

# M.P.S. IN NATURAL HAZARDS AND CATASTROPHES

## Natural Hazards and Catastrophes ( NHC (<http://mps.rsmas.miami.edu/natural-hazard-and-catastrophes>))

The University of Miami's Rosenstiel School of Marine and Atmospheric Science conducts world-class research on the earth systems responsible for these disasters, including the atmosphere, the ocean and solid earth. To meet society's need for a skilled workforce, the Natural Hazards and Catastrophes program (<http://mps.rsmas.miami.edu/natural-hazard-and-catastrophes>) offers an educational opportunity for students seeking to fill positions offered by the private and civil sectors to assess risks and exposures associated with natural hazards. The goal is to provide students with the skills and knowledge necessary to understand earth system natural hazards (atmospheric, oceanic, geological and hydrological) and the data analytics tools required to assess the associated risks (e.g. statistics, data management, programming, GIS, and remote sensing).
