and (4) to maintain the highest educational, professional, and ethical standards. Goals of the program are (1) to provide students with training to be fluent in basic compositional skills; (2) to help students understand various directions that available to composers in the 21st century; and (3) to help students perform, produce, or realize their music.

The Commercial Music & Production track within the Theory & Composition curriculum is designed to prepare undergraduate students for the many issues facing today's commercial music writers and producers. In this specialized program, successful students complete diverse compositional assignments, develop technical and practical skills in the recording studio, and acquire an understanding of the music industry. Prospective students should furnish evidence of outstanding compositional ability as well as basic sequencing and music notation skills.

EDUCATIONAL OBJECTIVES

- Students develop basic compositional skills of varying lengths and genres.
- Students compose or produce works utilizing various compositional techniques and styles.
- Students compose works for varied instrumentation and/or media.

DEGREE PROGRAMS

Bachelor of Music in Composition

MAJOR

Music Theory and Composition (MTC)
Media Writing & Production (MWP)
MINOR

MINOR IN MUSIC COMPOSITION

A minor in music composition is primarily intended for students in the Frost School of Music who are pursuing majors in other fields within the Frost School. Students interested in this minor are required to submit a portfolio to the chairman of the department for approval before declaring the minor. The minor consists of 15 credits.

Composition I (MTC 101) 2 credits
Composition II (MTC 102) 2 credits
Composition III (MTC 201) 2 credits
Composition IV (MTC 202) 2 credits
Composition Workshop (MTC 182) 4 credits
Orchestration (MTC 416) or Twentieth Century Techniques (MTC 312) 3 credits

The curriculum in Composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Theory or Composition. Prospective students are expected to furnish evidence of compositional ability.

## Music Theory - Composition Course Listing

472
INTRODUCTION

The mission of the Studio Music and Jazz Performance Program is to: (1) prepare jazz instrumentalists to enter the music profession or graduate school; (2) identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career; (3) foster faculty creativity and performance which serves as a role model for students; (4) develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities; (5) produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast; and (6) provide a platform of learning that includes performance, composition,arranging, technology, conducting, scholarship and production.

EDUCATIONAL OBJECTIVES

- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

DEGREE PROGRAMS

Bachelor of Music in Studio Music & Jazz

MAJOR

Studio Music & Jazz Instrumental (MSJI)
Studio Music & Jazz Vocal (MSJV)
MINOR

MINOR IN STUDIO MUSIC AND JAZZ (INSTRUMENTAL)

A 12 credit minor is available for students enrolled in the Frost School of Music whose principal performance medium is a jazz instrument. Permission of studio teacher required. The following courses must be taken to fulfill the requirement of this minor:

- Analysis and Evolution of Jazz Styles (MSJ 113) 3 credits
- Introduction to Jazz Improvisation (MSJ 124) 3 credits
- Jazz Improvisation Theory I (MSJ 371) 3 credits
- Advanced Modern Arranging I (MSJ 519) 3 credits

INSTRUMENTAL EMPHASIS

The instrumental curriculum in Studio Music and Jazz is designed for interested and qualified students who desire to continue to develop to the highest degree their background and skills in the performance of studio music and jazz. Admission to this major pre-supposes musical training in jazz on the principal instrument.

* Must pass with grade of C or above.
** Required if Math placement is MTH 101 or lower.
*** Jazz guitar ensembles required of all jazz guitar majors.
# Must be enrolled in this course in the semester the recital will be performed.

### VOCAL EMPHASIS

The vocal curriculum in Studio Music and Jazz is designed for interested and qualified vocalists who desire to continue to develop to the highest degree their backgrounds and skills in the performance of studio music (recording), jazz, and contemporary pop music. Admission to this major presupposes music training in jazz.

### BACHELOR OF MUSIC: STUDIO MUSIC & JAZZ

(Vocal Emphasis)

Experiential Music Curriculum

[Studio Music and Jazz Course Listing](#)
SCHOOL OF NURSING AND HEALTH STUDIES
www.miami.edu/nur

Please consult your 2012-2013 Student Handbook for the applicable curriculum and program policies. Please note that courses and policies are subject to change throughout the academic year. Check with the Office of Student Services at the School of Nursing and Health Studies for current materials.

The School of Nursing and Health Studies is committed to academic excellence, the advancement of nursing as a discipline, and service to society. Opportunities are available for students to study and earn course credit in a variety of international settings.

MISSION

The mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in the art and science of nursing and health studies through creating and disseminating health knowledge and developing culturally competent leaders to provide service to our community, the nation, and the world.

The mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

STUDENT RESPONSIBILITIES:

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student's responsibility to with all the provisions of the Bulletin. Changes to academic requirements and policies are updated in the School of Nursing and Health Studies Undergraduate Handbook.

The general requirements for graduation from the University of Miami are further described in the GENERAL INFORMATION section of the Bulletin.

STUDENTS WITH DISABILITY ACCOMMODATION POLICY:

It is the policy of the University of Miami School of Nursing and Health Studies to adhere to Standards of the Americans with Disabilities Act. Any students needing special accommodations to complete a course must submit written documentation to the Office of Disability Services (ODS). This office is the primary source responsible for the coordination of auxiliary aids and services for students with disabilities. Information and/or services are available to prospective and enrolled students, their parents and/or sponsors.

FINANCIAL ASSISTANCE:

Students interested in obtaining financial aid in the form of student loans and grants should contact the Office of Financial Assistance Services. Limited, small scholarships are available through the School of Nursing and Health Studies. The qualifications for these scholarships vary; further information is available from the School of Nursing and Health Studies, Office of Financial Assistance Services, and on the SONHS website (www.miami.edu/sonhs).
FACILITIES:

The School of Nursing and Health Studies is located on the Coral Gables Campus. The four-story Jerusalem-stone and stucco Schwartz Center features classrooms and clinical practice labs, seminar and conference rooms, two computer labs, and a simulation academy, all equipped with the latest technology. The spacious 53,000-square-foot facility supports the work of more than 40 nurse scientists and clinical educators and our 741 undergraduate and graduate students enrolled in the school’s nursing and health science programs annually. The building opened in fall 2006. Library resources for nursing students are at the Otto G. Richter Library on the Coral Gables Campus and the Calder Medical Library on the Medical Center Campus. Clinical experiences are offered in a variety of hospitals and health related agencies in the community.
NURSING

ACCREDITATION

The nursing baccalaureate program is approved by the Florida Board of Nursing and accredited by the Commission of Collegiate Nursing Education (CCNE), One DuPont Circle NW, Suite 530, Washington, DC 20036, (202) 887-6791

The University of Miami School of Nursing and Health Studies (SONHS) offers courses leading to the degrees of Bachelor of Science in Nursing (BSN), Master of Science in Nursing (MSN), Doctor of Nursing Practice (DNP) and Doctor of Philosophy (PhD). Baccalaureate education is the primary foundation for professional nursing, as well as for graduate education; students who successfully complete the baccalaureate program are eligible to sit for the licensure examination to practice professional nursing. Graduates of diploma and associate nursing degree programs are admitted as transfer students to obtain the BSN degree. Students holding a baccalaureate degree in a field other than nursing who would like to pursue the BSN are admitted to the Accelerated Program.

ACADEMIC POLICIES

ADMISSION:

Admission to the BSN Program is open to individuals who have demonstrated that they have the intellectual ability and the personal qualifications necessary for the profession of nursing. All applicants must meet the requirements for admission to the University of Miami; requests for admission should be directed to the Office of Admissions on the Coral Gables Campus.

Transfer students from accredited universities, colleges, or junior colleges may be admitted with advanced standing as space allows provided they have completed courses comparable to those required by the University of Miami. Transfer students are advised to contact the Office of Student Services at the School of Nursing and Health Studies concerning prerequisites.

An RN transition option is offered which allows RNs with an associate degree or diploma to earn the BSN degree. Academic transcripts are evaluated to determine that the 60 credits of transferable course work have been successfully completed.

TECHNICAL STANDARDS:

Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the University of Miami School of Nursing and Health Studies at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills requisite for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:
Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment.

**Observation**

The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.

**Communication**

Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

**Motor**

Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

**Conceptual-Integrative**

These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

**Behavioral-Social**

Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads.
and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant’s ability to complete all components of the program.

REQUIREMENTS FOR ENROLLMENT INTO CLINICAL COURSES:

BSN students at the University of Miami of Miami must achieve junior standing with a minimum UM GPA of 3.0 and a UM prerequisite GPA of 2.75.

Transfer students must have a minimum cumulative GPA of 3.5 and a prerequisite GPA of 3.3.

Accelerated Option students must have a minimum GPA of 3.0 with a 3.0 for prerequisite courses.

To be considered for progression or admission to clinical coursework, students are allowed to repeat only 1 failed prerequisite course.

Requirements for enrollment into upper division nursing courses:

Students are required to have a health examination prior to enrollment in clinical nursing courses. All students must provide evidence of a current TB screening test, hepatitis B, MMR, tetanus, varicella and influenza vaccinations, and certification in Basic Life Support. Students must submit to drug screening and background checks. See the School of Nursing and Health Studies Student Handbook 2012-13 for further information.

ACADEMIC PROGRESS:

To be assured of uninterrupted progression through the program, students must maintain a grade point average of 2.0 or better.

Student records are reviewed at the close of each semester, and those students with a cumulative average of less than 2.0 are subject to being placed on academic probation according to the University of Miami Policy on Academic Probation and Dismissal. A grade of C- is not an acceptable passing grade in any nursing course within the BSN program. When a clinical nursing course is repeated, both theoretical and clinical components must be repeated. When a course must be repeated progression in the nursing program will be altered in order for prerequisites to be met. Such alteration will, in all likelihood, lengthen the time required to complete the nursing program. Students will be required to fulfill the requirements that are in effect at the time of the current program. No special courses will be created for students who are repeating the same course.

Students are allowed to repeat only one failed nursing course. Failure of the same course again or any other nursing course will be grounds for dismissal from SONHS.

REGISTERED NURSE LICENSURE:

Graduates of the BSN program are eligible to take the National Council Licensure Examination (NCLEX-RN) for registered nursing after a student passes all the courses, completes the credit hours, and completes the requirements for the HESI exit exam.

REQUIREMENTS FOR GRADUATION

TRADITIONAL BSN:

GENERAL EDUCATION REQUIREMENTS

AREAS OF PROFICIENCY

Proficiency requirements are intended to ensure that students either already possess, or will develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

1. English Composition 6 credits

English 105 and English 106 or the equivalent

2. Writing Across the Curriculum (W) 5 courses

In addition to English 105/106, students must complete five (5) courses designated as Writing Across the Curriculum (W) courses. Courses designated as writing courses ("W" courses) require a substantial amount of writing and the preparation of papers that are corrected for diction, syntax, style, and content. Some courses satisfying this Writing Across
the Curriculum requirement may simultaneously fulfill Areas of Knowledge requirements (described below).

3. Mathematics

Students fulfill this requirement by satisfactorily completing an approved course in statistics above the level of MTH 101.

AREAS OF KNOWLEDGE

These requirements are designed to help students understand and appreciate the intellectual achievements in major areas of human inquiry and creative endeavor.

1. Natural World - 6 credits
   a. Biology 150/151
   b. Chemistry 103/105

2. People and Society - 6 credits
   a. Psychology 110
   b. 3 additional credits

Courses in the following areas may be used to fulfill this requirement: Africana Studies (AAS); American Studies (AMS); Anthropology (except APY 203); Economics (ECO); Education and Psychological Studies (EPS); Geography and Regional Studies (except GEG 120); International Studies (INS); Judaic Studies (JUS); History (HIS); Political Sciences (POL); Psychology (PSY); Sociology (SOC); Teaching and Learning (TAL); Women’s and Gender Studies (WGS), and the following courses: Broadcasting and Broadcast Journalism (CBR 102); Mass Media Communication in Society (COM 101); Communication Theory (COM 110); Interpersonal Communication (COS 112); Nonverbal Communication (COS 118); Political Communication (COS 336); Persuasion (COS 472).

3. Arts and Humanities - 12 credits

Courses in the following areas may be used to fulfill this requirement: Architecture; Music; Art and Art History; Theatre Arts; Motion Pictures and Photography; English (200-level or above); Modern Languages and Literature (300-level or above); Philosophy; Religious Studies; and the following courses: Public Speaking (COS 211); World History of the Dance (DAN 250).
BSN TRADITIONAL
PROGRAM OF STUDY
LOWER DIVISION
NURSING MAJOR

These are intended as examples only. Students have several options for completing the first two years of study. The Office of Student Services will assist students to select specific courses which most accurately reflect the student’s interests, abilities, and career goals. Students must complete all prerequisites prior to entering the junior year of clinical coursework.

Approved by School Council 5/09
HEALTH SCIENCE

Please consult your 2012-2013 Student Handbook for the applicable curriculum and program policies. Please note that courses and policies are subject to change throughout the academic year. Check with the Office of Student Services at the School of Nursing and Health Studies for current materials.

The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields. Pre-professional tracks include Pre-physical Therapy, Pre-pharmacy, Pre-forensics, Health Science/Business Administration, and Health Science General.

ACADEMIC POLICIES

ADMISSION:

In accepting students into the Health Science program, the University does not in any way assure admittance into any professional graduate programs. Admission to any of these programs is dependent upon academic performance in the undergraduate course-work and is determined independently by the school or program to which the student applies.

Entering freshmen in the 75th percentile have mid-range SAT and ACT scores of 1400 and/or and 32 respectively. Entering freshmen have an average weighted GPA of 4.2. Transfer students have a mean cumulative GPA of 3.44.

REQUIREMENTS FOR ADMITTED STUDENTS:

The Health Science degree requires courses in biology, chemistry, physics (where required by the track) and health science with a minimum grade of C- in each course. Students must satisfy both the general education requirements listed below and the requirements of a specific track, to be awarded the Bachelor of Science in Health Science degree. Students must maintain at least a 2.8 GPA in the courses listed under the track requirements with no grade below a C-.

ACADEMIC PROGRAMS

The School of Nursing and Health Studies will award a Bachelor of Science in Health Science once a student has completed the requirements listed below.

The Health Science Program offers curricula that are designed to prepare students for health professional or graduate education programs. Programs of study can be tailored for students wishing a variety of health professional options. Students are encouraged to contact graduate programs directly to ascertain if there are specific course requirements that might differ from health science track requirements. Any course requirements may be added to a student’s undergraduate curriculum track.

No minor is offered in Health Science. Health Science students may not minor in biology.
GENERAL EDUCATION REQUIREMENTS

1. English Composition - 3-6 credits

Except as indicated below, students must take English 105 and 106 (or its equivalent) during the first year of enrollment. Admission to ENG 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and 106. Such students must fulfill the English Composition requirement within the first three semesters. Students whose placement scores are high may be exempted from ENG 105 but not from ENG 106 or its equivalent.

2. Mathematics - 4 credits

a. MTH 161 or equivalent

3. Statistics and Computer Programming - 6 credits

a. HCS 202 or equivalent

b. CSC or CIS

4. Arts and Humanities - 12 credits

B.S.H.S. degree candidates must earn twelve credits in the three areas listed below. At least three credits must be earned in each area.

a. Fine Arts: courses in the departments of Art and Art History, Dance (DAN 250 only), Musicology (only the following: either MCY 131 or MCY 132, but not both, MCY 325, MCY 361 and MCY 362), Music Theory (MTC 125 only), and Theatre Arts (THA 101 only) count toward this requirement.

b. Literature: courses in the departments of English (200-level and higher) and Foreign Languages and Literatures (300-level and higher) count toward this requirement.

c. Philosophy and Religious Studies: courses in the departments of Philosophy and Religious Studies count toward this requirement.

d. An additional 3 credits from a, b, or c above or 3 credits in a foreign language other than ones native language.

5. People and Society - 6 credits

B.S.H.S. degree candidates must earn six credits in the following social science disciplines: African-American Studies, American Studies, Anthropology (except APY 203), Economics, Geography and Regional Studies (except GEG 120), History, International Studies, a Judaic Studies Social Science course, Political Science, Psychology, Sociology, and Women’s Studies. No more than three credits may be earned in any one discipline.

6. Writing - 5 Courses

May include any of the courses listed above except ENG 105 and ENG 106.
TRACK REQUIREMENTS:

1. Pre-Physical Therapy Track

Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above 100 level
Health Science 212, 213, 215
Chemistry - two semesters with lab, must include 104/106 or 201/205
Physics - two semesters with lab
Psychology 203 or 352
A minor in a discipline accepted by the School of Nursing and Health Studies.

2. Pre-Pharmacy Track

Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above the 100 level
Health Science 212, 213, 215
Chemistry minor - 111/113, 112/114, 201/205, 202/206
Physics - two semesters with lab
Economics 211, 212
Biochemistry and Molecular Biology 401
Communication 211

(Transfer students who do not complete the chemistry minor at the University of Miami must choose another minor accepted by the School of Nursing and Health Studies.)

3. Pre-Forensics Track

Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above the 100 level
Health Science 212, 213, 215, 216, and BIL 251 or BIL 252
Chemistry minor - 111/113, 112/114, 201/205, 202/206
Sociology 101, 271, 371, 372, 373, 470
Psychology 110 and 352

(Transfer students who do not complete the chemistry minor at the University of Miami must choose another minor accepted by the School of Nursing and Health Studies.)

4. Health Science/Business Administration Track

Biology 150/151, 160/161, and 12 credits of electives in biology or health science above the 100 level
Health Science 212, 213, 215
Chemistry - two semesters with lab, must include 104/106 or 201/205
Physics - two semesters with lab
Business Administration minor including ACC 211, 212, CIS, MGT 304, MKT 301, and FIN 300.
5. Health Science General Track

Biology 150/151, 160/161, 250, 255 and three credits of electives in biology or health science above 100 level
Health Science 212, 213, 215
Chemistry - two semesters with lab must include 104/106 or 201/205
Physics - two semesters with lab
A minor in a discipline accepted by the School of Nursing and Health Studies.

This program may be modified to meet the needs of various students. See an academic advisor in the SONHS for more details.

Health Science Course Listing
PUBLIC HEALTH

The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Public Health. Baccalaureate education provides the foundation for further education in Public Health and/or other specialized health professional fields.

ACADEMIC POLICIES

ADMISSION:

Entering freshmen in the 75th percentile have mid-range SAT and ACT scores of 1400 and/or and 32 respectively. Entering freshmen have an average weighted GPA of 4.2. Transfer students have a mean cumulative GPA of 3.44.

REQUIREMENTS FOR ADMITTED STUDENTS:

The course work for the BSPH Program is based on recommendations made by the Association for Prevention Teaching and Research (2008) for undergraduate course work in Public Health. Students are required to complete 30 credits of Public Health coursework, including 21 credits of core courses and 9 credits of approved electives.

ACADEMIC PROGRAMS

The School of Nursing and Health Studies will award a Bachelor of Science in Public Health, once a student has completed the requirements listed below.

The Public Health Program offers curricula that are designed to prepare students for public health practice or graduate education in health related fields. Programs of study can be tailored for students wishing to combine Public Health education with a variety of other health related fields (e.g., pre-med, pre-physical therapy).

No minor is required within the Public Health program. However, students have room within their plan of study to pursue a minor if desired.

GENERAL EDUCATION REQUIREMENTS:

1. English Composition - 3-6 credits

Except as indicated below, students must take English 105 and 106 (or its equivalent) during the first year of enrollment. Admission to ENG 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and 106. Such students must fulfill the English Composition requirement within the first three semesters. Students whose placement scores are high may be exempted from ENG 105 but not from ENG 106 or its equivalent.
2. Language - 3 credits
   a. A language other than English at the intermediate (200 level or higher).

3. Mathematics - 3 credits
   a. HCS 202 – Intro to Statistics for Health Care or equivalent

4. Natural World – 6 credits
   a. BIL 150/151 General Biology with Lab (5 credits)
   An additional credit from the following science disciplines:
   
   b. Biology, Chemistry, Eco Systems and Science and Policy, Geological Sciences, Marine Science, Physics, and Physical Science, as well as Anthropology 203, Geography 120.

5. Arts and Humanities - 12 credits
   At least three credits must be earned in each area.
   
   a. Fine Arts: courses in the departments of Art and Art History, Dance (DAN 250 only), Musicology (only the following: either MCY 131 or MCY 132, but not both, MCY 325, MCY 361 and MCY 362), Music Theory (MTC 125 only), and Theatre Arts (THA 101 only) count toward this requirement.
   
   b. Literature: courses in the departments of English (200-level and higher) and Foreign Languages and Literatures (300-level and higher) count toward this requirement.
   
   c. Philosophy and Religious Studies: courses in the departments of Philosophy and Religious Studies count toward this requirement.
   
   d. An additional 3 credits from a, b, or c above.

6. People and Society - 6 credits
   a. PSY 110 – Introductory Psychology (3 credits).
   An additional 3 credits from the following Social Science disciplines:
   
   b. African-American Studies, American Studies, Anthropology (except APY 203), Economics, Geography and Regional Studies (except GEG 120), History, International Studies, a Judaic Studies Social Science course, Political Science, Psychology, Sociology, and Women’s Studies. No more than three credits may be earned in any one discipline.

7. Writing - 5 courses

*APPROVED PUBLIC HEALTH ELECTIVES (9 credits required)
HCS/NUR 301: Human Sexuality (Fall)
HCS/NUR 305: Issues in Health Disparities (Spring)
HCS/NUR 306: Principles of Nutrition (Spring)
NUR 319: Bioethics (By Announcement Only)
HCS 355: Global Nutrition (Fall)
HCS 317: Growth and Development (Spring)
HCS 419: Contemporary Issues in South Florida (Fall)
HCS 487: Global Health Practicum (Permission of Instructor)

* Additional Public Health electives may be approved by the public health planning committee.

MINOR

A minor in Public Health is offered. The minor in Public Health consists of 12 credits including: HCS 206 Introduction to Public Health (3 cr), HCS 208 Introductory Epidemiology (3 cr), HCS 309 Health and Environment (3 cr), and an approved Public Health elective (3 cr).

Public Health Courses Listed Under Health Science Course Listing
All graduate work (except for the Master’s Degree in Law, J.D. in Law and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various programs in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Admission requirements are described in the Bulletin of the Graduate School, and may be obtained from the individual department or program. Information is also available at www.miami.edu/grad.

Applications to the Graduate School are processed through the various Schools and Colleges. See http://www.miami.edu/gs/index.php/graduate_school/apply/ for a listing of online applications by program.

Prospective students should note that “graduate study” means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative, and scholarship of the student. The term must be distinguished from “post-graduation study” which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor’s degree.

To preserve its ideals of scholarship, conduct, and character the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

MISSION

The mission of the Graduate School is to promote graduate education, scholarship, and research; to support individuals, departments, and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the Committee.
ACADEMIC POLICIES

TIME TO COMPLETION

Time to completion starts when a student begins any program in the Graduate School, whether it be a master’s or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various master’s degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master’s degree in field, work must be completed within eight years. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director.

RECENCY/VALIDATION FOR OVER-AGED CREDITS

Graduate credits transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credits by examination, with program approval.

REGISTRATION

Graduate students can register on the first day of registration and through the registration period. For more information on registration, students should contact their respective School or College. See academic calendar for dates of registration periods at http://www.miami.edu/index.php/registrar/calendar/.

FULL-TIME STUDY

The categories of full-time students include:

1. Graduate students taking eighteen or more graduate credits during the calendar year (nine credits in a regular semester, or 3 credits in a summer session).
2. Graduate teaching and research assistants taking sixteen or more graduate credits during the calendar year (eight credits in regular semester or 3 credits in a summer session).
3. Graduate students enrolled in any course numbered 700 or above, i.e., any 700-level course required for the completion of the degree.
4. All MBA for Executive and Professional students and Master of Science in Professional Management students are considered full-time.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School.

The maximum number of credits allowed for full-time study is 12 for each semester and three for each summer session. Exception to this policy can only be made by the Dean of the Graduate School or his/her designee and requires a signed recommendation from the Program Director.
Full-time registration is required during the semester or summer session in which a candidate defends the thesis or dissertation. Students who wish to have this requirement waived must have a written request provided to the Graduate School by the Dean of their respective College or School. In this case the student must graduate within the same academic year.

No full-time faculty member may be a full-time student, whether or not working toward a degree. Nor may a full-time student be a full-time faculty member. No full-time student will be a principal investigator in any grant or contract, whether in name or fact. And no principal investigator will be a full-time student.

Exceptions to these rules may be made in cases in which students are encouraged to apply individually for small research grants that are consistent with and contribute to their field of study and their dissertation work, and, in certain programs, in which students in a terminal degree status are obliged, as a part of their degree program, to teach as de facto faculty members. (Note: Faculty from School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue Doctoral degrees in their home program/school.)

WITHDRAWALS

Withdrawals, either from individual courses or from a Graduate program, should be processed through the office of the Dean of the School of the student’s program. Students who wish to officially withdraw from joint or dual degree programs should consult the office of the Dean of the School or College for both disciplines. The date of withdrawal is that on which the student notifies the office of the Dean or the date of receipt of a letter requesting withdrawal. No withdrawal from the University is official until the student has consulted with the Dean of his/her school and has completed the necessary forms.

Students wishing to officially withdraw from the University of Miami must provide the Office of the Registrar notification of their intent to withdraw. Initial notification may be made in person, in writing, by fax, or by telephone. This notification will be recorded and used for notification purposes for the Federal Government. Repayment of any federal funds will be based on the date of notification.

Students must also follow the required process as set forth by their school/college for withdrawing from courses. This process often requires that a signature from a dean or the dean’s representative be obtained on a Change of Course form. In some cases, students can complete the Change of Course form (hard copy or through the myUM system) without an approving signature. Change of Course forms must be submitted to the Office of the Registrar for final processing/review.

In addition to the completion of the Change of Course form, students will be asked to complete a Withdrawal Checklist and a Withdrawing Student Survey. The Withdrawal Checklist provides students with a series of offices that need to be notified concerning their withdrawal.

To officially withdraw from the MBA Program or Master of Science in Professional Management program, students must inform the Office of Graduate Business Programs in writing prior to the beginning of a course/term. Tuition will be refunded on a prorated basis based on the number of class meetings attended. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. For further information contact: Office of Graduate Business Programs, (305) 284-4643, email: mba@miami.edu.
MILITARY WITHDRAWAL

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit for the course (see below under “Credit for Courses After the 12th Week of the Semester”).

If you receive federal financial aid and withdraw before you complete 60% of the semester, a pro rate calculation will determine the amount of financial aid you have earned. It is based on the amount of time you were enrolled. This calculation is independent of any charges incurred at the university.

Credit for Courses After the 12th Week of the Semester

The following statement of policy was adopted by action of the Academic Deans’ Council April 14, 1967:

1. On recommendation of the Dean of the school, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may be awarded credit in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

2. Credit granted for a course under this policy should count toward graduation.

3. There should be no refund of tuition for courses for which credit has been granted. Refunds of courses not awarded credit should be on the same basis as complete withdrawals for military service.

4. The above recommendations are procedures for determining the awarding of credit and do not release the student from the usual withdrawal procedures.

Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefits bills must also clear their withdrawal with the main campus Veterans Affairs Officials in the Office of the Registrar in the Whitten University Center, Room 121 / Phone: (305) 284-2294 or Email: registrar@miami.edu.

Additional Information on Military Withdrawal is available at:
https://www6.miami.edu/registrar/MilitaryWithdrawalInfo.pdf

LEAVE OF ABSENCE

Leave may be obtained by petition of the Program Director followed by the approval of the Dean of the Graduate School. Leave of Absence officially stops the time to completion clock. The Petition for Leave of Absence form may be found at http://www.miami.edu/gs/index.php/graduate_school/forms/.
**GRADES AND CREDITS**
The same letter grades are used for graduate and undergraduate students, but with somewhat different meaning.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent accomplishment</td>
</tr>
<tr>
<td>B</td>
<td>Good accomplishment</td>
</tr>
<tr>
<td>C</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).</td>
</tr>
<tr>
<td>S</td>
<td>Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum, and internship credit. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of “S” to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of “S” reflects that a student is in good academic standing.</td>
</tr>
<tr>
<td>D</td>
<td>Poor (not acceptable for credit toward the advanced degree).</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the university. Courses dropped after last date must have approval of Dean of graduate school. Credit can be earned only by successful repetition of the course.</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete work in passing status with the instructor’s permission to complete the course. (Not to be used for thesis or dissertation credits). The “I” should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student’s primary school or college and the Dean of the Graduate School approve the delay. If the “I” is not changed within one year, credit can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of “I”s on a student’s transcript).</td>
</tr>
<tr>
<td>IP</td>
<td>Denotes in progress grade given by instructor for any course (500G, 600, or 700 level) in which a student has made expected or clearly satisfactory progress during the semester, but has yet fully to complete requirements for the course. “IP” is to be given for 700-level internships, research, thesis, and dissertation courses that have not been completed. Upon satisfaction of all Graduate School requirements, the Assistant Director, Programs of the Graduate School will issue final credit for all master’s thesis and doctoral dissertation courses (e.g., 710, 720, 730, 735, 740 and 750). Zero-credit courses (e.g., 720 and 750) will be changed to “S.” Please note that all “IP”s must be converted to “S”, letter grade, or “I” at graduation. “IP” will also be converted to “I” upon any departure from the University for a period in excess of one year.</td>
</tr>
<tr>
<td>NG</td>
<td>Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student’s grade. For a student to receive credit for the course, the instructor must report a passing grade prior to the student’s graduation.*</td>
</tr>
</tbody>
</table>

* Faculty Senate Legislation #85005(B)

An average of B (3.0) is required for a graduate degree, and no “D” credit may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded “D”.

No transferred credits are calculated into the University of Miami G.P.A.
AWARD OF ACADEMIC MERIT

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Quality points are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>0.00</td>
</tr>
<tr>
<td>D</td>
<td>0.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

The quality point average is then determined by dividing the total of quality points earned by the total of credits attempted. The symbols “S”, “W”, and “I” are not counted as credit attempted.

REPEAT RULE

A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a “C-” or higher, the number of credits required for graduation will be increased by the number of credits repeated.

Registrations which involve repeating a course in which a grade of “A” or “B” has already been earned may not earn quality points or credit hours, nor count as credits attempted.

LEVELS OF GRADUATE STUDY

Graduate study implies the need for a minimum of formal courses and a maximum of independent work under faculty supervision. Coursework, in itself, is not necessarily a determinant of graduate progress and achievement. The appropriate determinants are the ability of the qualified student to master the various qualifying and comprehensive examinations that a program requires of the student. All work taken by a graduate student in the major area or area of concentration shall be at the graduate level (500 or above). With the permission of the major department or program of major concentration a student may take elective credits (not prerequisite to the major) at any level provided the following limits are observed:
Approval for undergraduate credits as part of the graduate degree program can be made only after a minimum of 12 credits is completed. Award may not be made retroactively, nor are credits accepted from another institution.

**RA, TA, GA Hourly Guidelines**

To receive a stipend an RA, TA, GA must be a full-time student.

Graduate students with appointments as RAs, TAs or GAs will be expected to work 20 hours per week with the exception of efforts directly required for dissertation research.

International students may work on campus provided the student is maintaining F1 status and does not work more than a total of 20 hours per week (including any off campus work the student may have been authorized to perform) while school is in session. Questions regarding work for international students should be directed to International Student and Scholar Services: [http://www.miami.edu/isss](http://www.miami.edu/isss).

Graduate students with Assistantships and Fellowships will be classified with the following designations. *(FE) Fellows, *(RA) Research Assistant, *(TA) Teaching Assistant, *(GA) Graduate Assistant, *(TR) Trainee. *Please contact the Graduate School for specific codes.

Definitions:

FE (Fellow): Responsibilities do not include the provision of direct services to the University and require internal/external fellowship support.

RA (Research Assistant): Responsibilities are mainly conducting research and/or assisting with research projects.

TA (Teaching Assistant): Responsibilities are mainly teaching and/or assisting in the area of teaching.

GA (Graduate Assistant): Responsibilities are mainly in professional support of University operations and programs. Graduate students should not be hired to perform clerical duties.

TR (Trainee): Designated as such by specific federal guidelines which indicate a complex process wherein the trainee takes on an increasingly independent role in the selection, conceptualization, and execution of research projects under the supervision of an experienced mentor.

In definitions where the word “mainly” is used, “mainly” is defined as greater than 50%.
Requirements for Teaching Assistants

1. Graduate teaching assistants who are the instructors of record and responsible for assigning grades in a course must have a master’s in the teaching discipline or 18 graduate credit hours in the discipline.

2. Graduate teaching assistants must be directly supervised by a faculty member in the teaching discipline, must attend regular in-service training provided by the Instructional Advancement Center (in coordination with the Graduate School or provided by the specific graduate program), and must be reviewed by the supervising faculty member once a semester.

3. Graduate Teaching Assistants who have previous teaching experience and indication of competency may be exempted from TA Training by the Dean of the Graduate School in consultation with the Graduate Program Director in the discipline. A request for waiver must be submitted to the Dean of the Graduate School by the Graduate Program Director.

POLICY ON OUTSIDE EMPLOYMENT FOR RA/TA/GA

A graduate student must have prior approval from the chair or advisor to work outside the department, since such activities might impede progress toward his/her degree. Any question or concern should be discussed with the Dean of the Graduate School.

1. A graduate student is allowed to supplement his/her stipend by tutoring undergraduate students in courses in which he/she has no direct responsibility at the time.

2. A graduate student who is teaching a class or lab of a multi-section course using a common syllabus and common exams may not tutor any student in any section of that course.

3. A graduate student, like any other member of the teaching faculty, may offer review sessions for his or her students to which he or she may invite students from other sections of the same course. The graduate student arranging such sessions may not under any circumstances take money from the students in attendance.

4. A graduate student may use his or her office for tutoring or may ask departmental permission to use a classroom or other appropriate university facility.

5. The graduate advisor or department chair may require a graduate student to limit his or her outside employment or tutoring activity if, in the view of the department, such activity is impeding the graduate student’s academic progress or keeping him or her from fulfilling responsibilities within the department.

6. International students should clear their work instructions with International Student and Scholar Services. Questions regarding work for international students should be directed to International Student and Scholar Services, (305) 284-2928, email: isss@miami.edu or visit: http://www.miami.edu/isss.
GRADUATION

It is the responsibility of the student to apply for graduation through MyUM during the student’s final semester before the date indicated on the Graduate School calendar and the Schedule of Classes. These dates are published at http://www.miami.edu/index.php/registrar/calendar/. Students who previously applied for a diploma but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students may walk in the graduation ceremony, but the program will indicate “in progress” if information is missing. Students will be degree candidates until they have been cleared by the Graduate School.

Graduation ceremonies are held in May and December only. Those completing degree requirements during the fall, spring or summer sessions may, if they wish, participate in the graduation ceremonies of the previous or following May or December. Students receiving Ph.D., D.M.A., D.N.P, D.P.T, or Ed.D. degrees who are participating in the hooding ceremony and all masters marching in the graduation ceremony must have the approval of the graduate advisor, director, or appropriate person in the department/school to participate in the ceremonies.

Participation in graduation for students in all graduate programs is contingent upon the following:

1. The student must have met the requirements for their program.

2. The student must have a minimum of 3.00 cumulative grade point average; all students receiving master’s degrees must have completed a minimum of 30 credits; all Ph.D. D.MA. and Ed.D. students must have completed a minimum of 60 credits.

3. The student (Ph.D. D.M.A. and Ed.D. candidates) must be admitted to candidacy one semester prior to graduation.

4. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last semester of study must be paid in full by the beginning of the final semester.

5. The student must complete an electronic thesis or dissertation (ETD) according to the Graduate School’s requirements and submit all hard copies, paperwork, and fees (if required) by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the ETD process early in the semester by discussing with their advisors a suitable timetable for completing the defense of their thesis or dissertation. Students should check the academic calendar for the defense deadline date set for the semester they wish to graduate. The Graduate School also encourages students to familiarize themselves with the ETD process at www.miami.edu/etd or contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process. (See dissertation section of the Ph.D. description.)
CLEARANCE FOR DEGREE CONFERRAL

For the Graduate School to clear a student for graduation:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).

2. The Admission to Candidacy form must have been completed by the program at least one semester before graduation. The Graduate School does not require application to candidacy for master’s, D.P.T., nor D.N.P. degrees.

3. The student must defend his/her thesis or dissertation no later than two weeks before the last day of class in the semester he/she wishes to graduate.

4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the semester he/she wishes to graduate for their clearance to be processed in time.

CLASS ATTENDANCE AND ABSENCES

Regular and punctual class attendance is expected of all graduate students. It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.

V.A. students will be provided a grade report at the end of each semester period. A copy of the report will be placed in the student’s permanent file maintained by the Veteran Affairs Office. Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.

STUDENT RESPONSIBILITY

Standards of study and conduct in the Graduate School are set and maintained, not by fiat of the Graduate School, but rather by the faculty who determine the standards. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School devolves responsibility upon the student and the appointed committee. Within this broad responsibility the recommendation for the degree rests with the committee.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various departments in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements at the time specified.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.
It is the responsibility of the student to be informed concerning all regulations and procedures required. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that he/she was not informed of it by an advisor or other authority. The student should become familiar with the Bulletin, including:

1. The section presenting the requirements for the degree to be undertaken;
2. The offerings and requirements of the major department;
3. The Graduate Student Honor Code.

After the applicant has been admitted to the Graduate School but before the first registration, the student should consult the school or college and program in which the major work will be done concerning course requirements, deficiencies, if any, the planning of a program or special regulations. Programs may have additional degree requirements that are not listed in this Bulletin. All registrations require the signature of the dean of the school or college (or his/her representative) in which the degree is to be awarded. Only the Council of the Graduate School may waive requirements stated in this Bulletin.

GRADUATE STUDENT CODE OF ETHICS

Graduate students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the students program and/or the Graduate School through the process described in the Graduate Student Honor Code. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The Honor Code can be reviewed at http://www6.miami.edu/dean-students/pdf/graduate_honorcode.pdf.

GRADUATE SCHOOL GRIEVANCE GUIDELINES

INTRODUCTION

These University of Miami Graduate Grievance Procedures provides an opportunity for the resolution of disputes involving graduate students in a fair and collegial manner. These Graduate Student Grievance Procedures supersede all prior such procedures in effect or formerly utilized at the graduate level. They do not supplant UM Students Rights & Responsibilities or any other published policy or procedure relating to graduate students.

PURVIEW OF THE GUIDELINES

The formal grievance process described herein is intended for cases not involving grades or matters covered by the Honor Code, which have not been resolved at the department or program level, and it is available only after a final determination within the relevant School
or College has been reached. Students are encouraged to seek assistance from the University Ombudsperson for possible resolution before initiating the formal graduate grievance process. The procedures set forth here are applicable to any of the following types of grievances by graduate students who are enrolled in any graduate program at the University of Miami, except exclusively in the MD and JD programs:

1. grievances alleging improper dismissal or suspension from a graduate program;
2. grievances alleging the improper withholding or termination of financial support of any kind;
3. grievances alleging any other improper treatment, either substantive or procedural, of a graduate student by a faculty member, department or program, or university agency or administrator except:
   a. allegations of improper evaluation of the quality and/or quantity of academic work (see UM Student Rights & Responsibilities);
   b. allegations of unfair recommendation for employment or further graduate study;
   c. allegations of discriminatory treatment arising from the student complainant’s age, race, gender, sexual preference, handicap, national origin, or religion. (Such allegations ordinarily are handled by the Office of Equality Administration).

CONSTITUTION OF THE COMMITTEE AND GRIEVANCE PANEL

The Graduate Council Grievance Committee (GCGC) is a standing committee comprised of the Schools’ and Colleges’ alternate representatives to the Graduate Council. Grievances as understood herein shall be heard by ad hoc appeals panels, constituted from time to time by the Dean of the Graduate School to review individual graduate grievances. The grievance review panel (GRP) shall consist of five disinterested members: four faculty members of the GCGC and one graduate student appointed by the executive board of the Graduate Students’ Association. Notice of the constitution of the GRP shall be given by the Office of the Graduate Dean in writing to all parties to the grievance within ten (10) days after the grievance review request is properly filed.

Any party to the grievance may challenge the disinterestedness of a GRP member in writing to the Dean of the Graduate School within five (5) days after notification of the appointment. The challenge must specify reasons that would prevent the committee member or graduate student from making an unbiased recommendation with respect to the grievance. If such a challenge is determined to be valid by the Graduate Dean, a substitute appointment shall be made and the process will resume accordingly.

PROCEDURE AND TIME LIMITS FOR FILING A GRIEVANCE

After a final determination has been made in the relevant School or College (or by the head of the relevant administrative office in the event of a grievance against a university agency), a student who believes he or she has grounds for appeal within the purview of these guidelines may file a written grievance review request with the Office of the Dean of the Graduate School. The request shall describe the student’s allegations in a clear and concise fashion and shall clearly identify the individual(s), program(s), department, School
or College, and/or University agency or administrator against whom the grievance is brought. The student’s written grievance review request shall be filed within thirty (30) days of the final determination. No grievance review request nor any other appeal of any kind will be granted after this time limit has expired unless a written extension of time is granted by the Dean of the Graduate School based on a written request from the grievant stating good cause.

**DEFINITIONS AND ASSUMPTIONS**

*Burden of Persuasion:* The burden of persuasion is on the grievant.

*Final Determination:* This grievance process is available only after a final determination within the relevant School or College has been reached. This provision is intended to require the grievant to exhaust the remedies available within the relevant School or College before appealing to the Graduate Dean. In the case of a student in an interdisciplinary program who does not yet have a chair and/or committee assembled, the Dean of the Graduate School shall make a final determination in the student’s case subject thereafter to the appeal contemplated by this policy. Appeal from the Graduate School Dean’s decision follows this same procedure, except that the GRP shall be constituted by the Office of the Provost from the pool of GCGC members. Written notice of the constitution of the GRP in the case of a student in an interdisciplinary program without a chair or committee, shall be given by the Office of the Provost to all parties to the grievance within ten (10) days after the grievance review request is properly filed. All other deadlines, requirements, procedures, and the hearing format remain the same.

*Originals:* Wherever possible, the party in possession of an original document in support of or rebuttal to or at issue in the grievance shall provide it to the GRP within the time frames set out in the Hearing Materials and Preparation Deadlines. If a party has only a copy of a document not received by him, her, or it, the copy shall serve as an original. Digital documents or email messages in contention shall be printed and may then serve as originals.

*Party:* A party is the student grievant or the individual, program, department, School or College, or University agency or administrator against whom the student brings his or her grievance.

*Time Limits:* All time limits shall be calculated based on working days of the Fall and Spring Semesters, excluding reading and exam periods and University holidays. Grievances originally filed after the end of the Spring semester will be heard at the beginning of the following Fall Semester. Any stated time limit herein may be extended with the written consent of the grievant and the Dean of the Graduate School.

*Written:* Any document to which these guidelines refer as written signifies paper (hard) copy. Email messages and digital or other electronic versions do not meet the requirement that a form or notice be provided in writing. However, a party may transmit a digital version of any written document by email in addition to providing it in paper form.

**DEADLINES FOR HEARING MATERIALS, PREPARATION, AND WITNESS IDENTIFICATION**

All materials to be considered for review by the members of the GRP must be submitted in writing to the Office of the Dean of the Graduate School at least fourteen (14) days before the scheduled date of the hearing, at which time such materials will be distributed to all
parties to the grievance and to the members of the GRP. Thereafter, to the extent that any of the parties wishes to have additional materials considered by the GRP, such materials must be received by the Graduate School no later than seven (7) days before the scheduled date of the hearing, at which time all such additional written materials will be distributed to the parties as well as to the members of the GRP. Any party submitting written materials for consideration shall submit the original(s) and five (5) copies thereof to the Office of the Graduate Dean at his, her, or its own expense.

The name of any witness to be called by any party at the hearing shall be provided in writing to the Office of the Graduate Dean no less than five (5) days before the scheduled date of the hearing.

HEARING

The grievance review hearing is chaired by a designated member of the GRP. The hearing is staffed by the non-voting Administrative Assistant of the Dean of the Graduate School, who will record it for archival purposes only. The hearing will proceed as follows:

a. GRP chair's introduction, summary of issues, and process overview.
b. Student's presentation of issues (15 minutes maximum).
c. University representative's presentation of issues (15 minutes maximum).
d. Optional: Presentation(s) by witnesses (limited to 3 per side and a maximum of 15 minutes total per side).
e. Questions by members of the GRP.
f. All presenters and witnesses are excused.
g. Deliberation by GRP.

Presentation of the issues should be concise and relevant. Undoubtedly the dispute is somewhat complex or it would not have reached this stage. Points of dispute or ambiguity may be summarized or illustrated by anecdote at the hearing. Experience suggests, however, that the best approach is to minimize formal presentations and allow the GRP members maximum time for questions.

GRP DECISION AND AUTHORITY

No additional substantive information may be submitted by any party following the hearing, unless requested by the grievance review panel. The GRP may but need not seek additional information from other sources during its deliberations, which will be conducted in closed session. Following its deliberations, and within ten (10) days of the date of the grievance review hearing, the GRP will make its confidential advisory recommendation to the Dean of the Graduate School [Office of the Provost in the event of a student in an interdisciplinary program who does not yet have a chair or committee]. The subsequent decision by the Dean of the Graduate School [Office of the Provost], which shall be rendered within ten (10) days of the GRP's recommendation, is final.

Note: The above guidelines pertain only to matters which do not involve representation by an attorney. If an attorney is involved in the grievance, the Office of Legal Counsel at the University should be contacted.

MODIFICATIONS

These procedures may be modified or withdrawn with or without notice.
ADMISSION

ELIGIBILITY FOR ADMISSION
In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). Foreign students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score. University of Miami faculty members above the rank of instructor are not eligible to apply for the doctorate at the University of Miami. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue doctoral degrees in their home program/school.)

For specific admission requirements see also statements of the various programs.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

All those wishing to take courses for graduate credit, whether or not they wish to become candidates for a degree, must make application for admission directly to the program of interest prior to registration.

REQUIREMENTS FOR ADMISSION APPLICATION
1. The completed online application form
2. Official transcripts of all college work, both undergraduate and graduate
3. The official score report of the appropriate entrance examination

| GRE | All applicants must submit recent (within five years) Graduate Record Examination (GRE) scores which include 1) the aptitude portion (verbal & quantitative); 2) the most relevant advanced test in the major field if required by the program. GRE scores are valid for 5 years after the test date. |
| GMAT | Applicants for the Master or Ph.D. of Business Administration, the Master of Professional Accounting, the Master of Science in Management Science (Operations Research/Applied Statistics), or Taxation must submit the Graduate Management Admissions Test (GMAT) scores. GMAT scores are valid for 5 years after the test date. |
| TOEFL/IELTS | International applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) and the Graduate Record Examination. The TOEFL and IELTS scores are valid for 2 years after the test date. |
4. Letters of recommendation sent directly to the graduate program director of the academic program.

5. Other requirements may be required/requested by individual programs. Contact the specific program to which you are applying for their requirements, or for exemptions from the entrance examination.

6. Application fee of $65.

7. All materials and the fee should be sent directly to the School or academic department as indicated on the application.

_Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant._

**CATEGORIES OF ADMISSION**

1. Regular admission with or without specified deficiencies. Under circumstances in which it is difficult to evaluate the academic background of intellectually qualified applicants, they may be admitted with specified deficiencies. Such status is often appropriate for foreign students. Only one semester or one summer session of study in deficiency status is permitted and the student who fails to qualify at the end of that time will be requested to withdraw from the Graduate School.

2. Post Baccalaureate. This category provides an opportunity for graduate study for
   a. qualified applicants who, for good reason, do not wish to work toward an advanced degree. This would be appropriate for those students who have special objectives for professional study or scholarly work;
   b. students enrolled in a graduate program elsewhere but desiring to earn graduate credit at the University of Miami for the purpose of transferring it to the other institution;
   c. students already holding the master’s degree or doctorate but who desire additional coursework in their field.

Those admitted to a post-baccalaureate status should realize that their future admission to regular status is improbable unless they achieve the qualifications originally appropriate to admission to those categories. This is to say that the mere accumulation of graduate course credits is not sufficient to permit entrance into another graduate category. No more than a total of twelve (12) credit hours may be taken while in post-baccalaureate status.

Transient students described in (b) above should have sent to the Graduate School a letter from the Dean of the School of the student’s program they expect to earn a degree, stating that they are in good standing there and have permission to transfer credit. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and graduate degree [to be sent directly by the issuing institution to the Graduate School].

3. Certification/Professional Goals. This category provides an opportunity for graduate study for qualified teachers or professionals who do not wish to work toward an advanced degree but who for professional reasons need to continue to take graduate courses and have already taken 12 credits in Post-Baccalaureate Status. No credit taken in this status can be applied toward a graduate degree at the University. A letter explaining the need for the course work by the student’s employer must accompany the application.
Every applicant for admission can be assured that all credentials will be carefully studied in an effort to select appropriately qualified students. Each application for admission is examined by the members of the faculty responsible for the graduate program. The program informs each applicant of the results. It is expected that most applicants for admission will be candidates for an advanced degree. Except under unusual circumstances those who already hold an advanced degree are not admitted to candidacy for the same degree. Graduate programs vary as to whether students who do not hold the Master’s degree are required to initiate graduate studies at that level.

Applicants should note the following:

1. M.B.A. applicants should send applications and all documents to the Office of Graduate Business Programs in the School of Business Administration; P.O. Box 248505, Coral Gables, FL 33124. For further information you may contact mba@miami.edu.
2. all other correspondence, applications and documents should be sent directly to the academic department;
3. no action is taken until a file is complete and all documents are available;
4. application files should be complete at least one month before registration, much earlier for some applications, as specified elsewhere in this Bulletin;
5. admission to graduate status does not imply admission to candidacy for a degree;
6. some departments close admissions early because of limited capacity;
7. materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant.

International Students Admissions

All international students who have been admitted to a program of full-time study at the University of Miami need to enter the U.S. on a student visa. To apply for an F-1 visa, you must provide the U.S. Embassy or Consulate with a Form I-20 or DS-2019, passport, statement of funds, and other documents as required by the U.S. Embassy or Consulate. Please visit the International Student and Scholar Services (ISSS) website at www.miami.edu/isss for further information regarding visas, travel, pre-arrival information, etc. The Form I-20 or DS-2019 can only be issued after you have been admitted and have submitted proof of adequate financial support for your studies and living expenses. For questions regarding issuance of the Form I-20 or DS-2019, please contact your individual department.

DUAL DEGREE AND ACCELERATED DEGREE PROGRAMS

The University offers unique combined degree programs that culminate with students receiving both the undergraduate and graduate degrees concurrently or an accelerated program of study in which they receive an undergraduate degree and then a graduate degree the following year. These programs are intended for exceptional students to acquire both undergraduate and graduate degrees, in five years rather than the 4 plus 2 years (approximately) that is traditionally expected.

Please note: Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.
Requirements:

Students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application. Students should discuss the program and possibility of entering the program with an academic advisor. The program may require application at the time of matriculation to the undergraduate degree or prior to the beginning of final exams in the junior year.

Undergraduate students must take the GRE Examination before the end of their classification as a senior and attain a combined score of more than 1000 on the verbal and quantitative portions.

Once admitted into a dual degree or accelerated program:

In their senior year, students may take a maximum of twelve (12) graduate credits, with a maximum of six (6) credits per semester. While in senor status, to register, students must complete and submit the Graduate School's Application for Undergraduates to Take Graduate Coursework form which is available at www.miami.edu/gs/index.php/graduate_school/forms/. This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status. Add/Drop and/or Course Request forms without this approval form will not be processed. Undergraduate students must register for courses with graduate status in the Office of the Registrar. This process cannot be facilitated via online registration.

Financial Implications:

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Students are eligible for undergraduate aid only as long as they are undergraduates. Students enrolled in combined or accelerated degree programs are permitted undergraduate federal and University aid for a maximum of four academic years or to the point at which the number of graduate hours in a term exceeds the number of undergraduate hours, whichever comes first. During that time frame the student's undergraduate enrollment status will be determined using only undergraduate level courses in which the student enrolls. Graduate level courses in which the student enrolls during such semesters will not be used to determine the student's undergraduate enrollment status. Once a student is registered at the graduate level for financial assistance his/her status is considered graduate for all subsequent semesters.

Once registered as a graduate student, a student cannot revert to undergraduate status.

For further information, contact the Office of Financial Assistance at ofas@miami.edu, call (305) 284-5212, or visit the office at Rhodes House (Building 37). Office hours are 8:30 a.m. to 5:00 p.m., Monday through Friday.

Graduation Clearance Requirements:

For dual degree programs, the student must apply for undergraduate and graduate graduation at the same time. Degrees from dual degree programs are conferred at the same time.
For accelerated degree programs, the student must apply for undergraduate graduation in one semester, and for graduate graduation in a subsequent semester.

The student must meet the requirements of the Graduate School specified in the Bulletin for the awarding of the graduate degree.

Students enrolled in a dual degree or accelerated program can take a maximum of six (6) graduate credits per semester in their senior year for a maximum of twelve (12) graduate credits without incurring additional costs if they are full-time undergraduate students during this period.

Students should register for courses towards their graduate degree as "G" credits and not as "U" credits. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

Summary of Guidelines for Dual Degree and Accelerated Programs

- Take at least 12 undergraduate credits per semester. This qualifies you for the opportunity to take up to 6 graduate credits per semester at no additional cost.
- Graduate credits can be taken only in the senior year in a dual degree or accelerated program (based on the number of credits earned towards the undergraduate degree).
- The maximum number of graduate credits allowed per semester is six (6).
- The maximum number of graduate credits the undergraduate student can take at no additional cost is twelve (12).
- The Application for Undergraduates to take Graduate Coursework form should be completed and all signatures must be obtained before registering for graduate credits.
- The student can change his/her status to "graduate", or their status might be determined to be "graduate" for financial aid purposes during or at the completion of the senior year. This will make the student eligible for graduate financial aid (for US citizens or permanent residents).
- The student cannot be a full-time undergraduate (taking 12 or more undergraduate credits) and a full-time graduate (taking 9 or more graduate credits) at the same time.
- Once a student's status changes to graduate (or after they have taken a full load of graduate credits) their status cannot revert to undergraduate status.
- In a dual degree or accelerated program, an undergraduate student cannot take graduate credits in any other year except in the senior year.
- The student should avoid taking any undergraduate credits after the student's status has changed to graduate.

FOR UNIVERSITY OF MIAMI UNDERGRADUATES

Undergraduates Taking Graduate Coursework. University of Miami undergraduates within 30 credits of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit for graduate courses, while completing the requirement for the baccalaureate. The application may be found at https://www6.miami.edu/grad/forms/ApplicationforUndergraduatetstoTakeaGraduateCourse.pdf.
Admission to Graduate Status requires:

1. Must have a minimum of 3.000 G.P.A.

2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;

3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credits earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than six (6) hours credit may be taken in one semester, and no more than a total of twelve (12) hours credit may be taken while in Graduate Status. Students may take no more than 15 credits of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar, Whitten University Center, Room 121.

**READMISSION**

Unless a leave of absence has been requested and approved, students who have not been continuously enrolled for sessions must request readmission. Contact the appropriate program office well in advance of registration. If additional college work has been completed elsewhere since the last enrollment at the University of Miami, an official transcript of this will be required. Recency of credit rules will apply. The application for readmission to the Graduate School may be found at [https://www6.miami.edu/grad/forms/ApplicationforReadmission.pdf](https://www6.miami.edu/grad/forms/ApplicationforReadmission.pdf). If you are an applicant for readmission and also an international student, please contact the Office of International Admission at isss@miami.edu and (305) 284-2928.
DEGREE PROGRAMS

The University of Miami offers majors leading to graduate degrees as follows:

- **MASTER OF ARCHITECTURE (M. Arch.)**
- **MASTER OF ARCHITECTURE IN URBAN DESIGN (MUD)**
- **MASTER OF ARCHITECTURE IN REAL ESTATE AND URBANISM (MRED&U)**
- **MASTER OF ARTS (M.A.)** with concentrations in the following:
  - Applied Marine Physics
  - Art History
  - Art Presenting
  - Communication
    - Communication Studies
    - Film Studies
    - Television Broadcast
  - Print Journalism
  - Public Relations
  - Spanish Print in Journalism
  - Economics
  - English
  - Geography and Regional Studies
  - History
  - International Administration
  - International Studies
  - Journalism
  - Latin American Studies
  - Marine Affairs and Policy
  - Marine Biology and Fisheries
  - Marine Geology and Geophysics
  - Marine and Atmospheric Chemistry
  - Mathematics
  - Meteorology and Physical Oceanography
  - Philosophy
  - Public Relations/Media Management
  - Sociology

- **MASTER OF ARTS IN LIBERAL STUDIES (M.A.L.S.)**
- **MASTER IN ACCOUNTING (M.P.Acc.)**
- **MASTER OF BUSINESS ADMINISTRATION (MBA)**
- **MASTER OF BUSINESS ADMINISTRATION EXECUTIVE TRACKS**
  - Gables, Nassau, Orlando, DelRay, Tampa 1&2, Health Administration, Stragglers, International Business, Working Professionals, Puerto Rico
- **MASTER OF SCIENCE IN EDUCATION (M.S.Ed.)** with concentrations in the following:
  - Advanced Professional Studies
  - Community and Social Change
  - Counseling and Research
  - Early Childhood Special Education
  - Education
  - Education and Social Change
  - Elementary Education
  - Exercise Physiology
  - Higher Education/Enrollment Management
  - Higher Education/Student Life & Development
  - Marriage and Family Therapy
  - Counseling Mental Health
  - Reading
  - Research, Measurement and Evaluation
  - Special Education
  - Sport Administration (Focus athletics or recreational sports)
  - Sports Medicine
  - STEM Education

- **MASTER OF FINE ARTS (M.F.A.)** with concentrations in the following:
  - Art (Studio Work)
  - Digital Imaging
  - Painting
  - Sculpture
  - Graphic Design / Multimedia
  - Ceramics / Glass
  - Photography/Digital Imaging
  - Printmaking
  - Creative Writing
  - Motion Pictures
  - Production
  - Producing
  - Screenwriting
  - Printmaking

INTERDISCIPLINARY GRADUATE STUDIES - Dept. Code: IDS

The Graduate School is no longer accepting applications for the IDS program. This will not affect current IDS students.

ENVIRONMENTAL SCIENCE AND POLICY – Dept. Code: ECSD

Through the Graduate School, The Abess Center for Ecosystem Science and Policy offers an interdisciplinary course of study leading to a Ph.D. Details regarding areas of specialization can be found at the Abess Center website at http://www.cesp.miami.edu/. In most cases, doctoral students are supported by research assistantships which include tuition remission and a monthly stipend. All students are also required to serve satisfactorily for one term as teaching assistants in the Abess Center undergraduate program.

Prerequisite

Students admitted to the program must have earned a Bachelor's or Master's degree and should display a strong interest in the interdisciplinary study of ecosystem science and policy.

Ph.D. Degree Requirements

Completion of the Ph.D. will take approximately five years. All students are also required to:

- Complete a minimum of 60 credits, of which at least 26 must be for coursework taken while in residence at the University of Miami. (Students entering the program with a Master's degree in a related field may be given credit for up to 24 course credits.)

- Complete 12 credits worth of coursework in the following core courses:
  - ECS 501 – Interdisciplinary Environmental Theory
  - ECS 503 – Interdisciplinary Environmental Methods
  - ECS 505 – Interdisciplinary Environmental Law and Policy
  - ECS 507 – Interdisciplinary Environmental Decision Analysis

- Submit, by the end of their second semester, a proposed group of additional courses, totaling at least 18 hours, related to their research interest and intended dissertation research area. This group of courses requires approval of both the student's advisor and the Director of Graduate Studies.

- Accrue at least 13 credits worth of dissertation research.

- Pass written and oral comprehensive examinations following the conclusion of the core series of courses, usually at the end of the first year. A majority of the examination committee must be members of the Graduate Faculty of the University. In the event of failing to pass an examination, students are required to retake and pass the examination within one calendar year. By the end of the second year, students must present and defend a research proposal. Following successful completion of the comprehensive examination and research proposal defense, the student may apply to candidacy for the degree. Any student who fails to be admitted
to candidacy for the degree within this two-year period can be dismissed from the program.

- Convene a 4-member dissertation committee by the end of the first year.
- Write and defend a dissertation research proposal by the end of the second year. Students may proceed with the dissertation after the dissertation committee has been appointed and the Director of Graduate Studies and the Graduate School have accepted the dissertation proposal. The dissertation must be an investigation of a substantial scholarly topic and bridge both scientific and policy aspects of the topic area.
- Successfully complete an oral defense of the dissertation.

[Environmental Science and Policy Course Listing]
UM INTERNATIONAL EDUCATION AND EXCHANGE PROGRAMS
Dept. Code: SAP

Opportunities for study abroad may be available for some graduate degree programs during the summer, fall, spring and intersession terms.

Students may participate in programs led by faculty members or may participate in semester exchange program options offered by the MAIA program.

For further information contact: UM International Education and Exchange Programs, PO Box 248263, Coral Gables, FL 33124-1610, (305) 284-3434, e-mail: ieep@miami.edu.

In some programs it is possible to earn graduate credits for study taken abroad. The curriculum must be worked out by the student in conjunction with an advisor.
THE MASTER’S DEGREE

The minimum residence requirement is two semesters in full-time study or the equivalent in part-time work. In practice, most students need at least three semesters, or two semesters plus summer work, to complete degree requirements.

FOREIGN LANGUAGE

The requirements in a foreign language or languages are established by the student’s program. In those cases where the program deems it necessary that the student have competency in a foreign language, the student will be required to demonstrate such competence by examination in one or more languages. The choice of language or languages required will be by the program.

THESIS

Decision as to the thesis subject must be approved by the program. The thesis committee will consist of not less than three members. At least one of these must be a regular member of the Graduate Faculty of the University of Miami, and one must be from outside of the program awarding the degree. The committee is nominated by the Graduate Program Director of the department or program concerned. The duties of the thesis committee are similar to those of the dissertation committee. Thesis Committees cannot be appointed prior to admission to candidacy. The student who presents a thesis must enroll for at least six hours of thesis credit. Ordinarily no more than six credits may be granted.

When a student has completed coursework, it is recommended that those students in programs requiring a thesis or dissertation make their first appointment with the Dissertation Editor at the Graduate School once their thesis topic has been approved by the major department. The Dissertation Editor will provide information on the guidelines and deadlines that will become critical in the final months of the degree process or information can be downloaded from www.miami.edu/etd. The Graduate School office telephone number is (305) 284-4154, the email address is grad.dissertation@miami.edu.

Master's degree students who are required to write a thesis must defend their thesis by the date specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at www.miami.edu/etd. The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

One Dissertation Editor-approved PDF conforming in style to the formatting standards set by the Graduate School must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each dissertation must be accompanied by one certificate of approval of oral defense of thesis signed by all members of the Committee and one ETD Availability Agreement form signed by the student and Committee Chair. The forms can be downloaded from www.miami.edu/etd.
Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami’s Scholarly Repository, http://scholarlyrepository.miami.edu/. The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university’s Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student’s information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted at www.miami.edu/etd to ensure they fully understand the terms of access for their embargoed work.

FINAL EXAMINATION

A final public oral defense of the thesis is required. However, none but the members of the thesis committee may interrogate the candidate. In addition there may be required, if desired by the program, a final written integration examination to test the candidate’s ability to integrate the whole graduate program and the thesis in relation to it. These examinations must be held at least two weeks prior to commencement.

RESEARCH IN RESIDENCE

Once a student has completed all course and required research credits, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. (See Recency of Credit and Time to Completion sections of the Bulletin.) Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students.

COMPREHENSIVE EXAMINATION

In most programs a comprehensive examination, either written, oral or both, is a requirement. When the thesis is not a part of the program, an examining board, at least one of whose members must be a regular member of the Graduate Faculty, will be appointed by the program.

A student failing the comprehensive may be allowed one opportunity to retake it if the students committee so advises. The re-examination may not be taken during the same semester or summer session, and must be taken within one calendar year.
TRANSFER OF CREDIT

Upon recommendation of the major program and the approval of the Graduate School, a maximum of six semester hours of graduate credit, with grades of B or above, may be transferred from another accredited graduate institution, in partial satisfaction of a master’s degree requiring less than 36 semester hours. Nine hours of graduate credit may be approved for transfer to a degree program requiring 36 semester hours or more. Work taken more than six years prior to transfer will not be accepted. Work taken by extension, correspondence or online is not acceptable. All work transferred is subject to examination by the program. In no case will credit be transferred until the student has completed acceptably an equivalent number of credits at the University of Miami. Any student wishing to transfer credit must be enrolled at the University of Miami during the time of transfer. The satisfaction of the requirements of another university does not relieve the student from the University of Miami’s requirements. An official transcript of work to be transferred must be on file in the Graduate Office. Credits that pertain to or have been counted toward another degree cannot be transferred. Students enrolled in the Master of Business Administration program are not eligible for credit transfers.

Exceptions must be approved by the Dean of the Graduate School.

No transferred credits are calculated into the University of Miami G.P.A.

A SECOND MASTER’S DEGREE

A student enrolled in a University of Miami master’s degree program or holding a University of Miami master’s degree may earn a second master’s degree in a related area at the University by completing a minimum of 21 hours in residence toward the second degree, as long as all program and admission requirements for the degree are met. Each degree must have a separate thesis if two thesis options are elected. The second program decides if the areas are related enough to qualify for the reduced number of credits. The student must contact the second program during the application process for the second program to determine if the areas are related enough to qualify for the reduced number of credits.
THE DOCTORAL DEGREE

(For Ph.D., D.M.A., and Ed.D. candidates only)

GENERAL

The Graduate School does not specify course requirements for the Ph.D. However, the Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. Sixty credits beyond the baccalaureate degree are the minimum requirement for the Ph.D., and not less than half of the total credits must be in work open only to graduate students. At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credits must be taken. Graduate students studying for the Ph.D. who have received their master's degree in the same field must take at least twenty-four (24) hours in residence at the University of Miami in doctoral status.

The specific course requirements for the Ph.D. are established by the major department or program which may require such additional graduate credit as it deems necessary. Such requirements will be found in that part of the Bulletin which lists course offerings.

REGISTRATION

To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted. Doctoral students for whom course work is no longer appropriate and who are engaged on their dissertation should consult the following section.

DISSERTATION

A student must take a minimum of 12 hours of dissertation research except where otherwise stated. Not more than 12 hours of research may be taken in a regular semester, nor more than six in a summer session.

Ph.D., D.M.A., Ed.D., or Lecture Recital degree students must defend their dissertation, doctoral essay, or lecture recital essay by the deadline specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at www.miami.edu/etd. The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.
One Dissertation Editor-approved PDF conforming in style to the standards set by the Graduate School, must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each dissertation must be accompanied by one certificate of approval of oral defense of thesis signed by all members of the Committee and one ETD Availability Agreement form signed by the student and Committee Chair. The forms can be downloaded from www.miami.edu/etd.

Electronic Theses and Dissertations (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami’s Scholarly Repository, http://scholarlyrepository.miami.edu/. The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university’s Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student’s information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted at www.miami.edu/etd to ensure they fully understand the terms of access for their embargoed work.

RESEARCH IN RESIDENCE

Once a student has completed all course and required research credits, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students. (See Recency of Credit section.)

RESIDENCE

The student must spend at least two consecutive semesters beyond the first year’s graduate work, wherever taken, in full-time study at the University of Miami. With program approval, a) one summer of full-time study in sessions I and II can be substituted for one semester of residence, or b) full-time study for two successive summers can be substituted for two regular semesters. Residence requirements may be altered only by the Dean of the Graduate School. (At least 24 credits must be taken in residence.)
THE SUPERVISORY AND DISSERTATION COMMITTEES

A supervisory committee is usually appointed when a student is formally admitted to a doctoral program. The committee must be comprised of at least four members; this includes the committee chair, who shall be a member of the program or department of concentration (this includes secondary appointments), as well as a permanent member of the Graduate Faculty. Of the remaining members, it is also required that two shall be members of the program or department of concentration as well as permanent members of the Graduate Faculty, and one from outside the program or department of concentration. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the chair of the department and Dean of the Graduate School. A department, program, or school / college may require additional members.

This committee is nominated by the chairperson of the program or department concerned. It is appropriate for the chairperson to consult with the student regarding the membership of the committee. The supervisory committee is empowered to plan the course of study for the student; to determine deficiencies, if any; to set language and other requirements; to request applicable transfer of credit where appropriate and to make up and administer the qualifying examination.

When the student is admitted to candidacy, a dissertation committee is formed. This may be the supervisory committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The dissertation committee is nominated by the department or program concerned, and appointed by the Graduate Program Director and approved by department chair. As with the supervisory committee, it must be comprised of at least four members; this includes the committee chair, who shall be a member of the program or department of concentration, as well as a permanent member of the Graduate Faculty. Of the remaining members, it is also required that two shall be members of the program or department of concentration, as well as permanent members of the Graduate Faculty.

http://www.miami.edu/gs/index.php/graduate_school/current_students/graduate_faculty_list_by_department/ and one from outside the program or department of concentration. A department, program, or school or college may require additional members. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research;
2. To meet, at regular intervals, to review progress and expected results;
3. To read and comment upon the draft dissertation;
4. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work a minimum of two weeks prior to the defense.
The dissertation may be in another language only if relevant and appropriate to the content of the dissertation and accepted by the dissertation committee. This will be determined on a case-by-case basis. In such cases, an abstract in English will also be attached to the dissertation. The dissertation chair will submit a justification memorandum at the same time that the application for admission to candidacy form is submitted to the Graduate School with and explanation of why the student should be allowed to write their dissertation in a language other than English.

One Dissertation Editor-approved PDF must be uploaded to the ETD database and final paperwork handed in to the Graduate School on or before the date specified in the academic calendar published each session, accompanied by one certificate of approval of doctoral dissertation defense and one ETD Availability Agreement form. It is the duty of the student to acquire a copy of the guidelines for preparing dissertations from the Graduate School or www.miami.edu/etd and to conform to the requirements therein. All dissertations are also published by ProQuest/University Microfilms, Inc.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved to the student’s committee. Changes of committee members must be approved by Graduate Program Director, and sent to the Graduate School.

**QUALIFYING EXAMINATIONS**

A written qualifying examination is to be taken by each doctoral degree (Ph.D., D.M.A., D.N.P, D.P.T., Ed.D.) candidate at the time that the student and the Supervisory Committee deem appropriate. The school or major program may specify that its students must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the supervisory committee shall notify the Graduate School and the instructional school or program that the student has passed or failed the examination. A student who fails the examination will be given one opportunity to retake it with the permission of the supervisory committee. After a comprehensive exam is failed for a second time, the student is terminated from the program. Some programs do not administer qualifying examinations during the summer months. Check with the Graduate Program Director for specific program requirements.

**ADMISSION TO CANDIDACY**

When the student has met all requirements and passed the qualifying examinations, admission to candidacy for the degree is approved. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the defense of dissertation is scheduled.

**FINAL EXAMINATION**

A final public oral defense of the dissertation is required. Refer to the academic calendar for the deadline regarding dissertation defense for each graduation. Graduate programs set the specific requirements and format of the defense. Please contact your Graduate Program Director for details.
TRANSFER OF CREDIT

Transfer of graduate credit from another institution will not be made until the student has completed a like amount of credit at the University of Miami, and the transfer has been approved by the supervisory committee and the Dean of the Graduate School. Credit transferred is subject to the same recency rules as all other credit counted toward the degree, and is also subject to examination by the program. An official transcript of work to be transferred must be on file in the Graduate School. Credits that pertain to or have been counted toward another degree cannot be transferred.

Florida International University and University of Miami agreement

Effective as of Fall 2007, students may take up to six credits at the host institution as long as the following requirements are met:

1. Must be Ph.D. student or Master’s student in Latin American Studies.
2. Approval from both home and host institution;
3. Approval of Graduate School Deans;
4. Space at the host institution is available.
5. Approval of the Faculty member teaching the course.

Tuition and fees are to be paid at the home institution. Performance level is set at host institution. Contact the Graduate School for more information. The application form can be found at [http://www.miami.edu/gs/index.php/graduate_school/current_students/umfiu_doctoral_exchange_program/](http://www.miami.edu/gs/index.php/graduate_school/current_students/umfiu_doctoral_exchange_program/).
The School of Architecture at the University of Miami offers both a professional and a post-professional Master of Architecture degree.

The School is a member of the Association of Collegiate Schools of Architecture.

The School of Architecture’s location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals.

Students have the opportunity to work with the faculty in the exploration of theoretical issues as well as in the resolution of practical problems.

The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

The school’s resources, including an accredited undergraduate program in architecture and a state-of-the-art computer laboratory, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

All students admitted full time to the Master of Architecture program may be eligible for partial tuition scholarships and/or graduate assistantships, based on academic record.

Scholarships may vary in amounts and are intended to assist the recipient pursue studies as required by the program. Scholarships will be awarded on a competitive basis. Graduate assistantships require service in the form of teaching, research assistance, or other appropriate educational activities as designated by the director of the graduate program.

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

*In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education.*

*Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree*
ADMISSION REQUIREMENTS

Applications are for the fall semester only. Applications completed by February 1<sup>st</sup> will be given the highest priority. Admission to the graduate program is subject to the rules, regulations and procedures of the Graduate School as stipulated in the University Graduate Bulletin. It is the responsibility of each student to understand these requirements and to ensure that they are met.

The minimum requirements for application to the Master of Architecture Degree program are:

1. 3.0 cumulative grade point average.

2. 1000 cumulative Graduate Record Examination score on verbal and quantitative sections / 550 TOEFL score for international applicants and/or those whose native language is not English.

3. For Master of Architecture: Suburb and Town Design; Master of Architecture: Research - a Professional Degree in Architecture (Bachelor of Architecture or Master of Architecture).

RESOURCES

The school’s resources, including a state-of-the-art computer laboratory, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for graduate architecture students include: the Historic Preservation Certificate, the Suburb and Town Design, the BSAE/MARCH and the BARCH/MBA.

DEGREE PROGRAMS

MASTER OF ARCHITECTURE: PROFESSIONAL DEGREE

The Master of Architecture is designed for college graduates seeking a first professional degree in architecture. It consists of the following two tracks:

3 year Track: A 3 year program for students holding undergraduate degrees in non-design fields. Completion of 105 credit hours required.

Advanced Standing 2 Year Track: A program for students holding a previous non-professional degree in architecture or a closely related field. Completion of 51-60 credit hours required.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, compromise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.
MASTER OF ARCHITECTURE: POST PROFESSIONAL DEGREE

The Master of Architecture post-professional program provides an environment for serious inquiry into the nature of architecture.

Post-professional study is available to students holding an accredited degree in architecture who wish to develop a specialization in architectural theory and practice.

Three areas of study offer students the opportunity to investigate specific aspects of architecture and to elaborate their understanding for future teaching, research, publications and professional practice.

Master of Urban Design

This concentration consists of three semesters of directed study to explore in-depth the existing state of suburbs and cities, study precedents and propose design solutions.

The faculty is dedicated to seeking alternatives to modern patterns of urban growth.

The Miami metropolitan area provides a laboratory for the identification of urban problems and for the exploration of design solutions.

Each semester is comprised of a design studio and a seminar in parallel, studying both the real and ideal solutions for three aspects of town planning: new town design, housing and the redesign of existing situations.

The School of Architecture faculty teaches the curriculum with field condition input from visiting faculty and other experts such as developers, marketing experts and bankers.

Master in Real Estate Development and Urbanism

A one-year interdisciplinary program that will blend the fundamentals of real estate development with the School of Architecture’s strengths in the New Urbanism, community design and civic engagement.

Master of Architecture: Research

This program allows students to specialize in a specific area of study within the context of the discipline.

Each student must complete 36 credits, normally over three semesters. A specific program of study, reflecting the proposed professional objectives, is established for each student. In addition, a six-credit thesis is required.

An advisory committee of the faculty of the school supervises the progress of the students. The program is based on studio work combined with cross-disciplinary and specialized studies.

The program culminates in a comprehensive project tailored to meet the needs of the individual student.

Architecture and professional courses completed in a pre-professional bachelor’s degree program will be evaluated to identify courses that may be waived in the Master of Architecture Professional Degree Program.

A maximum of 54 credits, including three design studios, may be waived; generally architecture and professional courses with a grade of B- or higher will be accepted. Requirements for the degree will be contingent on the evaluation of the student’s prior work.

### Master of Architecture: Research

**Post Professional Degree**

An individual curriculum is developed for each student in consultations with the research program faculty and the director of graduate studies.

Courses in thesis preparation, ARC 529, and Thesis, ARC 710, (6 credits) are required. Master of Architecture degree conferred.
AWARDS AND SCHOLARSHIPS

American Institute of Architects Henry Adams Medal awarded by the American Institute of Architects to the highest ranking graduating student for scholarship and excellence in architecture.

American Institute of Architects Henry Adams Certificate awarded to the second highest ranking graduating student for scholarship and excellence in architecture. Other honors, distinctions, and awards are presented annually for excellent student performance.

Master of Arts
Master of Fine Arts
Master of Public Administration
Master of Science
Doctor of Philosophy

DEGREE REQUIREMENTS

Please consult the specific department section for information related to degree requirements in addition to general degree requirements for the various degrees as listed by the Graduate School.
OTHER

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available in Ungar 333 or at the following link; http://www.as.miami.edu/scholarships/travelscholarships and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the Ungar Building.
ANTHROPOLOGY - Dept. Code: APY

The Department of Anthropology does not have a graduate program. The courses may be taken for graduate credit with the consent of the major department.

DEGREE PROGRAMS

Two programs serve the needs of graduate students in Art and Art History.

Master of Fine Arts program in the studio areas of
- Painting
- Sculpture
- Graphic Design/Multimedia
- Ceramics/Glass
- Printmaking
- Photography/Digital Imaging

Master of Arts program in Art History

MASTER OF ARTS

The M.A. degree is designed for students in art history who plan academic, museum or gallery careers. It entails a minimum of 36 credits in art history and related courses, including six credits of thesis. M.A. students must pass a comprehensive examination. Reading knowledge of a foreign language appropriate to the study of Art History (e.g., French, German, Italian, Spanish) is required.

REQUIREMENTS FOR THE MASTER OF ARTS DEGREE IN ART HISTORY ARE:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Art History at 500 level or above</td>
<td>21 credits</td>
</tr>
<tr>
<td>Electives not restricted to courses in Art</td>
<td>9 credits</td>
</tr>
<tr>
<td>Thesis</td>
<td>6 credits</td>
</tr>
</tbody>
</table>

Admission to the Master of Arts program requires a minimum of eighteen semester hours of undergraduate study in Art History.

Applicants for admission are required to submit an example of an art history research paper they have done in addition to the general requirements of transcripts, GRE scores and letters of recommendation. It is highly recommended that applicants have reading knowledge of a foreign language (e.g., French, German, Italian, Spanish).

A maximum of six semester hours of graduate credit may be transferred from another institution, providing that the credits have been taken within six years prior to matriculation at the University of Miami and have been passed with a grade of B or higher.

Applicants for admission to the Master of Arts program are responsible for the submission of the following materials to the Graduate Secretary in Art and Art History:
- All transcripts of college-level academic work;
- GRE scores (and TOEFL score for foreign students);
- A research paper from an undergraduate art history course;
- Three letters of recommendation;
- Application form.

Applicants for the M.A. degree are considered in the Spring and Fall. The deadlines for applying are February 15 for Fall admission and September 15 for Spring admission.
FINANCIAL AID: Graduate Teaching Assistantships and tuition waivers are awarded by the department in studio areas.

The G.R.E. is required for the M.A., but not for the M.F.A. degree.

All M.F.A. students with Teaching Assistantships must contribute to the teaching program as an essential part of their responsibilities.

MASTER OF FINE ARTS

The Master of Fine Arts degree is the terminal degree for students interested in the creation of art who plan to pursue careers as practicing artists/teachers.

The students will take a minimum requirement of 60 credit hours in approved graduate courses.

Teaching assistants can opt to take 10 credits each semester, or will take 9 credits each semester the first year, 12 credits each semester the second year, and 9 credits each semester the third year.

A Supervisory Committee will be assigned when the student is formally admitted to the program.

It will be comprised of at least four members.

The Supervisory Committee chair will be from the student’s area of concentration and a member of the graduate faculty.

The head of the Supervisory Committee will select the membership of the Committee after conferring with the student.

The Supervisory Committee will formally review the student’s progress; the student may be put on probation at the end of any semester, and given one semester to improve or be removed from the program.

Application for candidacy may be made any time after the completion of 30 credits, but must be attained prior to registration for the final semester.

The Supervisory Committee will determine whether the student should be admitted to candidacy.

When the student is admitted to candidacy, a Thesis Committee is formed with at least four members, who need not be the same as the Supervisory Committee.

The Chair should be from the student’s area of concentration and a member of the graduate faculty.

Two others should be department faculty, and the fourth person must be from outside the studio faculty.

This committee will consult with and advise the student on his or her work, meet twice a semester to review progress, read and comment on the thesis document, and conduct a final oral exam during the thesis exhibition.

The thesis exhibition will be scheduled after the successful completion of ART 599; the show will be installed after the candidate has submitted an accepted thesis document. All incompletes must be cleared before the exhibition can be scheduled.
No student gains the right to be recommended for the degree simply by completing requirements. This right is reserved to the student's Thesis Committee in coordination with the Graduate Program Director.

**REQUIREMENTS FOR THE MASTER OF FINE ARTS DEGREE IN STUDIO:**

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARH 598, ART 604, ART 681 (3 seminars);</td>
<td>9 credits</td>
</tr>
<tr>
<td>Area of studio concentration;</td>
<td>24 credits</td>
</tr>
<tr>
<td>Art History at 500 or 600 level</td>
<td>6 credits</td>
</tr>
<tr>
<td>Electives, not restricted to courses in Art or Art History;</td>
<td>12 credits</td>
</tr>
<tr>
<td>ART 599 Exhibition Preparation</td>
<td>3 credits</td>
</tr>
<tr>
<td>Thesis, consisting of a body of studio work accompanied by a written document.</td>
<td>6 credits</td>
</tr>
</tbody>
</table>

Applicants for admission to the Master of Fine Arts program are responsible for the submission of the following materials to the Graduate Secretary in Art and Art History:

1. All transcripts of college-level academic work;
2. 20 slides of studio work; OR 20 images on a CD/DVD
3. Three letters of recommendation;
4. Application form.

Applicants for MFA degrees are considered in the Spring and Fall. February 15 is the postmark deadline for Fall admission and September 15 is the postmark deadline for the Spring admission. Teaching Assistantships are available only with Fall admission. The deadline for international applications for the following Fall semester is January 15.

[Art Course Listing](#)

[Art History Course Listing](#)
APPLICATION FOR ADMISSION

Applications are due December 1.
In applying for admission, applicants must select either the Master’s or the Ph.D. track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master's track, but wish to change to a Ph.D. track without completing the Master’s may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant's file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master’s track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must send the following to the Director of Graduate Studies in Biology:

A. completed application form.

B. all undergraduate and graduate official transcripts (photocopies are not accepted).

C. official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; the Biology subject matter test also is recommended (photocopies of scores are not accepted).

D. international applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English) official scores (photocopies of scores are not accepted).

E. letters of recommendation, from three science instructors/ supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential.

F. cover letter that identifies interests, suggests possible research projects and states career goals.

G. copies of any research papers (e.g., publications, manuscripts, senior reports, etc.).

H. written confirmation of a UM Biology faculty sponsor; applicants MUST secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor.
I. application fee of $65.
A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense.

*Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.*

**DEGREE REQUIREMENTS**

All students are required to satisfy the general requirements for the appropriate degree that are listed in the Graduate Studies Bulletin, whether or not they are listed among the Biology requirements.

**MASTER OF SCIENCE** - This degree may be attained by either of the two following routes.

**A. M.S. with thesis (a three year program)**

1. **Credits:** a total of 30 credits are required:
   - 24 course credits, including the four semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area; they are encouraged to select courses and independent studies that will prepare them for research, as listed under the Ph.D. requirements. No more than 9 credits from the independent study series (BIL 671-675) may be used to fulfill the 24 course credits. At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credits can be counted as a non-independent study credit. Course selection requires committee approval.
   - 6 research credits (BIL 710); no more than 6 M.S. research credits are allowed.
   - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. **Research Proposal:** public presentation and successful defense to the committee of a written research proposal. The public presentation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.

3. **Admission to candidacy is made by recommendation of the committee.**

4. **Thesis:** A well-written and successfully defended thesis of publishable quality; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation.

5. **Other requirements described under "The Master's Degree," including but not limited to:**
   - a total of at least 30 credits (course credits plus research credits). The Graduate School and the Department concur in requiring at least 24 course credits and exactly 6 research credits (BIL 710) for a thesis M.S.
• once a student has completed all required credits, she/he must enroll in "Research in Residence" (BIL 720) status until the degree is granted. This course carries 0 credits, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit normally applies to this course.

6. About the committee:

• A single committee will combine the responsibilities of the supervisory and thesis committees.

• The supervisory committee will be determined by the student in consultation with his or her advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

• The thesis committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

• The thesis committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.

• Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should consult with the committee about major changes in research goals and about problems. Memos summarizing each meeting should be in the student’s file.

7. About the time table:

• A written thesis proposal is due no later than the middle of the second semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the time table.

• Admission to candidacy normally occurs after completion of one year or 12 credits of graduate work and successful defense of the thesis proposal.

• Analysis of data and a polished draft of the thesis should be completed and in the hands of the committee by the middle of the sixth semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the time table.

• Defense of the thesis and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the sixth semester unless an extension has been approved by the Graduate Admissions and Advisement Committee (GAAC) upon recommendation of the thesis committee. Notice of the defense must be submitted on a special form to the
graduate school in advance of the defense and must be posted publicly in the department.

- The oral defense of the thesis must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.

- **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**

- The indicated dates form firm deadlines. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**

- Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support.

**B. M. S. without thesis (a two year program)**

1. Credits:

   - A total of 36 course credits are required by the Biology Department, including the four semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area, listed under the Ph.D. requirements. No more than 9 credits from the independent study series (BIL 671-675) may be used to fulfill the 36 course credits. At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credits can be counted as a non-independent study credit. Course selection requires committee approval.

   - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Admission to candidacy is made by recommendation of the committee.

3. Passing a written comprehensive exam given by the committee.

4. About the committee:

   - A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

   - The examination committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee,
or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student’s advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

- The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.

- Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student’s file.

5. Other requirements described under "The Master's Degree."

Note that although the Graduate School requires only 30 credits for an M.S. degree, the Department requires 36 course credits for a non-thesis M.S.

6. About the time table:

- **Admission to candidacy** normally occurs after completion of one year or 12 credits of graduate work.

- The **comprehensive exam** must be passed by the **end of the fourth semester**.

- **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**

- The indicated dates form **firm deadlines**. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**

- Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit** and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support**.

### C. DOCTOR OF PHILOSOPHY

1. Credits: a total of 60 credits (including both course and research credits) beyond the Bachelor’s degree are required:

   - At least 18 course credits that are not from the independent study series, including the four semester departmental core courses for graduate students and at least one graduate course in statistics. The independent study series is BIL 671-675. At times these course numbers are used by professors to teach a new course or a special topics course, however, in which case the corresponding credits can be counted as a non-independent study credit. Course selection requires committee approval.
• At least 12 research credits (BIL 730 and/or BIL 740). Once the overall number of required credits (see below) has been reached, there is no need to take additional research credits.

• An additional 30 credits from any combination of graduate courses (500 and 600 level regular courses and independent study courses) and research credits (700 level) to bring the total number of credits beyond the Bachelor's Degree to 60 credits. (One example: 18 required course credits + 12 required research credits + 15 additional course credits + 15 additional research credits = 60 total; another example would be 18 additional course credits and only 12 additional dissertation credits, etc.)

• Students who already have a Master's Degree in the same field may not need as many course credits (consult Graduate School rules on transfer credits), but at least 24 credits must be taken in residence at UM.

• The committee may decide that students with previous graduate level courses may be exempt from some of the course requirements.

• The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

• **CONCEPTUAL AREAS:** Students are encouraged to take courses and independent studies from at least 3 main conceptual areas, and are urged to take courses and independent studies that will prepare them for research and for the comprehensive qualifying exam. Students also are encouraged to participate in seminars and study groups and to take special courses in other departments of UM, at our Coalition for Excellence in Tropical Biology partner institutions, from the Organization for Tropical Studies, or other special interdisciplinary courses. Such courses should be appropriate to their course of study and research area as determined by their committee. Conceptual areas offered in our department include: EVOLUTION (graduate level evolution courses are in the series 520's and 620's, also 519 is included); ECOLOGY (graduate level ecology courses are in the series 530's and 630's); BEHAVIOR (graduate level behavior courses are in the series 540's and 640's); GENETICS AND MOLECULAR BIOLOGY (graduate level genetics courses include BMB 509, and BIL 530 in addition to the series 550's and 650's); and PHYSIOLOGY AND CELL BIOLOGY (graduate level physiology courses are in the series 560's and 660's). Special concentrations in our department and/or in collaboration with other departments include: Tropical Biology, Mathematical Ecology, Neuroscience, and Behavior.

2. Comprehensive qualifying exam should be passed by the end of the third semester.

• A single committee (see number 9 below about committee membership) will advise the student on both comprehensive and research training. To fulfill the **comprehensive function**, the committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above).

• To establish intellectual communication between the committee members and students early on, the committee will begin to work with the student in the first semester. Faculty will suggest reading lists, courses and/or independent study, as needed, to prepare the student with sufficient background for the comprehensive examination which will include 3 areas, one of which is the research area. The
committee and student will interactively define the scope of comprehensive training and thus of the comprehensive examination in these 3 areas.

- The comprehensive examination will be held in the third semester. The committee will designate a chair to administer the examination. The written part of the exam will not be open book and it will be administered on campus for a discrete period of time (up to 4 hours within each of two consecutive days) by the examination chair. All members of the committee will grade all the questions. With committee approval, an alternative is to present to the committee a first-authored, publishable, full-length article manuscript concerning research conducted since matriculation at UM. Before the end of the third semester, the manuscript must be submitted to a journal approved by the committee. After the committee has read the written answers or manuscript, about one week later there will be an oral exam for the purpose of further exploring the student’s grasp of the subject matter.

- Each committee member will decide on a pass/fail grade based on the total performance (written plus oral). For the student to pass the examination, 3 of the 4 examiners must vote a grade of pass. An oral and written summary of the committee’s evaluation must be prepared by the chair of the examination committee and given to the student and to GAAC. If the student does not pass the examination, there will be a chance to retake it the following semester. In the case of failure a second time, he/she will be terminated from the program.

3. Research proposal: public presentation of a research proposal and defense of a written research proposal to the complete research committee (see below) should be completed by the middle of the fourth semester. Students are encouraged to follow the format of a grant proposal to a major funding agency. At the proposal defense, the student will receive either a pass or a fail. A grade of pass will be recorded if no more than one member of the complete research committee (see below) votes to fail the student. If the student fails the proposal defense, she/he will be given a second chance to defend no later than the sixth week of the fifth semester. If the defense is failed a second time, the student will be terminated from the program.

4. Admission to candidacy: (application is made on a form available in the grad school and in the department). This normally will occur at the end of the fourth semester. Requirements are to pass the comprehensive examination and to successfully defend a written research proposal.

5. Teaching: All students on the Ph.D. track in Biology are required to serve satisfactorily at least one semester as a teaching assistant in one of the courses offered as part of the Department's training program.

6. Grants: Submission of a grant proposal to a major funding agency (e.g., NSF, NIH, National Geographic, World Wildlife Fund, etc.). All students are required to seek outside funding for their research. This must be a research project proposal. Application for an NSF pre-doctoral fellowship does not meet this requirement, but application for an NSF dissertation improvement grant does qualify.

7. Ph.D. Dissertation: A well-written and successfully defended dissertation containing an original contribution to the field and of quality appropriate for publication in a scientific journal; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation. A public dissertation seminar also is presented at the time of the defense.
8. Other requirements described under "Doctor of Philosophy," including but not limited to:

- a total of at least 60 credits (course credits plus research credits).

- once a student has completed all required credits, she/he must enroll in "Research in Residence" (BIL 750) status until the degree is granted. This course carries 0 credits, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit normally applies to this course.

9. A single committee will advise the student on both comprehensive and research training. The committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above). The research function of the committee is to advise the student on research, including preparation, training, project choice, project design, implementation and evaluation of the research. The committee will go through several phases and its membership will be determined by the advisor and student together, contingent upon approval of GAAC and/or the Graduate School, as appropriate at each phase:

- The **initial committee** will consist of at least 4 faculty, 2 appointed to ensure breadth of training (from two areas outside the research area) and 2 from the research area. It will be formed to help the student choose courses during the first few weeks of the first semester. This committee will decide whether students having a M.S. in biology (botany, zoology, etc.) from another institution can substitute a graduate level course taken elsewhere for a departmental course requirement; it also will decide which additional courses should be taken for both research and breadth. The choice of areas briefly will be outlined in a memo to GAAC.

- The **initial committee of at least 4 faculty** will be responsible for preparing and administering the comprehensive examination.

- The **complete committee of at least 4 faculty** including one from outside the department, should be formed by the end of the third semester; all four members should participate in the proposal evaluation which will take place in the fourth semester. The committee will consist of a minimum of four faculty, which includes the committee chair, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty.

- The **dissertation committee (of four)** is formed officially when the student is admitted to candidacy. It usually will comprise the same individuals as the complete research committee, or it may be formed anew. The student and advisor consult on the membership of the committee, and the department nominates the committee to the graduate school. The committee will consist of a minimum of four faculty, which includes the committee chair who is the advisor, who must be a member of the Graduate Faculty. Of the remaining members, it also is required that two shall be from the Graduate Faculty and one from outside the department of concentration. The dissertation committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.

- Committee meetings are **required at least once a year** (recommended at least once a semester in the early phases). The student is responsible for arranging meetings; the student should consult with the committee about any major changes in research goals and any problems; memos summarizing each meeting should be in
the student’s file.

10. About the time table:

- The written **comprehensive qualifying examination** must be passed by the end of the third semester.

- A **polished, written dissertation proposal** must be **defended to the committee in the fourth semester** together with a **public presentation of the proposal**. This must take place by mid-April of the spring semester or mid-November of the fall semester.

- **Admission to candidacy** normally occurs after the comprehensive qualifying exam and proposal defense are passed upon the recommendation of the committee and the approval of the Graduate School. Application for admission to candidacy is made to the graduate school on a special form.

- Analysis of data and a **polished draft of the dissertation** should be completed and in the hands of the dissertation committee **no later than the middle of the tenth semester**.

- **Defense of the dissertation and its submission to the Graduate School** must meet or precede the deadline for graduation immediately following **the tenth semester** unless an extension has been approved by GAAC upon recommendation of the dissertation committee. Notice of the defense and of the public seminar must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.

- The oral **defense of the dissertation** must be given during **regular sessions** of the Fall or Spring semesters, not during summer sessions, intersessions, reading days, or finals weeks.

- **No student may receive the degree in the same semester in which she/he is admitted to candidacy**.

- The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC**.

- Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit**, and explicitly should address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support** of the student beyond the 10 semesters of normal departmental support.

11. Public presentations must be during regular semesters. The public presentation associated with the defense of the proposal and the public seminar associated with the defense of the dissertation must be given during regular sessions of Fall or Spring semesters, not during summer sessions, inter-sessions, reading days, or finals weeks.
**IMPLEMENTATION**

All Graduate students will be reviewed each fall semester by GAAC.

A. The advisor will review the student's progress to date.

B. The student will provide updates for a student progress database every October.

C. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.

D. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.

E. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.

F. Possible outcomes of the review:
   1. Student making satisfactory progress
   2. Student not making satisfactory progress; recommendations for improvement
   3. Student not making satisfactory progress; his/her tenure terminated.

**FINANCIAL SUPPORT**

A. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.

B. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data.

C. Students holding full University fellowships, Maytag fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold Maytag fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

*Biology Course Listing*
PROSPECTIVE graduate students are expected to have completed, during their undergraduate training:

The candidate must hold a B.S./B.A. degree from an accredited institution. Consideration is given to applicants who have successfully completed general chemistry (two semesters), organic chemistry (two semesters), physical chemistry (two semesters), and the related laboratories. A course in advanced inorganic chemistry is strongly recommended, and remedial work in this area may be required of students who have not taken such a course. The mathematics and physics courses that are normally included in a B.S. program in chemistry are also required.

Undergraduate deficiencies are treated as such and must be overcome during the first year of graduate study.

M.S. Degree

The MS degree requires a minimum of 30 credits. At least 18 credits must be formal lecture courses. The remaining 12 credits must be broken down as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry Seminar (CHM 679)</td>

Students must take a minimum of 9 credits of formal lecture courses in the fall semester of their first year and a minimum 9 credits of formal lecture courses in the spring semester of their first year. Of the 18 credits, 3 core courses totaling 9 credits should be taken by all graduate students.

- The required number of credits in chemistry seminars (CHM 679 and 680) and Introduction to Research (CHM 685) must be taken in the first and second year.

- The required number of credits in research (CHM 710) must be taken in the second year.

- A dissertation based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the second year.

The remaining courses may be selected from 600-level chemistry courses or 500- or 600-level courses in other departments.

The M.S. degree may be earned with or without a thesis. In order to complete a MS degree without thesis, an advanced comprehensive exam must be passed.

The exam is administered at the end of the second year in the program.
Ph. D. Degree

The general requirements for the doctorate in Chemistry are set forth in this Bulletin under the heading Doctor of Philosophy. The Department of Chemistry has the following specific requirements:

The PhD degree requires a minimum of 60 credits. The department will cover tuition costs up to 60 credits for students on assistantships and fellowships. At least 18 credits must be formal lecture courses. The remaining 42 credits could be broken down as follows:

<table>

Students must take a minimum of 9 credits of formal lecture courses in the fall semester of their first year and a minimum 9 credits of formal lecture courses in the spring semester of their first year. Of the 18 credits, 3 core courses totaling 9 credits should be taken by all graduate students.

- The required number of credits in the chemistry seminar (CHM 679) must be taken in the first and second year.
- The required number of credits in Introduction to Research (CHM 685) must be taken in the first year.
- The required number of credits in the chemistry seminar (CHM 680) must be taken in the second and fourth year.
- The required number of credits in Pre-candidacy Doctoral Dissertation (CHM 730) must be taken in the first, second, third and fourth year.
- The required number of credits in Post-candidacy Doctoral Dissertation (CHM 740) must be taken in the fourth year.
- Four Cumulative Examinations must be passed before the end of the first year.
- An Oral Comprehensive Exam must be passed before the end of the second year.
- An original research proposal in Problems in Research Planning (CHM 688) must be presented and defended before the end of the third year.
- A dissertation based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the fifth year.
The department of Computer Science offers a Master of Science in Computer Science and a Doctor of Philosophy in Computer Science.

Master of Science in Computer Science

The Master of Science program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites for Admission
Completion of the following courses, or their equivalents, is prerequisite to entry into the program: CSC 120, CSC 220, CSC 314, CSC 517, CSC 527, MTH 111, MTH 224, and MTH 309. Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.

Requirements for Graduation
Students must complete the Graduate School requirements, and the Departmental requirements described here.

Students must complete either the thesis option or the coursework option.

1. Thesis option:
   • CSC 710 – Master’s Thesis (6 credits)
   and coursework:
   • At least 9 credits from CSC6XX courses and at least 15 credits from other approved courses.

2. Coursework option:
   At least 36 credits from approved courses.

At least 18 credits, excluding thesis credits, must be from courses offered by the Department of Computer Science, and may not include more than 6 credits from CSC 670. CSC 5XX and CSC 6XX courses can be approved for a program, and certain non-Computer Science graduate courses may be considered for approval.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designate. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.
5-year Bachelor of Science + Master of Science in Computer Science

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science, and the requirements for a 30 credit Master of Science in Computer Science with thesis. No credits may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credits towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e., CSC120, CSC220, CSC314, CSC517, CSC527, MTH161, MTH224, and MTH309.
- They have completed 3 credits of CSC410/1 in a research-oriented project.
- They have a GPA of at least 3.0 in the CSC courses taken towards their BS in Computer Science.
- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.

Students in the MS-phase must complete 3 further credits of CSC410/1 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take 600 level courses that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree. Students in the MS-phase must submit their GRE scores before they are admitted to graduate student status.

Incoming students can be admitted to the program if their mathematics placement is MTH108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

DOCTOR OF PHILOSOPHY IN COMPUTER SCIENCE

The Doctor of Philosophy program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.
Prerequisites for Admission
Completion of the following courses, or their equivalents, is prerequisite to entry into the program: CSC 120, CSC 220, CSC 314, CSC 517, CSC 527, MTH 111, MTH 224, and MTH 309. Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.

Requirements for Graduation
Students must complete the Graduate School requirements, and the Departmental requirements described here.

Written Qualifying Exam:
The student must pass a three-hour written exam of general knowledge of Computer Science at the end of the first year. Upon failure, the student may petition the CSGC to allow a second attempt at the end of the second year. The exam will be administered once a year in the early weeks of the summer session. It will cover expected knowledge of all first-year graduate students. Included in this material are a fundamental understanding of algorithm analysis and design, advanced skills in programming, basic knowledge of computer architecture, and a general understanding of computer systems.

Classroom Courses:
In the first two years, the student must take eight CSGC-approved classroom courses, for a total of 24 credits. At least four of these courses (12 credits) must be CSC 6XX courses. The eight courses must include two courses from each of the areas of Analysis, Applications, and Systems. The student must work with the Director of Graduate Studies to select a cohesive set of courses as approved by the CSGC. The CSGC will have sole authority in designating the areas to which each course belongs. In the case that a course is designated in more than one area, a student may apply the course to only one area. The designation of current CSGC-approved courses appears at the end of this description.

Selecting an Advisor:
By the end of the second semester, the student must find a research supervisor. By the end of the third semester, the student must have made significant progress on a research project under the supervision of a faculty member. The student must write a detailed progress report that will become a public document and shall be kept on file by the Department. The student must present the report to a quorum of the CSGC at a time to be approved by the chairman of the Department. The supervisor and CSGC must approve the project as applicable toward candidacy for a Ph.D.

Annual Presentations:
After passing the written comprehensive exam, the student must make a public oral presentation to the Department at least once per year. These presentations include the thesis proposal and the thesis defense. The goals are to develop the student’s oral and presentation skills, to provide a means for the Department to check the research and progress of the student, and to present the opportunity for feedback to improve the student’s research.

Teaching Experience:
Each student must teach a lab-based course for a minimum of one semester. Lab-based courses typically require the student to present material in a relaxed lecture format, re-emphasizing material learned in the general lecture as well as introducing new material to the students.

CREATIVE WRITING
www.as.miami.edu/english

DEGREE PROGRAMS

The Department of English offers a two-year program in fiction or poetry writing leading to the Master of Fine Arts degree. The program provides an opportunity for students of superior ability in imaginative writing to develop their skills and critical judgment through the practice of writing and the study of literature.

The creative writing program is a member of the Associated Writing Programs.

For further information, please consult the description of the M.F.A. in English.
ENGLISH - Dept. Code: ENG
www.as.miami.edu/english

DEGREE PROGRAMS

The Ph.D. program is an innovative scholarly course of study offering substantial work in all areas of English, American, and Transnational literature, including Anglo-Irish literature, with some opportunities for advanced work in comparative literature.

Doctor of Philosophy

1. Courses
Ph.D. students must complete 54 credits (if entering with a B.A.) or 36 credits (if entering with an M.A.) of 600-level courses in literature and literary theory.

2. Language Requirements
A reading knowledge of two foreign languages is required.

3. Qualifying Examination
All Ph.D. students are required to pass a qualifying examination. Students may not take the qualifying examination until they have

- completed the required Ph.D. coursework,
- satisfied the foreign language requirement
- enrolled for English 697 (Readings for the Qualifying Examination).

4. Dissertation
Students may proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been accepted by the committee and approved by the department.

The dissertation itself must be an investigation of a substantial critical or scholarly topic. A final oral defense of the dissertation is required.

Further information on the department’s graduate programs is contained in the Guide to Graduate Study available from the Department of English.

Students must complete their work within one year of the schedule set out in the Guide to Graduate Study.

English Course Listing
DEGREE PROGRAMS

The Department of Geography offers a graduate M.A. program. For more information, please contact Dr. Ira Sheskin at isheskin@miami.edu or visit the Geography Department’s web page at www.as.miami.edu/geography.

The following graduate level courses may be taken for graduate credit with the consent of the major department.

GEG 501, GEG 503, GEG 510, GEG 511, GEG 515, GEG 520, GEG 521, GEG 522, GEG 523, GEG 525, GEG 530, GEG 535, GEG 545, GEG 552, GEG 570, GEG 580, GEG 582, GEG 591, GEG 595, GEG 603, GEG 620, GEG 625, GEG 637, GEG 645, GEG 651, GEG 661, GEG 672, GEG 681, GEG 710, GEG 720, GEG 725

Geography and Regional Studies Course Listing
GEOLOGICAL SCIENCES - Dept. Code: GSC
www.as.miami.edu/geology

DEGREE PROGRAMS

A 5-year B.S./M.S. degree allows qualified entering freshmen to complete a B.S. in Geological Science and a M.S. in Marine Geology and Geophysics within 5 years.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences.

The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree above.

By the spring of their Junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor.

Contact Dr. Harold Wanless at the departmental office (305-284-4253) for more information.

Geological Course Listing
DEGREE PROGRAMS

I. REQUIREMENTS FOR THE M.A. DEGREE IN HISTORY

A. Admissions

We are looking for applicants with a record of outstanding achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master’s degree from an accredited institution may apply for admission to the doctoral program. Students with a bachelor’s degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1) A completed application form.
2) A completed financial aid application, if seeking aid.
3) Three letters of recommendation, preferably from applicant’s former professors.
4) Recent Graduate Record Examination scores on the General Test.
5) TOEFL scores (for international students).
6) Official transcripts.
7) A detailed statement from the student indicating:
   (a) the student’s background and education;
   (b) the student’s interests (field, topic, etc.);
   (c) why the student wants to pursue a graduate degree in history at the University of Miami;
   (d) what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.
8) A representative writing sample.

Deadlines
January 5: Applications for admission and aid for Fall semester.
B. Committee

Upon admission to the master’s program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student’s secondary field, must be formed no later than the student’s second semester in the program. There are then two options for completing the masters. One requires 27 hours of coursework and an exam. The other requires 21 hours of coursework, a master’s thesis (6 thesis credits), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

C. Requirements

27 credits at the 500 level or above, of which at least 18 must be at the 600 level or above.

Passage of an oral exam in two fields.

Completion of History 695 (Historiography). This course is normally given in the fall semester. All students are required to take the Historiography course in their first year.

Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing a thesis should register for 6 credits of History 710, which count toward the 27 required credits.

Language Requirements: Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor.

See under Ph.D. requirements for more information on fulfilling language requirements.

The student must apply for graduation in his or her penultimate semester (i.e. fall semester for spring semester).

The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Though the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive will also act as a thesis defense.

D. Fields

See H under Requirements for the Ph.D.
II. REQUIREMENTS FOR THE PH.D. DEGREE IN HISTORY

A. Admissions

We are looking for applicants with a record of outstanding academic achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master’s from an accredited institution may apply for admission to the doctoral program. Students with a bachelor’s degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1) A completed application form.

2) A completed financial aid application, if seeking aid.

3) Three letters of recommendation, preferably from the applicant’s former professors.

4) Recent Graduate Record Examination scores.

5) For international students, TOEFL scores.

6) Official transcripts.

7) A detailed statement from the student indicating:
   a) the student’s background and education;
   b) the student’s interests (field, topic, etc.);
   c) why the student wants to pursue a graduate degree in history at the University of Miami; and
   d) what the student plans to do with the degree upon completion.

This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.

8) A representative writing sample.

Admission from M.A. to Ph.D. Status

Students admitted at the master’s level who are performing well in their studies are encouraged to proceed to Ph.D. status. Advisors who believe that a student should be admitted to the Ph.D. program, and have the consent of the student, inform the DGS of this desire early in the spring semester and at least before the annual departmental meeting reviewing graduate students’ progress. The request is then reviewed by the department at
its annual meeting for recommendation to the graduate committee. Students who move from the M.A. to the Ph.D. program are eligible for the same number of years’ aid as students entering the Ph.D. program directly from the B.A., minus the years of aid they have already received. For course requirements, see below.

Deadlines

January 5: Applications for admissions and aid for Fall semester.

B. Committee

Upon admission to the program, the student is assigned a provisional major advisor. As noted above, students should then concur or select a different advisor by the beginning of the second semester in the program. An advisory committee of four or five, including the major advisor and faculty members representing the second and third fields, must be formed no later than the student’s third semester in the program. Concurrent with the formation of the committee, the student should choose the 4 fields of study. One of these must be from a cognate discipline. It is the responsibility of the student and the advisor to form this committee and notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee will also administer the oral and written comprehensive examinations. Students may change advisor and other committee members throughout the program provided that the faculty member(s) selected agree(s).

C. Requirements

1a) For students entering the Ph.D. program with a B.A., 45 credit hours (5 semesters) of graduate coursework at the University of Miami.

1b) For students entering the Ph.D. program with a masters from another university, at least 27 credit hours (3 semesters) of graduate coursework at the University of Miami.

1c) For students entering the Ph.D. program with a Masters from another program at the University of Miami, at least 27 additional credit hours (3 semesters) of graduate coursework at the University of Miami.

1d) For students entering the Ph.D. program with a Masters from the History department at the University of Miami, 24 additional credit hours of graduate coursework (to conform to a Graduate School requirement) at the University of Miami.

1e) All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the History Graduate Program at the University of Miami.

2) Completion of History 695 (Historiography), included in the above number of credits. All students are required to take the Historiography course in their first year.

3) Completion of History 693 (the two-semester Research Seminar), included in the above number of credits, at least once. Typically, students take History 693 in their 2nd and 3rd semesters in the program.

4a) Passage of a major field in written and oral exams.
4b) Passage of a 2nd field in written and oral exams.
4c) Passage of a 3rd field in written and oral exams.
4d) Passage of a 4th (cognate) field in the oral exam alone.
5) Following completion of course credit hours, students will need to take sufficient dissertation research credits (History 730 if before the comprehensives have passed; History 740 after the comprehensives have been passed) to reach a total of 60 credits hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credits. Students who enter the Ph.D. program with an M.A. from another university or from another program at the U. of M. receive 30 credit hours towards the 60 credit hour requirement.

The required credits of coursework are only the formal minimum. Although course work is necessary preparation for the comprehensive examination, students are examined on the mastery of fields of knowledge rather than courses. The number of courses taken depends on the student’s background, choice of fields, nature of related work, language skills, etc. Courses should be selected only after consultation with the Major Advisor.

D. Incompletes

All incompletes from the fall semester must be made up by the official end of the following spring semester. All incompletes from the spring semester must be made up before the official start of the subsequent fall semester. No student will be allowed to proceed to exams until all incompletes have been made up.

E. Languages Requirement

Reading knowledge of at least one foreign language is required. More than one foreign language may be required if the major advisor deems it necessary. The Modern Languages and Literatures Department administers examinations in the languages that it teaches and offers preparation courses in a handful of languages. Students may contact the DGS for the various options for taking courses in foreign languages. Students must, in conjunction with their advisor, prepare a plan that specifies how they will demonstrate language proficiency. The language requirement must be completed before a student can take the comprehensive examinations (see below).

F. Comprehensive Examinations

It is the responsibility of the student and major advisor to organize the comprehensive examinations. Students may take them at any time of the year that classes are in session. Arrangements for the exams, including selection of their dates and a final list of committee members, should be made by the end of the first month of the semester in question, with notification to the Department Chair and DGS.

The student takes the written part of the examinations in three history fields, which are normally administered over a period of two successive weeks. The portion for each field is four hours in duration. Only after the advisory committee deems that the student has successfully passed the written portions for each field is the student permitted to take the oral part of the examination.

The oral section covers the three history fields and one cognate field and is approximately two hours in duration. The prospectus may form part of the discussion, but the examination will focus on coverage of the fields. The committee consists of four to five faculty members. One member of the examining committee must be from outside the department. Normally this is the committee member representing the cognate field.

The student advances to candidate status after passing the comprehensive examinations and submitting an acceptable dissertation prospectus.
Students who have not already received a master’s degree from the University of Miami will be awarded an M.A. upon successful completion of their doctoral comprehensive exams.

G. Dissertation

After passing the examinations, students form a dissertation committee. This may be the original advisory committee, but it may also be revised to meet the needs of the dissertation work. The students, in consultation with the Major Advisor, put forward the names of individuals suggested to serve on the dissertation committee. The committee must be comprised of at least three members within the department and one outside the department. The committee is then approved and appointed by the dean of the graduate school.

The dissertation must make a significant contribution to the candidate’s field of specialization. It must meet the highest standards of research, substance, and form, and demonstrate an ability to conduct and report independent and original scholarly investigation.

The student must apply for graduation in his or her penultimate semester (i.e. fall for spring semester).

Upon completion of the dissertation and its tentative approval by the dissertation committee, the student takes a final oral examination that is a “defense” of the dissertation and that lasts for approximately two hours. It is open to the university community. Following the defense of the dissertation, the dissertation committee will render its decision to accept or reject the dissertation. Approval of the dissertation must be indicated by the signature of all members of the dissertation committee.

H. Fields

Chronological/Geographical fields
Medieval Europe
Early Modern Europe
Modern Europe
Early American History
Modern U.S. History
Colonial Latin America
Modern Latin America
East Asia
Russia
Africa
Caribbean

Topical Fields. These must cover either two of the geographic or two of the temporal fields listed above.

African Diaspora
Race and Ethnicity
Gender and Sexuality
History of Religion
History of Science and Medicine
History of Crime and Law
Political History
Diplomatic History
Urban and Environmental History
Economic History
Business History
Labor History
History of Sport
Military History
Cultural and Intellectual History
Public History
Atlantic World

Customized Fields

Students may create their own fields in consultation with their advisory committee. The student opting for this approach must file a plan of study listing relevant courses, the faculty member(s) involved, and the rationale. To pursue the individualized concentration, the student must obtain written approval of the plan by the major advisor, DGS, and the Department Chair.

The plan and signed approvals are placed in the student’s file. With rare exceptions, a customized field may not be the major field of study.

History Course Listing
The Master of Arts in International Administration (MAIA) program offers an interdisciplinary professional degree. The program prepares students for careers in government, as well as multinational corporations (MNCs) and non-governmental organizations (NGOs). Unlike conventional “international affairs” programs, MAIA equips graduates with both operational skills and a solid conceptual background to produce theoretically capable practitioners. The degree is awarded by the College of Arts and Sciences.

MAIA is a university wide program with faculty members coming from twelve (12) University departments. Drawing from the best academic resources of the University of Miami and from highly skilled professionals, students receive instruction in areas such as diplomacy, geopolitics, economics, history, religion, communication, political science, management and international studies. The program features advanced study in specialized subject areas ranging from public health to marine affairs.

Students may also select regional specializations which require language and cultural competency. Expanding on the regional specializations, MAIA students may participate in semester exchange programs with leading foreign universities such as Charles University Law School in the Czech Republic and Saint Petersburg State University in Russia. Additionally, MAIA also offers summer programs in Argentina, France, Ghana and Russia with practicum opportunities in Ecuador, Guatemala and Peru.

For additional program information and a complete list of MAIA faculty and staff, please visit us at www.miami.edu/maia.

Core Requirements
Six (6) core courses are required of all MAIA students. Students then complete the degree with three (3) graduate-level electives/nine (9) credits, which may be chosen from among other UM graduate offerings. Finally, all MAIA students must enroll in and complete a practicum, details of which are described below. The core courses are taught in an integrated fashion, designed to give students the maximum learning experience.

In the core courses, students will
1. develop skills in writing, speaking, and numerical and historical analysis
2. learn how to collect, interpret and report social, political, and economic data
3. increase skills in methods of research and communications
4. master strategic and tactical thinking and negotiation
5. build practical and theoretical knowledge in international relations, international economics, intercultural communication, and administration in an international context

Core courses are
1. International Administration (IGS 612)
2. World Affairs (IGS 614)
3. World Cultures (IGS 613)
4. Organizational Administration (IGS 616)
5. International Economics (IGS 615)
6. International Organizations (IGS 611)
Practicum in International Administration (IGS 517)
The purpose of the practicum is to give students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students are expected to complete the practicum with a minimum time commitment of at least two-hundred (200) hours. Participation in the spring clinics with topics ranging from public speaking to human resources are an integral component of the course. A final report/case study analysis is required as part of successful completion of the practicum. A fuller guide to the practicum and the requirements for the practicum is provided to students by the MAIA Office.

Other Requirements for Graduation
In addition to completing thirty (30) credits at the graduate level, which must include the six (6) required core courses, the practicum course and nine (9) elective credits, students must satisfy the following additional program requirements.

The information technology (IT) boot camp is an intensive program, which is generally in the fall semester. The MAIA IT boot camp provides training in Word, Excel, Access, and PowerPoint. Students also receive training to the statistical software SPSS as an introduction to program evaluation/assessment methodology.

The accounting and taxation boot camp is a two (2) day, non-credit workshop that covers key subjects essential to successful budgeting and financial control for nongovernmental organizations and other not-for-profit companies. It is taught by a professional financial manager and is offered once a year.

MAIA students must demonstrate proficiency in a second language prior to graduation. They are tested by staff and faculty with the Intensive Language Institute of the Division of Continuing and International Education. If students need additional language training after the testing result, they will be recommended to enroll in non-credit language courses to attain the necessary proficiency.

All MAIA students must complete their degree with three (3) graduate level elective courses or nine (9) elective credits. Electives must be approved by MAIA directors and students are encouraged to use the electives to create a specialization in either a function or regional area. For example, students may specialize in marine affairs by taking courses with the Rosenstiel School of Marine and Atmospheric Science or in a region by taking courses with the College of Arts and Sciences. Students may also select electives from Charles University Law School in Prague or Saint Petersburg State University in Russia.

Interdisciplinary Global Studies (IGS) Course Listing

Dual Degree Program: MAIA/MPH
The Master of Arts in International Administration/Master of Public Health (M.A.I.A.|M.P.H.) degree is offered jointly by the University of Miami College of Arts and Sciences and University of Miami Miller School of Medicine. The MAIA degree with a second master's degree in public health is designed for students who seek an in-depth knowledge of public health with a broader emphasis in globalization and health, international health policy and international development. Students enrolled in this joint program can expect to complete both degree requirements within three (3) years.
INTERNATIONAL STUDIES - Dept. Code: INS
www.as.miami.edu/international-studies/

DEGREE PROGRAMS

The Department of International Studies offers interdisciplinary social science programs leading to the Ph.D. and MA degrees. Ph.D. and MA programs offer advanced students the opportunity to study issues such as globalization, democratic governance, comparative and international political economy, post-Cold War conflicts and security threats, and new forms of civil society mobilization in world politics. To organize the study of these debates in the social sciences, the Department offers three fields of specialization:

• **International Relations**: international relations theory; globalization; social movements beyond the nation-state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.

• **Comparative Politics**: theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship, comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.

• **International and Comparative Political Economy**: the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; and international economic theory.

Ph.D. Degree Requirements

The Department’s Ph.D. program’s primary objective is to prepare a select group of highly qualified doctoral students for careers in academic teaching and research. The requirements include:

• Complete a total of 66 degree credits (12 semester courses) to obtain the Ph.D. degree (i.e., 36 credits at the doctoral level beyond the MA degree).

• Complete one seminar on quantitative methods and one seminar on qualitative methods in the social sciences.

• Complete a sequence of two core seminars in two of the Department’s three major fields of study: International Relations; Comparative Politics; and International and Comparative Political Economy.

• Pass written and oral examinations in two of the Department’s three fields of study.

• Complete at least one of the basic core seminars in the third (non-examination) field.

• Complete the Doctoral Workshop.

• Successfully defend a dissertation proposal/prospectus.
• Pass a foreign language examination.

• Complete 12 dissertation credits.

• Research, write and orally defend a dissertation that makes an original contribution to knowledge.

• See the INS Graduate Student Handbook (http://www.as.miami.edu/international-studies/pdf/Graduate%20Student%20Handbook.Fall%202010.pdf) for a complete description of the requirements for the Ph.D. degree.

**MA Degree Requirements**

The Department’s MA program prepares students for careers in international diplomacy, business, trade and finance, for service in government and non-governmental organizations and international institutions, and with the necessary degree and academic training to enter a doctoral program. The requirements include:

• Complete ten semester courses (30 credits).

• Complete a seminar on social science methodology.

• Complete two of the core seminars in one of the Department’s fields of study, and at least one of the core seminars in either of the other two fields. These fields include: International Relations; Comparative Politics; International and Comparative Political Economy.

• Pass a written qualifying (comprehensive) examination in one of the three fields of specialization.

• Pass a foreign language examination.

• MA candidates with a cumulative grade point average of at least 3.5 may, with the permission, substitute the qualifying examination with a written MA thesis.

• See the INS Graduate Student Handbook (insert link) for a complete description of the requirements for the MA degree.

http://www.as.miami.edu/lasp/degrees/journalism
http://www.as.miami.edu/lasp/degrees/filas

DEGREE PROGRAMS

MASTER OF ARTS IN LATIN AMERICAN STUDIES

A. The Master of Arts in Latin American Studies is a 30-credit interdisciplinary degree characterized by a high degree of flexibility in allowing students to create course of study focused on Latin American and the Caribbean that serves the interests of the student. Combining core courses offered by the program with a large variety of co-listed and cross-listed courses offered by departments, programs, and units throughout the University of Miami, the program is able to offer a tremendous amount of diversity in courses available for credit towards this degree. This allows students to combine course offerings from around the university into a cohesive course of study that allows them to specialize in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

B. The program consists of two core Latin American and Caribbean seminars, two regional fundamentals, and a minimum of three additional seminars to be taken as electives. Students will also be required to take one research methods course at the 500-level.

1. The core seminars are: LAS501 “Graduate Seminar in Latin American Studies” and LAS502 Research Design in Latin American Studies”

2. Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus.

3. Electives may be taken from any pre-approved co-listed, cross-listed, or core LAS courses at the 500-level or above, or with the approval of the degree director.

4. A Research Methods course may be chosen from any available and accessible Research Methods courses available at the University of Miami, but must be appropriate to the course of study chosen by the student and requires approval of the degree director. Under special circumstances, the research methods requirement may be waived with the prior approval of the degree director.

C. Students are required to write a master’s thesis, create an equivalent capstone project, or pass a comprehensive exam. The latter two options require the approval of the degree director. For each of these options, a committee consisting of at least three members is required. Students who opt for the comprehensive exam will take two more electives in the place of six credits of LAS710.
D. Students must demonstrate advanced language competence in Spanish, Portuguese, Haitian Creole, or French by passing a course taught in the target language at the 500-level or above, or by passing a language competency exam.

E. With approval from the Director of Latin American Studies degree programs, students may also take their elective credits with Latin Americanists in other Schools such as Communication, Law, Business, or Marine Sciences.

F. Students who are simultaneously enrolled in a certificate program (other than GIS) at the University of Miami may double-count courses between the certificate program and the Master of Arts in Latin American Studies, with approval of the degree director. In select cases (such as methods courses), seminars and courses at the 500-level that do not specifically target Latin America or the Caribbean but for which the final project or paper produced by the student is focused on Latin America may be counted towards the Master of Arts in Latin American Studies, subject to the approval of the degree director.

MASTER OF ARTS IN LATIN AMERICAN STUDIES WITH GIS CERTIFICATE

A. The Master of Arts in Latin American Studies with GIS certificate is a 30-credit interdisciplinary degree characterized by a high degree of flexibility in allowing students to create course of study focused on Latin American and the Caribbean that serves the interests of the student, while allowing students to focus on obtaining specific skills in geographic Information Systems (GIS). Combining core courses offered by the program with a large variety of co-listed and cross-listed courses offered by departments, programs, and units throughout the University of Miami, the program is able to offer a tremendous amount of diversity in courses available for credit towards this degree. This allows students to combine course offerings from around the university into a cohesive course of study that allows them to specialize in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

B. The GIS option allows students to work towards a graduate certificate in GIS through the department of Geographic and Regional Studies while working towards their Master of Arts in Latin American Studies.

D. Students in this program will have six credits in LAS710 which will consist of a GIS capstone project with a focus on Latin America, the Caribbean, or South Florida. Students will require a three-member committee to oversee the capstone project. A group project may be allowed with approval of the degree director.

LATIN AMERICAN STUDIES AND JOURNALISM DUAL M.A. DEGREE

Offered in the multi-cultural setting of Miami, a focal point for Caribbean Basin economic, political, immigration and communication flows, the School of Communication and College of Arts and Sciences have designed this joint degree program focusing on cross-cultural and international journalism. Students leave the university after four semesters and a summer
with two M.A. degrees in hand, one in Journalism and the other in Latin American and Caribbean Studies. This specialized course of study is for students who wish to enter careers in journalism and communication specializing on the issues, economies, and peoples of Latin America and the Caribbean region. Sustainable economic development, immigration, social justice and human rights, the environment, international business, and U.S.-Latin American relations are just some of the areas in which students may specialize in an individually tailored course of study anchored by a core of fundamentals. Because this is a joint offering, 18 credits are shared between the two M.A. programs.

FIRST FALL SEMESTER REQUIRED COURSES (based on availability): 12 CREDITS

CNJ 611 News Writing and Reporting Seminar (3) or
CEM 606 Writing and Reporting Across Platforms
LAS 501 Graduate seminar in Latin American Studies (3)
CNJ 510 Comparative Media Systems (3)
LAS 503 Program Seminar in Latin American Studies and Caribbean Studies (3)

FIRST SPRING SEMESTER REQUIRED COURSES: 12 CREDITS

CNJ 619 Advanced Newsgathering and Writing Seminar (3)
LAS 502 Interdisciplinary Research Methods (3)
CNJ 599 Advanced Projects and Directed Research (3)
LAS 503 Program Seminar in Latin American Studies and Caribbean Studies (3)

SUMMER SEMESTER REQUIRED COURSES: 5 CREDITS

LAS 505 Internship in Latin American and Caribbean Studies (5)

SECOND FALL SEMESTER REQUIRED COURSES: 13 CREDITS

COM 601 Theories of Communication (3)
COM 545 Intercultural Communication: International Perspectives (3)
LAS 503 Program Seminar in Latin American Studies and Caribbean Studies (3)
CNJ 654 Writing for Publication (3)
LAS 710 Pre-candidacy Thesis Credits (1)

SECOND SPRING SEMESTER REQUIRED COURSES: 12 CREDITS

CNJ 614 Media Law and Ethics Seminar (3)
LAS 503 Program Seminar in Latin American Studies and Caribbean Studies (3)
CNJ 654 Writing for Publication (3)
LAS 710 Pre-candidacy Thesis Credits (3)

TOTAL CREDITS (for the MA in Journalism) = 36 CREDITS

**FILAS (Fellows in Latin American Studies)**

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM’s world-class faculty in various academic disciplines, **FILAS** participants design individualized curricula. In addition to the regular general education course requirements of the
College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Public Health, Environmental Studies, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master’s level):

- Two History courses
- Two International Studies courses
- Two Economics courses
- Two advanced Languages and Literatures courses (SPA, POR, FRE, or HAI)
- Seven courses in Study Abroad
- One course as internship/co-op credits
- Five courses above the 300-level (third-year) in a range of disciplines
- Ten courses in one focus track Six thesis credits (LAS710)

**Six thesis credits (LAS710)**

**150 total credits**

FILAS students also write a thesis based on an original research project. In addition, they present their findings in a meeting of the UM Center for Latin American Studies in their final semester.

**FILAS ADMISSION REQUIREMENTS**

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in FILAS, emphasizing prior language or area study
- To continue through the Master’s level, students must maintain at least a 3.4 GPA and they must take the GRE Exam.

LIBERAL STUDIES - Dept. Code: MLS
www.as.miami.edu/mals

DEGREE PROGRAMS

The Liberal Studies program is founded on an interdisciplinary approach to issues and questions central to the history and development of human culture. It is designed to provide a broad understanding of these issues and questions through a focused and systematic program of study drawing upon faculty from various disciplines in the humanities, the social sciences, and the basic sciences.

THE MASTER OF ARTS IN LIBERAL STUDIES

The Master of Arts in Liberal Studies degree requires 24 credits, plus a six-credit thesis OR an additional six credits of coursework and a representative portfolio. In addition all students are required to participate in the MALS Writing Seminar. The curriculum is drawn from three core courses as well as additional courses designed for MALS students. Students may select from other graduate level courses with the approval of the director.

For the program with a thesis, a candidate must complete a minimum of 30 credits on the graduate level which includes:

- Three 3-credit core courses.
- 15 approved graduate credits.
- Six credits for thesis.

For the program without a thesis, a candidate must complete a minimum of 30 credits on the graduate level which includes:

- Three 3-credit core courses.
- 21 approved graduate credits.
- A portfolio representative of works completed.

For further information regarding this program, please write to:

Master of Arts in Liberal Studies Program

Liberal Studies Course Listing
MATHEMATICS - Dept. Code: MTH
www.math.miami.edu

DEGREE PROGRAMS

The Mathematics Department offers graduate degree programs leading to the

- Master of Arts
- Master of Science
- Doctor of Philosophy

Prerequisites and requirements for these degrees are described below:

MASTER OF ARTS IN MATHEMATICS

A. Prerequisite:

A minimum of nine credits in mathematics courses numbered 200 and above is required.

B. Requirements:

1. A total of 30 credits must be earned; at least 18 credits of which are in mathematical courses numbered 500 or above. These courses must include at least one of the following year-long sequences: 513-514, 515-516, 524-525, 531-532, 533-534, and 561-562. All courses from other departments must be numbered 600 or above, be pertinent to the teaching of secondary school mathematics, and be approved by the graduate committee.

2. A three-hour written examination covering the material in one of the year-long sequences listed above.

MASTER OF SCIENCE IN MATHEMATICS

A. Prerequisite:

A minimum of 15 credits in mathematics courses numbered 200 and above is required.

B. Requirements:

1. A total of 30, 33, or 36 credits in approved courses must be earned, depending on whether at least 15, 12-14, or 9-11 credits, respectively, are in mathematics courses numbered 600 and above.

2. A minimum of 24 credits must be earned in mathematics courses.

3. At least two of the basic sequences 531-532, 533-534, and 561-562 are required.

4. Three written exams, at least two of which are on the basic sequences of the above list, must be passed.
DOCTOR OF PHILOSOPHY IN MATHEMATICS

The following requirements are in addition to the general requirements for the Doctor of Philosophy Degree as described by the Graduate School (see section on Doctor of Philosophy elsewhere in this Bulletin).

1. A minimum of 36 credits must be earned in mathematics courses numbered 600 and above.

2. All four basic sequences 630-631, 632-633, 640-641, and 661-662 or their equivalents are required.

3. Preliminary and three written qualifying exams must be passed. Of these written exams, two must be from the above basic sequences; the other may be another from the basic sequences or in the candidate’s area of specialty.

4. A proficiency in one of the languages French, German, or Russian must be demonstrated.

Mathematics Course Listing
DEGREE PROGRAMS

The Department of Modern Languages and Literatures offers programs leading to the Ph.D. in Romance Studies with concentrations in French and Spanish. Graduate course work comprehends all major periods and areas, providing the breadth needed for interdisciplinary work and required of today’s teachers. The program is designed to prepare students for careers as university professors, teachers and research scholars. It includes training in advanced language, teaching, and research skills that may also contribute to other professions.

For additional information on teaching and research opportunities, faculty, program policies and application requirements, visit http://www.as.miami.edu/mll/graduate/.

The Ph.D. in Romance Studies (with concentrations in French and Spanish) is designed to prepare you for a career as a university professor and research scholar. It also provides training in advanced language, teaching, and research skills that can be used in other professions. The requirements set out below for the Ph.D. in Romance Studies are minimum requirements; the Committee on Graduate Studies, the Director of Graduate Studies, or your advisor may set additional requirements.

1. 
   a) for students entering on the “five year plan” (B.A. or M. A., see below), passing satisfactorily a minimum of 45 credits in approved courses;
   b) for students entering on the “four year plan” (M.A., see below) passing satisfactorily a minimum of 36 credits in approved courses;

2. passing “Introduction to Literary Theory” (MLL 611; former MLL 505), “Introduction to Modern Language Teaching” (MLL 611; former MLL 503), and a minimum of 3 graded credits in each of the following areas:

<table>
<thead>
<tr>
<th>French</th>
<th>Spanish</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Middle Ages and/or 16th Century</td>
<td>• Middle Ages and/or Golden Age 18th Century</td>
</tr>
<tr>
<td>• 17th Century and/or 18th Century</td>
<td>• 20th Century Spain and/or 20th Century Spain</td>
</tr>
<tr>
<td>• 19th Century and/or 20th Century</td>
<td>• Colonial Latin America 18th Century</td>
</tr>
<tr>
<td>• Francophone Studies</td>
<td>• 19th Century Latin America 20th Century</td>
</tr>
<tr>
<td>• 20th Century Latin America</td>
<td>• 20th Century Latin America</td>
</tr>
</tbody>
</table>

Note: Ordinarily, students will take at least two graduate courses in the department each semester.
3. In addition to proficiency in English and the language of study, demonstrating the following
   a) Reading knowledge of two other languages, or
   b) Holistic knowledge of one other language by passing the equivalent of a course on at least the 300-level;

Note: In consultation with the student’s advisor, appropriate languages of study will be determined (e.g. Latin American literature students may be encouraged to study Portuguese; students of Early Modern literature may be encouraged to study Italian, etc.)
   c) If area of specialization is Medieval or Early Modern (including Colonial Latin America), then also demonstrating reading knowledge of Latin.

4. Passing a breadth exam that covers either three periods in one region or two periods in two regions;

5. Passing a qualifying exam, on an approved topic;
The exam includes three general approaches that focus on literature, theory, and a cognate discipline (e.g. history, sociology, art, film, etc.);

6. Successfully defending a dissertation prospectus;

7. Completing and defending satisfactorily a dissertation;

8. Satisfying the requirements of the Graduate School as stated in the Bulletin.

ADMISSIONS REQUIREMENTS

We accept applications for Fall admission only, and only for doctoral study (we do not have an independent Master’s program). You may apply for the Ph.D. while holding either a B.A. or an M.A. degree.

The priority deadline to apply to begin classes in Fall 2011 is December 1, 2010 (all fellowships and most teaching assistantships are awarded to those who apply by this deadline). However, we will continue to accept applications through January 15, 2011.

Your completed application must include the following (incomplete applications will not be considered):

1. A completed application form, including a detailed statement of purpose. We only accept on-line applications. Visit our web page for on-line application instructions: http://www.as.miami.edu/mll/graduate/admissions.html

2. A completed Graduate Assistantship Application (to be considered for departmental and university awards).

3. Three substantial letters of recommendation (please provide each recommender with a cover sheet, available on line at: http://www.as.miami.edu/mll/graduate/admissions.html). Or use CollegeNet interface capability to have recommenders submit letters of recommendation online.
4. GRE scores, mailed directly from the testing agency (optional if you hold an M.A. degree and do not wish to be considered for fellowships. But we strongly recommend that you take the GRE because in case of equal qualifications we will give priority to student’s files that show GRE scores. Please remember to request school code to be 005815 for the University of Miami and Dept. Code 2603 copy for French and Dept. Code 2608 copy for Spanish.)

5. Official transcripts from all colleges and/or universities you have attended and listed in your application. If the transcripts are from international institutions, you must provide an official translation.

6. A substantial writing sample in English (research papers are preferable)

7. A substantial writing sample in the language of study (French or Spanish; research papers are preferable)

8. International students only: TOEFL scores, mailed directly from the testing agency

9. Application fee of $65.00.

Letters of recommendation and other printed materials should be sent to:

Graduate Program Admissions
Department of Modern Languages & Literatures
University of Miami

Coral Gables, Florida 33124-4650
FAX: 305-284-2068
E-mail: grad.mll@mail.as.miami.edu

We strongly encourage African-American and Hispanic candidates to apply for the Florida Education Fund domestic African American and Hispanic McKnight Doctoral Fellowships. Applications must be postmarked no later than January 15th of each year. The Fellowship is open to any incoming domestic Ph.D. African American or Hispanic student in ANY discipline. You may apply online at www.fefonline.org. The Florida Education Fund may be reached at (813) 272-2772. If an applicant who is accepted into our Ph. D. program receives a McKnight Fellowship, the College of Arts and Sciences will increase the amount of the fellowship’s stipend to match the current Teaching Assistantship stipend amount. Please note: If an applicant encounters any difficulty submitting the online application, the applicant should contact the FEF webmaster at webmaster@fefonline.org or call 813-943-7578 for assistance.

DEGREE PROGRAMS

A. Course requirements

Satisfactory completion of a minimum of 45 course credits in philosophy, at least 24 of which must be at the 600 level. Students are required to pass the following courses:

1. Proseminar: PHI601 and PHI602
2. Logic requirement: PHI510
3. Ethics requirement: PHI530 or 533.
4. One course from the epistemology and metaphysics group: PHI540-545.
5. One course from the history group: PHI560-583 (except PHI 582).

In some cases certain course requirements may (with the approval of the director of graduate studies) be waived for students who have completed equivalent work as part of a prior M.A. degree in philosophy.

B. Qualifying examination

A comprehensive qualifying examination must be taken. Exams are given the grade of O, 1, or 2. A grade of 1 or 2 is sufficient for the student to be awarded the M.A. The qualifying examination is a broad examination in a general area of philosophy close to the student’s proposed dissertation topic or intended area of specialization, for example, epistemology, philosophy of mind, metaphysics, or ethics and political philosophy. The examination is based on a list of core texts in the area in question, with the required texts chosen for each student individually by his or her qualifying examination committee. The exam may be attempted at most two times.

C. Satisfying the requirements of the Graduate School as stated in this Bulletin.

The requirements for the Ph.D. degree in philosophy

A. Course requirements

Satisfactory completion of a minimum of 45 course credits in philosophy, at least 24 of which must be at the 600 level. Students are required to pass the following courses:

1. Proseminar: PHI601 and PHI602
2. Logic requirement: PHI510
3. Ethics requirement: PHI530 or 533.
4. One course from the epistemology and metaphysics group: PHI540-545.
5. One course from the history group: PHI560-583 (except PHI 582).

In some cases certain course requirements may (with the approval of the director of graduate studies) be waived for students who have completed equivalent work as part of a prior M.A. degree in philosophy.

Research Requirement: In addition, students are required to enroll in and complete 15 credits of PHI730 (Doctoral Dissertation Research).
B. Qualifying examination

A comprehensive qualifying examination must be taken. Exams are given the grade of either 0, 1, or 2. A grade of 0 or 1 is considered a failing grade with respect to qualifying to continue in the Ph.D. program. A student must receive a grade of 2 in order to proceed to the dissertation stage. The qualifying examination is a broad examination in a general area of philosophy close to the student’s proposed dissertation topic or intended area of specialization, for example, epistemology, philosophy of mind, metaphysics, or ethics and political philosophy. The examination is based on a list of core texts in the area in question, with the required texts chosen for each student individually by his or her qualifying examination committee. The exam may be attempted at most two times.

Students can apply for Ph.D. candidacy after they have completed their coursework, received a mark of high pass on the qualifying examination and had their dissertation proposal approved.

C. The language requirement

A student who submits a dissertation proposal must possess the linguistic proficiency required by the proposed dissertation topic. This is determined by the dissertation proposal committee on the basis of examinations or coursework.

D. Ph.D. dissertation

Presentation and oral defense of an acceptable dissertation.

E. The requirements of the Graduate School as stated in this Bulletin

Philosophy Course Listing
DEGREE PROGRAMS

All graduate students in physics must plan their entire program with the advice and approval of a departmental advisor.

The program of graduate studies in physics emphasizes research work, but also includes teaching experience as an essential element. Research and thesis opportunities are at present available in the fields of astrophysics and cosmology, atmospheric and ocean optics, complexity, condensed matter physics, elementary particle theory, plasma physics.

In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

A. Submission of scores on the Graduate Record Examination (Aptitude Test and Advanced Test in Physics) with the application for admission.

B. A minimum of 24 physics course credits at the 500-600 level are required for the PhD.

C. The following specific courses, or their equivalent, are required for the PhD degree: PHY 540, 560, 561, 623, 650, 651, 670, 671. Also required: three additional physics lecture courses at the 500 or 600 level.

D. For the M.S. degree no more than three credits for reading courses may be counted, and no more than two credits of seminars. Up to six credits may be earned in thesis work for this degree.

E. The physics department offers a comprehensive graduate examination each year. A passing grade at an appropriate level is required for either the M.S. or the Ph.D. A student is required to take the exam each year and is allowed two attempts toward a passing grade.

F. Courses taken outside the department should be relevant to the students’ program and approved by the graduate advisor.

G. Students are required to participate in research at the earliest opportunity. Specifically, upon passing the written graduate examination and before the end of the following semester, the student is required to select a faculty member who consents to serve as the student’s Ph.D. thesis advisor. Student and thesis advisor are to form, in a timely fashion, a dissertation committee to review an oral presentation of the student’s initial research activities and future plans. Should a student need to select a new thesis advisor, this selection must be made without delay, and the review process must be repeated.

H. Renewal of financial support from the department is contingent, each semester, upon satisfactory performance of teaching duties and research activities, and upon timely progress towards completion of all requirements for the Ph.D. degree.
POLITICAL SCIENCE - Dept. Code: POL
www.as.miami.edu/mpa

DEGREE PROGRAMS

The Department of Political Science offers a Master’s degree in Public Administration.

The requirements for the Masters in Public Administration degree are:

A. Thirty-six to forty-eight credits at the graduate level, depending on government management experience and academic preparation.

B. Completion of core and specialized track course requirements as specified by the POL Department in consultation with the student’s career goals and interests.

C. An option exists for those students who wish to complete in five years their Bachelor’s degree and a Master of Public Administration. Contact POL Department for details.

D. All other requirements as stated in sections Requirements for the Master of Arts Degree and General Information.

SECOND MASTER’S DEGREE IN PUBLIC HEALTH (MPA/MPH)

The Master of Public Administration/Master of Public Health combines programs from the College of Arts and Sciences and the School of Medicine and is designed for students who seek an in-depth knowledge of management and public policy administration with training in public health.

It is possible for full-time students to complete the requirements for both degrees requirements within two and one-half years.

Interested students must apply and be accepted by both Departments. For further information, contact the Department of Political Science at (305) 284-2401 or the Department of Epidemiology and Public Health at (305) 243-6759.

Political Science Course Listing
PSYCHOLOGY - Dept. Code: PSY
www.psy.miami.edu

DEGREE PROGRAMS

Ph.D.

I. The principal goal of the graduate program in Psychology is that of preparing the student for a career contributing to the growth of scientific knowledge in psychology.

II. Applicants for admission to graduate status in psychology shall have

   A. a minimum average of B over-all
   B. at least 18 hours of psychology that must include courses in Introductory Psychology, Statistics, and Experimental Psychology or Research Methods.
   C. Students lacking the necessary preparation must ordinarily make up deficiencies prior to admission to the Graduate School.

III. All applicants must present the Graduate Record Examination (Aptitude Tests; Advanced Test in Psychology preferred). In all cases admission to graduate degree programs in Psychology is competitive, since available resources do not permit admission of all qualified applicants.

IV. The Ph.D. programs are categorized into three Divisions:

   • Health Psychology (including Health Clinical Psychology, Behavioral Medicine and Behavioral Neurosciences)
   • Child Psychology (including Clinical Child Psychology, Pediatric Health Psychology Applied Developmental Psychology)
   • Adult Psychology (including Adult Clinical Psychology)

   1. All Ph.D. programs in Psychology require a minimum of 72 credits, including thesis and dissertation credits.
   2. Psychology 680 and 681 will not be counted toward the 72 credit minimum.
   3. A Master of Science in Psychology based upon 24 credits of course work and six credits of Master’s thesis research is required in all programs.
   4. In cases in which a student has a prior graduate degree, the number of credits required for the Ph.D. may be reduced at the discretion of the Department.
   5. All programs in Clinical Psychology require an internship.

V. All students must successfully complete six foundation courses.

   A. PSY 604, 605, 614, 620, 625, and 640 or 641.
   B. Methodological courses 631, 632, and either 633, 634 or 698.
   C. A minimum grade average of B is required for all students.
   D. All students seeking an advanced degree in Psychology must participate substantially in the teaching of course offerings in the Psychology Department as an essential part of their education.

The Department of Religious Studies does not offer a graduate degree program. The graduate level courses may be taken for graduate credit with the consent of the major department.

Religious Course Listing
SOCIOMETRY - Dept. Code: SOC

www.as.miami.edu/sociology

DEGREE PROGRAMS

I. Graduate Program Overview

The Graduate Program in Sociology at the University of Miami is designed to equip students with the theoretical, methodological, and analytical tools required for research and teaching. The Graduate Program in Sociology offers two graduate degrees, the Master of Arts (M.A.) and the Doctor of Philosophy (Ph.D.). At the doctoral level, graduate students are encouraged to choose two concentrations from three substantive areas: (1) Criminology, (2) Race & Ethnic Relations, and (3) Medical Sociology. Although the strengths of the department lie within these major programmatic fields, students may also develop a course of study that meets unique research interests and career objectives. Assistantships and Fellowships are awarded each academic year to cover tuition and living expenses.

II. Requirements for the M.A. degree in Sociology:

A. A minimum of 31 credits at the graduate level (500 or 600) of which 6 must be taken in thesis work.
B. A maximum of 6 hours can be transferred from acceptable graduate institutions.
C. Course work must include Sociology 601, 602, 604, 610, 611, and one of 615 616 or 617.
D. 3 hours of course work may be earned in a related discipline. Such course selections must have prior departmental approval
E. Submission and successful defense of a thesis in accordance with current Graduate School policy.
F. The completion of all other requirements stated in sections of the Bulletin that specify Requirements for the Master’s Degree, and General Information.

III. Requirements for the Ph.D. in Sociology:

A. An M.A. or M.S. degree is required.
B. A minimum of 42 credits beyond the M.A. or M.S. degree.
C. Demonstration of computer competency.
D. Passing two written substantive area examinations.
E. The completion of a publishable-quality paper.
F. Written presentation and oral defense of an acceptable dissertation.
G. The satisfactory completion of the requirements of the Graduate School as stated in this Bulletin

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department (www.as.miami.edu/sociology/).

DEGREE PROGRAMS

The School of Business offers the following degrees:
Doctor of Philosophy in Business & Doctor of Philosophy in Economics
Master degree in Business Administration (MBA)
Master of Professional Accounting
Master of Science in Taxation
Non-degree executive education programs are also available

The requirements for the Doctor of Philosophy degree are the same as those listed in the general section of this Bulletin.

DOCTOR OF PHILOSOPHY

The Doctoral program combines interdisciplinary study and research. It is designed to prepare students for careers in academic research and teaching. Students follow specialized programs of study under the guidance of faculty experts. In addition, they have the opportunity to participate in cross-disciplinary training outside of the traditional domains of business and economics. The curriculum will also equip students with the skills and experience necessary for academic placement in the world’s top research universities.

A minimum of 60 credits are required to earn the PhD in Business or PhD in Economics degree. The program requires year-round, full-time study in order to maximize interaction between faculty and students. Students are expected to interact and begin research projects with the faculty upon entering the program.

PhD Program in Business Curriculum:

Students may choose to concentrate their study in Accounting, Finance, Management Science, Marketing, Operations Management, Organizational Behavior, or Strategy/International Business.
Required Prerequisite Courses (must be completed prior to admission or in the summer prior to commencing doctoral studies):

One year of college calculus, one course in linear algebra, and one introductory statistics course.

Required “Core” Courses (these courses can be waived by consent of the appropriate department; waiver is granted by issuing transfer credit for similar courses taken at the advanced graduate level at accredited institutions):

There are two streams of “core” courses for students, each comprising of five courses.

**Stream I:** (Accounting, Finance, Management Science, Marketing-Quantitative, and Operations Management)

Area of Concentration Courses (to be decided by the student and faculty):

In total, a minimum of 33 credits in concentration courses are to be taken, up to 15 of which may be satisfied by transfer credit. Some Departments may require students to complete a minor field. If so, their major field must consist of a minimum of 24 hours (with at least 15 hours completed in doctoral program residence at the University of Miami). The minor field would then consist of 9-12 hours in an area outside of the major concentration (with a minimum of 9 hours taken in doctoral program residency at the University of Miami).

**Dissertation Research**

12 credits are to be taken at a minimum—two semesters of 6-9 hours each. No transfer credit is given for dissertation or prior research.
Total Credit Requirements

In total, a minimum of 60 credits are required for receiving the Ph.D. degree in Business Administration: 15 hours of "core" courses, 33 hours of "concentration" courses, and 12 hours of dissertation research. To this total must be added any prerequisite courses (as outlined above), with transfer credit being subtracted.

Admissions Requirements:

Application Form
Application Fee of $65.00
GPA of B+ or better in undergraduate and graduate (if any) coursework
Official Transcripts, Copies of Diplomas and/or Certificates
Strong quantitative skills, as demonstrated through GMAT/GRE scores and prior coursework
Potential to conduct and publish high-quality original research
Official TOEFL or IELTS Score Report (International Students only)
Three Letters of Recommendation
Statement of Purpose
Resume

A master's degree or an undergraduate business degree is not required for admission.

Financial aid packages are available to qualified PhD applicants.

PhD Program in Economics Curriculum:

The Ph.D. program in Economics prepares the recipient for a variety of career opportunities, including university teaching, federal, state, and local government employment, and a host of employment opportunities in the private sector.

All Ph.D. students are required to complete sixty (60) credit hours. There are 12 core courses (36 credit hours), two courses in one major field (6 credit hours), one course in a minor field (3 credit hours), one field/elective course (3 credit hours) and the dissertation (12 credit hours). A field is comprised of either two related courses in one of the major economic disciplines, e.g. international trade, or two courses in related disciplines, e.g. health economics and labor economics.

Applicants for admission to graduate study in Economics should have an extensive background in Economic Theory and Quantitative methods.

a. All Doctor of Philosophy students must take the core that consists of the following courses:
   i. 500-level mathematical economics courses (ECO 512)
   ii. a 500-level macroeconomics course (ECO 521)
   iii. a 500-level microeconomics course (ECO 533)
   iv. a 500-level econometrics course (ECO 520)
   v. two 600-level econometrics courses (ECO 620, 625)
   vi. A 500 level mathematics (MTH 533)
   vii. three 600-level microeconomics courses (ECO 633, 634, and 635)
   viii. two 600-level macroeconomics/monetary theory courses (ECO 621, 603)
b. Two fields of specialization are required. A field is comprised of two courses. These two fields are selected from the following areas of concentration:
   i. ECO 603, 604
   ii. international trade (ECO 661, 760)
   iii. human resource economics (ECO 511, 586, 611)
   iv. cognate areas with departmental approval

c. One elective must be taken. Elective courses may be selected from the graduate offerings of the Mathematics, Computer Information Systems, Management Science, and Finance departments.

d. Additional Requirements:
   i. comprehensive examinations covering the core and the one field of specialization
   ii. a doctoral dissertation for 12 credit hours

e. To be considered for admission, all applicants must
   i. score a minimum of 1250 on the Graduate Record Examination general tests (combined verbal and quantitative scores),
   ii. hold a baccalaureate degree from an institution of recognized standing,
   iii. submit two copies of their official undergraduate transcript,
   iv. have demonstrated, by their undergraduate record, capability of completing a Ph.D. program,
   v. In addition, foreign students are required to score a minimum of 90 on the internet based, 600 on the paper based, or 235 computer based Test of English as a Foreign Language.

**Required Admissions Materials:**

Application Form
Application Fee of $65.00
GPA of B+ or better in undergraduate and graduate (if any) coursework
Official Transcripts, Copies of Diplomas and/or Certificates
Official GRE scores report
Official TOEFL Score Report (International Students only)
Three Letters of Recommendation
Statement of Purpose
Resume/CV (optional)

A master’s degree is not required for admissions.

Assistantships are available to qualified PhD applicants. The minimum additional requirements for consideration for an assistantship are a combined GRE score of 1250 and the equivalent of a cumulative "B+" GPA. The program only rarely admits students without an assistantship.
MASTER OF BUSINESS ADMINISTRATION

The University of Miami School of Business offers two full-time Master of Business Administration degrees.

FULL-TIME TWO-YEAR MBA PROGRAM

The Full-time two-year MBA Program is innovative, flexible, and career focused. It is designed to meet the needs of the student with an undergraduate background in business as well as the student who is just entering the business arena. The curriculum not only prepares business leaders of the future, but also adds a valuable dimension to other professions.

UM's Full-time MBA program is a 56-58 credit, lock-step program that is completed in less than two calendar years. Students typically enroll in elective courses during the third semester and the first term of the fourth semester of the program. Students may be able to complete a concentration based on completion of appropriate electives.

Students may be able to complete a concentration based on completion of required electives. Areas of concentration include: Computer Information Systems, Finance, International Business, Management, Management Science, Six Sigma, Management Science Consulting, Marketing, Mergers and Acquisitions, and Real Estate. Elective offerings are based on student demand. Students beginning the program in January obtain a cross-functional MBA in lieu of a concentration.

FULL-TIME ONE-YEAR MBA PROGRAM

The Full-time one-year MBA Program is offered once per year in January. This program is designed to meet the needs of the student with an undergraduate degree in business, who graduated in the last seven years from an accredited university. The curriculum prepares business leaders of the future, adding a valuable dimension to their education.

CURRICULUM

The One-Year MBA program is a 35-credit, cohort program that is completed in one year. There are no summer classes. Internship opportunities may be available through the Ziff Graduate Career Services Center during the summer months. The program is “lock-step” and students progress together through a sequential pattern of sixteen 2-credit courses, seven of which are electives and three 1-credit courses. There are two semesters totaling 28 weeks of class time. Each semester consists of two 7 week terms. There are no prerequisite courses required. Concentrations are not available or granted. This multi-disciplinary MBA program will expose students to various areas of business.

ACCELERATED MBA IN REAL ESTATE

The University of Miami School of Business Administration offers a new accelerated MBA program with a concentration in real estate highlighted by two internship opportunities. Bringing together the School’s strengths in management education with the strengths of the UM School of Architecture in new urbanism, the program is designed to prepare students to succeed in commercial real estate market careers.

PROGRAM HIGHLIGHTS

- Six-month paid real estate industry internship prior to first semester  
- Summer real estate industry internship between first and second semester classes  
- Consulting project with real estate industry non-profit organization  
- Specialized MBA curriculum focused on commercial real estate  
- Mentoring
CURRICULUM

The Accelerated MBA in Real Estate program is a 37-credit program that is completed in one year. The program is "lock-step" and students progress together through a sequential pattern of one or two-credit courses. There are two semesters totaling 28 weeks of class time. Each semester consist of two seven week terms. Students are registered for four to six courses per term. Waivers and course transfer are not permitted. Concentrations are not available or granted.

FULL-TIME MBA DUAL DEGREE PROGRAMS

The University of Miami offers dual degree programs in the areas of JD/MBA, MD/MBA, and BARCH/MBA. Dual degree programs are only available in conjunction with the Full-time two-year MBA Program, with the exception of the JD/One Year MBA and JD/LLM/One Year MBA programs. Admissions and all requirements for each program must be fulfilled in order to apply to the MBA program.
For more information on dual degree programs, please contact the Office of Recruiting and Admissions at 305-284-2510 or visit our website at www.bus.miami.edu/grad.

**INTERNSHIPS**

The School of Business encourages students to augment their classroom experience through a comprehensive internship program. Students who are interested in internships must register with the Ziff Graduate Career Center as soon as they arrive on campus.

**ADMISSION REQUIREMENTS**

The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited colleges or universities. Acceptance is based upon an evaluation of all credentials presented by the applicant. The following are the requirements for admission for both the Full-time two-year and one-year MBA Programs:

- Completed application, which includes four essays
- Application Fee of $100.00
- Resume
- Transcripts
- Letter(s) of Recommendation
- Official GMAT or GRE score report
- English Language Proficiency Exam, (TOEFL or IELTS), if applicable
- International Student Financial Statement, if applicable
- Campus Visit, encouraged
- Interview, by invitation only.

International applicants must provide an original copy of all transcripts in addition to a certified English translation of said documents as well as a copy and translation of the respective diploma.

**EXECUTIVE MBA PROGRAMS AND THE MBA FOR WORKING PROFESSIONALS**

The University of Miami offers Executive MBA Programs and an MBA for Working Professionals that are designed for accomplished professionals who are ready to take their career to the next level. Participants gain insight and understanding into the business environment by gaining a more global outlook and are better equipped to meet the challenges of today's business world. They become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations.

The Executive MBA and MBA for Working Professionals programs enable students to customize their MBA experience to better meet their industry and career goals - with a wide range of elective courses few other working professionals programs can match. This unique elective opportunity allows students to pursue a number of electives in specialty areas from accounting and marketing to management science and computer information systems. Students will also expand their professional network as they join elective classes with MBAs outside their regular cohort. (Five electives are offered in the Health EMBA program as cohort, lock-step courses that are already built into the curriculum).
CURRICULUM

To obtain detailed program curricula on the Executive MBA and MBA for Working Professional Programs, please reference the program brochures which can be requested by contacting the Office of Recruiting and Admissions at (305) 284-2510 or visit our website at www.bus.miami.edu/grad.

EXECUTIVE MBA

The Executive MBA programs provide business executives and professionals the opportunity to earn an MBA by attending class on Saturdays or in a Friday/Saturday/Sunday structure. These programs include:

- Executive MBA
- Executive MBA - Health Administration and Policy Concentration
- Executive MBA – Off Campus Programs in Palm Beach County Florida and in San Juan, Puerto Rico.

ADMISSION REQUIREMENTS

- Completed application, which includes four essays
- Application Fee of $100.00
- Resume
- Transcripts
- Letter(s) of Recommendation
- Official GMAT or GRE score report, may be required
- English Language Proficiency Exam, (TOEFL or IELTS) if applicable
- Interview required

International applicants must provide an original copy of all transcripts in addition to a certified English translation of said documents as well as a copy and translation of the respective diploma.

MBA FOR WORKING PROFESSIONALS

The MBA for Working Professionals Program also provides professionals the opportunity to earn an MBA by attending class on Monday evenings and Saturday mornings. MBA for Working Professionals programs include:

- MBA for Working Professionals
- Dual Degree Program: MBA for Working Professionals and Master of Science in Industrial Engineering

ADMISSION REQUIREMENTS

- Completed application, which includes four essays
- Application Fee of $100.00
- Resume
- Transcripts
- Letter(s) of Recommendation
- Official GMAT or GRE score report, may be required
- English Language Proficiency Exam, (TOEFL or IELTS) if applicable
- Interview required
International applicants must provide an original copy of all transcripts in addition to a certified English translation of said documents as well as a copy and translation of the respective diploma.

GLOBAL EXECUTIVE MBA IN SPANISH

The Global Executive MBA in Spanish enables participants to broaden their business knowledge, improve their management skills and strategic decision-making abilities, and expand their professional network through close interaction with a select group of business leaders from across Latin America.

The UM Global Executive MBA is taught in seven, two-week sessions.

The program offers a total of 15 courses of which 13 take place on campus in Coral Gables and two abroad during a Residential Session Abroad. The courses are given in sequence; the same group of students advances together throughout the entire program. Students are also offered the opportunity to select 3 elective courses to be taken in the 4th, 5th and 6th session of the program.

A brief two-week residential session abroad provides MBA students with the opportunity to gain international business perspectives, first-hand. As part of this program, students may receive lectures on pressing international business matters, meet prominent local business leaders, tour companies and manufacturing operations, and immerse themselves in a country’s cultural, social, and business environment.

All classes are taught entirely in Spanish, with reading materials in English, so reading-level knowledge of English is required.

CURRICULUM

To obtain detailed program curricula on the Global Executive MBA program, please reference the program brochures which can be requested by contacting the Office of Recruiting and Admissions at (305) 284-2510 or visit our website at www.bus.miami.edu/grad.

Admission Requirements

- Completed online application, which includes four essays
- A bachelor’s degree or its equivalent
- Copy of degree diploma
- Original transcripts for each undergraduate institution attended including the certified English translations
- Resume (applicant must have six or more years of professional work experience)
- Letter(s) of recommendation, one must be from applicant’s employer, or applicant’s client if self-employed
- Reading-level knowledge of English
- Interview, by invitation only
CERTIFICATE PROGRAMS

GRADUATE BUSINESS CERTIFICATE

The Graduate Business Certificate program provides professionals and graduate students an opportunity to add basic business courses to their portfolio. The program consists of four three-credit courses in functional areas of accounting, finance, management, and marketing. Students can take one or more courses for credit but must satisfactorily complete all four courses to be awarded the certificate. Students must have an undergraduate degree to be eligible for this certificate. Classes meet on Saturday from 8:00 a.m. – 12:00 p.m. and 1:00 p.m. – 5:00 p.m.

CURRICULUM

ACC 600 Accounting for Decision-Making and Control (3 credits)
FIN 602 Fundamentals of Finance (3 credits)
MGT 600 Managing Responsible Behavior in Organizations (3 credits)
MKT 660 Foundations of Marketing Management (3 credits)

For complete information on the Graduate Business Certificate program, including course dates and descriptions, please visit the Graduate Business Programs website at www.bus.miami.edu or call 305-284-2510.

ADMISSION REQUIREMENTS

The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited colleges or universities. Acceptance is based upon an evaluation of all credentials presented by the applicant. The following are the requirements for admission:

- Completed online application
- Application Fee of $100.00
- Resume
- Transcripts
RESEARCH INSTITUTES

INSTITUTE FOR THE STUDY OF QUALITY IN MANUFACTURING AND SERVICE

The University of Miami Institute for the Study of Quality in Manufacturing and Service (UMISQ) exists to advance the theory and practice of Quality Science. Its mission is to promote the improvement and innovation of quality on local, national, and international levels through the acquisition, dissemination, and application of knowledge in the areas of science, technology, and management as related to Quality Science in general, and Lean Six Sigma Management specifically.

Objectives

1. To conduct research in Quality Science and to publish its results through appropriate professional and academic outlets.
2. To educate and train management, labor, UM students, and others in the theories and practices of Quality Science in general, and Lean Six Sigma Management specifically.
3. To create internships for M.B.A. students in which they can solve real world problems using Quality Science theory and practice in general, and Lean Six Sigma management theory and practice in particular.
4. To remain financially self-sufficient.

The Institute pursues its objectives through involvement of faculty, students, and client organizations in all sectors of the economy.

INTELLIGENT COMPUTER SYSTEMS RESEARCH INSTITUTE

The Intelligent Computer Systems Research Institute is a center for research and information dissemination within the field of information business technology. The institute focuses on multi-disciplinary topics such as technology strategy, healthcare informatics, business intelligence, and embedded systems.

The Institute encourages a partnership model between academia and industry. Corporate partners are active in the provision of data, field studies, test environments, and other resources through which leading theoretical work can be developed tested in an applied environment.

The results of the research are developed for publication in leading academic and industry related journals as well as working papers. Industry partners are also actively encouraged to work with students through the creation of internship positions. These internships provide students the opportunity to act as a link between the teaching and research of the institute’s members and the field based applied environment.
THE GRADUATE STUDENT ASSOCIATION

The Graduate Student Association (GSA) is the student government organization representing students in the Graduate School (and all schools and colleges included under the Graduate School). Established in 1969, the GSA is one of the oldest graduate student governments in the United States. The primary function of the GSA is to provide the means for responsible and effective graduate student participation in the planning and conduct of University affairs. The GSA serves as a liaison between graduate students, individually and collectively, the faculty and the administration. In addition, the GSA exists as a social and intellectual forum to support and improve the quality of the graduate student environment at the University of Miami.

The Graduate Student Association is made up of seven officers and nearly fifty full- and part-time senators; the role of the GSA is both supervisory and implementary, and its scope encompasses both academic and social interests of the University's graduate student body. Officers and Senators meet regularly to discuss important issues and are often required to attend University-wide meetings with faculty, staff, administration and fellow students. The Graduate Student Senate is the primary body that represents the interests and concerns of the entire graduate student body at the University of Miami. The Senate is made up of one representative from every graduate department or program (currently there are 46 recognized graduate programs) at the University of Miami. The Senate coordinates most of the graduate activities and programs that the GSA sponsors, and acts as a hub for the exchange of information between different departments and programs. Typically, senators are either elected or appointed by their peers or program directors and serve for a one-year term. Each senator has one vote in the senate. Throughout the semester, the senate can issue directives, bills and resolutions pertaining to any aspect of graduate student life at the University of Miami, and works extremely closely with the Dean of the Graduate School in effecting changes and/or improvements.

The Senate, also as part of its charge, decides on and elects the new Executive Board of the Graduate Student Association each spring semester. Alternates are also elected or appointed to assist the senator when they are unable to carry out their duties.

The office of the GSA is located at Suite 21-T, 5606 Merrick Drive, please call 305-284-6750, e-mail: gsa@miami.edu, or visit our website at www.miami.edu/gsa for more information.

GRADUATE ACTIVITY FEE ALLOCATION COMMITTEE (GAFAC)

The unallocated portion of the graduate activity fee produces an annual fund that is available for graduate students to seek for enrichment of their various activities. The monies are allotted by a graduate student committee composed of nine elected representatives from Architecture, Arts and Sciences, Business, Communication, Education, Engineering, International Studies, Music and Nursing; and the Treasurer of the Graduate Student Association.

Petitions for funds are judged on the merits of the individual requests, the anticipated direct or indirect benefit to the University, the effort of the petitioners to generate support from other areas, past experience with the petitioning group, if applicable, and the current amount of funds available.

Forms for petitions are available in the Office of the Vice President for Student Affairs, Room 244, Ashe Building.
THE GRADUATE BUSINESS STUDENT ASSOCIATION

The Graduate Business Student Association (GBSA) is a professional and social student-run organization. All graduate business students become members once enrolled in a business master's program and are encouraged to attend meetings and events. The GBSA organizes activities and events aimed at strengthening networking within the graduate business student body and the business community and enriching the academic and social experience of its members. The GBSA is governed by a committee that consists of a president, vice president, speaker of senate, treasurer/executive secretary, director of community service, social director, and director of athletics. Elections take place at the end of each spring semester.

FINANCIAL ASSISTANCE

GRADUATE BUSINESS SCHOLARSHIPS AND FELLOWSHIPS

There are a limited number of merit-based graduate business scholarships which are awarded at the time of admission to qualified full-time MBA students entering in the fall semester only. A graduate business scholarship covers a portion of tuition for the MBA degree. Graduate business scholarships are not automatically renewed.

In addition to graduate business scholarships, there are a limited number of Emery Means Findley, Jr. Fellowships and scholarships which are awarded by Graduate Business Programs to applicants with outstanding academic credentials. Any applicant who wishes to be considered for a graduate business scholarship or a fellowship, must indicate this in the space provided on the application. Awards are available to both domestic and international students.

There are a limited number of merit/need-based scholarships which are awarded following admission for Executive and Working Professionals programs. Details on how to apply for these scholarships are provided at the time of admission.

DONOR SCHOLARSHIPS

Several endowed scholarships are made available to incoming graduate business students through the generosity of alumni and friends of the University of Miami School of Business Administration. These donor scholarships are for the purpose of recruiting students of high academic merit. The total number and amount of scholarship awards vary from year to year.

Scholarships will be awarded based on the recommendations of the Faculty Admissions Committee on a first come, first served basis. Since the number of scholarships is limited, students who meet the minimum criteria are not guaranteed a donor scholarship award.

We regret that a student may be ineligible for financial awards if he/she receives tuition benefits from the University of Miami or accepts any assistantship, scholarship, grant or fellowship from the University of Miami, in addition to our offer. This includes employees, their spouses, and dependents.
BANK OF AMERICA - ENDOWED BUSINESS SCHOLARSHIPS*
Criteria: A graduate business school student based on a combination of scholarship and financial need, who will preferably specialize in Finance, Accounting, or Management.

JACK R. BORSTING - GRADUATE SCHOLARSHIP ENDOWMENT
Criteria: Outstanding candidate for a master's level business degree.

RYDER/PATRICK J. CESARANO – ENDOWED SCHOLARSHIP*
Criteria: MBA student with a concentration in finance or management science/operations research. Based on academic excellence and financial need.

PAT & LON WORTH CROW - SCHOLARSHIP ENDOWMENT*
Criteria: Graduate business student specializing in Finance, who possesses several years of work experience, preferably with an expressed interest in a career in banking or a banking-related field. U.S. citizen, preferably resident in South Florida community.

EMERY MEANS FINDLEY, JR. – ENDOWED GRADUATE FELLOWSHIPS IN BUSINESS
Criteria: Outstanding candidates for Graduate Business Programs.

ALBERT AND ESTHER GREEN ENDOWED SCHOLARSHIP
Criteria: Graduate Business Student with a health challenge, or student studying or working in Health Administration.

ALLAN M. HERBERT & PATRICIA M. HERBERT – ENDOWED GRADUATE BUSINESS SCHOLARSHIP*
Criteria: Outstanding graduate business student, well-rounded, willing to finance his/her own education, and who appreciates the value of work and strives to combine study, work and extra-curricular activities.

JAMES W. McLAMORE – GRADUATE BUSINESS FELLOWSHIPS
Criteria: To recruit and retain outstanding graduate business students.

E. BRUCE MCLAUGHLIN & CYNTHIA M. SWOL - ENDOWED SCHOLARSHIP IN MARKETING*
Criteria: Graduate business student with concentration in Marketing, who has significant work experience prior to entering the MBA program. U. S. citizen, with preference given to female students with unmet financial need.

MERRILL LYNCH & CO. FOUNDATION, INC. – FELLOWSHIPS IN INTERNATIONAL FINANCE
Criteria: Graduate business student preparing for a career in International Finance.

SOUTHEAST BANKING CORPORATION FOUNDATION – ENDOWED SCHOLARSHIPS*
Criteria: Graduate student in the MBA program who is a Florida resident. Based on academic excellence and financial need.

* Essay Required
In 300 words or less, please explain why you need financial assistance to complete your MBA degree. The essay must be included with your application.

Various other donor scholarships are available based upon need, merit, or other specified criteria.

**ZIFF GRADUATE CAREER SERVICES CENTER**

A. The Ziff Graduate Career Services Center's mission is to provide top quality resources and career guidance to School of Business graduate students and build strong partner relationships with the corporate community.

1. The Ziff Career Services Team is committed to providing each student a personalized program and the resources and skills needed to be competitive in the marketplace.

2. The Ziff Career Services Team is the student’s frontline resource to securing employment upon graduation. Students who engage with the Ziff Graduate Career Services Center will utilize the staff to assist them in developing an effective career strategy and marketing campaign that will prepare them for a successful job search at all levels of their career. The marketing campaign will equip the student with a strategic résumé, improve their interview skills, generate contacts, develop networking opportunities, and prepare them for a successful career transition.

B. **ONLINE RESOURCES**

1. Ziffecareercenter.com – The center’s online portal where students find access to many of Ziff’s career resources, access to all current job postings and upcoming events. Documents such as résumés and cover letters will be held in the student’s site.

2. CareerLeader – An assessment tool specifically developed for MBA students that provide expert analysis of a student’s unique pattern of business relevant interests, values and abilities.

3. Careershift - A tool that provides the student access to thousands of national contacts based on company, alumni affiliation, location and creates targeted contact lists. One-stop location to conduct national and local job search for both full-time and internship opportunities.

4. Vault’s Career Insider – Provides inside information and advice on industries, companies, the job search and industry interview prep.

5. GoingGlobal – the leading provider of both country-specific and USA city-specific career and employment information. Features 30 Country Career Guides, 41 USA City Career guides, corporate profiles and more than 500,000 internship and job listings within the USA and around the world.

6. H1Base – A resource to assist international students in finding out which employers have H1 job postings, which companies have sponsored international students in the past and access to important information on the sponsorship process.
7. Myvisajobs.com - Current job listings and information on companies that hire international students.

C. REGISTRATION
1. Graduate business students that are seeking employment post-graduation are required to register with the Ziff Graduate Career Center to commence their Career Management Plan.

2. The registration process begins with the Pre-MBA OnBoarding Program. Students are required to complete key assignments prior to Orientation.

D. ON CAMPUS INTERVIEWS/CORPORATE RECRUITING
The recruiting program begins in the fall semester from mid-September through mid-December and continues from mid-January through May.

   Ziff Graduate Career Center has established recruiting relationships with many local and national companies to increase exposure for University of Miami School of Business Administration MBA graduates.

   MBA students can utilize the Ziff Graduate Career Services Center’s Internet Employment system, www.ziffecareercenter.com to sign up for on-campus interviews, monitor corporate presentation schedules, upload résumés and cover letters, and stay abreast of job opportunities offered by companies that are recruiting on campus.

   The Ziff Graduate Career Center regularly receives career opportunities that are made available through www.ziffecareercenter.com to students and alumni alike so they can review career opportunities listed with the center.

E. INTERNSHIPS
1. The School of Business Administration encourages students to augment their classroom experience through participation in a summer internship.

2. The internship is a key positioning element for the post-MBA career. The internship search should be the student’s main focus from the start of the first year.

F. NETWORKING CONTACTS
1. 'Cane Connections is an online University of Miami database that allows students access to alumni throughout the United States about their work experiences and gather other career related information. The database is a valuable network of contacts in a variety of fields. It is accessible through www.miamialumni.net.

2. Students are invited to join the School of Business MBA groups on LinkedIn and Facebook, an easy way to reach out to more contacts and build their network.
G. STUDENT RESPONSIBILITY

1. Ultimately, success in securing a job is defined by the student. Together with the Ziff Graduate Career Center as a partner, the student can create a successful marketing campaign that will connect him/her to a network of contacts and networking opportunities leading to interviews and job offers.

2. Students are to register online with the Ziff Graduate Career Center during the Pre-MBA OnBoarding cycle. All pre-MBA assignments need to be completed prior to Orientation.

3. Students are to meet with a career advisor in term one to discuss their career goals and develop a personalized career action plan/marketing campaign that will lay out the strategy and timing sequence of their goals. The career action plan and strategy will be built through numerous advising appointments and workshop events.

4. Students must regularly update and revisit their résumés in an ongoing résumé review process.

5. Students will participate in mock interviews and follow through with suggestions until they are declared ready to interview.

6. Students are expected to visit the Ziff Graduate Career Center regularly and access www.ziffecareercenter.com to identify and attend on-campus recruiting activities, corporate presentations, relevant workshops and MBA clubs sponsored events.

7. Students MUST complete the exit survey and report their employment information as soon as they secure a job or internship.

The Ziff Graduate Career Services Center is located in the School of Business complex on the first floor of the Jenkins Building.

THE MENTOR PROGRAM

1. The School of Business Mentor Program is designed to enhance the classroom experience by matching students with local professionals who have experience and expertise in the students’ area of career interest, or are versed in areas of professional development.

2. Through personal interaction with experienced business professionals, students gain an understanding of corporate culture, career directions, and networking. Students also have the opportunity to interact with other mentors by attending regularly scheduled roundtables, hosted by the School.

3. Graduate business students are encouraged to participate.

ACCOUNTING - Dept. Code: ACC

DEGREE PROGRAMS

The Department of Accounting offers two degree programs leading to the Master's degree:

Master of Accounting (MAcc) and
Master of Science in Taxation (MST).

While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation.

For admission to either program, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant’s undergraduate grade point average, GMAT score, grades in specific accounting courses, the rigor of the undergraduate program, and other factors such as work experience. Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score.

Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami Accounting Summer Intensive Program to fulfill this requirement.

SCHOLARSHIPS

University of Miami School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available. An application may be obtained from the Department’s website.
MASTER OF ACCOUNTING (MACC)

The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers, CFOs or financial analysts. In addition to the traditional one year of full-time study beyond the Bachelor’s level, the MAcc and the MST programs are offered as accelerated programs for UM undergraduates. Students in the accelerated programs have the option of obtaining an International Designation.

The MAcc is designed for the student who has taken the accounting and related courses required for an undergraduate major in accounting or other undergraduate business majors who have successfully completed the Accounting Summer Intensive Program. These students should be able to complete the MAcc in a year or less provided they enroll as full time students.

Undergraduate Course Requirements

The courses listed below are undergraduate prerequisites that, unless already completed, must be fulfilled in order to be admitted for graduate study. For most graduate tax classes the equivalent of ACC 404: Advanced Taxation (Corporate and Partnership Income Taxation) is also required. If a candidate does not have an undergraduate business degree, additional business prerequisites (economics, marketing, management, finance and others) will also be required.

Principles of Financial Accounting (ACC 211)
Managerial Accounting (ACC 212)
Intermediate Financial Accounting I and II (ACC 311 and 312)
Cost/Managerial Accounting (ACC 301)
Auditing (ACC 402)
Fundamentals of Taxation (ACC 403)
Accounting Information Systems (ACC 406)

Master of Accounting—Assurance Track (MAcc-Assurance)

The program requires 30 semester hours consisting of five required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. Of the elective courses, at least four credits must be selected from electives with an accounting emphasis (refer to list below). Courses with a 600-level designation are open to graduate students and upper-level undergraduate students. Graduate students are permitted to take up to 6 semester hours in 500-level courses. The remaining credits must all be earned in 600-level courses.

Required courses:
ACC 530 International Financial Reporting Standards (1 credit)
ACC 603 Studies in Financial Reporting Issues
ACC 610 Accounting Research and Theory
ACC 611 Auditing Seminar

In addition to the above courses, a student must select one of the following courses:
ACC 602 Analysis of Financial Statements
ACC 672 Advanced Financial Analysis
In addition to the above courses, a student must take at least two credits from the following accounting courses:

ACC 522 Advanced Issues in Auditing  
ACC 524 Accounting for Governmental and Not-for-Profit Entities  
ACC 620 Accounting Controls in Information Technology  
ACC 623 International Accounting and Taxation  
ACC 648 Financial Reporting Implications of Income Taxes  
ACC 675 Compensation, Incentives and Strategic Control  
ACC 677 Forensic Accounting

Students may select their other electives from courses above or the following courses:

Recommended elective courses:
BUS 602 Critical Thinking and Effective Writing (1 credit)  
BUS 603 Critical Thinking and Effective Presentations (1 credit)

Other elective courses:
ACC 640 Corporate Taxation I  
ACC 641 Corporate Taxation II  
ACC 642 Seminar in Taxation  
ACC 643 Tax Research  
ACC 645 Partnership Taxation  
ACC 647 Estate and Gift Taxes  
ACC 649 Issues in Tax Policy  
ACC 662 Taxation of Multinational Corporations  
ACC 677 Forensic Accounting  
BSL 691 The Public Corporation

Any other electives must be selected in consultation with the Program Director.

**Master of Accounting—Corporate Accounting Track (MAcc-Corporate)**

The program requires 30 semester hours consisting of five required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. Of the elective courses, at least two credits must be selected from electives with an accounting/finance emphasis (refer to list below). Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to graduate students and upper-level undergraduate students. Graduate students are permitted to take up to 6 semester hours in 500-level courses. The remaining credits must all be earned in 600-level courses.

Required courses:
ACC 530 International Financial Reporting Standards (1 credit)  
ACC 603 Studies in Financial Reporting Issues  
ACC 675 Compensation, Incentives and Strategic Control  
FIN 670 Corporate Finance

In addition to the above courses, a student must select one of the following two courses:
ACC 602 Analysis of Financial Statements  
ACC 672 Advanced Financial Analysis
In addition to the above courses, a student must take at least one course from the following accounting or finance courses:

ACC 610  Accounting Research and Theory
ACC 677  Forensic Accounting
FIN 650  Financial Investment
FIN 651  Advanced Topics in Investments
FIN 660  International Finance
FIN 671  Advanced Topics in Corporate Finance
FIN 685  Mathematics of Financial Derivatives

Students may select their other electives from courses above or the following courses:

Recommended elective courses:
BUS 602  Critical Thinking and Effective Writing (1 credit)
BUS 603  Critical Thinking and Effective Presentations (1 credit)

Other elective courses:
ACC 522  Advanced Issues in Auditing
ACC 524  Accounting for Governmental and Not-for-Profit Entities
ACC 601  Trends in Present Day Accounting
ACC 606  Internal Auditing
ACC 611  Auditing Seminar
ACC 620  Accounting Controls in Information Technology
ACC 623  International Accounting and Taxation
ACC 640  Corporate Tax I
ACC 641  Corporate Tax II
ACC 642  Seminar in Taxation
ACC 643  Tax Research
ACC 647  Estate and Gift Taxes
ACC 648  Financial Reporting Implications of Income Taxes
ACC 649  Issues in Tax Policy
ACC 662  Taxation of Multinational Corporations
BSL 691  The Public Corporation

Any other electives must be selected in consultation with the Program Director.

MASTER OF SCIENCE IN TAXATION (MST)

This program affords the accounting major or equivalent the opportunity to specialize in the area of taxation. Through electives, students are able to expand their areas of expertise, so that they may adequately prepare themselves for careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. The program requires 30 semester hours consisting of six required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution and has completed ACC403: Fundamentals of Taxation and ACC404: Advanced Taxation, or their equivalents. Of the elective courses, at least two courses must be selected from electives with a tax emphasis (refer to list below). Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to graduate students and upper-level undergraduate students. Graduate students are permitted to take up to 6 semester hours in 500-level courses. The remaining credits must all be earned in 600-level courses.
Required courses:
ACC 640  Corporate Taxation I
ACC 641  Corporate Taxation II
ACC 643  Tax Research
ACC 645  Partnership Taxation
ACC 648  Financial Reporting Implications of Income Taxes

In addition to the above courses, a student must select at least one of the following courses:
ACC 623  International Accounting and Taxation
ACC 649  Issues in Tax Policy
ACC 662  Taxation of Multinational Corporations

Students may select their other electives from courses above or the following courses:

Recommended elective courses:
BUS 602  Critical Thinking and Effective Writing (1 credit)
BUS 603  Critical Thinking and Effective Presentations (1 credit)

Other elective courses:
ACC 522  Advanced Issues in Auditing
ACC 524  Accounting for Governmental and Not-for-Profit Entities
ACC 530  International Financial Reporting Standards (1 credit)
ACC 601  Trends in Present Day Accounting
ACC 602  Analysis of Financial Statements*
ACC 603  Studies in Financial Reporting Issues
ACC 606  Internal Auditing
ACC 610  Accounting Research and Theory
ACC 611  Auditing Seminar
ACC 620  Accounting Controls in Information Technology
ACC 642  Seminar in Taxation
ACC 647  Estate and Gift Taxes
ACC 672  Advanced Financial Analysis and Valuation**
ACC 675  Compensation, Incentives and Strategic Control
ACC 677  Forensic Accounting
BSL 691  The Public Corporation

*Not open to students who have taken ACC 672
**Not open to students who have taken ACC 602 Any other electives must be selected in consultation with the Program Director.

ACCELERATED MASTER’S PROGRAMS

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor’s level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors. The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor’s and Master’s degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.
Accelerated Program Timeline

1. Internship in summer after junior year

2. Twelve credits of work in senior year will count towards their graduate degree (only students in the accelerated programs will be permitted to take these classes during their senior year).

3. In summer after senior year take one graduate course, CPA review course, and CPA exam.

4. Complete remaining credits of graduate work in fall semester after senior year.

Prerequisites

The following must be completed before students begin their senior year:

- A minimum of 102 credit hours
- 15 credit hours of the 21-hour Professional Business Core including CIS 410, ECO 302, FIN 302, MGT 303, and MGT 304. (MGT 401 must be taken in the final semester and FIN 303 will be taken as the core elective in the senior year.)
- The following Accounting major requirements: ACC 301, ACC 311, ACC 312, ACC 402 ACC 403, and BSL 301.
- All other requirements for a Bachelor’s degree other than those that will be satisfied through completion of the undergraduate courses taken while in senior-graduate status.

Senior Year Curriculum (Senior-Graduate Status)

The curriculum for the senior year is the same for all tracks (except that students selecting the MAcc-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of 14 credits in the fall and 16 credits in the spring semester as follows:

Fall Semester Senior Year

Recommended Sequence:
ACC 404 Advanced Taxation (3 credits)
ACC 406 Accounting Systems (3 credits)
FIN 303 Intermediate Financial Management (3 credits)

Courses offered only in the fall:
ACC 524 Accounting for Governmental and Not-for-profit Entities (2 credits)
ACC 530 International Financial Reporting Standards (1 credit)
BSL 691 The Public Corporation (2 credits)

Spring Semester Senior Year

Recommended Sequence:
ACC 411 Advanced Accounting (3 credits)
MGT 401 Strategic Management (3 credits)
One other non-accounting undergraduate course (3 credits)
Courses offered only in the spring:
ACC 643 Tax Research (2 credits)
ACC 522 Advanced Issues in Auditing (3 credits)
BUS 602 Critical Thinking and Effective Writing (1 credit)
BUS 603 Critical Thinking and Effective Presentations (1 credit)

Students should select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

**Summer after Senior Year**

Students must take one 2 or 3-credit accounting graduate course. Accounting courses are offered based on demand and could include ACC 620, Accounting Controls in IT (offered every summer) or ACC 649: Issues in Tax Policy.

To graduate on time you are **REQUIRED** to take an approved CPA review course during the summer following your senior year after you graduate. If you do not take a CPA review course you will have to register and pay for an addition six graduate credits in the next spring semester and you will graduate from graduate school a semester late, in May instead of December.

Students would also be expected to pass part, if not all of the CPA exam during this summer.

**Final Fall Semester**

In the final fall semester students will complete the remaining 15 or 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

**Admission to the Accelerated Programs**

**Incoming Freshmen**
- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.0 or higher by their junior year in college and to maintain this GPA after their junior year.
- Students will need to have completed 102 credit hours by the start of their senior year.

**Current University of Miami Undergraduate Accounting Majors**
- Students apply to the accelerated program by February 1 of their junior year.
- Admission to the program will be primarily based on GPA, and letters of recommendation. It is expected that the students admitted to the program will have GPAs exceeding 3.5, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the application pool.
- After admission, students must maintain an overall GPA of 3.0 or higher and an accounting GPA of 3.0 or higher to remain eligible.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 301, ACC 311, ACC 312, ACC 402, ACC 403, and BSL 301.
International Designation Requirements

Admission to this accelerated program is expected to be more competitive given the small number of international internships that will be available.

Incoming Freshman Admission Requirements

Applicants must meet the freshman admission requirements of the accelerated program as well as:
- Applicants must meet the freshman admission requirements of the accelerated program
- Maintain an overall GPA of 3.00 or higher and an accounting GPA of 3.25 or higher
- Demonstrate proficiency in a second language.

Current University of Miami Undergraduate Accounting Major Admission Requirements

Applicants must meet accelerated program admission requirements:
- Have an overall and accounting GPA of 3.5 or higher, and
- Demonstrate proficiency in a second language,

Educational Requirements to Sit for The CPA Exam

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Note, our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed at:  
http://www.myfloridalicense.com/dbpr/cpa/licensure.html

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam: To be eligible to take the CPA exam, you must have completed 120 semester hours including 24 semester hours of accounting (auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation) at the upper division level (300-level or above) and 24 semester hours in general business courses (including at least 6 semester hours of business law courses). One course can be at a lower lever (freshman or sophomore), the other course must be upper division (junior level or higher). The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note you do not have to have a bachelor’s degree in order to sit for the CPA exam.
Requirements for Licensure: In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the BOA requires that you have completed a bachelor's degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. (This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences.) If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of accounting courses and at least 39 semester hours of general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State: If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

Accreditation

The Board accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses

No credit will be given for courses which duplicate another course for which the applicant has received credit. Review courses are considered as duplicates.
For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

DEGREE PROGRAMS

The Department of Economics offers the Master of Arts and Doctor of Philosophy (refer to School of Business Doctor of Philosophy section for program specifics) degrees. Applicants for admission to graduate study in Economics should have an extensive background in Economic Theory and Quantitative methods.

The Master of Arts program may serve as a terminal degree for students preparing for careers in business, government, international agencies, or teaching, or as the first phase of a prospective doctoral program. The program of study, which consists of thirty credits, is structured as follows:

a. All Master of Arts students must take the following core that consists of the following courses:
   i. a 500-level mathematical economics course (ECO 510)
   ii. a 500-level econometrics course (ECO 520)
   iii. a 500-level macroeconomics course (ECO 521)
   iv. a 500-level microeconomics course (ECO 533)
   v. a 600-level macroeconomics course (ECO 621)
   vi. a 600-level microeconomics course (ECO 633)
   vii. a 500 level mathematics course (MTH 512)
   viii. 600 level econometrics (ECO 620)

b. Additional requirements are as follows:
   i. two courses in an area of specialization in a major economic discipline (e.g., international trade) or two related disciplines (e.g., health economics and labor economics)
   ii. comprehensive examinations over the core and area of specialization

c. Furthermore, all applicants must submit their scores on the GRE, hold a baccalaureate degree from an institution of recognized standing, and have demonstrated, by their undergraduate record, capability of completing an M.A. program. In addition, foreign students are required to score 90 on the internet based, 600 on the paper based, or 235 computer based Test of English as a Foreign Language.

SCHOOL OF COMMUNICATION – GRADUATE
www.com.miami.edu

DEPARTMENTS

The School of Communication offers the Master of Arts in the Department of Communication Studies (M.A. in Communication), the Department of Journalism and Media Management (M.A. in Journalism), the Department of Strategic Communication (M.A. in Public Relations) and the Master of Fine Arts in the Department of Cinema and Interactive Media (M.F.A. in Motion Pictures). The School also offers a Ph.D. in Communication.

ADMISSION REQUIREMENTS

Admission to Graduate Studies at the Master’s Level:

Requirements for admission to Graduate Studies for the Master of Arts or Master of Fine Arts degree in Communication are:

- A baccalaureate degree from an accredited institution
- The School’s official application
- A $65.00 non-refundable application fee
- Official transcripts of all undergraduate and graduate college work
- Three letters of recommendation
- Official Graduate Record Examination (GRE) scores (M.A. applicants only)
- Portfolio (M.F.A. applicants only)
- Official TOEFL scores for international applicants only
- Letter of intent--500 word typed statement of academic and professional goals

Contact the Office of Graduate Studies, 305-284-5236 or socgrad@miami.edu, for information.

Requirements for admission to Graduate Studies for the Juris Doctor/Master of Arts in Communication Joint degree are:

For Fall 2012

- Applications are due on April 1, 2012 for Fall 2012 matriculation. If students currently enrolled in the J.D. program want to apply to the School of Communication graduate program, the process will be as follows: Admitted students and current 1L students will supply a personal statement attached to an email indicating that they are applying to the joint degree program specifying one of the following three School of Communication M.A. programs: Communication Studies, Public Relations, and Journalism. This email and a personal statement should be directed to: Sandra Abraham, Executive Liaison for Interdisciplinary Programs, School of Law.
  - sabraham@law.miami.edu
  - Office: 305-284-4030
  - University of Miami, 1320 South Dixie Highway, Suite 731, Coral Gables, FL 33146.
• The Executive Liaison, working with the Admissions Office, will forward the student's application, including LSAT score, undergraduate transcript, letters of recommendation (two of them previously required for the J.D. program), and, if applicable, a current Law School transcript to the School of Communication for admission consideration.

• An LSAT score will be considered in lieu of the GRE.

• Students will be admitted to the Law School J.D. program and the School of Communication (SoC) master's program separately.

• Students in this joint degree program must commence law study first.

For Fall 2013

• Beginning in Fall 2012, students must be admitted to the Law School first, prior to enrollment in the School of Communication, checking a box on their application indicating their interest in the joint degree program. Once accepted to the Law School, the student's law school application including LSAT score, undergraduate transcript, and letters of recommendation (two of them required for the J.D. program) will be sent to the School of Communication for review. The student will then receive notification from the School of Communication regarding his/her admission to the joint degree program.

• An LSAT score may be submitted in lieu of the GRE.

General notes for Fall 2012 and Fall 2013

• Students will be admitted to the Law School J.D. program and the School of Communication (SoC) master's program separately.

• Students in this joint degree program must commence law study first. (Students who have already commenced work on the M.A. are not eligible for the joint program.)

Admission to Graduate Studies at the Doctoral Level:

Requirements for admission to Graduate Studies for the Doctor of Philosophy in Communication are:

• A master's degree in communication, or in another appropriate field. The degree must be in addition to a bachelor's degree. All degrees must be from accredited institutions.

• The School's official application

• A $65.00 non-refundable application fee

• Official transcripts of all undergraduate and graduate college work

• Three letters of recommendation

• Official Graduate Record Examination (GRE) scores

• Official TOEFL scores for international applicants only

• Letter of intent – a minimum 500 word typed statement of academic and professional goals

• A copy of the completed master's thesis or comparable scholarly work if no master's thesis has been completed. If the master's thesis is in progress, completed chapters should be submitted.

• Resume
DEGREE PROGRAMS

The School of Communication offers graduate programs leading to the Doctor of Philosophy, Master of Arts and Master of Fine Arts degrees.

COMMUNICATION (Ph.D.) is a highly individualized and innovative program. Each student is paired after his/her first year of study with a faculty member who assists the student in developing the requisite research techniques, teaching, writing, and media skills necessary for a career in education, media, business, or industry.

Research interests of the School of Communication faculty are diverse. Possible areas of specialization for doctoral work include intercultural communication, health communication, organizational communication, international communication, political communication, interpersonal communication, public relations, and mass communication.

COMMUNICATION STUDIES (M.A.) is a program designed to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. The 30-credit thesis track program emphasizes the student’s development of research skills. The 36-credit non-thesis track program focuses on a theoretical foundation with emphasis on applied communication. Students have the option to concentrate in Communication Studies, Health Communication, or Intercultural Communication.

JOURNALISM (M.A.) is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today’s media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting, journalism for social change or international journalism). The program begins in the fall semester and lasts for 18 months. No prior training or experience in journalism is required.

PUBLIC RELATIONS (M.A.) offers two programs. The 30-credit thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second non-thesis track program, a 36-credit coursework-only option, builds from a foundation of public relations and communication courses.

JOINT DEGREE JURIS DOCTOR (J.D.)/M.A. IN COMMUNICATION. A powerful background in law and in communication can be a launching pad for a career in law, business, entertainment or government. For this reason, the University of Miami School of Law and School of Communication have brought together these two dynamic fields to offer a joint degree program. Through this joint program, students can acquire a law degree and a master's degree in communication in less time (3 to 3 ½ years). The joint degree program is intended for students with a variety of goals including students who plan to practice professionally in a communication field such as journalism or strategic communication with a law-related emphasis. Graduates of these programs may also
work as in-house counsel for new communication technology companies, or serve with
government agencies concerned with communication law or with law firms practicing in
that field. This program also provides a solid foundation for future journalists who wish
to report on legal affairs, and offers ideal preparation for the rapidly growing field of
public affairs management, in which practitioners work in business, government and
non-profits to communicate with key audiences.

The School of Communication M.A. degree programs participating in the joint J.D.
program are:

- Communication Studies (Communication Studies, Health Communication,
  Intercultural Communication)
- Public Relations
- Journalism

**MOTION PICTURES (M.F.A.)** The Motion Picture graduate program provides a student-
centered, learning experience within a globally diverse moving image context. The M.F.A.
curriculum emphasizes the relationship between theory and practice and encourages
both creative collaboration and independent thinking as it prepares motion picture
professionals and artists. M.F.A. candidates are expected to follow a set sequence of
courses during the first two semesters of their studies. During the second year of
studies, candidates are strongly encouraged to explore not only a primary but also a
secondary area of specialization in the program and develop a minimum of two creative
projects consistent with their areas of primary interest and secondary specialization. A
minimum of 6 credit hours in each area of specialization is required. Under faculty
committee supervision, students will develop one or two creative projects in the third
year of their studies. This three-year program culminates with a thesis portfolio that
demonstrates, not only skillful execution of craft, but strong conceptual development
rooted in collaborative work and innovative uses of technology.

Graduate students are encouraged to pursue independent and critical thinking, research
and creative work as appropriate to the fulfillment of the requirements of their degree.
In addition, the graduate program seeks to support innovative approaches and ideas and
to aid in the pursuit of relevant scholarly and creative endeavors.

**DEGREE REQUIREMENTS**

Programs of study for the Master of Arts and Master of Fine Arts degrees are available with
these options:

**MASTER OF ARTS - THESIS TRACK**

For programs including a thesis, the candidate must complete a minimum of 30 credit
hours at the graduate level with the approval of a faculty advisor. Of the 30 credit hours,
15 credit hours must be at or above the 600 level. Six credit hours will be earned for
thesis work. The thesis may represent an applied research project, original research, or
a critical review on a topic approved by a thesis committee. The thesis committee chair
must be a member of the Graduate Faculty of the University.

A thesis is required for thesis-track Communication Studies and Public Relations
students.
MASTER OF ARTS - NON-THESIS TRACK

Students must complete a minimum of 36 credit hours at the graduate level with the approval of a faculty advisor. Of the 36 credit hours, all must be at or above the 500 level, and 15 must be at or above the 600 level.

JURIS DOCTOR/MASTER OF ARTS JOINT DEGREE

This joint degree program will allow 9 J.D. credits to be applied to the M.A. degree and 6 M.A. credits to be applied to the J.D. degree, saving the student 15 credits between the two programs.

In the J.D. program, students will complete 82 credits in the School of Law. Additionally, 6 credits from the School of Communication program will be applied to their Law School transcript, for a total of 88 required J.D. credits. In the M.A. program, students will complete 27 credits in the School of Communication. Additionally, 9 law school credits will be applied toward their master's degree, for a total of 36 required M.A. credits. As defined above, 15 credits will be counted toward both degrees: 6 credits from the School of Law and 9 credits from the School of Communication. During the first year of the joint program, students will be required to attend the J.D. program full-time. Students will be able to take courses in the School of Communication beginning in the fall of their 2L year. Students must complete all J.D. requirements and all M.A. requirements as defined by their programs. Participants in the joint J.D./M.A. program are not required to complete the M.A. capstone project. The thesis-track is not open to students in the J.D./M.A. joint program without specific approval of the School of Communication. Students may take Summer law courses which may reduce the length of the joint degree program by up to one semester. Students may not take more than 16 credits each semester, excluding summer sessions. Seventeen credits per semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

MASTER OF FINE ARTS

Students must complete a minimum of 66 credit hours with the approval of the faculty advisor. Of the 66 credit hours, at least 24 must be at or above the 600-level and 12 credit hours at the 700-level must be earned for thesis work.

GENERAL DEGREE REQUIREMENTS

1. All students in the Master of Arts (M.A.) program will complete the following core courses subject to specific requirements of each program.

a. Communication Studies and Public Relations

   COM 601 Theories of Communication

   COM 602 Methods of Communication Research and/or COM 603 Qualitative Research Methodologies

b. Journalism

   COM 605 Theories and Methods for Mass Communication Research
2. With the approval of a faculty advisor, a student may take 6 to 15 credit hours in courses outside the School of Communication.

3. Candidates in thesis programs must have their thesis proposals formally approved by their thesis committee following a personal meeting with committee members. Candidates will be given final oral examinations in defense of their thesis.

4. Final (Capstone) Projects or written comprehensive examinations are required in some M.A. programs.

It is the responsibility of the student to apply for graduation either during registration for the final semester or before the date indicated on the Graduate School calendar and the Schedule of Classes. Students who previously applied for a diploma but did not receive the degree must repeat the application procedure. Graduation is based on the following:

a. Students must complete the minimum credits required for their area of study with a minimum GPA of 3.0.

b. Course substitutions will not apply toward graduation without the written approval of the program director of the area and the director of graduate studies.

c. Students are required to have the approval of the area program director and the director of graduate studies to take courses at another University.

DEPARTMENT OF COMMUNICATION STUDIES

COMMUNICATION STUDIES (M.A.)

Communication Studies Track

The goals of the Master of Arts program in Communication Studies are to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. Students may complete coursework in persuasion, and interpersonal, intercultural, organizational, and health communication together with research methods applicable to these areas.

Two programs are offered. The thesis program emphasizes the student’s development of research skills under faculty supervision (30 credits). The non-thesis program focuses on a theoretical foundation with emphasis on applied communication (36 credits). Students will be prepared for leadership positions in public or private organizations at the national or international level, or pursue advanced degrees. Non-thesis students must complete a minimum of 36 credit hours at the graduate level with the approval of a faculty advisor or program director. Of the 36 credits, 18 credit hours must be at or above the 600 level. No more than six hours will be allowed for advanced projects and directed research (599).
REQUIRED COMMUNICATION CORE: (Thesis/Non-Thesis Programs) 9 CREDITS

COM 601  Theories of Communication (3)
COM 602  Methods of Communication Research (3)
COM 603  Qualitative Research Methodologies (3)

ELECTIVES: (Thesis Program) 15 CREDITS
(Non-Thesis Program) 27 CREDITS

Students may select elective courses within the School of Communication or the University; a maximum of six (6) credits thesis track and nine (9) credits non-thesis track may come from outside the School of Communication.

Recommended electives are:

COM 615  Social Effects of Mass Communication (3)

Health Communication Track

Health Communication is an emerging specialty in the field of communication. This graduate program is designed to provide a broad introduction to human communication in a healthcare context. Career opportunities in this area include public health leaders, practitioners, and researchers who design, evaluate, and disseminate health communication messages for private and governmental organizations, advertising, public relations and marketing agencies, and journalists. Students will explore the roles of patients and caregivers, social and cultural issues, communication in health organizations, and the role of mass media. Two programs are offered. The thesis track program emphasizes the student’s development of research skills under faculty supervision (30 credits). The non-thesis track program emphasizes a theoretical foundation based on application of communication courses (36 credits).

Intercultural Communication Track

The Intercultural Communication Track is designed to provide students with an understanding of the way communication functions in intercultural settings, how culture affects the communication process, and the reciprocal effects of intercultural perceptions on policy in the history of Eastern-Western relations. Career opportunities in this field include corporate diversity trainer, communication director, human resource manager, international service representative, negotiator, and foreign correspondent with government and business organizations. Two programs are offered. The thesis track program emphasizes the student’s development of research skills under faculty supervision (30 credits). The non-thesis track program emphasizes a theoretical foundation based on application of communication courses (36 credits).

**THESIS COM 710 Master’s Thesis (Thesis Program) ** 6 CREDITS

**TOTAL CREDITS**  = 30 CREDITS

**Public Relations - Non-Thesis**

Students who elect a program without a thesis must complete a minimum of 36 credit hours at the graduate level with the approval of the faculty advisor. Of the 36 credit hours, 18 must be at or above the 600 level.

**REQUIRED COMMUNICATION AND PUBLIC RELATIONS CORE:** 9 CREDITS

- COM 601 Theories of Communication (3)
- CPR 620 Public Relations Fundamentals (3)

Select one of the following courses:

- COM 602 Methods of Communication Research (3) or
- COM 603 Qualitative Research Methodologies (3)

**PUBLIC RELATIONS SEQUENCE:** 18 CREDITS

- CPR 517 Media Relations (3)
- CPR 582 International Public Relations (3)
- CPR 584 Public Relations Management (3)
- CPR 625 Seminar in Public Relations Administration (3)
- CPR 629 Public Relations Seminar: Fundraising in the Not-for-Profit Sector (3)
- CPR 632 Seminar in Public Relations and Political Campaigns (3)
- CPR 633 Seminar in Public Relations: Lobbying and Pressure Groups (3)
- CPR 634 Seminar in Public Relations: Non-profit Groups and Governmental Institutions (3)
- CPR 644 Seminar in Public Relations Ethics (3)
- COM 615 Social Effects of Mass Communication (3)
- CPR 690 Public Relations Practicum I

**ELECTIVES:** 9 CREDITS

Nine credits must be taken outside the School of Communication’s Public Relations program, with approval of the program director.

No written comprehensive examinations are required for this degree.

**COM 720 Continuous Registration – Research in Residence (0) (may be required for full time study)**

**TOTAL CREDITS**  = 36 CREDITS
DEPARTMENT OF JOURNALISM AND MEDIA MANAGEMENT

JOURNALISM (M.A.)

The Journalism program prepares students to work across different media platforms while also providing the opportunity to focus on particular areas of interest. The program emphasizes the timeless values and skills required to report news, commentary and features in a variety of formats, from newspapers and magazines to online journalism, television and radio. The program stresses analytical and critical thinking as well as effective storytelling in the context of today’s dynamic and evolving media landscape. In consultation with faculty advisors, students are strongly encouraged to develop areas of special interest while acquiring skills in a variety of media. During the first semester, all students take a core of courses that teach journalism from the print, online and broadcast perspectives. In later semesters, students will take additional core courses as well as electives and courses required within their chosen area of concentration.

From time-to-time and after consultation with a faculty adviser, students may take appropriate additional courses in other programs or schools. School of Communication journalism graduate students must complete a minimum of 36 credit hours at the graduate level with the approval of the Journalism graduate program director. Of the 36 credit hours, all must be at or above the 500 level, and 15 must be at or above the 600 level. Students with strong prior experience in a particular area may request a written waiver of a required course from their program director, upon the demonstration of sufficient expertise in that subject. All requirements and courses in the Journalism programs are subject to change as the faculty strives to keep the curriculum current with developments in the professional world and with new technologies and markets.

REQUIRED COMMUNICATION AND JOURNALISM CORE (All tracks): 21 CREDITS

- COM 605 Theories and Methods of Communication (3)
- CNJ 614 Media Law and Ethics Seminar (3)
- CEM 592 The Business of Modern Journalism (3)
- CEM 606 Writing and Reporting Across Platforms (3)
- CVJ 521 Seminar in Visual Storytelling (3)
- CVJ 522 Interaction Design and Information Visualization (3)
- CVJ 530 Programming for Interactivity (3)

Electronic Journalism Track

Students who are interested in working in television and multimedia operations as reporters, producers, writers, directors, editors, programmers, designers, and researchers or students interested in working in information graphics, information visualization, and social media may choose to specialize in Electronic Journalism. Graduates of the broadcast and multimedia journalism program tracks have gone on to work for organizations such as CNN, CBS, NBC, ABC, ESPN, the New York Times, CNN.com, MSNBC.com, Telemundo, Associated Press, TIME, National Geographic as well as local stations across the country and numerous non-government organizations, nonprofits and universities.

REQUIRED COURSES IN ADDITION TO THE CORE: 3 CREDITS

(only for those students pursuing a broadcast focus; others will complete an additional 3 credits of electives, listed below)
CEM 517  Television News Reporting

*Note:  This course is required for those students pursuing a television focus.

ELECTIVES:  9 CREDITS

Students must complete three additional elective courses, chosen with the approval of a faculty advisor. These courses may come from either within or outside of the School of Communication. It is highly recommended that students consider pursuing a professional internship for one of these electives. Elective options include (but are not limited to):

CEM 527  Television Newscast (3)
CEM 599  Advanced Projects and Directed Research (3)
CEM 609  Internship in Electronic Media Journalism (3)
CEM 630  Topics in Electronic Communication (3)
CEM 725  Journalism Internship (3)
CNJ 510  Comparative Media Systems (3)
CNJ 513  Computer-Assisted Reporting (3)
CNJ 515  Reporting and the Internet (3)
CNJ 523  Sports Reporting (3)
CNJ 544  Feature Writing (3)
CVJ 531  Database Journalism (3)
CVJ 550  3D Design and Graphics (3)
CVJ 541  Advanced Audio Video Narratives (3)
CVJ 551  Advanced Programming (3)
CVJ 519  Interactive Storytelling (3)

FINAL CAPSTONE PROJECT:  3 CREDITS

Students, in consultation with program faculty, will complete a final reporting project that reflects in-depth knowledge and analysis of a subject and professional competence in reporting it for the appropriate medium.

TOTAL CREDITS  = 36 CREDITS

*News and Feature Writing Track*

REQUIRED COURSES IN ADDITION TO THE CORE:  12 CREDITS

The News and Feature Writing track allows students the flexibility to design their own program based on their interests, with the advice and approval of a faculty advisor, who will develop a course plan with each student. Beyond the core courses, there are no required courses, though students must take at least 9 credits of the remaining 15 credits in courses that are writing and reporting intensive. Students may take up to a total of 6 credits in courses outside the School of Communication, in internships or as independent study projects, with the approval of a faculty advisor. An internship that involves intensive writing and reporting for a professional media organization and certain independent projects may under some circumstances count toward the required 9-credits of intensive writing and reporting.
Examples of electives (based on availability):

- CNJ 510       Comparative Media Systems (3)
- CNJ 511      Global Media (3)
- CNJ 513       Computer-Assisted Reporting (3)
- CNJ 515       Reporting and the Internet (3)
- CNJ 523       Sports Reporting (3)
- CNJ 544       Feature Writing (3)
- CNJ 599       Advanced Projects and Directed Research (3)
- CNJ 609       Graduate Internship in Journalism (3)
- CNJ 617       International Journalism (3)

Summer study abroad courses in journalism writing or graphic design may be available. Check the summer schedule for details.

FINAL (CAPSTONE) PROJECT: 3 CREDITS

Students, in consultation with program faculty, will complete a final reporting project that reflects in-depth knowledge and analysis of a subject and professional competence in reporting it for the appropriate medium.

TOTAL CREDITS = 36 CREDITS

**Latin American Studies and Journalism Dual M.A. Degrees**

Offered in the multi-cultural setting of Miami, a focal point for Caribbean Basin economic, political, immigration and communication flows, the School of Communication and College of Arts and Sciences have designed this joint degree program focusing on cross-cultural and international journalism. Students leave the university after four semesters and a summer with two M.A. degrees in hand, one in Journalism and the other in Latin American and Caribbean Studies. This specialized course of study is for students who wish to enter careers in journalism and communication specializing on the issues, economies, and peoples of Latin America and the Caribbean region. Sustainable economic development, immigration, social justice and human rights, the environment, international business, and U.S.-Latin American relations are just some of the areas in which students may specialize in an individually tailored course of study anchored by a core of fundamentals. Because this is a joint offering, 18 credits are shared between the two M.A. programs.

FIRST FALL SEMESTER REQUIRED COURSES (based on availability): 12 CREDITS

- CEM 606 Writing and Reporting Across Platforms (3)
- LAS 501 Interdisciplinarity in Latin American and Caribbean Studies (3)
- CVJ 521 Visual Story Telling (3)
- LAS 503 Program Seminar in Latin American Studies and Caribbean Studies (3)

FIRST SPRING SEMESTER REQUIRED COURSES (based on availability): 12 CREDITS

- COM 605 Theories and Methods of Communication (3)
- LAS 502 Interdisciplinary Research Methods (3)
- CNJ 614 Media Law and Ethics Seminar (3)
- LAS 503 Program Seminar in Latin American Studies and Caribbean Studies (3)
SUMMER SEMESTER REQUIRED COURSES (based on availability): 8 CREDITS
CEM 592  The Business of Modern Journalism (3)
LAS 505  Internship in Latin American and Caribbean Studies (5)

SECOND FALL SEMESTER REQUIRED COURSES (based on availability): 13 CREDITS
CVJ 530  Programming for Interactivity (3)
CVJ 522  Interaction Design and Information Visualization (3)
LAS 503  Program Seminar in Latin American Studies and Caribbean Studies (3)
Communication/Journalism Elective (3)
LAS 710  Pre-candidacy Thesis Credits (1)

SECOND SPRING SEMESTER REQUIRED COURSES (based on availability): 9 CREDITS
LAS 503  Program Seminar in Latin American Studies and Caribbean Studies (3)
Communication/Journalism Elective (3)
LAS 710  Pre-candidacy Thesis Credits (3)

TOTAL CREDITS (for the M.A. in Journalism) = 36 CREDITS

J.D./M.A. IN SCHOOL OF COMMUNICATION

This program allows students to earn a J.D. and an M.A. in Communication in 3 to 3½ years. The three School of Communication programs participating in the joint J.D./M.A. program are Communication Studies, Public Relations, and Journalism. This joint degree program will allow 9 J.D. credits to be applied to the M.A. degree and 6 M.A. credits to be applied to the J.D. degree, saving the student 15 credits between the two programs.

LAW SCHOOL REQUIREMENTS:

Nine Law School credits should come from the following courses:

Administrative Law
Communications law
Constitutional Law II
Copyright Law
First amendment Law
Intellectual Property Law
Internet Law
Mass Media Law

The Law School will accept 6 credits from the following School of Communication courses: (the courses selected will depend on the specific program, e.g., Journalism, Public Relations or Communication Studies, though following consultation with, and approval by, a faculty advisor, substitutions may be allowed)

COM 601 Theories of Communication (3)
COM 602 Methods of Communication Research (3)
COM 603 Qualitative Research Methodologies (3)
COM 605 Theories and Methods for Mass Communication Research (3)
CPR 620 Public Relations Fundamentals (3)
CNJ 611 Newswriting and Reporting Seminar (3) or
CEM 606 Writing and Reporting Across Platforms (3)
CEM 592 Special Topics in Electronic Media: The Business of Modern Journalism (3)

COMMUNICATION STUDIES (M.A.):

This program has three tracks, each with 9 credits of required courses and 18 credits of elective courses (plus 9 credits that will be transferred from the School of Law).

Communication Studies Track

This program focuses on developing a theoretical foundation with emphasis on applied communication.

REQUIRED COMMUNICATION CORE: (Non-Thesis Program) 9 CREDITS

COM 601 Theories of Communication (3)
COM 602 Methods of Communication Research (3)
COM 603 Qualitative Research Methodologies (3)

ELECTIVES: (Non-Thesis Program) 27 CREDITS

COM 615 Social Effects of Mass Communication (3)
COM 672 Seminar in Persuasive Communication (3)
COS 545 Intercultural Communication: International Perspectives (3)
COS 546 Intercultural Communication: Domestic Perspectives (3)
COS 560 The Executive Communicator (3)
COS 591 Advanced Special Topics in Communication Studies (3)
COS 599 Advanced Projects and Directed Research (3)
COS 674 Seminar in Interpersonal Communication (3)
COS 682 Seminar in Organizational Communication (3)
COS 684 Organizational Communication Audit Procedures (3)

Health Communication Track

This program focuses on human communication in a health-care context.

REQUIRED COMMUNICATION CORE: (Non-Thesis Programs) 9 CREDITS

COM 601 Theories of Communication (3)
COM 602 Methods of Communication Research (3)
COM 603 Qualitative Research Methodologies (3)
Intercultural Communication Track

This program focuses on the way communication functions in intercultural settings, how culture affects the communication process, and the reciprocal effects of intercultural perceptions on policy in the history of East-West relations.

REQUIRED COMMUNICATION CORE:  Non-Thesis Program  9 CREDITS

COM 601  Theories of Communication (3)
COM 602  Methods of Communication Research (3)
COM 603  Qualitative Research Methodologies (3)

ELECTIVES:  Non-Thesis Program  27 CREDITS

COS 545  Intercultural Communication: International Perspectives (3)
COS 546  Intercultural Communication: Domestic Perspectives (3)
COS 599  Advanced Projects and Directed Research (3)
COS 674  Seminar in Interpersonal Communication (3)
COS 682  Seminar in Organizational Communication (3)
COM 609  Special Topics (Social Change Communication Theory) (3)
COM 672  Seminar in Persuasive Communication (3)
HST 536  U.S. Health Care Crisis: Politics and Policies (3)
INS 570  Globalization and Health (3)
INS 670  Advanced Seminar in International Health (3)
NUR 550  Sociopolitical Dynamics of Health Issues (3)
SOC 632  Social Psychology of Health Illness (3)
SOC 635  Medical Sociology: Issues in Research and Theory (3)
SOC 691  Special Topics and Current Issues in Medical Sociology (3)

PUBLIC RELATIONS (M.A. – NON-THESIS)

This program is focused on public relations with 9 credits of required courses and 18 credits of elective courses (plus 9 credits that will be transferred from the School of Law.)

REQUIRED COMMUNICATION AND PUBLIC RELATIONS CORE:  9 CREDITS

COM 601  Theories of Communication (3)
CPR 620  Public Relations Fundamentals (3)
Select one of the following courses:

COM 602   Methods of Communication Research (3) or
COM 603   Qualitative Research Methodologies (3)

The 18 elective credits can be selected from the following courses:

CPR 517   Media Relations (3)
CPR 582   International Public Relations (3)
CPR 584   Public Relations Management (3)
CPR 625   Seminar in Public Relations Administration (3)
CPR 629   Public Relations Seminar: Fundraising in the Not-for-Profit Sector (3)
CPR 632   Seminar in Public Relations and Political Campaigns (3)
CPR 633   Seminar in Public Relations: Lobbying and Pressure Groups (3)
CPR 634   Seminar in Public Relations: Non-profit Groups and Governmental Institutions (3)
CPR 644   Seminar in Public Relations Ethics (3)
COM 615   Social Effects of Mass Communication (3)

JOURNALISM (M.A.)

The program in journalism has 18 credits of required courses and 9 credits of elective courses (plus 9 credits that will be transferred from the School of Law). Law students with particular areas of interest may consult with a faculty advisor in Journalism to request course substitutions.

REQUIRED COMMUNICATION AND JOURNALISM CORE:      18 CREDITS

COM 605   Theories and Methods of Communication (3)
CEM 592   The Business of Modern Journalism (3)
CEM 606   Writing and Reporting Across Platforms (3)
CVJ 521   Seminar in Visual Storytelling (3)
CVJ 522   Interaction Design and Information Visualization (3)
CVJ 530   Programming for Interactivity (3)

ELECTIVE OPTIONS:                        9 CREDITS

CEM 517   Television News Reporting (3)
CEM 527   Television Newscast (3)
CEM 599   Advanced Projects and Directed Research (3)
CEM 609   Internship in Electronic Media Journalism (3)
CEM 630   Topics in Electronic Communication (3)
CEM 725   Journalism Internship (3)
CNJ 510   Comparative Media Systems (3)
CNJ 511   Global Media (3)
CNJ 513   Computer-Assisted Reporting (3)
CNJ 515   Reporting and the Internet (3)
CNJ 523   Sports Reporting (3)
CNJ 544   Feature Writing (3)
CNJ 599   Advanced Projects and Directed Research (3)
CNJ 609   Graduate Internship in Journalism (3)
CNJ 617   International Journalism (3)
CVJ 519   Interactive Storytelling (3)
CVJ 531 Database Journalism (3)
CVJ 550 3D Design and Graphics (3)
CVJ 551 Advanced Programming (3)
CVJ 541 Advanced Audio Video Narratives (3)
CVJ 649 Team Multimedia Project (3)

**TOTAL CREDITS** = 36 CREDITS

NOTE: The requirements and electives within each track are subject to change.

**DEPARTMENT OF CINEMA AND INTERACTIVE MEDIA**

**MOTION PICTURES (M.F.A.)**

Students must complete a minimum of 66 credit hours with the approval of the faculty advisor. Of the 66 credit hours, at least 24 must be at or above the 600-level, and 12 credit hours at the 700-level must be earned for thesis work.

M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. During the second year of studies, candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credits hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies.

All M.F.A. students must demonstrate deeper, critical understanding of motion picture practice in diverse social and cultural contexts. To this purpose, and during their first year of studies, students are expected to produce a short motion picture project abroad. Students are also encouraged to participate in an internship during the summer of the first year or second year of studies.

This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

**FIRST YEAR:**

**REQUIRED FALL SEMESTER COURSE WORK:** 12 CREDITS

CMP 501 Principles of Aesthetics & Analysis (3)
CMP 510 Foundations of Screenwriting (3)
CMP 520 Cinematography (3)
CMP 560 Directing the Actor (3)

**REQUIRED SPRING SEMESTER COURSE WORK:** 12 CREDITS

CMP 530 Introduction to Editing (3)
CMP 511 Writing the Short Script (3)
CMP 570 Producing the Motion Picture (3)
CMP 550 Production Workshop I - Narrative (3)
SECOND YEAR:

FALL SEMESTER COURSE OFFERINGS: 12 CREDITS

CMP 650 Production Workshop II – Individual Projects (3)
CMP 610 Writing the Feature-length Screenplay (3)
CMP 612 Writing for Episodic Television (3)
CMP 670 The Business of Motion Pictures (3)
CMP 660 Directing Performance and Creative Collaboration (3)
CMP 603 Film Directors (3)

SPRING SEMESTER COURSE OFFERINGS: 12 CREDITS

CMP 611 Re-Writing the Feature Screenplay (3)
CMP 653 Documentary Production (3)
CMP 661 Directing the Camera (3)
CMP 640 Sound Design (3)
CMP 630 Advanced Editing (3)
CMP 607 National Cinemas (3)

THIRD YEAR:

RECOMMENDED FALL SEMESTER COURSE WORK: 9 CREDITS

CMP 715 MFA THESIS (6)
CMP 613 Advanced Writing for Episodic Television (3)
CMP 671 Production Management (3)

RECOMMENDED SPRING SEMESTER COURSE WORK: 9 CREDITS

CMP 715 MFA THESIS (6)
CMP 672 Marketing and Distribution (3)

No more than nine credit hours will be allowed for graduate internships and advanced projects and directed research. Courses may be taken, with program director approval, from other programs or departments within the University of Miami.

DOCTOR OF PHILOSOPHY IN COMMUNICATION

Students will not be admitted to the doctoral program until they have earned a master’s degree in communication or in another appropriate field.

Students must complete 57 credits of course work beyond the master’s degree. Twenty-four credits must be in courses at the 600-level. No transfer credits may count toward these 24 credits, and 12 of the 57 credits must be dissertation credits.

REQUIRED CORE COURSES: 21 CREDITS

COM 601 Theories of Communication (3)
COM 602 Methods of Communication Research (3)
COM 603 Qualitative Research Methodologies (3)
COM 604 Advanced Communication Research Methods (3)
COM 609 Special Topics in Communication (3)
COM 698 Doctoral Seminars (3)
Students must take a total of 9 credits in COM 609 and/or COM 698 or any combination of the two.

School of Communication Electives 9-12 CREDITS
Courses outside the School of Communication 12-15 CREDITS

Examinations

All School of Communication Ph.D. students will be given written and oral qualifying examinations following the conclusion of all course work prior to being admitted to candidacy for the Ph.D. degree. A majority of the examination committee must be members of the Graduate Faculty of the University. A failure to pass the qualifying exams will require the student to retake the exams and pass them within one calendar year. Any student who fails to be admitted to candidacy for the degree within this one-year period will be dismissed from the program.

Dissertation

Students must complete 12 dissertation credits. Students must proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been approved by the committee and accepted by the director of graduate studies and the Graduate School. The dissertation must be an investigation of a substantial scholarly topic. A final oral defense of the dissertation is required.

Requirements for Candidacy

Admission to Candidacy is based on:

a. GPA of at least 3.0
b. Approval from program director
c. Successful completion of qualifying examinations

Communication Course Listing

DEGREE PROGRAMS

MASTER OF SCIENCE IN EDUCATION (M.S.Ed)
The requirements for the degree of Master of Science in Education are described in a separate section.

SPECIALIST IN EDUCATION (Ed.S)
The requirements for the degree of Specialist in Education are described in a separate section.

DOCTOR OF PHILOSOPHY IN EDUCATION (Ph.D)
The Doctor of Philosophy degree with a major in education is designed to develop personnel competent to conduct research in a particular field of education or behavioral sciences.

Concentrations are offered in:
- exercise physiology (KIN),
- counseling psychology (EPS),
- language and literacy learning in multilingual settings (TAL),
- science, technology, engineering and mathematics (TAL),
- special education (TAL), and
- research, measurement, and evaluation (EPS).

DOCTOR OF EDUCATION (Ed.D)
The Doctor of Education degree is designed to develop personnel in education competent to utilize the results of research in practical situations.

Concentration is offered in:
- higher education leadership (EPS)

ADMISSION REQUIREMENTS

MASTER OF SCIENCE IN EDUCATION (M.S.Ed)
Admission to the Master of Science in Education is based on the following:

a. acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English must pass the Test of English as a Foreign Language (TOEFL) and the GRE. Teachers with at least three years full-time teaching experience may apply for a GRE waiver. If a GRE waiver is sought, a 3-page essay on an important educational topic is also required.
b. completion of a bachelor’s degree from an accredited institution;

c. acceptable undergraduate grade point average;

d. three letters of recommendation;

e. an interview (required by some programs);

f. personal characteristics relevant to the profession;

g. teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

Students must select a major from the areas offered. A School of Education and Human Development faculty advisor in the student’s major will be appointed to meet with the student to design a Program of Study/Course Sequence Plan. The Program of Study/Course Sequence Plan must be on file in the Senior Associate Dean’s Office by the end of the first semester of study or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

**SPECIALIST IN EDUCATION (Ed.S)**

Admission to the Specialist in Education is based on the recommendation of the faculty of the School of Education and Human Development. Among the factors to be considered are the following:

a. completion of a master’s degree with an outstanding record from an accredited institution;

b. adequacy of previous study in the field of education;

c. an appropriate period of successful teaching experience (TAL only);

d. acceptable scores on the Graduate Record Examination (GRE) or approval of a GRE waiver. If a GRE waiver is sought, a 3-page essay on an important educational topic is also required.

e. programs may require an interview.

f. submission of signed Student Responsibility Checklist and the Graduate Student Honor Code. These documents must be submitted to the Office of the Senior Associate Dean by the end of the student’s first semester of enrollment.

The Specialist in Education is a graduate degree requiring a minimum of 30 credit hours beyond a Master’s degree.

Applications for admission to the program are filed directly with the Graduate Admissions Office in the School of Education and Human Development. Further information may be secured by addressing the Department Chair of the specific program.
DOCTOR OF PHILOSOPHY (Ph.D)

Consideration for admission to the PhD program will be based on the following factors:

a. acceptable Graduate Record Exam (GRE) scores taken within the past five years; international applicants whose native language is not English must pass the Test of English for Foreign Languages (TOEFL);

b. professional experience relevant to degree program;

c. undergraduate grade point average of 3.0 or better (on a four point scale);

d. three letters of recommendation that address the applicant’s academic potential;

e. available student space in program;

f. admissions interview (optional for each program);

g. personal characteristics relevant to the profession;

h. For TAL: availability of faculty advisor willing to mentor the student.

i. For EPS, Counseling Ph.D.: Applications for doctoral study are due by December 10. Doctoral applications are reviewed once each year.

DOCTOR OF EDUCATION (Ed.D)

Consideration for admission to the doctoral program will be based on the following factors:

a. acceptable Graduate Record Exam (GRE) scores taken within the past five years; international applicants whose native language is not English must pass the Test of English for Foreign Languages (TOEFL);

b. professional experience relevant to degree program;

c. undergraduate grade point average of 3.0 or better (on a four point scale);

d. three letters of recommendation that address the applicant’s academic potential;

e. available student space in program;

f. admissions interview;

g. personal characteristics relevant to the profession;
DEPOSIT

Upon being admitted into any graduate program in the School of Education and Human Development, an applicant must verify her or his intention to attend through the MyUM system. In addition, the incoming student must submit a non-refundable deposit of $75. The deposit will be applied to the student’s tuition upon enrollment.

FINANCIAL ASSISTANCE

The following policies apply to all graduate programs in the School of Education and Human Development.

The School of Education and Human Development provides many forms of financial assistance for students enrolled in its graduate programs. These include tuition discounts, scholarships (including federally funded scholarships), tuition waivers, training fellowships, and other forms of help. Financial assistance is to be used only for enrollment in courses that define each student’s program. Students who are found to have enrolled in courses outside of their programs of study will be charged full tuition for those courses.

Teacher Tuition Discounts do not apply to PhD programs.

Financial assistance may not be applied to retaking of courses.

Financial assistance whose sources are outside of the School of Education and Human Development, for example Federal loans provided by the University of Miami, shall be governed by all applicable rules, regulations and policies. Specifically, many federal loans and grants have conditions limiting the programs and/or courses to which they may be applied. Some federal loans are restricted to graduate courses only; some fellowships, grants or traineeships may entail post-graduation employment commitments. Alternatively, private scholarships or fellowships may have their own conditions. Please be sure to ask about and to fully understand the conditions which govern whatever type of financial assistance you are offered.

DEGREE REQUIREMENTS

In addition to the formal academic requirements, the School of Education and Human Development requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education and Human Development reserves the right to dismiss any student who is academically or personally unwilling or unable to carry out the professional responsibilities of the respective professions for which he/she is being trained. Conduct which may be considered unprofessional may include, but is not limited to, research or professional misconduct, dishonesty, cheating, plagiarism, sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation, and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.
Students are required to maintain enrollment of at least one credit hour on a continuous basis during all fall and spring semesters until such time as they fulfill their graduate degree requirements. Note: Failure to do so may result in additional fees and/or inability to continue the program.

Also, students are required to be enrolled in the semester they graduate.

MASTER OF SCIENCE IN EDUCATION (M.S.Ed)

1. Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen (in the KIN Dept. or EPS Dept.), a maximum of six credits may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required.

2. Students must complete a minimum of thirty credits at the graduate level with an average of B and no grade lower than C-. Course substitutions will not apply toward graduation without the written approval of the chairperson of the Department and the Senior Associate Dean. Students are required to have Department and Senior Associate Dean’s approval prior to taking a course at another university.

3. Students enrolled in any Florida Department of Education approved program must fulfill any and all additional requirements (e.g., passing state teacher tests) specified by the program approval.

4. Students in counseling must complete the required “Personal Growth Experience” form.

All work towards the Master’s degree must be completed within six years of initial enrollment.

SPECIALIST IN EDUCATION (Ed.S)

The Specialist in Education is a degree independent of the Doctor of Philosophy in Education. Although there is normally some overlap in coursework, admission to a specialist program does not imply admission to a doctoral program.

1. A supervisory committee consisting of three faculty members in the student’s area of study will be appointed by the School of Education and Human Development.

2. Upon admission to the specialist program, a formal program of study is approved by the Supervisory Committee that consists of 3 faculty members.

3. A minimum of 60 graduate credits, (or 30 credits after completion of the Master’s program) is required. The program must include at least 30 graduate credits earned at the University of Miami and at least 18 graduate credits earned following admission to the specialist program. The specialist program of study is developed in consultation with the Supervisory Committee that consists of 3 faculty members (a chairperson and 2 other members).
4. A written examination, portfolio, or capstone project will be required. The written comprehensive examination will cover the student’s program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the Chairperson of the Specialist Supervisory Committee.

5. All specialist students must engage in teaching and/or research appropriate to their degree program.

All work for the degree of Specialist in Education must be completed within six years of initial enrollment.

**DOCTOR OF PHILOSOPHY IN EDUCATION (Ph.D)**

Upon admission to graduate study, a supervisory committee, consisting of four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

1. The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

2. The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Graduate Studies in the School of Education and Human Development.

3. The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The residence requirement is two full-time consecutive semesters of course work at the University of Miami.

The minimum total credits required beyond the Bachelor’s are 60, plus a minimum of 12 dissertation credits.

Fifteen credit hours of statistics and research methods are required as prescribed by the supervisory committee.

Students are required to complete all Ph. D requirements within 8 years of initial enrollment.

**DOCTOR OF EDUCATION (Ed.D)**

Upon admission to graduate study, a supervisory committee, consisting of three members, will be appointed by the School of Education and Human Development.

1. The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.
2. The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Academic Studies in the School of Education and Human Development.

3. The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The minimum total credits required beyond the bachelors are 60, including a minimum of 12 dissertation credits.

A supporting area consisting of at least 12 credits is required; the student must be qualified for admission to graduate status in this area, and receive approval for enrollment from the appropriate department and from the School of Education and Human Development.

A minimum of twelve credit hours of statistics and research methods are required as prescribed by the supervisory committee.

Students are required to complete all Ed. D requirements within 8 years of initial enrollment.

MASTER OF SCIENCE IN EDUCATION (M.S.Ed.)

COMMUNITY AND SOCIAL CHANGE

The Community and Social Change Master’s program is designed to prepare a new generation of creative leaders for the not-for-profit sector who are knowledgeable in the research, theories, and practice of individual and social well-being. The vision of the program is to be a hub for innovative and applied leadership in community well-being and social change. The mission of the program is to prepare globally aware leaders, researchers, and agents of change who create, inspire, and engage community organizations to foster well-being in diverse community settings. The program is designed to develop community leaders who can help understand and address the real challenges faced by local communities in a multi-cultural and global context. The program is designed to accommodate a variety of students by offering courses in a unique format that incorporates the following domains; 1) Core theory
and skill-building coursework, 2) Core research coursework, 3) Experiential field experience (practicum), and 4) Capstone experience (Comprehensive exam or major project).

COUNSELING

Programs offered in counseling and counseling psychology are characterized by intensive clinical supervision by faculty members in an on-campus clinic, by strengths in the areas of family systems and health psychology, and by the rich multi-ethnic composition of the community, students and clients.

The M.S.Ed. in counseling is a two year program which includes 54-60 credits of coursework and a comprehensive examination in one of three areas of specialization:

- Counseling and Research – This 54 credit program focuses on providing students with extensive grounding in the foundations for conducting research in the counseling field. Many students take this track in preparation for applying to doctoral programs in psychology. It provides an advanced level of research training as well as standard training for clinical work. It does not fulfill the academic requirements for licensure in Florida.

- Marriage and Family Therapy – This 60 credit program provides the academic and pre-degree supervision requirements for licensing as a Marriage and Family Therapist in the State of Florida.

- Mental Health Counseling – This 60 credit program provides the academic and pre-degree supervision requirements for licensing as a Mental Health Counselor in the State of Florida.

HIGHER EDUCATION ADMINISTRATION (Enrollment Management/Student Life and Development)

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management or Student Life and Development, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today’s challenges from a broad-based, highly informed perspective.

Also offered is a Certificate Program for working professionals who already have Master’s degrees and seek career-furthering credentials and skills.

- The Enrollment Management concentration (33 credits), the product of a unique collaboration between the School of Education and Human Development and the Division of Enrollments, integrates theory, research, teamwork, and effective communication. It is an interdisciplinary program, with courses also required in the School of Business Administration. Opportunities abound for integrating research and theory in daily practice.

- The Student Life and Development concentration (36 credits) provides knowledge and skills necessary to facilitate undergraduate students’
transition, adjustment and involvement in college, in ways that enhance their academic achievement and lead to persistence and graduation.

**RESEARCH, MEASUREMENT AND EVALUATION**

The objective of the RME programs (30 credits) is to train individuals to become experts in the research methodology, measurement, and applied statistics used in conducting applied research, evaluations, and assessments related to educational, psychological, and health outcomes. Graduates of the program have obtained skills concerning: (a) how to design research studies and evaluations, (b) what statistical and measurement analyses must be conducted to answer the desired research questions, and (c) how to analyze the collected data using appropriate statistical software. An emphasis of the program is on gaining experience in the application of the relevant methodologies using real-world data examples.

DOCTOR OF PHILOSOPHY (Ph.D.)

COUNSELING PSYCHOLOGY

The Counseling Psychology Program has been fully accredited by The American Psychological Association since 1995 and has a proud tradition of preparing students as scholars, clinicians and community leaders. Firmly committed to the foundational values of the discipline of counseling psychology, including its emphasis on prevention, optimal human development and the promotion of individual, family and community well-being, the program strives to prepare students who will make a difference in the world through research, scholarship and reflective practice. The mission of the program is to nurture the development of counseling psychology graduate students and faculty as reflective researchers and scientist-practitioners committed to promoting psychological well-being in a multicultural complex world.

RESEARCH, MEASUREMENT AND EVALUATION

The objective of the RME programs is to train individuals to become experts in the research methodology, measurement, and applied statistics used in conducting applied research, evaluations, and assessments related to educational, psychological, and health outcomes. Graduates of the program have obtained skills concerning: (a) how to design research studies and evaluations, (b) what statistical and measurement analyses must be conducted to answer the desired research questions, and (c) how to analyze the collected data using appropriate statistical software. An emphasis of the program is on gaining experience in the application of the relevant methodologies using real-world data examples.

DOCTOR OF EDUCATION (Ed.D.)

**HIGHER EDUCATION LEADERSHIP**

The Higher Education Leadership program, which offers a Doctor of Education degree (Ed.D.), is committed to preparing high-quality graduates for senior leadership positions in colleges and universities, state and federal agencies, and other educational organizations. The Ed.D program is guided by a practitioner-scholar model that combines theoretical offerings with application to practical higher education problems. Students focus on areas of special interest and choose dissertation projects that address issues confronting the contemporary higher education workplace.

The Executive Track is an innovative option in the Ed.D program explicitly designed to meet the needs of working professionals. Courses are offered on weekends, and a cohort design allows students to develop meaningful relationships, support one another, and learn from the diverse experiences of fellow educators. Ed.D students may also choose to take courses in a traditional weekly format.

An emphasis across the traditional and Executive Ed.D curriculum is on how theory and empirical evidence inform the administrative, organizational, and policy contexts within postsecondary education. Unique to the University of Miami’s Higher Education Leadership program curriculum is its component in Enrollment Management, a comprehensive strategy that promotes the seamless integration of administrative responsibilities to efficiently and effectively meet institutional needs and promote student success.
CERTIFICATES

DATA MANAGEMENT AND STATISTICAL ANALYSIS (a minimum of 4 courses)

This Certificate program is designed for individuals seeking the career-enhancing skills of data management and statistical analysis. The training provided in this certificate program will provide a foundation to individuals on how to organize and manage quantitative data using data management software and how to analyze the obtained data using relevant statistical analyses to answer a wide range of questions concerning the outcomes of interests.

HIGHER EDUCATION ADMINISTRATION/ENROLLMENT MANAGEMENT, Post Master’s Degree (a minimum of 4 courses)

The Certificate can be integrated into the Master’s Program in Higher Education Administration. It can be completed in addition to or after completion of a Master’s Program in Higher Education Administration, or a related field.

HIGHER EDUCATION ADMINISTRATION/STUDENT LIFE AND DEVELOPMENT, Post Master’s Degree (a minimum of 4 courses)

The Certificate can be integrated into the Master’s Program in Higher Education Administration. It can be completed in addition to or after completion of a Master’s Program in Higher Education Administration, or a related field.

LATINO MENTAL HEALTH COUNSELING (a minimum of 3 courses)

This Certificate requires previous graduate training. It can be acquired after graduation from the Masters Program in Counseling or can be integrated into the Doctoral Program in Counseling Psychology. It can be completed in addition to or after completion of a degree program in counseling, psychology or a related field.

  Language and Literacy Learning in Multilingual Settings,
  Science, Technology, Engineering and Mathematics, or Special Education

Contact the Department of Teaching and Learning for a program sheet and course listings for each of the following programs.

MASTER OF SCIENCE IN EDUCATION (M.S.Ed)

The Department of Teaching and Learning offers programs leading to a Master of Science in Education degree for individuals who are currently certified.

Note: Students in these programs must meet FLDOE requirements.

Periodically, the School of Education and Human Development offers various Advanced Professional Studies programs to specific groups of teachers (cohorts). The purpose of these programs is to prepare teachers to assume leadership roles in various disciplines and to enhance the teachers’ current knowledge of “best practices” in education. Each cohort’s curriculum is designed to meet that cohort’s primary mission. Successful completion of these programs leads to conferral of the Master’s of Education (M.S.Ed.) or Specialist in Education (Ed.S.) degree.

Applications are being accepted for admission to the Master of Science in Education in Advanced Professional Studies, both tracks: Early Childhood Special Education; Mathematics, Science and Technology for Resource Teachers in Elementary Schools; and Reading. Applicants must meet the admission requirements of the School of Education and Human Development. (See requirements for admission under Admission Requirements or www.education.miami.edu)
SPECIALIST IN EDUCATION (Ed.S)

The Ed.S. degree is available for teachers who wish to increase their proficiency in their chosen field.

Specializations for the degree are:
- Early Childhood Special Education
- Mathematics, Science and Technology for Resource Teachers in Elementary Schools

The program requires 30 additional credits beyond the Masters Degree (minimum) and is individually designed after admission. Some programs for cohorts of teachers feature lock-step curricula. These programs typically combine students pursuing M.S.Ed. degrees with those pursuing Ed.S. degrees. While all students in these programs follow the same curriculum, students pursuing Ed.S. degrees may receive additional or different assignments. Applicants for the Ed.S. must meet the requirements of the School of Education and Human Development. Additional information about the Specialist in Education is provided in a separate section.

Applications are being accepted for admission to the Specialist in Education in Early Childhood Special Education program and Mathematics, Science and Technology for Resource Teachers in Elementary Schools. Applicants must meet the admission requirements of the School of Education and Human Development. (See requirements for admission under Admission Requirements or www.education.miami.edu)

DOCTOR OF PHILOSOPHY (Ph.D)

The University of Miami Department of Teaching and Learning offers a Doctor of Philosophy Degree (Ph.D.) in the following areas of study:

- Language and Literacy Learning in Multilingual Settings,
- Special Education,
- Science, Technology, Engineering and Mathematics

An individual program of study is planned for each doctoral candidate based upon the student’s past academic and experiential background. This program of study is required to be completed by the end of the second semester of enrollment and submitted to the Office of the Senior Associate Dean. The overall goal of the doctoral program is to provide professional development for individuals interested in careers in teacher education and research in institutions of higher education. Applicants for admission to the doctoral program must meet the requirements of the School of Education and Human Development. Additional information about the Doctor of Philosophy is provided in a separate section.

Teaching and Learning Course Listing
DEGREE PROGRAMS

The College of Engineering offers courses of graduate study leading to the degrees of

Master of Science,
Master of Science in Architectural Engineering,
Master of Science in Biomedical Engineering,
Master of Science in Civil Engineering,
Master of Science in Electrical and Computer Engineering,
Master of Science in Industrial Engineering, and
Master of Science in Mechanical Engineering.

Ph.D. degrees are offered in the areas of

1. Biomedical Engineering,
2. Civil Engineering,
3. Electrical and Computer Engineering,
4. Ergonomics and Human Factors
5. Industrial Engineering, and

ADMISSION REQUIREMENTS

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or Ph.D. track. Admission guidelines for the various tracks are as follows. Please refer to program specific sections of the bulletin for more information with respect to admission and degree requirements.

• B.S. to M.S.:

In engineering, the master’s – not the bachelor’s – degree is the first professional degree, so all engineers should seek to obtain an M.S. degree. In order to facilitate the obtainment of an M.S. degree, the University of Miami (UM) College of Engineering (CoE) offers the M.S. degree through a number of possible venues or entry points, as summarized below. Every one of our M.S. degree programs requires 10 courses or 30 credit hours to complete; this can be typically undertaken in one, 9-month academic year (i.e., by enrolling in 15 credit hours per semester).
General Admission Requirements:

1. A B.S. degree from an accredited program.
2. Typically a cumulative grade point average of 3.0 on a 4.0 scale.
3. Typically a GRE score of 1000 or higher (verbal + quantitative).
4. Typically for international students a TOEFL PBT score of 550 or higher, or a TOEFL iBT score of 80 or higher, or an IELTS score of 6.5 or higher.

Some students may be required to take additional pre-requisite coursework, depending on the nature and content of their B.S. degree. A maximum of 6 credit hours above and beyond those required for a B.S. degree can be transferred into our 30-credit hour M.S. program. Additionally, qualified students may apply for a partial tuition scholarship (which at present is averaging about 25% of the cost). More detailed information can be found in the Prospective Graduate Students section of our website at www.miami.edu/coe.

<table>
<thead>

<th>UM Entry Point</th>
<th>Typical Duration</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Freshman Year</td>
<td>4 + 1 years</td>
<td>Students enter UM CoE as a freshman and apply by their junior year to obtain a joint B.S./M.S. degree after 5 years.</td>
</tr>
<tr>
<td>2. Transfer Year</td>
<td>2 + 2 + 1 years</td>
<td>Students enter UM CoE as a transfer from another accredited program after 2 years and apply by their junior year to obtain a joint B.S./M.S. degree after 3 years.</td>
</tr>
<tr>
<td>3. Summer Semester Before M.S.</td>
<td>4’ + 1 year</td>
<td>International students complete their B.S. capstone project at UM CoE as exchange students, then receive their B.S. from their home institution and transition – without leaving U.S. – into the M.S. program, beginning in the Fall semester.</td>
</tr>
<tr>
<td>4. First M.S. Semester On-Campus</td>
<td>1 year</td>
<td>Students enter M.S. program either after receiving a B.S. or after being in the workforce following their B.S. degree.</td>
</tr>
<tr>
<td>5. First M.S. Semester Off-Campus</td>
<td>1.5 to 3 years</td>
<td>Working professionals enter a specially customized M.S. degree program at an off-campus location.</td>
</tr>
<tr>
<td>6. First Semester of An Intensive English Program (IEP)</td>
<td>IEP + 1.5 years (in depth detail of program found on reverse of this page)</td>
<td>International students with a B.S. in engineering who are unable to meet TOEFL/IELTS requirements and have a minimum 550 or higher score on the quantitative section of the GRE may enter into the IEP and, assuming a minimum score of 450 on TOEFL, must take one required M.S. course per IEP semester; if they graduate from IEP and their M.S. course grades average 3.0 or better, they will not be required to retake the GRE before continuing – as a full-time student – in their chosen M.S. program.</td>
</tr>
</tbody>
</table>
University of Miami Bulletin, 2012-2013
Graduate, College of Engineering

- B.S. to Ph.D.: Direct admission to the Ph.D. track by students holding B.S. degrees is limited to students with exceptional credentials. These credentials typically include a minimum GPA of 3.5 on a 4.0 scale and a minimum GRE of 1,200 (verbal plus quantitative). After completion of the Departmental M.S. requirements, students enrolled in the direct B.S. to Ph.D. track may apply for an M.S. degree.

- M.S. to Ph.D.: Criteria for admission into the Ph.D. program for students with an appropriate M.S. degree include a minimum GPA of 3.5 on a 4.0 scale within their M.S. degree program and a minimum GRE of 1,100 (verbal plus quantitative).

The College offers graduate programs leading to degrees in both traditional and interdisciplinary areas of study. The primary focus of the College lies in those areas and problems that cross traditional lines. Given the interdisciplinary nature of programs, flexibility is provided in course selection which allows each student to pursue a program especially tailored to the goals of the individual. Given the strengths of the University, graduate programs are offered in conjunction with other schools or units. These programs include:

- Biomedical Engineering in conjunction with the School of Medicine
- Engineering Management Dual M.S. in Industrial Engineering and M.B.A. in conjunction with the School of Business Administration
- M.S. program in Management of Technology in conjunction with the School of Business Administration
- M.S. in Environmental Health and Safety in conjunction with the School of Medicine.

The M.S. and Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

Further details on the various College of Engineering areas of specialization are given under the Departmental and Program headings that follow this section.

Students applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant’s abilities and background.

Students who hold a bachelor’s degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

A student’s overall program is planned by the student and the student’s advisory committee. Requirements for the M.S. thesis and non-thesis options (not available in all areas of specialization) are shown below.

Accepted M.S. applicants can apply and be considered on a competitive basis for partial tuition scholarships. Need based aid also can be awarded, as determined through the financial aid process. A minimum graduate GPA of 3.0 must be maintained in order to maintain satisfactory progress.
Accepted Ph.D. applicants financial assistance is available in the form of fellowships, partial tuition scholarships, teaching and research assistantships, and graduate cooperative assistantships combining study and work assignments with private engineering and architectural firms and government agencies. A minimum graduate GPA of 3.3 must be maintained in order to maintain satisfactory progress.

Financial support is provided predominantly to students pursuing Ph.D. degrees.

For further information, contact David T. Poole, Director of Admission, College of Engineering at dtpoole@miami.edu or 305-284-4773.

DEGREE REQUIREMENTS

Requirements for the Master of Science Degree (thesis option):

- An approved integrated program with a minimum of 30 semester credits with an average grade of B or better and no grade below C.
- At least six (6) course credits must be at the 600-level.
- Six credits of the required 30 must be earned in thesis work.
- An oral examination in defense of the thesis.

Requirements for the Master of Science Degree (non-thesis option):

- An approved integrated program with a minimum of 30 semester credits with an average grade of B or better and no grade below C.
- At least twelve (12) of the course credits must be at the 600 level.
- In most departments a 3-credit graduating project is required.

Requirements for the Doctor of Philosophy Degree:

- The programs leading to the degree of Doctor of Philosophy comply in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and dissertation.
- Applicants for admission to the Ph.D. program will be expected to have superior records in their M.S. and B.S. degree programs, well above average scores on the Graduate Record Examination, and strong letters of recommendation.
- At least 18 credits in courses must be taken beyond the requirements for the M.S. degree of which 6 credits must be at the 600 level.
- All candidates for the doctorate are expected to complete an appropriate integrated program of studies in preparation for the comprehensive Qualifying Examination.
- Students are expected to take their qualifying exams during the first year of enrollment. Admission to candidacy across College of Engineering Departments includes passing the qualifying exam and successful defense of a proposal for research.
Minimum of one year beyond admission to candidacy is usually necessary for the completion of an acceptable dissertation (12 credits or more), whereupon the student is then expected to defend their Ph.D. thesis during the Final Oral Examination.

Departments may have requirements in addition to the above general requirements for their own graduate programs.

For further information, contact Office of Admission, College of Engineering (David Poole, dtpoole@miami.edu or 305-284-4773).

POSTGRADUATE CERTIFICATE PROGRAM

A Postgraduate Certificate Program is available requiring the completion of a minimum of 15 semester hours of individually planned advanced course work in an area of engineering specialization, or interdisciplinary study.

Course sequences culminate at an advanced level, but may begin at a basic level if a new area of specialization is to be undertaken.

The Program must be completed with a grade average of at least C, within a period of five calendar years from the date of enrollment.

No transfer credits will be accepted. International students requiring a student visa must be in a degree program, and cannot obtain a student visa for the Certificate Program; but international students with certain other types of visas may enroll in the Program.

Basic admission requirement for the Program is a bachelor’s degree in a recognized field of engineering or registration as a Professional Engineer by examination.

Students demonstrating marked ability in the Program may be encouraged to apply for admission to study for the Master’s Degree, and may apply up to six credits toward the M.S. degree.

Customized Engineering Master’s Program

The College of Engineering at the University of Miami has a unique graduate admission option for students wishing to be accepted into graduate studies to pursue a Master of Science degree in Engineering, but who are unable to demonstrate acceptable levels of English proficiency at the time of their application for admission. The IEP+ 1.5 Year Program is focused on helping non-native English applicants to obtain a Master of Science degree in Engineering.

Prospective students must complete and submit an application for graduate admission into the College of Engineering, providing all supporting documents as outlined in our graduate admission application and meet the following criteria:

1. Applicants must be academically admissible into graduate studies with appropriate academic credentials. They must have a Bachelor of Science degree in Engineering, or its equivalent, or be a candidate for one at the time of application.
2. Applicants must score a 550 or higher on the quantitative portion of the GRE.
3. Applicants must score a 450 or higher on TOEFL PBT (paper based test), or a 133 on TOEFL CBT (computer based test), or 45 on TOEFL iBT (internet based test) or 4.5 on ILETS (International English Language Testing System).

Students who are accepted under these criteria will enroll in our Intensive English Program (IEP) for a designated time, typically a year. The actual length of time a student will spend in IEP will be determined through a placement exam given once the student has arrived on the University of Miami Coral Gables campus. Students will also be required to enroll in a minimum of one graduate engineering course each semester while enrolled in IEP. Selection of these courses will be done after academic advising has taken place with our Associate Dean for Academics for students in this program.

Full-time enrollment in the M.S. portion of the IEP/M.S. Program will commence when the student has successfully completed Level Five of IEP and has completed two or more approved engineering courses, with a cumulative GPA of 3.0 or higher. Depending on the student’s background, the M.S. degree will require the taking of 30 or more credit hours – corresponding to 10 or more 3-credit courses – and the achievement of a cumulative GPA of 3.0 or higher in the taken courses. Assuming a 30-credit M.S. program, it is anticipated that the IEP and 6 credit hours will be completed in the first year, 18 credit hours the second year (9 credit hours in the Fall and 9 credit hours in the Spring) and a minimum of 6 credit hours in Fall of the third year; thus, the duration is expected to be IEP+1.5 years.

The fixed cost per student, entering in the Fall 2011 semester, for this specially designed IEP + 1.5 year IEP/M.S. program is $75,000 (U.S.D.). This cost covers the following: tuition (IEP and up to 36 graduate credit hours), Activity fee, Athletic fee, University fee and Wellness Center fee. Billing will be divided into three annual payments as follows: $35,000 at the beginning of year one, $25,000 at the beginning of year two and $15,000 at the beginning of year three. If you have any questions about the CEM Program, please contact David T. Poole, Director of Admission, College of Engineering at dtpoole@miami.edu or 305-284-4773 or Associate Dean for Academics, Dr. Shihab Asfour at sasfour@miami.edu.

**Ph.D. Course Exchange with Florida International University**

University of Miami Ph.D. students are eligible to enroll in courses at Florida International University for a maximum of 6 credits. Enrollment in FIU courses requires approval through the student’s program of study committee. See FIU/UM Ph.D. exchange section of the Graduate School section of the bulletin for more details.
BIOMEDICAL ENGINEERING - Dept. Code: BME

DEGREE PROGRAMS
The Department of Biomedical Engineering offers graduate programs leading to the degrees of Master of Science (thesis or non-thesis option) and Doctor of Philosophy in Biomedical Engineering. A 5-year BS/MS option is available for qualified undergraduate students enrolled within the Department.

AREAS OF RESEARCH
The areas of research in Biomedical Engineering include:
1. Biomedical instrumentation and devices
2. Medical imaging
3. Applications of computers to diagnostic and therapeutic systems
4. Biomechanics, biofluid dynamics, hemodynamics
5. Biomaterials, Tissue and cellular engineering
6. Biomedical signal and image processing
7. Rehabilitation and neural engineering
8. Brain-computer interface
9. Biomedical optics and lasers
10. Medical physics and engineering

ADMISSION REQUIREMENTS
A. The Department of Biomedical Engineering uses the same general graduate admission requirements as the College of Engineering.
B. Students who hold a Bachelor's degree in a field other than engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate courses, in addition to the regular requirements for the graduate degree.

MASTER OF SCIENCE
A. The Master of Science degree offers the graduate student an opportunity to obtain advanced training in selected areas of biomedical engineering and to begin independent research.
B. General requirements for the M.S. degree are listed in this Bulletin under Engineering and under Master's Degree-General.
C. Both a 30-credit thesis option and a 30 credit non-thesis option are available.
D. There is also a 5-year BS/MS option available for qualified undergraduate students enrolled within the Department.
E. The department admits four types of students to its MS program:
1. Students with BS degrees in Biomedical Engineering or similar engineering fields
2. Students with BS degrees in Electrical, Computer, Mechanical, Chemical, or similar engineering fields
3. Students with BS degrees in Physics, Mathematics, Computer Science, Chemistry, Biology or similar fields
4. Students with MD or similar degrees

F. Students in the last two groups are generally given conditional admission and required to take additional undergraduate courses in engineering, mathematics and science depending on their previous course work as decided by the graduate program director and the designated advisor.

G. There are three paths to earn a Master of Science degree in Biomedical Engineering:

1. The Thesis Option requires a minimum of 30 credits beyond the BS degree. These must include a minimum of 6 thesis credits (BME 710) and the completion of at least two appropriate courses at the 600 level.
2. The Non-Thesis Option requires a minimum of 30 credits beyond the BS degree. These must include at least 3 credits for an independent design or research project for which the student enrolls in BME 605. In addition, at least three appropriate courses at the 600 level must be completed.
3. The BS/MS Dual degree Program (see separate section below).

H. The student’s overall graduate program is planned by the student, advisor, graduate program director and the thesis committee (for the thesis option).

1. The thesis committee consists of a minimum of 3 members.
2. Two members, including the chair of the committee, shall be faculty members from the BME Department (primary or secondary), and one member must be from outside the Department.
3. Outside members of the thesis committee can include part-time faculty that teach within the Department.
4. One of the committee members must be a member of the Graduate Faculty.

I. The three courses of the Unified Medical Sciences sequence (BME 501, 502 and 503) were designed to apprise the engineer of the basic knowledge in the life sciences necessary to work in the broad field of biomedical engineering.

1. MS Students coming from traditional engineering field with no biology/medicine backgrounds are required to complete all of the three Unified Medical Sciences courses.
2. Other MS students are required to take at least two of the three courses unless the student holds a degree in medicine (MD, DO or equivalent) or an advanced degree (or its equivalent) in the life sciences.
3. Each such exception requires the approval of the department’s faculty for the course of concern.
BS/MS 5-YEAR PROGRAM

This program is available only to qualified undergraduate students enrolled within the Department as described in the Undergraduate Bulletin.

A. This program permits students to receive a baccalaureate degree (BSBE) and a Master of Science (MS) degree in five years.

B. The two degrees are awarded simultaneously when the combined requirements have been met for both degrees.

C. Qualified students who want to be enrolled in this program must apply before the end of their junior year and meet all pertinent graduate school and College of Engineering requirements.

D. In lieu of the 6-credit thesis requirement, the participants complete either one significant design project or two shorter duration projects by registering for BME 605 and 606.

E. The design project(s) is (are) monitored by at least two mentors, one of the mentors must be a member of the primary faculty in the department.

F. The project(s) is (are) completed by the acceptance of a verbal presentation and a written report by the student’s mentors.

DOCTOR OF PHILOSOPHY

A. The goal of the PhD program in Biomedical Engineering at the University of Miami is to prepare graduates for careers in academia, industrial research and development, or government. The program is designed to train students for advanced independent research and technical innovation in biomedical engineering.

B. The general requirements for award of the Doctor of Philosophy degree include:

1. Completion of a minimum of 60 credits beyond the Bachelor of Science degree.
2. Satisfactory completion of a qualifying examination.
3. The submission, oral defense, and approval of a dissertation proposal.
4. The submission and oral defense and approval of a dissertation.

There are no foreign language competency requirements for the PhD in biomedical engineering.

C. The requirements for admission to the PhD program in biomedical engineering usually include:

1. In general, the department admits three types of students to its PhD program:
   a) Students with MS degrees in Biomedical Engineering or related science and engineering fields.
   b) Students with MD degrees with undergraduate degrees in sciences or engineering.
   c) Highly qualified students with BS degrees in engineering or sciences (direct BS to PhD track).

2. The general requirements for admission of BS students to the doctoral degree program are consistent with the admission requirements of the College of Engineering.
3. Students in M.S. thesis or non-thesis tracks who wish to pursue a doctoral degree can transfer to the doctoral degree program without completing a thesis or project under the following general requirements:
   a) A letter of support by a faculty member who agrees to serve as the student’s Ph.D. dissertation advisor.
   b) Completion of an application for admission to the PhD program, which will be reviewed by the Department’s Graduate Admissions Committee, using the standard admission criteria for the doctoral program.

4. Regulations concerning admission, course requirements, residence requirements, qualifying and final examinations, and dissertation are listed in this Bulletin under Engineering and Doctor of Philosophy.

D. The doctoral program in biomedical engineering requires each student to pass a departmental qualifying screening examination.

1. The screening examination consists of three written examinations on each of the following broad subjects:
   a) basic engineering;
   b) applied mathematics and computer science; and
   c) applied physiology and medical science.

2. These examinations are usually offered once or twice each year.

3. The examination must be taken the first time it is scheduled after completion of the first two semesters.

4. A student may repeat once any or all parts of the examination where the results were found unsatisfactory.

5. Students admitted to the doctoral program with a BS degree that do not pass the qualifying examination may complete the MS degree.

E. Following the successful completion of the screening examination, a PhD Supervisory Committee is appointed by the Chairperson of the Department of Biomedical Engineering. The role of the Supervisory Committee is to administer the dissertation proposal, and to make up any additional written or oral examination deemed necessary to complete the qualifying examination.

1. The supervisory committee is composed of a minimum of 5 members.

2. Three members, including the chair, shall be members of the Graduate Faculty, and one member shall be from outside the Department.

3. A minimum of three members, including the chair of the committee, must be primary faculty members from the BME Department.

4. A research mentor who is not a Primary Faculty member of the Department of Biomedical Engineering, can serve as Co-Chair of the Supervisory Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering.

5. A written dissertation proposal is submitted along with an oral presentation to the supervisory committee.
6. Acceptance of the dissertation proposal in combination with other examinations as determined by the committee to assure the qualifications of the student for the doctorate leads to candidacy for the Ph.D.

F. When the student is admitted to candidacy, a dissertation committee is formed.
   1. The Dissertation Committee is nominated by the Department, and is approved and appointed by the Dean of the Graduate School.
   2. In the Department of Biomedical Engineering, the Dissertation Committee is generally the same as the Supervisory Committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation.
   3. The composition of the Dissertation Committee is subject to the same rules as for the Supervisory Committee (see above).
   4. The duties of the Dissertation Committee are:
      a) to consult with and to advise students on their research;
      b) to meet, at intervals, to review progress and expected results;
      c) to read and comment upon the draft dissertation;
      d) to meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

G. Successful defense of the dissertation leads to the award of the PhD degree.

H. All students in the BME Doctor of Philosophy program are required to complete the following course or credit requirements:
   1. At least two of the following three courses: BME 501, BME 502, BME 503.
      a. Students, who have completed these courses or similar coursework in their previous MS programs, may substitute technical electives for this requirement.
      b. Students in the direct BS to PhD track and students with no prior exposure to biology/medicine are required to complete all three courses
      c. This requirement can only be waived for students holding MD degrees.
   2. A zero-credit Biomedical Engineering Seminar course (BME 680). This requirement is not waived, even if the student has taken this course in his/her MS program.
   3. Students admitted with an MS degree must complete at least 18 credits of graduate level course work followed by at least 12 credits of dissertation work (BME 730 before admission to candidacy or BME 740 after admission to candidacy). A minimum of 6 course credits must be at the 600 level.
   4. Students admitted with a BS degree must complete at least 42 credits of graduate level course work followed by at least 18 credits of dissertation work (BME 730 before admission to candidacy or BME 740 after admission to candidacy). A minimum of 12 course credits must be at the 600 level.
• 500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students and seniors with graduate standing.

Biomedical Engineering Course Listing
CIVIL, ARCHITECTURAL, AND ENVIRONMENTAL ENGINEERING -
Dept. Code: CAE

DEGREE PROGRAMS

The Department of Civil, Architectural, and Environmental Engineering offers graduate programs leading to the degrees of:

- Master of Science in Architectural Engineering
- Master of Science in Civil Engineering
- Doctor of Philosophy in Civil Engineering

The specialty areas of study in Civil Engineering include:

- structural engineering and structural materials
- environmental engineering
- water-resources engineering

The specialty areas of study in Architectural Engineering include:

- integrated building systems
- MEP systems

In all fields of specialization, up to one-half of the required course work for the selected degree may be taken outside of the Department.

ADMISSION REQUIREMENTS

All students applying to the graduate program are required to submit GRE scores and three letters of recommendation. Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements.

A. International students should consult the section on admissions.
B. Students who hold a bachelor’s degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

MASTER OF SCIENCE

A. Requirements for the M.S. degree are listed in this Bulletin under Engineering and under Master’s Degree General.
B. A total of 6 credits of transfer and/or exchange coursework not counted towards the student’s bachelor’s degree may be taken at another institution and used to satisfy requirements for the M.S. degree.
C. Both a thesis option and a non-thesis option are available.
D. There is also a 5-year B.S./M.S. option available for qualified undergraduate students enrolled within the Department.
E. Of 30 required credits, up to 6 may be thesis research. At least 12 credits must be at the 600 level, of which up to 6 credits can be thesis research, independent study, or, for 5-year BS-MS candidates, Capstone Design.

F. The student and an advisory committee plan the student’s overall program.
   1. The advisory committee consists of a minimum of 3 members.
   2. The chair of the committee shall be a full-time faculty member from the CAE Department, one member must be from outside the Department and hold a Ph.D., and one member other than the chair must be either a full-time or part-time member of the Department.
   3. One of the committee members must be a member of the Graduate Faculty.

DOCTOR OF PHILOSOPHY

A. Regulations concerning admission, course requirements, residence requirements, qualifying and final examinations, and dissertation are listed in this Bulletin under Engineering and Doctor of Philosophy.

B. A total of 6 credits of transfer and/or exchange coursework beyond those counted towards the student’s bachelor’s and master’s degrees may be taken at another institution and used to satisfy requirements for the Ph.D. degree. Students entering without a previous master’s degree may use a total of 12 such credits to satisfy requirements for the Ph.D.

C. For students with a previous master’s degree, 18 credits of coursework are required, six of which must be at the 600 level in courses other than independent study. For students entering without a previous master’s degree, 42 credits of coursework are required, 12 of which must be at the 600 level in courses other than independent study.

D. The student and a supervisory committee plan the student’s overall program.

E. A separate dissertation committee may be formed to oversee the progress of the dissertation but, in most instances, the student’s supervisory committee also serves as the dissertation committee.

F. The supervisory/dissertation committee shall be composed of a minimum of 4 members.
   1. Three members, including the chair, shall be members of the Graduate Faculty, and one member shall be from outside the Department and hold a Ph.D.
   2. A minimum of two members, including the chair of the committee, must be full-time members from the CAE Department.

RESEARCH OPPORTUNITIES - CIVIL/ARCHITECTURAL ENGINEERING

- Current research activities in the Department include properties of concrete materials, such as cellular concrete, composite structural systems, fiber-reinforced concrete, modeling and simulation of engineering materials, multi-scale modeling of materials, fracture mechanics, structural steel behavior, structural health monitoring, structural repair and rehabilitation, energy, indoor air quality, heating, ventilating and air conditioning (HVAC), building material emissions and sorption, air cleaning using photocatalytic or other oxidizing technologies, environmentally compatible construction materials and systems, life-cycle building systems integration, and sustainable affordable housing.
RESEARCH OPPORTUNITIES - ENVIRONMENTAL ENGINEERING

- Current research activities in the Department include development of new physicochemical water and wastewater treatment processes, potable wastewater reuse, solid and hazardous waste management, health and environmental risk analysis, environmental/economic planning for sustainable development, hazardous waste remediation, environmental health studies, water quality studies, ground-water, surface-water, and contaminant-transport processes, hydrologic processes, water resources planning and management, and water policy.

**DEGREE PROGRAMS**

**I. MASTER OF SCIENCE IN ELECTRICAL AND COMPUTER ENGINEERING**

A. The Electrical and Computer Engineering Department offers the Degree of Master of Science in Electrical and Computer Engineering with 24 course credits and 6 thesis credits or 30 course credits and no thesis.

**II. THE FIVE-YEAR B.S.E.E. - M.S.E.C.E DUAL DEGREE PROGRAM**

A. This is a structured and integrated program with a minimum of 158 approved credits including two required courses EEN 615 & 616 as well as 12 Elective courses defined as follows:

1. At least one Analysis elective courses;
2. At least two Computer Engineering elective courses;
3. At least six EEN Elective Courses;
4. An additional three EEN or Technical Elective courses;
   
   Elective courses are to be selected in consultation with the advisor.

**III. THE FIVE-YEAR B.S.CP.E. - M.S.E.C.E DUAL DEGREE PROGRAM:**

A. This Dual Degree Program requires ten additional courses and replaces three technical elective courses as well as one senior design course currently required under the B.S.Cp.E. Degree.

These fourteen courses are specified as follows:

1. Three required courses EEN 368, 615, 616
2. select two hardware courses from: EEN 532, 542, 614
3. select two software courses from: EEN 511, 512, 513, 537, 572
4. select four courses from the following:
IV.  THE FIVE-YEAR B.S.I.T.S.E. - M.S.E.C.E DUAL DEGREE PROGRAM:
   A. This is a structured and integrated program with a minimum of 159 approved credits. These include:
      1. Thirty credits of required courses as follows:
         EEN 307, 315, 316, 336, 404, 454/455, 521, 562, 563, 568, 615, 616;
      2. Fifteen credits selected from the following elective courses:
         a) Six credits of EEN elective courses selected from the following list: EEN 511, 512, 513, 514, 532, 536, 538, 540, 542, 553, 562, 563, 564, 565, 614, 638, 671
         b) Nine credits of Technical Electives selected in consultation with the academic advisor

V.  DOCTOR OF PHILOSOPHY
   A. The program leading to the degree of Doctor of Philosophy complies in full with the requirements of the Graduate School concerning admission, residence requirements, qualifying examinations and the dissertation.
   B. Course requirements for the Ph.D. are described under the College of Engineering section.
   C. There is no foreign language requirement.
   D. The Ph.D. program in the Department will concentrate on a variety of emphasis areas for study and research.

500-level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

Electrical and Computer Engineering Course Listing
INDUSTRIAL ENGINEERING - Dept. Code: IEN

DEGREE PROGRAMS

I. Department Mission Statement
The Department of Industrial Engineering mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

II. MASTER OF SCIENCE
A. The Master of Science degree in Industrial Engineering includes the following areas of concentration:
   1. Engineering Management
   2. Ergonomics and Human Factors
   3. Health Care Systems
   4. Management of Technology
   5. Manufacturing Engineering
   6. Occupational Health and Safety
   7. Operations Research
   8. Productivity Engineering
   9. Quality
B. Students (other than University of Miami graduates) applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant’s abilities and background. Students who hold a bachelor’s degree in a field other than Industrial Engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree. A student’s overall program is planned by the student and the Graduate Advisor.
C. Requirements for the Master of Science Degree (both thesis and non-thesis option):
   1. An approved integrated program with a minimum of 30 semester credits with a 3.0 average or better on all credits attempted and no single grade below “C” at the University of Miami while a graduate student.
   2. At least twelve (12) course credits must be at the 600 level.

THESIS OPTION (30 Credits)
5 Common Core Courses  15 Credits
3 Elective Courses  9 Credits
Master’s Thesis (IEN 710)  6 Credits

TOTAL 30 Credits
NON-THESIS OPTION (30 Credits)

5 Common Core Courses  15 Credits
4 Elective Courses       12 Credits
Master's Project (IEN 694)  3 Credits

**TOTAL 30 Credits**

(Note: All courses are 3 credit hours unless otherwise indicated)

COMMON CORE COURSES

IEN 612 - Design of Experiments
IEN 642 – Linear Programming and Extensions (or advanced level Operations Research course)
IEN 657 - Ergonomics and Occupational Biomechanics (or advanced level Human Factors course)
IEN 664 - Supply Chain Management or IEN 572 Management of Technological Innovation (or advanced level Management Course)
IEN 665 - Advanced Production Systems

Notes:

i. In addition to the above required courses, the student will have to take other graduate level elective courses to fulfill the degree requirements. A list of approved electives is maintained by the Graduate Advisor in the Department of Industrial Engineering. Substitution of courses is allowed, but must be approved by the Graduate Advisor and the Department Chairman.

ii. 500-level courses are open to advanced undergraduates and to graduate students; 600-level courses are open only to graduate students.

iii. 500-level and 600-level courses are also open to qualified graduate students majoring in other disciplines.

D. The Department of Industrial Engineering offers a Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering Program (BSIE/MSIE Program).

1. This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering.

2. The special conditions for this Five-Year BSIE/MSIE Program are as follows:
   a) The student must declare his/her intent to participate before the end of their Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
b) A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.

c) To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.

d) The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all requirements are satisfied.

E. An interdisciplinary M.S. degree program in Environmental Health and Safety and an M.S. degree program in Occupational Ergonomics and Safety are offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student’s interests and career objectives.

F. The Department of Industrial Engineering, in cooperation with the School of Business Administration, offers three programs:
   1. a dual MSIE/MBA weekend executive program,
   2. an M.S. in Management of Technology,
   3. an M.S. in Quality Management.
For more details on these programs, contact the Department of Industrial Engineering.

III. DOCTOR OF PHILOSOPHY
   A. The Department offers a Ph.D. in Industrial Engineering for students with a background in engineering and a Ph.D. in Ergonomics and Human Factors for students with a background in engineering and/or related sciences.

   B. General requirements for award of the Doctor of Philosophy degree include:
      1. Sixty credits beyond the baccalaureate degree are the minimum requirement for the Ph.D.
      2. At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credits must be taken.

   C. Course work requirements depend on the student’s background, and are established by the Graduate Advisor and the Department Chairman.

   D. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.

   E. Once a student has completed all course and required research credits, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.

   F. A written qualifying examination is to be taken by each doctoral degree candidate during the first year of graduate work. The department may specify that the student must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the Graduate Advisor notifies the
Department Chairman that the student has passed or failed the examination. A student who fails the examination may be permitted to retake it, with the permission of the Graduate Advisor and the Chairman. Qualifying examinations normally will not be given during the summer months. The applicant must hold a 3.0 average on all credits attempted with no single grade below "C" at the University of Miami while a graduate student.

G. Each student in the Ph.D. program in Industrial Engineering has to take and pass 5 qualifying exams in the following areas: Management of Technology, Ergonomics & Biomechanics, Operations Research, Manufacturing Engineering, and Statistics & Regression analysis.

H. Each student in Ph.D. program in Ergonomics and Human Factors has to take and pass 5 qualifying exams in the following areas: Ergonomics and Human Factors, Industrial Hygiene, Safety Engineering, Biomechanics, and Statistics & Regression analysis

I. Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.

J. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist of not less than four members, three from the Department’s graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research.
2. To meet, at intervals, to review progress and expected results.
3. To read and comment upon the draft dissertation.
4. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
5. The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.

K. There are no foreign language requirements for the Ph.D. degree.

Industrial Engineering Course Listing
MECHANICAL AND AEROSPACE ENGINEERING - Dept. Code: MAE

DEGREE PROGRAMS

I. The Department of Mechanical and Aerospace Engineering offers courses and provides facilities for two programs of graduate study and research in Mechanical Engineering, leading to the degrees of

• Master of Science
• Doctor of Philosophy

A. The program of study must reflect the importance of underlying principles of the physical sciences and mathematical analysis to all phases of modern mechanical engineering.

B. Within the department, specializations are available in

<table>
<thead>
<tr>
<th>Fluid Mechanics</th>
<th>Heat Transfer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Energy Conversion</td>
<td>Hydrogen Energy</td>

</tr>
</tbody>
</table>

C. It is expected that each graduate student will indicate early in his/her graduate work (within the first year), the particular area in which he/she intends to concentrate his/her efforts as well as the faculty advisor for dissertation.

II. MASTER OF SCIENCE

A. One academic year, or equivalent, spent in full time graduate study will be the minimum time necessary for a student to fulfill the requirements for the degree of Master of Science in Mechanical Engineering.

B. General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

C. Students applying for acceptance to degree status must comply with the general requirements of the Graduate School.

D. Both a 30 credit hour thesis option and a 30 credit hour non-thesis option are available.

1. The student taking the Thesis Option must take an oral examination in defense of the thesis.

2. The student taking the Non-Thesis Option must complete a 3-credit Graduation Project at the end of the course program.

3. The Master of Science Degree in Mechanical Engineering (Management Option) can only be taken under the Non-Thesis Option.

   a) This degree specialization combines 15 credits selected from graduate business courses with 15 credits in a graduate engineering area of concentration.

   b) An undergraduate degree in engineering is required.
III. DOCTOR OF PHILOSOPHY
   A. The program in the Department of Mechanical and Aerospace Engineering leading to the degree of Doctor of Philosophy complies in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and the dissertation.
   B. There is no foreign language requirement.
   C. All candidates for the Ph.D. degree are expected to complete an integrated program of studies in mechanical engineering, mathematics, physics and/or chemistry in preparation for the Qualifying Examination.
   D. A qualifying examination is to be taken by each doctoral degree student within the first year. In the qualifying examination, the student is expected to demonstrate his/her competence in certain basic courses appropriate to modern mechanical engineering to the satisfaction of the department. A Ph.D. student will be admitted to candidacy after passing the qualifying examination as well as the defense of dissertation proposal.
   E. One or two years beyond admittance to candidacy will usually be found necessary for the completion of an acceptable dissertation, whereupon the student will be required to pass the Final Oral Defense of the Dissertation.
   F. The candidate may, if he/she so desires, pursue for his/her dissertation an investigation in connection with any of the research projects in progress in the Mechanical and Aerospace Engineering Department or, in the case of interdisciplinary programs, in other Colleges/Schools such as the School of Marine and Atmospheric Science or the Medical School.

500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

IV. CLEAN ENERGY RESEARCH INSTITUTE
   A. The Clean Energy Research Institute in the Department of Mechanical and Aerospace Engineering acts as the focal point of energy and environment related activities in the College of Engineering.
   B. Its goals are: to conduct research and to generate research proposals to investigate energy and environmental problems; to organize seminars, workshops and conferences using researchers within and without the University; to assemble, compile, publish and disseminate information on every aspect of energy and environmental problems; and to cooperate with other organs of the University, other academic institutions, government and private organizations in connection with the above listed activities.
   C. The current activities of the Institute include research into hydrogen as a clean, inexhaustible synthetic fuel, environmental damage caused by fossil fuels, global warming and its remediation, instabilities in boiling systems, solar cooling and heating, hybrid solar collectors, remote sensing applied to energy related problems and solar energy, system optimization and reliability of solar and wind energy systems, and organization of national and international conferences and symposia on energy and environmental problems.
V. FLUIDS AND THERMAL SCIENCES LABORATORY
A. The Fluids and Thermal Science Laboratory provides such equipment as a wind tunnel producing wind velocities of 150mph allowing opportunity to study the principles of aerodynamics, the effects of a hurricane, and air pollution modeling. Pressure and velocity measurements, renewable energy by wind power are simulated in this laboratory.
B. Research includes an open water channel that allows basic work on oil booms and boom arrangements to be done.
C. Additionally, air pollution research is conducted through sampling trains and equipment for stack sampling.
D. This laboratory provides research opportunities for both undergraduate and graduate students.

VI. INTERNAL COMBUSTION ENGINES LABORATORY
A. Funded continuously since the 1970s, the Internal Combustion Engines Laboratory is a well-established research laboratory internationally known for its work in designing and testing engines for use with conventional and alternative fuels.
B. Graduate and undergraduate students alike have worked with faculty on numerous projects.
C. The laboratory focuses on issues of performance, energy conservation (fuel economy) and environmental impact (exhaust emissions).
D. Faculty research has received international recognition, and students’ research have been presented in numerous publications and at conferences sponsored by industry, government and academic venues.

VII. DORGAN SOLAR and Fuel Cells ENERGY LABORATORY
A. The Dorgan Solar Energy Laboratory is equipped with a photovoltaic system, a solar air-conditioning system, a solar domestic hot water system, a solar-assisted heat pump system, and a meteorological data gathering station.
B. Both graduate and undergraduate students have worked with faculty on various research projects.
C. In addition to solar energy related projects, current research activities also include research on Hydrogen-Oxygen fuel cells and other energy and environment-related topics.

VIII. COMPUTATIONAL FLUID DYNAMICS LABORATORY
A. The CFD lab is equipped with a Beowulf PC cluster parallel computing system with 16 Pentium 4 Xeon 1.7G processors.
B. Current interests are mainly in the area of aerospace propulsion systems including turbomachinery unsteady aerodynamics, fluid-structure interaction, turbulence simulation, design optimization, rocket engine turbopump flow, CFD algorithm/code development, etc.

Mechanical and Aerospace Engineering Course Listing
OCEAN ENGINEERING/APPLIED MARINE PHYSICS

I. Ocean Engineering concentrates on problems associated with the interaction of the ocean and the works of man.
   A. The ocean engineer combines competence as an engineer with both a practical experience in and theoretical understanding of the ocean.
   B. The Ocean Engineering program, offered jointly with the Rosenstiel School of Marine and Atmospheric Science, is intended to lay the foundation of this competence, experience and understanding.
   C. The areas of faculty specialization in this program include coastal engineering, off-shore engineering, underwater acoustics, ocean measurements, marine geotechnics, and naval hydrodynamics.

II. The Master of Science degree in ocean engineering is offered jointly with the Rosenstiel School of Marine and Atmospheric Science.
   A. In addition, Master of Science and Doctor of Philosophy degrees in applied marine physics are offered by the Rosenstiel School of Marine and Atmospheric Science.
   B. See APPLIED MARINE PHYSICS/OCEAN ENGINEERING under RSMAS elsewhere in this Bulletin for information on the applied marine physics.

III. An approved interdisciplinary program is required for the M.S. degree in ocean engineering which consists of a minimum of 30 credits at the graduate level with an average grade of B or better and no grade below C.
   A. The 30 credits are divided among 24 credits in courses and six credits for thesis research.
   B. At least nine of the required credits must be 600 level courses.
   500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.
INTRODUCTION

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School’s present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969 the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution made through the Rosenstiel Foundation to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of 100 scientists who conduct sponsored research while offering graduate studies leading to the Master of Professional Science, Master of Science and Doctor of Philosophy degrees. The School offers curricula in applied marine physics, marine and atmospheric chemistry, marine affairs and policy, marine biology and fisheries, marine geology and geophysics, and meteorology and physical oceanography. The School also offers undergraduate programs leading to the Bachelor of Science in Marine and Atmospheric Science degree.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the art catamaran, unrivaled worldwide for both shallow and deep water research. The vessel, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School, signals a new era in scientific research. The Smith was built in 1999 and placed in service in February, 2000.

The 96-foot-long catamaran is capable of reaching speeds of over 12 knots and has a draft of only 5 feet, which enables it to explore heretofore inaccessible areas such as reefs, mangroves, grassbeds, and other shallow environments. The vessel accommodates 20 people in its ten two-person staterooms and encompasses 800 square feet of laboratory space, as well as an additional 800 square feet of multi-use space astern. Constructed by Eastern Shipbuilding Group in Panama City, Florida, the catamaran boasts twin Cummins engines at 760 hp each, Servogear variable pitch propellers, a 3,000-gallon tank of fresh water plus a reverse osmosis water maker, and 10,000 gallons of fuel storage.
DEPARTMENTS

The Rosenstiel School is made up of six academic divisions through which graduate degree programs are offered. These are:

- Applied Marine Physics
- Marine and Atmospheric Chemistry
- Marine Affairs and Policy
- Marine Biology and Fisheries
- Marine Geology and Geophysics
- Meteorology and Physical Oceanography

DEGREE PROGRAMS

The Rosenstiel School of Marine and Atmospheric Science offers graduate degree programs leading to the Master of Science, Master of Science, and Doctor of Philosophy degrees in applied marine physics, marine and atmospheric chemistry, marine biology and fisheries, marine geology and geophysics, and meteorology and physical oceanography. The division of Marine Affairs and Policy offers interdisciplinary Master of Arts and Master of Science degrees only.

In conjunction with the University of Miami School of Law, the Division of Marine Affairs and Policy at the Rosenstiel School also offers a joint degree program in Law and Marine Affairs. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and the M.P.S. in Marine Affairs and Policy from Rosenstiel.

The Rosenstiel School admits graduate students in the following categories. Regular admission is for students who wish to pursue a graduate degree. Non-degree admission provides an opportunity for graduate study to qualified applicants who do not wish to work toward an advanced degree but who have special objectives for professional study, or who already hold an advanced degree and desire additional coursework in the field. No more than twelve (12) credit hours may be taken while in non-degree status. A Certificate Program is available in all areas of study. This program provides professional training for any student who requires training in a specific research area but does not require an advanced degree. This program consists of one year full-time study with a minimum of eighteen (18) credit hours. Transient status is a type of non-degree admission available to students enrolled in a graduate program elsewhere but desiring to earn credit at the University of Miami for the purpose of transferring it to the home institution. All graduate students are required to demonstrate the ability to prepare and teach scientific material.

ADMISSION REQUIREMENTS

An application for admission to the Rosenstiel School of Marine and Atmospheric Science consists of the application form, application fee, transcripts, results of the Graduate Record Examination, results of the TOEFL or IELTS exam (for international students), and three letters of recommendation from persons knowing the applicant’s academic abilities. The application is encouraged to be filed by Dec 1st and must be filed by January 1st to have the highest probability for acceptance the following Fall semester. The application submission period for the M.P.S. program is from February 1st to June 1st. Students are
normally admitted only in the Fall semester; however, applicants who have received a Master’s degree may be considered for Spring admission to the Ph.D. program.

Because of resource limitations, only a small percentage of those applying for graduate study in marine and atmospheric science can be accepted. Undergraduate scholastic performance, the reputation of the school involved, Graduate Record Examination scores, and the letters of recommendation are all considered in evaluating an application.

A complete description of the Rosenstiel School, its faculty, educational and research facilities, curriculum and degree requirements is contained in the Bulletin of the Rosenstiel School of Marine and Atmospheric Science. The current Bulletin and additional information can be found on the Rosenstiel School website located at www.rsmas.miami.edu/grad-studies/.

UNDERGRADUATE PREPARATION

Students interested in pursuing marine or atmospheric science on the graduate level should elect an undergraduate major in one of the basic scientific disciplines. The undergraduate college should be selected on the basis of curriculum, staff strength, and research interests in that major. The student should be careful to satisfy the graduation requirements of his/her own college or university and should consult undergraduate departmental advisors for assistance on individual programs.

The undergraduate course requirements for students applying for graduate study at the Rosenstiel School are detailed below. The courses that are required or strongly recommended are printed in roman type. The courses which should be taken if the student’s program can include them are printed in italic type.

DEGREE REQUIREMENTS

THE MASTERS OF PROFESSIONAL SCIENCES (MPS) PROGRAMS

The M.P.S. Degree

The Masters of Professional Science degree is offered in the disciplines of marine affairs and policy, marine biology and fisheries, and meteorology and physical oceanography. It is expected that the normal time for completion of degree requirements for the Masters of Professional Science degree will be 12 – 15 months of full-time study.

Credit Requirements

Students in the Masters of Professional Science Program are required to complete 24 course credits and 6 internship credits. Within each track, there are compulsory classes and electives. Coursework is multi-disciplinary and thus will be accepted from multiple departments. As the terminal part of the degree, students must complete an internship with an approved agency, institution, or business, culminating in a final report.

Comprehensive Examination

A comprehensive examination is required of all M.P.S. students after completing at least 18 course credits and prior to beginning an internship. In most cases, the exam will be written and will be based on M.P.S. coursework. However, each division determines the content and form of the examination and establishes the test date for its students in a given year-class according to general school guidelines. In the event of a failure, a student may be re-examined once, upon the advice of the student's advisor and at the discretion of the faculty of the division. If granted, the re-examination must be given before the end of the following
semester. The Graduate Studies Office should receive written notification of the examination results. Students who fail the re-examination are subject to dismissal from the school.

**Internship**
Each student will be required to complete an internship with an organization engaged in some activity associated with marine and atmospheric science and identify an Internship Supervisor. Internships can be either paid or unpaid by the organization, or students can complete the internship by formal participation in a University sponsored program. An internship proposal, including contact information for the Internship Supervisor, must be submitted to the academic advisor and mentor for approval before the internship can begin.

**Internship Report**
The final grade will be based on a written report and an oral presentation. The internship report is not a summary of involvement but rather a contributory assessment of the experience, including developmental insight and a summary of any research performed. Internship report guidelines will be provided.

**Conference Attendance**
Though not mandatory, M.P.S. students are strongly encouraged to attend a scientific conference during their academic residency at RSMAS.

**THE M.S. PROGRAM**
The Master of Science degree is offered in the disciplines of applied marine physics, marine affairs and policy, marine biology and fisheries, marine and atmospheric chemistry, marine geology and geophysics, or meteorology and physical oceanography. It is expected that the normal time for completion of degree requirements for the Masters of Science degree will be two years of full-time study.

**Credit Requirements**
Twenty-four graduate course credits are required for the Master of Science degree. In addition, the student must enroll for a total of six credit hours of thesis research (710). All students are required to take at least one course outside the division of residence.

**Comprehensive Examination**
A comprehensive examination is required of all students. Each division determines the content and form of the examination and establishes a test date for its students according to general School guidelines. In the event of a failure, a student may be reexamined once, upon the advice of the student’s committee and at the discretion of the faculty of the Division. If granted, the reexamination must be given before the end of the following semester. Students who fail the re-examination are subject to dismissal from the School.

**Thesis**
A thesis is normally required for the Master of Science degree in marine and atmospheric science. Under certain conditions, the requirement of a thesis may be waived. A paper accepted for publication can be substituted for the thesis (only where the student is the sole author), or the M.S. degree can be bypassed. Both of these exceptions must be approved by the student’s committee, the faculty of the pertinent division, and the School Graduate Academic Committee. If a thesis is required, a public oral defense of the thesis must take place. The thesis committee must consist of at least three members, one of whom is a regular member of the Graduate Faculty of the University; one member must be from outside the division.
THE M.S. PROGRAM IN MARINE AFFAIRS

The Rosenstiel School of Marine and Atmospheric Science offers a Master of Science Program in Marine Affairs and Policy. There are two tracks that are currently offered in the program. The Master of Science Policy track offers an advanced training program in marine science applicable to topics such as the integrated coastal zone management and spatial planning. Applicants must have a baccalaureate degree from an accredited college or University. This program is for students with interests in the areas of administration, management and the conservation of marine resources.

The Master of Science degree in Marine Affairs and Policy is an integrated track in marine science and policy and gives students with a strong science background opportunities to build careers in marine resource management. The M.S. offers an academic curriculum for students interested in the application of science and technology to management issues.

Both M.S. tracks may be completed in two and one half years in an intensive program of five semesters.

Credit Requirements
The Master of Science requires the completion of 24 course credits and six master’s thesis credits. A committee of three is required – one advisor from Marine Affairs and Policy, a member from outside of Marine Affairs and Policy and one other faculty member from Marine Affairs and Policy. A thesis is required for the M.S. degree and a public oral defense of the thesis must take place. A grade point average of 3.0 or better must be maintained. All students are required to take at least one course outside the division.

Comprehensive Examination
An oral and written comprehensive examination is required of all students in Marine Affairs and Policy. In the event of a failure, a student may be reexamined once, upon the advice of the students committee and at the discretion of the faculty of the Division. If granted, the reexamination must be given before the end of the following semester. Students who fail the re-examination are subject to dismissal from the School.

THE PH.D. PROGRAM

The Doctor of Philosophy degree is offered in applied marine physics, marine biology and fisheries, marine and atmospheric chemistry, marine geology and geophysics, and meteorology and physical oceanography. It is expected that the total time to complete the requirements for the Ph.D. degree will normally be four years of full-time study from the date of receipt of the M.S. degree or, if the M.S. is bypassed, five years of full-time study from the date of admission with a bachelor's degree.

Credit Requirements
A total of sixty credits are required for the Ph.D. and not less than half of the total credits must be in work open only to graduate students (i.e. 600 level or above). At least twenty-four of the sixty credits must be course credits taken in residence at the University of Miami, and may include those course credits taken as part of the Master of Science degree. A minimum of 12 dissertation research credits must be taken; however, the course credit and research credit requirements needed are determined by the individual division. Students transferring into the school with a Master’s of Science degree are normally given credit for twenty-four course credits. However, individual divisions may require additional course
credits to remove deficiencies. All students entering the Ph.D. program without a master’s
degree are required to take at least one course outside the division of residence.

**Dissertation Committee**
The dissertation committee must consist of at least four members; this includes the
committee chair, who shall be a member of the division or share the chair duties with a co-
chair from the committee and be a regular member of the Graduate Faculty. Of the
remaining members, two shall be from the Graduate Faculty, and one member of each
Ph.D. committee must have their primary affiliation outside of RSMAS and that member
must also have a Ph.D. degree. (Adjunct and secondary appointments are considered
outside if their primary affiliation is not RSMAS).

**Comprehensive Examination**
An oral comprehensive examination is required of all RSMAS students. Some divisions may
also require a written component in addition to the oral exam. In the event of a failure, a
student may be re-examined once, upon the advice of the student’s committee and at the
discretion of the faculty of the division. Students who fail the re-examination are subject to
dismissal from the School.

**Qualifying Examination**
A written qualifying examination is required of all students admitted to the doctoral
program. The student’s committee will normally prepare and administer the examination
within the guidelines established by the faculty of the School and of each division. In the
event of a failure, a student may be reexamined once, upon the recommendation of the
student’s committee and at the discretion of the faculty of the division. If granted, the
reexamination must be given before the end of the following semester. Language and other
research tools requirements, if applicable, must be completed prior to taking the qualifying
examination. Students who fail the re-examination are subject to dismissal from the School.

**Dissertation Proposal**
An outline of the dissertation containing the following must be approved by the student's
committee and submitted to the RSMAS Graduate Studies Office with a copy to the division
academic committee:

(a) tentative title
(b) statement of the problem and objectives
(c) methods of attacking the problem, including equipment and facilities required
(d) timetable
A “Proposal Approval” form must accompany the proposal and be signed by the members of
the student’s committee.

**Admission to Candidacy**
Upon completion of the following requirements, the student is admitted to candidacy:

(a) have an approved committee on file in Graduate Studies
(b) successfully pass the comprehensive examination
(c) successfully pass the qualifying examination
(d) complete the language requirement, if any
(e) submit the dissertation proposal
(f) have a 3.0 average in all credits earned (≥ 12 credits)
(g) remove all “I” or deficiencies
An application for Admission to Candidacy must be completed. All doctoral students must be admitted to candidacy at least one semester prior to the one they intend to graduate.

**Dissertation**
A dissertation is required of all doctoral students at the Rosenstiel School. A public oral defense of the dissertation is required. A student must be admitted to candidacy prior to the defense and registered in the semester that he/she defends. Each dissertation must be accompanied by three originals of the Certificate of Approval. This form must be signed by all members of the student’s committee and the RSMAS Associate Dean of Graduate Studies.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved for the student’s Committee. Any student who fails to meet the cumulative grade point average requirement and other academic progress standards established by the University and the School is subject to dismissal from the graduate program.
Master of Science and Doctor of Philosophy degrees in applied marine physics are offered by the Applied Marine Physics Division of the Rosenstiel School of Marine and Atmospheric Science. An approved interdisciplinary program is required for the M.S. degree in applied marine physics which consists of a minimum of 30 semester credits at the graduate level with an average grade of “B” or better and no grade below “C.” The 30 credits are divided among 24 credits in courses and six credits for thesis research. At least six of the required course credits must be at the 600 level. For the Ph.D. degree, 60 graduate semester credits are required. These are divided among a minimum of 36 credits in courses (18 of which must be at the 600 level) and a minimum of 12 credits in dissertation research.

Applied Marine Physics Course Listing
MARINE AFFAIRS AND POLICY - Dept. Code: MAF

DEGREE PROGRAMS

The Division of Marine Affairs accepts highly qualified students who wish to pursue an academic degree program that combines a basic curriculum in marine science with a complementary program in a non-marine science discipline. The program is intended to provide the student with a broadened perspective of marine issues and problem-solving abilities. MAF offers a specialization in aquaculture management. This track focuses on technological, environmental, and economic feasibility of sustainable aquaculture operations.

Current division research and teaching focus on integrated coastal zone management, marine resource economics, political and environmental ecology, coastal and ocean law and policy, fisheries and aquaculture management, environmental planning and environmental impact assessment, underwater marine cultural resource management and marine geographic information systems.

Marine Affairs and Policy offers a Master of Science (MS) and Master of Professional Science (MPS) degrees. The M.S. in Marine Affairs and Policy program is geared to students who are interested in the application of science and technology in issues of marine resource management and are willing to carry out independent investigation and to present the results in a thesis. The MS has two tracks, the Science/Policy track and the Policy track. Students who apply to the Science/Policy track are required to have a B.S. degree in one of the pure sciences. The MS curriculum will include courses and training, which will address current marine policy issues and policy analysis techniques. The MPS program is geared to students with diverse academic backgrounds who are interested in careers related to marine resource management and policy and who seek advanced training in marine and atmospheric science.

Marine Affairs and Policy, in cooperation with the Undergraduate Marine and Atmospheric Science Program, also offers a five-year BA/MPS Program in Marine Affairs. This program enables qualified students to earn a B.A. in Marine Affairs in four years with the opportunity to earn an M.P.S. with only one additional year. Conditional acceptance to the MPS program is based on the student’s GPA at the end of their sophomore year. Students must then take GRE exams and apply for acceptance to the graduate program at Rosenstiel during their junior year.

The Division of Marine Affairs and Policy at the Rosenstiel School and the University of Miami School of Law offer a Joint degree program in Law and Marine Affairs. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and the MPS in Marine Affairs from Rosenstiel. A student may complete requirements for both degrees within three and one-half years in an intensive program of six semesters and two full summers. This program is geared toward students who want a career in the field of law with a specialization in marine and environmental issues.
MARINE AND ATMOSPHERIC CHEMISTRY - Dept. Code: MAC

DEGREE PROGRAMS

The program covers the chemistry of the atmosphere and oceans, including geochemical, photochemical and biochemical processes. Undergraduate training should be in chemistry, physics, biology and mathematics; also useful may be courses in geology, biochemistry, oceanography and meteorology.

New students are evaluated for their knowledge of chemistry; deficiencies are corrected by directed study and/or course work and must be remedied within one year. New students can be admitted to the M.A. or the M.S. program, or directly into the PhD program, even without a prior M.S. degree.

Students are assigned a faculty advisor when they are accepted into MAC, and during their first year they form a supervisory committee. The advisor and committee plan a course of study and research for the student. Students without an MS degree take a written comprehensive examination towards the end of the first year. The comprehensive exam tests the basic knowledge of marine and atmospheric science, and is based on core course material. The research proposal usually includes an abstract, background material, hypothesis and/or list of objectives, methods, preliminary data, and bibliography. Ph.D. students also take a written qualifying exam. The qualifying examination is set by the advisor and supervisory committee and is taken after their approval of the dissertation proposal. An oral examination may be required after the written examination. Students who twice fail the qualifying examination will receive an MS if they present and successfully defend a written thesis. For all students, the seminar (MAC 670) is taken twice for credit. However, each student must give one seminar per year and they must attend seminars regularly.

The MA is a non-research degree that occupies 1 year: two semesters of 12 course credits each, and a summer session of experimental work and a written project (6 credits).

Marine and Atmospheric Chemistry Course Listing
MARINE BIOLOGY AND FISHERIES - Dept. Code: MBF

DEGREE PROGRAMS

Students admitted to the program in the Division of Marine Biology and Fisheries are required to have a strong undergraduate preparation in the life sciences, with additional coursework in mathematics (calculus), physics, and chemistry (through organic). The program offers a series of study-options leading to the M.P.S., M.S. or Ph.D. degrees. These are intended to guide the student in a comprehensive study of marine organisms and the marine environment, and to develop areas of specialization within the marine biological sciences. Students are strongly encouraged to contact the faculty member whose area of research is of interest to them.

Areas of faculty interest include biological oceanography, biochemistry and molecular biology, ecology, fisheries, microbiology, physiology, toxicology, systematics, behavior and ecosystem and fisheries management. Students are not restricted to studies in any one study-option, and may (in consultation with their faculty advisor and/or committee) tailor their academic programs to suit individual interests in more than one area of faculty expertise. Within the Division of Marine Biology and Fisheries there are four major academic tracks for the M.S and Ph.D. degrees, each of which has one or more sub-specializations. These are (1) Biological Oceanography, which has an emphasis on near shore and pelagic marine life; (2) Fisheries Sciences, which focuses on fisheries stock assessment, population modeling, and fisheries management; (3) Marine Biomedical Sciences, which has subspecialties in Marine Molecular Biology and Genetics, Marine Diseases, and Marine Physiology and Biochemistry/Toxicology; and (4) Ecological Sciences and Coastal Marine Biology. This latter academic track offers specialization in Marine Biology, Coral Reef and Coastal-Marine Ecology, and Ecological Systems and Environmental Management. Individual curricula may blend coursework from one or more tracks depending on the specific interests of the student.

Marine Biology and Fisheries Course Listing
MARINE GEOLOGY AND GEOPHYSICS - Dept. Code: MGG

DEGREE PROGRAMS

The undergraduate student wishing to prepare for graduate work in marine geology and geophysics must be well trained in the basic sciences. According to the special interests of the individual, the undergraduate major and minor should be in geology, physics, chemistry, and/or mathematics.

The Division of Marine Geology and Geophysics offers M.S. and Ph.D. programs in the following broad areas:

- Environmental Geology and Geochemistry
- Sedimentary Systems and Marine Geology
- Paleoclimatology and Global Change
- Igneous Petrology and Geochemistry
- Geophysics
- Geodesy

Within each discipline, students have considerable flexibility in choice of courses, and “cross-track” courses are possible for students with special interests. Interactions with other divisions are particularly encouraged.

[Marine Geology and Geophysics Course Listing](#)
METEOROLOGY AND PHYSICAL OCEANOGRAPHY - Dept. Code: MPO

DEGREE PROGRAMS

The Division of Meteorology and Physical Oceanography (MPO) of the Rosenstiel School of Marine and Atmospheric Science (RSMAS) is engaged in research and graduate instruction in the physical processes governing the motion and composition of the ocean and atmosphere. The program ranges from direct observation to theoretical and numerical modeling of the earth-atmosphere system.

Three types of degrees are awarded by the Division: Master of Science, which requires 30 credits, including 24 credits in courses and 6 research credits; Doctor of Philosophy, which requires 60 credits, including a minimum of 36 course credits and a minimum of 12 research credits; the Division also awards Master of Professional Science degrees.

Students applying for admission to graduate study in the Division of Meteorology and Physical Oceanography should have a solid background in mathematics and physics or engineering. Once admitted, students in this Division will take courses in both Meteorology and Physical Oceanography in order to develop an understanding of the ocean and the atmosphere as closely related dynamical systems.

In the first year, students will take 5-6 courses, followed by a comprehensive exam at the end of the spring semester. Based on the results of this exam, students may be given the option to enter the Ph.D. program directly, to enter the M.S. program (leading to subsequent entrance into the Ph.D. program), or they may be required to re-take the comprehensive exam. Typical times for completion are 2-3 years for M.S. degrees and 4-6 years for Ph.D. degrees.

Meteorology and Physical Oceanography Course Listing
LIFE SCIENCES-SCHOOL OF MEDICINE

PROGRAM IN BIOMEDICAL SCIENCES
DEPT CODE: PIBS

www.biomed.miami.edu

ADMISSION REQUIREMENTS

The Program in Biomedical Sciences (PIBS) provides an entry point for first year doctoral students interested in obtaining a Ph.D. from the Leonard M. Miller School of Medicine. PIBS students experience a common first-year curriculum to build a solid foundation in biomedical science.

In the fall, students enroll in PIBS 601, which is a 9 credit course covering fundamentals of molecular and cellular biology, important model organ systems, and technical approaches in modern biomedical science. The course meets 4 days/week, 2 hours/day. The first hour is a lecture/discussion, and the second hour varies from professional development activities (reading papers, writing papers, choosing a lab and a project, time management, etc.) to discussions of particular relevant techniques, to critical reading of relevant literature.

In the spring semester, students elect from a menu of individual modular courses offered by the 8 graduate programs. Each modular course covers 6-7 weeks, and students will elect 1-2 of these per half semester. These courses will cover topics of more specific relevance to graduate programs or research themes.

Students will perform at least 3 laboratory rotations of 9 weeks each during the first year, and will generally choose a dissertation laboratory (and graduate program) during the latter half of the spring semester. If necessary a fourth rotation is possible, and in this case laboratory choice may be deferred until June.

In addition, students will meet several times per semester in small groups (6-7/group) with a mentor. Mentors are chosen for their experience and commitment to student training. In these group sessions, students will discuss a variety of issues relevant to challenges and opportunities in biomedical research, preparing for success in graduate school, and building a successful research career.

Ph.D. Program Choices:

Biochemistry & Molecular Biology
Cancer Biology
Human Genetics & Genomics
Microbiology & Immunology
Molecular Cell & Developmental Biology
Molecular & Cellular Pharmacology
Neuroscience
Physiology & Biophysics
ADMISSION REQUIREMENTS

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

- Students should apply online at: www.biomed.miami.edu

Inquiries should be directed to:

PIBS Course Listing

M.D./Ph.D. PROGRAM

ADMISSION REQUIREMENTS

Admission to the MD/PhD Program is highly competitive, and interested applicants are advised to apply early in the fall. AMCAS applications must be received by the Medical Admissions Office no later than December 15. Competitive applicants usually have a cumulative undergraduate science G.P.A. of at least 3.4 and a composite score of at least 32 on the MCAT exam. Preference will be given to candidates who can provide tangible evidence of a commitment to biomedical research, substantial laboratory or other relevant research experience and scientific talent. Applications from under-represented groups, including minorities and women, are encouraged.

The completed application should contain a research narrative and two letters of recommendation from scientists who specifically address their potential as a physician scientist. One of these must come from a scientist with whom the student performed research. Composite evaluations from a premedical advisory committee
cannot be substituted for either of these letters. The Graduate Record Examination (GRE) is not required for matriculation into the MD/PhD Program.

All MD/PhD applicants are reviewed by both the MD Program Admissions Committee and the MD/Ph.D Program Admissions Committee. These evaluations proceed independently and a student will still be considered for the MD program, even after an unfavorable review by the MD/Phd Program. A successful applicant is granted admission to both the MD Program and the MD/PhD Program.

**DEGREE PROGRAMS**

The Basic Science Graduate Programs

The following doctoral programs, described elsewhere in this bulletin, participate in the MD/PhD Program. The MD/PhD Program office can provide you with further information about these programs and the research interests of their faculty.

- Biochemistry and Molecular Biology
- Sheila and David Fuente Cancer Biology Program
- Epidemiology and Public Health
- Human Genetics & Genomics
- Microbiology and Immunology
- Molecular Cell and Developmental Biology
- Molecular and Cellular Pharmacology
- Neuroscience
- Physiology and Biophysics

**Program Sequence**

Students complete the first two years of medical school, which is followed by their PhD training and then the final two years of clinical clerkships. Students are advised to begin the program in June to enable an early start on their research rotations as the MD program courses begin in mid-August. Some students choose to continue their research during the first two years of medical school. It is recommended that students select and apply to a graduate program by February of their second year in the program and identify a research mentor no later than the beginning of the third year. The summers before the second and third year are usually spent in research rotations. The third year is spent both in class to fulfill the final graduate course requirements and in the mentor's laboratory. Students should plan to take their Ph.D. qualifying exam by the end of the third year. The following two or more years are spent carrying out original research for their dissertation. All Ph.D. requirements must be completed before entry into the third year of medical school.

Combined degree programs are long and challenging. To relieve pressure produced by the demands of the medical and graduate curricula, the University of Miami Miller School of Medicine provides a stimulating and supportive environment in which all combined degree students have frequent opportunities to exchange their ideas, energy and concerns.

The on-going program activities provide opportunities for integration of clinical problems with basic science advances. Enhance the clinical curriculum with in-depth case reviews.
Foster discussion of the students’ own research results in an interdisciplinary, rigorous, but informal setting.

Also, special events are scheduled to bring the program’s students together for in-depth discussion with international leaders in research.
BIOCHEMISTRY AND MOLECULAR BIOLOGY  
Dept. Code:  BMB

The aim of graduate education in this department is to prepare students for careers in Biochemistry and Molecular Biology. This training provides the student with a broad knowledge in the various aspects of Modern Biochemistry and Molecular Biology. Independent laboratory research is emphasized at all stages of the student’s career.

Some of the Biochemistry faculty are affiliated with: other departments in the University, the VA hospital, the Sylvester Comprehensive Cancer Research Center, and the Brahman Breast Cancer Institute. Thus, research facilities for a large variety of specialties are available to our students. Some of the graduate students participate in the combined M.D.-Ph.D. Program.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in: Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development. Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study.

The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the first year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the first year,
students choose mentors and formally enter individual graduate programs.

- Students should apply online at: www.biomed.miami.edu

**DEGREE PROGRAMS**

All incoming students will be advised by the Operating Committee. This committee will assist and mentor students prior to their selection of a thesis advisor. In addition students will be provided guidance concerning choices of courses and research programs. The student should choose a thesis mentor from the program faculty by the beginning of the second year of graduate study. The program operating Committee, in consultation with the mentor, will appoint a thesis committee and set up a tentative schedule for the remainder of the student’s graduate studies.

**DEGREE REQUIREMENTS**

Completion of the Ph.D. degree requires the completion of 36 credits of coursework at the graduate level (including specific required courses), 24 credits of thesis research, passing a qualifying exam, and submitting and successfully defending a dissertation showing results obtained on a research problem. The degree earned will be Doctor of Philosophy in Biochemistry and Molecular Biology.

Inquiries should be directed to:

Dr. Zafar Nawaz  
Graduate Program in Biochemistry and Molecular Biology  
University of Miami, Miller School of Medicine  
Department of Biochemistry and Molecular Biology  
P. O. Box 016129  
Miami, FL 33101  
Tel. 305/243-6261

**COMBINED M.D.-PH.D. DEGREE.**

The Department participates in the School of Medicine’s M.D.-Ph.D. Program in which students may obtain both degrees.

The curriculum will be tailored to the needs of the individual student.

[Biochemistry and Molecular Biology Course Listing](#)
THE PROGRAM

The Sheila and David Fuente Graduate Program in Cancer Biology is a University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. The objective of this program is to provide a unique multidisciplinary training environment for highly qualified individuals that will prepare them for independent research and teaching careers. The overall philosophy of the program is to integrate basic and clinical research. The scientific focus is on the biology of cancer and the development of novel diagnostic and therapeutic approaches.

The program emphasizes a multidisciplinary approach which incorporates concepts and state-of-the-art techniques from molecular biology, biochemistry, cell biology, biostatistics, genetics, genomics, immunology, proteomics, structural biology, clinical oncology, and translational research programs at the Sylvester Comprehensive Cancer Center. An important goal of the program is to provide students with a strong background in basic biomedical research coupled with an understanding of clinical aspects of cancer including diagnostic, prognostic, and therapeutic intervention. To achieve this goal the program utilizes a unique program of study that includes lectures from both basic and clinical researchers. In addition, the program has a two-tier mentoring system in which students receive guidance from both a research mentor and a physician mentor. The research mentor is the dissertation advisor, while the physician mentor will provide the student with a clinical perspective in oncology. Through this dual mentorship students conduct their doctoral research and obtain clinical knowledge in their area of study. The program aims to instill in students the ability to design multidisciplinary research programs in which scientific research is driven by unmet clinical challenges.

The curriculum includes core courses in Tumor Biology, Student Seminars, Tumor Boards, Special Topics in Cancer Research, Dialogues with Cancer Clinicians, and Logic and Reasoning in Translational Cancer Research. Students can also choose electives in cancer epidemiology, cellular and molecular biology, immunology, pharmacology, and microbiology with permission of CAB Director. After joining the program and choosing a research mentor, students formulate a proposal and take a qualifying exam. Their subsequent research is guided by an individually tailored dissertation committee, including the research advisor and physician mentor.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.
Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. [ Cancer Biology Course Listing ]
CLINICAL and TRANSLATIONAL INVESTIGATION DEPT CODE: CTI

This Master’s of Science in Clinical and Translational Investigation (MSCTI) at the University of Miami has been established to create a structured educational program that offers trainees of diverse cultural and educational backgrounds formal graduate training in the principles and practice of translational science and clinical research. Our highly integrated, cross-disciplinary program has been designed to further the new discipline of translational science by providing a foundation for the development of future practitioners and leaders of translational science who are prepared to deal with the perceived bottlenecks that inhibit translational research: institutional culture and practice, scientific complexity of translational research design and methodology, and regulatory and ethical processes. The overall goal of this curriculum development award is to engage promising new and Early Stage Investigators in the discipline of translational science, so that they make the pursuit of academic translational science their own professional goal.

The Masters in Clinical and Translational Investigation program is a one to three – year (time dependent on goals and responsibilities of accepted students), 30 credit program that includes completion of structured content courses, participation in small group interactive seminars, and completion of a K-award, R21, or R01-type interdisciplinary clinical/translational research proposal that will serve as a thesis or a formal master thesis, to be evaluated by a thesis committee consisting of one member of the Steering Committee, two faculty members, each representing one component of the translational focus (T1, T2, T3) of the student, and another investigator not affiliated with the K30 program.

Successful completion of the MSCTI will required a GPA of 3.0 or greater with no grades below C in any courses (these can be retaken and improved grades substituted) and successful completion of the thesis project

ADMISSIONS REQUIREMENTS

All strong research backgrounds are eligible to submit an application. Applications will be reviewed in batches, and admittance will be based on those most qualified for the program. We strongly encourage the following to apply:

- Individuals who have completed terminal healthcare degrees (e.g., MD, PhD, DO, RN) who are interested in pursuing additional formal didactic training to become independent investigators in clinical and/or translational science;

- Individuals who have completed terminal scientific degrees (e.g., Ph.D., DSci) who are interested in pursuing additional formal didactic training to improve knowledge and skills related to translation of basic to clinical applications; and

- Individuals who are currently enrolled in a terminal degree program (e.g., MD, PhD) who are interested in adding a year to their program to obtain a MCTSI concurrent with their terminal degree.
Completed application package consist of the following:

- Completed online application form
- Application fee (US dollars, non-refundable)
- Official transcripts from each college or university attended
- Resume or Curriculum Vitae
- Three letters of recommendation
- Personal statement of career goals and interest in degree program.
- Members of the Admissions Committees examine each application for acceptance into the program. Materials submitted in support of an application are confidential and cannot be released for other purposes nor returned to the applicant.

A GRE is not required

DEGREE PROGRAMS

- Master of Public Health (MPH)
- Master of Science in Public Health (MSPH)
- Doctor of Philosophy in Epidemiology (PhD)

The Graduate Programs in the Department of Epidemiology and Public Health at the University of Miami Miller School of Medicine are at the forefront of public health science with emphases on research, education, and evidence-based, public health service. The Graduate Programs promotes an environment of learning and inquiry, stressing the scientific method as a way of generating knowledge about common pathways in health and illness. The mission of the Graduate Programs in Epidemiology and Public Health is to develop leaders who can expand and translate knowledge into policy and practice to promote health and prevent disease in human populations.

MASTER OF PUBLIC HEALTH (MPH)

The Master of Public Health (MPH) degree is a professional degree for students who require a broad general academic experience in public health. Students will acquire competency in the fundamental public health disciplines. This includes research design and conduct, data analysis and policy analysis, communications, program planning and administration, public health systems and the organization of health services in the United States and Latin America, recognition and analysis of ethical issues in public health and professional practice, the needs of special populations, and the integration of these core disciplines in public health decision making. The MPH degree is a 45 semester-hour program that is accredited by the Council on Education for Public Health. The 45 credit degree program consists of 27 credits of core coursework, 12 credits of electives and 6 credits for the capstone/culminating experience.

MASTER OF SCIENCE IN PUBLIC HEALTH (MSPH)

The MSPH is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia, or private institutions. Studies will include many of the core disciplines included in the MPH degree with an additional emphasis on advanced research methods and quantitative analysis skills. The 45 credit degree consists of 24 credits of core coursework, 15 credits of electives and 6 credits for the capstone/culminating experience. The MSPH program is accredited by the Council on Education for Public Health.

Full-time students can expect to complete the MPH or MSPH degree requirements within 2 years. A nine-credit waiver may be available for students who enter the MPH or MSPH degree programs with an earned advanced degree (e.g., MD, DDS, DVM).
DOCTOR OF PHILOSOPHY IN EPIDEMIOLOGY (PhD)

The Doctor of Philosophy (PhD) in Epidemiology is an intensive research training program for students with prior training in Epidemiology or related disciplines. It provides advanced education and training for students seeking a professional career in medical and health-related research, as well as for physicians and other persons who have attained professional degrees and are seeking to integrate epidemiological research and methods into their ongoing careers. The program is primarily designed for persons who have an MPH degree, as well as for physicians and others who have a master’s or doctoral degree in a related discipline.

All Ph.D. students are required to complete sixty-six (66) credit hours. There are 9 core courses in epidemiology and biostatistics (30 credit hours), 8 courses (24 credit hours) in electives and the dissertation (12 credit hours).

JOINT DEGREE PROGRAMS

Joint degree programs are also offered in conjunction with the School of Medicine (MD/MPH, MD/PhD), School of Law (JD/MPH), School of Business (MPA/MPH), and the College of Arts and Sciences (MAIA/MPH).

http://publichealth.med.miami.edu/academic-programs/dual-degree-programs

ADMISSION REQUIREMENTS

http://publichealth.med.miami.edu/future-students/admissions

- **Online Application** and non-refundable application fee of 65 USD.

- Official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations.

- **Official GRE test scores** (code 5815). Alternatively we accept the MCAT, LSAT, GMAT and DAT for the MPH/MSPH degree programs only. Applicants to the MPH/MSPH program that hold advanced degrees (MD, PhD, JD) are encouraged but not required to submit test scores.

- **Resume/Curriculum Vitae** including employment, activities, community service, education, academic or professional honors.

- **Statement of purpose** detailing your academic interest in our program as well as your future career goals. This statement should discuss any experience you have in public health including field experience, training, education or other related qualifications. Discuss how earning this degree will contribute to your future and the future of public health.

- **Three letters of recommendation** from people who are best able to assess your ability to be successful in a public health degree program. Ideally, your recommenders are recent professors, researchers or employers in a related field. You will be asked for your recommenders’ contact information on the online application. They will be sent an online form to complete via email.
To obtain detailed program curricula on the MPH/MSPH, PhD in Epidemiology and joint degree programs, please contact our offices at the address below or visit our website at http://publichealth.med.miami.edu/

EPIDEMIOLOGY AND PUBLIC HEALTH

BIOSTATISTICS
Dept. Code: BST

http://www.biostat.med.miami.edu/

DEGREE PROGRAMS

- Master of Science in Biostatistics (MS)
- Doctor of Philosophy in Biostatistics (PhD)

MASTER OF SCIENCE IN BIOSTATISTICS (MS)

Prerequisites and requirements for these degrees are described below.

The essential background an ideal entering student would have is (1) a minimum of three semesters of calculus including partial derivatives and techniques for solving multiple integrals, (2) One semester of linear algebra, (3) one semester of probability theory, (4) four undergraduate courses in statistics or biostatistics. These four courses are to include a general introduction, linear regression, introductory mathematical statistics and at least one further course, typically drawn from multivariate analysis, nonparametrics, survey sampling and time series. Students who do not satisfy these pre-requisites may be required to make up their deficiencies during their first year of study.

Admitted MS students are expected to take a full suite of courses totaling 45 credits including four iterations of the seminar course, a consulting practicum as well as basic theory courses. In addition, students are expected to write a Major Paper and
pass a written examination between their first two years of study. The standard course sequence can be found at: http://www.biostat.med.miami.edu/academics/ms-in-biostatistics/ms-courses

Variations on this basic plan are permitted and decided on a case-by-case basis. Candidates may earn the MS on as part time or full time students.

DOCTOR OF PHILOSOPLY IN BIOSTATISTICS (PhD)

Formally, the essential background an ideal entering student would have is the same as for the MS program apart from item (4) where a minimum of six undergraduate courses would be expected. In practice, the ideal student will have further evidence of a commitment to the field of biostatistics usually through more extensive course work, undergraduate theses, or already having earned an MS in biostatistics or statistics. Degrees in allied fields such as mathematics, computer science, and engineering are also evidence of commitment to biostatistics if the degree clearly emphasized biostatistics related content.

Admitted PhD students are expected to take a full suite of courses including several iterations of the seminar course, a consulting practicum (or advanced computing course), and a series of four to six courses that ensure the candidate has studied a subject matter discipline within biomedical research. PhD students are also expected to take high level courses in statistical theory, survival analysis, and high-dimensional and complex data not generally taken by MS students. A sample program can be found at http://www.biostat.med.miami.edu/academics/phd-in-biostatistics/phd-courses

Variations on this basic plan are permitted and decided on a case-by-case basis. Candidates may earn the MS on as part time or full time students.

PhD students are expected to pass a first year exam between their first two years of study and to be examined on a thesis proposal normally at the end of their third year of study.

To obtain detailed program curricula on the Master of Science and PhD in Biostatistics, please contact our offices at the address below or visit our website at http://www.biostat.med.miami.edu/

Biostatistics Course Listing
HUMAN GENETICS AND GENOMICS
Dept. Code: HGG

http://biomed.miami.edu/default.asp?p=212

THE PROGRAM

The graduate program in Human Genetics and Genomics is part of the University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. This program aims to train scientists broadly in areas of human genetics and genomics relevant to human health and disease. Modern medicine is increasingly dependent on "genomic literacy" among practitioners and patients, and training the scientists who will work in genomics is an important mission of our program. Individuals earning PhD degrees in human genetics will have various career options, including clinical laboratory (after fellowship training and board certification, for which existing programs are available at the University of Miami), research laboratory, or computational research in academia, healthcare, and the biotechnology industry.

During the first year PIBS curriculum, students will have the opportunity to take two introductory short courses: Variation and Disease and Family Studies and Genetic Analysis. Rotations through faculty laboratories provide students with hands-on experience in various research areas. The rotations also provide the student the background necessary to select their dissertation advisor and area research.

During the second year the curriculum focuses on core coursework in molecular and computational genetics, biostatistics, and seminars and journal clubs. During the second and third years of study, students formulate and defend a dissertation proposal.

During the third year, students choose to pursue one of two tracks within the program: molecular genetics or computational genetics. Course requirements differ slightly between these two paths: students in the molecular genetics track will take Advanced Topics in Molecular Genetics while the Computational Genetics track students take Fundamentals of Genetic Epidemiology and Medical Biostatistics II. All students participate in a one-credit clinical rotation during their third or fourth years, and complete a teaching practicum.

APPLYING TO THE PROGRAM

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor's degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute
prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development. Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study.

- Students should apply online at: www.biomed.miami.edu

Human Genetics & Genomics Course Listing
MICROBIOLOGY AND IMMUNOLOGY
Dept. Code: MIC

www.biomed.miami.edu/micro

Objective

The objective of the Microbiology and Immunology (MIC) graduate Program is to provide multi-faceted training opportunities that lead to competitive postgraduate careers. The program trains students to rigorously investigate central topics in Microbiology or Immunology and their biomedical applications based on a broad comprehension of interdisciplinary science provided by the Program in Interdisciplinary Biomedical Sciences (PIBS) in the first year. Thereafter, the MIC Graduate Program offers students a specialty curriculum that is interactive and discussion based. Furthermore, students are in charge of a research project in either viral or bacterial pathogenesis or in molecular immunology, autoimmunity, tumor immunity or transplantation.

Goals

The goals of the MIC Graduate Program include:

1. Train up creative and critical-thinking scientific minds with a solid understanding of Microbiology or Immunology
2. Train technical laboratory skills necessary to perform experiments in the area of specialization
3. Continue training skills necessary to present scientific findings orally and in writing, including independent research plans as well as competitive manuscripts and grant proposals
4. Prepare students to become the teachers of tomorrow by involving them in the active teaching process of a laboratory class for undergraduate students (Microbiology 301)
5. Nourish the next generation of a networked community of scientists that is well prepared for challenging postgraduate careers in academic and non-academic settings.

ADMISSION REQUIREMENTS

All students interested in Microbiology and Immunology doctoral graduate programs are admitted through the Program in Interdisciplinary Biomedical Sciences (PIBS). Applicants should have a bachelor’s degree in a biological or related discipline (e.g., chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, physics, chemistry, or biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting, an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue cutting edge biomedical research. The PIBS Admissions Committee will review and make decisions on complete applications after December 15th. Applicants should apply online at: www.biomed.miami.edu
First year of Graduate Study

In the first semester, students of all graduate programs participate in the common PIBS curriculum for the biological and biomedical sciences. The core curriculum also offers learning opportunities in biostatistics, ethics, graduate development and in databases skills. Coursework relating to Microbiology and Immunology is largely being offered in the second semester.

The first year includes learning more about different programs, performing laboratory rotations with potential dissertation mentors and ultimately selecting both a program and mentor. To facilitate this process students are initially mentored by a senior student and faculty member. The students rotate through at least three laboratories before they chose mentors and formally enter the MIC graduate program. For a listing of our faculty research interest please visit our website: [www.biomed.miami.edu/micro](http://www.biomed.miami.edu/micro).

The Microbiology and Immunology Program

The Microbiology and Immunology Graduate Program accepts only students who wish to pursue the Doctor of Philosophy (Ph.D.) degree. The program accepts an individual with the ultimate goals of developing a creative and critically thorough research scientist. Such development is encouraged through the student’s performance of experimental protocols intended to address outstanding questions rooted in scientifically important areas of research.

Selection of a mentor to supervise dissertation research is major function during the first year of graduate study. Mentor selection is intended to be an experience in decision making in a supportive environment that launch a very intense relationship between a graduate student and a mentor.

After selection of a mentor, the mentor advises the student with regard to both course work and research. He may call on the student’s Progress Committee for additional advice. The MIC Graduate Program Office and its director are available for additional advice.

Degree Requirements

Sixty credits beyond the baccalaureate degree are the minim requirements for the Ph.D. and 36 credits must be of coursework at the graduate level and 24 credits of thesis research must been taken in residence at the University of Miami. In addition students must pass the MIC Qualifying Exam. They will schedule defend their Ph.D. dissertation after at least one peer-reviewed; first-author manuscript with primary experimental data (no review) has been accepted or in presses before the time of their defense, in a reputable journal in the areas of investigation. The Obtaining a doctoral degree in Microbiology and Immunology normally requires five to six years beyond the bachelor’s degree. The degree earned will be a Doctor of Philosophy in Microbiology and Immunology.
Financial Support

All students accepted are awarded a stipend of $27,000 per annum (as of June 1, 2012) and receive a full tuition scholarship. In addition, if students choose the University of Miami graduate student health insurance program, 80% of the individual insurance premium will be covered.

COMBINED M.D./PH.D. DEGREE

The Microbiology and Immunology Graduate Program participates in the School of Medicine’s MD/PhD Program. Medical students interested in advance research in Microbiology and Immunology should consult the Director of the MIC Graduate Program (Mathias Lichtenheld, M.D., mlichten@med.miami.edu).

Microbiology and Immunology Course Listing
Scientists in the Molecular and Cellular Pharmacology Program make use of the knowledge and techniques of biology, chemistry and physics to study the action of drugs, hormones and neurotransmitters on living systems and, more generally, the mechanisms through which signals are recognized and transduced by cells. The goals of the research in this department are: 1) to identify new targets and pathways for development of pharmaceuticals; 2) to use drugs as tools in the study of basic biological processes; and 3) to develop and study agents that may be beneficial in the treatment of disease.

A variety of technical approaches is used, including genetics, molecular biology, protein biochemistry and biophysics, fluorescence microscopy, immunology, computer modeling, cell culture, imaging, gene expression profiling, proteomics and whole animal studies including transgenic and genetically engineered mouse models. The faculty are a mixture of senior scientists who are recognized leaders in their respective fields and more junior faculty with recent training in state-of-the-art approaches to important biomedical problems.

The Department’s more than 40 graduate students and postdoctoral fellows contribute to the creative and stimulating scientific atmosphere.

Research interests of the faculty include:

Cardiovascular Pharmacology/Signaling/Muscle Contraction:

Investigators in this area study transcriptional regulation of gene expression and intracellular signals associated with the growth and function of the heart. They study ion channels, membrane events, blood vessels, etc. Studies of cardiac muscle contraction and the effect of disease causing mutations in the contractile apparatus of the heart on heart performance and morphology are also being pursued.

Current research areas include structure/function relationships in the proteins of the thin (troponin complex) and thick (myosin) filaments in health and disease, the role of specific ion channels in ventricular hypertrophy and its alleviation, excitation-contraction coupling in skeletal and cardiac muscle, proto-oncogene regulation of cardiac-specific genes, signaling in cardiac myocytes including the characterization of multimolecular enzyme complexes, apoptosis during myocardial ischemia, and the potential of stem cell based therapy for cardiac disease. A new study has been launched to investigate the effect of bone marrow stem cells in cardiac repair. Research in this area is in part supported by a National Heart Lung and Blood Institute Cardiovascular Pharmacology Training Grant. The students will have the opportunity to receive training in specific cardiovascular techniques utilized in the Program as well as attend cardiovascular journal club to learn about new findings in the cardiovascular field.
Neuropharmacology/Neuroscience:

Investigators in this area study the development, function, pharmacology, and diseases of the nervous system.

Current research interests include neuronal signaling through G-proteins, Ca$^{2+}$, and cyclic nucleotides, growth and guidance of axons during development and regeneration after injury, molecular control of dendrite development, control of physiological functions by the nervous system; molecular mechanisms and cell biology of olfaction and phototransduction; the genetic and cellular basis of neural development and degeneration using the fruit fly *Drosophila melanogaster* as a model system.

Cell Biology/Cancer:

Investigators in this area study cell cycle control and cancer, gene expression, mechanisms of hormone action, signal transduction, cytoskeleton, membrane transport, stem cells, and novel therapeutics.

Current research interests include steroid hormone regulation of gene expression and cell proliferation; cell cycle checkpoints during DNA replication; protein trafficking including endocytosis and exocytosis; control of cell polarity and morphogenesis; cilia in pulmonary function; molecular basis of human lymphoma; endocrine-related cancers including prostate and breast; stem cell maintenance and therapy; stem cell differentiation in hematopoiesis and physiochemical and metabolic aspects of drug design.

Model Systems:

Many investigators are using model organisms for their studies. These include transgenic and knock-out/knock-in mouse models Xenopus, Drosophila and yeast models. Yeast and Drosophila are important models because of the powerful molecular and genetic approaches and tools available. Xenopus provides a unique system for studying development and for protein expression and analysis. These systems are being used to study fundamental processes such as apoptosis, cell cycle, signal transduction, membrane dynamics, cytoskeleton, cell polarity, olfaction, development of the cardiovascular system, neurogenesis and neuronal degeneration. All of these processes are conserved in humans, so these systems serve as important models of human diseases. Investigators are also using these systems to screen for therapeutic agents and to identify targets of toxins and other natural, synthetic or pharmacologically relevant compounds.

Training Program:

In the first year, students receive a solid foundation in biomedical science. The core coursework ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of student development. In subsequent semesters, students take core courses encompassing mechanisms of drug action, neuropharmacology, cardiovascular pharmacology and intracellular...
signal transduction. A variety of elective courses are offered by this department and others.

Students begin their dissertation research at the end of the first year and complete their course requirements in the second year. In subsequent years, students devote their efforts to original thesis research. The department sponsors the visits of internationally-known scientists, who discuss their research in formal seminars and meet with students and faculty. Weekly intradepartmental seminars keep students abreast of new developments within the School of Medicine.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the 1st year students choose mentors and formally enter individual graduate programs.

THE REQUIREMENTS FOR THE PH.D. DEGREE IN MOLECULAR AND CELLULAR PHARMACOLOGY

These consist of 36 credit hours of graduate courses and seminars and 24 credits of Thesis Research. Students are required to pass a qualifying examination at the completion of their second year before undertaking Thesis Research at an intensive level.

The recruitment and training of applicants from underrepresented minority groups is an important goal of the Program.

Pharmacology Students supported by the National Institutes of Health training program must be United States citizens or permanent residents.

Other sources of support may be available on a limited basis for foreign applicants.

Molecular and Cellular Pharmacology Course Listing
MOLECULAR CELL AND DEVELOPMENTAL BIOLOGY  
Dept. Code: MDB

www.biomed.miami.edu/cellbio

The graduate program in Molecular Cell and Developmental Biology is an interdepartmental program, providing a wide range of research opportunities, comprised of faculty members from the Departments of Cell Biology, Ophthalmology, Surgery, Medicine, Neurology, Neurosurgery, Molecular and Cellular Pharmacology, Urology, Microbiology and Immunology.

Students have the opportunity to do research in the many areas of modern cell, molecular and developmental biology. Research topics including the cytoskeleton, cell surface molecular biology, stem cells, lens, corneal and retinal biology, protein processing and sorting, signal transduction, airway biology, regulation of gene expression in development, podocyte biology, cancer biology, neuromuscular development, malignant transformation, growth factors, epithelial cell biology, organogenesis and tissue repair, pattern formation in early development, RNA localization, mitochondrial molecular biology and cancer therapeutics.

The primary objective of this interdisciplinary graduate program is to prepare students for careers as independent, Ph.D. level researchers and educators, in both academic institutions and in the biotechnology industry and other venues.

Applicants are accepted only for the Ph.D. or combined M.D./Ph.D. degrees.

DEGREE REQUIREMENTS

Minimum credit requirements for the Ph.D. degree are set by the University at 36 course credits (including specific required courses) and 24 credits hours of research. The course credits must be earned in graduate level (500 and above) courses. Elective courses may be taken from the graduate courses offered by this program, or from a large variety of advanced courses offered by other departments at the University of Miami.

Typical coursework includes: Interdisciplinary Biomedical Studies, Seminar, Journal Club, Biological Macromolecules, Professional Skills and Ethics, Tumor Biology, Molecular Genetics, Developmental Biology, Advanced Molecular Cell Biology, Biostatistics Workshop and Histology. The interdisciplinary biomedical studies course covers fundamental topics of cellular and molecular biology, biochemistry, cellular physiology, neurobiology, and immunology.

Other requirements include participation in a departmental seminar series, a journal club, and three semesters of advanced topics courses.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology,
Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Previous research experience and publications are considered a plus.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in modern biomedical science. The core coursework in the fall includes topics ranging from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of scientific and career development. Specific topic coursework relating to the individual graduate student research programs is done largely in the second and third semesters of study.

The first year is also focused on choosing a dissertation mentor and a program. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students do research rotations in at least 3 laboratories chosen by the student from any of the biomedical sciences graduate faculty. At the end of the 1st year students choose mentors and formally enter individual graduate programs.

Students should apply online at: www.biomed.miami.edu

**Molecular Cell and Developmental Biology Program Core Curriculum:**

- MDB601 Seminar/Journal Club/Student presentations
- MDB651 Advanced Molecular Cell Biology
- MDB652 Current Topics in Mammalian Development
- MDB653 Histology
- MDB665 Tumor Biology or equivalent courses in Neuronal Cell Biology / Cell Biology aspects of human disease.
- MDB680 Research Ethics
- IBS683 Professional Skills and Ethics I
- IBS620 Scientific Writing I
- EPH501 Biostatistics
- MDB730 Doctoral Dissertation (pre-candidacy)
- MDB740 Doctoral Dissertation (post-candidacy)
- MDB750 Research in Residence
The program strongly encourages attendance to scientific meetings and travel awards for this purpose are made available to the students whenever possible.

**COMBINED M.D.-PH.D. DEGREE**

The Department participates in the Miller School of Medicine’s combined M.D.-Ph.D. Program.

The curriculum will be tailored to the needs of the individual student.

[Molecular Cell and Developmental Biology Course Listing](#)
The Neuroscience Program is an interdisciplinary program established in 1988 leading to the Ph.D. in Neuroscience.

The program aims to train highly-qualified individuals for independent research and teaching careers in the Neurosciences.

More than 80 participating faculty are located in several departments and schools, including Cell Biology and Anatomy, Molecular and Cellular Pharmacology, Physiology and Biophysics, Biology, Bioengineering, Psychology, The John P. Hussman Institute for Human Genomics, and the Rosenstiel School of Marine and Atmospheric Sciences, as well as several clinical departments such as Neurological Surgery, Neurology, Ophthalmology, Pathology, Physical Therapy, and Psychiatry.

Neuroscience Program faculty pursue a wide variety of research interests, including cellular and molecular mechanisms involved in signal transduction, gene expression in electrically excitable cells, synapse formation, neuronal growth and survival, integrative neuroscience, neuroimmunology, stroke, neuronal regeneration, autonomic control, brain metabolism and cerebral blood flow, degenerative changes within specific neural pathways in Parkinson’s and Alzheimer’s diseases, and genetic analysis of neurological disorders.

ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged.

Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), excellent academic records and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year, all students take a common curriculum to build a solid foundation in biomedical science. The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the 1st year, students choose mentors and formally enter individual graduate programs.

- Students should apply online at: www.biomed.miami.edu

THE NEUROSCIENCE PROGRAM

Graduate training is the major goal of the program, with emphasis on cellular, molecular, and genetic approaches to Neuroscience.

A single core curriculum provides the didactic scaffold of the program. This curriculum consists of courses in Developmental Neuroscience Membrane Biophysics, Introductory Neuroscience, Neural Systems, and Neuroanatomy. The core courses are supplemented with a variety of Special Topics Short Courses. Students also attend research seminars and a scientific journal club.

The Neuroscience Steering Committee guides the students, overseeing their coursework, until they have passed their qualifying exams. From then on, their progress is supervised by individually-tailored dissertation committees. The Neuroscience Program also participates in the School of Medicine’s MD/PhD combined degree program www.biomed.miami.edu/mdphd.

REQUIREMENTS FOR A PH.D. DEGREE IN NEUROSCIENCE

Students are required to complete 36 credit hours of graduate courses and seminars, including at least 18 credit hours in Neuroscience and 24 credits of Dissertation Research.

Students are required to pass a qualifying examination during their second year before undertaking Dissertation Research at an intensive level.

Inquiries should be directed to:

RESEARCH AREAS:

1. BEHAVIORAL NEUROBIOLOGY
2. DEVELOPMENTAL NEUROBIOLOGY
3. CELL/MOLECULAR NEUROBIOLOGY
4. CNS INJURY AND REPAIR
5. GENETIC ANALYSIS OF NEUROLOGICAL DISORDERS
6. NEUROLOGICAL DISORDERS
7. PSYCHIATRIC DISORDERS
8. SENSORY NEUROBIOLOGY
9. SYNAPSES
10. TRANSMITTERS AND RECEPTORS

Neuroscience Course Listing
PHYSICAL THERAPY  
Dept. Code: PTS  
www.pt.med.miami.edu

The Department of Physical Therapy is committed to providing quality educational experiences that enable its graduates to effectively carry out the expanding responsibilities of physical therapists as autonomous health care providers practicing in preventive, evaluative, maintenance, acute care and rehabilitation settings, and in educational and research environments.

The individual and collective efforts of the members of the Physical Therapy faculty are directed toward attaining specific goals and objectives as expressed in the philosophic statement of the American Physical Therapy Association.

The Mission of the Department of Physical Therapy (revised in December, 2000; re-affirmed in 2012) in accordance with the Mission of the Miller School of Medicine is to provide excellence in physical therapist education, to expand evidence-based practice of physical therapy through research, to provide high quality care to all who need it, and to be a community partner.

ADMISSION REQUIREMENTS

DOCTOR OF PHYSICAL THERAPY (entry level D.P.T.)

Applicants should have a baccalaureate degree in a related field and 3.0, or “B” average or better in the following courses:  
**English Composition/ Writing intensive course** (3 semester or 5 quarter hours);  
**Introduction to Statistics** (3 semester or 5 quarter hours);  
**Psychology** (3 semester or 5 quarter hours);  
**General Biology** (3 semester or 5 quarter hours);  
**General Chemistry I and II each with Lab** (8 semester or 12 quarter hours);  
**General Physics I and II each with Lab** (8 semester or 12 quarter hours);  
**Human Anatomy** (3 semester or 5 quarter hours);  
**Human Physiology** (3 semester or 5 quarter hours) or **Combined Anatomy and Physiology I &II** (6 semester or 9 quarter hours).

I. APPLICATION PROCEDURE  
We are now accepting applications only thru Physical Therapist Centralized Application Service (PTCAS), go to www.ptcas.org to apply.

A. Application deadline is October 15; We encourage you to apply early.  
Classes begin in May of each year. Application requirements consist of the following:

1. Submission of all application materials to PTCAS. Completion of prerequisites, with a minimum GPA of 3.0 on a 4.0 scale.

2. Demonstration of knowledge concerning the physical therapy profession by submitting:
   a minimum of 100 hours of first-hand observation and/or work experience related to the practice of physical therapy.
This experience must be substantiated in writing by a registered/licensed physical therapist. The name and email of the physical therapist(s) is required for verification.

3. Submission of three to four (3-4) letters of recommendation from people who can address both the applicant’s moral character and potential as a physical therapist.
   At least one letter must be written by a registered/licensed physical therapist, and one or more from faculty.

4. An on-site interview is required and will be offered to those applicants who have met the admission criteria.

5. Graduate Record Exam (GRE). Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website at: www.ets.org/s/gre/pdf/concordance_information.pdf for the official ETS Concordance Table. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 3.0 on the analytical section is also required.

6. International students are to complete the PTCAS application and submit official transcripts to the DPT program instead of PTCAS. Transcripts that are not in English must include an official translation. International applicants must have all transcripts evaluated by the University of Miami’s Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation. International applicants must meet ALL the necessary requirements to qualify for a student visa.

For more information contact:
7. Admissions Office
8. Department of Physical Therapy
9. 5915 Ponce de Leon Blvd., 5th Floor
10. Coral Gables, FL 33146
11. phone 305-284-4535
12. email: physicaltherapy@miami.edu
   www.pt.med.miami.edu

DOCTOR OF PHILOSOPHY IN PHYSICAL THERAPY (Ph.D.)

Application requirements: Applicants to the Physical Therapy PhD Studies Program must have a clinical degree in physical therapy from an accredited physical therapy program and be eligible for licensure to practice physical therapy in the United States. Students enrolled in the PhD in Physical Therapy program at the University of Miami work closely with a faculty mentor from their first days in the program. As a first step in the application process, the applicant must identify a track of interest and contact a faculty mentor in the selected track. Students are admitted to the program upon endorsement of a faculty mentor and completion of all admission requirements, with final selection made by the PhD Studies
Committee. Stipend and tuition support is potentially available for qualified applicants.

- **Motor Control:** Contact Edelle Field-Fote PhD, PT edee@miami.edu
- **Musculoskeletal Prosthetics and Amputee Rehabilitation:** Contact Robert Gailey, PhD, PT rgailey@miami.edu
- **Outcomes Research:** Contact Kathryn Roach PhD, PT keroach@miami.edu OR Neva Kirk-Sanchez, PhD, PT nkirksanchez@miami.edu
  The applicant must meet all the general admissions requirements of the University of Miami Graduate School. Additionally, stipulations include:
  - Direct entry into the PhD program is dependent upon having any of the degrees below:
    - An entry-level Master’s Degree in Physical Therapy
    - An advanced Master’s Degree with a Bachelor’s Degree in Physical Therapy
    - A Bachelor’s Degree in Physical Therapy.
  - An applicant with a Bachelor's Degree in Physical Therapy, though able to commence course work in the PhD Program, will be required to complete the credits to equal that of Advanced Master’s Degree in Physical Therapy before final admission to the PhD Program.
  - Official Transcripts of all college work.
  - Three completed recommendation forms with at least one form completed by a physical therapist.
  - A letter indicating career goals and objectives.
  - Licensure or eligibility for licensure, as a physical therapist in the State of Florida (must be licensed within 1 year of admission).
  - GRE, The University of Miami requires a minimum of 1000 on the verbal and quantitative section with a minimum of 400 on the verbal section and a minimum of 4.0 on the analytical section.

Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website at: www.ets.org/s/gre/pdf/concordance_information.pdf for the official ETS Concordance Table. Graduate Admissions will be using this concordance table when reviewing exam scores. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 4.0 on the analytical section is also required. International applicants must submit a complete application and have all transcripts evaluated by the University of Miami’s Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation.

The research areas of the faculty are diverse, reflecting the clinical and scientific emphasizes areas of the faculty. Please refer to the Faculty Section for specifics.

For more information contact:

email:  edee@miami.edu
DEGREE PROGRAMS

DOCTOR OF PHYSICAL THERAPY (entry level D.P.T.)

The Department offers the clinical Doctor of Physical Therapy (DPT). The DPT program recognizes the importance of in-depth basic and applied science knowledge and the humanities. As such, the curriculum is carefully sequenced to allow students to develop skills in both classroom and clinical settings.

Faculty also understand the importance of presenting problem-solving skills in conjunction with fundamental physical therapy concepts so that students will develop the professional attitudes and insights required for sustained and continued growth throughout their careers.

The entry-level doctoral program (DPT) is offered under the auspices of the Department of Physical Therapy, University of Miami Miller School of Medicine.

DOCTOR OF PHILOSOPHY IN PHYSICAL THERAPY (Ph.D.)

The University of Miami Doctor of Philosophy in Physical Therapy program develops physical therapist students for leadership positions in academic and research settings. Along with guiding students in the development of requisite knowledge and skills, the program promotes professional socialization into the role of academic faculty. We believe preparation to teach and undertake research in a physical therapy curriculum at the university level requires excellence in three dimensions: 1) Expertise in a specified content area; 2) Advanced knowledge and skill in research methods, design, and implementation of analysis and communication of results; and 3) Proficiency in instructional design, teaching methods, and evaluation. The successful integration of these three dimensions, each complex in its own right, provides the means for the student to develop expertise in testing, analyzing, researching, and teaching about disorders that interfere with function. Unifying these three core areas is the process of socialization to the role of a faculty member, including an awareness of academic responsibilities and sensitivity to the needs of the adult learner.

In keeping with this philosophy, students develop breadth of knowledge through completion of coursework from three basic core areas: Concentration Core, Research Core, and Education Core. They develop depth by completing elective courses with the intent to build expertise in their respective areas of concentration. The successful graduate of this program will have the requisite knowledge and skills to integrate research findings and scientific theory with clinical observations. On this basis, the graduate will be prepared to perform original research aimed at developing new knowledge to enhance the scientific basis of clinical practice and theoretical principles that will advance the profession of physical therapy. The program offers opportunities for the student to gain skill in communicating theories, concepts and research findings and to experience the roles and responsibilities of an academic faculty member. Students complete a dissertation project in which they develop and conduct a unique and significant research investigation with the guidance of a Physical Therapy faculty member as research advisor.
DEGREE REQUIREMENTS

DOCTOR OF PHYSICAL THERAPY (D.P.T.)

To receive the Doctor of Physical Therapy degree, the candidate must:

1. Complete all coursework (105 credits) as required with an overall GPA of 3.0 or better.
2. Complete at least 3 credits of Elective coursework, in addition to the 105 credits.
3. Successfully complete the clinical internships (I-IV) required.

The University of Miami, Department of Physical Therapy has affiliations with 350 clinical sites locally and throughout the country.

Distant internships may incur additional expenses for the student.

DOCTOR OF PHILOSOPHY IN PHYSICAL THERAPY (Ph.D.)

The curriculum, for all three core content areas (Musculoskeletal, Motor Control, and Outcomes Research) consist of:

- 19 - 21 credits in a core concentration area (i.e., Motor Control, or Outcomes Research) 12 credits in core education courses,
- 12 credits in core research courses,
- 6 - 21 credits in electives in area of concentration and
- 12 credits of Doctoral dissertation for a total of 60-75 credits.
- Credits may vary depending on educational background of applicants.

Physical Therapy Course Listing
PHYSIOLOGY AND BIOPHYSICS
Dept. Code: PHS

www.biomed.miami.edu/physiol

The Department offers training leading to the Ph.D. degree in Physiology and Biophysics.

Inquiries are also invited from those wishing to pursue a dual, M.D./Ph.D., degree program.

The M.S. degree is normally bypassed in the Department.

Physiology and Biophysics studies the molecular basis for fundamental processes related to life such as:

How does the brain work?
How do we remember?
How does the heart beat?
How do we breathe?
How do we see?
How do we move?

Research facilities and guidance for graduate and postdoctoral work are available in developmental neurobiology, sensory receptor mechanisms, axonal electrophysiology, ionic mechanism of the nerve impulse, electrophysiological and molecular aspects of synaptic and neuromuscular transmission, ion channels in nerve and muscle cell membranes, metabolic aspects of nervous function, molecular neuroscience, neuroimmunology, protein structure-function studies, molecular recognition, ligand-receptor interactions, neuropeptides, axonal growth, neurotrophic factors, cytokines, gene targeting, transgenic mice, neuronal apoptosis, nerve regeneration, molecular adhesion, and regulation of muscle contraction.

As described below, entrance into all graduate programs at the Miller School of Medicine is now through the Program in Biomedical Sciences (PIBS).

After entry into the Physiology and Biophysics program students take courses PHS 510, 511, 512, 641, and 642 unless they have mastered the equivalent of these. In planning their programs, students should take advantage not only of courses given by this Department but also of pertinent course offerings of other departments. Once the student has a sponsor, who, in consultation with a supervisory committee appointed when the dissertation project is chosen, provides guidance.

Since the Department aims to prepare its graduates for careers in research and teaching, all students in the Department are expected to participate in some teaching. Fellowships are general awarded to accepted students. Traineeships are also available under an NIH supported Training Grant.
ADMISSION REQUIREMENTS

All students are admitted through the Program in Biomedical Sciences (PIBS) for the PhD programs in Biochemistry & Molecular Biology, Cancer Biology, Human Genetics & Genomics, Microbiology & Immunology, Molecular Cell & Developmental Biology, Molecular & Cellular Pharmacology, Neuroscience, and Physiology & Biophysics. The PIBS Admissions Committee will review and make decisions on applications after December 15th.

Applicants should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no absolute prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Strong candidates will have research experience in a laboratory setting (including publications of abstracts and/or papers), an excellent academic record and GRE scores, excellent letters of recommendation from scientists who know the candidate well, and the motivation to pursue state-of-the-art biomedical research.

In the first year all students take a common curriculum to build a solid foundation in biomedical science. The core coursework in the fall ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of faculty development. Specific coursework relating to the individual graduate programs is done largely in the second and third semesters of study.

• Students should apply online at: www.biomed.miami.edu

The first year is also focused on choosing a program and a dissertation mentor. All students are initially mentored by a senior student and a faculty member to facilitate this process. In the 1st year, students rotate through at least 3 laboratories chosen from any of the biomedical sciences graduate faculty. At the end of the 1st year students choose mentors and formally enter individual graduate programs.

REQUIREMENTS FOR THE PH.D. DEGREE INCLUDE:

36 graduate credits in courses and seminars and an additional 24 credits in dissertation research.

Satisfactory performance on both written and oral parts of a qualifying examination that will require demonstrating mastery of relevant physiological principles and methods. The examination must be passed not later than 24 months after enrollment in the Department. Up to 12 transfer credits earned elsewhere may be acceptable toward Ph.D. requirements.

The Ph.D. dissertation research must be original work of a quality acceptable for publication in a first-rate scientific journal.

For further details on requirements, the general information sections of this Bulletin should be consulted.
Prospective applicants are urged to write early to the Department for further information on the Department’s activities, training resources, requirements, and financial aids.

Address inquiries to:

Dr. D. Landowne, Chair
Graduate Studies Committee
Department of Physiology and Biophysics
P. O. Box 016430
Miami, FL 33101
305/243-6821
305/243-5931 (fax)
email to physiology@miami.edu or visit http://biomed.miami.edu/physiol

M.D./PH.D. PROGRAMS

Students interested in pursuing careers in academic medicine or, more generally, in medically-related research may wish to enter a dual (M.D./Ph.D.) degree program. Details about this program and application procedures are obtainable from the Graduate Studies Committee Chairman at the address given above.

Physiology and Biophysics Course Listing
PHILLIP AND PATRICIA FROST SCHOOL OF MUSIC – GRADUATE
www.music.miami.edu/gradstudies/

DEPARTMENTS
- DEPARTMENT OF INSTRUMENTAL PERFORMANCE - Dept. Code: MIP
- DEPARTMENT OF KEYBOARD PERFORMANCE - Dept. Code: MKP
- DEPARTMENT OF MUSIC EDUCATION AND MUSIC THERAPY - Dept. Code: MED
- DEPARTMENT OF MUSIC MEDIA AND INDUSTRY - Dept. Code: MMI
- DEPARTMENT OF MUSIC THEORY-COMPOSITION - Dept. Code: MTC
- DEPARTMENT OF MUSICOLOGY - Dept. Code: MCY
- DEPARTMENT OF STUDIO MUSIC AND JAZZ - Dept. Code: MSJ
- DEPARTMENT OF VOCAL PERFORMANCE - Dept. Code: MVP

ADMISSION REQUIREMENTS
I. Students wishing to enroll for graduate credit in the Frost School of Music, whether or not they plan to become candidates for a degree, must fulfill the requirements for admission to the Graduate School listed elsewhere in the Bulletin.

II. In addition to these general requirements, the student must meet the following requirements of the Frost School of Music:

A. The Graduate Record Examination. (G.R.E. not required for Master of Music in Performance, Jazz Performance, and Studio Jazz Writing).

B. An on-campus audition is required of all D.M.A. applicants in Performance; M.M. applicants in Performance may audition in person or by recording. Prospective students for any major are encouraged to seek an interview with members of the University of Miami staff when they are serving as guest conductors and clinicians in various parts of the country.

C. An interview either on or off campus is required of all prospective Ph.D. students and D.M.A. students in composition and jazz composition.

D. Prospective Composition majors, Media Writing and Production majors, and Studio Jazz Writing majors are required to submit a portfolio of original compositions.

E. A writing sample of a major paper or thesis is required of applicants in Choral Conducting, Music Therapy, Musicology, Vocal Pedagogy, and Vocal Performance.

F. Prospective Ph.D. students in Music Education are required to show evidence of successful teaching experience and provide a writing sample of a major paper or thesis.

G. Placement Examination: During the orientation prior to registration, new master’s and doctoral students are required to take placement tests for entrance to graduate courses. Placement auditions are also required in performance before assignment to ensembles. Courses to remedy deficiencies indicated by these examinations must be taken at the earliest opportunity. (A student is presumed deficient in any area in which he/she does not take the entrance examinations.)

DEGREE REQUIREMENTS

DOCTOR OF MUSICAL ARTS (DMA)

The purpose of the Doctor of Musical Arts is to train the most promising musicians at the highest musical and intellectual level for prominent careers in their field. The degree stresses excellence in performance, composition, scholarship, and teaching. By its nature, the Doctor of Musical Arts provides opportunities for students with proven accomplishment to prepare themselves for the professorship.

For the Doctor of Musical Arts in Performance, Keyboard Performance and Pedagogy, Composition, Jazz Composition, Jazz Performance, Vocal Pedagogy and Performance, and Conducting, the candidate must meet all the general requirements for the Ph.D. degree with respect to residence, research tool requirements, total minimum hours, and written and oral examinations. The major differences between the D.M.A. and the Ph.D. are the creative efforts and performance that replace the dissertation requirements in the D.M.A. degree program. There will also be some variation in the research tool requirements in order that they apply in a more practical way to the needs of students.

ENTRANCE REQUIREMENTS

Selection of student based on:

1. Graduate Record Examination (Aptitude portion)
2. Academic record
3. Recommendations
4. Personal audition (Performance Majors); preliminary video tape required for instrumental conducting
5. Samples of musical composition (Composition Majors)
6. Writing Sample (major paper or thesis; Choral Conducting and Vocal Performance Majors)
PLACEMENT EXAMINATIONS

During the three days before registration, all new doctoral students are required to take examinations in music history and literature that will serve as placement tests or prerequisites for entrance to graduate courses. Courses to remedy deficiencies indicated by these examinations must be taken at the earliest opportunity.

DOCTORAL COMMITTEE

The committee is appointed when the student is formally admitted to a doctoral program. It will consist of a minimum of four members, three from the area of concentration and a minimum of one from the areas of Music Theory, Musicology, or Music Education (an approved member from a department outside of the Frost School of Music is possible). A committee may be expanded beyond the minimum number of members based on the needs of the student to a maximum of six. Of these, three (including the committee chairman) shall be regular members of the Graduate Faculty.

Responsibilities of the committee shall include the following:

1. Overseeing all of the students work prior to admission to candidacy, including academic program planning and advising as to recital repertoire.

2. Advising the student regarding relevant research competencies (tools) and ensuring that the student demonstrates these competencies prior to admission to candidacy.

3. Adjudging the quality of the student’s recitals, pedagogy presentations or compositions.

4. Overseeing the doctoral essay or lecture recital, including approval of the topic and proposal, supervision of the writing of the essay or lecture recital, assessment of the quality of the final essay or lecture recital, and the quality of the final essay defense. (In cases where special faculty expertise is needed for a particular essay topic, changes in membership of the doctoral committee may be made. Membership of the essay committee is recommended by the department or program concerned, and approved and appointed by the Dean of the Graduate School.)

RESEARCH TOOL REQUIREMENTS

The candidate will be required to show competency in the research tools recommended by the student’s doctoral committee, which is responsible for ensuring that the tools are relevant to the student and that procedures for demonstration of the competencies are appropriate. Research tools must be demonstrated and documented prior to admission to candidacy.

COURSE WORK

Extent of course work is determined by Placement Examinations; however, candidate must complete a minimum of 42 credit hours.
COGNATES

Doctor of Musical Arts students may select an additional formal area of study through the cognate option. The Departments in which the cognate resides administers the cognate. Students must apply to the cognate Department for admission. The admission process may include an audition, interview, portfolio, or testing as determined by the cognate Department. Students must complete all requirements specified for a cognate to be recognized as having completed the cognate. Otherwise, the credits will be considered electives. No credits required in the DMA program can apply to the cognate. Any overlap will require approved course substitutions within either the DMA program or the cognate as determined to be most appropriate by the Dean of Graduate Studies.

Procedures for Entering a Cognate
1. Review the cognates offered on the Graduate Studies web site.
2. Select the cognate you would like to pursue.
3. Contact the Department in which the cognate resides and obtain written approval of your entrance. A simple e-mail by the faculty member in charge of the cognate to the Graduate Studies Office would suffice.
4. Visit the Graduate Studies Office to formally sign-up for the cognate and to obtain a copy of the Academic Program Record (APR) for the cognate.

**HIGHER EDUCATION**

Music Assessment (MED664) 3 credits
Any combination of the following three required course types:
- Special Projects: Higher Ed. in Music (MED693, 1-2 cr.)
- Pedagogy course(s) in music or music ed. (2-4 cr.)
- Doctoral Seminar(s) (MED680, 1-2 cr.)
Electives selected from the following courses 3 credits
- Organiz. & Admin. in Higher Ed. (EPS533, 3 cr.)
- Higher Ed. in the U. S. (EPS603, 3 cr.)
- International Music Ed. (MED620, 3 cr.)
- History & Philosophy of Music Ed (MED660, 3 cr.)
- Music Learning & Curriculum (MED662, 3 cr.)
- Music Research Methods (MED663, 3 cr.)

**INSTRUMENTAL PERFORMANCE**

Applied Performance Instruction 6 credits
Approved Performance Ensembles 6 credits

**JAZZ PERFORMANCE**

Applied Performance Instruction 6 credits
Select one course from below: 3 credits
- Jazz Pedagogy (MSJ544, 3 cr.)
- Analysis of Jazz Styles (MSJ620, 3cr.)
Electives in Jazz Theory / Improv. / Ensembles 3 credits

**KEYBOARD PEDAGOGY**

Keyboard Pedagogy (MKP547) 3 credits
Seminar in Keyboard Pedagogy (MKP647) 3 credits
Keyboard Pedagogy Workshop (MKP650) 1 credit
Keyboard Pedagogy Internship (MKP680) 2 credits (1x2)
One from the following: 3 credits
A. MKP 5XX Intermediate to Advanced Repertoire
B. MKP 5XX Keyboard Pedagogy II: Keyboard Pedagogy Diagnostics
C. MKP 650 Keyboard Pedagogy Workshop (2 credits) and MKP 680 Keyboard Pedagogy Internship (1 credit)

**MUSIC BUSINESS**

Entrepreneurship for Musicians (MMI530) 3 credits
Music Copyright Law (MMI674) 3 credits
Approved MMI Course Electives 6 credits

**MUSIC EDUCATION**

Psychology of Music (MED562) 3 credits
Seminar in Music Teacher Education (MED670) 1 credit
Approved electives in music education or other pedagogy 8 credits
MUSIC TECHNOLOGY (12 credits)

Select courses from those below: 12 credits
- Electronic Music Studio (MTC505, 2 cr.)
- MIDI and Control Processing (MTC506, 2 cr.)
- Digital Sound Synthesis and Processing (MTC507, 2 cr.)
- Multimedia for Musicians (MTC521, 3 cr.)
- Film Scoring I (MTC511, 3 cr.)
- Film Scoring II (MTC512, 3 cr.)
- Electronic and Computer Music Seminar (MTC667) 1-3 credits
- Intro To MIDI Seq. & Digital Workstations (MSJ522, 2 cr.)
- Audio Technology for Musicians (MMI520, 2 cr.)
- Digital Audio I (MMI502, 3 cr.)
- Technology in Music Education (MED570, 3 cr.)
- Computer Applications in Music Education (MED571, 2 cr.)

MUSIC THEORY (12 credits)

Enrollment in this cognate waives any other MTC requirements for the degree.

Select courses from those below: 12 credits
- The Aesthetics of Music (MTC501, 3 cr.)
- Sixteenth-Century Counterpoint (MTC513, 3 cr.)
- Advanced Counterpoint (MTC518, 3 cr.)
- Theory Pedagogy (MTC611, 3 cr.)
- Advanced Comprehensive Theory (MTC612, 3 cr.)
- Twentieth Century Idioms (MTC613, 3 cr.)
- Analytical Techniques (MTC617, 3 cr.)

MUSICOCOLGY (12 credits)

Bibliography (MCY528) 3 credits
Approved Musicology Courses 9 credits

VOCAL PEDAGOGY (12 credits)

Approved courses in pedagogy, vocal diction, or related courses.

VOCAL PERFORMANCE (12 credits)

Private Voice MVP VOM-P 4 credits
Vocal Pedagogy (MVP538) 2 credits
Vocal Pedagogy (MVP638) 2 credits
Language Diction for Singers (MVP65X) 4 credits

VOCAL ACCOMPANYING (12 credits)

Private Voice Lessons 2 credits
Language Diction for Singers (MVP65X) 2 credits
Vocal Accompanying (MKP687) 2 credits
Vocal Literature (Select one from below): 3 credits
- Art Song Literature (MCY525, 3 cr.)
- Operatic Literature (MCY522, 3 cr.)
Select courses from any below: 3 credits
- American Musical Theater (MCY583, 3 cr.)
- Graduate Courses in Vocal Performance
QUALIFYING EXAMINATION

To be taken upon completion of approximately 9 credit hours of work. Exams in the areas of

1. Musicology;

2. Music Theory-Composition; and

3. Music Education (If required by the program).

Performance and jazz performance majors must present a qualifying recital during the first semester in residence.

COMPREHENSIVE EXAMINATION

To be taken in major area (except performance) after completion of approximately 36 credit hours. Examination may be oral or written.

ADMISSION TO CANDIDACY

Doctoral students are admitted to candidacy after completing research tool requirements, qualifying and comprehensive examinations. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

PERFORMANCE AND CREATIVE REQUIREMENTS

D.M.A. students in performance, jazz performance, or keyboard performance and pedagogy may present one recital before the qualifying written examination (provided they have passed their qualifying recital). Before the second or third, depending upon program, recital they must have passed the Qualifying Examinations and removed all reservations for the written examinations in music theory, musicology, and music education, as well as having presented a proposal for the doctoral essay to their committee. Before the final recital the student must be admitted to candidacy (this requirement includes the completion of both the qualifying examination and research tool subjects). All recitals are to be presented during either Fall or Spring semesters.

Performance Majors

Students accepted in the program must present three full-length solo recitals. In addition, instrumentalists are expected to perform a concerto with orchestra or a chamber music recital. Vocalists are expected to execute one or more substantial roles in a large scale work, e.g., opera or oratorio in addition to the solo recitals. Students majoring in accompanying and chamber music will present one solo recital, one chamber music recital, and three accompanying recitals. For Keyboard Performance and Pedagogy, an approved combination of recitals and pedagogy presentations is required.

Jazz Performance Majors

Students must present three full-length recitals

Conducting Majors (Choral)

No less than two approved full recitals shall be presented by each candidate.
Conducting Majors (Instrumental)
Three approved public recitals (or the equivalent) with suitable performing
groups must be given during the period of residency and prior to the oral
examination.

Composition Majors
1. The candidate will be required to compose a piece of major proportions for
large ensemble. In addition, no less than three works for any instrumental or
vocal group combination will be required during the period of residency.

2. A formal written analysis of the major work will be required. This will serve
as the Doctoral Essay for composition majors.

3. Some form of a recital or public performance of the candidate’s
compositions will be required. This requirement could be fulfilled with a recital
that would include representative works composed during the student’s
residence.

By means of a written doctoral essay or a lecture recital all D.M.A. candidates will be
expected to give evidence of their ability to make an original scholarly investigation and
present its results in an articulate manner.

Final Oral Examination (administered during Fall and Spring semesters only): defense of the
creative or recreative work, and the written essay or lecture recital.

LECTURE RECITAL

The lecture recital is a major presentation whose content must pertain to musical
performance, musical analysis, performance practice, comparative editions, interpretation,
musical style, or other issues that directly relate to a central theme of music performance.
A written document of the lecture recital must be submitted to the Graduate School
following procedures similar to those of the Doctoral Essay.

MASTER’S DEGREES

I. Programs. The Master of Music Degree is offered with majors in the areas shown
above.

II. Ensemble Requirements. The curricula for Master of Music degrees in performance
and conducting include participation in one ensemble during each semester that a
student is registered for seven credits or more.

III. General Admission Requirements. Those seeking admission in Performance should
have an undergraduate major or its equivalent in the performance field chosen. Those
applying for admission in Music Education should have an undergraduate background
substantially equivalent to certification requirements and teaching experience. Students
entering all graduate degree programs must take placement tests at the beginning of
the first Fall or Spring Semester in residence. Those seeking admission in Composition,
Studio Jazz Writing, or Media Writing and Production must submit with the application a
portfolio of compositions as evidence of creative ability.

IV. Credits. A minimum of thirty credits of graduate level courses with an average of B and
no grade below C. All students must complete the required courses of their major.
V. Oral Examinations. An oral examination in defense of the thesis, project, or recital is required. Final oral exams are administered during Fall and Spring semesters only.

Conducting Recital Guidelines

Master’s Recital (1 Credit)
A compilation on DVD of conducting single or multiple works of live performances of major ensembles spread across the Masters’ experience. These performances are arranged in consultation with the major professor who assists in the preparation of the performances.

Master’s Advanced Recital (2 Credits)
A full-length conducting recital is prepared and presented. The ensemble(s) and repertoire will be selected in close consultation with the major professor who will assist in the preparation process. All aspects of performance preparation including scheduling, venue arrangements, program notes, and the like will be carried out by the student under the guidance of the major professor.

Performance Recital Guidelines

Master’s Recital (1 Credit)
A full-length recital performed publicly by the student that may include chamber music in which the student’s instrument plays a prominent role. Selection of repertoire is determined in consultation with the major professor who assists in the preparation of the performances.

Master’s Advanced Recital (2 Credits)
A full-length recital in which all music performed features the recitalist as a soloist. The recitalist will prepare extended program notes on the repertoire performed. Portions of the extended program notes are to be included with the recital program distributed to the audience. The performance is to be recorded in both audio and video so that the recitalist presents a DVD as evidence of the recital to the Dean of Graduate Studies prior to the end of the semester in which the recital was given. Repertoire will be selected in consultation with the major professor, who will assist in the preparation process. The student under the guidance of the major professor will carry out all aspects of performance preparation including scheduling, venue arrangements, program notes, and the like.

MM–Instrumental Conducting (MCDI)
Candidates must possess and demonstrate an unquestioned gift of musical leadership based upon broad experience with instrumental ensembles. Advanced orchestration must be included in the program. Admission requirements include a baccalaureate degree in conducting or performance, accumulated practical experience with instrumental ensembles, and experience equivalent to an undergraduate requirement in orchestration. Enrollment in this major is only by special permission.

MM–Instrumental Performance (MIP)

Violin: The candidate must show an adequate technical grounding in scales, arpeggios, bowing and phrasing, demonstrate adequate ability in sight reading on the instrument, and be able to read at sight simple piano accompaniments.

Harp: The candidate must have a mastery of scales and arpeggios in all octaves in both slow and rapid tempo, and in various rhythms, should have had orchestral and other ensemble experience, should be able to read orchestral parts at sight, and should have developed the ability to transcribe music written for keyboard (or other) instruments for use in orchestra or ensemble or accompanying.

Multiple Woodwinds: The applicant must demonstrate, by audition, proficiency in at least three of the following families of instruments: clarinet, saxophone, flute, and double reed. Applied instruction will include a minimum of six credits from the above groups as determined by the supervisory committee. The curriculum further includes two credits in MIP 547 and one credit in MED 541. The recital (whose content and evaluation are the responsibility of the student’s committee) will consist of performance on the candidate's major instrument, and on instruments from at least two other woodwinds. The student is expected to supply his/her own professional quality instruments.

Other Orchestral Instruments: The candidate must demonstrate a well-grounded technique and an able control of his/her instrument, be able to perform as a soloist with orchestra in a concerto or concert piece for the instrument, and should have acquired a sufficiently thorough orchestral routine to play in a professional orchestra. The candidate should also be able to read at sight simple piano music, and must have completed sufficient experience in band, orchestra and chamber music playing.

DEGREE PROGRAMS

DOCTOR OF PHILOSOPHY (PHD)

The Doctor of Philosophy program is offered in Music Education. Requirements for the degree will conform to those for the general Doctor of Philosophy degree, listed elsewhere in this Bulletin. The Ph.D. is a research degree requiring 60 credit hours beyond the Master's degree or 90 credit hours beyond a Bachelor's degree. Enrollment for the Ph.D. degree is limited. Acceptance into the program will be based on academic record, Graduate Record Examination Scores, personal suitability, recommendations, experience, and demonstrated teaching competency.

Students are admitted to candidacy after successful completion of course work, qualifying examinations in musicology, music theory, and music education, and research tool requirements. Research tools are selected in consultation with the student's advisor, and are related to the student's proposed dissertation research. Comprehensive examinations are given after all academic work is completed to meet the candidacy requirement. The student's dissertation research topic must be presented to and approved by the student's committee. No student gains the right to be recommended for the degree simply by completing course requirements. Final oral examinations are administered during Fall & Spring Semesters only.

- 3 credits  MCYXXX  Electives

Musicology students are expected to demonstrate proficiency in a language other than English, normally German, French, or Spanish. Proficiency examinations will be administered by the Musicology Department and will consist of 1-2 passages from representative scholarly readings. Alternatively, enrolling in GER 625, FRE 625, or an equivalent course at the graduate level may fulfill the requirement. This requirement should be completed by the beginning of the second year to facilitate research on the master's thesis.

MM–Choral Conducting (MCDC)

Candidates must possess and demonstrate an unquestioned gift of musical leadership based upon broad experience with choral ensembles. MVP538 (Vocal Pedagogy) and 2-3 credits of private vocal or piano instruction must be included in the program. Admission requirements include a baccalaureate degree in music, practical experience in choral conducting through church, school, or community ensembles. Enrollment in this major is only by special permission. For detailed information, please consult the Graduate Choral Conducting Student Handbook, available from the Choral Office.
Major Area

2 credits MVPCDX Private Conducting Lessons

ARTIST DIPLOMA IN PERFORMANCE
The Artist Diploma in Performance is a program of advanced study designed for the outstanding performance career-oriented performer. The curriculum will focus on preparation for major competitions, auditions, apprenticeships, and the development of a performance career. Entrance to the program is limited to those individuals who have demonstrated exceptional performance skills by audition. A fully enrolled student can complete the eighteen-hour program in one year.

Requirements
8 credits Applied Lessons
2 credits Performance Ensembles
2 credits Recital
6 credits Approved Studies in Music

Vocal Performance Course Listing
The School of Nursing and Health Studies offers three graduate degrees: the Master of Science in Nursing (MSN), the Doctor of Nursing Practice (DNP), and the Doctor of Philosophy (PhD) in Nursing.

If admitted to an MSN, DNP or PhD program, all students must successfully pass a background check which includes fingerprinting and drug screening, and must also provide proof of current immunizations. These requirements must be met prior to registering for courses.

Note that courses and policies are subject to change throughout the academic year. Please refer to the 2012-2013 Student Handbook for the applicable curriculum and progression policies.

MASTER OF SCIENCE IN NURSING

The Master of Science in Nursing (MSN) degree program is designed for professional nurses holding a Bachelor of Science degree with a major in nursing (BSN). Registered nurses with baccalaureate degrees in other fields are also eligible to apply for admission. Specialty tracks focus on selected areas of advanced practice nursing and nursing education consisting of 30 to 100 semester credits. The degree requirements may be completed in three to seven semesters of full-time study depending on the specialty. Part-time study is also available for the Acute Care/Adult Nurse Practitioner, Family Nurse Practitioner and Nurse Education tracks. MSN tracks are lock-step and students must successfully complete a semester to progress to the next semester. Further information about each program may be obtained from the Office of Student Services, School of Nursing and Health Studies, University of Miami, P.O. Box 248153, Coral Gables, FL 33124-3850; by visiting us on-line at: http://www.miami.edu/sonhs/index.php/sonhs/academics/master_programs/, e-mail Nursinggrad@miami.edu or calling (305) 284-4325.

The MSN Program is accredited by the Commission on Collegiate Nursing Education (CCNE), One DuPont Circle NW, Suite 530, Washington, DC 20036, (202) 887-6791. Additional national accreditations are from the Accreditation Commission for Midwifery Education (ACME) formerly known as American College of Nurse Midwives Division of Accreditation, 8430 Colesville Road, Suite 1550, Silver Spring, MD 20910, (204) 485-1845, and the Council on Accreditation of Nurse Anesthesia Education Programs (COA), 222 South Prospect Avenue, Park Ridge, Illinois, 60068-4001, (847) 692-7050 (ext. 1154).

GRADUATE STUDENT RESPONSIBILITIES

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student's responsibility to comply with all the provisions of the Bulletin and written changes to the program of study. Students are provided assistance by advisors and faculty members. Requests for deviation from the program of study or school requirements are granted only by written approval from the Dean. Students who are in violation of the provisions of this Bulletin may be withdrawn unilaterally by appropriate School officials from classes, deleted as Nursing and Health Studies students or have a stop placed upon their future enrollment. The school reserves the right to change academic requirements to include course offerings to ensure that students are receiving the latest knowledge. Classes
may be held on weekdays or weekends, and will be listed as such in the course schedule. Changes are transmitted by written notice in the current year of the School of Nursing and Health Studies Master’s Handbook located at www.miami.edu/sonhs or by the Dean.

PROGRESSION POLICY

In order for MSN students to progress through their programs to completion, the academic policy is as follows:

1. Any graduate student who receives a “C” or lower in a nursing course will be dismissed from his or her program.

2. A grade of “B-” or “C+” for a course is below graduate standards, and the student must repeat that course. However, a student may only repeat one course, one time.

3. A passing grade in all clinical experiences is required to pass a course having a clinical component (generally listed as a “lab section” by UM). Students who are not making satisfactory progress may also receive an academic alert at mid-semester or mid-course.

4. All grades are included in the computation of the UM overall grade point average including those that are failed or repeated.

MSN ADMISSION REQUIREMENTS (Advance Practice Specialties)

Admission to graduate programs in the School of Nursing and Health Studies is subject to the rules, regulations, and procedures as determined by each graduate nursing program and the Graduate Bulletin of the University of Miami. Admission to the master’s program requires:

- Submission of a complete University of Miami Graduate School application for admission
- A Baccalaureate degree (BSN preferred) from a regionally-accredited institution
- Official transcripts from all undergraduate and graduate institutions attended, unless the applicant is a graduate of the University of Miami
- Three letters of reference, at least one of which is from an academic source
- Statement of professional goals for graduate study
- Current resume (Nurse Anesthesia applicants must have a minimum of one year critical care experience)
- Acceptable Graduate Record Examination (GRE) scores for the Nurse Anesthesia program. Our GRE School Code is 5815. The GRE is not required for admission to the Acute Care/Adult Nurse Practitioner, Family Nurse Practitioner, Nurse Education, and Nurse Midwifery tracks
- Prerequisite: Introductory Statistics Course
- Current (unrestricted) RN license (once admitted to the program, students must provide a Florida RN license)

DOCTOR OF NURSING PRACTICE

The Doctor in Nursing Practice (DNP) requires 38 credits of coursework beyond the master’s degree. The DNP degree is a practice-focused doctorate designed for nurses seeking a terminal degree in nursing practice. Classes are held one weekend per month—all day on Friday, Saturday and Sunday. The DNP Program is accredited by the Commission on Collegiate Nursing Education (CCNE), One DuPont Circle NW, Suite 530, Washington, DC 20036, (202) 887-6791.

The outcome objectives for graduates of the DNP program are to:

- Integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice that addresses health care disparities

- Evaluate research methods and findings to create an evidence-base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities

- Synthesize knowledge gained from traditional and innovative learning methods to lead quality, cost-effective health care collaborations addressing health care disparities.

- Demonstrate expert clinical judgment and knowledge of health care systems to design, deliver and evaluate evidence-based care interventions to reduce health care disparities

- Model expert nursing practice and serve as mentors to nursing colleagues in their efforts to improve nursing practice and health care systems

- Employ knowledge of health care policy and economics to develop and evaluate programs to address health care disparities

DNP ADMISSION REQUIREMENTS

- A baccalaureate degree and a master’s degree, preferably in nursing, from an accredited institution. Individuals without an MSN are evaluated on a case-by-case basis for admission

- Official transcripts from all undergraduate and graduate institutions attended, unless the applicant is a graduate of the University of Miami

- Three (3) letters of recommendation, at least one of which is from an academic source, and preferably from individuals with an earned doctorate in nursing

- Statement of professional goals for graduate study

- Current resume

- National specialty certification in an area of nursing practice

- Current (unrestricted) RN license*
● Current Basic Life Support certification (i.e., CPR or BLS)

● Applicants for whom English is not their native language must comply with the minimum Score Requirement in the University’s policy on Examinations for International Students located at http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements/

● Interviews will be scheduled as requested by faculty

● Documentation of completion of a minimum of 440 precepted clinical hours or supervised residency hours in master’s level program. An applicant who cannot provide such documentation may submit a portfolio for evaluation of equivalent clinical hours. Contents of the portfolio should include:

- Descriptions of any supervised internship or residency experiences in their master’s program
- Descriptions of any supervised internship or residency experiences they may have had after their master’s programs
- Descriptions of nursing practice-related supervised projects in their master’s programs
- Descriptions of nursing practice-related supervised projects they accomplished after their master’s programs (community or service sector). Any of the projects must have been accomplished outside of work hours
- Signed statement from supervisor of project with the number of hours in the project.
- Names and contact information of the supervisors who can be contacted to describe the experiences listed above

Final assignment of portfolio clinical hours is non-negotiable and is based on the level and nature of the supervision, the type and applicant’s responsibilities in the project.

* International and out-of-state students are welcomed into our DNP program. However, some assignments are limited to students holding current Florida RN licenses and BLS certification.

**DNP DEGREE REQUIREMENTS**

To receive the Doctor of Nursing Practice degree, the candidate must:
1. Complete all coursework as required with an overall GPA of 3.0 or better
2. Complete all required clinical hours
3. Successfully complete the capstone project
4. Successfully pass a comprehensive examination. The exam is an integrative experience to demonstrate students’ mastery of the outcome objectives of the program

DOCTOR OF PHILOSOPHY

The Ph.D. with a major in Nursing Science requires a minimum of 41 credits of coursework beyond the master’s degree or 62 credits of coursework beyond the bachelor’s degree. The principal goal of the Ph.D. with a major in Nursing Science is to prepare scholars and researchers who will contribute to the growth of science in nursing through recognized methods of scholarly inquiry. Admission to the doctoral program is competitive.

PH.D. ADMISSION REQUIREMENTS

A. Admission. The regular admission procedures include:
   1. The completed application form
   2. The official transcripts of all college work previously taken, including both undergraduate and graduate.
   3. Applicants must submit the scores from the Graduate Record Examination, taken within 5-years of the application
   4. Applicants for whom English is not the native language must comply with the minimum score requirements in the University’s policy on Examinations for International Students.
   5. Statement of Goals
   6. Letters of Recommendation

B. Selection of students. Factors considered for admission include:
   1. References including written evaluations from key professors
   2. Statement of professional goals and interests in doctoral study
   3. Admissions interview
   4. Portfolio of scholarly work including published manuscripts/scholarly papers

DEGREE REQUIREMENTS

To receive the Doctor of Philosophy degree, the candidate must meet all the general requirements for the Ph.D. degree with respect to course work, residency, the qualifying examination, 12 credits of dissertation, and successful defense of the dissertation. Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student's responsibility to understand fully, and comply with all the provisions of the Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Requests for deviation from the program of study or school requirements are granted only by written approval from the Dean. Students who are in violation of the provisions of this Bulletin may be withdrawn unilaterally by appropriate School officials from classes, or have a stop placed upon their future enrollment. The school reserves the right to change academic requirements to include course offerings to ensure that students are receiving the latest knowledge. Changes are transmitted by written notice in the current year of the School of Nursing and Health Studies PhD Handbook located at www.miami.edu/sonhs or by the Dean.

FINANCIAL ASSISTANCE

Full-time Ph.D. students are considered for support which may include:

1. Tuition Scholarships. These awards vary in amount and are intended to assist the recipient in pursuit of study and research as required by the degree. These scholarships are awarded on a competitive basis.

2. Graduate Stipends. These cash awards, paid monthly, are intended as part of an educational assistance program for PhD degree students. The stipends require service in the form of teaching, research assistance, or other appropriate educational activities that may be designated by the supervisor of the recipient.

For further information, contact: Office of Student Services, School of Nursing and Health Studies, University of Miami, P.O. Box 248153, Coral Gables, FL 33124-3850, Ph (305) 284-4325.
The International Education and Exchange Programs (IEEP) office provides opportunities for UM students to acquire an international perspective in their academic career through studying abroad on UM designed programs or at UM exchange partner universities overseas. IEEP offers an extensive array of overseas programs in over 35 countries.

The UM-designed programs are the UM Semesters on Location, delivered in Prague, Rome, the Galilee, and the Galapagos, and the UM courses abroad, directed and taught by UM faculty members in Latin America, Asia, Europe, South Africa, and other locations. The faculty-directed courses take place during the January Intersession, Spring Break, and the Summer Sessions. For the UM Semester on Location programs, students receive UM credits and UM grades, and the courses are taught by UM professors and/or professors from overseas universities who are experts in their academic fields.

Students can also receive UM credits and grades for study at any one of UM’s over 80 exchange partner universities overseas. These programs can be undertaken for a semester, year, and/or during the summer. Among a multitude of other options, students can study marine biology on the edge of Australia’s Great Barrier Reef at James Cook University, be at the center of Europe and study business at the Vienna University of Economics and Business Administration, explore Iceland’s unspoiled nature while studying earth sciences at the University of Iceland, immerse themselves in Japanese culture and business practices at Sophia University in Tokyo, or become acquainted with the changing panorama of international relations at Uppsala University in Sweden. Many of these programs are delivered in English so foreign language proficiency is not always required.

The Schools and Colleges at UM encourage study abroad options for their students. With the assistance of the International Education and Exchange Programs office and the guidance of academic advisors, students can select a study abroad program to fit almost any major. Additionally, UM financial aid will apply to the costs of the UM programs. Students are advised to plan early so studying abroad can be incorporated into their academic plan.

Students enrolled in any study abroad program at a partner institution may not earn more than 25 percent of their credits toward any UM degree program (credit requirements may vary by major/level), including courses taught by UM faculty. A student who anticipates earning more than 25 percent of his/her degree credits while participating in a study abroad program must immediately inform his/her advisor or program chair, who will be responsible for notifying the appropriate parties so that advance approval can be obtained from the Southern Association of Colleges and Schools (SACS).

For additional information, contact International Education and Exchange Programs, PO Box 248263, Coral Gables, FL 33124-1610. Tel: 305-284-3434. Email: ieep@miami.miami. Website: www.miami.edu/studyabroad.
The Miami Semester provides the opportunity for degree-seeking students attending other colleges to spend a semester or summer in Miami living, studying and doing research at the University of Miami. Domestic or international students can take advantage of these unique discipline or topic focused programs. Each Miami Semester program is designed to highlight the programs unique to the University, taking advantage of our geographical location, nationally known faculty, and unique environmental features.

The Miami Semester is limited to degree-seeking undergraduates in good standing attending other universities and colleges. Participating students will be required to take at least one to two core courses in their chosen program. Course offerings are subject to change depending on availability. Students may be accommodated in the fall semester; however, this is determined on a case by case basis.

Spring Programs

American Studies

This program allows students to select one to two courses from among the American Studies (AMS) Program's core courses, and classes from other departments based on availability and interests. It is an interdisciplinary approach for students to reflect on the interrelated nature of subjects like, but not limited to, Sociology, Geography, History, and Anthropology, and topics that are relevant to today's society such as cultural diversity, the global economy, regional and geographical norms, and popular culture. The goal of this program is to assist in students' understanding of the world around them by analyzing events, policies, societal norms and cultures, and historical events. Students may take any combination of courses that equal at least 12 credit hours.

Core Courses:

Students must enroll in at least one (1) of the following:
- Introduction to American Studies AMS 101
- The U.S., Transnationalism, and Globalism AMS 310
- History and Culture of South Florida AMS 350

Additional Courses

- Race and Healthcare in America AMS 401

Architecture: New Urbanism

The program allows for students currently majoring in Architecture at other colleges and universities to gain perspective of the field in South Florida. Students enroll in six credits of Architectural Design and six to nine credits of related electives or courses in Urban Studies. Students will also have opportunities to participate in study abroad programs in London, Venice, and/or Spain during intersession and spring breaks as an additional enrollment option (additional tuition and program fees apply). Students are required to maintain a standard full-load of credits for the spring semester of 12-15 UM credits.
Core Courses: (students must submit a design portfolio prior to enrolling in courses)

Students enroll in one (1) of the following:
- Architectural Design VII ARC 407
- Architectural Design VIII ARC 408
- Architectural Design IX ARC 509
- Architectural Design X ARC 510

Additional Courses

- Site Study of Selected Architecture and Urbanism (Intersession/Study Abroad) ARC 323
- Management of Professional Practice ARC 452
- Advanced Visual Analysis ARC 512
- General Physics for Architectural Majors PHY 103
- Cities in Time and Space URB 301
- Other Architecture elective course offerings (Interior Design, Landscape, and Historic Preservation)

Audio Engineering

Audio Engineering allows for students currently majoring in Electrical Engineering to study areas such as circuit theory, electronics, signal processing and multimedia with audio studies in acoustics, digital audio, recording and postproduction. Students must enroll in a minimum of two Electrical Engineering courses from the core courses. Students may also opt to add courses in other areas based on availability and interests.

Core Courses:

- Introduction to Digital Signal Processing EEN 436
- Real-time Digital Signal Processing Laboratory EEN 437
- Engineering Acoustics EEN 502
- Digital Speech and Audio EEN 540

Additional Courses:

- Advanced Digital Compositing for Film and Video EEN 595
- Advanced Computer Modeling and 3D Animation EEN 596
- Advanced Audio Editing for Film and Video EEN xxx

Courses available through the Frost School of Music:

- Audio Workshop MMI 141
- Transducer Theory MMI 501

Ecosystem Science and Policy

The Certificate in Ecosystem Science and Policy provides an opportunity for students from other universities to explore the South Florida environment, ecology and culture via interdisciplinary courses and experiential learning.

Students must take at least two core courses in Ecosystem Science and Policy. Miami Semester students will complete their schedules with courses chosen from among the interdisciplinary ECS courses and from other departments based on availability and interests.
Core Courses for sophomores:

- Problems in Ecosystem Science and Policy ECS 112
- Contemporary Environmental Issues ECS 202

Core Courses for juniors and seniors:

- Contemporary Environmental Issues ECS 202
- Perspectives on Environmental Decisions ECS 302
- Interdisciplinary Approaches to Complex Human-Environmental Problems ECS 403

**International Finance and Marketing**

The Certificate in International Finance and Marketing is designed for business students from other universities who want to add an international dimension to their studies. This program allows students to select from a limited set of courses offered by the School of Business. The program focuses on the international aspects of business. The program is open to students with at least a junior standing who have met the course prerequisites. Students must take at least two courses below, but may take all four.

Core Courses:

- International Finance FIN 330
- International Marketing MKT 360
- International Monetary Economics ECO 442
- International Business Law BSL 412

**Marine Science**

The Certificate in Marine Science is a hands-on study opportunity for those interested in marine science, oceanography, geology and marine physics. Students must enroll in a minimum of three Marine Science courses. In addition, highly qualified students may be eligible for an independent study research project. Students may also opt to add courses in other areas based on availability and interests.

**Sport Administration**

Sport Administration is an opportunity for students who are interested in the ethics, leadership, and business of managing athletic organizations. Students will have the opportunity to participate in an internship that fits their interest area as well taking hands-on courses in the Department of Exercise & Sport Sciences. Internships may take place within the UM Athletic Department or local professional sport franchises. Students make take any combination of courses that equal at least 12 credit hours.

Core Courses:

- Sport Facilities and Event Management ESS 206
- Sport Marketing ESS 302
- Essential Leadership in Sports and the Professions ESS 306
- Ethics Ethical Decision Making in Sport and the Professions ESS 308
- Legal Aspects of Sport ESS 401
- Sport Information Management ESS 403
- Finance and Budget in Sport Administration ESS 405
- Seminar in Sport Administration (internship) ESS 498
The Summer Scholars Program
www.miami.edu/ssp

The Summer Scholars Program (SSP) provides a unique opportunity for high school students to study at the University of Miami for three weeks during the second summer semester and earn between 5 – 6 semester credits. Students will either live on campus or participate as a commuter. SSP is designed to expose high school students to university academics and campus life before commencing undergraduate studies. Interested high school students should seek further information and application requirements for the program on the website at www.miami.edu/ssp.

Applicants should choose one (1) area of specialization. Each specialization area has a subset of required courses*:

**Broadcast Journalism**
- Introduction to Electronic Media and Production CEM 245
- Radio Production and Performance CEM 235

**Business and Law**
- Fundamentals in Business BUS 100
- Prelaw Studies GBM 100

**Engineering**
  - **Track A: Aerospace, Architectural, Civil, Environmental, and Mechanical Engineering**
    - Introduction to Architectural, Civil, and Environmental Engineering CAE 100
    - Introduction to Aerospace and Mechanical Engineering MAE 100
  - **Track B: Biomedical, Computer, and Electrical Engineering**
    - Introduction to Biomedical Engineering BME 100
    - Introduction to Computer and Electrical Engineering EEN 100

**Filmmaking**
- Survey of Motion Pictures CMP 103
- Motion Picture Technology CMP 222

**Forensic Investigation**
- Forensic Investigation APY 100
- Introduction to Forensic Anthropology APY 200

**Health and Medicine**
- Health Promotion, Prevention, and Rehabilitation NUR 200
- Students must choose one (1) of the following:
  - Topics in Biology: Infectious Diseases BIL 195
  - Topics in Biology: Oncology BIL 194
  - Introduction to Neuroscience NEU 100

**International Relations**
- Introduction to American National Government POL 100
- Introduction to World Politics POL 200
Marine Science
   Introduction to Aquaculture MSC 105
   Marine Environments of South Florida MSC 115

Sport Administration
   Leadership, Management, and Ethics in Sports KIN 100
   Survey of Sport Administration KIN 200

Sports Medicine
   Introduction to Athletic Training KIN 105
   Explorations in Exercise Science KIN 110

* Course titles, numbers, descriptions, and credits awarded are subject to change.
SUMMER SESSIONS
www.miami.edu/summersessions

The Summer Sessions program at the University of Miami is an exceptional opportunity for students to enhance their educational goals in a concentrated time period and for the South Florida community to take part in some of the innovative and unusual courses taught by outstanding faculty and well-known guest lecturers.

Special Academic Programs – Intersessions

January and Spring Break Intersessions - www.miami.edu/intersession
May and August InterSessions – www.miami.edu/summersessions

January, Spring Break, May, and June Intersession are short term credit courses designed so you can concentrate fully on: topics not normally offered during regular semesters; getting individual quality time with distinguished faculty members; and sharing knowledge with other students.

Tuition charges for January and Spring Break Intersession are separate from and in addition to your spring tuition charges (ARE NOT included in the full time 12-20 credit hours "Flat Rate" of Spring Semester).

Due to the intense format of the Intersession courses, there are special drop and refund policies; please refer to the web site for complete details.
UNDERGRADUATE COURSES*
* 500 level courses appear in both the undergraduate and graduate course listing and may be considered undergraduate or graduate at the discretion of the department. Prerequisites, co-requisites and other course requirements are subject to change.

SCHOOL OF ARCHITECTURE

ARCHITECTURE

ARC101 Architecture Design I
6 credits
Fall Semester
The study of architecture as an intellectual and aesthetic discipline. Topics include concept, site, form and technique. Co requisite: ARC 111, 121.
PREREQUISITE: COREQUISITE: ARC 111, 121.

ARC102 Architecture Design II
6 credits
Spring Semester
Architectural response to shelter, space and setting requirements. Topics include programming, program analysis and design, anthropometrics, and architecture psychology. Co requisite: ARC 112, 122.

ARC110 Introduction to Architectural Design
3 credits
First & Second Summer Session
Introduction to the design process and the role of the architect in society. Building design, landscape architecture, urban planning, historic preservation, architectural theory and graphics are taught through drawing and model making in a studio setting. Open to non-architecture majors in college and high school students entering 10th, 11th and 12th grades interested in exploring the field of architecture.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARC111 Drawing I
3 credits
Fall Semester
Exploration and expression of ideas through increased awareness and acquisition of visual and graphic vocabulary, stressing orthographic, oblique and conical projections; light shade and shadow; freehand sketching. Co requisite: ARC 101, 121.
PREREQUISITE: COREQUISITE: ARC 101, 121.

ARC112 Drawing II
3 credits
Spring Semester
Conical projection and freehand exploration of graphic expression and representation, studies in principles of composition, perspective, form, color, materials. Co requisite: ARC 102, 122.
PREREQUISITE: ARC 101, 111. COREQUISITE: ARC 102, 122.

ARC121 Architecture and Culture
3 credits
Fall Semester
Architecture as an intellectual and aesthetic discipline. Focus on design theory, language, typology, image, form, context, and case studies. Co requisite: ARC 101, 111.
PREREQUISITE: COREQUISITE: ARC 101, 111.

ARC122 Architecture and Behavior
3 credits
Spring Semester
Those aspects of environmental psychology which affect architectural design. Studies in human behavior and the design process, application of psychological factors to the design of buildings and their environment. Co requisite: ARC 102, 112.
PREREQUISITE: ARC 101, 121. COREQUISITE: ARC 102, 112.
ARC141 On-Site Survey of European Architecture and Urbanism  
3-6 credits  
Spring Semester & First & Second Summer Session  
On site introduction to architecture and the city with a historical review of most European periods from classical to contemporary. Survey of European architectural and urbanistic precedents in important selected locations. Elective course open to all majors; lecture and seminar format.

ARC203 Architecture Design III  
6 credits  
Fall Semester  
Architectural response to natural environment and site requirements. Focus on site analysis and design, climate, access and circulation, landscape, relation to larger context. Co requisite: ARC 223.  
PREREQUISITE: ARC 102, COREQUISITE: ARC 223.

ARC204 Architecture Design IV  
6 credits  
Spring Semester  
Building materials and structure as active constituents of architecture design. Focus on orientation, enclosure, low-energy responses, selection and assembly of construction materials, short and intermediate span structural systems. Co requisite: ARC 231.  
PREREQUISITE: ARC 203, 261. COREQUISITE: ARC 231.

ARC213 Computing I  
3 credits  
Fall & Spring Semester  
An introduction to new electronic design tools and technology available to architects today. Lectures on the history and future of computing in the profession.  
PREREQUISITE: ARC 102, 111, 112 OR PERMISSION OF INSTRUCTOR.

ARC223 Architecture and the Environment  
3 credits  
Fall Semester  
Architectural response to natural environmental requirements. Focus on climate, control, natural energy use, ecosystems, energy flow, environmental intervention, case studies of indigenous buildings.  
PREREQUISITE: ARC 102, 122.

3 credits  
Fall Semester  
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assembles, detailing and basic building code concepts.  
PREREQUISITE: NONE

ARC231 Building Technology: Structural Systems  
3 credits  
Spring Semester  
Structural systems: the tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral building envelope and financial considerations.  
PREREQUISITE: PHY 103.
ARC267 History of Architecture I: Ancient, Medieval and Renaissance
3 credits
Fall Semester
Studies of the history of architecture and urban design. Focus on religious and
secular monuments and their settings, domestic architecture and infrastructure,
regional constructional and compositional traditions from prehistory to the end
PREREQUISITE: COREQUISITE: ARC 203.

ARC268 History of Architecture II: Baroque through Contemporary
3 credits
Spring Semester
Studies of the history of architecture and urban design. Focus on religious and
secular monuments and their settings, domestic architecture and infrastructure,
regional constructional and compositional traditions from the end of the sixteenth
century through to the present. Co requisite: ARC 204.
PREREQUISITE: COREQUISITE: ARC 204.

ARC292 Introduction to Architecture Design I
3 credits
Spring Semester
Survey of the architecture profession and introduction to architecture design for
non-architecture majors. Role, opportunities, vocabulary, visual awareness, techniques
and procedures of design.
PREREQUISITE: NONE

ARC293 Introduction to Architecture Design II
3 credits
Spring Semester
Continuation of ARC 292 and an introduction to the interactions between architecture
and the engineering disciplines for non-architecture majors. Theories of building
and site design, technology as an integral component of design, program, site,
climate and methodology.
PREREQUISITE: ARC 292.

ARC294 Introduction to the Development of Architecture
3 credits
Fall Semester
Introduction to architecture for non-architecture majors. Vocabulary, themes, principles
and processes of design, cultural, social, economic and technological influences
demonstrated through historic examples.
PREREQUISITE: SOPHOMORE STANDING OR PERMISSION OF INSTRUCTOR.

ARC301 Architecture Design
6 credits
First & Second Summer Session
Comprehensive building and site design for students transferring into the architecture
program at third year level. Topics include human, environmental, cultural and
technological factors.
PREREQUISITE: SOPHOMORE STANDING.

ARC305 Architecture Design V
6 credits
Fall Semester
Environmental systems and structure as active constituents of architectural design.
Topics include the integration of enclosure, structure, environmental and mechanical
PREREQUISITE: ARC 204. COREQUISITE: ARC 362, CAE 213.
ARC306 Architecture Design VI
6 credits Spring Semester
Government and finance as active constituents of architecture design. Topics include zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies. Co requisite: ARC 351, CAE 313.
PREREQUISITE: ARC 305, CAE 313.

ARC323 On Site Study of Selected Architecture and Urbanism
3-6 credits Spring Semester & First & Second Summer Session
On site study of specific architectural and/or urbanistic precedents at selected locations. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

ARC324 On Site Graphic Analysis of Selected Architecture and Urbanism
3 credits Spring Semester & First & Second Summer Session
On site analysis and illustration of specific architectural and/or urbanistic precedents at selected locations. Diagrams, sketches, and drawings recording, analyzing and evaluating buildings and places. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

ARC362 Environmental Building Systems I
3 credits Fall Semester
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; safety systems - fire safety and emergency and signal systems. Co requisite: ARC 305.
PREREQUISITE: ARC 261

ARC363 Environmental Building Systems II
3 credits Spring Semester
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces. Principles and applications of electrical equipment and wiring design. Co requisite: ARC 306.
PREREQUISITE: ARC 362 OR PERMISSION OF INSTRUCTOR.

ARC371 Ancient Architecture
3 credits Fall Semester
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
PREREQUISITE: HIS 131 AND 132, ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC373 Early Christian, Byzantine, and Medieval Architecture
3 credits Fall Semester
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
PREREQUISITE: HIS 131 AND 132, ARC 204 OR PERMISSION OF INSTRUCTOR.
ARC382 Architecture and Culture in Italy  
3 credits  
Spring Semester  
A cultural and historical framework in preparation for participation in the Rome program. A range of topics, including architecture, art, history, cinema, literature and politics presented by University faculty from a variety of disciplines. Required for participation in the Rome Program.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARC390 History of Cities  
3 credits  
Fall Semester  
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.  
PREREQUISITE: ARC 204.

ARC407 Architecture Design VII  
6 credits  
Fall & Spring Semester & First & Second Summer Session  
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design.  

ARC408 Architecture Design VIII  
6 credits  
Fall & Spring Semester & First & Second Summer Session  
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.  
PREREQUISITE: ARC 407.

ARC452 Management of Professional Practice  
3 credits  
Fall & Spring Semester  
Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships.  
PREREQUISITE: ARC 306.

ARC475 Colonial Architecture  
3 credits  
Fall Semester  
History of architecture and human settlements. Colonial Architecture from the 16th through the 19th centuries in North and South America, the Caribbean, India and Africa.  
PREREQUISITE: ARC 204.

ARC476 19th and 20th Century Architecture  
3 credits  
Fall Semester  
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.  
PREREQUISITE: ARC 204 OR 292, 294 OR 371 OR 372 OR 373 OR PERMISSION OF THE INSTRUCTOR.

ARC481 Special Problems  
1- 3 credits  
Fall & Spring Semester & First & Second Summer Session  
Group or individual investigations of significant architectural issues, offered by special arrangement only.  
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.
ARC482 Special Problems
1-3 credits  
Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered
by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC483 Special Problems
1-3 credits  
Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered
by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC500 Architecture Theory
3 credits  
Fall Semester
Architecture and Culture/Architecture and the Environment Survey of primary texts
in theory of architecture. Part 1: Focus on design theory, language, identity,
tectonics and context. Part 2: Focus on environmental theory, sustainability,
and ecosystems.

ARC501 Architecture Design and Theory I
6 credits  
Fall Semester
Cultural, human and environment component and architectural responses to these:
Social and aesthetic concepts, architectural psychology, climatic principles,
programming analysis and design.
PREREQUISITE: GRADUATE STANDING.

ARC502 Architecture Design and Theory II
6 credits  
Spring Semester
Technology component; materials, structure, and environmental control systems as
a framework for architectural design. Construction materials and methods, structural
systems, mechanical systems.
PREREQUISITE: ARC 501.

ARC503 Architectural Design and Theory III
6 credits  
Fall Semester
Legal and economic component; government and finances as active constituents of
architecture design. Zoning regulations, building codes, principles of public
health, safety and welfare, market and feasibility studies.
PREREQUISITE: ARC 502.

ARC504 Architecture Design.
6 credits  
Fall Semester
Architecture Design: Comprehensive Component. Topics include zoning regulations,
building codes, principles of public health, safety and welfare, market and feasibility
studies.
PREREQUISITE: ARC 503 OR GRADUATE STANDING.

ARC507 Architecture Design
6 credits  
Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics
include building types, environment, energy, community design, etc.
PREREQUISITE: ARC503
ARC509 Architecture Design IX
6 credits  Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
PREREQUISITE: ARC 408.

ARC510 Architecture Design X
6 credits  Fall & Spring Semester & First & Second Summer Session
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
PREREQUISITE: ARC 509.

ARC511 Drawing
3 credits  Fall Semester
Graphic representation and exploration of visual ideas through increased awareness of visual and graphic vocabulary, stressing projections, light, shade and shadow, perspective, and freehand sketching.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ARC512 Advanced Visual Analysis
3 credits  Offered By Announcement Only
Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.
PREREQUISITE: ARC 204, 112.

ARC513 Computing
3 credits  Spring Semester
An introduction to new electronic design tools and technology available to architects today. Lectures on the history and future of computing in the profession.
PREREQUISITE: GRADUATE STANDING AND PERMISSION OF INSTRUCTOR.

ARC514 Michelangelo
3 credits  Fall Semester
Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.
PREREQUISITE: ARC 306, 112, 213 OR PERMISSION OF THE INSTRUCTOR.

ARC515 Computer Modeling
3 credits  Fall & Spring Semester
Three-dimensional, computer modeling and rendering. Lecture, problem solving exercises and laboratory.
PREREQUISITE: ARC 213, 513 OR PERMISSION OF THE INSTRUCTOR.

ARC516 Architectural Watercolor Renderings
3 credits  Fall Semester
This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).
PREREQUISITE: ARC 306 OR PERMISSION OF THE INSTRUCTOR.
ARC517 Construction Documents  
3 credits  
Fall Semester  
Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.  
PREREQUISITE: ARC 204 AND 261.

ARC518 Documentation of Historic Architecture  
3 credits  
First & Second Summer Session  
Principles of preservation and restoration, research methods, measured drawings, surveying methods, case studies.  
PREREQUISITE: ARC 204.

ARC519 Architecture and Color  
3 credits  
First & Second Summer Session  
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.  
PREREQUISITE: ARC 306 OR PERMISSION OF THE INSTRUCTOR.

ARC523 Interior Architecture Design  
3 credits  
Fall Semester  
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.  
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC524 Selected Topics in Interior Architecture Design  
3 credits  
Spring Semester  
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.  
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC525 Landscape Arch Design I  
3 credits  
Fall & Spring Semester  
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.  
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC526 Landscape Arch Design II  
3 credits  
Offered By Announcement Only  
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.  
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC527 Architecture Photography  
3 credits  
Offered By Announcement Only  
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.  
PREREQUISITE: ARC 204.
ARC528 Historic Preservation  
3 credits  
Spring Semester  
Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior's Standards for rehabilitation.  
PREREQUISITE: ARC 204.

ARC529 Research in Design-Methods and Procedures  
3 credits  
Fall & Spring Semester  
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.  
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC530 Building Technology II: Materials & Methods.  
3 credits  
Fall & Spring Semester  
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes, assemblies, detailing and basic building code concepts.

ARC531 Building Technology II: Structural Systems  
3 credits  
Spring Semester  
Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.  
PREREQUISITE: PHYSICS OR PERMISSION OF THE INSTRUCTOR.

ARC532 Building Structures I  
3 credits  
First Summer Session  
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.  
PREREQUISITE: ARC 531.

ARC533 Building Structures II  
3 credits  
Fall Semester & Second Summer Session  
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.  
PREREQUISITE: ARC 532.

ARC534 The Palazzo in Italian Architecture  
3 credits  
Fall & Spring Semester  
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.  
PREREQUISITE: ARC 382.

ARC535 Historic Italian Urbanism  
3 credits  
Fall & Spring Semester  
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.  
PREREQUISITE: ARC 382.
ARC536 Italian Gardens  
3 credits Fall & Spring Semester  
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.  
PREREQUISITE: ARC 382.

ARC537 Research in Rome  
3 credits Fall & Spring Semester  
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.  
PREREQUISITE: ARC 382.

ARC541 Seminar on Town Design  
3 credits Fall Semester  
Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.

ARC542 Seminar on Housing  
3 credits Offered By Announcement Only  
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.  
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC543 Seminar on Retrofit of Suburbia  
3 credits Offered By Announcement Only  
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.  
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC544 The Architecture of Palladio  
3 credits Fall Semester  
On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.  
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ARC545 Urban Composition  
3 credits Offered By Announcement Only  
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.  
PREREQUISITE: ARC 306, 502, OR PERMISSION OF INSTRUCTOR.

ARC546 Studies of Havana  
3 credits Spring Semester  
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.
ARC547 Architecture and Urban Identity
3 credits
Offered By Announcement Only
Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.
PREREQUISITE: ARC 306 OR PERMISSION OF INSTRUCTOR.

ARC548 Seminar in Community Development
3 credits
Offered By Announcement Only
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.
PREREQUISITE: ARC 305, 502, OR PERMISSION OF INSTRUCTOR.

ARC550 Professional Lecture Series
3 credits
Offered By Announcement Only
Exposure to the various professional disciplines in South Florida that make contributions to the design process. Case study analysis and evaluation of current building project, from time of initial formulation through completion, including research, diagrammatic studies, site visits and lectures.

ARC551 Contemporary Theories of Architecture
3 credits
Offered By Announcement Only
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.
PREREQUISITE: ARC 204 OR PERMISSION OF INSTRUCTOR.

ARC553 Structural Design Theory
3 credits
Offered By Announcement Only
Relationship of structural systems to architectural design. Case studies in theories of structure, form and construction.
PREREQUISITE: ARC 306 AND CAE 313.

ARC554 Architecture of South Florida
3 credits
Offered By Announcement Only
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.
PREREQUISITE: ARC 204 OR PERMISSION OF THE INSTRUCTOR.

ARC557 Design and Fabrication Techniques: Carved Panels
3 credits
First & Second Summer Session
Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.

ARC558 Theories of Landscape Architecture
3 credits
Fall Semester
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design.
PREREQUISITE: ARC 204 OR PERMISSION OF INSTRUCTOR.
ARC561 Building Technology I: Materials and Methods.
3 credits  Fall Semester
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry, concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.
PREREQUISITE: NONE
COREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC562 Environmental Building Systems I
3 credits  First Summer Session
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.
PREREQUISITE: ARC 561 OR PERMISSION OF INSTRUCTOR.

ARC563 Environmental Building Systems II
3 credits  Spring Semester
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design.
PREREQUISITE: ARC 562 OR PERMISSION OF INSTRUCTOR.

ARC567 History of Architecture I: Ancient, Medieval and Renaissance
3 credits  Fall Semester
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Co requisite: ARC 501.

ARC568 History of Architecture II: Baroque through Contemporary
0-3 credits  Spring Semester
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Co requisite: ARC502.

ARC569 Directed Readings
3 credits  Fall & Spring Semester & First & Second Summer Session
A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR.

ARC570 Modern Architecture
3 credits  Spring Semester
History of architecture, landscape, and city design in the modern era.
ARC571 Ancient Architecture
3 credits
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC572 Selected Topics in World Architecture
3 credits
History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC573 Early Christian, Byzantine, and Medieval Architecture
3 credits
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC574 Renaissance Architecture
3 credits
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC575 Colonial Architecture
3 credits
History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC576 19th and 20th Century Architecture
3 credits
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC577 The Architecture of Alvar Aalto
3 credits
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR.

ARC578 Italian Rationalist Architecture
3 credits
Offered By Announcement Only
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
PREREQUISITE: ARC 305 OR PERMISSION OF THE INSTRUCTOR.
ARC581 Special Problems
3 credits                    Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

ARC582 Special Problems
3 credits                    Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

ARC583 Special Problems
3 credits                    Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF THE INSTRUCTOR

ARC584 Special Problems
1- 3 credits                 Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR

ARC585 Special Problems
1- 3 credits                 Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR

ARC586 Special Problems
1- 3 credits                 Fall & Spring Semester & First & Second Summer Session
Group or individual investigations of significant architectural issues, offered by special arrangement only.
PREREQUISITE: PERMISSION OF PROGRAM DIRECTOR

ARC590 History of Cities
3 credits                                 Fall & Spring Semester
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.
PREREQUISITE: GRADUATE STANDING OR PERMISSION OF INSTRUCTOR.

ARC593 Computer Animation
3 credits                                 Spring Semester
Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.
PREREQUISITE: ARC 415 OR PERMISSION OF INSTRUCTOR.

ARC594 Geographic Information Systems in Urban Design
3 credits                                 Spring Semester
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.
PREREQUISITE: ARC 213 OR 513 OR PERMISSION OF INSTRUCTOR.
ARC596 Interactive Multimedia in Design

3 credits

Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.

PREREQUISITE: ARC 213 OR 513 OR PERMISSION OF INSTRUCTOR.

Spring Semester
AIS101 The Foundations of the United States Air Force I
1 credit
Fall Semester
Survey course designed to introduce students to the United States Air Force and encourage participation in Air Force Reserve Officer Training Corps (AFROTC). Featured topics include: overview of AFROTC, special programs offered through AFROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership, Air Force officer career opportunities, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
PREREQUISITE: MUST BE TAKEN WITH AIS150 PT LAB

AIS102 The Foundations of the United States Air Force II
1 credit
Spring Semester
Survey and follow-on course to AIS 101 designed to introduce students to the United States Air Force and encourage participation in Air Force Reserve Officer Training Corps (AFROTC). Featured topics include: introduction to leadership, Air Force Core Values, introduction to interpersonal communication and team building, and a continuation of communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS150 Leadership Laboratory
0 credit
Fall & Spring Semester
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the detachment commander and commandant of cadets.

AIS201 The Evolution of USAF Air and Space Power I
1 credit
Fall Semester
Course designed to examine general aspects of air and space power through a historical perspective. Covers time period from first balloons and dirigibles to space-age global positioning systems of the Afghan/Iraqi Wars. Examines several fundamental truths associated with war in the third dimension: e.g. Principles of War and Tenets of Air and Space Power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS202 The Evolution of USAF Air and Space Power II
1 credit
Spring Semester
Continuation of AIS 201 which provides students with knowledge level understanding for general element and employment of air and space power. Discusses the importance of Air Force Core Values with use of operational examples and historical Air Force leaders. Continues to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS301 Air Force Leadership Studies I
3 credits
Fall Semester
Study of leadership, management fundamentals, professional knowledge, and communication skills required of Air Force junior officers. Case studies are used to examine Air Force leadership and management situations. Mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities.
AIS302 Air Force Leadership Studies II
3 credits Spring Semester
Continuation of AIS 301 and is a study of Air Force personnel and evaluation systems, leadership ethics, and communication skills required of Air Force junior officers. Case studies are used to examine Air Force leadership and management situations. Mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities.

AIS401 National Security Affairs/Preparation for Active Duty I
3 credits Fall Semester
Examines national security process, regional studies, and Air Force doctrine. Special topics of interest focus on civilian control of military and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. Mandatory Leadership Laboratory complements this course by providing students advanced leadership experiences.

AIS402 National Security Affairs/Preparation for Active Duty II
3 credits Spring Semester
Continuation of AIS 401 which examines regional studies and advanced leadership ethics. Special topics of interest focus on the military as a profession, officership, military justice, preparation for active duty, and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. Mandatory Leadership Laboratory complements this course by providing students advanced leadership experiences.

AFRICANA STUDIES
AAS150 Introduction to Africana Studies
3 credits Fall & Spring Semester & First & Second Summer Session
Experiences of African American and other African-descended peoples with emphases on social, cultural, political, etc.
PREREQUISITE: NONE

AAS260 History of Slavery in the Atlantic
3 credits Fall Semester
The emergence and eventual abolition of the Trans-Atlantic slave trade and its effects on both old and new world
PREREQUISITE: NONE

AAS290 Special Topics
3 credits Offered By Announcement Only
Content varies by semester.

AAS350 Black Leadership in the U.S.
3 credits Fall & Spring Semester
Black leaders and leadership organizations. Emphasis on their role in overcoming oppression and barriers to advancement.
PREREQUISITE: THREE CREDITS IN AAS OR PERMISSION OF INSTRUCTOR

AAS390 Special Topics
3 credits Fall & Spring Semester & First & Second Summer Session
Content varies by semester
PREREQUISITE: 3 CREDITS IN AFRICAN STUDIES OR PERMISSION OF INSTRUCTOR
AFRICANA STUDIES

AAS490 Senior Seminar in Africana Studies  
3 credits  
Fall & Spring Semester  
Content varies by semester.  
PREREQUISITE: AAS 250

AMERICAN STUDIES

AMS101 Introduction to American Studies  
3 credits  
Fall & Spring Semester  
An interdisciplinary approach to American Studies with attention to a particular theme or period. (Satisfies Social Science core requirement).

AMS301 Topics in American Studies  
3 credits  
Fall & Spring Semester  
Content varies by semester.  
PREREQUISITE: AMS 101 OR PERMISSION OF INSTRUCTOR.

AMS310 The U.S., Transnationalism, and Globalization  
3 credits  
Spring Semester  
The history of the United States within a global framework.  
PREREQUISITE: AMS 101 OR PERMISSION OF INSTRUCTOR

AMS350 History and culture of South Florida  
3 credits  
Spring Semester  
The history and culture of South Florida from a multidisciplinary perspective.  
PREREQUISITE: AMS101 OR PERMISSION OF INSTRUCTOR

AMS399 Independent Study  
1-3 credits  
Offered By Announcement Only  
By arrangement with instructor; content varies.  
PREREQUISITE: AMS 101 AND PERMISSION OF INSTRUCTOR

AMS401 Seminar in American Studies  
3 credits  
Fall & Spring Semester  
Content varies by semester.  
PREREQUISITE: SIX CREDITS IN AMS COURSES.

AMS415 Labor, migrations, and social movements in the americas  
3 credits  
Spring Semester  
Social, political, economic, and cultural issues related to migrant labor in the Americas while placing Miami at the center of analysis.  
PREREQUISITE: 3 CREDITS IN AMERICAN STUDIES OR LATIN AMERICAN STUDIES

AMS450 Popular culture in the united states  
3 credits  
Fall Semester  
Rise of various forms of popular culture, from print media to music and film, in American history.  
PREREQUISITE: 3 CREDITS IN AMERICAN HISTORY

AMS499 Independent Study  
3 credits  
Fall Semester & First & Second Summer Session  
By arrangement with instructor; content varies.  
PREREQUISITE: AMS 101 AND PERMISSION OF INSTRUCTOR
AMERICAN STUDIES

AMS501 SENIOR PROJECT
3 credits
Spring Semester
All majors must complete either an individual research project or an internship at a local cultural or civic institution. Either option must be approved by the program director.
PREREQUISITE: SENIOR STANDING

AMS505 HONORS THESIS
3 credits
Spring Semester
American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS505: honors thesis. Candidates for departmental honors are responsible for finding a faculty member to serve as the thesis advisor. Students would take AMS 501 in the fall semester or the senior year and AMS 505 in the spring to complete the honors thesis.
PREREQUISITE: SENIOR STANDING, MINIMUM GPA 3.5. PERMISSION OF PROGRAM DIRECTOR

ANTHROPOLOGY

APY101 Introduction to Anthropology
3 credits
Fall & Spring Semester
A broad overview of archaeology, cultural anthropology, biological anthropology, and linguistics.

APY201 Principles of Archaeology
3 credits
Fall & Spring Semester
History, methods, and theory of archaeology with an outline of the main characteristics of the prehistoric record throughout the world.

APY202 Principles of Cultural Anthropology
3 credits
Fall & Spring Semester
Cultural anthropology, including such topics as economics, politics, kinship and families, health systems, religion, and personality.

APY203 Principles of Physical Anthropology
3 credits
Fall & Spring Semester
The origin and biological development of the human species; human evolution explored by means of the fossil record of prehistoric population; differentiation and adaptation of contemporary populations in various world environments; the comparison of humans and other primates with respect to biological and behavioral variability.

APY204 Principles of Linguistic Anthropology
3 credits
Fall Semester
Human linguistic principles of phonology, morphology, and grammar to construct a framework for understanding the operation of language in cultural context. The functions of human language in structuring ideological, economic, and political realms.

APY208 Short-Changed in the City
3 credits
Fall Semester
Marginalization plagues sub-populations in almost every large city. An anthropological view of this problem and its origins, presented through readings, discussions, lectures and field trips.
PREREQUISITE: APY 202 OR OTHER SOCIAL/BEHAVIORAL SCIENCE
APY210 Physical Anthropology and Society
3 credits Offered By Announcement Only
An evolutionary analysis of the human species from a social science perspective. History, methods, major theories, and key findings of Physical Anthropology.

APY230 The Sounds of the World's Languages
3 credits Offered By Announcement Only
The range of sounds produced by the speakers of the world's languages. An introduction to phonetics, with a focus on acoustically-oriented methods used in contemporary phonetics.
PREREQUISITE: APY 204

APY301 World Prehistory
3 credits Spring Semester
The global prehistoric record, with emphasis on the development of social complexity and ancient states.
PREREQUISITE: APY 201.

APY306 Human Evolution
3 credits Spring Semester
The macroevolution of humans using the fossil record of vertebrates, including the development of uniquely human behavioral and anatomical adaptations, and of diversity in living populations.
PREREQUISITE: APY 201, OR 203, OR PERMISSION OF THE INSTRUCTOR

APY307 Human Adaptation
3 credits Spring Semester
Human biological adaptation to different environments and stress is examined anthropologically within an evolutionary framework. Mechanisms of adaptation to temperature extremes and other climatic variables, high altitude, disease, nutritional stress, urbanization, extraterrestrial conditions, and other environmental challenges are described in relation to biological and behavioral variations among human populations. The limits of human performance and human adaptive potential in the present and future are explored.

APY308 Human Variation: Anthropology of Race
3 credits Fall Semester
Human biological diversity is viewed historically within a cross-cultural, evolutionary framework. Patterns of variation in human morphological, anatomical, physiological, biochemical, genetic, and behavioral characteristics are investigated in peoples living in different environments throughout the world. Observed differences among human populations are discussed with reference to traditional theories of racial taxonomy and modern perspectives in human classification.

APY309 Evolution of Human Behavior
3 credits Spring Semester
PREREQUISITE: APY 201 OR 202 OR 203 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.
COLLEGE OF ARTS AND SCIENCES

ANTHROPOLOGY

APY310 Primate Behavior and Adaptation
3 credits
Spring Semester
The taxonomy, distribution, anatomy, social behavior and adaptations to habitats of human and non-human primates as seen from an evolutionary perspective.
PREREQUISITE: APY 203 AND BIL 150 OR PERMISSION OF INSTRUCTOR.

APY315 Folk and Alternative Medicine
3 credits
Spring Semester
Historical and cultural backgrounds of health therapies, including theoretical bases of traditional ethnomedical, nonwestern, and complementary medical systems.
PREREQUISITE: ANY 200 LEVEL ANTHROPOLOGY COURSE, OR ANY 300 LEVEL NURSING COURSE, OR PERMISSION OF THE INSTRUCTOR.

APY320 The Evolution of Language
3 credits
Spring Semester
Popular contemporary hypotheses on the origins and development of language.
PREREQUISITE: APY 204

APY333 Ancient Celtic Society
3 credits
Offered By Announcement Only
Early Celtic culture and technology as reflected in the Iron Age archaeological remains of Europe.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY340 Marine Archaeology
3 credits
Spring Semester
Location, excavation, and study of submerged sites.
PREREQUISITE: APY 201 OR PERMISSION OF INSTRUCTOR.

APY345 Ancient Civilizations of Mesoamerica
3 credits
Spring Semester
Major pre-Columbian cultures of Mesoamerica, from Olmec to Aztec periods, with emphasis on ancient Maya.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY350 Ancient Cultures of the New World
3 credits
Offered By Announcement Only
The prehistoric record of the Americas, emphasizing the belief systems and social development of ancient chiefdoms and states.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY355 Ancient People of North America
3 credits
Offered By Announcement Only
The archaeological record of North America prior to European contact, exploring the relationship of art and oral history to material remains.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY356 Florida Archaeology
3 credits
Offered By Announcement Only
Archaeological remains of ancient cultures in the Florida peninsula, from initial occupation to the Colonial Period.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.
APY360 Anthropology of Food
3 credits Fall Semester
Evolution of human diet, basic nutrition, food taboos, effects of domestication, effects of diet on skeletal remains, analysis of your own food habits, and the impact of certain foods on our biocultural evolution of our species.
PREREQUISITE: ANY 200 LEVEL ANTHROPOLOGY COURSE OR PERMISSION OF INSTRUCTOR.

APY361 Gender and Language
3 credits Fall & Spring Semester & First & Second Summer Session
the ways in which language is used in the constitution of gender from a cross-cultural perspective. Course is co-listed with WGS 361
PREREQUISITE: NONE

APY362 The Languages of the World
3 credits Spring Semester
The world's languages. The primary focus is on major differences and similarities among the structural properties of languages from diverse regions and linguistic families. In short, an introduction to linguistic typology.
PREREQUISITE: APY 204

APY376 Economic Anthropology
3 credits Offered By Announcement Only
The structure and operation of the small-scale economy in the social system is examined. The interrelationship between social and economic systems, and the formation of non-market economies.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY377 Anthropology of Political Systems and Discourse
3 credits Offered By Announcement Only
Political systems and processes in tribal societies, with special emphasis on dispute settlement, the organization of political control, and the use of oratory. Case studies from Latin American and African examples.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY385 Caribbean Cultures
3 credits Spring Semester
Caribbean societies, including ethnic diversity, production and exchange, domestic organization, and belief systems.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY386 Psychological Anthropology
3 credits Fall Semester
The interaction between personality and cultural settings. Topics include cross-cultural child rearing and enculturation, behavioral development and adjustment, “deviance,” and ethnopsychiatry.
PREREQUISITE: APY 201 OR PSY 110 AND THREE ADDITIONAL CREDITS IN EITHER ANTHROPOLOGY OR PSYCHOLOGY.

APY387 Cultural Evolution
3 credits Spring Semester
Evolution of social systems and technologies, from hunting and gathering bands through industrial states.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.
ANTHROPOLOGY

APY390 African Cultures
3 credits  Offered By Announcement Only
Political and domestic organization, production, exchange, and belief systems of traditional African cultures, and the changes caused by increasing urbanization and modernization.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY391 Gender in Ancient Cultures
3 credits  Offered By Announcement Only
A cross-cultural examination of the role gender played in ancient complex culture areas, such as Mesoamerica, Mesopotamia, and the Mediterranean, with emphasis on using the archaeological record to reconstruct social roles.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY392 Sex and Culture
3 credits  Fall Semester
A cross-cultural examination of sex roles and sexuality; gender identity, division of labor, functions of marriage, sexual practices, reproductive control, and political relationships between the sexes.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY393 Drugs and Culture
3 credits  Offered By Announcement Only
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANOTHER SOCIAL/BEHAVIORAL SCIENCE.

APY394 Comparative Religion
3 credits  Fall Semester
A cross-cultural investigation of differing levels of religious belief systems examined from both etic and emic points of view.

APY395 Gender, Race & Class
3 credits  Fall Semester
PREREQUISITE: APY 202, WGS 201 OR PERMISSION OF INSTRUCTOR

APY396 Youth Culture, Identity and Globalization
3 credits  Spring Semester
Youth cultural practices and experiences in various urban contexts in the world. Particular emphasis is placed on marginalization, identity and commodification of violent practices as embedded in the globalization processes.
PREREQUISITE: APY 202 OR ANY SOCIAL AND BEHAVIORAL SCIENCES

APY397 Violence and Ritual
3 credits  Offered By Announcement Only
Various theories of ritual and violence with reference to ethnographically-based topics. It will explore the role of symbols, rituals and ideologies in shaping and contesting power within nations and other political communities.
PREREQUISITE: APY 202 OR ANY SOCIAL AND BEHAVIORAL SCIENCES

APY398 Coastal Cultures
3 credits  Spring Semester
Fishermen and their special relations to the environment, from Thailand and Sri Lanka to Alaska and the West Indies. Decision-making processes among fishermen, business concepts, responses to technology and myths of the sea.
PREREQUISITE: APY 202 AND THREE CREDITS IN ANTHROPOLOGY OR PERMISSION OF INSTRUCTOR.
ANTHROPOLOGY

APY399 The Anthropology of Kinship and Family in America
3 credits  Fall Semester
Theories of kinship and the family. It will examine emergence of new patterns of
kinship networks and construction of individuals. Ethnographic materials will
be drawn from the Americas and the Caribbean, particularly Brazil, Cuba, Haiti,
Jamaica and the United States.
PREREQUISITE: 6 CREDITS 200 LEVELS OR ABOVE IN ANTHROPOLOGY

APY405 Readings in Anthropology
1- 3 credits  Fall Semester
Supervised readings on special topics in Anthropology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY406 Readings in Anthropology
1- 3 credits  Spring Semester
Supervised readings on special topics in Anthropology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY413 Medical Anthropology
3 credits  Fall Semester
Cross-cultural and historical perspectives on health and illness in human evolution.
Effects of heredity, environment, and culture upon human disease ecology. Biological
and behavioral adaptations to disease.
PREREQUISITE: THREE CREDITS IN ANTHROPOLOGY, AND THREE CREDITS FROM BIOLOGY OR
NURSING.

APY414 Forensic Anthropology I: Human Osteology
3 credits  Fall Semester
Identification and interpretation of the human skeleton, including age, sex, hard
tissue pathology and traumas.
PREREQUISITE: APY 203, OR PERMISSION OF THE INSTRUCTOR.

APY415 Forensic Anthropology II: Fieldwork
3 credits  Spring Semester
The investigation, analyses, and legal aspects of human remains recovered from
crime scenes and mass disasters.
PREREQUISITE: APY 203 AND 414 OR PERMISSION OF THE INSTRUCTOR.

APY416 Bioarchaeology-Peopling the past
3 credits  Offered By Announcement Only
Contextualization of bodies in space, cultural milieu and time are the primary
focus of this course. Students will explore bioarchaeology’s history, development
and major topical concerns.
PREREQUISITE: APY 201 AND APY 203, OR PERMISSION OF THE INSTRUCTOR.

APY418 Seminar in Anthropology
3 credits  Fall & Spring Semester
Consideration of special topics in physical anthropology, linguistics, archaeology
and ethnology and their interrelationships.

APY419 Politics of the Past
3 credits  Spring Semester
PREREQUISITE: APY 201, OR PERMISSION OF THE INSTRUCTOR
ANTHROPOLOGY

APY420 Archaeology, Architecture, and the City
3 credits
Offered By Announcement Only
Ancient architectural remains in the global anthropological perspective, emphasizing the role of architecture in shaping the evolution of social and political interactions.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY421 Interpreting Bodies
3 credits
Spring Semester
PREREQUISITE: APY 202, WGS 201, OR PERMISSION OF THE INSTRUCTOR

APY422 Pseudoscience in Archaeology
3 credits
Spring Semester
Reconstructions of how people lived in the past that claim scientific validity, use the terminology of science, but are unsupported by evidence, can be called pseudoscientific. This course critically evaluates the field of pseudoscientific archaeology by applying the scientific method, logic, and common sense.
PREREQUISITE: APY 201 AND THREE ADDITIONAL APY CREDITS.

APY430 Anthropology of Sustainability
3 credits
Fall Semester
PREREQUISITE: APY 202 OR PERMISSION OF THE INSTRUCTOR

APY435 Anthropology of Nature and Environment
3 credits
Spring Semester
PREREQUISITE: APY 202 OR PERMISSION OF INSTRUCTOR

APY440 Environmental Archaeology
3 credits
Offered By Announcement Only
Theory and methodologies in the reconstruction of Quaternary environments from the archaeological record. Techniques of geoarchaeology, zooarchaeology, and paleoethnobotany.
PREREQUISITE: APY 201 AND THREE CREDITS IN BIOLOGY OR MARINE SCIENCE OR PERMISSION OF INSTRUCTOR.

APY445 Archaeology of the Ancient Maya
3 credits
Offered By Announcement Only
Seminar in ancient Maya culture, including examination of archaeological remains, epigraphy, lifeways, and art.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY477 Sacrifice and Ritual
3 credits
Fall Semester
Rituals from both tribal and other societies considered in a framework of a general theory of symbols and practice. Structure and function of sacrifice in the definition of cultural categories, concepts of morality, and the general relationship of humans to the supernatural.
PREREQUISITE: APY 394 OR PERMISSION OF THE INSTRUCTOR.

APY484 Anthropological Theory
3 credits
Spring Semester
Theoretical frameworks directing data collection and research methodology in anthropology.
PREREQUISITE: APY 202 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

826
ANTHROPOLOGY

APY485 Archeological Theory and Technique
3 credits Offered By Announcement Only
Theoretical traditions that shape modern archaeological research design and interpretation.
PREREQUISITE: APY 201 AND THREE ADDITIONAL CREDITS IN ANTHROPOLOGY.

APY501 Methods of Anthropological Research
3-6 credits Spring Semester
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE.

APY502 Field Studies in Anthropology
3-6 credits Fall & Spring Semester & First Summer Session
Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE AND WRITTEN PERMISSION FROM INSTRUCTOR.

APY505 Museum Internship
3 credits Fall & Spring Semester
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY506 Workshop in Anthropology
3-6 credits Fall & Spring Semester
This course is designed for upper level and graduate students to participate in special topics in Anthropology and related fields.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

APY512 Advanced Medical Anthropology
3 credits Fall & Spring Semester
Applications of theories and methods of medical anthropology to problems in human health and disease.
PREREQUISITE: APY 413, OR THREE CREDITS IN NURSING, OR THREE CREDITS IN EPIDEMIOLOGY AND PUBLIC HEALTH, OR PERMISSION OF THE INSTRUCTOR.

APY518 Advanced Seminar in Anthropology
3 credits Fall & Spring Semester
Specialized topics in Anthropology to involve students into current research specializations.
PREREQUISITE: SIX CREDITS IN ANTHROPOLOGY AT 300 LEVEL OR ABOVE OR PERMISSION OF INSTRUCTOR.

ARABIC

ARB101 Elementary Arabic I
3 credits Fall Semester
Fundamental grammatical principles; drill in pronunciation; simple reading and translation. Closed to native speakers.

ARB102 Elementary Arabic II
3 credits Spring Semester
Reading and translation; oral and written exercises. Closed to native speakers.
Closed to native speakers.
PREREQUISITE: ARB 101 OR THE EQUIVALENT. CLOSED TO NATIVE SPEAKERS.
AR200 Advanced Arabic
3 credits
Fall Semester
Continuation of Arabic 201. Readings designed to integrate listening comprehension, speaking, reading, writing skills. Discussion of Arab society, history and culture. Prerequisite: ARB 201 - Closed to native speakers. Open to Heritage speakers not formally educated in Arabic.
PREREQUISITE: ARB 20R OR THE EQUIVALENT

AR201 Intermediate Arabic
3 credits
Fall Semester
Reading and translation; oral and written exercises. Closed to native speakers. Closed to native speakers.
PREREQUISITE: TWO SEMESTERS OF ARABIC OR THE EQUIVALENT. CLOSED TO NATIVE SPEAKERS.

AR202 Intermediate Arabic II
3 credits
Spring Semester
Continuation of Arabic 201. Readings designed to integrate listening comprehension, speaking, reading, writing skills. Discussion of Arab society, history and culture. Closed to native speakers.
PREREQUISITE: ARABIC 201 - CLOSED TO NATIVE SPEAKERS.

AR310 Topics in Arabic Studies in Translation
3 credits
Offered By Announcement Only
Topics within the main linguistic, literary, and cultural facets of the Arabic-speaking world, including language in society, gender and sexuality, immigration, and literary, cinematic, and artistic representations of central themes or issues. Conducted in English. Writing credit. May be repeated for credit if topics vary.
PREREQUISITE: ENG 106 AND A 200-LEVEL COURSE IN HUMANITIES OR SOCIAL SCIENCES; OR PERMISSION OF INSTRUCTOR

AR400 Levantine Colloquial Arabic
3 credits
Fall Semester
PREREQUISITE: ARB 102 OR THE EQUIVALENT

AR591 Directed Readings
1- 3 credits
Offered By Announcement Only
PREREQUISITE: ONE ARB COURSE AT 200-LEVEL OR HIGHER AND PERMISSION OF THE INSTRUCTOR

ART
ART10T Art Appreciation
0 credit
Not Offered; Transfer Credit Only
PREREQUISITE: MDCC TRANSFER COURSE

ART101 Introduction to Drawing I
3 credits
Fall & Spring Semester & First Summer Session
Contour, cross-contour, perspective, proportion, chiaroscuro, and gesture in pictorial composition.

ART102 Introduction to Drawing II
3 credits
Fall & Spring Semester
Experimentation, chance, exaggeration, movement, texture, and color in pictorial composition.

ART103 Two-Dimensional Design
3 credits
Fall & Spring Semester & First & Second Summer Session
Line, rhythm, shape, pattern, value and color in pictorial composition.
ART104 Three-Dimensional Design
3 credits  Fall & Spring Semester & Second Summer Session
Basic 3D design principles to include: structure, shape, volume, and weight.

ART105 Figure Drawing
3 credits  Fall & Spring Semester
Drawing the human figure: proportion, anatomy, perspective, gesture, and expressive line.
PREREQUISITE: ART 101.

ART106 Issues in Art Making
3 credits  Fall Semester
Survey of theoretical, historical and contemporary approaches.
PREREQUISITE: ART 101; 103 OR 104, OR PERMISSION OF INSTRUCTOR.

ART107 Introduction to Drawing III
3 credits  Fall Semester
Continuation of ART 101 with emphasis on Renaissance perspective and alternative systems of spatial representation. Survey of materials and methods. Introduction of color.
PREREQUISITE: ART 101.

ART108 Figure in Clay I
3 credits  Fall & Spring Semester
Modeling the human figure in clay; proportion, anatomy, volume, gesture and form.
PREREQUISITE: NONE

ART109 Introduction to Electronic Media
3 credits  Fall & Spring Semester
Computer skills for desktop publishing and digital imaging.

ART180 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART181 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART182 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART183 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART184 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART185 Studies in Studio Art
1-3 credits  Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.
ART200 Intro to Concepts and Techniques in Digital Video
3 credits Offered By Announcement Only
An introduction to digital video as a means of artistic expression and its unique approach to technology. A hands on approach to beginning video art production.
PREREQUISITE: SUMMER SCHOLAR STUDENT ONLY.

ART202 Introduction to Painting
3 credits Fall & Spring Semester
Materials and techniques of easel painting.
PREREQUISITE: ART 101 AND 103, OR PERMISSION OF INSTRUCTOR.

ART210 Introduction to Photography
3 credits Fall & Spring Semester & First Summer Session
Camera techniques and darkroom procedures for black and white photography.

ART217 Introduction to Sculpture
3 credits Fall & Spring Semester
Integrated approach to concept development, craftsmanship and appropriate use of materials.
PREREQUISITE: ART 101 AND 104 OR PERMISSION OF INSTRUCTOR.

ART251 Intaglio/Relief I
3 credits Offered By Announcement Only
Drypoint, engraving, etching, aquatint, and softground; relief and intaglio printed collographs; relief printing from linoleum.
PREREQUISITE: ART 101 AND 103 AND 109, OR PERMISSION OF INSTRUCTOR.

ART252 Lithography I
3 credits Offered By Announcement Only
Beginning lithography in black and white from stones, aluminum plates, and photo plates.
PREREQUISITE: ART 101 AND 103 AND 109 OR PERMISSION OF INSTRUCTOR.

ART253 Silkscreen I
3 credits Offered By Announcement Only
Beginning silkscreen: monotyping with screens, reduction printing, multiple run silkscreen printing and beginning photo silkscreen.
PREREQUISITE: ART 101 AND 103 AND 109 OR PERMISSION OF INSTRUCTOR.

ART254 Computer Applications for Printmaking
3 credits Offered By Announcement Only
Software programs used as printmaking manipulation tools to aid in the planning of prints.
PREREQUISITE: ART 101, 103, AND 109 OR PERMISSION OF INSTRUCTOR.

ART261 Hand-built Ceramics I
3 credits Fall & Spring Semester
Beginning hand-building techniques: pinching, coiling, slab construction; introduction to glazing and firing.
PREREQUISITE: NONE.

ART262 Wheel Thrown Ceramics I
3 credits Fall & Spring Semester
Wheel throwing, glazing and firing.
PREREQUISITE: NONE.
ART263 Introduction to Glass Blowing  
3 credits                                                       Fall & Spring Semester
Forming shapes and vessels from molten glass by the use of a blow pipe and glass tools.
PREREQUISITE: ART 104 OR PERMISSION OF INSTRUCTOR

ART280 Studies in Studio Art  
1- 3 credits                                                       Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART281 Studies in Studio Art  
1- 3 credits                                                       Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART282 Studies in Studio Art  
1- 3 credits                                                       Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART283 Studies in Studio Art  
1- 3 credits                                                       Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART284 Studies in Studio Art  
1- 3 credits                                                       Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART285 Studies in Studio Art  
1- 3 credits                                                       Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART291 Graphic Design I  
3 credits                                                       Fall & Spring Semester
A comprehensive approach to understanding design fundamentals and the practice of graphic communications.
PREREQUISITE: ART 109

ART292 Multimedia I/ Web Design  
3 credits                                                       Fall & Spring Semester
Introduction to web design using several current time-based media.
PREREQUISITE: ART 109

ART293 Typography  
3 credits                                                       Fall & Spring Semester
Type and image compositions, history, arrangement, style, aesthetics of printed communications, type software and calligraphy.
PREREQUISITE: ART 291 OR PERMISSION OF INSTRUCTOR.

ART294 Multimedia II/ Animation  
3 credits                                                       Fall & Spring Semester
Animation using time-based media.
PREREQUISITE: ART 292
ART301 Intermediate Painting I
3 credits Fall & Spring Semester
Painting in oil and acrylic. Emphasis on experimentation and creative expression.

ART302 Intermediate Painting II
3 credits Fall & Spring Semester
Continuation of ART 301.
PREREQUISITE: ART 301.

ART305 Intermediate Figure Drawing
3 credits Fall & Spring Semester
Continuation of ART 105.
PREREQUISITE: ART 105.

ART308 Figure in Clay II
3 credits Fall & Spring Semester
Continuation of ART 108
PREREQUISITE: ART 108 OR PERMISSION OF INSTRUCTOR.

ART310 Intermediate Photography I
3 credits Fall & Spring Semester
Fine art photography in black and white. Continuation of ART 210. Emphasis on experimentation and creative expression.

ART311 Color Photography
3 credits Fall & Spring Semester
Fine Art photography in color. Emphasis on craftsmanship and creative expression.
PREREQUISITE: ART 310.

ART312 Introduction to Digital Photography
3 credits Fall & Spring Semester
Introduction to the technology of electronic/computer digitized photography.
PREREQUISITE: ART 310 AND 311.

ART317 Intermediate Sculpture I
3 credits Fall & Spring Semester
Incorporation of symbol and metaphor to achieve meaning, use of additional materials and technical processes.
PREREQUISITE: ART 217.

ART318 Intermediate Sculpture II
3 credits Fall & Spring Semester
Continuation of ART 317.
PREREQUISITE: ART 317.

ART319 Sculpture in Architecture & Science
3 credits Offered By Announcement Only
The principles of 3-D design and sculpture as applied to architectural and engineering uses, both functional and aesthetic.
PREREQUISITE: ART 104
ART351 Intaglio/Relief II  
3 credits  
Offered By Announcement Only  
Continuation of ART 251. Additional processes such as mezzotint, relief printing from woodblocks, multiple block printing, photographic xerox transfers and photo etching.  
PREREQUISITE: ART 251.

ART352 Lithography II  
3 credits  
Offered By Announcement Only  
Continuation of ART 252. Color printing from stones, aluminum plates and photo litho plates. Combination of lithography with other print media.  
PREREQUISITE: ART 252.

ART353 Silkscreen II  
3 credits  
Offered By Announcement Only  
Continuation of ART 253, including silk-screening on canvas, larger format work, and advanced photo silkscreen techniques.  
PREREQUISITE: ART 253.

ART354 Computer Assisted Printmaking: Lithography and Silkscreen  
3 credits  
Offered By Announcement Only  
The use of inkjet and laser printers to make positives for black and white and process color work in photo lithography; custom color separations for multiple screen printing.  
PREREQUISITE: ART 254 OR PERMISSION OF INSTRUCTOR.

ART361 Hand-built Ceramics II  
3 credits  
Fall & Spring Semester  
Continuation of ART 261.  
PREREQUISITE: ART 261 OR PERMISSION OF INSTRUCTOR.

ART362 Wheel Thrown Ceramics II  
3 credits  
Fall & Spring Semester  
Continuation of ART 262.  
PREREQUISITE: ART 262 OR PERMISSION OF INSTRUCTOR.

ART363 Cast Glass Processes  
3 credits  
Fall Semester  
The art of cast glass including sand casting and lost wax techniques.  
PREREQUISITE: ART 104 OR PERMISSION OF INSTRUCTOR.

ART364 Intermediate Glass Blowing  
3 credits  
Fall & Spring Semester  
Exploration of glass working techniques.  
PREREQUISITE: ART 263.

ART380 Studies in Studio Art  
1-3 credits  
Not Offered; Transfer Credit Only  
Studio studies taken at other institutions with no direct equivalents.

ART381 Studies in Studio Art  
1-3 credits  
Not Offered; Transfer Credit Only  
Studio studies taken at other institutions with no direct equivalents.
ART382 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART383 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART384 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART385 Studies in Studio Art
1-3 credits Not Offered; Transfer Credit Only
Studio studies taken at other institutions with no direct equivalents.

ART391 Graphic Design II
3 credits Fall & Spring Semester
Development of form and conceptual design. Contemporary visual rhetorical strategies such as metaphors, puns, irony and methonymy.
PREREQUISITE: ART 291

ART392 Multimedia III
3 credits Fall & Spring Semester
Video art, multimedia, installation art and interactive animation.
PREREQUISITE: ART 109

ART401 Advanced Painting I
3 credits Fall & Spring Semester
Development of a personal style in painting.
PREREQUISITE: ART 302.

ART402 Advanced Painting II
3 credits Fall & Spring Semester
Continuation of ART 401.
PREREQUISITE: ART 401.

ART405 Advanced Figure Drawing
3 credits Fall & Spring Semester
Continuation of ART 305.
PREREQUISITE: ART 305.

ART410 Advanced Photography I
3 credits Fall & Spring Semester
Development of a personal style in black and white, color, and/or digital photography.
PREREQUISITE: ART 311 AND 312.

ART411 Intermediate Digital Photography
3 credits Offered By Announcement Only
Digital photographic imaging with an emphasis on computer integration of silver based and alternative processes.
PREREQUISITE: ART 312 AND 410.
ART417 Advanced Sculpture I
3 credits
Fall & Spring Semester
Individual and collaborative installation and site-specific art.
PREREQUISITE: ART 318.

ART418 Advanced Sculpture II
3 credits
Fall & Spring Semester
Development of a personal visual vocabulary.
PREREQUISITE: ART 417.

ART451 Intaglio/Relief III
3 credits
Offered By Announcement Only
Continuation of ART 351.
PREREQUISITE: ART 351.

ART452 Lithography III
3 credits
Offered By Announcement Only
Continuation of ART 352.
PREREQUISITE: ART 352.

ART453 Silkscreen III
3 credits
Offered By Announcement Only
Continuation of ART 353.
PREREQUISITE: ART 353.

ART454 Computer Assisted Printmaking: Intaglio and Relief
3 credits
Offered By Announcement Only
Continuation of ART 354, photo etching and relief processes.
PREREQUISITE: ART 354 OR PERMISSION OF INSTRUCTOR.

ART461 Figure in Clay III
3 credits
Fall & Spring Semester
Advanced modeling from the figure. Emphasis on anatomy, line, gesture, volume, proportions and the expressive handling of clay.
PREREQUISITE: ART 361 OR PERMISSION OF INSTRUCTOR.

ART462 Advanced Ceramics
3 credits
Fall & Spring Semester
Development of expressive skills in either hand building or wheel throwing techniques.
PREREQUISITE: ART 361 OR 362.

ART463 Advance Topics in Ceramics
3 credits
Fall & Spring Semester
Changing topics/ Advance problems in ceramics processes.
PREREQUISITE: ART 361 OR ART 362 OR PERMISSION OF INSTRUCTOR.

ART491 Graphic Design III
3 credits
Fall & Spring Semester
Advanced page layout coupled with extensive use of typography with applications in page design for advertising and collateral projects.
PREREQUISITE: ART 391.
ART492 Multimedia IV  
3 credits \hspace{1em} Offered By Announcement Only  
Video art and multimedia installations/independent study.  
PREREQUISITE: ART 292, 294, 392

ART493 Illustration  
3 credits \hspace{1em} Offered By Announcement Only  
Contemporary illustration for print, new media, portfolio and exhibition.  
PREREQUISITE: ART 109 AND THREE ADDITIONAL CREDITS IN ART.

ART494 Critical Issues in Design and Culture  
3 credits \hspace{1em} Offered By Announcement Only  
Analytical and critical approach to graphic design/multimedia practice.  
PREREQUISITE: ART 491.

ART499 Honors Thesis  
3- 6 credits \hspace{1em} Fall & Spring Semester  
Formal thesis and project including an exhibition supervised by member of the department faculty.  
PREREQUISITE: B.F.A. CANDIDATE, SENIOR STANDING AND ACCEPTANCE IN DEPARTMENTAL HONORS PROGRAM.

ART501 Advanced Painting III  
1- 6 credits \hspace{1em} Fall & Spring Semester  
Course content decided between student and professor.  
PREREQUISITE: ART 402.

ART502 Advanced Painting IV  
1- 6 credits \hspace{1em} Fall & Spring Semester  
Continuation of ART 501.  
PREREQUISITE: ART 501

ART503 Advanced Painting V  
1- 6 credits \hspace{1em} Fall & Spring Semester  
Course content decided between student and professor. An independent study course may be repeated.  
PREREQUISITE: ART 502

ART504 Advanced Painting VI  
1- 6 credits \hspace{1em} Offered By Announcement Only  
Course content decided between student and professor. An Independent Study course may be repeated.  
PREREQUISITE: ART 503

ART505 Advanced Painting VII  
1- 6 credits \hspace{1em} Offered By Announcement Only  
Current readings and/or technical concerns not covered in the regular curriculum.  
Course content will vary each semester.  
PREREQUISITE: ART 504

ART509 Independent Study in Other Media  
1- 6 credits \hspace{1em} Offered By Announcement Only  
Course content decided between student and professor. Independent Study course may be repeated.  
PREREQUISITE: PERMISSION OF INSTRUCTOR.
ART510 Advanced Photography III
3 credits  Fall & Spring Semester
Course content decided between student and professor.
PREREQUISITE: ART 411.

ART511 Advanced Photography IV
3 credits  Fall & Spring Semester
Continuation of ART 510.
PREREQUISITE: ART 510.

ART512 Independent Study in Photography
1-6 credits  Fall & Spring Semester
Course content decided between student and professor. An independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART517 Advanced Sculpture III
3 credits  Fall & Spring Semester
Examination of ongoing work in relationship to historical and contemporary interpretations issues.
PREREQUISITE: ART 418 AND PERMISSION OF INSTRUCTOR

ART518 Advanced Sculpture IV
3 credits  Fall & Spring Semester
Continuation of ART 517.
PREREQUISITE: ART 517.

ART519 Independent Study in Sculpture
1-6 credits  Fall & Spring Semester
Course content decided between student and professor. An Independent Study course may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART551 Intaglio/Relief IV
3 credits  Offered By Announcement Only
Advanced work in intaglio/relief processes: course requirements decided between student and professor.
PREREQUISITE: ART 451.

ART552 Lithography IV
3 credits  Offered By Announcement Only
Advanced work in lithography: course requirements decided between student and professor.
PREREQUISITE: ART 452.

ART553 Silkscreen IV
3 credits  Offered By Announcement Only
Advanced work in silkscreen.
PREREQUISITE: ART 453.

ART554 Computer Assisted Printmaking
3 credits  Offered By Announcement Only
Advanced work in computer assisted printmaking; course requirements decided between student and professor.
PREREQUISITE: ART 454 OR PERMISSION OF INSTRUCTOR.
ART555 Topics in Printmaking
1-6 credits Offered By Announcement Only
Current readings and/or technical concerns not covered in the regular curriculum.
Course content will vary each semester.
PREREQUISITE: ANY 400 LEVEL PRINTMAKING CLASS.

ART562 Contemporary Ceramic Art
3 credits Fall & Spring Semester
Development of artistic style and technical abilities in relation to contemporary
patterns in ceramic art.
PREREQUISITE: ART 462 OR ART 463 OR PERMISSION OF INSTRUCTOR

ART563 Independent Study in Ceramics/Glass
1-6 credits Fall & Spring Semester
Course content decided between student and professor. An Independent Study course
may be repeated.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART564 Directed Research and Projects in Ceramics/Glass
3 credits Fall & Spring Semester
Ceramic/glass approaches from early history to contemporary period, and the development
of technical ability.
PREREQUISITE: ART 561 OR PERMISSION OF INSTRUCTOR.

ART591 Portfolio/Business of Design
3 credits Offered By Announcement Only
Individually supervised graphic design portfolio. Professional practices in design.
PREREQUISITE: ART 491.

ART592 Special Projects/Multimedia/Portfolio
3 credits Offered By Announcement Only
Video Art, print design, illustration or multimedia portfolio preparation.
PREREQUISITE: ART 292.

ART593 Seminar in Professional Practices
1-6 credits Fall & Spring Semester
Advanced course with a required placement in a professional design or multimedia
setting. Classroom sessions on professional topics and issues. Portfolio required.
PREREQUISITE: SENIOR STANDING.

ART599 Exhibition Preparation
3 credits Fall & Spring Semester
A seminar class devoted to the preparatory work needed to plan and promote a solo
exhibition, including installation/lighting concerns. Preliminary written assignments
will also be given in preparation for ART 710 Thesis.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ART HISTORY

ARH107 History of Photography
3 credits Spring Semester
A study of photography as a visual medium of expression and communication: a chronological
examination of its origins, styles and uses.

ARH131 Survey of Western Art I
3 credits Fall & Spring Semester & First & Second Summer Session
The art of western cultures from pre-history through the Middle Ages.
COLLEGE OF ARTS AND SCIENCES
ART HISTORY

ARH132 Survey of Western Art II
3 credits  Fall & Spring Semester & First & Second Summer Session
The art of western cultures from the Renaissance through the 20th century.

ARH133 Art of Non-European Cultures
3 credits  Offered By Announcement Only
The art of non-European cultures with selections from Africa, Oceania, Asia, and/or the Native Americas.

ARH134 Ancient American Art through the Contact Period
3 credits  Offered By Announcement Only
Indigenous American arts (Andean South America, Mesoamerica, Native North America) produced in antiquity through the European contact period.

ARH200 Islamic Art
3 credits  Offered By Announcement Only
Students in this course will study Islam as a religious and political entity and will analyze how the Islamic world defined itself in the realm of cultural production. This course will analyze a variety of Islamic artistic media, including architecture, manuscript illumination, textiles, ceramics, and small-scale luxury objects. Artworks from the 7th to the 17th century, created in a geographic area extending from Spain to India, will be studied in order to provide a general overview of artistic production in diverse Islamic lands.

ARH220 Student Docent Practicum at the Lowe Art Museum
1 credit  Fall Semester

ARH225 Introduction to Museum Studies
3 credits  Offered By Announcement Only

ARH233 European Visions of the New World
3 credits  Offered By Announcement Only
Survey of the European view of the Americas (16th-18th centuries) using prints, paintings, drawings, and illustrations in travel accounts.

ARH260 Islamic Art
3 credits  Fall Semester
Islamic art from the 7th to the 17th century including architecture, manuscript illumination, textiles, ceramics, and small-scale luxury objects. Study of Islam as a religious and political entity showing how the Islamic world defined itself in cultural creation.

ARH270 Spanish Art
3 credits  Spring Semester
A chronological study from prehistory to the present, addressing significant periods in Spanish art history, and establishing the unique characteristics of this art. How the effects of historical conditions (Islamic presence on the peninsula, American colonies, Franco) have defined Spain as distinct from its European neighbors.
ARH300 Spanish Art
3 credits
Offered By: Announcement Only
This course will study art produced on the Iberian Peninsula from the prehistoric period to the present day. It will proceed chronologically, addressing significant periods in Spanish art history, such as Roman, Islamic, Romanesque, Golden Age, Baroque and early Modern Spain. The aim of the course is to establish the unique characteristics of Spanish art, and how historical events (Islamic presence on the peninsula, American colonies, the regime of Franco) defined Spain as distinct from its European neighbors. The Spanish influence in art and architecture has been far-reaching, particularly in the Americas, and we will explore this influence in the early modern and contemporary periods in a variety of American locations.
PREREQUISITE: NONE

ARH321 Andean Art
3 credits
Offered By: Announcement Only
South American art from formative times through the Incan empire and the Spanish conquest (A.D. 1521).
PREREQUISITE: 3 CREDITS IN ART HISTORY

ARH322 Mesoamerican Art
3 credits
Offered By: Announcement Only
From Olmec Beginnings (ca 1,500 B.C.) through the Teotihuacan, the Mayan and the Aztec cultures to the Spanish Conquest (A.D. 1521).
PREREQUISITE: 3 CREDITS IN ART HISTORY

ARH323 Native American Art
3 credits
Offered By: Announcement Only
From the cultures of the Archaic Woodlands and the ancient Southwest (ca. 6,000 B.C.) to the present.
PREREQUISITE: 3 CREDITS IN ART HISTORY

ARH326 The Art of South Asia
3 credits
Fall Semester
The Arts of South Asia with selections from India and Thailand.
PREREQUISITE: 3 CREDITS IN ART HISTORY.

ARH327 The Art of East Asia
3 credits
Spring Semester
The Art of East Asia with selections from China, Korea, and Japan.
PREREQUISITE: 3 CREDITS IN ART HISTORY.

ARH332 Greek Art
3 credits
Offered By: Announcement Only
The art of ancient Greek civilization.
PREREQUISITE: ARH 131 OR HIS 221.

ARH333 Roman Art
3 credits
Offered By: Announcement Only
Roman art from the 1st century B.C. through the 4th century A.D.
PREREQUISITE: ARH 131 OR HIS 221.
ARH335 Early Christian and Byzantine Art
3 credits  Offered By Announcement Only
Christian art from the second through the fifteenth centuries in Rome and the Byzantine Empire.
PREREQUISITE: ARH 131 OR HIS 221.

ARH336 Medieval Art
3 credits  Offered By Announcement Only
Western European art from the fourth through the twelfth century.
PREREQUISITE: ARH 131 OR HIS 221.

ARH337 Italian Renaissance Art
3 credits  Offered By Announcement Only
The painting, sculpture, and architecture of Florence in the fifteenth century.
PREREQUISITE: ARH 132 OR HIS 221.

ARH338 Sixteenth Century Italian Art
3 credits  Offered By Announcement Only
The painting, sculpture, and architecture of Italy in the sixteenth century.
PREREQUISITE: ARH 132 OR HIS 221.

ARH339 Northern Renaissance Art
3 credits  Offered By Announcement Only
The painting of France and the Netherlands in the fourteenth and fifteenth centuries.
PREREQUISITE: ARH 132 OR HIS 221.

ARH340 Baroque Art
3 credits  Offered By Announcement Only
Art and architecture of the seventeenth century, focusing on major cultural centers in Europe and the Americas.
PREREQUISITE: ARH 132 OR HIS 222.

ARH341 Eighteenth-Century European Art
3 credits  Offered By Announcement Only
European art from 1700-1820, including Rococo and Neoclassicism, ending with Goya in Spain.
PREREQUISITE: ARH 132 OR HIS 222.

ARH342 Nineteenth-Century European Art
3 credits  Offered By Announcement Only
Neo-Classicism, Romanticism, Realism, Impressionism, 1760-1900.
PREREQUISITE: ARH 132 OR HIS 222.

ARH343 Modern Art
3 credits  Fall Semester
Cezanne to Surrealism. Primarily European Art c. 1880-1940 in the context of the development of Modernism and its aesthetic theories.
PREREQUISITE: ARH 132, HIS 222 OR THREE CREDITS OF HUMANITIES AT THE 300 LEVEL OR ABOVE.
ARH344 Contemporary Art
3 credits
Spring Semester
American and European Art from the Second World War to the present in its social, political, and theoretical contexts.
PREREQUISITE: ARH 132, HIS 222, OR THREE CREDITS OF HUMANITIES AT THE 300 LEVEL OR ABOVE.

ARH345 Art in the United States
3 credits
Colonial Art through the Armory Show c. 1750-1920.
PREREQUISITE: ARH 132, HIS 222, OR THREE CREDITS OF HUMANITIES AT THE 300 LEVEL OR ABOVE.

ARH346 History of Graphic Design
3 credits
Evolution of Graphic Design from the invention of writing through the twentieth century concentrating on contemporary themes and technical innovations.
PREREQUISITE: ARH 131, 132 OR PERMISSION OF INSTRUCTOR.

ARH347 Special Topics in Art History
3 credits
PREREQUISITE: 3 CREDITS IN ART HISTORY

ARH348 Special Topics in Architectural Theory and History
3 credits
PREREQUISITE: 3 CREDITS IN ART HISTORY

ARH349 Special Topics in Art and the Law
3 credits
PREREQUISITE: 3 CREDITS OF ART HISTORY

ARH350 Miami Museums: History, Theory, and Practice
3 credits
PREREQUISITE: 3 CREDITS OF ART HISTORY

ARH405 SPECIAL TOPICS IN MEDIEVAL ART
3 credits
Changing topics in Medieval Art.
PREREQUISITE: 3 CREDITS IN ART HISTORY

ARH407 Special Topics: Renaissance and Baroque Art
3 credits
Changing topics in Renaissance and Baroque art.
PREREQUISITE: 6 CREDITS IN ART HISTORY

ARH408 SPECIAL TOPICS IN MODERN ART
3 credits
Changing topics in Modern Art.
PREREQUISITE: 3 CREDITS IN ART HISTORY

ARH409 Special Topics in Contemporary Art
3 credits
Changing topics in contemporary art.
PREREQUISITE: 6 CREDITS IN ART HISTORY.
ARH411 Special Topics: Museum Studies  
3 credits  Offered By Announcement Only  
Changing topics in museum studies.  
PREREQUISITE: 6 CREDITS IN ART HISTORY.

ARH440 Seventeenth-century Dutch Art  
3 credits  Fall Semester  
Art and artists of the 17th Century Dutch Republic, including Rembrandt and Vermeer.  
PREREQUISITE: ARH 132.

ARH445 REMBRANDT VAN RIJN  
3 credits  Offered By Announcement Only  
Seventeenth-century Dutch Artist Rembrandt Van Rijn's life and work.  
PREREQUISITE: 6 CREDITS IN ART HISTORY

ARH499 Honors Thesis  
3-6 credits  Fall & Spring Semester  
Directed reading and a substantial and scholarly paper.  
PREREQUISITE: SENIOR STANDING AND ACCEPTANCE IN DEPARTMENTAL HONORS PROGRAM.

ARH505 Problems in Art History  
3 credits  Fall & Spring Semester  
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.  
PREREQUISITE: ANY 300-LEVEL OR 400-LEVEL COURSE IN ART HISTORY AND PERMISSION OF INSTRUCTOR.

ARH506 Problems in Art History  
3 credits  Fall & Spring Semester  
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.  
PREREQUISITE: ANY 300-LEVEL OR 400-LEVEL COURSE IN ART HISTORY AND PERMISSION OF INSTRUCTOR.

ARH507 Museum Studies Seminar  
3 credits  Offered By Announcement Only  
Administrative functions of local art museums; researching selected art works in their permanent collections.  
PREREQUISITE: 6 CREDITS IN HISTORY

ARH508 Museum Exhibition  
3 credits  Offered By Announcement Only  
Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.  
PREREQUISITE: 6 CREDITS OF ART HISTORY

ARH509 Museum Internship  
1-3 credits  Fall & Spring Semester  
UM sponsored internship with Miami-area museum.  
PREREQUISITE: BY PERMISSION OF HEAD OF ART HISTORY.
ARH510 Arts Administration Internship
1-3 credits Fall & Spring Semester
UM sponsored internship with Miami-area arts institution.
PREREQUISITE: BY PERMISSION OF HEAD OF ART HISTORY.

ARH511 ARTLAB @ THE LOWE
3 credits Spring Semester
Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.
PREREQUISITE: 9 CREDITS IN ART HISTORY, GRADUATE STANDING, OR BY PERMISSION OF INSTRUCTOR.

ARH530 Seminar in Art History
3 credits Offered By Announcement Only
Special topics in western and nonwestern art. Semester's topic will be announced.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARH540 Seminar in The History of Museums and Collecting
3 credits Offered By Announcement Only
History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.
PREREQUISITE: 9 CREDITS IN ART HISTORY, GRADUATE STANDING, OR BY PERMISSION OF INSTRUCTOR.

ARH550 Seminar in Theory and Methodology in the History of Art
3 credits Offered By Announcement Only
Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.
PREREQUISITE: 9 CREDITS IN ART HISTORY, GRADUATE STANDING OR BY PERMISSION OF INSTRUCTOR.

ARH560 Seminar in Nineteenth and Twentieth Century Art
3 credits Offered By Announcement Only
Special topics including museum practices and theory, women's art and contemporary issues.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

ARH570 Seminar in Non-European Art
3 credits Offered By Announcement Only
Special Topics in African, Oriental, Oceanic, Native North or South American art traditions.
PREREQUISITE: ARH 133, 134, OR PERMISSION OF INSTRUCTOR.

ARH598 Seminar in Contemporary American Art
3 credits Fall Semester
Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
PREREQUISITE: ARH 344. UNDERGRADUATES MUST HAVE PERMISSION OF INSTRUCTOR.
BMB145 Introduction to Biochemistry & Molecular Biology Research
2 credits                                      Fall & Spring Semester
PREREQUISITE: PERMISSION OF INSTRUCTOR

BMB151 Freshman Seminar
1 credit                                        Spring Semester
Basic Biochemistry and Molecular Biology information is presented to the students as background material to new information that is collected from weekly news stories on the web by the instructor and the students. Students write a brief paper on a topic that they select and prepare a Power Point presentation on that topic.
PREREQUISITE: BIOCHEMISTRY MAJORS ONLY OR PERMISSION OF INSTRUCTOR

BMB245 Introduction to Biochemistry and Molecular Biology or Nutrition Research
1- 3 credits                                  Fall & Spring Semester & First & Second Summer Session
PREREQUISITE: BMB 245 (IN THE FIELD, REQUIRES PERMISSION OF THE INSTRUCTOR TO REGISTER, BUT NOT LIMITED TO ONLY ONE STUDENT).

BMB251 Sophomore Seminar
1 credit                                       Spring Semester
Basic Biochemistry and Molecular Biology information is presented to the students as background material to new information that is collected from weekly news stories on the web, especially background information from weekly science journals, by the instructor and the students. Students write a brief paper on a topic that they select and prepare a Power Point presentation.
PREREQUISITE: THIS COURSE IS OPEN TO BIOCHEMISTRY MAJORS ONLY OR PERMISSION OF INSTRUCTOR

BMB258 Introduction to Biochemistry and Molecular Biology
3 credits                                      Spring Semester
The composition and functioning of a typical cell are described in chemical terms, leading to an understanding of how life processes such as metabolism, DNA replication and protein synthesis occur and are regulated at the level of individual molecules and reactions. Applications of biochemistry and molecular biology are discussed.
PREREQUISITE: CHM 112

BMB260 Introduction to Biochemistry and Nutrition
0- 3 credits                                  Spring Semester
The composition of food and the composition and functioning of a typical cell are described in chemical terms, leading to an understanding of how life processes such as digestion, and metabolism occur and are regulated at the level of individual molecule and reactions. Applications of biochemistry and nutrition are discussed.
PREREQUISITE: CHM 112, BUT CHM 201 PREFERRED; NOT OPEN TO STUDENTS WITH CREDIT IN BMB 258

BMB401 Biochemistry for the Medical Sciences
0- 3 credits                                  Fall Semester
Basic areas of biochemistry are discussed including protein structure, enzymology, metabolism, and molecular genetics. Emphasis is placed on central concepts of mammalian biochemistry. This course is recommended for premedical preparation.
PREREQUISITE: A GRADE OF B- OR HIGHER IN CHM 202 IS A PREREQUISITE
BMB407 Proteins and Enzymes
3 credits
Spring Semester
Course analyzes folding and binding of proteins, kinetics, and mechanisms of enzyme action. Not open to students with credits in BMB 507.
PREREQUISITE: BMB 406 OR 506 OR PERMISSION OF INSTRUCTOR.

BMB501 Senior Seminars
1 credit
Fall & Spring Semester
Students attend seminars of their own choice by visitors. Faculty or graduate students on recent research topics in Biochemistry and Molecular Biology or any other discipline in the basic biomedical sciences. Students write short reports on these seminars and critically evaluate the presentations. This course can be taken more than once.
PREREQUISITE: BMB 506

BMB506 Principles of Biochemistry and Molecular Biology
0- 3 credits
Fall Semester
Protein structure and function, enzyme mechanism and kinetics, and metabolism, focusing on energy metabolism and central concepts of metabolic regulation and of molecular biology including nucleic acid structure, protein synthesis, and DNA replication. (Not open to students with credit in BMB 401 or 406; for undergraduate honors credit or graduate student not majoring in biochemistry.
PREREQUISITE: A GRADE OF B- OR HIGHER IN CHM 202 IS A PREREQUISITE

BMB507 Proteins and Enzymes
3 credits
Spring Semester
Course analyzes the folding and binding of proteins, kinetics and mechanisms of enzyme action. For honors undergraduates. Not open to students in BMB 407.
PREREQUISITE: BMB 406 OR 506 OR PERMISSION OF INSTRUCTOR; FOR UNDERGRADUATE HONORS CREDIT OR GRADUATE STUDENTS NOT MAJORING IN BIOCHEMISTRY.

BMB509 Molecular Biology of the Gene I
3 credits
Fall Semester
Biochemical processes involved in the propagation and expression of genetic information in both prokaryotes and eukaryotes. Basic cellular processes of DNA replication, repair, genetic recombination, RNA transcription and processing, protein synthesis, control of gene expression, cell differentiation, and recombinant DNA technology. Reading includes both textbook assignments and original research papers.
PREREQUISITE: BMB 506 OR PERMISSION OF INSTRUCTOR.

BMB511 Topics in Applied BCH and Molecular Biology
1- 3 credits
Fall & Spring Semester & First & Second Summer Session
Selected topics from the fields of applied and pure biochemistry and molecular biology taught as a tutorial. Permission from Dr. Richard Myers is required for this course.
PREREQUISITE: BMB 406 OR 506 AND PERMISSION OF INSTRUCTOR.

BMB545 Research Problems in Biochemistry and Molecular Biology
2- 3 credits
Fall & Spring Semester & First & Second Summer Session
Laboratory research problems in various fields of biochemistry, including literature search, experiment design, data gathering, and evaluation or results. Permission from Dr. Richard Myers is required for this course.
PREREQUISITE: BMB545 (IN THE FIELD, REQUIRES PERMISSION OF THE INSTRUCTOR TO REGISTER, BUT NOT LIMITED TO ONLY ONE STUDENT).
BIL101 Introductory Biological Science
3 credits  Fall & Spring Semester & First & Second Summer Session
An integrated presentation of important biological processes and principles. Designed as an introduction to life sciences for the non-major. Students with credit in BIL 150 may NOT take this course to fulfill the natural science requirement. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS. STUDENTS WITH CREDIT IN BIL 150 MAY NOT TAKE THIS COURSE TO FULFILL THE NATURAL SCIENCE REQUIREMENT.

BIL102 Elementary Biotechnology
3 credits  Offered By Announcement Only
Major aspects of the biotechnology field for the non-science major. Food biotechnology, enzymes, environmental biotechnology, transgenic animals and plants, analytical biotechnology and more.

BIL103 Introduction to Ecology.
3 credits  Fall & Spring Semester
Overview of ecological and evolutionary principles; Relationships of organisms to living and non-living aspects of their environment; human impact on ecosystems. Not for credit in the biology major or minor.
PREREQUISITE: NOT FOR CREDIT IN THE BIOLOGY MAJOR OR MINOR.

BIL104 Genetics and Society
3 credits  Offered By Announcement Only
The impact of new knowledge in genetics and heredity on society, including a consideration of questions about the inheritance of I.Q. and behavior, racial differences, genetic screening, control of reproduction, genetic engineering, forensic applications.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL105 Biology of Plants.
3 credits  Offered By Announcement Only
Survey of the evolution and diversity of the plant kingdom; economic and cultural, importance of plants to humans. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL106 Biology of Animals
3 credits  Offered By Announcement Only
Survey of the evolution and diversity of the animal kingdom and the relationship between humans and other animals. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL107 Introduction to Evolution
3 credits  Fall Semester
Hereditary variation and the mechanisms of evolutionary change. Processes of species formation and the origin of adaptations. The development of evolutionary thinking from classical to contemporary time, including social issues (e.g., social Darwinism, creationism). Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.

BIL109 Human Biology
3 credits  Fall Semester
A survey of the anatomy and physiology of man and his relationship to some major biological problems. Lectures and demonstrations. Does not count toward the BIL major or minor.
PREREQUISITE: NOT FOR BIOLOGY MAJORS OR MINORS.
BIL113 General Biology Honors Seminar
1 credit
Fall Semester
Special topics in biology correlated with BIL 150.
PREREQUISITE: COREQUISITE: BIL 150.

BIL114 General Biology Honors Seminar
1 credit
Spring Semester
Special topics in biology correlated with BIL 160.
PREREQUISITE: COREQUISITE: BIL 160.

BIL149 First Year Information
1 credit
Fall Semester
First year seminar for incoming Biology majors. Facilitation and encouragement of development of critical thinking skills, proficiency in oral and written expression, and an ability to solve problems by integrating knowledge from different disciplines in Biology.

BIL150 General Biology
4 credits
Fall Semester & First Summer Session
Principles of biology at the cellular, genetic, organism, population, community and ecosystem levels of organization.

BIL151 General Biology Laboratory
1 credit
Fall Semester & First Summer Session
Laboratory exercises to accompany BIL 150.
PREREQUISITE: COREQUISITE: BIL 150.

BIL152 HHMI General Biology Laboratory
1 credit
Fall Semester
Laboratory exercises to accompany BIL 150. Students teams engage into inquiry-based laboratory research projects, each lasting six weeks, per semester.
PREREQUISITE: BIL 150

BIL160 Evolution and Biodiversity
4 credits
Spring Semester & Second Summer Session
Evolutionary processes from an organism perspective. Biosystematics, biogeography and a survey of the diversity of life, with emphasis on the morphological, ecological, and behavioral adaptations of selected representatives of the Domains of living organisms.

BIL161 Evolution and Biodiversity Laboratory
1 credit
Spring Semester & Second Summer Session
Laboratory exercises to accompany BIL 160.
PREREQUISITE: COREQUISITE: BIL 160.

BIL162 HHMI Evolution and Biodiversity Laboratory
1 credit
Spring Semester
Laboratory exercises to accompany BIL 160. Student teams engage in two inquiry-based laboratory research projects, each lasting six weeks, per semester.
PREREQUISITE: BIL 160
BIL210 Human Anatomy
4 credits
Fall Semester
Structural interrelationships of organ systems. Demonstrations, dissections, and discussions.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY.

BIL215 Human Physiology
3 credits
Spring Semester
Function of major human systems.
PREREQUISITE: BIL 210 (HSC 210).

BIL216 Human Physiology Laboratory
2 credits
Spring Semester & Second Summer Session
Experiments illustrating the physiology of human organ systems.
PREREQUISITE: BIL 210 (HSC 210).

BIL220 Evolution and Disease
3 credits
Fall & Spring Semester
Evolutionary insights on the origins and emergence of diseases, drug resistance, and how diseases have shaped human evolution.
PREREQUISITE: ONE YEAR OF MAJORS' GENERAL BIOLOGY WITH LABORATORY

BIL221 Biology of Birds
4 credits
Offered By Announcement Only
General biology of birds, field identification, natural history and migrations of southern Florida species. Lecture, 2 hours; laboratory, 3 hours; 4 field trips, 6 hours each. Binoculars needed.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL226 General Botany
3 credits
Offered By Announcement Only
Survey of the plant kingdom, including evolution, plant diversity, reproduction, structure, function and ecology.
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY OR PERMISSION OF INSTRUCTOR

BIL227 General Botany Laboratory
1 credit
Offered By Announcement Only
Laboratory exercises to accompany BIL 226.
PREREQUISITE: BIL 226

BIL228 Medical Botany
3 credits
Offered By Announcement Only
History of medical botany approaches to health by different cultures, separation and identification of secondary compounds and mechanisms of action. Molecular and physiological action of different secondary compounds in the treatment of common western ailments. In vivo identification of local medicinal plants.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL230 Introduction to Marine Biology
3 credits
Fall Semester
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORIES. COREQUISITE: BIL 231.
BIL231 Introduction to Marine Biology Laboratory
1 credit
Fall Semester
Experimental laboratory exploring ecology, physiology and behavior of marine organisms in southern Florida marine habitats. Exercises cover laboratory techniques in behavior, functional morphology, productivity, fisheries research, osmoregulation and community ecology.
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORIES. COREQUISITE: BIL 230.

BIL232 Populations, Resources and the Environment
3 credits
Offered By Announcement Only
Populations and their interrelationships with the environment. Human demographics, and natural resource issues including compatible development and landscape changes.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL236 Ecology Lab
1 credit
Fall & Spring Semester
Lab and field exercises in ecology. Some Saturday field trips required.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 235.

BIL241 Animal Behavior
3 credits
Fall & Spring Semester
Mechanistic and evolutionary aspects of animal behavior. A survey of systems that illustrate the control, development and function of behavior in a variety of animals.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL242 Animal Behavior Laboratory
1 credit
Offered By Announcement Only
A lab/field course in basic behavioral concepts using a variety of organisms, both vertebrate and invertebrate, in aquatic and terrestrial environments.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 241.

BIL250 Genetics
3 credits
Fall & Spring Semester & First Summer Session
The nature, organization, replication, expression, and evolution of the genetic materials.

BIL251 Principles of Genetics Laboratory
1 credit
Fall & Spring Semester
Laboratory exercises in genetics.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 250.

BIL252 HON: Honors Laboratory in Genetics
2 credits
Spring Semester
Laboratory exercises in genetics.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 250.

BIL253 Honors Seminar in Genetics
1 credit
Spring Semester
Special topics in genetics correlated with BIL 250.
PREREQUISITE: BIL 250.
BIL255 Cellular and Molecular Biology
3 credits  Fall & Spring Semester & First & Second Summer Session
Structure, molecules, and functions of cells.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL256 Cellular and Molecular Biology Laboratory
2 credits  Spring Semester
Laboratory exercises in cellular and organism physiology; involving current research techniques and applications.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 255.

BIL257 HON: Honors Seminar in Cell Biology
1 credit  Spring Semester
Special topics in cell and molecular biology correlated with BIL 255.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 255.

BIL258 Core Laboratory Techniques
2 credits  Offered By Announcement Only
Conceptual and applied "methods" course in modern analytical techniques. It will expose students to the Department of Biology's three best-developed core laboratory facilities for imaging, molecular biology, and element analysis.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL261 Comparative Vertebrate Anatomy
4 credits  Offered By Announcement Only
Anatomy, classification, function, distribution, and evolution of vertebrate animals and their relationships to the environment. Lecture, 2 hours; laboratory, 6 hours.
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY.

BIL265 Comparative Physiology
3 credits  Fall & Spring Semester
Animal and plant physiological processes such as homeostasis, energy budget, movement, sensation, and reproduction with emphasis on the organism level.
PREREQUISITE: BIL 250 OR BIL 255

BIL266 Comparative Physiology Laboratory
1 credit  Fall Semester
Experiments to illustrate basic plant and animal physiological processes.
PREREQUISITE: PREREQUISITE OR COREQUISITE: BIL 265.

BIL268 Neurobiology
3 credits  Offered By Announcement Only
Neurons, organization of the nervous system, electrical properties of neurons, neurotransmitters, receptors, synaptic transmission, sensory and motor system, and complex brain functions.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.

BIL284 Special Laboratory Topics in Biology
1 credit  Offered By Announcement Only
topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY
BIL285 Special Topics in Biology
3 credits Offered By Announcement Only
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL286 Special Topics in Biology
4 credits Offered By Announcement Only
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL299 Seminar in Research Problems
2 credits Fall & Spring Semester
Discussion of current research of the Biology Faculty.
PREREQUISITE: MINIMUM SOPHOMORE STANDING.

BIL310 Advanced Human Anatomy
4 credits Spring Semester
An in-depth exploration of the human body requiring extensive laboratory work, lectures, dissections, and field trips.
PREREQUISITE: BIL 210 (HSC 210) AND PERMISSION OF INSTRUCTOR.

BIL311 Biostatistics
3 credits Fall & Spring Semester
Descriptive and inferential univariate and bivariate statistics applied to biological data. Probability, probability distributions, data description and presentation, hypothesis testing, decision making and experimental design. (Not open to students with credit in MTH 224, PSY 204 or equivalent).
PREREQUISITE: MTH 105 OR 108 OR SCORES OF MATHEMATICS PLACEMENT TEST SUFFICIENT FOR ADMISSION TO A CALCULUS COURSE. 12 CREDITS IN BIOLOGY.

BIL312 Biostatistics Laboratory
1 credit Offered By Announcement Only
Computer laboratory exercises to complement Biostatistics.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY.

BIL315 Marine Biota and Biogeochemical Cycles
3 credits Spring Semester
The distribution of dissolved and particulate materials in the sea is not uniform in time and space. This variability reflects the diverse sources, transformations, and sinks of chemical constituents in the sea. This course focuses on the role of marine organisms in marine biogeochemical cycling and the marine carbon cycle and its interaction with the terrestrial biosphere and atmosphere.
PREREQUISITE: MSC 320
BIL316 Global Primary Production

3 credits  Offered By Announcement Only
Photosynthesis supports the vast majority of life on planet earth. Although terrestrial and aquatic photoautotrophs share the same basic photosynthetic mechanism, it is clear that the physical environment and the fate of primary product on differ drastically on land and in the sea. This course reviews the magnitude and the processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth’s iomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.
PREREQUISITE: BIL 160

BIL321 Invertebrate Zoology

4 credits  Offered By Announcement Only
Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.
PREREQUISITE: ONE YEAR OF BIOLOGY WITH LABORATORY.

BIL324 The Biology of Fishes

3 credits  Offered By Announcement Only
Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.
PREREQUISITE: BIL 255 AND 265, AND PERMISSION OF INSTRUCTOR.

BIL325 Herpetology in the Galapagos

3 credits  Fall Semester
PREREQUISITE: BIL 250 OR PERMISSION OF INSTRUCTOR

BIL330 Ecology

3 credits  Fall & Spring Semester
Organisms in relation to their environment.
PREREQUISITE: BIL 250: CALCULUS STRONGLY RECOMMENDED

BIL331 Ecology Laboratory

1 credit  Fall & Spring Semester
General basis of vertebrate taxonomy. Behavior, natural history, physiological ecology, adaptive morphology and zoogeography of the vertebrates. Lecture, 3 hours; laboratory, 3 hours; field trips.
PREREQUISITE: BIL 330

BIL332 Ecology and Land Use in the Galapagos

3 credits  Fall Semester
Principles and concepts of wildlife conservation and management.
PREREQUISITE: BIL 250 OR PERMISSION OF INSTRUCTOR

BIL335 Tropical Field Biology

3 credits  Spring Semester
Intensive field study conducted during semester breaks or recesses with additional pre-trip lectures. Requires payment of trip costs.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY AND PERMISSION OF INSTRUCTOR

BIL336 Tropical Plant Biology

3 credits  Spring Semester
Structure, diversity, ecology, development and physiology of major plant groups of the tropics. Lecture, 3 hours; field trips.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY.
BIL350 Survey of Marine Mammals  
3 credits
Offered By Announcement Only
The evolution and ecology of the cetaceans, pinnipeds, manatees, and allies: Natural history, zoogeography, physiology, husbandry, and biomedical aspects.
PREREQUISITE: BIL 150, MSC 230

BIL352 Techniques in Scanning Electron Microscopy  
3 credits
Spring Semester
Tissue preparation, use of the scanning electron microscope, photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.
PREREQUISITE: TWELVE CREDITS IN BIOLOGY, INCLUDING ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY AND PERMISSION OF INSTRUCTOR.

BIL353 Projects in Scanning Electron Microscopy  
2 credits
Fall Semester
Individual research projects in scanning electron microscopy. Six hours of laboratory.
PREREQUISITE: BIL 352 AND PERMISSION OF INSTRUCTOR.

BIL354 Advance Topics in Cell Biology  
3 credits
Fall Semester
Study of cell biology through comprehensive survey of relevant topics and in-depth discussion on important recent works.
PREREQUISITE: BIL 255

BIL358 Mathematical Biology  
3 credits
Offered By Announcement Only
Biomathematics concerned with shape and form, random processes, dynamic phenomena, and chaos in complex systems.
PREREQUISITE: ONE YEAR OF GENERAL BIOLOGY WITH LABORATORY; MTH 112 OR 132.

BIL360 Comparative Physiology  
3 credits
Fall & Spring Semester
Animal and plant physiological processes such homeostasis, energy budget, movement, sensation, and reproduction with emphasis on the organism level.
PREREQUISITE: BIL 255

BIL363 Environmental Physiology  
3 credits
Offered By Announcement Only
Functional and adaptive significance of morphological and physiological traits of organisms in relation to their physical environment.
PREREQUISITE: BIL 265.

BIL365 Endocrinology  
3 credits
Offered By Announcement Only
The endocrine glands and the chemistry, mechanisms of action, and physiological effects of hormones. Emphasis on vertebrate hormones, including clinical aspects of human endocrinology. Lecture, 3 hours.
PREREQUISITE: ONE YEAR OF BIOLOGY AND CHEMISTRY WITH LABORATORY.

BIL366 Comparative Vertebrate Physiology  
3 credits
Offered By Announcement Only
Homeostasis interactions with the external environment, and special topics in physiology including life without oxygen, behavioral energetics, allometry.
PREREQUISITE: BIL 265 OR PERMISSION OF THE INSTRUCTOR.
BIL367 A Survey of Cancer Biology
3 credits Offered By Announcement Only
The biological aspect of human cancers, including their incidence, diagnosis and treatment.
PREREQUISITE: BIL 255.

BIL369 Fundamentals of the Biology of Aging
3 credits Offered By Announcement Only
How and why we age. The biology of aging at the molecular, cellular, and organism levels is presented in a comparative and evolutionary context.
PREREQUISITE: BIL 250, 255 OR 265.

BIL371 Readings in Biology
1 credit Spring Semester
Independent readings on selected topics in biology under the supervision of individual faculty.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL372 Readings in Biology
1 credit Fall & Spring Semester
Independent readings on selected topics in biology under the supervision of individual faculty.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL374 Seminar in Biology
1 credit Fall & Spring Semester
Seminar on selected topics in biology.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY.

BIL375 Seminar in Biology
1 credit Fall & Spring Semester
Seminar on selected topics in biology.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL381 Workshop Leaders in Biology I
0-1 credits Fall Semester
Students engage in Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for a general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.
PREREQUISITE: A GRADE OF "A" OR "B" IN BIL 150, 151, 160, AND 161, OR EQUIVALENT OR AP OUTPLACING; PERMISSION OF INSTRUCTOR.

BIL382 Workshop Leaders in Biology II
0-1 credits Spring Semester
Students engage in Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for general education credit. Students may serve as workshop leaders for a second time for a stipend if they 1) have taken the course once before and (2) are graduating seniors.
PREREQUISITE: A GRADE OF "A" OR "B" IN BIL 150, 151, 160, 161 OR EQUIVALENT OR AP OUTPLACING; PERMISSION OF INSTRUCTOR.
BIL384 Special Laboratory Topics in Biology
1-3 credits
Offered By Announcement Only
Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL385 Special Topics in Biology
2-6 credits
Offered By Announcement Only
Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL388 Investigations at the Art-Science Divide
3 credits
Offered By Announcement Only
PREREQUISITE: PHI 241

BIL403 Neuroscience Laboratory
4 credits
Spring Semester
Research methods and laboratory experiments in contemporary neuroscience from individual cells to behavior. Scientific report writing and computer applications in experimental design and analysis. Lecture/Lab.
PREREQUISITE: PSY 316 WITH PSY 402 OR BIL 268 AS PRE- OR COREQUISITE

BIL415 Coral Reef Science and Management
3 credits
Offered By Announcement Only
Coral reefs as biophysical and socioeconomic systems. Coral reef typology, geomorphology; biotic and abiotic components of coral reef ecosystems.
PREREQUISITE: BIL 150 AND 160 OR EQUIVALENT.

BIL424 Reef Fish Identification and Survey Techniques
2 credits
Offered By Announcement Only
Basic ecology of reef fishes, field identification of tropical Atlantic coral reef fishes, analyses of fish survey data, and use of statistics software packages to detect differences in fish assemblages.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY; MTH 111/112; MSC 230; AND STATISTICS (PSY 204, BIL 311, OR EQUIVALENT).

BIL432 Ecology in the Galapagos
3 credits
Fall Semester
Ecological effects of contamination on populations, communities, and ecosystems and strategies for prevention and/or control measures.
PREREQUISITE: BIL 332 OR PERMISSION OF INSTRUCTOR

BIL433 Conservation in Practice
3 credits
Fall Semester
PREREQUISITE: BIL 432 OR PERMISSION OF INSTRUCTOR
BIL435 Origins, Ecology and Conservation of Insular Diversity
3 credits  Fall Semester & Second Summer Session
Three-week field course in the Solomon Islands. Ecological and evolutionary processes that maintain and create biological diversity in tropical islands. Nature selection, island biogeography, phylogenetics, community assembly, predator-prey interactions, sexual reproduction, mating systems, and social behavior. On-site field surveys and experiments. Fulfills lab/field requirement for the B.S. in Biology.
PREREQUISITE: ONE UPPER LEVEL COURSE IN ECOLOGY (E.G. BIL 330) OR EVOLUTION (E.G. BIL 220)

BIL445 Behavioral Endocrinology
3 credits  Fall Semester
PREREQUISITE: BIL 365 OR PERMISSION OF INSTRUCTOR

BIL451 Ethics and Genetics
3 credits  Offered By Announcement Only
PREREQUISITE: BIL 250

BIL455 Developmental Biology
3 credits  Fall Semester
PREREQUISITE: BIL 250 AND BIL 255

BIL466 Environmental Physiology: Oxygen, Water and Ionoregulatory Stress
3 credits  Fall Semester
Laboratory course that combines and elaborates on concepts learned in BIL 265 Topics will include homeostasis, interactions with the external environment, and life with limited oxygen and water. Lectures will be highly discussion-based; students will be expected to read primary research articles as suggested by the professor before lecture to foster participation in those discussions and form hypotheses about accompanying laboratory. Each lab will be written up as a formal laboratory report.
PREREQUISITE: BIL 265 AND PERMISSION OF INSTRUCTOR  CO-REQUISITE: BIL 265

BIL471 Special Studies in Biology
2-4 credits  Offered By Announcement Only
Content of course will vary by semester. Content in any semester will be expressed in parentheses, following title "Special Studies" in the printed class schedule.
PREREQUISITE: PERMISSION OF INSTRUCTOR

BIL481 Undergraduate Teaching Assistant Training in Biology
1-3 credits  Fall & Spring Semester
Training and teaching assistance for undergraduate workshops or laboratories, under the direct supervision of faculty. Specific topic is indicated by course subtitle. This course may be taken no more than twice for credit in the Biology major or minor, and if taken twice, teaching assistance must be for two different BIL courses. May be taken multiple times for general elective credit only.
PREREQUISITE: MINIMUM GRADE OF "B" IN THE COURSE IN WHICH STUDENT IS TO ASSIST.
PREMISSION OF INSTRUCTOR

BIL482 PRISM Teaching Fellow
2 credits  Fall & Spring Semester
Undergraduate mentors to PRISM students, and teaching fellows to PRISM course instructors in biology.
PREREQUISITE: PERMISSION OF INSTRUCTOR
BIL484 Special Laboratory Topics in Biology
1 credit                                               Offered By Announcement Only
Topics relevant to the biological sciences, co-listed with other departments or programs.
PREREQUISITE: ONE YEAR OF BIOLOGY FOR MAJORS WITH LABORATORY

BIL485 Special Topics in Biology
2-6 credits                                                 Fall & Spring Semester
Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.
PREREQUISITE: PERMISSION OF INSTRUCTOR

BIL491 Departmental Seminar in Biology
1 credit                                                              Fall Semester
Research seminars by distinguished biologists.
PREREQUISITE: 24 CREDITS IN BIOLOGY.

BIL492 Departmental Seminar in Biology
1 credit                                                            Spring Semester
Research seminars by distinguished biologists.
PREREQUISITE: 24 CREDITS IN BIOLOGY.

BIL495 Projects in Biology
2 credits                                                    Fall & Spring Semester
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL496 Projects in Biology
2 credits                                                    Fall & Spring Semester
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL497 Projects in Biology
2 credits                                                    Fall & Spring Semester
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL498 Senior Thesis
2 credits                                                    Fall & Spring Semester
Formal thesis preparation supervised by a member of the departmental faculty including a public oral defense and submission of the written document to the department.
PREREQUISITE: PREREQUISITE OR COREQUISITE: FOUR (4) CREDITS OF "PROJECTS IN BIOLOGY" OR EQUIVALENT.

BIL499 Research Colloquium
1 credit                                                     Fall & Spring Semester
Discussion of current research of Biology undergraduate students.
PREREQUISITE: BIL 495, JUNIOR OR SENIOR STANDING, AND PERMISSION OF THE DEPARTMENTAL HONORS DIRECTOR. COREQUISITE: BIL 496 OR 497.
BIL511 Biometry
3 credits
Descriptive and analytical statistics as used in biology. Emphasizes sampling, presentation of quantitative data, probability theory applications, distributions, parametric and non-parametric test procedures.
PREREQUISITE: ONE SEMESTER OF STATISTICS AND ONE YEAR OF CALCULUS.

BIL520 Evolution
3 credits
Evolutionary mechanisms and pathways: sources of hereditary variation, evolutionary forces, origins of adaptations, speciation, macroevolution, origin of life and humankind.
PREREQUISITE: BIL 250.

BIL521 Systematics
3 credits
Concepts and methods in phylogenetic systematics. Lectures, discussions, and computer labs, 3 hours.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL523 Advanced Biology of Marine Invertebrates
4 credits
Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.
PREREQUISITE: BIL 235 AND 321.

BIL525 Advanced Herpetology
3 credits
Systematics, biogeography, and evolutionary biology of amphibians and reptiles, with emphasis on modern families. Lecture, 2 hours; laboratory, 3 hours.
PREREQUISITE: BIL 250: BIL 360 STRONGLY RECOMMENDED

BIL526 Studies in the Biology of Mycorrhizae
2 credits
Readings, discussions and laboratory exercises concerning the biology of mutualistic root-inhabiting fungi and their plant hosts. Topics will vary by semester, may be repeated for credit.
PREREQUISITE: PERMISSION OF INSTRUCTOR.

BIL527 Biology of Fungi
5 credits
Physiology and ecology of the major groups of fungi, especially those of importance as pathogens or mutualists. Combined lecture and laboratory.
PREREQUISITE: BIL 250. BIL 360 STRONGLY RECOMMENDED

BIL531 Advanced Field Ecology
5 credits
Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory and field, 10 hours alternate Saturdays plus projects.
PREREQUISITE: ONE SEMESTER OF ECOLOGY AND BIL 511 OR ANOTHER STATISTICS COURSE.
BIL532 Stable Isotope Ecology
3 credits
Offered By Announcement Only
Stable isotope analysis applied to ecological questions such as nutrient cycling, photosynthesis and trophic level studies.
PREREQUISITE: BIL 235 OR PERMISSION OF INSTRUCTOR

BIL535 Molecular Ecology
3 credits
Offered By Announcement Only
Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA barcodes, and gene expression from a population biological perspective.
PREREQUISITE: BIL 250

BIL536 Molecular Ecology Laboratory
1 credit
Offered By Announcement Only
Laboratory techniques, molecular tools, applications, and analysis methods commonly used by researchers in the areas of molecular ecology and population genetics.
PREREQUISITE: BIL 535

BIL537 Ecosystem Ecology
3 credits
Offered By Announcement Only
Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.
PREREQUISITE: BIL 235 OR PERMISSION OF INSTRUCTOR

BIL539 Wildlife Resource Philosophy and Policy
3 credits
Offered By Announcement Only
Attitudes, philosophy, and policies that govern management of wildlife resources worldwide. Methods to influence public support for implementation of sound wildlife resource management.
PREREQUISITE: BIL 332

BIL540 Ethology and Behavioral Ecology
3 credits
Offered By Announcement Only
Evolutionary and comparative approach to concepts in animal behavior emphasizing function and mechanism. Topics include genetics of behavior, orientation, foraging, communication, and social behavior.
PREREQUISITE: BIL 235 AND EITHER BIL 241 OR 341 OR PERMISSION OF INSTRUCTOR

BIL548 Bioinformatics Algorithms
3 credits
Offered By Announcement Only
