**Program In Biomedical Sciences (PIB)**

**PIB 700. Journal Club. 1 Credit Hour.**
All PIBS students are required to attend one journal club or seminar each week.

Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

**PIB 701. Introduction to Biomedical Sciences. 5 Credit Hours.**
This course surveys fundamentals of molecular and cellular biology that underly all modern biomedical research. Lectures are organized into modules that cover Proteins and DNA, Gene Expression, Signaling and Membranes, Cells, and Development. A final module covers immunology, organ systems, and genetics. Experimental techniques are emphasized throughout, with the first week of the course devoted to a bootcamp on common biomedical methods.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**PIB 702. Scientific Reasoning. 3 Credit Hours.**
This course teaches scientific reasoning by critical reading of primary research papers in a small-group setting. Multiple small groups are offered every week and students can choose from different topics related to lectures in the companion PIB 701 course. Research papers are discussed in two 1-hour sessions each week.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**PIB 705. Biostatistics for the Biosciences. 3 Credit Hours.**
This is an introductory course that will cover the basics of applied statistics. The course will emphasize a practical understanding of statistical concepts: the goal is to prepare you to be able to properly analyze and interpret data from your research, not to turn you into a statistician. As such, the structure of the course is designed to give you lots of hands-on experience with data and statistical software, and to teach you how to proceed when you encounter novel problems in the future (e.g., data that you’re not quite sure how to analyze). An overall goal of the course is to prepare you to be able to intelligently assess the statistics commonly encountered in journal articles within your field and provide you with the fundamental skills required for more advanced statistical methods when you late encounter the need.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**PIB 731. Laboratory Research. 1-6 Credit Hours.**
Laboratory rotations familiarize students with a variety of modern techniques in biomedicine and potential mentors for their dissertation projects. One credit is awarded per rotation.

Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**PIB 780. Research Ethics. 1 Credit Hour.**
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of scientific integrity. This program should be an integral part of the proposed training effort.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**PIB 782. Professional Development: Skills for Success I. 1 Credit Hour.**
This workshop will teach students the basics on how to: manage your career, choose a rotation lab / mentor, read a scientific paper, write a lab report and present in the journal club and lab meetings.

Components: LEC.
Grading: SUS.
Typically Offered: Fall.

**PIB 783. Professional Development: Skills for Success II. 1 Credit Hour.**
This workshop will teach students the basics on how to: write a fellowship and scientific paper as well as the proper and ethical handling of research data.

Components: LEC.
Grading: SUS.
Typically Offered: Spring.

**PIB 784. Practical Graduate Teaching. 1 Credit Hour.**
Prerequisite: PIB 701.

Components: FLD.
Grading: SUS.
Typically Offered: Fall & Spring.

**PIB 785. PIBS Bioinformatics Workshop. 1 Credit Hour.**
The aim of this workshop is to introduce graduate students to basic bioinformatics data retrieval and analysis as relevant to bio-medical research. The sessions will include discussion on focused topics and hands-on, project-based exercises. Only publicly available databases and web-tools will be used, no programming will be taught.

Components: WKS.
Grading: SUS.
Typically Offered: Summer.

**PIB 830. Doctoral Dissertation. 1-12 Credit Hours.**
Required for all PhD candidates. First-year students generally take one credit of doctoral dissertation in their first summer semester then continue in program specific dissertation credit through graduation.

Components: THI.
Grading: SUS.
Typically Offered: Summer.
