GENERAL UNIVERSITY INFORMATION

A private, independent, international university
An equal opportunity/affirmative action employer
An announcement with information on administration, organization, admission and graduation requirements, and the courses of instruction in:

Undergraduate and Graduate Studies, 2015-2016

It is the policy of the University of Miami that no person within the jurisdiction thereof shall, on the basis of race, religion, color, sex, age, disability, sexual orientation, gender identity or expression, veterans status, or national origin, be excluded from, participation in, be denied the benefits of, or be subjected to discrimination or harassment (including all forms of sexual harassment and sexual violence) under any program or activity of the University, regardless of whether such program or activity occurs on-campus or off-campus. The University does not intend by this commitment to require compliance with this policy by governmental or external organizations that associate with but are not controlled by the University, except as required by law. The Executive Director of Workplace Equity and Performance is responsible for coordinating the University’s effort to implement the nondiscrimination policy and Affirmative Action Programs for employees and students. The Executive Director may be contacted at the following address or telephone number:

Workplace Equity and Performance Office
Gables One Tower, Suite 100R
1320 S. Dixie Highway
Coral Gables, FL 33146
305-284-3064

More information regarding the student sexual harassment/violence policy may be found online in the Student Rights and Responsibilities Handbook (https://umshare.miami.edu/web/wda/deanstudents/pdf/20132014SRR.pdf). For available resources and services contact the Dean of Students Office (http://www.miami.edu/sa/index.php/dean_of_students), Phone: 305-284-5353; the Counseling Center (http://www.miami.edu/sa/index.php/counseling_center), Phone: 305-284-5511; and/or the Sexual Assault Response Team (http://www.miami.edu/sa/index.php/counseling_center/current_students/special_programs/sexual_assault_response_team_sart) (S.A.R.T.).

The University of Miami is authorized under Federal law to enroll non-immigrant alien students.

The University reserves the right to change any provision or requirement, including, but not limited to fees and tuition, at any time without notice. Degrees, courses, programs, activities, and like academic or non-academic offerings of the University may also be changed from time to time without notice. The University further reserves the right to require a student to withdraw at any time under University policies, as may be promulgated from time to time. Further, admission of a student to the University of Miami for any semester does not imply that such student will be enrolled in any succeeding academic semesters. It also reserves the right to impose sanctions on any student whose conduct is unsatisfactory. Any admission on the basis of false statements or documents is void when the misconduct is discovered, and the student is not entitled to any credit hour for work which the student may have done at the University prior to any discipline that may be taken as a result of such misconduct. When a student is dismissed or suspended from the University for cause, there will be no refund of tuition or fees paid. If a dismissed student has paid only a part of his tuition and fees, the balance due the University will be considered a receivable and will be collected.

There will be no refund of tuition, fees, charges or any other payments made to the University in the event the operation of the University is suspended at any time as a result of any act of God, strike, riot, disruption, or for any other reason beyond the control of the University.

The University of Miami is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor, master, specialist, and doctoral degrees. Contact the Commission on Colleges at:
1866 Southern Lane
Decatur, Georgia 30033-4097
or call 404-679-4500 for questions about the accreditation of the University of Miami.

Mission Statement

The University of Miami’s mission is to educate and nurture students, to create knowledge, and to provide service to our community and beyond. Committed to excellence and proud of the diversity of our University family, we strive to develop future leaders of our nation and the world.

Core Values

We are absolutely committed to freedom of inquiry—the freedom to think, to question, to criticize, and to dissent. We will pursue the value of excellence in our research and educational missions with the single-mindedness that only great commitments deserve. We will provide our students with the foundations for ethical citizenship and service to others, a respect for differences among people, and a commitment to high standards of thought and communication. We also will prepare them for rewarding lifelong careers and will imbue in them a continued and permanent desire for the study of knowledge and the search for truth.

Undergraduate Academic Procedures and Information

While the University makes every effort to provide academic counseling to its students, its basic policy places the responsibility for planning an academic program upon the student.

The University of Miami relies on electronic means (email and CaneLink accounts) for correspondence with students. Students are required to maintain a working email address and are expected to update their personal biographical information annually via their CaneLink account. Students who fail to maintain a working email account may not receive critical university information.

Students are expected to familiarize themselves with the requirements of:
• the University,
• the schools in which they are enrolled, and
• their major department.

Requirements refer to those stated in the Bulletin at the time of admission to degree status, unless a student has not been continuously enrolled. In such cases, the Bulletin in effect at the time of re-admission is the one to be used. Under special circumstances, a student may appeal the bulletin decision. In such cases, the determination of the Bulletin in effect is made by the readmitting School or College.

Academic core requirements will not be waived for students under any circumstances.

The work of each student is under the supervision of an academic Dean and of the appropriate Scholarship Committee. A student who fails to maintain an adequate academic record may be dismissed from the University.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters. If a student whose record is unsatisfactory is for some reason permitted to continue in attendance, the appropriate scholarship committee or Dean may specify the standard that must be attained, and any other conditions to be met.

A student who graduates and plans to enter a graduate school or professional school at the University of Miami must apply for admission to the appropriate school of the University in accordance with application deadlines of respective schools.

Not all the regulations and procedures described below pertain to the deadlines of respective schools. The specific regulations of these schools are stated in their respective Bulletins.

Student-Right-To-Know and Campus Security Act

The Student-Right-to-Know and Campus Security Act requires institutions to disclose information about graduation rates and crime statistics to current and prospective students. Students interested in obtaining this type of information should contact the Office of Admission, 305-284-4323 or go to www.miami.edu/hea (http://www.miami.edu/hea).

Family Educational Rights and Privacy Act (FERPA) Buckley Amendment

The purpose of this policy is to assure that students have access to their educational records and to assure the privacy of students by restricting the disclosure of information from education records to those persons authorized under the Act.

The policy is provided to all students in the Student Life Handbook. Copies can also be printed from the website www.miami.edu/hea (http://www.miami.edu/hea).

Security of Student Records

The Office of the Registrar is charged with the responsibility of maintaining the security and integrity of student records. Student records created before 1985 have been electronically scanned. Student records created after 1985 are housed on an electronic database.

In order to maintain confidentiality, access to the student record system is limited to university personnel who have a legitimate need for this information. Each user is required to fill out an access form. A user name is created, and each user must also create a password that must be changed every 180 days. Periodic audits of records as well as reviews of who has access to the system are regularly scheduled to ensure a secure environment.

Students are assigned a UM ID number that is unique to them and they are encouraged to use it instead of their social security number. Students are required to provide their student ID or a photo ID when requesting academic record information from this office.

FERPA Training

FERPA, the Family Educational Rights and Privacy Act, provides established guidelines for universities to ensure that students have access to their educational records as well as to ensure the privacy of said records by restricting the disclosure of information from educational records to those persons authorized under the Act. FERPA guidelines must be followed when dealing with the disclosure of student information.

All staff who use the student records system are required to complete a FERPA tutorial. Periodic reviews are required.

Service Indicator (Hold) on Student Records

Schools and colleges, university administrative departments and other student related offices have the ability to put service indicators, also known as holds, on student records. These holds can be financial, academic or disciplinary in nature and may delay a student’s ability to register, to receive an official transcript or to receive a diploma. Holds on a student’s record normally require action on the part of the student, i.e., a payment, completion of paperwork, etc. Specific information on a hold and what is required to remove it can be found in the Student Services Center in CaneLink or can be obtained from the office/department that initiated the hold.

Course Information

Academic Credit

The University of Miami adopted the following Federal Definition of the Credit Hour at the Faculty Senate meeting on April 17, 2013 that appears in the Credit Hours policy statement of the Southern Association of Colleges and Schools Commission on Colleges (SACS), Federal Requirement 4.9:

Federal Definition of the Credit Hour

For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester credit hour,
or ten to twelve weeks for one quarter credit hour, or the equivalent amount of work over a different amount of time, or

2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Application of Credit Hour Policy

This credit hour policy applies to all undergraduate and graduate programs that award academic credit (i.e., any course that appears on an official transcript issued by the University) regardless of the delivery method including, but not limited to, self-paced, online, hybrid, lecture, seminar, and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

The expectation of contact time inside the classroom and student effort outside the classroom is the same in all formats of a course whether it be online, a hybrid of face-to-face contact with some content delivered electronically, or one delivered in lecture or seminar format. The University operates on the semester system and, for its measure of academic course work, uses academic credits (referred to as semester credits, semester hours, credit hours, hours, or credits).

Courses that have less structured classroom schedules, such as research seminars, independent studies, internships, practica, studio work, or any other academic work leading to the award of credit hours, at a minimum, should state clearly learning objectives and expected outcomes and workload expectations that meet the standards set forth above.

Two or three laboratory hours each week throughout a semester are considered the equivalent of one lecture hour in counting credit hours earned in an undergraduate laboratory or studio course.

No grades or credit hours are given for audited courses.

Campus Processes - Curriculum Review

Each College or School within the University of Miami is charged with following the policy on credit hours in its review and approval of all undergraduate and graduate courses and for certifying that the expected student learning for the course meets the credit hour standard. The determination of credit hours is made when a new course or a revision to an existing course is proposed. The submitted syllabus is examined for contact time as well as for assignments and evaluation mechanisms.

The Office of the University Registrar requires training for class scheduling before granting access to any departmental staff approved by a department for scheduling classes.

Academic Calendar

The University of Miami adheres to a reasonable approximation of the Carnegie unit for contact time. In addition, students are expected to spend two hours outside of class in preparation for each hour of instruction. The Academic Calendar is the official record of academic instruction.

The standard meeting times for three-credit hour courses are as follows:

- 50-minute, Monday-Wednesday-Friday schedule;
- 75-minute, Tuesday-Thursday schedule.

The calendar is planned to ensure 69 class days (41 Monday-Wednesday-Friday meeting days and 28 Tuesday-Thursday meeting days) and at least five days for final examinations. The policy allows a mandatory examination period to be counted in the minutes of instruction, but does not count reading days. The University has a required two-and-a-half-hour final examination policy that adds 150 minutes of instruction, resulting in a minimum of 2,200 minutes of classroom instruction in a three-credit hour course for all undergraduate and graduate terms in the Academic Calendar.

The calculation for summer sessions and other abbreviated terms follows this same standard which means longer class meeting times over the duration of the shortened term.

The University Registrar maintains the official Academic Calendar on its website: http://www.miami.edu/index.php/registrar/calendar/.

School of Business Administration

In the School of Business Administration, graduate programs include terms of varying length. The School follows federal and SACS guidelines for the credit hour. All graduate business programs have a minimum of 750 minutes of instructional contact time per credit hour, including the final examination. Students are expected to dedicate at least two hours of course-related work for each hour of instruction.

School of Law

The School of Law is accredited by the American Bar Association and follows federal and SACS guidelines for the credit hour. Ordinarily, full-time students must enroll for a minimum of 11 credit hours and a maximum of 16 credit hours (please consult the Student Handbook and Honor Code). For one credit hour, a student receives 700 minutes of instruction, exclusive of examination time. For a three-credit hour course, this equates to 2,100 minutes of classroom instruction. An additional 180 minutes of instruction is allotted for the final exam session in a three-credit hour course. The faculty expects students to spend at least two hours outside the classroom in preparation for each hour of instruction.

Miller School of Medicine

The Miller School of Medicine is accredited by the Liaison Committee on Medical Education (LCME). The School’s Department of Physical Therapy is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). The length of all educational programs is appropriate for each degree, based on national standards and accreditation criteria. The School follows federal and SACS guidelines for the credit hour. Completion of the M.D. program ordinarily takes four years. Although credit hours are not specified by the LCME, the medical education program leading to the M.D. must include at least 130 weeks of instruction. The University of Miami’s curriculum consists of 161 weeks and may be referenced here: http://admissions.med.miami.edu/md-programs/general-md/curriculum.

Change or Drop of Course

Course changes after the completion of registration must be approved by the student’s academic dean.

Dropping of any course for which the student has registered is official only when the drop has been fully processed by the student successfully dropping the course via CaneLink or by the Office of the Registrar.
Please note: Failure to attend classes or merely giving notice to instructors of one’s absence will not be considered as an official withdrawal and may result in failure in the course.

The last day to drop a course or make a change in credit-only option is noted on the Academic Calendar located on the Office of the Registrar’s website at www.miami.edu/registrar (http://www.miami.edu/registrar).

Students enrolled in a course after the withdrawal date must receive a final grade in the course.

Class Attendance and Absences

Regular and punctual class attendance is vital for all students. Instructors will distribute course syllabi which include policies regarding class attendance and missed or late work. Any student may be dropped from a course or receive a lowered grade for unauthorized absences in excess of those permitted by the instructor. It is each student’s responsibility to know and understand the instructor’s policies. It is also the student’s responsibility to give the instructor notice one week prior to any anticipated absence and to contact the instructor within one week after any unanticipated absence.

All students are responsible for material covered during their absence. However, the instructor must allow each student who is absent for a University-approved reason either the opportunity to make up, or to be excused from, work missed, without any reduction in the student’s final course grade as a direct result of such absence.

Other than absences for a University-approved reason, the instructor determines whether or not an absence is for an acceptable reason and whether or not students shall have the opportunity to make up missed work. If the instructor does not recognize the reason as acceptable, the student may appeal to the chair of the department in which the course is offered.

The following constitute University-approved reasons for absences:

1. Participation in an activity approved by the Academic Deans Policy Council, such as musical and debate activity, R.O.T.C. function, or varsity athletic trip; participation in a special academic activity such as a field trip or other special event connected with academic coursework. Verification of a student’s participation shall be issued by the sponsor when authorized by the Office of the Executive Vice President and Provost.

2. Observance of a religious holy day as described in the Religious Holy Day Policy, below:

Religious Holy Day Policy

The University of Miami, although a secular institution, is determined to accommodate those students who wish to observe religious holy days. It seeks to reflect its awareness of and sensitivity to religious holy days whenever possible when scheduling University activities. The following provisions are meant to apply equitably to all religious groups and to provide opportunities to all to meet their religious obligations.

1. Except as specifically provided to the contrary, this policy is binding on all students in undergraduate programs. Schools offering graduate or professional programs, including undergraduate professional programs, are strongly encouraged to adhere to these policies to the maximum extent practicable.

2. Any student absent from class in observance of a religious holy day shall not be penalized in any way for an examination or assignment missed during the period of absence. Absence in observance of a religious holy day does not relieve students from responsibility for any part of the course work required during the period of absence. Students who are absent on days of examinations or class assignments shall be offered a reasonable opportunity to make up the work without penalty, if the student previously arranged to be absent. Nothing in this policy shall preclude faculty members from limiting the number of student absences to a reasonable number of absences for any reason. The faculty member has discretion to determine how the make-up obligation will be fulfilled. A faculty member who penalizes a student contrary to these provisions may have committed unprofessional conduct, and thus may be subject to a complaint to the Committee on Professional Conduct under the provisions of Section 84.9 of the Faculty Manual.

3. It is the student’s obligation to provide faculty members with notice of the dates they will be absent due to observance of religious holy days, preferably before the beginning of classes but no later than the end of the first three class days. For religious holy days that fall within the first three class days, students must provide faculty members with notice no later than two class days before the absence. Missing a class due to travel plans associated with a particular religious holy day does not constitute an excused absence. Absences due to observance of religious holy days that are not pre-arranged with the relevant faculty member within the first three class days may be considered unexcused, and the faculty member may therefore prevent the student from making up examinations or assignments missed during the period of absence.

4. Faculty members are encouraged to anticipate days when a substantial number of students will be absent due to observance of religious holy days and should avoid scheduling examinations and assignment deadlines on those days. Faculty members are expected to reasonably assist students in obtaining class information the student missed during the period of absence in observance of a religious holy day. In that regard, faculty members are urged to allow taping or recording of the class session, with the reproduction limited to the student’s personal use, when a student misses a class due to observance of a religious holy day. To assist in identifying religious observance days, faculty members are encouraged to consult the illustrative list provided in the Interfaith Calendar (http://www.interfaithcalendar.org). Faculty members are urged to remind students of their obligation to inform faculty members within the first three class days of any anticipated absences due to observance of religious holy days and should include that information in the syllabus or course requirements document for that course.

Course-Numbering System

The following course-numbering system is used:

- Courses in the 100 series are primarily for freshmen.
- Courses in the 200 series are primarily for sophomores.
- Courses in the 300 series are primarily for juniors.
- Courses in the 400 series are primarily for seniors.
- Courses in the 500 series are open only to seniors or other qualified undergraduates.
- Courses in the 600 through 800 are open only to graduate students.
Courses in some departments, with the specific numbers 100, 200, 300, 400 are offered, in most instances, on an experimental or trial basis. When listed in CaneLink’s Course Offerings, a more descriptive title will normally be attached.

Credit for Service Experience

Veterans of the military services may make application for academic credit for schooling received while in the armed forces. Credit hour may be awarded for work that the American Council on Education Guide regards as college level. Students must have credit hours approved by their departmental chairperson.

Credit hour for military service and experience is usually in the elective area and may not take the place of subjects required for graduation. Such work is not assigned quality points and is not included in quality point computations.

Credit Only Option

The credit only option has been established to encourage students to explore academic areas outside their major and minor fields of concentration. Students may use this option with free electives and receive a CR (Credit Received) or NC (No Credit). These courses become part of a student’s record, but they do not count in the grade point average as computed by the University of Miami.

Eligibility

To be eligible to enroll for courses under the CR/NC option, a student must:

1. Hold the standing of Sophomore or above, and, if a transfer, must have completed one semester of residency at the University of Miami;
2. At the time of registration have a minimum cumulative grade point average of at least 3.00;
3. Elect the CR/NC option within two weeks following the last day of registration for Fall and Spring semesters. Election of CR/NC options for Summer Sessions must occur no later than the fifth class day following the last day of registration. No changes except withdrawals from the course are permitted after this time.

Regulations and Restrictions

1. Eligible students may take one course per semester for credit only, to a maximum of 9 credit hours.
2. Only free electives may be taken under this option. Free electives are defined as courses not taken to fulfill the requirements for the major, minor, or general education requirements (including prerequisite course work) of the University and the individual schools.
3. ENG 105 and ENG 106 cannot be taken for credit only.
4. Grading standards for the credit only option are the same as for students who register for the course under the regular grading system. Letter grades will be submitted by instructors to the Office of the Registrar. The Office of the Registrar will change all grades A as available basis after financial arrangements have been completed. Illegal Repeat

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

6. Should a student subsequently change his/her major, free electives taken for credit only prior to the declaration of this major may be counted toward fulfilling major, minor, or general education requirements at the discretion of the department chairman and the academic dean.

Final Examination Policy

- Final Examinations may not be given during a regularly-scheduled class period.
- No examination shall be permitted during the reading period.
- Final Examinations may be rescheduled only with the permission of the school/college dean.
- No student shall be required to take more than two final examinations in a twenty-four hour period. A student having three or more final examinations scheduled during a twenty-four hour period may request the instructor of the course most easily rescheduled (normally the course with the smallest enrollment) to reschedule the examination for that individual. The request shall be made no later than two weeks before the last class day.
- A student who has a conflict between a final examination and a religious observation may request that the instructor reschedule that student’s examination. The request shall be made no later than two weeks before the last class day. For the resolution of any problem pertaining to the scheduling of final examinations, a student should consult with the following entities or persons in this order: the relevant instructor, the department chair, the Dean or designee. If the matter cannot be resolved at the school or college, the student should contact the Office of the Provost.

Registration

Registration dates are shown on the University Academic Calendar (http://www.miami.edu/index.php/registrar/calendar), and all students are expected to register on these days. If a student is permitted to register late, a fee may be charged.

Cancellation of Courses

Students who select courses and fail to make payment and/or financial arrangements with the Office of Student Account Services (OSAS) prior to the payment deadline will have their course schedules canceled. Reinstatement of classes can only occur after payment arrangements have been made with the OSAS to cover all financial obligations including any reinstatement fees. Reinstatement to cancelled classes will be on an “as available” basis after financial arrangements have been completed.

Repeat Rules

A student may repeat a course, but the repetition will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the chair of the department in which the course is offered or, in the case of an un-departmentalized school, by the dean.

Illegal Repeat

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.
General Repeat Rule

- If the initial grade is D+ or lower (or a C- in cases where an academic unit requires a C or higher), both the initial grade and the repeat grade are included in the computation of the student’s cumulative grade-point average (CGPA).
- If the initial grade is a D or D+ (or a C- in cases where an academic unit requires a C or higher) and the repeat grade is passing, the number of credit hours required for graduation will be increased by the number of credit hours repeated.
- Registrations that involve repeating a course in which a grade of C or higher (or C- in cases where an academic unit does not require a C or higher) has already been earned do not earn quality points or credit hours, nor count as credit hours attempted.
- Courses repeated after graduation\(^3\) will be posted to the transcript showing the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.

Freshman Repeat Rule

- A student may elect to repeat up to two courses that were taken at the University of Miami within that student’s first two semesters of college work\(^2\) and in which the student earned a grade of D (including D+) or F. Each repeated course must be taken at the University of Miami, must be the same course as the course initially taken, and must be completed within 12 months after the end of the semester (or summer session) in which the initial course was first taken.
- No course may be repeated more than once under this rule. A course repeated more than once under the University’s General Repeat Rule will not qualify under the Freshman Repeat Rule.
- Enrollment for a second time in a course constitutes a repeat of that course for the purposes of this rule, unless the student withdraws from the course on or before the University’s published Last Day to Drop a Course date.
- For each repeated course, only the second grade (whether higher, or lower, or the same as the first grade) will be used in the computation of the student’s CGPA. The initial course will not count as credit hours attempted or earned, although the initial course grade will remain on the student’s permanent record.
- Students who plan to apply to graduate and/or professional school should be aware that such institutions may recalculate the CGPA to show the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.
- Students repeating a course for the purposes of this rule, unless the student withdraws from the course on or before the University’s published Last Day to Drop a Course date.
- For each repeated course, only the second grade (whether higher, or lower, or the same as the first grade) will be used in the computation of the student’s CGPA. The initial course will not count as credit hours attempted or earned, although the initial course grade will remain on the student’s permanent record.
- Students who plan to apply to graduate and/or professional school should be aware that such institutions may recalculate the CGPA to show the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.

\(^1\) This does not include courses that are eligible to be repeated for credit (e.g., Special Topic courses, Music lessons, etc.). Courses that are eligible to be repeated are designated in the student information system, CaneLink. Courses may have limits on the number of times they may be repeated.

\(^2\) This refers to courses or a course with a particular grade required for entry into a different degree program.

\(^3\) First two semesters includes work at all schools attended, not just the University of Miami.

Schedules

Fifteen or sixteen credit hours constitutes a normal schedule at the University. Academic deans and advisors will determine the appropriate credit hour load for their students. (A schedule of charges for credit hours is found in the Financial Payment Policies section of this Bulletin.) The schedule of any student whose outside interests cause unsatisfactory scholastic attainment may be reduced by the dean.

Temporary/Permanent Withdrawal from the University

If a student decides to withdraw from the University of Miami, there are procedures in place to facilitate this process. In order to withdraw officially from the University, a student must follow the procedures outlined in this bulletin and on the Office of the Registrar website (http://www.miami.edu/registrar).

Failure to follow the outlined withdrawal process may result in monies owed to the university (e.g. tuition, fees, etc.), failing grades on a student’s academic record and/or other negative consequences.

Please note that dropping courses in a summer session, thereby reducing a student credit-hour load to zero is not construed as a formal withdrawal from the University.

Undergraduate Students

Undergraduate students are required to meet with an Advisor in the ‘Cane Success Center. The ‘Cane Success Center is located on the 2nd Floor of the University Center, Suite 2275 (also known as "The Nest"). They can also be reached at (305) 284-1807 or success@miami.edu.

For more details about the withdrawal process and for helpful hints on making a smooth transition out of the University, visit the Undergraduate Withdrawing Student Checklist (http://www.miami.edu/index.php/cane_success_center/withdrawal/WithdrawingStudentChecklist) or view the PDF (https://umshare.miami.edu/web/wda/admission/Website/PDFs/Withdrawal/Withdrawal%20Checklist.pdf).

For students who are no longer on campus – If you have already left the University but did not complete the withdrawal process before your departure, please call or email the ‘Cane Success Center at (305) 284-1807 or success@miami.edu to begin the withdrawal process. Your withdrawal will not be finalized until an Exit Interview is completed.

Undergraduate Appeal Process

Withdrawal Date Appeal Form – If you were unable to attend classes due to a serious accident or illness, and this prevented you from notifying the University of your withdrawal in a timely manner, a Withdrawal Date Appeal Form (http://www.miami.edu/index.php/cane_success_center/withdrawal/withdrawal_date_appeal_form) can be submitted for consideration by an Appeals Committee. Appeals are submitted AFTER completing the official withdrawal process above and must include supporting documentation as to what prevented a timely notification. All appeals must be submitted within 30 calendar days of the official withdrawal date established with the ‘Cane Success Center or if the appeal is being submitted for a semester that has already completed, it must be submitted within 30 calendar days of the last day of the end of the semester in question. Appeals should be submitted via email to registrar@miami.edu or by mail to:

University of Miami
Office of the Registrar - Withdrawal Date Appeal
P.O. Box 248026
The Withdrawal Appeal Form can be found at: https://umshare.miami.edu/web/wda/admission/Website/PDFs/Withdrawal/Withdrawal%20Date%20Appeal%20Form.pdf

If you have a Merit-based Scholarship and want to return to UM – if you withdraw from the University but choose to return within one calendar year, and you have continued to meet the requirements of your scholarship, then your merit scholarship will be waiting for you here.

Contact the ‘Cane Success Center to begin the process of readmission.

*Frost School of Music students will need to re-audition after one semester away from the University.

Student Groups with Special Concerns Regarding Withdrawing from the University

- Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefit bills must also be cleared by the Veterans Affairs Certifying Official.

- Varsity athletes or any athlete registered with the department of Athletics must obtain approval and be cleared by the Athletic department prior to any change in their registration status, including withdrawal from the university.

- Per U.S. Department of Homeland Security (DHS) regulations, international students in F-1 or J-1 visa status must notify their ISSS advisor prior to temporarily or permanently withdrawing from the University and must leave the U.S. within 15 days of withdrawing. Failure to comply with DHS regulations may result in the loss of your future eligibility to enter the U.S.

Refunds

During the academic year, tuition will be refunded on a prorated basis depending on the date that is noted as the ‘Total Withdrawal Date’. Tuition will be refunded on a prorated basis through 60 percent of the semester.

Title IV financial aid and tuition will be refunded on a pro rata daily basis through 60 percent of the semester. This date is determined based on the student notifying the Canes Success Center (Undergraduate)/Office of the Registrar (Graduate) of his/her intent to withdraw. If the student fails to notify the appropriate office, federal guidelines for determining refunds will be followed. Please see the Refund Policy (p. 37) under the Financial Payment Policies section.

Military Withdrawal

- Students who need to withdraw from a semester due to official orders to active duty with the Armed Forces of the United State must provide a copy of their official written orders when submitting the request to withdraw.

- Students who withdraw after the 12th week of the semester because of these official orders may either be awarded credit hour (CR) or an academic grade for any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

- Credit hour granted for courses under this policy should count toward graduation.

- There should be no refund of tuition for courses for which credit hour has been awarded. Refunds for courses not awarded credit hour should be on the same basis as complete withdrawals for military service.

- The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

General Education Requirements

Philosophy

The University of Miami’s General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

As an institution of higher learning in an increasingly diverse and global community our goals are to produce graduates who have been exposed to a broad spectrum of educational opportunities and to prepare them for successful participation in the world. The University's General Education Requirements consist of coursework taken before, within, and in addition to students' specialized study within their areas of concentration. The aims of the General Education Requirements are designed to ensure that graduates of the University will have acquired essential intellectual skills and exposure to a range of intellectual perspectives and academic disciplines. Whereas the requirements of majors specified by schools and colleges within the University emphasize depth of learning, the General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge.

Areas of Proficiency

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use quantitative skills with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively. Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT examination may earn a student exemption from, but not credit for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.
• Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.

• Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

Effective Fall 2016, new students without prior college credit in English Composition will be placed as follows:

- ENG 103: ACT English score below 18, SAT Writing score below 430, and (if relevant) TOEFL iBT Writing score below 18.
- ENG 105: ACT English score 18-31, SAT Writing score 430-680, or TOEFL iBT Writing score 18 or above.
- ENG 106 or ENG 107: ACT English score 32 or above or SAT Writing score 690 or above

Beginning Fall 2017, the ACT Plus Writing or the Redesigned SAT with optional Essay will be required for new undergraduate applicants with fewer than thirty transfer credits. Placement cutoffs for the ACT Plus Writing and the Redesigned SAT with optional Essay are to be comparable to the fall 2016 score levels above, using concordance tables for the ACT Plus Writing and the Redesigned SAT with optional Essay.

All requirements for the English Composition General Education Requirements must be completed prior to attaining junior year classification.

Quantitative Skills

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to understand and use essential quantitative skills. The Quantitative Skills requirement helps students learn to use quantitative skills and tools to solve problems, including the interpretation, manipulation and application of quantitative data. Students fulfill this requirement by completing either a Department of Mathematics course numbered MTH 108 or higher or a quantitative skills course approved by the student’s college/school and the University Curriculum Committee in consultation with appropriate academic units. Exemption from the requirement can be achieved through the following tests: AP, IB, SAT, SAT subject test in mathematics level 2, or a test administered by the Department of Mathematics.

Students will be able to:

• Select and use appropriate quantitative methods and tools to solve problems.
• Interpret, manipulate, and apply quantitative data to solve problems.

Areas of Knowledge

In April 2012, the University of Miami Faculty Senate adopted a new set of General Education Requirements for Areas of Knowledge. The new “Cognate Program” was implemented during the 2013-2014 academic year.

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration.

In satisfying the Cognate Program for the Areas of Knowledge requirement, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world. Students fulfill the requirement by completing three cognates, one from each of the three areas of the university curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics (STEM). A cognate is a group of at least three courses for at least nine credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate.

While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students' transcripts.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the “Responsible Academic Unit” (RAU) for the cognate. Inquiries about a cognate should be directed to the cognate’s RAU.

The Faculty Senate University Curriculum Committee submitted this clarifying language to Legislation #2012-19(B) The following rule applies to all cognates: A course may not be used to satisfy the requirements of more than one cognate. This rule applies whether the cognate requirement is being met by a major, a minor, or a designated cognate. The fact that a school requires students to take courses which the school construes as outside the major or minor, but must be taken to fulfill the requirements for that major or minor, does not allow the course to be counted for both purposes. On the other hand, the fact that a course is listed as one which must be taken to meet the requirements for a major or minor does not necessarily preclude a student from participating in a cognate which has that course as one of its options. In many cases, the student could take one of the other courses, which make up the cognate.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

• Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
• Understand the creation and performance of art.
The following departments and programs offer courses that are used in Arts & Humanities cognates: Africana Studies; American Studies; Architecture; Art & Art History; Cinema & Interactive Media; Classics; English; History; Judaic Studies; Latin American Studies; Modern Languages & Literatures; Music Theory – Composition; Musicology; Philosophy; Religious Studies; Strategic Communication; and Theatre Arts. Others will be added as cognates are approved.

### People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

The following departments and programs offer courses that are used in People & Society cognates: Accounting; Aerospace Studies; Africana Studies; American Studies; Anthropology; Business Law; Classics; Communication Studies; Criminology; Economics; Ecosystem Science & Policy; Educational & Psychological Studies; Geography; History; International Studies; Journalism & Media Management; Judaic Studies; Kinesiology & Sport Sciences; Latin American Studies; Management; Marine Affairs; Marketing; Military Science; Modern Languages & Literatures; Music Media & Industry; Nursing; Philosophy; Political Science; Psychology; Religious Studies; Sociology; Strategic Communication; Teaching & Learning; Urban Studies; and Women’s & Gender Studies. Others will be added as cognates are approved.

### Science, Technology, Engineering & Mathematics (STEM)

Science, Technology, Engineering & Mathematics (STEM) cognates develop students’ abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.

The following departments and programs offer courses that are used in Science, Technology, Engineering & Mathematics cognates: Anthropology; Architecture; Atmospheric Science; Biochemistry; Biology; Biomedical Engineering; Chemistry; Civil, Architectural & Environmental Engineering; Computer Information Systems; Computer Science; Economics; Ecosystem Science & Policy; Electrical & Computer Engineering; Engineering Science; Finance; Geography; Geological Sciences; Health Science; Industrial Engineering; Kinesiology & Sport Sciences; Management Science; Marine Science; Marketing; Mathematics; Mechanical & Aerospace Engineering; Microbiology & Immunology; Neuroscience; Nursing; Physics; and Psychology. Others will be added as cognates are approved.

### Notes

For the current listing of cognates, visit http://www.miami.edu/cognates.

The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates by application to the cognate’s RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit hour, can be used in cognates. Courses that transfer in with non-specific UM course credit hour can be used in cognates only by application to the cognate’s Responsible Academic Unit (RAU).

Transfer students entering the university with 30 or more credits may take an individualized cognate as one of the three required cognates. Individualized cognates allow for flexible use of transfer credits to fulfill a cognate requirement, as approved by the dean/advising office in the student’s school/college.

### Grades

#### Academic Standing, Probation, and Dismissal

At the end of each semester the University shall determine whether a student is in Good Academic Standing, on Academic Probation, or subject to Academic Dismissal. Some schools and colleges may have exceptions to the Good Academic Standing, Academic Warning, Academic Probation and Academic Dismissal policies listed below.

#### Good Academic Standing

To be in Good Academic Standing a student must not be on Academic Probation or subject to Academic Dismissal.

#### Academic Probation

Students other than first-semester freshmen (non-transfer student) whose UM cumulative grade-point average (CGPA) in University of Miami courses is below the following levels shall be placed on Academic Probation.

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>CGPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 33</td>
<td>1.7</td>
</tr>
<tr>
<td>33-64</td>
<td>1.8</td>
</tr>
<tr>
<td>65-96</td>
<td>1.9</td>
</tr>
<tr>
<td>More than 96</td>
<td>2.0</td>
</tr>
</tbody>
</table>

First-semester freshmen who have a semester grade-point average below 1.3 shall be placed on Academic Probation. In addition, students who fail to make satisfactory progress toward meeting the degree requirements...
specified by their School or College may be put on Probation by the Academic Standards Committee of the School/College. Students on Academic Probation must meet with their academic advisor prior to the following semester and shall be restricted to a 13-credit hour load.

Academic Dismissal
A student who remains on probationary status after two consecutive semesters on Academic Probation shall be subject to Academic Dismissal. A student who has been on Academic Probation for one semester and has a CGPA below 1.0 shall also be subject to Academic Dismissal. The decision to dismiss shall be made by the Academic Standards Committee of the School or College in which the student is enrolled. If a decision is made not to dismiss, the student shall remain on Academic Probation.

Appeals and Readmission
Students who wish to appeal their Academic probation or dismissal for academic reasons, must do so in writing to the School or College Academic Standards Committee within thirty days of the notice of dismissal. Those who have been dismissed for academic reasons shall not be considered for readmission to any school or college at the University until at least two regular semesters have elapsed since their dismissal.

Faculty Senate Student Affairs Committee

Standard Academic Appeals Process
The Faculty Senate Student Affairs Committee (FSSAC) has responsibility for undergraduate student academic appeals. The FSSAC includes faculty representatives from all undergraduate schools as well as three non-voting ex officio representatives: a graduate and undergraduate student representative and the University ombudsperson. The FSSAC reviews undergraduate student academic appeals that have not been resolved at the department, school, or college levels. As noted in section II below, the FSSAC hears cases only after they have gone through the departmental and college process. The processes are the same for grade and non-grade appeals except as noted below.

I. Time Constraints
Appeals must be filed within a year of the occurrence of the academic action resulting in the appeal and prior to the completion of all degree requirements or withdrawal from the University. Exceptions to this deadline may be permitted by the FSSAC for good cause.

Each level of appeal should aim to review the appeal and arrive at judgment within a two month period from the date the appeal reaches them. The entire process should be completed within one year.

II. Order of Appeal
A student appeal regarding a faculty or administrative academic action must be addressed to the following entities or persons in this order:

1. The faculty member or administrator responsible for the course, program, or activity.
2. The department/program chair/director or administrative superior of the faculty member or administrator.
3. The Dean or designee of the school or college offering the course, program or activity.
4. If the school, college or administrative unit has a committee constituted to hear student appeals, that committee must be consulted before proceeding to the next level.
5. The ombudsperson. The student is to provide the materials listed in Section III below to the ombudsperson who will review the merits of the appeal, and attempt to resolve the matter. The ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by the FSSAC.
If the matter is the appeal of a final grade, and only after all the other steps are taken, the ombudsperson may refer the matter to the Provost who will decide whether or not to refer the appeal to the FSSAC.
For a non-grade-appeal, the student has the final authority to decide whether to take the appeal to FSSAC. If s/he chooses to do so, the ombudsperson shall forward the appeal and the accompanying documentation to the FSSAC via the Faculty Senate Office.
6. The Provost may request that the FSSAC review an appeal. If, but only if, s/he does so, the FSSAC shall have jurisdiction to review a grade-related appeal.
   a. As part of the request, the Provost shall forward to the FSSAC, via the Faculty Senate office, the materials submitted by the student as indicated in Section III, below.
   b. The FSSAC will review the student’s written appeal (see section III below), confer with the appropriate faculty, administrators, and others as it deems necessary in making its recommendation to the Provost. The FSSAC may request an interview with the student, additional information or access to records, interviews with relevant faculty or administrators, or additional information or access to records kept by faculty or administrators.
   c. The FSSAC will communicate its findings and recommendations to the Provost. Copies shall be provided to the Faculty Senate.
7. The final decision with respect to the grade-related appeal will be made by the Provost and communicated to the student in writing. Copies shall be provided to the Faculty Senate Office and to the Chair of the FSSAC.
8. For non-grade-related academic appeals:
   a. The FSSAC shall act upon those appeals and report its findings and recommendation to the Provost. The Committee shall forward to the Chair of the Faculty Senate a copy of its recommendation to the Provost.
   b. The Provost shall communicate his/her decision on each recommendation to the student concerned, to the Chair of the Committee, and the Chair of the Faculty Senate.

III. Materials for an Appeal
When bringing an appeal, the student must state in writing issues s/he wishes to have considered. The appeal must include:

1. An appeal letter clearly stating the conditions as seen by the student, and offering reasons for granting the appeal.
2. The appeal letter must indicate if the student wishes to make a personal appearance and, if so, the reasons why the appearance is necessary.
3. Documents of support (e.g., examinations, term papers, syllabi, or medical documentation of illness) that the student wishes to have examined.
4. All written decisions made at earlier levels of the appeal by individual faculty/administrators, departments/programs/administrative units, college or school committees, and deans which are available to the student or in the student’s possession.

IV. Other Notes and Special Conditions

1. If the appeal is based on or related to a charge made by the student of discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, age, or handicap, a representative of the appropriate University office will be contacted and, as appropriate, consulted in the appeal process.

2. If the appeal is based on or related to a disability:
   a. The ADA Coordinating Committee shall serve in an advisory capacity.
   b. The student is to include in the materials provided, the appropriate forms from the Office of Disability Services documenting:
      i. An evaluation of the disability
      ii. Recommendations related to the disability
   c. The FSSAC does not consider appeals based upon the grant, denial or modification of an accommodation by the Office of Disability Services. Instead, any such appeal is as prescribed by the Office of Disability Services Grievance Procedure only.

The Grading System

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent attainment</td>
</tr>
<tr>
<td>B</td>
<td>Good attainment</td>
</tr>
<tr>
<td>C</td>
<td>Fair attainment</td>
</tr>
<tr>
<td>D</td>
<td>Poor attainment (earns credit hour but may not fulfill requirement for a major)</td>
</tr>
<tr>
<td>F</td>
<td>Failure (effective Fall 1995)</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped on or before the last day for withdrawing from classes as published in the official calendar of the University. Credit hour can be earned only by successful repetition of the course.</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete work in passing status with the instructor’s permission to complete the course. An “I” will be assigned only if the instructor is satisfied that there are reasonable non-academic grounds for the student’s incomplete work.</td>
</tr>
</tbody>
</table>

IP Denotes in progress grade assigned upon satisfactory completion of the first semester of a two-semester sequence, with the final grade for both courses to be submitted at the end of the second semester of the sequence. Please note that all “IP”s must be converted to a letter grade or “IF” at graduation. “IP” will also be converted to “IF” upon any departure from the University for a period in excess of one year.

IF Symbol indicating that an “I” grade was not appropriately completed. The symbol “IF” is equivalent to an “F” when computing a student’s average.

CR Grade signifying that credit only is awarded based on a “C” average or better.

NC Grade signifying that no credit hour is awarded based on a course average below a grade of “C”.

NG Symbol assigned by the Office of the Registrar indicating that the instructor has not reported the student’s grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student’s graduation, or by the end of one regular academic semester, whichever comes first. An Academic Dean may approve an extension initiated by the course instructor. An “NG” not replaced by a passing grade, or by a “W”, prior to the student’s graduation shall be changed to an “F” by action of the student’s Academic Dean.

Grade Point Average

The grade point average is used to determine:

- class rank
- graduation and university honor eligibility
- good standing, probation, and dismissal status
- scholarship eligibility

Your official grade point average is based only on the work you have completed at the University of Miami. The only exception to this policy is for determining whether a student qualifies for university honors established by the minimum grade point requirement at the time of graduation. For graduation purposes, cumulative grade point average is defined as either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere whether or not the transfer work is accepted toward a degree at the University of Miami, whichever is lower.

Quality points per credit hour are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>

</table>
The Honor Code

The Honor Code, initiated at the request of the Undergraduate Student Body Government, ratified by student referendum, approved by the Faculty Senate, by the President of the University, and administered by students, protects the academic integrity of the University of Miami by encouraging consistent ethical behavior among its undergraduate students. The Code provides standards that prohibit all forms of scholastic dishonesty, including cheating, plagiarism, collusion, and falsification or misrepresentation of experimental data. The Code covers all written and oral examinations, term papers, creative works, assigned computer related work, and any other academic work done at the University by an undergraduate student.

All undergraduate students are responsible for reading, understanding, and upholding the Honor Code. Signed pledges are required for written work submitted for evaluation, but the absence of a signed pledge does not free a student from the ethical standards required by the Code. Procedures for dealing with infractions of the Code, including provisions for appeals, are printed in the text of the Honor Code. Copies may be obtained from the Office of the Dean of Students or from the Office of the Undergraduate Student Body Government, or on-line at www.miami.edu/honor-council.

In keeping with the traditional prerogatives of university faculties, nothing in the Code infringes on the faculty's assignment of grades undertaken in a class. Instructors are informed when students have been found guilty of infractions involving their classes. Courses in which students have been failed for academic dishonesty may neither be dropped nor repeated under the terms of the freshman repeat rule.

Courses marked with an “IE” or “IF” count as credit hour attempted but are not counted in credit hours earned and do not carry quality points. Credit hours marked CR are counted as credit hours earned but are not counted in credit hours attempted and do not carry quality points. Courses marked with the symbols I, IP, W, NC, and NG do not carry credit hours attempted, credit hours earned, or quality points.

The grade point average is determined by dividing the total quality points earned by the total credit hours attempted.

Military service credit hour, some foreign university credit hour, correspondence course credit hour, credit by examination, etc., are not awarded quality points and do not enter the computation of the grade point average.

The Dean’s List

The Dean’s List is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained high scholastic achievement for the semester. To attain the Dean’s List, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit only);
2. have attained a quality point average of 3.50 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Dean’s List will be announced by each college and school at the end of the semester. The Office of the Registrar will post this achievement to the student’s permanent record.

The Provost’s Honor Roll

The Provost’s Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained a high scholastic achievement for the semester. To attain the Provost’s Honor Roll, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit only);
2. have attained a quality point average of 3.75 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Provost’s Honor Roll will be announced by the Provost’s Office. The Office of the Registrar will post the achievement to the student’s permanent record, and distribute the Provost’s Honor Roll Certificate.

The President’s Honor Roll

The President’s Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained the highest possible scholastic achievement for the semester. To attain the President’s Honor Roll a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit only);
2. have attained a quality point average of 4.0 for the semester;
3. have no courses with pending grades (I or NG).

The President’s Honor Roll will be announced by the Office of the Registrar who will post the achievement to the student’s permanent record, and distribute the President’s Honor Roll Certificate.

Graduation

Graduation and Degrees

It is the responsibility of the student to be sure he/she makes satisfactory progress toward, and fulfills requirements for, the degree he/she seeks. He/she may obtain help in the office of his/her Academic Dean.
To receive a Bachelor’s degree from the University, the student must earn at least 120 credit hours (more in some schools), with a C average (2.0) or better as well as a C average for all work done at the University of Miami.

Students must also meet all of the degree requirements of their respective schools and should not expect requirements in composition, mathematics, foreign languages, or other subject areas to be waived for any reason.

- A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of 56 credit hours in residence at the University of Miami to earn an undergraduate degree.
- A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of 45 credit hours in residence at the University of Miami to earn an undergraduate degree.
- In addition, each student must complete at least half of the credit hours specified for his or her major in residence at the University of Miami.
- Not more than 30 credit hours of correspondence work and extension work combined will be accepted toward a degree, and neither correspondence nor extension work may be credited as a part of the last 45/56 credit hours of the student’s program.
- Not more than 30 credit hours based on military experience will be awarded toward the degree.
- Credit hours earned in a manner other than by course registration, i.e. proficiency examination, CLEP, placement tests, etc., may not be used to meet the final 45/56 credit hour residency requirement, however such credit by examination may be earned while the student is enrolled in the courses needed to meet the final 45/56 credit-hour residency requirement.
- Once a degree has been awarded, no changes will be made to the academic record.

**Dual Degree**

- To obtain two different undergraduate degrees, a student must complete all the requirements for each degree.
- A second undergraduate degree on the same level requires a different major and a different minor.
- If the degrees are in two different schools, a student must meet the requirements with distinctly different majors and minors, wherever applicable, in each school.
- Students must obtain approval from the Office of the Senior Vice Provost and Dean of Undergraduate Education to pursue dual degrees in different schools.

As a general rule, college credit hours more than 12 years old are not recognized for degree purposes. Students in this category should consult their academic deans.

A student must apply for graduation on CaneLink during the semester in which they expect to graduate.

**Graduation Honors**

University Honors (summa cum laude, magna cum laude and cum laude) will be determined by a minimum GPA unique to the school or college from which the student is graduating. The GPA required will change each academic year and will be based on the cumulative GPA of the previous year’s graduating class.

Visit the Honors Program and Office of Academic Enhancement website at [www.miami.edu/honorsprogram](http://www.miami.edu/honorsprogram) for specific GPA requirements each academic year to determine eligibility for graduation with University Honors.

The top 5% of the graduating class will receive summa cum laude within each individual school or college; the next 10% will receive magna cum laude, and the next 10% cum laude.

Eligibility for University Honors for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

A student must meet the required GPA by the completion of the final semester within his/her school or college to be eligible to graduate with the honor.

**Diplomas and Transcripts**

No diplomas or official transcripts are released from the Office of the Registrar without the approval of the Office of Student Account Services.

The last date on which application may be made for each graduation period is published in the Academic Calendar. The academic deans are the only officers authorized to approve placing the student’s name on the candidate degree list.

Diplomas are issued after the student’s graduation has been awarded by the school/college and noted on the student’s official transcript. The diploma must be issued in the name on the student’s academic record. Addition or omission of a middle name is acceptable. The addition of a middle name will be acceptable only as it appears on the student’s application for admission. If the middle name is not on the application or if the student wants another version, documented proof of a legal name change must be presented to the Office of the Registrar.

Official transcripts are issued only upon receipt of a secure electronic request through the university’s online transcript system or a written and signed request from the student is received in the office. Payment for the transcripts is required before they will be sent.

Unofficial transcripts are available free of charge to students through CaneLink.

**Student Status**

**Academic Bankruptcy**

Students entering college sometimes perform at an unacceptable academic level. They either drop out or are dismissed. Some individuals with this experience re-evaluate their educational goals and desire to return to college. Their academic record, however, may present an insurmountable obstacle. Undergraduate students in this category who want the opportunity for a fresh start at the University without this handicap may apply for admission or readmission with the request that their prior academic record be disregarded.
In order to be considered for academic bankruptcy, a student’s combined college grade point average must be below 2.00 as calculated by the Office of Admission.

**Application for Initial Admission to the University with Academic Bankruptcy**

The applicant must apply to the Office of Admission and:

1. Must have been admissible to the University as a senior in high school,
2. Must have attended an accredited institution for at least one year and must not have attended any college or university for the preceding six months, and,
3. Must not be admissible to the University based on his or her college-level work.

**Application for Readmission to the University with Academic Bankruptcy**

A University of Miami student who has dropped out or who has been dismissed may request Academic Bankruptcy on meeting these conditions:

1. The student must apply to the Office of the Registrar.
2. At least six months must have elapsed since the end of the semester in which the student was last in attendance at the University of Miami.
3. Detailed written evidence must be provided with the readmission application, showing that the conditions or factors that caused the poor performance have changed sufficiently, so that there is a reasonable expectation of future satisfactory performance.

**Conditions of Approval**

1. If Academic Bankruptcy is approved, no course credit hours earned previously will be displayed on the transcript for credit hours attempted, credit hours earned, or quality points earned; however, all grades earned previously will remain on the transcript.
2. Readmission applicants with approval from the dean of the accepting school, may have Academic Bankruptcy apply only to those credit hours taken by the student when last in attendance at the University of Miami, so that credit hours earned at another institution subsequent to the date the student last attended the University are not affected.  
   All grades, good or bad, are invalidated during this process and will not be reinstated at any future time.

**Academic Bankruptcy will be granted only once for any student.**

**Certification of Enrollment**

Students who require certification of enrollment for insurance or education loan purposes may obtain an enrollment letter via their CaneLink account (https://canelink.miami.edu) or by submitting a request in writing to the Office of the Registrar. Enrollment verification via CaneLink is available after the last day to drop without a “W”. Please refer to the University’s academic calendar for specific dates.

Enrollment Verification letters will include only information maintained in the university’s official academic record system. The Office of the Registrar will not alter, amend or add anything to the standard letter. Notarization is available upon request.

Students will be certified as currently enrolled once they have met their financial obligations. If a student is delinquent in paying his/her tuition and fees statement balance and/or Monthly Payment Plan, the University will not process transcript and/or diploma requests. Course selection/modification will not be permitted for any previous, current or future semesters. The student is not considered enrolled during the term in question, which means that certification of enrollment cannot be provided for insurance, student loan deferment or repayment purposes. Non-payment also means the student is ineligible for financial assistance awarded for the term in question. A late payment fee may be assessed on delinquent accounts.

Students who require enrollment certification for scholarship purposes only, will be conditionally certified until financial obligations are met.

1. For students who do not have a Social Security number, verification letters are generated by the Office of the Registrar. Letters are typically generated in seven (7) business days but may take longer during our registration period and the first two weeks of classes.

**Classification of Students**

Students are classified in three ways:

1. by course load (full- or part-time);
2. by objective (degree sought, non-degree, transient, audit, etc.);
3. by year.

**By Course Load**

A student is a full-time student if he/she carries not less than the minimum normal load, 12 credit hours per semester in most schools, nine credit hours in the Graduate School (please refer to the Graduate section for exceptions). The minimum credit hour loads in a summer session will vary for each category, according to the length of the sessions. (A typical full-time class schedule for fall and spring semesters not requiring override approval from an advisor consists of 15 credit hours. In some cases, students are recommended to enroll in fewer than 15 credit hours.) Please refer to the university's full-time/half-time policy located at www.miami.edu/registrar (http://www.miami.edu/registrar). For spring semester, Intersession courses can be included when evaluating full-time status. It is important to note that tuition charges for Intersession courses typically are separate from and in addition to charges for the spring semester. Full-time status may vary from one college or school to another. Students should consult with the dean of his/her college or school for details.

**By Objective**

A degree student is one whose immediate educational objective consists wholly or principally of work normally credited to a University of Miami bachelor’s or higher degree. To qualify for this status, a student must meet the standards for admission.

A non-degree student is one who is not pursuing a degree program. Such students are those who, although eligible for degree candidacy, have requested permission to take a limited or special selection of credit hour
courses without regard to requirements for a degree. This classification includes high school graduates and students with previous college credit hour

1. who do not want degree status;
2. whose applications for degree status are incomplete;
3. who are taking work toward teacher certification;
4. who are workshop applicants;
5. who are visiting summer school students. (Students under 21 years of age who have not completed high school will not be admitted to this status.) Non-degree students are sub-classified as transient, special, etc.

An undergraduate non-degree student may petition the Director of Admissions to have his/her status changed to that of degree student. Up to 30 credit hours earned in non-degree status may be applied towards a degree, but only to the extent approved by the appropriate academic dean. It is therefore important that the degree student identify himself/herself as such, early in his/her program.

By Year

- A freshman is a degree student who has earned 0 to 29 credit hours.
- A sophomore is a degree student who has earned 30 to 59 credit hours.
- A junior is a degree student who has earned 60 to 89 credit hours.
- A senior is a degree student who has earned 90 credit hours or more.

Transient Student

A transient student is one who is enrolled at the University of Miami with the sole intention of using credit hours earned toward graduation elsewhere.

Audit Student

An audit student is one who enrolls as an observer or listener only. Auditing is allowed only when there is space available in the class. Audit status may be restricted by the Dean in the case of laboratory, studio or performance courses where audit status is not appropriate. Audit students receive no credit hour, do not prepare written assignments or take examinations, are not eligible for residence in campus residence halls, and do not receive student privileges except for the use of the library. No entries are made on the permanent academic record for audited courses.

Students wishing to change from audit status to credit hour status must obtain all necessary approvals within two weeks following the last day of registration for Fall and Spring semesters and no later than the fifth class day following the last day of registration for Summer Sessions. No changes except withdrawals from the course are permitted after this time.

Note: Fee for auditing a course is non-refundable. Please refer to financial information section of the bulletin.

Undergraduates Taking Graduate Coursework

University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The application may be found at: https://umshare.miami.edu/web/wda/grad/forms_/web/undergrad_take_grad_course.pdf.

Admission to Graduate Status requires:

1. Must have a minimum of 3.00 G.P.A.
2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than six (6) credit hours may be taken in one semester, and no more than a total of twelve (12) credit hours may be taken while in Graduate Status. Students may take no more than 13 credit hours of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar.

Eligibility for University Extracurricular Activities

Full participation in University-sanctioned extracurricular activities and organizations is open to all full-time students who are not on academic probation and who have been assessed the Student Activity Fee. Extracurricular activities include, but are not limited to the following: academic; athletic; dramatic; or musical organizations or teams; student organizations registered with the Committee on Student Organizations (COSO); fraternities and sororities; student publications; program boards; and University committees.

Students on probation may participate in any activity required as partial fulfillment of their degree program; may attend meetings of organizations; and may play intramural sports. They may not otherwise compete, perform, or hold a leadership position. At the beginning of each fall semester, the activity’s faculty or staff advisor or appropriate committee chairperson shall determine with the Office of the Provost the eligibility of each participating student. Some activities apply stricter standards, and may monitor academic progress and review eligibility during the academic year. Students should consult with the individual activity for specific requirements.

Readmission

Undergraduate students who have not attended the University for at least one semester should request readmission through the Office of the Registrar no later than two weeks before the beginning of classes, in the semester they wish to re-enroll. Readmission to the University is
inactive_status_readmission_withdrawal/readmission_information/

Students who have attended another college or university since they were last enrolled at the University of Miami, will be required to provide a transcript of their work. Failure to disclose all prior institutions attended may result in disciplinary action.

An undergraduate student who has applied to graduate for a given semester will not be eligible to register for any subsequent semester until the student applies for readmission or admission to a new program. A candidate for graduation may wish to continue his/her studies in one of the following situations:

1. If the student fails to graduate and further registration is needed, they must delete their application for graduation in CaneLink and within twenty-four hours, registration for subsequent semesters or sessions should be available. Students should contact the Office of the Registrar for assistance.

2. If the student graduates and wishes to pursue a second bachelor’s degree, the student must apply for readmission, stating his/her new degree objective.

3. If the student graduates and wishes to take additional course work without a degree objective, the student must apply for unclassified status.

Proof of immunization must be provided to the Student Health Service before readmission to the University of Miami. Failure to do so may prevent you from registering for classes.

**Inactive Status**

Inactive status is available to continuing, undergraduate, degree-seeking students who intend, and qualify, to re-enroll at the University of Miami after leaving the university for a designated period of time. This status is used when students will not be taking classes at another institution. Students interested in this option may obtain further information at https://umshare.miami.edu/web/wda/registrar/Forms-1/InactiveStatusNotificationForm.pdf or by visiting the Office of the Registrar.

**Non-UM Programs**

Students who study through a non-UM program, domestic or study abroad, and would like to have those credit hours applied toward their UM degree, should apply for Non-UM Program status. For more specific information on the Non-UM program please see the application: https://umshare.miami.edu/web/wda/registrar/Forms-1/Non-UM%20ProgramApplication.pdf.

Non-UM is only available in the Fall and Spring semesters.

---

**Student Identification Numbers**

All students at the University of Miami will receive an identification number that is unique to them. This number supplements the social security number, which is also required by the university in order to provide information to the federal government and approved agencies. Access to social security numbers is limited to staff who have a legitimate need for that information.

**Transfers Between Schools and Colleges**

Undergraduate students who have compiled fewer than sixty (60) credit hours may transfer between schools and colleges provided that such students:

1. Demonstrate their academic admissibility to the new program (as defined by class rank and SAT scores) at the time of their original matriculation at the University;
2. Satisfy any special criteria required for admission by a particular program (e.g., auditions in the arts, portfolios in architecture, etc.);
3. Obtain the approval of the Dean of the receiving school or college.

It is a general policy of the University that students admitted to degree seeking status may not transfer to an unclassified status.

Students who have compiled 60 or more credit hours with an average of 2.0 or higher and who have satisfied all of the above three conditions may be eligible to transfer between schools and colleges pending space availability and additional program requirements.

**Admission**

The University of Miami is a member of the National Association for College Admission Counseling and subscribes to its Statement of Principles of Good Practice.

**Freshman Admission**

The Admission Committee reviews applications and bases admission decisions on the following factors:

- **The Secondary School Record.** The applicant must be in the process of completing graduation requirements at a regionally accredited secondary school or must be a graduate of an accredited secondary school. The applicant must have successfully completed a solid college preparatory program including English, Mathematics, natural sciences, social sciences and foreign language.

- **Standardized Tests.** Applicants attending schools in the United States must submit official SAT or ACT results. The results of these tests, together with the secondary school record, provide a better measure of the ability of a candidate to perform college level work successfully than can be obtained by either measure alone. Applicants graduating from a secondary school outside of the United States should not submit SAT or ACT results.

- **The Counselor’s Evaluation Form.** This form is to be completed by the applicant’s secondary school counselor and includes rank in class, test score information, and an evaluation of potential for academic success in the student’s area of interest.
• **The Essay.** Since each applicant is considered individually, the Essay provides the opportunity to present information that may assist the Admission Committee as it evaluates the application for admission.

**Transfer Admission**

Transfer admission may be granted in most fields of study to students who have earned credit hours from other regionally accredited colleges or universities. Courses completed with **passing grades of C or higher** at other colleges and universities and acceptable for academic credit hours by the University of Miami, will be verified, and where appropriate, will be translated into University of Miami equivalents by the Office of Undergraduate Admission. However, the Dean of the College or School within the University from which the student plans to graduate determines which transferred courses may be counted toward meeting graduation requirements of that College or School.

**Transfer of Credit Hours to UM**

Work taken at other institutions will appear on the University of Miami transcript in separate entries as:

1. The total number of transferable credit hours attempted and quality points earned, regardless of grades, and
2. The total credit hours transferred, which shall be the total credit hours for which a grade of C or higher was earned.

*Note: Only the transfer totals earned are added to the University of Miami totals. Total credit hours attempted and quality points earned elsewhere are not included in the University of Miami totals.*

The University does not accept transfer credit hours for courses in which a grade of C- and below (or the equivalent grade) was earned. However, grades of C, D, and F are used to calculate the transfer admission grade point average.

Credit hours are not transferred from institutions not accredited by the appropriate regional accrediting association. Limited exceptions may be made with the approval of the Dean in the College or School of the student’s major. Credit hours transferred from institutions not in existence long enough to attain regional accreditation must be validated by the attainment of a C average or better in the first 12 credit hours of course work taken at the University of Miami.

The University does not have a coursework forgiveness policy. The grades of any repeated courses will be averaged.

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

Upper division course requirements (300 level or above) at the University may not be satisfied with community college courses.

After being offered admission and enrolling, a student must submit any final college transcripts with grades, AP, IB, AICE or CLEP examination scores for review by the end of the first semester of enrollment. Any documents listed above which are submitted after this time period will not be reviewed and credit hours will not be awarded.

**Required Credit Hours in Residence at the University of Miami**

A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of **56 credit hours in residence** at the University of Miami to earn an undergraduate degree.

A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of **45 credit hours in residence** at the University of Miami to earn an undergraduate degree.

At least half of the credit hours required for the chosen Major or Minor must be completed at the University of Miami.

See Admission procedures for transfer students (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/transfer_applicants/transfer_application_instructions).

**Undergraduate International Admission**

**ELIGIBILITY FOR ADMISSION** (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/eligibility_requirements_by_country)

**Admission Procedures for International Students**

**Educational Documents**

**Diplomas, Certificates**

Copies should be enclosed with the application. Students from countries following the British educational system must submit certified photocopies, or ask the examinations council to mail confidential results to the University of Miami. Reports of scores in school-leaving examinations (e.g., Baccalaureate) must also be submitted.

**Transcripts, Statements of Marks**

A transcript must contain the following information: subjects studied; marks (grades) awarded; length of class periods; number of periods per week for each subject; and grading scale with minimum passing mark. Year-by-year records of marks should be sent to the University of Miami directly from U.S. institutions. Certified records from foreign institutions may be submitted by applicants, but the University may sometimes insist that such transcripts be sent directly to the University of Miami from the issuing institutions. All secondary and tertiary transcripts must be submitted.

**English Translations**

Documents in a language other than English must be accompanied by certified English translations. Notarized translations will not be accepted. Translations supplement but do not replace original documents. Please remember to send both.

**Syllabus of university study** (description of each course or subject studied accompanied by certified English translations. Notarized translations will not be accepted).

**A current (within the past six months) bank or government sponsorship letter guaranteeing payment for tuition and fees, books, room and board,**
medical insurance and personal expenses for one calendar year (two semesters and two summer sessions) is required.

Examinations for International Students

All international students whose native language is not English, including those applying for transfer from U.S. institutions, are required to submit the results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The TOEFL code for the University of Miami is 5815.

The SAT score report is not required and should not be submitted for admission consideration from applicants who are attending schools outside the United States. Applicants should only submit an SAT score report if they qualify for merit scholarship consideration.

Please see the TOEFL Score Requirements (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements).

Conditional admission: Academically qualified applicants who are unable to take the TOEFL, or who have scored less than the required minimum, may be offered admission to undergraduate programs with the condition that they successfully complete level five of the University of Miami Intensive English Program or obtain a 550 TOEFL and higher. University of Miami TOEFL code number is 5815, and the IELTS code number is 4861.

Institutional TOEFL scores are designed for academic placement use at the University of Miami. Those needing TOEFL for admission to the University of Miami or for use elsewhere should take the TOEFL iBT instead. Visit www.ets.org/toefl/ (http://www.ets.org/toefl) for more information about the TOEFL iBT.

Please see the IELTS Score Requirements (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements).

IELTS is the International English Language Testing System. It measures ability to communicate in English across all four language skills – listening, reading, writing and speaking – for people who intend to study or work where English is the language of communication.

IELTS Course ID (codes): Undergraduate Admission – 4861; Graduate Admission – 4862. For more information, visit http://bandscore.ielts.org/course_info.aspx?OrgId=3187.

Programs of Study

International students are eligible to apply for all programs offered at the University of Miami. It should be noted that medicine and law are studied at the graduate level in the United States, and it is therefore inappropriate for undergraduate international applicants to request these programs.

Financial Information

The University of Miami has no financial assistance for international students other than academic scholarships. International students must provide funds for all of their expenses during the entire period of study, including travel and vacations. Students who would not be able to cover their expenses are best advised not to apply for admission.

Early Admission

A limited number of carefully selected students who are currently enrolled in high school and who have completed three years of study may be admitted to the University as freshmen. Early admission applicants typically have a very strong academic background and demonstrate a mature character.

Students who wish to apply under Early Admission must have the support of his/her parents, guidance counselor, and high school. Early applicants must also schedule an interview with the Office of Undergraduate Admission.

Early Admission applicants must submit official high school transcripts, SAT or ACT examination results, and all other supporting documents required to complete the application as part of the admission process.

Early Admission applicants will be notified of an admission decision by June 1 or after receipt of grades from the final high school year completed.

Since every applicant must be appraised individually, no general qualifications can be listed. Students interested in early admission may send inquiries and requests for applications to the Office of Undergraduate Admission.

Advanced Placement/Credit

The University allows students to receive college credit hour toward graduation from the following programs: Advanced Placement, International Baccalaureate, Dual Enrollment, and College Level Examination Program. To have Advanced Placement, International Baccalaureate, or College Level Examination Program credit hours evaluated, the student must submit an official test result report to the Office of Undergraduate Admission. The University of Miami does not give credit hour for CLEP Foreign Language and General Examinations. Students taking Dual Enrollment courses (college courses taken while still in high school) must submit an official college transcript for review of potential transfer credit hour. Please refer to the transfer student section for requirements to transfer college coursework.

A student must submit official AP, IB, Dual Enrollment transcripts or CLEP results no later than the end of the first semester of enrollment for review. Documents submitted after this time period will not be reviewed and credit hour will not be awarded.

The University will accept no more than 60 credit hours from these programs to count toward the 120 credit hours required for graduation.

GED Scores

Submitting GED Scores

An applicant may apply to the University upon completion of the GED in lieu of completing high school. When applying with the GED, the applicant must submit official high school transcripts up to the time of withdrawal, as well as the official GED score report and diploma.

Applicants submitting the GED must achieve the following scores to be considered for admission. These scores should be considered a guideline and do not guarantee admission to the applicant.
For exams taken in English:
Overall score of 2800
No subscore below 500

For exams taken in any language other than English:
Overall score of 3000
No subscore below 600

It is strongly suggested that applicants submitting the GED in any language other than English also submit a TOEFL score.

Non-Degree Enrollment

Adult Student Access Program (A.S.A.P.)
For information and policies regarding enrollment for classes in a Non-Degree seeking status, please visit: https://next-bulletin.miami.edu/undergraduate-academic-programs/continuing-international-education/adult-student-access/

Financial Assistance

http://www.miami.edu/admission/index.php/ofas/

The Office of Student Financial Assistance (http://www6.miami.edu/ofas) and Employment (https://www.miami.edu/ofas) administers federal, state, private and University financial assistance programs. Our office awards financial assistance for Undergraduate and Graduate/Professional students. We communicate with our students mainly through the CaneLink (https://canelink.miami.edu) system regarding any information we might need in order to complete the financial aid process. Medical students should contact their respective financial aid office.

Office of Student Financial Assistance and Employment
P.O. Box 248187
Coral Gables, FL 33124-5240
Telephone: 305-284-6000
Fax: 305-284-4082
Hours of Operation:
Monday-Friday (8:30 am - 5:00 pm EST)

Undergraduate

Undergraduate Financial Assistance
It is the purpose of the Office of Student Financial Assistance and Employment to provide need base assistance and/or academic achievement awards to qualified students in the form of scholarships, grants, loans and work programs (http://www.miami.edu/index.php/office_of_financial_assistance/ug/ug_aid) to the extent that resources are available. Professional financial aid and student employment advisors are ready to assist all students plan for the most efficient use of their financial resources for education.

Underlying the awarding of need-based financial assistance is the philosophy that the student and family have the primary responsibility for educational costs. Need-based financial assistance serves to supplement these primary resources.

• Students who require financial assistance in order to attend the University should apply for assistance each academic year.
• Candidates for admission should indicate their interest in financial assistance by checking the box provided for that purpose in the application for admission.
• The U.S. Department of Education’s Free Application for Federal Student Aid (FAFSA) (http://www.fafsa.ed.gov) is used to determine eligibility for federal need based assistance. The FAFSA must be completed for each academic year.
• Beginning with students who entered during the 2014-2015 academic year (including readmitted students) the College Board’s CSS Financial Aid PROFILE Application is required to determine institutional need based financial aid awards. The PROFILE application must be completed each academic year to determine renewal eligibility.

Important Financial Aid Tips

• Financial aid applications are accepted throughout the year but it is important to note that the appropriate preference date for receipt of aid applications must be met as aid is awarded on a funds available basis.
• DO NOT WAIT FOR YOUR ADMISSION DECISION TO APPLY FOR FINANCIAL AID. Financial aid resources are limited and there is no guarantee of assistance for students who do not submit appropriate documentation by the deadline posted above. Your financial aid application will not be considered complete until all documents are received.
• Apply for an FSA ID from the Department of Education early: https://fsaid.ed.gov/nps/index.htm.
• Keep a checklist and copies of all forms submitted. Put the applicant’s name and UM ID# on all forms submitted.
• Use your best estimate of current income information when completing the FAFSA and PROFILE if your federal tax returns
have not been completed by the application deadline. Submit your complete current year federal tax transcripts to our office by April 15.

- If you are not required to file a federal tax return and will not be filing, please notify us in writing.

Financial Aid Census Date

Effective Fall 2014, financial aid awards will be set according to a census date or date of fixed enrollment. All financial aid awards will be set according to the enrollment in effect at the close of business on the last day of the drop/add period each regular term semester. No adjustments will be made to the financial aid awards for any enrollment changes (increases or decreases) made after this date with two exceptions:

1. Bright Futures awards will continue to be adjusted (increased or decreased) according to any change in the enrolled credit hours.
2. The aid award package for students with federal financial aid and who completely withdraw (drop to 0 credit hours enrolled) will be adjusted according to the regulatory required Return To Title IV Calculation.

Graduate/Professional

Graduate and Doctoral Students

It is the purpose of the Office of Student Financial Assistance and Employment to provide federal financial aid assistance to qualified students in the form of loans and work programs. It is the purpose of the Office of Student Financial Assistance and Employment to provide federal financial aid assistance to qualified Graduate and Doctoral Students.

Graduate/Professional

Graduate Online

For United States citizens and eligible non-citizens, federal financial aid is available for online programs.

- Applying for Financial Aid (http://www.miami.edu/index.php/office_of_financial_assistance/g/g_applying), UM
- Costs and Financial Aid (http://www.miami.edu/gs/index.php/graduate_school/costs_and_financial_aid), UM

Eligibility

Federal Direct Graduate PLUS Loan: Borrowers may be eligible to request up to the cost of attendance minus other financial aid. Your award letter includes your maximum loan eligibility for the Federal Graduate PLUS Loan. This loan is based on the borrower not having an adverse credit history. Once you have accepted the offered loan amount on CaneLink, a credit check will be conducted by the US Department of Education. You will be required to have completed a Master Promissory Notice as well as Entrance Counseling (first time borrowers only). In the event your loan is declined, you have the option of appealing that decision or reapplying with an endorser; however, the Department of Education will then require you complete Credit Counseling in order to approve the disbursement of your loan.

First-time borrowers will need to complete the online Federal Direct Stafford Loan Master Promissory Note (MPN) and Loan Entrance Counseling with the Department of Education. Students may complete all federal student loan applications and entrance counseling at the Department of Education website (http://www.studentloans.gov).

Scholarships and Tuition Waivers are exclusively handled by the respective department. Our office is notified of scholarships/waivers by the department and it is then added to your award package. Adjustments to your Graduate PLUS Loan and/or other aid may take place upon notification to prevent an over award of aid.

In order to receive a graduate assistantship or fellowship, a graduate student must:

- Be admitted unconditionally to a post-baccalaureate degree program;
- Be enrolled for full-time study; and
- Maintain a cumulative graduate grade point average of 3.0 or above.

For additional information, please visit the Law School Website at www.law.miami.edu (http://www.law.miami.edu) or the Graduate School Website at www.miami.edu/grad (http://www.miami.edu/grad).

For specific information regarding graduate programs, contact the Graduate Advisor of the respective program. For information regarding loan and work-study opportunities, visit the Office Student Financial Assistance and Employment website at www.miami.edu/ofas (http://www.miami.edu/ofas).

Graduate Online

For United States citizens and eligible non-citizens, federal financial aid is available for online programs.

- Applying for Financial Aid (http://www.miami.edu/index.php/office_of_financial_assistance/g/g_applying), UM
- Costs and Financial Aid (http://www.miami.edu/gs/index.php/graduate_school/costs_and_financial_aid), UM

Eligibility

Please see the University’s Financial Aid (p. 31) website for eligibility criteria.

- http://www.miami.edu/index.php/office_of_financial_assistance/g/g_applying/eligibility/
Applying for Financial Aid
To apply for financial aid, submit the Free Application for Federal Student Aid (FAFSA) at https://fafsa.ed.gov/. Be sure to include the University of Miami school code 001536.

Awarding and Disbursing Financial Aid

Key Points and associated deadlines:

- Awards are processed on a rolling basis and are done annually, one academic year at a time (3 terms per academic year: Fall, Spring and Summer).
- Students are strongly encouraged to begin the application process at least four weeks prior to the start date of their program or renewal date of their existing loan.
- Applications will be accepted in the last 30 days of the term, but the Office of Student Financial Assistance and Employment cannot be held responsible if funds are not available for disbursement for the term. Delays can occur that are outside of the control of the Office of Student Financial Assistance and Employment.

New Students

The Office of Student Financial Assistance and Employment will award Financial Aid for new students when

- FAFSA has been received
- A student has been fully admitted
- Student has enrolled in classes

Financial Aid will be disbursed only when:

- All Official transcripts have been received by the University
- After the last day to add/drop and when attendance has been confirmed

Continuing Students

The Office of Student Financial Assistance and Employment will award Financial Aid for continuing students only when

- FAFSA has been received
- The student has enrolled in classes

Financial Aid will be disbursed only when:

- After the last day to add/drop and when attendance has been confirmed.

Maintaining Eligibility, including Satisfactory Academic Progress

Students must maintain all federal aid eligibility requirements for the entire term. Please see the eligibility (p. 33) page for specific criteria for maintaining eligibility.

Federal and Institutional Need Based Aid

SAP Policy

Federal and Institutional Need-based Satisfactory Academic Progress Policy

- In compliance with federal financial aid regulations, the University of Miami requires satisfactory academic progress (SAP) towards a degree as an eligibility requirement for federal and university need-based financial assistance. The SAP policy requires both a quantitative and a qualitative measure of a student’s progress.
- This policy is applicable to all undergraduate, law, graduate and doctoral students receiving financial aid through federal aid sources, including the Federal Parent Loan for Undergraduate Students (PLUS).
- At the end of each semester, the Office of Student Financial Assistance and Employment Services reviews the academic progress of all University of Miami financial aid recipients.
- If it is determined that a student is not making satisfactory academic progress at the end of the semester, a notification is sent to the student. The student will be placed on financial aid warning for one semester. Aid will not be withdrawn for the subsequent (warning) term, but at the end of that term, the student’s academic record will be reviewed by Office of Student Financial Assistance and Employment and appropriate renewal or termination actions will be taken. Notification will be sent to the student detailing information on the appeal process.
- Federal academic progress policy is subject to change based on guidelines and changes made by the U.S. Department of Education.

Undergraduate Credit Completion and Cumulative Grade Point Average Requirement for all Federal Aid and UM Need-based Assistance

Undergraduate Students

A student must have earned at least 67% of the total credit hours attempted during his/her overall academic career. Graduate level credit hours cannot be combined to meet the 67% requirement; however, credit hours transferred into the University of Miami are used in the calculation. The percentage of earned credit hours is calculated by dividing earned credit hours by all attempted credit hours. Rounding does not apply (e.g.: student completes 21 of 31 attempted credit hours therefore percentage complete is 21 / 31 = 67%).

- Withdrawals, Incomplete, Audits, and Fs are attempted but not considered earned hours.
- Reinstatement of aid eligibility can be obtained by earning additional University-approved credit hours, achieving the 67% completion requirement, or having an appeal approved by a committee as outlined later in this section.
- The University reviews progress at the end of each semester. Aid eligibility will be restored upon determination that the progress requirements have been met.

All undergraduate students must meet and maintain the University of Miami credit hour and cumulative grade point average (CGPA)
requirements to maintain satisfactory academic progress. The criteria listed below must be met to receive federal and institutional financial assistance administered by the Office of Student Financial Assistance and Employment.

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>Minimum Cumulative G.P.A.</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 32</td>
<td>1.7</td>
</tr>
<tr>
<td>33 to 64</td>
<td>1.8</td>
</tr>
<tr>
<td>65 to 96</td>
<td>1.9</td>
</tr>
<tr>
<td>97 +</td>
<td>2.0</td>
</tr>
</tbody>
</table>

This criteria does not apply for meeting requirements for University of Miami scholarships and State of Florida financial aid. State of Florida financial aid and University of Miami academic scholarships have their own CGPA requirements.

Maximum Period of Eligibility for All Financial Assistance Awards

- Degree-seeking undergraduate students receiving federal aid must complete their degrees within 150% of the normal time for completion as determined by the school or college catalog under which the student was admitted. For example, if an academic program requires 120 credit hours, the student must complete the program within 180 total credit hours. Credit hours used in this calculation include those accepted for transfer and those attempted at the University of Miami.
- Pell Grant eligibility is limited to 12 full time semesters or the equivalent (e.g.; two half-time semesters equal one full time semester) www.studentaid.ed.gov/pell-limit (http://studentaid.ed.gov/PORTALSWebApp/students/english/PellLimit.jsp).
- Students receiving university need-based grants are limited to four years of eligibility (five years of eligibility for the five-year undergraduate degree programs).

Graduate/Professional Federal Financial Aid Semester Review - Graduate and Doctoral

- A student must have earned at least 67% of the total credit hours attempted during his/her overall academic career. Undergraduate and graduate level credit hours cannot be combined to meet the 67% requirement; however, credit hours transferred into the University of Miami are used in the calculation. The percentage of earned credit hours is calculated by dividing earned credit hours by all attempted credit hours. Rounding does not apply. (e.g.: Student completes 21 of 31 attempted credit hours, percentage complete is 21/31 = 67%).
- Withdrawals, Incompletes, Audits, and F’s are attempted but not considered earned hours.
- Credit hours transferred into the University of Miami will be counted as credit hours attempted and credit hours earned.
- Reinstatement of aid eligibility can be obtained by earning additional University approved credit hours, achieving the 67% completion requirement, or having an appeal approved by a committee as outlined later in this section.
- The University reviews progress at the end of each semester. Aid eligibility will be restored upon determination that the progress requirements have been met.

Graduate students must be enrolled at least half-time in order to receive federal financial assistance. A minimum of 5 graduate credit hours constitutes at least half-time enrollment at the graduate level. The only exception to this credit hour requirement is enrollment in any of the 800-level research courses. Students enrolled in any of these courses are considered full-time and are eligible for federal loans.

Graduate and Doctoral Students

All University of Miami graduate and doctoral students must maintain a minimum 3.0 cumulative grade point average (CGPA). Graduate students who fail to meet the minimum credit hour or cumulative grade point average requirements have failed to meet the satisfactory academic progress standards established by the University. Those in violation of the satisfactory academic progress eligibility requirements will be notified in writing of their eligibility status and right to appeal.

Maximum Period of Eligibility for All Financial Assistance Awards

- Graduate students may receive federally-funded assistance for the time to complete their degree requirements in accordance with limits set by the Graduate School. The limits are: six (6) years for those studying for the various masters degrees and 8 years for those studying for doctoral degrees. Students pursuing dual masters degrees will receive aid for a maximum of six (6) years. Students in a combined masters degree/doctoral degree program are eligible for assistance for a maximum of eight (8) years.
- Time to completion starts when a student begins any program in the Graduate School, whether it is a masters or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various masters degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a masters degree in field, work must be completed within eight years. Individual programs may be set to a shorter time period.
- Graduate students who plan to enroll in a graduate degree program should keep in mind their aggregate loan limits. For more information, go to the National Student Loan Data System (NSLDS) at http://www.nslds.ed.gov. This site displays information on loan amounts, outstanding balances, loan statuses and disbursements.

Law School Students

Scholarship SAP Policy

Undergraduate only

- The academic scholarship is available to undergraduate students enrolled full time in a course of undergraduate study leading to the first bachelor's degree.
- First-time freshmen are eligible for University of Miami academic scholarships for four years (eight consecutive semesters), or such shorter time required to complete the baccalaureate degree.
- Transfer students are eligible for University of Miami academic scholarships for two years (four consecutive semesters), or such shorter time required to complete the baccalaureate degree.
• Academic scholarships may be applied only to fall and spring semester coursework of undergraduate study only. They are not available during a summer term.
• Bachelor of Architecture students may receive the scholarship for five academic years (ten consecutive semesters), or such shorter time required to complete the degree. Bachelor of Architecture students admitted as a transfer student from another university may receive the scholarship for up to three academic years (six consecutive semesters), or such shorter time required to complete the degree.

Credit Hour and GPA Requirements for UM Scholarships
• Scholarship recipients must maintain a minimum 3.0 cumulative grade point average (on a 4.0 scale) for all credit hours earned at the University of Miami to retain their scholarship.
• All full-time undergraduate students are required to register for and complete at least 24 (a minimum of 12 each semester) new credit hours at the University of Miami each academic year, defined as the fall and spring semesters.
• Reinstatement of academic scholarship eligibility can be obtained by earning additional University-approved credit hours. The University reviews progress once a year at the end of the spring semester.
• Withdrawals, Incomplete, Audits, and F's are attempted but not considered earned credit hours.
• Ronald Hammond scholarship recipients should refer to their contract for renewal criteria provided by the Office of Academic Enhancement (http://www6.miami.edu/provost/oaе).

All 2014-2015 and prior academic scholarship recipients please refer to the Bulletin at the time when you were admitted into the university for scholarship renewal requirements.

Graduate/Professional
Graduate/Professional Only
Graduates scholarships awards are determined by the departments. A student’s academic progress and eligibility for an award is monitored and evaluated by the departments.

State of Florida SAP Policy
The Florida Department of Education (http://www.fldoe.org/students/financialaid.asp) and Office of Student Financial Assistance (http://www.floridastudentfinancialaid.org) has its own standards of progress for state financial assistance.

• All Bright Futures Scholarship recipients (includes Florida Academic and Florida Medallion scholarships) are eligible for up to 132 credit hours; however, eligible students may only receive up to 45 credit hours per academic year.
• 2009-2010 high school graduates and thereafter may receive up to 100% of his/her program of study or 120 credit hours (or the equivalent in quarter or clock hours) toward completion of his/her first baccalaureate degree, or for up to five years from high school graduation (if the student was initially funded within three years after high school graduation), whichever comes first.
• Florida Gold Seal Vocational Scholar recipients who graduate from high school in the 2009-2010 academic year and thereafter are eligible to receive funding for up to 100% of their program of study, up to 90 credit hours.
• State of Florida Aid academic progress policy is subject to change based on changes made by the Florida Department of Education.

A student must earn at least 24 credit hours (or the equivalent) if enrolled full time for the entire academic year. A student enrolled full time (12 or more credit hours or the equivalent) for only one term must earn at least 12 credit hours for that term. If a student is enrolled part time for any part of the academic year, the student must earn a prorated number of credit hours. (See below). Initial eligibility must be at least 6 credit hours.

<table>
<thead>
<tr>
<th>Student Funded (per term)</th>
<th>Required Earned Hours (per term)</th>
</tr>
</thead>
<tbody>
<tr>
<td>12+ credit hours (Full Time)</td>
<td>12</td>
</tr>
<tr>
<td>9-11 credit hours (Three-Quarter Time)</td>
<td>9</td>
</tr>
<tr>
<td>6-8 credit hours (Half Time)</td>
<td>6</td>
</tr>
</tbody>
</table>

A student that fails to meet the minimum institutional grade point average (3.0 for Florida Academic, 2.75 for Florida Medallion and Gold Seal) will no longer be eligible for his/her Bright Futures award. Florida Academic recipients that fail to achieve a 3.0 institutional average, but achieve at least a 2.75 institutional average, will renew at the lower Florida Medallion amount. Recipients that fail to meet the progress requirements receive notice including information on the appeal process.

• Award Reinstatement: an eligible student that did not receive scholarship funds for the last academic year (fall through spring), may request reinstatement of the award. The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at http:\www.FloridaStudentFinancialAid.org (http://www.FloridaStudentFinancialAid.org)
• Award Restoration: a student that failed to achieve a minimum 2.75 institutional GPA and became ineligible for funding may apply for restoration in an academic year after which the 2.75 institutional GPA requirement was met. (The 2.75 institutional GPA must be met before the fall term for which the student is applying.) The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at http:\www.FloridaStudentFinancialAid.org (http://www.FloridaStudentFinancialAid.org)
• For 2009-10 and later high school graduates, if a scholarship is not renewed because of an insufficient GPA during their first year of funding, the scholarship may be restored in an academic year after the minimum institutional GPA requirement is met. Students who do not meet the minimum earned credit hours requirement or who fail to meet the minimum institutional GPA requirement after their first year of funding will NOT be permitted a restoration opportunity. *State of Florida Aid academic progress policy is subject to change based on changes made by the Florida Department of Education.
• Recipients of the William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Assistance Grant (FSAG) must complete at least 24 credit hours each academic year with an institutional grade point average of at least 2.0. Classes taken in the previous summer may be included in calculating the completed credit hours (credit hours earned during summer of 2014 may be combined with the credit hours earned during the 2014-2015 academic year to
meet the 24 credit hour requirement). Please note that credits earned the previous summer at another institution may be counted if they are accepted as transfer credits to the University of Miami; however, this will have no impact on the CGPA calculation at UM.

- William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Access Grant (FSAG) recipients are limited to nine semesters of eligibility.

Students that do not meet the annual minimum 24 credit hours requirement for renewal, may not receive funding the following academic year. To be eligible for renewal in a subsequent year, the student must meet the general eligibility requirements for renewal and have maintained/earned an institutional GPA of 2.0.

Students enrolling for only one semester must complete at least 12 new credit hours while maintaining the required institutional GPA.

### SAP Appeals Process

Students that do not meet the academic progress requirements may submit a written appeal to request reinstatement of eligibility to receive aid. The student must complete the University of Miami’s Academic Progress Appeal Form. This petition requires the student to:

1. Submit a written explanation as to why he/she was unable to meet or maintain the academic progress requirements; and
2. Submit documentation that substantiates the student’s circumstances, such as a letter from a doctor or copies of medical bills if a student cites medical reasons for not meeting the requirements.

The appeal form (https://umshare.miami.edu/web/wda/financialassistance/SAP15-16.pdf) may be downloaded from the financial assistance website. Submit the Appeal Form and all documentation to the Satisfactory Academic Progress (SAP) Appeal Committee, c/o the Office of Student Financial Assistance and Employment. All appeals must be submitted no later than 30 days from notice of ineligibility. All appeals submitted completely and on time will be reviewed by the committee prior to the beginning of each semester. Decisions are made using the appeal documentation provided by the student in conjunction with the student’s academic record. All decisions by the committee are final.

A general description of the major financial assistance programs available through various departments as well as the Office of Student Financial Assistance and Employment can be found at [http://www.miami.edu/ose](http://www.miami.edu/ose).

### Student Employment

**Student Employment** ([http://www.miami.edu/ose](http://www.miami.edu/ose))

Student Employment is responsible for assisting and guiding students (admitted and enrolled in a degree program at the University of Miami) through the job search and placement process while attending the University.

Student Employment provides job opportunities to all students regardless of sex, age, disability, sexual orientation, ethnicity, nationality, race or creed. University of Miami student employees are required to adhere to established federal, state and local employment regulation practices.

Employment programs for undergraduate students include the Federal Work Study, Student Assistant program, and Miami Commitment program, all of which offer opportunities on campus and in the surrounding community. Employment programs for graduate students include: Federal Work Study, Student Assistant Program and Graduate Assistantships.

Eligibility for an employment program does not provide the funds up-front for tuition expenses.

**Federal Work Study**

Federal Work Study is a need-based program that provides part-time job opportunities based on your financial aid eligibility. To apply for Federal Work Study, you must complete the Free Application for Federal Student Aid (FAFSA) and check yes to “Are you interested in being considered for work study?”

Students who are awarded Federal Work Study obtain jobs available at the University of Miami campuses or at off-campus community service agencies that have been approved to participate in the program.

**Student Assistant Program**

The Student Assistant program is for those students who do not apply or qualify for financial aid. Student assistant positions are similar to Federal Work Study in terms of job responsibilities and rates of pay; however, they are not supported by federal funds.

**Miami Commitment Program** ([http://www.miami.edu/index.php/miamicommitment/miami_commitment_forms/endofyear_evaluation](http://www.miami.edu/index.php/miamicommitment/miami_commitment_forms/endofyear_evaluation))

The Miami Commitment program is available by invitation to a limited number of students based on Office Admission recruitment strategies. To be considered, invited students must apply to the program by the published deadline.

**Graduate Assistantship Program**

Graduate Assistantships are mostly offered directly to selected students by their academic departments. Graduate Assistantships may include a tuition scholarship of varying amounts, in addition to work payment. Students must be admitted to a Graduate or Professional Degree Program at the University of Miami in order to be hired as a Graduate Assistant.

**Off-Campus Employment**

Students seeking career-related experiences and who have reliable transportation can work off-campus. Student Financial Assistance and Employment acts only as a referral service and makes no particular recommendations regarding off-campus employers. Off-Campus employers hire students directly and Student Financial Assistance and Employment is not responsible for safety, wages, working conditions, or other aspects of off-campus employment.

The University of Miami participates in E-verify ([http://www.miami.edu/index.php/ose/student_information/after_being_hired/e-verify_ose](http://www.miami.edu/index.php/ose/student_information/after_being_hired/e-verify_ose)). E-Verify is an internet-based system that allows an employer, using information reported on an employee’s Form I-9, to determine the eligibility of that employee to work in the United States. The E-Verify system is operated by the U.S. Department of Homeland Security (DHS).
Financial Payment Policies

Policy
All semester charges (tuition, room, board and fees) are due by the date on the billing notification e-mail, unless an established Monthly Payment Plan contract has been finalized with the Office of Student Account Services. Previously unbilled and new charges are due and payable when incurred. Payment is considered complete only when all charges are paid or when satisfactory arrangements to pay have been finalized with the Office of Student Account Services.

Consequences of Non-Payment
There are consequences to non-payment. Students that are delinquent in paying their tuition and fees statement balance and/or Monthly Payment Plan may be subject to having their class schedule cancelled. Also, there will be a hold on transcripts and course registration for the current and subsequent semester. Cancellation may also lead to the forfeiture of any financial aid the student may have been awarded.

Course selection will not be permitted for any past due accounts including Monthly Payment Plans. A late payment fee will be assessed on all delinquent accounts.

Finance Charges
No additional charges are imposed on an account once full payments are received by the payment due date. If, however, payment is received after the payment due date, a Finance Charge is assessed. Finance charges are assessed at an Annual Percentage Rate of 16%.

Anticipated Payments
If financial aid funds are not available at the time of registration, the student would normally be expected to cover these payments. However, financial aid awards will be considered “anticipated” under the following conditions:

- The Office of Student Financial Assistance and Employment (OSFAE) is provided with a source of aid (other than College Work Study or Miami Commitment) on the student’s award package.
- OSFAE awards the corresponding amount on the student’s award package. i.e., outside scholarship information must be provided to both the Offices of Financial Assistance and Student Account Services in order to consider the aid as “anticipated.”
- OSFAE allocates the guaranteed award during the semester that the disbursement should be expected.
- Final guarantees have been processed by the appropriate alternative loan lender – preliminary approvals will not result in automatic disbursements of alternative loan funds.

Examples
Veterans Monthly Educational Benefit Checks: An amount not to exceed the total of the checks expected to be received during the semester (for fall and spring, this is typically three checks) may be credited. Arrangements for this type of tuition credit must be initiated with a representative of Veterans Affairs through the Office of the Registrar and the Office of Student Account Services.

Students with VA benefits are required to sign a promissory note with the Office of Student Accounts in order to have their anticipated awards credited to their account. International Students with Government Sponsorships: Payment of all or a portion of charges that can be billed directly to corresponding government agencies may be credited upon presentation of appropriate documentation from their government or embassy.

Florida Prepaid Program
The University of Miami will assist with a student’s education expenses by billing for any available Florida Prepaid College Program funding directly to the Florida Prepaid College Board. Florida Prepaid participants may authorize the University of Miami to request a payment disbursement option that best matches your needs and current savings in the plan. We encourage participants to authorize a payment that will facilitate your financial planning objectives for your student’s enrollment at the University of Miami.

The University of Miami requires new students to complete the “Florida Prepaid College Program Authorization Form.” In addition to this form, all students who plan to use their prepaid funds must contact Florida Prepaid at 1-800-552-4723 option 2, and request a separate Florida Prepaid “Transfer Form.” Upon your request, Florida Prepaid will mail the Transfer Form to you. The purchaser of the plan must complete this form and return it directly to Florida Prepaid. It is necessary that Florida Prepaid have this Transfer Form on file in order for students to use Florida Prepaid funds at the University of Miami.

Questions in reference to Florida Prepaid should be sent to saccounts@miami.edu with “Florida Prepaid” in the subject line. The required authorization form for the University of Miami and an example can be downloaded from the following web site: www.miami.edu/osas (http://www.miami.edu/osas)

Policy on Previous and Unpaid Balances
Non-Payment
The University of Miami may declare due and payable at once the sum of all past due balances. In addition, the student will be responsible for interest accrued on all past due and unpaid amounts at the maximum rate permitted by law and any and all costs incurred by the University of Miami in enforcing its rights. The University reserves the right to withhold transcripts, diplomas, readmission, and future registration for non-payment of outstanding balances. The University’s Collection Department may also disclose the student’s outstanding indebtedness, along with other relevant information, to credit information bureaus. A non-refundable $100 reinstatement fee will be charged to reinstate each unpaid and cancelled semester.

Refund Policy
Definitions
Title IV Financial Aid or Title IV Programs refers to the following awards:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loan, DL PLUS (Graduate Student), DL PLUS (Parent)
Refund Policy

Students who have advised the appropriate University department of their withdrawal, through 60 percent of the semester, will receive credit for eligible financial aid refunds using a pro-rated calculation based on the percentage of the semester attended by the student. Unearned Title IV funds will be returned in accordance with the refund policy established in Section 484B of the Higher Education Act of 1965, as amended (HEA) and provided for through the Student Assistance General Provisions regulations enacted on October 7, 1998. Please review UM’s current policy on tuition refunds (https://umshare.miami.edu/web/wda/accountservices/Refund_Calendar/Refunds20148.pdf). Fees are not refundable and will not be pro-rated.

The University refund schedule does not apply to students in the following on-campus and off-campus programs: The Executive MBA, the MBA Program for Working Professionals, and the Master of Science in Professional Management. Unless the student has completed official withdrawal procedures in writing with the Graduate Business Program office prior to the beginning of a course/term, tuition will be refunded on a prorated basis based on the number of class meetings attended through the effective date of withdrawal. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. This policy supersedes any information stated in the Graduate Bulletin and other university publications.

Procedure

The amount of earned tuition and financial aid will be calculated on a daily pro-rated basis. Unearned tuition will be credited to the students account. Unearned, disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid programs. Students who have not completed the verification process are ineligible to receive any financial aid and therefore no financial aid will have been earned. All disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid program.

The return of financial aid will be refunded to the following sources used in the specific order as noted below until the total amount of the school’s responsibility has been satisfied:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loans
- Federal PLUS Loans (Graduate Student)
- Federal PLUS Loans (Parent)
- Federal Pell Grant
- Federal Supplemental Opportunity Grant (SEOG - Federal Portion Only)
- Any other Title IV Assistance
- State financial aid

In the event of an overpayment of unearned Title IV grants, the University will send the student a notification letter requesting payment in full or the establishment of a satisfactory payment arrangement with the University’s Department of Collection or the Debt Collection Services of the U.S. Department of Education. This notification letter will be processed within 30 days of the date of the University’s determination that the student withdrew.

If the student does not respond to the request for repayment within 15 days, the University will notify the Department of Education of any Title IV grant overpayment. If the student does not make satisfactory repayment arrangements for the repayment of Title IV grant aid, the student will then become ineligible for federal assistance on the 46th day from the date of the University’s repayment letter.

Withdrawal Example

A student notifies the Registrar of withdrawal on the 50th day of the semester. If the total number of calendar days in a semester were 108, the earned financial aid ratio would be 50 divided by 108 or 46.3 percent. The student would have earned 46.3 percent of the approved federal aid that the student was originally scheduled to receive for the term. The 53.7 percent of the student’s scheduled or disbursed aid remains unearned and must be returned to the Federal Program. If a student remains in school until the percentage of earned financial aid is 60% or more, then federal regulations consider the student to have earned 100% of their federal aid. For further information please refer to the 'Cane Success Center withdrawal information page (http://www.miami.edu/index.php/cane_success_center/withdrawal).

Post Withdrawal Disbursements

If the University determines that a student is eligible for Title IV funds that have not been disbursed, grant funds that the student is eligible for will be disbursed first. Federal aid that the student is eligible for will be credited to the students account and applied against any outstanding charges.

Reinstatement of Cancelled Classes (Continuing Students)

Classes are subject to cancellation if the student fails to complete payment by the due date for each semester. Reinstatement of a cancelled semester is at the sole discretion of the Office of Student Account Services. A non-refundable $100.00 Reinstatement Fee will be assessed on the student’s account if a reinstatement of cancelled classes is granted.

The student will be allowed to register for a subsequent semester only if all outstanding balances have been paid in full, with certified funds.

Important Note: Students who are receiving financial assistance and have had their classes canceled for the semester run the risk of forfeiting their awarded financial aid for the term and/or academic year.

Payment Options

The University Cashier accepts cash, personal checks, traveler’s checks, cashier’s checks, certified checks, money orders, and checks drawn against lines of credit. Personal check and credit card payments are accepted on line via CaneLink. Bank wire transfers are also accepted.

Checks and Money Orders

Payments must be in U.S. Dollars and drawn on a U.S. bank. Payments must be made payable to the University of Miami and include the
student’s identification number to ensure credit to the student’s account. 
Post-dated checks are not accepted.

Returned Checks Policy
All returned checks are deposited twice, automatically, and without notice. A Returned Check Fine will be assessed to the student’s account, as listed below, after the second attempt. Check cashing privileges will be canceled for those students who have three (3) or more returned checks.

A notification letter will be mailed to the maker of the check by the University’s Collection Department detailing the amount and fine for the returned check. Check cashing privileges will be restricted until cash or certified funds (money order or cashier’s check) are presented for payment. A personal check will not be accepted to replace a dishonored check.

Returned check fines processed through CaneLink will incur a $20 fee. Checks not processed through CaneLink will incur the following charges:

<table>
<thead>
<tr>
<th>Check Type</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Check &lt; or = $800.00</td>
<td>$20.00 fee</td>
</tr>
<tr>
<td>Checks over $800.00</td>
<td>2.5% of the check amount</td>
</tr>
<tr>
<td>Checks for Monthly Payment Plan</td>
<td>$25.00 Fee</td>
</tr>
</tbody>
</table>

Wire Transfer of Funds
Wire transfer of funds for payment on an account at the University of Miami may be processed through any full service bank. Please direct the transfer to:

Bank of America, N.A.
1500 South Dixie Highway
Coral Gables, Florida 33146

ABA Routing Number: 026009593
For Credit to: University of Miami Account 5508319094
For Further Credit to: Student Name and I.D. Number

The student’s name and the student’s identification number (C#) are required in order to properly credit funds to the student’s account.

Tuition Payment Plans
The Office of Student Account Services offers several tuition payment options to assist students and parents. The University’s payment options are designed to provide convenient alternative plans of budgeting and paying educational costs whether or not a financial assistance award is granted.

Monthly Payment Plan (MPP)
Purpose: This plan allows you to divide all or part of your semester educational expenses (tuition, fees, on-campus housing, and meal plan less financial assistance) into four convenient monthly payments for the fall. A four month payment plan is also available for the spring term as well. The University of Miami does not offer a monthly payment plan option for the summer term.

Contract length: This plan is offered on a semester-by-semester basis for the fall and spring semesters. The minimum contract for either plan is $1,000.

Fee: A 3% non-refundable administration fee of the amount financed is charged and included in the established monthly payments.

Conditions: Payments are due on the 1st of each month with the first payment due on August 1st. The first payment for spring MPPs will be due on the first business day in January.

Students may apply for the Monthly Payment Plan on CaneLink. For more information regarding this option please follow this link to the Monthly Payment Plan FAQ page (https://umshare.miami.edu/web/wda/accountservices/MPP%20FAQs%20website%20changes%207%22%2013.pdf).

Tuition and Fees

Tuition
The basic undergraduate tuition rate covers the normal student load and is increased if the student carries an overload. Private instruction, e.g., music lessons, carries extra charges. Students who opt to participate in any of the University’s intercession courses will be billed for the intercession course separately from the flat rate cost of full-time tuition and fees.

For tuition charges in special programs and sessions, see announcements that are published concerning these components of the University’s academic program.

The following list of charges is effective for the academic year 2015-2016.

Undergraduates (All Colleges and Schools)

<table>
<thead>
<tr>
<th>Number of Credit Hours</th>
<th>Tuition (per semester)</th>
</tr>
</thead>
<tbody>
<tr>
<td>One</td>
<td>$ 1,850.00</td>
</tr>
<tr>
<td>Two</td>
<td>$ 3,700.00</td>
</tr>
<tr>
<td>Three</td>
<td>$ 5,550.00</td>
</tr>
<tr>
<td>Four</td>
<td>$ 7,400.00</td>
</tr>
<tr>
<td>Five</td>
<td>$ 9,250.00</td>
</tr>
<tr>
<td>Six</td>
<td>$11,100.00</td>
</tr>
<tr>
<td>Seven</td>
<td>$12,950.00</td>
</tr>
<tr>
<td>Eight</td>
<td>$14,800.00</td>
</tr>
<tr>
<td>Nine</td>
<td>$16,650.00</td>
</tr>
<tr>
<td>Ten</td>
<td>$18,500.00</td>

<tr>
<td>In excess of 20, per credit hour</td>
<td>$1,850.00</td>
</tr>
<tr>
<td>No credit hour towards degree (audit), per course, nonrefundable</td>
<td>$1,850.00</td>
</tr>
</tbody>
</table>

Undergraduate students carrying both undergraduate and graduate courses will be charged tuition at the rate in effect for undergraduate credit hours taken and appropriate fees. For example, tuition for a student carrying a total of 15 credit hours, of which 3 are graduate and 12 are undergraduate, would be charged at the $22,200.00 rate.

Undergraduate students taking graduate level coursework that is priced at a special level will be billed separately for these courses. Students
should check with their advisors and/or the appropriate school’s department for more details on their course pricing requirements.

Full-time fees will be assessed according to student classification as an undergraduate or graduate.

The University reserves the right to change without notice tuition, fees, room and all other charges at the beginning of any academic year, and the right to change activities and board fees at the beginning of any semester.

Graduate Students

| (Pre-Master’s, Post-Master’s, and Doctoral Students per credit hour) | $1,850.00 |
| Research in Residence (720 or 750) or Continuous Registration-Master’s Study (725), per fall/spring semester | $1,850.00 |
| Research in Residence (720 or 750) or Continuous Registration-Master’s Study (725), per summer session (0 Research Credit Courses) | $1,850.00 |
| Audit Work (No degree credit) Tuition, per course, non-refundable. | $1,850.00 |

Certain programs are conducted by the University under contract with the State of Florida. Florida residents who have been accepted as students in those contract programs are required to pay current state tuition for each credit hour taken and the state provides the University with additional funds in accordance with the terms of the contracts. Students involved in state contract programs should contact the appropriate school/college to ascertain the state tuition charge per credit hour that they are expected to pay.

Fees

Some fees depend upon full-time status. This is usually determined by the sum total of semester credit hours carried by the student in all divisions or enrollment in certain special programs that are classified as full-time regardless of credit hour load. Intersession classes are included with regular fall and spring semester classes in determining the student’s full- or part-time status. This determination will also result in the billing of required fees. Fees are subject to change.

Undergraduate students are classified full-time if they enroll in 12 or more credit hours in a regular semester or 12 or more credit hours in a summer session or if they are enrolled in a special program which is classified full-time regardless of credit hour load.

Graduate students are classified full-time if they enroll in nine (9) or more credit hours in a regular semester or six (6) or more credit hours in a summer session, or if they are enrolled in dissertation credit hours that are classified as full-time.

### Mandatory Fees

Graduate Business Program Mandatory Fees

For all Graduate Business Programs, there is a one-time non-refundable $2,000.00 mandatory Enrollment Fee for Applicants with intent to enroll in all Masters of Business Administration (MBA) and Specialized Master Degree Programs.

In addition to tuition, all Executive and Professional MBA programs have a mandatory Program Administration Fee charged each semester. The tuition typically increases each academic year. Any increase in the University of Miami per credit tuition rate will be compensated by a corresponding reduction in the program administration fee. The total cost of the program (Tuition and Program Administration Fee) therefore will not vary.

Program Administration Fee

- Professional MBA beginning in Fall 2015: $3,200.00
- Professional MBA beginning in Spring 2015: $3,200.00
- The Miami Executive MBA for the Americas: $7,916.00
- Global Executive MBA (in Spanish): $2,312.00
- Executive Health Sector Management and Management: $1,050.00
- Executive MBA for Artists and Athletes: $9,600.00

Late Registration Fee (Permission to register required)

Reinstatement Fee charged if classes are canceled AFTER Semester begins: $100.00

Proficiency or Competency Examination Fee

College of Engineering, Division of Continuing and International Education:

- Examination Fee, per examination: $25.00
- Recording Fee for Competency Examinations, per examination: $25.00
- English Language Proficiency Test: $50.00

Alumni Rate and Policy

Special Opportunity for UM Graduates

UM graduates may take undergraduate credit hour courses in the College of Arts and Sciences on a space available basis, at a special alumni rate. All University of Miami graduates are eligible for this special program.

Students may take whatever courses are of interest. From Anthropology to Theatre Arts and all the disciplines in between, participants may choose a course or collection of courses (maximum two courses per discipline) to meet professional or personal goals.

Interested students may call the Division of Continuing and International Education at 305-284-4000 to inquire about the benefit and/or the current tuition rate, request an application, or enroll in the courses. They will submit a simple, no-fee, one-page application, simply select an undergraduate course (open on a space available basis) and be on their way to continued learning at UM.

Policies Governing Enrollment in University of Miami Alumni Status

The University of Miami Alumni Status includes students who are not seeking a degree and meet the following requirements. Enrollment in a non-degree program and/or satisfactory completion of courses does not imply admission to a degree program.

1. University of Miami graduates (completed degree);
2. U.S. citizens or permanent U.S. residents.

Conditions applying to University of Miami Alumni enrollment

1. Students may enroll in a maximum of 12 undergraduate credit hours per semester.
2. Students are limited to two courses per academic department.
3. Courses may be selected from the College of Arts and Sciences only.
4. International students will not be issued I-20 forms.
5. International students in B-1 (business) or B-2 (pleasure) visa status may engage in study as long as the educational activity is secondary to the principal activity for which the visa was sought.
6. Enrollment may be completed on a space-available basis only. (Course availability determined two days prior to semester start.)
7. Courses taken for undergraduate credit hour (including 500 level courses) will not be considered for graduate credit hour at a later date.

Note: Not all courses and/or departments may be available.

*Parking subject to change

Parking on the University of Miami's Coral Gables campus is a privilege extended to those using the facilities of the University consistent with the terms of the University's Motor Vehicle Parking Code and other policies of the University as they are set or amended by the Provost. Parking privileges are extended only to those eligible members of the university community including trustees, faculty, administrators, staff, students, vendors and visitors who have paid for, received and properly displayed a current and valid UM parking permit. In consideration of being allowed to use the University’s facilities for parking, the purchaser of a parking permit agrees to be bound by the rules set forth in the Motor Vehicle Parking Code, and agrees to pay to the University any fine or administrative charge assessed for non-compliance with this code.

Students, faculty, employees, and staff may not park in visitor parking spaces, and UM parking permits are not valid at parking meters.

First year resident students (students residing on the Coral Gables campus who are attending college on a full time basis for the first time) are restricted from purchasing a parking permit to park on the University of Miami’s Coral Gables campus. This policy applies to first year students living in University of Miami student housing on the Coral Gables campus.

For more information on Parking, please visit our Website, www.miami.edu/parking (http://www.miami.edu/parking). Annual permits are valid August 16, 2015 through August 15, 2016.

Student Services
Academic Resource Center

Located on the second floor of the University Center, the Camner Academic Resource Center (ARC) offers free academic assistance to all UM students. The ARC offers individual peer tutoring by appointment in most subjects, study skills instruction with a Learning Specialist, free academic workshops, and many other valuable services. Please visit www.umarc.miami.edu (http://www.umarc.miami.edu) or call 305-284-2800 to learn more and/or schedule an appointment.

Peer Tutoring

At the ARC, all UM students can take advantage of free individual peer tutoring to develop a deeper understanding of course work through additional, special, or corrective content instruction. All tutoring is course specific and taught by nationally certified peer tutors. All UM students are eligible for two hours of tutoring per week for each course. Please email tutoring.arc@miami.edu for more information or to ask any questions.

Supplemental Instruction

Small group sessions are available to help students succeed in the University’s toughest courses. Group Peer Tutoring is done on a weekly basis where students sit down to discuss course content in a small group setting with the peer tutor serving as a facilitator.

Academic Workshops

This free workshop series instructs students on specific academic skills and strategies to enhance academic performance. Workshop topics include effective test-taking strategies, improving study strategies, utilizing technology, and organization and time management skills. Topics are updated every semester, and students may attend unlimited sessions. Please visit our website www.umarc.miami.edu (http://www.umarc.miami.edu) for the current workshop schedule.

Learning Specialists

The Camner Academic Resource Center provides the support of trained Learning Specialists to students experiencing difficulty with academic issues. Students may request a one-on-one meeting with a Learning Specialist to help develop the skills needed to achieve success in their academic careers. Skills covered during these appointments include time management, effective note-taking, college textbook reading, educational technologies, test taking, and other learning strategies. Students can request an appointment with a Learning Specialist through our website or by filling out a request form at the Camner Academic Resource Center. Visit the website at www.umarc.miami.edu (http://www.umarc.miami.edu) for more information about the support services available to students.

Independent Learning Initiative

The Independent Learning Initiative is a fee-based academic support program that provides structure, support, instruction, and monitoring for students needing additional guidance during the college experience. During the semester, students will identify and understand their academic strengths and areas for growth, as well as learn strategies, skills, and technologies to enhance their academic and personal success in college. Participants learn to monitor their academic progress and critically evaluate their current skills and strategies to work towards becoming a successful independent student. For more information about the program or to apply, please visit our website at www.umarc.miami.edu (http://www.umarc.miami.edu).

UMX 100: The University of Miami Experience

The University of Miami Experience (UMX 100) is a graded, comprehensive virtual self-paced course specifically designed to assist first year students in making a successful transition to the University of Miami. Freshman and transfer students are automatically enrolled. UMX 100 provides an opportunity for students to utilize UM resources necessary for success in college and beyond. Specifically, students will be exposed to campus leadership opportunities, academic and career planning, university traditions, study abroad opportunities, personal wellness programs, as well as advising and registration through videos, power points, blogs, and more. These resources and opportunities are only a click away. Questions about UMX 100 can be directed to umx@miami.edu.

The course will open on the following dates each semester:

<table>

Disability Services

Office of Disability Services (ODS)

The Office of Disability Services (ODS) is the primary university office responsible for the coordination of auxiliary aids and services for students with disabilities. Please visit our website www.umarc.miami.edu (http://www.umarc.miami.edu) for more information.

The Office of Disability Services (ODS) provides academic accommodations and support to ensure that students with disabilities are able to access and participate in the opportunities available at the University of Miami. Individuals with disabilities must request academic accommodations through the Office of Disabilities Services. Accommodations are determined on a collaborative and case-by-case basis and are based on the documentation provided by the individual. ODS staff will work collaboratively with students to determine what academic adjustments and educational auxiliary aids are reasonable to ensure that students with disabilities are not subject to discrimination.

Information is available to prospective and enrolled students, their parents and/or sponsors. The Office of Disability Services (ODS) is located in the Camner Academic Resource Center in Whitten University Center N2400. ODS staff can be reached at 305-284-2374 (Voice) or 305-284-1999 (Fax). Office hours are 8:30 am to 5:00 pm, Monday through Friday. Individuals may email the office staff at disabilityservices@miami.edu for quick responses to questions.

The following deadline dates apply for all requests for academic accommodations through the Office of Disabilities Services:

<table>

</table>

Cane Cards

The Cane Card is an on-campus student identification card. Students, faculty, and staff must present a government-issued photo ID such
as a driver’s license or passport when acquiring their card. The Cane Card provides access to on-campus student residences, the Otto G. Richter Library, computer laboratories, the swimming pool, the Patti and Allan Herbert Wellness Center (for those who purchase a membership), and other facilities where access has been granted. The Cane Card is also used to control lending privileges at the library, access to athletic and other events (fee required), the purchase of discounted Metrorail tickets, U-Print services, and meal plan privileges. All University of Miami students, faculty and staff are required to carry their Cane Cards for identification purposes while on campus.

• Lost or stolen Cane Cards should be reported to the Cane Card office at 305-284-3096 during the week or anytime by accessing your MyUM account, under the financial tab.
• Lost or stolen cards may also be reported to security 24 hours per day at 305-284-6666.
• After being reported stolen or lost, a card will be deactivated to prevent unauthorized use.
• Lost or stolen cards will be replaced for a $25 fee (Fee waived in certain circumstances. Please contact the Cane Card office for additional details).
• Damaged cards will be replaced for free upon exchange of the original damaged card.
• For all issues with Cane Express accounts, call Student Account Services at 305-284-6430.

Commuter Student Involvement

The Department of Orientation and Commuter Student Involvement is located on the second floor of the Shalala Student Center, suite 203. This department offers a variety of services and programs for students from Miami-Dade and Broward Counties who live at home and commute to the University of Miami. For more information, please visit our website at miami.edu/csi (http://www.miami.edu/csi).

Great Start Pre-Orientation Program for First-Year Commuter Students

Great Start is an overnight, pre-orientation program designed to promote and emphasize college adjustment and campus involvement opportunities. The program’s goal is to help students feel like a part of the University and give them a chance to meet other commuter students. Students who participated in Great Start have said the program greatly contributed to a positive transition from high school to college.

Commuter student leaders serve as Program Coordinators, Steering Committee members, and Counselors. Applications are available in the fall on the Great Start website, miami.edu/greatstart (http://www.miami.edu/greatstart).

Commuter Assistant/Transfer Assistant Program

The Commuter Assistant (CA)/Transfer Assistant (TA) Program provides first-year commuter and incoming transfer students with an experience that mirrors the programs and services offered by Resident Assistants and Academic Fellows to first-year students living on-campus in a Residential College. All first-year commuter students and interested new transfer students will be assigned to a CA or TA group and will begin meeting with this group during New Student Orientation. The CA/TA serves as a mentor, plans programs that will aid commuter or transfer students in their transition to college, and works with the Department of Orientation and Commuter Student Involvement to plan, promote, and implement initiatives specifically focused on first-year commuter or incoming transfer students. CAs and TAs release informative newsletters to their student groups and also host a monthly breakfast called “Good Morning, Commuters!” for off-campus students. CAs and TAs are hired during the spring semester. Applications are available on the departmental website, miami.edu/csi (http://www.miami.edu/csi).

Association of Commuter Students

The Association of Commuter Students (ACS) is a second home for its members. ACS, a student organization, provides social support, service opportunities, school spirit involvement, and a physical space through which commuters bond with fellow students and to participate in all that the University has to offer. ACS provides its members with a working knowledge of UM that gives them the opportunity to become fully involved in campus life. Brought together by a simple fact of life, commuting to campus, ACS members have forged bonds that extend beyond this commonality. For more information on ACS, visit their website at miami.edu/studorgs/acs (http://www.miami.edu/counseling-center/association_of_commuter_students).

Off-Campus Housing Assistance

The Department of Housing and Residential Life provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

• Individual consultations & appointments
• Over-the-phone guidance
• Knowledge of the greater Miami area & specific neighborhoods where students typically reside
• Roommate search assistance

For more information about assistance with off-campus housing, visit miami.edu/off-campus-services (http://www.miami.edu/housing), or contact the office at 305-284-4505 or email housing@miami.edu.

Counseling Center

https://miami.edu/counseling-center

The Counseling Center is the primary provider of mental health services for UM students. The Counseling Center provides short-term individual, couples, and group therapy as well as psycho-educational outreach programming and consultation. Urgent care and limited career and psychological assessment are also available. Psychiatric services are available to those under the care of a Counseling Center therapist.

The Counseling Center staff consists of experienced professionals from the fields of mental health counseling, psychology, social work and psychiatry.

During the fall and spring semesters, the Counseling Center is open Monday, Wednesday and Friday from 8:30 a.m. to 5 p.m. and Tuesdays and Thursdays from 8:30 a.m. to 7 p.m. During the Spring, Summer and
Winter breaks the Counseling Center is open Monday through Friday from 8:30 a.m. to 5 p.m.

Students can call the Counseling Center directly at 305-284-5511 or request an appointment in person. The Counseling Center offers walk-in triage service for students in crisis. The University Counseling Center is located at 1204 Dickinson Drive, Suites N & S.

For more information, visit https://miami.edu/counseling-center.

**Sexual Assault Response Team (S.A.R.T.)**

The Counseling Center also coordinates the Sexual Assault Response Team (S.A.R.T.). S.A.R.T. is a 24/7 telephone response line to assist University of Miami students victims of sexual assault. This service is available during the academic year and is for both men and women. The S.A.R.T. hotline number is 305-798-6666.

For more information, visit https://miami.edu/SART.

**Graduate Student Training**

The Counseling Center participates in the graduate training programs in the Department of Psychology and the programs of the Department of Educational and Psychological Studies. Doctoral students in psychology take part in the Center’s professional activities and have first-hand contact with clinical problems. In addition, pre-doctoral interns obtain professional training at the Counseling Center through the Dr. Jess Spier Pre-doctoral Internship in Professional Psychology. The pre-doctoral internship at the Counseling Center is accredited by the American Psychological Association.

**Dean of Students**

www.doso.miami.edu (http://www.doso.miami.edu)

The Dean of Students Office provides leadership that is consistent with the University’s mission and works closely with students and student organizations, contributing to their co-curricular education and serving as an advocate for their varied interests. The Office works directly with academic, athletic, student affairs, and other administrators in the coordination of institutional efforts to address specific concerns, as well as to enhance the overall quality of the student experience.

Each area within the Dean of Students Office provides students with opportunities for student support, involvement, and leadership. For more information about each of these areas, click on the links below.

- Alcohol and Other Drug Education (http://www.miami.edu/sa/index.php/pier21)
- Greek Life (http://www.miami.edu/sa/index.php/dean_of_students/FraternitiesAndSororities-1-1)
- Sexual Assault Resources - It’s On Us (http://www.miami.edu/sa/index.php/its_on_us)
- Undergraduate Honor Council (http://www.miami.edu/sa/index.php/dean_of_students/undergraduate_honor_council)
- University Chaplains’ Association (http://www.miami.edu/sa/index.php/spiritual_life)
- Veteran Student Services (http://www.miami.edu/sa/index.php/dean_of_students/veteran_student_services)

The Dean of Students Office coordinates efforts in response to various student crises and employs an Assistant Dean who is a Licensed Clinical Social Worker. The entire staff is knowledgeable and prepared to assist all students in their adjustments to campus life. The administration and record keeping of all undergraduate student disciplinary infractions are also the responsibility of the Dean of Students Office.

To contact the Dean of Students Office visit Whitten University Center, Suite 2250 or call 305-284-5353.

**Career Services**

http://www.HireACane.com

**Patricia and Harold Toppel Career Center**

(305) 284-5451 | toppel@miami.edu

The Toppel Career Center provides innovative and dynamic career services to students and alumni of the University of Miami. Furnished with the latest technology, including videoconferencing, 360-degree video recording, and lecture capture, the Center’s six interview suites, a technology lab, a conference room, and a multipurpose Loft offer a variety of spaces (http://www.HireACane.com/Students/ToppelReservations.aspx) for students to meet their career-related needs. The Center is often described as “like no other” by visitors and is a model for career services throughout the country. Over six times larger than the average career center, the 12,000 square-foot building on Ponce De Leon Boulevard houses career programs and workshops, networks, professional individualized advising, practice interviews, industry panels, walk-in peer advising, company presentations, on-campus interviews, and more.

**Career Education**

Regardless of the path you take, an effective career planning process begins as soon as you step on campus. Professional staff at the Center assist students with their career development utilizing a three-part model (http://www.HireACane.com/Students/GettingStarted/Explore,Prepare,Connect?CareerEducationPlan.aspx) that provides the tools necessary to Explore (strengths, interests, values, skills, and abilities), Prepare (career and industry research, practice interviews, and internships), and Connect (building meaningful relationships and growing a professional network).

**Advising Services**

Toppel offers a variety of options for career advising. You can set up an individual advising appointment with highly trained and motivated career advisors who have industry-specific knowledge and can provide you guidance on potential career paths (schedule online at HireACane.com (http://www.HireACane.com)). For resume (http://www.HireACane.com/Students/ResumesandLetters/ResumeAssistance.aspx) and cover letter (http://www.HireACane.com/Students/ResumesandLetters/CoverLettersandNetworkingLetters.aspx) reviews and practice interviews (http://www.HireACane.com/Students/InterviewPreparation.aspx), you can drop by any time from Monday through Friday, 9am - 4:30pm, to meet with a peer advisor (no appointment necessary). The Center even
offers online career assessments (http://www.HireACane.com/Students/GettingStarted/CareerAssessments.aspx) that can help you narrow down career options by building self-awareness.

Programs and Workshops
A series of programs and workshops (http://www.HireACane.com/Students/Programs.aspx) is offered throughout the academic year both in person and virtually. Each session provides information and skill-building activities in the areas of resume development, interviewing skills, social media for the job search, securing internships, and much more. In addition, programs designed to increase awareness of specific career paths and professional opportunities are offered. These are often conducted by outside speakers and panelists who are UM alumni and/or recognized specialists in their field.

Career Preparation & Networking
Through the Center’s vision, Empowering and Connecting a World of 'Canes, the staff encourages students to develop meaningful relationships with professionals in their area(s) of interest. The Toppel Career Center provides many opportunities for you to network with employers and alumni, including panel programs, employer meet-ups, job shadowing (UShadow (http://www.HireACane.com/Students/UShadow.aspx)), on-campus recruiting, and career fairs.

Career Fairs and On-Campus Recruiting
Career Expo (http://www.HireACane.com/Students/CareerFairsandEvents/CareerExpo.aspx) is the largest career fair, typically bringing in over 100 employers and 1,000 students and alumni biannually in September and February. Toppel also organizes smaller industry-specific career fairs that focus on more specialized areas. Representatives from a variety of industries from around the world visit campus to meet, interview and discuss career opportunities with students. In addition, the On-Campus Recruiting (http://www.HireACane.com/Students/JobSearching/OnCampusRecruiting.aspx) program brings employers to campus for company information sessions and to interview students for jobs and internships in the interview suites. Last year, over 1,000 interviews were conducted in the Center’s interview suites. You can apply for these positions through Toppel’s free online career management system at HireACane (http://www.HireACane.com).

Toppel Internship Program
The Toppel Internship Program (TIP) (http://www.sa.miami.edu/toppel/mainsite/Students/Internships/ToppelInternshipProgram.aspx) is designed to provide valuable career-related work experience through internships with participating employers. TIP allows students to earn a one-credit transcript notation from the Toppel Career Center for internships they have already secured. Students can also search HireACane (http://www.HireACane.com) for hundreds of opportunities available to them. Part-time internships require at least 160 working hours while full-time internships require at least 320 working hours.

UCAN
If you are interested in jobs and internships outside of South Florida, the Center is a member of the University Career Action Network (UCAN) (http://ucan-csm.symplicity.com/students), a highly selective consortium of private institutions across the country. Participating schools, including Brown, Duke, Emory, Princeton, Harvard, and others, share internship opportunities across the network. You will be strongly encouraged to complete at least one internship while here, and these partnerships will help you meet this goal.

The Launch Pad at Toppel
The Launch Pad at Toppel (http://www.thelaunchpad.org) provides support to all entrepreneurs and inventors at the University of Miami. The Launch Pad’s programs are co-curricular and voluntary by design. Pragmatic, concrete, and experiential, they provide the just-in-time knowledge entrepreneurs need to assess and develop their ideas and plans for a new enterprise. The Launch Pad offers guidance, encouragement, and immediate access to a dedicated local commercial network. It brings entrepreneurs into the local business community as early as possible. The Launch Pad’s programs are exercises in experiential capitalism that fulfill a key educational obligation: to teach learners not just how to find a job, but also how to make a job.

Connecting with the Toppel Career Center
The Toppel Career Center’s mission is to help all students achieve a lifetime of career success. Currently, over 2/3 of all undergraduate students utilize the Center’s services each year, including over 1,500 unique visits to career fairs and nearly 4,000 unique visits to career education opportunities. Evidence shows that students who visit the Career Center are more likely to earn internships and ultimately have better career outcomes at the time of graduation. Visit us at 5225 Ponce De Leon Blvd. or by logging into HireACane (http://www.hireacane.com) and activating your account as soon as you arrive on campus! You can also keep up with what we’re doing by following any one of our social media platforms: LinkedIn (http://www.linkedin.com/groups?gdid=1295647&trk=hb_side_g), Facebook (http://www.facebook.com/pages/Toppel-Career-Center-at-the-University-of-Miami/70221785028?ref=ts), Twitter (http://www.twitter.com/toppel), Instagram (http://instagram.com/hireacane), YouTube (http://www.youtube.com/toppelcareercenter), Flickr (http://www.flickr.com/photos/hireacane), Blogger (http://toppelpeers.blogspot.com), Pinterest (http://pinterest.com/umtoppel), and Snapchat (username: HireACane).

Honor Council

The Honor Council - Undergraduate
www.miami.edu/honor-council

The purpose of the Honor Council is to protect the academic integrity of the University by encouraging consistent ethical behavior by students in their academic work. The Honor Council investigates and adjudicates alleged violations of the Undergraduate Student Honor Code (https://umshare.miami.edu/web/wda/deansstudents/pdf/undergrad_honorcode.pdf). The Council is also responsible for educating the University community on Honor Code related issues and promoting academic integrity through a variety of educational programs. The Council consists of representatives from the undergraduate schools and colleges.

Members of the University community who would like to request Honor Council programming or an investigation of alleged academic dishonesty are encouraged to call the Honor Council at 305-284-5354 or email honorcouncil@miami.edu.
International Student and Scholar Services

www.miami.edu/isss

International Student and Scholar Services (ISSS)

1306 Stanford Drive
Whitten University Center, Suite 2275
Coral Gables, FL 33146-6929
Telephone: 305-284-2928
Fax: 305-284-3409
Email: isss@miami.edu
Website: www.miami.edu/isss (http://www.miami.edu/isss)

ISSS represents the needs and interests of the University of Miami international community and provides support services and programs for international students, scholars, and academic departments at UM. Every year, approximately 3,748 international students (undergraduate and graduate) and scholars (professors and researchers) from 120 countries representing every region of the world study, teach, and conduct research at the University of Miami.

International students and scholars face some unique challenges as well as opportunities while pursuing their academic goals at UM. The professional and dedicated ISSS staff provides expert advice, services, programs, and information aimed at supporting their educational endeavors and enriching their U.S. experience over the entire course of their stay. ISSS support services and programs encompass:

- Pre-Arrival Information
- Immigration Advising for Students and Scholars in F-1 and J-1 Status
- Employment Information and Authorization
- Online Tax Return Preparation System
- Liaison with Sponsoring Embassies, Government and Agencies
- Short-Term, Small Emergency Loans
- Assistance with Personal and Adjustment Problems
- Assistance in Coping with Crises
- Advocacy
- International Student Orientation
- International Scholar Orientation
- Advise the Council of International Students and Organizations (COISO)

On the ISSS website you will find detailed information regarding each of these services and programs. Please do not hesitate to contact us should you have any questions or require additional information. We look forward to assisting you.

Libraries

The libraries of the University of Miami (http://welcome.miami.edu/academics/libraries) rank among the top research libraries in North America with a combined collection of over 3.6 million volumes, with 95,600 current electronic and print serials. The libraries are located on the Coral Gables, Rosenstiel, and Medical campuses.

Individual and Collaborative Study Space

Expert Assistance for Every Subject
Librarians (http://sp.library.miami.edu/subjects/staff.php?letter=Librarians%20by%20Subject%20Specialty) are available to support students in all courses and majors. Consider us part of your network.

Online Research Guides for Courses and Majors
Online research guides (http://libguides.miami.edu/content.php?pid=384666) can help you find the resources you need for course assignments, research projects and more.

Jobs
We offer a variety of opportunities for student employment. Check out our openings today (http://library.miami.edu/student-jobs).

Ombudsperson and University Troubleshooters

www.miami.edu/ombudsperson (http://www.miami.edu/ombudsperson)

The Ombudsperson and University Troubleshooters provide open channels of communication between students and the university by listening to student concerns, investigating the facts and attempting to resolve situations in the best possible way. Ultimately, the goal is to resolve matters and assist students in their success at the University. The Ombudsperson and University Troubleshooters do not bypass or circumvent those individuals who have responsibility for departments or classroom instruction. Nor will they eliminate certain structured grievance and appellate mechanisms already established by the University.

Ombudsperson

The Ombudsperson is in a position to interpret University policy to students and make recommendations to the central administration when policy changes are needed as they have extensive knowledge of the University. The Ombudsperson assists in the decision-making process within the University and ensures that the University follows its own published policies and procedures. The Ombudsperson will connect students to faculty and administrators who will listen, answer questions, interpret policies/procedures and provide guidance on the appropriate steps to consider for a resolution. The Ombudsperson seeks to resolve matters informally before they become matters in a formal grievance–appeal proceeding and works with students in establishing next steps to assist in their success at the University.

University Troubleshooters

University Troubleshooters are faculty members and administrators who serve as a resource for students seeking assistance. They represent in a wide range of campus departments, who assist students with academic and administrative related matters. If a student has spoken to the appropriate University Troubleshooter and have not brought resolution to a student’s concern, students should contact the

Residence Life

Housing and Residential Life

www.miami.edu/housing (http://www.miami.edu/housing)

The University of Miami offers undergraduate on-campus housing in five residential colleges and University Village.

Each residential college has resident faculty members (Masters and Associate Masters), an Area Director/Assistant Area Director, and student staff who all live in the residential college with the resident students to support and promote student well-being, safety, academic achievement, student learning, and development. Numerous social, educational, cultural, and recreational programs are offered throughout the academic year.

Special Interest Housing (http://www6.miami.edu/provost/oae/sih.html) (SIH) is also available within the residential college system—these resident communities are facilitated through the Office of Academic Enhancement. Themes center around literature, community service, ethnic cuisine, healthier lifestyles, and diverse educational experiences as well as academic and career interests.

General Highlights

- The University has both single and double rooms. Singles are limited and assigned based on seniority living on campus and, thus, entering students are typically assigned to double occupancy rooms.
- All non-local freshmen students are required to live in University housing for two academic semesters, as long as space is available. This policy does not apply to freshmen students living with parents or legal guardians in Miami-Dade or Broward Counties.
- University Village (http://www.miami.edu/sa/index.php/residential_life/on_campus/university_village), an apartment-style residential community, is an available option to juniors and seniors. The apartments are fully furnished and include in-apartment washers and dryers, full-size kitchen appliances (stove, refrigerator, microwave, & dishwasher), and reserved parking.
- All housing facilities are co-educational with men and women living on alternate floors or alternating separate suites or apartments.

Applying for On-Campus Housing

- Admitted undergraduate students, following verification of acceptance to the University and payment of the enrollment deposit, can apply for housing via CaneLink (http://www.canelink.miami.edu).
- Students are encouraged to apply for housing as soon as possible after paying the enrollment deposit. New freshmen housing applications should be submitted by May 1, 2015; applications received from new freshmen after May 1, 2015 will be accommodated on a space available basis.
- The $250 non-refundable pre-payment can be paid by credit card or electronic debit from a checking account at the time of application.
- Assignments to buildings, rooms, and specific roommates are made according to the date of application and receipt of the housing deposit.
- Whenever possible, requests for roommates are honored. However, if specific preferences are not available, the University reserves the right to assign students to other roommates.

The 2015-2016 housing agreement is for both fall and spring semesters, unless the applicant is:

1. applying only for spring semester housing (not available in University Village)
2. applying only for summer session housing
3. graduating in December
4. participating in a University of Miami study abroad experience spring semester
5. not enrolling in the University spring semester

Housing cancellations received through May 31, 2015 will result in a $500 cancellation penalty. Cancellations received after May 31, 2015 will result in:

- the canceling student being responsible for the fall semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the $500 cancellation penalty

Housing cancellations for the spring semester received through December 1, 2015 will result in a $500 cancellation penalty.

Cancellations for the spring semester received after December 1, 2015 will result in:

- the canceling student being responsible for the spring semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the $500 cancellation penalty

Note: Written notice of cancellations must be made to the Department of Housing and Residential Life office directly.

Off-Campus Housing Resources

The Department of Housing and Residential Life also provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

- Individual consultations and appointments
Centers less urgent conditions, you may visit one of the local Urgent Care by calling 800-436-7709 and selecting the Health Resources option. For insurance may also contact the United Healthcare Nurseline by dialing 305-284-9100. Students with United Healthcare should go to an Emergency Room. After hours assistance for urgent situations can be obtained by dialing 305-284-9100. Students are urged to go to the Student Health Service is closed on Saturdays and University holidays. After hours assistance is available by calling 305-284-9100.

Hours of Operation

Fall and Spring semesters: 8:30 a.m. to 5:00 p.m., Mondays, Tuesdays, Wednesdays and Fridays. On Thursdays: 9:00 a.m. to 5:00 p.m. Sundays: 11:00 a.m. until 4:00 p.m.

Winter break, Spring break, and Summer sessions: Monday through Friday from 9:00 a.m. to 5:00 p.m.

The Health Service is located on Saturdays and University holidays. After hours assistance is available by calling 305-284-9100.

For sudden, severe illness or serious accident dial 911. For illnesses or injuries requiring immediate attention, students are urged to go to an Emergency Room. After hours assistance for urgent situations can be obtained by dialing 305-284-9100. Students with United Healthcare insurance may also contact the United Healthcare Nurseline by calling 800-436-7709 and selecting the Health Resources option. For less urgent conditions, you may visit one of the local Urgent Care Centers (https://umshare.miami.edu/web/wda/studenthealth/pdf/UrgentCareCenters.pdf).

Eligibility/Access

The Health & Counseling Centers Fee, is mandatory for (undergraduate (p. 39), graduate (p. 39), and law (p. 39)) students regardless of credit hour load and all students registered in an off-campus program who are enrolled in the University sponsored student insurance plan (http://www.miami.edu/sa/index.php/student_health_center/insurance_information). Employees may be charged the Health and Counseling Centers fee on their initial bill, however the charge will be removed from their bill soon after the last day to drop or add a class, if they remain eligible for tuition remission benefits. Dependent UM students are treated the same as all other students.

Health Insurance

Domestic students enrolled in six or more credit hours per semester (or considered full time) are required to obtain adequate health insurance (see exceptions (https://umshare.miami.edu/web/wda/studenthealth/pdf/ProgramsNotCharged.pdf)). The annual premium for the health insurance plan offered through the University is added to each student’s fees. Domestic students with adequate alternative coverage may request cancellation of the insurance fee via CaneLink. Insurance cancellation must be renewed each year via CaneLink.

Deadlines to waive the insurance are:

- July 25 for the Fall semester
- January 25 for the Spring semester
- April 25 for Summer I
- June 25 for Summer II

Domestic students can check the status of their insurance waiver/cancellation request via CaneLink. The insurance premium will be prorated for those students entering for the first time in the Spring or Summer semesters. No waiver and/or refund will be granted after the above dates.

Students who have previously waived the insurance charge can reinstate the insurance prior to the Spring semester or first Summer session by completing the reinstatement request form and checklist. Coverage can also be reinitiated at the start of the Fall semester by choosing not to re-waive the charge, or at other times during the academic year, if within 30 days of termination of other similar coverage, by completing the reinstatement request form and checklist (https://umshare.miami.edu/web/wda/studenthealth/Forms-1/studentreinstatement.pdf). Documentation of termination may be requested.

Deadline for reinstatement of insurance is January 25th for the Spring. Please do not consider your reinstatement complete until reinstatement has been verified via CaneLink, the charge has been posted to your student account and all charges on your account have been paid.

All international students are required to enroll in the University sponsored health insurance program. The annual premium for this coverage is added to each student’s fees.

Any additional questions regarding the health insurance requirement should be directed to the Student Health Service at 305-284-9100 or to studenthealth@miami.edu.

Immunization

All students are required to provide proof of immunization against measles, mumps and rubella; and tetanus, diphtheria and pertussis.
All new students must also provide proof of immunization against hepatitis B (https://www.miami.edu/sa/index.php/student_health_center/immunization_information/#Hepatitis) and meningococcal meningitis (http://www.miami.edu/sa/index.php/student_health_center/immunization_information/#Hepatitis) or sign a waiver declining these immunizations. An immunization (https://umshare.miami.edu/web/wda/studenthealth/pdf/immunization_form_07new.pdf) form must be completed and returned to the Student Health Service prior to arrival on campus. For students less than 18 years old, the meningitis/hepatitis vaccine waivers must be signed by a parent or legal guardian.

All international students must also be screened for tuberculosis by completing page two of the immunization form (https://umshare.miami.edu/web/wda/studenthealth/pdf/immunization_form_07new.pdf).

Deadlines for submission of immunization records are Fall - August 22nd, Spring - January 15th, Summer - April 15th. Failure to comply with this requirement will interfere with registration. A $50.00 processing fee will be charged for any form received after the start of the semester. Immunization information must be entered at mystudenthealth.miami.edu (https://mystudenthealth.miami.edu) prior to faxing or mailing the form to the Student Health Service for verification. Immunization compliance can also be verified at mystudenthealth.miami.edu (https://mystudenthealth.miami.edu). Instructions on the use of mystudenthealth.miami.edu (https://mystudenthealth.miami.edu) is available at miami.edu/student-health (http://www.miami.edu/student-health).

Most students will be able to obtain the required immunization information from their prior medical providers or from their prior high school, college or university. Students who believe that they were previously immunized but are unable to provide proof of immunization may either obtain blood tests confirming immunity or obtain the necessary immunizations. Immunizations and blood tests documenting immunity are available at the Student Health Service. All charges are in addition to processing fees for late forms.

Immunization against varicella (chicken pox) is suggested and is available at the Student Health Service for a reasonable charge.

Pharmacy

The pharmacy (http://www.miami.edu/sa/index.php/student_health_center/pharmacy) is located on the second floor of the Student Health Service, and can fill prescriptions from most local and out of town medical providers.

Prescription prices are often lower than at local drug stores, and most insurance plans are accepted. Non-prescription medications, vitamins, nutritional supplements, personal care products, over-the-counter medications, and condoms are also available. New prescriptions can be dropped off, called or faxed by the ordering provider. Refill requests will be handled most promptly by having your prescription number available and calling the automated refill line at 305-284-5922. Refills can also be requested by calling 305-284-5922 option 2.

• Students with the Health Service sponsored insurance plan receive enhanced benefits if prescriptions are filled at the Health Service pharmacy.

Contact information for Pharmacy

Telephone: 305-284-5922
Fax: 305-284-4883

Hours of Operation for Pharmacy

Fall and Spring semesters are from 9:00 a.m. to 5:30 p.m., Monday through Friday. Winter break, Spring break, and Summer sessions, 9:00 a.m. to 5:00 p.m. Monday through Friday.

The pharmacy is closed on Saturdays, Sundays, and on University holidays.

University Dining Services

The University of Miami Dining Services program offers students a variety of food options conveniently located throughout the campus. Among these are:

• Hurricane Food Court - featuring varied concepts including several well-known national brands
• Courtside Eatery at the Wellness Center - featuring a variety of healthy food options
• Jenkins Snack Bar – the perfect spot to grab a quick bite at the School of Business
• The Corner Deli at Outtakes – specializing in sandwiches, salads, & soups made with kosher ingredients
• Outtakes – a full service convenience store
• Starbucks at Richter Library & Student Center – your favorite specialty coffee
• Carts – for your convenience around campus [Communication, Memorial, and Merrick]
• Village Marketplace – providing UV residents your convenience store needs
• Einstein Bros. Bagels – enjoy a delicious bagel at the Law School
• Sebastian’s Café – offers specialty sandwiches and salads at UM’s Newman Alumni Center
• GOT Spot featuring Rose’s Café – our newest addition located at the University’s Gables One Tower
• Lime Fresh Mexican Grill – Mexican fare at the University Center
• M2O – made to order deli sandwiches, Panini’s, salads, and soups at the Student Center
• Jamba Juice – smoothies at the Student Center

The University of Miami Dining Services program offers a variety of services that meet the individual student’s schedule of classes and extracurricular activities. Four different meal plan options are offered at the Hecht/Stanford and Mahoney/Pearson Dining locations for students residing in the residential dorms on campus:

• Unlimited meal plan provides unlimited access into the dining hall
• 19 meal plan provides 19 meals per week
• 14 meal plan provides 14 meals per week
• 8 meal plan provides 8 meals per week
• 100 Block meal plan provides 100 meals to be consumed throughout the fall and spring semesters
• 75 Block meal plan provides 75 meals to be consumed throughout the fall and spring semesters
• 50 Block meal plan provides 50 meals to be consumed throughout the fall and spring semesters
• Enrollment in any of the residential colleges (excluding University Village) requires participation in the 8, 14, 19, or the Unlimited meal plan
• Freshmen must choose from the Unlimited, 19, or 14 Meal Plans only
• Block meal plans are open to Commuter and University Village students only
• Graduate and undergraduate students who are 25 or older as of September 1 of the meal plan contract year are excluded from this requirement
• Commuter and other students not enrolled in the residential colleges may participate in any meal plan
• All meal plans are available seven days a week. Students have the opportunity to eat meals five times a day up to their weekly meal total. Unless they are on the Unlimited meal plan
• Take-out is limited to once per meal period

Dining Dollars
• Dining Dollars provided with the meal plan may be used in approved food service locations for food purchases only. Usage is limited to $20 per day
• Dining Dollars may not be used in vending machines
• Unused Dining Dollars at the end of the Fall Semester will carry into the Spring Semester
• Unused Dining Dollars at the end of the Spring Semester are forfeited
• Dining Dollars may be used at the Hurricane Food Court, Carts, The Corner Deli, Outtakes Convenience Store, Village Marketplace, Rathskeller, Subway, Jenkins Snack Bar, Starbucks, BankUnited Center, Sebastian’s Café, Courtside Eatery at the Wellness Center, Lime Fresh Mexican Grill, Jamba Juice, and M2O

Dining Services Contract
• The Dining Services contract begins with the first meal of Fall Semester and extends through the last meal of Spring Semester
• The student indicates choice of meal program on the Dining Contract or via CaneLink
• The student’s signature on the Dining Contract or election via CaneLink signifies acceptance of that board plan for the period indicated
• Students who do not enroll in any of the meal plans will be force enrolled onto the 14 meal plan. All terms and conditions will be binding upon the student
• Meals are not served when the University is not in session, during official University vacation periods, or between semesters
• The entire semester amount must be paid in full at the same time students pay other registration costs (tuition and fees) during or before the first week of classes
• All students may make changes to their meal plan within the first week of the semester by notifying the Department of Dining Services or via CaneLink
• Changes made to lower meal plans for the Spring Semester will be assessed a $40 processing fee
• Charges will be prorated up to the end of the week
• Meal plan weeks run Monday through Sunday
• Releases will be subject to a $300 cancellation fee plus full charges through the week of cancellation, and may also result in a Dining Dollars surcharge fee
• Approval is obtained solely through the Department of Dining Services
• The University reserves the right to terminate the contract by written notice if a student fails to comply with any of the terms and conditions of the contract and all other University and Dining Services rules and regulations.

For more information on Dining Services write to:
University of Miami, Dining Services
P.O. Box 248106
Coral Gables, FL 33124-6909

call Dining Services at 305-284-3584, email diningservices@miami.edu or visit http://www.miami.edu/finance/index.php/auxiliary_services/dining_services/.

Honors

Foote Fellows Honors Program
The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years. The Foote Fellows Honors Program offers unique academic freedom to the most educationally accomplished incoming students at the University of Miami.

Additionally, outstanding students may pursue departmental honors. Students who satisfactorily complete the requirements for departmental honors are graduated with Departmental Honors; the award is noted on the graduates diploma and official transcript.

Foote Fellow Honors Program
http://www.miami.edu/admission/index.php/undergraduate_admission/academics/foote_fellows_honors_program/

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the
University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Departmental Honors Programs

Among the departments offering approved programs for honors study at the junior-senior level for both majors and elective students are American studies, art and art history, biochemistry and molecular biology, biology, business administration, chemistry, computer science, engineering, English, finance, French, German, history, international finance and marketing, international studies, Judaic Studies, marine science, mathematics, meteorology, microbiology and immunology, philosophy, political science, psychology, religious studies, sociology, Spanish, and women’s and gender studies. Admission into the program is by invitation, but any student who believes himself or herself qualified may apply to the Chairman or the Departmental Honors Advisor of the major department, preferably during the sophomore or early junior year. Upon successful completion of the required program and with approval by the faculty of the department, the notation Departmental Honors in ... is included in the candidate’s diploma and transcript.

Departmental Honors are designed primarily to provide an opportunity for the student to intensify and deepen his or her knowledge of the major, to permit closer associations with professors in the student’s area of concentration, and to prepare the student for research, thesis preparation, and other work at the graduate level in the major areas.

Departmental Honors requirements vary by departments; the prospective Departmental Honors student should confer with the Honors Advisor within the department about specific requirements for graduation with Departmental Honors.

Fellows in Latin American Studies (FILAS)

This innovative, dual B.A./M.A. honors degree in Latin American Studies allows outstanding incoming freshmen the opportunity to complete a master’s degree in five years, following a rigorous, efficient, accelerated curriculum of 150 credits. This highly selective group of students will enjoy close faculty mentoring and the opportunity to engage in specialized research projects with faculty. Students will gain advanced competence in at least one major language of Latin America, intern for one semester in public or private organizations dealing with Latin America and/or the Caribbean, and take advanced seminars with UM’s major Latin American scholars and visiting scholars. In addition, students will receive first-hand experience in their regions of focus by studying abroad. Most study abroad opportunities are for one semester (six months). FILAS students may arrange their own study abroad in consultation with the academic director or they may participate in the university’s study abroad options. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Fellows in Latin American Studies (FILAS). The FILAS application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November. Admitted first-semester freshmen interested in admittance to the FILAS program should contact the Academic Director of the Latin American Studies Programs for application information before October 1st.

For further information and application forms please go to the following web address: www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors).

Honors Program in Biochemistry and Molecular Biology (HPBMB)

The Honors Program in Biochemistry & Molecular Biology (HPBMB) is offered to mature high school seniors with strong academic ability and achievement who seek careers in biological or biomedical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Philosophy Degree (PhD) in approximately six years.

To begin, students are admitted simultaneously into (i) the Honors Program and (ii) a special Privileged Studies Program in the College of Arts and Sciences. Privileged Studies provides flexibility in designing a course of study without the limitations of the conventional course distribution requirements. Furthermore, students are assured of a place in the graduate program of the Biochemistry & Molecular Biology Department after 2.5 or 3 calendar years of undergraduate work, provided that (i) a 3.5 GPA both overall and in the sciences is maintained and (ii) at least 1200 is scored on the graduate records examination (GRE). Undergraduates will conduct intensive laboratory work in the areas of biochemistry, molecular biology, and/or nutritional biochemistry starting in their very first year of the program. By spring of their junior year, students will prepare an undergraduate thesis as preparation for their entry into graduate school. At that time they will start taking graduate courses and continue to do research with a graduate faculty member.

Applicants must have a combined SAT I score of 1400 (combined Math and Critical Reading scores) or an ACT score of 32 and an unweighted GPA of 3.75. An SAT 2 score of at least 600 in Math, and one science (Biology, Chemistry or Physics) is required. Eight semesters of English and mathematics and two semesters each of biology and chemistry must be completed by the time they graduate from high school. All components of the Common Application for undergraduate admission must be completed by November 1 of the senior year. In addition, a supplemental application form for the Honors Program in Biochemistry & Molecular Biology (HPBMB) must be completed at this time, including the personal statement. Finally, letters of recommendation in support of the application must be received from (i) three teachers and (ii) a counselor.

For further information and application forms, please go to the following web address: www.miami.edu/dualdegree (http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors).

Honors Program in Exercise Physiology (HPEP)

The Kinesiology and Sport Sciences Department offers an accelerated Master degree program for students who have completed their 4-year undergraduate program in Exercise Physiology or Athletic Training. It allows students to complete their Master degree in any of the Exercise Physiology tracks (Clinical and Applied Exercise Physiology, Strength and
Conditioning, and Nutrition for Health and Human Performance) within one year of their BS degree obtained in that major.

The additional year of study will enable students to complete all requirements leading to a Master of Science degree in Exercise Physiology in the School of Education and Human Development, (M.S. Ed.), in 5 years. To be considered, applicants must be in the top 10% of their high school graduating class. Students must have an SAT score of 1000 or an ACT score of 30 and an unweighted minimum GPA of 3.0 or above. The Exercise Physiology and HPEP application forms and supporting materials must be submitted no later than August 1st of the applicant’s senior year. A review of completed applications will begin by the end of September.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (http://www.miami.edu/dualdegree).

**Honors Program in Law (HPLW)**

The University of Miami offers the Honors Program in Law (HPLW) which allows excellent students with high academic ability to gain admission to both undergraduate study and to graduate study in the law school. Such an achievement guarantees admission to the School of Law, pending students meet all program requirements - and gives qualified students the chance to complete both bachelors and Juris Doctor degrees in just six years. Applicants who wish to be considered for admission must be high school seniors in the top 5% of their class, have a minimum SAT I score of 1400 or an ACT score of 32 and an unweighted GPA of 3.750. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Law. The HPLW application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (http://www.miami.edu/dualdegree).

**Honors Program in Marine Geology (HPMG)**

The Honors Program in Marine Geology (HPMG) allows exceptional students to pursue an accelerated program in the undergraduate Geological Sciences and graduate Marine Geology and Geophysics programs. The degree consists of an undergraduate Bachelor of Sciences degree in Geological Sciences from the College of Arts and Sciences, combined with a graduate Master of Science degree from the Division of Marine Geology and Geophysics at the University of Miami Rosenstiel School of Marine and Atmospheric Science. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Marine Geology. The HPMG application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (http://www.miami.edu/dualdegree).

**Honors Program in Medicine (HPME)**

The Honors Program in Medicine (HPME) is offered to mature high school seniors with strong academic ability and achievement who seek careers in medicine or medical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Medicine Degree (MD) in 7 or 8 years.

Students undergo a highly selective screening process and are admitted simultaneously to the University of Miami and the Miller School of Medicine. Accepted students are assured of a place in medical school after 3 or 4 calendar years of undergraduate work assuming they maintain the required grade point average and receive the required MCAT score.

Applicants to the Honors Program in Medicine must be US citizens or permanent residents of the United States with an alien registration receipt card in their possession at the time of application. Residents of any state may apply. Only students who are in their last year of high school are eligible to apply.

**To be considered students must:**

- have a combined SAT1 score of 1400 (combined Math and Critical Reading scores) or an ACT score of 32 and an unweighted GPA of 3.75
- meet the SAT II score requirement of at least 600 in Math (Level I or II) and one science (Biology, Chemistry or Physics)
- have completed eight semesters of English and mathematics and two semesters each of biology and chemistry by the time they graduate from high school complete all components of your Common Application for undergraduate admission and all standardized testing by November 1
- complete a Dual Degree Honors Program Supplemental Application for Medicine by November 1

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (http://www.miami.edu/dualdegree).

**Honor Societies**

The following honor societies have chapters at the University of Miami:

- Alpha Epsilon Delta (Pre-Med)
- Alpha Epsilon Rho (Electronic Media)
- Alpha Eta Mu Beta (Biomedical Engineering)
- Alpha Kappa Delta (Sociology)
- Alpha Lambda Delta (Freshmen General Scholarship)
- Alpha Phi Sigma (Criminology)
- Alpha Rho Chi (Architecture)
- Beta Alpha Psi (Accounting)
- Beta Beta Beta (Biology)
- Beta Gamma Sigma (Business)
- Chi Epsilon Pi (Meteorology)
- Eta Kappa Nu (Electrical and Computer Engineering)
- Eta Sigma Phi (Classics)
- Golden Key (General Scholarship)
Honors Students’ Association (General Scholarship)
Mortar Board (General Scholarship)
Omicron Delta Kappa (General Scholarship)
Phi Beta Kappa (General Scholarship)
Phi Lambda Pi (General Scholarship)
Pi Kappa Lambda (Music and Music Education)
Pi Lambda Theta (Education)
Pi Sigma Alpha (Political Science)
Pi Tau Sigma (Mechanical and Aerospace Engineering)
Psi Chi (Psychology)
Rho Rho Rho (Marine Science)
Sigma Delta Pi (Spanish)
Sigma Gamma Epsilon (Geological Sciences)
Sigma Pi Sigma (Physics)
Sigma Tau Delta (International English)
Sigma Theta Tau (Nursing)
Tau Beta Pi (Engineering)
Theta Alpha Kappa (Religious Studies)

First-Year Seminars

First-Year Seminars
• FFA 190-199. First-Year Seminars in Arts
• FLT 190-199. First-Year Seminars in Literature
• FNS 190-199. First-Year Seminars in Natural Science
• FPR 190-199. First-Year Seminars in Philosophy/Religion
• FSS 190-199. First-Year Seminars in the Social Sciences

Conceived as alternatives to the typical survey courses that incoming students take, First-Year Seminars offer a limited number of students a small class focused on a specific topic. The seminars are interdisciplinary in nature and/or experimental in subject and design. Seminars are taught by distinguished faculty from a wide variety of academic disciplines and offer students the opportunity to engage in research from their first semester on campus. No student may take more than one. First-Year Seminars are 3 credit hour courses that may be used to fulfill general education requirements in STEM, People & Society, or Arts & Humanities, as they can be a part of cognates.

Veterans

Veterans’ Benefits
The University of Miami maintains a Veterans’ Affairs (V.A.) Office in the:
Office of the Registrar
P.O. Box 248026
Coral Gables, Florida 33124-6914

This office assists veterans and dependents of veterans who are entitled to V.A. educational benefits under Chapter 30, 31, 32, 33, or Chapter 35 of Title 38, U.S. Code, and Chapter 1606 or Chapter 1607, Title 10, USC. The University of Miami participates in the Yellow Ribbon Program for qualified Chapter 33 recipients.¹ Anyone needing information on Veterans’ Benefits is advised to contact the Office of the Registrar or visit the Registrar’s website at www.miami.edu/registrar (http://www.miami.edu/registrar) and select “Veteran Information”.

V.A. students with previous post-secondary educational training/experience must request an official transcript(s) be sent to the School. If the transcript has not been received prior to the end of the student’s initial semester, or as specified in the guidelines under the program he/she is enrolled in, the Veterans’ Affairs Office will not re-certify the student for V.A. educational benefits. The Veterans’ Affairs Office may re-certify the student after the transcript has been received.

The V.A. student’s previous training and/or experience will be evaluated by the School. Should credit(s) be accepted and/or awarded, the V.A. student’s tuition and training time may be reduced proportionally. The V.A. and the student will receive a written notice of the credit(s) allowed.

¹ The University of Miami’s Yellow Ribbon Program is available to students in the Fall and Spring semesters only.

Standards of Progress Policy for Veterans

Satisfactory progress is indicated by a Satisfactory Progress Average (SPA), which is a variation of the Quality Point Average (QPA). The SPA is computed by the following formula:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>E</td>
<td>0</td>
</tr>
<tr>
<td>IE</td>
<td>0</td>
</tr>
<tr>
<td>IF</td>
<td>0</td>
</tr>
<tr>
<td>NG</td>
<td>0</td>
</tr>
</tbody>
</table>

• Note that “E’s”, “F’s”, “IE’s” and “IF’s” are included in the SPA.
• A grade of CR will be counted as CR=2.
• The SPA is determined by dividing the total quality points earned by the credits attempted.

When a course is dropped with a grade of "W", the V.A. requires a student to repay any benefits received for that course unless the V.A. determines there are mitigating circumstances involved.

Benefits will not be paid for courses in which a student receives an NG or NC.

• An SPA of 2.0 or greater for undergraduate students, or 3.0 or greater for graduate students, is satisfactory progress.
• Less than 2.0 for undergraduate, and less than 3.0 for graduate students, is not satisfactory.
• Law and M.D. students will be considered to be making satisfactory progress as long as they meet the academic standards set by their schools for retention in their degree programs.
• The SPA is non-cumulative. It is computed each term on a one-term basis.
• Any term a student’s SPA is less than 2.0 for undergraduate or 3.0 for graduate, he/she will be notified that he/she is not making
satisfactory progress. He/she will be certified, in a probationary status, for only one additional semester.

- If, at the end of this additional semester, his/her SPA for that semester is still below the satisfactory level, the V.A. will be notified of the unsatisfactory progress and his/her educational benefits will be terminated.

- A student whose V.A. educational benefits have been terminated for unsatisfactory progress may petition the Veterans' Affairs Office to be re-certified after one semester has elapsed. Please address your request to:

  VA Certifying Official
  c/o Office of the Registrar
  University of Miami
  P.O. Box 248026
  Coral Gables Florida 33124-6914

- The Veterans' Affairs Office may re-certify the student for V.A. educational benefits only if there is a reasonable likelihood that the student will be able to attain and maintain satisfactory progress for the remainder of the program.

**For V.A. Payment of Benefits Purposes**

All V.A. Students are required to notify the V.A. Certifying Official, every semester, in writing, their intent to use their benefits, and therefore to be certified for that semester.

- An "I" (incomplete) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of one calendar year unless permission for a delay is granted by the Academic Dean.

- An "NG" (no grade) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of one regular semester unless permission for a delay is granted by the Academic Dean.

- If permission is obtained, a memo signed by the Academic Dean must be given to the Veterans' Affairs Office during the semester in which the "I" or "NG" was to be removed. This memo should also state the period of time for which the delay is approved.

- If a memo giving permission for a delay in the "I" or "NG" removal is not received by the end of the semester in which the "I" or "NG" was to be removed, the V.A. will be notified of the incomplete grade resulting in a loss of educational benefits for that course.

Please consult with our office regarding regulations for "IP's" received in Thesis, Research, or Dissertation.

There is an official period after each registration in which a student may drop a course without a "W" appearing on his/her grade report. This period is not to be confused with the last date to drop a course with a "W" grade. Please check the academic calendar on the Registrar's website for dates: www.miami.edu/registrar.

**Class Attendance and Absences**

- Regular and punctual class attendance is vital for all students.

- It is the student's responsibility to know the instructor's policies regarding examinations, penalties for absences, and late or missed work.
UNDERGRADUATE ACADEMIC PROGRAMS

Architecture
http://www.arc.miami.edu

Introduction
The School of Architecture offers a five-year, accredited professional program leading to the Bachelor of Architecture degree. The Bachelor of Architecture fulfills the educational requirements for professional registration. It offers specialized architectural study through upper-level studios and architecture electives, as well as opportunities for the study of liberal arts through the elective sequence.

The School of Architecture’s location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals. Students have the opportunity to work with the faculty in the exploration of theoretical issues and in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Mission
• Prepare students for professional leadership and lifelong learning in architecture, urbanism and related fields.
• Preserve and develop knowledge for the profession through research and practice.
• Share knowledge locally and internationally through community service.
• Promote building and community design goals of environmental responsibility, social equity and economic sustainability.

Accreditation
The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Resources
The school’s resources, including state-of-the-art computer and digital fabrication laboratories, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for undergraduate architecture students include:
• the Historic Preservation Certificate
• the Classical Architecture Certificate
• the Master of Urban Design
• the Master of Real Estate Development and Urbanism
• the M.S. Architecture
• the BSAE/MARCH
• the BARCH/MBA

Dual Degree Programs
A six year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Architecture is also available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect. The course requirements for the BSAE/MArch program are as follows:

Majors
Major in Architecture
• Bachelor of Architecture (p. 58)

Minors
Minor in Architecture
• Architecture (p. 61)

Joint
Joint Degrees in Architecture
• Bachelor of Science in Architectural Engineering and Master of Architecture (p. 60)

Academic Policies

Admission
Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the School of Architecture is selective and highly competitive. Application to the Bachelor of Architecture program is requested by January 1st. Early application is encouraged.

Freshman
Admission decisions are based on the following factors: portfolio, secondary school record, SAT/ACT score, counselor’s evaluation and the student essay.
Transfer Students

The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 G.P.A. is required for transfer admission. A portfolio is required for advanced placement in the design sequence of the Bachelor of Architecture Program. Application deadline for the School of Architecture program is March 1st.

All transfer students requesting advanced placement in design must provide a portfolio of previous academic design and graphic work and three academic recommendations. Students accepted into third year design will be required to complete a transitional design course (ARC 301) during the summer prior to enrollment. The courses MTH 130 and PHY 103, or their equivalent are to be completed before admission into ARC 305.

Student Responsibilities

Students in the School of Architecture are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Written requests for variation from program or school requirements are reviewed by a faculty committee.

Academic Progress and Probation

The School of Architecture will review each student’s record at the end of each semester. When a student’s semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with School of Architecture policies and procedures. Students on probation are not permitted to enroll in more than 13 credit hours, shall meet on a monthly basis with their academic advisor, and may have a STOP placed upon their future enrollment until grades for work-in-progress are reviewed. First semester freshmen who have a semester grade-point average below 2.0 shall be placed on probation.

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>CGPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 33 credit hours</td>
<td>2.0</td>
</tr>
<tr>
<td>33-64 credit hours</td>
<td>2.1</td>
</tr>
<tr>
<td>65-96 credit hours</td>
<td>2.2</td>
</tr>
<tr>
<td>More than 96 credit hours</td>
<td>2.3</td>
</tr>
</tbody>
</table>

Students must complete all Architecture Design studios with a grade of C- or higher. Students receiving two consecutive C- grades in architecture design studios will have to repeat the later course. Students receiving a grade of D+ or lower in an architecture design studio must repeat the studio and will be restricted to a 15 credit hour semester load. The student will meet with an academic advisor on a monthly basis and will be reviewed prior to continuation.

Academic Dismissal

A student in the School of Architecture whose CGPA or progress toward degree completion falls below the level of the minimum standards of the University of Miami may be dismissed. In the School of Architecture this includes a student who receives three grades of D+ or lower in design courses.

Class Attendance and Absences

Class attendance is mandatory for all architecture courses; three unexcused absences constitutes grounds for dismissal from the course and/or a failing grade. Students are required to be present for an entire design review, therefore, students arriving late or departing early from class will be considered absent. Excused absences require written notification and are granted by the instructor.

Failing Grades or Incompletes

A required architecture course in which a student receives a failing grade must be repeated during the first subsequent semester in which the course is offered. Incompletes can be given only for reasons of serious illness or exceptional hardship.

Student Work

The University may retain selected student work and may place it in the architecture archives for exhibition, publication, or other use as the University deems appropriate. Each student in architecture is encouraged to maintain a design portfolio of every project undertaken throughout the five-year program.

Permission to Take Courses at Another University

A form is available from the Office of Academic Services and should be completed and approved PRIOR to off-campus enrollment. Students are encouraged to provide complete documentation for each course request form. Each student requesting transfer credit hour must supply the University of Miami registrar with certified transcripts. Additionally, each student should review transfer evaluations to be certain that all courses are correctly evaluated for credit hour. The proper transmission and transfer of credit hours is the responsibility of the individual student. The last 45 credit hours towards the degree must be completed at the University of Miami.

Changes to Academic Requirements

The School reserves the right to change academic requirements.

Computer Requirement

Undergraduate and graduate students entering the program are required to purchase their own computers for use in the design studio. The School of Architecture computing resources are accessible via a wireless network with an approved device and subject to School and University policy. System requirements are published on the School of Architecture web site.

Requirements for Graduation

Architecture students must complete a cognate in People and Society and a cognate in either Arts & Humanities or STEM.

Bachelor of Architecture

Specific procedures and policies are detailed in the student handbook available from the Office of Academic Services.

Year Six
First Semester

ARC 652 Management of Professional Practice, Environmental Building Systems I 3
ARC 699 Directed Research 6
Architecture Elective 3
Cognate Elective 1 3

Term Credit Hours: 15

Second Semester

CAE 581 Energy-Efficient Building Design 3
ARC 610 Architecture Design Degree Project 6
Architecture Elective 3

Term Credit Hours: 12

Total Credit Hours: 203

1 To be selected from approved lists of People and Society (PS)/Arts and Humanities (HA). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230 or ARC 630, ARC 268 or ARC 476 and ARC 594.

2 To be selected from approved list of Technical Electives

Honors

Henry Adams Medal
Awarded in conjunction with the American Institute of Architects to the highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Henry Adams Certificate
Awarded in conjunction with the American Institute of Architects to the second highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Other honors, distinctions, and awards are presented annually for excellent student performance.

Minor in Architecture

A minor in architecture is available to non-architecture majors as an option in the undergraduate architecture program. The purpose of the minor is to provide a general understanding and appreciation of the discipline of architecture. The minor does not satisfy professional requirements in architecture but does offer an introductory basis for further study at the undergraduate or graduate level. The program requires 12 credit hours in architecture courses.

Four architecture electives from the following list of courses may be taken to complete the requirements for the minor.
Introduction
The College of Arts and Sciences at the University of Miami is a community of scholars and students that encourages the quest for a deeper understanding of the human experience and fosters a personal commitment to lifelong learning, intellectual growth, and the enduring values of the liberal arts.

The College is dedicated to helping students develop analytical and communication skills, creative abilities, and a sense of civic responsibility needed in an increasingly complex society. It strives to provide them with a rigorous grounding in their chosen field, an awareness of the interconnectedness of disciplines, and an exposure to the discovery of new knowledge.

The College seeks to create an intellectual environment that enhances individual growth and supports scholarly activities and creative endeavors that augment human knowledge and understanding.

Degree Programs
The College of Arts and Sciences offers courses leading to the degrees of:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Fine Arts
- Bachelor of Liberal Arts

Graduates with one of these degrees will have had a sound liberal arts introduction to the major fields of human knowledge. In addition to this background, each bachelor’s candidate has the opportunity to select an area of academic or of occupational interest. Professional or pre-professional curricula leading to certification in teaching, or to dentistry, medicine, law, etc., can be built into the degree program.

Academic Policies
The College of Arts and Sciences follows the general university academic policies outlined in the General Academic Information section of this Bulletin.

Academic Appeal Policy and Procedures
The College’s Faculty Committee on Academic Appeals (FCAA) is responsible for reviewing and conducting hearings on appeals related to exceptions to academic policy under the authority of the College of Arts and Sciences. Appeals must be submitted directly by the student from their student UM email account. Appeals will not be accepted from parents/guardians, doctors, attorneys, or anyone else other than the student. Please read below for a list of acceptable and unacceptable appeal requests. All appeals related to course drops/enrollment adjustments MUST be submitted within 30 calendar days from the semester end date noted on the academic calendar for the semester in question. Transcripts will not be altered once a student has graduated and has a conferred degree. Appeal decisions will be delivered to students’ UM email account within 2 to 3 business weeks upon receipt of the appeal. All appeal decisions are final and non-negotiable.

The student maintains full responsibility for the impact of an appeal decision, especially as it relates to their account, financial aid, visa status, academic progress, and graduation timeline.

Steps to Submit an Acceptable Appeal:
1. Draft an email to the Assistant Dean of Academic Services – see website for contact information. as.miami.edu/advising.
2. The appeal email must briefly describe the situation, the reason/justification for the request, the specific request/action, the specific year/term/course ID as applicable to the type of appeal, and the student’s name/ID.
3. Appeals must be accompanied by supporting documentation, if applicable to the type of appeal. Documentation must be submitted as an attachment to the appeal email. It is the responsibility of the student to determine what documentation best supports their appeal case. We will not pre-approve documentation before submission of the appeal. We will only accept documentation from the student submitting the appeal.

Appealable Actions for Committee Review:
1. Request for retroactive drop of one, or more, courses after the last date to drop without a W, and/or after the last day to drop a class for the semester in question. This type of appeal is only considered for cases of extreme, unforeseen circumstances or medical emergencies that can be documented. Retroactive drop action can NOT result in a complete withdrawal (all enrolled classes dropped).
2. Request for waiver of the 45 credit hour residency requirement
   a. Appeal must include the institution where credits will be/were taken, the year/term to be/were taken, and the exact number of credits to be considered for waiver.
   b. This process does not preapprove transfer equivalencies or guarantee transferability of courses. Students are responsible for adhering to all necessary policies and procedures related to transferring courses to UM.
3. Substitution for, or waiver from College of Arts and Sciences’ General Education Requirements (not University general education requirements – see below).

The following requested actions are not appealable through the College of Arts and Sciences FCAA:
1. Adjustment of academic record/transcript after graduation and a conferral of the degree: See University Bulletin
2. Retroactive withdrawals for Fall/Spring semesters
   a. The University has a formal withdrawal policy found here: http://www.miami.edu/index.php/cane_success_center/withdrawal/
3. Retroactive withdrawals for summer sessions that alters the effective date of the withdrawal
   a. See withdrawal policy linked above
4. Grade Appeals, including incomplete grades that are now IF grades
   a. See Faculty Senate Appeals process in Bulletin here: http://www.miami.edu/index.php/academicbulletin/
5. Waiver of University General Education Requirements as defined by the Bulletin: No appeals process available
6. Substitution for/waiver from any requirements related to a major or minor: Under respective department authority
Bachelor of Arts and Bachelor of Science Degrees

Candidates for degrees in the College of Arts and Sciences must complete the credit hours of work and achieve the quality point average specified for students in the University at large. These requirements are indicated in the Academic Procedures and Information section of this Bulletin. Candidates must also complete the General Education requirements of the University, i.e., the Proficiencies: English Composition, Advanced Writing and Communication, and Quantitative Skills; completion of a cognate in each of the three areas: Arts & Humanities, People & Society, and Science, Technology, Engineering & Mathematics. The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge.

I. Additional Proficiencies and Areas of Knowledge

In addition to the university’s general education requirements, the college has the following requirements and provisos:

Bachelor of Science

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.
- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must complete a calculus sequence: MTH 161-MTH 162, MTH 140-MTH 141-MTH 162, or MTH 171-MTH 172.
- Computing or Statistics Proficiency: Degree candidates must earn at least 3 credit hours in either
  1. a computing course approved by the major department; or
  2. a statistics course approved by the major department.
- Natural Science Area of Knowledge: Degree candidates must earn at least 3 credit hours in Natural Science, in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credit hours must be earned in courses that count toward a major in that department. These credit hours may double count with any other requirement.

Bachelor of Arts

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.
- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.
- Natural Science Area of Knowledge: Degree candidates must earn at least 3 credit hours in Natural Science: Anthropology (only APY 203), Biology, Chemistry, Ecosystem Science and Policy (only ECS 111, ECS 112, ECS 202), Geography (only GEG 120), Geological Sciences, Marine Sciences (except MSC 313, MSC 314), Physical Sciences, and Physics. These credit hours may double count with any other requirement.

Bachelor of Fine Arts

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.

Bachelor of Liberal Arts

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- None

Details of the Second Language Proficiency

Second language requirements can be fulfilled through courses offered in the departments of Modern Languages and Literatures (Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Portuguese, and Spanish, except for courses numbered 310-319), Classics (Latin and Greek), and Teaching and Learning in the School of Education (American Sign Language). Special 100- and 200-level Spanish courses are required of heritage Spanish speakers who choose to fulfill the language requirement by taking Spanish. Courses taken in order to meet second language requirements, including necessary prerequisite courses, cannot be used in cognates taken to fulfill the Areas of Knowledge requirement.

Students who graduated high school at an institution in which the primary language of instruction and the primary language of school administration was not English, are eligible for exemption from the CAS second language requirement. Exemption will be granted by CAS Office of Student Advising. To be granted the exemption, the student must have on file the equivalent of a high school diploma from such an institution.

Details of the Advanced Writing and Communication Proficiency

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student’s major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two transfer courses towards the writing requirement.

Separation of Proficiencies and Areas of Knowledge

Courses taken to fulfill the proficiency requirements cannot be used in cognates taken to fulfill the Areas of Knowledge requirement.
II. Major and Minor Fields (B.A. and B.S degrees)
B.A. and B.S. degree candidates must choose a major offered in the college by one of the disciplines with an undergraduate academic program in the college, and at least one other minor or major from any of the disciplines in the university. B.S. degree candidates must choose a major from one the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Ecosystem Science and Policy, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Psychology. B.A. degree candidates must choose at least one major or minor from a field other than the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Computer Information Systems, and Engineering. The majors and minors taken by a student must come from different fields of study. Multiple majors and minors may be taken from departments and programs that offer multiple fields of study. To find the requirements for majors and minors, consult this bulletin under the discipline concerned, and confer with the designated departmental representatives. Any student who does not make satisfactory progress towards a major may be required to change or relinquish candidacy for the degree.

Individual courses may be used to satisfy the requirements of multiple majors and minors. However, a minimum combined total number of credit hours must be completed in courses required for the majors and minors. The minimum number of credit hours is 24 times the number of majors, plus 9 times the number of minors.

III. Additional Bachelor of Fine Arts Requirements
B.F.A. degree candidates must satisfy the requirements of a major as determined by the Department of Art and Art History or the Department of Theatre Arts. B.F.A. studio majors must minor in Art History. Students must maintain at least a GPA of 3.0 in their major, and an overall GPA of 2.0 or above as specified in departmental and program sections of this bulletin.

IV. Additional Bachelor of Liberal Arts Requirements
B.L.A. degree candidates must complete 120 credit hours with an overall GPA of 2.0 or above. At least 60 of the 120 credit hours must be in 300, 400, or 500-level courses. Of these 60 credit hours, 30 credit hours must be completed in the College of Arts and Sciences. No more than 40 credit hours in 300-level or higher courses may be earned in any one department, and no more than 52 total credit hours may be earned in any one department. Up to 30 of the 120 credit hours may be courses from other schools and colleges of the university except for those courses expressly excluded from recognition by the college. Students may, but are not required to, elect a major in a department. If a student fulfills the departmental requirements for the major, it will be recorded on the official transcript. No minor may be elected.

V. Other Requirements
General Electives
Beyond the general education and major/minor courses, all students must complete sufficient general electives to reach a total of 120 credit hours. General electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses.

Credit Only
Only general electives may be taken under this option. Courses that are used to satisfy the major, the minor, the distribution requirements of the College and the general education requirements of the University may not be taken for credit only.

Exemption
Exemption from a course or courses refers specifically to the following:
1. credit by examination through the Advanced Placement (AP) or International Baccalaureate (IB) programs;
2. advanced placement by proficiency examinations or test scores, with no credit earned;
3. advanced standing and/or placement, with credit earned.

Transfer Credit Hours
Credit hours transferred from other institutions may not count towards the completion of a major or minor without the written approval of the department or program.

Independent Major
The Independent Major allows students to pursue a BA or a BS degree in the College of Arts and Sciences, depending on the field of study and in consultation with the Guidance Committee. Students will fulfill all requirements for such degrees.

Students may begin to develop a proposal for the IM when they have reached sophomore standing. The proposal should explain why existing majors are inappropriate or inadequate to satisfy the student’s interests. Students will be ineligible for declaring the IM upon reaching senior standing, that is, they must declare as a junior and spend at least two (2) full semesters in residence at UM in the IM. Students will require a cumulative UM GPA of 3.5 or higher to be eligible for the IM.

A student’s Guidance Committee typically will comprise two tenured or tenure-track faculty, typically from different departments, who represent the disciplinary breadth of the courses selected for the IM. A third Guidance Committee member might be appropriate when the proposed course of study encompasses expertise from three Departments or disciplines. The Guidance Committee Chair, who has primary oversight responsibility regarding satisfactory completion of the major, will serve as the primary advisor for the student’s senior research/creative project under most circumstances, and must be a tenure-track faculty. Exceptions to the Chair serving as the primary advisor might include situations where there are co-advisors.

The IM proposal must include at least thirty (30) credit hours of coursework beyond those needed to fulfill General Education requirements. Of those thirty (30), at least six (6) must be at the 300 level; additionally, six (6) credit hours will be satisfied by a Capstone project/thesis in the last two (2) semesters of the Bachelor’s degree. Because many courses have variable availability and conflicts are inevitable, strong proposals will identify more than 30 credit hours of coursework before being submitted to the Advisory Committee for approval. If a student wishes to pursue the IM as a double-major, the Advisory Committee should give particular attention to the appropriateness of the student’s plan of study; no double-counting of credit hours will be allowed between the two majors.
PreLaw Preparation

Although no specific curriculum is required in preparation for Law School, the Pre-Law Committee of the American Bar Association strongly recommends that students considering a career in Law should have a well-balanced education. This education should include courses requiring intensive writing, logical reasoning and critical thinking and reading skills.

PreLaw Advising provides a variety of services to all students interested in attending Law School. For more information, please contact the Office of Student Academic Services in Ashe 200. These services include:

1. Pre-Law Advising: confidential advising in preparation for law school (i.e. application process, general information, discussion of your concerns).
3. Pre-Law Newsletter: information about programs and events.
4. LSAT and LSDAS registration booklets (for juniors and seniors).
5. Campus-wide programs for pre-law students such as Law Day.
6. Programs and seminars in coordination with other University of Miami departments such as: School of Law Career Planning Center, School of Law Center for Ethics and Public Service, Toppel Career Planning and Placement, the Counseling Center, and the Reading and Study Skills Center.

In order to take advantage of the services listed above a student should complete a Pre-Law registration card at the beginning of the academic year.

Other

The Max and Peggy Krilloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available at the following link; http://www.as.miami.edu/academics/undergraduate-studies/scholarships/ and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the College of Arts and Sciences.

Foote Fellows

Foote Fellows pursuing degrees in the College of Arts and Sciences are exempt from all University-wide and College-specific general education requirements. They are eligible for priority admission into the daVinci program, first-year seminars, and internships in the Dean’s office. Opportunities to learn by doing, through research or tutorials, as well as seed money for students interested in developing a business plan or a prototype are also available to A&S Foote Fellows. Questions? Go to Ashe 200 for answers!

DaVinci Program

The da Vinci Program encourages high-achieving, intellectually curious students to rethink the map of human knowledge. It emphasizes connections between humanistic and scientific inquiry and their modes of understanding: objectivity, critical analysis, self-reflexivity, the nature of proof, authority, and the logic and rhetoric of written expression. It also helps define the distinctive elements that humanities classes can offer to STEM-minded students: a chance to reflect on questions of human values, ethics, and aesthetics. At the same time, it introduces humanities students to conceptually new means of investigating the traditional fields.

Students are invited in the program before their first year and they take a seminar per semester in each of the first four semesters of study. A capstone experience marks the conclusion of their undergraduate career.

PRISM Program

The Advanced Program in Integrated Science and Math (PRISM) brings together top first-year students interested in the natural sciences. The program is designed for those who plan on pursuing postgraduate education and a career in science or medicine (Ph.D./M.D. track). Our outstanding faculty, lab directors, graduate assistants, and caring advisors are here to encourage integrated learning in STEM disciplines. PRISM students are exposed to new developments in science and are encouraged to become actively engaged in research during their undergraduate experience. PRISM classes are advanced versions of the typical track done by a first-year natural science student, so there are no additional classes to complete.

Aerospace Studies

http://www.miami.edu/aerospace-studies

Dept. Code: AIS

Introduction

Air Force Reserve Officer Training Corps (AFROTC)

AFROTC is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC classes are held on college campuses throughout the United States and Puerto Rico; students can register through normal course registration processes. AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as “cadets”) who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

For more information on AFROTC course descriptions, please review http://miami.edu/. For more information on the AFROTC program, please review http://www.as.miami.edu/afrotc/.

Enrollment

There is no military obligation to enroll in AFROTC. To enroll students must meet the following criteria:

- Be a U.S. citizens or resident alien, or be able to become a U.S. citizen prior to attending Field Training the summer following sophomore year
- Be full-time college students, enrolled in 12 credit hours per semester
- Be able to participate in a demanding physical fitness program
Aerospace Studies

Force (Lecture 1, Leadership Lab* 0)

AIS 101/AIS 102 Foundations of the United States Air Educational Objectives

- Be able to pass a Department of Defense Medical Examination
- Have solid moral character
- Maintain AFROTC minimum required grade point average

Scholarships

More than 60% of Air Force ROTC scholarships are awarded to undergraduate students in engineering or other scientific and technical disciplines. However, students in every degree program enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily. Scholarships are awarded in increments of two, three, and four years. Air Force ROTC offers several types of scholarships. Type 1 covers full tuition and most required fees. Type 2 covers tuition and fees, but is capped at $18,000 annually. Type 7 scholarships are designated for in-state tuition-level institutions. All types of awards provide an allowance for books and a monthly non-taxable stipend. All scholarship cadets are required to meet academic, military, and physical fitness standards to earn and maintain scholarship benefits.

Additionally, University of Miami undergraduates enrolled in the Air Force ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University’s tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain continuous enrollment in the AFROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University’s undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University’s AFROTC detachment.

Benefits

All AFROTC cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon being commissioned a Second Lieutenant in the Air Force, you will receive a starting salary and allowances worth more than $58,000 annually. Free medical and dental care, 30 days paid annual vacation and educational benefits are also part of the compensation package.

Educational Objectives

AIS 101/AIS 102 Foundations of the United States Air Force (Lecture 1, Leadership Lab* 0)

Aerospace Studies AIS 101/AIS 102 is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force heritage, military customs and courtesies, career opportunities, Air Force Core Values, interpersonal communications, and team building. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS 201/AIS 202 The Evolution of USAF Air and Space Power (Lecture 1, Leadership Lab* 0)

Aerospace Studies AIS 201/AIS 202 is a survey course designed to examine general aspects of the employment of air and space power through a historical perspective. Historical examples assist in understanding the development of Air Force distinctive capabilities and missions. In addition, the students continue discussing the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders. Students also continue to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS 301/AIS 302 Air Force Leadership Studies (Lecture 3, Leadership Lab* 0)

Aerospace Studies AIS 301/AIS 302 teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

AIS 401/AIS 402 National Security Affairs and Preparation for Active Duty (Lecture 3, Leadership Lab* 0)

Aerospace Studies AIS 401/AIS 402 is a course designed to examine national security process, regional studies, advanced leadership ethics, and Air Force Doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism with a continuing emphasis on the refinement of communication skills.

A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

Minors

Minor in Aerospace Studies

- Aerospace Studies (p. 66)

Minor in Aerospace Studies

- A minor in Aerospace Studies consists of 16 credit hours.
- You must take all AIS courses listed under the Aerospace Course Listing.
- A grade of C- or higher, with an overall GPA of 2.0, is required in each course taken for the minor.

Africana Studies

http://www.as.miami.edu/africanastudies

Dept. Code: AAS

Introduction

The Program in Africana Studies (AAS) provides opportunities for students to learn about the experiences of people of African descent in North and South America, the Caribbean and continental Africa. Courses
are presently offered leading to a major or minor in Africana Studies. Students are encouraged to pursue these courses, even if they are not majors or minors, in order to achieve a balanced education in keeping with the stated goals of the University of Miami.

**Educational Objectives**

1. To help students research, acquire, and disseminate information about the historical and social experiences of Africans and people of African descent on all sides of the Atlantic basin, but with special emphasis on the United States.
2. To facilitate students’ understanding of the multi-cultural, multi-ethnic, globalized society of our time.
3. To help students think critically about the global black experience.
4. To prepare students for graduate work and professional careers.

**Departmental Honors**

Carter G. Woodson Award - Best all-round student who combines intellectual excellence and community service.

**Writing Requirement**

To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in Africana Studies should take at least one English course or one History course related to Africana Studies and is listed as an advanced writing course.

**Majors**

**Major in Africana Studies**

- B.A. in Africana Studies (p. 67)

**Minors**

**Minor in Africana Studies**

- Africana Studies (p. 67)

**B.A. in Africana Studies**

- A major in Africana Studies consists of 30 credit hours.
- Twelve of the 30 credit hours must be completed at the 300 level or above.
- A grade of C- or better with an overall GPA of 2.0 is required in each course taken for the major.

<table>

**American Studies**

http://www.as.miami.edu/americanstudies/

**Dept. Codes: AMS**

**Introduction**

The Program in American Studies at the University of Miami fosters the interdisciplinary study of American culture and society, and explores the place of the United States in an increasingly interconnected world. Our faculty come from a wide range of fields, including history, literature, political science, religion, art, philosophy, law, music, ethnic studies, anthropology, architecture, sociology, communications, and education. What unites them is the commitment to examining the U.S. from multiple perspectives, highlighting the diversity of people, cultures, and experiences that have shaped the past and present United States. The Program places analysis of globalization at its center, and encourages a hemispheric perspective that allows students and faculty to explore interests in the United States, the Caribbean, Latin America, the Pacific Rim, and other border crossings.

**Educational Objectives**

The undergraduate curriculum in American Studies encourages students to bridge the divide between disciplines by examining specific themes and topics in an engaging, dynamic, interdisciplinary manner. By exposing students to courses that place questions of cultural diversity, regional difference, ethnic and racial identity, gender and sexuality, class dynamics, and popular culture at the forefront of intellectual investigation, the Program in American Studies enables them to situate their own experiences in a wider context. It also exposes them to a multiplicity of perspectives that inform our understanding of the United States and its place in a global society. The Program encourages its majors to study abroad, and faculty members help students plan their curriculum to make that option feasible.
Departmental Honors
American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

Advance Writing and Communication Requirement
To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in American Studies should take at least one English course or one History course related to the American Studies discipline listed as an advanced writing course.

Majors
Major in American Studies
• B.A. in American Studies (p. 68)

Minors
Minor in American Studies
• American Studies (p. 68)

B.A. in American Studies
A major in American Studies consists of at least 30 credit hours in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses. These credit hours must include at least 18 at the 300 level or above. All majors must complete AMS 101; AMS 310; at least two other AMS core courses; at least one course in American history, and at least one course in American literature.

Students must take three courses, chosen in consultation with an American Studies advisor, in a specialized area of American Studies (200 level or higher). Students may work in areas including, but not limited to, Ethnic Studies, Caribbean Studies, Latino/a Studies, Environmental Studies, Communication Studies, Women’s Literature, Urban Studies, Africana Studies, Religious Studies, or Material Culture Studies. At least one of these courses must be either comparative or non-U.S.-based.

Students must take courses from at least three different departments in order to fulfill the requirements for the major.

In addition, all majors must complete AMS 501. This capstone course can take the form of an individual research project or an internship at a local cultural or civic institution. For the research option, students will identify an appropriate faculty member to supervise and grade the project, and then obtain approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will be determined by the faculty member and student in consultation with the program director. For the internship option, students will partner with any number of local institutions and produce a creative and/or scholarly project for evaluation. The internship will be arranged through the program director, in consultation with the Butler Center and/or the Office of Civic and Community Engagement. The final product will be evaluated by the program director.

Minor in American Studies
A minor in American Studies consists of at least 15 credit hours in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses.

Select 9 credit hours at the 300 level or above 9
AMS 101 Introduction to American Studies 3
AMS 310 The United States In The World 3
Select at least one additional AMS core course 3
Select at least one course in American history or American literature 3

Total Credit Hours 21

Anthropology
http://www.as.miami.edu/anthropology

Dept. Code: APY

Introduction
Anthropology is the scientific study of humankind, from its beginnings to the present. Of the many sciences that study aspects of humans and their behavior, only anthropology attempts to understand and integrate the entire panorama of human biology and culture in all times and places.

The Anthropology Department offers a wide range of courses for students in pursuit of the Bachelor of Arts degree, from the basic four fields of cultural anthropology, linguistics, physical anthropology, and archaeology, to advanced study of topics such as Maya archaeology, medical anthropology, Caribbean cultures, primatology, and the evolution of language.

Anthropological training concentrates on broadly transferable skill areas such as understanding human diversity, building research skills for collecting and making sense of information, and communicating effectively. The skills developed through completing a degree in anthropology are useful for living and working in today’s world, which increasingly means interacting with people from many different cultural backgrounds and nations.

The field is especially suited to a multi-ethnic, multi-lingual, and multi-cultural urban center such as Miami, and the research programs of the department faculty reflect the compositions and concerns of the larger community.

Anthropological knowledge has taken an increasing role in the solution of practical problems in public health, cultural resource management, economic development in the Third World, business relations with immigrant and overseas populations, State and Federal programs, and many other areas.

Anthropological training concentrates on broadly transferable skill areas such as understanding human diversity, building research skills for collecting and making sense of information, and communicating effectively. The skills developed through completing a degree in anthropology are useful for living and working in today’s world, which increasingly means interacting with people from many different cultural backgrounds and nations.

The field is especially suited to a multi-ethnic, multi-lingual, and multi-cultural urban center such as Miami, and the research programs of the department faculty reflect the compositions and concerns of the larger community.

Anthropological knowledge has taken an increasing role in the solution of practical problems in public health, cultural resource management, economic development in the Third World, business relations with immigrant and overseas populations, State and Federal programs, and many other areas.
Educational Objectives

Students who graduate from our program in anthropology will have achieved:

1. Basic familiarity with each of the four subfields of our discipline: archaeology, cultural anthropology, linguistic anthropology, and physical or biological anthropology.

2. Extended familiarity with one or more of these subfields in terms of knowledge of content, e.g. area ethnoology in Latin America and/or the Caribbean; topical knowledge such as substance use and abuse, gender, food, primate behavior, art, ritual, museums and collections, material culture, and/or world languages; and methodological skills involving field research in one or more of the subfields.

3. The ability to articulate the anthropological view of the human condition in terms of an operational definition of culture and a holistic perspective on how humans behave.

4. Sufficient skill in research to be able to produce a research paper based on original anthropological investigation.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in anthropology should take at least two courses designated as W (writing intensive) offered in the department.

Degree Programs

The Department of Anthropology offers a major and a minor in the University’s array of Bachelor of Arts Degrees.

Departmental Honors

A student with junior or senior standing and a cumulative grade point average of 3.5 or higher may earn honors in anthropology by completion of a qualifying thesis paper encompassing an original research agenda under the direction of a member of the faculty in the Department of Anthropology. The scope of work will be set in a thesis proposal submitted to the adviser and approved in writing. The student will submit a copy of the completed thesis to the Department upon final approval by the Thesis Adviser.

Medical Anthropology Track

The courses listed below constitute a medical anthropology track that may be pursued by anthropology majors. In addition to the required four subfield courses (APY 201-APY 202-APY 203-APY 204), the medical anthropology track may consist of any six of the following list of courses.

Majors are strongly encouraged to enroll in one of our many fieldwork opportunities or to obtain training in field methods specific to their interests. The remainder of the program will be developed with the student’s departmental adviser. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in anthropology should take at least two courses designated as W (writing intensive) offered by the department.

Minor in Anthropology

A minor in Anthropology consists of 15 or more credit hours, passed with a grade of C- or higher with an overall GPA of 2.0 including any two 200-level anthropology courses. Appropriate courses offered in other departments may also be counted toward the minor with approval of the Director of Undergraduate Studies.

Art and Art History
http://www.as.miami.edu/art
Dept. Codes: ART, ARH

Educational Objectives
The Department of Art and Art History provides facilities and instruction to serve equally the needs of the general student for participation in and appreciation of the visual arts and those of students with specialized interests and abilities preparing for careers in the production, teaching, utilization, and interpretation of Art and Art History.

Degree Programs
The Department of Art and Art History offers two degrees:

- the Bachelor of Arts, with tracks in:
  - Art History
  - General Study
  - Studio Art
- the Bachelor of Fine Arts in Studio Art, which allows for primary and secondary concentrations in:
  - Painting
  - Sculpture
  - Printmaking
  - Photography/Digital Imaging
  - Graphic Design/Multimedia
  - Ceramics

The B.A. requires a minimum of 36 credit hours in the department with a grade of C or higher. The B. A. major is also required to have a minor outside the department. Minor requirements are specified by each department and are listed in the Bulletin. The B.F.A. requires a minimum of 72 credit hours in the department, a grade of C or higher in each course, a successful portfolio review, and at least a 3.0 average in departmental courses. The B.F.A. major is not required to have a minor outside the department. To satisfy the College of Arts and Sciences writing requirement, students majoring in Art or Art History, for all degree programs, must complete at least one course in Art History designated as a writing course.

Departmental Honors
In order to be eligible for Departmental Honors, candidates must have completed at least nine credit hours at the 300 level or above, and must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for Honors must request admission to Departmental Honors from the Department Chair, and identify an exhibition/thesis faculty supervisor.

In addition to fulfilling the regular major requirements, students must register in their senior for six credits of Independent Study at the 500 level. Art majors will be expected to work on an exhibition project. Art history majors will be expected to research and write an Honors thesis.

The Department Chair and the faculty supervisor will determine whether the completed exhibition project or thesis merits Departmental Honors.

Audit
Due to the nature of studio courses, it is not possible for a student to audit courses offered in the studio areas.

Total Credit Hours 36

B.F.A. in Art

Portfolio Review

All students who anticipate graduating with a Bachelor of Fine Arts (BFA) degree must submit a portfolio consisting of 15-20 images of their work. Instructions for submitting this folio can be found on the department website. Students can apply as incoming freshmen or anytime within their first years. NO STUDENT IS OFFICIALLY CONSIDERED A BFA CANDIDATE UNTIL THE PORTFOLIO IS APPROVED BY THE FACULTY. If the BFA portfolio is not submitted at the proper time or fails to be passed by the faculty, the student will be advised and registered as a Bachelor of Arts (BA) candidate.

BFA Exhibition

Unless otherwise instructed, each BFA candidate will take part in an exhibition of work screened and approved by a faculty member from their area of specialization, accomplished as an art major at the University of Miami, in the Fall or Spring semester of the senior year. The BFA exhibitions are held in the College Gallery.

At the time the candidates BFA exhibition is hung, a formal critique will be arranged between the student and the art faculty.

Total Credit Hours 72

BFA Minor in Art History

All BFA studio majors automatically minor in art history. A minor outside the department is not required.

A BFA student is limited to a maximum of 21 credit hours in any one studio area – Painting, Printmaking, Graphic Design/Multimedia, Photo/Digital, Ceramics, and Sculpture.

Students must maintain at least a 3.0 average in their major.

Minor in Art and Art History

BFA Minor in Art History

All BFA studio majors automatically minor in Art History. A minor outside the department is not required.
A BFA student is limited to a maximum of 21 credits in any one studio area - Painting, Printmaking, Graphic Design, Multimedia, Photography/Digital Imaging, Ceramics, or Sculpture.

Students must maintain at least a 3.0 average in their major.

Minor
A minor in Art and Art History consists of 15 credit hours (9 of which must be from the University of Miami) in any departmental courses. All courses must be passed with a C or higher.

Astronomy
Astronomy
For courses in Astronomy see PHYSICS (p. 122), in particular PHY 110 and PHY 545.

Biochemistry and Molecular Biology
http://biomed.miami.edu/

Dept. Code: BMB

(Code for the major is either Track 1: BCHM or Track 2: BCHN)

Introduction
Biochemistry is the chemistry of life. It includes or has large areas of overlap with molecular biology, biophysics, structural biology, cell biology, metabolism, neuroscience, nutrition, genetics, etc. It tries to explain what happens in living organisms and how biological processes are regulated. It is a relatively young science. Our understanding is still developing and students can learn something new every day. An Undergraduate Major in one of our two tracks, Track 1: Biochemistry and Molecular Biology (BCHM) or Track 2: Biochemistry and Nutrition (BCHN), provides an excellent preparation for:

1. Medical School
2. Graduate Studies in all basic medical sciences: Biochemistry, Molecular Biology, Cell Biology, Genetics, Neurobiology, Microbiology, Immunology, Pharmacology, Biophysics, Physiology, Bio-informatics, Biology, Nutrition, Environmental Science, and others.
3. Industry: Biotechnology, Pharmaceutical, Food Production, Food processing, and others.
4. Allied Health Professions: Nutrition, Dentistry, Forensics, Veterinary Medicine, Toxicology, Clinical Chemistry, Environmental Science, and others.

Interesting Articles

Educational Objectives
The undergraduate program in Biochemistry & Molecular Biology strives to provide

1. superior training in nutrition, biochemistry and molecular biology and
2. encouragement for self-study and research to students seeking a B.S. degree.

As part of a research-oriented university, the department, through its students, creates new knowledge. As a result of our teaching efforts, the new B.S.'s created will be able to matriculate into professional and graduate schools or to find positions in teaching professions and/or industry. In addition, the department serves the community by providing expertise in matters related to nutritional and medical biochemistry. For example, it teaches biochemistry to pre-medical and other pre-health students across a wide variety of life science related majors including biology, microbiology, neuroscience, and biomedical engineering.

Degree Programs
As a member of the College of Arts & Sciences, the Department of Biochemistry and Molecular Biology offers an undergraduate B.S. degree. As a member of the Miller School of Medicine, it offers the following graduate degrees: Ph.D., Executive Ph.D., dual B.S.-Ph.D., and dual M.D.-Ph.D. Also, it offers a Molecular Medicine Pathway for M.D. students.

Departmental Honors
Departmental honors can be earned by biochemistry majors who have:

1. Successfully completed two semesters of research (5 or 6 credit hours of BMB 545). This research must be described in a brief thesis that needs to be approved by three BMB faculty members.
2. A 3.5 or higher grade point average in all BMB courses.
3. A 3.3 or higher grade point average in all courses taken at the University of Miami.

Dual Degree Honors Program
The Honors Program in Biochemistry & Molecular Biology (HPBMB) is offered to mature high school seniors with strong academic ability and achievement who seek careers in biological or biomedical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Philosophy Degree (PhD) in approximately 6 years. For information see http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors/.

Majors

Major in Biochemistry and Molecular Biology

Minors

Minor in Biochemistry and Molecular Biology
• Biochemistry and Molecular Biology (p. 75)
B.S. in Biochemistry and Molecular Biology or Nutrition

Major

The Bachelor of Science (B.S.) degree in either BCHM or BCHN requires 16 total credits of BMB courses: 10 credits of required BMB courses plus six credits of elective BMB courses. At least two elective BMB credits must come from a BMB lab course, either BMB 145, BMB 245, BMB 402, or BMB 545. To satisfy the College of Arts and Sciences writing requirement in the discipline, BMB majors must complete for writing credit (W) either BMB 507, BMB 511, or BMB 545. For all students, a grade of C or better must be earned in each BMB course. For current UM students to declare either major or minor in BMB, a UM cumulative grade point average of 2.9 is required. For transfer students to declare either major or minor in BMB, a grade point average of 3.5 is required. The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities. The two possible academic tracks, BCHM and BCHN, differ by two required upper level BMB lecture courses.

Required BMB Courses

Students must complete all four BMB lecture courses listed in either Track 1 or Track 2:

Track 1 (BCHM)

BMB 401 Biochemistry For The Biomedical Sciences
BMB 506 Biomedical Case Studies
BMB 507 Protein Structure, Function, & Biology
BMB 509 Molecular Biology Of The Gene

Track 2 (BCHN)

BMB 401 Biochemistry For The Biomedical Sciences
BMB 506 Biomedical Case Studies
BMB 417 Biochemistry of Food and Nutrition
BMB 519 Nutrition And Genetics

Elective BMB Courses

Students in either Track 1 or 2 must complete at least six credits of elective BMB courses. At least two elective BMB credits must come from a BMB lab course, either BMB 145, BMB 245, BMB 402, or BMB 545.

BMB 145 Introduction To Bmb Research

PSY 292 Introduction To Biobehavioral Statistics For Non-Majors
or CSC 120 Computer Programming I

Total Credit Hours: 69

1. Writing credit (W) may be obtained in this course.
2. These courses may be taken more than once for additional credits.
3. PRISM students take designated sections of the traditional chemistry series: CHM 111/CHM 113, CHM 112/CHM 114, CHM 201/CHM 205, and CHM 202/CHM 206, which satisfy the requirement for obtaining the Minor in Chemistry. The indicated three semester “Chemistry for the Biosciences” series is preferred, since students will be prepared for independent BMB research at a more early stage.
4. PRISM students take PHY 201/PHY 106 and PHY 202/PHY 108. A more advanced physics course series can be substituted (e.g., PHY 205, PHY 206/PHY 208, PHY 207/PHY 209).
5. PRISM students take MTH 171 and MTH 172.
6. PRISM students take CSC 210.

<td></td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credit Hours:** 10

1. Students must have all the courses that are a prerequisite for BMB 401 and BMB 506.

Students should become familiar with the credit hour sharing rules. Credit hours for a minor cannot be used for a major. Credit hours can be shared between two majors.

The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities.

A grade of C or better must be earned in each Biochemistry and Molecular Biology course.

### Biology

http://www.bio.miami.edu

Dept. Code: BIL

#### Introduction

The Department of Biology offers undergraduate programs for students interested in a natural science education that will prepare them for careers in biological research, medicine and other health-related fields,
teaching, environmental management and other fields that require a broad base of biological knowledge.

**Educational Objectives**

The Department of Biology trains students to understand and use the scientific method, and to engage in critical thinking and experimental design. We strongly encourage original laboratory and/or field research under the mentorship of biology faculty. The Bachelor of Science in Biology prepares the student for further training in natural science, such as biology graduate school, as well as medical, veterinary, dental or other health-care professions. The Bachelor of Arts degree prepares the student for a career in more humanities-related fields such as teaching or environmental law.

**Degree Programs**

Two undergraduate degrees are available in Biology: the B.S. and A.B. Both require a major in Biology of 34 credit hours with a minimum grade of C- in each course and an overall GPA of 2.0.

**Departmental Honors**

**Honors Program**

See HONORS PROGRAMS (p. 52) elsewhere in this Bulletin for minimal requirements. In addition to the grade point averages specified in the minimal requirements, the following program constitutes the Biology Departmental Honors Program:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 495</td>

<tr>
<td>BIL 151</td>
<td>General Biology Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>BIL 160</td>
<td>Evolution and Biodiversity</td>
<td>4</td>
</tr>
<tr>
<td>BIL 161</td>
<td>Evolution and Biodiversity Laboratory</td>
<td>1</td>
</tr>
</tbody>
</table>

Complete a senior thesis, of superior quality, on the results of the research.

**Chemistry**

Select one of the following options:

Option 1: Choose CHM 103, CHM 105 *OR* CHM 111, CHM 113

- CHM 103 Chemistry for Life Sciences I (Lecture) & CHM 105 and Chemistry for Life Sciences I (Laboratory)
- CHM 111 Principles of Chemistry I & CHM 113 and Chemistry Laboratory I
- PLUS choose CHM 104, CHM 106 *OR* CHM 201, CHM 206
- CHM 104 Chemistry for Life Sciences II (Lecture) & CHM 106 and Chemistry for Life Sciences II (Laboratory)

Option 2: Choose Chemistry for the BioSciences Three-semester Sequence.

- CHM 121 Chemistry For The Biosciences I & CHM 113 and Chemistry Laboratory I
- CHM 221 CHM211 Chemistry for the Biosciences II & CHM 114 and Chemistry Laboratory II
- CHM 222 CHM212 Chemistry for the Biosciences III & CHM 205 and Organic Chemistry Laboratory I

Advanced placement, and in certain situations, course credit hour can be earned through the College Entrance Examination Board program, placement examinations, and departmental proficiency examinations.

For Graduate programs, consult the Graduate School section of this Bulletin.
Minor

A minor in a department other than natural science.

B.S. in Biology

The B.S. degree is recommended in preparation for graduate schools, professional schools, marine biology, and high school or college teaching. In addition to the College of Arts and Sciences general degree requirements, the B.S. requirements are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 150</td>
<td>General Biology</td>
<td>4</td>
</tr>
<tr>
<td>BIL 151</td>
<td>General Biology Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>BIL 160</td>
<td>Evolution and Biodiversity</td>
<td>4</td>
</tr>
<tr>
<td>BIL 161</td>
<td>Evolution and Biodiversity Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>BIL 250</td>
<td>Genetics</td>
<td>3</td>
</tr>
<tr>
<td>BIL 255</td>
<td>Cellular and Molecular Biology</td>
<td>3</td>
</tr>
<tr>
<td>BIL 330</td>
<td>Ecology</td>
<td>3</td>
</tr>
<tr>
<td>or BIL 432</td>
<td>Ecology in the Galapagos</td>
<td></td>
</tr>
<tr>
<td>BIL 360</td>
<td>Comparative Physiology</td>
<td>3</td>
</tr>
<tr>
<td>Additional BIL electives</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

At least three credit hours of which must be at the 400-level or higher

Two biology laboratory or field courses beyond
BIL 151, BIL 161 are required as part of the additional BIL electives. Lab/field courses in approved departments other than Biology (e.g., MIC, MSC, NEU) may be counted towards this lab requirement.

Up to eight credit hours toward the major, but not the minor, may be selected from the following:

| Courses numbered 300 or higher in BMB, MBF or MIC |  |
| BME 305 Biomedical Technology |  |
| CSC 548 Bioinformatics Algorithms |  |
| RSM 521 Object-Oriented Programming And Agent-Based Modelling |  |
| MSC courses numbered 300 or higher with a biological topic |  |

A maximum of six credit hours of the following may be applied towards the major

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 371 Readings in Biology</td>
<td>2</td>
</tr>
<tr>
<td>BIL 372 Readings in Biology</td>

<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 495 Projects in Biology</td>
<td>3</td>
</tr>
<tr>
<td>BIL 496 Projects in Biology</td>
<td></td>
</tr>
<tr>
<td>BIL 497 Projects in Biology</td>
<td></td>
</tr>
</tbody>
</table>

A maximum of six credit hours of the following (no more than one of each option) may be applied towards the major.

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 281 Undergraduate Learning Intern in Biology</td>
<td>2</td>
</tr>
<tr>

<td>Applied Probability And Statistics</td>
<td></td>
</tr>
<tr>
<td>MSC 204</td>
<td>Environmental Statistics</td>
<td></td>
</tr>
<tr>
<td>MTH 224</td>
<td>Introduction to Probability and Statistics</td>
<td></td>
</tr>
<tr>
<td>PSY 292</td>
<td>Introduction To Biobehavioral Statistics For Non-Majors</td>
<td></td>
</tr>
<tr>
<td>CSC 120</td>
<td>Computer Programming I</td>
<td></td>
</tr>
</tbody>
</table>

Chemistry

Select one of the following Options:

Option 1: Standard Chemistry Sequence (addition of CHM 202, CHM 206 will fulfill the minor in Chemistry)

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHM 111 Principles of Chemistry I</td>
<td>4</td>
</tr>
<tr>
<td>CHM 113 &amp; CHM Laboratory I (recommended to be taken in the first year)</td>
<td>4</td>
</tr>
</tbody>
</table>

Option 2: Three-semester Chemistry Sequence (recommended for life sciences major; includes the minor in Chemistry)

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHM 121 Chemistry For The Biosciences I</td>
<td></td>
</tr>
<tr>

<tr>
<td>CHM 222 CHM212 Chemistry for the Biosciences III</td>
<td></td>
</tr>
<tr>
<td>CHM 113 Chemistry Laboratory I</td>
<td></td>
</tr>
<tr>
<td>CHM 114 Chemistry Laboratory II</td>
<td></td>
</tr>
<tr>
<td>CHM 205 Organic Chemistry Laboratory I</td>
<td></td>
</tr>
</tbody>
</table>

Physics

Two semesters of college physics with laboratory or three semesters of university physics with laboratory

Minor

A minor in chemistry, ecosystem science and policy, physics, geological sciences, marine sciences, biochemistry and molecular biology, computer science, mathematics, or microbiology and immunology

Total Credit Hours 90

1. Only one course may be counted towards the laboratory course requirement for the B.S. degree
2. A maximum of one credit hour may be applied towards the major or minor. These courses may be taken more than once each for general elective credit only, but only two credits from these options may count towards the major or minor.
3. This will fulfill the mathematics/statistics/computer programming requirement under the College of Arts and Sciences General degree requirements for the Bachelor of Science.
Minor in Biology

A biology minor consists of nine credit hours of BIL at the 200-level or higher taken in residence at the University of Miami. (Note: All courses in the minor must be in BIL. Courses from BMB, MBF, MIC, or BME, or other natural sciences approved as electives in the BIL major may not be counted towards the minor.)

Overall GPA in the BIL minor courses must be a minimum of 2.0.

All credit hours required for a Biology minor must be earned in residence at the University of Miami.

Chemistry

http://www.as.miami.edu/chemistry

Dept. Code: CHM

Introduction

Each undergraduate chemistry degree program requires:

<table>
<thead>
<tr>
<th>Core Courses</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHM 111 Principles of Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>CHM 112 Principles of Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>CHM 113 Chemistry Laboratory I</td>
<td>1</td>
</tr>
<tr>
<td>CHM 114 Chemistry Laboratory II</td>
<td>1</td>
</tr>
<tr>
<td>CHM 202 Organic Chemistry II (Lecture)</td>
<td>3</td>
</tr>
<tr>
<td>CHM 205 Organic Chemistry Laboratory I</td>
<td>1</td>
</tr>
<tr>
<td>CHM 206 Organic Chemistry Laboratory II</td>
<td>1</td>
</tr>
<tr>
<td>CHM 214 Quantitative Analytical Chemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

One year of Calculus

At least two semesters of Physics Plus Lab

Total Credit Hours 16

The requirements for a major are flexible and should conform to the objectives of the student. A grade of C- or higher must be earned in all courses taken for major or minor credit hour, and the Chemistry GPA must be 2.00 or higher. Credit hours earned in CHM 381 and CHM 382 do not count towards the major or minor.

Educational Objectives

The mission of the Bachelor’s degree program in the Chemistry Department is to promote an understanding and appreciation of the role of chemistry in modern society, especially as it relates to and integrates with other biological and physical sciences and societal issues facing humanity today such as the environment, health issues and technological advances.

Degree Programs

Three programs lead to degrees with a chemistry major:

1. The B.A. degree
2. The B.S. degree
3. The B.S. degree with certification by the American Chemical Society Committee for Professional Training of Chemists.

Departmental Honors

Honors in Chemistry may be earned by students who complete the B.S. degree in chemistry, plus at least five credit hours of CHM 488 and one credit hour of CHM 490, all with an average grade of at least 3.00. A written Honors Thesis and oral defense on the subject of the Honors Research must be presented by the student and approved by a Department Honors Committee.

Writing Requirement

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Chemistry should take CHM 320 or ENG 233.

Credit for Courses at the 100- and 200-Level

Credit hour may be earned in only one of the courses CHM 103, CHM 111 or CHM 151. Credit hour may not be earned in both CHM 104 and CHM 201.

Majors

Majors in Chemistry

- B.A. in Chemistry (p. 78)
- B.S. in Chemistry (p. 79)
- Certified B.S. in Chemistry (p. 79)

Minors

Minor in Chemistry

- Chemistry (p. 80)

B.A. in Chemistry

http://www.as.miami.edu/chemistry/

The B.A. degree requires 27 credit hours of chemistry. This major is designed for premedical students, high school science teachers, and others who choose a non-science minor. It may be combined with business courses in an interdisciplinary program. Variations within the program below may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner.

<table>

  & PHY 206 and University Physics II
  & PHY 207 and University Physics III
  & PHY 208 and University Physics II Lab
  & PHY 209 and University Physics III Lab

Advanced Courses
- CHM 316 Instrumental Analytical Chemistry 3
- CHM 320 Instrumental Methods in Chemistry and Biochemistry 2
- CHM 360 Physical Chemistry I (Lecture) 3
- CHM 364 Physical Chemistry (Laboratory I) 1
- CHM 365 Physical Chemistry II (Lecture) 3
- CHM 441 Inorganic Chemistry (Lecture) 3

BMB 401 Biochemistry For The Biomedical Sciences 3

Electives 3
- CHM 317 The Chemistry of Food and Taste.
- CHM 401 Environmental Chemistry
- Any 500-level CHM course

Total Credit Hours 58-59

The B.S. degree requires 40 credit hours of chemistry. This major meets the minimum entrance requirements of many graduate programs in chemistry. Variations within the above program may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner. For students who plan to do graduate work in physical chemistry, a double minor is recommended: Mathematics and Computer Science through 310 and 311, Physics through 350 and 360.

Certified B.S. in Chemistry

http://www.as.miami.edu/chemistry/

The American Chemical Society certified B.S. degree consists of:

Core Courses
- CHM 111 Principles of Chemistry I 3
- CHM 112 Principles of Chemistry II 3
- CHM 113 Chemistry Laboratory I 1
- CHM 114 Chemistry Laboratory II 1
- CHM 201 Organic Chemistry I (Lecture) 3
- CHM 202 Organic Chemistry II (Lecture) 3
- CHM 205 Organic Chemistry Laboratory I 1
- CHM 206 Organic Chemistry Laboratory II 1
- CHM 214 Quantitative Analytical Chemistry 3

Choose One of the Following: 8
- MTH 161 Calculus I
  & MTH 162 and Calculus II
- MTH 171 Calculus I
  & MTH 172 and Calculus II

Choose One of the Following: 10-11
- PHY 205 University Physics I
  & PHY 210 and Honors University Physics II-III
  & PHY 208 and University Physics II Lab
  & PHY 209 and University Physics III Lab
- PHY 205 University Physics I
  & PHY 206 and University Physics II
  & PHY 207 and University Physics III
  & PHY 208 and University Physics II Lab
  & PHY 209 and University Physics III Lab

Advanced Courses
- CHM 316 Instrumental Analytical Chemistry 3
- CHM 320 Instrumental Methods in Chemistry and Biochemistry 2
- CHM 360 Physical Chemistry I (Lecture) 3
- CHM 364 Physical Chemistry (Laboratory I) 1
- CHM 365 Physical Chemistry II (Lecture) 3
Educational Objectives

The educational objectives of the Department of Classics may be stated in a variety of ways, and on a number of levels. In terms of linguistic competency, students majoring (or minoring) in Classics are required to reach an appropriate level of fluency in reading ancient Greek or Latin, or both. In terms of cultural literacy, students of the Classics are educated within a rigorous curriculum exposing them to the great literary works and material cultures of ancient Greece and Rome. In terms of critical thinking, students of the Classics are trained to hone the skills of memory, analysis, and synthesis, skills that they will be able to apply for the rest of their lives in any realm of thought or action whatsoever.

The goal of an education in Classics is to foster and inculcate an ever-burgeoning awareness of what Cicero referred to as *humanitas* – in short, everything it is to be human. It is the mission of Classics to expose its students to the greatest thoughts and endeavors of the human race, and to encourage them to think about what that greatness consists in, and how to enlarge upon it. The profoundest educational objective of the Department of Classics is to preserve and study all that is important about the past, in order best to prepare for the future.

Degree Programs

The Department of Classics offers the Major and the Minor in Classics.

Major in Classics

The undergraduate Major in Classics at UM has four possible tracks. Greek, Latin, Greek and Latin, and Classical Civilization. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Classics should take three courses marked W from the list of GRE, LAT, and CLA courses offered in the catalogue.

General Education Rubrics

Courses in Classics labeled 'LAT' or 'GRE' and above the 201 level – that is, LAT 202, GRE 202, and higher – satisfy General Education requirements under the 'Literature' requirement of the 'Humanities' rubric.

Some courses in Classics labeled CLA satisfy General Education requirements under the 'Literature' requirement, while others do so under the 'People and Society' requirement. These are as follows:

### Literature

- CLA 224: The Heroic Journey
- CLA 246: Ancient Rhetorical Theory
- CLA 310: Survey of Ancient Greek Literature and Culture
- CLA 311: Survey of Classical Latin Literature and Culture
- CLA 315: The Classical Epic Tradition
- CLA 322: Monsters and Fantastical Creatures in Western Antiquity and Other Cultures
- CLA 340: Greek Tragedy
- CLA 360: Women In Greek And Roman Antiquity

### People & Society

- CLA 221: Sports & Society In The Ancient World
- CLA 222: Sexuality and Gender in the Ancient World
- CLA 232: Topics in Ancient Law, Scandalous Trails from the Ancient Legal World
- CLA 233: Ancient Medicine
Departmental Honors

A student may earn Honors in Classics by completing a ‘capstone’ project with a grade of B or higher. This project can be the senior thesis (CLA 495 and 496; 6 credits) or an Independent Study course (LAT 491, GRE 491, or CLA 491; 3 credits) that includes a substantial research paper. Either project must be supervised by a faculty member in the Classics Department. In order to qualify for a ‘capstone’ project, the student must have by the end of the junior year a minimum GPA of 3.5 in the Classics major and 3.3 overall.

In addition, Classics Majors, Classics Minors, and other students who meet certain academic criteria are eligible for membership in Eta Sigma Phi, the National Honors Society for Classics.

Majors

Majors in Classics

B.A. in Classics with Tracks in:

- Greek (p. 81)
- Latin (p. 81)
- Latin and Greek (p. 81)
- Classical Civilization (p. 81)

Minors

Minor in Classics

- Classics (p. 81)

B.A. in Classics - Classical Civilization Track

Select one of the following Options: 9

Option 1:
- LAT 101 Elementary Latin I
- LAT 102 Elementary Latin II
- LAT 201 Intermediate Latin I

Option 2:
- GRE 101 Elementary Ancient Greek I
- GRE 102 Elementary Ancient Greek II
- GRE 201 Intermediate Ancient Greek I

Select one additional course (202 and above) in either Latin (LAT) or Greek (GRE) 3

Select six Classics-in-translation (CLA) courses 18

Total Credit Hours 30

B.A. in Classics - Greek Track

GRE 101 Elementary Ancient Greek I 3
GRE 102 Elementary Ancient Greek II 3
GRE 201 Intermediate Ancient Greek I 3
Select five additional courses in Greek (GRE 202 and above) 15
Select two Classics-in-translation (CLA) courses 6

Total Credit Hours 30

B.A. in Classics - Latin Track

LAT 101 Elementary Latin I 3
LAT 102 Elementary Latin II 3
LAT 201 Intermediate Latin I 3
Select five additional courses in Latin (LAT 202 and above) 15
Select two Classics-in-translation (CLA) courses 6

Total Credit Hours 30

B.A. in Classics - Latin and Greek Track

LAT 101 Elementary Latin I 3
LAT 102 Elementary Latin II 3
LAT 201 Intermediate Latin I 3
GRE 101 Elementary Ancient Greek I 3
GRE 102 Elementary Ancient Greek II 3
GRE 201 Intermediate Ancient Greek I 3
Select two additional courses in Latin (LAT 202 and above) 6
Select two additional courses in Greek (GRE 202 and above) 6
Select two Classics-in-translation (CLA) courses 6

Total Credit Hours 36

Minor in Classics

Courses that qualify for the minor in Classics are taught each semester. A grade of C-minus or better is required in each course taken for the minor, as well as an overall GPA of 2.0 or higher.

Select one of the following: 3

- 3 credit hours in a Greek (GRE) course
- 3 credit hours in a Latin (LAT) course

Select 12 credit hours in Greek (GRE), Latin (LAT), or Classics-in-translation (CLA) courses in any combination desired 12

Total Credit Hours 15

Computer Science

http://www.cs.miami.edu

Dep't Code: CSC

Introduction

The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. The Department has faculty with strong accomplishments in the fields of algorithm engineering, automated
Bachelor of Science in Computer Science

reasoning, bioinformatics, computational complexity, computational geometry & computer graphics, cryptography & network security, data mining, molecular computation, multimedia systems, music information retrieval, robotics, scientific computing, semantic web, and wireless & mobile computing.

Educational Objectives
The Department of Computer Science educates students in the science of software development: the analysis of domain problems, the development of algorithms and programs, the use of specialist computing techniques, the system-software and hardware platforms, and the production and deployment of efficient and robust computer software. Instruction ranges from introductory programming classes and laboratories, through to research in various areas of computer science.

Degree Programs
The Department of Computer Science offers
- a Bachelor of Science (BS) major
- a Bachelor of Arts (BA) major
- a 5-year Bachelor of Science + Master of Science (BS+MS)
- a minor

Computer Science as a Second Major
A second major in Computer Science is available to all students. A second major in Computer Science requires completion of the requirements of either the Bachelor of Science version or the Bachelor of Arts version.

Writing within the Discipline
To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is Computer Science must take at least one of the following courses for a writing credit: CSC 431, CSC 405, ENG 233.

Departmental Honors
In addition to the University’s requirements for Departmental Honors, Departmental Honors in Computer Science requires completing a major and 6 additional approved credit hours (all CSC 4XX and CSC 5XX courses are approved). The major or additional credit hours must include at least 3 credit hours from CSC 410 and CSC 411.

Notes
- A grade of C- or better in all CSC courses is required in a major or minor.
- An overall GPA of 2.5 or better in all CSC courses is required in a major or minor. This GPA is computed using only courses from this department. If a course is repeated only the highest grade for the course is used.
- For a Computer Science major, at least 15 credit hours of CSC courses must be completed at the University of Miami.
- For a Computer Science minor, at least 9 credit hours of CSC courses must be completed at the University of Miami.

Majors in Computer Science
- B.S. in Computer Science (p. 82)
- B.A. in Computer Science (p. 83)
- Second Major in Computer Science (p. 84)

Minors
Minor in Computer Science
- Computer Science (p. 84)

Joint
Joint Degrees in Computer Science
- Five-Year B.S. + M.S. in Computer Science (p. 84)

Bachelor of Science in Computer Science
Students must complete the Core, a Track, and the Science & Ethics requirements.

ECE 570  Network Client-Server Programming
ECE 572  Object-Oriented and Distributed Database Management Systems
ECE 574  Agent Technology

Computer Science as a Second Major

A second major in Computer Science is available to all students. A second major in Computer Science requires completion of the requirements of a Computer Science major, either the Second Major in Computer Science, Fundamentals (p. 83) or the Second Major in Computer Science, with Tracks (p. 82).

Five-Year B.S. + M.S. in Computer Science

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science, and the requirements for a 30 credit hour Master of Science in Computer Science (p. 395) with thesis. No credit hours may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

• They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
• Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:
  - CSC 120 Computer Programming I 4
  - CSC 220 Computer Programming II 4
  - CSC 314 Computer Organization and Architecture 3
  - CSC 317 Data Structures And Algorithm Analysis 3
  - CSC 427 Theory Of Computing 3
  - MTH 161 Calculus I 4
  - MTH 224 Introduction to Probability and Statistics 3
  - MTH 309 Discrete Mathematics I 3

• They have completed 3 credit hours of CSC 410/CSC 411 in a research-oriented project.
• They have a GPA of at least 3.0 in the CSC courses taken towards their BS in Computer Science.

• They have advised the Director of Graduate Studies of their eligibility for the MS-phase.

Students in the MS-phase must complete 3 further credit hours of CSC 410/CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take 600 level courses that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree. Students in the MS-phase must submit their GRE scores before they are admitted to graduate student status.

Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

Minor in Computer Science

Criminology

http://www.as.miami.edu/sociology

Introduction

The major in Criminology provides a comprehensive understanding of crime and the criminal justice system. The major prepares students to assume roles of leadership in this critical area of modern society.
Courses are designed to review theory, research, and applications of knowledge regarding delinquency and crime, as well as to understand the manner in which offenders are processed. Students learn about the nature and extent of crime, different types of crime, and theories to explain crime. In addition, detailed analyses are made of the functions of the law, police, courts, and correctional systems and the ways in which these are linked to broader aspects of society. Students may also minor in Criminology. The Criminology major and minor are administered through the Department of Sociology.

**Educational Objectives**

CRIMINOLOGY courses have several broad objectives, including:

1. General education and development of critical thinking skills.

2. Undergraduate preparation for pursuing careers in such fields as law and society, in the local and state criminal justice systems (e.g., juvenile probation officer, pretrial services officer, crime analyst for criminal justice agencies), or in federal agencies (e.g., DEA).

3. Preparation for graduate study in criminology, criminal justice, sociology, or other social and behavioral sciences.

4. Preparation for law school.

**Degree Programs**

Students may earn a Bachelor of Arts degree in Criminology. The Department of Sociology also offers graduate degrees in Sociology (M.A., Ph.D.) with emphases in criminology and in other areas (race/ethnic relations and medical sociology).

**Departmental Honors**

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Criminology. They must also achieve a minimum of B in all Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.

2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee in the Department of Sociology. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor for all six credit hours.

3. Recruitment of eligible students is by departmental invitation during a student’s junior year.

**Advanced Writing and Communication Requirements**

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Criminology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered within the department; however, it is the student’s responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

**Alpha Phi Sigma**

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Phi Sigma, the National Criminal Justice Honor Society. Alpha Phi Sigma sponsors events that enhance the academic and social life of the department.

**Majors**

**Major in Criminology**

- B.A. in Criminology (p. 85)
- Criminology & Sociology Double Major; Combined Minor (p. 132)

**Minors**

**Minor in Criminology**

- Criminology (p. 85)
- Criminology & Sociology Double Major; Combined Minor (p. 132)

**B.A. in Criminology**

The major in Criminology consists of 31 credit hours, including:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Credit Hours</th>

</table>

<table>
<thead>
<tr>
<th>Elective Courses</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select four other courses offered by the Department</td>
<td>12</td>
</tr>
</tbody>
</table>

Total Credit Hours 31

1. EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education.
2. PSY 291 can be substituted for SOC 211 only by students who are also majoring or minoring in Psychology. SOC 212 remains a requirement.

**Other Requirements**

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 16 credit hours must be earned in residency in the Department; thus, only a maximum of 16 credit hours can be transferred from other institutions as eligible for the CRIMINOLOGY major.

**Minor in Criminology**

A minor in Criminology requires a minimum of 15 credit hours, including:
**Economics**

**Introduction and Educational Objectives**
Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

**Degree Programs**
A student pursuing the Economics major through the College of Arts and Sciences must meet the degree requirements set forth in this Academic Bulletin (p. 62). Additionally, a student pursuing the Economics major will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may be the major area of specialization of a candidate for the Master of Arts (p. 429) and Doctor of Philosophy (p. 420) degrees. Consult the Graduate Academic Programs section of the Bulletin for the general requirements of these programs.

**Majors**

**Major in Economics**
- Economics (p. 86)

**Minors**

**Minor in Economics**
- Economics (p. 87)

**Major in Economics**
A student pursuing the major in Economics through the College of Arts and Sciences will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

**Economics Major, Political Economy Track (P&S)**
The Political Economy track consists of a minimum of 24 credit hours of Economics courses according to the following:

<table>
<thead>
<tr>

Total Credit Hours 24

1. All advanced courses in Economics (300-500 levels) require ECO 302 as a pre-requisite.
2. Additional pre-requisite for ECO 302 and for ECO 303: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher
3. Additional pre-requisite for ECO 510: MAS 202 or MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of “C-” or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

Minor in Economics

Arts and Sciences students may minor in economics. (p. 164)
should consult their advisors regarding requirements for that major. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major. Students whose primary college is Arts & Sciences are required to complete four courses designated as "Writing Intensive" (also known as "W") courses. Those seeking a B.A. degree in ECS must complete at least two, but as many as four, ECS courses designated as "W". These include ECS 113, ECS 301, ECS 302, ECS 402, and ECS 403. Up to two "W" courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

1. Additional courses may be approved by the ECS program.
2. APY, ARC, ECO, ECS, GEG, HIS, INS, LAS, MAF, POL, SOC
B.S. in Ecosystem Science and Policy

The B.S. degree in Ecosystem Science and Policy is recommended for students intending to attend graduate or professional schools in pursuit of research or academic careers (including secondary or higher education). It is also suitable for those preparing for technical careers in government and private industries concerned with the environment. Students pursuing the B.S. may choose to have the major fulfill either the STEM or People & Society cognate; they will need to complete the other cognate plus the Arts & Humanities cognate. Students with a second major in another school or college should consult their advisors regarding requirements for that major and school or college. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major. Students whose primary college is Arts & Sciences are required to complete four courses designated as “Writing Intensive” (also known as “W”) courses. Those seeking a B.S. degree in ECS must complete at least two, but as many as four, ECS courses designated as “W”. These include ECS 113, 301, 302, 402, and 403. Up to two “W” courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

</tbody>
</table>

Complete one of the following ECS science tracks: 9-15

Environmental Chemistry Track: 1

Select three of the following (must include 2 labs):

- CHM 201 Organic Chemistry I (Lecture)
- & CHM 205 and Organic Chemistry Laboratory I
- CHM 202 Organic Chemistry II (Lecture)
- & CHM 206 and Organic Chemistry Laboratory II
- CHM 360 Physical Chemistry I (Lecture)
- & CHM 364 and Physical Chemistry (Laboratory I)
- CHM 365 Physical Chemistry II (Lecture)
- & CHM 464 and Physical Chemistry (Laboratory II)
- CHM 401 Environmental Chemistry

Environmental Health Track: 2

Select three of the following:

- CHM 201 Organic Chemistry I (Lecture)
- & CHM 205 and Organic Chemistry Laboratory I
- MIC 301 Introduction to Microbiology and Immunology
- MIC 322 Medical Parasitology

Geology Track: 3

- GSC 260 Earth Materials

Select two of the following:

- GSC 360 Depositional and Diagenetic Systems
- GSC 380 Paleontology and Stratigraphy
- GSC 410 Environmental Geochemistry
- GSC 420 Geophysics
- GSC 480 Structural Geology
- GSC 550 Hydrogeology

Geospatial Certificate Track: 4

- GEG 199 Introduction to GIS (Geographic Information Systems)
- GEG 391 Intermediate GIS (Geographic Information Systems)
- GEG 392 Remote Sensing of the Environment

Select two of the following:

- GEG 491 GIS and Environmental Modeling
- GEG 545 Special Topics (Web-GIS)
- GEG 545 Special Topics (Advanced SAR Techniques and Applications)
- GEG 545 Special Topics (GIS in Public Health)

Mathematics Track: 5

- MTH 359 Mathematical Models in Biology and Medicine

Select two of the following:

- MTH 210 Introduction to Linear Algebra
- MTH 310 Multivariable Calculus
- MTH 311 Introduction to Ordinary Differential Equations

Mathematics Courses

Select one of the following: 5-8

- MTH 151 Calculus I for Engineers
- & MTH 162 and Calculus II
- MTH 161 Calculus I
- & MTH 162 and Calculus II
- MTH 171 Calculus I
- & MTH 172 and Calculus II

Select one of the following Statistics courses: 3
Certificate in Sustainability

### Certificate in Sustainability

The certificate program is intended to equip students with knowledge and skills for implementing positive change through environmentally responsible practices in various fields; to serve as a curricular adjunct to sustainable initiatives at UM; to foster a culture of conservation at the University; to enhance students' preparation for a variety of careers, including engineering, architecture, business, marketing, government, and more; and to affirm UM's commitment to sustainability and complement its efforts to enhance environmental education.

To obtain the sustainability certificate, students will complete the People & Society cognate “Global Sustainability: Living on a Finite Planet.” (For details on the cognate, see below or use the cognate search engine at: https://canelink.miami.edu/psc/PUMIAJ/EMPLOYEE/HRMS/c/UMSR266_MENU.UMSR266_COGNSRCH.GBL)

The Global Sustainability cognate will earn students 9 of the 18 credit hours needed for the Sustainability Certificate.

In addition, students will take 9 more credit hours from courses included in the cognate or from a list of approved courses (see below). Students may take the additional 9 credit hours to align with their major or minor, or individual interests (e.g., energy, green buildings, natural resource management). Note that some courses on the list may require one or more prerequisites. It is the responsibility of students to obtain any permissions for waivers of prerequisites from the appropriate parties in a given School or College. Courses not on the list below may be substituted; students should obtain permission for substitutions in advance from the director or assistant director of ECS.

Students must be enrolled full time and all courses for the Certificate must be passed with no lower than a "C" grade. Students who successfully complete the program will receive a notation on their transcripts that they have received the Sustainability Certificate.

| Total Credit Hours | 68-77 |

1. Note: CHM 111/CHM 113, CHM 112/CHM 114 must be taken before the Chemistry concentration. Fulfillment of the Chemistry concentration earns a Chemistry minor.
2. Note: BIL 150/BIL 151, BIL 160/BIL 161 and CHM 121, CHM 221, CHM 222 should be taken before the Environmental Health concentration.
3. Note: GSC 110/GSC 114 and GSC 111 should be taken before the Geology concentration. This plus the Geology concentration earns a minor in Geological Sciences.
4. Note: Fulfillment of the Geospatial Certificate PLUS GEG 110 earns a geography minor. This minor does NOT qualify for an Arts and Sciences B.S.; students completing the geospatial certificate concentration must complete an additional minor in one of the following for an Arts and Sciences B.S.: Biology, Chemistry, Computer Science, Geology, Marine Science, Mathematics, Physics.
5. Note: Calculus II must be taken before the Mathematics concentration. Fulfillment of the Mathematics concentration earns Mathematics minor.
6. Note: ECS B.S. majors without a second major must take a GIS course, e.g., GEG 199.
Cognate: Global Sustainability: Living on a Finite Planet
Area of Knowledge: People and Society
Responsible Academic Unit: MSC Marine & Atmospheric Science

This cluster consists of three linked groups. Group one introduces human impacts on the natural world. Group two discusses environmental politics and policies. Group three considers societal implications of living on a finite planet.

Select exactly three of the following option groups:

Option Group: Human Impacts on Natural World
Select exactly one course from the following:  
- ECS 111 Introduction to the Earth's Ecosystem
- GSC 103 Evolution of the Modern Earth's Environment
- MSC 220 Climate and Global Change

Option Group: Environmental Politics & Policy
Select exactly one course from the following:  
- ECS 113 Introduction to Environmental Policy
- ECS 372 Special Topics in Ecosystem Science and Policy
- GEG 371 Environmental Geography: Current Issues
- POL 322 Environmental Politics and Policy
- MSC 340 Ocean Policy
- MSC 313 Coastal Law
- MSC 346 Climate Science and Policy

Option Group: Social Implications
Select exactly one course from the following:  
- ARC 223 Architecture and the Environment
- INS 322 Economics of Development and the Environment
- INS 421 Poverty and the Environment
- ECO 345 Environmental Economics
- MSC 345 Economics of Natural Resources and the Environment
- ECS 310 Sustainable Living
- GEG 311 Drinking Water: Past, Present, And Future
- GEG 341 Geography of Population and Development

Total Credit Hours 9

Prerequisite Courses
- GEG 371 has a prerequisite of 1 course in physical geography or ecology, or permission of instructor; the ecology requirement should be filled by most of the courses in option group 1
- POL 322 has a prerequisite of POL 201 or POL 202; it is only offered in Summer
- MSC 340 has a prerequisite of MSC 111
- ARC 223 has a prerequisite of ARC 102 and ARC 122
- INS 322 has a prerequisite of INS 102 or ECO 211 and ECO 212, or permission of instructor
- INS 421 has a prerequisite of INS 102 or permission of instructor
- ECO 345 has a prerequisite of ECO 211 and ECO 302
- MSC 345 has a prerequisite of ECO 211

- GEG 341 has a prerequisite of any 100 level GEG course.

Additional Courses
In addition to completing the “Global Sustainability” cognate, students must take at least 9 more credit hours to earn the sustainability certificate. Any courses within the “Global Sustainability” cognate not being used to satisfy the cognate may count for the certificate. Students may also choose courses from the list below. The list includes courses specific to various areas of study (e.g., engineering) that may require one or more prerequisites. Please see the relevant School/Department descriptions in this Bulletin for further details.

College of Arts and Sciences
Anthropology
- APY 307 Human Adaptation 3
- APY 360 Anthropology of Food 3
- APY 387 Cultural Evolution 3
- APY 435 Anthropology of Nature and Environment 3

Biology
- BIL 103 Introduction to Ecology. 3
- BIL 220 Evolution and Disease 3
- BIL 330 Ecology 3
- BIL 332 Tropical Ecology 3
- BIL 433 Conservation in Practice 3

Ecosystem Science and Policy
- ECS 201 Seminar Series in Contemporary Environmental Issues I 1
- ECS 202 Seminar Series in Contemporary Environmental Issues II 1
- ECS 301 Tools for Environmental Decision-Making: The Quantitative Perspective 3
- ECS 302 Perspectives on Environmental Decision Making 3
- ECS 433 Conservation in Practice 3
- ECS 501 Interdisciplinary Environmental Theory 3

Geography
- GEG 370 Conservation of Resources 3
- GEG 522 Urbanization in the Developing World 3
- GEG 530 Resources and Society 3

Geological Sciences
- GSC 106 Geological Influences on Society 3
- GSC 107 Natural Disasters - Hollywood Vs. Reality 3
- GSC 550 Hydrogeology 3

History
- HIS 229 Consumer Society: A Global History 3
- HIS 368 Nature and the Environment in American History 3

International Studies
- INS 101 Global Perspectives 3
- INS 102 Global Economics 3
- INS 201 Globalization and Change in World Politics 3

Latin-American Studies
Minor in Ecosystem Science and Policy

Education

Degree in Teacher Education for Elementary and Secondary Schools

The School of Education in conjunction with the College of Arts and Sciences and the School of Music offers a degree program in teacher education. Students majoring in Elementary may choose to earn their degree through the School of Education or the College of Arts and Sciences.

The program in Secondary Education enables a student to teach in a secondary school in the areas of English, Mathematics, Biology, Economics, Geography, History, International Studies or Political Science. Students wishing to earn certification in Secondary Education must complete a Bachelor of Arts or a Bachelor of Science degree in the College of Arts and Sciences with a major in Secondary Education.¹

Other

All education programs are approved by the State of Florida Department of Education. For specific information regarding required coursework, please see an education advisor.

Minors

Minor in Education

• Traditional Education (p. 92)

Certificates

Certificate in Education

• Professional Training Option (p. 92)

Minor in Traditional Education

The requirements for a minor in education consist of 15 credit hours passed with a C or higher, with an overall GPA of 2.5 in courses selected from the list of acceptable TAL departmental courses. A minimum of six credit hours must be numbered 300 or higher. This minor does not lead to teaching credentials.

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional component, one of the requirements to become a certified teacher in the State of Florida.

The PTO minor ranges from 17-18 credit hours. Upon completion of the program participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a Temporary Teaching Certificate in the State of Florida.

http://www.miami.edu/engineering

Minor in Engineering

The College of Engineering offers the student in the College of Arts and Sciences a variety of 15 credit hour minors designed to give the student a basic understanding of the technologies that support and shape our civilization. Minors may be elected in Architectural, Civil, Computer, Electrical, Environmental, Industrial, or Mechanical Engineering. The student is given considerable freedom in choosing courses in accordance with the student’s interests.

Faculty in the College is prepared to assist students seeking Engineering minors in the preparation of programs of study.

More detailed descriptions of these minors will be found in the COLLEGE OF ENGINEERING (p. 225) section of this Bulletin.

English

http://www.as.miami.edu/english

Dept. Code: ENG

Introduction

The English Department offers programs for students interested in a liberal arts education. While many English majors direct their studies toward careers in law, creative writing, secondary education, or university teaching and scholarship, an English major is just as valuable to students considering careers in business, journalism, or any of the health professions. Students who would like to learn more about any of these programs are encouraged to consult the Director of Undergraduate Studies in the Department of English, Ashe Bldg. 321.

Educational Objectives

English as a discipline offers an opportunity for a general humanistic education, and it develops skills in communication and analysis essential in most careers. An education in English teaches students to write, to think critically, to weigh values, and to communicate ideas. At the same time, it develops their creativity and aesthetic understanding, and affords them a knowledge of our literary heritage in all of its historical and cultural dimensions.

Degree Programs

The major in English leads to the degree of Bachelor of Arts.

Major in English

Students majoring in English must earn 30 credit hours in English courses (36 credit hours for Departmental Honors) and must meet the requirements for one of the tracks described below:

- The English Literature Major (p. 94),
- The Creative Writing Concentration (p. 95),
- The Concentration in British Literary History (p. 95), or
- The Women’s Literature Concentration (p. 95).

Credit hours earned for courses in freshman composition (ENG 105, ENG 106, ENG 107, and ENG 208) may not be applied toward the total number of credit hours required for the major. In each English course, the English major must earn a grade of C- or better, with an overall GPA in the major of 2.0 or better.

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

Minor

The Department of English offers two minors:

- The Minor in English (p. 96) and
- The English Minor in Creative Writing (p. 96).

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Departmental Honors in Literature

Students interested in seeking Departmental Honors in English should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the English Literature Major, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #2 of the English Literature Major.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester.
The student must receive a grade of B or higher in both courses in order to qualify for honors. (6 credit hours)

3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.

4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.

5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

Departmental Honors in Creative Writing

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses (including courses in creative writing) and a 3.3 average overall. In addition to meeting the requirements for the Creative Writing Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #3 of the Creative Writing Concentration.
2. Complete a six-credit-hour Senior Creative Writing Project. The student undertaking this project normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. (6 credit hours)
3. Receive for the project a recommendation for honors by the director of the Senior Creative Writing Project and by one other faculty reader designated by the Director of Creative Writing.
4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

Departmental Honors in Women's Literature

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the Women's Literature Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirements #2 and #3 of the Women's Literature Concentration.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. (6 credit hours)
3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.

5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

B.A. in English

Requirements for the English Literature Major are as follows:

1. Select ONE of the following (N.B., ENG 210 may NOT be used to fulfill this requirement):
   - ENG 201 World Literary Masterpieces I
   - ENG 202 World Literary Masterpieces II
   - ENG 205 Jewish Literature
   - ENG 211 English Literature I
   - ENG 212 English Literature II
   - ENG 213 American Literature I
   - ENG 214 American Literature II
   - ENG 215 English and American Literature by Women
   - ENG 260 African-American Literature
   - ENG 261 Literature of the Americas
   - 3 credit hours

2. Select FIVE LITERATURE courses numbered 300 or above. At least TWO must be numbered 400 or above. The courses must be distributed as follows:
   - Select two courses numbered 300 or above in literature before 1700
   - Select two courses numbered 300 or above in literature between 1700 and 1900
   - Select one course numbered 300 or above in literature since 1900
   - 15 credit hours

3. Select FOUR additional English courses other than freshman composition
   - 12 credit hours

Total Credit Hours

30 credit hours

1. i.e., any four courses designated ENG and numbered 200 or above, excluding ENG 208.

All students majoring in English must take at least one Writing (W) course offered by the Department of English.
B.A. in English - Concentration in British Literary History

Requirements for the Concentration in British Literary History are as follows:

1. ENG 211 English Literature I
2. ENG 212 English Literature II
3. Select EIGHT courses numbered 300 or above, at least FOUR of which must be numbered 400 or above. These courses must be distributed as follows:
   - Select one course numbered 300 or above on Shakespeare
   - Select one course numbered 300 or above on literary theory or the history of criticism
   - Select two additional courses numbered 300 or above in British literature (or a combination of British and other literatures) before 1800
   - Select two additional courses numbered 300 or above in British literature (or a combination of British and other literatures) after 1800
   - Select two electives numbered 300 or above

Recommended Courses
Select ancillary courses in Art History, Music, History, and Philosophy, in consultation with a departmental advisor

Total Credit Hours 30

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

B.A. in English - Concentration in Creative Writing

Students who declare a major in English with a Creative Writing Concentration should meet with the Director of Creative Writing.

Requirements for the Creative Writing Concentration are as follows:

1. Select one of the following workshop tracks: 12
   **Fiction Track**
   - ENG 290 Beginning Fiction Workshop
   - ENG 390 Intermediate Fiction Workshop
   - Select one of the following options:
     - ENG 404 Creative Writing (Prose Fiction) (TO BE TAKEN TWICE)
     - OR
     - ENG 404 Creative Writing (Prose Fiction) & ENG 408 and Writing Autobiography
   **Poetry Track**
   - ENG 292 Beginning Poetry Workshop
   - ENG 392 Intermediate Poetry Workshop
   - Select one of the following options:
     - ENG 406 Creative Writing (Poetry) (TO BE TAKEN TWICE)
     - OR

2. Select one of the following (N. B., ENG 210 may NOT be used toward the fulfillment of this requirement): 3
   - ENG 201 World Literary Masterpieces I
   - ENG 202 World Literary Masterpieces II
   - ENG 205 Jewish Literature
   - ENG 211 English Literature I
   - ENG 212 English Literature II
   - ENG 213 American Literature I
   - ENG 214 American Literature II
   - ENG 215 English and American Literature by Women
   - ENG 260 African-American Literature
   - ENG 261 Literature of the Americas
3. Select FOUR LITERATURE courses numbered 300 or above, at least TWO of which must cover literature earlier than 1900. TWO of the four courses must be numbered 400 or above.
4. Select one additional LITERATURE course numbered 200 or higher 3

Total Credit Hours 30

1  In this option, ENG 404 is to be taken once.
2  In this option, ENG 406 is to be taken once.

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

B.A. in English - Concentration in Women's Literature

Students considering this concentration may want to take a special Women's Studies section of ENG 106 in the freshman year.

Requirements for the Women's Literature Concentration are as follows:

1. ENG 215 3
2. Select FOUR literature courses numbered 300 or above, at least TWO of which must be numbered 400 or above. These courses must be distributed as follows:
   - Select two courses in literature before 1700
   - Select two courses in literature between 1700 and 1900
3. Select FIVE additional English courses other than freshman composition 15
4. Select THREE of the courses in 2 and 3, above, from the following list: ENG 372, ENG 373, ENG 374, ENG 490, ENG 494, or any English course numbered 200 or above (other than ENG 215) that is combined with a course in Women’s and Gender Studies
5. Recommended Courses
Select ancillary courses in Women’s and Gender Studies, in consultation with a departmental advisor

Total Credit Hours 30
Minor in Creative Writing

Students may declare an English Minor in Creative Writing through their school or college. Submitting materials to the Creative Writing Program is not required for the minor. The student completes, with a grade of C- or better in each course and with an overall GPA in the minor of 2.0 or better, at least 15 credit hours at the 200-level or above beyond the credits earned for freshman composition. The 15 credit hours must be distributed as follows:

- ENG 209 Creative Writing 3
- Select one LITERATURE course at the 200-level, excluding ENG 210 3
- ENG 219 Cw Beginning Mixed Genre Workshop 3
- ENG 391 Cw Intermediate Mixed-Genre Workshop 3
- Select one LITERATURE course at the 300-level or above 3

Total Credit Hours 15

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Minor in English

The student minoring in English completes, with a grade of C- or better in each course and with an overall GPA in the minor of 2.0 or better, at least 15 credit hours at the 200-level or above beyond the credits earned for freshman composition. The 15 credit hours must be distributed as follows:

- Select one LITERATURE course at the 200-level 3
- Select one LITERATURE course at the 200-level or the 300-level 3
- Select one LITERATURE course at the 400-level 3
- Select TWO additional English courses other than freshman composition 6

Total Credit Hours 15

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Geography and Regional Studies

http://www.as.miami.edu/geography
Study Abroad
Majors are strongly encouraged to study abroad. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in a foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

Degree Programs
The major in Geography leads to Bachelor of Arts degree.

Departmental Honors in Geography
The Department of Geography encourages its majors and minors to intensify and deepen their knowledge of Geography through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in Geography that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in Geography or other disciplines.

Minimum requirements for the program are as follows:
1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in Geography of at least 3.50; and
3. a thesis that is approved by departmental faculty.

Students have 3 options for writing the thesis.
1. Students may take 6 credit hours of independent study (GEG 525) with one or more departmental faculty.
2. Students may take a 3 credit hour course offered at the 300-level or above and 3 credit hours of independent study (GEG 525).
3. In exceptional circumstances, a student’s thesis may be written as part of the requirements for earning 6 credit hours in Geography at the 300-level or above.

In all three cases, the thesis must be a single, coherent work of scholarship through which the student earns 6 credit hours in Geography over the course of two semesters.

A Geography faculty member must serve as the Honors thesis advisor, and a second reader, who may be from another department, must be selected in consultation with the thesis advisor. The thesis must be at least 30 pages in length (double spaced, 12 point font), not including tables and figures. Once the topic and committee are secured, students should turn in their signed Departmental Honors Thesis Form to the main office of the Geography Department.

In addition to completing the written thesis, students must orally present the results of their work to faculty and students at a special honors colloquium to be held at the end of the semester.

Majors

Majors in Geography and Regional Studies
• B.A. in Geography as a First Major (p. 97)

Minors

Minor in Geography and Regional Studies
• Geography (p. 98)

Certificates

Certificate in Geography and Regional Studies
• Geospatial Technology (p. 97)

B.A. in Geography as a First Major
1. Students must complete at least 30 credit hours in Geography with a grade of C- or higher.
2. The overall GPA in courses counted toward the major must be 2.00 or higher.

<table>
<thead>
<tr>

Geospatial Technology Certificate
This Certificate Program is designed to benefit students who seek to enhance their skills in geospatial technologies, especially Geographic Information Systems (GIS) and satellite remote sensing. Students will be exposed to standard software tools used in the industry (ArcGIS), as well as satellite image data. Students who earn the Certificate will enhance their employment prospects and/or advance their careers in geospatial
technology, particularly in job settings that stress the use of satellite remote sensing and vector-based GIS.

The Certificate requires a minimum of 15 credit hours, including 3 core courses and 2 or more electives completed with at least a C- grade in each course. Students may also receive up to 6 credit hours toward the certificate for past course work completed at UM or other accredited colleges and universities within the past 3 years. At most one course may be taken for credit only.

</tbody>
</table>

Total Credit Hours | 15

Note that all courses from the Certificate Program can be double counted toward the major.

Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center or with the GIS Program Director. Upon approval by the GIS Program Director, 3 to 4 credit hours may be earned with an internship (GEG 535).

For more information e-mail terghazar@miami.edu to make an appointment.

Minor in Geography

1. Students must complete at least 15 credit hours in Geography with a grade of C- or higher.
2. At least 6 credit hours must be at the 300-level or higher.

Geological Sciences

http://www.as.miami.edu/geology

Dept. Code: GSC

Introduction

Geological Sciences is concerned with Planet Earth, its origin, evolution, structure, internal and surface processes, mineral resources, environmental preservation, global dynamics, paleoclimate reconstruction, and life history. Geologists use their knowledge of chemistry, biology, physics and mathematics to solve Earth problems.

Educational Objectives

Geological Sciences undergraduates are prepared for careers in industry as well as graduate study in geosciences, the environmental sciences, and marine sciences. Career paths include research and teaching, as well as employment in the petroleum and mineral industries and in industries and government organizations concerned with energy resources, geodynamics, the marine environment, conservation, and climate change.

Degree Programs

The Department of Geological Sciences offers three undergraduate degree major programs and two double major programs:

- Bachelor of Science (B.S.)
- Bachelor of Arts (B.A.) in Geological Sciences
- Five-year Master of Science Program (M.S.)
- Geological Sciences/Marine Science (Double Major)
- Geological Science/Ecosystem Science and Policy (Double Major)

For the Geoscience Graduate Program please see the Department of Marine Geosciences (p. 520) at the RSMAS campus.

Double Major

Double majors are offered in cooperation with the Marine and Atmospheric Science Program and the Ecosystem Science and Policy Program.

Marine Science (MSC)

This program consists of a major in the Geological Sciences and a major in Marine Science. Interested students should read the information under Marine and Atmospheric Science in this Bulletin and contact the Marine Science office (184 Cox Science or 305-284-2180) for details.

Ecosystem Science and Policy (ECS)

This program consists of a major in Geological Sciences and a major in Ecosystem Science and Policy (ECS). Interested students should read the information under ECS in this bulletin and contact the ECS office (058 Cox).

Departmental Honors

Honors in Geological Sciences may be earned by students in good standing within the University Honors program. In addition to their general requirements, a student must have an overall GPA of 3.0 or better, and also perform research beginning prior to their senior year, resulting
in a written Honor’s Thesis and oral defense approved by the student’s thesis advisor.

**Writing and Communications Requirement**

To satisfy the College of Arts and Sciences writing and communications requirement in the discipline, students majoring in Geological Sciences should take at least two of the following courses (GSC 114, GSC 310, GSC 462, GSC 560).

**Majors**

**Majors in Geological Sciences**

- B.S. in Geological Sciences (p. 99)
- B.A. in Geological Sciences (p. 99)

**Minors**

**Minor in Geological Sciences**

- Geological Sciences (p. 100)

**Joint**

**Joint Degrees in Geological Sciences**

- Five Year B.S./M.S. in Geological Sciences and Marine Geology (p. 100)

**B.A. in Geological Sciences**

The B.A. in Geological Sciences is recommended for science oriented students who plan to use an understanding of Earth systems in their professional careers but desire a broader liberal arts education or are pursuing a dual major outside the sciences. B.A. students must complete a core curriculum of 24-27 credit hours including:

Select two of the following: 6-7

<table>

GSC 114 Earth Processes Lab 2

GSC 260 Earth Materials 4

GSC 360 Depositional and Diagenetic Systems 4

GSC 482 Field Methods 2

Select eight additional credit hours at the 300 – 500 level with a grade of C- or better and with an overall GPA of 2.0 8

Students are strongly encouraged to take:

GSC 580 Summer Field Geology

GSC 231 Field Study of Reef Systems Through Time (offered during spring break)

or GSC 311 Field Study of Volcanoes and Society

Total Credit Hours 26-27

**B.S. in Geological Sciences**

The B.S. in Geological Sciences is recommended as preparation for graduate school and careers in professional research and science teaching. As described in sections 3 and 4 below, a B.S. in Geological Science requires a strong foundation in mathematics and several applied sciences.

**Core Curriculum**

<table>

**Summer Field Course for B.S. Candidates**

GSC 580 Summer Field Geology (or an approved field course through another university) 4

**Calculus**

Select one of the following: 8

- MTH 161 Calculus I
  & MTH 162 and Calculus II
- MTH 171 Calculus I
  & MTH 172 and Calculus II

Select either one semester of a computer course or a statistics course 3

**Chemistry**

CHM 111 Principles of Chemistry I 3

**Recommended Courses:**

CHM 112 Principles of Chemistry II

CHM 113 Chemistry Laboratory I

CHM 114 Chemistry Laboratory II

**College Physics**

PHY 101 College Physics I & PHY 102 and College Physics II 8

**Recommended Courses in lieu of College Physics:**

PHY 205 University Physics I

& PHY 206 and University Physics II

Complete the “Required Areas of Study” of the College (see under COLLEGE OF ARTS AND SCIENCES in this Bulletin)

**Minor**

Select a Minor from the following:

- Biology
- Chemistry
- Computer Science
- Ecosystem Science and Policy
- Marine and Atmospheric Science
- Mathematics
Physics

1. Must complete with a grade of C- or better and with an overall GPA of 2.0.
2. The field course (GSC 580 or an approved equivalent at another University) is required for B.S. students and encouraged for others in order to gain practical experience in the skills of observation, interpretation, measuring, sampling, mapping and report writing. This requirement, when completed, has proven to be a strong asset when applying for graduate work or employment.

Geological Sciences B.S. students desiring a minor in Ecosystem Science and Policy must take:

<table>

| **Total Credit Hours** | 15 |

1. ECS 301, ECS 380 series, and ECS 580 series; and ECS 372 series with approval of Departmental Chair.

Five Year B.S./M.S. in Geological Sciences and Marine Geology

A 5-year B.S./M.S. in Geological Sciences and Marine Geology allows qualified students to complete a master’s degree in one year of study beyond the B.S.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences. The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree above with the Honors option. By the beginning of their junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor. Contact the Geological Sciences chair at the departmental office (305-284-4253) for more information.

Minor in Geological Sciences

The minor in Geological Sciences consists of 16 credit hours in courses numbered 110 or higher. A minimum grade of "C-" must be earned in each course with an overall GPA of 2.0.
Introduction

The International Studies major provides a focused educational experience aimed at familiarizing students with the key structural features and dynamics of the international system and preparing them to enter the growing international job market. Processes of globalization, in part driven by global capital flows, expanding trade and the unrelenting development of communication and information technologies, have affected virtually everyone in every country, often in ways we are just beginning to understand. These developments often pose serious problems for government and other societal institutions, while also creating a demand for individuals who understand international processes. Jobs in virtually all sectors have acquired a decidedly international dimension, whether in trade, tourism, finance, public policy, government, or education. INS Graduates have moved on to the corporate world, the public sector, started their own businesses, or have continued their studies at the graduate level (i.e. Law, Business, and International Studies).

Educational Objectives

International Studies seeks to provide students with the ability to understand:

- International politics within the context of interstate relations and foreign policy.
- International economics and its sub-discipline international political economy, including such issues as trade and production, money and finance, and development.
- Social science research methods including qualitative, quantitative, comparative case study and formal modeling.

Students are encouraged to explore interdisciplinary options that further their understanding of international studies. This type of course work can be taken in other disciplines offered at the university or taken outside the institution, either through exchange programs or other inter-institutional options provided by UM. Students will demonstrate the ability to synthesize the various thematic areas of the discipline through required participation in advanced seminars. Seminars will stress analytical participation, oral presentations and the ability to interpret and critique core theoretical readings.

Degree Programs

International Studies provides both a major and minor option for students. The flexibility of the program often allows students to double major without the need to extend their university studies. Students are encouraged to speak with the International Studies advisor to explore such possibilities. The major in International Studies leads to the degree of Bachelor of Arts.

Advanced Writing & Communication Requirements

Details of the Advanced Writing and Communication Proficiency:

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student’s major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two courses towards the writing requirement.
Departmental Honors
The Department of International Studies encourages its majors to intensify and deepen their knowledge of the field through its departmental honors program. The program is designed to give students the opportunity to explore various topics and problems in international studies that are of particular interest to them, to work more closely with departmental faculty, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in international studies and related fields.

Minimal requirements for the program are as follows:
1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in international studies of at least 3.50; and
3. a thesis that is approved, with a grade of at least B+, by a member of the departmental faculty.

After reaching agreement with a member of the faculty who will serve as the honors thesis advisor, students writing a senior honors thesis will enroll in INS 418 and INS 419, Honors Thesis, for a total of six credit hours [the credit hours may be spread over two semesters or taken in a single semester]. The thesis itself is expected to be an extended, coherent work of scholarship on an issue of relevance in the field of international studies.

INS Electives and Interdisciplinary Options
Select six credit hours of electives at the 300 level or above. ³ 6

Total Credit Hours 30

¹ These courses must be completed before taking the Thematic Core courses.
² Additional classes will be counted toward the elective portion of the INS major, if taken. Other courses, including classes in other disciplines, may be taken with the approval of the INS Advisor.
³ With the approval of the INS Advisor, students may take courses from other departments outside of INS such as Geography and Regional Studies, History, Anthropology, Sociology, Political Science, Economics, Religion, Art History, Foreign Languages, Environmental Science, et cetera. Appropriate study abroad courses, an approved internship (INS 519), or an honors thesis (INS 418 & INS 419) may also be used to fulfill elective credit hour requirements.

Important Advising Notes for all International Studies Majors

1. Double Counting: Of the combined courses in the Thematic Core and the INS Electives, no more than 6 credit hours may count double towards a second major. A student may not count any course used to fulfill the requirements of the INS major toward a minor requirement.
2. Study Abroad: Students are strongly encouraged to study abroad for a summer, a semester, or an entire year, depending on the program. Study abroad at carefully selected institutions will complement the student's curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a
foreign culture. The study abroad experience need not result in credit hour overloads or extended time spent in the program.

3. **Internship Credit Hour**: Students are encouraged to find a suitable internship during their undergraduate career. Upon approval by an advisor in the International Studies Undergraduate Program Office, 3 credit hours may be earned with an internship (INS 519), either toward the major or as elective credit hours (depending on the relevance of the particular internship to the INS major). The University’s Toppel Career Planning and Placement Center regularly advertises internships.

4. **Academic Standing**: Only courses in which a grade of C- or better is attained, may be counted towards the International Studies major and students must maintain a GPA of 2.75 or better in all major requirements (30 credit hours).

### Minor in International Studies

**Requirements for the Minor in International Studies (15 credit hours)**

The International Studies Minor consists of two parts:

1. 6 credit hour set of introductory courses;
2. 9 credit hours in advanced courses.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Total Credit Hours** 9

1. Advanced level courses from other departments may be taken if approved by the INS advisor. Only courses in which a grade of C- or better is attained may be counted towards the minor in International Studies, and students must maintain a GPA of 2.75 or better in all minor requirements (15 credit hours).

### Judaic Studies

http://www.as.miami.edu/judaic

**Dept. Code: JUS**

**Introduction**

The George Feldenkreis Program in Judaic Studies is a broad, flexible, interdisciplinary program designed for undergraduates to gain an understanding of Jewish civilization and its diverse cultural experiences. The program, which is non-theological in orientation, is an academic exploration of the multi-faceted, socio-historical, 4,000-year record of the Jewish people. Courses taught by and combined with the program, highlight the variety of cultural, political, social, and religious experiences of Jews in different times and places.

### Educational Objectives

The program is structured to provide an in-depth liberal arts education that will constitute a foundation for advanced academic study, professional careers in a variety of fields, and a more complex and rich understanding of the Jewish world. Judaic Studies courses meet distribution requirements for the Humanities and Social Sciences in the College of Arts and Sciences, the College of Engineering, the School of Communication, the School of Business, and the Frost School of Music.

### Advanced Writing and Communication Requirement

Students majoring in Judaic Studies satisfy the college of Arts and Sciences "Writing requirement in the discipline" when they take any course in Jewish or Israeli literature offered by the Department of English.

### Holocaust Survivors Service Internship (JUS 205/JUS 206)

Interns meet on a 1 to 1 basis with Holocaust survivor, who currently reside in South Florida, and gain experiences that will offer them valuable, once-in-a-lifetime opportunity to meet with survivors of the Holocaust. Students are expected to commit to two semesters of service for 3 credit hours each semester (A total of 6). Credit hours may be earned for JUS, REL, or Social Science requirements.

Students who participate in the program will assist Holocaust survivors as "friendly visitors." Student volunteers are scheduled to meet regularly each semester with a UM faculty member to share their experiences and to participate in enrichment activities.

Interns will also earn a stipend of up to $250 per semester to cover any out of pocket expenses that may incur. This will be based on the number of visits to survivors.

The program is open to students of all denominations and backgrounds. * Finger Printing and Background checks will need to be completed once registered for the program.

<td>1</td>
</tr>
</tbody>
</table>
One course in Ancient Jewish History and Society and one course in Modern Jewish History and Society. Courses will be designated appropriately by the Program Director each semester.  

15 more credits (5 courses) in classes listed in the Judaic Studies Degree Audit or combined sections approved for JUS credit, 9 credits of which must be completed at the 300-level or higher. Students who complete HEB 201 need only complete 6 credits at the 300-level or higher.  

1 Can be used simultaneously to fulfill the College of Arts and Sciences Language requirement.  

2 Courses will be designated appropriately by the Program Director each semester.  

3 12 credit hours of which must be completed at the 300-level or higher. Students who complete HEB 202 need only complete 9 credit hours at the 300-level or higher.

Honors in Judaic Studies consist of the above plus an Honors Thesis and one additional elective at the 300 level or higher. A grade of "C-" or better must be attained in each course taken for the major with an overall GPA of 2.0.

Minor in the George Feldenkreis Program in Judaic Studies

One of the following 3 courses:

<table>

<td>3</td>
</tr>
</tbody>
</table>

Four courses in Ancient/Modern Jewish History and Society (to be designated as such and published by the JUS Program Director each semester). Students are strongly encouraged to take at least one course in Ancient Jewish History and Society and at least one course in Modern Jewish History and Society.

Students are strongly encouraged to take HEB 101 as one of the above four courses.

A grade of "C-" or better must be attained in each course with an overall GPA of 2.0.

Latin American Studies

http://www.as.miami.edu/las

Dept. Code: LAS

Introduction

Latin American Studies offers an interdisciplinary approach to learning about the politics, economics, cultures, and societies of Latin America and the Caribbean. Undergraduate courses are offered in Africana Studies, American Studies, Anthropology, Architecture, Art and Art History, Biology, Communication, Economics, Geography, History, Journalism, International Studies, Marketing, English, Modern Languages and Literatures, Music, Musicology, Political Science, Religious Studies, Sociology, and Women’s and Gender Studies. The major in Latin American Studies is designed for the student who wants to acquire background knowledge about the area or who is interested in some aspect of Latin American and Caribbean affairs, such as government, law, business, research, journalism, education or public health. Students are strongly encouraged to spend at least one semester abroad on a program with a Latin American and/or Caribbean Studies component (see Office of International Education and Exchange Programs (p. 372))

Educational Objectives

The goal of the BA in Latin American Studies is to acquire, advance and disseminate knowledge of the history, literature, culture, politics, economics, and natural and social sciences of the regions within an interdisciplinary framework. This program also places special emphasis on the languages and cultures of Hispanophone, Francophone and Lusophone Americas, including the transnational study of Latin Americans, Caribbeans and their descendants in the United States. Students should leave the program with the following:

- the analytical and methodological tools needed to conduct interdisciplinary research;
- the ability to read, write and think critically about primary and secondary sources;
- a general knowledge of the different regions that comprise Latin America, the Caribbean and their Diaspora as well as a critical understanding that the geographic, political, and cultural boundaries that have traditionally defined the “area” as an object of study are not isomorphic and are connected to the interests of European and North American powers;
- a critical understanding of the competing ways in which Latin American and Caribbean peoples have represented themselves paying particular attention to race/ethnicity, class, gender and sexuality, language, religion, migration, transculturation, and other historical, social, economic, and political factors;
- a language competency in either French, Spanish, Portuguese, or Haitian Creole at an intermediate level and a beginning competency in a second language spoken in the region (either French, Spanish, Portuguese, Haitian Creole indigenous language of Latin America and the Caribbean);
- a “Beyond the Books” experience that will bridge the gap between the university and the surrounding communities, and will help solidify a long-term interest in and commitment to the regions.

Degree Programs

- Bachelor of Arts

Departmental Honors

The Latin American Studies Program invites its undergraduate majors and minors to apply for departmental honors and expand their knowledge of Latin America and the Caribbean. Admission into the departmental honors program is by invitation, but any student who believes her or himself qualified may apply to the academic director of Latin American Studies, preferably during the sophomore or early junior year. Candidates for departmental honors work closely with one faculty member for two semesters to engage in original research in an area of her/his choice. LAS majors and minors with a cumulative G.P.A. of at least 3.0 and an overall G.P.A. of at least 3.5 in the LAS major or minor may earn
departmental honors by completing two honors thesis courses, LAS 495 and LAS 496 (Honors I & II). Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as honors thesis advisor and obtain written approval of the Academic Director. The faculty member with whom the student works will help determine the nature of the independent research project. Candidates must complete a thesis (with a grade of at least a B+, which must be approved by the thesis advisor) and present the work at the LAS Annual Student Symposium or another similar event showcasing undergraduate research at the university.

Advanced Writing and Communication Requirement
To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Latin American Studies should take at least one course with a "W" designation. These courses include (please refer to CaneLink or the LAS Course Booklet for details on courses that fulfill the writing requirement, as offerings change every semester):

Advanced Language Proficiency in Spanish, French, Portuguese, or Haitian Creole
Select one of the following: 3
- SPA 203 Advanced Spanish
- FRE 203 Advanced French
- HAI 201 Intermediate Haitian Creole I (or equivalent)
- POR 202 Intermediate Portuguese II

Secondary Language Competence in another Latin American or Caribbean Language
Select one of the following: 3
- SPA 105 Accelerated Elementary Spanish
- FRE 105 Accelerated Elementary French
- POR 105 Beginning Portuguese for Spanish Speakers
- HAI 102 Elementary Haitian Creole II (or equivalent)
- A Latin American, Caribbean, or Indigenous language course in the DILS program

Upper Division LAS Courses
Select two courses in Latin American history 6
Select six courses in classes listed in LAS or combined with LAS 1 18
Select one of the following: 3
- LAS 494 Independent Study in Latin American and Caribbean Studies
- LAS 501 Interdisciplinary In Latin American And Caribbean
- LAS 505 Internship in Latin American and Caribbean Studies
- LAS 506 Civic Engagement In Latin America

Total Credit Hours 36

1 12 credit hours of which must be completed at the 300-level or higher. Courses that are not combined with LAS but do have a significant focus on Latin America may be taken with the approval of the academic director. A freshman seminar with a significant focus (25% or more) on Latin America or the Caribbean may be counted towards this requirement. SPA 203 and FRE 203 may be counted towards this requirement if not used to satisfy the aforementioned language requirements.

A C- or better for all major courses, with a GPA of 2.0 are required for successful completion of the LAS Major.

Majors
Major in Latin American Studies
- B.A. in Latin American Studies (p. 105)
- B.A/M.A in Latin American Studies (Fellows in Latin American Studies) (p. 106)
B.A./M.A in Latin American Studies
(Fellows in Latin American Studies)

FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM’s world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master’s level):

**CAS GENERAL EDUCATION REQUIREMENTS**

**Total Credit Hours**

150

1 Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).
2 MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.
3 Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. **FILAS students already fulfill this requirement when completing the language requirements cited below.**
4 Degree candidates must complete at least four writing courses, and at least one such course must be in the student’s major discipline.
5 Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. **However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the Collage of Arts & Sciences, “three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, 112, or 202), Geological Sciences, Marine Science (except MSC 313 and 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate.”**

**FILAS Admission Requirements**

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
• Statement of interest in FILAS, emphasizing prior language or area study
• To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

**Minor in Latin American Studies**

The minor in Latin American Studies may be obtained by completing LAS 101 or LAS 290 and 12 more credit hours in approved LAS courses. At least three of these courses should be taken at the 300 level or above.

**UBuenos Aires**

Students enrolled in the UBuenos Aires study abroad program who are interested in completing an LAS minor must enroll in the following courses at Universidad de Belgrano:

• History of Latin America or Estudios Culturales Latinoamericanos (either one must fulfill the UM equivalency for LAS101)
• One Spanish language course or, for students at the advanced level in Spanish, one course taught in Spanish not to include PEAL262 or PEAL302
• Three additional courses from those listed in the "Available Courses List": https://goabroad.miami.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=10256

Students wanting to apply these classes towards an LAS major should consult with the academic director of Latin American Studies for further guidance.

**Mathematics**

http://www.math.miami.edu

Dept. Code: MTH

**Educational Objectives**

The aim of our mathematics degree programs is to provide students with a core knowledge of mathematics essential to the understanding of science and other disciplines. Students should gain substantial problem solving and critical reasoning skills and should develop an understanding of the conceptual underpinnings of mathematics. The knowledge gained through these programs should provide the necessary background in mathematics for those students planning to go on to graduate study in mathematics and related fields. This knowledge should also prepare those students who will be immediately entering careers in science, business, education or other fields which are increasingly making use of mathematics.

**Degree Programs**

• Bachelor of Arts and Bachelor of Science

**Major**

The requirements for a major in mathematics (p. 107) vary according to the objectives of the student. There are seven courses required of all mathematics majors.

An additional four courses are required, selected from one of the following track options:

- Core Mathematics
- Applied Analysis
- Computational Mathematics
- Probability and Statistics
- Secondary School Teaching
- Mathematical Economics

**Minor**

A student seeking a minor in mathematics (p. 108) must have credit for a calculus sequence: MTH 161-MTH 162 or MTH 171-MTH 172.

In addition, a minor in mathematics requires three courses from a list of approved courses for the minor. (p. 108) All three courses must be taken in the Department of Mathematics, University of Miami. A grade of C- or better is required for each of the three courses applied toward the minor and the quality point average for the three courses must be 2.5 or above.

**Departmental Honors**

Requirements for Departmental Honors in Mathematics (p. 107):

The student must complete three sequences from a list of approved two-course sequences. The student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

For requirements leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees, with a major in mathematics, see the Bulletin of the Graduate School (p. 408).

**Majors**

B.A. or B.S. in Mathematics (p. 107)

**Minors**

Minor in Mathematics (p. 108)

**B.A. or B.S. in Mathematics**

http://www.math.miami.edu

The requirements of a major in mathematics vary according to the objectives of the student. There are seven courses required of all mathematics majors. An additional four courses are required selected from one of six track options: (p. 108)

(Requirements for Departmental Honors in Mathematics (p. 108) are given at the end of this section.)

**Courses Required of All Mathematics Majors:**

**Track Options:**

Select four courses from one of the following Tracks: 12

**Core Mathematics Track:**
- Select four of the following:
  - MTH 510 Linear Algebra
  - MTH 512 Elementary Complex Analysis
  - MTH 531 Topology I
  - MTH 532 Topology II
  - MTH 534 Introduction to Real Analysis II
  - MTH 551 Introduction to Differential Geometry
  - MTH 562 Abstract Algebra II

**Applied Analysis Track:**
- MTH 311 Introduction to Ordinary Differential Equations
- MTH 512 Elementary Complex Analysis
- Select one of the following:
  - MTH 513 Partial Differential Equations I
  - MTH 512 and Partial Differential Equations II
  - MTH 515 Ordinary Differential Equations
  - MTH 516 and Dynamics and Bifurcations

**Computational Mathematics Track:**
- MTH 320 Introduction to Numerical Analysis
- CSC 317 Data Structures And Algorithm Analysis
- MTH 520 Numerical Linear Algebra
- MTH 521 and Numerical Methods In Differential Equations

**Probability and Statistics Track:**
- MTH 224 Introduction to Probability and Statistics
- MTH 524 Introduction to Probability Theory
- MTH 525 and Introduction to Mathematical Statistics
- MTH 542 Statistical Analysis

**Secondary School Teaching Track:**
- MTH 309 Discrete Mathematics I
- Select two of the following:
  - MTH 502 History of Mathematics
  - MTH 504 Foundations of Geometry
  - MTH 505 Theory of Numbers

**Mathematical Economics Track:**
- MTH 524 Introduction to Probability Theory
- MTH 525 and Introduction to Mathematical Statistics
- ECO 512 Mathematical Economics (II)
- Select one of the following:
  - ECO 520 Econometrics
  - ECO 521 Graduate Macroeconomic Theory
  - ECO 533 Advanced Microeconomic Theory

Notes:

- Course work in physics is desirable.

- This option is only for those obtaining a teaching credential.

- It would be useful for students planning to do graduate study in mathematics to complete the following courses: MTH 531, MTH 532, MTH 533, MTH 534, MTH 561, MTH 562.
- Students interested in actuarial science should choose the Probability and Statistics option, for these students a finance minor is recommended.
- Transfer students will be permitted to apply up to 14 transfer credit hours towards the major; however, the courses MTH 461 (or MTH 561) and MTH 433 (or MTH 533) must be completed at the University of Miami.
- A grade of C- or better is required for each course applied toward the major; the overall quality point average for University of Miami courses applied toward the major must be 2.5 or above.

**Requirements for Departmental Honors in Mathematics:**

- Select three of the following sequences 18
  - MTH 513 Partial Differential Equations I
  - MTH 514 and Partial Differential Equations II
  - MTH 515 Ordinary Differential Equations
  - MTH 516 and Dynamics and Bifurcations
  - MTH 520 Numerical Linear Algebra
  - MTH 521 and Numerical Methods In Differential Equations
  - MTH 524 Introduction to Probability Theory
  - MTH 525 and Introduction to Mathematical Statistics
  - MTH 531 Topology I
  - MTH 532 and Topology II
  - MTH 533 Introduction to Real Analysis I
  - MTH 534 and Introduction to Real Analysis II
  - MTH 561 Abstract Algebra I
  - MTH 562 and Abstract Algebra II

The student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

A combined major in meteorology and mathematics (p. 286) is available. For specific information please see the Meteorology section of the bulletin.

**Minor in Mathematics**

www.math.miami.edu

A student seeking a minor in mathematics must have credit in a calculus sequence: MTH 161-MTH 162 or MTH 171-MTH 172.

In addition, a minor in mathematics requires three of the following courses.

- Select three of the following: 9
  - MTH 210 Introduction to Linear Algebra
  - MTH 211 Calculus III
or MTH 310 Multivariable Calculus
MTH 224 Introduction to Probability and Statistics
MTH 230 Introduction to Abstract Mathematics
MTH 309 Discrete Mathematics I
MTH 311 Introduction to Ordinary Differential Equations
MTH 320 Introduction to Numerical Analysis
MTH 359 Mathematical Models in Biology and Medicine
MTH 433 Advanced Calculus
MTH 461 Survey Of Modern Algebra

Total Credit Hours 9

Notes

• All three courses must be taken in the Department of Mathematics, University of Miami.

• It is possible to select certain 500 level mathematics courses among the three, with prior approval of the Mathematics Department.

• A grade of C- or better is required for each of these three courses and the quality point average for the three courses must be 2.5 or above.

Microbiology and Immunology

http://www.as.miami.edu/microbiology-immunology

Dept. Code: MIC

Introduction

Microbiology and Immunology is an ancillary department in the College of Arts and Sciences. Our primary goal is to educate students in their chosen field and instill in them a desire for lifelong learning. Research opportunities and laboratory engagement help create knowledge in our students while preparing them to become active members of the scientific and public communities. A major in Microbiology and Immunology requires thorough preparation in chemistry, biology, biochemistry, physics, and mathematics.

Educational Objectives

1. To expose students to the various disciplines within the field of Microbiology and Immunology, including virology, parasitology, microbial genetics, immunology and medical bacteriology.
2. To introduce students to special projects and/or research opportunities in laboratories at the School of Medicine.
3. To provide laboratory experience for the development of skills required for the conduct of research.
4. To make students aware of current cutting edge research in the field of Microbiology and Immunology by attending seminars of speakers from within and outside the University.

Degree Programs

• A Bachelor’s of Science degree is awarded to all microbiology and immunology majors upon completion of the requirements. A chemistry minor is automatically received however, a student’s choice of minor may be science or non-science.

Advanced Writing and Communication

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Microbiology and Immunology should take at least one course from the following MIC 201, MIC 301, MIC 302, MIC 304 or MIC 323.

Departmental Honors

Students that wish to gain a deeper understanding of Microbiology and Immunology can choose to write a thesis. The following program constitutes receiving Departmental Honors in Microbiology and Immunology.

1. Overall GPA 3.3 or higher
2. Six credit hours of Special Projects (MIC 451, MIC 452, MIC 453, MIC 454, MIC 455 or MIC 456) carried out under supervision of a member of the Microbiology and Immunology faculty, culminating in a senior thesis that includes 15 references. Once the mentor and student have revised and finalized the document a hard copy must be turned in to the Program Director.

Majors

Major in Microbiology and Immunology
• B.S. in Microbiology and Immunology (p. 109)

Minors

Minor in Microbiology and Immunology
• Microbiology and Immunology (p. 111)

B.S. in Microbiology and Immunology

Minimum requirements are:

Required MIC Courses
Select one of the following: 5

MIC 301 Introduction to Microbiology and Immunology 1,2,4

MIC 303 Part 1 of 2: Introductory Microbiology and Immunology (Lecture) and Part 2 of 2: Introductory Microbiology and Immunology (Lab) 1,2,4

Other Required Courses

MIC 319 Innate Immunity 2,3 3
MIC 321 Immunobiology 2,4 3

11 credit hours of MIC Courses Required 11

Elective MIC Courses

Select 13 credit hours of the following: 13

MIC 201 Modern Plagues and Society

MIC 322 Medical Parasitology 4

MIC 323 Principles of Microbial Pathogenesis 3

MIC 436 Fundamental and Medical Virology 4

MIC 441 Microbiology and Immunology Colloquium 3,4

Research in MIC for Credit

(only 6 credit hours may be applied to count toward the 13 MIC Elective hours, any credits over 6 count as elective credits toward the 120 credits required for graduation)

MIC 451 Special Projects in Immunobiology 5,6

MIC 452 Special Projects in Parasitology 5,6

MIC 453 Special Projects in Pathogenic Bacteriology 5,6
MIC 454 Special Projects in Microbial Genetics\textsuperscript{5,6}  
MIC 455 Special Projects in Immunogenetics\textsuperscript{5,6}  
MIC 456 Special Projects in Virology\textsuperscript{5,6}

Outside Electives that be taken to count toward the 13 credit hours above (3 courses maximum)  
BIL 352 Techniques in Scanning Electron Microscopy\textsuperscript{4}  
or BIL 554 Electron Microscopy
BIL 255 Cellular and Molecular Biology
GSC 310 Microbes and the Environment  
or MSC 465 Marine Comparative Immunology

**Required Natural Science Courses**

CHM 111 Principles of Chemistry I \textsuperscript{4}
& CHM 113 and Chemistry Laboratory I

CHM 112 Principles of Chemistry II \textsuperscript{4}
& CHM 114 and Chemistry Laboratory II

CHM 201 Organic Chemistry I (Lecture) \textsuperscript{4}
& CHM 205 and Organic Chemistry Laboratory I

CHM 202 Organic Chemistry II (Lecture) \textsuperscript{4}
& CHM 206 and Organic Chemistry Laboratory II

BIL 150 General Biology \textsuperscript{5}
& BIL 151 and General Biology Laboratory

BIL 160 Evolution and Biodiversity \textsuperscript{5}
& BIL 161 and Evolution and Biodiversity Laboratory

BMB 401 Biochemistry For The Biomedical Sciences \textsuperscript{3}

Select one of the following Physics Options: \textsuperscript{10-11}

Option 1:

PHY 101 College Physics I  
& PHY 106 and College Physics Laboratory I

PHY 102 College Physics II  
& PHY 108 and College Physics Laboratory II

Option 2:

PHY 205 University Physics I

PHY 206 University Physics II

PHY 207 University Physics III

PHY 208 University Physics II Lab

PHY 209 University Physics III Lab

Select two semesters of Calculus including: \textsuperscript{8}

MTH 162 Calculus II

Select one of the following Computer Science or Statistics courses: \textsuperscript{3-4}

CSC 120 Computer Programming I

CSC 210 Computing for Scientists

MTH 224 Introduction to Probability and Statistics

PSY 292 Introduction To Biobehavioral Statistics For Non-Majors

SOC 211 Quantitative Methods for Sociologists

EPS 553 Introductory Statistics

**Total Credit Hours** \textsuperscript{85-87}

---

1. Honors students must take both the MIC 301 or MIC 303/MIC 304 and MIC 302.
2. Required of all Microbiology and Immunology majors.
3. MIC 201, MIC 304, MIC 319, MIC 323, GSC 310, BIL 554 Fall Semester only
4. MIC 301, MIC 302, MIC 303, MIC 321, MIC 322, MIC 436 Spring Semester only
5. MIC 441 Fall and Spring Semesters
6. MIC 451, MIC 452, MIC 453, MIC 454, MIC 455, MIC 456 all require that you have already completed 17 credit hours in MIC/MIC electives and a 3.0 cumm GPA with permission of Program Director or Roger Fall and Spring Semester

All MIC majors are required to have a minor (science or non-science). Students automatically get a CHM minor provided that they take one year of organic chemistry while in residence at UM.

Transfer students seeking a Microbiology and Immunology major must earn at least 10 credit hours taken in residence at UM beyond MIC 301 in the courses listed above for majors.

### 4-year Sample Curriculum

(Assuming courses are taken during the fall/spring)

This is a guide and is not meant to take the place of the advice of your major advisor, you should consult with them before making any changes.

**Fall**

**Term Credit Hours:** 17-18

**Total Credit Hours:** 132-141
Variations in the above programs may, in special cases, be approved by the Microbiology and Immunology undergraduate advisor and Director. All courses in Microbiology and Immunology to be credited toward a Microbiology and Immunology major or minor must be completed with a grade of C- or better with an overall GPA of 2.0.

**Military Science**

http://www.as.miami.edu/armyrotc

http://armyrotc.fiu.edu/

Dept. Code: MSL

**Introduction**

The Army Reserve Officer Training Corps is a college elective that will help students succeed in their desired career, whether civilian or military. Students who complete all ROTC requirements may be commissioned second lieutenants and serve in the Army, Army National Guard or Army Reserve.

The military science department’s Reserve Officers Training Corps (ROTC) program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers’ educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a 31-day summer camp, normally between the junior and senior years. Nursing students may attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The department offers both a four-year and a two-year program, each with its own special advantages. Students are invited to visit or write the Department of Military Science to obtain additional information.

**Core Program**

The program requires four years of military science courses which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as freshmen or as sophomores.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below.

Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Women are encouraged to enroll and will be commissioned as officers in the United States Army upon completion of the ROTC curriculum. Job opportunities for women officers in the Army are the same as those for men, excluding a few combat arms fields.

**Basic Course**

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course. Enrollment in ROTC requires proof of a doctor’s physical screening. Participation in regularly scheduled physical training is required. In addition to classroom instruction, a one and a half hour leadership laboratory period is required every other week.

**Advanced Course**

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet officers and noncommissioned officers. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (75 minutes) periods each week and a two hour (120 minutes) leadership laboratory period every week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course.

**Army Nurse Corps Option**

Students enrolled in the School of Nursing curriculum leading to the degree of Bachelor of Science in Nursing may simultaneously qualify for commissions as Second Lieutenants in the Army Nurse Corps. Nursing students qualify for entry into the Officer Development Course through satisfactory completion of the General Military Course, the Basic Camp option or equivalent training. Nursing students participate in a summer Advanced Camp training program and an Army nurse training program. They provide practical and leadership experience in the clinical setting. The focus is to provide nursing cadets an experience which integrates clinical, interpersonal and leadership knowledge and skills. Emphasis is placed on practical experience under the direct supervision of an Army Nurse Corps Officer who acts as the cadet’s preceptor throughout the camp period.

**Professional Military Education**

In addition to basic and advanced ROTC courses, cadets must complete professional military education requirements consisting of one course in each of the following areas: written and oral communication skills, U.S. military history, and computer literacy. Students should consult with the professor of military science to determine those University courses suitable for fulfilling these requirements.

**Monetary Allowances**

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of $450—$500 per month for up to 20 months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide approximately $4,800 per semester during the last two years of school. Both the United States Army Reserve and the National
Guard offer additional monetary incentives for cadets who join their organizations (drill pay).

**Army ROTC College Scholarship Program**

Financial assistance is available in the form of two- or three-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive FULL Tuition and Fees. Additionally, Army scholarship recipients receive a flat-rate allowance of $1200 per year for textbooks and other expenses and $350–$500 per month stipend for up to 10 months per year. During the 32-day advanced course summer training between the junior and senior years, Army ROTC also pays attending cadets $27 per day plus room and board. There are also numerous national and organizational scholarships that students may compete for as a member of Army ROTC.

Additionally, University of Miami undergraduates enrolled in the Army ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University’s tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain continuous enrollment in the Army ROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University’s undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University’s Army ROTC detachment.

**Uniforms and Textbooks**

All uniforms and items of insignia incident to membership in the Army ROTC Program are furnished by the Department of Military Science. Textbooks are provided at no cost to students/cadets enrolled in the basic course.

**Special Activities**

Cadets have the opportunity to join and participate in a number of military affiliated organizations and activities, both on a voluntary and a selective basis. The Color Guard is a voluntary organization that functions as a military unit participating in military ceremonies and presenting the national colors at civic events. Cadets have the opportunity to qualify for and compete with cadets from other universities and colleges in a series of military events termed Ranger Challenge.

**Awards and Decorations**

Awards and decorations made available by national organizations, the University of Miami Army ROTC Alumni Association, and local and national military organizations, are presented to both basic and advanced officer course cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in Army ROTC and other University academic courses, and in outstanding campus and cadet corps leadership.

**Prerequisite for Admission to the Professional Officer Course**

1. Be at least 17 years of age at time of acceptance.
2. Be able to complete the professional officer course and graduate from the University of Miami prior to reaching the age of thirty (30) at the time of commissioning.

3. Selection by the professor of military science and acceptance by the University of Miami.
4. Execute a written agreement with the government to complete the professional officer course and accept an Army ROTC commission.
5. Enlist in the Army Reserve Component-ROTC (terminated upon receiving an Army officer commission).

Those students enrolled in the four-year Army ROTC program must complete the basic course or its equivalent, or have acceptable prior military service. Veterans and students with previous ROTC training are invited to write, visit, or call the Department of Military Science 305-284-3329 or 305-348-1619 to discuss their eligibility status.

Students desiring entry into the two-year Army ROTC program should contact the Department of Military Science one semester prior to the semester in which they wish to enroll in the professional officer course. This lead time is required to complete the application and a physical examination prior to enrollment in the professional officer course.

**Leadership Laboratory**

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for two (120 minutes) hours every week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

**Educational Objectives**

To provide a base of knowledge in the areas of ethics, leadership, Communication skills, Military Leadership, U.S Military History, Tactics and Team building to include future Officer development.

**Degree Programs**

Students can receive degrees from the university in addition to being in the Army ROTC program, as well as being eligible (once requirements are met) to receive a minor in Military Science.

**Modern Languages and Literatures**

http://www.as.miami.edu/mll

Dept. Codes: ARB, CHI, FRE, GER, HAI, HEB, ITA, JPN, MLL, POR, SPA

**Introduction**

The study of languages and cultures is an integral part of a modern, global university education. At the University of Miami, students can choose courses in Arabic, Chinese, French, German, Haitian Creole, Hebrew, Italian, Japanese, Portuguese, and Spanish. All majors (French, German, Spanish), minors (Arabic Studies, Italian, Portuguese), and language programs (Chinese, Hebrew, Japanese) in the department are articulated through the notion of Global Literacy. Global literacy is the ability to participate in sociocultural practices by both interacting with others in different languages and by creating, presenting, and interpreting ideas through oral and written texts in more than one language. Consequently, global literacy involves awareness about oral and written texts, their conventions and genres, and their social, historical, political, and artistic uses. It entails linguistic proficiency in
more than one language. You cannot be global if you only live in one language. Global Literacy includes written and oral communication, critical thinking and social responsibility, and appreciation of cultural artifacts, artistic products, and new technologies in more than one language.

Global Literacy and multilingualism foster success in business, economics, education, law, medicine, natural sciences, politics, social sciences, arts, and humanities. Language study most effectively enriches academic as well as personal experiences when students choose a language based on its relevance to possible careers, to research in particular fields, to personal heritage, or to the understanding of unfamiliar cultures. Students combine advanced modern language study with majors in other fields, such as International Studies, Communications, History, Political Science (and other pre-law fields), Biology (and other pre-med fields), Nursing, English, Finance, Latin American Studies, Anthropology, Psychology, Computer Science, Sociology, and Philosophy.

The Department has Undergraduate Advisors for each language (http://www.as.miami.edu/mll/undergraduate/advising). You are encouraged to consult with them for placement, and must consult with them if you plan to major, minor, or study abroad (contact the Department office for names and office hours). If you plan to double major, you must have an advisor from each of your fields.

Students may qualify for a wide range of departmental awards (http://www.as.miami.edu/mll/undergraduate/student-awards) for excellence in linguistic and literary achievement. The Modern Languages and Literatures Awards Reception takes place annually during graduation week. Some awards are conferred through nomination by professors; others require an application. Students may obtain information on specific awards in the Department office. The annual deadline for applications is usually in early March.

Placement Guideline for MLL Courses

Most students studying a second language can determine their appropriate level by adhering to the following guidelines. However, various factors (i.e., the strength of the program in which the student previously studied the language, how long it has been since the student has used the language, the extent of the student's exposure to the language at home/in social settings; the student's knowledge of other languages, etc.) make it such that these are only guidelines and individual cases may differ. For this reason, on the first day of each course section, the instructor conducts a diagnostic evaluation of students' abilities. The instructor will then inform students whether that course is indeed the level or track that will benefit him/her the most or, if not, which course he/she must take. For this reason, it is extremely important that students attend their language class on the first day of class for the semester.

Students who wish to study Spanish (as a second language, native language, or heritage language) can get more tailored placement advice through our on-line placement advisor: http://www.as.miami.edu/labs/resources/placement/index.html.

The following are MLL’s general placement guidelines (http://www.as.miami.edu/mll/undergraduate/placement-guidelines):

- If you have not studied Arabic, Chinese, French, German, Hebrew, Italian, Japanese, or Spanish in high school, or have completed one to two years of high school instruction, take 101; for Portuguese, take 105.
- If you have taken 101 or its equivalent at another institution, take 102.
- If you have completed three years of high school instruction in French or Spanish, or scored a 3 on the AP language exam take 105. If you have had three years of high school Arabic, Chinese, German, Hebrew, Italian, or Japanese, take 102.
- If you have taken four years of high school French or Spanish, scored a 4 on the AP exam or a 4 on the IB exam in French or Spanish, or took the equivalent of 102 or 105 at another university, take 201. If you have taken four years of high school German, Italian or Portuguese, take 201. If you have taken four years of Arabic, Chinese, Hebrew, or Japanese, take 201.
- If you had five to six years of high school French, German, Italian, or Spanish, take 202.
- If you have taken the equivalent of 201 at another university, or scored a 5 on the AP exam, you have completed your language requirement. If you wish to continue your studies, take 202.
- If you took the equivalent of 202 in French or Spanish at another university or scored a 4 on the AP literature exam, you have completed your language requirement. If you wish to continue your studies, take 203. If you took the equivalent of 202 in German, Italian or Portuguese at another university, you have completed your language requirement. If you wish to continue your studies, take 301.
- If you scored a 5 on the AP literature exam in French, Italian or Spanish, you have completed your language requirement. If you wish to continue your studies, take 301.

The Department offers courses open to native speakers of French, German, Italian, Portuguese, and Spanish. Native speakers may not enroll in 101, 102, 105, 201, 202, 203, or 301 in their language. If you are a native speaker of French, German, Italian, or Portuguese, and graduated from a high school where that was the official language of instruction, you may take any course above 301 (consult with the respective Undergraduate Advisor). If you are a native speaker of Spanish and graduated from a high school where that was the official language of instruction, your first SPA course at UM must be either SPA 302 or SPA 303 or SPA 307 (which is a prerequisite for most other SPA courses).

The Department of Modern Languages & Literatures identifies as heritage learners of Spanish those students who begin their university studies of the language with little or no prior instruction in Spanish but who, because of family background or social experience, can already understand much casual spoken Spanish and have a passive knowledge of the language (though they may not usually speak the language themselves). In the great majority of cases, they have been born and fully educated in the United States, and may have grown up speaking principally English (or a ‘mix’ of Spanish and English, i.e. “Spanglish”) in the home with their grandparents, parents and siblings. Heritage learners may or may not consider themselves as “bilinguals” or “native speakers”, since both of these terms carry very different connotations—linguistic, social, and psychological—for different individuals. Some state that they “do not really speak Spanish” even though they are able to comprehend much spoken language (i.e., they are “passive bilinguals”). In the great majority of cases, they self-identify as “Hispanic” or “Latino/a”.

HERITAGE LEARNERS OF SPANISH MUST BE PLACED IN ONE OF THE FOLLOWING FOUR COURSES:
1. **SPA 107 Basic Spanish for Heritage Learners** is for those students with little or no prior instruction in Spanish who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language although they do not usually speak the language themselves. Generally, their abilities to read and write Spanish are very weak. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**

2. **SPA 207 Intermediate Spanish for Heritage Learners** is for those students **WHO HAVE ALREADY TAKEN AND PASSED SPA 107** or who have studied Spanish for **AT LEAST TWO YEARS IN HIGH SCHOOL**. They can understand casual spoken Spanish and have some functional ability in speaking, reading and writing the language. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**

3. **SPA 208 Advanced Spanish for Heritage Learners** is for those students **who have studied Spanish for four years in high school and who have developed functional abilities in speaking, reading and writing the language. Students who earned a score of 5 on the AP Spanish Language Exam should register for this course.** **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**

4. **SPA 307 Introduction to Literary Studies for Native/Heritage Speakers** is intended for those students who have completed secondary and/or university studies in a Spanish-speaking country and for those heritage learners who demonstrate an advanced level of productive competence (in the written and spoken modes) in Spanish because of prior formal study of the language. Many heritage learners who place directly into 343 have taken AP Spanish literature in high school and earned a score of 4 or 5.

**SPA 101, SPA 102, SPA 105, SPA 201, SPA 202 AND SPA 203 ARE NOT FOR HERITAGE LEARNERS. ANY HERITAGE LEARNER WHO ENROLLS IN ONE OF THESE COURSES WILL BE OBLIGATED TO SWITCH TO A HERITAGE LANGUAGE COURSE (SPA 107, SPA 207, SPA 208 OR SPA 307) DURING THE FIRST WEEK OF CLASS.**

**Arts and Sciences Language Requirement**

The College of Arts and Sciences requires all **B.A. and B.S. degree students to show competency in a language other than English by successfully completing an approved college language course at the 200-level or higher. Students wishing to fulfill the language requirement in a language not taught at UM, may request an equivalency evaluation for a course at the appropriate level offered at an accredited institution, complete the approved equivalent course, and transfer the credits. Students requesting such an equivalency evaluation must submit appropriate documentation to the MLL department for approval. For a native speaker of the language in question, a course that transfers at UM’s 300-level will fulfill the language requirement. For a second language learner of the language in question, a course that transfers at UM’s 200-level will fulfill the language requirement.**

**Writing Credits: Writing Across the Curriculum**

All of the Department’s 300- and 500-level courses and some 400-level courses offer writing credit. **NOTE: Courses may simultaneously fulfill General Education requirements and Writing Credit, or the Foreign Language Requirement and Writing Credit.**

**Cognates**

Most of the Department’s courses are part of cognates in one of two Areas of Knowledge: Arts & Humanities, and People & Society. A course cannot simultaneously complete a cognate in an Area of Knowledge and the College of Arts & Sciences’ Foreign Language Requirement.

**Degree Programs**

Students pursuing a single major in Arts and Sciences earn a BA.

**Major**

**Goals of the Major**

The major is designed to allow students to gain advanced linguistic, cultural and literary competence in the given language. With each course students grow in the capacity to communicate, to critically see and understand the world not only in more sophisticated perspectives but also from other geopolitical positions, and in understanding and appreciating media, new technologies, film, literary and cultural products which also foster the appreciation of learners’ own language, culture, and society. Students will develop analytical and critical skills. They will learn to build coherent arguments orally and in writing; to develop tools for the interpretation of various texts; to perform research and write critical papers; to find and evaluate sources of information; to heighten their sensitivity to contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Rhodes House, room 37F) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

**Minor**

You do not have to be a student of the College of Arts and Sciences to minor in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a minor in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Rhodes House, room 37F) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order
to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

**Departmental Honors**

Departmental Honors in Modern Languages are possible in the three languages for which the major is offered: French, German and Spanish. In order to request admission to Departmental Honors, candidates must have completed at least twelve credit hours at the 300 level or above. They must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for honors will identify an honors thesis supervisor and a second reader and request admission to Departmental Honors. Admission to candidacy must also be approved by the Director of Undergraduate Studies for the appropriate language.

In addition to fulfilling the regular major requirements, students must register in their Senior year for FRE or GER or SPA 594-595, Senior Honors Thesis. This is a two-semester, six credit hour sequence: 594 for research and 595 for the actual writing of the honors thesis.

The honors thesis advisor and the second reader will determine whether the finished thesis merits Departmental Honors.

**Majors**

**Major in Modern Languages and Literatures**
- B.A. in French, German, or Spanish (p. 116)

**Minors**

**Minors in Modern Languages and Literatures**
- Arabic Studies (p. 117)
- French, German, Italian, Portuguese, or Spanish (p. 117)
- Modern Languages (p. 117)

**B.A. in French, German, or Spanish**

A major consists of at least 24 credit hours beyond 202/207, which must include the following distribution:

- at least 9 credit hours must be at the 300 level;
- at least 3 credit hours must be at the 400 level;
- at least 3 credit hours must be at the 500 level (capstone course);
- Spanish and French majors must take at least one course that focuses on a period prior to the 20th century.

<table>
<thead>
<tr>
<th>Spanish majors must take one of the following: 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPA 353 Colonial Spanish American Topics</td>
</tr>
<tr>
<td>SPA 363 Medieval And Early Modern Peninsular</td>
</tr>
<tr>
<td>Topics</td>
</tr>
<tr>
<td>SPA 354 19Th-Century Spanish American Topics</td>
</tr>
<tr>
<td>SPA 364 18th and 19th CENTURY PENINSULAR</td>
</tr>
<tr>
<td>TOPICS</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>French majors must take one of the following: 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>FRE 363 Medieval And Renaissance Topics In French</td>
</tr>
<tr>
<td>FRE 364 Early Modern Topics In French</td>
</tr>
<tr>
<td>FRE 365 19Th Century Topics In French</td>
</tr>
</tbody>
</table>

- For German majors with GER 202 and Spanish and French majors with SPA 203/FRE 203, the remaining 6 credit hours can be taken in any of the 300 or 400-level courses of the respective programs.
- Five writing intensive classes (W) in the department are required of all majors. Thus, students completing a major in FRE, GER, and SPA must satisfy the College of Arts and Sciences writing requirement in the discipline.

In consultation with their MLL advisor, students can have up to 1 course (3 credit hours) from among the MLL courses or the FRE, GER, and SPA courses taught in English (numbered 310-319) count toward their French, German, or Spanish major.

Only one professional Spanish course (SPA 432 or SPA 433) will count towards the Spanish major, although students are free to take both.

Students with transfer credit hours at the 300-level must take at least 21 graded credit hours at or above the 300-level at the University of Miami; i.e., up to 9 credit hours at the 300- and 400-level may be transferred from another institution or a study abroad program not administered by UM. Up to 12 credit hours taken abroad in a UM-administered program may count towards any of the majors in the Department. Students must earn a grade of C- or higher in every course counting toward the major, and maintain a minimum overall average of 2.5 in the major.

**Capstone Courses**

The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation of, synthesis, and reflection on a student’s experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Of the 24 credit hours required for the major, a minimum of 12 credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 credit hours from these programs may be applied toward the major. Up to 6 transfer credit hours from other institutions may count toward the major; whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:
- A student may use 3 transfer credit hours with UM equivalency and 9 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 6 transfer credit hours with UM equivalency and 6 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

**Minor in Arabic Studies**

A minor in Arabic Studies consists of a minimum of 15 credit hours, passed with a "C" or higher.

</table>

**Minor in French, German, Italian, Portuguese, or Spanish**

A minor in one modern language consists of a minimum of 12 credit hours in that language, earned according to the following guidelines: a minimum of 9 credit hours must be at the 300 and/or 400 level, a minimum of 6 credit hours must be graded credit hours taught by UM faculty, a maximum of 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM. Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

**Minor in Modern Languages**

The minor in two foreign languages consists of at least 24 graded credit hours with 12 credit hours in one language on any level and 12 credit hours in any other language, 6 of which must be on the 300-level or above. For example: ARB 101, ARB 102, ARB 201 and ARB 202 along with SPA 202, SPA 203, SPA 301 and SPA 322 would constitute a Minor in Modern Languages; so would FRE 201, FRE 203, FRE 301 and FRE 330 along with ITA 101, ITA 102, ITA 201 and ITA 202. Many other combinations are possible. This minor must include 6 graded credit hours per language from the University of Miami. Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

**Neuroscience**

https://www.as.miami.edu/neuroscience/; http://www.psy.miami.edu/; http://neuroscience.med.miami.edu/undergraduate-program

Dept. Code (NEUR)

**Introduction**

Neuroscience is the study of the nervous system (i.e., the brain, spinal cord, and peripheral nerves), the mechanisms of behavior, and the nature of mind and consciousness. The Neuroscience Program is a rigorous, interdisciplinary program between the Department of Psychology,
the Department of Biology, and the Miller School of Medicine. The neuroscience major provides a broad-based liberal arts background that can be applied to a variety of career fields. It is also excellent preparation for medical school or graduate study in neuroscience, psychology, biology or behavioral medicine.

**Educational Objectives**

The neuroscience major seeks to provide students with exposure to and a fundamental understanding of the neural and bio behavioral sciences by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic scientific inquiry, advising, and mentoring.

**Degree Programs**

All neuroscience majors are required to pursue a Bachelor of Science (B.S.) degree.

**Departmental Honors**

Students can earn Departmental Honors in Neuroscience by demonstrating excellence in their coursework and completing a Senior Honors Thesis in Neuroscience.

1. **Excellence in Coursework** – A minimum 3.3 combined GPA and a minimum 3.5 neuroscience GPA is required.
2. **Senior Honors Thesis in Neuroscience** – This is an independent empirical research project that is completed across two semesters (i.e., NEU 580 and NEU 581) under the supervision of a faculty mentor in the Neuroscience Program. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services in the Department of Psychology is also required.

**Other**

The neuroscience major is administered by the Department of Psychology’s Undergraduate Academic Services for Psychology (UASP) office. UASP provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508. Appointments are only necessary during the official advising period for registration.

**Freshmen and Transfer Students**

All freshmen neuroscience majors in the College of Arts and Sciences are required to participate in the Department of Psychology’s year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring). These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami). This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a neuroscience major after matriculation may be required to take part in an advising seminar prior to declaring the neuroscience major.

**Prerequisites**

Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any course that is to serve as a prerequisite for another course in the neuroscience major. Students who enroll in NEU or PSY courses without the specified prerequisites may be dropped.

**Advanced Writing and Communication Requirement**

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, neuroscience majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY or NEU area. Two such writing courses, PSY 390 and NEU 403, are already built into the neuroscience major.

**Research Experience for Course Credit**

Research experience is considered an integral part of the neuroscience major. Students may earn course credit (i.e., NEU 280, NEU 380, and/or NEU 480) by working in the laboratory of a Neuroscience Program faculty mentor. Students can repeat NEU 280, NEU 380, and NEU 480 without penalty. A minimum 2.8 combined and neuroscience GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required. Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

**Research Participation in PSY 110**

As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more details. Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in neuroscience or psychology.

**Senior Assessment**

As part of the Department of Psychology’s accreditation plan, all senior neuroscience majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the students’ graduation status; however, failure to complete the assessment may delay or prevent graduation.

**Transfer Courses**

Courses from other colleges or universities may be assigned NEU or PSY credit at UM with written approval by UASP.

**Majors**

**Major in Neuroscience**

- B.S. in Neuroscience (p. 119)

**Minors**

**Minor in Neuroscience**

There is no minor available in neuroscience.
B.S. in Neuroscience

The major in neuroscience requires roughly 50 credit hours in core BIL, NEU, and PSY courses, and roughly 26 credit hours in auxiliary CHM and PHY courses.

Notes

- There are limited seats in the neuroscience major so students may be required to join a waitlist before they are able to declare.
- Neuroscience majors are required to complete 130 total credit hours to complete their B.S. degree.
- The neuroscience major can only be declared as a first major for students who are enrolled in the College of Arts and Sciences.
- AP Credit for Statistics (i.e., PSY 292) cannot count toward the neuroscience major.
- Students who declare the neuroscience major after they transfer must have a minimum 3.8 combined SAT, 30 ACT, or 3.5 combined, UM, and neuroscience GPA after 24 completed credit hours at UM to declare the neuroscience major.
- Students may repeat no more than two courses for the neuroscience major in which they received a D or an F.
- New transfer students must have a minimum 3.8 combined GPA to declare the neuroscience major, and at least 7 completed credit hours in the required BIL or CHM courses.
- Students are strongly advised not to continue with the neuroscience major if they have less than a 2.8 neuroscience GPA after 15 completed credit hours in the neuroscience major.
- Students must earn a minimum 2.6 neuroscience GPA to graduate with the neuroscience major.

Other Requirements

- Students must earn a minimum grade of C- in any course that is to count toward the neuroscience major.
- Students may repeat no more than two courses for the neuroscience major.
- Neuroscience majors may not earn majors or minors in Biology or Psychology.
- All neuroscience majors must complete a minor in Biochemistry, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.

### Philosophy

#### Dept. Code: PHI

**Introduction**

The Philosophy Department offers a wide range of courses at the undergraduate level which cover every major area of philosophy as well as its history. Students can major or minor in the subject. In addition, the department sponsors two undergraduate philosophy organizations:

- the Philosophy Club, which is open to all UM undergraduates, and
- Phi Sigma Tau, a chapter of the National Honor Society in Philosophy.

Both groups afford students regular opportunities to meet, eat, and talk philosophy with each other and with graduate students and faculty in the department. All undergraduates who are interested in philosophy are welcome to participate in these philosophical events.

**Educational Objectives**

Philosophy is the study of the most basic moral, scientific, legal, aesthetic, religious, and metaphysical concepts and theories by which we understand ourselves and our universe. It is a reasoned pursuit of fundamental truths, a quest for understanding, a study of principles of conduct. It analyzes the basic assumptions and concepts of other disciplines and the norms that govern interpersonal relations and the acquisition of knowledge. It seeks to establish standards of evidence, to provide rational methods of resolving conflicts, and to create techniques for evaluating ideas and arguments. Philosophers are dedicated to developing the following abilities: reasoning clearly, distinguishing between good and bad arguments, thinking through complicated questions, and using reason in situations that are often governed by emotions. Studies have shown that philosophy majors do extremely well on standardized tests, and in careers that require analytical abilities such as the practice of law and software development. But irrespective of career choice, philosophy deepens one's sense of the meaning and
varieties of human experience, and enhances self-knowledge, foresight, and sense of direction in life.

Degree Programs
The major in Philosophy leads to the degree of Bachelor of Arts. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in philosophy should take at least two (2) (properly approved writing and communication) philosophy courses.

Pre-Law Major and Minor Tracks
The Department offers major and minor tracks for students wishing to enhance their Pre-Law studies with relevant Philosophy coursework.

Pre-Med Major and Minor Tracks
The Department also offers major and minor tracks for students wishing to supplement their Pre-Med work with relevant Philosophy coursework.

Departmental Honors
A program of work toward graduation with Honors in Philosophy is available for qualified students. Interested students should consult the Departmental Director of Undergraduate Studies during their sophomore or junior years. Further information may be found under the section entitled HONORS PROGRAM.

For requirements leading to the Master of Arts and Ph.D. degree (p. 410), see the Bulletin of the Graduate School.

Majors

Majors in Philosophy
- B.A. in Philosophy (p. 121)
- B.A. in Philosophy - Pre-Law Track (p. 121)
- B.A. in Philosophy - Pre-Med Track (p. 121)

Minors

Minors in Philosophy
- Philosophy (p. 122)
- Philosophy - Pre-Law Track (p. 122)
- Philosophy - Pre-Med Track (p. 122)

B.A. in Philosophy
A major in philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Elective courses may be chosen to fit individual needs.

Physical Sciences

Dept. Code: PSC

Introduction

PSC 101 is an interdisciplinary physical science course designed primarily for the non-science major. It may be used to satisfy a physical science requirement in some degree programs. Students should consult the degree requirements listed elsewhere in the Bulletin as well as their advisors for the appropriateness of this course for their programs. See also under PHY 110.

Physics

http://www.physics.miami.edu

Dept. Code: PHY

Introduction

The requirements for a major or minor in the Department of Physics are flexible and may be adapted to the needs of the individual student.

A grade of C- or better is required in all courses counted toward the major or minor with an overall GPA of 2.0. Any lecture course in the Physics department may be passed by means of a proficiency examination.

Note that more mathematics beyond two semesters of calculus is required for most of the physics courses at the 300 level or higher. In order to complete any Physics major sequence in four years, the student should begin elementary calculus as soon as possible. Students are encouraged to discuss an appropriate math sequence with the physics advisor. The minimum math requirement for physics major typically is as follow:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MTH 151</td>
<td>Calculus I for Engineers</td>
<td>4-5</td>
</tr>
<tr>
<td>or MTH 161</td>
<td>Calculus I</td>
<td></td>
</tr>
<tr>
<td>or MTH 171</td>
<td>Calculus I</td>
<td></td>
</tr>
<tr>
<td>MTH 162</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>or MTH 172</td>
<td>Calculus II</td>
<td></td>
</tr>
<tr>
<td>MTH 210</td>
<td>Introduction to Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MTH 211</td>
<td>Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>or MTH 310</td>
<td>Multivariable Calculus</td>
<td></td>
</tr>
<tr>
<td>MTH 311</td>
<td>Introduction to Ordinary Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td>17-18</td>
<td></td>
</tr>
</tbody>
</table>

Requirements for the Master of Science and Doctor of Philosophy (p. 412) degrees will be found in the Bulletin of the Graduate School.

Majors

Majors in Physics

- B.S. in Physics - Pure Physics (p. 124)
- B.S. in Physics - Chemistry/Physics (p. 123)
- B.S in Physics - Engineering/Physics (p. 124)
- B.S. in Physics - Marine Science/Physics (p. 124)
- B.S. in Physics - Applied Physics (p. 122)

Minors

Minor in Physics

- Physics (p. 125)

B.S. in Physics - Applied Physics

http://www.physics.miami.edu

This sequence is available for those intending careers in applied physics. The major is divided into tracks, depending on the student’s field of interest. The Physics for the Life Sciences track is designed for premedical students.
Students must complete the core set of courses AND one track in their field of interest. Multiple tracks are allowed with prior authorization from the Department of Physics.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Applied Physics should pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

Core Courses
The core set of courses is required for all tracks and it includes one of the University Physics sequences with two labs (see table below), plus PHY 350, and PHY 360.

Engineering Physics Track
Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 9 credits in Engineering with prior authorization from the Department of Physics.

Computational Physics Track
Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 2 courses from the Computer Science BS core (p. 82) and a third course in Computer Science with prior authorization from the Department of Physics.

Medical Physics Track
Additional 5 credits in physics at the 300 level or higher, including PHY 351 and one lab, plus BME 265, BME 330, and one among BME 470, BME 520, or BME 521.

Physics for the Life Sciences Track
Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus required biology and chemistry courses. In biology, the required courses are BIL 150, BIL 151, BIL 160, BIL 161, BIL 255, and either BIL 360 or BME 265. In chemistry, the students are required to take one year of inorganic chemistry (CHM 111-CHM 112) with laboratory (CHM 113-CHM 114) and one semester of organic chemistry with laboratory (CHM 201/CHM 205) or the three-semester sequence of Chemistry for the Life Sciences (CHM 121, CHM 221, CHM 222) with laboratory (CHM 113, CHM 114, CHM 205, CHM 206).

Chemical Physics Track
Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus CHM 360, CHM 364, CHM 365, CHM 464, and one among CHM 530, CHM 553, or CHM 575.

B.S. in Physics - Chemistry/Physics
The dual major in Chemistry and Physics is designed for students who are pursuing a regular B.S. degree in Chemistry (p. 79) and want to pursue a second major in Physics.

In addition to the major in Chemistry (p. 79), the dual major requires 22 credit hours in physics and specific courses in Chemistry.

Students pursuing this dual major will have to satisfy the College of Arts and Sciences writing requirement for the Chemistry major.
or CHM 575 Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy

Total Credit Hours 32-34

Other courses may be approved after consultation with a physics faculty advisor.

**B.S. in Physics - Engineering/Physics**

Students in the College of Engineering who want a dual major in physics should consult the Physics Department Chairman or Associate Chair. A major tailored to the student's needs will be arranged. The minimum number of physics credits is the same as for the Engineering Track of the Applied Physics major.

Students pursuing this dual major will take courses designed to provide them with the skills required for effective communication, both written and oral, within their discipline in the Rosenstiel School of Marine and Atmospheric Science.

**B.S. in Physics - Pure Physics**

The pure physics major is recommended for students intending to enter graduate school in Physics, or that want a deeper understanding of fundamental physics.

It consists of one of the University Physics sequences with two labs, plus PHY 306 (lab), PHY 321, PHY 340, PHY 350, PHY 351, PHY 360, PHY 362, PHY 506 (lab), PHY 540, and PHY 560.

Students interested in a Ph.D. program in physics are strongly encouraged to also take PHY 561.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Pure Physics are required to pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

Political Science

http://www.as.miami.edu/politicalscience

Dept. Code: POL

Introduction

A political science major prepares students for work in a number of fields including law, politics, public policy, public administration, and international affairs, as well as employment in business and the nonprofit sector.

Educational Objectives

Political science majors gain an understanding of American political and legal life, the workings of other countries' political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

Degree Programs

- Bachelor of Arts in Political Science
- Five year program: Bachelor of Arts in Political Science and Masters of Public Administration (A special curriculum for students specializing in public administration enables them to complete the requirements for both a Bachelor's and Master's degree in five years.)

Departmental Honors

To earn Departmental Honors a political science major must:

1. Graduate with an overall GPA of 3.500.
2. Graduate with a political science GPA of at least 3.700. All political science course grades on a student’s transcript are counted in the calculation of the major GPA. This includes all grades from courses that were completed more than once (e.g. to obtain a high enough grade to count towards the major).

B.A. in Political Science

The political science major consists of at least 30 credit hours. At least 21 credit hours of these must be earned at the University of Miami.

To count toward the major, each course must be completed with a grade of C- or above, with an overall GPA of 2.0 or above.

**Total Credit Hours:** 24

---

1. **POL 213 does not count toward the major.**
2. This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are not seminars and do not fulfill this requirement: POL 520, POL 521, POL 563, POL 564, POL 590.
3. These can include courses used to fulfill departmental core courses requirement. Please note that some courses cover more than one sub-field. Students may not, however, use a single class to fill two sub-field requirements.

---

1. **Excellence in Coursework** – A minimum 3.3 combined GPA and a minimum 3.5 psychology GPA is required.
2. **Senior Honors Thesis in Psychology** – This is an independent empirical research project that is completed across two semesters (i.e., PSY 580 and PSY 581) under the supervision of a faculty mentor in the Department of Psychology. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services is also required.
Other
The office of Undergraduate Academic Services for Psychology (UASP) provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508. Appointments are only necessary during the official advising period for registration.

Freshmen and Transfer Students
All psychology minors in the College of Arts and Sciences are required to participate in the Department of Psychology’s year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring). These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami). This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a psychology major after matriculation may be required to take part in an advising seminar prior to declaring the psychology major.

Prerequisites
Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any PSY course that is to serve as a prerequisite for another course in the psychology major. Students who enroll in PSY courses without the specified prerequisites may be dropped.

Advanced Writing and Communication Requirement
To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, psychology majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY area. Writing courses are already built into the required courses of the B.S. track of the psychology major; however, students who follow the B.A. track of the psychology major will need to plan accordingly to incorporate a writing-designated PSY course into their graduation plans.

Research Experience for Course Credit
Research experience is considered an integral part of the psychology major. Students may earn course credit (i.e., PSY 280, PSY 380, and/or PSY 480) by working in the laboratory of a Department of Psychology faculty mentor. Students can repeat PSY 280, PSY 380, and PSY 480 without penalty. A minimum 2.8 combined and psychology GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required. Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

Research Participation in PSY 110
As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more details. Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in psychology.

Senior Assessment
As part of the Department of Psychology’s accreditation plan, all senior psychology majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the students’ graduation status; however, failure to complete the assessment may delay or prevent graduation.

Transfer Courses
Courses from other colleges or universities may be assigned PSY credit at UM with written approval by UASP.

Majors
Major in Psychology

</tr>
</tbody>
</table>

Note: At least 3 of these credit hours must be in a 400 level PSY writing course.
Second Majors in Psychology

- Students enrolled in the **College of Arts and Sciences** who pursue a **B.A. degree** must follow the “B.A. Departmental Requirements” outlined above.
- Students enrolled in the **College of Arts and Sciences** who pursue a **B.S. degree** must follow the “B.S. Departmental Requirements” outlined above.
- Students enrolled in the **School of Architecture**, **School of Business Administration**, **School of Communication**, **School of Education and Human Development**, and **Frost School of Music** must follow the “B.A. Departmental Requirements” outlined above.
- Students enrolled in the **College of Engineering**, **Rosenstiel School of Marine and Atmospheric Science**, and **School of Nursing and Health Studies** must follow the “B.S. Departmental Requirements” outlined above.

Other Requirements

- Students must earn a minimum grade of C- in a PSY course to count it toward the psychology major.
- Students must have a minimum 2.8 combined, UM, and psychology GPA to declare the psychology major.
- Students are strongly advised not to continue with the psychology major if they have less than a 2.5 psychology GPA after 15 completed credit hours in psychology.
- Students must earn a minimum 2.3 psychology GPA to graduate with the psychology major.
- Students must complete at least half of their psychology major in residence, including all 300, 400, and 500 level PSY courses.
- Only 6 PSY credit hours at the 300, 400, and 500 level may be taken through a UM Study Abroad Program with prior written approval.

Notes

- AP Credit for Statistics (i.e., PSY 292) cannot count toward the psychology major.
- Students who declare the psychology major after they transfer credit for PSY 292 or complete PSY 292 can use PSY 292 as a substitute for PSY 291.
- Only 6 credit hours of the following may count toward the psychology major:
  - PSY 280: Introduction To Research Projects I (1-3)
  - PSY 380: Introduction To Research Projects II (1-3)
  - PSY 480: Research With Writing Credit (1-3)
  - PSY 581: Senior Honors In Psychology II (3)
- The following courses do not count toward the psychology major:
  - PSY 106: Freshman Advising Contact Term (Fact) (1)
  - PSY 190: Faculty Overview Of Research And Undergraduate Mentoring (Forum) (1)
  - PSY 206: Transfer To The University Of Miami (Tums) (1)
  - PSY 305: Introduction To Research And Graduate School (1)
  - PSY 580: Senior Honors In Psychology I (3)

• All psychology majors who pursue a B.A. degree in the College of Arts and Sciences must complete a minor from the list of acceptable minors published by the College.
• All psychology majors who pursue a B.S. degree in the College of Arts and Sciences must complete a minor in Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.

Minor in Psychology

The minor in psychology requires 15 credit hours in PSY courses.

<table>

Other Requirements

- Students must earn a minimum grade of C- in a PSY course to count it toward the minor.
- Students must earn a minimum 2.0 psychology GPA to graduate with the minor.
- Students must complete at least 9 of the 15 minor credit hours in residence, and only 3 of these credit hours may be taken through a UM Study Abroad Program with prior written approval.

Notes

- Only 3 credit hours of PSY 280, PSY 380, and/or PSY 480 may count toward the minor.
- The following courses do not count toward the minor:
  - PSY 106: Freshman Advising Contact Term (Fact) (1)
  - PSY 190: Faculty Overview Of Research And Undergraduate Mentoring (Forum) (1)
  - PSY 206: Transfer To The University Of Miami (Tums) (1)
  - PSY 305: Introduction To Research And Graduate School (1)

Religious Studies

http://www.as.miami.edu/religion

Dept. Code: REL

Introduction

Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students’ broad and deep apprehension of religion’s place(s) in human experience. The department’s educational work aims.
to strengthen students’ capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

The University regards the academic study of religion as an integral part of liberal, humane learning and seeks to assist students in understanding the role religion plays in human existence and culture. Instruction in the Department of Religious Studies is non-sectarian and seeks an open analysis of all points of view. Courses are designed to provide a general orientation to the academic study of religion for the undergraduate student, as well as more advanced exposure for those who wish to pursue professional careers where a study of religious ideas and institutions would be helpful, such as in psychology, sociology, history, journalism, teaching, law, medicine, the fine arts, religious education, the ministry, and the rabbinate.

The Department sponsors a wide variety of speakers and events each year, including a Religious Studies Colloquium series and a Forum on Religion and Public Life. It has enriched the existing curriculum by bringing to the campus such outstanding scholars as Elizabeth Kubler-Ross, Joachim Jeremias, Alvin Plantinga, Harry M. Orlinsky, Anson Rainey, Abraham J. Malherbe, Alan Segal, William May, Robert Segal, Douglas Allen, Marvin Sweeney, Martin Hengel, Martin E. Marty, and Juergen Moltmann.

**Educational Objectives**

The general educational objectives of the Department are

1. to explore texts, histories, and ways in which humans from various cultures have understood their world including the beliefs, ethics, rituals, artifacts, and organizations of religions;
2. to understand the changing relationship between religion and elements of the wider culture including the dynamics of politics, art, economics, literature, and society and their relationship to religions;
3. to become familiar with the theories and methods used in the study of religion.

**Degree Programs**

The Department offers two tracks by which students may earn a major or a minor. The first track is Religious Studies, which is designed for students who are seeking a broad and comprehensive understanding of the world’s major religions and the cultures in which they are practiced. The second track is Religion and Health Care, which is designed for students who are interested in any aspect of health care or who wish to supplement their pre-med concentration with coursework in the field of Religious Studies.

**Departmental Honors**

The Department of Religious Studies encourages its majors and minors to intensify and deepen their knowledge of religious texts, traditions, and issues through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in religion that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in religious studies or other disciplines.

Minimum requirements for the program are as follows:

1. A cumulative grade point average of at least 3.30;
2. A cumulative grade point average in religious studies of at least 3.50; and
3. A thesis that is approved by departmental faculty.

For the determination of honors, cumulative grade point average means either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere (whether or not the transfer work is accepted toward a degree at the University of Miami), whichever is lower.

**Theta Alpha Kappa**

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Theta Alpha Kappa, the National Honor Society for Religious Studies and Theology. Theta Alpha Kappa sponsors events that enhance the academic and social life of the department.

**URome**

In keeping with its emphasis on a global approach to the study of religion and society, the Department sponsors a study abroad program known as URome. This semester-on-location program, which is open to all qualified University of Miami undergraduate students, is offered each spring semester in collaboration with the American University of Rome. A limited amount of scholarship support for the URome program is available for qualified Religious Studies majors and minors.

**Majors**

**Majors in Religious Studies**

- B.A. in Religious Studies (p. 131)
- B.A. in Religion and Health Care (p. 130)

**Minors**

**Minors in Religious Studies**

- Religious Studies (p. 131)
- Religion and Health Care (p. 131)

**B.A. in Religion and Health Care**

FOR STUDENTS FIRST ENROLLED IN OR AFTER FALL SEMESTER 2015

A major in Religion and Health Care leading toward the B.A. degree requires 24 credit hours in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0.

Select one of the following: 3

Select four Religion and Health Care courses 12

Select 6 elective credits 6

Select a minimum of 12 credit hours in courses numbered 300 or above

Writing credit (W) in at least one course in the department
**REL 499** Method and Theory in the Study of Religion  
Total Credit Hours 24

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Religion and Health Care should take one W class in REL.

To ensure that majors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who major in Religion and Health Care must complete at least 12 credit hours in department offered courses numbered 300 or above in residence at the Coral Gables campus.

---

### B.A. in Religious Studies

**FOR STUDENTS FIRST ENROLLED IN OR AFTER THE FALL SEMESTER 2015**

A major in Religious Studies leading toward the B.A. degree requires 24 credit hours in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0.

Select one of the following:

- REL 101 Introduction to Religion  
- REL 102 Problem of God  
- REL 103 One God: Judaism, Christianity, Islam  
- REL 105 One Goal: Transforming the Self in Asian Religions

Select a minimum of 18 elective credit hours in REL courses  
Select a minimum of 12 credit hours in courses numbered 300 or above  
Writing credit (W) in at least one course in the department

Total Credit Hours 24

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Religious Studies should take one W class in REL.

To ensure that majors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who major in Religious Studies must complete at least 12 credits in department offered courses numbered 300 or above in residence at the Coral Gables campus.

---

### Minor in Religious Studies

**FOR STUDENTS FIRST ENROLLED IN OR AFTER FALL SEMESTER 2015**

An undergraduate minor requires 12 credit hours, passed with a grade of C- or higher, and a GPA in the minor of 2.0.

Select one of the following:

- REL 101 Introduction to Religion  
- REL 102 Problem of God  
- REL 103 One God: Judaism, Christianity, Islam  
- REL 105 One Goal: Transforming the Self in Asian Religions

Select 9 elective credits  
Select a minimum of 6 credit hours in courses numbered 300 or above

Total Credit Hours 12

To ensure that minors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who minor in Religious Studies must complete at least 6 credits in department offered courses numbered 300 or above in residence at the Coral Gables campus.

---

### Minor in Religion and Health Care

**FOR STUDENTS FIRST ENROLLED IN OR AFTER FALL SEMESTER 2015**

An undergraduate minor in Religion and Health Care requires 12 credit hours, passed with a grade of C- or higher, and a GPA in the minor of 2.0.

Select one of the following:

- REL 101 Introduction to Religion  
- REL 102 Problem of God  
- REL 103 One God: Judaism, Christianity, Islam

Sociology

http://www.as.miami.edu/sociology

Dept. Code: SOC

### Overview

The Major in Sociology provides scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other. Increasingly, sociologists are also focused on understanding the processes of globalization that are currently transforming contemporary societies.

Courses for both majors are designated SOC; see course list below. For information on Criminology please see the CRIMINOLOGY (p. 84) section of the Bulletin.
Educational Objectives
The undergraduate program in Sociology has as its main objective to provide students with:

1. A strong component of a liberal arts education, training in analytical and statistical skills that are highly valued by potential employers;
2. A valuable undergraduate preparation for pursuing careers in such fields as journalism, politics, public relations, business or public administration and in other—fields that involve investigative or analytical skills or working with diverse groups;
3. An excellent and comprehensive training program for students wishing to pursue graduate work in programs leading to academic positions, research expertise, or work in the field of applied sociology.

Degree Programs
Students may earn a Bachelor of Arts degree in Sociology. The Department of Sociology also offers graduate programs leading to M.A. and Ph.D. degrees in the areas of:

- Medical sociology
- Race and ethnic relations
- Criminology

Departmental Honors
Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Sociology or Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Sociology or Criminology. They must also achieve a minimum of B in all Sociology/Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.
2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor(s) for all six credit hours.
3. Recruitment of eligible students is by department invitation during a student’s junior year.

Advanced Writing and Communication Requirements
To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Sociology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered within the department; however, it is the student’s responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

Alpha Kappa Delta
Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Kappa Delta, the International Sociology Honor Society. Alpha Kappa Delta sponsors events that enhance the academic and social life of the department.

Majors

**Major in Sociology**
- B.A. in Sociology (p. 132)
- Sociology & Criminology Double Major; Combined Minor (p. 132)

**Minors**

**Minor in Sociology**
- Sociology (p. 133)
- Sociology & Criminology Double Major; Combined Minor (p. 132)

**B.A. in Sociology**

A major in SOCIOLOGY requires a minimum of 31 credit hours, including:

<table>

</tbody>
</table>

Elective Courses
Four additional courses offered by the Department of Sociology 12

Total Credit Hours 31

^1 EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education.

^2 PSY 291 can be substituted for SOC 211 only by students who are also majoring or minoring in Psychology. SOC 212 remains a requirement.

Other Requirements
- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 16 credit hours must be earned in residency in the Department; thus, only a maximum of 15 credit hours can be transferred from other institutions as eligible credit hours for the SOCIOLOGY major

Sociology & Criminology Double Major; Combined Minor

Students may choose to double major in both Sociology and Criminology, or major in either Sociology or Criminology while minoring in the other.

**Sociology and Criminology Double Major:**
Students wishing to complete a double major must complete the Declaration of Major form for the College of Arts and Sciences and fill...
Students completing a double major are not required to complete a minor as well.

A double major in Sociology and Criminology requires a minimum of 58 credit hours, including:

**Required Core Courses – 10 Credits**

- SOC 101 Introduction to Sociology (3 Credits)
- SOC 210 Introduction to Research Methods (3 Credits)
- SOC 211 Quantitative Methods for Sociologists (3 Credits)
- SOC 212 Quantitative Methods Lab (1 Credit)

**Sociology Required Courses – 9 Credits**

- SOC 401 Sociological Theory (3 Credits)
- TWO of the following three courses:
  - SOC 301 Social Organization (3 Credits)
  - SOC 302 Social Psychology (3 Credits)
  - SOC 303 Social Inequalities (3 Credits)

**Criminology Required Courses – 9 Credits**

- SOC 371 Criminology (3 Credits)
- SOC 470 Theories of Deviant Behavior (3 Credits)
- ONE of the following two courses:
  - SOC 271 Criminal Justice (3 Credits)
  - SOC 370 Juvenile Delinquency (3 Credits)

**Elective Courses**

Ten other courses offered by the Department for a total of 30 credits

**Other Requirements:**

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 9 credit hours must be earned in residency in the Department; thus, only a maximum of 6 credit hours can be transferred from other institutions as eligible credit hours for the SOCIOLOGY/CRIMINOLOGY DOUBLE major

**Sociology and Criminology Major-Minor Program**

A minor in either Sociology or Criminology while majoring in the other program requires 12 additional credits offered by the Department to the major program requirements.

6 of these credits must be 300-level or higher, totaling 43 credit hours.

Sociology majors must take SOC 371 Criminology.

### Minor in Sociology

A minor in SOCIOLOGY requires a minimum of 15 credit hours, including:

<table>

### Theatre Arts

http://www.as.miami.edu/theatrearts

**Dept. Code: THA**

**Introduction**

The University of Miami Department of Theatre Arts offers two distinct undergraduate degrees:

- a liberal arts program leading to a Bachelor of Arts degree in theatre and
- a pre-professional conservatory-based theatre training program leading to a Bachelor of Fine Arts degree in either
  - Acting,
  - Musical Theatre,
  - Stage Management,
  - Theatre Management, or
  - Design/Production.

The Department also produces a season of plays and musicals at the Jerry Herman Ring Theatre as well as workshops and student projects in the Studio Theatre.

**Educational Objectives**

The Department of Theater Arts immerses students in the practices and the study of theatre enabling them to nurture and promote within their communities an engagement with the arts.

**Degree Programs**

- THE BACHELOR OF ARTS DEGREE
- THE BACHELOR OF FINE ARTS DEGREE

**The Bachelor of Fine Arts Degree in Theatre Arts**

In addition to the general requirements for admission to the University, the student seeking admission to the BFA program must meet the following requirements of the Department of Theatre Arts:

1. Submission of the Supplemental Application to the Department of Theatre Arts. (This form is located on the Department of Theatre Arts website under “Prospective Students and on the Undergraduate Admissions website page.)
2. An audition or interview/portfolio review to determine acceptance into the BFA programs. These audition/reviews will be held on the University of Miami campus as well as in major cities throughout the United States as scheduled on our website.

3. BFA transfer students must follow the same Admission procedures as freshmen and should realize that placement into the program will be determined by the Theatre Arts faculty. All BFA transfers must be approved by the Director of the Conservatory.

The candidates for the degree of Bachelor of Fine Arts must satisfy the College of Arts and Sciences academic requirements.

All BFA students are evaluated by the faculty at the end of each semester.

BFA students in Theatre Arts Department courses must earn a cumulative 2.7 grade point average to remain in the BFA program. A Theatre Arts major must maintain a minimum grade of C- or higher in each required course outside the theatre. Failure to maintain satisfactory academic standing may result in the student being placed on academic probation by the Department and eventually to dismissal from the program.

BFA Theatre Arts courses are progressive in nature and students must successfully complete each course in sequence. Failure to pass the requirements of any particular class in the conservatory may result in the student’s dismissal from the program. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Theatre Arts should take at least THA 481 and THA 482 offered by the department.

Production activities and discipline within the Department will be governed by the student handbook, available on the Department website (www.miami.edu/tha).

Musical Theatre and Acting Majors will be admitted to the Bachelor of Fine Arts degree program only in the fall of each academic year.

**Majors**

**Majors in Theatre Arts**
- B.A. in Theatre Arts (p. 134)
- B.F.A. in Theatre Arts - Design/Technical Production (p. 135)
- B.F.A. in Theatre Arts - Musical Theatre (p. 136)
- B.F.A. in Theatre Arts - Acting (p. 134)
- B.F.A. in Theatre Arts - Stage Management (p. 137)
- B.F.A. in Theatre Arts - Theatre Management (p. 138)

**Minors**

**Minor in Theatre Arts**
- Theatre Arts (p. 139)

**B.A. in Theatre Arts**

http://www.as.miami.edu/theatrearts

All students seeking a Bachelor of Arts degree in Theatre Arts must take the following courses and receive a grade of C- or higher in all Theatre Arts classes and an overall GPA of 2.0 or above. All classes listed as THA are eligible to be counted towards the BA Theatre Arts degree. The student needs a minimum of 36 credit hours drawn from the requirements listed below. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Theatre Arts should take at least THA 481 and THA 482 offered by the department.

**Elective Classes**

Select 9 credit hours at the 200 level or higher level 9
Select 6 credit hours at the 300 level or higher level 6
Select 3 credit hours at the 400 level 3

**Total Credit Hours** 36

Transfer students have a residency requirement of 18 Theatre Arts credit hours on campus.

The State of Florida recognizes the Bachelor of Arts and Bachelor of Fine Arts Degrees as meeting the Theatre Arts subject area requirements for teaching at the secondary level. In addition to earning the BA or BFA degree in Theatre, students desiring to teach in the field of Theatre Arts should complete the required education credit hours in order to be certified by the state.

1. All BFA Theatre Management majors are required to manage the front of house aspects of at minimum one production at the Jerry Herman Ring Theatre per year in sophomore, junior and senior years.
2. All BFA Theatre Management majors must actively participate in one season subscription renewal campaign at the Jerry Herman Ring Theatre, noted as THA 366 in the above bulletin.

**Minor in Theatre Arts**

http://www.as.miami.edu/theatrearts/

A minor in Theatre Arts consists of 15 credit hours of Theatre Arts classes with a minimum grade of C- in each course and an overall GPA of 2.0 or above.

**Urban Studies**

http://www.as.miami.edu/urb

**Introduction**

The minor in Urban Studies provides undergraduate students with a flexible concentration in interdisciplinary studies of cities, urbanism, and urbanity. Urban Studies is a long established academic field, especially prominent in major cities in the United States. Course work combines a practical focus on Metropolitan Miami with more general attention to urban theory and globalization from a global perspective.

The minor has a liberal arts orientation and includes perspectives from the social sciences, architecture, and history. It is a useful complement to majors such as Geography, History, Sociology, Anthropology, Literature, International Studies, Economics, Political Science, and others. The minor is also of particular interest to students in Architecture Communication and Business. Courses in the Minor are taught in the College of Arts & Sciences and the School of Architecture. Note that there are slightly different requirements for ARC students.

**Minors**

**Minor in Urban Studies**

- Urban Studies (p. 139)

**Minor in Urban Studies**

- Students must complete 15 credit hours (five courses);
• In all five courses, students must achieve a minimum grade of C- with a 2.0 overall GPA;

1 ARC students may select no more than one ARC course while NonARC students must select at least one ARC course. Note that URB 201 or URB 301 will suffice as prerequisites for any of these courses.

Other courses may be approved upon request; please consult the program Director, Dr. Richard Grant: rgrant@miami.edu

Women’s and Gender Studies

http://www.as.miami.edu/wgs

Dept. code: WGS

Introduction

The Program in Women’s and Gender Studies at the University of Miami seeks to encourage the rigorous investigation of gender as a significant issue in all areas of human experience. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures based on gender shape our lives. The program’s core objective is to foster the examination, open discussion, and lively debate of gender issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university’s academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

Educational Objectives

The undergraduate curriculum in Women’s and Gender Studies explores the ways in which ideas about gender and sexuality shape social roles and identities, as well as the ways in which race, ethnicity, class, and nationhood influence the perception and experience of gender and sexuality within particular cultures. The curriculum is informed by recent scholarship that recognizes gender and sexuality as crucial components of human experience in social, cultural, economic, political, religious, and legal contexts. It includes courses that introduce students to feminist theory and scholarship, engaging ethical and political issues of equality and justice. The program encourages students to question their assumptions about the possible meanings of female and male through the comparative study of how different societies and historical periods have viewed manhood, womanhood, and relations between women and men. Courses in Women’s and Gender Studies enable students to acquire critical and analytical skills that they can then apply in other aspects of their educational experience at UM and beyond the university in their careers and personal development.

The LGBTQ Studies minor is designed to allow students to explore sexuality and sexual minorities from a variety of perspectives. The course will provide students with an introduction to a broad array of LGBTQ issues including visual and performing arts, literature, languages, history, social science, various theories, public policy and the law, families and other types of intimate relationships, crime, popular culture, and LGBTQ identities and communities. This widely interdisciplinary field addresses work in a broad range of scholarly disciplines including biological and cultural studies, in literature and anthropology, in the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of popular culture to investigations into the development and social construction of sexual identity.

Advance Writing and Communication Credit

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in WGS should take at least one WGS core course that is writing intensive (i.e., WGS301).

Departmental Honors

Women’s and Gender Studies majors with a cumulative GPA of at least 3.5 in WGS courses and an overall GPA of at least 3.0 may earn departmental honors by completing WGS 505 instead of the senior research project. Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as thesis adviser and then must complete a thesis proposal of approximately 400 words which must be approved by the thesis adviser and then the program director. The format and length of the thesis will vary according to the nature of the project. Most students writing an honors thesis as part of their WGS major will take WGS 505 twice (for a total of 6 credit hours).

Majors
Major in Women's and Gender Studies

- B.A. in Women's and Gender Studies (p. 141)

Minors

Minors in Women's and Gender Studies
- Women's and Gender Studies (p. 141)
- LGBTQ Studies (p. 141)

B.A. in Women's and Gender Studies

A major in Women's and Gender Studies consists of at least 30 credit hours in Women's and Gender Studies courses (core or combined) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses. These credits must include at least 18 at the 300 level or above.

</tbody>
</table>

All majors must complete WGS 501 (or WGS 505), which will take the form of an individual research project with a faculty member of the student's choice; the student is responsible for finding an appropriate faculty member who is available to supervise the project and then must seek formal approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will vary according to the nature of the project.

Minor in LGBTQ Studies

Minor

A minor in LGBTQ (Lesbian/Gay/Bisexual/Transgender/Queer) Studies consists of at least 15 credits in LGBTQ Studies courses (core or combined sections) with a grade of C- or better in each course, and a cumulative GPA of at least 2.0 in LGBTQ courses. All minors must complete WGS 202 and WGS 201. The remaining course work must include at least 9 credit hours at the 300 level or above and no more than 6 credit hours in any one department or program or more than 3 credit hours of individual studies without the approval of the program director.

Minor in Women's and Gender Studies

A minor in Women's and Gender Studies consists of at least 15 credit hours in Women's and Gender Studies courses (core or combined sections) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses.
Business

http://www.bus.miami.edu

Introduction
The School of Business Administration offers courses leading to the degrees of

• Bachelor of Business Administration (BBA), and
• Bachelor of Science in Business Administration (BSBA).

Undergraduate degrees in business are administered by the Vice Dean, Undergraduate Business Education.

Mission
The mission of the University of Miami School of Business Administration is to develop innovative ideas and principled leaders that transform global business and society.

Accreditation
The Bachelor of Science in Business Administration and the Bachelor and Master of Business Administration as well as the undergraduate and graduate Accounting programs are fully accredited by AACSB International — The Association to Advance Collegiate Schools of Business.

Academic Policies
Student Responsibilities

• Students in the School of Business Administration are responsible for planning their own programs and for meeting degree requirements.
• It is the student’s responsibility to understand fully, and to comply with, all the provisions of this Bulletin and any written changes to their program of study.
• Students are provided assistance by academic advisors and faculty members.
• Requests for deviation from department, program, or school requirements are granted only by written approval from the Vice Dean or respective department chairperson.
• A student who is in violation of the provisions of this Bulletin may be administratively withdrawn from a class or classes, dismissed as a business student, and/or have an electronic hold placed upon future enrollment.
• A student who is disruptive in class as determined by assigned faculty and the Vice Dean will be administratively dropped from the class.
• Information regarding appeal procedures and special requests relative to academic matters is available in Merrick 104, School of Business Administration, Office of Undergraduate Business Education.

Admission to the School of Business Administration
Admission to the University for undergraduate study as a freshman is sufficient for admission to the School of Business Administration prior to matriculation. However, strong quantitative skills are typically needed for success. Students who do not matriculate in the School of Business Administration in their first semester of study at the University may request a transfer to the School of Business Administration thereafter only according to the policies and procedures set out below.

Transferring to the School of Business Administration
Transfer applicants from outside the University of Miami must submit a satisfactory academic record in compliance with the standards of the University of Miami Office of Admission. All previous transfer courses must be from an accredited institution. Admitted applicants will be in good academic standing at all institutions previously attended and have a minimum cumulative grade point average (GPA) of 3.0. A minimum grade of "C" (2.0) must be earned in all transfer courses for credit to be awarded. This includes repeated courses under a forgiveness policy at any previous institution.

All transfer students to the School of Business Administration, including those from other Schools and Colleges within the University of Miami, must have completed and received college credit for a calculus course equivalent to either MTH 161 (4 credit hours) or MTH 140/MTH 141 (8 credit hours), and earned a grade of "B" or better in the course(s). The transfer calculus course must be approved by submitting the syllabus and textbook title to the University of Miami Department of Mathematics for evaluation.

All transfer coursework taken outside the University of Miami will be reviewed on a course-by-course basis for equivalency to School of Business Administration course requirements. Any business course that is from a non-AACSB accredited institution will be accepted only as elective credit toward the overall degree requirements. Transfer applicants may appeal to have transfer courses from non-AACSB accredited institutions apply toward completion of business course requirements by submitting the course syllabus and textbook title to the appropriate School of Business Administration department for evaluation.

A transfer student’s overall coursework must also meet specific curricular and residency requirements. Pursuant to School of Business Administration policy, transfer students must complete 50 percent of the Business Core at the University of Miami. Note that the University of Miami also requires that 50 percent of all major and 50 percent of all minor courses be completed at the University of Miami. Residency and other requirements are set out below in the section headed Requirements for Graduation.

Academic Progress, Probation, and Dismissal
The School of Business Administration reviews each student’s academic record at the end of each semester. When a student’s semester or cumulative GPA is less than 2.0, or progress toward degree completion is unsatisfactory, the student will be warned, placed on academic probation, or dismissed in accordance with the University’s or School of Business Administration’s policies and procedures:

• Warning: semester GPA lower than 2.0 but cumulative GPA above 2.0
• Probation: cumulative GPA lower than 2.0
• Probation with Dismissal: two consecutive semesters with cumulative GPA lower than 2.0, or failure to make progress toward degree completion
• Failure to make progress toward degree completion includes, but is not be limited to:
The requirements for readmission may be viewed in the General Readmission University's Freshman Repeat Rule (FRR): The following policy is applied specifically to business students using the University of Miami. A student on probation is not permitted to enroll in more than four courses (no more than 13 credit hours) and may have an electronic hold placed upon future enrollment until grades for work-in-progress are reviewed. A student who is dismissed for failure to satisfactorily complete required business core courses, or for failure to make progress toward the degree, may not automatically be dismissed from the University. Accordingly, such a student may apply to another School or College within the University, and if accepted, may continue as an undergraduate student at the University of Miami. For such a student who is not accepted by another School or College, dismissal from the School of Business Administration may have the incidental effect of dismissal from the University of Miami as well.

**Freshman Repeat Rule (FRR) in the School of Business Administration**

The University’s Freshman Repeat Rule (FRR) allows a student who receives a "D" or an "F" in a course taken at the University of Miami within the student’s first 30 credit hours or first two regular semesters of college work, to repeat up to two such courses within the following two semesters. After the course has been repeated, only the second grade earned will be used in the computation of the student’s cumulative GPA. However, the initial grade remains on the record, although the initial grade does not count as “credit hours attempted” or “credit hours earned” at the University of Miami.

The following policy is applied specifically to business students using the University’s Freshman Repeat Rule (FRR):

- The summer sessions are not counted as semesters, either individually or together, in computing the two semesters in which a student may elect to repeat a course in which a "D" or "F" grade is earned. Additionally, a student who initially enters the University in the spring semester may repeat courses in which a “D” or “F” grade is earned and which were taken in the summer sessions following initial enrollment, without having either of the summer sessions count as one of the “two semesters” to which the policy refers.
- Students desiring to take advantage of the FRR policy must complete a FRR Request Form, which is available in the School of Business Administration, Office of Undergraduate Business Education. For additional information about the application of the FRR in the School of Business Administration, consult an academic advisor in the Office of Undergraduate Business Education.

**Readmission**

The requirements for readmission may be viewed in the General Information (p. 22) section of this Bulletin. The following special conditions related to readmission are also in effect for the School of Business Administration:

- A student requesting readmission, who was previously dismissed for academic reasons or who had below a 2.0 cumulative GPA, must present adequate evidence that the conditions and/or factors that caused the prior poor academic performance have changed sufficiently and that there is a reasonable expectation of satisfactory performance if the student is permitted to resume study in the School of Business Administration.
- A student dismissed for nonacademic reasons must provide written authorization from the Dean of Students’ Office before re-enrollment will be permitted.
- A student who did not earn at least a C grade in MAS 110 or MTH 161 will not be re-admitted to the School of Business Administration.
- A student seeking readmission may have conditions placed upon any such readmission. Failure to satisfactorily accomplish the stated conditions may result in dismissal or the student otherwise not being permitted to register for future semesters.

**Changes to Academic Requirements**

The School of Business Administration reserves the right to change academic requirements including course offerings, grades, and required grade point averages, to ensure that students are receiving the latest knowledge and are maintaining the standards necessary to be professionally competitive. Changes are communicated to students either by written or electronic notice, or personally by their academic advisors.

**Requirements for Graduation**

**Residency and Other Graduation Requirements**

In addition to meeting the graduation requirements as set out in Degree Programs, below, a candidate for either the BBA or BSBA degree must complete the last 45 credit hours consecutively and exclusively in degree-seeking status in residence at the School of Business Administration, University of Miami. Credit by examination may not be used to meet the residency requirement. In addition, a minimum of 120 credit hours is required for graduation, not including ENG 103, TAL 191, MTH 099, or any UMI Internship course. The student’s last 56 credit hours must be completed at a four-year institution.

**Age of Credit Hours**

Credit hours more than 12 years old are not recognized for degree purposes.

**Grade Point Average (GPA)**

Students must earn a cumulative grade point average (GPA) of at least 2.0 in all undergraduate courses and a GPA of at least 2.0 in all undergraduate courses taken at the University of Miami in order to meet minimum graduation requirements. Each major and/or minor area of specialization within the School of Business Administration has its own set of requirements regarding minimum GPA, both for individual coursework and for cumulative GPA in major coursework. In some cases, this GPA requirement is higher than 2.0. It is the student’s responsibility to be familiar with the grade point requirement for his/her proposed major(s) and any minor(s).
Percent of Credit Hours at UM Required

At least fifty percent of the total credit hours required in the Business Core and the major and minor areas of specialization must be completed at the University of Miami. Considered separately, at least fifty percent of the credit hours required in the major only and/or minor only must be completed at the University of Miami.

Degree Programs

Bachelor of Business Administration (BBA)

All BBA students must complete areas A, B, C, D, and E as listed below. All courses except area D must be taken for graded credit.

A. University of Miami’s General Education Requirements

The School of Business Administration participates in the University’s General Education requirements (p. 19). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University’s general education Areas of Proficiency: English composition (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (MAS 110 or any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University’s general education distribution requirements in three Areas of Knowledge. Every BBA student must complete a cognate designated Arts & Humanities (A&H) or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

The School of Business Administration’s program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic English composition courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required to complete ENG 230, Advanced Business Communication, with at least a C- before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BBA degree requirements upon successful completion of MAS 110.

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100- and 200-level Business Core courses must be completed before taking 300- and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but they should be completed before taking MGT 401 or any upper-level courses in the major area of specialization.

NOTE: MAS 110 and MAS 201 must be completed with a “C-” or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

C. Major and Minor Areas of Specialization - Requirements

All students must complete the requirements for at least one major in one of the School of Business Administration areas of specialization. Additionally, students may elect to complete a minor in an area of specialization distinct from the major. The minor may be in an area of specialization offered by the School of Business Administration or by another School or College within the University. Major and minor area of specialization requirements are specified by each academic department. Every specialization (major and minor) requirement must be taken for a grade and completed with a grade of “C-” or higher, and students must earn a minimum cumulative GPA of 2.0 in all major and minor specialization courses attempted, unless a higher grade or GPA is prescribed by the relevant department for a specific major or minor area of specialization. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a
second major or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major or a co-major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional/co-major may be used to satisfy a business major or minor area of specialization.

Major areas of specialization in the School of Business Administration are available only with completion of the required Business Core. Therefore, students in other Schools and Colleges of the University of Miami seeking to pursue a major area of specialization in the School of Business Administration must successfully transfer to the School of Business Administration and complete all Business Core requirements for either the BBA or BSBA degree, in addition to completing the specific coursework required for the business major area of specialization. A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or "dual degree student" must meet the minimum requirements for transfer to the School of Business Administration, whether or not the student formally transfers to the School of Business Administration.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

**International Business (P&S) | Undergraduate Business Education**

| Management (P&S) | Management |
| Marketing (P&S) | Marketing |

**D. Electives (as needed to meet the minimum 120 credit hours)**

All undergraduate courses offered by the University may be used as free electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student's cumulative GPA, and credit for the course is included in the student's overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used as preparation for entrance to medical school must be taken for a grade.

**E. International Focus Within the Curriculum**

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

**Bachelor of Science in Business Administration (BSBA)**

The BSBA degree in the School of Business Administration emphasizes quantitative foundation courses. All BSBA majors in the School of Business Administration must complete areas A, B, C, D, and E as listed below. All courses except area D must be taken for graded credit.

**A. University of Miami’s General Education Requirements**

The School of Business Administration participates in the University’s General Education requirements (p. 19). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University’s general education Areas of Proficiency: English composition (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University’s general education distribution requirements in three Areas of Knowledge. Every BSBA student must complete a cognate designated Arts & Humanities (A&H) outside the School of Business Administration. As each business major and minor fulfills a cognate requirement in one Area of Knowledge, depending on the Area of Knowledge of the student’s major(s) and any minor(s), an additional cognate in either People & Society (P&S), or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BSBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

The School of Business Administration’s program establishing Advanced Writing and Communication Skills proficiency for business requires each student to complete the following courses beyond the basic English...

Quantitative Elective

Select one of the suggested courses approved by the academic advisor:

- BTE 324 Object-Oriented Programming
- BTE 423 Database Management Systems
- ECO 430 Applied Econometrics
- ECO 510 Mathematical Economics And Applications
- MAS 342 Introduction to Optimization and Decision Making
- MAS 442 Stochastic Models in Operations Research
- MAS 547 Computer Simulation Systems
- MGT 445 Supply Chain Modeling and Analysis
- MGT 446 Supply Chain Strategy

Total Credit Hours 62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before MGT 401 or any upper-level courses in the major area of specialization.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

C. Major and Minor Areas of Specialization - Requirements

All students must complete the requirements for at least one major in one of the School of Business Administration areas of specialization. Additionally, students may elect to complete a minor in an area of specialization distinct from the major. The minor may be in an area of specialization offered by the School of Business Administration or by another School or College within the University. The major and minor area of specialization requirements are specified by each academic department. Every specialization (major/minor) requirement must be taken for a grade and completed with a grade of “C” or higher, and students must earn a cumulative minimum GPA of 2.0 in all major and minor specialization courses attempted, unless a higher grade or GPA is prescribed by the relevant department for a specific major or minor. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major or a co-major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional/co-major may be utilized to satisfy a business major or minor.

Major areas of specialization in the School of Business Administration are available only with completion of the required Business Core. Therefore, students in other Schools and Colleges of the University of Miami seeking to pursue a major area of specialization in the School of Business Administration must successfully transfer to the School of Business Administration and complete all Business Core requirements for either the BBA or BSBA degree, in addition to completing the specific coursework required for the business major area of specialization. A student in another School or College at the University of Miami pursuing a business degree as a “second degree” or “dual degree student” must meet the minimum requirements for transfer to the School of Business Administration, whether or not the student formally transfers to the School of Business Administration.
Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

### D. Electives (as needed to meet the minimum 120 credit hours)

All undergraduate courses offered by the University may be used as free electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student’s cumulative GPA, and credit for the course is included in the student’s overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used in preparation for entrance to medical school must be taken for a grade.

### E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

### Honors

#### General Honors Program, University of Miami

*Beginning Academic Year 2015-2016: The Foote Fellows Program (p. 52) serves as the University's General Honors Program.*

*Prior to Academic Year 2015-2016: Eligible students were invited to join the University’s General Honors Program. A total of 24 credit hours of designated (H) honors courses is required to graduate with General University Honors. A minimum 3.5 cumulative GPA must also be maintained in all honors courses. For details, consult the University Honors Program Office (http://www.miami.edu/index.php/honors_program_home) or an academic advisor in the Office of Undergraduate Business Education.*

#### Graduation (Latin) Honors

- Students who qualify based on their cumulative GPA and class rank will graduate with University Honors (p. 25): *cum laude, magna cum laude, or summa cum laude*.
- For details consult an academic advisor in the Office of Undergraduate Business Education and the University Honors Program Office (http://www.miami.edu/index.php/honors_program_home).

#### General Business Honors, School of Business Administration

Graduation with General Business Honors requires:

- Completion of all of the requirements of the BSBA degree program; and
- A minimum 3.75 cumulative GPA at graduation.

For details, consult an academic advisor in the Office of Undergraduate Business Education.

#### Departmental Honors in Business

Graduation with Departmental Business Honors requires:

- A minimum 3.9 GPA in School of Business Administration courses at the end of the junior year; and
- Completion of a 3-credit hour research project during the entire senior year on a topic that is of interest to both the faculty member supervising the research and the student responsible for completing it. The depth of the project must be consistent with the time requirements of a 3-credit hour upper-level class in the supervising department; and
- A minimum 3.9 GPA in all School of Business Administration courses at graduation; and
- Any other requirements, if any, established by the Department granting honors, as set forth in this Academic Bulletin.

Students who major in two distinct areas of specialization may complete their research project in the department of either business major...
specialization. Students in interdisciplinary majors (Entrepreneurship, Health Sector Management and Policy, International Finance and Marketing, Real Estate) may complete their research project in any department within the major. Students pursuing a minor may complete their research project in the department of either their major or minor area of specialization.

The 3-credit hour research project class is taken for "credit only" and does not count toward the 120-credit hours required for graduation. Students who begin a research project but do not complete it will be retroactively withdrawn from the research course. Students receive credit for the project only if the work is deemed to be of exceptional quality, consistent with the workload of a 3-credit hour upper-level independent study course, and worthy of a designation that is only open to the top 1% of School of Business Administration undergraduates.

Deadlines and procedures for the projects are available in the Office of Undergraduate Business Education and in department offices.

Business Honor Societies

Students may be nominated for or elected into an honor society based on specific criteria. Contact the listed department for additional information.

• Beta Gamma Sigma (Highest Honors in Business) (Undergraduate Business Education (http://bus.miami.edu/undergraduate-programs))
• Beta Alpha Psi (Department of Accounting (http://bus.miami.edu/faculty-and-research/academic-departments/_accounting/contact-us))

Other Honors

• Omicron Delta Epsilon (Department of Economics (http://bus.miami.edu/faculty-and-research/academic-departments/economics/contact-us))

Special Programs for Business Students

The Global Business Studies Program: Latin America

The Global Business Studies Program (https://www.bus.miami.edu/undergraduate-programs/curriculum/majors/global-business) is a co-major option for incoming freshman who apply and are selected. The co-major is not available to continuing or transfer students. Students in the program simultaneously pursue a major in a functional area of business and, in the co-major, region-specific global studies coursework.

Curriculum for Co-major in Global Business Studies (21-27 credit hours)

1. Introduction to the region (3 credit hours)
2. Demonstrated proficiency in the language of the region, or where this is not feasible, at least one language course at the 200 level or above (min. 3 credit hours) Students may demonstrate language proficiency by enrolling in business coursework delivered in the language of the region selected.
3. Economics of the region (3 credit hours)
4. Political and/or Regulatory Environment of the region (3 credit hours)
5. History of the region (3 credit hours)
6. Introduction to International Business (Standard course is MGT 349. Recommended alternatives: MGT "Doing Business in [the Region]"

where available, or other approved business course in-country) (total of 3 credit hours)

7. Seminar & Senior Thesis (6 credit hours)

• Culminates in a written research paper examining a significant problem or proposal for a particular country, approached from an interdisciplinary stand point
• Carried out under the supervision of one or more faculty members
• Oral presentation of the student’s findings and recommendations also required
• Internship or directed study in-country may allow for field research

8. Minimum of one semester “study abroad” in the studied region is required.

• Students may choose to satisfy the co-major’s economics and/or history and/or politics/regulation course requirement in-country.

Minor Area of Specialization in International Business (P&S)

The International Business minor provides business students an interdisciplinary perspective of international business to augment their studies in other areas of business specialization. The International Business minor may not be taken by students pursuing the International Finance and Marketing major or by non-business students. Students must complete all pre-requisite courses before enrolling in required International Business minor courses.

The International Business minor consists of 12 credit hours as follows:

<table>
<thead>
<tr>
<th>Core Courses</th>
<th>6-9 credit hours</th>
</tr>
</thead>
<tbody>
<tr>

Options for Non-Business Students

Cognate for Non-Business Students (P&S)

The School of Business Administration offers a general business cognate to non-business students: Understanding Business. Completion of the business cognate fulfills the University’s General Education requirement of a cognate in the Area of Knowledge labeled People & Society (P&S).

This cognate offers students an overview of the business environment with the goal of promoting awareness and understanding of the real-world issues that affect the global economy in the 21st century. Courses in the cognate deliver the essential business concepts that enable critical consideration of the questions that confront decision makers in the various functional areas of business. Students need to declare the cognate at their home school or college.

The business cognate consists of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS 200</td>
<td>Introduction To Business</td>
</tr>
<tr>
<td>Options</td>
<td></td>
</tr>
<tr>
<td>BUS 201</td>
<td>Money</td>
</tr>
<tr>
<td>BUS 202</td>
<td>Introduction To The Legal Environment Of Business</td>
</tr>
<tr>
<td>BUS 203</td>
<td>Managing Effectively: A Skills Development Approach</td>
</tr>
<tr>
<td>BUS 206</td>
<td>PRINCIPLES OF INTERNATIONAL BUSINESS</td>
</tr>
<tr>
<td>FIN 300</td>
<td>Fundamentals of Finance for Non-Finance Majors</td>
</tr>
<tr>
<td>HIS 225</td>
<td>History of the Modern Business Enterprise</td>
</tr>
<tr>
<td>MGT 251</td>
<td>Nature and Foundations of Entrepreneurship</td>
</tr>
<tr>
<td>MKT 301</td>
<td>Marketing Foundations</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td></td>
</tr>
</tbody>
</table>

1 Course must be taken by all students pursuing the business cognate before taking any other courses in the cognate.

2 To be taken after completing BUS 200. All courses must be taken within the current pre-requisite structure.

Minors for Non-Business Students

Students in other schools and colleges of the University may choose to pursue any of the following minor areas of specialization in the School of Business Administration by officially declaring the minor at their home school or college:

**Minor Areas of Specialization**

- Business Law (P&S) (p. 157)
- Business Technology (STEM) (p. 160)
- Economics (P&S) (p. 164)
- Entrepreneurship (P&S) (p. 180)
- Finance (STEM) (p. 171)
- Health Sector Management and Policy (P&S) (p. 174)
- Management (P&S) (p. 181)
- Marketing (P&S) (p. 187)

Students interested in completing a minor offered by the School of Business Administration should consult with an academic advisor in the School or College of their degree/major to determine if a minor in business is acceptable. Neither advice nor consent from either the Office of Undergraduate Business Education or the relevant School of Business Administration department is necessary for a student to choose or complete a minor offered in the School of Business Administration. Instead, non-business students should simply declare the minor and complete the necessary coursework, according to the details listed in the appropriate department’s section of this Academic Bulletin and the following supplemental guidelines, which are applicable to all minors unless otherwise provided by the department offering the minor:

All courses within the minor must be taken for a grade and completed with a grade of “C-” or higher. To be awarded the minor, the student must also achieve a minimum cumulative GPA of 2.0 in all minor courses, unless a higher grade or GPA is prescribed by the department offering the minor, as set out in that department’s section of this Academic Bulletin. All courses taken by the student in the department offering the minor will count toward the GPA in the minor.

**Foote Fellows**

**General Overview**

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such
as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

**Foote Fellows in Business**

As the best and brightest of each incoming class, School of Business Administration Foote Fellows are afforded the most stimulating academic and co-curricular experiences the School has to offer. They are invited to take part in Foote-only seminars, exclusive workshops on a variety of academic and career-oriented themes, and networking events with some of the School’s most honored speakers and guests.

Many of the School’s Foote Fellows also engage, one-on-one, with business faculty in cutting-edge research projects that culminate in a series of collaborative workshops as well as potential publications. Unsurprisingly, then, Foote Fellows frequently represent the School as ambassadors to elite conferences and as members of competitive teams vying for regional, national, and international recognition.

Business Foote Fellows also enjoy dedicated academic and co-curricular/career advisors, as well as opportunities for unique mentorship by prominent alumni.

**Accounting**

**Department Code:** ACC

**Introduction and Educational Objectives**

The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed upon general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

**Degree Programs**

A student pursuing the Accounting major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

**Educational Requirements to Sit for the CPA Exam**

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. **Note:** Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed at: [http://www.myfloridalicense.com/dbpr/cpa/licensure.html](http://www.myfloridalicense.com/dbpr/cpa/licensure.html)

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida website noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts:

1. the requirements to be eligible to take the CPA exam and
2. the requirements for licensure to practice as a CPA in Florida.

**Requirements to Sit for the CPA Exam**

To be eligible to take the CPA exam, you must have completed at least 120 credit hours including 24 credit hours of accounting (auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation) at the upper division (300-level or above) and 24 credit hours in upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division. As part of the general business credit hours, applicants are required to have a total of 6 credit hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable toward the required credit hours nor are courses for non-accounting majors and any MBA courses that are equivalent to general business courses at the 300-level or above (with some exceptions). Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting

**Requirements for Licensure**

In addition to passing all four parts of the CPA exam with at least a 75% within an 18 month rolling period, the BOA requires that you have completed a bachelor’s degree plus an additional 30 credit hours for a total of 150 credit hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. (This experience may be obtained before or after sitting for the exam; however, all requirements to sit for the exam must be met before the work experience commences.) If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 credit hours must include a minimum of 36 credit hours of accounting courses at the 300-level or above and at least 39 credit hours of general business courses at the 300-level or above (with some exceptions). Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting
majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State
If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition, if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

Accreditation
The Board accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above-mentioned means, then you must use the provisions of F.A.C. 61H1-27.001(5).

Duplicate Courses
- No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.
- For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

The Fifth Year Option
Many of our graduates satisfy the 30 credit hour requirement for the CPA by continuing on for a fifth year during which time they also can complete the requirements for either the Master of Accounting (MAcc) or Master of Science in Taxation (MST) degree. While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers/CFOs or financial analysts. The MST is designed for students interested in careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. Students interested in these programs should consult with the Program Director in the Department of Accounting.

Majors

Major in Accounting
- B.B.A. in Accounting (p. 152)
- B.S.B.A. in Accounting (p. 153)

Minors

Minor in Accounting
- Accounting (p. 155)

Special Programs

- Accelerated Accounting Programs (p. 151)
- Five-Year Accounting Program with Senior-Year Internship (p. 154)

Accelerated Accounting Programs

Accelerated Master's Programs
In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) in the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while in the senior year.

The accelerated programs are available only to students who are undergraduate students at the University of Miami School of Business Administration. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline
1. Internship in summer after junior year
2. Twelve credit hours of work in senior year will count towards the MAcc or MST degree (only students in the accelerated programs are eligible to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and the CPA exam.
4. Complete remaining credit hours of graduate work in fall semester after senior year.

Pre-requisites
The following must be completed before students begin their senior year:
- A minimum of 102 credit hours
- All undergraduate degree requirements except for those that can be completed in the senior year
- FIN 303 before or during senior year (for those students who intend to select the MAcc-Corporate track)
- Note: MGT 401 must be completed in the final semester of the undergraduate program.
- The following Accounting major requirements must be taken prior to senior year:

<table>

</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td></td>
<td><strong>30</strong></td>
</tr>
</tbody>
</table>

\(^1\) Program requirements are subject to change. Not all courses are offered every semester or term. Consult the Program Director for the recommended sequence.

\(^2\) Both ACC 301 and ACC 404 are required courses. One of these two courses is completed in the junior year. The remaining course needs to be completed in the senior year.

Students must select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

Summer after Senior Year

Students must take one graduate accounting course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620 (offered every summer) or ACC 649.

Students are also REQUIRED to take an approved CPA review course during the summer following their senior year after graduation. Students who do not take a CPA review course must complete an additional six graduate credit hours which will likely delay graduation from December to the following May. Students are expected to pass part, if not all, of the CPA exam during this summer.

Final Fall Semester

In the final fall semester students will complete the remaining 15 or 16 graduate credit hours including the requirements for their track and electives selected in consultation with the Program Director in the Department of Accounting.

Admission to the Accelerated Master’s Programs

Incoming Freshmen

- Prospective students may apply to the accelerated program when they apply for admission to the University of Miami.
- SAT Reading and Math combined scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have a cumulative and an accounting major GPA of 3.3 or higher by their junior at the University of Miami. Students must then maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher to remain in the program.
- Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 30 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year including the following:

1. To continue as an accounting major, a student must have a minimum cumulative GPA of 3.0 in accounting courses before enrolling in ACC 312. All subsequent coursework specific to the accounting major area of specialization, including ACC 312, must be completed with a grade of “C” or better.

Five-Year Accounting Program with Senior-Year Internship

**Five-Year Accounting Program with Senior-Year Internship**
The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

**Program Timeline**

1. **Junior Year**: Complete an application to the program and apply for an internship position to take place in the spring of senior year.

2. **Fall semester of Senior Year**: Submit the internship agreement and apply to graduate school.

3. **Spring semester of Senior Year**: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate degree and Accounting major.

4. **Summer following Senior Year**: Take CPA review and exam.

5. **Fall semester following Senior Year**: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

**Pre-requisites**
The program is designed for University of Miami School of Business Administration undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401.

**Senior Year Spring Semester Curriculum**
In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include two accounting major courses and MGT 401.

**Summer, Fall, and Spring after Senior Year**
In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

**Admission to the Five-Year Accounting Program with Senior-Year Internship**

- Students must apply to the program in their junior year and obtain an “approved” internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.
Minor in Accounting

Minor Area of Specialization in Accounting (P&S)

The Department of Accounting allows business students to earn a minor in Accounting. The Accounting minor is not available to non-business students.

In addition to the general requirements for all business minors, business students wishing to minor in Accounting must complete the following 9 credit hours of coursework in accordance with the current pre-requisite structure, which includes completion of ACC 211 and ACC 212:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 301 Cost Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACC 311 Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ACC 312 Intermediate Accounting II</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td><strong>9</strong></td>
</tr>
</tbody>
</table>

1 ACC 211 and ACC 212 are pre-requisites for all other Accounting courses.

2 To obtain a minor in Accounting a student must have a minimum cumulative GPA of 3.0 in Accounting courses before enrolling in ACC 312. This course has the additional pre-requisite of ACC 311

Degree Programs

A student pursuing the Legal Studies major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

Majors

Business Law

Department Code: BSL

Introduction

The modern manager faces increasing legal implications in daily operations and in formulating business policy. Consequently, effective decision-making requires an appreciation of the social, ethical, economic, and political bases of law as it relates to business. Business law courses provide the student with fundamental insight into legal institutions, the regulatory environment, and the nature of legal discourse, as well as an array of substantive principles of law, including such areas as contracts, sales, business organizations, and domestic and international commercial relationships.

Educational Objectives

The primary goals of the Department of Business Law are to contribute to legal knowledge through conducting scholarly research, to disseminate it by publication in leading journals and law reviews, and to transmit that knowledge to students and the larger UM-wide, business, and professional communities.

These goals both inform and drive the Department’s educational objectives, which focus on:

- instilling in students a strong sense of the legal and ethical issues permeating business;
- aiding students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- developing students’ analytical and problem solving ability, as well as their oral and written presentation skills.
MGT 304 Organizational Behavior 3
MGT 401 Strategic Management (must be taken in final semester) 3
MKT 201 Foundations of Marketing 3
Total Credit Hours 51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a “C-” or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Legal Studies Major Area of Specialization (P&S)

Students must complete a minimum of 15 credit hours of Business Law coursework beyond the core course, BSL 212 (total of 18 credit hours), as follows:

Core Course

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Credit Hours 15

¹ All courses must be completed within the current pre-requisite structure.

NOTE: All specific coursework for the major in Legal Studies must be completed with a grade of “C-” or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.
MGT 445  Supply Chain Modeling and Analysis
MGT 446  Supply Chain Strategy

Total Credit Hours 62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Legal Studies Major Area of Specialization (P&S)
Students must complete a minimum of 15 credit hours of Business Law courses beyond the core course, BSL 212 (total of 18 credit hours), as follows:

Core Course
BSL 212  Introduction to Business Law (Taken as part of the Business Core, it is a pre-requisite for all other BSL courses.)

Required Course
BSL 485  Managing the Legal Factor (required in the student’s final semester)

Elective Courses ¹
Select four courses (12 credit hours) from the following:
BSL 304  Corporate Law
BSL 305  Legal and Social Aspects of Business Regulation
BSL 324  Negotiation
BSL 333  Legal Aspects of Real Estate Transactions
BSL 401  The Law of Financial Transactions
BSL 412  International Business Law
BSL 424  Intellectual Property Law
BSL 435  Law Of Entrepreneurship
BSL 460  Health Care Law and Ethics
BSL 476  The Law Of Risk
BSL 499  Special Topics (as appropriate)

Total Credit Hours 15

¹ All courses must be completed within the current pre-requisite structure.

NOTE: All specific coursework for the minor in Legal Studies must be completed with a grade of “C-” or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

Minor in Business Law

Minor Area of Specialization in Business Law (P&S)
The Business Law minor is flexible, permitting business and non-business students alike to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student’s chosen corporate, creative, scientific, academic, professional, or personal endeavors. Students in the School of Business Administration, as well as students in the other schools and colleges of the University of Miami, pursue the minor in Business Law by officially declaring the minor at their home school or college and completing the coursework identified below. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Business Law is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Law Department is necessary.

The 12 credit hour minor in Business Law consists of the following (all courses must be completed within the current pre-requisite structure):

Required Courses
BSL 212  Introduction to Business Law (part of the Business Core for Business students) 3
BSL 485  Managing the Legal Factor (required in the student’s final semester) 3

Elective Courses
Select two courses (6 credit hours) from the following:
BSL 304  Corporate Law
BSL 305  Legal and Social Aspects of Business Regulation
BSL 324  Negotiation
BSL 333  Legal Aspects of Real Estate Transactions
BSL 401  The Law of Financial Transactions
BSL 412  International Business Law
BSL 424  Intellectual Property Law
BSL 435  Law Of Entrepreneurship
BSL 460  Health Care Law and Ethics
BSL 476  The Law Of Risk
BSL 499  Special Topics (as appropriate)

Total Credit Hours 12

NOTE: All specific coursework for the minor in Legal Studies must be completed with a grade of “C-” or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

Business Technology

Department Code: BTE

Introduction
The Department of Business Technology serves the University as the focus for employing business technology and information management in the efficient solution of the entire range of business problems.

Today’s business and government organizations rely heavily upon information management for efficient administration and management. Collection, storage, and retrieval of data by computers are involved in the wide range of business activities including daily operations, management decision-making, and long-range planning. As the dependence of management on business technology grows, so does the need for
business technology specialists. The courses and degree programs are described below.

**Educational Objectives**

The Business Technology major is designed to provide the student with the key information technology and management skills needed in today’s business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

**Degree Programs**

A student pursuing the Business Technology major can earn either a Bachelor in Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

**Majors**

**Major in Business Technology**

- B.B.A. in Business Technology (p. 158)
- B.S.B.A. in Business Technology (p. 159)

**Minors**

**Minor in Business Technology**

- Business Technology (p. 160)

**B.B.A. in Business Technology**

**Major Area of Specialization in Business Technology (STEM)**

Students pursuing the BBA in Business Technology must complete the BBA Business Core and the specific coursework for the Business Technology major area of specialization as follows:

**BBA Business Core Requirements for the Business Technology Major Area of Specialization (STEM)**

---

### Economics

#### Department Code: ECO

### Introduction and Educational Objectives

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students
planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

**Degree Programs**

A student pursuing the Economics major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin. Additionally, a student pursuing the Economics major will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may also be the major area of specialization of a candidate for the Master of Arts (p. 429) and Doctor of Philosophy (p. 420) degrees. Consult the Graduate Academic Programs section of the Bulletin for general requirements of these programs of study.

**Majors**

**Major in Economics**

- B.B.A. in Economics (p. 161)
- B.S.B.A. in Economics (p. 162)

**Minors**

**Minors in Economics**

- Minor in Economics for Business Students (p. 164)
- Minor in Economics for Non-Business Students (p. 164)

**B.B.A. in Economics**

**Major Area of Specialization in Economics (P&S or STEM)**

Students who wish to pursue the Economics major area of specialization will choose between two tracks: Political Economy (P&S) or Quantitative Economics (STEM).

In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

Students pursuing the BBA in Economics must complete the BBA Business Core and the specific coursework for one of the Economics major tracks as follows:

**BBA Business Core Requirements for the Economics Major Area of Specialization (P&S or STEM)**

ECO 351 Economics of Developing Countries
ECO 371 Latin America And The Global Economy
ECO 379 ECONOMICS OF POVERTY
ECO 386 Health Economics
ECO 403 Contemporary Issues in Monetary Economics
ECO 420 Economic Growth
ECO 441 International Trade Theory
ECO 442 International Monetary Economics
ECO 460 Industrial Organization
ECO 499 Special Topics ( Energy Economics; Global Economics: Trade and Financial Flows; Global Economics, Energy, and Commodity Markets; Managerial Economics; The Economics of China)
ECO 521 Graduate Macroeconomic Theory
ECO 532 History of Economic Thought

Students who have completed ECO 302 may select a maximum of two electives (0-6 credit hours) from the following:

ECO 430 Applied Econometrics
ECO 444 Game Theory in Economic Applications.
ECO 510 Mathematical Economics And Applications 4
ECO 512 Econometrics
ECO 533 Advanced Microeconomic Theory

Additional two options in this category include ECO 499 (Special topics: Forecasting or Special Topics: Information Economics)

Required Courses
ECO 302 Micro Economic Theory 1, 2
ECO 303 Macro Economic Theory 2

Elective Courses
Select four courses (12 credit hours) from the following:

ECO 430 Applied Econometrics
ECO 444 Game Theory in Economic Applications.
ECO 499 Special Topics (Information Economics or Forecasting only)
ECO 510 Mathematical Economics And Applications 3
ECO 512 Mathematical Economics (II)
ECO 520 Econometrics
ECO 533 Advanced Microeconomic Theory

Total Credit Hours 18

1 All advanced courses in Economics (300-500 levels) require ECO 300 or the more technical version, ECO 302, as a pre-requisite.
2 Additional pre-requisite for ECO 300: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher
Additional pre-requisite for ECO 302: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher
Additional pre-requisite for ECO 303: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher
Additional pre-requisite for ECO 510: MAS 202 or MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of “C-” or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

B.S.B.A. in Economics

Major Area of Specialization in Economics (P&S or STEM)

Students who wish to pursue the Economics major area of specialization will choose between two tracks: Political Economy (P&S) or Quantitative Economics (STEM).

In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

Students pursuing the BSBA in Economics must complete the BSBA Business Core and the specific coursework for one of the Economics major tracks as follows:

BSBA Business Core Requirements for the Economics Major Area of Specialization (P&S or STEM)

</tr>
</tbody>
</table>

Elective Courses 3

Select three courses (9 credit hours) from the Economics departmental offerings - check all pre-requisites.

Total Credit Hours 12

NOTE: All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.

Minor in Economics for Non-Business Students

Minor Area of Specialization in Economics for Non-Business Students (P&S)

Non-Business students in any school or college may pursue a minor in Economics in the School of Business Administration. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Economics is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Economics department is necessary for a student to choose or complete a minor in Economics. Instead the non-business student should simply declare the Economics minor and complete the required 15 credit hours of Economics courses, according to the following:

Required Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 300</td>
<td>Microeconomic Theory And Applications 1, 2 or ECO 302 Micro Economic Theory</td>
<td>3</td>

</tr>
</tbody>
</table>

Total Credit Hours 15

NOTE: All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.
ECO 211  Economic Principles and Problems 3  
(Microeconomics)

ECO 212  Economic Principles and Problems 3  
(Macroeconomics)

ECO 300  Microeconomic Theory And Applications¹ 3  
or ECO 302  Micro Economic Theory

Elective Courses ³
Select two courses (6 credit hours) from the Economics 6  
departmental offerings - check all pre-requisites

Total Credit Hours 15

¹ Additional pre-requisite for ECO 300: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

² Additional pre-requisite for ECO 302: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ All advanced courses in Economics (300 - 500 levels) require ECO 300 or the more technical version, ECO 302.

NOTE: All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.

Finance
Department Code: FIN

Introduction
The finance major is designed to prepare business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

Educational Objectives
The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. We study these issues in a variety of contexts and industries.

The three primary areas of finance are financial management, investments, and financial markets and intermediaries. Financial management focuses on how an organization can accomplish its mission. For example, a corporation seeks to create and maintain wealth, and a non-profit organization seeks to improve the world in some way. All organizations want to achieve their mission to the greatest extent possible, and that requires making the best decisions with respect to value. The area of investments studies the purchase and sale of financial securities, such as stocks, bonds, options, and futures from the point of view of an investor. Financial markets are created to facilitate the trading (buying/selling) of financial securities. Financial intermediaries sell claims on themselves to investors, such as stock, life insurance, or a bank deposit. Financial intermediaries then invest the money from such sales in other assets such as loans, real estate, or other financial securities.

Degree Programs
A student pursuing a major in the Finance Department can earn either a Bachelor of Business Administration (BBA) by meeting the degree requirements set forth in this Academic Bulletin.

Majors
• Finance
• International Finance and Marketing
• Real Estate

Important Note: To be eligible for any of the three majors offered by the Finance Department, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a cumulative University of Miami GPA of 2.5 or higher after having completed FIN 302.

B.B.A. in International Finance and Marketing

Major Area of Specialization in International Finance and Marketing (STEM)

Introduction

The International Finance and Marketing major area of specialization is aimed at meeting the needs of business students seeking to pursue a career in international business, finance, and/or marketing.

Educational Objectives

The International Finance and Marketing major area of specialization is designed to prepare students for the most critical areas of decision making in international business. The objective is to provide business students with a comprehensive curriculum based on a strong program of international courses, and to create opportunities for access to multinational companies and the international business community.

Curriculum

Students pursuing the BBA in International Finance and Marketing must complete the BBA Business Core and the specific coursework for the International Finance and Marketing major area of specialization as follows:

### BBA Business Core Requirements for the International Finance and Marketing Major Area of Specialization (STEM)

**Elective Courses**

Select two courses (6 credit hours) at the 300 - 500 level from the Finance departmental offerings.

Select two courses (6 credit hours) at the 400 or 500 level from the Finance departmental offerings.

| Total Credit Hours | 18 |

1. **Important Note:** In order to pursue a major in Finance, a student must earn a grade of “B” (grade point of 3.0) or higher in FIN 302 (note that a grade of “B-” does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

2. Students are strongly encouraged to take FIN 303 and FIN 320 during the same semester.

3. Excluding FIN 300 and FIN 308.

**Note:** All specific coursework for the major in Finance must be completed with a grade of “C-” or higher (except for the minimum “B” grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.
NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a “C-” or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the International Finance and Marketing Major Area of Specialization (STEM)

Students must complete a minimum of 21 credit hours of Finance and Marketing courses beyond the core courses FIN 302 and MKT 201/MKT 301 (total of 27 credit hours) as follows:

<table>

Total Credit Hours 21

1 Important Note: In order to pursue a major in International Finance and Marketing, a student must earn a grade of “B” (grade point of 3.0) or higher in both FIN 302 and MKT 201/MKT 301 (note that a grade of “B-” does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

2 All courses must be taken within the current pre-requisite structure.

3 No 300-level Finance course may be used to satisfy this requirement. Additionally, some 400-level Finance courses require FIN 303 as a pre-requisite.

Note: All specific coursework for the major in International Finance and Marketing must be completed with a grade of “C-” or higher (except for the minimum “B” grade required for FIN 302 and MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

B.B.A. in Real Estate

Major Area of Specialization in Real Estate (STEM)

Introduction

The Real Estate major in the School of Business Administration is created for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Educational Objectives

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major strengthens ties with important segments of the business community and builds on the University’s strategic strengths in architecture (New Urbanism) and urban planning.

Students pursuing the major in Real Estate should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 139) (For more information, contact the Director of the Urban Studies Program. (http://www.as.miami.edu/urbanstudies/contact))

Curriculum

Students pursuing the BBA in Real Estate must complete the BBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

BBA Business Core Requirements for the Real Estate Major Area of Specialization (STEM)

## B.S.B.A. in International Finance and Marketing

### Major Area of Specialization in International Finance and Marketing (STEM)

#### Introduction

The International Finance and Marketing major area of specialization is aimed at meeting the needs of business students seeking to pursue careers in international business, finance, and/or marketing.

#### Educational Objectives

The International Finance and Marketing major area of specialization is designed to prepare students for the most critical areas of decision making in international business. The objective is to provide business students with a comprehensive curriculum based on a strong program of international courses, and create opportunities for access to multinational companies and the international business community.

#### Curriculum

Students pursuing the BSBA in International Finance and Marketing must complete the BSBA Business Core and the specific coursework for the International Finance and Marketing major area of specialization as follows:

### BSBA Business Core Requirements for the International Finance and Marketing Major Area of Specialization (STEM)

### B.S.B.A. in Real Estate

#### Major Area of Specialization in Real Estate (STEM)

**Introduction**

The Real Estate major in the School of Business Administration is created for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

**Educational Objectives**

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major strengthens ties with important segments of the business community and builds on the University's strategic strengths in architecture (New Urbanism) and urban planning.

Business students pursuing the major in Real Estate should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 139) (For more information, contact the Director of the Urban Studies Program. [http://www.as.miami.edu/urbanstudies/contact])

#### Curriculum

Students pursuing the BSBA in Real Estate must complete the BSBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

<table>
<thead>
<tr>
<th>BSBA Business Core Requirements for the Real Estate Major Area of Specialization (STEM)</th>
</tr>
</thead>
<tbody>
<tr>

**NOTE:** ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

**NOTE:** Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

### Specific Coursework for the Real Estate Major Area of Specialization (STEM)

Students must complete a minimum of 18 credit hours of Real Estate coursework beyond the core course FIN 302 (total of 21 credit hours). All courses must be taken within the current pre-requisite structure.

#### Core Course
- FIN 302 Fundamentals of Finance (taken as part of the Business Core)

#### Required Courses
- FIN 303 Intermediate Financial Management (pre-requisite FIN 302)
- FIN 320 Investment and Security Markets
- FIN 344 Real Estate Investment Analysis (pre-requisites FIN 302 & FIN 303 or FIN 320)
- BSL 333 Legal Aspects of Real Estate Transactions (pre-requisite BSL 212)
- ARC 584 Special Problems (Introduction to Real Estate and Urbanism)

#### Elective Courses
Select two courses (6 credit hours) from the following:
- FIN 427 Fixed Income Markets and Analysis (Pre-requisites FIN 302, FIN 320)
- FIN 445 Real Estate Finance (Pre-requisites FIN 302 & FIN 303 or FIN 320)
- FIN 499 Special Topics in Finance (Real Estate Market Analysis)

Optional Courses (Strongly Recommended)
- Introductory ARGUS and Advanced ARGUS, offered as one-credit enhancements in the spring semester
- MGT 445 Supply Chain Modeling and Analysis

Total Credit Hours: 18

**1 Important Note:** In order to major in Real Estate, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of “B-” does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

**2 In choosing to take FIN 303 or FIN 320, students are strongly advised to consider the prerequisites of the 400 level classes they might want to take later.

**3 FIN 344 is the pre-requisite or co-requisite for FIN 499: Real Estate Market Analysis.

**Note:** All specific coursework for the major in Real Estate must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

### Minor in Finance

#### Minor Area of Specialization in Finance (STEM)

Students in the School of Business Administration, as well as students in the other schools and colleges of the University of Miami, may pursue a minor in Finance by officially declaring the minor at their home school or college. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Finance is acceptable. If so, neither the advice nor the consent of either the Office of Undergraduate Business Education or the Finance Department is necessary.

The 12 credit hour minor in Finance consists of the following (all courses must be taken within the current pre-requisite structure):

#### Required Courses
- FIN 302 Fundamentals of Finance (part of Business Core for Business students)
- FIN 303 Intermediate Financial Management
- FIN 320 Investment and Security Markets

#### Elective Course
Select one course (3 credit hours) at the 300 or 400 level from Finance departmental offerings.

Total Credit Hours: 12

**1 Pre-requisite is FIN 302
2 excluding FIN 300 and FIN 308.

**NOTE:** All specific coursework for the minor in Finance must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.

### Health Sector Management and Policy

**Department Code:** HSM

#### Introduction

The Health Sector Management and Policy major area of specialization is designed for students seeking to pursue careers in health management...
and policy in any of a variety of health care organizations and public settings. The curriculum enables students to gain skills and understanding in the specialized language of health care and to comprehend concepts of management, financing, politics, law, and ethics as applied to the health care sector. The major area of specialization is also ideal for students aspiring to earn advanced degrees in health administration, health economics, medical sociology, public health, or law.

**Educational Objectives**

The purpose of the major area of specialization in Health Sector Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry. Appropriate candidates for the major area of specialization in Health Sector Management and Policy include School of Business Administration students interested in exploring the health care sector, working in the legal, management, or policy-making aspects of the health care sector or those wanting to have an augmentation to their pre-med, pre-law or pre-MBA, MPA or MPH studies, as well as those who expect to pursue a Ph.D. The minor area of specialization in Health Sector Management and Policy is available to students from all UM schools and colleges. Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers.

**Degree Programs**

The major area of specialization in Health Sector Management and Policy is available to students seeking a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA), by declaring it and meeting the degree requirements set forth in this Academic Bulletin.

**Majors**

**Major in Health Sector Management and Policy**

- B.B.A. in Health Sector Management and Policy (p. 172)
- B.S.B.A. in Health Sector Management and Policy (p. 173)

**Minors**

**Minor in Health Sector Management and Policy**

- Health Sector Management and Policy (p. 174)

**B.B.A. in Health Sector Management and Policy**

**Major Area of Specialization in Health Sector Management and Policy (P&S)**

Students pursuing the BBA in Health Sector Management and Policy must complete the BBA Business Core and the specific coursework for the Health Sector Management and Policy major area of specialization as follows:

| BBA Business Core Requirements for the Health Sector Management and Policy Major Area of Specialization (P&S) |
|-------------------------------------------------|---|
| ACC 211 Principles of Financial Accounting | 3 |
| ACC 212 Managerial Accounting | 3 |

| BSL 212 | Introduction to Business Law | 3 |

Select one of the suggested courses approved by the academic advisor:

- BTE 324 Object-Oriented Programming
- BTE 423 Database Management Systems
- ECO 430 Applied Econometrics
- ECO 510 Mathematical Economics And Applications
- MAS 342 Introduction to Optimization and Decision Making
- MAS 442 Stochastic Models in Operations Research
- MAS 547 Computer Simulation Systems
- MGT 445 Supply Chain Modeling and Analysis
- MGT 446 Supply Chain Strategy

Total Credit Hours: 62

Note: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

Note: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

#### Specific Coursework for the Health Sector Management and Policy Major Area of Specialization (P&S)

All courses must be taken within the current pre-requisite structure.

Students must complete a minimum of 21 credit hours of Health Sector Management and Policy coursework as follows:

#### Foundational Course

- MGT 270 Introduction To Health Sector Organization And Management | 3 |

#### Required Courses

- ACC 315 Accounting for Health Care Organizations. (pre-requisites ACC 211 & ACC 212) | 3 |
- BSL 460 Health Care Law and Ethics (pre-requisite BSL 212) | 3 |
- BTE 450 Introduction to Health Informatics | 3 |
- ECO 386 Health Economics | 3 |
- MKT 388 Health Care Marketing (pre-requisite MKT 201/ MKT 301) | 3 |

#### Elective Course

Select one course (3 credit hours) from the following:

- BPH 206 Introduction To Public Health | 3 |
- BPH 305 Issues In Health Disparities |
- BPH 309 Health & Environ. |
- BPH 310 Global Health |
Minor in Health Sector Management and Policy

Minor Area of Specialization in Health Sector Management and Policy (P&S)

The purpose of the minor in Health Sector Management and Policy is to provide the student with a basic understanding of the organizational, management, economic, and financial structure, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students interested in: exploring the health care sector; working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, pre-law or pre-MBA/MPA studies.

Students in the School of Business Administration, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Health Sector Management and Policy by officially declaring the minor at their home school or college and completing the coursework specified below. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Health Sector Management and Policy is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Health Sector Management and Policy is necessary.

The 12 credit hour minor in Health Sector Management and Policy consists of four courses—three required and one elective as indicated below (all courses must be taken within the current pre-requisite structure):

Total Credit Hours 12

1 MGT 270 is foundational to all other major coursework.
2 Pre-requisites: ECO 211, ECO 212, ECO 300 or ECO 302, and a calculus course

Note: All specific coursework for the major in Health Sector Management and Policy must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

Management

Department Code: MGT

Introduction

The Department of Management in the School of Business Administration is heterogeneous with respect to both research and teaching areas. Faculty are specialized in and teach courses that span a number of fields including entrepreneurship, human resources, international management, leadership, operations management, organizational behavior, strategic management, supply chain management, and teams. Given both the multinational context and diversity present in twenty first century organizations, coursework in the Department of Management is focused on preparing business students to be productive and effective contributors to the various communities they are embedded within or impact. Students who select any of the Management major areas of specialization pursue a variety of careers after graduation including starting businesses, running family businesses, accepting management positions in domestic or international organizations, attending law school, or pursuing other advanced graduate degrees.

Educational Objectives

• The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
• The improvement of interpersonal skills and learning to work effectively in teams;
• An understanding of the tools, methods, and procedures used to successfully lead people and organizations; and
• An awareness of the ethical issues and responsibilities inherent in being a member of the global business community.

Degree Programs

A student pursuing any major from the Department of Management may earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All
area specific coursework for any major and/or minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major and/or minor area of specialization.

#### Quantitative Elective

Select one of the suggested courses approved by the academic advisor:

- BTE 324 Object-Oriented Programming
- BTE 423 Database Management Systems
- ECO 430 Applied Econometrics
- ECO 510 Mathematical Economics And Applications
- MAS 342 Introduction to Optimization and Decision Making
- MAS 442 Stochastic Models in Operations Research
- MAS 547 Computer Simulation Systems
- MGT 445 Supply Chain Modeling and Analysis

| Excluding any 100-level Management courses and MGT 401. |
B.S.B.A. in Human Resource Management

Major Area of Specialization in Human Resource Management (P&S)

The Human Resource Management major area of specialization is designed for business students intending to pursue careers in human resources or personnel management.

Students pursuing the BSBA in Human Resource Management must complete the BSBA Business Core and the specific coursework for the Human Resource Management major area of specialization as follows:

BSBA Business Core Requirements for the Human Resource Management Major Area of Specialization (P&S)

**Note:** Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

**Specific Coursework for the Management Major Area of Specialization (P&S)**
Students must complete a minimum of 15 credit hours in Management departmental courses beyond the core courses MGT 303 and MGT 304.
Minor in Entrepreneurship for Business Students - Health Care Ventures Track

Minor Area of Specialization in Entrepreneurship - Health Care Ventures Track (P&S)

This minor is one of two specialized tracks offered to business students seeking to pursue a minor in Entrepreneurship. Eligible business students must have a declared business major other than Entrepreneurship.

The 12 credit hour minor in Entrepreneurship - Health Care Ventures Track consists of the following:

<table>
<thead>
<tr>
<th>Required Courses 1</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>MGT 353 Introduction to Entrepreneurship</td>
<td>3</td>
</tr>
<tr>
<td>MGT 454 Business Planning for Entrepreneurs (pre-requisite MGT 353)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 320 Investment and Security Markets (check all pre-requisites) or FIN 425 Business and Security Valuation</td>
<td>3</td>
</tr>
<tr>
<td>BTE 389 Launching High Technology Ventures</td>
<td></td>
</tr>
<tr>
<td>MGT 357 Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours 12

1 All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework taken for any minor in the Department of Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Minor in Entrepreneurship for High Growth/Technology Ventures Track

Minor Area of Specialization in Entrepreneurship - High Growth/Technology Ventures Track (P&S)

This minor is one of two specialized tracks offered to business students who wish to pursue a minor in Entrepreneurship. Eligible business students must have a declared business major other than Entrepreneurship.

The 12 credit hour minor in Entrepreneurship - High Growth/Technology Ventures Track consists of the following:

<table>
<thead>
<tr>
<th>Required Courses 1</th>

Total Credit Hours 12

1 All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework taken for any minor in the Department of Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Minor in Entrepreneurship for Non-Business Students

Minor Area of Specialization in Entrepreneurship for Non-Business Students (P&S)

This minor is for non-business students who seek to learn about developing business plans or how to initiate and manage small business enterprises. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Entrepreneurship is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Management is necessary. Instead the non-business student should simply declare the minor and complete the required six courses, or 18 credit hours, as follows:

<table>
<thead>
<tr>
<th>Required Courses 1</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 211 Principles of Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECO 211 Economic Principles and Problems</td>
<td>3</td>
</tr>
</tbody>
</table>

1 All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework taken for any minor in the Department of Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.
Minor in Management for Non-Business Students

Minor Area of Specialization in Management for Non-Business Students (P&S)

Non-Business students in any school or college may pursue a minor in Management in the School of Business Administration. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Management is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Management Department is necessary for a student to choose or complete a minor in Management. Instead the non-business student should simply declare the Management minor and complete the required 12 credit hours of Management courses, as follows:

Required Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGT 302</td>
<td>Human Resource Management</td>
<td>3</td>
</tr>
<tr>
<td>MGT 303</td>
<td>Operations Management</td>
<td>3</td>
</tr>
<tr>
<td>MGT 304</td>
<td>Organizational Behavior</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Course

Select one course (3 credit hours) at the 300 - 400 level from the Department of Management.

Total Credit Hours: 12

1 All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one minor area of specialization in the Department of Management. All coursework taken for any minor in the Department of Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Management Science

Department Code: MAS

Introduction

Management Science uses the ideas and methods of science, mathematics, statistics, and computing, which collectively are often referred to as Business Analytics, to help managers make better business decisions. Management Science techniques have been applied in a wide variety of areas including financial modeling, marketing research, organizational theory, transportation and logistics, health care, environmental protection, and manufacturing. Almost any decision can benefit from the methods of Management Science/Analytics.

Educational Objectives

The Department of Management Science offers a major area of specialization in Business Analytics as well as a minor in Business Analytics. The Business Analytics curriculum is designed to give business students the necessary educational background and experience to allow them to work as successful business analytics professionals.
In addition to the general education, business, and economics courses of the Bachelor of Science in Business Administration degree program, the major in Business Analytics requires a solid background in the natural sciences and mathematics. Additionally, students are required to take sequences of courses in optimization, decision science, and data analytics. A number of the courses in the Business Analytics curriculum require projects, in which the student evaluates a real-world system or process. As the system is studied and modeled, the student applies management science methods to find ways to improve the process. In such a course, written and oral presentation of findings is part of the learning and evaluation process. A major or minor area of specialization in Business Analytics is recommended to qualified students as preparation for direct entry into the field of Analytics or as preparation for future graduate studies.

**Degree Programs**

The Bachelor of Science in Business Administration (BSBA) is awarded with the major in Business Analytics by meeting the appropriate School of Business Administration requirements.

**Majors**

**Major in Business Analytics**

- B.S.B.A. in Business Analytics (p. 182)

**Minors**

**Minor in Business Analytics**

- Business Analytics (p. 183)

**B.S.B.A. in Business Analytics**

**Major Area of Specialization in Business Analytics (STEM)**

The Department of Management Science offers a major area of specialization in Business Analytics for students pursuing the Bachelor of Science in Business Administration degree. Students who choose the major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

Students pursuing the BSBA in Business Analytics must complete the BSBA Business Core and the specific coursework for the Business Analytics major area of specialization as follows:

**BSBA Business Core Requirements for the Business Analytics Major Area of Specialization (STEM)**

</tr>
</tbody>
</table>

Total Credit Hours 12

1 All courses must be taken within the current pre-requisite structure. In order to complete this minor, students will need pre-requisite courses of MTH 162, MAS 311, and MAS 312 or their equivalents.

2 offered in fall semester

3 offered in spring semester

Note: All specific coursework for the minor in Business Analytics must be completed with a grade of “C-” or better. In addition, a minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Marketing

Department Code: MKT

Introduction

Rapidly increasing global competition, emergence of new markets, and technological advancements make today’s marketplace a highly dynamic and challenging environment for companies. Effective marketing is therefore crucial for organizations to survive and prosper in such an environment. Marketing is the process through which organizations develop and distribute products and services that satisfy the needs of customers. Customer satisfaction is critical to the profitable operations
and growth of organizations and, as such, an integral component of modern-day marketing.

**Educational Objectives**

The primary goals of the Department of Marketing are:

1. to contribute to marketing knowledge through conducting scholarly research and disseminating the research findings through leading journals;
2. to excel in imparting marketing knowledge to students and honing their critical-thinking skills so as to prepare them for potentially successful careers in an increasingly competitive, dynamic, global, and service-and technology-oriented environment; and
3. to be of service to the business and professional communities at large.

The marketing curriculum offers courses and programs to undergraduate and graduate students for their professional development in domestic and world business.

A program of study in marketing offers students better understanding of and insights into:

- Marketing’s role within the organization and society;
- The various ‘markets’ for goods and services through better identification and analysis of consumer needs, wants, and interests;
- Marketing’s responsibility to society in legal, ethical, and moral matters;
- Methods, procedures, and techniques used in planning and managing marketing decisions.

**Degree Programs**

A student pursuing the Marketing major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

**Majors**

**Major in Marketing**

- B.B.A. in Marketing (p. 184)
- B.S.B.A. in Marketing (p. 185)

**Minors**

**Minor in Marketing**

- Marketing for Business Students (p. 187)
- Marketing for Non-Business Students (p. 187)

**B.B.A. in Marketing**

**Major Area of Specialization in Marketing (P&S)**

The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective. Additionally, the marketing program of study is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

A program of study in marketing offers business students a comprehensive understanding of such topics as:

- The critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies;
- The legal and ethical responsibilities of marketers.

Students pursuing the BBA in Marketing must complete the BBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

**BBA Business Core Requirements for the Marketing Major Area of Specialization (P&S)**

MKT 469 International Marketing Management (pre-requisites MKT 302 (pre or co-requisite) & MKT 360)

Total Credit Hours 15

1. Important Note: In order to pursue a major in Marketing, a student must earn a grade of “B” (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of “B-” does not qualify).

2. MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher.

Note: All specific coursework for the major in Marketing must be completed with a grade of “C-” or higher (except for the minimum “B” grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA.

B.S.B.A. in Marketing

Major Area of Specialization in Marketing (P&S)
The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective. Additionally, the marketing program of study is flexible, allowing business students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

A program of study in marketing offers students a comprehensive understanding of such topics as:
- The critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies;
- The legal and ethical responsibilities of marketers.

Students pursuing the BSBA in Marketing must complete the BSBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

MKT 389 Understanding Media Metrics In The Digital World

MKT 469 International Marketing Management (pre-requisites MKT 302 (pre or co-requisite) & MKT 360)

Total Credit Hours 15

Important Note: In order to pursue a major in Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of "B-" does not qualify).

MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher.

Note: All specific coursework for the major in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA.

Minor in Marketing for Business Students

Minor Area of Specialization in Marketing for Business Students (P&S)

The 12 credit hour minor in Marketing for business students consists of 9 credit hours of Marketing courses beyond the core course MKT 201/MKT 301, as follows:

<table>
<thead>
<tr>
<th>Core Course</th>
<th>Elective Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKT 201/301 Foundations of Marketing (taken as part of the Business Core; pre-requisite for all other MKT courses)</td>
<td>Select three courses (9 credit hours) from the Department of Marketing</td>
</tr>
</tbody>
</table>

Total Credit Hours 9

Important Note: In order to pursue the minor in Marketing, a student must earn a grade of "B" (grade point average of 3.0) or higher in MKT 301 (note that a grade of "B-" does not qualify).

MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher.

All courses must be taken within the current pre-requisite structure.

Note: All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

Minor in Marketing for Non-Business Students

Minor Area of Specialization in Marketing for Non-Business Students (P&S)

Non-Business students in any school or college may pursue a minor in Marketing in the School of Business Administration. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Marketing is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Marketing Department is necessary for a student to choose or complete a Marketing minor. Instead the non-business student should simply declare the minor and complete the required 12 credit hours of Marketing courses, as follows:

<table>
<thead>
<tr>
<th>Required Course</th>
<th>Elective Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKT 301 Marketing Foundations (pre-requisite for all other MKT courses)</td>
<td>Select three courses (9 credit hours) from the Department of Marketing</td>
</tr>

</table>

Total Credit Hours 12

Important Note: In order to pursue the minor in Marketing, a student must earn a grade of "B" (grade point average of 3.0) or higher in MKT 301 (note that a grade of "B-" does not qualify).

All courses must be taken within the current pre-requisite structure.

Note: All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.
Communication

http://www.miami.edu/com

Introduction

The School of Communication houses four departments that offer courses in eight majors leading to the Bachelor of Science in Communication degree. The departments are: Cinema and Interactive Media (Motion Pictures), Communication Studies (Communication Studies), Journalism and Media Management (Broadcast Journalism, Electronic Media, Journalism, Media Management), and Strategic Communication (Advertising, Public Relations). In addition, the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees are offered in the School.

Students engage with a diverse faculty of communication scholars, artists and professionals in a variety of hands-on learning experiences embracing research, writing, production, creative problem-solving and multimedia storytelling. On-campus television and radio facilities, soundstages and multimedia labs are available for academic and extra curricular student projects. Students utilize contemporary digital imaging technology and learn skills that cut across a variety of media platforms. Digital editing, recording and mixing facilities are available. New media technology is incorporated throughout the curriculum and the School has numerous computer labs and digitally “smart” classrooms.

Two video-conference centers with broadcast-quality interactive capability for remote interviews and programming support the School’s mission. The School also houses a film soundstage and two fully digital, high-definition television studios and control rooms. In addition, a fiber-optic linked studio allows for real-time, broadcast-quality transmissions to sites around the world. Under Communication faculty supervision, student-produced programming is distributed through the University’s cable facility and carried throughout the community by the local cable operator and is available through online streaming. The School operates several online sites that afford students outlets for multimedia, interactive and cross-platform writing, research, reporting and creative work.

The University’s FM radio station, and student online and print newspapers and magazines, offer additional opportunities for career development. The Bill Cosford Cinema, a 240-seat movie theatre, supports the Motion Picture Program and offers film programming for the Miami community. The School’s Norton Herrick Center for Motion Picture Studies is dedicated to research into the history and aesthetics of motion pictures and their social and cultural impact.

The School’s Center for Communication, Culture, and Change focuses on promoting positive social and behavioral change through communication research. The Center seeks to address urgent social issues, and make a positive difference in people’s lives.

The School supports student chapters of the American Advertising Association, the Public Relations Society of America, the Society of Professional Journalists, the National Broadcasting Society, the University Film and Video Association and other professional organizations. In addition, the School sponsors a nationally competitive intercollegiate debate team, which annually produces several members of the All American Debate Team.

Internships in professional settings are available to Communication students at the sophomore, junior and senior levels. Professionals at daily and weekly newspapers, magazines, news bureaus, cable systems, radio and television stations and networks, production houses and motion picture studios cooperate in faculty-supervised internships. Executives of city and county governments, advertising agencies, public relations firms and other business and nonprofit organizations join in providing internship opportunities. The Stein Family Office of Career Services and Internships assists students seeking internships and offers career planning services. Summer and semester-length study abroad opportunities are also available.

Mission

The School of Communication is dedicated to a global educational perspective and is committed to providing a socially responsible and ethically grounded learning environment guided by a diverse faculty of scholars, artists and professionals. The School is committed to quality undergraduate and graduate programs in communication that emphasize the relationship between theory and practice. We believe in freedom of expression and creativity, and encourage both collaboration and independent thinking as we prepare future scholars, professionals and leaders for a lifetime of service and learning.

Accreditation

The University of Miami is accredited by:

The Southern Association of Colleges and Schools
1866 Southern Lane
Decatur, GA 30033-4097

Academic Policies

Internal Transfer into the School of Communication

A student enrolled at the University of Miami in a School or College other than the School of Communication may apply for admission into the School. Applications are accepted throughout the year. A minimum overall grade point average of 2.5 is necessary for consideration. Applications are available in the Admissions, Academic & Alumni Services Office of the School of Communication (2037 Wolfson Building) and must be submitted prior to the end of each semester. Admission decisions will be made promptly after semester grades are final. Students will be notified in writing of the School’s decision.

Transfer Students

A transfer student must complete in residence a minimum of 18 credit hours toward a Communication major or a minimum of 9 credit hours toward a Communication minor. Courses taken elsewhere in Communication or related disciplines are not automatically accepted toward a major or minor at the University of Miami. Students who have obtained the written approval of the Chair of a Communication major to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major. Students should consult a School of Communication advisor to determine whether the transfer of Communication courses will increase beyond 120 the total number of credit hours required for a degree. In general, transfer credit hours will not be accepted to satisfy requirements for any course in any major or minor.
at the 300-level or above. Student petitions to transfer credit hours will be considered on an individual basis.

Transfer credit hours may not be used to satisfy requirements for any major or minor in Communication without the written approval of the Chair of the program concerned.

**Academic Progress & Probation/Dismissal**

Students must maintain a grade point average (GPA) of 2.5 or higher in courses taken in residence and submitted for their School of Communication major. Following the first semester in which any student's GPA in the major falls below a 2.5, the School may issue a warning to that student that his or her work does not meet School expectations. Should that student's GPA in the major be below a 2.5 in any subsequent semester, he or she may be placed on Academic Probation. The School may dismiss from the University any student who is on probation a total of two semesters (not necessarily consecutive). A student who has been dismissed from the School may apply for admission to one of the other Schools or Colleges within the University, but will not be readmitted to the School of Communication.

Those who wish to appeal their probation or dismissal must do so in writing to the Dean within 30 days of the notice of probation or dismissal. See also GOOD ACADEMIC STANDING, WARNING, PROBATION, AND DISMISSAL (p. 21).

**Internship Credit Hours**

All programs allow students to complete multiple internships for academic credit. Students should consult with their faculty advisor or the School’s academic advising office for their department’s specific internship credit hour policies.

**Credit Hours and Advanced Placement Credit**

Credit hours may be earned through Advanced Placement, IB, CLEP Examinations and Advanced Placement by Proficiency Examinations. These credit hours may be applied to the appropriate General Education Required Areas of Study or as electives except:

1. where prohibited by the University or a specific program area; or
2. if the course is remedial (e.g., ENG 103, MTH 099).

To earn credit hours, each student must pay a recording fee and have exempted course credit hours entered on his or her University transcript. An exemption may be granted for ENG 105 by the Department of English, but this exemption will not earn credit hours toward the 120 University credit hours required for graduation.

**Grade Point Average**

A candidate for the Bachelor of Science in Communication (B.S.C.) must complete the credit hours and achieve the grade point average specified for students in the University at large as stated in the section titled ACADEMIC PROCEDURES AND INFORMATION (p. 13), subject to additional requirements specified in School and Program sections.

**General Education Requirements**

In April 2012, the University of Miami Faculty Senate adopted a new set of General Education Requirements (GERs). The new Cognate Program of General Education was implemented in the 2013-2014 academic year (AY 2014).

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

See GENERAL EDUCATIONAL REQUIREMENTS (p. 19).

**Degree Programs**

The School of Communication offers courses in eight programs of study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Communication Studies, Electronic Media, Broadcast Journalism, Journalism, Media Management, and Motion Pictures.

**Minors**

The School of Communication offers minors in its eight programs of study and a general minor in Communication (COM). School of Communication students may complete a minor in a specific program of study, but are not eligible for the general minor in Communication.

**Concentrations**

Most degree programs offer concentrations or tracks of study in specialty areas. See the individual program sections for details on these concentrations.

**Requirements for Graduation**

**Bachelor of Science Degree in Communication**

Required University General Education Requirements

The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently. The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor.

All School of Communication students must complete the University’s General Education Requirements. These requirements can be found in the General Education Requirements (p. 19) section. Note that the General Education Requirements differ for incoming freshmen and transfer students.

Completion of each School of Communication major or minor fulfills one of the three cognate areas required by the University: People & Society, Arts & Humanities and STEM. (See individual program descriptions below identifying the specific cognate area covered.)

Students completing a second major or minor in the School which fulfills a cognate area different from their first major, and offered in a different department, may apply the second major or minor toward a second cognate area. No course submitted toward a School of Communication major or minor used to fulfill a University cognate may be applied toward any other cognate area. No more than two cognate areas may be completed in the School of Communication.

Students should meet with their advisors for assistance in completing all University and School requirements.
Developing Proficiency in Advanced Writing and Communication Skills

By their nature, Schools of Communication aspire to help students understand communication processes and develop high-level skills in writing, oral presentation and the use of digital communication technologies for crafting meaningful and effective messages. To fulfill the University’s Advanced Writing and Communication Skills requirement, all students enrolled in one of the eight undergraduate majors offered by the School will be required to complete their program’s core writing course, at least one public speaking/presentational skills course, and one digital skills course.

Major/Minor Requirements

In addition to completing a major in the School of Communication, students must also complete a minor (or a second major) in either a second Program of Study within the School or in an academic program outside of the School. Students completing majors and/or minors in the School must complete all School of Communication courses with grades of C or higher (a grade of C- or lower is not acceptable.) Students may not enroll in a School of Communication course without grades of C or higher in prerequisite courses. Students completing a minor or second major outside the School of Communication should consult this Bulletin for minimum grade requirements.

The Major in the School of Communication

Majors in the School of Communication leading to a Bachelor of Science in Communication require between 39 and 48 credit hours in School of Communication courses specified in Program Statements (below). Courses within each major must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) In addition, students must maintain a grade point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication majors.

The Minor

Each Communication student, in addition to completing requirements for a Communication major (below), must complete a minor field in either a second Program of Study within the School or in an academic program outside the School. Each course submitted for a minor offered in the School of Communication must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) To find the requirements for a given minor, students should consult this Bulletin and confer with the appropriate department representative.

School of Communication advisors will aid students in identifying appropriate minors. The candidate for a Communication degree may choose from among any of the disciplines offering minors at the University for which they may qualify. The choice of a minor should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

The Second Major Option

Students may choose to complete a second major, either within the School or in an academic program outside the School, in place of the minor requirement. Some second majors are impractical within the minimum 120 credit hours degree program. Students should consult with a Communication advisor before selecting a second major. The choice of a second major should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

Double Counting

Students completing a major and a minor in the School of Communication, or two majors within the School of Communication, may count only COM 250 toward both Programs of Study. No other course duplication is allowed. Students should consult with the Department Chair of the minor or second major for acceptable course substitutions where appropriate.

Upper Division Credit Hours

In earning a Bachelor of Science in Communication, each School of Communication student must complete a minimum of 36 credit hours of course work at the 300-level or above. Upper division transfer credit hours also apply if completed at a four-year institution and if approved by the Department Chair.

Electives

Only Free Elective courses may be taken under the University’s Credit Only option (see CREDIT ONLY OPTION (p. 17)). Free Electives are defined as courses not taken to fulfill the requirements of the major within the School of Communication, of the second major or minor, or of the School’s General Education Requirements. Free Electives are courses that are not taken to meet any of the above requirements or their prerequisites, but taken solely to meet the requirement of a minimum total of 120 credit hours for the degree.

General Electives

A sufficient number of University electives must be completed to fulfill a minimum total of 120 credit hours. Electives may be chosen from any course offered by the University except certain unapproved courses such as:

Students should consult a School of Communication advisor before selecting elective courses. Because specific courses are required in some School of Communication majors, students are advised to read Program Statements carefully and seek the advice of a School of Communication advisor prior to taking general University electives.

Schedules

Fifteen to sixteen credit hours constitute a normal semester schedule in the School of Communication. Students who wish to register for more than 18 credit hours must obtain prior approval from the Office of Admissions, Academic & Alumni Services (2037 Wolfson Building). Students who are on academic probation will be limited to a maximum of thirteen credit hours.

Honors

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students must contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details about the School of Communication Honors Program.
General Information

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows in the School of Communication

The School of Communication hosts several activities geared for our Foote Fellows throughout the academic year. School of Communication Foote Fellows will be receiving information from Assistant Dean Luis Herrera regarding our specific programs. For further inquiries, please contact him at lherrera@miami.edu.

Cinema and Interactive Media

http://com.miami.edu/programs

The Department of Cinema and Interactive Media offers a major in Motion Pictures and minors in Motion Pictures (CMP) and Interactive Media (CIM).

Introduction

The Motion Picture Program offers a complete curriculum for a new generation of media specialists, providing historical context and embracing the moving image creative process from writing and development, through production and post-production, to all forms of exhibition.

Visual storytelling requires technical skill, historical perspective and the ability to think critically in cinematic terms. The undergraduate Motion Pictures major provides the practical, collaborative and analytical skills required in today’s global and complex media environments.

The accomplished faculty is dedicated to engaging students in the discovery and development of their talents. Students are trained in innovation, creativity, critical thinking, adaptability, and the capacity to integrate theory and practice, technology and art. They are also well-equipped to understand the business and legal environments in which media industries operate.

Facilities in the Motion Picture Program include digital cameras; grip and electrical equipment; a soundstage; digital post-production image and sound facilities; and a digital animation lab. The School also operates the Bill Cosford Cinema, a state-of-the-art theater that exhibits first-run alternative, foreign and classic films. The Cosford Cinema provides an on-campus venue for various film festivals, including the annual Canes Film Festival featuring UM undergraduate and graduate work. A professional showcase screening of the best student work is held annually in Los Angeles.

The Motion Picture Program offers special summer programs in Prague (FAMU), Greece, and Los Angeles (LA Experience).

Major Cognate Area

- Arts and Humanities

Minor Cognate Areas

- Motion Pictures- Arts and Humanities
- Interactive Media- STEM

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

Dept. Code: CIM

Degree Programs

The Bachelor of Science in Communication is offered in the Motion Picture Program.

Major in Motion Pictures

A major is offered in Motion Pictures.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Motion Pictures majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Motion Pictures Major

Before admission as a Motion Pictures (CMP) major, a student must:

- Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Cinema and Interactive Media to use transfer credit hours to satisfy one or more requirements of that major may be required to complete
additional courses in residence at the University before being admitted to that major.

- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.

- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School.

A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

The Motion Pictures Major

Students majoring in Motion Pictures are required to choose one of the following five areas of concentration: General, Production, Screenwriting, Business or Critical Studies.

Minor in Motion Pictures and Interactive Media

Minors are offered in:

- Motion Pictures
- Interactive Media

Both minors require a grade of C or higher in all courses (a C- is not acceptable).

A grade of C or higher is required in all courses (a C- is not acceptable).

Communication Minor

Minor in Communication

A student seeking a minor in the general area of Communication must complete 15 credit hours, at least six of which must be at the 300-level or above. At least 9 credit hours towards the minor must be taken at UM.

- Students in the School of Communication cannot minor in Communication.
- Courses taken for this minor must be taken from the departments of Cinema Interactive Media, Communication Studies, Journalism and Media Management and Strategic Communication. Course prefixes include: CIM, COM, COS, JMM and STC.
- Each course submitted for a Communication minor must be completed with a grade of C or higher (a grade of C- or lower is not acceptable).
- Please see an advisor in the School of Communication, Undergraduate Academic Services Office for further assistance.

Communication Studies

http://com.miami.edu/programs
The Department of Communication Studies offers a major in Communication Studies and minors in Communication Studies (COS) and Health Communication (CHCO).

Introduction
The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, and professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete applications to particular contexts.

Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in

communication, law and other areas.

Degree Programs
The Bachelor of Science in Communication is offered in Communication Studies.

Major in Communication Studies
A major is offered in Communication Studies.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study (p. 19). Communication Studies majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Communication Studies major
Before admission as a Communication Studies (COS) major, a student must:
• Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
• Students who have obtained the written approval of the Chair of Communication Studies to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
• Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
• A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

Minor in Communication Studies

Communication Studies Minor

The minor in Communication Studies requires 15 credit hours, at least six of which must be at the 300-level or above. The additional credit hours must be chosen with prior approval of a Communication Studies advisor. A grade of C or higher is required in all courses (a C- is not acceptable).

Students, in conjunction with an advisor, can construct a Communication Studies minor focusing on areas of specific interest. These sample areas of concentration listed below are noted on the transcript as a Communication Studies Minor. Possible areas of concentration include the following:

Sample Concentration in General Communication Studies

Offers a rich background in the field of human communication in a variety of contexts applicable to all personal, social and professional endeavors. Complements any major or academic/career objective.

Journalism and Media Management

http://com.miami.edu/programs

The Department of Journalism and Media Management offers majors and minors in Journalism, Broadcast Journalism, Electronic Media, and Media Management.

Introduction

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards and obtain prestigious internships, long-term positions and admission
to excellent graduate programs and professional schools in a variety of fields.

Four majors and four minors are offered in the Department of Journalism and Media Management. The department’s programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication’s Electronic Media and Broadcast Journalism majors are designed for students who intend to pursue professional work in the arts, crafts and businesses of electronic mass communication and allied fields.

Students majoring or minoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School’s Media Management major is designed for students interested in the business and management aspects of contemporary media. Students may pursue interests in entrepreneurship, sales, management, technology and research, among other topics. Students are encouraged to network with industry professionals at Media Management Association meetings and expand their knowledge of media business operations on various platforms through local and national internships.

The School’s major in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to online media and entrepreneurial ventures. We emphasize effective storytelling through writing, audio and video recording, photography, graphics and data visualization. Reporting skills, analytical thinking and journalistic ethics are stressed throughout the program. Students are encouraged to work for The Miami Hurricane, UM’s award-winning online and print student-run newspaper, Distraction magazine, the Ibis yearbook, and various professional publications and websites.

The School’s facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

### Major Cognate Area
- People and Society (all department majors)

### Minor Cognate Area
- People and Society (all department minors)

Dept. Code: JMM

### Degree Programs
The Bachelor of Science in Communication is offered in Journalism, Electronic Media, Broadcast Journalism, and Media Management.

### Major
Majors are offered in:
- Electronic Media
- Broadcast Journalism
- Media Management
- Journalism

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. All majors must also complete a separate minor or second major within the School or in an academic program outside the School. Major/Minor pairing among Journalism, Broadcast Journalism, and Electronic Media is not permitted.

**NOTE:** Departmental Majors, if you wish to both major and minor in the Department of Journalism and Media Management, you must first obtain the written approval of the Chair of the department.

### Admission to the Electronic Media, Broadcast Journalism, Media Management and Journalism Majors
Before admission as an Electronic Media, Broadcast Journalism, Media Management or Journalism major, a student must:
- Complete the Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to that major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School.
- A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

### Majors

#### Majors in Journalism and Media Management

Strategic Communication

http://com.miami.edu/programs

The Department of Strategic Communication offers majors and minors in Advertising and Public Relations and a minor in Strategic Communication.

Dept. Code: STC

Introduction

The Department of Strategic Communication offers majors and minors in Advertising and Public Relations.

Students majoring in Advertising learn the art, craft and business of promoting brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development and media planning skills. The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally. The curriculum is hands-on and students learn how to create an advertising campaign that meets their client's goals. Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School's Advertising Program also has an active alliance with the American Advertising Federation.

Students majoring in Public Relations learn how to promote a client's business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their public’s. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community. Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

Major Cognate Area

- Advertising General Track:
  - People and Society
- Advertising Management Track:
  - People and Society
- Advertising Creative Track:
  - People and Society or
  - Arts and Humanities
- Public Relations:
  - People and Society

Minor Cognate Area

- Advertising Minor:
  - People and Society
- Public Relations Minor:
  - People and Society
- Strategic Communication Minor:
  - People and Society

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

Degree Programs

The Bachelor of Science in Communication is offered in Advertising and Public Relations

Majors are offered in:

- Advertising General Track
- Advertising Creative Track
- Advertising Management Track
- Public Relations

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study (p. 19). Advertising majors must also complete a separate minor or a second
major in either a second Program of Study within the School or in an academic program outside the School.

**Admission to the Advertising and Public Relations Majors**

Before admission as an Advertising or Public Relations major, a student must:

- Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Strategic Communication to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

**Major in Advertising**

Students majoring in advertising will choose one of the following three tracks:

- Advertising General Track
- Advertising Management Track
- Advertising Creative Track

**Major in Public Relations**

A major is offered in Public Relations.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Public Relations majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

**Minors in Strategic Communication Department**

The Department of Strategic Communication offers minors in:

- Advertising
- Public Relations
- Strategic Communication

The minors in Advertising, Public Relations and Strategic Communication require a grade of C or higher in all courses (a C- is not acceptable).

---

**Majors in Strategic Communication**

| COS 211 | Public Speaking 3 |
MKT 301  Marketing Foundations  3  
MKT 310  Consumer Behavior and Marketing Strategy  3  
**Total Credit Hours**  48  

1 Students must complete at least one course with an international or intercultural focus. Courses that meet this requirement include: STC 350, STC 482, COS 343, and COS 545. Other courses may be used to fulfill this requirement with the approval of an Advertising faculty advisor. Studying abroad also fulfills this requirement.  

Electives outside the Advertising major (but within the School of Communication) must be approved by the Chair of Strategic Communication.  

Students seeking a Marketing minor from the School of Business Administration must complete:  

MKT 301  Marketing Foundations  3  
Select three additional courses in Marketing  9  
**Total Credit Hours**  12  

2 with a grade of B or higher.  

Students must earn a cumulative grade point average of 2.5 or higher in the four courses submitted for the minor. Consult the School of Business Administration (p. 142) section.

**NOTE:** Students majoring in Advertising (all tracks) and Public Relations may not minor in Strategic Communication.
The University of Miami's Division of Continuing & International Education (DCIE) is dedicated to providing the highest quality education and training — both on campus and online — to people of all ages, throughout every stage of life.

DCIE offers a wide range of undergraduate, graduate and noncredit courses (including fully online and hybrid options) that span a wide array of industry- and academic-related disciplines. Our programs help advance and enrich students who are either beginning their academic journey to those seasoned professionals pursuing career opportunities in South Florida or within the global community.

DCIE manages the following programs:

- Non degree credit courses in undergraduate and graduate studies
- Noncredit professional certificate programs
- Bachelor of General Studies degree program for adults 22+
- Online middle school and high school
- Summer college credit programs for high school students
- Intensive English-language programs for international students
- Intensive language programs
- Osher lifelong learning community for adults aged 50+
- Corporate/custom training and workforce development programs

Adult Student Access Program

www.miami.edu/asap

Students that meet the minimum requirements may take up to 30 credit hours in an undergraduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. In order to be enrolled in this category, students submit an online application with any required documents. A minimum 2.5 G.P.A. is required to continue in the program beyond 12 attempted credit hours. The application for enrollment may be found on the Web at www.miami.edu/asap (http://www.miami.edu/asap).

Students may take up to 6 credit hours, lifetime maximum, in a graduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. Not all graduate departments participate in this program. In order to enroll in this category, students submit an online application, after securing the written permission of the participating graduate department. The application for enrollment may be found on the Web at www.miami.edu/asap (http://www.miami.edu/asap).

For more information, contact: The Adult Student Access Program, DCIE, University of Miami, umnondegree@miami.edu, 305-284-4000.

Bachelor of General Studies

www.miami.edu/bgs

Introduction

Under the leadership of Collegiate Studies, the DCIE offers the Bachelor of General Studies (BGS) degree program, which provides a solid and rigorous, interdisciplinary academic experience for adult, part-time students. It is designed specifically for adults who have previously attended college but have not yet completed their undergraduate degrees, as well as for those who have never had the opportunity to pursue post-secondary studies. You are eligible for admission if you graduated from high school at least four years ago, have not attended the University of Miami during the past calendar year, have a minimum of 2.2 grade-point average on previous college work, and are a U.S. citizen or permanent resident.

The BGS curriculum allows an individual the flexibility to design an area of concentration to enhance professional or personal goals. Designed to strengthen critical thinking and writing skills of the students, each course is taught by exceptional University of Miami faculty who are committed to the adult student.

Advisors offer personalized attention in career exploration and academic advising and discuss educational alternatives with potential students. Every effort is made to ensure that the process - from admission to registration - is efficient and convenient. Students may attend day, evening, or weekend classes to complete their educational goals.

To underscore its commitment to the adults in our community, the University offers a special tuition to students in the Bachelor of General Studies program which enables the adult, part-time student to pursue this degree at an affordable tuition rate. What’s more, many courses are available online allowing for greater scheduling flexibility.

The admission process takes into consideration that one’s grade-point average, while significant, is only one factor in determining an applicant’s qualification for acceptance. Therefore, an admissions interview with an advisor from the DCIE will be scheduled to supplement the information you provide on the BGS application form, which may be obtained by calling Collegiate Studies at 305-284-2727 or at www.miami.edu/bgsdegree (http://www.miami.edu/bgsdegree).

Requirements for Graduation

I. Candidates for the Bachelor of General Studies (BGS) degree must complete the required credit hours and achieve the quality point average specified for students in the University at large as stated in the section Academic Regulations and Procedures. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours for that subject as a general requirement for graduation, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied towards the 120 required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, the distributions of the School, the General Education
Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Required Areas of Study

<table>
<thead>
<tr>
<th><strong>English Composition</strong></th>

</tr>
</tbody>
</table>

**Foreign Languages**

Select a minimum of 3 credit hours of foreign language at the 200 course level or higher.

**People and Society (History/Social Sciences)**

Select 6 credit hours in a single two-semester History survey sequence

Select 9 credit hours in courses taught by at least two of the following disciplines:

- African American Studies
- American Studies in Social Science
- Anthropology
- Communication
- Economics
- Education and Psychological Studies
- Geography
- Judaic Studies
- Political Science
- Psychology and Sociology

**Arts and Humanities**

Select a total of 12 credit hours in each of the following disciplines:

- Art History
- Literature
- Philosophy and Religious Studies

Select a total of 9 credit hours in each of the following disciplines:

- American Studies in Humanities
- Art
- Art History
- Communications (Motion Pictures)
- Dance
- Theatre Arts
- Musicology
- English
- Italian
- German
- Portuguese
- Spanish or French Literature
- Philosophy
- Religion or Women’s Studies in Humanities

**Mathematics/Computer Information Systems**

MTH 101 Algebra for College Students (or an acceptable score on the math placement test is required) | 3 |
MTH 113 Finite Mathematics | 3 |

Select one 3 credit hour course in computer information systems

**Natural World (Natural Sciences)**

Select 6 credit hours in one or more of the following disciplines:

- Biology
- Chemistry
- Geological Sciences
- Environmental Science
- Marine Sciences
- Physics and Physical Sciences

**Area of Concentration**

Every candidate for a degree must select an area of concentration. ²

**Interdisciplinary Courses**

ENG 333 Writing the Research Paper | 3 |

Select four more interdisciplinary courses to meet requirements for graduation

**Electives**

Select elective courses in consultation with their advisor to meet the 120 credit hour graduation requirement

**Total Credit Hours**

120

1 during the first year of enrollment in the School.

2 The candidate designs an area of concentration that meets his/her professional and personal goals. The course of study is reviewed and approved by the Dean and/or Director of the program.

3 BGS Interdisciplinary courses are especially designed to foster critical thinking and taught by faculty from all departments.

---

**Credit Certificate Programs**

miami.edu/ccp

Not everyone needs or wants a complete degree program. Recognizing this, the DCIE - in cooperation with several other colleges and schools of the University - offers special Credit Certificate Programs.

Focusing on a single subject, these certificate programs allow students to concentrate on courses that offer the specific knowledge and skills needed for career advancement. All courses are taught by University of Miami faculty at the undergraduate level and are taken for academic credit hour.

Each certificate program varies in the number of required credit hours. While required courses are noted, students may work with an advisor in developing an individually-designed program.

Credit certificate programs are currently available in the following subject areas:

**Certificate in Accounting**

The Undergraduate Certificate in Accounting is awarded by the Division of Continuing and International Education and the Department of Accounting. It is designed for those who hold at least an undergraduate degree (preferably in business) from an accredited college or university, and whose present interest or occupation is accounting. The program
requires students to take the same 24 credit hours of accounting courses required for the undergraduate major in Accounting. To sit for the Certified Public Accountant (CPA) examination in Florida, students must have completed 120 credit hours, including 24 credit hours of accounting (above the elementary level) and 24 credit hours of business courses, including a minimum of six credit hours of business law. There are additional educational requirements to become licensed as a Certified Public Accountant in Florida. Students may wish to consider either the Graduate Certificate in Accounting or the Graduate Certificate in Taxation (offered by the School of Business) to meet those additional education requirements.

Certificate in Computer Information Systems

The Certificate in Computer Information Systems program is designed to provide a broad background in business computer information systems and to develop the technical skills one needs to stay competitive in this challenging field. The program will be of particular benefit to programmers and to management information systems analysts. The certificate is awarded by the DCIE and the Department of Computer Information Systems upon the successful completion of 18 credit hours.

Global Academy

http://www.umga.miami.edu

University of Miami Global Academy (UMGA) offers an online middle and high school college preparatory program for both full-time and part-time students. Students have the option of either taking courses and transferring them back to their local school or completing all of their courses at UMGA and graduating from the University of Miami Global Academy. In addition, UMGA offers courses on an accelerated schedule for credit advancement or credit recovery. Whether students are at the middle or high school level, all are provided with the following:

- Instruction from certified, highly qualified teachers
- Academic coaching to assist with schedules and college acceptance
- Small class size
- A highly interactive learning environment that promotes engagement
- Comprehensive curriculum offering regular, honors, Advanced Placement (AP) and world language courses including French, Latin, and Mandarin Chinese
- iESOL Program to increase English language proficiency

Additional information regarding middle school, high school, and summer school can be found at www.umga.miami.edu (http://www.umga.miami.edu).

Intensive Language Institute

The Intensive Language Institute offers comprehensive language instruction for academic, professional, and personal purposes. The Intensive English Program, a full-time course of study for international students who wish to pursue university studies in the United States, provides instruction in English language and academic study skills. The ILI also offers certificate programs, part-time language courses and customized language programs.

Intensive English Program

The Intensive English Program is designed to prepare students to participate successfully in the academic environment. Students are given a placement test upon arrival to determine the most appropriate level of study. Courses are offered at five levels of instruction. The skills-based curriculum integrates reading and writing, listening and speaking into one complete program of study. The focus is on English language acquisition and application in an academic setting. Specialized classes vary by level; focusing on the needs of the language learners. Satisfactory completion of the highest level meets the English language requirement for acceptance to undergraduate programs at the University.

For more information contact:
Intensive English Program
PO Box 248005
Coral Gables, FL 33124-1610
305-284-2752
E-mail: iep@miami.edu
Visit our website at www.miami.edu/iep (http://www.miami.edu/iep)

Intensive Language Programs

Communicative language classes are offered in the evenings and on weekends in Spanish, Portuguese, Italian, French, Mandarin Chinese and ESL throughout the year. These courses focus on meaningful communication in the chosen language. Specialized classes focus on Accent Reduction, Medical Spanish or Medical Haitian Creole, and/or Business Writing. A 7-day immersion-style program in Spanish is also offered. Several non-credit certificates are available: the English for Law School Studies Certificate is a 6-week summer program for international students, the Business Communication Certificate focuses on oral and written skills necessary for the workplace, and the Teaching English as a Foreign Language Certificate teaches skills needed to teach ESL or EFL abroad. The Intensive Language Institute also develops and conducts customized language courses on or off campus tailored for individuals, groups, and organizations with specialized language training needs. For further information, or to register for classes, please call us at 305-284-4000 or visit us on the web at: www.continue.miami.edu (http://www.continue.miami.edu). Email: alc.cstudies@miami.edu.

Office of Professional Advancement

Dedicated to providing the highest quality, competency-based, continuing professional education, the Office of Professional Advancement offers seminars, courses and certificate programs to meet the training and professional development needs of both corporations and individuals.

For more information, specific curriculum descriptions and a listing of current seminars, courses and workshops, contact the:

Office of Professional Advancement, DCIE
University of Miami
111 Allen Hall
Coral Gables, Florida 33124-1610
305-284-5800
Email opa@miami.edu.
Additional information on the web at: http://www.continue.miami.edu.

**Alfus Healthcare Advocacy**
This program offers a comprehensive curriculum geared to educate students in the complex field of the US healthcare system. Healthcare advocates strive to maintain high individual services for clients in a system that is frequently impersonal and intimidating. Classes are taught by industry leaders. The program is offered online in cohorts of 8 modules for a period of approximately 9 months. Upon completion, students are prepared to successfully enter this promising new field.

For detailed course descriptions, calendar and tuition cost, please visit our website at: http://www.continue.miami.edu/pac.

**Electronic Medical Records Specialist Certificate**
Manage electronic medical records and gain the professional knowledge to become an essential member of the healthcare team. Learn through hands-on practice sessions using PrimeSUITE®, electronic medical records software. The Program prepares students to sit for the Certified Electronic Health Records Specialist (CEHRS) examination through the National Health Career Association.

For detailed course description, calendar and tuition cost, please visit our website at www.continue.miami.edu.

**Business and Leadership Certificate Programs**
The Office of Professional Advancement offers certificate programs in the areas of business, Leadership and Nonprofit areas. These non-credit certificate programs are tailored for individuals who want to improve their business and leadership skills.

For a full list of business certificate programs offered, please visit our website: http://www.continue.miami.edu.

**Certified Professional Coach Program**
This Coach Certificate Training Program is designed to support you in becoming a professional coach or in using coaching skills to enhance your leadership, management, and/or communication skills. This program has been written by master coaches and aligns with the International Coach Federation (ICF) Core Coaching Competencies. The University of Miami has designed a thorough program that will allow you to make a powerful leap into using coaching skills and becoming a professional coach. The Certified Professional Coach Program is a 140 hour, eleven month program designed for those interested in a career in coaching, who also want outstanding training in order to serve clients at the highest level. Additionally, it is designed for leaders, managers, human resource professionals, teachers, or service professionals (doctors, lawyers, counselors, consultants, etc.) who want to dramatically improve their ability to communicate, motivate, inspire, and empower others.

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu/coach.

**Human Resources Management Certificate Program**
This certificate provides the latest in proven techniques and strategies to effectively manage organizational challenges. The curriculum covers the following topics: Strategic Management, Legal and Regulatory Issues; Employment, Planning, and Placement; Benefits and Compensations: Development and Administration; Training and Development and Employee and Labor Relations. The HR Program is recognized by the Greater Miami Society for Human Resource Management. The comprehensive curriculum works for the newcomer as well as the seasoned professional and is especially useful to small and medium-size business owners. (6 months)

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu/hrm.

**SHRM® Certification Course (SHRM-CP™/SHRM-SCP™)**
Establish yourself as a globally-recognized human resource expert by earning the new standard in HR Certification: SHRM Certified Professional (SHRM·CP™) and SHRM Senior Certified Professional (SHRM·SCP™). Designed for SHRM credential candidates, this course will expand and test your knowledge of practical, real-life competencies in areas critical for HR career success. Combining expert instruction with the SHRM Learning System® for SHRM-CP™/SHRM-SCP™, you will learn faster, retain more knowledge, and stay on track for success on the exam.

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu/hrm.

**Interior Design Certificate Program**
If you have always had an eye for design, and have a knack for taking an ordinary space and making it feel extraordinary, then the University of Miami Certificate in Interior Design is for you. The Certificate in Interior Design Program offers non-credit courses to those who want to enrich their cultural experiences or who are interested in improving their professional or occupational skills. Taught by industry professionals, our Certificate in Interior Design program focuses on the important fundamentals to enter the design field. A hands-on program, students will learn history of interiors, principles and elements of design, freehand and computer drafting, specification and materials, professional practice, photography and building a portfolio.

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu.

**Paralegal Studies Certificate Program**
The UM Paralegal Studies program is an intense four-month course of study which certifies the successful student as a qualified professional ready to start an exciting new career as a paralegal. Classes are taught by prominent local attorneys, Judges and Magistrates. The Paralegal Program classes are offered on the weekends, weekdays or weekday evenings at the Coral Gables campus and on weekday evenings in
Broward. This program is also available online in both English and Spanish. (4 months)

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu/paralegal.

**Paralegal Specialist Certificate**

The Paralegal Specialist Certificates provide both beginning and experienced paralegals with expansive educational and professional opportunities. The certificate programs allow paralegals to augment current skills and focus on virtually any area of the law. Choose from over 20 Paralegal Specialist Certificates and give yourself an edge in today's competitive job market. All specialist courses are available online so students are able to enroll at any time. (6 months)

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu/paralegal.

**Personal Financial Planning Certificate Program**

Designed for students preparing for professional examinations and professional practice in personal financial planning.

Our program consists of providing the highest quality CFP education through Dalton Education, a leading provider of innovative education solutions in financial planning. The founders of Dalton Education have helped thousands of financial professionals earn the CFP® certification marks with their leading CFP review course, THE DALTON REVIEW®. Students can choose from an independent, self-paced, online education program or a live, instructor-led, internet delivered program.

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu/pfp.

**Social Media Management Education Program**

University of Miami is proud to offer a Social Media Professional Certificate and Social Media Strategist Certificate. This is a cutting edge program, designed to teach the business applications of social media communications. This self-paced online program is convenient, practical, and affordable with the flexibility to begin at a time that works best for you.

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu.

**Project Management Professional Certificate (PMP®)**

This program satisfies the educational requirement needed to qualify to take the Project Management Professional (PMP®) exam. Learn the core competencies of project management, following the Project Management institute’s A Guide to the Project Management Body of Knowledge, (PMBOK® Guide). Become proficient in the knowledge areas, process groups, skills and techniques delineated in the PMBOK Guide to execute projects effectively and efficiently through all stages.

For more detailed course descriptions, current schedule, and prices please visit our website at http://www.continue.miami.edu.
Education and Human Development

http://www.education.miami.edu

Introduction
The School of Education and Human Development offers undergraduate majors in:

- Human and Social Development
  - Track I: Individual and Relational Development
  - Track II: Community and Program Development
  - Track III: Human and Social Development Studies
- Athletic Training
- Exercise Physiology
- Sport Administration
- Elementary (K-6)/Exceptional Student Education (K-12) with ESOL and Reading Endorsements (K-12)
- Secondary English with ESOL Endorsement (K-12)
- Secondary Science, Mathematics and Social Science (6-12).

The degrees of Master of Science in Education, Specialist in Education, Doctor of Education, and Doctor of Philosophy are available in various departments within the School. These programs are under the supervision of the Dean of the Graduate School and the School of Education and Human Development Sr. Associate Dean for Graduate Studies.

Vision/Mission
Our vision is to be a center of excellence in the study, promotion and integration of educational, psychological, and physical well-being in multicultural communities.

Our mission is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community.

Academic Policies

Admission
Applications for incoming freshman are processed and reviewed by the Office of Admission.

Application to the Bachelor of Science in Education program is requested by February 1st.

Early application is encouraged.

Transfer students: The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 GPA is recommended for transfer admission.

Application deadline for transfer students is March 1st.

Students admitted into the SEHD programs are held to the program requirements stated in the Bulletin for that term.

Student Responsibilities
Students are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with the provisions set forth in this Bulletin and written changes to their program of study. Written requests for variation from program or school requirements are reviewed by an administrative committee.

Matriculated students who elect to transfer courses from another institution over a summer or intersession term, must receive departmental or program approval prior to enrolling in the course. Students are responsible for adhering to the residency rule which states that the last 45 consecutive credits must be earned at UM.

A student advising compact specifies the dual responsibilities between students and advisors in each program.

Academic Progress and Probation
The School will review each student’s record at the end of each semester.

When a student’s semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with the School of Education and Human Development policies and procedures.

Students on probation are not permitted to enroll in more than 12 credit hours, shall make arrangements to meet on a monthly basis with their academic advisor, and may have a STOP placed on their future enrollment until grades are further reviewed. The following criteria will determine probationary status.

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>CGPA</th>
<th>CGPA (Exercise Physiology Majors Only)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 30 credit hours</td>
<td>1.7</td>
<td>2.0</td>
</tr>
<tr>
<td>30-59 credit hours</td>
<td>2.0</td>
<td>2.5</td>
</tr>
<tr>
<td>60+ credit hours</td>
<td>2.3</td>
<td>2.5</td>
</tr>
</tbody>
</table>

Note: There are different retention and probation policies for Athletic Training majors. Please see the Athletic Training (p. 214) website or the Athletic Training Guidelines Manual for this and other important information regarding the requirements for completion of the Athletic Training major.

Note: The minimum GPA required for graduation from a Teacher Education Program is 2.5.

Subject to Dismissal
A student who remains on academic probation twice during their undergraduate studies can be designated as “Subject to Dismissal” and will be dismissed the following semester if not removed from probationary status. It is not required to be on this status to be dismissed from the School of Education and Human Development or from the University of Miami.

Academic Dismissal
A student in the School of Education and Human Development whose CGPA or progress toward degree completion, falls below the level of the minimum standards of the University of Miami and/or the School of Education and Human Development, may be dismissed.
Accreditation

Kinesiology and Sport Sciences offers the Athletic Training Program that is accredited by the Commission on Accreditation of Athletic Training Education (CAATE); the Sport Administration Program is approved by the North American Society of Sport Management. Teacher Education Programs offered by the School of Education and Human Development are approved by the Florida Department of Education. In conjunction with the Phillip and Patricia Frost School of Music, the School of Education and Human Development offers Teacher Education Programs in Music Education at the undergraduate and graduate levels. Students who successfully complete their program of studies and submit an application to the Florida Department of Education - Bureau of Educator Certification are eligible to receive a Professional Teaching Certificate.

Educational and Psychological Studies

Dept. Code: EPS

Bachelor of Science in Education: Human and Social Development

The major in Human and Social Development (HSD) focuses on the promotion of healthy development and well-being. It prepares students to work with people in multiple contexts and settings:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements

By exploring the scholarly and practical interconnections among individual, interpersonal, social, and community approaches to change, students learn to identify barriers to well-being and to implement effective change-oriented strategies and policies. HSD coursework emphasizes theory, research, and skills. It culminates in a practicum in a setting related to students’ area of interest and prepares them for both graduate studies and careers.

Students choose between three areas of concentration (tracks).

- **Track I: Individual and Relational Development (Track Code: HSDI)**
  This track emphasizes individual, relational, and family well-being. Focusing on context and diversity in mental health and on strength-based, preventive, and empowering approaches, courses cover family studies, counseling theories and techniques, interviewing skills, and the basics of human service work. Students are well-prepared for graduate study in the helping professions and careers in health and human services.

- **Track II: Community and Program Development (Track Code: HSDC)**
  This track promotes healthy individual and community development by emphasizing how social, institutional, and community dynamics affect personal well-being. Stressing the role of non-government agencies in fostering well-being for people with diverse backgrounds, HSDC prepares students to diagnose institutional and community challenges and offer strategies for positive change. Courses include community-focused planning, needs assessment, and change strategies and nonprofit program development, implementation, and evaluation. Students are well prepared for graduate study in community psychology and public policy and careers in community organizations.

- **Track III: Human and Social Development Studies (Track Code: HSDS)**
  This is a general track which offers a menu of courses relating to individual and community development. HSDS students are free to combine classes from the Individual (HSDI) and Community (HSDC) tracks. This track meets the needs of students who seek greater flexibility in course work and are less concerned with specializing in the individual or community tracks.

HSD students must declare an approved second major or a minor either in the School of Education or through any other school or college.

Requirements for Graduation

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES (p. 13), subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only. Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

V. Required Areas of Study

1. **English Composition 3 – 6 credit hours**
   Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105.
Courses satisfying the English Composition requirement may not be used to fulfill the Advanced Writing and Communication Requirement.

2. Mathematics
B.S.Ed. degree candidates in the Department of Educational and Psychological Studies are required to take EPS 351. This course fulfills a Math requirement for the HSD major. Prior to taking EPS 351, students must complete MTH 101 or be exempt from MTH 101 based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics.

3. Foreign Languages (not applicable)

Areas of Knowledge and Cognate Requirements

The University of Miami’s General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a Cognate, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement,
  - one in the Arts & Humanities (A&H),
  - one in People & Society (P&S), and
  - one in Science, Technology, Engineering & Mathematics (STEM).

Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.

- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in that one area.
  - Exercise Physiology and Athletic Training majors will fulfill the STEM cognate.
  - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the P&S cognate.
  - An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Skills Requirement

Every student majoring in Human and Social Development, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses in the HSD major which meet the Advanced Writing and Communication Skills Requirement are EPS 321, EPS 371 and EPS 579.

VII. Major in Human and Social Development

- Every candidate for the B.S.Ed. degree in the Department of Educational and Psychological Studies must choose a major in Human and Social Development.
- Students choose among three areas of concentration:
  - Track I – Individual and Relational Development (HSDI);
  - Track II – Community and Program Development (HSDC);
  - Track III – Human and Social Development Studies (HSDS).
- To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.
- HSD majors must maintain a minimum overall grade point average of 2.0 with a grade of “C” or better in all courses in the major.
- HSD students must declare an approved second major or a minor in the School of Education and Human Development or through any other UM school or college.

VIII. Minor

B.S.Ed. majors in Human and Social Development are required to declare a minor.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

For further information, address all inquiries to:

Assistant Dean
School of Education and Human Development

Minor in Human and Social Development

- The requirements of the minor are 15 credit hours with a grade of C or better.
- Nine of these 15 credit hours must be earned at the University of Miami; with prior approval, three of these nine may be taken through the UM Study Abroad Program.
- All transfer course equivalencies, (up to 6 credits), must be approved by the EPS department.
- EPS 201 is required
- Two courses must be upper division courses (at or above the 300 level)
- The undergraduate coursework in Human and Social Development is open to all qualified University of Miami students.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student's degree granting college or school.

Kinesiology and Sport Sciences

Dept. Code: KIN

The School of Education and Human Development offers undergraduate studies in the Kinesiology and Sport Sciences Department. The Department provides some of the strongest programs in the field, providing a structured classroom setting immersed in theory and knowledge with clinical and practical experiences. The department is committed to fostering unique and collaborative efforts within our diverse University community. Students are encouraged to engage in various work and clinical experiences including opportunities at the Medical School, the Miami Project to cure paralysis, UM Varsity Athletics Department, South Florida sports industry, Sports Medicine Clinics, Veterans Administration Hospital, and local high schools. Students can choose to major in one of the following areas:

- Athletic Training
- Exercise Physiology (with a pre-medical or pre-physical therapy track)
- Sport Administration

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the
quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES (p. 13), subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

V. Required Areas of Study.

1. **English Composition**
   Students must take ENG 105 and ENG 106 (or their equivalent) during the first year of enrollment in the School. Admission to ENG 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and ENG 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

2. **Mathematics**
   B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests. Statistics does not satisfy the Math requirement.

3. **Foreign Languages (applicable to Sport Administration majors only)**
   Students must earn at least 3 credit hours of a foreign language at the 200 course level or higher. Special 200-level courses are required of native speakers who choose to fulfill the language requirement. Two semesters of American Sign Language constitutes an acceptable alternative for the Foreign Language Requirement.

**Areas of Knowledge and Cognate Requirements**

The University of Miami’s General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a Cognate, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement,
  - one in the Arts & Humanities (A&H),
  - one in People & Society (P&S), and
  - one in Science, Technology, Engineering & Mathematics (STEM).
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
  - Exercise Physiology and Athletic Training majors will fulfill the STEM cognate.
  - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the P&S cognate.
- An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Requirement

Every student majoring in a program from the Kinesiology and Sport Sciences Department will meet the Advanced Writing and Communication Requirement upon fulfillment of the courses for that major. These courses have a prerequisite of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral components will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. The following courses meet the Advanced Writing and Communication Skills Requirement for the major:

- **Athletic Training**: KIN 250 and KIN 260
- **Exercise Physiology**: KIN 365 and KIN 457
- **Sport Administration**: KIN 306 and KIN 498

VII. Majors

Every candidate for the B.S.AT. degree must choose Athletic Training as a major. Every candidate for the B.S.EXPH degree must choose Exercise Physiology as a major. Every candidate for the B.S.Ed. degree must choose a major in Sport Administration. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.

The choice of majors should be made no later than the beginning of the junior year and must be approved by the major department. Any student
making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

VIII. Minors

B.S.Ed. majors in Sport Administration and Exercise Physiology and B.S. EXPH majors are required to declare a minor. Sport Administration students require department approval before declaring a minor. Exercise Physiology students may choose not to declare a minor if following the pre-med track. Students must complete all of the pre-med courses in order to be waived from the minor requirement. Please consult an advisor for clarification of this requirement.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

Minors

A minor in any of the three areas below consists of 14-15 credit hours:

Exercise Physiology

Sport Administration

Sports Medicine

- A grade of C or better is required for each course applied toward the minor; the overall grade point average for the minor must be 2.5 or above.
- The undergraduate coursework in Exercise Physiology, Sports Medicine, and Sport Administration are open to all qualified University of Miami students. A student can minor in either Exercise Physiology or Sports Medicine but not both.
- Athletic Training majors are not allowed to minor in Sports Medicine.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student’s degree granting college or school.
- Seniors are required to participate in the General Education Assessment as part of the SACS review process.

For further information, address all inquiries to:

B.S. in Exercise Physiology

The Undergraduate program in Exercise Physiology at the University of Miami, is designed for students to acquire a sound knowledge base in the sciences followed by the application of that knowledge base to human movement, exercise and sports performance. Clinical laboratory experiences supplement applied scientific theory in a rigorous academic setting.

- Students may pursue a pre-med track concurrent with the Exercise Physiology major and should inform their advisor if selecting this track.
- Exercise Physiology requires that students maintain a major GPA of 2.75. Students with a major GPA below 2.75 will have one semester to raise their GPA to meet the requirement. Failure to do so may lead to dismissal from the major.
- Students transferring from another college or university must have a cumulative GPA of 3.0 or above in order to be considered for admission to the major.
- A grade of “C” or better is required for each course applied toward the major. Students are allowed to retake a course one time.
- All 100 level courses and KIN 202, KIN 212, and KIN 232 are open to non-majors. All other courses are open to majors and minors only. KIN 202 is only open to science majors.
- All 300- and 400-level courses are restricted to declared Exercise Physiology majors only.
- KIN 466 has been changed to KIN 399, and should be taken in the Spring semester of the junior year. Students unable to take or retake this class prior to graduation are permitted to take KIN 545 as a substitution.
- Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.
- The BSEXP degree requires:

**University of Miami Honors Program – Exercise Physiology**

The courses below will be available for honors credit hour for Exercise Physiology students provided the following stipulations are met:

1. The course is under the direction of a full-time faculty member in Exercise Physiology.
2. The student completes an honors project permission form and submits this form to the instructor within the first three weeks of the semester.
3. The student completes assigned writing credit work by the end of the semester.
4. Assignments completed for honors credit hour are in addition to the University of Miami Writing Center for review.

The University of Miami currently offers an accelerated programs for undergraduate Exercise Physiology majors who want to obtain a Master’s Degree in Exercise Physiology, Strength & Conditioning/Fitness Entrepreneurship, or Nutrition for Health & Human Performance. This can be done by taking one additional year of graduate courses. These students must take two graduate courses in Exercise Physiology in their senior undergraduate year in order to earn an M.S.Ed. degree in one additional year. Please visit our website www.education.miami.edu (http://www.education.miami.edu) for additional information on the accelerated master’s programs. To be eligible students must apply for admission to the accelerated master’s program no later than the end of the Fall semester of their senior year.

**B.S. in Athletic Training**

The Athletic Training program at the University of Miami is an undergraduate education program that has been accredited by CAATE. The program is designed to provide a structured classroom and clinical experience to prepare students to become eligible to sit for the Board of Certification exam; Didactic courses are sequenced to maximize student learning. Please see the Athletic Training website or the Athletic Training Guidelines Manual for the course sequence form and other important information regarding the requirements for completion of the Athletic Training major.

- A degree in Athletic Training requires a major GPA of 3.0 or higher and an overall GPA of 2.5 or higher.
- Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.
- Students must successfully meet all of the retention requirements outlined in the Athletic Training Education Program (ATEP) handbook in order to continue in the major.
- The BSAT degree requires:

B.S. in Education, Sport Administration

The Sport Administration major at the University of Miami is an undergraduate education program designed to prepare students for careers in the sport industry. The program is committed to the professional development of students so that competencies and skills relevant to the Sport Industry can be acquired over time. Specific competencies in organization, ethics, marketing, leadership and legal issues are emphasized.

- Field experience and internships are an essential component of the major. The KIN department is actively engaged in placing students in visible sports settings and appropriate sport environments so that students acquire relevant competencies and gain pragmatic hands-on experiences that are necessary for success in today's sport industry.
- The Sport Administration major is a 39 credit hour major leading to a Bachelor of Science in Education.
- Students are required to meet a foreign language component. This may be satisfied with two semesters of American Sign Language (TAL 107 and TAL 207), or any intermediate course (200+), in a foreign language that is offered at UM.
- Students transferring from another college or university must have a cumulative GPA of 2.75 or above in order to be considered for admission to the major.
- Students are required to complete a 9-credit internship upon successful completion of ALL coursework for the Sport Administration Major. Exceptions to this policy must be approved by the Undergraduate Program Director and the Assistant Dean.
- A Business minor is suggested to complement the Sport Administration major and provide a well-rounded comprehensive background to the Sport Administration field. A minor in any field is required.
- Students pursuing a degree in Sport Administration must receive a grade of B- or higher in KIN 201 in order to continue with the major.
- Students will be allowed to retake a course once.
- All 400-level courses are restricted to declared Sport Administration majors only.
- A degree in Sport Administration requires a major GPA of 2.5 or higher and an overall GPA of 2.3 or higher.
- KIN 306 and KIN 308 may not be taken in the same semester and must be taken during junior year.
- A grade of C or better is required for each course applied toward the major with the exception of KIN 201 which requires a grade of B- or higher in the course, as previously specified.

Please note that students majoring in Athletic Training are ineligible for the Sports Medicine minor.

Teaching and Learning

Dept. Code: TAL

The Department of Teaching and Learning offers a Bachelor of Science in Education Degree in Elementary Education (K-6)/Exceptional Student Education (K-12) with ESOL (English for Speakers of Other Languages, K-12) and Reading (K-12) endorsements.

In conjunction with the College of Arts and Sciences, the Department also offers majors in Secondary Education in English with ESOL endorsement, in Chemistry, in Biology, in Mathematics, and in Social Science (6-12). Students in Secondary Education programs are required to fulfill the general education requirements for the College of Arts and Sciences.

The Department offers two minors:

1. A traditional Education Minor consisting of 15 credit hours and
2. A Professional Training Option minor of 18 credit hours that fulfills the State of Florida "Professional Training Option" (PTO) for teaching in secondary-schools. Candidates must select a minor area of study in English, math, Secondary Science or Secondary Social studies or other areas of recognized certification. In order to obtain teaching credentials from the State of Florida, a PTO completer must successfully teach in an accredited school in Florida for one academic year.

Teacher Preparation Programs

One of the roles of the School of Education and Human Development is to serve as the professional school to conduct and coordinate programs for the preparation of teachers and other educational personnel at the University of Miami. Membership is held in the American Association of Colleges for Teacher Education, the National Association of State Directors of Teacher Education & Certification and in the Florida Association of Colleges for Teacher Educators. Teacher Preparation Programs (TPP) are accredited by the Florida Department of Education for the preparation of elementary/exceptional student education teachers, secondary teachers, music teachers and other school service personnel.

Professional Development Schools

Bel-Aire Elementary, Henry S. West Laboratory Elementary, Sunset Elementary, Ponce de Leon Middle School and Booker T. Washington Senior High School are operated by Miami-Dade County Public Schools. These schools provide the most up-to-date teaching environments, both in terms of design and curriculum, in partnership with the University of Miami. Students are welcomed at these facilities for field experiences and student teaching, and both students and faculty have the opportunity to contribute to the high quality functioning of these professional development schools.

Teacher Preparation Programs

Teacher Preparation Programs/majors in Elementary/Exceptional Student Education and Secondary Education that lead to professional certification and applicable endorsements are approved by the Florida Department of Education (FLDOE). Please be advised that the State may implement new requirements for certification. These requirements will be mandatory with or without notice in this bulletin. The student is responsible for securing the application for certification and submitting the necessary documents and fees to the Florida Department of Education to obtain certification and endorsement. The DOE Certification Ombudsman in the School of Education and Human Development is available to assist with certification and re-certification matters.

Academic Policies

Admission

Selection for the Teaching Profession

The faculty of the School of Education and Human Development conceives its ultimate obligation to be to the children, adolescents, and adults who will be taught by teachers who have completed teacher preparation programs at the University. The quality of students admitted into the teacher education curriculum is as important as the skills, content, and concepts to be learned.

Most courses in the teacher education program require school site-based field experiences, culminating in a full-time 15-week internship. School districts require a criminal background check for field placement students and interns. Fingerprinting and FBI background check procedures are at the applicant’s expense. Students with felony arrests may wish to consider these requirements carefully and, if necessary, seek advice from an advisor in the School before applying for admission to the program. Students without a valid social security number will not be eligible for placement in the school district.

The Office of Teacher Preparation and Accreditation will assist students through these requirements.

All students who wish to be considered for admission and/or retention in curricula leading to Florida Teacher Certification will be formally screened at certain points in their program of study with respect to the following criteria:

1. Admission to Teacher Candidacy (see requirements below).
2. Acceptable grade point averages (C or better for courses in the major).
3. Acceptable evaluations by University of Miami faculty.
4. Evaluations by clinical faculty at various field experience sites.
5. Satisfactory progress toward the completion of the Florida Educators Accomplished Practices requirement.

Students who receive a grade below C in their Student Teaching semester will not be recommended for teacher certification.

Note: The Assistant Dean of the School of Education & Human Development and the Director of Teacher Preparation & Accreditation jointly approve appeals to the above policies.

Requirements for Admission to Teacher Candidacy
2. Completion of 45 credit hours. In addition, transfer students must have a minimum of 9 credit hours of acceptable credit earned at the University of Miami.
3. A 2.5 GPA in education core courses. No education classes lower than C.
4. A 2.5 GPA in the content area teaching major (for secondary education majors).
5. Completion of the Course Advisement Plan (CAP).
6. Completion of at least one Field Experience requirement.
7. Further enrollment in teacher education course work offered by the School of Education and Human Development is contingent upon the student meeting requirements 1-6 above.
8. All students must successfully complete M-DCPS fingerprinting process. Forms are available in the Office of Undergraduate Academic Services.

NOTE: Appeals to the policies stated 1-6 above must be directed to the Assistant Dean of the School of Education and Human Development.

Please note: Students may not register for any class above TAL 332 without admission to Teacher Candidacy.

Requirements for Admission to Student Teaching
Students submit a formal application to the Office of Teacher Preparation and Accreditation for admission to Student Teaching. Application materials are available and are to be completed by students no later than October 15 (Fall semester) or March 15 (Spring semester).

The following requirements must be met:
1. Admission to a Teacher Preparation Program (Teacher Candidacy).
2. Completion of application for admission to Student Teaching, which includes an electronic submission to the Office of Teacher Preparation and Accreditation.
3. Approval of the Assistant Dean for Undergraduate Studies, the TAL Department Chair, and the Director of Teacher Preparation & Accreditation.
4. Recommendations from two members of the faculty familiar with the student’s academic proficiency. One of these must be from a faculty member in the School of Education and Human Development.
5. Earned a minimum of 90 credit hours.
6. Submission of FEAPs Portfolio via Live Text to the Director of Teacher Preparation & Accreditation. The FEAP Portfolio must include evidence at the indicator level in the first five FEAPs.
7. All secondary majors must have completed approximately two-thirds of the courses in the teaching major and received departmental approval. Elementary/ESE majors must have completed ALL of the courses for the Elementary/ESE major.
8. Earned a minimum of 2.5 grade point average in core courses offered by the School of Education and Human Development.
9. A grade of C or better is required of each course applied to the major.
10. Earned a minimum of a 2.5 grade point average overall.
11. Successfully completed pre-internship field experiences.
12. Demonstrate satisfactory progress towards the completion of the Florida Educators Accomplished Practices requirement, as indicated in #6 above.
13. Passed the Florida General Knowledge Test.
14. Taken the Professional Education Test and the Subject Area Exam.

NOTE: A MAXIMUM OF 12 CREDIT HOURS MAY BE TAKEN DURING THE STUDENT TEACHING SEMESTER. No outside job may be held or additional classes taken during the Student Teaching semester.

NOTE: The Assistant Dean and the Director of Teacher Preparation & Accreditation, School of Education and Human Development must approve appeals to the above policies.

Students must complete the Florida Educator Accomplished Practices (FEAPs) and the P-12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints:

1. TAL 306, and TAL 429; and application to student teaching
2. Students enrolled in all teacher-education programs will submit complete portfolios at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via Live Text as follows

- TAL 306 Field Experience Seminar I (Must submit an artifact in order to receive a passing grade).
- TAL 429 Field Experience Seminar II (Must submit an artifact in order to receive a passing grade).
- Elementary/ESE major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 420 and TAL 426;
- Secondary Education major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 540.
- Music Education major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 506.

Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Licensure/Certification Information
Only students who have completed all requirements for any State approved degree or certificate program will have their transcripts stamped as meeting State approved requirements for certification as well as appropriate endorsements. Students must meet requirements of the School of Education and Human Development as well as the college or
school issuing the second major. Evidence of successful completion of all twelve Florida Educator Accomplished Practices is required to receive the FLDOE stamp on the graduate’s final transcript.

Transcript stamp is contingent upon the student taking at least half of the coursework in teacher education at the University of Miami, including the Student Teaching component. At least half of the coursework in the students teaching content area(s) must be taken at the University of Miami in the School of Education and Human Development, Frost School of Music, or other UM schools or colleges as determined by the program in which the student is enrolled.

Department’s Honor Code, Ethics FEAP and Plagiarism Policy

At a minimum, students will receive an automatic FAIL for any assignment that shows even minimal evidence of any of the violations listed in the Student Handbook such as cheating, plagiarism, misrepresentation, collusion, falsification of data and documents, or fabrication of findings. The student will not be allowed to improve that grade and the Ethics FEAP will be marked as permanently failed in the student’s portfolio record.

The professor of record will have absolute discretion to judge the severity of an offense involving plagiarism and/or The Honor Code, including extending the penalty to an F in the course.

Students will receive an automatic FAIL on any assignment or action which shows a violation to the Ethics FEAP. Either the Chair, Director of Accreditation or the Dean’s office may refer a student to the University Honors Council. Consequence for violating the Honor Code include disciplinary warning, disciplinary probation, suspension or expulsion from the university.

For further information, address all inquiries to:

Assistant Dean
School of Education and Human Development
P.O. Box 248065
University of Miami
Coral Gables, Florida 33124
Telephone: (305) 284-3711

B.S.E.D. in Elementary/Exceptional Student Education (ESE) with ESOL and Reading Endorsements

The Department of Teaching and Learning offers a major in Elementary/Exceptional Student Education that leads to certification in Elementary Education (K-6)/ESE (K-12) with ESOL and Reading endorsements. The requirements for Elementary/ESE Education are a major in Elementary/ESE Education and a minor outside of the Department of Teaching and Learning.

Students must earn a grade of C or better in all courses in their major.

Requirements for Graduation

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES (p. 13), subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);
4. Statement of Foreign Language Requirements;
II. Students must pass the Professional Education, General Knowledge and Subject Area tests of the Florida Teacher Certification Examination (FTCE).

III. Students must complete the Florida Educator Accomplished Practices (FEAPs) and the P-12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints: Students enrolled in all teacher-education programs will submit complete portfolios at

1. application to student teaching and
2. at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via LiveText as follows

• TAL 306 Field Experience Seminar I (Must submit an artifact in order to receive a passing grade).
• TAL 429 Field Experience Seminar II (Must submit an artifact in order to receive a passing grade).
• Elementary/ESE major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 420 and TAL 426;
• Secondary Education major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 540.
• Music Education major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 506.

IV. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

V. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

VI. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

VII. Required Areas of Study

1. English Composition 3 – 6 credit hours
   Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105. Courses satisfying the English Composition requirement may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

2. Mathematics
   B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

3. Foreign Languages (not applicable)

Areas of Knowledge and Cognate Requirements

The University of Miami's General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a Cognate, which is a cluster of courses arranged by their content, field and interest.

• A cognate is a group of at least three related courses for at least 9 credit hours.
• The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
• Student must take three cognates to fulfill the Areas of Knowledge requirement,
  • one in the Arts & Humanities (A&H),
  • one in People & Society (P&S), and
  • one in Science, Technology, Engineering & Mathematics (STEM).
• Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
• In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
  • Exercise Physiology and Athletic Training majors will fulfill the STEM cognate.
  • Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the P&S cognate.
• An approved list of cognates can be found on the University of Miami website.

VIII. Writing

Every student majoring in Teaching and Learning, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses for the TAL Major which meet the Advanced Writing and Communication Skills Requirement are TAL 332 and TAL 426.

IX. Majors
Every candidate for the B.S.Ed. degree in the Department of Teaching and Learning must choose a major in Elementary/Exceptional Student Education (ESE) with ESOL and Reading endorsements.

X. Minors

Every candidate for a B.S. Ed. in Elementary Education/ESE must select a minor outside of the department of TAL.

XI. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above. Students may select elective course credits beyond the major, minor and general education requirements to complete a total of 120 credits required for the degree.

Note: Common prerequisites and total length for state-approved teacher education programs are subject to revision based on legislative and State of Florida Department of Education rule changes.

XII. Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Please note: Students may not register for any class above TAL 332 without admission to Teacher Candidacy. Please see the requirements for Teacher Candidacy on the TAL Department page in the University Bulletin.

Please note: Students are strongly encouraged to register for TAL 203 and TAL 324.

**B.S.E.D. in Secondary Education**

The Department of Teaching and Learning offers a major in Secondary Education (6-12). Certification is offered in the general areas of:

- English/ESOL Endorsement; (Major code: SECE)
- Mathematics (Major code: SEC)
- Sciences (Biology, Chemistry) (Major code SECS)
- Social Science (Economics, Geography, History, International Studies, or Political Science) (Major code SECH)

Each student should complete a major from the appropriate department in the College of Arts and Sciences and a second major in the Department of Teaching and Learning.

The requirements for a major leading to secondary certification include:

- A grade of C or higher in all Education courses and a minimum of 2.5 GPA in both the Secondary Education major and the subject area of discipline. An overall 2.5 GPA is required.
- MDC-PS fingerprinting and FBI background check
- Admission to Teacher Candidacy
- Successful completion of the Florida Teacher Certification Exams including
  - The General Knowledge Exam (all 4 sections)- Required for Teacher Candidacy
  - The Professional Education Exam
  - The Subject Area Exam

- Successful submission of the FEAP e-portfolio submission through Live Text
- Successful completion of the following SEC courses:

</table>

Total Credit Hours 40-45

Please note: Students may not register for classes above TAL 404 without admission to Teacher Candidacy.

**Minor in Education**

The Department of Teaching and Learning offers two minors.

**Education Minor (not for certification)**

- 15 credit hours in TAL course work.
- TAL 101 and TAL 103 are required.
- Two courses must be taken at the 300 level or higher.
- All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
- It is strongly recommended that students enroll in courses for this minor which do not include Field Experience. Please see an advisor for a list of those courses.
• This minor does not lead to teaching credentials.

Professional Training Option Minor

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring or minoring in a teachable subject.

• Fingerprinting and Background check completed with the MDC-PS Office
• 18 credit hours.
• All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
• Students must pass the Florida Teacher Certification Exams, (FTCE), prior to graduation in order to be eligible for the State of Florida Stamp applied to transcripts.
• Students must pass all 4 sections of the General Knowledge Exam (GKT), part of the FTCE, in order to be eligible for 400 level courses or higher.

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring in a teachable area in order to participate in the program.

The PTO minor consists of 17-18 credit hours passed with a C or higher with an overall GPA of 2.5 or higher. Upon completion of the program courses, participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State-approved PTO program. Program completers will be eligible to apply for a 3-year Temporary Teaching Certificate in the State of Florida. There is a one-year of successful teaching requirement in an accredited school in Florida in order to apply for a Professional Teaching Certificate.

The required courses for the PTO minor are:

Mission

The College of Engineering is committed to educating tomorrow’s technology leaders for career success.

The objective of the College of Engineering is to serve society by offering high quality educational programs in the professional areas that it covers, and by performing research and community service, with high professional standards. The College is dedicated to educating engineers to deal with the major issues of society over the next generation - enhancing competitiveness, advancing health care, coming into harmony with the environment, utilizing technology for humankinds benefit, and supporting a sophisticated infrastructure. The goal of the faculty is to prepare students to be employed effectively in manufacturing, consulting, construction, information technology, service industries, and those related to the medical industry and health care, in roles involving planning, design and implementation at all levels of decision making. Students are broadly prepared in technical, leadership, and management skills. Student development accrues both inside and outside the classroom, with input from faculty, employers, alumni, and other students. They are made acutely aware of environmental and international perspectives. Professional competence in the traditional sense is complemented by a broad capability to function in society. The College places great emphasis on providing students with a learning experience which will enable them to develop productive careers while creating engineering solutions to problems of our society. Learning is centered around real life experiences, which involve an understanding of science, mathematics, social values, and aesthetics, to produce economical solutions to physical problems which society encounters. Protection and enhancement of the environment is stressed at all levels, and emphasis is placed on the creative application of knowledge which will improve the quality of life.

Department and Programs

The College of Engineering has five departments -

- Biomedical Engineering,
- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical and Aerospace Engineering

offering curricula leading to Bachelor of Science degrees in the following fields:

- Aerospace Engineering,
- Architectural Engineering,
- Biomedical Engineering,
- Civil Engineering,
- Computer Engineering,
- Electrical Engineering,
- Engineering Science,
- Environmental Engineering,
- Industrial Engineering, and
- Mechanical Engineering.

Interdisciplinary areas of study, areas of specialization within departments, and study in two entirely different areas are available through options, concentrations and dual degree programs.

Accreditation

The programs in Aerospace Engineering, Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (http://www.abet.org) (ABET)

415 North Charles Street
Baltimore, MD 21201
telephone: 410-347-7700

The program in Engineering Science is not accredited.

The College offers graduate programs leading to degrees both in the traditional and interdisciplinary areas of study. Programs leading to the M.S. degree may include specialization in the following areas of study:

- Architectural Engineering,
- Biomedical Engineering,
- Civil Engineering,
- Electrical and Computer Engineering,
- Engineering Management,
- Environmental Engineering,
- Industrial Engineering,
- Mechanical Engineering,
- Medical Informatics, Structural Engineering, and Thermal and Fluid Sciences.

A joint M.S.I.E./M.B.A. program and a M.S. program in Management of Technology are offered in conjunction with the School of Business Administration, a M.S. in Environmental Health and Safety in conjunction with the School of Medicine and a M.S. in Occupational Health and Safety in conjunction with the School of Medicine.

Combined BS/MS Program

The College offers a five-year Bachelor of Science and Master of Science BS/MS degree program in Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering. This program is specifically designed for those students who want to pursue their graduate study as they are completing their undergraduate study. The special conditions and processes for the five-year BS/MS Program are as follows:

Requirements

You must be an undergraduate student in the College of Engineering (CoE). A master’s degree is considered the first professional degree in engineering. The Admission Committee will carefully review academic credentials for admission into our M.S. program. Students should discuss the program and possibility of entering with an academic adviser. Completed applications are due prior to the beginning of the final exams in your junior year.

Application Process

Get the application form (It is different for US students and International students) from the CoE Office of Admission, fill it out and then return it to the same office. The application fee is waived for currently enrolled students in the CoE.
Take the GRE Examination before the end of your senior year and attain a combined score of more than 1000 on the Verbal and Quantitative portions.

Financial Implications
Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree. For further information contact the University of Miami Financial Aid Office.

Once admitted into BS-MS program
In your senior year when you have a full time undergraduate status, you may take a maximum of twelve (12) graduate credit hours (a maximum of six (6) credit hours per semester). In order to register for these classes, you must complete and submit the UM Graduate School “Application for Undergraduate to Take Graduate Course” special form.

During your last one or two semesters, when you are taking graduate course work only, register as a graduate student.

A student wishing to withdraw from the BS/MS Program without the MS degree must complete all the requirements for the BS degree.

To qualify for the MS degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA in the credit hours applied toward the MS degree.

The student is awarded both the BS and MS degrees at the end of the fifth year when all degree requirements are satisfied.

The Doctor of Philosophy Degree is currently offered in the area of:

- Biomedical Engineering,
- Civil Engineering,
- Electrical and Computer Engineering,
- Ergonomics and Human Factors,
- Industrial Engineering, and
- Mechanical Engineering.

The Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

The Bulletin of the Graduate School (p. 498) presents more detailed information on these graduate programs.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Annex is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

Engineering Laboratories
The College of Engineering maintains a variety of well-equipped laboratories adequate for undergraduate instruction and providing for graduate and sponsored research.

Computer Laboratory
- Clarke Computational Laboratory
- Computer Graphics Laboratory

Biomedical Engineering Laboratories
- Biomedical Design and Instrumentation Laboratory
- Biomaterials/Circulatory Assist Device Laboratory
- Biomedical Atomic Force Microscopy Laboratory
- Biomedical Optics Laboratory
- Diabetes Tissue Engineering Laboratory
- Joint Bioengineering and Endourology Laboratory
- Measurements Laboratory
- Medical Imaging Laboratory
- Neuroprosthetics Research Group
- Neurosensory Engineering Laboratory
- Stem Cell and Mechanobiology Laboratory
- Tissue Biomechanics Laboratory
- Tissue Engineering Laboratory

Civil, Architectural and Environmental Engineering Laboratories
- Environmental Engineering Laboratory
- Geotechnical Engineering Laboratory
- Mechanics of Solids and Materials Laboratory
- Structures and Materials Laboratory
- Sustainable Building Systems Laboratory

Electrical and Computer Engineering Laboratories
- Electronics Laboratory
- Wireless Communications Laboratory
- Digital Signal Processing Laboratory
- Electrical Machinery Laboratory
- Digital Design Laboratory
- Microprocessor Laboratory
- Photonics and Micro-Devices Laboratory
- Distributed Decision Environments Laboratory
- Underwater Imaging Laboratory
- Networks Laboratory
- Embedded Systems Laboratory
- Computer Vision and Image Processing Laboratory
- Information Technology Laboratory
- Multimedia Laboratory
- Digital Audio and Speech Processing Laboratory
- Optics and Fiber Communications Laboratory
- ECE Computer Laboratory
- Nanophotonics and Devices Laboratory
- MEMS and VLSI Laboratory

Industrial Engineering Laboratories
- Computer Integrated Manufacturing Laboratory
- Industrial Hygiene Laboratory
• Biomechanics and Gait Laboratory
• Human Factors and Aging Research Laboratory
• Productivity Research Laboratory
• Work Design Laboratory
• Work Physiology Laboratory
• Systems and Operations Research Laboratory
• Industrial Ventilation Laboratory
• Robotics Laboratory

**Mechanical and Aerospace Engineering Laboratories**

- Aerospace Materials Simulation Laboratory
- Aerodynamics and Computational Fluid Dynamics Laboratory
- Design and Manufacturing Laboratory
- Fuel Cells Laboratory
- Thermo-Fluid Mechanics Laboratory
- Integrated Nano-Bio-Systems Laboratory
- Internal Combustion Laboratory
- Materials Laboratory
- Materials Modeling Laboratory
- Measurements Laboratory
- Multifunctional Composite Materials Laboratory
- Optimization and Reliability Laboratory
- Robotics and Intelligent Systems Engineering Laboratory
- Stress Analysis Laboratory
- Tissue Biomechanics Laboratory
- Wind Tunnel Laboratory

**Academic Policies**

**Admission**

Admission to the College of Engineering is covered under the section on Admission (p. 28) to the University in the General Information section of this Bulletin. Algebra, trigonometry, analytic geometry, chemistry, computer literacy, and physics are high school subjects that are appropriate for students planning on entering the College.

The academic work of each transfer student will be evaluated on an individual basis, and the student will be enrolled in the College at an appropriate level.

**Requirements for Graduation**

The College believes that emphasis should be placed on the student’s ultimate level of attainment in selected subject areas. For those students whose preparation is advanced beyond that of the average secondary school graduate, the University provides proficiency examinations and schedules the students for more advanced work. Graduation for these students may be accelerated. For those students whose secondary school preparation has not provided an adequate background, the University offers preparatory courses. Graduation for these students may be delayed accordingly.

The student’s program of study is selected jointly with an adviser, with special attention to the individual student’s needs. Flexibility is ordinarily possible within the framework of sound education in the essential fundamentals and within the development of depth in selected fields of design and analysis. An examination of a typical curriculum given under the various department sections of this Bulletin shows that there is a strong common core of studies. Therefore, students uncertain of their ultimate field of specialization retain a high degree of mobility to enable them to transfer from one curriculum to another.

Each student must demonstrate upon admission an adequate preparation in the necessary skills of reading, writing, and mathematics. Placement test scores will indicate which, if any, supplementary courses must be taken the first semester. Although these courses are recorded for University credit hour, the student must take the full curriculum, as listed, in addition to these courses. Students not prepared in these areas are advised to make every effort to correct deficiencies before the first semester.

Completion of any of the prescribed curricula, except Engineering Science, with an overall grade point average of at least 2.0 (C) in all course work, to include all accepted work from other institution(s), is the basic requirement for graduation in the College. An average of C also must be attained in all work attempted at the University of Miami and the professional studies. The Engineering Science curriculum, because of its special purpose, has a higher requirement, i.e., a grade point average of 3.0 (B).

The requirements for graduation as specified by each Department and Program reflect the general education requirements of the University of Miami and the requirements of the appropriate accrediting agencies. The curricula contain required courses and elective courses. No course required for graduation may be taken under the credit-no credit (Credit-Only) option.

Students are expected to make satisfactory progress toward graduation by meeting the criteria established above. Whenever a student fails to demonstrate positive academic progress, he/she may be placed on academic probation or dismissed by the College of Engineering Scholastic Standards and Advising (SSA) Committee.

**General Educational Requirements**

**Areas of Knowledge**

Students at the College of Engineering fulfill the Areas of Knowledge requirement by completing three cognates, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

For students in the College of Engineering, their engineering major will count as a cognate in Science, Technology, Engineering & Mathematics. These students have to complete a cognate in People & Society and Arts & Humanities.

A cognate is a group of at least three courses for at least nine credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate. While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed
on the students' transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate's RAU.

Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. These requirements are specified under each department.

The student's official records are maintained by the Office of Enrollment Services. It is the student's obligation to take the initiative to assure that all requirements are being met in conformity with his/her own graduation plans.

Degree Programs

Dual Majors

Dual majors are offered for engineering students with strong interest in related fields of study such as Physics or Mathematics. In order to obtain a dual major in one of these areas, the student will have to obtain, in parallel, a degree in one of the engineering programs, plus additional course work approved by the dual majors department. Further information on this dual major program may be obtained from the Dean’s Office of the College.

Minors

Minors are offered by the College of Engineering. The departments of:

- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical Engineering

offer minors with various areas of specialization. Details of each area of concentration and its requirements may be found under each departmental listing.

Engineering students can earn a minor offered by any other College/School within the University of Miami, including the College of Engineering. In cases where the major degree requirements satisfy some of the requirements for the minor, at least six credit hours beyond the major degree requirements must be taken in the minor subject area to earn a minor. Minors in Engineering require a minimum GPA of 2.0 in the courses required for the minor.

Departmental Honors Program

A student in the College of Engineering may graduate with Departmental Honors noted upon his/her diploma and transcript upon fulfillment of the following requirements:

1. Completion of at least 18 credit hours of course work in honors courses and/or in courses at the 500 level, including 6 credit hours in independent study, senior thesis, or designated advanced or special honors courses specified by the department, with grades of at least B in these 6 credit hours.
2. Attainment of at least a 3.4 overall grade point average. Transfer students must also attain at least a 3.4 grade point average in all work taken at the University of Miami.
3. Attainment of at least a 3.5 average in the departmental major courses.
4. A written request from the student to the departmental faculty during his/her semester of expected graduation stating the desire to graduate with Departmental Honors, and specifying those courses taken in compliance with section (A) above.

Certificate Programs in Engineering

In cooperation with the University’s School of Continuing Studies, the College of Engineering offers practicing engineers advanced or specialized training without having to meet the stringent entrance requirements of the Graduate School. Persons holding Bachelor’s degrees, registered as Professional Engineers, or possessing equivalent qualifications can be granted Certificates of Proficiency by the University after completing fifteen credit hours of course work in a specified field of engineering. Study programs are arranged on an individual basis by each student and his/her advisor. Detailed information on Certificate Programs can be requested from the Office of the Dean of Engineering.

The Internship Cooperative Program

The Cooperative Program takes its name from the close cooperation that exists between the College and participating employers. This arrangement attempts to insure that each student's academic and work experience will integrate and contribute significantly to his/her overall growth and professional development. Interviews and screening by both the employer and Cooperative Program personnel attempt to match the needs of the employer carefully with the interests and capability of the student.

Advantages to the Student

1. Offers on-the-job experience to supplement the academic degree program.
2. Offers potential long term career employment with the Cooperative Program employer.
3. The experience obtained makes the student, upon graduation, potentially much more valuable to any future employer. Upon completion of an appropriate amount and level of experience, graduation in the Cooperative Program may be recognized by a special seal on the student’s diploma.
4. Helps the student to verify whether or not his/her career or specialty choice is correct.
5. Tends to increase motivation and to make academic studies more meaningful.
6. Earnings from Cooperative Program employment can cover a significant portion of the student’s college expenses.
7. Certain work experience may shorten the experience requirements, after graduation, for eligibility for professional registration.
8. Helps to develop the students understanding of human relations and the lifelong need of learning to balance appropriately the demands on ones time of multiple duties such as studying, employment, daily necessities, family obligations, etc.
Graduation.
detailed curriculum advice, courses taken abroad will apply towards
all University of Miami financial aid is granted. With prior approval and
programs is equivalent to University of Miami tuition and fees. Almost
Humanities and Social Sciences abroad. The cost of attending these
academic year; summer programs in intensive Language instruction,
course work at Engineering schools abroad for a semester or an
Australia in which professional work experience is carried out abroad;
and paid) in Spain, England, France, Argentina, Colombia, Chile, and
interest to Engineering students are the following: internships (unpaid
Latin America, Europe, Asia, Australia and the Middle East. Of particular
of one of the University of Miami's numerous study abroad options in

Types of Cooperative Program Arrangements
Continuous Work-Study
An arrangement involving a combination of part-time employment
(15 or more hours per week) and a credit hour academic load which
is appropriately reduced from the normal full-time load to balance the
employment duties. Full-time employment may be undertaken during the
summer period. Two students may be used during the year to share the
hours of a full-time position (20 hours each student). In some instances,
an individual student will hold a full-time position and carry a light
academic load in evening and/or early morning classes.

Alternating Work-Study
An arrangement involving two students alternating full-time employment
and full-time study. Students alternate positions of work and study at the
end of each semester (including the summer), and thereby provide the
equivalent employee time of a full-time position year-round.

Student Eligibility for the Program
University of Miami students enrolled in the College of Engineering are
eligible to enter the Cooperative Program. Initial entry into the Program
is limited to superior students. Normally, work assignments are not given
until the equivalent of one or two semesters of full-time academic work is
completed. Currently, most students in the Program are under continuous
work-study arrangements.

Study Abroad Programs
The College of Engineering encourages its students to take advantage
of one of the University of Miami's numerous study abroad options in
Latin America, Europe, Asia, Australia and the Middle East. Of particular
interest to Engineering students are the following: internships (unpaid
and paid) in Spain, England, France, Argentina, Colombia, Chile, and
Australia in which professional work experience is carried out abroad;
course work at Engineering schools abroad for a semester or an
academic year; summer programs in intensive Language instruction,
Humanities and Social Sciences abroad. The cost of attending these
programs is equivalent to University of Miami tuition and fees. Almost
all University of Miami financial aid is granted. With prior approval and
detailed curriculum advice, courses taken abroad will apply towards

Advantages to the Employer
1. Offers an opportunity to recruit and screen potential employees in the
fields of engineering.
2. The Cooperative Program maintains an up-to-date roster of
available undergraduate and graduate students, many with previous
experience. This roster offers employers means of obtaining
employees to meet fluctuating work loads, on relatively short notice.
3. Students in the Cooperative Program can provide good company
public relations with their classmates.
4. Participation in a Cooperative Program serves the profession by
providing opportunities for many capable and well deserving young
persons to attend a University, who otherwise might lack the financial
ability or motivation to attend.

The Management of Technology Supplemental Program
The objective of this program is to educate engineers in how to exploit
their technological knowledge. This is a vital, but often neglected, link
in achieving competitiveness in the global marketplace. The basic
premise motivating this approach is the recognition that in today's world,
technology is the backbone of the business enterprise system and that
wealth can only be created through production of goods and services.
This program will educate engineers in a multitude of subjects bridging
the gap between product technology, production technology and the
marketplace, which is the ultimate customer of engineering contributions.
The program consists of four courses:
1. Quality in Design of Products and Production Systems
2. Entrepreneurship for Engineers
3. Production Systems Design

A project is required at the end of the program, but is threaded
throughout the program starting with the first course. Upon completion of
the program, the student will receive a special certificate of completion.
This program is available to all qualified students in all departments of
the College of Engineering.

Admission to the Program
Admission to this supplemental program will be by application submitted
by the candidate or by nomination by an advisor or department chair. All
applications will be reviewed by a standing committee. Students must
meet the prerequisite of each course before enrolling in it.

Requirements for the Certificate
The program is an add-on to existing curriculum. Students must complete
all courses designated in order to qualify for the certificate. A notation
will be made on the student's transcript recognizing their completion of
the special program. No designation will be made on the diploma.

Course Sequence
Courses are recommended to be taken in the sequence indicated above.

Team Work
Students will be encouraged to work on projects in teams.
Multidisciplinary teams will also be encouraged.

Foote Fellows

Foote Fellows in CoE
The Foote Fellows Honors Program recognizes the most educationally
accomplished incoming students at the University of Miami. Foote
Fellows have distinguished themselves both in and out of the
classroom at their previous schools, are self-motivated, and think
independently. Admission to the Foote Fellows Honors Program is by
invitation.

Foote Fellows in the College of Engineering are exempt from the
Cognates Program of General Education requirements within the
curricular framework of their major. Within the curricular framework of
their majors, Foote Fellows enjoy unmatched freedom and flexibility
to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated adviser helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Biomedical Engineering

http://www.miami.edu/bme

Dept. Code: BME

Introduction

Biomedical engineering is a multidisciplinary field at the interface of traditional engineering disciplines and biological sciences. Biomedical engineers apply engineering principles and techniques to solve problems in medicine and biology. Applications include the design of medical devices, implants and prostheses, the development of new biomaterials or drug delivery systems, cellular or tissue engineering, medical applications of optics and lasers, or the acquisition and interpretation of physiological signals and medical images for diagnostic and monitoring purposes. Biomedical engineering has an impact on virtually all fields of medicine.

The Department of Biomedical Engineering at the University of Miami was formally established in 1979 as a graduate program. The four-year undergraduate program leading to the B.S degree in BME was created approximately ten years later to address the growing importance of the field and the need for professional biomedical engineers. The undergraduate BME program at the University of Miami was the first of its kind in Florida, with the first class of B.S.B.E. students graduating in 1993. It has been Accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board of Engineering and Technology (ABET) since 1997. The Department of Biomedical Engineering also offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees. In addition, qualified undergraduate students may apply for the combined BS/MS program (details are provided following the curricula for the BS degrees).

Some special features of the program include the small class size and open-door policy of the faculty, which facilitates student-faculty interaction. The Department has very strong ties with the University of Miami Miller School of Medicine. Undergraduate students have a wide range of research and internship opportunities in some of the leading research laboratories in their respective field. The Department strongly encourages undergraduate student participation in research and professional activities.

Mission Statement

The mission of the biomedical engineering program is to prepare students to become knowledgeable and skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.

Educational Objectives

The educational objectives of the program are to graduate engineers who will apply their knowledge, technical skills, and ability to solve problems at the interface of engineering and life sciences. Within a few years after graduation they will be:

1. Working as professionals in biomedical engineering or related fields.
2. Continuing their education to advance their careers through professional development activities or through the pursuit of advanced degrees.

Program Description

Curriculum

The two educational objectives of the Biomedical Engineering program are achieved via the implementation of a curriculum with four parallel concentrations which include a common core and concentration-specific courses. The core curriculum is designed to provide a broad foundation in the basic sciences and in engineering. Concentration-specific courses provide the depth required to be proficient engineers.

The four concentrations are:

- Electrical (E),
- Mechanical (M),
- Biomaterials and Tissue (B) and
- Premedical (P).

The Premed concentration provides training in biomedical engineering and allows for students to take courses that are commonly required for admission to medical school. The Biomaterials and Tissue concentration provides training in the fundamental aspects of cell and tissue biology, design of biomaterial scaffolds and implants, and the application of tissue engineered constructs toward repair, restoration, and regeneration of damaged cells, tissues and organs. The Electrical concentration provides training in the fundamental aspects of electronics and signal processing, design of instrumentation, sensors, imaging systems and neural interfaces, and the application of biomedical technology toward measurement, control and rehabilitation of tissue and organ function. The Mechanical concentration provides training in the fundamental aspects of solid, fluid, and computational mechanics, design and modeling of biomedical devices such as artificial implants, and prostheses and the application of biomechanical principles toward assessment and
restoration of tissue and organ function. The curriculum is designed to provide all graduates with the analytical and design skills required to formulate and solve problems at the interface of engineering and life sciences. Outstanding students are prepared for graduate studies or medical school.

Required courses in the humanities and social sciences provide students with an awareness of social, ethical and environmental issues related to their profession. The curriculum has been carefully designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to complete the upper level course requirements successfully. The curriculum includes two or three technical electives selected by the student based on their individual professional interests.

The curriculum places a special emphasis on written and oral communication skills. Many of the Biomedical Engineering courses, as well as the capstone design project, include a requirement for a written term paper and oral presentation on a course-related topic related to the class.

Advanced Writing and Communication Skills
Biomedical Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Biomedical Engineering students acquire Advanced Writing and Communication skills in the following core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BME 111</td>
<td>Introduction to Engineering I</td>
<td>3</td>
</tr>
<tr>
<td>BME 112</td>
<td>Introduction to Engineering II</td>
<td>3</td>
</tr>
<tr>
<td>BME 330</td>
<td>Foundations of Medical Imaging</td>
<td>3</td>
</tr>
<tr>
<td>BME 335</td>
<td>Biomaterials</td>
<td>3</td>
</tr>
<tr>
<td>BME 402</td>
<td>Senior Design I</td>
<td>2</td>
</tr>
<tr>
<td>BME 403</td>
<td>Senior Design II</td>
<td>1</td>
</tr>
<tr>
<td>BME 440</td>
<td>Biomedical Measurements</td>
<td>4</td>

<tr>
<td>BME 450</td>
<td>Biomedical Transport Phenomena</td>
<td>3</td>
</tr>
<tr>
<td>BME 480</td>
<td>Biomedical Instrumentation</td>
<td>3</td>
</tr>
</tbody>
</table>

Design Experience
The biomedical engineering design experience is integrated in the curriculum throughout the four years of study, starting in the freshman year with the Introduction to Biomedical Engineering course. Each semester includes classroom or laboratory courses which place a heavy emphasis on theoretical and practical biomedical engineering design concepts. In the second semester of the junior year, students complete a 3 credit-hour course which covers the principles of biomedical engineering design, from problem identification and design conception to implementation and testing, including regulatory aspects. The design experience culminates in the senior year with a yearlong capstone Senior Design Project. The Senior Design Project is typically completed by teams of two to four students who build on their knowledge and previous design experience to solve one major design problem which integrates the various components of the curriculum.

Teaching and Design Laboratories
Biomedical Engineering students have open access to several teaching laboratories which are used for the laboratory courses and design projects. The laboratory equipment and instructional modules are geared towards instruction in the areas of tissue mechanics, instrumentation, measurements, biomedical optics, physiological signals, tissue engineering, among others. In particular, the Department houses a scanning electron microscope and a state-of-the-art 3D printer that are used by students in their design projects.

Undergraduate Research and Internships
Biomedical Engineering students are strongly encouraged to gain research or professional experience through internships. Many undergraduate students conduct research in laboratories at the Department of Biomedical Engineering and at the School of Medicine, or are hired as interns by the local biomedical industry.

Degree Programs
The department offers one degree program with four concentrations: Electrical, Mechanical, Biomaterials and Tissue, and Premed. A list of the core science and engineering courses common to all four concentrations is provided below, followed by a tabular listing of the course requirements for the degree Bachelor of Science in Biomedical Engineering for each concentration.

Dual Major
The College of Engineering offers a dual major in Biomedical Engineering for students that are majoring in another engineering Department. In order to obtain the dual major in Biomedical Engineering, the student will have to obtain, in parallel, a major in one of the fundamental engineering programs, plus 24 credit hours of course work, including 19 credit hours of required course work and 5 credit hours of elective course work from the lists given below. Of this total of 24 credit hours, at least 12 have to be at the level of 400 and above.

The required courses for the dual major are:

<table>

</tbody>
</table>

Total Credit Hours 19

The electives are to be chosen from the BME course list.

Departmental Honors
Upon request departmental honor is noted in a student’s diploma and transcript upon fulfillment of the requirements specified in the College Bulletin.

 Majors

 Majors in Biomedical Engineering

• B.S. in Biomedical Engineering - Electrical Concentration (p. 233)
• B.S. in Biomedical Engineering - Mechanical Concentration (p. 234)
• B.S. in Biomedical Engineering - Biomaterials and Tissue Concentration (p. 232)
• B.S. in Biomedical Engineering - Premed Concentration (p. 236)
Joint Degrees in Biomedical Engineering

- B.S./M.S. in Biomedical Engineering - Electrical Concentration (p. 239)
- B.S./M.S. in Biomedical Engineering - Mechanical Concentration (p. 240)
- B.S./M.S. in Biomedical Engineering - Biomaterials and Tissue Concentration (p. 237)
- B.S./M.S. in Biomedical Engineering - Premed Concentration (p. 241)

B.S. in Biomedical Engineering - Biomaterials and Tissue Concentration

**Total Credit Hours:** 133

---

1. Students must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates). Each cognate should be a minimum of 3 courses (9 credit hours).

2. Technical Electives are chosen from the BME course offerings (300 level and above) with the approval of the advisor. Any other courses selected need to be approved by the advisor and the chairperson.

</table>

1. Students must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates). Each cognate should be a minimum of 3 courses (9 credit hours). Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.

2. Advanced Bioscience Elective is to be chosen from BMB 260, BIL 250, BIL 255, BIL 268, CHM 202, or BMB 402. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.

3. Technical Lab Elective is selected from BME 506, BME 507, BME 566 or BME 395; Science Lab Elective is selected from a science lab complementing the Adv. Bioscience Elective (e.g., CHM or BIL lab).

4. Technical Electives are chosen from BME course offerings (300 level & above) with the approval of the advisor. Any other course selected need to be approved by the advisor and the department chairperson.

---

**B.S./M.S. in Biomedical Engineering - Biomaterials and Tissue Concentration**

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.
- The participants are excused from BME 402/BME 403, but are required to complete BME 705/BME 706.
- Up to 12 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree.
- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their senior year.
- Students can register for a maximum of 6 graduate credit hours per semester in their senior year.
- A typical curriculum of the BS/MS is shown below for the Biomaterials and Tissue Concentration.
• If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

**Total Credit Hours:** 156

¹ Students must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates). Each cognate should be a minimum of 3 courses (9 credit hours).
The undergraduate elective is any undergraduate level course with a number of credit hours sufficient to ensure that the student is enrolled for a total of 12 undergraduate credit hours during each semester of the senior year. The undergraduate elective can be any undergraduate class, but students are encouraged to select an engineering or science course.

All Technical Electives are taken as graduate courses. They are graduate-level courses (600 level and above) chosen from the BME course offerings with the approval of the advisor. A minimum of 6 credit hours of technical electives must be taken at the 700 level. Non-BME courses need to be approved by the advisor and the chairperson.

B.S./M.S. in Biomedical Engineering - Electrical Concentration

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.

Total Credit Hours:  157

1 Students must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates). Each cognate should be a minimum of 3 courses (9 credit hours).

2 Technical Elective Labs are selected from BME 506, BME 566 or BME 395.

3 The undergraduate elective is any undergraduate level course with a number of credit hours sufficient to ensure that the student is enrolled for a total of 12 undergraduate credit hours during each semester of the senior year. The undergraduate elective can be any undergraduate class, but students are encouraged to select an engineering or science course.

4 All Technical Electives are taken as graduate courses. They are graduate-level courses (600 level and above) chosen from the BME course offerings with the approval of the advisor. A minimum of 6 credit hours of technical electives must be taken at the 700 level. Non-BME courses need to be approved by the advisor and the chairperson.

B.S./M.S. in Biomedical Engineering - Mechanical Concentration

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.

- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.

- The participants are excused from BME 402/BME 403, but are required to complete BME 705/BME 706.

- Up to 12 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree.

- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their senior year.

- Students can register for a maximum of 6 graduate credit hours per semester in their senior year.

- A typical curriculum of the BS/MS is shown below for the Mechanical Concentration.

- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

1. Students must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates). Each cognate should be a minimum of 3 courses (9 credit hours). Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.
Civil, Architectural and Environmental Engineering

http://www.cae.miami.edu

Dept. Code: CAE

Mission Statement

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise

The department offers three undergraduate degrees:

- Bachelor of Science in Civil Engineering,
- Bachelor of Science in Architectural Engineering and
- Bachelor of Science in Environmental Engineering.

Civil Engineering

Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

Architectural Engineering

Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, facility management companies, HVAC equipment manufacturers, architectural firms, government agencies, and universities.

Environmental Engineering

Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature's beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.

Educational Objectives

The objectives of the Civil Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to civil engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Architectural Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to architectural engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Environmental Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to the water environment or
2. Pursuing a graduate or professional degree.

Advanced Writing and Communication Skills

Civil, Architectural, and Environmental Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Civil, Architectural, and Environmental Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- CAE 111 – Introduction to Engineering I
- CAE 212 – Structures Laboratory (Civil and Architectural Engineering) – 1 Credit
- CAE 345 – Environmental Laboratory (Environmental Engineering) – 3 Credits
- CAE 371 – Geotechnical Laboratory (Civil and Architectural Engineering) – 1 Credit
• CAE 402 – Professional Engineering Practice- 3 Credits

**Majors**

**Majors in Civil, Architectural, and Environmental Engineering**

- B.S. in Civil Engineering (p. 244)
- B.S. in Architectural Engineering (p. 245)
- B.S. in Environmental Engineering (p. 246)
- B.S./M.S. in Civil Engineering (p. 247)
- B.S./M.S. in Architectural Engineering (p. 247)
- B.S. in Environmental Engineering/M.S. in Civil Engineering (p. 248)
- B.S. in Architectural Engineering and Master of Architecture Dual Degree Program (p. 248)

**Minors**

**Minor in Civil, Architectural, and Environmental Engineering**

- Civil Engineering (p. 250)
- Architectural Engineering (p. 249)
- Environmental Engineering (p. 250)

**B.S. in Civil Engineering**

**Civil Engineering Curriculum**

The Civil Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and civil engineering design. The first two years of the Civil Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. During the next two years of the four-year program, the Civil Engineering curriculum integrates engineering sciences with design applications in the areas of structural, environmental, geotechnical, and water resources engineering. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of civil engineering.

Graduate study is offered leading to the degrees of Master of Science and Doctor of Philosophy in Civil Engineering (p. 504). For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Civil Engineering is shown below.

B.S. in Architectural Engineering

Architectural Engineering Curriculum

The Architectural Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and architectural engineering design. The Architectural Engineering program integrates design applications across the curriculum, beginning with building construction and architectural design in the sophomore year, and continuing with structural, building mechanical and electrical systems design, and construction management in the junior and senior years. The curriculum culminates with a major comprehensive design experience that includes applications from the major specialty areas of architectural engineering.

Graduate study is offered leading to the degree of Master of Science in Architectural Engineering (p. 504). For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Architectural Engineering is shown below.

B.S. in Environmental Engineering

Environmental Engineering Curriculum

The Environmental Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and environmental engineering design. The first two years of the Environmental Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. The next two years of the four-year program, integrate engineering sciences with design applications with particular emphasis in the areas of water and wastewater engineering.

Design courses emphasize an integrated approach that considers all environmental media in the prevention and control of environmental problems. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of environmental engineering. A tabular listing of the course requirements for the degree of Bachelor of Science in Environmental Engineering is shown below:

1 Only offered once a year
2 To be selected from lists of approved People and Society (PS)/ Humanities and Arts (HA) cognates and Technical electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230; ARC 268 or ARC 476; and ARC 517 (Spring only) or ARC 594 (Fall only).
CAE 530 Water Resources Engineering II 1 3
RSMAS Course 3
HA Cognate 2 3
Tech Elective 3

Term Credit Hours: 16

Spring
CAE 402 Professional Engineering Practice 3
Environmental Eng. Course 4 3
CAE 404 Senior Design Project II - Civil Architectural 1 2
HA Cognate 2 3
PS Cognate 2 3

Term Credit Hours: 14
Total Credit Hours: 126

1 Only offered once a year.
2 To be selected from approved lists of People and Society (PS)/
   Humanities and Arts (HA) cognates and Biology Electives. Students
   take a minimum of 3 courses (9 credit hours) in HA cognate and 3
   courses in PS Cognate (9 credit hours).
3 Co-requisite CAE 212 not required for EnE majors.
4 CAE 540, CAE 533 and CAE 542 offered on a 3-semester rotation.
   Students must take these three courses.

Note: students must select the RSMAS course from the list of required
(non-elective) courses in either the Ocean Engineering Track or the
Marine Policy Track. A minor in Marine Science will be awarded for
15 credit hours of MSC, AMP or other RSMAS courses provided these
include MSC 111, MSC 301 and at least 6 credit hours at the 300 level or
higher. Required courses in the track count towards the 6 credit hours at
the 300 level or higher.

RSMAS Track 1: Ocean Engineering

MSC 403 Marine Environmental Toxicology 3
AMP 509 Coastal Physics and Engineering 3
Select one elective from any MSC course or any RSMAS 500-
level course 3

Total Credit Hours 9

RSMAS Track 2: Marine Policy 1

MSC 340 Ocean Policy 3
MSC 313 Coastal Law 3
MSC 314 Ocean Law 3

Total Credit Hours 9

1 These courses fulfill the requirements of People and Society
   electives for General Education.

B.S./M.S. in Civil Engineering

The Department also offers three 5-year programs leading to the
B.S. and the M.S. degrees (BSCE-MSCE; BSAE-MSAE; and BSEnE-
MSCE). These programs are open to students who are admitted to the
graduate program at the end of their junior year. Students applying for
this program must have a minimum grade point average of 3.0, and
score more than 310 on the Graduate Record Examination. The course
requirements for any of the five-year BS/MS programs can be met as
follows:

Senior Year
First Semester Credit Hours
Take PS or HA Cognate course in freshman semester 3
Graduate Level Course 3
CAE 703 Master’s Design Project I 3
Do not Register for CAE 403, Register for CAE 703 9

Second Semester
Graduate Level Course 3
Graduate Level Course 3
Graduate Level Course 3

Term Credit Hours: 9
Total Credit Hours: 33

B.S./M.S. in Architectural Engineering

The Department also offers three 5-year programs leading to the
B.S. and the M.S. degrees (BSCE-MSCE; BSAE-MSAE; and BSEnE-
MSCE). These programs are open to students who are admitted to the
graduate program at the end of their junior year. Students applying for
this program must have a minimum grade point average of 3.0, and
score more than 310 on the Graduate Record Examination. The course
requirements for any of the five-year BS/MS programs can be met as
follows:

Senior Year
First Semester Credit Hours
Take PS or HA Cognate course in freshman semester 3
Graduate Level Course 3
CAE 703 Master’s Design Project I 3
Do not Register for CAE 403, Register for CAE 703 9

Second Semester
Graduate Level Course 3
Graduate Level Course 3
Graduate Level Course 3

Term Credit Hours: 9
Total Credit Hours: 33

B. S. M. S. in Architectural Engineering
The Department also offers three 5-year programs leading to the B.S. and the M.S. degrees (BSCE-MSCE; BSAE-MSAE; and BSEnE-MSCE). These programs are open to students who are admitted to the graduate program at the end of their junior year. Students applying for this program must have a minimum grade point average of 3.0, and score more than 310 on the Graduate Record Examination. The course requirements for any of the five-year BS/MS programs can be met as follows:

### Senior Year

#### First Semester
- Take PS or HA Cognate course in freshman semester: 3
- Graduate Level Course: 3
- CAE 703 Master’s Design Project I: 3
- Do not Register for CAE 403, Register for CAE 703

#### Second Semester
- Graduate Level Course: 3
- Graduate Level Course: 3

#### Total Credit Hours: 9

### Graduate Year

#### First Semester
- Graduate Level Course: 3
- Graduate Level Course: 3
- Graduate Level Course: 3

#### Second Semester
- Graduate Level Course: 3
- Graduate Level Course: 3
- Graduate Level Course: 3

#### Total Credit Hours: 9

#### Total Credit Hours: 33

**B.S. in Architectural Engineering and Master of Architecture Dual Degree**

A six-year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect. The course requirements for the BSAE/MArch program are:

### Bachelor of Science in Architectural Engineering and Master of Architecture

## Electrical and Computer Engineering

[http://www.ece.miami.edu](http://www.ece.miami.edu)

### Dept. Code: ECE

### Mission Statement

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

### Introduction

Electrical and Computer Engineering are complementary disciplines that are at the forefront of the continuing development and evolution of our modern technological society. Electrical and computer engineers have initiated and contributed to the development of such important and diverse areas as integrated electronics and photonics, telecommunication systems and computer networks, computer hardware and software, image processing and computer vision, automation and robotics, electrical power generating and transmission systems, as well as participated in the development of significant applications to biotechnology. These technologies have significantly transformed how our evolving society will live, learn, work, communicate and do business in the 21st century and are critical to the development of a sustainable world economy. It is an exciting and challenging discipline offering a variety of rewarding career paths. The Department of Electrical and Computer Engineering offers a number of innovative academic and research programs to help prepare students to achieve a variety of career goals.

The Department offers two undergraduate degree programs:

1. Bachelor of Science in Electrical Engineering degree program (B.S.E.E.)
2. Bachelor of Science in Computer Engineering degree program (B.S.Cp.E.)

The Electrical Engineering and the Computer Engineering degree programs are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

In addition, the Department offers graduate courses leading to the:

- Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.), and the
- Doctor of Philosophy degree (Ph.D.).
Bachelor of Science in Electrical Engineering (B.S.E.E.)

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern electrical engineering, along with the necessary skills and experiences to apply standard practices, methodologies and available tools for solving electrical engineering problems. The major areas of Electrical Engineering include electronics, analog and digital circuits, microprocessors, communications and control systems. The design sequence is spread throughout the educational experience curricula, culminating in the two-semester senior design project. Graduates are expected to keep pace with this rapidly evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

Educational Objectives

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary technical fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including but not limited to the admission to and completion of professional or graduate studies of the highest standard.

Degree Program

The Electrical Engineering degree program has three options:

1. Electrical Engineering Option;
2. Audio Engineering Option;
3. Electrical Engineering Pre-Med Option

These options require specialized courses as well as the 49 Engineering Credit Hours required in the accredited Electrical Engineering degree program.

Electrical Engineering Major - Electrical Engineering Option

Electrical Engineering is concerned with the design, analysis and implementation of a variety of systems, components and devices, primarily of an electrical or electronic nature, which form the cornerstone of our complex and technologically oriented society. For example, this ranges from small-scale integrated electronics and photonics systems and devices, the technological drivers of the information technology revolution, to large-scale electrical power systems and power generators, which supply the nation’s energy needs and form the basis for sustained economic growth. Furthermore, Electrical engineering also involves the design of micro and nano devices, integrated circuits, hardware, and large-scale systems for telecommunications and networking that engender our increasingly networked life. Therefore, electrical engineering is a vast and rich discipline involved in the design of systems, components, and devices for a variety of applications and areas such as portable electronics (e.g., cell phones), communications and networks, biomedical sensing and medical systems, energy harvesting, next generation displays, lasers, optical and wireless transmission, audio/video compression and recognition, radar and tracking/guidance systems, and remote sensing systems. The University of Miami’s electrical engineering curriculum is focused on the fundamentals of the discipline, in the first two years building a firm foundation in mathematics, basic science, and basic engineering principles such as basic circuits, electronics, software and programming, computer hardware, and signal and system analysis. The students build upon this foundation through more advanced courses and focused specialization, culminating in a capstone major design experience. We continually update our curriculum and laboratories to incorporate new scientific and technological developments, and industry practices. Our graduates have gone on to successful careers in industry, or to graduate school in science and engineering, as well as law school, business school, and medical school.

Electrical Engineering Major - Audio Engineering Option

Audio Engineering offers students, who have a deep interest in sound and music, the opportunity to combine a rigorous electrical engineering education with additional specialized courses offered both by the UM ECE department as well as the Frost School of Music. In particular, the Audio Engineering option combines traditional electrical engineering studies with audio studies in areas such as acoustics, speech and audio signal processing, digital audio, transducers, speech and audio coding and transmission systems, post-production, noise cancellation, architectural acoustics, and recording, thereby providing a multi-disciplinary education. Our Audio Engineering graduates are highly sought by industry and have been pursuing successful careers in music/entertainment, multimedia, telecommunications, analog and digital electronics, and in the hearing aid/medical instrumentation industries, or have chosen graduate study. Students enrolled in Audio Engineering have access to a variety of well-equipped laboratories, both in the UM ECE Department, as well as in the Frost School of Music. For example, students have access to the Gusman Concert Hall, which houses a professional recording studio with automated console and multi-track recording. There, students can record live concerts ranging from small jazz groups to a symphony orchestra. In addition, Audio Engineering students use the Weeks Center for Recording and Performance, which also features a fully professional recording studio, analog and digital signal processing equipment and audio test equipment.

Electrical Engineering Major - Pre-Med Option

Our Department offers a pre-medical option that allows motivated students to obtain the rigorous education of a bachelors degree in electrical engineering while simultaneously completing the basic science requirements necessary for applying to medical or dental school. Much of the excitement in engineering involves applications of electrical and computer engineering to problems in health, such as the development of nano-scale biosensors, or the signal processing analysis of DNA sequences. The pre-med option allows students to learn the fundamentals of Electrical and Computer Engineering while preparing them for entry into either medical school, advanced graduate study, or industry.

Double Degree Program - B.S.E.E. & B.S.B.E.

A BME student who satisfies the requirement of the B.S.B.E. degree with electrical orientation as described in this Bulletin may also qualify for the B.S.E.E. degree by taking the following additional courses:
Chapter 2. Software Engineering Option

This chapter discusses the software engineering option offered by the Computer Engineering program. It covers the curriculum requirements, educational objectives, and the five-year B.S.E.E.-M.S.E.C.E. Dual Degree Program.

### The Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree Program

This is a structured and integrated program of 152/154 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate option available for Electrical Engineering Majors. It includes two required courses, ECE 715 and ECE 716 as well as the selection of advanced technical electives.

**Note that:**

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested ECE Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.E.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.E.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

### Educational Objectives

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary technical fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including but not limited to the admission to and completion of professional or graduate studies of the highest standard.

### Degree Program

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern computer engineering, along with the necessary skills and experiences to apply standard practices, methodologies and modern tools for solving computer engineering problems.

The computer engineering design sequence is spread throughout the curriculum, culminating in a two semester senior design project.

Graduates are expected to keep pace with this rapidly-evolving discipline. To this end, the faculty stress the importance of continued education and life-long professional development, by trying to instill in the students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

The Computer Engineering degree program has two options:

1. Computer Engineering Option
2. Software Engineering Option

These options require a common engineering core, which is followed by specialized courses in each area along with elective courses.

### Computer Engineering Major - Computer Engineering Option

Computer engineering is concerned with the characterization, design, analysis and implementation of hardware, software and the overall architecture of computers and computer systems, and with the development of applications enabled by such configurations. This ranges from embedded microprocessors and associated software supporting a variety of familiar devices, to large-scale distributed computer systems interconnected by high-speed telecommunication networks controlled by sophisticated communication protocols. Since modern electronic computing systems are digital in nature, the program provides in-depth coverage of a range of topics dealing with digital information processing systems. Among the topics covered are digital system design, computer organization and architecture, operating systems, software engineering, programming, data structures, algorithms, database systems, microprocessor-based systems, and embedded systems.
The department also offers electives in digital communications, computer networks, wireless and mobile networks, very large scale integration (VLSI), microelectronics, nanotechnology, application specific integrated circuits (ASIC), microelectromechanical systems (MEMS), image processing and computer vision, artificial intelligence, machine learning, data mining, and agent technology.

**Computer Engineering Major - Software Engineering Option**

Software Engineering is concerned primarily with the systematic and disciplined approach to developing software systems. It requires the application of both computer engineering and computer science principles and practices to the creation, operation, and maintenance of software systems and applications. The Software Engineering Option of the Bachelor of Science in Computer Engineering degree at the University of Miami is a unique interdisciplinary program developed and administered collaboratively by the Department of Electrical and Computer Engineering and the Department of Computer Science. This Option prepares students for successful careers in software engineering. Software systems are becoming increasingly complex, and emerging technologies are pushing the boundaries of reusable components and software quality assurance. To prepare students to meet these challenges, this Option establishes a solid foundation of software system fundamentals, coupled with strong hands-on experience and an understanding of professional practice and conduct. In addition to the core curriculum in software engineering, students are introduced to the paradigms of real-time, adaptive, and collaborative software systems, through a wide range of technical elective courses in the departments of Electrical and Computer Engineering, Computer Science, and other departments in the University of Miami. The technical electives allow students to apply the knowledge they have gained to different application areas. This provides valuable hands-on experience in contemporary application areas, which enhances the students’ potential career development opportunities.

Students pursuing the Software Engineering Option of the Bachelor of Science in Computer Engineering degree must earn at least 15 credit hours in Computer Science as part of their degree requirements.

**The Five-Year B.S.Cp.E.-M.S.E.C.E. Dual Degree Program**

This is a structured and integrated program of 154/156 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate option available for Computer Engineering Majors. It includes two required courses, ECE 715 and ECE 716 as well as the selection of advanced technical electives.

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested Computer Engineering juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

**Dual Majors**

Computer Engineering or Electrical Engineering students who want to do additional majors or minors must meet with their academic advisor to plan out their course work.

Computer Engineering students wanting to do Computer Science as a second major must

1. have an additional 6 advisor-approved technical credit hours beyond that required for the CE major, and
2. take PHI 115.

**Departmental Laboratories**

The Department maintains a variety of well-equipped laboratories and computers adequate for undergraduate instruction and graduate research. The laboratories and computer facilities include:

- Computer Vision and Image Processing Laboratory
- Digital Audio and Speech Processing Laboratory
- Digital Signal Processing Laboratory
- Digital Systems Design Laboratory
- Electronics Laboratory
- Electro-Optics and Micro-Devices Laboratory
- Embedded Systems Laboratory
- Fortinet Cyber Security Laboratory
- Information Technology Laboratory
- Microprocessor Laboratory
- Multimedia Laboratory (Arnold Center for Confluent Media Studies)
- Networks Laboratory
- Optics and Fiber Communications Laboratory
- Underwater Imaging Laboratory

**Departmental Electives**

<tbody>
<tr>
<td>Select from all ECE elective classes at the 300 level or above</td>
</tr>
</tbody>
</table>
Technical Electives
Select from all ECE or any 200 level or above CoE courses, as well as courses from Math, Physics, Chemistry, Biology, Computer Science, selected in consultation with, and with the approval of, the academic advisor.

EE Design Elective
Select one of the following:

- ECE 417 Embedded Microprocessor System Design 3
- ECE 454 Digital System Design and Testing 2
- ECE 505 Semiconductor Photonic Devices 3
- ECE 532 VLSI Systems 3

or any ECE course approved by the Academic Advisor

Basic Science (/Lab) Electives
Basic Science (/Lab) Electives are selected in consultation with the Academic Advisor from courses in Biology, Chemistry, Environmental Science, Geological Science, Marine Science, or Physics.

Computer Engineering (CE) Technical Electives
Select from all ECE at any 300 level or above in consultation with, and with the approval of, the academic advisor. Additionally, one elective course may be selected from the following computer science courses:

- CSC 317 Data Structures And Algorithm Analysis 3
- CSC 427 Theory Of Computing 3
- CSC 518 Interpreters and Compiler Theory 3
- CSC 529 Introduction to Computer Graphics 3
- CSC 540 Algorithm Design and Analysis 3
- CSC 555 Multimedia Systems 3

Software Engineering (SE) Technical Electives
Select from all ECE at any 300 level or above in consultation with, and with the approval of, the academic advisor. Additionally, one elective course may be selected from the following computer science courses:

- CSC 329 Introduction to Game Programming 3
- CSC 424 Computer Networks 3
- CSC 427 Theory Of Computing 3
- CSC 507 Data Security and Cryptography 3
- CSC 529 Introduction to Computer Graphics 3
- CSC 540 Algorithm Design and Analysis 3
- CSC 545 Introduction to Artificial Intelligence 3
- CSC 547 Computational Geometry 3
- CSC 555 Multimedia Systems 3

Advanced Writing and Communication Skills
Electrical and Computer Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom, laboratory, and design procedures where they learn effective oral, graphical and technical writing skills. Electrical and Computer Engineering students acquire Advanced Writing and Communication skills in the following core courses: ECE 312, ECE 415, and ECE 418.

Internship Program
The Department of Electrical and Computer Engineering encourages its students to take advantage of the College of Engineering Internship Cooperative Program with Industry.

Students could do that either on a part-time or a full-time arrangement. Students who wish to intern full-time for one semester or for twelve weeks in the summer may apply to earn as much as 3 credit hours that could be applied to their degree requirement as a Technical Elective. Students interested in such a possibility need to submit a proposal to the ECE Department describing the type of work they expect to accomplish approved by the industrial supervisor. If the proposal is approved the student will be assigned a Faculty Supervisor and will be able to register under ECE 499. At the end of the Internship Program, the student is expected to submit to the ECE Department a technical report with comments from the student industrial supervisor. The Faculty advisor will review the report and submit the appropriate grade for ECE 499.

NOTE 1: An ECE course for which another ECE course is a prerequisite may not be taken unless the student has completed the ECE prerequisite course with a grade of C- or better.

NOTE 2: All ECE courses at the 300 level or above must be taken at UM.

Departmental Honors
See College of Engineering (p. 225) section.

Majors
Majors in Electrical and Computer Engineering
- B.S.C.p.E. in Computer Engineering - Software Engineering Option (p. 256)
- B.S.E.E. in Electrical Engineering - Audio Engineering Option (p. 257)
- B.S.E.E. in Electrical Engineering - Electrical Engineering Option (p. 258)
- B.S.E.E. in Electrical Engineering - Electrical Engineering Pre-Med Option (p. 259)

Minors
Minors in Electrical and Computer Engineering
- Electrical Engineering (p. 265)
- Computer Engineering (p. 265)

Joint
Joint Degrees in Electrical and Computer Engineering
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree Program - Audio Engineering Option (p. 263)
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree Program - Electrical Engineering Option (p. 264)
- Five-Year B.S.C.p.E.-M.S.E.C.E. Dual Degree Program - Computer Engineering Option (p. 261)
B.S.C.p.E. in Computer Engineering - Computer Engineering Option

1. See description of electives under the Departmental Electives Section.
2. Advanced Bioscience Elective is to be chosen from BMB 260 BIL 250, BIL 255, BIL 268, or BMB 401, in consultation with their academic advisor. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements.
3. Offered only in the Fall semester.
4. Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.
Five-Year B.S.C.p.E.-M.S.E.C.E. Dual Degree Program - Computer Engineering Option

**Freshman Year**

**Fall**
- ECE 111 Introduction to Engineering I 3
- ECE 118 Introduction to Programming 3
- ENG 105 English Composition I 3
- MTH 151 Calculus I for Engineers 5

**Term Credit Hours:** 14

**Spring**
- ECE 112 Introduction to Engineering II 2
- ECE 118 Introduction to Programming 3
- ENG 107 English Composition II: Science and Technology 3
- MTH 162 Calculus II 4
- PHY 205 University Physics I 3
- PS Cognate (People and Society Elective) 1 3

#### Total Credit Hours: 154
Five-Year B.S.E.E.-M.S.E.E. Dual Degree Program - Electrical Engineering Option

The first three years are the same as in the undergraduate B.S.E.E. program with 97 credit hours. The remaining 55 credit hours shown below should include at least ten graduate courses of which, at least four are at the 700 level. Also see description of electives under the Electrical and Computer Engineering Section.

<td></td>
</tr>
</tbody>
</table>

Total Credit Hours: 18

1. Students with a major in Electrical Engineering wishing to add a minor in Computer Engineering must take 6 Computer Engineering course credit hours in addition to those needed to satisfy their degree requirements.
2. A minimum grade point average of 2.0 in all ECE courses taken.

Minor in Electrical Engineering

Students wishing to minor in Electrical Engineering should satisfy a 15 credit hour requirement specified as follows:

1. A core of 7 credit hours consisting of ECE 201, ECE 204, and ECE 305.
2. At least 8 credit hours of Electrical Engineering Electives at the 300 level or above and subject to approval of an academic advisor.

3. Students with a major in Computer Engineering wishing to add a minor in Electrical Engineering must take 6 Electrical Engineering course credit hours in addition to those needed to satisfy their degree requirements.
4. A 2.0 grade point average in all ECE courses taken.

Engineering Science

Introduction

The curricula in the engineering sciences have been designed to prepare a student to fill the gap between the pure and applied sciences. The programs have been planned to enable the graduate to meet, work, and communicate with scientists and engineers at all levels of research and development, design and production, sales and distribution and to participate in the rapid and efficient translation of the latest scientific discoveries into technological achievements.

The general curriculum outlined below has been developed to give the student a firm foundation in the engineering sciences supported by a thorough grounding and facility in mathematics, physics and chemistry. In addition, each student will choose an area of specialization in at least one of the Engineering fields of architectural, civil, biomedical, electrical, industrial, or mechanical, and mathematics, chemistry or physics. By being well grounded in both the basic and applied sciences, the student, upon graduation, will be well prepared to assume responsibilities in his/her field of specialization or continue his/her professional development through graduate studies.

The engineering science program is intended primarily for students who expect to pursue graduate studies, and it will not satisfy the licensure requirements for professional engineering registration.

Premedical Studies: When BIL 150 and BIL 160 are added to the course sequence for engineering science, basic premedical requirements are satisfied. Additional specific courses, such as genetics or biochemistry, may be required for admission to certain medical schools. For optimum timing and course selection students who combine premedical studies and engineering science should consult the faculty advisor for engineering science and the Coordinator, Committee on Premedical Studies.

Because of the nature of the curriculum and its goals, the student must maintain a B average. The degree of Bachelor of Science Engineering Science is awarded upon successful completion of the program.

The required curriculum for the degree of Bachelor of Science in Engineering Science (General Concentration) is shown below as is a typical premed curriculum. A Professional Chemistry Concentration in the Engineering Science Program is available (the Professional Chemistry Program, approved by the American Chemical Society, is also available in the College of Arts and Sciences).

Mission Statement

The mission of the Engineering Science program is to provide excellent undergraduate and graduate education in engineering that will prepare graduates to meet Societies changing needs and aspirations.
Educational Objectives
The objectives of the Engineering Science program are to educate engineers who:

- have a sound background in the fundamentals of engineering science grounded in mathematics, physics and chemistry
- have abilities and knowledge expected by graduate programs
- are prepared to enter graduate programs with a strong background in pure science

Majors
Degree Programs in Engineering Science

¹ You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

² Applied electives are advanced courses selected in coordination with the Faculty Advisor and require his/her approval.

³ Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.
## Engineering Science Curriculum - Premed Concentration

### Freshman Year

#### Fall

- **MAE 111** Introduction to Engineering I 3
- **ENG 105** English Composition I 3
- **MTH 151** Calculus I for Engineers 5
- **PHY 205** University Physics I 3

**Term Credit Hours:** 14

#### Spring

- **MAE 112** Introduction to Engineering II 2
- **CHM 111** Principles of Chemistry I 3
- **CHM 113** Chemistry Laboratory I 1
- **ENG 107** English Composition II: Science and Technology 3
- **MTH 162** Calculus II 4
- **PHY 206** University Physics II 3
- **PHY 208** University Physics II Lab 1

**Term Credit Hours:** 17

### Sophomore Year

#### Fall

- **BIL 150** General Biology 4
- **BIL 151** General Biology Laboratory 1
- **CHM 112** Principles of Chemistry II 3
- **CHM 114** Chemistry Laboratory II 1
- **PHY 207** University Physics III 3
- **PHY 209** University Physics III Lab 1
- **HA Cognate (HA Elective) ¹** 3

**Term Credit Hours:** 16

#### Spring

- **CAE 210** Mechanics of Solids I 3
- **ECE 201** Electrical Circuit Theory 3
- **BIL 160** Evolution and Biodiversity 4
- **BIL 161** Evolution and Biodiversity Laboratory 1
- **MTH 211** Calculus III 3
- **PS Cognate (PS Elective) ¹** 3

**Term Credit Hours:** 17

### Junior Year

#### Fall

- **MAE 202** Dynamics 3
- **MAE 207** Mechanics of Solids II 3
- **CHM 201** Organic Chemistry I (Lecture) 3
- **MTH 311** Introduction to Ordinary Differential Equations 3
- **HA Cognate (HA Elective) ¹** 3

**Term Credit Hours:** 15

#### Spring

- **MAE 303** Thermodynamics I 3
- **ECE 204** Electrical Circuits Laboratory 1
- **MAE 309** Fluid Mechanics 3
- **CHM 202** Organic Chemistry II (Lecture) 3
- **CHM 205** Organic Chemistry Laboratory I 1
- **PS Cognate (PS Elective) ¹** 3

**Term Credit Hours:** 14

### Senior Year

#### Fall

- **IEN 311** Applied Probability and Statistics 3
- **MAE 302** Mechanical Behavior of Materials 3
- **MAE 412** System Dynamics 3
- **PHY 360** Introduction to Modern Physics 3
- **PS Cognate (Adv. PS Elective)** 3

**Term Credit Hours:** 15

### Total Credit Hours: 123

1. You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

### Industrial Engineering

http://www.ie.miami.edu

**Dept. Code:** IEN

### Mission Statement

The Department of Industrial Engineering's mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote lifelong learning; and contribute to emerging societal needs.

### Overview

Industrial Engineering combines science and technical knowledge with human sciences to design, plan, and analyze systems that involve people, materials, money, energy, equipment, and other resources. Industrial engineers work with personnel in research and development, accounting, engineers in other disciplines, maintenance, human resources, and production to increase organizational productivity, improve quality, reduce health care costs, conserve energy, develop public transportation systems, and improve industrial safety conditions. Industrial engineering distinguishes itself from other engineering professions because it has applications in manufacturing, service, commercial, and governmental...
activities. It is the major branch of engineering concerned not only with technology, but with people, making industrial engineers a prime source of management talent.

Through consultation with his/her academic advisor, a student is assisted in choosing electives which will prepare him/her for a degree of specialization compatible with his/her future goals. The available concentrations are Engineering Management and Manufacturing. Specific courses required in each concentration are described in Degree Programs Section.

The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
- Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

- a Ph.D. program in Ergonomics and Human Factors
- a Ph.D. in Industrial Engineering.

For further information, see the Bulletin of the Graduate School (p. 510).

**Bachelor of Science in Industrial Engineering**

**Industrial Engineering Program Educational Objectives**

The major goal of the Industrial Engineering program at the University of Miami is to prepare graduates to contribute to the economy by virtue of employment in a variety of industries: manufacturing (heavy and light, traditional and high technology) and service (health care, retail, transportation, logistics, government, consulting, banking, and insurance). In striving to achieve this goal, the objective of the faculty is to provide all graduates with the mathematical, scientific, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to clients or decision makers in a fashion that facilitates decision-making processes. In addition, superior students are prepared for graduate studies and research. Within the first several years following graduation from the Industrial Engineering program, graduates are expected to be:

1. Working as professionals by adding value in any one of the following sectors:
   - Service
   - Government
   - Consulting
   - Retail
   - Manufacturing
2. Pursuing or holding a graduate degree and/or developing professionally through continuing education, licensure, certification and seminars in a new area or their chosen areas of expertise.

The curriculum includes required courses in mathematics and the physical sciences that ensure a firm scientific background while advanced departmental courses provide specialization. Required courses in the people and society - humanities and arts give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to successfully complete upper level course requirements.

The engineering design experience is interwoven in the curriculum throughout the students’ four years of study.

- Starting with IEN 111 *Introduction to Engineering* I and IEN 112 *Introduction to Engineering* II, an introduction to Engineering graphics, Auto CAD, MATLAB, C++, advanced Excel and Access are given.
- The students then move on to take IEN 201 *Methods Analysis and Work Measurement* where they perform work measurement projects in industry, write reports, and make oral presentations to management. In the Spring of their Junior year, the students take IEN 363 *Project Management for Engineers* and they are exposed to techniques and tools in project management such as use of network flow and MS Project.
- Students take IEN 361 *Industrial Cost Analysis* and IEN 380 *Engineering Economy* where they become aware of the impact of productivity on the economic and social well-being of industry and countries. The students are also introduced to basic models of decision making such as the formulation and evaluation of an economic strategy.
- IEN 406 *Computer-Aided Manufacturing* introduces the students to product design in manufacturing and modern concepts of CAD/CAM/ Automation.
- IEN 441 *Deterministic Models in Operations Research* focuses on the formulation of linear programming problems and solutions by the simplex method. Related topics include sensitivity analysis, duality theory and network programming. Engineering applications are emphasized.
- IEN 442 *Stochastic Models in Operations Research* focuses on basic concepts and techniques of random processes that are used to develop models for a variety of engineering and managerial problems. Topics include the Poisson Process, Markov chains, renewal theory, queuing models, and reliability.
- IEN 465 *Production and Inventory Control* provides a thorough treatment of modern production and inventory management policies, and their ramifications on supply chain management.
- Theory and applications of decision support systems in industrial engineering are covered in IEN 524 *Decision Support Systems in IE*. The topics include the study of model-based data-based, knowledge-based, and communication-based decision support systems.
- In IEN 557 *Ergonomics and Human Factors Engineering* both laboratory projects and real-world projects are designed, discussed, and conducted.
- Industry based projects are embedded into several other courses such as IEN 512 *Statistical Quality Control and Quality Management*, IEN 547 *Computer Simulation Systems*, and IEN 568 *Materials Handling and Facilities Planning*.
- IEN 494 *Senior Project* is a capstone project course where the students pool all of their knowledge and previous design experience into one major project integrating all components of the curriculum together. These projects are usually industry-based. Students prepare written and oral presentations. These presentations are made before production...
top management or engineers of the organization where the projects were conducted in the presence of the faculty representatives from the department.

Real world projects are an integral part of most junior and senior level courses. In these courses, communication is emphasized through requirements for oral presentation and written technical reports. This experience provides the graduates with valuable industrial experience and communications skills while studying at the University of Miami.

The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of production system design, work methods and measurement, human factors engineering, manufacturing processes, computer applications in industrial engineering and operations research.

Advanced Writing and Communication Skills: Industrial Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Industrial Engineering students acquire Advanced Writing and Communication skills in the following core courses:

• IEN 111 Introduction to Engineering I
• IEN 201 Methods Analysis and Work Measurement
• IEN 351 Industrial Safety Engineering
• IEN 363 Project Management for Engineers
• IEN 380 Engineering Economy
• IEN 494 Senior Project
• IEN 512 Statistical Quality Control and Quality Management
• IEN 547 Computer Simulation Systems
• IEN 557 Ergonomics And Human Factors Engineering
• IEN 568 Materials Handling and Facilities Planning

Industrial Engineering Concentrations
• Engineering Management Concentration
• Manufacturing Engineering Concentration
• Pre-Medical Concentration

Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering (Five-Year BSIE/MSIE Program)

This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering. The special conditions for this Five-Year BSIE/MSIE Program are as follows:

1. The student must declare his/her intent to participate before the end of the Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
2. A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.

3. To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.
4. The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all undergraduate and graduate requirements are satisfied.

Majors

Major in Industrial Engineering
• B.S.I.E. in Industrial Engineering (p. 269)
• B.S.I.E. in Industrial Engineering - Engineering Management Concentration (p. 270)
• B.S.I.E. in Industrial Engineering - Manufacturing Concentration (p. 272)
• B.S.I.E. in Industrial Engineering - Pre-Med Concentration (p. 273)
• Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering B.S.I.E./M.S.I.E. (p. 275)
• Five-Year Bachelor of Science in Industrial Engineering (Engineering Management Concentration) and Master of Science in Industrial Engineering B.S.I.E./M.S.I.E. (p. 274)

Minors

Minor in Industrial Engineering
• Industrial Engineering (p. 276)

<sup>1</sup> To be selected from lists of approved People and Society (PS)/ Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

<sup>2</sup> Advanced Bioscience Elective is to be chosen from BIL 250, BIL 255, BIL 269, MIC 301, CHEM 202, or BMB 402. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.

<sup>3</sup> Technical or Science Elective Lab is selected from a science lab complementing the Adv Bioscience Elective (e.g., CHM or BIL lab).

Mechanical and Aerospace Engineering

http://www.mae.miami.edu

Dept. Code: MAE

Introduction

Engineering is the art of applying the knowledge of science for the benefit of humanity. Mechanical Engineering is the most broadly based area of engineering. It is concerned with the analysis, design,
development and application of equipment for such diverse fields as energy conversion, transportation, production machinery, consumer goods, and environmental control. Today's advanced technology is largely a result of the skill of mechanical engineers who are heavily represented in most fields of modern industry.

Because of the varied careers and opportunities which are available to the Mechanical Engineering graduates, the curriculum emphasizes education in the fundamentals of the physical, mathematical, and engineering sciences, including materials science, solid mechanics, fluid mechanics and thermodynamics. These basic subjects are followed by courses in their application to the design and analysis of engineering devices and systems. Computers are utilized for analysis and design throughout the curriculum.

Aerospace Engineering is concerned with the analysis, design and development of a wide variety of aircraft and space vehicles and systems. The undergraduate aerospace engineering program is designed to provide a broad based foundation in aeronautics and astronautics, including topics such as aerodynamics, propulsion, aerospace structures and materials, flight dynamics, control and performance.

In the junior and senior years, the student is assisted in choosing technical electives in preparation for a degree of professional specialization or for further study in engineering, law, business or medicine. With the aid of an advisor and the concurrence of the department chairman, the student may select courses compatible with a variety of career goals.

The department offers two undergraduate degrees:

- Bachelor of Science in Mechanical Engineering and
- Bachelor of Science in Aerospace Engineering.

Within the Bachelor of Science in Mechanical Engineering program, sequences of courses are available to provide advanced knowledge in such traditional areas as electromechanical design, heat transfer, solid mechanics, fluid mechanics, and materials science. There are concentrations in:

- Aerospace Engineering and
- Internal Combustion Engines.

Mission Statements

Mission of Mechanical and Aerospace Engineering Department

The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet society's changing needs and aspirations.

Mission of the Mechanical Engineering Program

The mission of the Mechanical Engineering program is to provide excellent undergraduate education in Mechanical Engineering that will prepare graduates to meet society's changing needs and aspirations.

Mission of the Aerospace Engineering Program

The mission of the Aerospace Engineering program is to provide excellent undergraduate education in Aerospace Engineering that will prepare graduates to meet society's changing needs and aspirations.

Educational Objectives

The educational objectives of the undergraduate Aerospace Engineering (B.S.A.S.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to aerospace engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

The educational objectives of the undergraduate Mechanical Engineering (B.S.M.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to mechanical engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

Advanced Writing and Communication Skills

Mechanical & Aerospace Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Mechanical & Aerospace Engineering students acquire Advanced Writing and Communication skills in the following core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>

Graduate Studies

Graduate programs leading to the degrees of Master of Science and Doctor of Philosophy are offered by the Department with options in various engineering and interdisciplinary fields. Detailed information is available in the Bulletin of the Graduate School (p. 514).

Majors

Majors in Mechanical and Aerospace Engineering

- B.S. in Mechanical Engineering (p. 280)
- B.S. in Mechanical Engineering - Aerospace Engineering Concentration (p. 281)
• B.S. in Mechanical Engineering - Internal Combustion Engines Concentration (p. 282)
• B.S. in Aerospace Engineering (p. 279)
• B.S. in Aerospace Engineering and B.S. in Mechanical Engineering Dual Degree (p. 279)
• B.S. and M.S. in Mechanical Engineering (p. 278)

Minors

Minor in Mechanical and Aerospace Engineering
  • Mechanical Engineering (p. 282)

B.S. and M.S. in Mechanical Engineering

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of more than 1000 on the Graduate Record Examination (taken before the fifth year). The curriculum requirements for this program are as follows:

1. You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

2. Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

3. At least two must be at 700 Level courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

B.S. in Mechanical Engineering - Aerospace Engineering Concentration

The mission of the aerospace engineer is to design and manufacture payload carrying vehicles to travel distances at the lowest cost in the shortest period of time. The training of the aerospace engineer is by demand multidisciplinary and by spirit pioneering. It includes aerodynamics, propulsion, advanced materials, structures, controls, robotics, electronics and computer usage.

An option has been developed to allow students at the University of Miami to have a concentration of courses in Aerospace Engineering. This concentration in aerospace is built on the existing accredited degree program in Mechanical Engineering.

See Aerospace Engineering Concentration Curriculum (p. 279).

1. You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

### B.S. in Mechanical Engineering - Internal Combustion Engines Concentration

This program is designed to acquaint the mechanical engineering student with the fundamental science and engineering underlying the design of both conventional and high performance internal combustion engines and the fundamentals of emission formation in combustion systems, automobile mechanisms and structures including vibrations and noise. Included are studies of conventional fuels and synthetic fuels of the future such as hydrogen and methanol.

#### Technical Electives:

- MAE 442 Capstone Design Project-I
- MAE 443 Capstone Design Project-II
- MAE 415 Automatic Control
- MAE 470 Introduction to Aerospace Structures
- MAE 503 Internal Combustion Engines
- MAE 506 Nuclear Engineering
- MAE 510 Fundamentals of Solar Energy Utilization
- MAE 530 Thermodynamics I

#### Minor in Mechanical Engineering

A student in the College of Arts and Sciences choosing the general field of mechanical engineering as a minor must complete 15 credit hours consisting of the following:

### Core Courses

- CAE 210 Mechanics of Solids I
- MAE 111 Introduction to Engineering I

### Elective Courses

Select 9 credit hours from one of the following areas of specialization:

#### Energy Engineering:

- MAE 303 Thermodynamics I
- MAE 420 Applied Thermodynamics
- MAE 503 Internal Combustion Engines
- MAE 506 Nuclear Engineering
- MAE 510 Fundamentals of Solar Energy Utilization

#### Environmental Engineering:

- MAE 303 Thermodynamics I

**Total Credit Hours**: 15
The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School’s present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired and additional buildings were constructed to accommodate new wide-ranging projects. In 1969, the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution, made through the Rosenstiel Foundation, to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the Rosenstiel School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of over 80 who conduct sponsored research while offering studies leading to the Bachelor of Science, Bachelor of Arts, Master of Arts, Master of Science, Master of Professional Science and Doctor of Philosophy degrees.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate and undergraduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the-art catamaran, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School.

The Rosenstiel School strives to be in the forefront of basic and applied research as it applies to the ocean, atmosphere and global environment, with particular emphasis on subjects of societal significance. Our goal is to provide excellence in graduate and undergraduate education and research training, and to be a strong force towards improved environmental understanding and management.

Admission decisions are based on the secondary school record, SAT/ACT score, counselor’s evaluation and the applicant’s essay.

Student Responsibilities
Students of the Rosenstiel School are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study.

Academic Progress
The Rosenstiel School will review each student’s record at the end of each semester. All students in the Undergraduate Marine Science and Atmospheric Science Programs must maintain a cumulative grade point average of 2.5 or better in order to remain in the program. Only those courses passed with a grade of C- or better may be applied to the major or minor.

Honors
Honors in the Marine and Atmospheric Science Program may be earned by students who have a 3.5 GPA and have completed 4 credit hours of independent research and a senior thesis.

Degree Programs
The Rosenstiel School of Marine and Atmospheric Science offers degree programs on both the undergraduate and graduate levels for students interested in marine science and/or atmospheric science as a career.

Undergraduate Degree Programs
The Atmospheric Science program offers a Bachelor of Science in Marine and Atmospheric Science degree in Meteorology, with a curriculum conforming to the recommendations of the American Meteorological Society. The BS in Meteorology is a single major program, with a minor in Mathematics. Students may combine Meteorology with a second major in Mathematics, Marine Science, Physics, or Broadcast Journalism. A five-year course of study culminating in the Master of Professional Science is also available.

The Rosenstiel School Marine Science program offers two undergraduate degree options, a Bachelor of Science in Marine and Atmospheric Science and a Bachelor of Arts in Marine Affairs. The Bachelor of Science degree program is meant for students planning to continue with graduate studies in marine science, or for those who will pursue a technical career in this area in government or private industry.

The Bachelor of Arts degree is designed for students planning either non-technical careers with government agencies or private industries directly or indirectly concerned with the ocean, or graduate studies in such areas as business, law, economics, political science, education, or communication.

In cooperation with the graduate program in Marine Affairs and Policy, a five-year BA/MPS program in Marine Affairs is available. This program enables qualified students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Affairs with only one additional year.

Graduate Degree Programs
Graduate courses in the marine and atmospheric sciences are offered through the Graduate School and the Rosenstiel School of Marine and
Atmospheric Science and are listed under the Rosenstiel School graduate program entries in the Bulletin.

Courses at the 500-level may be taken for undergraduate credit hour with junior standing and departmental consent. These courses are listed in the course section of the undergraduate bulletin.

Requirements for Graduation
In addition to satisfying the course requirements for graduation with majors in Marine Science, Meteorology and Marine Affairs (specified above under “Undergraduate Majors (p. 284)”), students are expected to satisfy the School’s General Education Requirements. General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the General Education Requirements.

Areas of Proficiency
A) English Composition: Students must complete ENG 105 and either ENG 106 or ENG 107, or their approved equivalents, typically in the first year of residence. Students with an appropriate score on the Advanced Placement [AP] language or literature examinations, or with an appropriate score on the International Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT/V or ACT/E exams may be exempted from English 105.

B) Communication across the Curriculum: Students in the Rosenstiel School will, as part of their major curriculum, take courses designed to provide students with the skills required for effective communication, both written and oral, within the discipline.

C) Mathematics
Bachelor of Arts in Marine Affairs:

Select one of the following: 3-4

Areas of Knowledge
As described under the section General Education Requirements (p. 19) under General University Information, students must complete one cognate in each of three the Areas of Knowledge:

1. Arts and Humanities,
2. People and Society (Social Sciences) and

All undergraduate students in the Rosenstiel School will fulfill their STEM cognate requirement through their major requirements. Students in Marine Affairs will fulfill their People and Society cognate requirement through their minor. Students in Marine Science may elect to fulfill the People and Society cognate requirement with a Marine Policy cognate. Students in Meteorology may elect to fulfill the People and Society cognate requirement with a Broadcast Meteorology cognate. Cognates integrating Study Abroad courses are also available. See program advisors for details.

Atmospheric Science - Meteorology

Meteorology
Meteorology is the study of the atmosphere, including climate and climate variability, weather forecasting, cloud and precipitation physics, tropical dynamics, severe weather and hurricanes. Atmospheric scientists use computer models and sophisticated observing systems to describe and understand the atmosphere. The curriculum emphasizes math and physics basics, providing a strong foundation for an intensive study of meteorology. The curriculum, conforming to the recommendations of the American Meteorological Society, prepares students for graduate school and for jobs in industry and government.

The Rosenstiel School offers a Bachelor of Science in Marine and Atmospheric Science with a major in Meteorology.

Although Meteorology is a single major program, students often combine Meteorology with a second major in such diverse fields as mathematics, marine science or broadcast journalism.

Majors

Majors in Atmospheric Science - Meteorology

- B.S. in Meteorology (p. 287)
- B.S. Double Major in Meteorology and Mathematics (p. 286)
Minors

**Minors in Atmospheric Science - Meteorology**
- Meteorology (p. 288)
- Climate Science and Policy (p. 287)

**B.S. Double Major in Meteorology and Marine Science**

A double major in Meteorology and Marine Science is well suited for students with interests in the physical aspects of climate, as well as the interaction of the ocean and the atmosphere. It provides an excellent foundation for students who want to pursue graduate degrees in these fields. In addition to those courses that satisfy General Education Requirements, the double major curriculum is as follows:

<table>

MTH 524  Introduction to Probability Theory
MTH 525  Introduction to Mathematical Statistics
MTH 542  Statistical Analysis

Total Credit Hours  87-88

B.S. in Meteorology

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Meteorology are:

Atmospheric Science
ATM 103  Survey of Modern Meteorology  3
MSC 111  Introduction to Marine Science  3
ATM 118  Current Weather Topics  2
ATM 243  Weather Forecasting  3
ATM 303  Atmospheric Observation  3
ATM 305  Atmospheric Thermodynamics  3
ATM 405  Atmospheric Dynamics I  3
ATM 406  Atmospheric Dynamics II  3
ATM 407  Weather Analysis  4
ATM 409  Cloud Physics And Radiation  3

ATM 220  Climate And Global Change  3
or ATM 307  Introduction To The Physics Of Climate

Mathematics
MTH 161  Calculus I  4
MTH 162  Calculus II  4
MTH 210  Introduction to Linear Algebra  3
MTH 224  Introduction to Probability and Statistics  3
MTH 211  Calculus III  3
or MTH 310  Multivariable Calculus
MTH 311  Introduction to Ordinary Differential Equations  3
or MTH 320  Introduction to Numerical Analysis

Physics
PHY 205  University Physics I  3
PHY 206  University Physics II  3
PHY 207  University Physics III  3
PHY 208  University Physics II Lab  1

Chemistry
ATM 265  Atmospheric Chemistry  3-4
or CHM 111  Principles of Chemistry I
& CHM 113  and Chemistry Laboratory I

Computer Science
CSC 120  Computer Programming I  4

Electives
Select one free elective in Atmospheric Science, Mathematics or Science  3
Select 6 credit hours of upper level elective, to be approved by advisor  6

Recommended courses include:
ATM 306  Advanced Principles In Broadcasting Meteorology
ATM 307  Introduction To The Physics Of Climate
ATM 321  Scientific Programming In The Atmospheric Sciences
MSC 301  Introduction to Physical Oceanography

Total Credit Hours  79-80

1  Broadcast meteorology majors must take either MTH 224 or MTH 311/MTH 320, but are not required to take both.
2  Both ATM 220 and ATM 307 may be taken for full credit.

500-level courses are open to undergraduates but typically offered on the RSMAS campus. For Broadcast Meteorology double-majors and minors, the electives may be taken from the School of Communications.

Minor in Climate Science and Policy

A minor in Climate Science and Policy requires 15 credits which must include:

MSC 346  Climate Science and Policy  3

Select three of the following (List A):
ATM 102  Introduction To Weather And Climate
or ATM 103  Survey of Modern Meteorology
ATM 220  Climate And Global Change
A minor in Meteorology requires 15 credit hours which must include:

</tbody>
</table>

**Total Credit Hours**: 15

Only those courses passed with a grade of "C-" or higher may be applied to the minor.

## Marine Affairs

The ocean is acquiring an ever-increasing significance as an avenue of worldwide commerce and communication and as a source of food, energy, minerals and fuels. As nations and private concerns become more involved in the ocean, the need increases for qualified professionals to deal with the commercial and legal complexities of marine affairs. In order to meet this need, the Rosenstiel School offers a Bachelor of Arts degree with a major in Marine Affairs combined with a required minor or additional major in Anthropology, Economics, Ecosystem Science and Policy, Geography, International Studies, Latin American Studies, Political Science, or an approved field within the School of Business Administration. Students in the School of Communication may include Marine Affairs as a second major. This program is designed for students who wish to prepare themselves for graduate studies and careers in ocean related areas of business, policy, management, law, and communication.

## 5 Year BA/MPS Program in Marine Affairs

The Rosenstiel School offers a 5 year BA/Master of Professional Science (MPS) Program in Marine Affairs. This program enables qualified Marine Affairs students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Affairs in one additional year. Conditional acceptance to the graduate Marine Affairs and Policy program is based on the student's GPA at the end of the sophomore year. Students must then apply for acceptance to the graduate program at the Rosenstiel School during their junior year.

### Majors

#### Majors in Marine Affairs

</tbody>
</table>

The minor satisfies either the STEM Area of Knowledge cognate requirement, or the People and Society Area of Knowledge cognate requirement. Only those courses passed with a grade of "C-" or higher may be applied to the minor.
MSC 460  Spatial Applications in Marine Science  3
Select 9 credit hours of approved electives in Marine Affairs  9

Other Required Courses
GSC 110  The Earth System  3-4
or GSC 111  Earth System History
ECO 211  Economic Principles and Problems  3
Select 6 credit hours of upper level elective, to be approved by advisor. 6

Biology
BIL 150  General Biology  4
BIL 160  Evolution and Biodiversity  4

Chemistry
CHM 111  Principles of Chemistry I  3
CHM 112  Principles of Chemistry II  3

Mathematics
Completion of 3 credit hours of Mathematics above MTH107  3-4
Select one approved course in Computer Programming or Statistics  3

Total Credit Hours  62-64

500-level courses offered through the graduate Marine Affairs and Policy or Marine Ecosystems and Society programs at the Rosenstiel School may be taken by Junior or Senior students with permission.

Minor in Climate Science and Policy
See under Atmospheric Science (p. 285)

Minor in Marine Policy
A minor in Marine Policy requires 15 credits which must include:

Required Courses
MSC 111  Introduction to Marine Science  3

Electives
Select 12 credit hours of the following:  12
MSC 310  Living Resources of the Ocean
MSC 313  Coastal Law
MSC 314  Ocean Law
MSC 340  Ocean Policy
MSC 342  Decision Making And The Environment
MSC 345  Economics of Natural Resources and the Environment
MSC 346  Climate Science and Policy
MSC 410  Marine Conservation Science
MSC 415  Coral Reef Science and Management
MSC 420  Political Ecology of the Galapagos
MAF 501  Political Ecology of Marine Management
MAF 504  Fieldwork in Coastal Management
MAF 510  Environmental Planning and the Environmental Impact Statement
MAF 512  Aquaculture Management
MAF 518  Coastal Zone Management

MAF 530  Port Operations and Policy  15

Total Credit Hours

Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 with an additional elective, and all electives must be above and beyond those used for the major. The Marine Policy minor fulfills the requirements of a People and Society cognate.

Marine Science
Dept. Code: MSC

Marine Science is an interdisciplinary program dealing with the study of the world’s oceans, their physical and biological constituents, the influence of oceanic resources on human society, and the conservation and future development of these resources.

The Bachelor of Science double major in Marine Science prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans. The Bachelor of Science in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a second major in one of the sciences through the College of Arts and Sciences, RSMAS or the College of Engineering. Common second majors are biology, chemistry, geological sciences, physics, biochemistry, computer science, meteorology and microbiology & immunology. Required courses for these combinations are listed below. Second majors in Applied Physics, Engineering (all disciplines), and Mathematics may be taken. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credit hours for graduation.

Majors

Majors in Marine Science

| Total Credit Hours | 70-72 |

1 Required for Biochemistry double majors.
2 Required for Engineering, Mathematics and Applied Physics double major.
3 At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
4 University Physics is recommended.
BIL 311  Biostatistics  
CSC 120  Computer Programming I  
MTH 224  Introduction to Probability and Statistics  
PSY 291  Introduction To Biobehavioral Statistics  

**Physics**  
Select one of the following Options: 4  

**Option 1:**  
PHY 205  University Physics I  
PHY 206  University Physics II  
PHY 207  University Physics III  
PHY 208  University Physics II Lab  
or PHY 209  University Physics III Lab  

**Option 2:**  
PHY 101  College Physics I  
PHY 102  College Physics II  
PHY 106  College Physics Laboratory I  
PHY 108  College Physics Laboratory II  

**Electives**  
Select 6 credit hours of electives 5  

**Total Credit Hours**  
107-109

---

1. At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.  
2. The electives must include at least one lab or field based course. MSC 230 and one advanced biology course may fulfill requirements in both Biology and Marine Science.  
3. CHM 202 and CHM 206 may be substituted by courses leading to a major or minor in an approved science or math discipline (BCH, CHM, CSC, GSC, MIC, MTH, PHY).  
4. University Physics is recommended.  
5. Including 3 at the upper level, to be approved by advisor.

---

**B.S. in Marine Science/Chemistry**

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Chemistry are:

### Marine Science
- MSC 111  Introduction to Marine Science  
- MSC 215  Chemical Oceanography  
- MSC 216  Chemical Oceanography Laboratory  
- MSC 230  Introduction to Marine Biology  
- MSC 301  Introduction to Physical Oceanography  
- MSC 232  Introduction to Marine Biology Laboratory  
or MSC 302  Introduction to Physical Oceanography Lab  
Select 12 credit hours of electives in Marine Science  

### Biochemistry and Molecular Biology
- BMB 401  Biochemistry For The Biomedical Sciences  

### Biology
Select one of the following:

### Chemistry
- CHM 111  Principles of Chemistry I  
- CHM 112  Principles of Chemistry II  
- CHM 113  Chemistry Laboratory I  
- CHM 114  Chemistry Laboratory II  
- CHM 201  Organic Chemistry I (Lecture)  
- CHM 202  Organic Chemistry II (Lecture)  
- CHM 205  Organic Chemistry Laboratory I  
- CHM 206  Organic Chemistry Laboratory II  
- CHM 304  Structural Identification of Organic Compounds  
- CHM 316  Instrumental Analytical Chemistry  
- CHM 320  Instrumental Methods in Chemistry and Biochemistry  
- CHM 360  Physical Chemistry I (Lecture)  
- CHM 364  Physical Chemistry (Laboratory I)  
- CHM 365  Physical Chemistry II (Lecture)  
- CHM 441  Inorganic Chemistry (Lecture)  
Select one of the following:  
- CHM 317  The Chemistry of Food and Taste.  
- CHM 401  Environmental Chemistry  
- Any 500-level Chemistry course as described for Chemistry BS majors  

### Geological Sciences
Select one of the following:  
- GSC 110  The Earth System  
- GSC 114  and Earth Processes Lab  
- GSC 111  Earth System History  

### Mathematics
- MTH 161  Calculus I  
- MTH 162  Calculus II  
Select one semester of a computer or statistics course of the following approved classes:
- MSC 204  Environmental Statistics  
- MTH 224  Introduction to Probability and Statistics  
- CSC 120  Computer Programming I  
- CSC 210  Computing for Scientists  

### Physics
- PHY 205  University Physics I  
- PHY 206  University Physics II  
- PHY 207  University Physics III  
- PHY 208  University Physics II Lab  
or PHY 209  University Physics III Lab  

### Electives
Select 3 credit hours of electives  

**Total Credit Hours**  
99-101
B.S. in Marine Science/Computer Science

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Computer Science are:

Approved 500-level classes offered by the Rosenstiel School

---

1 At least 6 of which must be at the 300-level or higher.

Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 with an additional elective, and all electives must be above and beyond those used for the major. The Marine Science minor fulfills the requirements of a STEM cognate. Only those courses passed with a grade of "C-" or higher may be applied to the major or minor.

Phillip and Patricia Frost School of Music

Introduction

The University of Miami Frost School of Music awards three undergraduate degrees with major programs in twelve areas.

- Bachelor of Music
  - Instrumental Performance
  - Keyboard Performance
  - Vocal Performance
  - Studio Jazz Instrumental
  - Studio Jazz Vocal
  - Music Education with a minor in Education
  - Music Therapy with a minor in Psychology
  - Theory and Composition
  - Media Writing and Production
  - Music Business and Entertainment Industries with a minor in Business or Communication

- Bachelor of Science
  - Music Engineering

- Bachelor of Arts
  - Music

Mission

The Frost School of Music seeks to transform lives through the study and performance of music, and to enhance music’s future as the result of the most innovative and relevant curricula in higher education. The Frost School of Music is devoted to excellence and a culture of collegiality, in which a diversity of people, musical styles, and careers are valued. The Frost School of Music is a community of musicians committed to advanced musicianship for all Frost students across a broad array of majors and programs. The Frost School of Music seeks to elevate the community through intensive, sustained outreach to underserved populations. The Frost School of music strives to enhance the cultural richness of the University of Miami, South Florida and throughout the world as the result of world class performance, scholarship and research.

Accreditation

The Frost School of Music has been a member of the National Association of Schools of Music since 1939. The requirements for entrance and for graduation as set forth in this bulletin are in accordance with the principles of this association.

Goals

The primary goals are:

1. to provide music majors with a high quality education,
2. to provide opportunities for other university students to increase their musical skill, understanding, and appreciation,
3. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and
4. to serve as an educational and cultural resource for the university, South Florida, and global communities.

Performing Ensembles

Ensembles provide music learning and performing experience for all students on the University of Miami campus through rehearsals and public concerts. Membership in each of these performing ensembles is based on auditions. Not all ensembles meet degree requirements. Follow ensemble policies as indicated in the Frost School of Music student handbook. Please refer to the course catalog for a complete list of all ensembles.

Instrumental Ensembles

- Accompanying
- American Music Ensemble (Songwriters)
- Avant Garde Ensemble
- “Band of the Hour” Marching Band
- Bluegrass Ensemble
- Blues Ensemble
- Brass Chamber Music
- Brass Choir
- Clarinet Choir
- Classical Guitar Ensemble
- Concert Jazz Band
- Contemporary Music Ensemble
- E.C.M. Ensemble
- Electronic Music Ensemble
- Flute Choir
- Funk/Fusion Ensemble
- Horace Silver Ensemble
- Jazz Band III
- Jazz Bass Ensemble
- Jazz Guitar Ensemble
- Jazz Keyboard Ensemble
- Jazz Saxophone Ensemble
- Laptop Ensemble
- Mallet Ensemble
- Monk/Mingus Ensemble
- Percussion Chamber Music
- Rock Ensemble
- Salsa Ensemble
- Saxophone Ensemble
- Small Jazz Ensembles
- String-KeyBoard Chamber Music
- Studio Jazz Band
- Studio Rhythm Section
- Symphonic Winds
- Symphony Orchestra
- Synthesizer Ensemble
- The Other Music Ensemble
- Trombone Choir
- Tuba Ensemble
• University Band
• Wind Ensemble
• Woodwind Chamber Music

Vocal Ensembles
• Chamber Singers
• Jazz Vocal I-III
• Men’s Chorale - Maelstrom
• Musical Theatre Workshop
• Opera Theater
• Symphonic Choir
• University Chorale
• Women’s Chorale - Cantilena

Music for Non-Music Degree Students
Select music courses are available to students not enrolled in a music degree program. Pre-college students, matriculating University of Miami students, and interested community adults may enroll in these courses. Students who are not currently enrolled at the University of Miami but who wish to pursue courses will need to apply as a special student through the Frost School of Music Office of Admission. A list of courses is available at http://www.miami.edu/frost/index.php/frost/students/.

Non-music majors who wish to enroll in lessons are required to audition and may, with the permission of the appropriate faculty member and the undergraduate or graduate dean, register for one or two credit hours a semester upon payment of tuition and an applied music fee of $300.00 per credit hour. Lessons by non-music majors are subject to teacher availability.

Academic Policies
Requirements for Admission to the Frost School of Music
Students admitted to the Frost School of Music must successfully complete a dual admission process. In addition to the general requirements for admission to the University, the undergraduate student must meet the following requirements of the Frost School of Music:

1. Submit a Frost School of Music Application to the Frost School of Music Admission Office.
2. Submit an Application for Undergraduate Study to the University Office of Undergraduate Admission.
3. Demonstrate performance proficiency by auditioning on campus, at designated regional audition centers, or by recording. Appropriate faculty committees will evaluate the audition.
4. After being admitted to the university each student will be required to participate in placement auditions and exams in theory and music performance. These examinations will be given immediately prior to the fall semester.
5. Transfer students who are admitted to the university will receive a tentative evaluation of their previous work from the Office of Admission. Validation of credit hours in music will be based on the results of auditions and placement examinations discussed above. The Associate Dean for Undergraduate Studies of the Frost School of Music determines which transferred courses will meet specific requirements for graduation.

6. Admission is granted in Fall semesters only.

Students who are admitted to the Frost School of Music must begin a program of specialized requirements in music during their first semester.

Admission to the University (Undergraduate Students)
Application forms and bulletins for undergraduate students may be secured from the University of Miami web site at www.miami.edu. The University Office of Admission receives and processes all undergraduate applications, evaluates credentials, and mails letters of acceptance to applicants who qualify for entrance. Because of the university’s selective admissions policy and limited enrollment only those applicants are accepted who present evidence of intellectual promise, unusual talent and potential, and strong personal qualifications. Admission as a transfer student requires a 3.0 grade point average from the previous institution. The University Office of Admission and the Frost School of Music determine admission to the university. Prospective students should make formal application for admission in the fall of the senior year in high school. The Frost School of Music participates in the Early Action and Regular Decision programs.

Placement Tests
Upon entering the Frost School of Music, students must demonstrate, through placement auditions, college-level performance on their instrument and in music theory. Results of placement tests will enable music advisors to assist students in selecting the appropriate program and level of study.

Audit
Students are not permitted to audit music courses.

Lessons
The study of a musical instrument or voice, in private lessons or group lessons, requires an audition. Frost School of Music students are classified as “majors” or “principals.” A performance “major” aspires to a professional career in music performance. A “principal” aspires to develop their music performance skills to the fullest extent possible in a music degree other than performance.

There are five levels of undergraduate and graduate lessons.

• Level 1 - undergraduate freshman and sophomore, typically four semesters
• Level 3 - undergraduate junior and senior, typically four semesters
• Level 5 - graduate artist’s diploma
• Level 6 - graduate masters
• Level 7 - graduate doctoral

Transfer students enroll in Level 1 for the first semester and are placed at an appropriate classification level of study based on the results of the jury at the end of each semester.
Credit for Lessons
The number of credit hours awarded for lessons is determined by the student’s curriculum. Students enrolled for 2 credit hours of lessons are required to perform a jury at the end of each semester.

Jury
The purpose of the jury is to evaluate student musicianship and technical progress. Students enrolled for 2 credit hours of lessons are required to play a jury before a panel of performance faculty at the end of each semester. Juries are held during Reading Days. Students perform technical requirements and repertoire as assigned by their lesson teacher.

The lesson teacher prepares a jury sheet that lists the repertoire covered during the semester and the studio grade for each student. The grade is recorded on the jury sheet and placed in the student’s file. The final grade may be determined in part by studio class participation, recital attendance, or other requirements specific to the student’s program of study.

Lessons: Warning, Probation and Dismissal
The following applies to all majors and programs in the Frost School of Music:
Students earning a grade of “C+” or lower in lessons will be placed on probation for one semester. Following probation, an additional grade of C+ or lower in lessons will result in dismissal from the Frost School of Music. Courses may not be dropped during the second enrollment.

Students Who Fail to Successfully Complete a Music Course
Students who fail to successfully complete any music course, including zero credit forums, after the second enrollment will be dismissed from the Frost School of Music. Courses may not be dropped during the second enrollment.

Forums
Students must successfully complete a program forum each semester in residence. Program forums (which are zero credit) are degree requirements. Students must successfully complete the required number of program forums to graduate.

Summer Lessons
During each of the five-week summer sessions, students may register for one credit hour and receive a one-hour lesson per week. Summer lessons do not fulfill degree requirements.

Special Fees
Students studying a secondary instrument beyond the required four semesters of secondary piano will be assessed a per-credit hour fee and must have the approval of the undergraduate dean and program director or department chair. Students who require an accompanist may be assessed an accompanying fee.

Non Music or Free Electives
Non–music or free electives may be chosen from any courses offered by the university except ESS courses numbered below 140.

Dual Degrees
Dual degrees have more stringent requirements than “double majors.” The only courses that may count for both degrees are the general education requirements (ENG 105 and ENG 106, Math, People and Society cognate, and STEM cognate). For each degree a student must have a different major and minor, if a minor is required. The major for one degree may not be a minor for the other degree.

Graduation Requirements
The general requirements for graduation from the University of Miami are described in the General Information (p. 13) section of the Academic Bulletin. These general requirements are included in the list of requirements for majors in the Frost School of Music. The student should consult regularly with his/her advisor and review the Degree Progress Report available in CaneLink under Academic Requirements. The Degree Progress Report is a tool to help evaluate if academic requirements are being met. The Dean must approve changes or deviations from the printed requirements in writing. Students must satisfy all degree requirements in order to graduate. Degree requirements may be satisfied by successfully completing a course, an approved substitution for the course, an approved transfer course, or waiver from the course as a result of demonstrating the required competency through testing.

Degree Programs

- Bachelor of Music
  - Instrumental Performance (MIP) (p. 301)
  - Keyboard Performance (MKP) (p. 304)
  - Vocal Performance (MVP) (p. 336)
  - Studio Jazz Instrumental (MSJI) (p. 325)
  - Studio Jazz Vocal (MSJV) (p. 325)
  - Music Education with a minor in Education (MED) (p. 310)
  - Music Therapy with a minor in Psychology (MTY) (p. 310)
  - Theory and Composition (MTC) (p. 320)
  - Media Writing and Production (MWP) (p. 320)
  - Music Business and Entertainment Industries (MBEI) (p. 306)
- Bachelor of Science
  - Music Engineering (MUE) (p. 317)
- Bachelor of Arts
  - Music (MUS) (p. 298)

Bachelor of Arts in Music (MUS)

Dept. Code: MCY

Undergraduate students who are interested in musicology, music history or ethnomusicology are encouraged to enroll in the Bachelor of Arts in Music degree, through which they can pursue these and related subjects within a liberal arts music curriculum. There is no undergraduate degree in musicology.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in
evaluated and revised writing, speaking, stage presence, and audience engagement.

All BA in Music students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.

2. MCY or MTC 300+ Elective, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

3. MCY or MTC 300+ Elective, required by your major which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.A.M. Bachelor of Arts in Music

Introduction
The Bachelor of Arts in Music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and pre-legal. A minor outside the Frost School of Music is required. Students in the BA in Music program must earn a minimum 2.5 GPA each semester to remain in the program.

The mission of the Bachelor of Arts in Music is to provide students with the highest quality education possible in music, a broad education in the liberal arts, and in-depth study in an academic area outside of the Frost School of Music.

Please see below for additional goals and degree requirements.

### Instrumental Performance (MIP)

**Dept. Code:** MIP

The Department of Instrumental Performance offers a bachelor of music performance degree in 17 traditional instruments: flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, euphonium, tuba, percussion, violin, viola, violoncello, double bass, guitar, and harp.

### Bachelor of Music: Instrumental Performance (MIP)

The purpose of the Bachelor of Music in Performance Degree is to

1. Provide the highest quality of education possible in the areas of musicianship that will lead toward a professional performance career or graduate study as a classical artist.
2. To provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research.
3. To provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

### Educational Objectives

- Students will develop musicianship skills and technique that will lead toward a professional career as a solo classical performer or graduate study.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble leading towards a professional career or graduate study as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for fostering a professional career or graduate study as a classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.

### Advanced Writing and Communication Skills Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All BA in Music students will successfully complete:

1. MCY 341, which will include substantial evaluated and revised writing components.
2. MCY or MTC 300+, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MCY or MTC 300+, which will include discipline specific communication skills.

### Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.
Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Complete from the following courses 8 semesters of 1 credit hour:

- MKP 189 Accompanying, Level I
- MKP 190 Accompanying, Level II
- MKP 191 Accompanying, Level III

Total Credit Hours: 121

1. **EMC core courses require a grade of “C” or higher.**

### Advanced Writing and Communication Skills Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All keyboard performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MKP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MKP 547 Keyboard Pedagogy, which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

### Music Business Entertainment Industries (MBEI)

**Dept. Code:** MMI

The Department of Music Media and Industry includes two programs:

- Music Engineering Technology
- Music Business Entertainment Industries

#### Advanced Writing and Communication Skills Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.

2. a Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue. MBEI take MMI 537 Recorded Music Operations, MUE take MMI 410 Music Engineering Capstone Project.

3. one required course in their major which will include discipline specific communication skills. MBEI take ENG 230 Advanced Business Communication or COS 333 Business Communication, or ENG 331 Legal Writing. MUE take MMI 401 Audio Electronics.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

### B.M. in Music Business Entertainment Industries with a Required Minor in Business, Communications, or Entertainment

#### Introduction
The Bachelor of Music in Music Business and Entertainment Industries is a professional degree program designed to prepare qualified musicians for careers in the business management, financial, legal, and artistic areas of the music industry. Music, business, and music business courses are combined in an interdisciplinary curriculum, which includes a minor in Marketing, Legal Studies, Business Administration, Management, Finance, Computer Information Systems, Public Relations, or other approved business-related area.

Students must maintain a minimum GPA of 2.70 to remain in the MBEI Program.

Please see below for additional goals and degree requirements.

Total credits for courses in the major = 54

Total Credit Hours 120

1  EMC core courses require a grade of “C” or higher.

Educational Objectives

- Students will have a conceptual understanding of the structures and inter-relationships of the music and entertainment industries.
- Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
- Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
- Students will know how to promote and sell a music industry product.
- Students will have an understanding of the performing artist as a major economic factor in the marketplace.
- Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 537 Recorded Music Operations, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. ENG 230 Advanced Business Communications, COS 333 Business Communication, or ENG 331 Legal Writing which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Music Education and Music Therapy (MED) & (MTY)

Dept. Code: MED

The Department of Music Education and Music Therapy offers two degree programs,

- music education (MED) and
- music therapy (MTY).

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. a required musicology course, which will include substantial evaluated and revised writing components. MED take MCY 341 Music of the Medieval, Renaissance, and Baroque Periods. MTY take MCY 141 Musical Trends and Traditions.
2. a Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience...
during performance, and preparing program notes or similar media as appropriate to the medium/venue. MED take MED 471 Internship in Music Education & MED 473 (6 credits ea.) or MED 475 Internship in Music Education (12 credits).

3. one required course in their major which will include discipline specific communication skills. MED take MED 542 Teaching General Music. MTY take MED 551 Music Therapy Research Methods.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Music Education with Minor in Education

Introduction

A basic premise of the Music Education program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical and practical foundation in music education. The instructional program prepares students for teaching all areas of the instructional specialization (e.g. choral, general, instrumental music) while allowing them to develop a specialization in a given area of music teaching through and emphasis area and internship. The theoretical and practical foundations in our series of music education techniques and methods courses incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners.

Please see below for additional program goals and academic requirements.

Total credits for courses in the major = 61

**Total Credit Hours**: 127

1. *MED and TAL courses require a grade of "C" or higher.*
2. *MED 475 Internship in Music Education (12 credits) can be substituted for MED 471 & MED 473*

**Program Goals**

- Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.
- Enable students to apply the musical and instructional skills developed in the program (and reinforced during field experience and student teaching) to teach music in a wide array of contexts.
- Help students to develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.
- Help students develop skills in integrating information from the diverse professional literature into their teaching.

**Educational Objectives**

- Students must demonstrate generic competencies required by the university in general education courses.
- Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida in Teaching and Learning (TAL) courses.
- Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree, including 66 credit hours in music.
- Students must demonstrate teaching competencies related to the core courses in the music education specialization, including a minimum of 32 credit hours in Music Education.

The Music Education curriculum is designed to prepare students to teach music in a wide array of contexts, including (K-12) public & private schools. All Music Education majors must perform at a high level either vocally or on an instrument. Students must successfully complete the
Florida General Knowledge Examination (FGKE) to be admitted to teacher candidacy and to graduate.

All students must develop knowledge of and performance ability on wind, string, and percussion instruments as well as, vocal skills to assure effective use of the voice in teaching.

Admission to and/or retention in the music education curriculum leading to Florida Teacher Certification requires that students be formally screened with respect to specific criteria. Following are the Requirements for Admission to Teacher Candidacy and for Admission to Associate Teaching:

**Admission to Teacher Candidacy**
1. Acceptance as a major in the music education program.
3. Completion of 55 credit hours. (Transfer students must have at least 12 credit hours earned at the University of Miami.)
4. No grade less than a C in TAL & MED courses.
5. Required Background Check completed.

**Admission to Student Teaching**
1. Approval of MED faculty members.
2. Completion of 90 credit hours.
3. Completion of at least three-fourths of the courses in the teaching major, verified by advisor.
4. Completion of a C or better in all MED & TAL courses
5. Completion of pre-internship field experiences with above-average evaluations.

**Advanced Writing and Communication Skills**

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Education students will successfully complete:
1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MED 471 & MED 473 Internship in Music Education (Elementary & Secondary) or MED 475 Internship in Music Education, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 542 Teaching General Music, one required course in their major which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

---

### B.M. in Music Therapy with Minor in Psychology

**Introduction**

The music therapy program provides students with the opportunity to develop comprehensive musicianship as well as clinical knowledge and skills within a rich musical, scholarly and communicative environment. Music therapy majors must demonstrate musical proficiency, either vocally or instrumentally, and must acquire musical competency on guitar, piano, voice and percussion.

Graduates of this program are prepared for careers as professional music therapists in a variety of health care and educational settings. Furthermore, graduates are eligible to take the Board Certification Exam in music therapy, leading to the credential, Music Therapist Board Certified (MT-BC). The music therapy curriculum is approved by the American Music Therapy Association, and is based on the clinical and research paradigm known as Neurologic Music Therapy.

To remain in the Music Therapy program, students must earn a minimum 2.5 GPA each semester. Additionally, music therapy core courses must be completed with a grade of C or higher. All internship applications must include a written letter of recommendation from a music therapy faculty member.

Please see below for additional goals and degree requirements.

**Total credits for courses in the major = 57**

---

### Educational Objectives

The music therapy program is designed to address three primary objectives:

- **Comprehensive musicianship**: through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.

- **Knowledge of human behavior**: by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.

### Knowledge of Music Therapy

Students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context. Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through five semesters of clinical practica in addition to a six-month, full-time clinical internship. Internship applications must include a written letter of recommendation from music therapy faculty member.

### The Music Therapy Equivalency Program

The equivalency program is designed for the individual who has already completed a bachelor’s degree in a related discipline, including the following courses:

- Music Theory I, II, III and IV; Music History I and II; Conducting, Arranging, Applied Lessons (6 semesters), Performing Ensembles (8 semesters), Piano Competency (4 semesters of either lessons or group piano) and Introduction to Psychology.

Beyond these courses, the program consists of 50 credit hours that can be completed in two years, followed by a six-month clinical internship. All internship applications must include a written letter of recommendation from a music therapy faculty member. Please contact the Music Therapy Program Director for a listing of the 50 credit hours.

If any of the prerequisite courses have not yet been completed, they can be taken at the University of Miami. Taking these additional courses, however, may lengthen the amount of time required to complete the equivalency program. In certain situations, alternate courses from other universities can substitute for the required courses. Depending on the nature of the course, this decision will be made by the undergraduate dean, in consultation with the Music Therapy Program Director.

In order to determine exactly how many credits are required to complete the equivalency program, the student should obtain official transcripts for their previous degree and meet with the music therapy program director. Following completion of the course and internship, students are then eligible to sit for the music therapy board certification exam and can become professional members of the American Music Therapy Association (AMTA). For students wishing to pursue graduate studies...
in music therapy, the equivalency program can be combined with the master's degree in music therapy.

### Advanced Writing and Communication Skills

#### Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Therapy students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MED 363 Senior Practicum, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 551 Music Therapy Research Methods, which will include discipline specific communication skills.

#### Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

### Music Engineering Technology (MUE)

#### B.S. Music Engineering Technology with Required Minor in Electrical Engineering or Computer Engineering

#### Music Engineering Technology

##### Introduction

The mission of the Music Engineering Technology program is to:

1. Provide the highest quality education in the field of music engineering.
2. Promote advancements in the fidelity and creativity of music recording, production and reproduction.
3. Promote advancements in the invention, design and implementation of audio hardware and software.

The goals of the Music Engineering Technology program are to:

1. Further enhance the program's national and international stature.
2. Obtain teaching infrastructure and resources needed to provide contemporary education in the field of music engineering technology.
3. Ensure that curricular offerings are current and able to educate students in new and future theory and practice.
4. To help graduates find professional career positions.

##### Educational Objectives

- Understanding the theoretical basis of sound recording, processing and reproduction.
- Designing and implementing original audio hardware and/or software.
- Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

The Music Engineering Technology curriculum is designed for musicians interested in pursuing a career in music recording, audio hardware and software design, and related professions in the audio, audio-video, multimedia, and internet industries. The program is interdisciplinary in nature; it includes courses in music, music engineering, computer science, electrical engineering, and mathematics. This program includes a minor in Electrical Engineering or a double major in Computer Science. Freshman students are expected to enroll in calculus, which carries a prerequisite of Trigonometry and Analytical Geometry. Prospective students are expected to have a strong background in music performance and in mathematics.

#### Advanced Writing and Communication Skills

##### Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Engineering students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 410 Music Engineering Capstone Project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MMI 401 Audio Electronics, which will include discipline specific communication skills.

##### Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

ECE 201  Electrical Circuit Theory  3
ECE 204  Electrical Circuits Laboratory  1
ECE 218  Data Structures  3
ECE 304  Logic Design  3
EMC core courses require a grade of "C" or higher.

1. EMC core courses require a grade of "C" or higher.
   - The electrical engineering minor requires ECE 306.
   - The computer engineering minor requires ECE 318 or ECE 322.

A dual minor in electrical engineering and computer engineering requires ECE 306 and ECE 318 or ECE 322.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 410 Music Engineering Capstone Project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MMI 401 Audio Electronics, which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Music Theory Comp. (MTC) & Media Writing & Prod. (MWP)

Dept. Code: MTC

The Department of Music Theory-Composition includes two programs,

- Music Theory-Composition (MTC) and
- Media Writing and Production (MWP).

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Theory and Composition students will successfully complete:

1. a required musicology course, which will include substantial evaluated and revised writing components. MTC take MCY 341 Music of the Medieval, Renaissance, and Baroque Periods. MWP take MCY 141 Musical Trends and Traditions.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Majors

Majors in Music Theory-Composition

- B.M. in Music Theory and Composition (p. 324)
- B.M. in Media Writing and Production (p. 323)

Minors

Minor in Music Theory-Composition

- Music Composition (p. 325)

Plan of Study

If a discrepancy exists between the Academic Bulletin course list and the Plan of Study, the Academic Bulletin course list takes precedence.

**B.M. in Media Writing and Production**

The Commercial Music & Production degree program is designed to prepare undergraduate students for the many issues facing today's commercial music writers and producers. In this specialized program, successful students complete diverse compositional assignments, develop technical and practical skills in the recording studio, and acquire an understanding of the music industry. Prospective students should furnish evidence of outstanding compositional ability as well as basic sequencing and music notation skills.

Please see below for additional goals and degree requirements.

1. EMC core courses require a grade of "C" or higher.

---

**Advanced Writing and Communication Skills Courses**

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in
evaluated and revised writing, speaking, stage presence, and audience engagement.

All Media Writing and Production students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 Analysis and Experience, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Music Theory and Composition

Introduction

The Bachelor of Music in Composition is designed to:

1. Provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition, production, and performance.
2. To provide student access varied composition communities.
3. To continue to build upon the Frost School of Music’s reputation as an innovative, forward-thinking, and first-rate center for advanced study.
4. To maintain the highest educational, professional, and ethical standards.

Goals of the program are:

1. To provide students with training to be fluent in basic compositional skills.
2. To help students understand various directions that available to composers in the 21st century.
3. To help students perform, produce, or realize their music.

The curriculum in Composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Theory or Composition. Prospective students are expected to furnish evidence of compositional ability.

Please see below for additional goals and degree requirements.

Total credits for courses in the major = 52

1 EMC core courses require a grade of “C” or higher.

Educational Objectives

- Students develop basic compositional skills of varying lengths and genres.
- Students compose or produce works utilizing various compositional techniques and styles.
- Students compose works for varied instrumentation and/or media.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Theory and Composition students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 Analysis and Experience which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Minor in Music Composition

A minor in music composition is primarily intended for students in the Frost School of Music who are pursuing majors in other fields within the Frost School. Students interested in this minor are required to submit a portfolio to the chairman of the department for approval before declaring the minor. The minor consists of 15 credit hours.

Studio Music and Jazz (MSJI) & (MSJV)

Dept. Code: MSJ

The Department of Studio Music and Jazz includes two programs, instrumental and vocal.

Introduction

The mission of the Studio Music and Jazz Performance Program is to:

- Prepare jazz instrumentalists to enter the music profession or graduate school.
- Identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career.
- Foster faculty creativity and performance which serves as a role model for students.
- Develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities.
- Produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast.
- Provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Educational Objectives

- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Music and Jazz students will successfully complete:
1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MSJ XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MSJ 371 Jazz Improvisation I, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Majors

Majors in Studio Music and Jazz
- B.M. in Studio Music and Jazz Instrumental (p. 329)
- B.M. in Studio Music and Jazz Voice (p. 330)

Minors

Minor in Studio Music and Jazz
- Studio Music and Jazz Instrumental (Music Majors Only) (p. 331)

Plan of Study

*If a discrepancy exists between the Academic Bulletin course list and the Plan of Study, the Academic Bulletin course list takes precedence.*

**Courses in the MSJI Major**

**B.M. in Studio Music and Jazz Instrumental**

The instrumental curriculum in Studio Music and Jazz is designed for interested and qualified students who desire to continue to develop to the highest degree their background and skills in the performance of studio music and jazz. Admission to this major pre-supposes musical training in jazz on the principal instrument.

Please see below for additional goals and degree requirements.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Instrumental students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MSJ XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MSJ 371 Jazz Improvisation I, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Studio Music and Jazz Voice

The vocal curriculum in Studio Music and Jazz is designed for interested and qualified vocalists who desire to continue to develop to the highest degree their backgrounds and skills in the performance of studio music (recording), jazz, and contemporary pop music. Admission to this major presupposes music training in jazz.

Please see below for additional goals and degree requirements.

1 EMC core courses require a grade of "C" or higher.

**Advanced Writing and Communication Skills**

**Courses**

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Vocal students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MSJ VO3 Private Lesson Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MSJ 371 Jazz Improvisation I, which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Minor in Studio Music and Jazz Instrumental (Music Majors Only)**

A 12 credit hour minor is available for students enrolled in the Frost School of Music whose principal performance medium is a jazz instrument. Permission of the studio teacher is required. The following courses must be taken to fulfill the requirement of this minor:

<table>

**The Bruce Hornsby Creative American Music Program**

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a Minor in Creative American Music. A minor in Creative American Music requires 17 credit hours.

**The Contemporary Performance Principal**

The Contemporary Performance Principal accommodates talented songwriters, singers, and instrumentalists who are not classical or jazz musicians. Contemporary instruments include Guitar (Electric and Acoustic), Voice, Electric Bass, Keyboard, Media (Alternate Controllers/ Electronic Producers), Strings (Fiddle, Electric Violin, etc.) and Percussion (incl. Drums). Songwriters will also apply to the Creative American Music Program. The Contemporary Performance Principal is available to students in the following majors: Music Business and Entertainment Industries, Music Engineering Technology, Media Writing and Production, Music Education, Music Theory/Composition, Music Therapy, and the Bachelor of Arts in Music. Pre-screening and audition are required.

**Majors**

**Major in the Bruce Hornsby Creative American Music Program**

- B.M. in Music Business Entertainment Industries with Minor in Creative American Music & Business, Communications, or Entertainment (p. 335)

**Minors**

**Minor in the Bruce Hornsby Creative American Music Program**

- Creative American Music (p. 336)

**Plan of Study**

If a discrepancy exists between the Academic Bulletin course list and the Plan of Study, the Academic Bulletin course list take precedence.

**Music Business & Entertainment Industries w/ Creative American Music Minor (CAM)-Plan of Study**

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Vocal Performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods which will include substantial evaluated and revised writing components.
2. MVP VO3 Private Lesson (Level 3) Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MVP 538 Vocal Pedagogy, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Experiential Music Curriculum Core Courses

The EMC Core courses are common to all Frost School of Music students regardless of degree program. The EMC core courses empower students to become internal musicians as they develop deep knowledge in music and a high level of musical skills. As a community of musicians, all students interact with their peers whose diverse interest strengthen their music making abilities.

Additional courses for Principal Instrument Lesson & Studio Class and Ensembles may be required for the major.
All EMC core courses must be successfully completed with a grade of "C" or higher.

**Advanced Writing and Communication Skills**

**Courses**

All students are required to successfully complete 3 Advanced Communications and Writing courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. a required musicology course, which will include substantial evaluated and revised writing components.
2. a Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. one required course in their major which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Areas of Knowledge**

**Arts and Humanities Cognates**

All Frost School of Music students satisfy the Arts and Humanities cognate upon successful completion of the BM, BS, or BA music degree requirements.

**People and Society Cognates**

Students enrolled in the following degree programs: MIP, MKP, MVP, MSJI, MSJV, MTC, MWP, and MUE must complete a People and Society cognate. For the current listing of cognates, visit http://www.miami.edu/cognates.

The following degree programs satisfy the People and Society cognate upon successful completion of the required minor:

- MED Music Education required minor in Education
- MTY Music Therapy required minor in Psychology
- MBEI Music Business and Entertainment Industries required minor in Business, Communications or Entertainment, if the minor is designated as People and Society
• MUS Bachelor of Arts in Music required minor outside of music **may** fulfill this requirement if the minor is in the People and Society area of knowledge.

• A minor in Music Business and Entertainment Industries satisfies the People and Society cognate.

Science, Technology, Engineering, and Math (STEM) Cognate

Students enrolled in the following degree programs: MIP, MKP, MVP, MSJI, MSJV, MED, MTY, MTC, MWP, and MBEI must complete a STEM cognate. For the current listing of cognates, visit [http://www.miami.edu/cognates](http://www.miami.edu/cognates).

The following degree programs satisfy the STEM cognate upon successful completion of the required minor:

• MUE Music Engineering required minor in Electrical Engineering or Computer Engineering
• MBEI Music Business and Entertainment Industries required minor in Business, Communications or Entertainment, if the minor is designated as STEM
• MUS Bachelor of Arts in Music required minor outside of music **may** fulfill this requirement if the minor is in the STEM area of knowledge

Minors

Music Minor

(Audition Required)

Any student wishing to declare a minor in music must audition on an instrument and be approved by the Frost School of Music as a minor. The approval form is available at [http://www.miami.edu/frost/index.php/frost/students/](http://www.miami.edu/frost/index.php/frost/students/) or in the Undergraduate Dean's Office. A fee is assessed for private instruction. The fee is currently $300 per semester and must be paid prior to enrolling. Please note that private lessons may not be available on all instruments. Studio space varies from year to year. A music minor requires 15 credit hours, 12 of which must be earned at the University of Miami.

Minor in Creative American Music (CAM)

(Audition Required, Music majors only)

The Bruce Hornsby Creative American Music Program

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a minor in Creative American Music. A minor in Creative American Music requires 17 credit hours.

Minor in Music Composition

(Audition Required, Music majors only)

A minor in music composition is intended for students in the Frost School of Music who are pursuing majors in other fields within the Frost School. The curriculum in composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Theory or Composition. Students interested in this minor are required to submit a compositional portfolio to the chairman of the department for approval before declaring the minor. A minor in music composition requires 15 credit hours.

### Minor in Studio Music and Jazz Instrument
(Audition Required, Music majors only)

A minor in Studio Music and Jazz Instrumental is available for students enrolled in the Frost School of Music whose principal performance medium is a jazz instrument. Permission of the studio teacher is required. A minor in Studio Music and Jazz Instrumental requires 12 credit hours.

### Minor in Dance
(Audition Required)

There is no undergraduate degree for dance.

A minor in dance is intended for students interested in developing their performance and choreographic skills as well as basics for teaching K-12. Prospective students interested in this minor are required to audition for acceptance as well as maintain a grade point average of 3.0 in dance courses. Dance courses are open to all university students with the approval of their advisor. A minor in Dance requires 15 credit hours.

Nursing and Health Studies

http://www.miami.edu/nur

Please consult your 2015 - 2016 Undergraduate Student Handbooks and the School of Nursing and Health Studies website for the applicable curriculum and program policies. Please note that courses and policies are subject to change throughout the academic year. Check with an advisor in the Office of Student Services at the School of Nursing and Health Studies for current information.

The School of Nursing and Health Studies is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are also available for students to study and earn course credit hours in a variety of international settings.

Mission

The mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

Student Responsibilities

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. The student is responsible to comply with all the provisions of the Bulletin. Changes to academic requirements and policies are updated in the School of Nursing and Health Studies Undergraduate Handbooks and website.

The general requirements for graduation from the University of Miami are further described in the General University Information (p. 13) section of the Bulletin.

Students with Disability Accommodation Policy

The policy of the University of Miami School of Nursing and Health Studies is to adhere to Standards of the Americans with Disabilities Act. Any student needing special accommodations should go to the Office of Disability Services (ODS). This office is the primary source responsible for the coordination of services for students with disabilities. The student is responsible for adhering to the Office of Disability Services requirements.

Financial Assistance

Students interested in obtaining financial aid in the form of student loans and grants should contact the Office of Financial Assistance Services. Limited, small scholarships are available through the School of Nursing and Health Studies. The qualifications for these scholarships vary; further information is available from the Office of Financial Assistance Services, and on the SONHS website (www.miami.edu/sonhs (http://www.miami.edu/nursing)).

Facilities

The School of Nursing and Health Studies is located on the Coral Gables Campus. The four-story Jerusalem-stone and stucco Schwartz Nursing Center features classrooms and clinical practice labs, conference rooms, one computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000-square-foot facility supports the work of more than 40 nurse scientists and clinical educators and our approximately 850 undergraduate and graduate students enrolled in the school's nursing and health science studies programs annually. The building opened in fall 2006. Library resources for nursing students are at the Otto G. Richter Library on the Coral Gables Campus and the Calder Medical Library on the Medical Center Campus. Clinical experiences are offered in a variety of hospitals and health related agencies in the community.

Foote Fellows

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Health Science

Health Science

Please consult your 2015-2016 Student Handbook for the applicable curriculum and program policies. Please note that courses and policies are subject to change throughout the academic year. Check with the Office of Student Services at the School of Nursing and Health Studies for current materials.

The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields. Pre-professional tracks include:

• Pre-physical Therapy,
• Pre-pharmacy,
• Health Science/Health Management and Policy, and
• Health Science General.

Academic Policies

Admission
In accepting students into the Health Science program, the University does not in any way assure admittance into any professional graduate programs. Admission to any of these programs is dependent upon academic performance in the undergraduate course-work and is determined independently by the school or program to which the student applies.

Entering freshmen in the 75th percentile have mid-range SAT and ACT scores of 1410 and/or 32 respectively. Entering freshmen have an average weighted GPA of 4.2. Transfer students have a mean cumulative GPA of 3.33.

Requirements for Admitted Students
Required courses for the Health Science degree include courses in biology, chemistry, physics and mathematics, (where required by the track) and health science with a minimum grade of C- in each course. Students must satisfy both the general education requirements listed below and the requirements of a specific track, to be awarded the Bachelor of Science in Health Science degree. Students must maintain at least a 2.8 GPA in the courses listed under the track requirements with no grade below a C-.

Academic Programs
The School of Nursing and Health Studies will award a Bachelor of Science in Health Science once a student has completed the requirements listed below.

The Health Science Program offers curricula that are designed to prepare students for health professional or graduate education programs. Programs of study can be tailored for students wishing a variety of health professional options. Students are encouraged to contact graduate programs directly to ascertain if there are specific course requirements that might differ from health science track requirements. Any course requirements may be added to a student’s undergraduate curriculum track.

No minor or second major is offered in Health Science. Health Science students may not minor in biology.

General Education Requirements

Areas of Proficiency
The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition
Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively. Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour for, ENG 105.

Students will be able to:
• Gather information, synthesize data, compare various points of view, and present results in writing.
• Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
• Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

Advanced Writing and Communication Skills: Health Studies

Pertinent Educational Outcomes:
1. Effectively communicate information related to public health in both speech and in writing, using appropriate information sources, presentation formats, and technologies.
2. Demonstrate the necessary written and verbal communication skills to effectively carry out a career in healthcare.

</tbody>
</table>

Assessment Measures
• Student performance on written assignments and presentations:

In order to graduate from the Health Sciences program students must successfully pass two courses in English Composition (English 105 & 106) as well as 5 writing intensive courses with a grade greater than or equal to 70%. The majority of required courses for the B.S. in Public Health program include written assignments and student presentations as part of the course grade. Grading of student written assignments and oral presentations are based on defined rubrics. A number of elective courses in the health studies curriculum also require students to submit
significant written assignments and give oral presentations throughout the semester. Throughout the Health Studies curriculum student musts demonstrate their ability to write and communicate accurately and with clarity in order to successful complete their courses.

- Graduating Senior Survey responses for questions related to written and verbal communication:

<table>

</tbody>
</table>

- Based on the results from the GSS (2010–2014) students believe their undergraduate coursework in the Health Studies significantly enhanced their written, oral and formal presentation skills which in turn allowed them to more effectively interact with various individuals and groups.

Mathematics/Statistics/Computer science

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems.

The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by completing an approved course in statistics, calculus 1, and a CSC or CIS course. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or a placement examination administered by the Department of Mathematics.

Students will be able to:

- Select quantitative tools appropriate for solving problems.
- Use quantitative tools appropriate for solving problems.
- Interpret quantitative data in an appropriate manner for solving problems.

Areas of Knowledge

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Cognates:

Students fulfill the Areas of Knowledge requirement by completing three cognates, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

A cognate is a group of at least three courses for at least nine credits, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate.1 While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students’ transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate’s RAU.

[1] (p. ) The University’s cognate approval process ensures that all Arts & Humanities cognates require students to complete at least one course that goes beyond skill development, i.e., beyond the basic composition, oral communication, and introductory foreign language courses.

Arts & Humanities (9 credits)

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students
to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
- Understand the creation and performance of art.

**People & Society (9 credits)**

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

**Science, Technology, Engineering & Mathematics (stem) Fulfilled by BSHS Degree**

Science, Technology, Engineering & Mathematics cognates develop students' abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.

The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates, by application to the cognate’s RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit hour, can be used in cognates.

3 credit hours of electives in biology or health science above 100 level

- HCS 216 Principles of Systemic Physiology Laboratory (also recommended)
- PSY 230 Child And Adolescent Development
- or PSY 240 Abnormal Psychology

A minor in a discipline accepted by the School of Nursing and Health Studies

Nursing

Nursing Accreditation

The nursing baccalaureate program is approved by the Florida Board of Nursing and accredited by the:

Commission of Collegiate Nursing Education (CCNE)
One DuPont Circle NW, Suite 530
Washington, DC 20036
202-887-6791

The University of Miami School of Nursing and Health Studies (SONHS) offers courses leading to the degrees of:

- Bachelor of Science in Nursing (BSN),
- Master of Science in Nursing (MSN),
- Doctor of Nursing Practice (DNP) and
- Doctor of Philosophy (PhD).

Baccalaureate education is the primary foundation for professional nursing, as well as for graduate education; students who successfully complete the baccalaureate program are eligible to apply for the licensure examination to practice professional nursing. Graduates of diploma and Associate's nursing degree programs may apply as transfer students to obtain the BSN degree. Students holding a baccalaureate degree in a field other than nursing who would like to pursue the BSN may apply to the Accelerated Option BSN Program.

Academic Policies

Admission

Admission as a freshman or sophomore to the BSN Program is open to applicants who have met the requirements for admission to the University of Miami. Requests for admission should be directed to the Office of Admissions on the Coral Gables Campus.

Transfer students to the Traditional BSN Program, from accredited universities, colleges, or junior colleges may be admitted with advanced standing as space allows provided they have completed courses comparable to those required by the University of Miami. Transfer students are advised to contact the Office of Student Services at the School of Nursing and Health Studies concerning prerequisites.

Transfer students to the Accelerated Option Program must have a Baccalaureate degree from an accredited university or college and must have met all the nursing prerequisites required by the University of Miami. Students are recommended to contact an advisor in the Office of Student Services at the School of Nursing and Health Studies.

An RN transition option is offered to RN's with an Associate's degree or diploma to earn the BSN. Academic transcripts are evaluated to determine if the 60 credits of transferable course work, including prerequisites have been successfully completed.

Technical Standards

Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the University of Miami School of Nursing and Health Studies at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

- Observation
- Communication
- Motor
- Conceptual-Integrative
- Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment.

Observation

The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.
Communication
Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

Motor
Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

Conceptual-Integrative
These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral-Social
Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant’s ability to complete all components of the program.

**Requirements for Enrollment into Upper Division and Clinical Courses**

- Traditional BSN students at the University of Miami of Miami must achieve junior standing with a minimum UM GPA of 3.0 and a UM prerequisite GPA of 2.75.
- Transfer students must have a minimum cumulative GPA of 3.5 and a prerequisite GPA of 3.3.
- Accelerated Option BSN students must have a minimum GPA of 3.0 with a 3.0 for prerequisite courses.
- To be considered for progression or admission to clinical coursework, students are allowed to repeat only 1 failed prerequisite course. Failure of a second course, regardless of a passing retake on the first failed course disqualifies the student for progression or admission to the clinical course work.
- Students are required to have a health examination prior to enrollment in clinical nursing courses. All students must provide evidence of a current TB screening test, hepatitis B, MMR, tetanus, varicella and influenza vaccinations, and certification in Basic Life Support. Students must submit to drug screening and background checks. See the School of Nursing and Health Studies 2015-16 Student Handbooks for further information.

NUR 306  Principles of Nutrition  3
NUR 317  Theories in Growth and Development  3
FL RN License

Total Credit Hours  34

**Academic Progress**

To be assured of uninterrupted progression through the BSN program, students must maintain a grade point average of 2.0 or better.

Student records are reviewed at the close of each semester, and those students with a cumulative average of less than 2.0 are subject to being placed on academic probation according to the University of Miami Policy on Academic Probation and Dismissal. A grade of C- is not a passing grade in any nursing course within the BSN program.

When a clinical nursing course is repeated, both theoretical and clinical components must be repeated. When a course must be repeated, progression in the nursing program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the BSN program. Students are required to fulfill the requirements that are in effect at the time of the current program. No special courses will be created for students who are repeating the same course.

Failure of two nursing courses with a grade of C- or below or failure of the same nursing course twice with a grade of C- or below constitutes failure of two nursing courses and the student will be dismissed from the program. A student who fails only one nursing course, retakes the failed nursing course and receives a passing grade on the second attempt at a failed nursing course, may progress through the program but the original failure is still counted as a failed course. If the student should fail another nursing course later in the program of study, then the student will not be allowed to retake the second failed course and the student will be dismissed from the program.

**Registered Nurse Licensure**

Graduates of the BSN program are eligible to apply for the National Council Licensure Examination (NCLEX-RN) for registered nursing after a student passes all the courses, completes the credit hours, and completes the requirements for the RN Exit HESI exam.

**Requirements for Graduation**

**Traditional BSN**

**General Education Requirements Philosophy**

The University of Miami's General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged in a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methodologies and achieve in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

**Areas of Proficiency**

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

**English Composition**

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively. Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

**Advanced Writing and Communication Skill Requirements**

**Summary of Communication Skills Required of Students in the Bachelor of Science in Nursing (BSN) Program**

Students must communicate effectively using English in clinical and classroom settings. A student must be able to elicit information from patients, describe changes in mood, activity, and posture, and perceive nonverbal communications. A student must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes. Throughout the curriculum students are expected to achieve skills in the following communication domains:

**Therapeutic Communication**

Therapeutic communication between the nurse and patient is a cornerstone of effective nursing care. This communication style is goal-oriented and focused on learning and promoting growth. Example content: principles of therapeutic use of self; therapeutic communication techniques; health education/teaching; reflective journals.
Technical Communication
Technical communication encompasses the specific methods used by the nursing profession to communicate information necessary for nursing practice.

Example content: use of clinical information systems (e.g., electronic health record, physician order entry); application of standardized health care terminology; use of data and data systems

Inter-and Intra-Professional Communication
Effective communication among all members of the healthcare team is essential for delivering high quality, safe patient care.

Example content: teamwork/cooperative learning; scopes of practice; conflict resolution; group dynamics and evaluation.

Scholarly Written Communication
Scholarly writing is a formal means of communication in which the writer communicates synthesized knowledge about a topic while also demonstrating original thought and unique perspectives.

Example content: scholarly papers; research critiques; application of APA publication style.

Scholarly Verbal Communication
Scholarly verbal communication is a formal way of speaking with the intended audience to provide and/or elicit information in a systematic manner. Primary methods of scholarly verbal communication involve verbal presentations/lectures and formal data gathering processes such as interviews.

Example content: scholarly presentations; key informant interviews

Minimal Writing Proficiency Standards
Writing proficiency is evaluated throughout the BSN program plan of study. Three primary categories of writing are required:

1. scholarly papers (NUR 400/NUR 401, NUR 440, NUR 453);
2. patient care documentation (NUR 304, NUR 308, NUR 318, NUR 320, NUR 411, NUR 448, NUR 453); and
3. reflective journals (NUR 306, NUR 453). Each writing component is evaluated as part of the grading rubric for the associated course, with feedback and revisions required.

Plan for Assessment of the BSN Program Advanced Writing and Communication Skills Requirement
Content to meet the required communication skills and minimal writing proficiency standards is provided across the curriculum. The table below outlines the specific communication domains and content covered in each course as well as assessment/outcome criteria for each. In addition to demonstrating skills across these five communication domains, students are also required to complete ENG 105 and ENG 106 (or equivalent) as prerequisite course to provide the foundation for the development of more advanced writing and communication skills.

*Bold course numbers are courses in the accelerated BSN plan of study

Author Comment: Table with specific communication domains and content should go here (needs to be created by courseleaf)
In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems. The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by completing a statistics course beyond MTH101.

Students will be able to:

- Select quantitative tools appropriate for solving problems.
- Use quantitative tools appropriate for solving problems.
- Interpret quantitative data in an appropriate manner for solving problems.

SOCIAL SCIENCE

- Introduction to Psychology (PSY 110)
- A Social Science Course

AREAS OF KNOWLEDGE

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

COGNATES

Students fulfill the Areas of Knowledge requirement by completing three cognates, one from each of the three areas of the university curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a group of at least three courses for at least nine credits, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate (1). While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students’ transcripts, thus certifying their depth of knowledge in those areas.
The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate’s RAU.

**Arts & Humanities**
Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.

**People & Society**
People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

**Science, Technology, Engineering & Mathematics (Fulfilled Through BSN Degree)**
Science, Technology, Engineering & Mathematics cognates develop students’ abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.
- The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates, by application to the cognate’s RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit, can be used in cognates.

1 The University’s cognate approval process ensures that all Arts & Humanities cognates require students to complete at least one course that goes beyond skill development, i.e., beyond the basic composition, oral communication, and introductory foreign language courses.

**Traditional BSN**

**BSN Traditional Program of Study - Lower Division Nursing Major**

These are intended as examples only. Students have several options for completing the first two years of study. The Office of Student Services will assist students to select specific courses which most accurately reflect the student's interests, abilities, and career goals. Students must complete all prerequisites prior to entering the junior year of clinical coursework.

Public Health

The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Public Health. Baccalaureate education provides the foundation for further education in Public Health and/or other specialized health professional fields.

Academic Policies

Admission

Entering freshmen in the 75th percentile have mid-range SAT and ACT scores of 1410 and/or 32 respectively. Entering freshmen have an average weighted GPA of 4.2. Transfer students have a mean cumulative GPA of 3.3.

Requirements for Admitted Students

The course work for the BSPH Program is based on recommendations made by the Association for Prevention Teaching and Research (2008)
for undergraduate course work in Public Health. Students are required to complete:

- 33 credit hours of Public Health coursework, including:
- 27 credit hours of core required courses and
- 6 credit hours of approved Public Health electives.

**Academic Programs**

The School of Nursing and Health Studies will award a Bachelor of Science in Public Health, once a student has completed the requirements listed below.

The Public Health Program offers curricula that are designed to prepare students for public health practice or graduate education in health related fields. Programs of study can be tailored for students wishing to combine Public Health education with a variety of other health related fields (e.g., pre-med, pre-physical therapy).

No minor is required within the Public Health program. However, students have room within their plan of study to pursue a minor if desired.

**General Education Requirements**

**Philosophy**

The University of Miami’s General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

**Areas of Proficiency**

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

**English Composition**

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

**Mathematics/Statistics/Computer Science:**

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems. The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by completing an approved course in statistics. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or a placement examination administered by the Department of Mathematics.

Students will be able to:

- Select quantitative tools appropriate for solving problems.
- Use quantitative tools appropriate for solving problems.
- Interpret quantitative data in an appropriate manner for solving problems.

**Social Science**

Introduction to Psychology (PSY 110)

An additional Social Science course

**Areas of Knowledge**

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

**Cognates**

Students fulfill the Areas of Knowledge requirement by completing three cognates, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

A cognate is a group of at least three courses for at least 9 credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate. While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students’ transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and
keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate’s RAU.

1 The University’s cognate approval process ensures that all Arts & Humanities cognates require students to complete at least one course that goes beyond skill development, i.e., beyond the basic composition, oral communication, and introductory foreign language courses.

Arts & Humanities (9 credits)
Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

• Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
• Understand the creation and performance of art.

People & Society (Fulfilled by BSPH Degree)
People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

• Analyze the organization of society.
• Analyze patterns of social change.

Science, Technology, Engineering & Mathematics (STEM - 9 credits)
Science, Technology, Engineering & Mathematics cognates develop students’ abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

• Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
• Interpret quantitative data and draw useful conclusions.

The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates, by application to the cognate’s RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit hour, can be used in cognates.

Bachelor of Science in Public Health (BSPH) to Master of Public Health (MPH)/M.S. in Public Health (MSPH) 4+1 Program
The School of Nursing and Health Studies (SONHS) and the Graduate Programs in Public Health at the University of Miami Miller School of Medicine have developed a Bachelor of Science in Public Health (BSPH) to a Master’s in Public Health (MPH) or M.S. in Public Health (MSPH) 4 + 1 program.

Program Highlights

• Undergraduate students enrolled in the BSPH program in the SONHS who qualify academically may apply to the MPH or MSPH program in the spring of their junior year.
• Accepted students are then able to take 12 credit hours of Master’s level Public Health courses in their senior year. These Master’s level credit hours would count toward their MPH or MSPH degree.
• By completing 3-6 credit hours of Master’s level MPH or MSPH coursework in the summer following completion of their BSPH degree, students could complete their MPH or MSPH degree in only one additional academic year.
• Students accepted to the 4 +1 program will continue to pay undergraduate tuition for the senior year.
• Upon graduation with the BSPH, accepted students will then matriculate into the MPH or MSPH program and complete the remaining 33 credit hours of MPH or MSPH coursework at UM graduate school tuition rates.

Admissions Criteria

• BSPH students must have an overall undergraduate GPA of at least a 3.0 at the time of application to be considered. Accepted students who do not maintain a GPA of 3.0 for the remainder of their undergraduate coursework are subject to re-evaluation.
• GRE scores are not required for University of Miami undergraduates who apply to the 5 year BSPH + MPH program.
• Admissions decisions to the graduate program will be made solely by the admissions committee for the Graduate Programs in Public Health at the Miller School of Medicine.
• BSPH students taking master’s level public health courses in their senior year must obtain a grade of B or better in these courses in order for them to count towards the graduate degree.

Majors

Major in Public Health

• B.S. in Public Health (p. 358)

### Total Credit Hours: 121

### Required Public Health Courses (need: 9X3=27 credits)

- BPH 206 Introduction To Public Health
- BPH 208 Introductory Epidemiology
- BPH 310 Global Health
- BPH 309 Health & Environ.
- BPH 321 Health Promotion And Disease Prevention
- BPH 352 Biological Principles Of Public Health
- BPH 465 Public Health Statistics And Data Management
- BPH 322 Introduction To Health Policy
- BPH 490 Field Practicum In Community Health

### Approved Public Health Electives (need: 2X3=6 credits)

Select two of the following:

- BPH 301 Human Sexuality And Vulnerable Populations
- BPH 303 Hiv/Aids And Health Maintenance For Health Care Providers
- BPH 305 Issues In Health Disparities
- BPH 306 Principles Of Nutrition
- BPH 317 Theories In Growth And Development
- BPH 319 Contemporary Issues In Bioethics For Health Care
- BPH 355 Global Nutrition
- BPH 419 Contemporary Health Issues In South Florida
- BPH 487 Global Health Practicum (Chile, Spain, etc.)
- MGT 270 Introduction To Health Sector Organization And Management
- APY 205 Medicine, Health Care In Society, Medicine, Health Care in Society
Additional Program Requirements

BIL 150 General Biology 5
& BIL 151 and General Biology Laboratory

Select one of the following: 4

CHM 103 Chemistry for Life Sciences I (Lecture)
CHM 111 Principles of Chemistry I

Social Science class

PSY 110 Introduction to Psychology (or equivalent) 3

Total Credit Hours 51

Minor in Health Communication

Minor in Health Communication

A joint minor in Health Communication is offered in conjunction with the School of Communication. The Minor in Health Communication consists of 15 credits:

COS 324 Health Communication 3
BPH 206 Introduction To Public Health 3

Select two Communication Studies Electives 6

COS 325 Communication In Health Organization
COS 426 Patient-Provider Communication
COS 427 Health Behavior And Risk
COS 472 Persuasion

Select one Public Health Elective 3

BPH 305 Issues In Health Disparities
BPH 309 Health & Environ.
BPH 310 Global Health
BPH 317 Theories In Growth And Development
BPH 319 Contemporary Issues In Bioethics For Health Care
BPH 321 Health Promotion And Disease Prevention
BPH 322 Introduction To Health Policy
BPH 352 Biological Principles Of Public Health
BPH 355 Global Nutrition
BPH 419 Contemporary Health Issues In South Florida
BPH 465 Public Health Statistics And Data Management
BPH 487 Global Health Practicum
APY 205 Medicine, Health Care In Society, Medicine, Health Care in Society

Total Credit Hours 15

A grade of C or higher is required in all courses (a grade of C- or lower is not acceptable for minor).

Minimum UM GPA of 2.0 required to declare minor.

For further information, please contact the Office of Student Services at 305-284-4325 or via email at http://www.miami.edu/sonhs/index.php/sonhs/

Minor in Public Health

MINOR IN PUBLIC HEALTH:

The School of Nursing & Health Studies (SONHS) offers a minor in Public Health (12 credits). The Public Health minor consists of two required courses, Introduction to Public Health and Introduction to Epidemiology, and two elective courses chosen from a list of approved Public Health electives (see below):

BPH 206 Introduction To Public Health 3
BPH 208 Introductory Epidemiology 3

Elective Courses (Must complete two from the list below): 6

BPH 301 Human Sexuality And Vulnerable Populations
BPH 303 Hiv/Aids And Health Maintenance For Health Care Providers
GRADUATE ACADEMIC PROGRAMS

Mission
The mission of the Graduate School is to promote graduate education, scholarship, and research; to support individuals, departments, and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the Committee.

Graduate School
http://www.miami.edu/grad

All graduate work (except for the Master’s Degree in Law, J.D. in Law and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various programs in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Admission requirements are described in the Bulletin of the Graduate School, and may be obtained from the individual department or program. Information is also available at www.miami.edu/grad (http://www.miami.edu/grad).

Applications to the Graduate School are processed through the various Schools and Colleges. See http://www.miami.edu/gs/index.php/graduate_school/apply/ for a listing of online applications by program.

Prospective students should note that “graduate study” means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average graduate student is expected to assume the initiative in completing all requirements in the time specified.

To preserve its ideals of scholarship, conduct, and character the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Academic Policies

Time to Completion
Time to completion starts when a student begins any program in the Graduate School, whether it be a master’s or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various master’s degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master’s degree in field, work must be completed within eight years. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director.

Recency/Validation for Over-Aged Credit Hours
Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.

Continuous Enrollment
To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and readmission must be granted. Doctoral students for whom course work is no longer appropriate should consult their program for registration guidance.

Registration
Graduate students can register on the first day of registration and through the registration period. For more information on registration, students should contact their respective School or College. See academic calendar for dates of registration periods at http://www.miami.edu/index.php/registrar/calendar/.

Full-Time Study
The categories of full-time students include:

1. Graduate students taking 18 or more graduate credit hours during the calendar year (9 credit hours in a regular semester or 6 credit hours in a summer semester).
2. Graduate teaching and research assistants taking 16 or more graduate credit hours during the calendar year (8 credit hours in regular semester or 6 credit hours in a summer semester).
3. Graduate students enrolled in any course numbered 800 or above, i.e., any 800-level course required for the completion of the degree.
4. All MBA for Executive and Professional students and Master of Science in Professional Management students are considered full-time.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School.

The maximum number of credit hours allowed for full-time study is 12 for each semester and six for each summer semester. Exception to this policy can only be made by the Dean of the Graduate School or his/her designee and requires a signed recommendation from the Program Director.
For thesis and dissertation students, full-time registration is required during the semester or summer session in which a candidate defends the thesis or dissertation. Students who wish to have this requirement waived must have a written request provided to the Graduate School by the Dean of their respective College or School, or the dean’s designee.

No full-time faculty member may be a full-time student, whether or not working toward a degree. Nor may a full-time student be a full-time faculty member.

No full-time student will be a principal investigator in any grant or contract, whether in name or fact. And no principal investigator will be a full-time student.

Exceptions to these rules may be made in cases in which students are encouraged to apply individually for small research grants that are consistent with and contribute to their field of study and their dissertation work, and, in certain programs, in which students in a terminal degree status are obliged, as a part of their degree program, to teach as de facto faculty members. (Note: Faculty from School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue Doctoral degrees in their home program/school.)

Withdrawals

Withdrawals, either from individual courses or from a graduate program, should be processed through the office of the Dean of the School of the student’s program. Students who wish to officially withdraw from joint or dual degree programs should consult the office of the Dean of the School or College for both disciplines. The date of withdrawal is that on which the student notifies the office of the Dean or the date of receipt of a letter requesting withdrawal. No withdrawal from the University is official until the student has consulted with the Dean of his/her school and has completed the necessary forms.

Students wishing to officially withdraw from the University of Miami must provide the Office of the Registrar notification of their intent to withdraw. Initial notification may be made in person, in writing, by fax, or by telephone. This notification will be recorded and used for notification purposes for the Federal Government. Repayment of any federal funds will be based on the date of notification.

Students must also follow the required process as set forth by their school/college for withdrawing from courses. This process often requires that a signature from a dean or the dean’s representative be obtained on a Change of Course form. In some cases, students can complete the Change of Course form (hard copy or through the CaneLink system) without an approving signature. Change of Course forms must be submitted to the Office of the Registrar for final processing/review.

In addition to the completion of the Change of Course form, students will be asked to complete a Withdrawal Checklist and a Withdrawing Student Survey. The Withdrawal Checklist provides students with a series of offices that need to be notified concerning their withdrawal.

To officially withdraw from the MBA Program or Master of Science in Professional Management program, students must inform the Office of Graduate Business Programs in writing prior to the beginning of a course/term. Tuition will be refunded on a prorated basis based on the number of class meetings attended. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. For further information contact: Office of Graduate Business Programs, 305-284-4643, email: mba@miami.edu.

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below under “Credit Hour for Courses After the 12th Week of the Semester”).

If you receive federal financial aid and withdraw before you complete 60% of the semester, a pro rate calculation will determine the amount of financial aid you have earned. It is based on the amount of time you were enrolled. This calculation is independent of any charges incurred at the university.

Credit Hour for Courses After the 12th Week of the Semester

The following statement of policy was adopted by action of the Academic Deans’ Council April 14, 1967:

1. On recommendation of the Dean of the school, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
2. Credit hour granted for a course under this policy should count toward graduation.
3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefits bills must also clear their withdrawal with the main campus Veterans Affairs Officials in the Office of the Registrar who can be contacted at:

Phone: 305-284-2294 or Email: registrar@miami.edu

Additional Information on Military Withdrawal is available at:

https://www6.miami.edu/registrar/MilitaryWithdrawlInfo.pdf

Leave of Absence

Leave may be obtained by petition of the Program Director followed by the approval of the Dean of the Graduate School. Leave of Absence officially stops the time to completion clock. The Petition for Leave of Absence form may be found at http://www.miami.edu/gs/index.php/graduate_school/forms/.
Grades and Credit Hours

The same letter grades are used for graduate and undergraduate students, but with somewhat different meaning.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent accomplishment</td>
</tr>
<tr>
<td>B</td>
<td>Good accomplishment</td>
</tr>
<tr>
<td>C</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.)</td>
</tr>
<tr>
<td>S</td>
<td>Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum, and internship credit hour. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of “S” to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of “S” reflects that a student is in good academic standing.</td>
</tr>
<tr>
<td>D</td>
<td>Poor (not acceptable for credit hour toward the advanced degree).</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the university. Courses dropped after last date must have approval of Dean of graduate school. Credit hour can be earned only by successful repetition of the course.</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete work in passing status with the instructor’s permission to complete the course. (Not to be used for thesis or dissertation credit hours). The “I” should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student’s primary school or college and the Dean of the Graduate School approve the delay. If the “I” is not changed within one year, credit hour can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if the Academic Dean of the student’s primary school and the Dean of the Graduate School approve the delay).</td>
</tr>
<tr>
<td>IP</td>
<td>Denotes in progress grade given by instructor for any course (600, 700, or 800 level) in which a student has made expected or clearly satisfactory progress during the semester, but has yet to fully complete requirements for the course. “IP” is to be given for 800-level internships, research, thesis, and dissertation courses that have not been completed. Upon satisfaction of all Graduate School requirements, the Assistant Director, Programs of the Graduate School will issue final credit hour for all master’s thesis and doctoral dissertation courses (e.g., 810, 820, 830, 835, 840 and 850). Zero-credit hour courses (e.g., 820 and 850) will be changed to “S.” Please note that all “IP”s must be converted to “S”, letter grade, or “I” at graduation. “IP” will also be converted to “I” upon any departure from the University for a period in excess of one year.</td>
</tr>
<tr>
<td>NG</td>
<td>Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student’s grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student’s graduation.</td>
</tr>
</tbody>
</table>

1 Faculty Senate Legislation #85005(B)

An average of B (3.0) is required for a graduate degree, and no “D” credit hour may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded “D”.

No transferred credit hours are calculated into the University of Miami G.P.A.

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Quality points are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>0.00</td>
</tr>
<tr>
<td>D</td>
<td>0.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols “S”, “W”, and “I” are not counted as credit hour attempted.

Repeat Rule

A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a “C-” or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated.

Registrations which involve repeating a course in which a grade of “A” or “B” has already been earned may not earn quality points or credit hours, nor count as credit hours attempted.

Levels of Graduate Study

Graduate study implies the need for a minimum of formal courses and a maximum of independent work under faculty supervision. Coursework, in itself, is not necessarily a determinant of graduate progress and achievement. The appropriate determinants are the ability of the qualified student to master the various qualifying and comprehensive examinations that a program requires of the student. All work taken by a graduate student in the major area or area of concentration shall be at the graduate level (600 or above). With the permission of the program
of major concentration a student may take elective credit hours (not prerequisite to the major) at any level provided the following limits are observed:

<table>
<thead>
<tr>
<th>Total Graduate Course Credit Hours</th>
<th>Maximum Course Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Below 500 Level</td>
<td></td>
</tr>
<tr>
<td>30</td>
<td>3</td>
</tr>
<tr>
<td>31 or above</td>
<td>6</td>
</tr>
</tbody>
</table>

Approval for undergraduate credit hours as part of the graduate degree program can be made only after a minimum of 12 credit hours is completed. Award may not be made retroactively, nor are credit hours accepted from another institution.

**RA, TA, GA Hourly Guidelines**

To receive a stipend an RA, TA, GA must be a full-time student.

Graduate students with appointments as RAs, TAs or GAs will be expected to work 20 hours per week with the exception of efforts directly required for dissertation research.

International students may work on campus provided the student is maintaining F1 status and does not work more than a total of 20 hours per week (including any off campus work the student may have been authorized to perform) while school is in session. Questions regarding work for international students should be directed to International Student and Scholar Services: http://www.miami.edu/isss.

Graduate students with Assistantships and Fellowships will be classified with the following designations. *(FE) Fellows, *(RA) Research Assistant, *(TA) Teaching Assistant, *(GA) Graduate Assistant, *(TR) Trainee. *Please contact the Graduate School for specific codes.

**Definitions**

**FE (Fellow)**
Responsibilities do not include the provision of direct services to the University and require internal/external fellowship support.

**RA (Research Assistant)**
Responsibilities are mainly conducting research and/or assisting with research projects.

**TA (Teaching Assistant)**
Responsibilities are mainly teaching and/or assisting in the area of teaching.

**GA (Graduate Assistant)**
Responsibilities are mainly in professional support of University operations and programs. Graduate students should not be hired to perform clerical duties.

**TR (Trainee)**
Designated as such by specific federal guidelines which indicate a complex process wherein the trainee takes on an increasingly independent role in the selection, conceptualization, and execution of research projects under the supervision of an experienced mentor.

In definitions where the word “mainly” is used, “mainly” is defined as greater than 50%.

**Requirements for Teaching Assistants**

1. Graduate teaching assistants who are the instructors of record and responsible for assigning grades in a course must have a master’s in the teaching discipline or 18 graduate credit hours in the discipline.
2. Graduate teaching assistants must be directly supervised by a faculty member in the teaching discipline, must attend regular inservice training provided by the Instructional Advancement Center (in coordination with the Graduate School or provided by the specific graduate program), and must be reviewed by the supervising faculty member once a semester.
3. Graduate Teaching Assistants who have previous teaching experience and indication of competency may be exempted from TA Training by the Dean of the Graduate School in consultation with the Graduate Program Director in the discipline. A request for waiver must be submitted to the Dean of the Graduate School by the Graduate Program Director.

**Policy on Outside Employment for RA/TA/GA**

A graduate student must have prior approval from the chair or advisor to work outside the department, since such activities might impede progress toward his/her degree. Any question or concern should be discussed with the Dean of the Graduate School.

1. A graduate student is allowed to supplement his/her stipend by tutoring undergraduate students in courses in which he/she has no direct responsibility at the time.
2. A graduate student who is teaching a class or lab of a multi-section course using a common syllabus and common exams may not tutor any student in any section of that course.
3. A graduate student, like any other member of the teaching faculty, may offer review sessions for his or her students to which he or she may invite students from other sections of the same course. The graduate student arranging such sessions may not under any circumstances take money from the students in attendance.
4. A graduate student may use his or her office for tutoring or may ask departmental permission to use a classroom or other appropriate university facility.
5. The graduate advisor or department chair may require a graduate student to limit his or her outside employment or tutoring activity if, in the view of the department, such activity is impeding the graduate student’s academic progress or keeping him or her from fulfilling responsibilities within the department.
6. International students should clear their work instructions with International Student and Scholar Services. Questions regarding work for international students should be directed to International Student and Scholar Services, 305-284-2928, email: isss@miami.edu or visit: http://www.miami.edu/isss.

**Graduation**

It is the responsibility of the student to apply for graduation through CaneLink during the student’s final semester before the date indicated on the Graduate School calendar and the Schedule of Classes. These dates are published at http://www.miami.edu/index.php/registrar/calendar/. Students who previously applied for a diploma but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students may walk in the graduation ceremony, but the program will indicate “in progress” if information is
For the Graduate School to clear a student for graduation:

- Clearance for Degree Conferral contingent upon the following:

  1. The student must have met the requirements for their program.
  2. The student must have a minimum of 3.00 cumulative grade point average; all students receiving master's degrees must have completed a minimum of 30 credit hours; all Ph.D., D.M.A., and Ed.D. students must have completed a minimum of 60 credit hours.
  3. The student (Ph.D., D.M.A., and Ed.D. candidates) must be admitted to candidacy one semester prior to graduation.
  4. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last semester of study must be paid in full by the beginning of the final semester.
  5. The student must complete an electronic thesis or dissertation (ETD) according to the Graduate School’s requirements and submit all paperwork, online surveys, and agreements (if required) by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the ETD process early in the semester by discussing with their advisors a suitable timetable for completing the defense of their thesis or dissertation. Students should check the academic calendar for the defense deadline date set for the semester they wish to graduate. The Graduate School also encourages students to familiarize themselves with the ETD process at www.miami.edu/etd (http://www.miami.edu/etd) or contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process. (See dissertation section of the Ph.D. description.)

**Clearance for Degree Conferral**

For the Graduate School to clear a student for graduation:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one semester before graduation. The Graduate School does not require application to candidacy for master’s, D.P.T., nor D.N.P. degrees.
3. The student must defend his/her thesis or dissertation no later than two weeks before the last day of class in the semester he/she wishes to graduate.
4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the semester he/she wishes to graduate for their clearance to be processed in time.

**Class Attendance and Absences**

Regular and punctual class attendance is expected of all graduate students. It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.

V.A. students will be provided a grade report at the end of each semester period. A copy of the report will be placed in the student’s permanent file maintained by the Veteran Affairs Office. Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.

**Student Responsibility**

Standards of study and conduct in the Graduate School are set and maintained, not by fiat of the Graduate School, but rather by the faculty who determine the standards. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School devolves responsibility upon the student and the appointed committee. Within this broad responsibility the recommendation for the degree rests with the committee.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various departments in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements at the time specified.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

It is the responsibility of the student to be informed concerning all regulations and procedures required. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that he/she was not informed of it by an advisor or other authority. The student should become familiar with the Bulletin, including:

1. The section presenting the requirements for the degree to be undertaken;
2. The offerings and requirements of the major department;
3. The Graduate Student Honor Code.

After the applicant has been admitted to the Graduate School but before the first registration, the student should consult the school or college and program in which the major work will be done concerning course requirements, deficiencies, if any, the planning of a program or special regulations. Programs may have additional degree requirements that are not listed in this Bulletin. All registrations require the signature of the dean of the school or college (or his/her representative) in which the degree is to be awarded.
Only the Council of the Graduate School may waive requirements stated in this Bulletin.

**Graduate Student Code of Ethics**

Graduate students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the students program and/or the Graduate School through the process described in the Graduate Student Honor Code. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The Honor Code can be reviewed at http://www6.miami.edu/dean-students/pdf/graduate_honorcode.pdf.

**Graduate School Grievance Guidelines**

**Introduction**

These University of Miami Graduate Grievance Procedures provides an opportunity for the resolution of disputes involving graduate students in a fair and collegial manner. These Graduate Student Grievance Procedures supersede all prior such procedures in effect or formerly utilized at the graduate level. They do not supplant UM Students Rights & Responsibilities or any other published policy or procedure relating to graduate students.

**Purview of the Guidelines**

The formal grievance process described herein is intended for cases not involving grades or matters covered by the Honor Code, which have not been resolved at the department or program level, and it is available only after a final determination within the relevant School or College has been reached. Students are encouraged to seek assistance from the University Ombudsperson for possible resolution before initiating the formal graduate grievance process. The procedures set forth here are applicable to any of the following types of grievances by graduate students who are enrolled in any graduate program at the University of Miami, except exclusively in the MD and JD programs:

1. grievances alleging improper dismissal or suspension from a graduate program;
2. grievances alleging the improper withholding or termination of financial support of any kind;
3. grievances alleging any other improper treatment, either substantive or procedural, of a graduate student by a faculty member, department or program, or university agency or administrator except:
   a. allegations of improper evaluation of the quality and/or quantity of academic work (see UM Student Rights & Responsibilities);
   b. allegations of unfair recommendation for employment or further graduate study;
4. c. allegations of discriminatory treatment arising from the student complainant’s age, race, gender, sexual preference, handicap, national origin, or religion. (Such allegations ordinarily are handled by the Office of Equality Administration).

**Constitution of the Committee and Grievance Panel**

The Graduate Council Grievance Committee (GCGC) is a standing committee comprised of the Schools’ and Colleges’ alternate representatives to the Graduate Council. Grievances as understood herein shall be heard by ad hoc appeals panels, constituted from time to time by the Dean of the Graduate School to review individual graduate grievances. The grievance review panel (GRP) shall consist of five disinterested members: four faculty members of the GCGC and one graduate student appointed by the executive board of the Graduate Students’ Association. Notice of the constitution of the GRP shall be given by the Office of the Graduate Dean in writing to all parties to the grievance within ten (10) days after the grievance review request is properly filed.

Any party to the grievance may challenge the disinterestedness of a GRP member in writing to the Dean of the Graduate School within five (5) days after notification of the appointment. The challenge must specify reasons that would prevent the committee member or graduate student from making an unbiased recommendation with respect to the grievance. If such a challenge is determined to be valid by the Graduate Dean, a substitute appointment shall be made and the process will resume accordingly.

**Procedure and Time Limits for Filing a Grievance**

After a final determination has been made in the relevant School or College (or by the head of the relevant administrative office in the event of a grievance against a university agency), a student who believes he or she has grounds for appeal within the purview of these guidelines may file a written grievance review request with the Office of the Dean of the Graduate School. The request shall describe the student’s allegations in a clear and concise fashion and shall clearly identify the individual(s), program(s), department, School or College, and/or University agency or administrator against whom the grievance is brought. The student’s written grievance review request shall be filed within thirty (30) days of the final determination. No grievance review request or any other appeal of any kind will be granted after this time limit has expired unless a written extension of time is granted by the Dean of the Graduate School based on a written request from the grievant stating good cause.

**Definitions and Assumptions**

**Burden of Persuasion**

The burden of persuasion is on the grievant.

**Final Determination**

This grievance process is available only after a final determination within the relevant School or College has been reached. This provision is intended to require the grievant to exhaust the remedies available within the relevant School or College before appealing to the Graduate Dean. In the case of a student in an interdisciplinary program who does not yet have a chair and/or committee assembled, the Dean of the Graduate School shall make a final determination in the student’s case subject thereafter to the appeal contemplated by this policy. Appeal from the Graduate School Dean’s decision follows this same procedure, except
that the GRP shall be constituted by the Office of the Provost from the pool of GCGC members. Written notice of the constitution of the GRP in the case of a student in an interdisciplinary program without a chair or committee, shall be given by the Office of the Provost to all parties to the grievance within ten (10) days after the grievance review request is properly filed. All other deadlines, requirements, procedures, and the hearing format remain the same.

**Originals**

Wherever possible, the party in possession of an original document in support of or rebuttal to or at issue in the grievance shall provide it to the GRP within the time frames set out in the Hearing Materials and Preparation Deadlines. If a party has only a copy of a document not received by him, her, or it, the copy shall serve as an original. Digital documents or email messages in contention shall be printed and may then serve as originals.

**Party**

A party is the student grievant or the individual, program, department, School or College, or University agency or administrator against whom the student brings his or her grievance.

**Time Limits**

All time limits shall be calculated based on working days of the Fall and Spring Semesters, excluding reading and exam periods and University holidays. Grievances originally filed after the end of the Spring semester will be heard at the beginning of the following Fall Semester. Any stated time limit herein may be extended with the written consent of the grievant and the Dean of the Graduate School.

**Written**

Any document to which these guidelines refer as written signifies paper (hard) copy. Email messages and digital or other electronic versions do not meet the requirement that a form or notice be provided in writing. However, a party may transmit a digital version of any written document by email in addition to providing it in paper form.

**Deadlines for Hearing Materials, Preparation, and Witness Identification**

All materials to be considered for review by the members of the GRP must be submitted in writing to the Office of the Dean of the Graduate School at least fourteen (14) days before the scheduled date of the hearing, at which time such materials will be distributed to all parties to the grievance and to the members of the GRP. Thereafter, to the extent that any of the parties wishes to have additional materials considered by the GRP, such materials must be received by the Graduate School no later than seven (7) days before the scheduled date of the hearing, at which time all such additional written materials will be distributed to the parties as well as to the members of the GRP. Any party submitting written materials for consideration shall submit the original(s) and five (5) copies thereof to the Office of the Graduate Dean at his, her, or its own expense.

The name of any witness to be called by any party at the hearing shall be provided in writing to the Office of the Graduate Dean no less than five (5) days before the scheduled date of the hearing.

**Hearing**

The grievance review hearing is chaired by a designated member of the GRP. The hearing is staffed by the non-voting Administrative Assistant of the Dean of the Graduate School, who will record it for archival purposes only. The hearing will proceed as follows:

1. GRP chair’s introduction, summary of issues, and process overview.
2. Student's presentation of issues (15 minutes maximum).
3. University representative’s presentation of issues (15 minutes maximum).
4. Optional: Presentation(s) by witnesses (limited to 3 per side and a maximum of 15 minutes total per side).
5. Questions by members of the GRP.
6. All presenters and witnesses are excused.
7. Deliberation by GRP.

Presentation of the issues should be concise and relevant. Undoubtedly the dispute is somewhat complex or it would not have reached this stage. Points of dispute or ambiguity may be summarized or illustrated by anecdote at the hearing. Experience suggests, however, that the best approach is to minimize formal presentations and allow the GRP members maximum time for questions.

**GRP Decision and Authority**

No additional substantive information may be submitted by any party following the hearing, unless requested by the grievance review panel. The GRP may but need not seek additional information from other sources during its deliberations, which will be conducted in closed session. Following its deliberations, and within ten (10) days of the date of the grievance review hearing, the GRP will make its confidential advisory recommendation to the Dean of the Graduate School [Office of the Provost in the event of a student in an interdisciplinary program who does not yet have a chair or committee]. The subsequent decision by the Dean of the Graduate School [Office of the Provost], which shall be rendered within ten (10) days of the GRP’s recommendation, is final.

Note: The above guidelines pertain only to matters which do not involve representation by an attorney. If an attorney is involved in the grievance, the Office of Legal Counsel at the University should be contacted.

**Modifications**

These procedures may be modified or withdrawn with or without notice.

**Admission**

**Eligibility for Admission**

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score. University of Miami faculty members above the rank of instructor are not eligible to apply for the doctorate at the University of Miami. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical
All applicants must submit recent applicant to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

All those wishing to take courses for graduate credit hour, whether or not they wish to become candidates for a degree, must make application for admission directly to the program of interest prior to registration.

Requirements for Admission Application
1. The completed online application form
2. Official transcripts of all college work, both undergraduate and graduate
3. The official score report of the appropriate entrance examination
4. Letters of recommendation sent directly to the graduate program director of the academic program.
5. Other requirements may be required/requested by individual programs. Contact the specific program to which you are applying for their requirements, or for exemptions from the entrance examination.
6. Application fee of $65.
7. All materials and the fee should be sent directly to the program as indicated on the application.

Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.

Categories of Admission
1. Regular admission with or without specified deficiencies. Under circumstances in which it is difficult to evaluate the academic background of intellectually qualified applicants, they may be admitted with specified deficiencies based on evaluative criteria established and maintained by the school or college. Such status is often appropriate for international students or students with extensive professional experience relevant to the desired discipline. The Graduate School allows only one semester in deficiency status. Graduate Council notification is required for programs requesting deficiency status beyond one semester. For all regular admissions with deficiencies, students must receive a list of documented requirements to remove the deficiency and specific milestones. Students who fail to qualify at the end of that time will be requested to withdraw from the Graduate School.
2. Post Baccalaureate. This category provides an opportunity for graduate study for a. qualified applicants who, for good reason, do not wish to work toward an advanced degree. This would be appropriate for those students who have special objectives for professional study or scholarly work; b. students enrolled in a graduate program elsewhere but desiring to earn graduate credit hour at the University of Miami for the purpose of transferring it to the other institution; c. students already holding the master’s degree or doctorate but who desire additional coursework in their field.

Those admitted to a post-baccalaureate status should realize that their future admission to regular status is improbable unless they achieve the qualifications originally appropriate to admission to those categories. This is to say that the mere accumulation of graduate course credit hours is not sufficient to permit entrance into another graduate category. No more than a total of 12 credit hours may be taken while in post-baccalaureate status. Transient students described in (b) above should have sent to the Graduate School a letter from the Dean of the School indicating the nature of the student’s program they expect to earn a degree, stating that they are in good standing there and have permission to transfer credit hour. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and have permission to transfer credit hour. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and graduate degree (to be sent directly by the issuing institution to the Graduate School).

3. Certification/Professional Goals. This category provides an opportunity for graduate study for qualified teachers or professionals who do not wish to work toward an advanced degree but who for professional reasons need to continue to take graduate courses and have already taken 12 credit hours in Post-Baccalaureate Status. No credit taken in this status can be applied toward a graduate degree at the University. A letter explaining the need for the course work by the student’s employer must accompany the application.
Every applicant for admission can be assured that all credentials will be carefully studied in an effort to select appropriately qualified students. Each application for admission is examined by the members of the faculty responsible for the graduate program. The program informs each applicant of the results.

It is expected that most applicants for admission will be candidates for an advanced degree. Except under unusual circumstances those who already hold an advanced degree are not admitted to candidacy for the same degree. Graduate programs vary as to whether students who do not hold the Master’s degree are required to initiate graduate studies at that level.

Applicants should note the following:

1. M.B.A. applicants should send applications and all documents to:
   The Office of Graduate Business Programs
   School of Business Administration
   P.O. Box 248505
   Coral Gables, FL 33124.
   For further information you may contact mba@miami.edu
2. all other correspondence, applications and documents should be sent directly to the academic department;
3. no action is taken until a file is complete and all documents are available;
4. application files should be complete at least one month before registration, much earlier for some applications, as specified elsewhere in this Bulletin;
5. admission to graduate status does not imply admission to candidacy for a degree;
6. some programs close admissions early because of limited capacity;
7. materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant.

International Students Admissions
All international students who have been admitted to a program of full-time study at the University of Miami need to enter the U.S. on a student visa. To apply for an F-1 visa, you must provide the U.S. Embassy or Consulate with a Form I-20 or DS-2019, passport, statement of funds, and other documents as required by the U.S. Embassy or Consulate. Please visit the International Student and Scholar Services (ISSS) website at www.miami.edu/issss (http://www.miami.edu/issss) for further information regarding visas, travel, pre-arrival information, etc. The Form I-20 or DS-2019 can only be issued after you have been admitted and have submitted proof of adequate financial support for your studies and living expenses. For questions regarding issuance of the Form I-20 or DS-2019, please contact your individual department.

Readmission
Unless a leave of absence has been requested and approved, students who have not been continuously enrolled must request readmission. Contact the appropriate program office well in advance of registration. If additional college work has been completed elsewhere since the last enrollment at the University of Miami, an official transcript of this will be required. Recency of credit hour rules will apply. The application for readmission to the Graduate School may be found at: https://umshare.miami.edu/web/wda/grad/forms_/web/ readmission_to_grad_school.pdf If you are an applicant for readmission and also an international student, please contact the Office of International Admission at issss@miami.edu and 305-284-2928.

Dual Degree and Accelerated Degree Programs
The University offers unique combined degree programs that culminate with students receiving both the undergraduate and graduate degrees concurrently or an accelerated program of study in which they receive an undergraduate degree and then a graduate degree the following year. These programs are intended for exceptional students to acquire both undergraduate and graduate degrees, in five years rather than the 4 plus 2 years (approximately) that is traditionally expected.

Please note: Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Requirements
Students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application. Students should discuss the program and possibility of entering the program with an academic advisor. The program may require application at the time of matriculation to the undergraduate degree or prior to the beginning of final exams in the junior year.

Undergraduate students must take the GRE Examination before the end of their classification as a senior and attain a combined score of more than 297 on the verbal and quantitative portions.

Once admitted into a dual degree or accelerated program:

In their senior year, students may take a maximum of 12 graduate credit hours, with a maximum of 6 credit hours per semester. While in senior status, to register, students must complete and submit the Graduate School’s Application for Undergraduates to Take Graduate Coursework form which is available at www.miami.edu/gs/index.php/ graduate_school/forms/ (http://www.miami.edu/gs/index.php/ graduate_school/forms). This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status. Add/Drop and/or Course Request forms without this approval form will not be processed. Undergraduate students must register for courses with graduate status in the Office of the Registrar. This process cannot be facilitated via online registration.

Financial Implications
Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Students are eligible for undergraduate aid only as long as they are undergraduates. Students enrolled in combined or accelerated degree programs are permitted undergraduate federal and University aid for a maximum of four academic years or to the point at which the number of graduate credit hours in a term exceeds the number of undergraduate credit hours, whichever comes first. During that time frame the student’s undergraduate enrollment status will be determined using only undergraduate level courses in which the student enrolls. Graduate level courses in which the student enrolls during such semesters will not be used to determine the student’s undergraduate enrollment status. Once a
student is registered at the graduate level for financial assistance his/her status is considered graduate for all subsequent semesters.

Once registered as a graduate student, a student cannot revert to undergraduate status.

For further information, contact the Office of Financial Assistance at ofas@miami.edu, call 305-284-5212, or visit the office at Rhodes House (Building 37). Office hours are 8:30 a.m. to 5:00 p.m., Monday through Friday.

Graduation Clearance Requirements

For dual degree programs, the student must apply for undergraduate and graduate graduation at the same time. Degrees from dual degree programs are conferred at the same time.

For accelerated degree programs, the student must apply for undergraduate graduation in one semester, and for graduate graduation in a subsequent semester.

The student must meet the requirements of the Graduate School specified in the Bulletin for the awarding of the graduate degree.

Students enrolled in a dual degree or accelerated program can take a maximum of 6 graduate credit hours per semester in their senior year for a maximum of 12 graduate credit hours without incurring additional costs if they are full-time undergraduate students during this period.

Students should register for courses towards their graduate degree as "G" credit hours and not as "U" credit hours. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

Summary of Guidelines for Dual Degree and Accelerated Programs

- Take at least 12 undergraduate credit hours per semester. This qualifies you for the opportunity to take up to 6 graduate credit hours per semester at no additional cost.
- Graduate credit hours can be taken only in the senior year in a dual degree or accelerated program (based on the number of credit hours earned towards the undergraduate degree).
- The maximum number of graduate credit hours allowed per semester is 6.
- The maximum number of graduate credit hours the undergraduate student can take at no additional cost is 12.
- The Application for Undergraduates to take Graduate Coursework form should be completed and all signatures must be obtained before registering for graduate credit hours.
- The student can change his/her status to "graduate", or their status might be determined to be "graduate" for financial aid purposes during or at the completion of the senior year. This will make the student eligible for graduate financial aid (for US citizens or permanent residents).
- The student cannot be a full-time undergraduate (taking 12 or more undergraduate credit hours) and a full-time graduate (taking 9 or more graduate credit hours) at the same time.
- Once a student’s status changes to graduate (or after they have taken a full load of graduate credit hours) their status cannot revert to undergraduate status.
- In a dual degree or accelerated program, an undergraduate student cannot take graduate credit hours in any other year except in the senior year.
- The student should avoid taking any undergraduate credit hours after the student’s status has changed to graduate.

For University of Miami Undergraduates

Undergraduates Taking Graduate Coursework. University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The application may be found at https://www6.miami.edu/grad/forms/ApplicationforUndergraduatestoTakeaGraduateCourse.pdf.

Admission to Graduate Status requires:

1. Must have a minimum of 3.000 G.P.A.
2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than 6 credit hours may be taken in one semester, and no more than a total of 12 credit hours may be taken while in Graduate Status. Students may take no more than 15 credit hours of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar, 305-284-2294.

Degree Programs

The University of Miami offers majors leading to graduate degrees as follows:

- MASTER OF ARCHITECTURE (M. Arch.)
- MASTER OF ARCHITECTURE IN URBAN DESIGN (MUD)
- MASTER OF ARCHITECTURE IN REAL ESTATE AND URBANISM (MRED&U)
- MASTER OF ARTS (M.A.) with concentrations in the following:
  - Applied Marine Physics
  - Art History
  - Art Presenting
  - Communication
    - Communication Studies
    - Film Studies
    - Television Broadcast
Degree Programs

- Print Journalism
  - Public Relations
  - Spanish Print in Journalism
- Economics
- English
- Geography and Regional Studies
- History
- International Administration
- International Studies
- Journalism
- Latin American Studies
- Marine Affairs and Policy
- Marine Biology and Fisheries
- Marine Geology and Geophysics
- Marine and Atmospheric Chemistry
- Mathematics
- Meteorology and Physical Oceanography
- Philosophy
- Public Relations/Media Management
- Sociology

- MASTER OF ARTS IN LIBERAL STUDIES (M.A.L.S.)
- MASTER IN ACCOUNTING (M.P.Acc.)
- MASTER OF BUSINESS ADMINISTRATION (MBA)
- MASTER OF BUSINESS ADMINISTRATION EXECUTIVE TRACKS
  - Gables, Nassau, Orlando, DelRay, Tampa 1 & 2, Health Administration, Stragglers, International Business, Working Professionals, Puerto Rico
- MASTER OF SCIENCE IN EDUCATION (M.S.Ed.) with concentrations in the following:
  - Advanced Professional Studies
  - Community and Social Change
  - Counseling and Research
  - Early Childhood Special Education
  - Education
  - Education and Social Change
  - Elementary Education
  - Exercise Physiology
  - Higher Education/Enrollment Management
  - Higher Education/Student Life & Development
  - Marriage and Family Therapy
  - Counseling Mental Health
  - Reading
  - Research, Measurement and Evaluation
  - Special Education
  - Sport Administration (Focus athletics or recreational sports)
  - Sports Medicine
  - STEM Education
- MASTER OF FINE ARTS (M.F.A.) with concentrations in the following:
  - Art (Studio Work)
  - Digital Imaging
  - Painting
  - Sculpture
  - Graphic Design / Multimedia
  - Ceramics / Glass
  - Photography/Digital Imaging
  - Printmaking
  - Creative Writing
  - Motion Pictures
    - Production
    - Producing
    - Screenwriting
  - Printmaking
- MASTER OF MUSIC (M.M.) with concentrations in the following:
  - Accompanying and Chamber Music
  - Art Presenting
  - Choral Conducting (A.D.)
  - Collaborative Piano
  - Composition
  - Electronic Music
  - Instrumental Conducting (A.D.)
  - Instrumental Performance (A.D.)
  - Jazz Pedagogy
  - Jazz Performance
  - Keyboard Performance and Pedagogy
  - Media Writing and Production
  - Multiple Woodwinds
  - Music Business and Entertainment Industries
  - Piano Performance (A.D.)
  - Music Education/String Pedagogy
  - Music Theory
  - Music Therapy
  - Musicology
  - Studio Jazz Writing
  - Vocal Performance (A.D.)
- MASTER OF SCIENCE (M.S.) with concentrations in the following:
  - Applied Marine Physics
  - Biology
  - Biostatistics
  - Chemistry
  - Computer Information Systems
  - Computer Science
  - Engineering
  - Environmental Health and Safety
  - Information Technology
  - Management Science
  - Management of Technology
  - Marine Affairs and Policy
  - Marine Biology and Fisheries
  - Marine Geology and Geophysics
  - Marine and Atmospheric Chemistry
  - Mathematics
• Meteorology and Physical Oceanography
• Occupational Ergonomics and Safety
• Physics
• Professional Management
• Psychology
• Public Health
• Statistics
• Taxation

• MASTER OF SCIENCE IN ARCHITECTURAL ENGINEERING (M.S.A.E.)
• MASTER OF SCIENCE IN BIOMEDICAL ENGINEERING (M.S.B.E.)
• MASTER OF SCIENCE IN CIVIL ENGINEERING (M.S.C.E.)
• MASTER OF SCIENCE IN ELECTRICAL AND COMPUTER ENGINEERING (M.S.E.C.E.)
• MASTER OF SCIENCE IN INDUSTRIAL ENGINEERING (M.S.I.E.)
• MASTER OF SCIENCE IN MECHANICAL ENGINEERING (M.S.M.E.)
• MASTER OF SCIENCE IN MUSIC ENGINEERING TECHNOLOGY (M.S.M.E.T.)
• MASTER OF SCIENCE IN NURSING (M.S.N.)
• MASTER OF SCIENCE IN TAXATION (M.S.Tax.)
• MASTER OF PUBLIC ADMINISTRATION (M.P.A.)
• MASTER OF PUBLIC HEALTH (M.P.H.)

• SPECIALIST IN EDUCATION (Ed.S.) with concentrations in the following:
  • Advanced Professional Studies
  • Early Childhood Special Education
  • Education
  • Higher Education Leadership
  • Music Education
  • Reading
  • Special Education
  • STEM Education

• SPECIALIST IN MUSIC EDUCATION (SPEC.M.)

• DOCTOR OF MUSICAL ARTS (D.M.A.) with concentrations in the following:
  • Accompanying and Chamber Music
  • Choral Conducting
  • Collaborative Piano
  • Composition
  • Instrumental Conducting
  • Instrumental Performance
  • Jazz Composition
  • Keyboard Performance and Pedagogy
  • Multiple Woodwinds
  • Performance (Applied Music)
  • Piano Performance
  • Jazz Performance
  • Vocal Pedagogy
  • Vocal Performance

• DOCTOR OF NURSING PRACTICE (D.N.P.)

• DOCTOR OF PHYSICAL THERAPY (D.P.T.)

• Higher Education Leadership (Ed.D.)

• DOCTOR OF PHILOSOPHY (Ph.D.) with concentrations in the following:
  • Applied Marine Physics
  • Biochemistry and Molecular
  • Biology
  • Biomedical Engineering
  • Biostatistics
  • Business Administration
  • Cancer Biology
  • Chemistry
  • Civil Engineering
  • Communication (Communication, Film)
  • Computer Science
  • Counseling Psychology

  • Sociology
  • Teaching and Learning
Interdisciplinary Graduate Studies
Dept. Code: IDS

The Graduate School is no longer accepting applications for the IDS program. This will not affect current IDS students.

Environmental Science and Policy
Dept. Code: ECSD

Through the Graduate School, The Abess Center for Ecosystem Science and Policy offers an interdisciplinary course of study leading to a Ph.D. Details regarding areas of specialization can be found at the Abess Center website at http://www.cesp.miami.edu/. In most cases, doctoral students are supported by research assistantships which include tuition remission and a monthly stipend. All students are also required to serve satisfactorily for one term as teaching assistants in the Abess Center undergraduate program.

Prerequisite
Students admitted to the program must have earned a Bachelor’s or Master’s degree and should display a strong interest in the interdisciplinary study of ecosystem science and policy.

Ph.D. Degree Requirements
Completion of the Ph.D. will take approximately five years. All students are also required to:

• Complete a minimum of 60 credit hours, of which at least 26 must be for coursework taken while in residence at the University of Miami. (Students entering the program with a Master’s degree in a related field may be given credit hour for up to 24 course credit hours.)

• Complete 12 credit hours worth of coursework in the following core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECS 601</td>
<td>Interdisciplinary Environmental Theory</td>
<td>3</td>

<tr>
<td>ECS 605</td>
<td>Interdisciplinary Environmental Law &amp; Policy</td>
<td>3</td>
</tr>
<tr>
<td>ECS 607</td>
<td>Interdisciplinary Environmental Decision</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 12

• Submit, by the end of their second semester, a proposed group of additional courses, totaling at least 18 credit hours, related to their research interest and intended dissertation research area. This group of courses requires approval of both the student’s advisor and the Director of Graduate Studies.

• Accrue at least 13 credit hours worth of dissertation research.

• Pass written and oral comprehensive examinations following the conclusion of the core series of courses, usually at the end of the first year. A majority of the examination committee must be members of the Graduate Faculty of the University. In the event of failing to pass an examination, students are required to retake and pass the examination within one calendar year. By the end of the second year, students must present and defend a research proposal. Following successful completion of the comprehensive examination and research proposal defense, the student may apply to candidacy for the degree. Any student who fails to be admitted to candidacy for the degree within this two-year period can be dismissed from the program.

• Convene a 4-member dissertation committee by the end of the first year.

• Write and defend a dissertation research proposal by the end of the second year. Students may proceed with the dissertation after the dissertation committee has been appointed and the Director of Graduate Studies and the Graduate School have accepted the dissertation proposal. The dissertation must be an investigation of a substantial scholarly topic and bridge both scientific and policy aspects of the topic area.

• Successfully complete an oral defense of the dissertation.

Office of Study Abroad
Dept. Code: SAP

Opportunities for study abroad may be available for some graduate degree programs during the summer, fall, spring and intersession terms. Students may participate in programs led by faculty members or may participate in semester exchange program options offered by the MAIA program.

For further information contact:
Office of Study Abroad
PO Box 248263
Coral Gables, FL 33124-1610
305-284-3434
e-mail: ieep@miami.edu

In some programs it is possible to earn graduate credit hours for study taken abroad. The curriculum must be worked out by the student in conjunction with an advisor.

Master’s Degree
The minimum residence requirement is two semesters in full-time study or the equivalent in part-time work. In practice, most students need at least three semesters, or two semesters plus summer work, to complete degree requirements.

Foreign Language
The requirements in a foreign language or languages are established by the student’s program. In those cases where the program deems it necessary that the student have competency in a foreign language, the student will be required to demonstrate such competence by examination in one or more languages. The choice of language or languages required will be by the program.

Thesis
Decision as to the thesis subject must be approved by the program. The thesis committee will consist of not less than three members. The committee chair must be Regular Faculty from the student’s program or department of concentration (this includes secondary appointments).
In addition to the chair, one of the remaining members must also be Regular Faculty or have Graduate Faculty status in the student’s program or department of concentration; the third member must be an outside member. “Regular Faculty” are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the chair of the department and Dean of the Graduate School. A program may require additional members.

The committee is nominated by the Graduate Program Director of the program concerned. The duties of the thesis committee are similar to those of the dissertation committee. The student who presents a thesis must enroll for at least 6 credit hours of thesis. Ordinarily no more than 6 credit hours may be granted.

The Dissertation Editor will provide information on the guidelines and deadlines that will become critical in the final months of the degree process or information can be downloaded from www.miami.edu/etd (http://www.miami.edu/etd). The Graduate School office telephone number is 305-284-4154, the email address is grad.dissertation@miami.edu.

Master’s degree students who are required to write a thesis must defend their thesis by the date specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at www.miami.edu/etd (http://www.miami.edu/etd). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

One Dissertation Editor-approved PDF conforming in style to the formatting standards set by the Graduate School must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each thesis must be accompanied by one certificate of approval of oral defense of thesis signed by all members of the Committee, one Signature page from the thesis document signed by all members of the committee, and one ETD Availability Agreement form signed by the student and Committee Chair. The forms can be downloaded from www.miami.edu/etd (http://www.miami.edu/etd).

Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami’s Scholarly Repository, http://scholarlyrepository.miami.edu/. The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university’s Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student’s information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted at www.miami.edu/etd (http://www.miami.edu/etd) to ensure they fully understand the terms of access for their embargoed work.

Final Examination

A final public oral defense of the thesis is required. However, none but the members of the thesis committee may interrogate the candidate. In addition there may be required, if desired by the program, a final written integration examination to test the candidate’s ability to integrate the whole graduate program and the thesis in relation to it. These examinations must be held at least two weeks prior to commencement.

Research in Residence

Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. (See Recency of Credit and Time to Completion (p. 33) sections of the Bulletin.) Research in Residence students, while not required, may purchase or receive any prerequisites that are normally available to graduate students.

Comprehensive Examination

In most programs a comprehensive examination, either written, oral or both, is a requirement. When the thesis is not a part of the program, an examining board, at least one of whose members must be a regular member of the Graduate Faculty, will be appointed by the program.

A student failing the comprehensive may be allowed one opportunity to retake it if the students committee so advises. The re-examination may not be taken during the same semester or summer session, and must be taken within one calendar year.

Transfer of Credit Hour

Upon recommendation of the major program and the approval of the Graduate School, a maximum of 6 credit hours of graduate credit hour, with grades of B or above, may be transferred from another accredited graduate institution, in partial satisfaction of a master’s degree requiring less than 36 credit hours. 9 credit hours of graduate credit hour may be approved for transfer to a degree program requiring 36 credit hours or more. Work taken more than six years prior to transfer will not be accepted. Work taken by extension, correspondence or online is not acceptable. All work transferred is subject to examination by the program. In no case will credit hour be transferred until the student has completed an equivalent number of credit hours at the University of Miami. Any student wishing to transfer credit hour must be enrolled at the University of Miami during the time of transfer. The satisfaction of the requirements of another university does not relieve
the student from the University of Miami’s requirements. An official transcript of work to be transferred must be on file in the Graduate Office. Credit hours that pertain to or have been counted toward another degree cannot be transferred. Students enrolled in the Master of Business Administration program are not eligible for credit hour transfers.

Exceptions must be approved by the Dean of the Graduate School.

No transferred credit hours are calculated into the University of Miami G.P.A.

A Second Master’s Degree
A student enrolled in a University of Miami master’s degree program or holding a University of Miami master’s degree may earn a second master’s degree in a related area at the University by completing a minimum of 21 credit hours in residence toward the second degree, as long as all program and admission requirements for the degree are met. Each degree must have a separate thesis if two thesis options are elected. The second program decides if the areas are related enough to qualify for the reduced number of credit hours. The student must contact the second program during the application process for the second program to determine if the areas are related enough to qualify for the reduced number of credit hours.

Doctoral Degree
(For Ph.D., D.M.A., and Ed.D. candidates only)

General
The Graduate School does not specify course requirements for the Ph.D. However, the Graduate School will, not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D., and not less than half of the total credit hours must be in work open only to graduate students. At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken. Graduate students studying for the Ph.D. who have received their master’s degree in the same field must take at least twenty-four (24) hours in residence at the University of Miami in doctoral status.

The specific course requirements for the Ph.D. are established by the major department or program which may require such additional graduate credit hour as it deems necessary. Such requirements will be found in that part of the Bulletin which lists course offerings.

Dissertation
A student must take a minimum of 12 credit hours of dissertation research except where otherwise stated. Not more than 12 credit hours of research may be taken in a regular semester, nor more than 6 in a summer session.

Ph.D., D.M.A., Ed.D., or Lecture Recital degree students must defend their dissertation, doctoral essay, or lecture recital essay by the deadline specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at www.miami.edu/etd (http://www.miami.edu/etd). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

One Dissertation Editor-approved PDF conforming in style to the standards set by the Graduate School, must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each dissertation must be accompanied by one certificate of approval of oral defense of thesis signed by all members of the Committee, one Signature page from the dissertation document signed by all committee members, and one ETD Availability Agreement form signed by the student and Committee Chair. The forms can be downloaded from www.miami.edu/etd (http://www.miami.edu/etd).

Electronic Theses and Dissertation (ETD) Embargo Policy
Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami’s Scholarly Repository, http://scholarlyrepository.miami.edu/. The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university’s Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student’s information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted at www.miami.edu/etd (http://www.miami.edu/etd) to ensure they fully understand the terms of access for their embargoed work.

Research in Residence
Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students. (See Recency of Credit section.)

Residence
The student must spend at least two consecutive semesters beyond the first year’s graduate work, wherever taken, in full-time study at the University of Miami. With program approval,

1. one summer of full-time study in two sessions can be substituted for one semester of residence, or
2. full-time study for two successive summers can be substituted for two regular semesters.

Residence requirements may be altered only by the Dean of the Graduate School. (At least 24 credit hours must be taken in residence.)

The Supervisory and Dissertation Committees
A supervisory committee is usually appointed when a student is formally admitted to a doctoral program. For the dissertation/doctoral essay/lecture recital essay committee a student needs no less than four members. The committee chair must be Regular Faculty from the student's program of concentration (this includes secondary appointments). In addition to the chair, two members must be Regular Faculty or have Graduate Faculty status in the student's program of concentration. The fourth member must be an outside member. "Regular Faculty" are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the Program Director (or Chair of the department) and Dean of the Graduate School. A department, program, or school / college may require additional members.

This committee is nominated by the chairperson of the program concerned. It is appropriate for the chairperson to consult with the student regarding the membership of the committee. The supervisory committee is empowered to plan the course of study for the student; to determine deficiencies, if any; to set language and other requirements; to request applicable transfer of credit hour where appropriate and to make up and administer the qualifying examination.

When the student is admitted to candidacy, a dissertation committee is formed. This may be the supervisory committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The dissertation committee is nominated by the department or program concerned, and appointed by the Graduate Program Director and approved by department chair. As with the supervisory committee, it must be comprised of at least four members; this includes the committee chair, who shall be a member of the program or department of concentration, as well as a permanent member of the Graduate Faculty. Of the remaining members, it is also required that two shall be members of the program or department of concentration, as well as permanent members of the Graduate Faculty (http://www.miami.edu/gs/index.php/graduate_school/current_students/graduate_faculty_list_by_department) and one from outside the program or department of concentration. A program may require additional members. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research;
2. To meet, at regular intervals, to review progress and expected results;
3. To read and comment upon the draft dissertation;
4. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work a minimum of two weeks prior to the defense.

The dissertation may be written in a language other than English at the recommendation of the dissertation committee and with the approval of the program and the Graduate School. Graduate School approval will be determined on a case-by-case basis. The Dissertation Chair will submit a memorandum from the Department Chair to the Dissertation Editor together with the student's application for admission to candidacy explaining why it is both relevant and appropriate for the dissertation research to be written in a language other than English. Acceptable “relevant and appropriate” reasons for writing the dissertation in a language other than English include, but are not limited to: relevancy to research where presentation in a non-English language expands knowledge of that language; relevancy where the loss or weakening of the research's meaning and impact if primary data, e.g., interviews, are translated into English; or appropriateness where the majority of the bibliographic sources, references, and potential outlets for future publication are anticipated to be in that language other than English. Both the memorandum and the application for admission to candidacy form must be submitted to the Graduate School at the same time. In some cases upon review of the memorandum, the Graduate School may determine that the student will also be required to submit an English translation of the non-English dissertation. For all approved cases, an abstract in English should be included in the final dissertation.

One Dissertation Editor-approved PDF must be uploaded to the ETD database and final paperwork handed in to the Graduate School on or before the date specified in the academic calendar published each session, accompanied by one certificate of approval of doctoral dissertation defense and one ETD Availability Agreement form. It is the duty of the student to acquire a copy of the guidelines for preparing dissertations from the Graduate School or www.miami.edu/etd (http://www.miami.edu/etd) and to conform to the requirements therein. All dissertations are also published by ProQuest/University Microfilms, Inc.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved to the student’s committee. Changes of committee members must be approved by Graduate Program Director, and sent to the Graduate School.

Qualifying Examinations
A written qualifying examination is to be taken by each doctoral degree (Ph.D., D.M.A., D.N.P, D.P.T., Ed.D.) candidate at the time that the student and the Supervisory Committee deem appropriate. The major program may specify that its students must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the supervisory committee shall notify the Graduate School and the instructional school or program that the student has passed or failed the examination. A student who fails the examination will be given one opportunity to retake it with the permission of the supervisory committee. After a comprehensive exam is failed for a second time, the student is terminated from the program. Some programs do not administer qualifying examinations during the summer months. Check with the Graduate Program Director for specific program requirements.
Admission to Candidacy
When the student has met all requirements and passed the qualifying examinations, admission to candidacy for the degree is approved. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the defense of dissertation is scheduled.

Final Examination
A final public oral defense of the dissertation is required. Refer to the academic calendar for the deadline regarding dissertation defense for each graduation. Graduate programs set the specific requirements and format of the defense. Please contact your Graduate Program Director for details.

Transfer of Credit Hour
Transfer of graduate credit hour from another institution will not be made until the student has completed a like amount of credit hour at the University of Miami, and the transfer has been approved by the supervisory committee and the Dean of the Graduate School. Credit hour transferred is subject to the same recency rules as all other credit hour counted toward the degree, and is also subject to examination by the program. An official transcript of work to be transferred must be on file in the Graduate School. Credit hours that pertain to or have been counted toward another degree cannot be transferred.

Florida International University and University of Miami Agreement
Effective as of Fall 2007, students may take up to 6 credit hours at the host institution as long as the following requirements are met:

1. Must be Ph.D. student or Master’s student in Latin American Studies.
2. Approval from both home and host institution;
3. Approval of Graduate School Deans;
4. Space at the host institution is available.
5. Approval of the Faculty member teaching the course.

Tuition and fees are to be paid at the home institution. Performance level is set at host institution. Contact the Graduate School (p. 360) for more information. The application form can be found at http://www.miami.edu/gs/index.php/graduate_school/current_students/umfiu_doctoral_exchange_program/.
Architecture
http://www.arc.miami.edu

Introduction
The School of Architecture at the University of Miami offers a professional Master of Architecture degree, as well as, Master degrees in Urban Design, Real Estate Development & Urbanism, and Architecture Research.

The School of Architecture's location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation's fastest growing urban areas. These challenges result in an increasing demand for skilled professionals.

Students have the opportunity to work with the faculty in the exploration of theoretical issues as well as in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Accreditation
The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Admission Requirements
Applications are for the fall semester only. Applications completed by February 1st will be given the highest priority. Admission to the graduate program is subject to the rules, regulations and procedures of the Graduate School as stipulated in the University Graduate Bulletin (p. 360). It is the responsibility of each student to understand these requirements and to ensure that they are met.

The minimum requirements for application to the Master of Architecture Degree program are:

1. 3.0 cumulative grade point average.
2. 300 cumulative Graduate Record Examination score on verbal and quantitative sections
3. International applicants and/or those whose native language is not English should have been taken within 2 years prior to application for admission; a minimum score of 550 (paper-based), 80 (internet-based) is required. Visit the TOEFL website, www.toefl.org (http://www.ets.org/portal/site/ets/menuitem.fab2360b164a1de9ba0779f1751509/?vngnextoid=69c0197a484f4010vgVCM10000022f95910RCRDN), for more information.
4. For: Master of Architecture (Advanced Standing), Urban Design, and Master of Architecture: Research - a Professional Degree in Architecture (Bachelor of Architecture or Master of Architecture) is required.

Resources
The school's resources, including a state-of-the-art computer and digital fabrication laboratories, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for graduate architecture students include:

- Historic Preservation Certificate
- Classical Architecture Certificate
- Bachelor of Science in Architectural Engineering (BSAE)/Master of Architecture (MARCH)
- Bachelor of Architecture (BARCH)/Master of Business Administration (MBA)

Master of Architecture: Professional Degree
The Master of Architecture is designed for college graduates seeking a first professional degree in architecture. It consists of the following two tracks:

- 3-year Track: A 3-year program for students holding undergraduate degrees in non-design fields. Completion of 105 credit hours required.
- Advanced Standing 2-Year Track: A program for students holding a previous non-professional degree in architecture or a closely related field. Completion of 51-60 credit hours required.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Master of Urban Design
This concentration consists of three semesters of directed study to explore in-depth the existing state of suburbs and cities, study precedents and propose design solutions. The faculty is dedicated to seeking alternatives to modern patterns of urban growth.

The Miami metropolitan area provides a laboratory for the identification of urban problems and for the exploration of design solutions. Each semester is comprised of a design studio and a seminar in parallel, studying both the real and ideal solutions for three aspects of town
planning: new town design, housing and the redesign of existing situations. The School of Architecture faculty teaches the curriculum with field condition input from visiting faculty and other experts such as developers, marketing experts and bankers.

**Master in Real Estate Development and Urbanism**

An intensive one-year graduate program for students with degrees and experience in business, architecture and related fields blending the fundamentals of real estate development (finance, law, market analysis, development process) with the School's strengths in livable community design.

**Master of Science in Architecture**

The Master of Science in Architecture (M.S.Arch) degree programs is structured across a 36-credit system of advanced study, typically beyond a first professional degree in architecture, engineering or closely allied profession. It is flexible to enable a student to take a core group of courses within a specialized track, as well as electives. The program may be initiated during the final semesters of the first professional degree in architecture and engineering. After foundational core coursework and electives, each student develops an individually focused thesis or a capstone project on a topic of their interest, with a faculty adviser. The M.S.Arch. program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

**Awards and Scholarships**

All students admitted full time to the Master of Architecture program may be eligible for partial tuition scholarships and/or graduate Assistantships, based on academic record.

Scholarships may vary in amounts and are intended to assist the recipient pursue studies as required by the program. Scholarships will be awarded on a competitive basis. Graduate Assistantships require service in the form of teaching, research assistance, or other appropriate educational activities as designated by the director of the graduate program.

American Institute of Architects Henry Adams Medal awarded by the American Institute of Architects to the highest ranking graduating student for scholarship and excellence in architecture. American Institute of Architects Henry Adams Certificate awarded to the second highest ranking graduating student for scholarship and excellence in architecture.

Other honors, distinctions, and awards are presented annually for excellent student performance.

**Masters**

**Masters Degrees in Architecture**

- M.Arch. Professional Degree (p. 378)
- M.S. in Architecture (Post Professional) (p. 379)
- M.U.D. Master of Urban Design (p. 383)
- Master in Real Estate Development and Urbanism (p. 383)

---

### M.Arch Professional Degree

**3-Year Track - For students with Prior Non-Architecture Degrees**

Architecture and professional courses completed in a pre-professional bachelor’s degree program will be evaluated to identify courses that may be waived in the Master of Architecture Professional Degree Program.

A maximum of 54 credit hours, including three design studios, may be waived; generally architecture and professional courses with a grade of B- or higher will be accepted.

Requirements/Recommendations for additional coursework will be contingent on the evaluation of the student’s prior work at the time of admission.

### M.S. Architecture Post Professional Degree

The Master of Science in Architecture (M.S.Arch) degree programs is structured across a 36-credit system of advanced study, typically beyond a first professional degree in architecture, engineering or closely allied profession. It is flexible to enable a student to take a core group of courses within a specialized track, as well as electives. The program may be initiated during the final semesters of the first professional degree in architecture and engineering. After foundational core coursework and electives, each student develops an individually focused thesis or a capstone project on a topic of their interest, with a faculty adviser. The M.S.Arch program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

There are five tracks of concentration possible within the Master of Science in Architecture degree program:

- Classical and Traditional Architecture
- Computational and Embedded Technology
- Healthcare Design
- Historical Preservation
- Resilient Sustainable Building Technology

#### 1. Classical and Traditional Architecture

The Master of Science in Architecture: Classical and Traditional Architecture program consists of five courses (21 credits), and five electives (15 credits). The program focuses on the theory and practice of Classical and Traditional Architecture with an emphasis on contemporary vernacular trends in the building arts, emerging urbanisms, the economies of preservation of built patrimonies and sustainable practices of classical and traditional architecture worldwide.

The program includes an option of a semester in Rome as well as a summer option. The program explores the Western Classical Architecture tradition, its sources in ancient Egypt, Greece and Rome, and development through Medieval, Renaissance and Enlightenment periods, as well as the Elements and Principles of Classical Architecture, History of Rome, Urban Elements and Principles, Architectural Treatises, Italian Classicism, and Architectural History of Rome.

#### 2. Computation and Embedded Technology

The Master of Science in Architecture: Computation and Embedded Technology program consist of five courses (21 credits), and five elective courses (15 credits) from School of Architecture and other schools/ departments by arrangement and approval of the coordinator of the track. The program is dedicated to the research and education of digital design thinking in architecture focusing on computational design and digital fabrication.

The program focuses on training innovative professionals rather than on innovative technology. The goals are to integrate analytical approaches and creative problem-defining processes to solve challenging issues in design with applications in art, architecture, education, business and healthcare. Making is at the center of the program’s pedagogy and the iterative and incremental developments of design and fabrication enable students to internalize and personalize these concepts. The research areas for making include, but are not limited to, parametric and algorithmic design, physical computing (sensors and actuators), biomimicry, robotic fabrication, machine learning, and computer-vision.

**Term Credit Hours:** 12

**Total Credit Hours:** 34-36

**Electives List**

**Theory and Computation Electives**

- **CSC120 - Computer Programming I** (4 credits) History of computing. Fundamental programming constructs. Algorithms and problem solving. Object-oriented programming. Recursion. Lecture 3 hours, laboratory 2 hours. Prerequisites: Corequisite: MTH108 or MTH140 or MAS110

- **CSC540 - Algorithm Design and Analysis** (3 credits) Design techniques, including divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting and searching. Combinatorial and graph algorithms. Prerequisites: CSC317 (http://www.cs.miami.edu/courses/course-formal-pages/csc317) or CSC517

- **CEM Intro to Systems: Designing Interactivity** (3 credits) In this course you will learn to apply systems thinking to the design of interactive systems ranging from physical games to screen-based applications. Designers must understand how to create interactivity through meaningful choice and how to design interfaces that visually communicate desired human interaction as part of an integrated system. Students will learn design principles for creating interactive systems as well as techniques for conducting design research, rapidly prototyping and evaluating multiple design solutions. The first half of the semester will be dedicated to looking at systems thinking through the lens of games. Students will first play games and then design and test their own games in small groups as a method for understanding interactivity and choice. The second half of the semester, students will address interactivity through the design of a screen-based application and/or real-life intervention.

- **CEM Programming for Designers** (3 credits) This course will teach students the basics of programming using Processing. Processing is a language created by Ben Fry and Casey Reas of MIT. It was created to make computer programming accessible to people who might imagine it but do not always have the skills to execute it, thus making it an excellent tool to teach programing concepts to designers. Processing gives students immediate results allowing them to easily create beautiful, interactive graphics. Read about processing at: http://processing.org/about/

- **ARC Computer Programming 1 - C & C++** (3 credits) This course provides a fast-paced introduction to the C and C++ programming languages, the basis of building energy analysis and modeling. Students will learn the required background knowledge, including memory management, pointers, preprocessor macros, object-oriented programming, and how to find bugs when you inevitably use any of those incorrectly. Moreover, students will learn how to apply the C and C++ in building technology and sustainable design via exercises each week. It is a fundamental class that will provide a basis for the in-depth modeling classes in the second semester.

- **ARC Computer Programming II - Python** (3 credits) This course will provide a gentle introduction to programming using Python for highly motivated students with little or no prior experience in programming computers. The course will focus on planning and organizing programs, as well as the grammar of the Python programming language. The focuses and exercises of the class will be on how to model the building energy performance and visualize the building and its relationship with surrounding environment using Python. Moreover, to prepare students a strong foundation to use BIM software such as Ravit or ArchiCAD.

**Research Method Electives**

- **EPS670 Introduction to Research Methods** (3 credits) The nature of disciplined inquiry in behavioral and social sciences. Includes philosophy of science, quantitative and qualitative research, basic concepts in sampling and measurement, and systematic searches of the research literature. Students are required to complete literature search on a topic of their interest and submit a report of their findings.

- **EPS351 Introduction to Statistics and Research Design** (3 credits) The course will cover basic statistics relevant to the social sciences (e.g., central tendency, variation, t-tests, correlations), with emphasis on real world applications employing commonly used research designs. Students will acquire the tools necessary to interpret elementary statistical analyses and a foundation in the basic analytic methods used in conducting quantitative research in the behavioral sciences.

**Advanced Algorithm and Application Electives**

- **CSC220 - Computer Programming II** (4 credits) Common APIs including list, priority queue, set, and map, and their efficient implementations in an object-oriented language using fundamental data structures. Sorting and other applications of recursion. Combining asymptotic analysis and experiments to extrapolate
running times. Using APIs in a software project. Lecture 3 hours, laboratory 2 hours. Prerequisites: CSC120 (http://www.cs.miami.edu/courses/course-formal-pages/csc120), MTH108 or MTH140 or MAS110

CSC547 - Computational Geometry (3 credits) Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS. Prerequisites: CSC317 (http://www.cs.miami.edu/courses/course-formal-pages/csc317) or CSC517

CEM Mobile Application Development (3 credits) The rapid global growth and evolution of smart phones, tablets, mobile computing and applications are impacting virtually all aspects of societies, economies and the media, requiring new leadership and expertise in these areas. This introductory course gives communication students valuable understanding and experience designing, developing and distributing a mobile application of their choosing as their course end product. Students can target any mobile platform and distribution system, including Apple’s iOS and App Store, or Android Apps on Google Play, for example. No programming experience is required. Student will learn by example and collaboration to use Apple’s Xcode or Appcelerator Titanium Studio, for example, among others that may help students to more easily and effectively complete their mobile application for smart phones, tablets, or both.

CEM Dynamic Data (3 credits) This course focuses on speaking through computer programming and data. Students will learn to build stories using numerical data or databases as a primary material and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.

CEM Information Graphics and Visualization (3 credits) Humans are a visual species. Therefore, designing charts, graphs, maps, diagrams, and explanatory illustrations is a key skill to communicate ideas and improve public understanding of relevant issues. In this course you will learn the conceptual basics of information graphics and visualization, how to transform raw data into functional and beautiful displays that will not only attract users’ attention, but that will also enlighten them.

CEM Web Applications (3 credits) With the evolution of technology there has been an exponential adoption of cloud computing technologies and an increasing number of applications are being pushed on the Web. Software will be consumed through the browser and the implications for software development are significant. In this course students will learn the concept of interoperability of applications: server-side scripting, web server configuration, caching servers, and data stores.

ARC Digital Simulation - Space Syntax (3 credits) In this course students will learn how to analyze and generate spatial configurations with advanced computational methods. In a series of theory lectures we explore how designing and planning of a site, neighborhood or city could become evidence based by using scientific methods. Various exercises will provide training for your skills in working with state-of-the art yet office proven design tools (Deepthmap, Ecotect, and Rhino/Grasshopper).

LAW785 Health Rights Clinic (3 credits, Departmental Approval Required) The Health Rights Clinic is a medical legal partnership operated in collaboration with the UM Miller School of Medicine. Students participating in the Health Rights Clinic represent multiple clients in different legal matters related to health. Under the guidance of Director JoNel Newman (http://law.miami.edu/faculty-administration/jonel-newman.php?op=1) and Associate Director Melissa Swain (http://law.miami.edu/faculty-administration/melissa-gibson-swain.php?op=1), clinic students spend the academic year representing low income patients of the South Florida AIDS Network, Jackson Hospital and other medical partners.

MDR550 CMC Introduction to the Medical Profession (3 credits) This course provides the foundation of the MD/MPH curriculum areas of emphasis. The course covers the role and responsibilities of physicians, concepts of population medicine and professionalism. Along with didactic sessions, the course utilizes communication skills laboratories designed to equip students for the community physician practice settings. CMC stands for Continuity Medicine Curriculum.

MDR616 Intro. Dermatology and Ophthalmology (2 credits) The Dermatology and Ophthalmology module is an introductory course that covers the basic pathophysiology and clinical aspects of dermatology and ophthalmology that are essential for a general physician. The module covers the normal structure and function of skin, and eye. Common disease diseases of the skin and eye are discussed.

MDR630 Intro. To Epidemiology (2 credits) The principles of epidemiology including the distribution, determinants of disease frequency and their investigation. There is a review of biostatistics to help with the evaluation of scientific investigations.

NUR314 Health Assessment (3 credits) Introduction to health assessment using a lifespan approach. Emphasis is on the development of data collection and basic decision-making using health assessment findings.
3. HealthCare Design

The Master of Science in Architecture: Healthcare Design program consists of five courses (21 credits), and five electives (15 credits). Students may plan a course of study within one of three topics:

**People— Built Environment and Health Impacts** focuses on the understanding of the interrelationships of health and the built environment with the potential for a research-based practice. The program draws on faculty engaged in research through the University of Miami’s Built Environment Behavior and Health Team, which includes faculty in Architecture and the Miller School of Medicine Department of Public Health Sciences.

**Places—Healthcare Campuses & Buildings** focuses on healthcare buildings and site planning through active engagement with evidence-based design, working with healthcare providers in specific locations. The students will engage in research, participatory planning processes, and the development of design proposals based on research-validated strategies significant to health and well-being.

**Potentials—Healthcare and the Internet of Things (IoT) ecosystem** explores the capabilities and potential of the IoT to transform healthcare systems and delivery. The student will engage in discovery and design to create new elements of care as well as the design of supportive environments.

4. Historical Preservation

The Master of Science in Architecture: Historic Preservation emphasizes planning and the stewardship of cultural heritage. The program consists of five core courses (21 credits), three elective courses (9 credits), concluding with a 6-credit thesis.

The program builds upon the classic tenets of professional knowledge in preservation while fostering a critical assessment of that body of thought to address the challenges that face natural and cultural conservation. The program builds upon the expertise of University faculty to foster cross-disciplinary dialogs in the service of stewardship. The teaching consists of lectures, seminars, field and lab work, travel study, design studios and the aula magna of Miami, a diverse and emergent 21st Century city that provides the instructional settings and experiences of the program. The pedagogy advances the position that: addressing climate-change; promoting a balanced micro-macro cultural currency; housing global urban population growth; and championing the social-ethical dimension of heritage, represent forces integral to planning and indispensable to stewardship of the natural and cultural environment.

5. Resilient Sustainable Building Technology

The Master of Science in Architecture: Resilient Sustainable Building Technology program consists of six core courses (18 credits), and four elective courses (12 credits) selected from the Department of Architectural Engineering, School of Education and School of Architecture, concluding with a 6-credit thesis.

The program focuses on the challenges of a low-carbon economy, climate change, sustainability and resiliency. The courses will address the ways new and renewable energy can be harnessed in buildings, develop skills in simulation and modeling essential for performance analysis, and the ability to contribute effectively within a multidisciplinary design team.

Admission Requirements

Please consult the general section of the Graduate Bulletin (p. 360) for the Graduate School admission requirements, and the specific program description for additional, department specific admission requirements.

Degree Programs

- Master of Arts
- Master of Fine Arts
- Master of Public Administration
- Master of Science
- Doctor of Philosophy

Degree Requirements

Please consult the specific department section for information related to degree requirements in addition to general degree requirements for the various degrees as listed by the Graduate School.

Other

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available at the following link; http://www.as.miami.edu/academics/graduate-studies/ and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services.

Anthropology

The University of Miami offers a Professional Practice in Anthropology. The program will provide an academic foundation of best practices, current theory, grantsmanship, government regulations, and ethical standards of working with living peoples, dynamic cultural systems, forensics, and cultural heritage materials within the U.S. and abroad. It is designed to prepare graduates for careers in the private sector, government and nongovernmental organizations, nonprofit organizations, and education, including medical and research settings.

Students in these programs are expected to design their mandatory field/research experience in concert with a faculty advisor and external site supervisor as a means of acquiring practical experience in workplace setting. These students will present a professional paper, submit a grant proposal, and/or produce a manuscript for publication as part of the requirements for graduation. They may elect to pursue a degree with or without a written thesis. A total of 36 semester credit hours of graduate coursework (600-level or above) is required to complete the degree.

Masters

- Master of Arts in Anthropology (p. 385)

M.A. in Anthropology

The Department of Anthropology offers a Master of Arts degree in the Professional Practice of Anthropology. The program offers students the opportunity to specialize in three concentrations, 1- Applied Archaeology; 2- Applied Forensic and Biological anthropology; and 3- Applied Cultural Anthropology.

- **Track 1:** Applied archaeology – cultural heritage management (cultural resource management), including museum management for archaeological collections, graduates will be in compliance with regulations and requirements from the U.S. Secretary of the Interior;
- **Track 2:** Applied forensic and biological anthropology – recovery, analysis and identification of human remains, legal interpretation thereof, and museum management of human skeletal/dental remains; applied primatology;
- **Track 3:** Applied cultural anthropology – medical anthropology, anthropology in public health and allied fields, and applied ethnography for industrial/private/government sectors.

Graduate students have two degree options – Option 1 with no written thesis, and Option 2 with a written master’s thesis. The aim of the curriculum is to give graduates the skill sets needed to design, conduct, and analyze anthropological fieldwork for their employers or as a component of independent research-driven careers.

- **Option 1.** The nonthesis option is designed for applicants whose ultimate career will be in employment for which practical application of bench skills and a master’s degree are the gold standard. Nonthesis students require a minimum of 36 credits beyond the baccalaureate degree with a minimum of 18 months in residency.
- **Option 2.** This option is designed to prepare students to compete successfully for employment in mid-level careers immediately upon graduation.
We have designed this degree program so that it can be completed in two years.

**Option 2.** The thesis option requires a minimum of 36 credits beyond the baccalaureate degree and a written thesis with an open defense guided by a thesis advisor and thesis committee of the student’s choice. The committee for the thesis must include at least three faculty members, including one from outside anthropology. Additional credits for thesis research and writing may be added to the minimum of 36 if the student wishes. A minimum of 18 months in residency is also required for this option.

This option is designed for individuals who wish to pursue career employment with increased potential for professional advancement based on advanced analytical and writing skills used in management. With the thesis track, graduates would have the option of eventually pursuing admission to a doctoral program.

The thesis option may require an additional year in the program to accommodate thesis research and writing. The thesis research and writing credits may serve as part of the residency requirement if the student is in residence during the course.

**ADMISSION REQUIREMENTS**

Applicants for the program will be selected for admission based on submission of the following materials and standards:

1. Official copy of undergraduate transcripts showing the date the bachelor’s degree was awarded. Transcripts must show a 3.0 GPA in anthropology and no less than 3.0 for the overall GPA. Students with lower averages may be admitted provisionally with higher than minimum GRE scores and supporting materials from referees on a case-by-case basis.

2. A personal statement of intent in which the applicant details reasons for pursuing the degree and for pursuing the degree in our program specifically. A cogent written statement will be used in evaluating the applicants’ ability for written expression, as well as their fit with our strengths and offerings.

3. A GRE score of 1100 (or combined 297 on the revised General Test). Applicants with lower scores may be considered for admission with supporting documentation from referees of active and successful involvement in research and/or transcripts showing an established record of scholarly achievement as an undergraduate.

We will also consider the admission of part time students, especially in the case of returning students or practicing professional anthropologists who are seeking continuing education to better their skill set while enhancing their opportunities for advancement in the field. Nondegree-seeking students and/or part time students will be considered by the Admissions Committee on a case-by-case basis.

**Basic Coursework Requirements**

1. Seminars in two of the four core graduate seminars in professional practice and theoretical foundations (see below) (3 credits; total of 6 credits);

2. One course or seminar in analytical skills for qualitative and/or quantitative data (3 credits); and

3. One course or seminar in professional writing (e.g., scientific writing for publication, federal compliance reporting, grants writing) (3 credits).

**Additional Requirements for the Degree**

1. One semester of hands-on field work or internship (usually over the summer), with the option of a second as thesis research; and

2. One paper for presentation at professional organization or one paper for publication in a journal/proceedings/book chapter or other professional venue. The presentation may be poster, podium or multimedia.

**The Professional Practice Core Courses**

The MA in Anthropology consists of the following courses.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>APY 601</td>
<td>Advanced Seminar in Archaeology, Theory and Practice</td>
<td>3</td>
</tr>
<tr>
<td>APY 602</td>
<td>Advanced Seminar in Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>APY 603</td>
<td>Advanced Seminar in Biological Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>APY 604</td>
<td>Advanced Seminar in Linguistic Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>APY 612</td>
<td>Advanced Medical Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>APY 690</td>
<td>Teaching Practicum In Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>APY 805</td>
<td>Graduate Internship: Professional Practice of Anthropology</td>
<td>1-9</td>
</tr>
<tr>
<td>APY 810</td>
<td>Master’s Degree Thesis Preparation and Writing</td>
<td>1-9</td>
</tr>
</tbody>
</table>

**Total Credit Hours** 20-36

APY 601 – Methods of Anthropological Research (3-6 credits), may be offered as a seminar or independent study.

APY 702 – Field Studies in Anthropology (3-6 credits), may be offered as a seminar or independent study.

APY 615 – Museum Internship (3 credits), may be offered as a seminar or independent study.

APY 616 – Workshop in Anthropology (3-6 credits), may be offered as a seminar or independent study.

APY 622 – Advanced Medical Anthropology (3 credits), may be offered as a seminar or independent study.

APY 628 – Advanced Seminar in Anthropology (3 credits), may be offered as a seminar or independent study.

**Other Competencies Required for the M.A.**

Foreign language (mandatory) – demonstrated competency in the language of the country in which the applicant will work is expected. The language requirement may be met by analysis and translation of historical documents in a language other than English, or translation into English of three scientific articles from peer-reviewed journals pertaining to the professional practice of anthropology published originally in a foreign language.
Nine graduate-level credits outside of Anthropology (mandatory) – These may be from a suggested list of electives and/or may be designed as a graduate cognate by the student with guidance from the advisor.

**Professional Certification of Competency**

Certificates of Proficiency (optional) – These may be gained in professional competency courses offered in conjunction with institutions in the student’s area of professional specialization. Credit hours may be earned if the student completes the certification as an independent study, part of an internship program, or fieldwork course.

**Thesis Option**

Written Master's Thesis (optional) - The thesis option will require the production of a written document as part of the minimum requirements in this track. The thesis research and writing credits may serve as part of the residency requirement if the student is in residence during the course. Thesis requirements will conform to the University of Miami’s standards and format.

**ACADEMIC STANDING**

Graduate students are expected to maintain an overall GPA of 3.0 in all coursework. Should the average fall below that mark in a semester, the student will be notified and work with his/her advisor to rectify the performance problems. If the student has a second consecutive semester with an average GPA below the 3.0 standard, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program at the discretion of the Chair and in discussion with the student and his/her departmental advisor in accordance with guidelines for the University’s Graduate College.

For additional program information, please visit [http://www.as.miami.edu/anthropology/](http://www.as.miami.edu/anthropology/).

**Art and Art History**

http://www.as.miami.edu/art

**Degree Programs**

**One program serves the needs of graduate students in Art and Art History.**

- Master of Fine Arts program in the studio areas of
  - Painting
  - Sculpture
  - Ceramics/Glass
  - Printmaking
  - Photography/Digital Imaging

**Master of Fine Arts**

The Master of Fine Arts degree is the terminal degree for students interested in the creation of art who plan to pursue careers as practicing artists/teachers.

The students will take a minimum requirement of 60 credit hours in approved graduate courses (at the 600 level or above).

Teaching assistants should take 10 credit hours each semester.

A Supervisory Committee will be assigned when the student is formally admitted to the program.

- It will be comprised of at least four members.
- The Supervisory Committee chair will be from the student’s area of concentration and be a tenure track faculty member.
- The head of the Supervisory Committee will select the membership of the Committee after conferring with the student.
- The Supervisory Committee will formally review the student’s progress; the student may be put on probation at the end of any semester, and given one semester to improve or be removed from the program.

Application for candidacy may be made any time after the completion of 30 credit hours, but must be attained prior to registration for the final semester.

- The Supervisory Committee will determine whether the student should be admitted to candidacy.
- When the student is admitted to candidacy, a Thesis Committee is formed with at least four members, who need not be the same as the Supervisory Committee.
- The Chair should be from the student’s area of concentration and be a tenure track faculty member.
- Two others should be department faculty, and the fourth person must be from outside the studio faculty.
- This committee will consult with and advise the student on his or her work, meet twice a semester to review progress, read and comment on the thesis document, and conduct a final oral exam during the thesis exhibition.
- The thesis exhibition will be scheduled after the successful completion of ART 699; the show will be installed after the candidate has submitted an accepted written document. All incompletes must be cleared before the exhibition can be scheduled.
- No student gains the right to be recommended for the degree simply by completing the course requirements. This right is reserved to the students Thesis Committee in coordination with the Graduate Program Director.

Applicants for admission to the Master of Fine Arts program are responsible for the submission of the following materials to the Graduate Secretary in Art and Art History:

1. All transcripts of college-level academic work
2. 20 images of studio work; Instructions for submitting the portfolio are on the department website [www.miami.edu/art](http://www.miami.edu/art)
3. Three letters of recommendation
4. Application form
5. A letter of intent
6. The GRE test is not required for being considered for admission to the MFA program or for a teaching assistantship; however there are other possible fellowships offered by the University that might require the GRE. For more information contact the department or the Graduate School.
7. Applicants for MFA degrees are considered in the Spring for the upcoming Fall semester. February 15 is the deadline for receipt
of applications. The deadline for international applications for the upcoming Fall semester is January 15.

**Biology**

http://www.bio.miami.edu

Dept. Code: BIL

**Degree Programs**

**Application for Admission**

Applications are due December 1.

In applying for admission, applicants must select either the Master's or the Ph.D. track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master's track, but wish to change to a Ph.D. track without completing the Master's may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant's file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master's track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must:

2. Send hardcopies of the following to the Coordinator of Graduate Studies in Biology, Department of Biology, 1301 Memorial Drive, Coral Gables, FL 33146 USA.
   - Originals of all undergraduate and graduate official transcripts (photocopies are not accepted)
   - Official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; the Biology subject matter test also is recommended (photocopies of scores are not accepted)
   - International applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English) official scores (photocopies of scores are not accepted)
3. Send digital copies of the following to the Coordinator of Graduate Studies in Biology (gradcoord@bio.miami.edu)
   - A cover letter that identifies interests, suggests possible research projects, states career goals and identifies a UM Biology faculty sponsor
   - Copies of any research papers (e.g., publications, manuscripts, senior reports, etc.)
4. Letters of recommendation from three science instructors/supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential should be sent by email to the Coordinator of Graduate Studies in Biology at gradcoord@bio.miami.edu
5. Request UM Biology faculty sponsor submit a memo of support by email to the Coordinator of Graduate Studies in Biology (gradcoord@bio.miami.edu). Applicants MUST secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor

A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense in early January of the year of admission.

*Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.*

**Degree Requirements**

All students are required to satisfy the general requirements for the appropriate degree that are listed in the Graduate Studies Bulletin, whether or not they are listed among the Biology requirements.

**Implementation**

All Graduate students will be reviewed each spring semester by GAAC.

1. The advisor will review the student's progress to date.
2. The student will provide updates for a student progress database every February.
3. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
4. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
5. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
6. Possible outcomes of the review:
   - a. Student making satisfactory progress
   - b. Student not making satisfactory progress; recommendations for improvement
c. Student not making satisfactory progress; his/her tenure terminated.

**Financial Support**

1. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
2. Master’s degree students usually are not eligible for departmental stipends or tuition remission.
3. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data. Students who choose not to present at the annual departmental graduate student symposium may be considered as not in good standing.
4. Students holding full fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

**Masters**

**Masters Programs in Biology**

- M.S. in Biology with Thesis (Three Year Program) (p. 389)
- M.S. in Biology without Thesis (Two Year Program) (p. 390)

**Doctoral**

**Doctoral Program in Biology**

- Ph.D. in Biology (p. 391)

**M.S. in Biology with Thesis (Three Year Program)**

1. Credit hours: a total of 30 credit hours are required:
   - 24 course credit hours, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area; they are encouraged to select courses and independent studies that will prepare them for research, as listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 24 course credit hours:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 675</td>
<td>Advanced Study in Plant or Animal</td>
<td>1-6</td>
</tr>
<tr>
<td>BIL 678</td>
<td>Current Topics in Biological Research</td>
<td>1</td>
</tr>
</tbody>
</table>

   At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
   - 6 research credit hours (BIL 810); no more than 6 M.S. research credit hours are allowed.
   - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Research Proposal: public presentation and successful defense to the committee of a written research proposal. The public presentation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
3. Admission to candidacy is made by recommendation of the committee.
4. Thesis: A well-written and successfully defended thesis of publishable quality; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation.
5. Other requirements described under "The Master’s Degree," including but not limited to:
   - a total of at least 30 credit hours (course credit hours plus research credit hours). The Graduate School and the Department concur in requiring at least 24 course credit hours and exactly 6 research credit hours (BIL 810) for a thesis M.S.
   - once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 820) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hour normally applies to this course.

6. About the committee:
   - A single committee will combine the responsibilities of the supervisory and thesis committees.
   - The supervisory committee will be determined by the student in consultation with his or her advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The thesis committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The thesis committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
   - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should consult with the committee about major changes in research goals and about problems. Memos summarizing each meeting should be in the student’s file and emailed to the Graduate Director (graddirector@bio.miami.edu).

7. About the time table:
   - A written thesis proposal is due no later than the middle of the second semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.
   - Admission to candidacy normally occurs after completion of one year or 12 credit hours of graduate work and successful defense of the thesis proposal.
• Analysis of data and a polished draft of the thesis should be completed and in the hands of the committee by the middle of the sixth semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.

• Defense of the thesis and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the sixth semester unless an extension has been approved by the Graduate Admissions and Advisement Committee (GAAC) upon recommendation of the thesis committee. Notice of the defense must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.

• The oral defense of the thesis must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.

• No student may receive the degree in the same semester in which she/he is admitted to candidacy.

• The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.

• Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support.

8. Completed SACS evaluation forms are required at two points during the course of study. One following the research proposal defense and the final following defense of the thesis. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

M.S. in Biology without Thesis (Two Year Program)

1. Credit hours:

• A total of 36 course credit hours are required by the Biology Department, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area, listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 36 course credit hours.:

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 675</td>
<td>Advanced Study in Plant or Animal Sciences</td>
<td>1-6</td>
</tr>
<tr>
<td>BIL 678</td>
<td>Current Topics in Biological Research</td>
<td>1</td>
</tr>
</tbody>
</table>

At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

• The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Admission to candidacy is made by recommendation of the committee.

3. Passing a written comprehensive exam given by the committee.

4. About the committee:

• A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

• The examination committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student’s advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.

• The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.

• Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student’s file.

5. Other requirements described under "The Master’s Degree."

• Note that although the Graduate School requires only 30 credit hours for an M.S. degree, the Department requires 36 course credit hours for a non-thesis M.S.

6. About the time table:

• Admission to candidacy normally occurs after completion of one year or 12 credit hours of graduate work.

• The comprehensive exam must be passed by the end of the fourth semester.

• No student may receive the degree in the same semester in which she/he is admitted to candidacy.

• The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.

• Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support.

7. Completed SACS evaluation forms are required following the comprehensive exam. The student is responsible for providing blank forms to the committee. The graduate advisor is responsible for
Ph.D. in Biology

1. Credit hours: a total of 60 credit hours (including both course and research credit hours) beyond the Bachelor’s degree are required:
   • At least 18 course credit hours that are not from the independent study series, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. The independent study series is:
     | Course Code | Course Title                          | Credits |
     |-------------|---------------------------------------|---------|
     | BIL 675     | Advanced Study in Plant or Animal Sciences | 1-6     |
     | BIL 678     | Current Topics in Biological Research  | 1       |
   At times these course numbers are used by professors to teach a new course or a special topics course, however, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
   • At least 12 research credit hours (BIL 830 and/or BIL 840). Once the overall number of required credit hours (see below #8) has been reached, there is no need to take additional research credit hours.
   • An additional 30 credit hours from any combination of graduate courses (600 level regular courses and independent study courses) and research credit hours (800 level) to bring the total number of credit hours beyond the Bachelor’s Degree to 60 credit hours. (One example: 18 required course credit hours + 12 required research credit hours + 15 additional course credit hours + 15 additional research credit hours = 60 total; another example would be 18 additional course credit hours and only 12 additional dissertation credit hours, etc.)
   • Students who already have a Master’s Degree in the same field may not need as many course credit hours (consult Graduate School rules on transfer credit hours), but at least 24 credit hours must be taken in residence at UM.
   • The committee may decide that students with previous graduate level courses may be exempt from some of the course requirements.
   • The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."
   • CONCEPTUAL AREAS: Students are encouraged to take courses and independent studies from at least 3 main conceptual areas, and are urged to take courses and independent studies that will prepare them for research and for the comprehensive qualifying exam. Students also are encouraged to participate in seminars and study groups and to take special courses in other departments of UM, at our Coalition for Excellence in Tropical Biology partner institutions, from the Organization for Tropical Studies, or other special interdisciplinary courses. Such courses should be appropriate to their course of study and research area as determined by their committee. Conceptual areas offered in our department include: EVOLUTION (graduate level evolution courses are in the 620’s series); ECOLOGY (graduate level ecology courses are in the 630’s series), BEHAVIOR (graduate level behavior courses are in the 640’s series); GENETICS AND MOLECULAR BIOLOGY (graduate level genetics and molecular biology courses are in the 650’s series); and PHYSIOLOGY AND CELL BIOLOGY (graduate level physiology courses are in the 660’s series). Special concentrations in our department and/or in collaboration with other departments include: Tropical Biology, Mathematical Ecology, Neuroscience, and Behavior.

2. Comprehensive qualifying exam should be passed by the end of the third semester.
   • A single committee (see number 9 below about committee membership) will advise the student on both comprehensive and research training. To fulfill the comprehensive function, the committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above).
   • To establish intellectual communication between the committee members and students early on, the committee will begin to work with the student in the first semester. Faculty will suggest reading lists, courses and/or independent study, as needed, to prepare the student with sufficient background for the comprehensive examination which will include 3 areas, one of which is the research area. The committee and student will interactively define the scope of comprehensive training and thus of the comprehensive examination in these 3 areas.
   • The comprehensive examination will be held in the third semester. The committee will designate a chair to administer the examination. The chair of the comprehensive examination will not be the graduate advisor. The written part of the exam will not be open book and it will be administered on campus for a discrete period of time (up to 4 hours within each of two consecutive days) by the examination chair. All members of the committee will grade all the questions. With committee approval, an alternative is to present to the committee a first-authored, publishable, full-length article manuscript concerning research conducted since matriculation at UM. Before the end of the third semester, the manuscript must be submitted to a journal approved by the committee (refer to the Department of Biology Graduate Student Handbook for additional details concerning the alternative qualifying exam). After the committee has read the written answers or manuscript, about one week later there will be an oral exam for the purpose of further exploring the student’s grasp of the subject matter.
   • Each committee member will decide on a pass/fail grade based on the total performance (written plus oral). For the student to pass the examination, 3 of the 4 examiners must vote a grade of pass. An oral and written summary of the committee’s evaluation must be prepared by the chair of the examination committee and given to the student and to GAAC. If the student does not pass the examination, there will be a chance to retake it the following semester. In the case of failure a second time, he/she will be terminated from the program.
   • At time of completion of the oral examination the examination committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

3. Research proposal: public presentation of a research proposal and defense of a written research proposal to the complete research committee (see below) should be completed by the middle of the fourth semester. Students are encouraged to follow the format of a grant proposal to a major funding agency. At the proposal defense, the student will receive either a pass or a fail. A grade of pass will
be recorded if no more than one member of the complete research committee (see below) votes to fail the student. If the student fails the proposal defense, she/he will be given a second chance to defend no later than the sixth week of the fifth semester. If the defense is failed a second time, the student will be terminated from the program. At time of completion of the proposal defense the complete research committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

4. Admission to candidacy: (application is made on a form available in the grad school and in the department). This normally will occur at the end of the fourth semester. Requirements are to pass the comprehensive examination and to successfully defend a written research proposal and to have complete SACS evaluation forms from both the qualifying exam and the proposal defense on file.

5. Teaching: All students on the Ph.D. track in Biology are required to serve satisfactorily at least one semester as a teaching assistant in one of the courses offered as part of the Department’s training program.

6. Grants: Submission of a grant proposal to a major funding agency (e.g., NSF, NIH, National Geographic, World Wildlife Fund, etc.) is required. All students are required to seek outside funding for their research. This must be a research project proposal. Application for an NSF pre-doctoral fellowship does not meet this requirement, but application for an NSF dissertation improvement grant does qualify.

7. Ph.D. Dissertation: A well-written and successfully defended dissertation containing an original contribution to the field and of quality appropriate for publication in a scientific journal; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation. A public dissertation seminar also is presented at the time of the defense. Following the defense the committee is required to provide the Graduate Director with a completed SACS evaluation form.

8. Other requirements described under "Doctor of Philosophy,” including but not limited to:

• a total of at least 60 credit hours (course credit hours plus research credit hours).

• once a student has completed all required credit hours, she/he must enroll in "Research in Residence” (BIL 850) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hours normally applies to this course.

9. A single committee will advise the student on both comprehensive and research training. The committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above). The research function of the committee is to advise the student on research, including preparation, training, project choice, project design, implementation and evaluation of the research. The committee will go through several phases and its membership will be determined by the advisor and student together, contingent upon approval of GAAC and/or the Graduate School, as appropriate at each phase:

• The initial committee will consist of at least 4 faculty, 2 appointed to ensure breadth of training (from two areas outside the research area) and 2 from the research area. It will be formed to help the student choose courses during the first few weeks of the first semester. This committee will decide whether students having a M.S. in biology (botany, zoology, etc.) from another institution can substitute a graduate level course taken elsewhere for a departmental course requirement; it also will decide which additional courses should be taken for both research and breadth. The choice of areas briefly will be outlined in a memo to GAAC.

• The initial committee of at least 4 faculty will be responsible for preparing and administering the comprehensive examination.

• The complete committee of at least 4 faculty including one from outside the department, should be formed by the end of the third semester; all four members should participate in the proposal evaluation which will take place in the fourth semester. The committee will consist of a minimum of four faculty, which includes the committee chair, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty.

• The dissertation committee (of four) is formed officially when the student is admitted to candidacy. It usually will comprise the same individuals as the complete research committee, or it may be formed anew. The student and advisor consult on the membership of the committee, and the department nominates the committee to the graduate school. The committee will consist of a minimum of four faculty, which includes the committee chair who is the advisor, who must be a member of the Graduate Faculty. Of the remaining members, it also is required that two shall be from the Graduate Faculty and one from outside the department of concentration. The dissertation committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.

• Committee meetings are required at least once a year (recommended at least once a semester in the early phases). The student is responsible for arranging meetings; the student should consult with the committee about any major changes in research goals and any problems; memos summarizing each meeting should be in the student’s file.

10. About the time table:

• The written comprehensive qualifying examination must be passed by the end of the third semester.

• A polished, written dissertation proposal must be defended to the committee in the fourth semester together with a public presentation of the proposal. This must take place by mid-April of the spring semester or mid-November of the fall semester.

• Admission to candidacy normally occurs after the comprehensive qualifying exam and proposal defense are passed upon the recommendation of the committee and the approval of the Graduate School. Application for admission to candidacy is made to the graduate school on a special form.

• Analysis of data and a polished draft of the dissertation should be completed and in the hands of the dissertation committee no later than the middle of the tenth semester.

• Defense of the dissertation and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the tenth semester unless an extension has been approved by GAAC upon recommendation of the dissertation committee. Notice of the defense and of the public seminar must be submitted on a special form to the graduate
school in advance of the defense and must be posted publicly in the department.

- The oral defense of the dissertation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
- No student may receive the degree in the same semester in which she/he is admitted to candidacy.
- The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.
- Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour, and explicitly should address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support of the student beyond the 10 semesters of normal departmental support.

11. Public presentations must be during regular semesters. The public presentation associated with the defense of the proposal and the public seminar associated with the defense of the dissertation must be given during regular sessions of Fall or Spring semesters, not during summer sessions, inter-sessions, reading days, or finals weeks.

12. Completed SACS evaluation forms are required at three points during the course of study. One following the qualifying exam, one following the proposal defense and the final following defense of the dissertation. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

Chemistry

http://www.as.miami.edu/chemistry

Dept. Code: CHM

Degree Programs

Prospective graduate students are expected to have completed, during their undergraduate training:

The candidate must hold a B.S./B.A. degree from an accredited institution. Consideration is given to applicants who have successfully completed general chemistry (two semesters), organic chemistry (two semesters), physical chemistry (two semesters), and the related laboratories. A course in advanced inorganic chemistry is strongly recommended, and remedial work in this area may be required of students who have not taken such a course. The mathematics and physics courses that are normally included in a B.S. program in chemistry are also required.

Undergraduate deficiencies are treated as such and must be overcome during the first year of graduate study.

Masters

Masters Program in Chemistry

- M.S. in Chemistry (p. 393)

Doctoral

Doctoral Program in Chemistry

- Ph.D. in Chemistry (p. 393)

M.S. in Chemistry

The MS degree requires a minimum of 30 credit hours.

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

- The required number of credit hours in the chemistry seminars (CHM 779) and Introduction to Research (CHM 785) must be taken in the first and second year.
- The required number of credit hours in research (CHM 810) must be taken in the second year.
- A dissertation based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the second year.

The M.S. degree may be earned with or without a thesis.

In order to complete a MS degree without thesis, an advanced comprehensive exam must be passed.

The exam is administered at the end of the second year in the program.

Ph.D. in Chemistry

The general requirements for the doctorate in Chemistry are set forth in this Bulletin under the heading Doctor of Philosophy. The Department of Chemistry has the following specific requirements:

The PhD degree requires a minimum of 60 credit hours. The department will cover tuition costs up to 60 credit hours for students on assistantships and fellowships.

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

- The required number of credit hours in the *chemistry seminar* (CHM 779) must be taken in the first and second year.
- The required number of credit hours in Introduction to Research (CHM 785) must be taken in the first year.
- The required number of credit hours in the *chemistry seminar* (CHM 780) must be taken in the fall semester of the third year.
- The required number of credit hours in *Pre-candidacy Doctoral Dissertation* (CHM 830) must be taken in the first, second, third and fourth year.
- The required number of credit hours in *Post-candidacy Doctoral Dissertation* (CHM 840) must be taken in the fourth year.
- An *Oral Comprehensive Exam* must be passed before the end of the spring semester of the second year.
- An original *research proposal in Problems in Research Planning* (CHM 788) must be presented and defended before the end of the spring semester of the third year.
- A *Doctoral Dissertation* (CHM 780) based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the fifth year.

### Five-Year B.S. and M.S. in Computer Science

This program is open only to currently enrolled Computer Science undergraduates.

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science (p. 82), and the requirements for a 30 credit hour Master of Science in Computer Science with thesis (p. 395). No credits may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:
  - CSC 120  Computer Programming I  4
  - CSC 220  Computer Programming II  4
  - CSC 314  Computer Organization and Architecture  3
  - CSC 317  Data Structures And Algorithm Analysis  3
  - CSC 427  Theory Of Computing  3
  - MTH 161  Calculus I  4
  - MTH 224  Introduction to Probability and Statistics  3
  - MTH 309  Discrete Mathematics I  3
  - Total Credit Hours  27

- They have completed 3 credit hours of CSC 410/CSC 411 in a research-oriented project.
- They have a GPA of at least 3.0 in the CSC courses taken towards their BS in Computer Science.
- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.
- Students in the MS-phase must complete 3 further credit hours of CSC 410/CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take 600/700 level courses that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree. Students in the MS-phase must submit their GRE scores before they are admitted to graduate student status.
- Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time...
they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

**M.S. in Computer Science**

The Master of Science program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

**Prerequisites for Admission**

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 120</td>
<td>Computer Programming I</td>
<td>4</td>
</tr>
<tr>
<td>CSC 220</td>
<td>Computer Programming II</td>
<td>4</td>
</tr>
<tr>
<td>CSC 314</td>
<td>Computer Organization and Architecture</td>
<td>3</td>
</tr>
<tr>
<td>CSC 317</td>
<td>Data Structures And Algorithm Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CSC 427</td>
<td>Theory Of Computing</td>
<td>3</td>
</tr>
<tr>
<td>MTH 161</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MTH 224</td>
<td>Introduction to Probability and Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MTH 309</td>
<td>Discrete Mathematics I</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 27

Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.

**Requirements for Graduation**

Students must complete the Graduate School requirements, and the Departmental requirements described here.

<table>
<thead>
<tr>
<th>Option</th>
<th>Minimum Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thesis Option</td>
<td>30-36</td>
</tr>
<tr>
<td>Coursework Option</td>
<td>31-42</td>
</tr>
</tbody>
</table>

**Thesis Option**

- CSC 810: Master’s Thesis 1-6
- Select a minimum of 9 credit hours from approved CSC7XX courses
- Select 15 credit hours of approved courses

**Coursework Option**

- Select a minimum of 18 credit hours from approved 700 level courses
- Select 18 credit hours from approved courses

Total Credit Hours 31-42

For both options, at least 18 credit hours must be from CSC 6XX and CSC 7XX courses, and may not include more than 6 credit hours from CSC 670.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designee. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.

**Ph.D. in Computer Science**

The Doctor of Philosophy program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

**Prerequisites for Admission**

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 120</td>
<td>Computer Programming I</td>
<td>4</td>
</tr>
<tr>
<td>CSC 220</td>
<td>Computer Programming II</td>
<td>4</td>
</tr>
<tr>
<td>CSC 314</td>
<td>Computer Organization and Architecture</td>
<td>3</td>
</tr>
<tr>
<td>CSC 317</td>
<td>Data Structures And Algorithm Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CSC 427</td>
<td>Theory Of Computing</td>
<td>3</td>
</tr>
<tr>
<td>MTH 161</td>

<tr>
<td>MTH 224</td>
<td>Introduction to Probability and Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MTH 309</td>
<td>Discrete Mathematics I</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 27

Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.

**Requirements for Graduation**

Students must complete the Graduate School requirements, and the Departmental requirements described here.

**Written Qualifying Exam**

The student must pass a three-hour written exam of general knowledge of Computer Science at the end of the first year. Upon failure, the student may petition the CSGC to allow a second attempt at the end of the second year. The exam will be administered once a year in the early weeks of the summer session. It will cover expected knowledge of all first-year graduate students. Included in this material are a fundamental understanding of algorithm analysis and design, advanced skills in programming, basic knowledge of computer architecture, and a general understanding of computer systems.

**Classroom Courses**

In the first two years, the student must take eight CSGC-approved classroom courses, for a total of 24 credit hours. At least four of these courses (12 credit hours) must be CSC 7XX courses. The eight courses must include two courses from each of the areas of Analysis, Applications, and Systems. The student must work with the Director of Graduate Studies to select a cohesive set of courses as approved by the CSGC. The CSGC will have sole authority in designating the areas to which each course belongs. In the case that a course is designated in more than one area, a student may apply the course to only one area. The designation of current CSGC-approved courses appears at the end of this description.
Selecting an Advisor
By the end of the second semester, the student must find a research supervisor. By the end of the third semester, the student must have made significant progress on a research project under the supervision of a faculty member. The student must write a detailed progress report that will become a public document and shall be kept on file by the Department. The student must present the report to a quorum of the CSGC at a time to be approved by the chairman of the Department. The supervisor and CSGC must approve the project as applicable toward candidacy for a Ph.D.

Annual Presentations
After passing the written comprehensive exam, the student must make a public oral presentation to the Department at least once per year. These presentations include the thesis proposal and the thesis defense. The goals are to develop the student’s oral and presentation skills, to provide a means for the Department to check the research and progress of the student, and to present the opportunity for feedback to improve the student’s research.

Teaching Experience
Each student must teach a lab-based course for a minimum of one semester. Lab-based courses typically require the student to present material in a relaxed lecture format, re-emphasizing material learned in the general lecture as well as introducing new material to the students.

Creative Writing
http://www.as.miami.edu/english

Degree Programs
The Department of English offers a two-year program in fiction- or poetry-writing leading to the Master of Fine Arts degree. The program provides an opportunity for students of superior ability in imaginative writing to develop their skills and critical judgment through the practice of writing and the study of literature.

The Creative Writing Program is a member of the Associated Writing Programs.

For further information, please consult the description of the M.F.A. in English, which may be found on the English Department Web site under Creative Writing.

English
http://www.as.miami.edu/english

Dept. Code: ENG

Degree Programs
The Ph.D. program in English (p. 397) is an innovative scholarly course of study offering substantial work in all areas of English, American, and Transnational literature, including Anglo-Irish literature, with some opportunities for advanced work in comparative literature.

Doctoral

Doctoral Program in English
- Ph.D. in English (p. 397)

Ph.D. in English
http://www.as.miami.edu/english

1. Courses
   Ph.D. students must complete 54 credit hours (if entering with a B.A.) or 36 credit hours (if entering with an M.A.) of 600-level courses in literature and literary theory.

2. Language Requirements
   A basic reading knowledge of two foreign languages or an advanced reading knowledge of one foreign language is required.

3. Qualifying Examination
   All Ph.D. students are required to pass a qualifying examination. Students may not take the qualifying examination until they have:
   • completed the required Ph.D. coursework,
   • satisfied the foreign language requirement
   • enrolled for ENG 697.

4. Dissertation
   Students may proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been accepted by the committee and approved by the department.

The dissertation itself must be an investigation of a substantial critical or scholarly topic. A final oral defense of the dissertation is required.

Further information on the department’s graduate programs is contained in the Guide to Graduate Study available from the Department of English and posted on the department Web site in the Graduate section.

Students must complete their work within one year of the schedule set out in the Guide to Graduate Study.

Geography and Regional Studies
http://www.as.miami.edu/geography

Dept. Code: GEG

Introduction
Geography is the science of place and space. Geographers ask where things are located on the surface of the earth, why they are located where they are, how places differ from one another, and how people interact with the environment. There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence. Physical geographers study patterns of climates, land forms, vegetation, soils, and water. Thus, Geography links the social sciences and natural sciences.

Geographers use many tools and techniques in their work, and geographic technologies are increasingly among the most important emerging fields for understanding our complex world. They include Geographic Information Systems (GIS), Remote Sensing, Global Positioning Systems (GPS), online mapping such as Google Earth, statistics, and others.

Geographers work in many different areas, such as environmental management, education, disaster response, city and county planning, community development, and more. Geography is an interdisciplinary field that offers diverse career opportunities.

The relevance and prestige of Geography as a discipline was helped enormously during the past 20 years by four key developments:

1. the emergence of “globalization” as a phenomenon requiring analysis and explanation;
2. the increasing recognition of space and place in cognate social and physical sciences;
3. deepening concern for nature-society interactions and issues of environmental sustainability and development; and,
4. the development of geographic information systems (GIS and GIScience) and remote sensing technologies and their widespread adoption by organizations in both the public and private sectors.

In recognition of the importance of these developments, UM Geography emphasizes three major orientations in its M.A. program:

1. environmental analysis,
2. globalization and urban change, and
3. developmental studies

This program provides students with an understanding of the main streams of geographical thought and familiarizes them with research design issues, including quantitative and qualitative research.
methodologies, survey research, remote sensing, and computer mapping and GIScience. Students also are provided with a range of Geography courses at the 500 and 600 levels, and are able to take two courses, if they so choose, in cognate disciplines outside Geography.

Educational Objectives
The MA Program in Geography offers specializations in areas such as:

- Geographic Information Systems and Remote Sensing
- Global Health and Medical Geography
- Urban Geography and International urbanization
- Environmental Studies
- International and Regional Development

Educational Objectives
The MA Program in Geography offers specializations in areas such as:

- Geographic Information Systems and Remote Sensing
- Global Health and Medical Geography
- Urban Geography and International urbanization
- Environmental Studies
- International and Regional Development

Geography offers courses on the Middle East, Africa, South America and other areas.

Geography offers courses that provide training in indispensable skills for everyone entering the present-day labor market:

- Research Methodology
- Statistics
- Computer Cartography
- Geographic Information Systems (GIS)
- Remote Sensing of the Environment

Degree Programs
The Department of Geography offers a Master’s program and a Graduate Certificate in Geospatial Technology. For more information on the M.A. program, please contact Dr. Richard Grant at rgrant@miami.edu or visit the Geography Department’s web page at www.as.miami.edu/geography. For more information on the Certificate Program, please contact terghazar@miami.edu.

Other
Internship Credit Hour
Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center or with the GIS Program Director. Upon approval by the GIS Program Director, 3 to 4 credit hours may be earned with an internship (GEG 635). For more information e-mail terghazar@miami.edu to make an appointment.

Geological Sciences
http://www.as.miami.edu/geology

Dept. Code: GSC

Degree Programs
A 5-year B.S./M.S. degree allows qualified entering freshmen to complete a B.S. in Geological Science and a M.S. in Marine Geology and Geophysics within 5 years.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences.

The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree.

The Certificate requires a minimum of 15 credit hours, including three core courses and two or more electives completed with at least a C grade in each course. Students may also receive up to 6 credit hours toward the certificate for past course work completed at UM or other accredited colleges and universities within the past 3 years.

Note that all courses from the Certificate Program can be double counted toward the MA degree.

Certificates
Certificate in Geography and Regional Studies
- Graduate Certificate in Geospatial Technology (p. 398)

Graduate Certificate in Geospatial Technology
This Certificate Program is designed to benefit students who seek to enhance their skills in geospatial technologies, especially Geographic Information Systems (GIS) and satellite remote sensing. Students will be exposed to standard software tools used in the industry, as well as satellite image data. Students who earn the Certificate will enhance their employment prospects and/or advance their careers in geospatial technology, particularly in job settings that stress the use of satellite remote sensing and vector-based GIS. The Certificate requires a minimum of 15 credit hours, including three core courses and two or more electives completed with at least a C grade in each course. Students may also receive up to 6 credit hours toward the certificate for past course work completed at UM or other accredited colleges and universities within the past 3 years.

Geological Sciences
http://www.as.miami.edu/geology

Dept. Code: GSC

Degree Programs
A 5-year B.S./M.S. degree allows qualified entering freshmen to complete a B.S. in Geological Science and a M.S. in Marine Geology and Geophysics within 5 years.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences.

The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree.
By the spring of their Junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor.

Contact Dr. Harold Wanless at the departmental office (305-284-4253) for more information.

History

http://www.as.miami.edu/history

Dept. Code: HIS

Degree Programs

Requirements for the M.A. Degree in History

Admissions

We are looking for applicants with a record of outstanding achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master's degree from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from applicant’s former professors.
4. Recent Graduate Record Examination scores on the General Test.
5. TOEFL scores (for international students).
7. A detailed statement from the student indicating:
   a. the student’s background and education;
   b. the student’s interests (field, topic, etc.);
   c. why the student wants to pursue a graduate degree in history at the University of Miami;
   d. what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Deadlines

January 5: Applications for admission and aid for Fall semester.

Committee

Upon admission to the master’s program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student’s secondary field, must be formed no later than the student’s second semester in the program. There are then two options for completing the masters. One requires 27 credit hours of coursework and an exam. The other requires 21 credit hours of coursework, a master’s thesis (6 thesis credit hours), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

Requirements

- 27 credit hours at the 600 level or above, of which at least 18 must be at the 700 level or above.
- Passage of an oral exam in two fields.
- Completion of HIS 721 (Historiography). This course is normally given in the fall semester. All students are required to take the Historiography course in their first year.
- Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing a thesis should register for 6 credit hours of HIS 810, which count toward the 27 required credit hours.
- Language Requirements: Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor. See under Ph.D. requirements for more information on fulfilling language requirements.
- The student must apply for graduation in his or her penultimate semester (i.e. fall semester for spring semester).
- The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Though the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive will also act as a thesis defense.

Fields

See Requirements for the Ph.D.

Doctoral

Doctoral Program in History

- Ph.D. in History (p. 399)

Ph.D. in History

Admissions

We are looking for applicants with a record of outstanding academic achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master’s
from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from the applicant’s former professors.
4. Recent Graduate Record Examination scores.
5. For international students, TOEFL scores.
7. A detailed statement from the student indicating:
   a. the student’s background and education;
   b. the student’s interests (field, topic, etc.);
   c. why the student wants to pursue a graduate degree in history at the University of Miami; and
   d. what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Admission from M.A. to Ph.D. Status

Students admitted at the master’s level who are performing well in their studies are encouraged to proceed to Ph.D. status. Advisors who believe that a student should be admitted to the Ph.D. program, and have the consent of the student, inform the DGS of this desire early in the spring semester and at least before the annual departmental meeting reviewing graduate students’ progress. The request is then reviewed by the department at its annual meeting for recommendation to the graduate committee. Students who move from the M.A. to the Ph.D. program are eligible for the same number of years’ aid as students entering the Ph.D. program directly from the B.A., minus the years of aid they have already received. For course requirements, see below.

Deadlines

January 5: Applications for admissions and aid for Fall semester.

Committee

Upon admission to the program, the student is assigned a provisional major advisor. As noted above, students should then concur or select a different advisor by the beginning of the second semester in the program. An advisory committee of four or five, including the major advisor and faculty members representing the second and third fields, must be formed no later than the student’s third semester in the program. It is the responsibility of the student and the advisor to form this committee and notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee will also administer the oral and written comprehensive examinations. Students may change advisor and other committee members throughout the program provided that the faculty member(s) selected agree(s).

Requirements

1. Requirements:
   a. For students entering the Ph.D. program with a B.A., 45 credit hours (5 semesters) of graduate coursework at the University of Miami.
   b. For students entering the Ph.D. program with a masters from another university, at least 27 credit hours (3 semesters) of graduate coursework at the University of Miami.
   c. For students entering the Ph.D. program with a Masters from another program at the U. of M. receive 30 credit hours towards the 60 credit hour requirement.
   d. For students entering the Ph.D. program with a Masters from the History department at the University of Miami, 24 additional credit hours of graduate coursework (to conform to a Graduate School requirement) at the University of Miami.
   e. All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the History Graduate Program at the University of Miami.

2. Completion of HIS 721, included in the above number of credit hours. All students are required to take the Historiography course in their first year.

3. Completion of HIS 701 and HIS 702 (the two-semester Research Seminar), included in the above number of credit, at least once. Typically, students take HIS 701 and HIS 702 in their 2nd and 3rd semesters in the program.

4. Passage:
   a. Passage of a major field in written and oral exams.
   b. Passage of a 2nd field in written and oral exams.
   c. Passage of a 3rd field in written and oral exams.

5. Following completion of course credit hours, students will need to take sufficient dissertation research credit (HIS 830 if before the comprehensives have passed; HIS 840 after the comprehensives have been passed) to reach a total of 60 credit hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credit hours. Students who enter the Ph.D. program with an M.A. from another university or from another program at the U. of M. receive 30 credit hours towards the 60 credit hour requirement.

The required credit hours of coursework are only the formal minimum. Although course work is necessary preparation for the comprehensive examination, students are examined on the mastery of fields of knowledge rather than courses. The number of courses taken depends on the student’s background, choice of fields, nature of related work, language skills, etc. Courses should be selected only after consultation with the Major Advisor.
Incompletes
All incompletes from the fall semester must be made up by the official end of the following spring semester. All incompletes from the spring semester must be made up before the official start of the subsequent fall semester. No student will be allowed to proceed to exams until all incompletes have been made up.

Languages Requirement
Reading knowledge of at least one foreign language is required. More than one foreign language may be required if the major advisor deems it necessary. The Modern Languages and Literatures Department administers examinations in the languages that it teaches and offers preparation courses in a handful of languages. Students may contact the DGS for the various options for taking courses in foreign languages. Students must, in conjunction with their advisor, prepare a plan that specifies how they will demonstrate language proficiency. The language requirement must be completed before a student can take the comprehensive examinations (see below).

Comprehensive Examinations
It is the responsibility of the student and major advisor to organize the comprehensive examinations. Students may take them at any time of the year that classes are in session. Arrangements for the exams, including selection of their dates and a final list of committee members, should be made by the end of the first month of the semester in question, with notification to the Department Chair and DGS.

The student takes the written part of the examinations in three history fields, which are normally administered over a period of two successive weeks. The portion for each field is four hours in duration. Only after the advisory committee deems that the student has successfully passed the written portions for each field is the student permitted to take the oral part of the examination.

The oral section covers the three history fields and is approximately two hours in duration. The prospectus may form part of the discussion, but the examination will focus on coverage of the fields. The committee consists of at least three faculty members.

The student advances to candidate status after passing the comprehensive examinations and submitting an acceptable dissertation prospectus.

Students who have not already received a master’s degree from the University of Miami will be awarded an M.A. upon successful completion of their doctoral comprehensive exams.

Dissertation
After passing the examinations, students form a dissertation committee. This may be the original advisory committee, but it may also be revised to meet the needs of the dissertation work. The students, in consultation with the Major Advisor, put forward the names of individuals suggested to serve on the dissertation committee. The committee must be comprised of at least three members within the department and one outside the department. The committee is then approved and appointed by the dean of the graduate school.

The dissertation must make a significant contribution to the candidate’s field of specialization. It must meet the highest standards of research, substance, and form, and demonstrate an ability to conduct and report independent and original scholarly investigation.

The student must apply for graduation in his or her penultimate semester (i.e. fall for spring semester).

Upon completion of the dissertation and its tentative approval by the dissertation committee, the student takes a final oral examination that is a "defense" of the dissertation and that lasts for approximately two hours. It is open to the university community. Following the defense of the dissertation, the dissertation committee will render its decision to accept or reject the dissertation. Approval of the dissertation must be indicated by the signature of all members of the dissertation committee.

Fields
Chronological/Geographical fields:
- Medieval Europe
- Early Modern Europe
- Modern Europe
- Early American History
- Modern U.S. History
- Colonial Latin America
- Modern Latin America
- East Asia
- Russia
- Africa
- Caribbean

Topical Fields. These must cover either two of the geographic or two of the temporal fields listed above:
- African Diaspora
- Race and Ethnicity
- Gender and Sexuality
- History of Religion
- History of Science and Medicine
- History of Crime and Law
- Political History
- Diplomatic History
- Urban and Environmental History
- Economic History
- Business History
- Labor History
- History of Sport
- Military History
- Cultural and Intellectual History
- Public History
- Atlantic World

Customized Fields:
Students may create their own fields in consultation with their advisory committee. The student opting for this approach must file a plan of study listing relevant courses, the faculty member(s) involved, and the rationale.
To pursue the individualized concentration, the student must obtain written approval of the plan by the major advisor, DGS, and the Department Chair.

The plan and signed approvals are placed in the student's file. With rare exceptions, a customized field may not be the major field of study.

International Administration

http://www.miami.edu/maia

The Master of Arts in International Administration (MAIA) program offers a comprehensive graduate degree designed to prepare students for careers in the administration of International public and private organizations. Career options include government, multinational corporations (MNCs), non-governmental organizations (NGOs), as well as the for-profit sector. Unlike conventional "international affairs" programs, MAIA equips graduates with both operational skills and a solid conceptual background to produce theoretically capable practitioners. The degree is awarded by the College of Arts and Sciences.

MAIA is an interdisciplinary program which collaborates with faculty members from twelve (12) University departments. Drawing from the best academic resources of the University of Miami and from highly skilled professionals, students receive instruction in areas such as diplomacy, geopolitics, economics, finance, religion, communication, political science, management, public health, and international studies. The program allows students to select an area of specialization to complement their professional goals. Concentration options include International Business, Public Health, Strategic Communications, Geographical Information Systems, Security Management, and a General Track. Together with a thorough co-curricular professional development itinerary and an internship component students emerge with the expertise needed to further their career in a vast array of exciting fields.

For additional program information and a complete list of MAIA faculty and staff, please visit us at www.miami.edu/maia (http://www.miami.edu/maia).

Dual Degree Program: MAIA/MPH

The Master of Arts in International Administration/Master of Public Health (M.A.I.A./M.P.H.) degree is offered jointly by the University of Miami College of Arts and Sciences and University of Miami Miller School of Medicine's Department of Public Health Sciences. The MAIA degree with a second master's degree in public health is designed for students who seek an in-depth knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development. Students enrolled in this joint program can expect to complete both degree requirements within two and a half (2.5) years.

Masters

Masters Program in International Administration

• M.A. in International Administration (p. 402)

M.A. in International Administration

Core Requirements

• Six (6) core courses are required of all MAIA students.
• Students then complete the degree with three (3) graduate-level electives/nine (9) credit hours, which may be chosen from among other UM graduate offerings.
• Finally, all MAIA students must enroll in and complete a practicum, details of which are described below.

The core courses are taught in an integrated fashion, designed to give students the maximum learning experience.

In the core courses, students will

1. develop skills in writing, speaking, and numerical and historical analysis
2. learn how to collect, interpret and report social, political, and economic data
3. increase skills in methods of research and communications
4. master strategic and tactical thinking and negotiation
5. build practical and theoretical knowledge in international relations, international economics, intercultural communication, and administration in an international context

<tr>
<td><strong>Total Credit Hours</strong></td>
<td><strong>21</strong></td>
</tr>
</tbody>
</table>

The purpose of the practicum is to give students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students are expected to complete the practicum with a minimum time commitment of at least two-hundred (200) hours. Participation in the spring clinics with topics ranging from public speaking to human resources are an integral component of the course. A final report/case study analysis is required as part of successful completion of the practicum. A fuller guide to the practicum and the requirements for the practicum is provided to students by the MAIA Office.

Other Requirements for Graduation

In addition to completing thirty (30) credit hours at the graduate level, which must include the six (6) required core courses, the practicum course and nine (9) elective credit hours, students must satisfy the following additional program requirements:

• Co-curricular Seminars in information technology (IT) which includes training in the statistical software SPSS as an introduction to program evaluation/assessment methodology, as well as seminars in diplomatic protocol, media relations, budgeting for non-profits, public speaking, and public policy analysis.
The Department of International Studies offers interdisciplinary social science programs leading to the Ph.D. and MA degrees. Ph.D. and MA programs offer advanced students the opportunity to study issues such as globalization, democratic governance, comparative and international political economy, post-Cold War conflicts and security threats, and new forms of civil society mobilization in world politics. To organize the study of these debates in the social sciences, the Department offers three fields of specialization:

- **International Relations**: international relations theory; globalization; social movements beyond the nation-state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.

- **Comparative Politics**: theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship, comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.

- **International and Comparative Political Economy**: the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; and international economic theory.

### Masters

#### Masters Program in International Studies

- **M.A. in International Studies**

### Doctoral

#### Doctoral Program in International Studies

- **Ph.D. in International Studies**

#### M.A. in International Studies

The Department’s MA program prepares students for careers in international diplomacy, business, trade and finance, for service in government and non-governmental organizations and international institutions, and with the necessary degree and academic training to enter a doctoral program. The requirements include:

- Complete ten semester courses (30 credit hours).
- Complete two graduate courses on social science methodology.
- Complete one core seminar in one of the Program’s fields of study, including:
  - International Relations;
  - Comparative Politics;
  - International and Comparative Political Economy.
- Pass a foreign language examination.
- Thesis and Non-thesis options: MA candidates with a cumulative grade point average of at least 3.5 may opt to write a thesis; all students have the option of completing the degree by writing two research papers in lieu of the thesis.

See the [INS Graduate Student Handbook](http://www.as.miami.edu/international-studies/) for a complete description of the requirements for the MA degree.

#### Ph.D. in International Studies

The Department’s Ph.D. program’s primary objective is to prepare a select group of highly qualified doctoral students for careers in academic teaching and research. The requirements include:

- Complete a total of 66 degree credit hours (12 semester courses) to obtain the Ph.D. degree (i.e., 36 credit hours at the doctoral level beyond the MA degree).
- Complete one seminar on quantitative methods and one seminar on qualitative methods in the social sciences.
- Complete a sequence of two core seminars in two of the Program’s three major fields of study:
  - International Relations;
  - Comparative Politics; and
  - International and Comparative Political Economy.
- Pass
  a. written MA exam in one of the Program's three fields of study and
  b. written and oral examinations in two of the Program’s three fields of study.
- Complete at least one of the basic core seminars in the third (non-examination) field.
- Complete the Doctoral Workshop.
- Successfully defend a dissertation proposal/prospectus.
- Pass a foreign language examination.
- Complete 12 dissertation credit hours.
- Research, write and orally defend a dissertation that makes an original contribution to knowledge.
The Master of Arts in Latin American Studies is a 30 credit hour interdisciplinary degree characterized by a high degree of flexibility in allowing students to create a course of study focused on Latin America and the Caribbean that serves the interests of the student. Combining core courses offered by the program with a large variety of courses combined with departments, programs, and units throughout the University of Miami, the program offers tremendous diversity in courses available for credit hour towards this degree. This encourages students to combine course offerings from around the university into a cohesive course of study that enables specialization in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

The program consists of two core Latin American and Caribbean seminars, two regional fundamentals, and a minimum of three additional seminars to be taken as electives. Students will also be required to take one research methods course at the 600-level.

MA in Latin American Studies

- Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus.
- Electives may be taken from any pre-approved combined or core LAS courses at the 600-level or above, or from other courses approved by the academic director.
- A Research Methods course may be chosen from any available and accessible Research Methods courses available at the University of Miami, but must be appropriate to the course of study chosen by the student and requires approval of the academic director. Under special circumstances, the research methods requirement may be waived with the prior approval of the academic director.
- Students are required to write a master’s thesis, create an equivalent capstone project, or pass a comprehensive exam. The latter two options require the approval of the academic director. For each of these options, a committee consisting of at least three members is required. Students who opt for the comprehensive exam will take one more elective in the place of the Research Methods course and enroll in 6 credit hours of LAS 697, rather than LAS 810.
- Students must demonstrate advanced language competence in Spanish, Portuguese, Haitian Creole, or French by passing a course taught in the target language at the 600-level or above, or by passing a language competency exam.
- With approval from the academic director, students may also take their elective credit hours with Latin Americanists in other Schools such as Communication, Law, Business, or Marine Sciences.
- Students who are simultaneously enrolled in a certificate program (other than GIS) at the University of Miami may double-count courses between the certificate program and the Master of Arts in Latin American Studies, with approval of the academic director. In select cases (such as methods courses), seminars and courses at the 600-level that do not specifically target Latin America or the Caribbean, but for which the final project or paper produced by the student is focused on Latin America may be counted towards the Master of Arts in Latin American Studies, subject to the approval of the academic director.

FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM’s world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication,
Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master’s level):

</tr>
</tbody>
</table>

**Total Credit Hours**: 150

1. Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).
2. MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.
3. Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. FILAS students already fulfill this requirement when completing the language requirements cited below.
4. Degree candidates must complete at least four writing courses, and at least one such course must be in the student's major discipline.
5. Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the Collage of Arts & Sciences, "three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, 112, or 202), Geological Sciences, Marine Science (except MSC 313 and 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate."

**FILAS students also write a Master’s Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.**

### FILAS Admission Requirements

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in FILAS, emphasizing prior language or area study.
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

### M.A. Dual Degree in Latin American Studies and Journalism

[http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/journalism/](http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/journalism/)

Offered in the multicultural setting of Miami, a focal point for Caribbean Basin economic, political, immigration and communication flows,
the School of Communication and College of Arts and Sciences have
designed this joint degree program focusing on cross-cultural and
international journalism. Students leave the university after four
semesters and a summer with two M.A. degrees in hand, one in
Journalism and the other in Latin American and Caribbean Studies. This
specialized course of study is for students who wish to enter careers in
journalism and communication specializing on the issues, economies,
and peoples of Latin America and the Caribbean region. Sustainable
economic development, immigration, social justice and human rights, the
environment, international business, and U.S.-Latin American relations
are just some of the areas in which students may specialize in an
individually tailored course of study anchored by a core of fundamentals.
Because this is a joint offering, 18 credit hours are shared between the
two M.A. programs.

M.A. Dual Degree in Latin American Studies and Public Health

http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/medicine-and-public-health/

Miami is the gateway to Latin America. As such we recognize an urgent need for public health professionals with the training and expertise needed to meet the growing public health challenges both in Latin America and the Caribbean. This program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

Average Program Duration: 2 years, 5 semesters

Number of required credits: 54 (+6 for non-native speakers)

The Curriculum

The total requirements for the MPH/MALAS program are 60 credits. These requirements include 30 MPH credits, 12 MA in LAS credits, 6 elective credits, 6 culminating/capstone credits and 6 language credits (for non-native speakers):

Language Requirements (6 credits)

Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing two courses taught in the target language at the 500-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, IB credits or Defense Language Proficiency Test).

</tbody>
</table>

Select two other LAS courses in consultation with the Academic Director. 6 credits

**Regional Fundamentals in Latin America Electives (6 credits)**

Six credits worth of Regional Fundamentals in Latin America must be taken. These electives may be chosen from appropriate offerings in LAS, INS, POL, HIS, APY, or GEG. Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus. For this joint degree, we will require that the six credits of electives in POL, LAS, INS, APY, GEG, or HIS be used to meet this requirement. The LAS Academic Director may approve courses from other departments.

**Culminating Experience (6 credits)**

**M.A. in Latin American Studies with GIS Certificate**

http://www.as.miami.edu/grad/graduate/joint-master-of-arts-programs/gis/

- The GIS option allows students to work towards a graduate certificate in GIS through the department of Geographic and Regional Studies while working towards their Master of Arts in Latin American Studies.
- Required courses for this program are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAS 601</td>
<td>Interdisciplinary In Latin American And Caribbean</td>
<td>3</td>
</tr>
<tr>

<tr>
<td>GEG 693</td>
<td>Intermediate GIS</td>
<td>3.00</td>
</tr>
</tbody>
</table>

Select three electives in LAS 9 credits

- The 6 credit hours in LAS 810 will consist of a GIS capstone project with a focus on Latin America, the Caribbean, or South Florida. Students will require a three-member committee to oversee the capstone project. A group project may be allowed with approval of the academic director.

**Liberal Studies**

http://www.as.miami.edu/mals

**Dept. Code:** MLS

**Degree Programs**

The Liberal Studies program is founded on an interdisciplinary approach to issues and questions central to the history and development of human culture. It is designed to provide a broad understanding of these issues and questions through a focused and systematic program of study drawing upon faculty from various disciplines in the humanities, the social sciences, and the basic sciences.

For further information regarding this program, please write to:

Master of Arts in Liberal Studies Program
125-G Memorial Classroom Building
Coral Gables, FL 33124-2302
Call 305-284-6731 and/or email mals@miami.edu

**Masters**

**Masters Program in Liberal Studies**

- M.A. in Liberal Studies (p. 407)

**M.A. in Liberal Studies**

The Master of Arts in Liberal Studies degree requires 24 credit hours, plus a 6 credit hour thesis OR an additional 6 credit hours of coursework and a representative portfolio. In addition all students are required to participate in the MALS Writing Seminar. The curriculum is drawn from three core courses as well as additional courses designed for MALS students. Students may select from other graduate level courses with the approval of the director.
For the program with a thesis, a candidate must complete a minimum of 30 credit hours on the graduate level which includes:

- Three 3 credit hour core courses.
- 15 approved graduate credit hours.
- 6 credit hours for thesis.

For the program without a thesis, a candidate must complete a minimum of 30 credit hours on the graduate level which includes:

- Three 3 credit hour core courses.
- 21 approved graduate credit hours.
- A portfolio representative of works completed.

Mathematics
http://www.math.miami.edu

Dept. Code: MTH

Degree Programs
The Mathematics Department offers graduate degree programs leading to the:

- Master of Arts (p. 408)
- Master of Science (p. 408)
- Doctor of Philosophy (p. 408)

Prerequisites and requirements for these degrees are described on the program pages:

Masters
Masters Programs in Mathematics
- M.A. in Mathematics (p. 408)
- M.S. in Mathematics (p. 408)

Doctoral
Doctoral Program in Mathematics
- Ph.D. in Mathematics (p. 408)

M.A. in Mathematics
http://www.math.miami.edu/

1. Prerequisite:
   - A minimum of 9 credit hours in mathematics courses numbered 200 and above is required.

2. Requirements:
   a. A total of 30 credit hours must be earned; at least 18 credit hours of which are in mathematical courses numbered 600 or above. These courses must include at least one of the following year-long sequences:
      - MTH 613 & MTH 614 Partial Differential Equations I and Partial Differential Equations II
      - MTH 615 & MTH 616 Ordinary Differential Equations and Dynamics and Bifurcations
      - MTH 624 & MTH 625 Introduction to Probability Theory and Introduction to Mathematical Statistics
      - MTH 631 & MTH 632 Topology I and Topology II
      - MTH 633 & MTH 634 Introduction to Real Analysis I and Introduction to Real Analysis II
      - MTH 661 & MTH 662 Abstract Algebra I and Abstract Algebra II

All courses from other departments must be numbered 700 or above, be pertinent to the teaching of secondary school mathematics, and be approved by the graduate committee.

b. A three-hour written examination covering the material in one of the year-long sequences listed above.

M.S. in Mathematics
http://www.math.miami.edu/

1. Prerequisite:
   - A minimum of 15 credit hours in mathematics courses numbered 200 and above is required.

2. Requirements:
   a. A total of 30, 33, or 36 credit hours in approved courses must be earned, depending on whether at least 15, 12-14, or 9-11 credit hours, respectively, are in mathematics courses numbered 700 and above.
   b. A minimum of 24 credit hours must be earned in mathematics courses.
   c. At least two of the following basic sequences are required:
      - MTH 631 & MTH 632 Topology I and Topology II
      - MTH 633 & MTH 634 Introduction to Real Analysis I and Introduction to Real Analysis II
      - MTH 661 & MTH 662 Abstract Algebra I and Abstract Algebra II
   d. Three written exams, at least two of which are on the basic sequences of the above list, must be passed.

Ph.D. in Mathematics
http://www.math.miami.edu/

The following requirements are in addition to the general requirements for the Doctor of Philosophy Degree as described by the Graduate School (see section on Doctor of Philosophy elsewhere in this Bulletin).

1. A minimum of 36 credit hours must be earned in mathematics courses numbered 700 and above.

2. All four basic sequences or their equivalents are required:
   - MTH 733 & MTH 734 Real Variables and Real Variables
   - MTH 735 & MTH 736 Complex Variables and Complex Variables
   - MTH 741 & MTH 742 Algebraic Topology and Algebraic Topology
Modern Languages and Literatures

http://www.as.miami.edu/mll

Dept. Codes: ARB, CHI, FRE, GER, ITA, MLL, POR, SPA

Degree Programs

The Ph.D. in Romance Studies offers concentrations in French (http://www.as.miami.edu/mll/graduate/french-graduate-studies) and Spanish (http://www.as.miami.edu/mll/graduate/spanish-graduate-studies) with emphases on literary and cultural production, and the critical study of language. The program is designed primarily to prepare students for careers as university professors and research scholars. Students develop advanced language, teaching, and research skills that lend themselves to other professions, as well. A variety of geographic, temporal, and theoretical concentrations allow students to carry out innovative and interdisciplinary research projects, often with a transnational focus.

While developing professional competency in their major research fields through an intensive study of canonical works in French and/or Spanish, students also engage in comparative African Studies, Arabic Studies, Brazilian Studies, Caribbean Studies, Francophone Studies, German Studies, Iberian Studies, Italian Studies, Latin American Studies, and combinations thereof.
