MASTER OF SCIENCE IN FINANCE (ONLINE)

Master of Science in Finance (online)
The Master of Science in Finance provides focused, graduate level education meant to prepare students for a professional career in finance. The program consists of 32 credits taken over a sixteen-month period beginning in August, January or May. The program includes 4 credits of fundamental coursework in accounting, finance, microeconomics and quantitative methods, 8 credits covering general business education including business analytics, operational excellence, business planning, and communications, 8 credits in more advanced finance topics, and 12 credits in the area of specialization. Currently the specializations are in Corporate Finance, including courses in financial decision making, applied corporate finance, derivatives, and financial modeling. The proposed 32-credit online curriculum waives the following 3 courses from the on-campus version of the MS in Finance, as it is geared for Working Professionals who are already expected to possess the skills covered in these courses: BUS 600/ BUS 602 Critical Thinking and Effective Writing (1 credit); BUS 603 Critical Thinking and Effective Speaking (1 credit); BUS 604 Career Development and Enrichment (1 credit). Students in the program will earn both the Certificate in Financial Decision Making and the Certificate in Corporate Finance along the way to earning their degree.
