To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

2 The Technical Elective is selected from courses at the 300 level or above, offered by one of the following departments: MTH, BME (except BME 320), CAE, ECO, EEN, IEN, MEN, ACC, FIN, MGT (Except MGT 303), MAS, MKT.

3 IEN Electives are selected from courses at the 300 level or above, offered by the Department of Industrial Engineering.

4 IEN Electives are selected from courses at the 600 or 700 level, offered by the Department of Industrial Engineering.

2  IEN Electives are selected from courses at the 600- or 700-level, offered by the Department of Industrial Engineering.

Minor in Industrial Engineering

A student majoring in another discipline who chooses to take a minor in Industrial Engineering must complete 15 credit hours of coursework consisting of the courses listed below. A minimum of 12 credits must be taken at the University of Miami and IEN 201 must be taken at the University of Miami. In addition, you must achieve a minimum GPA of 2.5 for the courses in the minor.

Substitutions may be accepted with the permission of the Department Chairman except for IEN 201.
Introduction

Engineering is the art of applying the knowledge of science for the benefit of humanity. Mechanical Engineering is the most broadly based area of engineering. It is concerned with the analysis, design, development and application of equipment for such diverse fields as energy conversion, transportation, production machinery, consumer goods, and environmental control. Today's advanced technology is largely a result of the skill of mechanical engineers who are heavily represented in most fields of modern industry.

Because of the varied careers and opportunities which are available to the Mechanical Engineering graduates, the curriculum emphasizes education in the fundamentals of the physical, mathematical, and engineering sciences, including materials science, solid mechanics, fluid mechanics and thermodynamics. These basic subjects are followed by courses in their application to the design and analysis of engineering devices and systems. Computers are utilized for analysis and design throughout the curriculum.

Aerospace Engineering is concerned with the analysis, design and development of a wide variety of aircraft and space vehicles and systems. The undergraduate aerospace engineering program is designed to provide a broad based foundation in aeronautics and astronautics, including topics such as aerodynamics, propulsion, aerospace structures and materials, flight dynamics, control and performance.

In the junior and senior years, the student is assisted in choosing technical electives in preparation for a degree of professional specialization or for further study in engineering, law, business or medicine. With the aid of an advisor and the concurrence of the department chairman, the student may select courses compatible with a variety of career goals.

The department offers two undergraduate degrees:

- Bachelor of Science in Mechanical Engineering and
- Bachelor of Science in Aerospace Engineering.

Within the Bachelor of Science in Mechanical Engineering program, sequences of courses are available to provide advanced knowledge in such traditional areas as electromechanical design, heat transfer, solid mechanics, fluid mechanics, and materials science. There are concentrations in:

- Aerospace Engineering and
- Internal Combustion Engines.

Mission of Mechanical and Aerospace Engineering Department

The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet Society's changing needs and aspirations.

Mission of the Mechanical Engineering Program

The mission of the Mechanical Engineering program is to provide excellent undergraduate education in Mechanical Engineering that will prepare graduates to meet society's changing needs and aspirations.

Mission of the Aerospace Engineering Program

The mission of the Aerospace Engineering program is to provide excellent undergraduate education in Aerospace Engineering that will prepare graduates to meet society's changing needs and aspirations.

Educational Objectives

The educational objectives of the undergraduate Aerospace Engineering (B.S.A.S.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to aerospace engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

The educational objectives of the undergraduate Mechanical Engineering (B.S.M.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to mechanical engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

Advanced Writing and Communication Skills

Mechanical & Aerospace Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Mechanical & Aerospace Engineering students acquire Advanced Writing and Communication skills in the following core courses:

<table>

Graduate Studies

Graduate programs leading to the degrees of Master of Science and Doctor of Philosophy are offered by the Department with options in various engineering and interdisciplinary fields. Detailed information is available in the Bulletin of the Graduate School (p. 662).

Majors in Mechanical and Aerospace Engineering

• B.S. in Mechanical Engineering (p. 406)
• B.S. in Mechanical Engineering - Aerospace Engineering Concentration (p. 407)
• B.S. in Mechanical Engineering - Internal Combustion Engines Concentration (p. 409)
• B.S. in Aerospace Engineering (p. 405)

Dual B.S./M.S. Degrees in Mechanical and Aerospace Engineering

• B.S. in Aerospace Engineering and B.S. in Mechanical Engineering Dual Degree (p. 412)
• B.S. and M.S. in Mechanical Engineering (p. 410)

Minor in Mechanical and Aerospace Engineering

• Mechanical Engineering (p. 413)

Mechanical Engineering - Aerospace Engineering Concentration

The mission of the aerospace engineer is to design and manufacture payload carrying vehicles to travel distances at the lowest cost in the shortest period of time. The training of the aerospace engineer is by demand multidisciplinary and by spirit pioneering. It includes aerodynamics, propulsion, advanced materials, structures, controls, robotics, electronics and computer usage.

An option has been developed to allow students at the University of Miami to have a concentration of courses in Aerospace Engineering. This concentration in aerospace is built on the existing accredited degree program in Mechanical Engineering.

Mechanical Engineering - Internal Combustion Engines Concentration

This program is designed to acquaint the mechanical engineering student with the fundamental science and engineering underlying the design of both conventional and high performance internal combustion engines and the fundamentals of emission formation in combustion systems, automobile mechanisms and structures including vibrations and noise. Included are studies of conventional fuels and synthetic fuels of the future such as hydrogen and methanol.

B.S./M.S. - Mechanical Engineering

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of 300 or more on the Graduate Record Examination (taken before the fifth year).

### Minor in Mechanical Engineering

#### Core Courses
- **CAE 210** Mechanics of Solids I 3
- **MAE 111** Introduction to Engineering I 3

#### Elective Courses
Select 9 credit hours from one of the following areas of specialization:

**Energy Engineering:**
- **MAE 303** Thermodynamics I
- **MAE 420** Applied Thermodynamics
- **MAE 503** Internal Combustion Engines
- **MAE 506** Nuclear Engineering
- **MAE 510** Fundamentals of Solar Energy Utilization

**Environmental Engineering:**
- **MAE 303** Thermodynamics I
- **MAE 309** Fluid Mechanics
- **MAE 408** Heating, Ventilating, and Air Conditioning
- **MAE 510** Fundamentals of Solar Energy Utilization
- **MAE 521** Exhaust Emission Control

**Materials Engineering:**
- **MAE 207** Mechanics of Solids II
- **MAE 301** Engineering Materials Science
- **MAE 302** Mechanical Behavior Of Materials
- **MAE 507** Advanced Mechanics of Solids

**Thermal Engineering:**
- **MAE 303** Thermodynamics I
- **MAE 310** Heat Transfer
- **MAE 408** Heating, Ventilating, and Air Conditioning
- **MAE 420** Applied Thermodynamics
- **MAE 441** Design of Fluid and Thermal Systems
- **MAE 503** Internal Combustion Engines
- **MAE 508** Intermediate Heat Transfer
- **MAE 510** Fundamentals of Solar Energy Utilization

**Total Credit Hours** 15

---

1. You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).
2. Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

---

* At least 9 credit hours of Mechanical Engineering courses must be taken at the University of Miami and is subject to approval of an academic advisor.

** A 2.0 grade point average in all MAE courses taken.
Marine and Atmospheric Science

http://www.rsmas.miami.edu/academics/undergraduate

Introduction

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School’s present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired and additional buildings were constructed to accommodate new wide-ranging projects. In 1969, the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution, made through the Rosenstiel Foundation, to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the Rosenstiel School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of over 80 who conduct sponsored research while offering studies leading to the Bachelor of Science, Bachelor of Arts, Master of Arts, Master of Science, Master of Professional Science and Doctor of Philosophy degrees.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate and undergraduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the-art catamaran, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School.

Mission

The Rosenstiel School strives to be in the forefront of basic and applied research as it applies to the ocean, atmosphere and global environment, with particular emphasis on subjects of societal significance. Our goal is to provide excellence in graduate and undergraduate education and research training, and to be a strong force towards improved environmental understanding and management.

Academic Policies

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the Undergraduate Marine Science and Atmospheric Science Programs is selective and highly competitive. Admission decisions are based on the secondary school record, SAT/ACT score, counselor’s evaluation and the applicant’s essay.

Student Responsibilities

Students of the Rosenstiel School are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study.

Academic Progress

The Rosenstiel School will review each student’s record at the end of each semester. All students in the Undergraduate Marine Science and Atmospheric Science Programs must maintain a cumulative grade point average of 2.5 or better in order to remain in the program. Only those courses passed with a grade of C- or better may be applied to the major or minor.

Honors

Honors in the Marine and Atmospheric Science Program may be earned by students who have a 3.5 GPA and have successfully completed 4 credit hours of independent research and a senior thesis.

Degree Programs

The Rosenstiel School of Marine and Atmospheric Science offers degree programs at both the undergraduate and graduate levels for students interested in marine science and/or atmospheric science as a career.

Undergraduate Degree Programs

The Atmospheric Science program offers a Bachelor of Science in Marine and Atmospheric Science degree in Meteorology, with a curriculum conforming to the recommendations of the American Meteorological Society. The BS in Meteorology is a single major program, with a minor in Mathematics. Students may combine Meteorology with a second major in Mathematics, Marine Science, Physics, Computer Science, or Broadcast Journalism. A five-year course of study culminating in the Master of Professional Science is also available.

The Rosenstiel School Marine Science program offers two undergraduate degree options, a Bachelor of Science in Marine and Atmospheric Science and a Bachelor of Arts in Marine Affairs. The Bachelor of Science degree program is meant for students planning to continue with graduate studies in marine science, or for those who will pursue a technical career in this area in government or private industry.

The Bachelor of Arts degree is designed for students planning either non-technical careers with government agencies or private industries directly or indirectly concerned with the ocean, or graduate studies in such areas as business, law, economics, political science, education, or communication.

In cooperation with the graduate program in Marine Ecosystems and Society, a five-year BA/MPS program in a Marine Ecosystems and Society is available. This program enables qualified students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Ecosystems and Society with only one additional year.

Graduate Degree Programs

Graduate courses in the marine and atmospheric sciences are offered through the Graduate School and the Rosenstiel School of Marine and Atmospheric Science and are listed under the Rosenstiel School graduate program entries in the Bulletin.
Courses at the 500-level may be taken for undergraduate credit with junior standing and departmental consent. These courses are listed in the course section of the undergraduate bulletin.

Requirements for Graduation
In addition to satisfying the course requirements for graduation with majors in Marine Science, Meteorology, and Marine Affairs (specified above under "Undergraduate Majors (p. 414)"), students are expected to satisfy the School's General Education Requirements. General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the General Education Requirements.

Areas of Proficiency
A) English Composition
Students must complete ENG 105 and either ENG 106 or ENG 107, or their approved equivalents, typically in the first year of residence.

B) Communication across the Curriculum
Students in the Rosenstiel School will, as part of their major curriculum, take courses designed to provide students with the skills required for effective communication, both written and oral, within the discipline.

C) Mathematics

Bachelor of Arts in Marine Affairs:

Areas of Knowledge
As described under the section General Education Requirements (p. 18) under General University Information, students must complete one cognate in each of three the Areas of Knowledge:

1. Arts and Humanities,
2. People and Society (Social Sciences) and

All undergraduate students in the Rosenstiel School will fulfill their STEM cognate requirement through their major requirements. Students in Marine Affairs will fulfill their People and Society cognate requirement through their minor. Students in Marine Science may elect to fulfill the People and Society cognate requirement with a Marine Policy cognate. Students in Meteorology may elect to fulfill the People and Society cognate requirement with a Broadcast Meteorology cognate. Cognates integrating Study Abroad courses are also available. See program advisors for details.

Minors Offered by Marine and Atmospheric Science
- Climate Science and Policy (p. 420)
- Marine Policy (p. 422)
- Marine Science (p. 436)
- Meteorology (p. 420)

Foote Fellows are exempt from cognate requirements. Foote Fellows with SAT/V scores at or above 700 or ACT/E scores at or above 32 are exempt from the English composition requirement. All Foote Fellows must complete math requirements as specified by their program.

Atmospheric Science - Meteorology
Dept. Code: ATM

Meteorology
Meteorology is the study of the atmosphere, including climate and climate variability, weather forecasting, cloud and precipitation physics, tropical dynamics, severe weather and hurricanes. Atmospheric scientists use computer models and sophisticated observing systems to describe and understand the atmosphere. The curriculum emphasizes math and physics basics, providing a strong foundation for an intensive study of meteorology. The curriculum, conforming to the recommendations of the American Meteorological Society, prepares students for graduate school and for jobs in industry and government.

The Rosenstiel School offers a Bachelor of Science in Marine and Atmospheric Science with a major in Meteorology.
Although Meteorology is a single major program, students often combine Meteorology with a second major in such diverse fields as Mathematics, Marine Science, or Broadcast Journalism. Students interested in adding Broadcast Journalism as a second major should review the School of Communication (p. 294) page for additional requirements.

**Majors in Atmospheric Science - Meteorology**

- B.S. in Meteorology (p. 418)
- B.S. Double Major in Meteorology and Mathematics (p. 417)
- B.S. Double Major in Meteorology and Marine Science (p. 416)

**Minors Offered by Marine and Atmospheric Science**

- Climate Science and Policy (p. 420)
- Marine Policy (p. 422)
- Marine Science (p. 436)
- Meteorology (p. 420)

**B.S.M.A.S. in Meteorology and Marine Science**

---

1. Both ATM 220 and ATM 307 may be taken for full credit.  
2. Calculus I and II must be passed with a grade of "C-" or higher.  
3. Broadcast meteorology majors must take either MTH 224 or MTH 311/MTH 320, but are not required to take both.
Minor in Climate Science and Policy

MSC 346 Climate Science and Policy 3
Select two or three of the following (List A):
ATM 102 Introduction To Weather And Climate 3
or ATM 189 Survey of Modern Meteorology
ATM 220 Climate And Global Change 3
or MSC 2 Climate and Global Change
MSC 222 The Earth's Climate: Past and Future 3
ATM 307 Introduction To The Physics Of Climate 3
MSC 347 Polar Science and Policy 3
GSC 462 Earth's Ancient Atmospheres, Climates, And Sea Levels 3
Select one or two of the following (List B):
MSC 313 Coastal Law 3
MSC 314 Ocean Law 3
MSC 340 Ocean Policy 3
MSC 342 Decision Making and the Environment 3
MSC 418 Climate Law 3
RSM 520 Climate and Society 3
Approved Statistics Course ** 0-3
Total Credit Hours 15-18

* Students with a Meteorology major should replace ATM 102/ATM 103 from List A with an additional course from list B.

** Students from a program without a statistics requirement must also take an approved course in statistics increasing this to an 18 credit hour minor.

*** The minor satisfies either the STEM Area of Knowledge cognate requirement, or the People and Society Area of Knowledge cognate requirement.

**** Only those courses passed with a grade of "C-" or higher may be applied to the minor. Courses used towards a minor must be above and beyond those used for the major.

Minor in Meteorology

ATM 103 Survey of Modern Meteorology 3
Select 12 credit hours of the following: 12
ATM 118 Current Weather Topics 3
ATM 220 Climate And Global Change 3
ATM 243 Weather Forecasting 3
ATM 265 Atmospheric Chemistry 3
ATM 303 Meteorological Instrumentation and Observation 3
ATM 305 Atmospheric Thermodynamics 3
ATM 306 Advanced Principles In Broadcasting Meteorology 3
ATM 307 Introduction To The Physics Of Climate 3
ATM 321 Scientific Programming In The Atmospheric Sciences 3
ATM 405 Atmospheric Dynamics I 3
ATM 406 Atmospheric Dynamics II 3
ATM 407 Weather Analysis 3
ATM 409 Cloud Physics, Radiation, and Remote Sensing 3
Approved 500-level classes offered by the Rosenstiel School 3
Total Credit Hours 15

* The Meteorology minor fulfills the requirements of a STEM cognate. Only those courses passed with a grade of "C-" or higher may be applied to the minor.
Marine Affairs
Dept. Code: MSC

Marine Affairs
The ocean is acquiring an ever-increasing significance as an avenue of worldwide commerce and communication and as a source of food, energy, minerals and fuels. As nations and private concerns become more involved in the ocean, the need increases for qualified professionals to deal with the commercial and legal complexities of marine affairs. In order to meet this need, the Rosenstiel School offers a Bachelor of Arts degree with a major in Marine Affairs combined with a required minor or additional major in Anthropology, Economics, Ecosystem Science and Policy, Geography, International Studies, Latin American Studies, Political Science, or an approved field within the School of Business Administration. Students in the School of Communication may include Marine Affairs as a second major. This program is designed for students who wish to prepare themselves for graduate studies and careers in ocean related areas of business, policy, management, law, and communication.

5 Year BA/MPS Program in Marine Ecosystems and Society
The Rosenstiel School offers a 5 year BA/Master of Professional Science (MPS) Program in Marine Ecosystems and Society. This program enables qualified Marine Affairs students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Ecosystems and Society in one additional year. Conditional acceptance to the graduate Marine Ecosystems and Society program is based on the student's GPA at the end of the sophomore year. Students must then apply for acceptance to the graduate program at the Rosenstiel School during their junior year.

Majors in Marine Affairs
• B.A. in Marine Affairs (p. 421)

Minors Offered by Marine and Atmospheric Science
• Climate Science and Policy (p. 420)
• Marine Policy (p. 422)
• Marine Science (p. 436)
• Meteorology (p. 420)

**Total Credit Hours**

16

¹ For students in the College of Engineering that take the MSC 111 section for Engineers you will be waived from the MSC 112 requirement.

* Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 and MSC 112 with one additional elective, and all electives must be above and beyond those used for the major. The Marine Policy minor fulfills the requirements of a People and Society cognate. Only those courses passed with a grade of "C-" or higher may be applied to the minor.

**Marine Science**

**Dept. Code: MSC**

**Marine Science**

Marine Science is an interdisciplinary program dealing with the study of the world’s oceans, their physical and biological constituents, the
influence of oceanic resources on human society, and the conservation and future development of these resources.

The Bachelor of Science double major in Marine Science prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans. The Bachelor of Science in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a second major in one of the sciences through the College of Arts and Sciences, RSMAS, or the College of Engineering. Common second majors are Biology, Chemistry, Geological Sciences, Physics, Computer Science, Meteorology and Microbiology & Immunology. Required courses for these combinations are listed within the major tab.

Second majors in Applied Physics, Biochemistry, Engineering (all disciplines), and Mathematics may be taken. Students interested in adding a second major in one of these disciplines should review the Applied Physics (p. 171), Biochemistry (p. 80), Engineering (all disciplines) (p. 343), or Mathematics (p. 144) pages for additional requirements. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credit hours for graduation.

### Majors in Marine Science
- B.S. in Marine Science/Biology (p. 425)
- B.S. in Marine Science/Chemistry (p. 427)
- B.S. in Marine Science/Geological Sciences (p. 430)
- B.S. in Marine Science/Physics (p. 434)
- B.S. in Marine Science/Computer Science (p. 428)
- B.S. in Marine Science/Meteorology (p. 431)
- B.S. in Marine Science/Microbiology and Immunology (p. 433)
- B.S. in Marine Science with a Second Major in One of: Applied Physics, Biochemistry, Engineering (All Disciplines), and Mathematics (p. 423)

### Minors Offered by Marine and Atmospheric Science
- Climate Science and Policy (p. 420)
- Marine Policy (p. 422)
- Marine Science (p. 436)
- Meteorology (p. 420)

### B.S.M.A.S. in Marine Science with a Second Major

| Arts and Humanities Cognate Courses | 9 |
| People and Society Cognate Courses | 9 |

### Requirements for Second Major

| Total Credit Hours | 120-122 |

1. Required for Biochemistry double majors.
3. At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement. Three credits may double count for both MSC and the second major if approved by advisor.
4. University Physics is recommended (Required for Engineering and Applied Physics).
5. Students should review the Applied Physics, Biochemistry, Engineering (all disciplines), or Mathematics page for the second major requirements and credits needed.

MTH 161  Calculus I  4
  or MTH 171 Calculus I
MTH 162  Calculus II  4
  or MTH 172 Calculus II

Select one of the following:  3-4
  MSC 204  Environmental Statistics
  BIL 311  Biostatistics
  CSC 120  Computer Programming I
  MTH 224  Introduction to Probability and Statistics
  PSY 291  Introduction To Biobehavioral Statistics

Select one of the following Options:  3

Option 1:
  PHY 205  University Physics I
  PHY 206  University Physics II
  PHY 207  University Physics III
  PHY 208  University Physics II Lab
  or PHY 209  University Physics III Lab

Option 2:
  PHY 101  College Physics I
  PHY 102  College Physics II
  PHY 106  College Physics Laboratory I
  PHY 108  College Physics Laboratory II

Electives
  Arts and Humanities Cognate Courses  9
  People and Society Cognate Courses  9
  300+ Level Approved Science or Mathematics Elective  3
  300+ Level Elective  3
  Additional Elective  3

Total Credit Hours  127-130

1  At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
2  The electives must include at least one lab or field based course. One advanced biology course may fulfill requirements in both Biology and Marine Science.
3  University Physics is recommended.

- CHM 202 Organic Chemistry II (Lecture) 3
- CHM 206 Organic Chemistry Laboratory II 1
- GSC 111 Earth System History 4
- MSC 215 Chemical Oceanography 3
- MSC 216 Chemical Oceanography Laboratory 1

**Credit Hours** 15

**Junior Year**

**Fall**
- CHM 214 Quantitative Analytical Chemistry 3
- CHM 360 Physical Chemistry I (Lecture) 3
- CHM 364 Physical Chemistry (Laboratory I) 1
- MSC 230 Introduction to Marine Biology 3
- PHY 205 University Physics I 3

**Credit Hours** 15

**Elective #3** 3

**Spring**
- CHM 316 Instrumental Analytical Chemistry 3
- CHM 365 Physical Chemistry II (Lecture) 3
- CHM 366 Physical Chemistry (Laboratory II) 1
- MSC Course 3
- MSC Course 3

**Credit Hours** 16

**Senior Year**

**Fall**
- BMB 401 Biochemistry For The Biomedical Sciences 3
- PHY 207 University Physics III 3
- PHY 208 University Physics II Lab 1

**Elective #5** 3

**Elective #6** 3

**MSC Course** 3

**Credit Hours** 16

**Spring**
- CHM 441 Inorganic Chemistry (Lecture) 3
- MSC 301 Introduction to Physical Oceanography 3
- MSC 302 Introduction To Physical Oceanography Lab 1

**Credit Hours** 16

**Elective #7** 3

**MSC Course** 3

**Credit Hours** 16

**Total Credit Hours** 124

* 7 elective courses must include:
  - 3 Arts and Humanities Cognate courses
  - 3 People and Society Cognate courses

### B.S.M.A.S in Marine Science and Computer Science

#### Curriculum Requirements

**Marine Science**
- MSC 111 Introduction to Marine Science 3
- MSC 112 Introduction to Marine Science Lab 3
- MSC 215 Chemical Oceanography 3
- MSC 230 Introduction to Marine Biology 3
- MSC 301 Introduction to Physical Oceanography 3
- MSC 302 Introduction To Physical Oceanography Lab 1
- MSC 321 Scientific Programming in the Atmospheric Sciences 3
- MSC 216 Chemical Oceanography Laboratory 1
- MSC 321 Introduction to Marine Biology Laboratory 1

Select 9 credit hours of electives in Marine Science

**Other Required Courses**

Select one of the following:
- BIL 150 General Biology
- BIL 151 and General Biology Laboratory
- BIL 160 Evolution and Biodiversity
- BIL 161 and Evolution and Biodiversity Laboratory
- CHM 111 Principles of Chemistry I 3
- CHM 112 Principles of Chemistry II 3
- CHM 113 Chemistry Laboratory I 1
- CHM 114 Chemistry Laboratory II 1
- CSC 120 Computer Programming I 4
- CSC 220 Computer Programming II 4
- CSC 314 Computer Organization and Architecture 3
- CSC 322 System Programming 3
- CSC 431 Introduction To Software Engineering 3

Select 6 credit hours of approved electives, as described for Computer Science majors

**ENG 105** English Composition I 3
**ENG 106** English Composition II 3

Select one of the following:
- GSC 110 The Earth System
- GSC 114 and Earth Processes Lab
- GSC 111 Earth System History
- MSC 424 Origin and Geology of the Galapagos Islands.
- MTH 161 Calculus I 4
- MTH 171 Calculus I
MTH 162  Calculus II  4
or MTH 172 Calculus II
MTH 210  Introduction to Linear Algebra  3
MTH 309  Discrete Mathematics I  3
MTH 311  Introduction to Ordinary Differential Equations  3
Select one of the following  3
MSC 204  Environmental Statistics
MTH 224  Introduction to Probability and Statistics
PHY 205  University Physics I  3
PHY 206  University Physics II  3
PHY 207  University Physics III  3
PHY 208  University Physics II Lab  1
or PHY 209 University Physics III Lab

Electives
Arts and Humanities Cognate Courses  9
People and Society Cognate Courses  9
300+ Level Elective  3
Additional Elective  3
Total Credit Hours  127-128

1 At least 6 of which must be at the 300-level or higher. MSC204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

| or MTH 172 Calculus II                             | 4            |

Choose one of the following:

| MSC 204 Environmental Statistics                   | 3            |
| MTH 224 Introduction to Probability and Statistics  | 2            |
| GSC 204 Environmental Statistics                   | 1            |
| CSC 120 Computer Programming I                       | 1            |

Electives

- Arts and Humanities Cognate Courses: 9
- People and Society Cognate Courses: 9
- 300+ Level Elective: 3

Additional Elective: 3

Total Credit Hours: 120-131

1. At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
2. One course in Geological Sciences may fulfill requirements in both Marine Science and Geology.
3. University Physics is recommended.

* 6 elective courses must include:
  * 3 Arts and Humanities Cognate courses
  * 3 People and Society Cognate courses
B.S.M.A.S. in Marine Science and Microbiology and Immunology
Curriculum Requirements

Required Marine Science Courses
MSC 111 Introduction to Marine Science 3
MSC 112 Introduction to Marine Science Lab 1
MSC 215 Chemical Oceanography 3
MSC 230 Introduction to Marine Biology 3
MSC 301 Introduction to Physical Oceanography 3
MSC 216 Chemical Oceanography Laboratory 1
or MSC 302 Introduction To Physical Oceanography Lab

Select 12 credit hours of electives in Marine Science 1

Required Microbiology and Immunology Courses
MIC 319 Innate Immunity 3
MIC 321 Immunobiology 3
Select one of the following: 5

MIC 301 Introduction to Microbiology and Immunology
& MIC 304 Immunology (Lecture) and Part 2 of 2: Introductory Microbiology and Immunology (Lab)

Microbiology and Immunology Approved Electives 13
MIC 201 Modern Plagues and Society
MIC 322 Medical Parasitology
MIC 323 Principles of Microbial Pathogenesis
MIC 436 Fundamental and Medical Virology
MIC 441 Microbiology and Immunology Colloquium (can be taken twice to count toward the 13 MIC elective hours)
MIC 460 Advanced Topics in Microbiology and Immunology

Only 6 credit hours of Research in MIC may be applied toward the 13 MIC elective hours
MIC 451 Special Projects in Immunobiology
MIC 452 Special Projects in Parasitology
MIC 453 Special Projects in Pathogenic Bacteriology
MIC 454 Special Projects in Microbial Genetics
MIC 455 Special Projects in Immunogenetics
MIC 456 Special Projects in Virology

Maximum of 3 courses from outside electives can count towards the 13 MIC elective hours
BIL 255 Cellular and Molecular Biology
BIL 352 Techniques in Scanning Electron Microscopy or BIL 55 Electron Microscopy
GSC 310 Microbes and the Environment or MSC 465 Marine Comparative Immunology

Additional Required Courses
BIL 150 General Biology 4
BIL 151 General Biology Laboratory 1
BIL 160 Evolution and Biodiversity 4
BIL 161 Evolution and Biodiversity Laboratory 1
BMB 401 Biochemistry For The Biomedical Sciences 3
CHM 111 Principles of Chemistry I 3
CHM 113 Chemistry Laboratory I 1
CHM 112 Principles of Chemistry II 3
CHM 114 Chemistry Laboratory II 1
CHM 201 Organic Chemistry I (Lecture) 3
CHM 205 Organic Chemistry Laboratory I 1
CHM 202 Organic Chemistry II (Lecture) 3
CHM 206 Organic Chemistry Laboratory II 1
MTH 161 Calculus I 4
or MTH 171 Calculus I
MTH 162 Calculus II 4
or MTH 172 Calculus II
ENG 105 English Composition I 3
ENG 106 English Composition II 3
Select one of the following: 4-5
GSC 110 The Earth System & GSC 114 and Earth Processes Lab
GSC 111 Earth System History
MSC 424 Origin and Geology of the Galapagos Islands.
Select one of the following: 3-4
MSC 204 Environmental Statistics
MTH 224 Introduction to Probability and Statistics
CSC 120 Computer Programming I
CSC 210 Computing for Scientists
Select one of the following Options: 10-11
Option 1:
PHY 205 University Physics I
PHY 206 University Physics II & PHY 208 and University Physics II Lab
PHY 207 University Physics III & PHY 209 and University Physics III Lab

Option 2:
PHY 101 College Physics I & PHY 106 and College Physics Laboratory I
PHY 102 College Physics II & PHY 108 and College Physics Laboratory II

Electives
300+ Level Elective 3
Arts and Humanities Cognate Courses 9
People and Society Cognate Courses 9
Total Credit Hours 132-135

1 At least 6 of which must be at the 300-level or higher. MSC204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
2 MSC 465 may double count as both MSC and MIC upper electives.

MSC 465  Marine Comparative Immunology  3
MSC 466  Environmental Physiology: Oxygen, Water And Ionoregulatory Stress  3
Approved MSC 372 and 500-level classes offered by the Rosenstiel School  3

Total Credit Hours  16

1 At least 6 of which must be at the 300-level or higher.

2 For students in the College of Engineering that take the MSC 111 section for Engineers you will be waived from the MSC 112 requirement.

* Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 and MSC 112 with an additional elective, and all electives must be above and beyond those used for the major. The Marine Science minor fulfills the requirements of a STEM cognate. Only those courses passed with a grade of “C-” or higher may be applied to the major or minor.
Music

http://www.music.miami.edu

Phillip and Patricia Frost School of Music

Introduction
The University of Miami Frost School of Music awards three undergraduate degrees with major programs in twelve areas.

- Bachelor of Music
  - Instrumental Performance (MIP) (p. 444)
  - Keyboard Performance (MKP) (p. 447)
  - Vocal Performance (MVP) (p. 478)
  - Studio Jazz Instrumental (MSJI) (p. 473)
  - Studio Jazz Vocal (MSJV) (p. 473)
  - Music Education (MED) (p. 450)
  - Music Therapy (MTY) (p. 450)
  - Theory and Composition (MTC) (p. 468)
  - Media Writing and Production (MWP) (p. 468)
  - Music Business and Entertainment Industries (MBEI) (p. 456)
  - Musicianship, Artistry Development, and Entrepreneurship (MADE) (p. 460)
  - B.M. in Professional Studies (MPRO) (p. 462)

- Bachelor of Science
  - Music Engineering (MUE) (p. 463)

- Bachelor of Arts
  - Music (MUS) (p. 442)

Mission
The Frost School of Music seeks to transform lives through the study and performance of music, and to enhance music’s future as the result of the most innovative and relevant curricula in higher education. The Frost School of Music is devoted to excellence and a culture of collegiality, in which a diversity of people, musical styles, and careers are valued. The Frost School of Music is a community of musicians committed to advanced musicianship for all Frost students across a broad array of majors and programs. The Frost School of Music seeks to elevate the community through intensive, sustained outreach to underserved populations. The Frost School of Music strives to enhance the cultural richness of the University of Miami, South Florida and throughout the world as the result of world class performance, scholarship and research.

Accreditation
The Frost School of Music has been a member of the National Association of Schools of Music since 1939. The requirements for entrance and for graduation as set forth in this bulletin are in accordance with the principles of this association.

Goals
The primary goals are:

1. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and
2. to provide music majors with a high quality education,
3. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and
4. to serve as an educational and cultural resource for the university, South Florida, and global communities.

Performing Ensembles
Ensembles provide music learning and performing experience for all students on the University of Miami campus through rehearsals and public concerts. Membership in each of these performing ensembles is based on auditions. Not all ensembles meet degree requirements. Follow ensemble policies as indicated in the Frost School of Music student handbook. Please refer to the course catalog for a complete list of all ensembles.

Instrumental Ensembles
- Accompanying
- American Music Ensemble (Songwriters)
- Avant Garde Ensemble
- "Band of the Hour" Marching Band
- Bluegrass Ensemble
- Blues Ensemble
- Brass Chamber Music
- Brass Choir
- Clarinet Choir
- Classical Guitar Ensemble
- Concert Jazz Band
- Contemporary Music Ensemble
- E.C.M. Ensemble
- Electronic Music Ensemble
- Flute Choir
- Funk/Fusion Ensemble
- Horace Silver Ensemble
- Jazz Band III
- Jazz Bass Ensemble
- Jazz Guitar Ensemble
- Jazz Keyboard Ensemble
- Jazz Saxophone Ensemble
- Laptop Ensemble
- Mallet Ensemble
- Monk/Mingus Ensemble
- Percussion Chamber Music
- Rock Ensemble
- Salsa Ensemble
- Saxophone Ensemble
- Small Jazz Ensembles
- String-Keyboard Chamber Music
- Studio Jazz Band
- Studio Rhythm Section
- Symphonic Winds
- Symphony Orchestra
- Synthesizer Ensemble
- The Other Music Ensemble
- Trombone Choir
must meet the following requirements of the Frost School of Music:

1. Submit a Frost School of Music Application to the Frost School of Music Admission Office.
2. Submit an Application for Undergraduate Study to the University Office of Undergraduate Admission.
3. Demonstrate performance proficiency by auditioning on campus, at designated regional audition centers, or by recording. Appropriate faculty committees will evaluate the audition.
4. After being admitted to the university each student will be required to participate in placement auditions and exams in theory and music performance. These examinations will be given immediately prior to the fall semester.
5. Transfer students who are admitted to the university will receive a tentative evaluation of their previous work from the office of Admission. Validation of credit hours in music will be based on the results of auditions and placement examinations discussed above. The Associate Dean for Undergraduate Studies of the Frost School of Music determines which transferred courses will meet specific requirements for graduation.
6. Admission is granted in Fall semesters only.

Requirements for Admission to the Frost School of Music

Students who are admitted to the Frost School of Music must begin a program of specialized requirements in music during their first semester.

Admission to the University (Undergraduate Students)

Application forms and bulletins for undergraduate students may be secured from the University of Miami web site (http://www.miami.edu). The University Office of Admission receives and processes all undergraduate applications, evaluates credentials, and mails letters of acceptance to applicants who qualify for entrance. Because of the university's selective admissions policy and limited enrollment only those applicants are accepted who present evidence of intellectual promise, unusual talent and potential, and strong personal qualifications. Admission as a transfer student requires a 3.0 grade point average from the previous institution. The University Office of Admission and the Frost School of Music determine admission to the university. Prospective students should make formal application for admission in the fall of the senior year in high school. The Frost School of Music participates in the Early Action and Regular Decision programs.

Placement Tests

Upon entering the Frost School of Music, students must demonstrate, through placement auditions, college-level performance on their instrument and in music theory. Results of placement tests will enable music advisors to assist students in selecting the appropriate program and level of study.

Audit

Students are not permitted to audit music courses.

Lessons

The study of a musical instrument or voice, in private lessons or group lessons, requires an audition. Frost School of Music students are classified as "majors" or "principals." A performance "major" aspires to a professional career in music performance. A "principal" aspires to develop their music performance skills to the fullest extent possible in a music degree other than performance.

There are five levels of undergraduate and graduate lessons.

- Level 1 - undergraduate freshman and sophomore, typically four semesters
- Level 3 - undergraduate junior and senior, typically four semesters
- Level 5 - graduate artist's diploma
- Level 6 - graduate masters
- Level 7 - graduate doctoral

Transfer students enroll in Level 1 for the first semester and are placed at an appropriate classification level of study based on the results of the jury at the end of each semester.

Credit for Lessons

Lessons are two credit hours on your primary instrument. Students enrolled for 2 credit hours of lessons are required to perform a jury at the end of each semester. Lessons on a secondary instrument are one credit if available. See student handbook for more information.
Jury

The purpose of the jury is to evaluate student musicianship and technical progress. Students enrolled for 2 credit hours of lessons are required to play a jury before a panel of performance faculty at the end of each semester. Juries are held during Reading Days. Students perform technical requirements and repertoire as assigned by their lesson teacher.

The lesson teacher prepares a jury sheet that lists the repertoire covered during the semester and the studio grade for each student. The grade is recorded on the jury sheet and placed in the student's file. The final grade may be determined in part by studio class participation, recital attendance, or other requirements specific to the student's program of study.

Lessons: Warning, Probation and Dismissal

The following applies to all majors and programs in the Frost School of Music:

Students earning a grade of "C+" or lower in lessons will be placed on probation for one semester. Following probation, an additional grade of C+ or lower in lessons will result in dismissal from the Frost School of Music. Courses may not be dropped during the second enrollment.

Students Who Fail to Successfully Complete a Music Course

Students who fail to successfully complete any music course, including zero credit forums, after the second enrollment will be dismissed from the Frost School. Courses required for the degree must be taken at the next available opportunity and may not be dropped during the second enrollment.

Grade and GPA Requirements

1. Candidates for degrees must complete all requirements of the University and the Frost School of Music with a minimum "C" average (2.0) or higher and at least 120 credits. Students may not graduate with an "F" or "NG" in any course.

2. Experiential Music Curriculum Core Courses require a grade of "C" or higher for all music students.

3. Music Engineering Technology, Music Business & Entertainment Industries, and Studio Music and Jazz Vocal majors are required to maintain a minimum 2.7 cumulative GPA to remain in the program.

4. Bachelor of Arts in Music majors are required to earn a minimum 2.5 semester GPA each semester to remain in the program.

5. Music Therapy majors are required to earn a minimum 2.5 semester GPA each semester to remain in the program. All Music Therapy Courses in the Major (MED courses) must be completed with a grade of "C" or higher.

6. All Music Engineering Technology students must earn a minimum 2.0 GPA in all Engineering courses taken.

7. All Music Education (MED) and Teaching and Learning (TAL) courses require a grade of "C" or higher.

8. Music Scholarship renewal requires a minimum 3.0 cumulative GPA each semester, a minimum grade of "B" in private lessons each semester, and a 3.0 semester GPA in Frost School of Music courses each semester.

Forums

Students must successfully complete a program forum each semester in residence. Program forums (which are zero credit) are degree requirements. Students must successfully complete the required number of program forums to graduate.

Summer Lessons

During each of the five-week summer sessions, students may register for one credit hour and receive a one-hour lesson per week. Summer lessons do not fulfill degree requirements.

Special Fees

Students studying a secondary instrument beyond the required four semesters of secondary piano will be assessed a per-credit hour fee and must have the approval of the undergraduate dean and program director or department chair. Students who require an accompanist may be assessed an accompanying fee.

Non Music or Free Electives

Non–music or free electives may be chosen from any courses offered by the university except ESS courses numbered below 140.

Dual Degrees

Dual degrees have more stringent requirements than "double majors." The only courses that may count for both degrees are the general education requirements (ENG 105 and ENG 106, Math, People and Society cognate, and STEM cognate). For each degree a student must have a different major and minor, if a minor is required. The major for one degree may not be a minor for the other degree.

Summer Transfer Credit

Students currently enrolled in the Frost School of Music or any University of Miami student wishing to attend another institution during the summer and have credit transferred to the University of Miami must complete the Transfer Credit Equivalency Evaluation Form. (Courses away from UM (https://umshare.miami.edu/web/wda/frost/admissions/frost_transfer_credit.pdf)) After the form is complete make an appointment with the Associate Dean for Undergraduate Studies. Bring a copy of the description of the courses they wish to take at the other institution. After 56 credits have been earned, classes must be taken at a NASM or regionally accredited institution (four year college or university). The last 45 credits prior to graduation must be in residence at the University of Miami.

Graduation Requirements

The general requirements for graduation from the University of Miami are described in the General Information (p. 13) section of the Academic Bulletin. These general requirements are included in the list of requirements for majors in the Frost School of Music. The student should consult regularly with his/her advisor and review the Degree Progress Report available in CaneLink under Academic Requirements. The Degree Progress Report is a tool to help evaluate if academic requirements are being met. The Dean must approve changes or deviations from the printed requirements in writing. Students must satisfy all degree requirements in order to graduate. Degree requirements may be satisfied by successfully completing a course, an approved substitution for the
course, an approved transfer course, or waiver from the course as a result of demonstrating the required competency through testing.

Music students are expected to meet the university general education requirements, detailed in the academic bulletin, in order to ensure that they have acquired essential intellectual skills. Music students are encouraged to engage in a range of academic disciplines.

**English and Mathematics Requirements**

Students requiring ENG 105, ENG 106, or MTH 101 must enroll in these classes during the first year in residence and are not permitted to drop the courses.

**Course and Cognate Requirements**

**Advanced Writing and Communication Skills**

**Courses**

All students are required to successfully complete 3 Advanced Communications and Writing courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. a required musicology course, which will include substantial evaluated and revised writing components.
2. a Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. one required course in their major which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Areas of Knowledge**

**Arts and Humanities Cognates**

All Frost School of Music students satisfy the Arts and Humanities cognate upon successful completion of the BM, BS, or BA music degree requirements.

**People and Society Cognates**

Students enrolled in the following degree programs: MIP, MKP, MVP, MSJI, MSJV, MTC, MWP, MUE, MADE, and MPRO must complete a People and Society cognate.

The following degree programs satisfy the People and Society cognate upon successful completion of the required minor:

- MED Music Education required minor in Education
- MTY Music Therapy required minor in Psychology
- MBEI Music Business and Entertainment Industries required minor in Business, Communications or Entertainment, if the minor is designated as People and Society
- MUS Bachelor of Arts in Music required minor outside of music may fulfill this requirement if the minor is in the People and Society area of knowledge
- A minor in Music Business and Entertainment Industries satisfies the People and Society cognate.

**Science, Technology, Engineering, and Math (STEM) Cognate**

Students enrolled in the following degree programs: MIP, MKP, MVP, MSJI, MSJV, MED, MTY, MTC, MWP, MBEI, MADE, and MPRO must complete a STEM cognate.

The following degree programs satisfy the STEM cognate upon successful completion of the required minor:

- MUE Music Engineering required minor in Electrical Engineering or Computer Engineering
- MBEI Music Business and Entertainment Industries required minor in Business, Communications or Entertainment, if the minor is designated as STEM
- MUS Bachelor of Arts in Music required minor outside of music may fulfill this requirement if the minor is in the STEM area of knowledge

The EMC Core courses are common to all Frost School of Music students regardless of degree program. The EMC core courses empower students to become internal musicians as they develop deep knowledge in music and a high level of musical skills. As a community of musicians, all students interact with their peers whose diverse interest strengthen their music making abilities.

Additional courses for Principal Instrument Lesson & Studio Class and Ensembles may be required for the major.

All EMC core courses must be successfully completed with a grade of "C" or higher.
### Degree Requirements for Foote Fellows

Foote Fellows have freedom within the General Education requirements as described below.

- Creative American Music Minor (p. 468)
- Music Composition Minor (p. 473)
- Studio Music and Jazz Instrumental Minor (p. 478)
- Dance Minor (p. 480)
- Performer’s Certificate in Instrumental Performance (p. 447)
- Performer’s Certificate in Keyboard Performance (p. 449)
- Performer’s Certificate in Jazz (p. 478)
- Performer’s Certificate in Vocal Performance (p. 480)

Bachelor of Arts in Music (MUS)

Dept. Code: MCY

Undergraduate students who are interested in musicology, music history or ethnomusicology are encouraged to enroll in the Bachelor of Arts in Music degree, through which they can pursue these and related subjects within a liberal arts music curriculum. There is no undergraduate degree in musicology.

Bachelor of Arts in Music

- B.A.M. Bachelor of Arts in Music (p. 442)

Minors

- Minor in General Music (p. 444)

B.A.M. Bachelor of Arts in Music

Introduction

The Bachelor of Arts in Music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and pre-legal. A minor outside the Frost School of Music is required. Students in the BA in Music program must earn a minimum 2.5 GPA each semester to remain in the program.

The mission of the Bachelor of Arts in Music is to provide students with the highest quality education possible in music, a broad education in the liberal arts, and in-depth study in an academic area outside of the Frost School of Music.

Educational Objectives

- Students will acquire a thorough knowledge of music theory and music history, and develop advanced competence in musical performance.
- They will develop the ability to think, speak, and write clearly with the capacity to explain and defend their views effectively and rationally based on substantive knowledge of the liberal arts.
- The student will acquire competency in a selected non-music academic area that includes a broad understanding of the area and contemporary thought within the area.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All BA in Music students will successfully complete:

1. MCY 341, which will include substantial evaluated and revised writing components.
2. MCY or MTC 300+, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MCY or MTC 300+, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

# Minor in General Music

(Audition Required)

Any student wishing to declare a minor in music must audition on an instrument and be approved by the Frost School of Music as a minor. The approval form is available here (http://www.miami.edu/frost/index.php/frost/students) or in the Undergraduate Dean's Office. A fee is assessed for private instruction. The fee is $300 per semester and must be paid prior to enrolling. Please note that private lessons may not be available on all instruments. Studio space varies from year to year. A music minor requires 15 credit hours, 12 of which must be earned at the University of Miami.

**Instrumental Performance (MIP)**

Dept. Code: MIP

The Department of Instrumental Performance offers a bachelor of music performance degree and a performer's certificate in 17 traditional instruments: flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, euphonium, tuba, percussion, violin, viola, violoncello, double bass, guitar, and harp.

**Bachelor of Music: Instrumental Performance (MIP)**

The purpose of the Bachelor of Music in Performance Degree is to

1. Provide the highest quality of education possible in the areas of musicianship that will lead toward a professional performance career or graduate study as a classical artist.
2. To provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research.
3. To provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

**Educational Objectives**

- Students will develop musicianship skills and technique that will lead toward a professional career as a solo classical performer or graduate study.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble leading towards a professional career or graduate study as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for fostering a professional career or graduate study as a classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.
Major in Instrumental Performance

- B.M. in Instrumental Performance (MIP) degree requirements (p. 445)

Certificates

- Instrumental Performance (p. 447)

B.M. in Instrumental Performance

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Instrumental Performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MIP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MIP 541-549 Pedagogy and Repertoire, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Certificate in Instrumental Performance

Performers Certificate in Instrumental Performance

(Audition Required—Music Majors Only)

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWI, MBM, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.
Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All keyboard performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MKP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MKP 547 Keyboard Pedagogy, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Total required credits**

**Certificate in Keyboard Performance**

**Performer’s Certificate in Keyboard Performance**

(Audition Required—Music Majors Only)

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

Music Education and Music Therapy (MED) & (MTY)

Dept. Code: MED

The Department of Music Education and Music Therapy offers two degree programs,

• Music Education (MED)
• Music Therapy (MTY).

Majors in Music Education and Music Therapy

• B.M. in Music Education with Minor in Education (p. 450)
• B.M. in Music Therapy with Minor in Psychology (p. 453)

B.M. in Music Education with Minor in Education

Introduction

The Music Education program expects its students to be excellent musicians and excellent teachers. The instructional program prepares students to teach choral, general, and instrumental music while allowing them to specialize in an area of music teaching through an emphasis area and the internship. The theoretical foundations and practical techniques in our techniques and methods courses incorporate ideas drawn from theory, research, and the practical experiences of the instructors.

Program Goals

• Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.
• Enable students to apply the musical and instructional skills developed in the program (and reinforced during field experience and student teaching) to teach music in a wide array of contexts.
• Help students to develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.
• Help students develop skills in integrating information from the diverse professional literature into their teaching.

Educational Objectives

• Students must demonstrate generic competencies required by the university in general education courses.
• Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida in Teaching and Learning (TAL) courses.
• Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree.
• Students must demonstrate teaching competencies related to the core courses in the music education.

The Music Education curriculum is designed to prepare students to teach music in a wide array of contexts, including (K-12) public & private schools. All Music Education majors must perform at a high level either vocally or on an instrument. Students must successfully complete the Florida General Knowledge Examination (FGKE) to be admitted to teacher candidacy and to graduate.

All students must develop knowledge of and performance ability on wind, string, and percussion instruments as well as, vocal skills to assure effective use of the voice in teaching.

Admission to and/or retention in the music education curriculum leading to Florida Teacher Certification requires that students be formally screened with respect to specific criteria. Following are the Requirements for Admission to Teacher Candidacy and for Admission to Associate Teaching:

Admission to Teacher Candidacy

1. Acceptance as a major in the music education program.
3. Completion of 45 credit hours. (Transfer students must have at least 12 credit hours earned at the University of Miami.)
4. Successful completion of TAL 305 or TAL 404 (Cor higher).
5. No grade less than a C in TAL & MED courses.
6. 2.5 minimum GPA in music courses.
7. Required Background Check completed through Miami-Dade Public Schools Office.
8. Completion of a successful Field Experience Requirement.

Admission to Student Teaching

1. Approval of MED faculty members.
2. Completion of 90 credit hours.
3. Completion of at least three-fourths of the courses in the teaching major, verified by advisor.
4. Admission to Teacher Candidacy through the Assistant Dean's Office in the School of Education & Human Development.
5. Completion of a C or better in all MED & TAL courses
6. 2.5 minimum GPA in TAL and music courses.
7. Completion of pre-internship field experiences with above-average evaluations.

TOTAL       | Total credits for courses in the major = 61                                  |              |

1. MED, TAL and EMC courses require a grade of “C” or higher. Lessons require a grade of “B” or higher.

2. MED 475 Internship in Music Education (12 credits) can be substituted for MED 471 & MED 473

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Education students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MED 471 & MED 473 Internship in Music Education (Elementary & Secondary) or MED 475 Internship in Music Education, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 542 Teaching General Music, one required course in their major which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Music Therapy with Minor in Psychology

Introduction

The music therapy program provides students with the opportunity to develop comprehensive musicianship as well as clinical knowledge and skills within a rich musical, scholarly, and communicative environment. Music therapy majors must demonstrate musical proficiency, either vocally or instrumentally, and must acquire musical competency on guitar, piano, voice, and percussion.

Graduates of this program are prepared for careers as professional music therapists in a variety of health care and educational settings. Furthermore, graduates are eligible to take the Board Certification Exam in music therapy, leading to the credential, Music Therapist Board Certified (MT-BC). The music therapy curriculum is approved by the American Music Therapy Association, and is based on the clinical and research paradigm known as Neurologic Music Therapy.

To remain in the Music Therapy program, students must earn a minimum 2.5 GPA each semester. Additionally, music therapy core courses must be completed with a grade of C or higher. All internship applications must include a written letter of recommendation from a music therapy faculty member.

Educational Objectives

The music therapy program is designed to address three primary objectives:

- Comprehensive musicianship: through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.
- Knowledge of human behavior: by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.
- Knowledge of Music Therapy: students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context. Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through five semesters of clinical practice in addition to a six-month, full-time clinical internship. Internship applications must include a written letter of recommendation from a music therapy faculty member.

The Music Therapy Equivalency Program

The equivalency program is designed for the individual who has already completed a bachelor’s degree in a related discipline, including the following courses:

- Music Theory I, II, III and IV; Music History I and II; Conducting, Arranging, Applied Lessons (6 semesters), Performing Ensembles (8 semesters), Piano Competency (4 semesters of either lessons or group piano) and Introduction to Psychology.

Beyond these courses, the program consists of 50 credit hours that can be completed in two years, followed by a six-month clinical internship. All internship applications must include a written letter of recommendation from a music therapy faculty member. Please contact the Music Therapy Program Director for a listing of the 50 credit hours.

If any of the prerequisite courses have not yet been completed, they can be taken at the University of Miami. Taking these additional courses, however, may lengthen the amount of time required to complete the equivalency program. In certain situations, alternate courses from other universities can substitute for the required courses. Depending on the nature of the course, this decision will be made by the undergraduate dean, in consultation with the Music Therapy Program Director.

In order to determine exactly how many credits are required to complete the equivalency program, the student should obtain official transcripts for their previous degree and meet with the music therapy program director. Following completion of the course and internship, students are then eligible to sit for the music therapy board certification exam and can become professional members of the American Music Therapy Association (AMTA). For students wishing to pursue graduate studies in music therapy, the equivalency program can be combined with the master’s degree in music therapy.

### Advanced Writing and Communication Skills

**Courses**

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Therapy students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MED 363 Senior Practicum, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 551 Music Therapy Research Methods, which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

### Music Media and Industry (MMI)

**Department code:** MMI.

The Department of Music Media and Industry offers degree programs in the following areas:

- **B.M. in Music Business Entertainment Industries with a Business, Communications, or Entertainment-Related Minor.**
- **B.M. in Musicianship, Artistry Development, and Entrepreneurship with a Minor in Music Business and Entertainment Industries.**
- **B.M. in Professional Studies**
- **B.S. in Music Engineering Technology with a Minor in Computer or Electrical Engineering**

### Majors

- **B.M. in Music Business Entertainment Industries with a Business, Communications, or Entertainment-Related Minor (p. 456)**
- **B.M. in Musicianship, Artistry Development, and Entrepreneurship with a Minor in Music Business and Entertainment Industries (p. 460)**
- **B.M. in Professional Studies (p. 462)**
- **B.S. in Music Engineering Technology with a Minor in Computer or Electrical Engineering (p. 463)**

### Minors

- **Creative American Music Minor (p. 468)**
- **Music Business and Entertainment Industries Minor (p. 468)**

### B.M. in Music Business Entertainment Industries

**Introduction**

The Bachelor of Music in Music Business and Entertainment Industries is a professional degree program designed to prepare qualified musicians for careers in the business management, financial, legal, and artistic areas of the music industry. Music, business, and music business courses are combined in an interdisciplinary curriculum, which includes a minor in Marketing, Legal Studies, Business Administration, Management,
Finance, Computer Information Systems, Public Relations, or other approved business-related area.

Students must maintain a minimum GPA of 2.70 to remain in the MBEI Program.

Please see below for additional goals and degree requirements.

**Educational Objectives**

- Students will have a conceptual understanding of the structures and inter-relationships of the music and entertainment industries.
- Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
- Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
- Students will know how to promote and sell a music industry product.
- Students will have an understanding of the performing artist as a major economic factor in the marketplace.
- Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

B.M. in Musicianship, Artistry Development, and Entrepreneurship

The MADE major allows the freedom and flexibility for students to focus on their preferred areas of emphasis, with outcomes that lead toward a viable career of their own choosing.

Educational Objectives

Upon graduation, students will have:

- a highly competitive skill set in musicianship, artistry, and entrepreneurship, including performing, writing, arranging/orchestration, recording, musical direction, marketing and promotion, copyright management and administration, as well as the ability to write basic agreements and licenses;
- a diverse and applied understanding of the music industry;
- the ability to create and execute a sound business plan, as well as a portfolio/EPK that best showcases their brand identity.

| or other applicable media elements. Students will also be required to organize a public performance/showcase their works. Requisite: MADE Major or CAM Minor

**Advanced Writing and Communication Skills**

**Courses**

All students are required to successsfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

- MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
- MMI 445 Senior Project/Portfolio, this course is the capstone for both the CAM and MADE programs. Students will develop and compile a portfolio of creative works that showcase their individual artistry, including but not limited to recordings, videos, songs, scores, and/or other applicable media elements. Students will also be required to organize a public performance/showcase their works. Requisite: MADE Major or CAM Minor

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Professional Studies

The Bachelor of Music in Professional Studies will allow students to work closely with an advisor to develop individual goals and design a personalized program of study. While most music degree programs are highly prescriptive, the MPRO will allow students to tailor the curriculum to match their diverse personal and professional goals, as well as adjust to the rapidly changing music industry.

Students will select approved electives with the assistance of a guidance committee consisting of their assigned Faculty Advisor(s), Senior Academic Advisor, and the Associate Dean for Undergraduate Studies.

**B.S. in Music Engineering Technology**

**Introduction**

The mission of the Music Engineering Technology program is to:

1. Provide the highest quality education in the field of music engineering.
2. Promote advancements in the fidelity and creativity of music recording, production and reproduction.
3. Promote advancements in the invention, design and implementation of audio hardware and software.

The goals of the Music Engineering Technology program are to:

1. Further enhance the program’s national and international stature.
2. Obtain teaching infrastructure and resources needed to provide contemporary education in the field of music engineering technology.
3. Ensure that curricular offerings are current and able to educate students in new and future theory and practice.
4. To help graduates find professional career positions.

**Educational Objectives**

- Understanding the theoretical basis of sound recording, processing and reproduction.
- Understanding the practice techniques used in sound recording, processing and reproduction.
- Designing and implementing original audio hardware and/or software.
• Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

The Music Engineering Technology curriculum is designed for musicians interested in pursuing a career in music recording, audio hardware and software design, and related professions in the audio, audio-video, multimedia, and internet industries. The program is interdisciplinary in nature; it includes courses in music, music engineering, computer science, electrical engineering, and mathematics. This program includes a minor in Electrical Engineering or a double major in Computer Science. Freshman students are expected to enroll in calculus, which carries a prerequisite of Trigonometry and Analytical Geometry. Prospective students are expected to have a strong background in music performance and in mathematics.

1. EMC core courses require a grade of "C" or higher. Lesson require a grade of "B" or higher.
2. MMI 460 Recital Recording and Sound Reinforcement can be taken 3 times for a total of 3 credits
3. Must complete calculus by end of sophomore year.

A minimum 2.7 GPA is required to remain in the Music Engineering Technology program. **A minimum 2.0 GPA is required in all Engineering courses taken.**

### Advanced Writing and Communication Skills

**Courses**

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 410 Music Engineering Capstone Project, which will include evaluated communication skills in attracting an audience, engaging
an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

MMI 401 Audio Electronics, which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Minor in Creative American Music (Audition Required, Music majors only)  
The Bruce Hornsby Creative American Music Program

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a minor in Creative American Music. A minor in Creative American Music requires 17 credit hours.

The Contemporary Performance Principal

The Contemporary Performance Principal accommodates talented songwriters, singers, and instrumentalists who are not classical or jazz musicians. Contemporary instruments include Guitar (Electric and Acoustic), Voice, Electric Bass, Keyboard, Media (Alternate Controllers/Electronic Producers), Strings (Fiddle, Electric Violin, etc.) and Percussion (incl. Drums). Songwriters will also apply to the Creative American Music Program. The Contemporary Performance Principal is available to students in the following majors: Music Business and Entertainment Industries, Music Engineering Technology, Media Writing and Production, Music Education, Music Theory/Composition, Music Therapy, and the Bachelor of Arts in Music. Pre-screening and audition are required.

Minor in Music Business and Entertainment Industries (No Audition Required)

Dept. Code: MTC

The Department of Music Theory-Composition includes two programs, • Music Theory-Composition (MTC) and • Media Writing and Production (MWP).

B.M. in Media Writing and Production

The Commercial Music & Production degree program is designed to prepare undergraduate students for the many issues facing today’s commercial music writers and producers. In this specialized program, successful students complete diverse compositional assignments, develop technical and practical skills in the recording studio, and acquire an understanding of the music industry. Prospective students should furnish evidence of outstanding compositional ability as well as basic sequencing and music notation skills.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Media Writing and Production students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 Analysis and Experience, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**B.M. in Music Theory and Composition**

**Introduction**

The Bachelor of Music in Composition is designed to:

1. Provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition and performance.
2. To provide student access to varied composition communities.
3. To continue to build upon the Frost School of Music's reputation as an innovative, forward-thinking, and first-rate center for advanced study.
4. To maintain the highest educational, professional, and ethical standards.

**Goals of the program are:**

1. To provide students with training to be fluent in basic compositional skills.
2. To help students understand various directions that are available to composers in the 21st century.
3. To help students perform and realize their music.
The curriculum in Composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Composition. Prospective students are expected to furnish evidence of compositional ability.

**Educational Objectives**

- Students develop basic compositional skills of varying lengths and genres.
- Students compose works utilizing various compositional techniques and styles.
- Students compose works for varied instrumentation and/or media.

**Advanced Writing and Communication Skills**

**Courses**

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Theory and Composition students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.

2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

3. MTC 311 Analysis and Experience which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Degree Requirements**

Minor in Music Composition

A minor in music composition is primarily intended for students in the Frost School of Music who are pursuing majors in other fields within the Frost School. Students interested in this minor are required to submit a portfolio to the chairman of the department for approval before declaring the minor. The minor consists of 15 credit hours.

- **MTC 101** Composition I 2
- **MTC 102** Composition II 2
- **MTC 201** Composition III 2
- **MTC 202** Composition IV 2
- **MTC 182** Composition Workshop (4 semesters of 1 credit hour) 4

Complete exactly 1 course from the following: 3
- **MTC 416** Orchestration
- **MTC 516** Advanced Orchestration
- **MTC 312** 20th And 21st Century Techniques

Total Credit Hours 15

Studio Music and Jazz (MSJI) & (MSJV)

Dept. Code: MSJ

The Department of Studio Music and Jazz includes two programs, instrumental and vocal.

Introduction

The mission of the Studio Music and Jazz Performance Program is to:

- Prepare jazz instrumentalists to enter the music profession or graduate school.
- Identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career.
- Foster faculty creativity and performance which serves as a role model for students.
- Develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities.
- Produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast.
- Provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Educational Objectives

- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

Majors in Studio Music and Jazz

- B.M. in Studio Music and Jazz Instrumental (p. 473)
- B.M. in Studio Music and Jazz Voice (p. 476)

Minor in Studio Music and Jazz

- Studio Music and Jazz Instrumental (Music Majors Only) (p. 478)

Certificates

- Jazz Performance (p. 478)

B.M. in Studio Music and Jazz Instrumental

Dept. Code: MSJ

The instrumental curriculum in Studio Music and Jazz is designed for interested and qualified students who desire to continue to develop to the highest degree their background and skills in the performance of studio music and jazz. Admission to this major pre-supposes musical training in jazz on the principal instrument.

### University of Miami Academic Bulletin
### B.M. in Studio Music and Jazz Voice

The vocal curriculum in Studio Music and Jazz is designed for interested and qualified vocalists who desire to continue to develop to the highest degree their backgrounds and skills in the performance of studio music (recording), jazz, and contemporary pop music. Admission to this major presupposes music training in jazz.

will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Vocal students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.

2. MSJ V03 Private Lesson Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

3. MSJ 213 Analysis & Evolution of Jazz Styles II, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Certificate in Jazz Performance

(Audition Required-Music Majors Only)

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

Certificate in Vocal Performance

(Audition Required-Music Majors Only)

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

Minor in Dance
(Audition Required)

There is no undergraduate degree for dance.

A minor in dance is intended for students interested in developing their performance and choreographic skills as well as basics for teaching K-12. Prospective students interested in this minor are required to audition for acceptance as well as maintain a grade point average of 3.0 in dance courses. Dance courses are open to all university students with the approval of their advisor. A minor in Dance requires 15 credit hours.

Nursing and Health Studies

http://www.miami.edu/sonhs

The School of Nursing and Health Studies (SONHS) is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are available for students to study and earn course credit in a variety of local and international settings.

Mission

The mission of the SONHS is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

Baccalaureate Degrees

The SONHS offers three baccalaureate degrees:

1. Bachelor of Science in Health Science (BSHS)
2. Bachelor of Science in Nursing (BSN)
3. Bachelor of Science in Public Health (BSPH)

Student Responsibilities

Students in the SONHS are responsible for fulfilling their degree requirements. Students are also responsible for complying with all provisions outlined in the Academic Bulletin and the Student Handbook.

Academic Bulletin and Student Handbook

In addition to the material listed in the Academic Bulletin, all SONHS students are held to the policies, procedures, and requirements listed in the most current Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for their respective degree program. Please note the material included in the Student Handbook is subject to change throughout the academic year and may not be reflected in the Academic Bulletin. The Student Handbook contains the most current information. Consult an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for questions related to academic requirements and opportunities.

Accommodations Policy for Students with Disabilities

The SONHS adheres to standards of the Americans with Disabilities Act. Any student needing special accommodations should seek assistance through the Office of Disability Services (ODS) (http://umarc.miami.edu/arc/ODS.html), which is the primary on-campus resource responsible for the coordination of services for students with disabilities. Students must follow ODS’ policies, procedures, and timelines to request assistance. Please note ODS has strict deadlines to apply for accommodations; only students who are officially registered with ODS may be granted accommodations.

Financial Assistance

Students interested in obtaining financial assistance in the form of student loans, grants, etc. should contact the Office of Financial Assistance (http://www.miami.edu/admission/index.php/ofas).

The SONHS also offers limited merit-based and need-based scholarships to continuing students. The types of scholarships available and the qualifications for them vary by semester. Continuing students who wish to be considered for SONHS scholarships must apply for such scholarships through the SONHS General Scholarship Application. Calls for applications are e-mailed to continuing students once each semester to prompt students to apply who wish to be considered for a scholarship for the next term. Additional information on SONHS scholarships as well as health science-, nursing-, and public health-related outside scholarships can be found on the SONHS Scholarships website (http://www.miami.edu/sonhs/index.php/sonhs/scholarships).

Facilities

The SONHS is located on the Coral Gables Campus. The four-story, Jerusalem-stone and stucco M. Christine Schwartz Center for Nursing and Health Studies opened in Fall 2006. The building features classrooms and clinical practice labs, conference rooms, a computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000 square foot facility supports the work of more than 40 nurse-scientists and clinical educators and approximately 950 undergraduate and graduate students enrolled in the SONHS’ health science, nursing, and public health programs.

In Fall 2015, SONHS broke ground on the new, state-of-the-art, 41,000 square foot, 5 story Simulation Hospital (http://www.miami.edu/sonhs/index.php/simulation_hospital). The Simulation Hospital is projected to open on the Coral Gables Campus in Spring 2017. It is a one-of-a-kind facility as it is one of the first education-dedicated simulation facilities located on a college campus. This new facility will use the latest simulation technology to provide SONHS students with the highest-quality healthcare education through a variety of simulated clinical environments. It will also provide opportunities for public health-related simulation experiences and create ample opportunities for inter-professional education (IPE).

Library resources for SONHS students are available at the Otto G. Richter Library (http://library.miami.edu) on the Coral Gables Campus and the Louis Calder Memorial Library (http://calder.med.miami.edu) on the Medical Campus.

Clinical experiences are offered in a variety of hospitals and health-related agencies in the community, including the University of Miami Hospital, Jackson Health System, Sylvester Comprehensive Cancer Center, Nicklaus Children’s Hospital, and approximately 170 other community partners.

The Foote Fellows Honors Program (http://admissions.miami.edu/undergraduate/academics/programs-of-distinction/foote-fellows) at the University of Miami recognizes the most educationally accomplished incoming students. Throughout high school, Foote Fellows distinguished themselves both in and out of the classroom as self-motivated, independent-thinking individuals dedicated to the pursuit of knowledge. This program was built to reflect these ideals and to embody the educational vision of former University of Miami President, Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Program Benefits and Opportunities

Foote Fellows in the School of Nursing and Health Studies (SONHS) are exempt from the Areas of Proficiency (e.g., English and mathematics), Areas of Knowledge (i.e., cognates), and Advanced Writing and Communication requirements. These exemptions provide Foote Fellows with unmatched freedom and flexibility to explore a multitude
of educational endeavors within the curricular framework of the SONHS. Many Foote Fellows leverage this opportunity to complete additional majors and/or minors, study abroad, participate in research, etc.

SONHS Foote Fellows may be eligible to participate in various global initiatives (http://www.miami.edu/sonhs/index.php/sonhs/global_studies), research experiences, civically-engaged or clinically-based courses, and academic lectures. They will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University (e.g., “Books That Matter”). Furthermore, Foote Fellows receive focused advising by the Foote Fellow program coordinator on post-baccalaureate prestigious awards and fellowships. SONHS Foote Fellows should speak with the academic advisors located in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to learn more about their academic and extracurricular opportunities.

**Admission Criteria**

Admission to the SONHS Foote Fellows program is by invitation only. To be considered for this program, health science, nursing, and public health students must have a weighted high school GPA of 4.5 or higher and a SAT score of 1300 or higher (verbal and math) or an ACT score of 30 or higher. Students must also submit a portfolio consisting of (a) an essay on their desire to contribute to decreasing health disparities, including a description of at least one health disparity and a plan for addressing it, (b) a historical account of their community service, volunteer, and leadership experience, and (c) a discussion of their short-term and long-term goals.

**Outcome Criteria**

Foote Fellows in the SONHS will maintain an undergraduate GPA of 3.5 or higher. They will also create a capstone portfolio that includes examples of (a) how they have addressed a health disparity throughout their program of study and of (b) the community service, volunteer, and leadership experiences they have participated in throughout their time at the University of Miami.

**Health Science**

**Academic Programs**

The University of Miami (UM) School of Nursing and Health Studies (SONHS) offers courses leading to the degree of Bachelor of Science in Health Science (BSHS). Baccalaureate education provides the foundation for further education in specialized health professional fields. All students who pursue the BSHS degree graduate with a health science major and one of the following pre-professional tracks:

1. General Track
2. Health Management and Policy Track
3. Pre-Medical Track
4. Pre-Occupational Therapy Track
5. Pre-Pharmacy Track
6. Pre-Physical Therapy Track

Students are encouraged to contact graduate programs directly to ascertain if there are specific course requirements they must complete above and beyond those included in their chosen pre-professional track.

**Admission**

Admission as a new freshman or transfer student to the BSHS program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM.

In accepting students into the BSHS program, the UM does not in any way ensure admittance into professional graduate programs. Admission to professional graduate programs is dependent upon strong undergraduate academic performance and appropriate, well-rounded extracurricular experiences. Admission to these programs is determined independently by the school or program to which the student applies.

Applicants interested in any of the SONHS’ baccalaureate programs are encouraged to speak with a representative from the SONHS’ Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) and/or the UM’s Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

**Academic Policies**

**Grades**

Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to grades, progression, and dismissal.

Undergraduate BSHS students must earn a C- or higher in each course for the major to progress. When a course must be repeated, progression in the BSHS program may be altered in order for prerequisites to be met. Such alteration may lengthen the time required to complete the BSHS program.

**Grade Point Averages (GPAs)**

Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to GPAs, progression, and dismissal.

**Requirements to Declare**

Current UM students who wish to switch into the BSHS program must possess a minimum 2.8 UM GPA to be considered.

Incoming transfer students who plan to enter the BSHS program must possess a minimum 2.8 transfer GPA to be considered for admission.

**Requirements to Continue**

BSHS are strongly encouraged not to continue with the BSHS degree if they have less than a 2.5 UM GPA after 15 credits completed in the major.

**Requirements to Graduate**

Students enrolled in the BSHS program must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

**Prerequisites and Corequisites**

Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before
entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean. Students should consult an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to course enrollment.

**Residency Requirements**

Undergraduate BSHS students must adhere to the general UM residency rules (p. 23). At least half of the health science major must be taken in residence at the UM. Exceptions to the residency requirements may only be obtained through an appeal to the Undergraduate Academic Standing and Admissions Committee (UGASAC). Students should speak with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for more information on the residency requirements and on the UGASAC appeals process.

**Transfer Credit**

Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services). Detailed course descriptions or syllabi must be presented to the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for transfer equivalency reviews.

**Degree Requirements**

Listed in this section are the degree requirements for the BSHS program.

The University of Miami's General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

There are numerous ways students can create plans of study for the BSHS program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study. Students should meet with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to degree requirements and plans of study.

**Areas of Proficiency**

The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

**English Composition**

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool.

Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

**Requirements**

Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

**Outcomes**

By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

**Mathematics & Computer Science**

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

**Requirements**

Students complete this requirement by completing a course in each of the following areas:

1. **Calculus:** MTH 141, MTH 161, or MTH 171
2. **Computer Science:** 1 CSC or BTE course
3. **Statistics:**
   a. **Health Management and Policy Track**: MAS 201 or other approved statistics course
   b. **All other tracks**: HCS 202 or other approved statistics course

Math placement criteria is established affected by the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement). The following items may affect students’ math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement) website and consult with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) if they have any questions.

**Outcomes**

By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

**Areas of Knowledge (Cognates)**

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the
Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements (p. 485)" section of the Academic Bulletin or visit http://www.miami.edu/cognates/.

**Arts & Humanities**

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

**Requirements**

Complete one Arts & Humanities cognate.

**Outcomes**

By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

**People & Society**

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

**Requirements**

Complete one People & Society cognate.

**Outcomes**

By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change

**Science, Technology, Engineering, and Mathematics (STEM)**

STEM cognates develop students' abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

**Requirements**

Complete one STEM cognate. The health science major may be used to fulfill this cognate area.

**Outcomes**

By completing the STEM requirement, students will be able to:

1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

**Major**

Refer to the "Major Requirements" section below for information on the courses required for the BSHS program.

Students in the BSHS program may not declare an additional major in Biology.

**Minor**

All students must complete a minor from the SONHS’ approved minors list. An approved second major from this list waives the minor requirement. See the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for details.

Students in the BSHS program may not declare a minor in Biology.

**Advanced Writing and Communication Skills**

The Advanced Writing and Communication Skills requirement empowers health science students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health.

**Requirements**

To fulfill this requirement, students must complete five designated writing-intensive courses. Several health science requirements and/or electives may qualify as writing-intensive.

**Health Science Courses that Require Formal Student Writing or Presentation**

The following courses carry writing and presentation components and may count for the BSHS program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Writing Assignment</th>
<th>Student Presentations</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 105 and ENG 106</td>
<td>Serves as a prerequisite to other skills</td>

</tbody>
</table>
Classes Not Applicable Toward SONHS Degrees

The following courses do not count toward the 120 credits required of the BSHS degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Senior Assessments

In line with the SONHS’ ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students’ GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students’ ability to graduate.

Research Experience

Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach) during their time at the UM. Students should speak with the academic advisors located in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to learn more about the research opportunities available to them at the UM.

Required Coursework and Sample Plans of Study

Visit the "TRACKS IN BSHS PROGRAMS (p. 486)" link to learn more about the academic requirements for the SONHS’ BSHS programs and to view sample graduation plans, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for each BSHS program.

Major in Health Science

- BSHS, Health Science Major, General Track (p. 486)
- BSHS, Health Science Major, Health Management and Policy Track (p. 488)
- BSHS, Health Science Major, Pre-Medical Track (p. 490)
- BSHS, Health Science Major, Pre-Occupational Therapy Track (p. 492)
- BSHS, Health Science Major, Pre-Pharmacy Track (p. 494)
- BSHS, Health Science Major, Pre-Physical Therapy Track (p. 496)

BSHS - General Track

Students enrolled in the General Track must complete the coursework listed below to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

**Total Credit Hours**

---

* The health science major may be used to fulfill this cognate area.

** Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above.

*** Students who complete the Traditional Chemistry or the Chemistry for the Biosciences sequences automatically fulfill the requirements for a minor in chemistry; no additional coursework would be required to complete this requirement.

**** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

***** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

### This is only a sample.

There are numerous ways students can create plans of study for the General Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, General Track
- **Minor(s):** Chemistry
- **Cognates**
  - **Art & Humanities:** American Literature (RAU = English)
  - **People & Society:** Abnormal Psychology (RAU = Psychology)
BSHS - Health Management and Policy Track

- Science, Technology, Engineering, and Mathematics (STEM): Health Science major (RAU = Nursing & Health Studies)

### BSHS - Pre-Occupational Therapy Track

Students enrolled in the Pre-Occupational Therapy Track must complete the coursework listed below to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

Advanced Writing and Communication Skills***

This is only a sample. There are numerous ways students can create plans of study for the Pre-Occupational Therapy Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

• ENG placement: ENG 105
BSHS - Pre-Pharmacy Track

- **MTH placement:** MTH 107
- **Major(s):** Health Science, Pre-Occupational Therapy Track
- **Minor(s):** Chemistry
- **Cognates**
  - **Art & Humanities:** American Literature (RAU = English)
  - **People & Society:** Foundations of Behavior for Prehealth Professions (RAU = Anthropology)
  - **Science, Technology, Engineering, and Mathematics (STEM):** Health Science major (RAU = Nursing & Health Studies)

Advanced Writing and Communication Skills**** 0

Electives***** 13-12

Total Credit Hours 120

* The health science major may be used to fulfill this cognate area.
** Students may fulfill this requirement by taking any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above.
*** Students who complete the Traditional Chemistry or the Chemistry for the Biosciences sequences automatically fulfill the requirements for a minor in chemistry; no additional coursework would be required to complete this requirement.
**** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.
***** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Pre-Pharmacy Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. W Course is designated as writing-intensive
* Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above.
** HCS 216 is not required but it is highly recommended.
Nursing
www.miami.edu/sonhs

Nursing Accreditation

The baccalaureate nursing program in the University of Miami’s (UM’s) School of Nursing and Health Studies (SONHS) is approved by the Florida Board of Nursing and accredited by the following:

Commission of Collegiate Nursing Education (CCNE)
One DuPont Circle NW, Suite 530
Washington, DC 20036
(202) 887-6791

Academic Programs

Baccalaureate education is the primary foundation for professional nursing and is necessary for graduate study. The SONHS offers three baccalaureate options leading to the Bachelor of Science in Nursing (BSN) degree:

1. Accelerated BSN: For students who hold a baccalaureate degree in a field other than nursing and who seek a one year nursing degree
2. RN-to-BSN: For students who possess a diploma or Associate’s degree in nursing, who have successfully completed the Registered Nurse (RN) licensure exam, and who wish to finish their baccalaureate education within three to five semesters
3. Traditional BSN: For students who may not have any previous higher education experience and who seek a traditional four-year nursing degree

Admission

Students who possess a baccalaureate degree from a regionally-accredited institution in a field other than nursing and who wish to pursue a career in nursing may apply to the Accelerated BSN program. Applicants must meet specific admission criteria and complete specific clinical prerequisites (http://www.miami.edu/sonhs/index.php/accelerated_bsn/admissions) before they may enter the Accelerated BSN program. Applications for the Accelerated BSN program are submitted through NursingCAS (http://www.nursingcas.org) and are reviewed by the SONHS.

The RN-to-BSN program is designed to provide licensed RNs who have an Associate’s degree or a nursing diploma with an opportunity to complete the remaining coursework needed to earn a BSN degree. Students interested in the RN-to-BSN program must meet specific admission criteria (http://www.miami.edu/sonhs/index.php/rn_to-bsn/admissions) and must apply through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint). All applications are reviewed by the SONHS.

Admission as a new freshman to the Traditional BSN program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM. Students who wish to transfer into the Traditional BSN program must also meet general UM admission requirements. Additionally, students who wish to transfer directly into the clinical components of the Traditional BSN curriculum (i.e., the third year) must complete specific clinical prerequisites (http://www.miami.edu/sonhs/index.php/bsn/admissions) as outlined by the SONHS. These transfer applicants will be considered for direct entry into clinical coursework as space allows. All transfer applications are handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and are reviewed by the SONHS. Only credits taken at regionally-accredited institutions are considered for transfer to the UM.

Applicants interested in any of the SONHS’ baccalaureate programs are encouraged to speak with a representative from the SONHS’ Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) and/or the UM’s Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

Academic Policies

Technical Standards

Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the UM SONHS at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

1. Observation
2. Communication
3. Motor
4. Conceptual-Integrative
5. Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment. Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant’s ability to complete all components of the program.

Observation

The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.

Communication

Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to...
communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

**Motor**
Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

**Conceptual-Integrative**
These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

**Behavioral-Social**
Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

**Clinical Clearance**
Before students can enter the clinical components of the undergraduate nursing curriculum, they must successfully complete a drug test and a background check. Students must have a background report without any infractions, regardless of how they were resolved or adjudicated. Accordingly, if a student’s background report contains any infractions, regardless of how they were resolved or adjudicated, he/she will not be able to successfully complete the background check and he/she will be withdrawn from the nursing program.

Students must also provide current immunizations as outlined by the SONHS and obtain a Basic Life Support (BLS) for Healthcare Providers certification from the American Heart Association prior to entry into clinical coursework. The BLS certification must include content on Automated External Defibrillators (AEDs).

Refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) or speak with a representative in the OSS (http://www.miami.edu/sonhs/index.php/sonhs-office_of_student_services) for more information.

**Grades**
Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to grades, progression, and dismissal.

Undergraduate nursing students must earn a C or higher in each clinical prerequisite and each nursing course to progress.

A C- or below is considered a failure in a clinical prerequisite or a nursing course. Students are allowed to repeat only one failed clinical prerequisite and one failed nursing course. A student who fails only one clinical prerequisite and/or one nursing course, retakes the failed clinical prerequisite and/or failed nursing course, and receives a passing grade on the second attempt at a failed clinical prerequisite and/or a failed nursing course may progress through the program but the original failure is still counted as a failed course. Failure of two clinical prerequisites or two nursing courses with a grade of C- or below, or failure of the same clinical prerequisite or the same nursing course twice with a grade of C- or below, constitutes failure of two clinical prerequisites or two nursing courses, respectively, and the student will be dismissed from the nursing program.

When a nursing course must be repeated, progression in the nursing program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the BSN program.

Students who repeat a clinical nursing course must repeat both the theoretical and clinical components of the course. Students are required to fulfill the course requirements in effect at the time of enrollment. No special courses will be created for students who repeat a course.

**Grade Point Averages (GPAs)**
Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to GPAs, progression, and dismissal.

**Requirements to Declare**
Current UM students who wish to switch into the Traditional BSN program must possess a minimum 3.0 UM GPA and a minimum 2.75 clinical prerequisite GPA to be considered.

Incoming transfer students who plan to enter the Traditional BSN degree must possess a minimum 3.5 transfer GPA and a minimum 3.3 clinical prerequisite GPA to be considered for admission.

**Requirements to Continue**
Students who are enrolled in the Traditional BSN program and who are not yet enrolled in their clinical coursework (i.e., third or fourth year) are strongly encouraged to continue with the nursing major if they have less than a 2.5 UM GPA and/or less than a 2.5 clinical prerequisite GPA after 15 credits in the clinical prerequisites and/or second year nursing courses.

**Requirements to Progress into Clinical Coursework**
Students who enter the Accelerated BSN program enter directly into clinical coursework. These students must possess a minimum 3.0 transfer GPA and a minimum 3.0 clinical prerequisite GPA to be considered for admission.

Current UM students enrolled in the Traditional BSN program must possess a minimum 3.0 UM GPA and a minimum 2.75 clinical prerequisite GPA to progress into their clinical coursework (i.e., third year).
Incoming transfer students who apply to transfer directly into the clinical components of the Traditional BSN degree (i.e., the third year) must possess a minimum 3.5 transfer GPA and a minimum 3.3 clinical prerequisite GPA to be considered for admission.

Requirements to Graduate
Students enrolled in the Accelerated BSN, RN-to-BSN, and Traditional BSN programs must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

Prerequisites and Corequisites
Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean. Students should consult an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to course enrollment.

Residency Requirements
Undergraduate nursing students must adhere to the general UM residency rules (p. 23). Once a student enrolls at the UM, all remaining clinical prerequisites must be completed at the UM unless special permission is obtained through an appeal to the Undergraduate Academic Standing and Admissions Committee (UGASAC). Additionally, all courses in the nursing major must be completed at the UM. Students should speak with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for more information on the residency requirements and on the UGASAC appeals process.

Transfer Credit
Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services). Detailed course descriptions or syllabi must be presented to the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for transfer equivalency reviews.

Degree Requirements
Listed in this section are the degree requirements for the Traditional BSN program. The Accelerated BSN and RN-to-BSN requirements are listed under the "OVERVIEW" section of the "TRACKS IN BSN PROGRAMS (p. 505)" link for each of the respective programs.

The University of Miami's General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage in a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year). Students should meet with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to degree, clinical prerequisite, or major requirements.

Areas of Proficiency
The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition
Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Requirements
Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

Outcomes
By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Mathematics
In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

Requirements
Students complete this requirement by completing NUR 202.

Math placement criteria is established affected by the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement). The following items may affect students' math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement) website and consult with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) if they have any questions.

Outcomes
By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems
Areas of Knowledge (Cognates)
The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements (p. )" section of the Academic Bulletin or visit http://www.miami.edu/cognates/.

Arts & Humanities
Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Requirements
Complete one Arts & Humanities cognate.

Outcomes
By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

People & Society
People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Requirements
Complete one People & Society cognate.

Outcomes
By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change

Science, Technology, Engineering, and Mathematics (STEM)
STEM cognates develop students’ abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Requirements
Complete one STEM cognate. The nursing major may be used to fulfill this cognate area.

Outcomes
By completing the STEM requirement, students will be able to:

1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

Clinical Prerequisites
Refer to the "Clinical Prerequisite Requirements" section below for information on the clinical prerequisites required for the Traditional BSN program.

Major
Refer to the "Major Requirements" section below for information on the courses required for the Traditional BSN nursing major.

Advanced Writing and Communication Skills
The Advanced Writing and Communication Skills requirement empowers nursing students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health. Several designated writing-intensive courses are built into the nursing major to satisfy this requirement.

Required Communication domains
Students must communicate effectively using English in clinical and classroom settings. A student must be able to elicit information from patients, describe changes in mood, activity, and posture, and perceive nonverbal communications. A student must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. Students must be able to communicate effectively and efficiently with all members of the healthcare team in both immediate and recorded modes. Throughout the curriculum students are expected to achieve skills in the following communication domains:

Therapeutic Communication
Therapeutic communication between the nurse and patient is a cornerstone of effective nursing care. This communication style is goal-oriented and focused on learning and promoting growth.

Example content: principles of therapeutic use of self; therapeutic communication techniques; health education/teaching; reflective journals

Technical Communication
Technical communication encompasses the specific methods used by the nursing profession to communicate information necessary for nursing practice.

Example content: use of clinical information systems (e.g., electronic health record, physician order entry); application of standardized health care terminology; use of data and data systems

Inter- and Intra-Professional Communication
Effective communication among all members of the healthcare team is essential for delivering high quality, safe patient care.
Example content: teamwork/cooperative learning; scopes of practice; conflict resolution; group dynamics and evaluation

Scholarly Written Communication
Scholarly writing is a formal means of communication in which the writer communicates synthesized knowledge about a topic while also demonstrating original thought and unique perspectives.

Example content: scholarly papers; research critiques; application of APA publication style

Scholarly Verbal Communication
Scholarly verbal communication is a formal way of speaking with the intended audience to provide and/or elicit information in a systematic manner. Primary methods of scholarly verbal communication involve verbal presentations/lectures and formal data gathering processes such as interviews.

Example content: scholarly presentations; key informant interviews

Minimal writing proficiency standards
Writing proficiency is evaluated throughout the BSN plan of study. Three primary categories of writing are required:

1. scholarly papers (NUR 400/NUR 401, NUR 440, and NUR 453)
2. patient care documentation (NUR 304, NUR 308, NUR 318, NUR 320, NUR 411, NUR 448, and NUR 453)
3. reflective journals (NUR 306 and NUR 453)

Each writing component is evaluated as part of the grading rubric for the associated course. Feedback and revisions are required.

Plan for assessment
Content to meet the required communication domains and minimal writing proficiency standards is provided across the curriculum. The table below outlines the specific communication domains covered in each course as well as the assessment/outcome criteria used to measure them. In addition to demonstrating skills across the five required communication domains, students must complete ENG 105 and ENG 106 or their equivalents to provide the foundation for the development of more advanced writing and communication skills.

Students can transfer equivalent clinical prerequisites to the UM as long as they comply with the general UM and the SONHS residency rules (see “Residency Requirements” section above). Students must provide the documentation listed in the “Transfer Credit” section above to the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for any health science, nursing, or public health transfer equivalency requests. For transfer equivalency reviews of any other clinical prerequisites, students must present any necessary documentation to the respective academic unit for their consideration.

RN-to-BSN
Students must meet specific admission criteria (http://www.miami.edu/sonhs/index.php/rn_to_bsn/admissions) to be considered for the RN-to-BSN program. If admitted, any required coursework must be completed prior to matriculation.

Traditional BSN
All clinical prerequisites must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year) and within the last 10 years. The clinical requirements include:

<table>
<thead>
<tr>

(*) = MTH 107 is a prerequisite or corequisite for BIL 150. If SAT/ACT/ALEKS scores place a student above MTH 101, the student is waived from the MTH 101 requirement. If SAT/ACT/ALEKS scores place a student above MTH 107, the student is waived from the
BIL 150 prerequisite/corequisite MTH 107 requirement. Credits is not awarded for these waivers.

Students can transfer equivalent clinical prerequisites to the UM as long as they comply with the general UM and the SONHS residency rules (see “Residency Requirements” section above). Students must provide the documentation listed in the "Transfer Credit" section above to the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for any health science, nursing, or public health transfer equivalency requests. For transfer equivalency reviews of any other clinical prerequisites, students must present any necessary documentation to the respective academic unit for their consideration.

Major Requirements
Nursing must be a student’s first major. There is no additional major offered in nursing.

Visit the "TRACKS IN BSN PROGRAMS (p. 505)” link to learn more about the major requirements for the SONHS’ BSN programs, which are listed under the "OVERVIEW" section for each BSN program.

Minor Requirements
There is no minor available in nursing.

Classes Not Applicable Toward SONHS Degrees
The following courses do not count toward the 120 credits required of the BSN degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Pre-immersion Course
Prior to enrollment in clinical nursing courses, students must complete a mandatory online pre-immersion course. The pre-immersion course is listed in students' first term of clinical enrollment but it does not affect students’ GPAs. Failure to complete the pre-immersion course may delay entry into the clinical nursing courses. Information about the pre-immersion course will be provided to eligible students by the OSS.

Senior Assessments
In line with the SONHS’ ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students’ GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students’ ability to graduate.

HESI Exams
Mandatory HESI exams are required throughout the undergraduate nursing programs. For further details, refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks).

RN Licensure Exam (NCLEX-RN)
Students who successfully complete the Accelerated BSN or Traditional BSN program at the SONHS are eligible to sit for the RN licensure exam referred to as the NCLEX-RN. For additional eligibility requirements, refer to the appropriate state board of nursing website.

Research Experience
Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach) during their time at the UM. Students should speak with the academic advisors located in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to learn more about the research opportunities available to them at the UM.

Required Coursework and Sample Plans of Study
Visit the "TRACKS IN BSN PROGRAMS (p. 505)” link to learn more about the academic requirements for the SONHS’ BSN programs and to view sample graduation plans, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for each BSN program.

Major in Nursing
• Accelerated BSN (p. 505)
• RN-to-BSN (p. 506)
• Traditional BSN (p. 507)

Accelerated BSN
Students enrolled in the Accelerated BSN program must complete the following coursework as specified in the Plan of Study to earn the BSN degree through the School of Nursing and Health Studies (SONHS):

Curriculum Requirements

<table>

</table>

L Course includes a lab component
C Course includes a clinical component and meets the UM civic engagement criteria

Upon successful completion of the 30 core credits listed above, 30 additional credits are automatically awarded to RN-to-BSN students simply for possessing an RN license, bringing their overall credit total up to the 120 credits required for the BSN degree. These credits are added in the form of the following Advanced Placement courses at no additional tuition cost:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

**Traditional BSN**

Students enrolled in the Traditional BSN program must complete the coursework listed below to earn the BSN degree through the School of Nursing and Health Studies (SONHS). All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to degree, clinical prerequisite, or major requirements.

C: Course includes a clinical component and meets the UM civic engagement criteria.
L: Course includes a lab component.
*: The nursing major may be used to fulfill this cognate area.
**: MTH 107 is a prerequisite or corequisite for BIL 150. If SAT/ACT/ALEKS scores place a student above MTH 101, the student is waived from the MTH 101 requirement. If SAT/ACT/ALEKS scores place a student above MTH 107, the student is waived from the BIL 150 prerequisite/corequisite MTH 107 requirement. Credits is not awarded for these waivers.
*** These NUR courses follow a lock-step sequence; these NUR courses must be taken in the semesters specified in the Plan of Study.
**** Course must be completed online via Blackboard prior to full matriculation into the clinical components of the Traditional BSN program (i.e., the third year); students officially register for the course in their first semester of their third year but the course does not affect the students’ GPA.
*****This elective must be completed by taking at least 3 credits in a BIL, BPH, HCS, HST, or NUR course at or above the 200 level.

****These courses are factored into the Traditional BSN nursing coursework; students do not need to take extra courses to complete this requirement.
*****The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Traditional BSN program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement**: ENG 105
- **MTH placement**: MTH 101
- **Major(s)**: Nursing
- **Minor(s)**: None
- **Cognates**
  - **Art & Humanities**: World of Music (RAU = Music)
  - **People & Society**: The Science of Human Development (RAU = Psychology)
  - **Science, Technology, Engineering, and Mathematics (STEM)**: Nursing major (RAU = Nursing & Health Studies)

All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year).

C Course includes a clinical component and meets the UM civic engagement criteria.
L Course includes a lab component.
* These NUR courses follow a lock-step sequence; these NUR courses must be taken in the semesters specified in this Plan of Study.
** Course must be completed online via Blackboard prior to full matriculation into the clinical components of the Traditional BSN program (i.e., the third year); students officially register for the course in their first semester of their third year but the course does not affect the students’ GPA.
*** This elective must be completed by taking at least 3 credits in a BIL, BPH, HCS, HST, or NUR course at or above the 200 level.

Public Health Academic Programs

The University of Miami (UM) School of Nursing and Health Studies (SONHS) offers courses leading to the degree of Bachelor of Science in Public Health (BSPH). Baccalaureate education provides the foundation for further education in public health and specialized health professional fields. The program is currently undergoing the accreditation process with the Council on Education for Public Health.

Admission

Admission as a new freshman or transfer student to the BSPH program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM.

Applicants interested in any of the SONHS’ baccalaureate programs are encouraged to speak with a representative from the SONHS’ Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) and/or the UM’s Office of Undergraduate Admission.

Academic Policies

Grades
Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to grades, progression, and dismissal.

Undergraduate BSPH students must earn a C- or higher in each course for the major to progress.

When a course must be repeated, progression in the BSPH program may be altered in order for prerequisites to be met. Such alteration may lengthen the time required to complete the BSPH program.

Grade Point Averages (GPAs)
Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to GPAs, progression, and dismissal.

Requirements to Declare
Current UM students who wish to switch into the BSPH program must possess a minimum 2.8 UM GPA to be considered.

Incoming transfer students who plan to enter the BSPH program must possess a minimum 2.8 transfer GPA to be considered for admission.

Requirements to Continue
BSPH are strongly encouraged not to continue with the BSPH degree if they have less than a 2.5 UM GPA after 15 credits completed in the major.

Requirements to Graduate
Students enrolled in the BSPH program must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

Prerequisites and Corequisites
Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean.

Students should consult an academic administrator in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for more information on the residency requirements and on the UGASAC appeals process.

Transfer Credit
Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

Detailed course descriptions or syllabi must be presented to the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for transfer equivalency reviews.

Degree Requirements

Listed in this section are the degree requirements for the BSPH program.

The University of Miami’s General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

There are numerous ways students can create plans of study for the BSPH program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

Students should meet with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to degree requirements and plans of study.

Areas of Proficiency
The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition
Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Requirements
Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

Outcomes
By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Mathematics
In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

Requirements
Students complete this requirement by completing a course in each of the following areas:

1. Mathematics: MTH 107 or higher
2. Statistics: BPH 202 or other approved statistics course

Math placement criteria is established affected by the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement). The following items may affect students' math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement) website and consult with an academic advisor in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) if they have any questions.

Outcomes
By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

Social Science
Requirements
Students complete this requirement by completing PSY 110 and an additional approved social science course for a total of 6 credits.

Modern Language
Requirements
Students complete this requirement by completing one 3 credit Modern Language course at or above the 200 level.

Natural Science
Requirements
Students complete this requirement by completing BIL 150 and BIL 151, as well as CHM 103 and CHM 105 or CHM 111 and CHM 113 or CHM 121 and CHM 113 for a total of 9-10 credits.

Areas of Knowledge (Cognates)
The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates.

For more information on cognates, go to the "General Education Requirements (p. 505)" section of the Academic Bulletin or visit http://www.miami.edu/cognates/.

Arts & Humanities
Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Requirements
Complete one Arts & Humanities cognate.

Outcomes
By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

People & Society
People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Requirements
Complete one People & Society cognate. The public health major may be used to fulfill this cognate area.

Outcomes
By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change

Science, Technology, Engineering, and Mathematics (STEM)
STEM cognates develop students' abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Requirements
Complete one STEM cognate.

Outcomes
By completing the STEM requirement, students will be able to:
1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

Major
Refer to the "Major Requirements" section below for information on the courses required for the BSPH program.

Advanced Writing and Communication Skills
The Advanced Writing and Communication Skills requirement empowers public health students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health.

Requirements
To fulfill this requirement, students must complete five designated writing-intensive courses. Several public health requirements and/or electives may qualify as writing-intensive.

Public health Courses that Require Formal Student Writing or Presentation
The following courses carry writing and presentation components and may count for the BSPH program:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Writing Assignment</th>
<th>Student Presentations</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 105 and ENG 106</td>
<td>Serves as a prerequisite to other skills</td>
<td>Serves as a prerequisite to other skills</td>
</tr>
<tr>
<td>BPH 202</td>
<td>Final written project</td>
<td></td>
</tr>
<tr>
<td>BPH 206</td>
<td>Final written project</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 305</td>
<td>Three reflective papers</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 306</td>
<td>Dietary Assessment paper</td>
<td></td>
</tr>
<tr>
<td>BPH 309</td>
<td>Three reflective papers</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 310</td>
<td>Four reflective papers</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 317</td>
<td>Five journal entries</td>
<td>Group presentation</td>
</tr>
<tr>
<td>BPH 321</td>
<td>Five reflective papers</td>
<td>Student presentations throughout class</td>
</tr>
<tr>
<td>BPH 419</td>
<td>Seven reflective papers</td>
<td>Five research show and tell presentations</td>
</tr>
<tr>
<td>BPH 465</td>
<td>Final written project, small written summaries</td>
<td></td>
</tr>
<tr>
<td>BPH 487</td>
<td>Daily journal, written health assessment</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 490</td>
<td>Five journal entries, final paper</td>
<td>Final student presentation</td>
</tr>
</tbody>
</table>

Outcomes
By completing the Advanced Writing and Communication Skills requirement, students will be able to:

1. effectively communicate information related to public health in both speech and in writing, using appropriate information sources, presentation formats, and technologies
2. demonstrate the necessary written and verbal communication skills to effectively carry out a career in healthcare

Plan for assessment
Student Performance on Written Assignments and Presentations
In order to graduate from the BSPH program students must successfully pass two courses in English Composition (i.e., ENG 105 and ENG 106) as well as five writing-intensive courses with a grade greater than or equal to 70%. The majority of public health courses include written assignments and student presentations as part of the course grade. Grading of student written assignments and oral presentations are based on defined rubrics. These courses may be applied to the BSPH program as outlined in the major requirements.

Graduating Senior Survey (GSS) Responses for Questions Related to Written and Verbal Communication
Based on the results from the GSS, students believe their undergraduate coursework in the BSPH program significantly enhanced their written, oral, and formal presentation skills, which, in turn, allowed them to more effectively interact with various individuals and groups.

Electives
Students must earn a minimum of 120 credits to complete the BSPH degree. Students may need to take varying numbers of elective credits beyond the degree requirements listed above to reach the 120 credit threshold.

Major Requirements
Public health can be a primary or an additional major.

Coursework in the BSPH program is based on recommendations made by the Association for Prevention Teaching and Research (2008) for undergraduate course work in public health. Students are required to complete 33 credit hours of public health coursework, which includes 27 credit hours of core required courses and 6 credit hours of approved public health electives.

Visit the "MAJORS (p. 513)" link to learn more about the major requirements for the SONHS' BSPH program, which are listed under the "OVERVIEW" section for the public health major.

Second Major Requirements
A second major in public health is available to all UM students. Students who pursue a second major in public health must complete the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BPH 206</td>
<td>Introduction To Public Health</td>
<td>3</td>
</tr>
<tr>
<td>BPH 208</td>
<td>Introductory Epidemiology</td>
<td>3</td>
</tr>
<tr>

</tr>
</tbody>
</table>

Total Credit Hours 33

(*) = Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 305, BPH 306, BPH 317, BPH 319,
BPH 355, BPH 402, BPH 419, BPH 487, BTE 450, BSL 460, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 366, GEG 414, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, and MKT 388

Minor Requirements
The SONHS offers a minor in public health. The School also collaborated with the School of Communication to offer a minor in health communication.

Visit the “MINORS (p. 513)” link to learn more about the minor requirements for the public health and health communication minors.

Classes Not Applicable Toward SONHS Degrees
The following courses do not count toward the 120 credits required of the BSPH degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Senior Assessments
In line with the SONHS’ ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students’ GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students’ ability to graduate.

Bachelor of Science in Public Health (BSPH) and Master of Public Health (MPH)/Master of Science in Public Health (MSPH) 4+1 Program
The SONHS and the Graduate Programs in Public Health at the UM Miller School of Medicine have developed a Bachelor of Science in Public Health (BSPH) to a Master in Public Health (MPH) or Master of Science in Public Health (MSPH) 4 + 1 program.

Program Highlights
1. Undergraduate students enrolled in the BSPH program in the SONHS who qualify academically may apply to the MPH or MSPH program in the fall of their junior year.
2. Accepted students are able to take 12 credit hours of Master’s-level public health courses in their senior year
   a. BSPH students taking Master’s-level public health courses in their senior year must obtain a grade of B or better in these courses in order for them to count toward the graduate degree
   b. All Master’s-level credit hours count toward their MPH or MSPH degree
   c. By completing 3-6 credit hours of Master’s-level MPH or MSPH coursework in the summer following completion of their BSPH degree, students can complete the MPH or MSPH degree in only one additional academic year
3. Students accepted to the 4 + 1 program continue to pay undergraduate tuition for the senior year
   a. Upon graduation with the BSPH, students matriculate into the MPH or MSPH program and complete the remaining 33 credit hours of MPH or MSPH coursework at UM graduate school tuition rates

Admission Criteria
1. BSPH students must have an overall undergraduate GPA of 3.0 or higher at the time of application to be considered; accepted students who do not maintain a 3.0 GPA for the remainder of their undergraduate coursework are subject to re-evaluation
2. GRE scores are not required for UM undergraduates who apply to the 4+1 program
3. Admissions decisions are made solely by the admissions committee for the Graduate Programs in Public Health at the UM Miller School of Medicine

Research Experience
Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach) during their time at the UM. Students should speak with the academic advisors located in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to learn more about the research opportunities available to them at the UM.

Required Coursework and Sample Plans of Study
Visit the “MAJORS (p. 513)” link to learn more about the academic requirements for the SONHS’ BSPH program and to view a sample graduation plan, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for the BSPH program.

Major in Public Health
- BSPH, Public Health Major (p. 513)

Minors in Public Health
- Public Health Minor (p. 515)
- Health Communication Minor (p. 515)

BSPH - Public Health
Students enrolled in the public health major must complete the coursework listed below to earn the BSPH degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

Total Credit Hours 120

* The public health major may be used to fulfill this cognate area.
** Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 305, BPH 306, BPH 317, BPH 319, and MKT 388
*** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended that students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.
**** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the public health major. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG, MTH, and modern language placements and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG, MTH, and modern language placement information and major, minor, and cognate selections:

• ENG placement: ENG 105
• MTH placement: MTH 101
• Modern Language placement: SPA 101
• Major(s): Public Health
• Minor(s): None
• Cognates
  • Art & Humanities: Popular Culture (RAU = English)
  • People & Society: Public Health major (RAU = Nursing & Health Studies)
  • Science, Technology, Engineering, and Mathematics (STEM): Biology and Chemistry for Pre-Health Sciences (RAU = Chemistry)

**Health Communication Minor**

The School of Communication (SoC) in collaboration with the School of Nursing and Health Studies (SONHS) offers a minor in health communication, which is available to all students. Students must have a minimum of a 2.0 UM GPA to declare the minor and they must earn a C or higher in each course for the minor for it to count; a grade of C- or lower is not acceptable for the health communication minor. Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

GRADUATE ACADEMIC PROGRAMS

Mission
The mission of the Graduate School is to promote graduate education, scholarship, and research; to support individuals, departments, and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the Committee.

Graduate School
http://www.miami.edu/grad

All graduate work (except for the Master’s Degree in Law, J.D. in Law and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various programs in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Admission requirements are described in the Bulletin of the Graduate School, and may be obtained from the individual department or program. Information is also available here (http://www.miami.edu/grad).

Applications to the Graduate School are processed through the various Schools and Colleges. See this website (http://www.miami.edu/gs/index.php/graduate_school/apply) for a listing of online applications by program.

Prospective students should note that “graduate study” means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative, and scholarship of the student. The term must be distinguished from “post-graduation study” which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor’s degree.

To preserve its ideals of scholarship, conduct, and character the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Academic Policies
Time to Completion
Time to completion starts when a student begins any program in the Graduate School, whether it be a master’s or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various master’s degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master’s degree in field, work must be completed within eight years. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director.

Recency/Validation for Over-Aged Credit Hours
Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.

Continuous Enrollment
To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and readmission must be granted. Doctoral students for whom course work is no longer appropriate should consult their program for registration guidance.

Registration
Graduate students can register on the first day of registration and through the registration period. For more information on registration, students should contact their respective School or College. See academic calendar for dates of registration periods here (http://www.miami.edu/index.php/registrar/calendar).

Full-Time Study
The categories of full-time students include:

1. Graduate students taking 18 or more graduate credit hours during the calendar year (9 credit hours in a regular semester or 6 credit hours in a summer semester. In online programs, 6 credit hours in each regular semester and 6 credit hours during the summer.)
2. Graduate teaching and research assistants taking 16 or more graduate credit hours during the calendar year (8 credit hours in regular semester or 6 credit hours in a summer semester).
3. Graduate students enrolled in any course numbered 800 or above, i.e., any 800-level course required for the completion of the degree.
4. All MBA for Executive and Professional students are considered full-time.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School.

The maximum number of credit hours allowed for full-time study is 12 for each semester and six for each summer semester. Exception to this policy can only be made by the Dean of the Graduate School or his/her designee and requires a signed recommendation from the Program Director.
For thesis and dissertation students, full-time registration is required during the semester or summer session in which a candidate defends the thesis or dissertation. Students who wish to have this requirement waived must have a written request provided to the Graduate School by the Dean of their respective College or School, or the dean’s designee.

No full-time faculty member may be a full-time student, whether or not working toward a degree. Nor may a full-time student be a full-time faculty member.

No full-time student will be a principal investigator in any grant or contract, whether in name or fact. And no principal investigator will be a full-time student.

Exceptions to these rules may be made in cases in which students are encouraged to apply individually for small research grants that are consistent with and contribute to their field of study and their dissertation work, and, in certain programs, in which students in a terminal degree status are obligated, as a part of their degree program, to teach as de facto faculty members. (Note: Faculty from School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue Doctoral degrees in their home program/school.)

Withdrawals

Withdrawals, either from individual courses or from a graduate program, should be processed through the office of the Dean of the School of the student’s program. Students who wish to officially withdraw from joint or dual degree programs should consult the office of the Dean of the School or College for both disciplines. The date of withdrawal is that on which the student notifies the office of the Dean or the date of receipt of a letter requesting withdrawal. No withdrawal from the University is official until the student has consulted with the Dean of his/her school and has completed the necessary forms.

Students wishing to officially withdraw from the University of Miami must provide the Office of the Registrar notification of their intent to withdraw. Initial notification may be made in person, in writing, by fax, or by telephone. This notification will be recorded and used for notification purposes for the Federal Government. Repayment of any federal funds will be based on the date of notification.

Students must also follow the required process as set forth by their school/college for withdrawing from courses. This process often requires that a signature from a dean or the dean’s representative be obtained on a Change of Course form. In some cases, students can complete the Change of Course form (hard copy or through the CaneLink system) without an approving signature. Change of Course forms must be submitted to the Office of the Registrar for final processing/review.

In addition to the completion of the Change of Course form, students will be asked to complete a Withdrawal Checklist and a Withdrawing Student Survey. The Withdrawal Checklist provides students with a series of offices that need to be notified concerning their withdrawal.

To officially withdraw from the MBA Program or Master of Science in Professional Management program, students must inform the Office of Graduate Business Programs in writing prior to the beginning of a course/term. Tuition will be refunded on a prorated basis based on the number of class meetings attended. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. For further information contact: Office of Graduate Business Programs, 305-284-2510, email (mba@miami.edu).

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below under “Credit Hour for Courses After the 12th Week of the Semester”).

If you receive federal financial aid and withdraw before you complete 60% of the semester, a pro rate calculation will determine the amount of financial aid you have earned. It is based on the amount of time you were enrolled. This calculation is independent of any charges incurred at the university.

Credit Hour for Courses After the 12th Week of the Semester

The following statement of policy was adopted by action of the Academic Deans’ Council April 14, 1967:

1. On recommendation of the Dean of the school, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
2. Credit hour granted for a course under this policy should count toward graduation.
3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefits bills must also clear their withdrawal with the main campus Veterans Affairs Officials in the Office of the Registrar who can be contacted at:

Phone: 305-284-2294
Email: registrar@miami.edu

Leave of Absence

Leave may be obtained by petition of the Program Director followed by the approval of the Dean of the Graduate School. Leave of Absence officially stops the time to completion clock. The Petition for Leave of Absence form may be found here (http://www.miami.edu/gs/index.php/graduate_school/forms).

Grades and Credit Hours

The same letter grades are used for graduate and undergraduate students, but with somewhat different meaning.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent accomplishment</td>
</tr>
<tr>
<td>B</td>
<td>Good accomplishment</td>
</tr>
<tr>
<td>C</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).</td>
</tr>
</tbody>
</table>
Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Quality points are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>1.30</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols “S”, “W”, and “I” are not counted as credit hour attempted.

Repeat Rule

A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a “C-” or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated.

Levels of Graduate Study

Graduate study implies the need for a minimum of formal courses and a maximum of independent work under faculty supervision. Coursework, in itself, is not necessarily a determinant of graduate progress and achievement. The appropriate determinants are the ability of the qualified student to master the various qualifying and comprehensive examinations that a program requires of the student. All work taken by a graduate student in the major area or area of concentration shall be at the graduate level (600 or above). With the permission of the program of major concentration a student may take elective credit hours (not prerequisite to the major) at any level provided the following limits are observed:

<table>
<thead>
<tr>
<th>Total Graduate Course Credit Hours</th>
<th>Maximum Course Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Below 500 Level</td>
<td></td>
</tr>
<tr>
<td>30</td>
<td>3</td>
</tr>
<tr>
<td>31 or above</td>
<td>6</td>
</tr>
</tbody>
</table>

Approval for undergraduate credit hours as part of the graduate degree program can be made only after a minimum of 12 credit hours is completed. Award may not be made retroactively, nor are credit hours accepted from another institution.
RA, TA, GA Hourly Guidelines

To receive a stipend an RA, TA, GA must be a full-time student.

Graduate students with appointments as RAs, TAs or GAs will be expected to work 20 hours per week with the exception of efforts directly required for dissertation research.

International students may work on campus provided the student is maintaining F1 status and does not work more than a total of 20 hours per week (including any off campus work the student may have been authorized to perform) while school is in session. Questions regarding work for international students should be directed to International Student and Scholar Services (http://www.miami.edu/isss).

Graduate students with Assistantships and Fellowships will be classified with the following designations. *(FE) Fellows, *(RA) Research Assistant, *(TA) Teaching Assistant, *(GA) Graduate Assistant, *(TR) Trainee. *Please contact the Graduate School for specific codes.

Definitions

FE (Fellow)
Responsibilities do not include the provision of direct services to the University and require internal/external fellowship support.

RA (Research Assistant)
Responsibilities are mainly conducting research and/or assisting with research projects.

TA (Teaching Assistant)
Responsibilities are mainly teaching and/or assisting in the area of teaching.

GA (Graduate Assistant)
Responsibilities are mainly in professional support of University operations and programs. Graduate students should not be hired to perform clerical duties.

TR (Trainee)
Designated as such by specific federal guidelines which indicate a complex process wherein the trainee takes on an increasingly independent role in the selection, conceptualization, and execution of research projects under the supervision of an experienced mentor.

In definitions where the word “mainly” is used, “mainly” is defined as greater than 50%.

Requirements for Teaching Assistants

1. Graduate teaching assistants who are the instructors of record and responsible for assigning grades in a course must have a master’s in the teaching discipline or 18 graduate credit hours in the discipline.
2. Graduate teaching assistants must be directly supervised by a faculty member in the teaching discipline, must attend regular inservice training provided by the Instructional Advancement Center (in coordination with the Graduate School or provided by the specific graduate program), and must be reviewed by the supervising faculty member once a semester.
3. Graduate Teaching Assistants who have previous teaching experience and indication of competency may be exempted from TA Training by the Dean of the Graduate School in consultation with the Graduate Program Director in the discipline. A request for waiver must be submitted to the Dean of the Graduate School by the Graduate Program Director.

Policy on Outside Employment for RA/TA/GA

A graduate student must have prior approval from the chair or advisor to work outside the department, since such activities might impede progress toward his/her degree. Any question or concern should be discussed with the Dean of the Graduate School.

1. A graduate student is allowed to supplement his/her stipend by tutoring undergraduate students in courses in which he/she has no direct responsibility at the time.
2. A graduate student who is teaching a class or lab of a multi-section course using a common syllabus and common exams may not tutor any student in any section of that course.
3. A graduate student, like any other member of the teaching faculty, may offer review sessions for his or her students to which he or she may invite students from other sections of the same course. The graduate student arranging such sessions may not under any circumstances take money from the students in attendance.
4. A graduate student may use his or her office for tutoring or may ask departmental permission to use a classroom or other appropriate university facility.
5. The graduate advisor or department chair may require a graduate student to limit his or her outside employment or tutoring activity if, in the view of the department, such activity is impeding the graduate student’s academic progress or keeping him or her from fulfilling responsibilities within the department.
6. International students should clear their work instructions with International Student and Scholar Services. Questions regarding work for international students should be directed to International Student and Scholar Services (http://www.miami.edu/isss), Phone: 305-284-2928, E-mail: isss@miami.edu.

Graduation

It is the responsibility of the student to apply for graduation through CaneLink during the student’s final semester before the date indicated on the Graduate School calendar and the Schedule of Classes. These dates are published here (http://www.miami.edu/index.php/registrar/calendar). Students who previously applied for a diploma but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students may walk in the graduation ceremony, but the program will indicate “in progress” if information is missing. Students will be degree candidates until they have been cleared by the Graduate School.

Graduation ceremonies are held in May and December only. Those completing degree requirements during the fall, spring or summer sessions may, if they wish, participate in the graduation ceremonies of the previous or following May or December. Students receiving Ph.D., D.M.A., D.N.P., D.P.T., or Ed.D. degrees who are participating in the hooding ceremony and all masters marching in the graduation ceremony must have the approval of the graduate advisor, director, or appropriate person in the program to participate in the ceremonies.

Participation in graduation for students in all graduate programs is contingent upon the following:

1. The student must have met the requirements for their program.
2. The student must have a minimum of 3.00 cumulative grade point average; all students receiving master’s degrees must have completed a minimum of 30 credit hours; all Ph.D. D.M.A. and Ed.D. students must have completed a minimum of 60 credit hours.
3. The student (Ph.D. D.M.A. and Ed.D. candidates) must be admitted to candidacy one semester prior to graduation.

4. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last semester of study must be paid in full by the beginning of the final semester.

5. The student must complete an electronic thesis or dissertation (ETD) according to the Graduate School’s requirements and submit all paperwork, online surveys, and agreements (if required) by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the ETD process early in the semester by discussing with their advisors a suitable timetable for completing the defense of their thesis or dissertation. Students should check the academic calendar for the defense deadline date set for the semester they wish to graduate. The Graduate School also encourages students to familiarize themselves with the ETD process here (http://www.miami.edu/etd), or contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process. (See dissertation section of the Ph.D. description.)

**Clearance for Degree Conferral**

For the Graduate School to clear a student for graduation:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).

2. The Admission to Candidacy form must have been completed by the program at least one semester before graduation. The Graduate School does not require application to candidacy for master’s, D.P.T., nor D.N.P. degrees.

3. The student must defend his/her thesis or dissertation no later than two weeks before the last day of class in the semester he/she wishes to graduate.

4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the semester he/she wishes to graduate for their clearance to be processed in time.

**Class Attendance and Absences**

Regular and punctual class attendance is expected of all graduate students. It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.

V.A. students will be provided a grade report at the end of each semester period. A copy of the report will be placed in the student’s permanent file maintained by the Veteran Affairs Office. Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.

**Student Responsibility**

Standards of study and conduct in the Graduate School are set and maintained, not by fiat of the Graduate School, but rather by the faculty who determine the standards. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School devolves responsibility upon the student and the appointed committee. Within this broad responsibility the recommendation for the degree rests with the committee.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various departments in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements at the time specified.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

It is the responsibility of the student to be informed concerning all regulations and procedures required. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that he/she was not informed of it by an advisor or other authority. The student should become familiar with the Bulletin, including

1. The section presenting the requirements for the degree to be undertaken;
2. The offerings and requirements of the major department;
3. The Graduate Student Honor Code.

After the applicant has been admitted to the Graduate School but before the first registration, the student should consult the school or college and program in which the major work will be done concerning course requirements, deficiencies, if any, the planning of a program or special regulations. Programs may have additional degree requirements that are not listed in this Bulletin. All registrations require the signature of the dean of the school or college (or his/her representative) in which the degree is to be awarded.

Only the Council of the Graduate School may waive requirements stated in this Bulletin.

**Graduate Student Code of Ethics**

Graduate students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the students program and/or the Graduate School through the process described in the Graduate Student Honor Code. All graduate students are bound by the rules and regulations of the University of Miami that apply to them.
Graduate School Grievance Guidelines

Introduction

These University of Miami Graduate Grievance Procedures provides an opportunity for the resolution of disputes involving graduate students in a fair and collegial manner. These Graduate Student Grievance Procedures supersede all prior such procedures in effect or formerly utilized at the graduate level. They do not supplant UM Students Rights & Responsibilities or any other published policy or procedure relating to graduate students.

Purview of the Guidelines

The formal grievance process described herein is intended for cases not involving grades or matters covered by the Honor Code, which have not been resolved at the department or program level, and it is available only after a final determination within the relevant School or College has been reached. Students are encouraged to seek assistance from the University Ombudsperson for possible resolution before initiating the formal graduate grievance process. The procedures set forth here are applicable to any of the following types of grievances by graduate students who are enrolled in any graduate program at the University of Miami, except exclusively in the MD and JD programs:

1. grievances alleging improper dismissal or suspension from a graduate program;
2. grievances alleging the improper withholding or termination of financial support of any kind;
3. grievances alleging any other improper treatment, either substantive or procedural, of a graduate student by a faculty member, department or program, or university agency or administrator except:
   a. allegations of improper evaluation of the quality and/or quantity of academic work (see UM Student Rights & Responsibilities);
   b. allegations of unfair recommendation for employment or further graduate study;
   c. allegations of discriminatory treatment arising from the student complainant’s age, race, gender, sexual preference, handicap, national origin, or religion. (Such allegations ordinarily are handled by the Office of Equality Administration).

Constitution of the Committee and Grievance Panel

The Graduate Council Grievance Committee (GCGC) is a standing committee comprised of the Schools’ and Colleges’ alternate representatives to the Graduate Council. Grievances as understood herein shall be heard by ad hoc appeals panels, constituted from time to time by the Dean of the Graduate School to review individual graduate grievances. The grievance review panel (GRP) shall consist of five disinterested members: four faculty members of the GCGC and one graduate student appointed by the executive board of the Graduate Students’ Association. Notice of the constitution of the GRP shall be given by the Office of the Graduate Dean in writing to all parties to the grievance within ten (10) days after the grievance review request is properly filed.

Any party to the grievance may challenge the disinterestedness of a GRP member in writing to the Dean of the Graduate School within five (5) days after notification of the appointment. The challenge must specify reasons that would prevent the committee member or graduate student from making an unbiased recommendation with respect to the grievance. If such a challenge is determined to be valid by the Graduate Dean, a substitute appointment shall be made and the process will resume accordingly.

Procedure and Time Limits for Filing a Grievance

After a final determination has been made in the relevant School or College (or by the head of the relevant administrative office in the event of a grievance against a university agency), a student who believes he or she has grounds for appeal within the purview of these guidelines may file a written grievance review request with the Office of the Dean of the Graduate School. The request shall describe the student’s allegations in a clear and concise fashion and shall clearly identify the individual(s), program(s), department, School or College, and/or University agency or administrator against whom the grievance is brought. The student’s written grievance review request shall be filed within thirty (30) days of the final determination. No grievance review request nor any other appeal of any kind will be granted after this time limit has expired unless a written extension of time is granted by the Dean of the Graduate School based on a written request from the grievant stating good cause.

Definitions and Assumptions

Burden of Persuasion

The burden of persuasion is on the grievant.

Final Determination

This grievance process is available only after a final determination within the relevant School or College has been reached. This provision is intended to require the grievant to exhaust the remedies available within the relevant School or College before appealing to the Graduate Dean. In the case of a student in an interdisciplinary program who does not yet have a chair and/or committee assembled, the Dean of the Graduate School shall make a final determination in the student’s case subject thereafter to the appeal contemplated by this policy. Appeal from the Graduate School Dean’s decision follows this same procedure, except that the GRP shall be constituted by the Office of the Provost from the pool of GCGC members. Written notice of the constitution of the GRP in the case of a student in an interdisciplinary program without a chair or committee, shall be given by the Office of the Provost to all parties to the grievance within ten (10) days after the grievance review request is properly filed. All other deadlines, requirements, procedures, and the hearing format remain the same.

Originals

Wherever possible, the party in possession of an original document in support of or rebuttal to or at issue in the grievance shall provide it to the GRP within the time frames set out in the Hearing Materials and Preparation Deadlines. If a party has only a copy of a document not received by him, her, or it, the copy shall serve as an original. Digital documents or email messages in contention shall be printed and may then serve as originals.

Party

A party is the student grievant or the individual, program, department, School or College, or University agency or administrator against whom the student brings his or her grievance.

Time Limits

All time limits shall be calculated based on working days of the Fall and Spring Semesters, excluding reading and exam periods and University holidays. Grievances originally filed after the end of the Spring semester will be heard at the beginning of the following Fall Semester. Any stated
time limit herein may be extended with the written consent of the grievant and the Dean of the Graduate School.

**Written**

Any document to which these guidelines refer as written signifies paper (hard) copy. Email messages and digital or other electronic versions do not meet the requirement that a form or notice be provided in writing. However, a party may transmit a digital version of any written document by email in addition to providing it in paper form.

**Deadlines for Hearing Materials, Preparation, and Witness Identification**

All materials to be considered for review by the members of the GRP must be submitted in writing to the Office of the Dean of the Graduate School at least fourteen (14) days before the scheduled date of the hearing, at which time such materials will be distributed to all parties to the grievance and to the members of the GRP. Thereafter, to the extent that any of the parties wishes to have additional materials considered by the GRP, such materials must be received by the Graduate School no later than seven (7) days before the scheduled date of the hearing, at which time all such additional written materials will be distributed to the parties as well as to the members of the GRP. Any party submitting written materials for consideration shall submit the original(s) and five (5) copies thereof to the Office of the Graduate Dean at his, her, or its own expense.

The name of any witness to be called by any party at the hearing shall be provided in writing to the Office of the Graduate Dean no less than five (5) days before the scheduled date of the hearing.

**Hearing**

The grievance review hearing is chaired by a designated member of the GRP. The hearing is staffed by the non-voting Administrative Assistant of the Dean of the Graduate School, who will record it for archival purposes only. The hearing will proceed as follows:

1. GRP chair’s introduction, summary of issues, and process overview.
2. Student’s presentation of issues (15 minutes maximum).
3. University representative’s presentation of issues (15 minutes maximum).
4. Optional: Presentation(s) by witnesses (limited to 3 per side and a maximum of 15 minutes total per side).
5. Questions by members of the GRP.
6. All presenters and witnesses are excused.
7. Deliberation by GRP.

Presentation of the issues should be concise and relevant. Undoubtedly the dispute is somewhat complex or it would not have reached this stage. Points of dispute or ambiguity may be summarized or illustrated by anecdote at the hearing. Experience suggests, however, that the best approach is to minimize formal presentations and allow the GRP members maximum time for questions.

**GRP Decision and Authority**

No additional substantive information may be submitted by any party following the hearing, unless requested by the grievance review panel. The GRP may but need not seek additional information from other sources during its deliberations, which will be conducted in closed session. Following its deliberations, and within ten (10) days of the date of the grievance review hearing, the GRP will make its confidential advisory recommendation to the Dean of the Graduate School [Office of the Provost in the event of a student in an interdisciplinary program who does not yet have a chair or committee]. The subsequent decision by the Dean of the Graduate School [Office of the Provost], which shall be rendered within ten (10) days of the GRP’s recommendation, is final.

Note: The above guidelines pertain only to matters which do not involve representation by an attorney. If an attorney is involved in the grievance, the Office of Legal Counsel at the University should be contacted.

**Admission**

**Eligibility for Admission**

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score. University of Miami faculty members above the rank of instructor are not eligible to apply for the doctorate at the University of Miami. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue doctoral degrees in their home program/school.)

For specific admission requirements see also statements of the various programs.

*Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.*

All those wishing to take courses for graduate credit hour, whether or not they wish to become candidates for a degree, must make application for admission directly to the program of interest prior to registration.

**Requirements for Admission Application**

1. The completed online application form
2. Official transcripts of all college work, both undergraduate and graduate
3. The official score report of the appropriate entrance examination

| GRE | All applicants must submit recent (within five years) Graduate Record Examination (GRE) scores which include 1) the aptitude portion (verbal & quantitative); 2) the most relevant advanced test in the major field if required by the program. GRE scores are valid for 5 years after the test date. |
4. Letters of recommendation sent directly to the graduate program director of the academic program.
5. Other requirements may be required/requested by individual programs. Contact the specific program to which you are applying for their requirements, or for exemptions from the entrance examination.
6. Application fee of $65.
7. All materials and the fee should be sent directly to the program as indicated on the application.

Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.

Categories of Admission

1. **Regular** admission with or without specified deficiencies. Under circumstances in which it is difficult to evaluate the academic background of intellectually qualified applicants, they may be admitted with specified deficiencies based on evaluative criteria established and maintained by the school or college. Such status is often appropriate for international students or students with extensive professional experience relevant to the desired discipline. The Graduate School allows only one semester in deficiency status. For all regular admissions with deficiencies, students must receive a list of documented requirements to remove the deficiency and specific milestones. Students who fail to qualify at the end of that time will be requested to withdraw from the Graduate School.

2. **Post Baccalaureate.** This category provides an opportunity for graduate study for
   a. qualified applicants who, for good reason, do not wish to work toward an advanced degree. This would be appropriate for those students who have special objectives for professional study or scholarly work;
   b. students enrolled in a graduate program elsewhere but desiring to earn graduate credit hour at the University of Miami for the purpose of transferring it to the other institution;

   c. students already holding the master’s degree or doctorate but who desire additional coursework in their field. Those admitted to a post-baccalaureate status should realize that their future admission to regular status is improbable unless they achieve the qualifications originally appropriate to admission to those categories. This is to say that the mere accumulation of graduate course credit hours is not sufficient to permit entrance into another graduate category. No more than a total of 12 credit hours may be taken while in post-baccalaureate status.

   Transient students described in (b) above should have sent to the Graduate School a letter from the Dean of the School of the student’s program they expect to earn a degree, stating that they are in good standing there and have permission to transfer credit hours. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and graduate degree [to be sent directly by the issuing institution to the Graduate School].

3. **Certification/Professional Goals.** This category provides an opportunity for graduate study for qualified teachers or professionals who do not wish to work toward an advanced degree but who for professional reasons need to continue to take graduate courses and have already taken 12 credit hours in Post-Baccalaureate Status. No credit taken in this status can be applied toward a graduate degree at the University.

   A letter explaining the need for the course work by the student’s employer must accompany the application.

Every applicant for admission can be assured that all credentials will be carefully studied in an effort to select appropriately qualified students. Each application for admission is examined by the members of the faculty responsible for the graduate program. The program informs each applicant of the results.

It is expected that most applicants for admission will be candidates for an advanced degree. Except under unusual circumstances those who already hold an advanced degree are not admitted to candidacy for the same degree. Graduate programs vary as to whether students who do not hold the Master's degree are required to initiate graduate studies at that level.

Applicants should note the following:

1. M.B.A. applicants should send applications and all documents to: The Office of Graduate Business Programs School of Business Administration P.O. Box 248505 Coral Gables, FL 33124. For further information you may contact mba@miami.edu
2. all other correspondence, applications and documents should be sent directly to the academic department;
3. no action is taken until a file is complete and all documents are available;
4. application files should be complete at least one month before registration, much earlier for some applications, as specified elsewhere in this Bulletin;
5. admission to graduate status does not imply admission to candidacy for a degree;
6. some programs close admissions early because of limited capacity;
7. materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant.
International Students Admissions

All international students who have been admitted to a program of full-time study at the University of Miami need to enter the U.S. on a student visa. To apply for an F-1 visa, you must provide the U.S. Embassy or Consulate with a Form I-20 or DS-2019, passport, statement of funds, and other documents as required by the U.S. Embassy or Consulate. Please visit the International Student and Scholar Services (http://www.miami.edu/issss) (ISSS) website for further information regarding visas, travel, pre-arrival information, etc. The Form I-20 or DS-2019 can only be issued after you have been admitted and have submitted proof of adequate financial support for your studies and living expenses. For questions regarding issuance of the Form I-20 or DS-2019, please contact your international department.

Readmission

Unless a leave of absence has been requested and approved, students who have not been continuously enrolled must request readmission. Contact the appropriate program office well in advance of registration. If additional college work has been completed elsewhere since the last enrollment at the University of Miami, an official transcript of this will be required. Recency of credit hour rules will apply. The application for readmission to the Graduate School may be found here (https://umshare.miami.edu/web/wda/grad/forms_/web/readmission_to_grad_school.pdf). If you are an applicant for readmission and also an international student, please contact the Office of International Admission at iss@miami.edu and 305-284-2928.

Dual Degree and Accelerated Degree Programs

The University offers unique combined degree programs that culminate with students receiving both the undergraduate and graduate degrees concurrently or an accelerated program of study in which they receive an undergraduate degree and then a graduate degree the following year.

These programs are intended for exceptional students to acquire both undergraduate and graduate degrees, in five years rather than the 4 plus 2 years (approximately) that is traditionally expected.

Please note: Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Requirements

Students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application. Students should discuss the program and possibility of entering the program with an academic advisor. The program may require application at the time of matriculation to the undergraduate degree or prior to the beginning of final exams in the junior year.

Undergraduate students must take the GRE Examination before the end of their classification as a senior and attain a combined score of more than 297 on the verbal and quantitative portions.

Once admitted into a dual degree or accelerated program:

In their senior year, students may take a maximum of 12 graduate credit hours, with a maximum of 6 credit hours per semester. While in senior status, to register, students must complete and submit the Graduate School's Application for Undergraduates to Take Graduate Coursework form which is available here (http://www.miami.edu/gs/index.php/graduate_school/forms). This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status. Add/Drop and/or Course Request forms without this approval form will not be processed. Undergraduate students must register for courses with graduate status in the Office of the Registrar. This process cannot be facilitated via online registration.

Financial Implications

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Students are eligible for undergraduate aid only as long as they are undergraduates. Students enrolled in combined or accelerated degree programs are permitted undergraduate federal and University aid for a maximum of four academic years or to the point at which the number of graduate credit hours in a term exceeds the number of undergraduate credit hours, whichever comes first. During that time frame the student’s undergraduate enrollment status will be determined using only undergraduate level courses in which the student enrolls. Graduate level courses in which the student enrolls during such semesters will not be used to determine the student’s undergraduate enrollment status. Once a student is registered at the graduate level for financial assistance his/her status is considered graduate for all subsequent semesters.

Once registered as a graduate student, a student cannot revert to undergraduate status.

For further information, contact the Office of Financial Assistance at ofas@miami.edu, call 305-284-5212, or visit the office at Rhodes House (Building 37). Office hours are 8:30 a.m. to 5:00 p.m., Monday through Friday.

Graduation Clearance Requirements

For dual degree programs, the student must apply for undergraduate and graduate graduation at the same time. Degrees from dual degree programs are conferred at the same time.

For accelerated degree programs, the student must apply for undergraduate graduation in one semester, and for graduate graduation in a subsequent semester.

The student must meet the requirements of the Graduate School specified in the Bulletin for the awarding of the graduate degree.

Students enrolled in a dual degree or accelerated program can take a maximum of 6 graduate credit hours per semester in their senior year for a maximum of 12 graduate credit hours without incurring additional costs if they are full-time undergraduate students during this period.

Students should register for courses towards their graduate degree as “G” credit hours and not as "U" credit hours. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

Summary of Guidelines for Dual Degree and Accelerated Programs

- Take at least 12 undergraduate credit hours per semester. This qualifies you for the opportunity to take up to 6 graduate credit hours per semester at no additional cost.
- Graduate credit hours can be taken only in the senior year in a dual degree or accelerated program (based on the number of credit hours earned towards the undergraduate degree).
• The maximum number of graduate credit hours allowed per semester is 6.
• The maximum number of graduate credit hours the undergraduate student can take at no additional cost is 12.
• The Application for Undergraduates to take Graduate Coursework form should be completed and all signatures must be obtained before registering for graduate credit hours.
• The student can change his/her status to "graduate", or their status might be determined to be "graduate" for financial aid purposes during or at the completion of the senior year. This will make the student eligible for graduate financial aid (for US citizens or permanent residents).
• The student cannot be a full-time undergraduate (taking 12 or more undergraduate credit hours) and a full-time graduate (taking 9 or more graduate credit hours) at the same time.
• Once a student's status changes to graduate (or after they have taken a full load of graduate credit hours) their status cannot revert to undergraduate status.
• In a dual degree or accelerated program, an undergraduate student cannot take graduate credit hours in any other year except in the senior year.
• The student should avoid taking any undergraduate credit hours after the student’s status has changed to graduate.

For University of Miami Undergraduates

Undergraduates Taking Graduate Coursework. University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The application may be found here (https://www6.miami.edu/grad/forms/ApplicationforUndergraduatestoTakeaGraduateCourse.pdf).

Admission to Graduate Status requires:

1. Must have a minimum of 3.000 G.P.A.
2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than 6 credit hours may be taken in one semester, and no more than a total of 12 credit hours may be taken while in Graduate Status. Students may take no more than 15 credit hours of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar, 305-284-2294.
• Counseling Mental Health
• Reading
• Research, Measurement and Evaluation
• Special Education
• Sport Administration (Focus athletics or recreational sports)
• Sports Medicine
• STEM Education

• MASTER OF FINE ARTS (M.F.A.) with concentrations in the following:
  • Art (Studio Work)
  • Digital Imaging
  • Painting

  • Special Education
  • STEM Education

• SPECIALIST IN MUSIC EDUCATION (SPEC.M.)
• DOCTOR OF MUSICAL ARTS (D.M.A.) with concentrations in the following:
  • Accompanying and Chamber Music
  • Choral Conducting
  • Collaborative Piano
  • Composition
  • Instrumental Conducting
  • Instrumental Performance
  • Jazz Composition
  • Keyboard Performance and Pedagogy
Environmental Science and Policy
Dept. Code: ECSD

Through the Graduate School, The Abess Center for Ecosystem Science and Policy offers an interdisciplinary course of study leading to a Ph.D. Details regarding areas of specialization can be found at the Abess Center website (http://www.cesp.miami.edu). In most cases, doctoral students are supported by research assistantships which include tuition remission and a monthly stipend. All students are also required to serve satisfactorily for one term as teaching assistants in the Abess Center undergraduate program.

Prerequisite
Students admitted to the program must have earned a Bachelor’s or Master’s degree and should display a strong interest in the interdisciplinary study of ecosystem science and policy.

Ph.D. Degree Requirements
Completion of the Ph.D. will take approximately five years. All students are also required to:

• Complete a minimum of 60 credit hours, of which at least 26 must be for coursework taken while in residence at the University of Miami. (Students entering the program with a Master’s degree in a related field may be given credit hour for up to 24 course credit hours.)

• Complete 12 credit hours worth of coursework in the following core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECS 601</td>
<td>Interdisciplinary Environmental Theory</td>

<tr>
<td></td>
<td>Total Credit Hours</td>
<td>12</td>
</tr>
</tbody>
</table>

• Submit, by the end of their second semester, a proposed group of additional courses, totaling at least 18 credit hours, related to their research interest and intended dissertation research area. This group of courses requires approval of both the student’s advisor and the Director of Graduate Studies.

• Accrue at least 13 credit hours worth of dissertation research.

• Pass written and oral comprehensive examinations following the conclusion of the core series of courses, usually at the end of the first year. A majority of the examination committee must be members of the Graduate Faculty of the University. In the event of failing to pass an examination, students are required to retake and pass the examination within one calendar year. By the end of the second year,
students must present and defend a research proposal. Following successful completion of the comprehensive examination and research proposal defense, the student may apply to candidacy for the degree. Any student who fails to be admitted to candidacy for the degree within this two-year period can be dismissed from the program.

- Convene a 4-member dissertation committee by the end of the first year.
- Write and defend a dissertation research proposal by the end of the second year. Students may proceed with the dissertation after the dissertation committee has been appointed and the Director of Graduate Studies and the Graduate School have accepted the dissertation proposal. The dissertation must be an investigation of a substantial scholarly topic and bridge both scientific and policy aspects of the topic area.
- Successfully complete an oral defense of the dissertation.

Office of Study Abroad
Dept. Code: SAP

Opportunities for study abroad may be available for some graduate degree programs during the summer, fall, spring and intersession terms.

Students may participate in programs led by faculty members or may participate in semester exchange program options offered by the MAIA program.

For further information contact:
Office of Study Abroad
PO Box 248263
Coral Gables, FL 33124-1610
305-284-3434
e-mail: iep@miami.edu

In some programs it is possible to earn graduate credit hours for study taken abroad. The curriculum must be worked out by the student in conjunction with an advisor.

Master's Degree

The minimum residence requirement is two semesters in full-time study or the equivalent in part-time work. In practice, most students need at least three semesters, or two semesters plus summer work, to complete degree requirements.

Foreign Language

The requirements in a foreign language or languages are established by the student’s program. In those cases where the program deems it necessary that the student have competency in a foreign language, the student will be required to demonstrate such competence by examination in one or more languages. The choice of language or languages required will be by the program.

Thesis

Decision as to the thesis subject must be approved by the program. The thesis committee will consist of not less than three members. The committee chair must be Regular Faculty from the student’s program or department of concentration (this includes secondary appointments). In addition to the chair, one of the remaining members must also be Regular Faculty or have Graduate Faculty status in the student’s program or department of concentration; the third member must be an outside member. “Regular Faculty” are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the chair of the department and Dean of the Graduate School. A program may require additional members.

The committee is nominated by the Graduate Program Director of the program concerned. The duties of the thesis committee are similar to those of the dissertation committee. The student who presents a thesis must enroll for at least 6 credit hours of thesis. Ordinarily no more than 6 credit hours may be granted.

The Dissertation Editor will provide information on the guidelines and deadlines that will become critical in the final months of the degree process or information can be downloaded here (http://www.miami.edu/etd). The Graduate School office telephone number is 305-284-4154, the email address is grad.dissertation@miami.edu.

Master’s degree students who are required to write a thesis must defend their thesis by the date specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found here (http://www.miami.edu/etd). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

One Dissertation Editor-approved PDF conforming in style to the formatting standards set by the Graduate School must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each thesis must be accompanied by one certificate of approval of oral defense of thesis signed by all members of the Committee, one Signature page from the thesis document signed by all members of the committee, and one ETD Availability Agreement form signed by the student and Committee Chair. The forms can be downloaded here (http://www.miami.edu/etd).

Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami’s Scholarly Repository (http://scholarlyrepository.miami.edu). The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university’s Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student’s information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation can be downloaded here (http://www.miami.edu/etd).
A Second Master's Degree

A student enrolled in a University of Miami master's degree program or holding a University of Miami master's degree may earn a second master's degree in a related area at the University by completing a minimum of 21 credit hours in residence toward the second degree, as long as all program and admission requirements for the degree are met. Each degree must have a separate thesis if two thesis options are elected. The second program decides if the areas are related enough to qualify for the reduced number of credit hours. The student must contact the second program during the application process for the second program to determine if the areas are related enough to qualify for the reduced number of credit hours.

Doctoral Degree

(For Ph.D., D.M.A., and Ed.D. candidates only)

General

The Graduate School does not specify course requirements for the Ph.D. However, the Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D., and not less than half of the total credit hours must be in work open only to graduate students. At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken. Graduate students studying for the Ph.D. who have received their master's degree in the same field must take at least twenty-four (24) hours in residence at the University of Miami in doctoral status.

The specific course requirements for the Ph.D. are established by the major department or program which may require such additional graduate credit hour as it deems necessary. Such requirements will be found in that part of the Bulletin which lists course offerings.

Dissertation

A student must take a minimum of 12 credit hours of dissertation research except where otherwise stated. Not more than 12 credit hours of research may be taken in a regular semester, nor more than 6 in a summer session.

Ph.D., D.M.A., and Ed.D. degree students must defend their dissertation, doctoral essay, or lecture recital essay by the deadline specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found here (http://www.miami.edu/etd). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

One Dissertation Editor-approved PDF conforming in style to the standards set by the Graduate School, must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the
guidelines for preparing theses and dissertations and to conform to the
requirements therein. Each dissertation must be accompanied by one
certificate of approval of oral defense of thesis signed by all members
of the Committee, one Signature page from the dissertation document
signed by all committee members, and one ETD Availability Agreement
form signed by the student and Committee Chair. The forms can be
downloaded here (http://www.miami.edu/etd).

Electronic Theses and Dissertation (ETD) Embargo
Policy
Graduate students can elect to withhold their electronic thesis or
dissertation for up to two years before the work is available for
download from the University of Miami’s Scholarly Repository (http://
 ScholarlyRepository.miami.edu). The metadata for all theses and
dissertations regardless of the availability option elected (i.e., open
access, UM campus only, or embargo) will be immediately available for
viewing in the university’s Scholarly Repository after the Dissertation
Editor has approved and released the thesis or dissertation to the
repository. If embargo is elected by the student, the existence of the
student’s information page will appear in the Scholarly Repository right
away displaying title, defense date, abstract, committee, keywords,
etc., but the PDF of the electronic thesis or dissertation will not be
downloadable until the term of embargo elected has expired. After the
elected embargo period has expired the electronic thesis or dissertation
will be released for open access in the Scholarly Repository. Students
requesting embargo should carefully review the details of embargo
election described in the ETD Availability Agreement form posted on the
ETD website (http://www.miami.edu/etd) to ensure they fully understand
the terms of access for their embargoed work.

Research in Residence

Once a student has completed all course and required research credit
hours, he or she must enroll in Research in Residence status until the
degree has been granted. Research in Residence status is considered
full-time enrollment. Time restrictions on obtaining degrees will be strictly
enforced and can be waived only by the Dean of the Graduate School.
Research in Residence students, while not required, may purchase or
receive any perquisites that are normally available to graduate students.
(See Recency of Credit section.)

Residence
The student must spend at least two consecutive semesters beyond
the first year’s graduate work, wherever taken, in full-time study at the
University of Miami. With program approval,

1. one summer of full-time study in two sessions can be substituted for
   one semester of residence, or
2. full-time study for two successive summers can be substituted for
two regular semesters.

Residence requirements may be altered only by the Dean of the Graduate
School. (At least 24 credit hours must be taken in residence.)

The Supervisory and Dissertation
Committees
A supervisory committee is usually appointed when a student is
formally admitted to a doctoral program. For the dissertation/doctoral
essay/lecture recital essay committee a student needs no less than
four members. The committee chair must be Regular Faculty from
the student’s program of concentration (this includes secondary
appointments). In addition to the chair, two members must be Regular
Faculty or have Graduate Faculty status in the student’s program of
concentration. The fourth member must be an outside member. “Regular
Faculty” are faculty having tenured or tenure-earning appointments of
a program or department. A thesis or dissertation committee cannot
be chaired by a person unless they hold a higher or equivalent degree
as the candidate for the graduate degree. Exceptions to the committee
composition may be approved by the Program Director (or Chair of the
department) and Dean of the Graduate School. A department, program,
or school / college may require additional members.

This committee is nominated by the chairperson of the program
concerned. It is appropriate for the chairperson to consult with the
student regarding the membership of the committee. The supervisory
committee is empowered to plan the course of study for the student; to
determine deficiencies, if any; to set language and other requirements; to
request applicable transfer of credit hour where appropriate and to make
up and administer the qualifying examination.

When the student is admitted to candidacy, a dissertation committee
is formed. This may be the supervisory committee, but it may also be a
committee formed anew to undertake the duties of advising and passing
upon the dissertation. The dissertation committee is nominated by
the department or program concerned, and appointed by the Graduate
Program Director and approved by department chair. As with the
supervisory committee, it must be comprised of at least four members;
this includes the committee chair, who shall be a member of the program
or department of concentration, as well as a permanent member of the
Graduate Faculty. Of the remaining members, it is also required that
two shall be members of the program or department of concentration,
as well as permanent members of the Graduate Faculty (http://
www.miami.edu/gs/index.php/graduate_school/current_students/
graduate_faculty_list_by_department) and one from outside the program
or department of concentration. A program may require additional
members. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research;
2. To meet, at regular intervals, to review progress and expected results;
3. To read and comment upon the draft dissertation;
4. To meet, when the dissertation is completed, to conduct the final oral
   examination and to satisfy itself that the dissertation is a contribution
to knowledge and that it is written in lucid and correct English and
submitted in approved form.

1. The candidate is well advised to have a final, acceptable typescript of
   the dissertation in the hands of each member of his/her committee at a time
reasonably in advance of the final defense of the work a minimum of two
weeks prior to the defense.

The dissertation may be written in a language other than English at the
recommendation of the dissertation committee and with the approval
of the program and the Graduate School. Graduate School approval
will be determined on a case-by-case basis. The Dissertation Chair will
submit a memorandum from the Department Chair to the Dissertation
Editor together with the student’s application for admission to candidacy
explaining why it is both relevant and appropriate for the dissertation
research to be written in a language other than English. Acceptable
“relevant and appropriate” reasons for writing the dissertation in a
language other than English include, but are not limited to: relevancy
to research where presentation in a non-English language expands
knowledge of that language; relevancy where the loss or weakening
of the research’s meaning and impact if primary data, e.g., interviews,
are translated into English; or appropriateness where the majority of
the bibliographic sources, references, and potential outlets for future publication are anticipated to be in that language other than English. Both the memorandum and the application for admission to candidacy form must be submitted to the Graduate School at the same time. In some cases upon review of the memorandum, the Graduate School may determine that the student will also be required to submit an English translation of the non-English dissertation. For all approved cases, an abstract in English should be included in the final dissertation.

One Dissertation Editor-approved PDF of the dissertation must be uploaded to the ETD database and final paperwork handed in to the Graduate School on or before the date specified in the academic calendar published each session, accompanied by one certificate of approval of doctoral dissertation defense, one signature page from the dissertation, and one ETD Availability Agreement form. It is the duty of the student to acquire a copy of the guidelines for preparing dissertations from the Graduate School or ETD website (http://www.miami.edu/etd), and to conform to the requirements therein. All dissertations are also published by ProQuest/University Microfilms, Inc.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved to the student’s committee. Changes of committee members must be approved by Graduate Program Director, and sent to the Graduate School.

### Qualifying Examinations

A written qualifying examination is to be taken by each doctoral degree (Ph.D., D.M.A., D.N.P, D.P.T., Ed.D.) candidate at the time that the student and the Supervisory Committee deem appropriate. The major program may specify that its students must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the supervisory committee shall notify the Graduate School and the instructional school or program that the student has passed or failed the examination. A student who fails the examination will be given one opportunity to retake it with the permission of the supervisory committee. After a comprehensive exam is failed for a second time, the student is terminated from the program. Some programs do not administer qualifying examinations during the summer months. Check with the Graduate Program Director for specific program requirements.

### Admission to Candidacy

When the student has met all requirements and passed the qualifying examinations, admission to candidacy for the degree is approved. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the defense of dissertation is scheduled.

### Final Examination

A final public oral defense of the dissertation is required. Refer to the academic calendar for the deadline regarding dissertation defense for each graduation. Graduate programs set the specific requirements and format of the defense. Please contact your Graduate Program Director for details.

### Transfer of Credit Hour

Transfer of graduate credit hour from another institution will not be made until the student has completed a like amount of credit hour at the University of Miami, and the transfer has been approved by the supervisory committee and the Dean of the Graduate School. Credit hour transferred is subject to the same recency rules as all other credit hour counted toward the degree, and is also subject to examination by the program. An official transcript of work to be transferred must be on file in the Graduate School. Credit hours that pertain to or have been counted toward another degree cannot be transferred.

### Florida International University and University of Miami Agreement

Effective as of Fall 2007, students may take up to 6 credit hours at the host institution as long as the following requirements are met:

1. Must be Ph.D. student or Master’s student in Latin American Studies.
2. Approval from both home and host institution;
3. Approval of Graduate School Deans;
4. Space at the host institution is available.
5. Approval of the Faculty member teaching the course.

Tuition and fees are to be paid at the home institution. Performance level is set at host institution. Contact the Graduate School (p. 517) for more information. The application form can be found here (http://www.miami.edu/gs/index.php/graduate_school/current_students/umfiu_doctoral_exchange_program).
Introduction

The School of Architecture at the University of Miami offers a professional Master of Architecture degree, as well as, Master degrees in Urban Design, Real Estate Development & Urbanism, and Architecture Research.

The School of Architecture’s location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals.

Students have the opportunity to work with the faculty in the exploration of theoretical issues as well as in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Accreditation

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Admission Requirements

Applications are for the fall semester only. Applications completed by February 1st will be given the highest priority. Admission to the graduate program is subject to the rules, regulations and procedures of the Graduate School as stipulated in the University Graduate Bulletin (p. 517). It is the responsibility of each student to understand these requirements and to ensure that they are met.

The minimum requirements for application to the Master of Architecture Degree program are:

1. 3.0 cumulative grade point average.
2. 300 cumulative Graduate Record Examination score on verbal and quantitative sections

3. International applicants and/or those whose native language is not English the TOEFL should have been taken within 2 years prior to application for admission; a minimum score of 550 (paper-based), 80 (internet-based) is required. Visit the TOEFL website, www.toefl.org (http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vngnextoid=69c0197a484f4010VgnVCM10000022f95190RCRD), for more information.

4. For: Master of Architecture (Advanced Standing), Urban Design, and Master of Architecture: Research - a Professional Degree in Architecture (Bachelor of Architecture or Master of Architecture) is required.

Resources

The school’s resources, including a state-of-the-art computer lab, digital fabrication laboratories and model shop are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for graduate architecture students include:

- Historic Preservation Certificate
- Classical Architecture Certificate
- Bachelor of Science in Architectural Engineering (BSAE)/Master of Architecture (MARCH)
- Bachelor of Architecture (BARCH)/Master of Business Administration (MBA)

Master of Architecture: Professional Degree

The Master of Architecture is designed for college graduates seeking a first professional degree in architecture. It consists of the following two tracks:

- 3-year Track: A 3-year program for students holding undergraduate degrees in non-design fields. Completion of 105 credit hours required.
- Advanced Standing 2-Year Track: A program for students holding a previous non-professional degree in architecture or a closely related field. Completion of 51-60 credit hours required.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, compromise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Master of Urban Design

This concentration consists of three semesters of directed study to explore in-depth the existing state of suburbs and cities, study precedents and propose design solutions. The faculty is dedicated to seeking alternatives to modern patterns of urban growth.

The Miami metropolitan area provides a laboratory for the identification of urban problems and for the exploration of design solutions. Each semester is comprised of a design studio and a seminar in parallel, studying both the real and ideal solutions for three aspects of town planning: new town design, housing and the redesign of existing situations. The School of Architecture faculty teaches the curriculum
with field condition input from visiting faculty and other experts such as developers, marketing experts and bankers.

**Master in Real Estate Development and Urbanism**

An intensive one-year graduate program for students with degrees and experience in business, architecture and related fields blending the fundamentals of real estate development (finance, law, market analysis, development process) with the School’s strengths in livable community design.

**Master of Science in Architecture**

The Master of Science in Architecture (M.S.Arch) degree programs is structured across a 36-credit system of advanced study, typically beyond a first professional degree in architecture, engineering or closely allied profession. It is flexible to enable a student to take a core group of courses within a specialized track, as well as electives. The program may be initiated during the final semesters of the first professional degree in architecture and engineering. After foundational core coursework and electives, each student develops an individually focused thesis or a capstone project on a topic of their interest, with a faculty adviser. The M.S.Arch. program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

**Awards and Scholarships**

All students admitted full time to the Master of Architecture program may be eligible for partial tuition scholarships and/or graduate Assistantships, based on academic record.

Scholarships may vary in amounts and are intended to assist the recipient pursue studies as required by the program. Scholarships will be awarded on a competitive basis. Graduate Assistantships require service in the form of teaching, research assistance, or other appropriate educational activities as designated by the director of the graduate program.

American Institute of Architects Henry Adams Medal awarded by the American Institute of Architects to the highest ranking graduating student for scholarship and excellence in architecture. American Institute of Architects Henry Adams Certificate awarded to the second highest ranking graduating student for scholarship and excellence in architecture.

Other honors, distinctions, and awards are presented annually for excellent student performance.

**Masters Degrees in Architecture**

- M.Arch. Professional Degree (p. 534)
- M.S in Architecture (Post Professional) (p. 535)
- M.U.D. Master of Urban Design (p. 537)
- Master in Real Estate Development and Urbanism (p. 537)

---

Architecture and professional courses completed in a pre-professional bachelor’s degree program will be evaluated to identify courses that may be waived in the Master of Architecture Professional Degree Program.

A maximum of 54 credit hours, including three design studios, may be waived; generally architecture and professional courses with a grade of B- or higher will be accepted.

Requirements/Recommendations for additional coursework will be contingent on the evaluation of the student’s prior work at the time of admission.

M.S. Architecture Professional Degree

The Master of Science in Architecture (M.S.Arch) degree programs is structured across a 36-credit system of advanced study, typically beyond a first professional degree in architecture, engineering or closely allied profession. It is flexible to enable a student to take a core group of courses within a specialized track, as well as electives. The program may be initiated during the final semesters of the first professional degree in architecture and engineering. After foundational core coursework and electives, each student develops an individually focused thesis or a capstone project on a topic of their interest, with a faculty adviser. The M.S.Arch. program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

Track Options

There are five tracks of concentration possible within the Master of Science in Architecture degree program:

- Classical and Traditional Architecture
- Computational and Embedded Technology
- Healthcare Design
- Historical Preservation
- Resilient Sustainable Building Technology

Classical and Traditional Architecture Track

The Master of Science in Architecture: Classical and Traditional Architecture program consists of five courses (21 credits), and five electives (15 credits). The program focuses on the theory and practice of Classical and Traditional Architecture with an emphasis on contemporary vernacular trends in the building arts, emerging urbanisms, the economies of preservation of built patrimonies and sustainable practices of classical and traditional architecture worldwide.

The program includes an option of a semester in Rome as well as a summer option. The program explores the Western Classical Architecture tradition, its sources in ancient Egypt, Greece and Rome, and development through Medieval, Renaissance and Enlightenment periods, as well as the Elements and Principles of Classical Architecture, History of Rome, Urban Elements and Principles, Architectural Treatises, Italian Classicism, and Architectural History of Rome.

Computational and Embedded Technology Track

The Master of Science in Architecture: Computation and Embedded Technology program consist of five courses (21 credits), and five elective courses (15 credits) from School of Architecture and other schools/departments by arrangement and approval of the coordinator of the track. The program is dedicated to the research and education of digital design thinking in architecture focusing on computational design and digital fabrication.

The program focuses on training innovative professionals rather than on innovative technology. The goals are to integrate analytical approaches and creative problem-defining processes to solve challenging issues in design with applications in art, architecture, education, business and healthcare. Making is at the center of the program’s pedagogy and the iterative and incremental developments of design and fabrication enable students to internalize and personalize these concepts. The research areas for making include, but are not limited to, parametric and algorithmic design, physical computing (sensors and actuators), biomimicry, robotic fabrication, machine learning, and computer-vision.

The Master of Science in Architecture: Historic Preservation emphasizes planning and indispensable to stewardship of the natural and cultural environment.

### Resilient Sustainable Building Technology Track

The Master of Science in Architecture: Resilient Sustainable Building Technology program consists of six core courses (18 credits), and four elective courses (12 credits) selected from the Department of Architectural Engineering, School of Education and School of Architecture, concluding with a 6-credit thesis.

The program focuses on the challenges of a low-carbon economy, climate change, sustainability and resiliency. The courses will address the ways new and renewable energy can be harnessed in buildings, develop skills in simulation and modeling essential for performance analysis, and the ability to contribute effectively within a multidisciplinary design team.

### HealthCare Design Track

The Master of Science in Architecture: Healthcare Design program consist of five courses (21 credits), and five electives (15 credits). Students may plan a course of study within one of three topics:

**People— Built Environment and Health Impacts** focuses on the understanding of the interrelationships of health and the built environment with the potential for a research-based practice. The program draws on faculty engaged in research through the University of Miami’s Built Environment Behavior and Health Team, which includes faculty in Architecture and the Miller School of Medicine Department of Public Health Sciences.

**Places—Healthcare Campuses & Buildings** focuses on healthcare buildings and site planning through active engagement with evidence-based design, working with healthcare providers in specific locations. The students will engage in research, participatory planning processes, and the development of design proposals based on research-validated strategies significant to health and well-being.

**Potentials—Healthcare and the Internet of Things (IoT) ecosystem** explores the capabilities and potential of the IoT to transform healthcare systems and delivery. The student will engage in discovery and design to create new elements of care as well as the design of supportive environments.

### Historical Preservation Track

The Master of Science in Architecture: Historic Preservation emphasizes planning and the stewardship of cultural heritage. The program consists of five core courses (21 credits), three elective courses (9 credits), concluding with a 6-credit thesis.

The program builds upon the classic tenets of professional knowledge in preservation while fostering a critical assessment of that body of thought to address the challenges that face natural and cultural conservation. The program draws upon the expertise of University faculty to foster cross-disciplinary dialogs in the service of stewardship. The teaching consists of lectures, seminars, field and lab work, travel study, design studios and the aula magna of Miami, a diverse and emergent 21st Century city that provides the instructional settings and experiences of the program. The pedagogy advances the position that: addressing climate-change; promoting a balanced micro-macro cultural currency; housing global urban population growth; and championing the social-ethical dimension of heritage, represent forces integral to

Other

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available here (http://www.as.miami.edu/academics/graduate-studies) and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services.

Anthropology

The University of Miami offers a Professional Practice in Anthropology. The program will provide an academic foundation of best practices, current theory, grantsmanship, government regulations, and ethical standards of working with living peoples, dynamic cultural systems, forensics, and cultural heritage materials within the U.S. and abroad. It is designed to prepare graduates for careers in the private sector, government and nongovernmental organizations, nonprofit organizations, and education, including medical and research settings.

Students in these programs are expected to design their mandatory field/research experience in concert with a faculty advisor and external site supervisor as a means of acquiring practical experience in workplace setting. These students will present a professional paper, submit a grant proposal, and/or produce a manuscript for publication as part of the requirements for graduation. They may elect to pursue a degree with or without a written thesis. A total of 36 semester credit hours of graduate coursework (600-level or above) is required to complete the degree.

• Master of Arts in Anthropology (p. 538)

M.A. in Anthropology

The Department of Anthropology offers a Master of Arts degree in the Professional Practice of Anthropology. The program offers students the opportunity to specialize in three concentrations, 1- Applied Archaeology; 2- Applied Forensic and Biological anthropology; and 3- Applied Cultural Anthropology.

Track 1): Applied archaeology – cultural heritage management (cultural resource management), including museum management for archaeological collections, graduates will be in compliance with regulations and requirements from the U.S. Secretary of the Interior;

Track 2): Applied forensic and biological anthropology – recovery, analysis and identification of human remains, legal interpretation thereof, and museum management of human skeletal/dental remains; applied primatology;

Graduate students have two degree options– Option 1 with no written thesis, and Option 2 with a written master’s thesis. The aim of the curriculum is to give graduates the skill sets needed to design, conduct, and analyze anthropological fieldwork for their employers or as a component of independent research-driven careers.

Option 1. The nonthesis option is designed for applicants whose ultimate career will be in employment for which practical application of bench skills and a master’s degree are the gold standard. Nonthesis students require a minimum of 36 credits beyond the baccalaureate degree with a minimum of 18 months in residency.

This option is designed to prepare students to compete successfully for employment in mid-level careers immediately upon graduation.

We have designed this degree program so that it can be completed in two years.

Option 2. The thesis option requires a minimum of 36 credits beyond the baccalaureate degree and a written thesis with an open defense guided
Additional Requirements for the Degree
1. One semester of hands-on field work or internship (usually over the summer), with the option of a second as thesis research; and
2. One paper for presentation at a professional organization or one paper for publication in a journal/proceedings/book chapter or other professional venue. The presentation may be poster, podium or multimedia.

The Professional Practice Core Courses
The MA in Anthropology consists of the following courses.

<table>

Total Credit Hours 20-36

Other Competencies Required for the M.A.
Foreign language (mandatory) – demonstrated competency in the language of the country in which the applicant will work is expected. The language requirement may be met by analysis and translation of historical documents in a language other than English, or translation into English of three scientific articles from peer-reviewed journals pertaining to the professional practice of anthropology published originally in a foreign language.

Nine graduate-level credits outside of Anthropology (mandatory) – These may be from a suggested list of electives and/or may be designed as a graduate cognate by the student with guidance from the advisor.

Professional Certification of Competency
Certificates of Proficiency (optional) – These may be gained in professional competency courses offered in conjunction with institutions.
in the student’s area of professional specialization. Credit hours may be earned if the student completes the certification as an independent study, part of an internship program, or fieldwork course.

**Thesis Option**

Written Master’s Thesis (optional) - The thesis option will require the production of a written document as part of the minimum requirements in this track. The thesis research and writing credits may serve as part of the residency requirement if the student is in residence during the course. Thesis requirements will conform to the University of Miami’s standards and format.

**Academic Standing**

Graduate students are expected to maintain an overall GPA of 3.0 in all coursework. Should the average fall below that mark in a semester, the student will be notified and work with his/her advisor to rectify the performance problems. If the student has a second consecutive semester with an average GPA below the 3.0 standard, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program at the discretion of the Chair and in discussion with the student and his/her departmental advisor in accordance with guidelines for the University’s Graduate College.

For additional program information, please visit our website (http://www.as.miami.edu/anthropology).

**Art and Art History**

http://www.as.miami.edu/art

**Degree Programs**

One program serves the needs of graduate students in Art and Art History.

- Master of Fine Arts program in the studio areas of
  - Painting
  - Sculpture
  - Ceramics/Glass
  - Printmaking
  - Photography/Digital Imaging

- The Supervisory Committee will formally review the student’s progress; the student may be put on probation at the end of any semester, and given one semester to improve or be removed from the program.

Application for candidacy may be made any time after the completion of 30 credit hours, but must be attained prior to registration for the final semester.

- The Supervisory Committee will determine whether the student should be admitted to candidacy.
- When the student is admitted to candidacy, a Thesis Committee is formed with at least four members, who need not be the same as the Supervisory Committee.
- The Chair should be from the student’s area of concentration and be a tenure track faculty member.
- Two others should be department faculty, and the fourth person must be from outside the studio faculty.
- This committee will consult with and advise the student on his or her work, meet twice a semester to review progress, read and comment on the thesis document, and conduct a final oral exam during the thesis exhibition.
- The thesis exhibition will be scheduled after the successful completion of ART 699; the show will be installed after the candidate has submitted an accepted written document. All incompletes must be cleared before the exhibition can be scheduled.
- No student gains the right to be recommended for the degree simply by completing the course requirements. This right is reserved to the students Thesis Committee in coordination with the Graduate Program Director.

Applicants for admission to the Master of Fine Arts program are responsible for the submission of the following materials to the Graduate Secretary in Art and Art History:

1. All transcripts of college-level academic work
2. 20 images of studio work; Instructions for submitting the portfolio are on the department website (http://www.miami.edu/art).
3. Three letters of recommendation
4. Application form
5. A letter of intent
6. The GRE test is not required for being considered for admission to the MFA program or for a teaching assistantship; however there are other possible fellowships offered by the University that might require the GRE. For more information contact the department or the Graduate School.
7. Applicants for MFA degrees are considered in the Spring for the upcoming Fall semester. February 15 is the deadline for receipt of applications. The deadline for international applications for the upcoming Fall semester is January 15.

**Masters Program in Art and Art History**

Applicants must:

- the same criteria that are applied to other Ph.D. applicants. Such applicants will be judged by the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant’s file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master’s track, but wish to change to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant’s file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants who were admitted on the Master’s track, but wish to change to the M.S. track or the Ph.D. track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applications are due December 1.

In applying for admission, applicants must select either the Master's track or the Ph.D. track.

| Area of studio concentration | 24 |
| Art History at 600 level | 9 |
| Electives, not restricted to courses in Art or Art History | 12 |
| Thesis, consisting of a body of studio work accompanied by a written document | 6 |
| ART 699 Exhibition Preparation | 3 |
| Total Credit Hours | 60 |

### Biology

http://www.bio.miami.edu

**Dept. Code: BIL**

### Degree Programs

**Application for Admission**

Applications are due December 1.

In applying for admission, applicants must select either the Master's or the Ph.D. track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master's track, but wish to change to a Ph.D. track without completing the Master's program may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant’s file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master’s track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must:

2. Send hardcopies of the following to the Coordinator of Graduate Studies in Biology, Department of Biology, 1301 Memorial Drive, Coral Gables, FL 33146 USA.
   - Originals of all undergraduate and graduate official transcripts (photocopies are not accepted)
   - Official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; the Biology subject matter test also is recommended (photocopies of scores are not accepted)
   - International applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English) official scores (photocopies of scores are not accepted)
3. Send digital copies of the following to the Coordinator of Graduate Studies in Biology (gradcoord@bio.miami.edu)
   - A cover letter that identifies interests, suggests possible research projects, states career goals and identifies a UM Biology faculty sponsor
   - Copies of any research papers (e.g., publications, manuscripts, senior reports, etc.)
4. Letters of recommendation from **three** science instructors/supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential should be sent by email to the Coordinator of Graduate Studies in Biology at gradcoord@bio.miami.edu
5. Request UM Biology faculty sponsor submit a memo of support by email to the Coordinator of Graduate Studies in Biology (gradcoord@bio.miami.edu). Applicants MUST secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched, the sponsor will be the major advisor

A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense in early January of the year of admission.

**Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.**

### Degree Requirements

All students are required to satisfy the general requirements for the appropriate degree that are listed in the Graduate Studies Bulletin, whether or not they are listed among the Biology requirements.

### Implementation

All Graduate students will be reviewed each spring semester by GAAC.

1. The advisor will review the student’s progress to date.
2. The student will provide updates for a student progress database every February.
3. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
4. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
5. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
6. Possible outcomes of the review:
   - a. Student making satisfactory progress
   - b. Student not making satisfactory progress; recommendations for improvement
   - c. Student not making satisfactory progress; his/her tenure terminated.

### Financial Support

1. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
2. Master’s degree students usually are not eligible for departmental stipends or tuition remission.
3. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data. Students who choose not to present at the annual departmental graduate student symposium may be considered as not in good standing.
4. Students holding full fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

Masters Programs in Biology

- M.S. in Biology with Thesis (Three Year Program) (p. 542)
- M.S. in Biology without Thesis (Two Year Program) (p. 543)

Doctoral Program in Biology

- Ph.D. in Biology (p. 543)

M.S. in Biology with Thesis (Three Year Program)

1. Credit hours: a total of 30 credit hours are required:
   - 24 course credit hours, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area; they are encouraged to select courses and independent studies that will prepare them for research, as listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 24 course credit hours.:

<table>
<thead>
<tr>
<th>BIL 675</th>
<th>Advanced Study in Plant or Animal Sciences</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1-6</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>BIL 678</th>
<th>Current Topics in Biological Research</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1</td>
</tr>
</tbody>
</table>

   At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
   - 6 research credit hours (BIL 810); no more than 6 M.S. research credit hours are allowed.
   - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Research Proposal: public presentation and successful defense to the committee of a written research proposal. The public presentation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.

3. Thesis: A well-written and successfully defended thesis of publishable quality; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation.

4. Other requirements described under "The Master's Degree," including but not limited to:
   - a total of at least 30 credit hours (course credit hours plus research credit hours). The Graduate School and the Department concur in requiring at least 24 course credit hours and exactly 6 research credit hours (BIL 810) for a thesis M.S.
   - once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 820) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hour normally applies to this course.

5. About the committee:
   - A single committee will combine the responsibilities of the supervisory and thesis committees.
   - The supervisory committee will be determined by the student in consultation with his or her advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The thesis committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The thesis committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
   - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should consult with the committee about major changes in research goals and about problems. Memos summarizing each meeting should be in the student’s file and emailed to the Graduate Director (graddirector@bio.miami.edu).

6. About the time table:
   - A written thesis proposal is due no later than the middle of the second semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.
   - Analysis of data and a polished draft of the thesis should be completed and in the hands of the committee by the middle of the sixth semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.
   - Defense of the thesis and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the sixth semester unless an extension has been approved by the Graduate Admissions and Advisement Committee (GAAC) upon recommendation of the thesis committee. Notice of the defense must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
   - The oral defense of the thesis must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
   - No student may receive the degree in the same semester in which she/he is admitted to candidacy.
   - The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.
   - Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour and explicitly address how the proposed change of schedule relates
to these matters. The memo requesting the change also should address the proposed financial support.

7. Completed SACS evaluation forms are required at two points during the course of study. One following the research proposal defense and the final following defense of the thesis. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

**M.S. in Biology without Thesis (Two Year Program)**

1. Credit hours:
   - A total of 36 course credit hours are required by the Biology Department, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area, listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 36 course credit hours.:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 675</td>
<td>Advanced Study in Plant or Animal Sciences</td>
<td>1-6</td>
</tr>
<tr>
<td>BIL 678</td>
<td>Current Topics in Biological Research</td>
<td>1</td>
</tr>
</tbody>
</table>

   At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
   - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Passing a written comprehensive exam given by the committee.

3. About the committee:
   - A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The examination committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student’s advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
   - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student’s file.

4. Other requirements described under "The Master’s Degree."
   - Note that although the Graduate School requires only 30 credit hours for an M.S. degree, the Department requires 36 course credit hours for a non-thesis M.S.

5. About the time table:
   - The comprehensive exam must be passed by the end of the fourth semester.
   - No student may receive the degree in the same semester in which she/he is admitted to candidacy.
   - The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.
   - Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support.

6. Completed SACS evaluation forms are required following the comprehensive exam. The student is responsible for providing blank forms to the committee. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

**Ph.D. in Biology**

1. Credit hours: a total of 60 credit hours (including both course and research credit hours) beyond the Bachelor’s degree are required:
   - At least 18 course credit hours that are not from the independent study series, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. The independent study series is:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 675</td>
<td>Advanced Study in Plant or Animal Sciences</td>
<td>1-6</td>
</tr>
<tr>
<td>BIL 678</td>
<td>Current Topics in Biological Research</td>
<td>1</td>
</tr>
</tbody>
</table>

   At times these course numbers are used by professors to teach a new course or a special topics course, however, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
   - At least 12 research credit hours (BIL 830 and/or BIL 840). Once the overall number of required credit hours (see below #8) has been reached, there is no need to take additional research credit hours.
   - An additional 30 credit hours from any combination of graduate courses (600 level regular courses and independent study courses) and research credit hours (800 level) to bring the total number of credit hours beyond the Bachelor’s Degree to 60 credit hours. (One example: 18 required course credit hours + 12 required research credit hours + 15 additional course credit hours + 15 additional research credit hours = 60 total; another example would be 18 additional course credit hours and only 12 additional dissertation credit hours, etc.)
• Students who already have a Master's Degree in the same field may not need as many course credit hours (consult Graduate School rules on transfer credit hours), but at least 24 credit hours must be taken in residence at UM.
• The committee may decide that students with previous graduate level courses may be exempt from some of the course requirements.
• The minimum acceptable grade average in all coursework towards the degree is a “B (3.0)” and no grade may be below a “C.”

**CONCEPTUAL AREAS:** Students are encouraged to take courses and independent studies from at least 3 main conceptual areas, and are urged to take courses and independent studies that will prepare them for research and for the comprehensive qualifying exam. Students also are encouraged to participate in seminars and study groups and to take special courses in other departments of UM, at our Coalition for Excellence in Tropical Biology partner institutions, from the Organization for Tropical Studies, or other special interdisciplinary courses. Such courses should be appropriate to their course of study and research area as determined by their committee. Conceptual areas offered in our department include: EVOLUTION (graduate level evolution courses are in the 620's series); ECOLOGY (graduate level ecology courses are in the 630's series), BEHAVIOR (graduate level behavior courses are in the 640's series); GENETICS AND MOLECULAR BIOLOGY (graduate level genetics and molecular biology courses are in the 650's series); and PHYSIOLOGY AND CELL BIOLOGY (graduate level physiology courses are in the 660's series). Special concentrations in our department and/or in collaboration with other departments include: Tropical Biology, Mathematical Ecology, Neuroscience, and Behavior.

2. Comprehensive qualifying exam should be passed by the end of the third semester.

The qualifying examination has two components:

(I) Comprehensive Component

(II) Specialty Component

The Graduate Core will serve as the comprehensive component of the qualifying exam. The minimum acceptable grade in each of Graduate Core I and Graduate Core II is a “B” (3.0). Students who fail to achieve a B average across the two Graduate Core classes will be considered to have failed the comprehensive component of the qualifying exam. Students who earn As (4.0) in both Graduate Core I and Graduate Core II will pass with distinction, students whose grade average across the two classes is <4 but ≥3 will earn a passing grade, while students with a grade average across the two classes of <3 will fail the comprehensive component of the qualifying exam. In addition to assigning letter grades, faculty will complete the graduate school rubric for evaluating student performance on qualifying exams for each student.

**Final letter grades will use the University of Miami standard quality points:**

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Point</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
</tbody>
</table>

In the event that a student fails the comprehensive component of the qualifying exam, the student will be given the opportunity in the following academic year to retake any Graduate Core class in which they failed to achieve the minimum grade of a B. It is only necessary to retake a class if a student earned less than a B in that class (i.e. if students earn less than a B in only one of the two classes, it is not necessary for them to retake both classes in the sequence). All students retaking classes must have completed their retakes by the end of their fourth semester. Each retake grade will replace a student’s original grade for that part of the Graduate Core. Following the retakes, students who earn As (4.0) in both Graduate Core I and Graduate Core II will pass with distinction, students whose grade average across the two classes is <4 but ≥3 will earn a passing grade, while students with a grade average across the two classes of <3 will fail the comprehensive component of the qualifying exam. A student who earns less than a B in a retake, will fail the comprehensive component of the qualifying exam for a second time and be terminated from the program. In addition to assigning letter grades, faculty will complete the graduate school rubric for evaluating student performance on qualifying exams for each student.

(II) Specialty Component

The specialty component of the qualifying exam will be administered by the initial committee (see § “The committee”) who will test the student in subject areas related to the student’s field of study. As early as the middle of the first semester and before the end of the second semester the student should meet with their initial committee to define the scope of their specialty exam. The specialty component should focus two specific areas of biology that the student intends to incorporate into their dissertation research. These areas can be discussed with the committee, and may be defined by a specific group of reviews, papers, books and book chapters, and even mathematical or computational skill sets to master. The student should be actively engaging their committee to explore and define these areas over their first year of study. The student is responsible for working with their committee to develop a clear understanding of what individual faculty expect of them with respect to preparing for the specialty component of the qualifying exam.

**Traditional Specialty Component:** The specialty component of the qualifying exam will be administered in the third semester. The committee will designate a chair other than the student’s advisor to administer the examination. The written part of the exam will be closed-book and will be administered on campus in a single four-hour period by the examination chair. Two committee members will provide questions for the four-hour specialty exam. Each of the two committee members will provide questions expected to occupy the student for half of the four-hour exam. Exams can be handwritten or completed on a wireless disabled laptop with autocorrect and prompts disabled. All members of the committee will read
the exam, the committee members who provided the questions will grade the exam questions they provided. One week after the committee has read the written answers (about one week after the written exam), an oral exam will be administered by the whole committee for the purpose of further exploring the student’s grasp of both the specialty component subject matter and any material covered by Graduate Core I and II.

Alternative Specialty Component: With committee approval, an alternative to the traditional specialty component of the qualifying exam is to present to the committee a first-authored, publishable, full-length article manuscript concerning research conducted since matriculation at UM. The purpose of the alternate exam is to immediately focus students and their graduate advisors on developing the research, analysis and writing skills that are necessary for a successful career. Before the end of the third semester, the manuscript must be submitted to a journal approved by the committee. One week after the committee has read the manuscript, there will be an oral exam for the purpose of further exploring the student’s grasp of both the specialty component subject matter and any material covered by Graduate Core I and II.

The specific requirements for the alternative specialty component are:

1. The research must have been conducted since matriculation at UM, under the guidance of the Ph.D. advisor. Research conducted prior to matriculation at UM cannot be the basis for the article. However, a student’s supervisory committee may at its discretion approve work that considerably extends previous research (e.g. a M.S. project) and that contains substantial new data generated since matriculation.

2. The student must be the first author of the article, and must play the principal role in data analysis, writing, submission, and seeing the manuscript through to publication.

3. The target journal should have an impact factor above the median (i.e., top 50%) for journals in its subject area.

4. The publication must be a full article: No form of short note (e.g., primer, technical or natural history note), short communication or brief commentary is acceptable. Substance rather than paper length will be the major consideration: e.g., articles in Science and Nature would be short but perfectly acceptable! The exam committee will assess the paper’s acceptability.

5. Prior to submission for publication, all members of the supervisory committee must have agreed upon journal selection, served as collegial reviewers of the manuscript, and agreed that the manuscript is suitable for submission. The student is also expected to orally present and defend the research described in the manuscript.

6. Satisfactory completion of this alternate qualifying exam will require submission of the manuscript before the end of the third semester of graduate study. As is the case for a standard written qualifying exam, satisfactory completion will also require a vote of the supervisory/examination committee.

7. A memorandum to GAAC by the supervisory/examination committee chair reporting passing the alternate qualifying exam should be accompanied by a copy of the journal’s acknowledgment of submission.

8. If the approved manuscript has not been submitted before the end of the third semester, the graduate student must prepare to sit the regular specialty component of the qualifying exam before the end of the fourth semester. Students have up to the Monday of the second last week of classes in the fourth semester to submit their manuscript. If the manuscript is not submitted by the end of the second last week of classes in the fourth semester, the student must sit the regular specialty component of the qualifying exam before the end of the fourth semester.

9. The student is encouraged to present the work on which the manuscript is based at the department’s annual graduate student symposium.

- Each committee member will decide on a pass/fail grade based on the total performance (written plus oral). Conditional passes may not be awarded. For the student to pass the examination, 3 of the 4 examiners must vote a grade of pass. An oral and written summary of the committee’s evaluation must be prepared by the chair of the examination committee and given to the student and to GAAC. If the student does not pass the examination, there will be a chance to retake it the following semester. In the case of failure a second time, the student will be terminated from the program.

- At time of completion of the oral examination the examination committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

3. Research proposal: public presentation of a research proposal and defense of a written research proposal to the complete research committee (see below) should be completed by the middle of the fourth semester. Students are encouraged to follow the format of a grant proposal to a major funding agency. At the proposal defense, the student will receive either a pass or a fail. A grade of pass will be recorded if no more than one member of the complete research committee (see below) votes to fail the student. If the student fails the proposal defense, she/he will be given a second chance to defend no later than the sixth week of the fifth semester. If the defense is failed a second time, the student will be terminated from the program. At time of completion of the proposal defense the complete research committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

4. Admission to candidacy: (application is made on a form available in the grad school and in the department). This normally will occur at the end of the fourth semester. Requirements are to pass the comprehensive examination and to successfully defend a written research proposal and to have complete SACS evaluation forms from both the qualifying exam and the proposal defense on file.

5. Teaching: All students on the Ph.D. track in Biology are required to serve satisfactorily at least one semester as a teaching assistant in one of the courses offered as part of the Department’s training program.

6. Grants: Submission of a grant proposal to a major funding agency (e.g., NSF, NIH, National Geographic, World Wildlife Fund, etc.) is required. All students are required to seek outside funding
for their research. This must be a research project proposal. Application for an NSF pre-doctoral fellowship does not meet this requirement, but application for an NSF dissertation improvement grant does qualify.

7. Ph.D. Dissertation: A well-written and successfully defended dissertation containing an original contribution to the field and of quality appropriate for publication in a scientific journal; a defense is successful if all members of the committee sign the graduate school form and the signature page of the dissertation. A final, acceptable typescript of the dissertation must be in the hands of the committee a minimum of two weeks prior to the defense. If this deadline is not met, the defense must be rescheduled. A public dissertation seminar also is presented at the time of the defense. Following the defense the committee is required to provide the Graduate Director with a completed SACS evaluation form.

8. Other requirements described under "Doctor of Philosophy," including but not limited to:

- a total of at least 60 credit hours (course credit hours plus research credit hours).
- once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 850) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hours normally applies to this course.

9. Committee: A single committee will advise the student on both comprehensive and research training. The committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above). The research function of the committee is to advise the student on research, including preparation, training, project choice, project design, implementation and evaluation of the research. The committee will go through several phases and its membership will be determined by the advisor and student together, contingent upon approval of GAAC and/or the Graduate School, as appropriate at each phase:

- The initial committee will consist of at least 4 faculty, 2 appointed to ensure breadth of training (from two areas outside the research area) and 2 from the research area. It will be formed to help the student choose courses during the first few weeks of the first semester. This committee will decide whether students having a M.S. in biology (botany, zoology, etc.) from another institution can substitute a graduate level course taken elsewhere for a departmental course requirement; it also will decide which additional courses should be taken for both research and breadth. The choice of areas briefly will be outlined in a memo to GAAC.
- The initial committee of at least 4 faculty will be responsible for preparing and administering the comprehensive examination.
- The complete committee of at least 4 faculty including one from outside the department, should be formed by the end of the third semester; all four members should participate in the proposal evaluation which will take place in the fourth semester. The committee will consist of a minimum of four faculty, which includes the committee chair, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty.
- The dissertation committee (of four) is formed officially when the student is admitted to candidacy. It usually will comprise the same individuals as the complete research committee, or it may be formed anew. The student and advisor consult on the membership of the committee, and the department nominates the committee to the graduate school. The committee will consist of a minimum of four faculty, which includes the committee chair who is the advisor, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty and one from outside the department of concentration. The dissertation committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
- Committee meetings are required at least once a year (recommended at least once a semester in the early phases). The student is responsible for arranging meetings; the student should consult with the committee about any major changes in research goals and any problems; memos summarizing each meeting should be in the student's file.

10. About the time table:

- The written comprehensive qualifying examination must be passed by the end of the third semester.
- A polished, written dissertation proposal must be defended to the committee in the fourth semester together with a public presentation of the proposal. This must take place by mid-April of the spring semester or mid-November of the fall semester.
- Admission to candidacy normally occurs after the comprehensive qualifying examination and proposal defense are passed upon the recommendation of the committee and the approval of the Graduate School. Application for admission to candidacy is made to the graduate school on a special form.
- Analysis of data and a polished draft of the dissertation should be completed and in the hands of the dissertation committee no later than the middle of the tenth semester.
- Defense of the dissertation and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the tenth semester unless an extension has been approved by GAAC upon recommendation of the dissertation committee. Notice of the defense and of the public seminar must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
- The oral defense of the dissertation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
- No student may receive the degree in the same semester in which she/he is admitted to candidacy.
- The indicated dates form firm deadlines. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for
the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.

- Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour, and explicitly should address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support of the student beyond the 10 semesters of normal departmental support.

11. Public presentations must be during regular semesters. The public presentation associated with the defense of the proposal and the public seminar associated with the defense of the dissertation must be given during regular sessions of Fall or Spring semesters, not during summer sessions, inter-sessions, reading days, or finals weeks.

12. Completed SACS evaluation forms are required at three points during the course of study. One following the qualifying exam, one following the proposal defense and the final following defense of the dissertation. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

**Chemistry**

http://www.as.miami.edu/chemistry

**Dept. Code:** CHM

**Degree Programs**

Prospective graduate students are expected to have completed, during their undergraduate training:

The candidate must hold a B.S./B.A. degree from an accredited institution. Consideration is given to applicants who have successfully completed general chemistry (two semesters), organic chemistry (two semesters), physical chemistry (two semesters), and the related laboratories. A course in advanced inorganic chemistry is strongly recommended, and remedial work in this area may be required of students who have not taken such a course. The mathematics and physics courses that are normally included in a B.S. program in chemistry are also required.

Undergraduate deficiencies are treated as such and must be overcome during the first year of graduate study.

**Masters Program in Chemistry**

- M.S. in Chemistry (p. 547)

**Doctoral Program in Chemistry**

- Ph.D. in Chemistry (p. 547)

**M.S. in Chemistry**

The MS degree requires a minimum of 30 credit hours.

**Suggested Plan of Study**

<table>

</tr>
<tr>
<td>Total Credit Hours</td>
<td></td>
<td>30</td>
</tr>
</tbody>
</table>

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

- The required number of credit hours in the chemistry seminars (CHM 779) and Introduction to Research (CHM 785) must be taken in the first and second year.
- The required number of credit hours in research (CHM 810) must be taken in the second year.
- A dissertation based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the second year.

The M.S. degree may be earned with or without a thesis.

In order to complete a MS degree without thesis, an advanced comprehensive exam must be passed.

The exam is administered at the end of the second year in the program.

**Ph.D. in Chemistry**

The general requirements for the doctorate in Chemistry are set forth in this Bulletin under the heading Doctor of Philosophy. The Department of Chemistry has the following specific requirements:

The PhD degree requires a minimum of 60 credit hours. The department will cover tuition costs up to 60 credit hours for students on assistantships and fellowships.

**Chemistry Seminar (Total of 2 credits required for CHM 779)** | 1
**CHM 779 Chemistry Seminar** | 1
**CHM 785 Introduction to Research** | 2
**Master’s Thesis (Total of 8 credits required for CHM 810)** | 7
**CHM 810 Master’s Thesis** | 1
**Total Credit Hours** | 30

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.
The required number of credit hours in the chemistry seminar (CHM 779) must be taken in the first and second year.

The required number of credit hours in Introduction to Research (CHM 785) must be taken in the first year.

The required number of credit hours in the chemistry seminar (CHM 780) must be taken in the fall semester of the third year.

The required number of credit hours in Pre-candidacy Doctoral Dissertation (CHM 830) must be taken in the first, second, third, and fourth year.

The required number of credit hours in Post-candidacy Doctoral Dissertation (CHM 840) must be taken in the fourth year.

An Oral Comprehensive Exam must be passed before the end of the spring semester of the second year.

An original research proposal in Problems in Research Planning (CHM 788) must be presented and defended before the end of the spring semester of the third year.

A Doctoral Dissertation (CHM 880) based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the fifth year.

Computer Science

http://www.cs.miami.edu

Dept. Code: CSC

Degree Programs

The department of Computer Science offers a Master of Science in Computer Science and a Doctor of Philosophy in Computer Science.

Note

All Computer Science graduate TAs and RAs must complete RCR training during their first semester in the department. All other Computer Science graduate students must complete Responsible Conduct of Research (RCR) training before starting research work. Information about RCR training can be found from UM ethics programs, here (http://www.miami.edu/index.php/ethics/projects/rcr).

Masters Programs in Computer Science

• M.S. in Computer Science (p. 549)

• Five-Year B.S. and M.S. in Computer Science (p. 548)

Doctoral Program in Computer Science

• Ph.D. in Computer Science (p. 549)

Five-Year B.S. and M.S. in Computer Science

This program is open only to currently enrolled Computer Science undergraduates.

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science (p. 99), and the requirements for a 30 credit hour Master of Science in Computer Science with thesis (p. 549). No credits may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

• They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.

• Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:

</tbody>
</table>

¹ For both options, at least 18 credit hours must be from CSC 6XX and CSC 7XX courses, and may not include more than 6 credit hours from CSC 670.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designate. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.

M.S. in Computer Science

The Master of Science program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Ph.D. in Computer Science

The Doctor of Philosophy program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites for Admission

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

<table>
<thead>
<tr>

<tr>
<td></td>
<td>Select 3 credit hours from approved courses</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credit Hours</td>
<td>31-42</td>
</tr>
</tbody>
</table>

Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.
Requirements for Graduation

Students must complete the Graduate School requirements (http://bulletin.miami.edu/graduate-academic-programs/graduate-school/academic-policies), and the Departmental requirements described here.

Credits

For graduation students must complete at least 60 credits (as required by the Graduate School), including at least 24 classroom course credits (see below), at least 18 pre-candidacy credits (CSC830), and at least 9 post-candidacy credits (CSC840).

Written Qualifying Exam

The student must pass a three-hour written exam of general knowledge of Computer Science at the end of the first year. Upon failure, the student may petition the CSGC to allow a second attempt at the end of the second year. The exam will be administered once a year in the early weeks of the summer session. It will cover expected knowledge of all first-year graduate students. Included in this material are a fundamental understanding of algorithm analysis and design, advanced skills in programming, basic knowledge of computer architecture, and a general understanding of computer systems.

Classroom Courses

In the first two years, the student must take eight CSGC-approved classroom courses, for a total of 24 credit hours. At least four of these courses (12 credit hours) must be CSC 7XX courses. The eight courses must include two courses from each of the areas of Analysis, Applications, and Systems. The student must work with the Director of Graduate Studies to select a cohesive set of courses as approved by the CSGC. The CSGC will have sole authority in designating the areas to which each course belongs. In the case that a course is designated in more than one area, a student may apply the course to only one area. The designation of current CSGC-approved courses appears at the end of this description.

Selecting an Advisor

By the end of the second semester, the student must find a research supervisor. By the end of the third semester, the student must have made significant progress on a research project under the supervision of a faculty member. The student must write a detailed progress report that will become a public document and shall be kept on file by the Department. The student must present the report to a quorum of the CSGC at a time to be approved by the chairman of the Department. The supervisor and CSGC must approve the project as applicable toward candidacy for a Ph.D.

Annual Presentations

After passing the written comprehensive exam, the student must make a public oral presentation to the Department at least once per year. These presentations include the thesis proposal and the thesis defense. The goals are to develop the student’s oral and presentation skills, to provide a means for the Department to check the research and progress of the student, and to present the opportunity for feedback to improve the student’s research.

Teaching Experience

Each student must teach a lab-based course for a minimum of one semester. Lab-based courses typically require the student to present material in a relaxed lecture format, re-emphasizing material learned in the general lecture as well as introducing new material to the students.

Creative Writing

http://www.as.miami.edu/english

Degree Programs

The Department of English offers a two-year program with a third-year option in fiction or poetry leading to the Master of Fine Arts degree. The program provides an opportunity for students of superior ability in imaginative writing to develop their skills and critical judgment through the practice of writing and the study of literature.

The Creative Writing Program is a member of the Associated Writing Programs.

For further information, please consult the description of the M.F.A. in English, which may be found on the English Department Web site under Creative Writing.

Requirements for the MFA Degree

Workshop (12 credits)—Students must take these workshops in the genre they were admitted to.

Forms Courses (12 credits)—Students must take these forms courses in the genre they were admitted to.

Thesis (6 credits)

Electives (6 credits)—must be literature or forms courses, or other graduate courses at the university

3rd year electives (up to 6 credits)

Total: 36-42 credits

Teacher Training

For TAs:

Semester 1: Take ENG 691, Graduate Practicum I: Teaching College Writing (0 credits)

Semester 1: 5 hours per week in the Writing Center

Semester 2: Creative Writing Teaching Practicum, ENG 209

Semester 2: 5 hours per week in the Writing Center

Semester 3 or 4: Teach a composition class (or 10 hours per week in the Writing Center)

Semester 3 or 4: Teach ENG 209, Introduction to Creative Writing

Semester 5 or 6: Teach two sections of either composition or creative writing each semester

For non-TAs:

Semester 2: Creative Writing Teaching Practicum, ENG 209

Sample Schedule

Semester 1: workshop (3 credits), forms course (3 credits), and literature or other elective course (3 credits) (for TAs: ENG 691, plus Writing Center hours)

Semester 2: workshop (3 credits), forms course (3 credits), and literature or other elective course (3 credits) (for all students: Creative Writing Teaching Practicum, ENG 209, plus Writing Center hours for TAs)

Semester 3 or 4: Teach a composition class (or 10 hours per week in the Writing Center)

Semester 3 or 4: Teach ENG 209, Introduction to Creative Writing

Semester 5 or 6: Teach two sections of either composition or creative writing each semester

For non-TAs:

Semester 2: Creative Writing Teaching Practicum, ENG 209

Sample Schedule

Semester 1: workshop (3 credits), forms course (3 credits), and literature or other elective course (3 credits) (for TAs: ENG 691, plus Writing Center hours)

Semester 2: workshop (3 credits), forms course (3 credits), and literature or other elective course (3 credits) (for all students: Creative Writing Teaching Practicum, ENG 209, plus Writing Center hours for TAs)

Semester 3 or 4: Teach a composition class (or 10 hours per week in the Writing Center)

Semester 3 or 4: Teach ENG 209, Introduction to Creative Writing

Sample Schedule

Semester 1: workshop (3 credits), forms course (3 credits), and literature or other elective course (3 credits) (for TAs: ENG 691, plus Writing Center hours)

Semester 2: workshop (3 credits), forms course (3 credits), and literature or other elective course (3 credits) (for all students: Creative Writing Teaching Practicum, ENG 209, plus Writing Center hours for TAs)

Semester 3 or 4: Teach a composition class (or 10 hours per week in the Writing Center)

Semester 3 or 4: Teach ENG 209, Introduction to Creative Writing

English

1. Courses
Introduction

Geography is the science of place and space. Geographers ask where things are located on the surface of the earth, why they are located where they are, how places differ from one another, and how people interact with the environment. There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence and sustainability. Physical geography is concerned with patterns of climates, climate change, land forms, vegetation, soils, and water. Thus, Geography links the social sciences and natural sciences.

Geographers use many tools and techniques in their work, and geographic technologies are increasingly among the most important emerging fields for understanding our complex world. They include Geographic Information Systems (GIS), Remote Sensing, Global Positioning Systems (GPS), online mapping such as Google Earth, statistics, cartography, and others.

Geography is an interdisciplinary field that offers diverse career opportunities. Geographers work in many different areas, such as environmental management, education, disaster response, city and county planning, community development, and more.

The relevance and prestige of Geography as a discipline was helped enormously during the past 20 years by four key developments:

1. the emergence of “globalization” as a phenomenon requiring analysis and explanation;
2. the increasing recognition of space and place and sustainability in cognate social and natural sciences;
3. deepening concern for nature-society interactions and issues of environmental sustainability and development; and,
4. the development of geographic information systems (GIS and GIScience) and remote sensing technologies and their widespread adoption by organizations in both the public and private sectors.

In recognition of the importance of these developments, UM Geography emphasizes three major orientations in its M.A. program:

1. global urbanization
2. environment and sustainability
3. global and public health

Educational Objectives

The MA Program in Geography offers specializations in areas such as:

- Geographic Information Systems and Remote Sensing
- Global Health and Medical Geography
- Urban Geography and International urbanization
- Environmental Studies
- International and Regional Development

Geography offers courses on the Middle East, Africa, South America, and other areas.

Geography offers courses that provide training in indispensable skills for everyone entering the present-day labor market:

- Research Methodology
- Statistics
- Computer Cartography
- Geographic Information Systems (GIS)
- Remote Sensing of the Environment

Degree Programs

The Department of Geography offers a Master’s in Geography and a Graduate Certificate in Geospatial Technology. For more information on the M.A. program, please contact Dr. Richard Grant at rgrant@miami.edu or visit the Geography Department’s web page at www.as.miami.edu/geography (http://www.as.miami.edu/geography). For more information on the Certificate Program, please contact terghazar@miami.edu, or visit the Certificate Program webpage at http://www.as.miami.edu/gisc/.

Internship Credit Hour

Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center or the Department Internship Director. Upon approval, 3 credit hours may be earned with an internship. These credit hours will be included in the fulfillment of M.A. requirements (GEG 635).
Certificate in Geospatial Technology

Certificate in Geospatial Technology

The Certificate Program in Geospatial Technology (GT) is designed to benefit students who seek to enhance their skills in geospatial technology, especially Geographic Information Systems (GIS) and satellite remote sensing. The Certificate requires a minimum of 15 credit hours, including three core courses and two or more electives. Students may receive credit toward the Certificate for past coursework completed at UM or other accredited schools. All fifteen credits may be double counted toward the M.A. degree, making it possible for a student to complete both the M.A. and the Certificate in two years.

Total Credit Hours: 26-36

* Students completing the Graduate Geospatial Certificate Program concurrently with the MA degree must complete GEG 692 and use one of the electives for a course that satisfies the Certificate Program requirements.

** Students completing the two-paper option take GEG 625 and GEG 645; Students completing the Thesis Option take GEG 810 and GEG 820.

Geological Sciences

http://www.as.miami.edu/geology

Dept. Code: GSC
Degree Programs
A 5-year B.S./M.S. degree allows qualified entering freshmen to complete a B.S. in Geological Science and a M.S. in Marine Geology and Geophysics within 5 years.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences.

The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree.

By the spring of their Junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor.

Contact Dr. Harold Wanless at the departmental office (305-284-4253) for more information.

History
http://www.as.miami.edu/history

Dept. Code: HIS

#Our Department is committed to pursuing excellence in historical and interdisciplinary scholarship, teaching, and service to the profession, the University, and the wider community.

Our fine faculty of some twenty-four professors does research and teaches in many historical areas, often crossing chronological, geographic, and disciplinary boundaries.

Our courses combine innovative subjects and methods with more traditional subjects and presentations. In their classes, students have the opportunity to experience the latest and best historical research and writing, to explore special topics in depth, and to receive rigorous training in researching, analyzing, and writing history from nationally and internationally recognized scholars.

Master of Arts Program in History

• M.A. in History (p. 554)

Doctoral Program in History

• Ph.D. in History (p. 555)

M.A. in History

We are looking for applicants with a record of outstanding achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master’s degree from an accredited institution may apply for admission to the doctoral program. Students with a bachelor’s degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from applicant’s former professors.
4. Recent Graduate Record Examination scores on the General Test.
5. TOEFL scores (for international students).
7. A detailed statement from the student indicating:
   a. the student’s background and education;
   b. the student’s interests (field, topic, etc.);
   c. why the student wants to pursue a graduate degree in history at the University of Miami;
   d. what the student plans to do with the degree upon completion.
   This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.

8. A representative writing sample.

Deadlines

January 5: Applications for admission and aid for Fall semester.

Committee

Upon admission to the master’s program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student’s secondary field, must be formed no later than the student’s second semester in the program. There are then two options for completing the masters. One requires 27 credit hours of coursework and an exam. The other requires 21 credit hours of coursework, a master’s thesis (6 thesis credit hours), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

Requirements

• 27 credit hours at the 600 level or above, of which at least 18 must be at the 700 level or above.
• Passage of an oral exam in two fields.
• Completion of HIS 721 (Historiography). This course is normally given in the fall semester. All students are required to take the Historiography course in their first year.
• Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing
a thesis should register for 6 credit hours of HIS 810, which count toward the 27 required credit hours.

- Language Requirements: Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor. See under Ph.D. requirements for more information on fulfilling language requirements.
- The student must apply for graduation in his or her penultimate semester (i.e., fall semester for spring semester).
- The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Though the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive will also act as a thesis defense.

Ph.D. in History

Admissions

We are looking for applicants with a record of outstanding academic achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master’s from an accredited institution may apply for admission to the doctoral program. Students with a bachelor’s degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from the applicant’s former professors.
4. Recent Graduate Record Examination scores.
5. For international students, TOEFL scores.
7. A detailed statement from the student indicating:
   a. the student’s background and education;
   b. the student’s interests (field, topic, etc.);
   c. why the student wants to pursue a graduate degree in history at the University of Miami; and
   d. what the student plans to do with the degree upon completion.
   This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Admission from M.A. to Ph.D. Status

Students admitted at the master’s level who are performing well in their studies are encouraged to proceed to Ph.D. status. Advisors who believe that a student should be admitted to the Ph.D. program, and have the consent of the student, inform the DGS of this desire early in the spring semester and at least before the annual departmental meeting reviewing graduate students’ progress. The request is then reviewed by the department at its annual meeting for recommendation to the graduate committee. Students who move from the M.A. to the Ph.D. program are eligible for the same number of years’ aid as students entering the Ph.D. program directly from the B.A., minus the years of aid they have already received. For course requirements, see below.

Deadlines

January 5: Applications for admissions and aid for Fall semester.

Committee

Upon admission to the program, the student is assigned a provisional major advisor. As noted above, students should then concur or select a different advisor by the beginning of the second semester in the program. An advisory committee of four or five, including the major advisor and faculty members representing the second and third fields, must be formed no later than the student’s third semester in the program. It is the responsibility of the student and the advisor to form this committee and notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee will also administer the oral and written comprehensive examinations. Students may change advisor and other committee members throughout the program provided that the faculty member(s) selected agree(s).

Requirements

1. Requirements:
   a. For students entering the Ph.D. program with a B.A., 45 credit hours (5 semesters) of graduate coursework at the University of Miami.
   b. For students entering the Ph.D. program with a masters from another university, at least 27 credit hours (3 semesters) of graduate coursework at the University of Miami.
   c. For students entering the Ph.D. program with a Masters from another program at the University of Miami, at least 27 additional credit hours (3 semesters) of graduate coursework at the University of Miami.
   d. For students entering the Ph.D. program with a Masters from the History department at the University of Miami, 24 additional credit hours of graduate coursework (to conform to a Graduate School requirement) at the University of Miami.
   e. All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the History Graduate Program at the University of Miami.

2. Completion of HIS 721, included in the above number of credit hours. All students are required to take the Historiography course in their first year.

3. Completion of HIS 701 and HIS 702 (the two-semester Research Seminar), included in the above number of credit, at least once. Typically, students take HIS 701 and HIS 702 in their 2nd and 3rd semesters in the program.
4. Completion of HIS 722 (Prospectus Seminar), included in the above number of credits hours.

5. Passage:
   a. Passage of a major field in written and oral exams.
   b. Passage of a 2nd field in written and oral exams.
   c. Passage of a 3rd field in written and oral exams.

6. Following completion of course credit hours, students will need to take sufficient dissertation research credit (HIS 830 if before the comprehensives have passed; HIS 840 after the comprehensives have been passed) to reach a total of 60 credit hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credit hours. Students who enter the Ph.D. program with an M.A. from another university or from another program at the U. of M. receive 30 credit hours towards the 60 credit hour requirement.

The required credit hours of coursework are only the formal minimum. Although course work is necessary preparation for the comprehensive examination, students are examined on the mastery of fields of knowledge rather than courses. The number of courses taken depends on the student’s background, choice of fields, nature of related work, language skills, etc. Courses should be selected only after consultation with the Major Advisor.

Incompletes

All incompletes from the fall semester must be made up by the official end of the following spring semester. All incompletes from the spring semester must be made up before the official start of the subsequent fall semester. No student will be allowed to proceed to exams until all incompletes have been made up.

Languages Requirement

Reading knowledge of at least one foreign language is required. More than one foreign language may be required if the major advisor deems it necessary. The Modern Languages and Literatures Department administers examinations in the languages that it teaches and offers preparation courses in a handful of languages. Students may contact the DGS for the various options for taking courses in foreign languages. Students must, in conjunction with their advisor, prepare a plan that specifies how they will demonstrate language proficiency. The language requirement must be completed before a student can take the comprehensive examinations (see below).

Comprehensive Examinations

It is the responsibility of the student and major advisor to organize the comprehensive examinations. Students may take them at any time of the year that classes are in session. Arrangements for the exams, including selection of their dates and a final list of committee members, should be made by the end of the first month of the semester in question, with notification to the Department Chair and DGS.

The student takes the written part of the examinations in three history fields, which are normally administered over a period of two successive weeks. The portion for each field is four hours in duration. Only after the advisory committee deems that the student has successfully passed the written portions for each field is the student permitted to take the oral part of the examination.

The oral section covers the three history fields and is approximately two hours in duration. The prospectus may form part of the discussion, but the examination will focus on coverage of the fields. The committee consists of at least three faculty members.

The student advances to candidate status after passing the comprehensive examinations and submitting an acceptable dissertation prospectus.

Students who have not already received a master’s degree from the University of Miami will be awarded an M.A. upon successful completion of their doctoral comprehensive exams.

Dissertation

After passing the examinations, students form a dissertation committee. This may be the original advisory committee, but it may also be revised to meet the needs of the dissertation work. The students, in consultation with the Major Advisor, put forward the names of individuals suggested to serve on the dissertation committee. The committee must be comprised of at least three members within the department and one outside the department. The committee is then approved and appointed by the dean of the graduate school.

The dissertation must make a significant contribution to the candidate’s field of specialization. It must meet the highest standards of research, substance, and form, and demonstrate an ability to conduct and report independent and original scholarly investigation.

The student must apply for graduation in his or her penultimate semester (i.e. fall for spring semester).

Upon completion of the dissertation and its tentative approval by the dissertation committee, the student takes a final oral examination that is a “defense” of the dissertation and that lasts for approximately two hours. It is open to the university community. Following the defense of the dissertation, the dissertation committee will render its decision to accept or reject the dissertation. Approval of the dissertation must be indicated by the signature of all members of the dissertation committee.

Fields

Chronological/Geographical fields:

- Medieval Europe
- Early Modern Europe
- Modern Europe
- Early American History
- Modern U.S. History
- Colonial Latin America
- Modern Latin America
- East Asia
- Russia
- Africa
- Caribbean

Topical Fields. These must cover either two of the geographic or two of the temporal fields listed above:

- African Diaspora
- Race and Ethnicity
- Gender and Sexuality
- History of Religion
- History of Science and Medicine
• History of Crime and Law
• Political History
• Diplomatic History
• Urban and Environmental History
• Economic History
• Business History
• Labor History
• History of Sport
• Military History
• Cultural and Intellectual History
• Public History
• Atlantic World

Customized Fields:
Students may create their own fields in consultation with their advisory committee. The student opting for this approach must file a plan of study listing relevant courses, the faculty member(s) involved, and the rationale. To pursue the individualized concentration, the student must obtain written approval of the plan by the major advisor, DGS, and the Department Chair.

The plan and signed approvals are placed in the student’s file. With rare exceptions, a customized field may not be the major field of study.

**International Administration**
http://www.miami.edu/maia

The Master of Arts in International Administration (MAIA) program offers a comprehensive graduate degree designed to prepare students for careers in the administration of International public and private organizations. Career options include government, multinational corporations (MNCs), non-governmental organizations (NGOs), as well as the for-profit sector. Unlike conventional “international affairs” programs, MAIA equips graduates with both operational skills and a solid conceptual background to produce theoretically capable practitioners. The degree is awarded by the College of Arts and Sciences.

MAIA is an interdisciplinary program which collaborates with faculty members from twelve (12) University departments. Drawing from the best academic resources of the University of Miami and from highly skilled professionals, students receive instruction in areas such as diplomacy, geopolitics, economics, finance, religion, communication, political science, management, public health, and international studies. The program allows students to select an area of specialization to complement their professional goals. Concentration options include International Business, Public Health, Strategic Communications, Security Management, and a Dual Degree Program: MAIA/MPH

The Master of Arts in International Administration/Master of Public Health (M.A.I.A./M.P.H.) degree is offered jointly by the University of Miami College of Arts and Sciences and University of Miami Miller School of Medicine’s Department of Public Health Sciences. The MAIA degree with a second master’s degree in public health is designed for students who seek an in-depth knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development. Students enrolled in this joint program can expect to complete both degree requirements within two and a half (2.5) years.

**Practicum**

| IGS 617 | Practicum in International Administration | 3 |

**Additional Requirements**

| Electives | 9 |
|Seminar in Statistical Software | 3 |
|Accounting and Taxation Seminar | 4 |
|Second Language Proficiency | 5 |

Total Credit Hours 30

* The core courses are taught in an integrated fashion, designed to give students the maximum learning experience. In the core courses, students will:
1. develop skills in writing, speaking, and numerical and historical analysis
2. learn how to collect, interpret and report social, political, and economic data
3. increase skills in methods of research and communications
4. master strategic and tactical thinking and negotiation
5. build practical and theoretical knowledge in international relations, international economics, intercultural communication, and administration in an international context

The purpose of the practicum is to give students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students are expected to complete the practicum with a minimum time commitment of at least two-hundred (200) hours. Participation in the spring clinics with topics ranging from public speaking to human resources are an integral component of the course. A final report/case study analysis is required as part of successful completion of the practicum. A fuller guide to the practicum and the requirements for the practicum is provided to students by the MAIA Office.

2 All MAIA students must complete their degree with three (3) graduate level elective courses or nine (9) elective credit hours outside of the MAIA Program. Electives must be approved by a MAIA advisor and students are encouraged to use the electives to create a specialization in either a function or regional area.
Co-curricular Seminar in statistical software SPSS as an introduction to program evaluation/assessment methodology, as well as seminars in diplomatic protocol, media relations, budgeting for non-profits, public speaking, and public policy analysis.

The accounting and taxation seminars are non-credit hour workshops that covers key subjects essential to successful budgeting and financial control for nongovernmental organizations and other not-for-profit companies. It is taught by two professional financial managers and is offered once a year.

MAIA students must demonstrate proficiency in a second language prior to graduation. They are tested by staff and faculty with the Intensive Language Institute of the Division of Continuing and International Education. If students need additional language training after the testing result, they will be recommended to enroll in non-credit hour language courses to attain the necessary proficiency.

International Studies

http://www.as.miami.edu/international-studies/

Dept. Code: INS

Degree Programs

The Department of International Studies offers interdisciplinary social science programs leading to the Ph.D. and MA degrees. Ph.D. and MA programs offer advanced students the opportunity to study issues such as globalization, democratic governance, comparative and international political economy, post-Cold War conflicts and security threats, and new forms of civil society mobilization in world politics. To organize the study of these debates in the social sciences, the Department offers three fields of specialization:

- **International Relations**: international relations theory; globalization; social movements beyond the nation-state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.
- **Comparative Politics**: theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship, comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.
- **International and Comparative Political Economy**: the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; and international economic theory.

Masters Program in International Studies

- M.A. in International Studies (p. 558)

Doctoral Program in International Studies

- Ph.D. in International Studies (p. 558)

M.A. in International Studies

The Department’s MA program prepares students for careers in international diplomacy, business, trade and finance, for service in government and non-governmental organizations and international institutions, and with the necessary degree and academic training to enter a doctoral program. The requirements include:

- Complete ten semester courses (30 credit hours).
- Complete two graduate courses on social science methodology.
- Complete one core seminar in one of the Program’s fields of study, including:
  - International Relations;
  - Comparative Politics;
  - International and Comparative Political Economy.
- Pass a foreign language examination.
- Thesis and Non-thesis options: MA candidates with a cumulative grade point average of at least 3.5 may opt to write a thesis; all students have the option of completing the degree by writing two research papers in lieu of the thesis.

See the INS Graduate Student Handbook for a complete description of the requirements for the MA degree.

Ph.D. in International Studies

The Department’s Ph.D. program’s primary objective is to prepare a select group of highly qualified doctoral students for careers in academic teaching and research. The requirements include:

- Complete a total of 66 degree credit hours (12 semester courses) to obtain the Ph.D. degree (i.e., 36 credit hours at the doctoral level beyond the MA degree).
- Complete one seminar on quantitative methods and one seminar on qualitative methods in the social sciences.
- Complete a sequence of two core seminars in two of the Program’s three major fields of study:
  - International Relations;
  - Comparative Politics; and
  - International and Comparative Political Economy.
- Pass
  a. written MA exam in one of the Program’s three fields of study and
  b. written and oral examinations in two of the Program’s three fields of study.
- Complete at least one of the basic core seminars in the third (non-examination) field.
- Complete the Doctoral Workshop.
- Successfully defend a dissertation proposal/prospectus.
- Pass a foreign language examination.
- Complete 12 dissertation credit hours.
- Research, write and orally defend a dissertation that makes an original contribution to knowledge.

See the INS Graduate Student Handbook for a complete description of the requirements for the Ph.D. degree.
Latin American Studies

http://www.as.miami.edu/las/graduate/master-of-arts-program/

Dept. Code: LAS

Latin American Studies offers an interdisciplinary approach to learning about the politics, economics, cultures, and societies of Latin America and the Caribbean. Courses are offered in departments from every school and college at the University of Miami and our affiliated faculty research diverse topics from development economics to immigrant healthcare, from indigenous music to Caribbean colonial literature. Our students become true experts who can speak to a wide range of issues confronting Latin America: experts who can contribute proactively to development and cooperation, as well as to business and political analysis in a way that their peers with a more traditional disciplinary focus cannot.

Masters Programs in Latin American Studies
• B.A./M.A. in Latin American Studies (p. 561)
• M.A. in Latin American Studies (p. 561)
• M.A. in Latin American Studies with GIS Certificate (p. 562)

Joint Program in Latin American Studies
• M.A./M.P.H Dual Degree in Latin American Studies and Public Health (p. 561)
• JD/MA in Latin American Studies (p. 560)

B.A./M.A. in Latin American Studies
FILAS (Fellows in Latin American Studies)
In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM’s world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master’s level):

<table>
<thead>
<tr>
<th>CAS GENERAL EDUCATION REQUIREMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>English Composition ¹</td>
</tr>
<tr>
<td>ENG 105   English Composition I</td>
</tr>
</tbody>
</table>

| ENG 106   English Composition II     | 3 |
| Mathematics, Computing & Statistics ²|   |
| Second Language ³                      |   |
| Writing Across the Curriculum ⁴       |   |
| Cognates ⁵                             | 9 |
| Advanced Language Proficiency in Spanish, French, Portuguese, or Haitian Creole | 3 |

Select one of the following:
- FRE 203 Advanced French
- HAI 201 Intermediate Haitian Creole I
- POR 202 Intermediate Portuguese II
- SPA 203 Advanced Spanish

Secondary Language Competence in another Latin American or Caribbean Language
Select one of the following:
- FRE 105 Accelerated Elementary French
- HAI 102 Elementary Haitian Creole II (or equivalent)
- POR 105 Beginning Portuguese for Spanish Speakers
- SPA 105 Accelerated Elementary Spanish

FILAS Specific Requirements
Select one gateway seminar in Latin American Studies 3
Select two History courses 6
Select two International Studies courses 6
Select two Economics courses 6
Select two advanced Languages and Literatures courses 6
(SPA, POR, FRE, or HAI)
Select seven courses in Study Abroad 21
Select one course as Internship in Latin America 3
Select five courses above the 300-level (third-year) in a range of disciplines 15
Select ten courses in one focus track 30

MA Phase Requirements
GRE Exam in Semester 7 or 8
Las 601 Interdisciplinary In Latin American And Caribbean 3
Las 602 Research Design in Latin American Studies 3
Select two Regional Fundamentals courses 6
Select four electives from approved LAS or combined courses 12
Las 810 Pre-candidacy thesis credits (students must enroll in two semesters of this 3-credit course to fulfill this requirement.) 3
Las 810 Pre-candidacy thesis credits 3

| Total Credit Hours | 150 |

¹ Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).
² MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.
Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. FILAS students already fulfill this requirement when completing the language requirements cited below.

Degree candidates must complete at least four writing courses, and at least one such course must be in the student's major discipline. Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the College of Arts & Sciences, "three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, 112, or 202), Geological Sciences, Marine Science (except MSC 313 and 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate."

FILAS students also write a Master’s Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

**FILAS Admission Requirements**

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in FILAS, emphasizing prior language or area study.
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

**J.D./M.A. in Latin American Studies**

**Overview**

The University of Miami School of Law in partnership with the University of Miami Center for Latin American Studies (LAS), College of Arts and Sciences offers a joint J.D./M.A. in Latin American Studies and the Law. This curriculum prepares Law School students for government, political and nonprofit legal positions. The program provides a solid theoretical framework and grounding in policy analysis, administration, and management.

This joint program allows students to obtain both J.D. and M.A. degrees in 3 or 3 1/2 years -less time than obtaining the degrees separately. The first year is spent in the Law School and years two, three and four (if needed) are spent taking both Law and M. A. courses.

**Courses and Credits**

On the J.D. side, students must complete 82 credits in the Law School and 6 credits will be double-counted from the M.A. courses to complete the total of 88 JD credits. On the M.A. side, students must complete 21 credits in Latin American Studies courses, and 9 credits will be double-counted from the J.D. coursework to complete the total of 30 credits. Students will be required to complete a total of 103 credits for both degrees.

**Juris Doctor (J.D.) Course Requirements**

- During their first year of the joint program, students will be required to attend the J.D. program full-time.
- Students who begin in the JD program will be able to take courses in the Latin American Studies Master’s program beginning the fall of their 2L year.
- Students must complete all J.D. requirements and all M.A. requirements as defined by their programs.
- Students may take summer law courses which may reduce the length of the joint degree program by up to a semester.
- Students may not take more than 16 credits/semester. Seventeen credits/semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

**Master of Latin American Studies Requirements**

- Required courses in LAS are: LAS601, Introductory Seminar; LAS602, Research Design; and a disciplinary research methods course (to be approved by the degree director.)
- Two regional fundamentals courses are also required.
- Students will be required to write a master's thesis, create an equivalent capstone project, or pass a comprehensive exam. (6 credits)
- These options require a committee consisting of at least three faculty members.
- Language Requirement: Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing two courses taught in the target language at the 600-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, 18 credits or Defense Language Proficiency Test).

**Admissions**

To be admitted to this program, students must apply separately to both programs. Students may apply to the MA in Latin American Studies program prior to beginning Law School or anytime during the first or second year of Law School. Students may begin the MA program in the fall or spring semesters.

For admission to the M.A. program students must complete an MA application. If they apply before the end of their first year in Law School, they will not need to take the GRE exam. Their LSAT score will be used instead of the GRE. For more details on the M.A. program, visit the M.A. in Latin American Studies website.

Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program. J.D./M.A. Proposed Sample Schedule with 3 1/2 years, no summers:

(Note: schedule can be shortened through summer credits).
Tuition and Fees

Tuition for J.D. courses will be paid to the Law School. Tuition for the M.A courses will be paid to the College of Arts and Sciences. Law School scholarships may only be used towards tuition for Law School courses.

M.A. Dual Degree in Latin American Studies and Public Health

http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/medicine-and-public-health-

Miami is the gateway to Latin America. As such we recognize an urgent need for public health professionals with the training and expertise needed to meet the growing public health challenges both in Latin America and the Caribbean. This program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

Average Program Duration: 2 years, 5 semesters

Number of required credits: 54 (+6 for non-native speakers)

Curriculum Requirements

The total requirements for the MPH/MALAS program are 60 credits. These requirements include 30 MPH credits, 12 MA in LAS credits, 6 elective credits, 6 culminating/capstone credits and 6 language credits (for non-native speakers):

1 Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing two courses taught in the target language at the 500-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, IB credits or Defense Language Proficiency Test).

2 Six credits worth of Regional Fundamentals in Latin America must be taken. These electives may be chosen from appropriate offerings in LAS, INS, POL, HIS, APY, or GEG. Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus. For this joint degree, we will require that the six credits of electives in POL, LAS, INS, APY, GEG, or HIS be used to meet this requirement. The LAS Academic Director may approve courses from other departments.

M.A. in Latin American Studies

The Master of Arts in Latin American Studies is a 30 credit hour interdisciplinary degree characterized by a high degree of flexibility in allowing students to create a course of study focused on Latin American and the Caribbean that serves the interests of the student. Combining core courses offered by the program with a large variety of courses combined with departments, programs, and units throughout the University of Miami, the program offers tremendous diversity in courses available for credit hour towards this degree. This encourages students to combine course offerings from around the university into a cohesive course of study that enables specialization in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

Curriculum Requirements

The program consists of two core Latin American and Caribbean seminars, two regional fundamentals, and a minimum of three additional seminars to be taken as electives. Students will also be required to take one research methods course at the 600-level.

In addition, all students are required to participate in the MALS Writing Seminar.

Curriculum Requirements

Core Courses
MLS 601 Aspects of Creative and Reflective Thought 3
MLS 602 Perspectives on Human Nature 3
MLS 603 Theories of the Physical Universe 3
MLS Writing Workshop 1

Choose One of the Following Options: 21

Thesis or Project Option:
- Approved Graduate Credit Hours (15 credits) 2
- Thesis or Project Requirement (6 credits)

Non-Thesis Option:
- Approved Graduate Credit Hours (21 credits) 2
- A portfolio representative of works completed

Total Credit Hours 30

1. Students learn to analyze and read texts critically and demonstrate their ability to express that knowledge in their oral and written work with accuracy and insight. This 3 hour, non-credit workshop is required and should be taken during the first regular semester of study.

2. Students may select from other graduate level courses with the approval of the director.

Mathematics
http://www.math.miami.edu

Dept. Code: MTH

Degree Programs
The Mathematics Department offers graduate degree programs leading to the:
- Master of Arts (p. 563)
- Master of Science (p. 563)
- Doctor of Philosophy (p. 563)

Prerequisites and requirements for these degrees are described on the program pages:

Masters Programs in Mathematics
- M.A. in Mathematics (p. 563)
- M.S. in Mathematics (p. 564)
- M.S. in Mathematical Finance (p. 563)

Doctoral Program in Mathematics
- Ph.D. in Mathematics (p. 564)

M.A. in Mathematics
http://www.math.miami.edu/

Admissions Requirement
A minimum of 9 credit hours in mathematics courses numbered 200 and above is required. For more information about admission, please visit our website (http://www.math.miami.edu/graduate/application-procedure).

Curriculum Requirements

Choose one of the following: 24

MTH 613 & MTH 614 Partial Differential Equations I and Partial Differential Equations II
MTH 615 & MTH 616 Ordinary Differential Equations and Dynamics and Bifurcations
MTH 624 & MTH 625 Introduction to Probability Theory and Introduction to Mathematical Statistics
MTH 631 & MTH 632 Topology I and Topology II
MTH 633 & MTH 634 Introduction to Real Analysis I and Introduction to Real Analysis II
MTH 661 & MTH 662 Abstract Algebra I and Abstract Algebra II

Additional Courses 1
- A three-hour written examination covering the material in one of the year-long sequences listed above.

Total Credit Hours 30

1. At least 18 credits of MTH courses are required.
   - All courses from other departments must be numbered 600 or above, be pertinent to the teaching of secondary school mathematics, and be approved by the graduate committee.

M.S. in Mathematical Finance
http://www.msmf.miami.edu

Admission Requirements
Here is a list of the course based admissions requirements. For more information about admission, please visit our website (http://www.msmf.miami.edu/admissions/admission-requirements).

- 1 semester of Linear Algebra
- 1 semester of Differential Equations
- 1 semester of calculus-based Probability and Statistics

Curriculum Requirements

Core Courses
MTH 642 Statistical Analysis 3
MTH 643 Statistical Analysis II with Financial Applications 3
MTH 645 Optimization Methods 3
MTH 647 Introduction To Mathematical Finance 3
MTH 648 Stochastic Calculus with Application to Finance 3
MTH 649 Computational Methods of Finance 3
FIN 650 Financial Investment 2
FIN 651 Advanced Topics in Investments 2

Electives 12
M.S. in Mathematics

http://www.math.miami.edu/

Admission Requirement

A minimum of 15 credit hours in mathematics courses numbered 200 and above is required. For more information about admission, please visit our website (http://www.math.miami.edu/graduate/application-procedure).

Curriculum Requirements

A minimum of 24 credit hours must be earned in Mathematics Courses

Choose two of the following:

Modern Languages and Literatures

http://www.as.miami.edu/mll

Dept. Codes: ARB, CHI, FRE, GER, ITA, MLL, POR, SPA

Degree Programs

The Ph.D. in Romance Studies offers concentrations in French (http://www.as.miami.edu/mlf/graduate/french-graduate-studies) and Spanish (http://www.as.miami.edu/mlf/graduate/spanish-graduate-studies) with emphases on literary and cultural production, and the critical study of language. The program is designed primarily to prepare students for careers as university professors and research scholars. Students develop advanced language, teaching, and research skills that lend themselves to other professions, as well. A variety of geographic, temporal, and theoretical concentrations allow students to carry out innovative and interdisciplinary research projects, often with a transnational focus.

While developing professional competency in their major research fields through an intensive study of canonical works in French and/or Spanish,
students also engage in comparative Africana Studies, Arabic Studies, Brazilian Studies, Caribbean Studies, Francophone Studies, German Studies, Iberian Studies, Italian Studies, Latin American Studies, and combinations thereof.

The program’s strong theoretical component grounds student research in a range of areas, including: aesthetics, bilingualism, digital humanities, early modern studies, film studies, gender and sexuality studies, (im)migration studies, indigenous studies, performance studies, postcolonial studies, queer studies, subaltern studies, sociolinguistics, theatre studies, and women’s studies.

Students are required to develop competency in a cognate field related to their intellectual pursuits, leading to the dissertation topic. Recent examples of cognate specialization include anthropology, communication studies, film studies, history, philosophy, musicology, and sociology.

The department offers two graduate certificates to prepare students beyond their specialization, which may be fulfilled with course electives:

• Graduate Certificate in Second Language Acquisition and Teaching (http://www.as.miami.edu/mll/graduate/pedagogical-training)
• Early Modern Studies Concentration (http://www.as.miami.edu/media/college-of-arts-and-sciences/content-assets/modern-languages/documents/EarlyModernStudiesConcentration.pdf), an interdisciplinary certificate offered in conjunction with English and History

For additional information on teaching and research opportunities, faculty, program policies and application requirements, visit our website (http://www.as.miami.edu/mll/graduate).

Admission Requirements
The Department of Modern Languages and Literatures accepts applications to the Ph.D. program for Fall admission only from students holding (or completing during the time of application) B.A. or M.A. degrees in a related discipline (e.g. Spanish, French, Luso-Brazilian Studies, History, Anthropology, Communication Studies, Comparative Literature). Please note that the Department does not admit students who seek terminal M.A. degrees.

The deadline to apply for the 2016-17 academic year is December 15, 2016. All applicants will automatically be considered for Departmental TAships and University-wide fellowships.

Applications must include the following materials:

1. A completed application form, including a detailed statement of purpose. (Applications are only accepted through this link (http://www.miami.edu/gs/index.php/graduate_school/apply/apply_online).
2. A Graduate Assistantship application.
3. Three letters of recommendation (typically, 1-2 pages). Be sure to provide each recommender with this PDF cover sheet (http://www.as.miami.edu/media/college-of-arts-and-sciences/style-assets/images/mll/RecommFormGradAdmission.pdf). Alternatively, applicants may use the CollegeNet interface to have recommenders submit their letters online.
4. GRE scores mailed directly from ETS testing agency to the Department of Modern Languages and Literatures. Domestic and international students can send GRE and TOEFL scores to our Department with these codes:
   a) 5815 (University of Miami);
   b) 2603 (Department of Modern Languages and Literatures/French);
   c) 2608 (Department of Modern Languages and Literatures/Spanish).
5. International students without BA or MA degrees from a U.S. institution should have TOEFL scores mailed directly from the testing agency to the Department of Modern Languages and Literatures.
6. Official transcripts from all colleges/universities attended and listed in the application. Transcripts from international institutions should be accompanied by an official translation to English.
7. A research paper of 15-20 pages in English.
8. A research paper of 15-20 pages in French or Spanish.

Application fee of $65.00.

Printed materials should be sent to:
Graduate Program Admissions
Department of Modern Languages & Literatures
University of Miami
P. O. Box 248093
Coral Gables, Florida 33124-4650
FAX: 305-284-2068

For questions, consult the Graduate Program website (http://www.as.miami.edu/mll/graduate) or contact the Department (grad.mll@mail.as.miami.edu).

MLL encourages African American and Hispanic applicants to pursue McKnight Doctoral Fellowships, which are supplemented by the UM College of Arts and Sciences to match the Departmental stipend amount. (Applicants must be U.S. citizens). Applications are due on 15 January of each year and are available online (http://www.fefonline.org). In case of any difficulty submitting the online application, applicants should contact FEF (webmaster@fefonline.org) or call 813-943-7578. For additional information, please contact the Florida Education Fund at (813) 272-2772.

Doctoral Program in Modern Languages and Literatures
• Ph.D. in Romance Studies (p. 565)

Ph.D. in Romance Studies
Basic Program Requirements
The requirements set out below for the Ph.D. in Romance Studies are minimum requirements. The Graduate Studies Committee, Director of Graduate Studies, and individual advisors may set additional requirements.

1. The requirements:
   a. for students entering on the “five - year plan” (with a B.A. or M.A., see below), passing satisfactorily a minimum of 45 graded credit hours in approved courses;
   b. for students entering on the “four - year plan” (with an M.A. in a closely related field, see below) passing satisfactorily a minimum of 36 graded credit hours in approved courses;
2. Passing MLL 611, MLL 601, and a minimum of three graded credit hours in each of the following areas:

<table>
<thead>
<tr>
<th>French</th>
</tr>
</thead>
<tbody>
<tr>
<td>Middle Ages and/or 16th Century</td>
</tr>
<tr>
<td>17th and/or 18th Century</td>
</tr>
<tr>
<td>19th and/or 20 - 21st Century</td>
</tr>
<tr>
<td>Francophone Studies</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Spanish</th>
</tr>
</thead>
<tbody>
<tr>
<td>Middle Ages and/or Golden Age</td>
</tr>
<tr>
<td>18th-19th-Century Spain and/or 20 - 21st Century Spain</td>
</tr>
<tr>
<td>Colonial Latin America</td>
</tr>
<tr>
<td>19th-Century Latin America</td>
</tr>
<tr>
<td>20th/21st -Century Latin America</td>
</tr>
</tbody>
</table>

For students whose focus is on critical sociolinguistics, a minimum of nine graded credit hours in courses focused on language analysis, and nine graded credit hours from any of the areas of literary/cultural studies indicated above, all chosen in consultation with the faculty advisor (18 credit hours total).

Note: Ordinarily, students will take at least two graduate courses in the MLL department each semester.

3. In addition to proficiency in English and the major language of study, demonstrating the following:
   a. reading knowledge of two other languages, or
   b. holistic knowledge of one other language (for example, by passing the equivalent of a course at the 300-level);
   
   Note: Appropriate languages of study will be determined in collaboration with the student’s advisors (e.g. students of Latin America may be encouraged to study Portuguese or an indigenous language; students focusing on early modern Spanish or French studies may be encouraged to study Italian; students working in the French-speaking Caribbean may need to take Haitian Kreyòl; etc.);
   
   c. if areas of specialization include Medieval Early Modern or Colonial Latin America Studies, students must demonstrate reading knowledge of Latin.

4. Passing a Breadth Exam. Depending on the student’s interests, the exam shall consist of three parts, according to one of the following configurations:
   a. one geographic region over three time periods;
   b. two geographic regions over two or three time periods;
   c. two geographic regions over one or two time periods and one area of critical sociolinguistics;
   d. two areas of critical sociolinguistics and one geographic region over one time period.

5. Passing a Qualifying Exam on an approved topic. The exam includes three general approaches that focus on:
   a. Literature or sociolinguistics;
   b. Theory;
   c. A cognate discipline (e.g. history, sociology, philosophy, art, film, etc.).

8. Satisfying the requirements of the Graduate School as stated in the Graduate Bulletin.

Philosophy

http://www.as.miami.edu/phi

We offer an M.A. and a Ph.D. in philosophy.

The M.A. program is designed for those who want to pursue philosophy at a deeper level than in their B.A. degree, or who wish to transition into philosophy from other academic disciplines. Students may choose this program to improve their chances of acceptance into a highly-ranked Ph.D. program, or for other reasons. There are no distribution requirements: students may tailor their coursework to their own interests. Students must also write and defend a thesis, which can be used as a writing sample for Ph.D. program applications. (Note that acceptance into the M.A. program does not guarantee acceptance into our own Ph.D. program later on, the application procedures are separate.)

The Ph.D. program is specifically designed to prepare students for careers as professional teachers and researchers in philosophy, not only by way of coursework and research supervision, but also through professional mentoring and opportunities for philosophical development both inside and outside the classroom. Students normally enter with either a B.A. or an M.A. degree in philosophy. Students who enter without an M.A. and who fulfill the relevant requirements are awarded the M.A. degree as they work towards the Ph.D.

Each entering student is assigned a mentor from among the faculty, and faculty members lead professional development seminars on such topics as teaching, preparing work for publication, and preparing for the job market. A dedicated placement director work with each student to maximize their success at securing good post-graduation employment.

The Department prides itself on providing an inclusive, friendly and congenial atmosphere for doing philosophy, with many opportunities for informal interaction among students and faculty including workshops, conferences, colloquia and post-colloquium dinners.

Masters Degree in Philosophy

- M.A. in Philosophy (p. 566)

Doctoral Program in Philosophy

- Ph.D. in Philosophy (p. 567)

M.A. in Philosophy

Course Requirements

Satisfactory completion of a minimum of 45 course credit hours in philosophy, at least 21 of which must be at the 700 level (not including the Proseminar). Students are required to pass the following courses:

Qualifying Exam

Total Credit Hours: 45

* In some cases certain course requirements may (with the approval of the director of graduate studies) be waived for students who have completed equivalent work as part of a prior M.A. degree in philosophy.

** A comprehensive qualifying exam must be taken. Exams are given the grade of 0, 1 or 2. A grade of 1 or 2 is sufficient for the student to be awarded the MA. The student is provided with a reading list in their intended area of specialization. The student studies the material on the reading list, writes a paper of 7,000–10,000 words on a topic central to this material, and participates in an oral defense of the paper as it relates to the reading list.

*** Satisfying the requirements of the Graduate School as stated in this Bulletin.

Ph.D. in Philosophy

Course Requirements

Satisfactory completion of a minimum of 45 course credit hours in philosophy, at least 21 of which must be at the 700 level (not including Proseminar). Students are required to pass the following courses:

Total Credit Hours: 60

1 • A comprehensive qualifying exam must be taken. Exams are given the grade of 0, 1 or 2. A grade of 0 or 1 is considered a failing grade with respect to qualifying to continue in the PhD program.

2 • A student must receive a grade of 2 in order to proceed to the dissertation stage. The student is provided with a reading list in their intended area of specialization. The student studies the material on the reading list, writes a paper of 7,000–10,000 words on a topic central to this material, and participates in an oral defense of the paper as it relates to the reading list.

3 • Students can apply for Ph.D. candidacy after they have completed their coursework, received a mark of high pass on the qualifying examination and had their dissertation proposal approved.

A student who submits a dissertation proposal must possess the linguistic proficiency required by the proposed dissertation topic. This is determined by the dissertation proposal committee on the basis of examinations or coursework.

* Presentation and oral defense of an acceptable dissertation.

** The requirements of the Graduate School as stated in this Bulletin.

* In some cases certain course requirements may (with the approval of the director of graduate studies) be waived for students who have completed equivalent work as part of a prior M.A. degree in philosophy.
Physics
http://www.physics.miami.edu
Dept. Code: PHY

Degree Programs
All graduate students in physics must plan their entire program with the advice and approval of a departmental advisor.

The program of graduate studies in physics emphasizes research work, but also includes teaching experience as an essential element. Research and thesis opportunities are at present available in the fields of astrophysics and cosmology, atmospheric and ocean optics, biological physics, complexity, condensed matter physics, elementary particle theory, plasma physics.

Doctoral Program in Physics
• Ph.D. in Physics (p. 568)

Ph.D. in Physics
In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

1. Submission of scores on the Graduate Record Examination (Aptitude Test and Advanced Test in Physics) with the application for admission.

2. A minimum of 24 physics course credit hours at the 600-700 level are required for the PhD.

3. The following specific courses, or their equivalent, are required for the PhD degree:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY 640</td>
<td>Classical Mechanics II</td>

<tr>
<td></td>
<td>Total Credit Hours</td>
<td>33</td>
</tr>
</tbody>
</table>

4. For the M.S. degree no more than 3 credit hours for reading courses may be counted, and no more than 2 credit hours of seminars. Up to 6 credit hours may be earned in thesis work for this degree.

5. The physics department offers a comprehensive graduate examination each year. A passing grade at an appropriate level is required for either the M.S. or the Ph.D. A student is required to take the exam each year and is allowed two attempts toward a passing grade.

6. Courses taken outside the department should be relevant to the students' program and approved by the graduate advisor.

7. Students are required to participate in research at the earliest opportunity. Specifically, upon passing the written graduate examination and before the end of the following semester, the student is required to select a faculty member who consents to serve as the student's Ph.D. thesis advisor. Student and thesis advisor are to form, in a timely fashion, a dissertation committee to review an oral presentation of the student's initial research activities and future plans. Should a student need to select a new thesis advisor, this selection must be made without delay, and the review process must be repeated.

8. Renewal of financial support from the department is contingent, each semester, upon satisfactory performance of teaching duties and research activities, and upon timely progress towards completion of all requirements for the Ph.D. degree.

Political Science
http://www.as.miami.edu/mpa

The MPA program is designed to prepare students for a career of public service. Students will be exposed to the essential components of public service professionalism—excellence in technique, ethics and leadership—to help meet the challenges in the years ahead. Our award-winning, student-oriented faculty is dedicated to helping you achieve this "professional edge" in small, stimulating seminars, convenient evening courses, super-modern facilities and we have an excellent record in placing graduates.

Masters Program in Political Science

• M.P.A./M.P.H. Second Master's Degree in Public Health (p. 569)

Joint Program in Political Science
• J.D./M.P.A. Joint Degree Program (p. 568)
• MPH/MPA Joint Program (http://www.as.miami.edu/mpa/about-the-program/dual-mpamph-program)

J.D./M.P.A. Joint Degree Program
The joint program allows students to obtain both JD and MPA degrees in four years. The program is designed to prepare law school students for government, political and nonprofit legal positions. The first year is spent in the Law School and years two through four are spent taking both Law and MPA courses.

To be admitted to this program, students must apply separately to both programs. Students may apply to the MPA program prior to beginning law school or anytime during the first or second year of law school. Students may begin the MPA program in the fall, spring or summer semesters. For further information contact the Department of Political Science at 305-284-2401 or the Law School at 305-284-5535.

* 36 to 48 credit hours at the graduate level, depending on government management experience and academic preparation.

** Completion of core and specialized track course requirements as specified by the POL Department in consultation with the student’s career goals and interests.

*** An option exists for those students who wish to complete in five years their Political Science Bachelor’s Degree and a Master of Public Administration. Contact POL Department for details.

**** All other requirements as stated in sections Requirements for the Master of Arts Degree and General Information.

---

**M.P.A./M.P.H. Second Master's Degree in Public Health**

**Master of Public Administration Joint Degree (MPA/MPH)**

The Master of Public Administration/ Master in Public Health (MPA/MPH) degree is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine’s Department of Public Health Sciences. The joint degree is designed for students who seek an in-depth knowledge of public health with training in management and public policy administration. Students may complete the requirements for the MPA and MPA+H degrees consecutively or in succession.

Applicants must be admitted into the MPH and MPA programs on a separate basis, based on the admissions requirements and procedure of each individual program. Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program. Both
the MPA and the MPH degree programs require the Graduate Record Exam (GRE) as part of the admissions requirement.

Average Program Duration: 2.5 years
Number of required credits: 66

Psychology

http://www.psy.miami.edu

Dept. Code: PSY

Complete details about the Psychology Graduate Program, including description of our three graduate divisions (Adult, Child, and Health), faculty research interests, and admission requirements, can be found at our website listed above.

Doctoral Program in Psychology

- Ph.D. in Psychology (p. 570)

Ph.D. in Psychology

1. The principal goal of the graduate program in Psychology is that of preparing the student for a career contributing to the growth of scientific knowledge in psychology.

2. Applicants for admission to graduate status in psychology shall have
   a. a minimum average of B over-all
   b. at least 18 credit hours of psychology that must include courses in Introductory Psychology, Statistics, and Experimental Psychology or Research Methods.
   c. Students lacking the necessary preparation must ordinarily make up deficiencies prior to admission to the Graduate School.

3. All applicants must present the Graduate Record Examination (Aptitude Tests; Advanced Test in Psychology preferred). In all cases admission to graduate degree programs in Psychology is competitive, since available resources do not permit admission of all qualified applicants.

4. The Ph.D. programs are categorized into three Divisions: Health Psychology (including Health Clinical Psychology, Behavioral Medicine, and Behavioral Neurosciences); Child Psychology (including Clinical Child Psychology, Pediatric Health Psychology, and Applied Developmental Psychology); Adult Psychology (including Adult Clinical Psychology). All clinical Ph.D. programs in Psychology require a minimum of 72 credit hours, including thesis and dissertation credit hours. Non-clinical programs require a minimum of 60 credit hours.

5. PSY 680 and PSY 681 will not be counted toward the 72 credit hour minimum.

6. A Master of Science in Psychology based upon 24 credit hours of course work and 6 credit hours of Master's thesis research is required in all programs.

7. In cases in which a student has a prior graduate degree, the number of credit hours required for the Ph.D. may be reduced at the discretion of the Department.

8. All programs in Clinical Psychology require an internship.

- All students must successfully complete:

Total Credit Hours 27

a. A minimum grade average of B is required for all students.
b. All students seeking an advanced degree in Psychology must participate substantially in the teaching of course offerings in the Psychology Department as an essential part of their education.

Certificate in Applied Behavior Analysis
http://www.psy.miami.edu/aba/

The Post-Baccalaureate Certificate Program in Applied Behavior Analysis (ABA) is a full-time graduate program designed for students who have earned a bachelor’s degree in psychology or a related field and are seeking further training and/or professional certification in ABA. It is a 24-credit program designed to be completed in two consecutive semesters (fall/spring). Students who complete the certificate program will meet all the university instructional coursework and experience requirements necessary to take the exam to become a Board Certified assistant Behavior Analyst (BCaBA).

Curriculum Requirements
Classroom-based courses are offered in a face-to-face didactic format. The required classroom instructional courses include:

<table>
<thead>
<tr>

Sociology
http://www.as.miami.edu/sociology

Dept. Code: SOC

Graduate Program Overview
The Graduate Program in Sociology at the University of Miami is designed to equip students with the theoretical, methodological, and analytical tools required for research and teaching. The Graduate Program in Sociology is designed for students seeking the Doctor of Philosophy (Ph.D.) in Sociology. The Master of Arts (M.A.) degree is earned during the first portion of the program. At the doctoral level, graduate students are encouraged to choose two concentrations from three substantive areas:

1. Criminology,
2. Race & Ethnic Relations, and
3. Medical Sociology.

Although the strengths of the department lie within these major programmatic fields, students may also develop a course of study that meets unique research interests and career objectives. Assistantships and Fellowships are awarded each academic year to cover tuition and living expenses.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department (http://www.as.miami.edu/sociology).

Masters Program in Sociology
• M.A. in Sociology (p. 571)

Doctoral Program in Sociology
• Ph.D. in Sociology (p. 572)

M.A. in Sociology

An M.A. in SOCIOLOGY is offered as the first step in the PhD., and it requires:

1. A minimum of 31 credit hours at the graduate level 600 of which 6 must be taken in thesis work.
2. A maximum of 6 credit hours can be transferred from acceptable graduate institutions.
3. 3 credit hours of course work may be earned in a related discipline. Such course selections must have prior departmental approval.
4. Submission and successful defense of a thesis in accordance with current Graduate School policy.
5. The completion of all other requirements stated in sections of the Bulletin that specify Requirements for the Master’s Degree and General Information.
6. For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department website (http://www.as.miami.edu/sociology).

7. Course work must include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 601</td>
<td>Classical Sociological Theory</td>
<td>3</td>
</tr>

</tr>
<tr>
<td>or SOC 616</td>
<td>Social Psychology: Sociological Perspectives</td>
<td></td>
</tr>
<tr>
<td>Three additional courses</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>
These electives should include anticipated Ph.D. courses.

Note: Funded full time students will complete 36 credits as a result of funding requirements. These should include beginning Ph.D. courses.

## Ph.D. in Sociology

A Ph.D. in SOCIOLOGY requires:

1. An M.A. or M.S. degree is required.
2. A minimum of 42 credit hours beyond the M.A. or M.S. degree
3. Passing two written substantive area examinations.
4. The completion of a publishable-quality paper.
5. Admission to candidacy.
7. The satisfactory completion of the requirements of the Graduate School as stated in this Bulletin.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department [www.as.miami.edu/sociology](http://www.as.miami.edu/sociology)

Research Institutes

Institute for the Study of Quality in Manufacturing and Service

The University of Miami Institute for the Study of Quality in Manufacturing and Service (UMISQ) exists to advance the theory and practice of Quality Science. Its mission is to promote the improvement and innovation of quality on local, national, and international levels through the acquisition, dissemination, and application of knowledge in the areas of science, technology, and management as related to Quality Science in general, and Lean Six Sigma Management specifically.

Objectives

1. To conduct research in Quality Science and to publish its results through appropriate professional and academic outlets.
2. To educate and train management, labor, UM students, and others in the theories and practices of Quality Science in general, and Lean Six Sigma Management specifically.
3. To create internships for M.B.A. students in which they can solve real world problems using Quality Science theory and practice in general, and Lean Six Sigma management theory and practice in particular.
4. To provide a vehicle for Lean Six Sigma certifications.

The Institute pursues its objectives through involvement of faculty, students, and client organizations in all sectors of the economy.

Intelligent Computer Systems Research Institute

The Intelligent Computer Systems Research Institute is a center for research and information dissemination within the field of information business technology. The institute focuses on multi-disciplinary topics such as Big Data, Analytics, Cloud Computing, Artificial Intelligence, Machine Learning, Agent technology, "The Internet of Things", Health and Legal Informatics, Business Intelligence, and embedded systems.

Objectives

1. To encourage partnerships between academia and industry. Corporate partners can provide data, field studies, test environments, and other resources through which leading theoretical work can be developed tested in an applied environment.
2. To conduct research for publication in leading academic and industry related journals, as well as working papers.
3. To encourage industry partners to work with students through the creation of internship positions. These internships provide students the opportunity to act as a link between the teaching and research of the institute’s members and the field based applied environment.

The Graduate Business Student Association

The Graduate Business Student Association (GBSA) is a professional and social student-run organization. All graduate business students become members once enrolled in a business master’s or doctoral program and are encouraged to attend meetings and events. The GBSA organizes activities and events aimed at strengthening networking within the graduate business student body and the business community while enriching the academic and social experiences of its members. The GBSA is governed by a committee that consists of a president, vice president, treasurer, secretary, marketing director, community service director, networking director, and a wellness and athletics director. In addition, cohort representatives are elected per program to serve as a liaison between their respective cohort and the committee.

Financial Assistance

Graduate Business Scholarships and Fellowships

There are a limited number of merit-based graduate business scholarships which are awarded at the time of admission to qualified full-time MBA students entering in the fall semester only. A graduate business scholarship covers a portion of tuition for the MBA degree. Graduate business scholarships are not automatically renewed.

In addition to graduate business scholarships, there are a limited number of Emery Means Findley, Jr. Fellowships and scholarships which are awarded by Graduate Business Programs to applicants with outstanding academic credentials. Any applicant who wishes to be considered for a graduate business scholarship or a fellowship, must indicate this in the space provided on the application. Awards are available to both domestic and international students.

There may be a limited number of merit/need-based scholarships which are awarded following admission to Professional and Executive programs. Details on how to apply for these scholarships are provided at the time of admission.

Donor Scholarships

Several endowed scholarships are made available to incoming graduate business students through the generosity of alumni and friends of the University of Miami School of Business Administration. These donor scholarships are for the purpose of recruiting students of high academic merit. The total number and amount of scholarship awards vary from year to year.

Scholarships will be awarded based on the recommendations of the Faculty Admissions Committee on a first come, first served basis. Since the number of scholarships is limited, students who meet the minimum criteria are not guaranteed a donor scholarship award.

We regret that a student may be ineligible for financial awards if he/she receives tuition benefits from the University of Miami or accepts any assistantship, scholarship, grant or fellowship from the University of Miami, in addition to our offer. This includes employees, their spouses, and dependents.

BANK OF AMERICA - ENDOWED BUSINESS SCHOLARSHIPS 1
Criteria: A graduate business school student based on a combination of scholarship and financial need, who will preferably specialize in Finance, Accounting, or Management.

JACK R. BORSTING - GRADUATE SCHOLARSHIP ENDOWMENT
Criteria: Outstanding candidate for a master’s level business degree.

RYDER/PATRICK J. CESARANO – ENDOWED SCHOLARSHIP
Criteria: MBA student with a concentration in finance or management science/operations research. Based on academic excellence and financial need.

PAT & LON WORTH CROW - SCHOLARSHIP ENDOWMENT
Criteria: Graduate business student specializing in Finance, who possesses several years of work experience, preferably with an expressed interest in a career in banking or a banking-related field. U.S. citizen, preferably resident in South Florida community.

EMERY MEANS FINDLEY, JR. – ENDOWED GRADUATE FELLOWSHIPS IN BUSINESS
Criteria: Outstanding candidates for Graduate Business Programs.

DEAN M. FOGEI BUSINESS ENDOWED SCHOLARSHIP
Criteria: Graduate business student with financial need and priority is for a United States veteran.

ALBERT AND ESTHER GREEN ENDOWED SCHOLARSHIP
Criteria: Graduate business student with a health challenge, or student studying or working in Health Administration.

ALLAN M. HERBERT & PATRICIA M. HERBERT – ENDOWED GRADUATE BUSINESS SCHOLARSHIP
Criteria: Outstanding graduate business student, well-rounded, willing to finance his/her own education, and who appreciates the value of work and strives to combine study, work and extra-curricular activities.

JAMES W. McLAMORE – GRADUATE BUSINESS FELLOWSHIPS
Criteria: To recruit and retain outstanding graduate business students.

E. BRUCE MCLAUGHLIN & CYNTHIA M. SWOL - ENDOWED SCHOLARSHIP IN MARKETING
Criteria: Graduate business student with concentration in Marketing, who has significant work experience prior to entering the MBA program. U.S. citizen, with preference given to female students with unmet financial need.

MERRILL LYNCH & CO. FOUNDATION, INC. – FELLOWSHIPS IN INTERNATIONAL FINANCE
Criteria: Graduate business student preparing for a career in International Finance.

CHARLES & ROSE NATIELLO AND THOMAS A. NATIELLO, JR. BUSINESS SCHOLARSHIP
Criteria: Full-time Graduate Business student who has completed one year and is enrolled in a two-year program with a 3.5 GPA or higher.

PIECHOSKI FAMILY GRADUATE BUSINESS FELLOWSHIP
Criteria: Outstanding graduate business student.

SOUTHEAST BANKING CORPORATION FOUNDATION – ENDOWED SCHOLARSHIPS
Criteria: Graduate student in the MBA program who is a Florida resident. Based on academic excellence and financial need.

SOUVIRON FAMILY SCHOLARSHIP - Annual MBA Scholarship
Criteria: The annual scholarship is for a MBA student with financial need with a preference for an Eagle Scout, if someone meets that criteria. If not, a qualified MBA student with need.

Essay Required: In 300 words or less, please explain why you need financial assistance to complete your MBA degree. The essay must be included with your application.

Various other donor scholarships are available based upon need, merit, or other specified criteria.

Ziff Graduate Career Services Center
The Ziff Graduate Career Service Center’s mission is to provide the most current quality resources, career counseling, advising and coaching services that support all University of Miami School of Business Administration graduate program participants, alumni staff, faculty and others who seek career guidance and coaching. The Ziff Graduate Career Services Center continues to build, foster and maintain strong vibrant partnerships and corporate relationships in both the South Florida community and nationwide, which in turn exposes and engages students along their chosen career paths.

This Ziff Career Services Team is committed to providing each student with a personalized plan and the resources and skills needed to be competitive in the global business environment. Developing graduates who will become principled leaders with innovative ideas in a more global society, is the most important challenge that the Ziff Team seeks to navigate for students.

The Ziff Career Services Team is the students’ premier frontline resource to assist in the development of an effective career strategy and the personal branding activities and initiatives that will prepare them for a successful job search at all levels of their career. The personal branding effort includes a strategic resume, honing of interview skills through practice and mock interviews with selected employers and staff, networking opportunities and practices, understanding the generation and maintenance of contacts, and the preparation for a successful career transition. Highlighting leadership, organization and continuous career management, while developing and enhancing an array of skill sets, is central to the mission of the Ziff Graduate Career Services Center.

The Ziff Graduate Career Services Center is located in the School of Business Administration Graduate program participants, alumni staff, faculty and others who seek career guidance and coaching. The Ziff Graduate Career Services Center continues to build, foster and maintain strong vibrant partnerships and corporate relationships in both the South Florida community and nationwide, which in turn exposes and engages students along their chosen career paths.

On Campus Corporate Recruiting and Interviews
The UM-SBA recruiting initiatives begin in the Fall semester from mid-September through mid-December and continues in the Spring semester from mid-January through May. The Ziff Graduate Career Services Center provides ongoing events from Information Sessions to Workshops to Guest Speaker Events to Alumni Engagement to On-Campus Recruiters, all in an effort to expose students to HR professionals, company executives and real-world executives who contribute their time to present a variety of potential career pathways for graduates.

Mock Interviews are scheduled during the same Fall and Spring time frames, to ensure employers are available for students to gain experience with their interviewing skills. A mock interview is a simulation of a job interview which is a conversational exercise that resembles a real interview to the extent possible and practical, for the purpose of providing experience for candidates in a non-threatening scenario.
Networking Strategies, Approaches and Practices

Students are encouraged to join the School of Business Administration MBA groups via LinkedIn, Facebook and other social media outlets as an engaging way to reach out to contacts, companies, classmates, faculty and employers to build their own unique network. The ZIFF/SYMPLICITY website (https://sba-miami-csm.symPLICITY.com) provides students with notices, agendas and listings and itineraries for seminars and work sessions key to the MBA majors.

The University of Miami Alumni Association (http://www.miamialumni.net) allows students to register and create an account to access alumni throughout the United States and the larger global communities.

The Ziff Graduate Career Services Center also provides networking opportunities through on campus career fairs, guest speaker series and events that encourage students to engage employers, recruiters and other working professionals in a variety of disciplines, sectors of business, and industry. Additionally, the ZIFF/SYMPLICITY website provides access to UM-SBA MBA graduates who are available as a resource for students.

Internship Opportunities and Experience

The School of Business Administration encourages students to augment their classroom experience and curriculum through participation in an internship in summer or during Spring and Fall semesters if students can accommodate these with their schedule. The Ziff Graduate Career Services Center recruits a variety of employers to provide unique and targeted internship opportunities for students, all sourced on the ZIFF/SYMPLICITY website.

An internship assignment is a key positioning element for the post-MBA candidate’s career. The internship search is the graduate student’s main focus at the beginning of their enrollment in their specific MBA program. The Ziff Graduate Career Services Center works with all graduate students to target their specific career choices and optimize the type of resources necessary and appropriate to improve the student’s fit for employers.

Registration for Ziff

UM-SBA graduate business students who are seeking employment opportunities post-graduation are required to register with the Ziff Graduate Career Services Center to establish an individual account that includes personal and academic profiles as well as career goals and objectives in order to access job postings, workshops, events, counseling, interviewing and more, on the Ziff website (http://www.bus.miami.edu/graduate-programs/full-time-mba/two-year-mba/career-services).

Ziff Graduate Career Services Center utilizes a software application that allows students to download an app (http://www.sba-miami-csm.symPLICITY.com) to access all of the calendar services and resources on their smart phones or tablets. Students receive alerts about upcoming events, activities, resources for job searches, and other career-related opportunities and initiatives. In addition, student Facebook and LinkedIn accounts are synched to this application.

The registration process begins with the Pre-Onboarding Protocols as students are required to complete practical assignments prior to their SBA Orientation.

Online Resources

The Center’s online portal is where students can access through smart phone applications, career resources, job postings, tools for conducting employment searches, networking activities, informational sessions, career fairs, national conferences, professional networking and corporate presentations as they are promoted on the student’s calendars. Updated and new employment search engines and the latest web-based tools are available for students to search types of companies/businesses and jobs, including compensation packages, qualifications, career ladders and the competition for positions on a national or global basis.

Student Responsibilities

Ultimately, success in obtaining a job is defined by the student based on their individual set of circumstances, major, geographic preference and type of industry or business as well as their short and long term goals and objectives. Along with the Ziff Graduate Career Services Center as a partner, students can create a successful personal branding effort that will connect a network of contacts that will lead to interviews and job offers. Participation in on-campus recruiting activities, MBA Club activities, participation in MBA career fairs, relevant workshops and other SBA-sponsored events is encouraged to broaden students’ exposure to individuals and environments that can assist them in their personal branding efforts.

Students are required to meet with a Ziff Graduate Career Services Center career adviser in their first term as an MBA to discuss their career goals and to develop a personalized Career Action Plan that will lay out a strategy and time frame for their goals. This Career Action Plan and the ongoing strategies will be built through numerous advising/coaching sessions, workshops and participation in both SBA and external events or initiatives.

Please note, Ziff Graduate Career Services Center supports career outcome, however, it is the students’ personal commitment that truly leads to employment.

Students will be required to maintain a current Ziff Graduate Career Services Center profile, resume and goals for their selected career pathways. Students must complete an exit survey after graduation to report their employment information.

The Mentor Program

1. The School of Business Mentor Program is designed to enhance the classroom experience by matching students with local professionals who have experience and expertise in the students’ area of career interest, or are versed in areas of professional development.
2. Through personal interaction with experienced business professionals, students gain an understanding of corporate culture, career directions, and networking. Students also have the opportunity to interact with other mentors by attending regularly scheduled roundtables, hosted by the School.
3. Graduate business students are encouraged to participate.
4. Applications are available on our website (http://www.bus.miami.edu/alumni/get-involved/mentor-program).

Doctoral Programs in Business

Doctoral

The doctoral program at the University of Miami School of Business Administration links world-class faculty with accomplished PhD candidates to prepare them for careers in academic research and teaching. The PhD in Business and PhD of Philosophy in Economics programs, combine interdisciplinary study and research with one-on-one mentoring from faculty experts in your area of interest.

Doctorate of Philosophy in Business

The PhD in Business program combines interdisciplinary study and research. It is designed to prepare students for careers in academic research and teaching. Students follow specialized programs of study under the guidance of faculty experts. In addition, they have the opportunity to participate in cross-disciplinary training. The curriculum will also equip students with the skills and experience necessary for academic placement in the world’s top research universities.

A minimum of 60 credit hours are required to earn the PhD in Business degree. The program requires year-round, full-time study in order to maximize interaction between faculty and students. Students are expected to interact and begin research projects with the faculty upon entering the program.

The requirements for the PhD in Business degree are the same as those listed in the general section (p. 530).

Students may choose to concentrate their study in:

- Accounting
- Finance
- Management Science
- Marketing
- Operations Management
- Organizational Behavior
- Strategy/International Business

Required “Core” Courses
(These courses can be waived by consent of the appropriate department; waiver is granted by issuing transfer credit hours for similar courses taken at the advanced graduate level at accredited institutions.)

There are two streams of “core” courses for students, each comprising of five courses.

Stream I
(Accounting, Finance, Management Science, Marketing-Quantitative, and Operations Management)

</table>

Total Credit Hours 15
Area of Concentration Courses
(These are to be decided by the student and faculty.)

In total, a minimum of 33 credit hours in concentration courses are to be taken, up to 15 of which may be satisfied by transfer-credit hours. Some Departments may require students to complete a minor field. If so, their major field must consist of a minimum of 24 credit hours (with at least 15 credit hours completed in doctoral program residence at the University of Miami). The minor field would then consist of 9-12 credit hours in an area outside of the major concentration (with a minimum of 9 credit hours taken in doctoral program residency at the University of Miami).

Dissertation Research
12 credit hours are to be taken at a minimum—two semesters of 6-9 credit hours each. No transfer credit is given for dissertation or prior research.

Total Credit Hour Requirements
In total, a minimum of 60 credit hours are required for receiving the Ph.D. degree in Business:

<table>
<thead>
<tr>
<th>Category</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Core&quot; courses</td>

</tr>
<tr>
<td>Dissertation research</td>
<td>12</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td>60</td>
</tr>
</tbody>
</table>

To this total must be added any prerequisite courses (as outlined above), with transfer-credit hours being subtracted.

Doctorate of Philosophy in Economics

Doctorate of Philosophy in Economics

The Ph.D. program in Economics prepares the recipient for a variety of research-oriented career opportunities, including university research/teaching, government employment, and a host of employment opportunities in the private sector.

All Ph.D. students are required to complete 60 credit hours.

<table>

MBA Programs

MBA Programs

The MBA (Master of Business Administration) at the University of Miami School of Business prepare students for leadership in today's rapidly changing, global economy. In order to compete and succeed in the 21st century, business leaders must not only be able to adapt to change, they must drive change. At the UM School of Business, we not only prepare students for careers in management and leadership positions, we produce creative thinkers, strong communicators, and the best negotiators.

MBA programs are offered in different formats to serve the diverse academic and business needs of our constitutes including full time, part time, hybrid and online.
Executive and Professional MBA Programs

Executive MBA and Professional MBA Programs

The University of Miami offers Executive and Professional MBA programs that are designed for accomplished professionals who are ready to take their career to the next level without interrupting their career. Participants gain insight and understanding into the business environment by gaining a more global outlook and are better equipped to meet the challenges of today's business world. They become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations. Programs include:

- Professional MBA
- Executive MBA in Health Sector Management and Policy
- Global Executive MBA in Spanish
- The Miami Executive MBA for the Americas
- The Miami Executive MBA for Artists and Athletes

Global Executive MBA (in Spanish)

Global Executive MBA

The University of Miami’s Global Executive MBA program is designed for highly experienced Spanish-speaking executives, entrepreneurs and other professionals in Latin America. The Global Executive MBA in Spanish enables participants to broaden their business knowledge, improve their management skills and strategic decision-making abilities, and expand their professional network through close interaction with a select group of business leaders from across Latin America. The UM Global Executive MBA is taught in seven, two-week sessions offering a total of 15 courses of which 13 take place on campus in Coral Gables and two abroad during a Residential Session Abroad. The courses are given in sequence; the same group of students advances together throughout the entire program. A two-week residential session abroad provides MBA students with the opportunity to gain international business perspectives, first-hand. As part of this program, students may receive lectures on pressing international business matters, meet prominent local business leaders, tour companies and manufacturing operations, and immerse themselves in a country’s cultural, social, and business environment. All classes are taught entirely in Spanish, with some reading materials in English, so reading-level knowledge of English is required.

To obtain detailed program admission curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://www.bus.miami.edu/graduate-programs/executive-mba/global-emba).

Health Sector Management and Policy

Executive MBA in Health Sector Management and Policy

The University of Miami Executive MBA in Health Sector Management and Policy Program prepares graduates for positions of leadership in health care and health-related organizations. The program focuses on the post-graduate educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. Combining its strengths in graduate business education and its close relationships with the South Florida health care community, the program teaches practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the health care industry.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://www.bus.miami.edu/graduate-programs/executive-mba/health-management).

The Miami Executive MBA for Artists and Athletes (hybrid)

The Miami Executive MBA for Artists and Athletes is an accredited track of our existing Executive MBA program which combines classroom courses and online distance learning to allow both active and retired NFL players, as well as other athletes and artists the ability to take courses while tending to their regular daily activities or business commitments. This is a very important population, many of whom are already executives familiar with branding, marketing, media and public relations. The participants in this Program would have demonstrated working in collaborative environments. They also possess a highly disciplined work ethic and perseverance to succeed. The EMBA for Artists and Athletes track builds on these daily features of life and provides a framework for participants to capitalize on their experiences and become successful managers and business leaders during and/or after their professional sports and entertainment days. These individuals have to learn to transition their playing skills into practical leadership and business skills. This EMBAAA track provides participants with the industry exposure and extensive network base, both key for elevating their careers and leveraging their personal brands. Similar to our other EMBA tracks, the EMBA for Artists & Athletes is lock-step in nature. Participants progress together through a sequential pattern of courses. They will obtain their MBA from UM after a successful completion of 42 credits over an 18 month period. The course curriculum is adapted from the EMBA and Professional MBA programs with some adaptations. The program structure is similar to our Global MBA Program. The EMBAAA track consists of 6 residencies in an 18 month period (33 credits) and the online distance learning module (9 credits) during the NFL season, for a total of 42 credits.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://www.bus.miami.edu/graduate-programs/executive-mba/embah-athletes).

Full Time MBA Programs

Full-Time MBA Programs
The University of Miami delivers full-time MBA programs that are innovative, flexible and career focused. They are designed for those who either have an undergraduate background in business, or are from other industry areas interested in a career in business. The curriculum not only prepares students for leadership in business, it adds a valuable dimension to other professions. Students become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations. Programs include:

• Full-Time Two-Year MBA
• Accelerated One-Year MBA
• Accelerated MBA in Real Estate
• JD/MBA (Joint Degree)
• MD/MBA (Joint Degree)
• JD/LLM/MBA
• BArch/MBA (Joint Degree)

Accelerated MBA in Real Estate

Accelerated MBA in Real Estate
The University of Miami, School of Business Administration offers an accelerated MBA program with a concentration in real estate highlighted by two internship opportunities. Bringing together the School's strengths in management education with the strengths of the UM School of Architecture in new urbanism, the program prepares students to succeed in commercial real estate market careers. This program is designed to meet the needs of the student with an undergraduate degree in business. Applicants must demonstrate successful completion of the core business courses: Financial and Managerial Accounting, Microeconomics, Macroeconomics, Statistics, Calculus, Organizational Behavior, Operations Management, Marketing, and Finance.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/real-estate/index.html?utm_source=undefined&utm_medium=undefined&utm_campaign=undefined&utm_term=undefined&utm_content=undefined).

BArch/MBA
The Bachelor of Architecture/Master of Business Administration is an exciting joint venture with the University’s School of Business Administration, which will allow students to earn a Bachelor of Architecture as well as a Master of Business Administration. The joint degree offers students the unique opportunity to complete the two degrees in six years, saving an entire year by combining the programs.

Students will begin taking Saturday graduate level business courses during the fourth year of their architecture program. Both degrees are fully accredited by their respective accrediting bodies — the NCARB and AACSB International.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of
Recruiting and Admissions at 305-284-2510 or visit our website (http://arc.miami.edu/programs/barch-mba).

- Elective 2
- Elective 2
- Elective 2

### Total Credits
45

*Students may be able to complete a concentration based on electives completed. Elective offerings are based on class demand.*

**Prerequisite coursework**
The following courses must be successfully completed during the fourth year of the BArch program:
- **BUS 630**
- **BUS 632**
- **MAS 201**

**JD/LLM/MBA**

**Triple Degree Program: A Specialized Option for Business Majors**
The University of Miami School of Law and the School of Business have created a triple degree program - a JD, an LLM in Tax or Real Property Development, and an MBA - which can be completed in just four years and two summers.

This program offers a combination of legal and business degrees to students who were undergraduate business majors. These credentials are ideal for anyone with a long-term goal of servicing top corporate clients or becoming a senior executive at a bank, real estate company, or financial institution. They also serve as significant assets in today's competitive marketplace to any attorney starting out in tax or real estate law.

To obtain detailed program admission, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/jd-llm-mba).
JD/MBA

Juris Doctor /Master of Business Administration

The University of Miami School of Law and the School of Business Administration offer a joint degree program in law and business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Business Administration degree from the School of Business Administration.

Students who apply for the joint J.D./M.B.A. program must apply to both the School of Law and the School of Business Administration. The applicant must achieve a qualifying score on the Law School Admissions Test (LSAT) and the Graduate Management Admissions Test (GMAT) for admission to the respective schools. The applicant must notify both schools that he or she is applying for the joint J.D./M.B.A. program, and in order to remain in the joint program, the student must meet minimum standards of both the School of Law and the School of Business Administration.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/jd-mba/index.html?utm_source=undefined&utm_medium=undefined&utm_campaign=undefined&utm_term=undefined&utm_content=undefined).

In addition to all requirements for the J.D degree, students in the joint J.D./M.B.A. program must complete the following courses:

| LAW 100 - Business Associations      |          |
| LAW 105 - Federal Income Tax I       |          |
| LAW 406 - Professional Responsibility|          |

46-48

*Courses waived (based on waiver exam) must be replaced with an elective.

7 electives (14 credits) are required during the 2nd year of the program. Students may be able to complete a concentration based on electives completed. Elective offerings are based on class demand.

MD/MBA

MD/MBA

The University of Miami School of Business offers a joint MD/MBA degree program in partnership with the University’s Miller School of Medicine (http://www.med.miami.edu). The business curriculum prepares future physicians for the business complexities related to running a private medical practice or heading a group practice, and prepares medical students for careers in health sector management, leadership and policy.

The MD/MBA program adds an additional year to the four-year medical school curriculum. The MBA coursework ranges from financial reporting and corporate strategy to the legal aspects of health administration.

MD/MBA candidates have the option of choosing a Research Track (project based which provides practical hands on experience) or an Elective Track (provides business electives). Please refer to the curriculum for details.
MD students are eligible to apply to the MD/MBA program during their 3rd year of Medical School and will be required to submit a Full-Time MBA online application and the GMAT (http://www.mba.com) to be considered for the program.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/md-mba).

### One Year MBA

**Full-Time Accelerated 1-Year MBA Program**

The One-Year MBA program at the University of Miami School of Business Administration is offered once per year in January. This program is innovative, flexible, and career focused. It is designed to meet the needs of the student with an undergraduate degree in business, who graduated from an accredited university.

The 35-credit curriculum is cohort based and completed in one year. Students obtain a cross-functional MBA in lieu of a concentration.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/one-year-mba).
Two Year MBA

Full-Time 2-Year MBA Program

The full-time two-year MBA Program is innovative and career focused. It is designed to meet the needs of undergraduate students who have studied in any discipline. In addition to preparing business leaders of the future, the curriculum adds a valuable dimension to those seeking to build their business acumen for a wide variety of future career opportunities.

UM’s full-time MBA program is a 56 credit hour, lock-step program that is completed in less than two calendar years. Students typically enroll in elective courses during the second year of the program. Students may be able to complete a concentration based on completion of appropriate electives. Concentrations are offered based on class demand. In addition, students may enroll in a foreign language class, with no additional charge.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/two-year-mba).

Specialized Master Degrees

Specialized Master Degrees

The School of Business offers a premier catalog of master’s degree programs geared toward specific career paths. Each of these full-time programs can be completed in less than one year. Students will focus on in-depth business analysis, delve into research in economics, as well as enhance their proficiency in topics like accounting, finance, and organizational leadership. A new skill-set in a specialized area will make...
students more valuable to their organizations and more competitive in the marketplace.

- Master of Accounting
- Master of Science in Business Analytics
- Master of Arts in Economics
- Master of Science in Finance
- Master in International Business Studies
- Master of Science in Management Studies
- Master of Science in Taxation
- Master of Professional Accounting (online)
- Master of Science in Finance (online)

**Master in International Business Studies**

**Master in International Business Studies**

The Master in International Business Studies (MIBS) program seeks to develop global leaders. To this end, it offers to a select group of globally-minded students from throughout the world with rich experiential learning opportunities in Miami and other locations worldwide. The program incorporates a rigorous academic curriculum focusing on best practices by both global startups and leading multinationals in addressing their emerging opportunities and challenges. Students are exposed to South Florida’s rich multicultural business community and the hundreds of international conferences that it hosts every year. Students may focus their professional development efforts on developing both regional competencies and functional expertise of their choice. MIBS program activities in and out of classrooms are designed to help its students bond, as well as expand their professional network with participants of other graduate business programs.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/specialized-masters/international).

**Total Credit Hours**

**35**

**Master of Accounting**

The Master of Accounting (MAcc) and Master of Science in Taxation (MST) programs are similar in that they offer an opportunity to concentrate in accounting, but they differ in degree of specialization and career path orientation. The MAcc offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation. In addition to the traditional one year of full-time study beyond the Bachelor's level, the MAcc and the MST programs are offered as accelerated programs for University of Miami undergraduates.

**Scholarships**

University of Miami School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

**Accounting Summer Intensive Program**

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

**Non-Accounting Majors**

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Accounting (MAcc) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MAcc or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. Although MST students must complete advanced taxation in the summer, MAcc students may complete the course in the summer or in term one of the spring semester.

**Foreign Students**

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MAcc program will...
automatically also be considered applicants to the Accounting Summer Intensive Program.

**Program Schedule**

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½-week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

**Program Prerequisite Accounting Courses**

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

**Summer Intensive Program Course Offerings**

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 632</td>
<td>Intermediate Accounting I</td>
<td>2</td>
</tr>
<tr>
<td>ACC 633</td>
<td>Intermediate Accounting II</td>
<td>2</td>
</tr>
<tr>
<td>ACC 634</td>
<td>Cost Accounting</td>
<td>2</td>
</tr>
<tr>
<td>ACC 636</td>
<td>Accounting Systems</td>
<td>2</td>
</tr>
<tr>
<td>ACC 673</td>
<td>Taxation for Business and Investment Decisions</td>
<td>2</td>
</tr>
<tr>
<td>ACC 635</td>
<td>Auditing</td>
<td>2</td>
</tr>
</tbody>
</table>

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

**Entering the MAcc or MST Program**

Upon successful completion of the intensive program, students immediately enter the MAcc or MST program in the fall semester. To graduate with their MAcc or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

**CPA Licensure Requirements**

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. Please find the licensure requirements for the State of Florida, here (http://www.myfloridalicense.com/dbpr/cpa/licensure.html).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

**Requirements to Sit for the CPA Exam:** To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods: January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor’s degree in order to sit for the CPA exam.

**Requirements for Licensure:** In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor’s degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida’s 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

**Licensed in Another State:** If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more
than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements
The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)
Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses
No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

Admission Requirements
For admission to MAcc, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant’s:

- Undergraduate grade point average
- GMAT score
- Grades in specific accounting courses
- Rigor of the undergraduate program
- Other factors such as work experience.

Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami’s Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami’s Accounting Summer Intensive Program to fulfill this requirement.

Master of Accounting (MAcc)
The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers, CFOs or financial analysts. The MAcc is designed for the student who has taken the accounting and related courses required for an undergraduate major in accounting or other undergraduate business majors who have successfully completed the Accounting Summer Intensive Program. These students should be able to complete the MAcc in a year or less provided they enroll as full time students.

Undergraduate Course Requirements
The courses listed below are undergraduate prerequisites that, unless already completed, must be fulfilled in order to be admitted for graduate study. For most graduate tax classes including ACC 648 Financial Reporting Implications of Income Taxes, the equivalent of ACC 404 Advanced Taxation (Corporate and Partnership Income Taxation) is also required. Students can satisfy this prerequisite by taking ACC 639 Income Taxation and Business Entities which is offered in a 9-day intersession format in August before the start of the fall semester. If a candidate does not have an undergraduate business degree, additional business prerequisites (economics, marketing, management, finance and others) will also be required.

Master of Accounting—Assurance Track (MAcc-Assurance)
The program requires 30 semester hours consisting of nine required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not
count toward the MAcc degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

1 Any other electives must be selected in consultation with the Program Director.
2 ACC 631 is not open to students that completed ACC 411 Advanced Accounting or equivalent at a US university.
3 ACC 639 is not open to students that have completed ACC 404 Advanced Taxation or equivalent at a US university.

**Accelerated Masters Programs**

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor’s level, the MAcc and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.

The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor’s and Master’s degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

All UG degree requirements except those taken in the senior year.

Students that select the MAcc-Corporate Track must take FIN 303 before or during their senior year.

**Summer after Junior Year**

**Internship**

**Senior Year Curriculum** 1

- ACC 506  Internal Auditing  2
- or ACC 572  Advanced Financial Analysis
- ACC 522  Advanced Issues in Auditing  3
- ACC 530  International Financial Reporting Standards  1
- ACC 648  Financial Reporting Implications of Income Taxes.  2
- BSL 691  The Public Corporation: Legal Perspectives  2
- BUS 602  Critical Thinking and Effective Writing  1
- BUS 603  Critical Thinking and Effective Speaking  1

**Summer after Senior Year** 2

- 1 ACC graduate course
- Approved CPA Review Course 3
- Pass CPA exam

**Final Fall Semester**

- Remaining 16 graduate credits 4

1 Twelve credits of work in senior year will count towards the MAcc or MST degree (only students in the accelerated program are eligible to take these classes during their senior year).
2 Students must take one accounting graduate course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620 Accounting Controls in Information Technology (offered every summer) or ACC 649 Issues in Tax Policy.
3 Students are also REQUIRED to take an approved CPA review course during the summer following their senior year. Students who do not take a CPA review course must complete an additional six graduate credits which will likely delay graduation to May instead of graduating in December.
4 Students are also expected to pass part, if not all, of the CPA exam during this summer.

In the final fall semester students will complete the remaining 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.
Admission to the Accelerated Programs

Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 15 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 406 and MGT 401.

Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

Program Timeline

1. Fall semester of Junior Year: Complete an application to the program by September 15 and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate accounting degree in specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

Pre-requisites

The program is designed for University of Miami School of Business Administration undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses (ACC 301 and ACC 406) and MGT 401.

Senior Year Spring Semester Curriculum

In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.

Summer, Fall, and Spring after Senior Year

In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship

- Students must apply to the program in their junior year and obtain an “approved” internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.

Master of Arts in Economics

Master of Arts in Economics

The Master of Arts in Economics program provides students with the essential analytical tools and rigorous training they need to apply economic analysis to help both global corporations and government institutions achieve success. The program introduces students to several
applied areas of economics and provides the required problem-solving skills to analyze economic problems.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/specialized-masters/economics).

**Master of Professional Accounting (online)**

**Master of Professional Accounting (online)**

The Master of Professional Accounting provides focused, accounting education meant to prepare students for a career in accounting departments of businesses/corporations. The program consists of 32 credits that will be taken over a 16-month period with start dates in September, January, and May. The coursework will consist of 16 credits in basic accounting, taxation and information systems, followed by 16 credits in advanced topics including auditing and financial statement analysis and firm valuation. The courses offered in the MPrA are already taught at both the undergraduate and graduate level in accounting departments of businesses/corporations. Most students in the program will earn a Certificate in Accounting Practice along the way to earning their degree.

To obtain detailed program admission and curricula information please visit the website. (http://www.miami.edu/online/online-degrees/masters-professional-accounting)

**Master of Science in Business Analytics**

**Master of Science in Business Analytics**

The Master of Science in Business Analytics program is an intensive experience that develops well-trained business analysts armed with the skills necessary to understand, manage and make use of big data in a business context. Over the course of 10 months, students learn how to turn abstract data into meaningful information with which to predict consumer behavior and forecast revenue and expenses for virtually any business model and any industry sector.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/specialized-masters/analytics).

## Master of Science in Finance (online)

The Master of Science in Finance provides focused, graduate level education meant to prepare students for a professional career in finance.

The program consists of 32 credits taken over a sixteen-month period beginning in August, January or May. The program includes 4 credits of fundamental coursework in accounting, finance, microeconomics and quantitative methods, 8 credits covering general business education including business analytics, operational excellence, business planning, and communications, 8 credits in more advanced finance topics, and 12 credits in the area of specialization. Currently the specializations are in Corporate Finance, including courses in financial decision making, applied corporate finance, derivatives, and financial modeling. The proposed 32-credit online curriculum waives the following 3 courses from the on-campus version of the MS in Finance, as it is geared for Working Professionals who are already expected to possess the skills covered in these courses: BUS 600/ BUS 602 Critical Thinking and Effective Writing (1 credit); BUS 603 Critical Thinking and Effective Speaking (1 credit); BUS 604 Career Development and Enrichment (1 credit). Students in the program will earn both the Certificate in Financial Decision Making and the Certificate in Corporate Finance along the way to earning their degree.

To obtain detailed program admission and curricula information, please visit the website (http://online.miami.edu/online-degrees/masters-finance).

| FIN 619  Advanced Portfolio Management and Alternative Investments | 4       |

| Elective                         | 2       |
| Total Credit Hours               | 32      |

## Certificate in Financial Decision Making

For students who want to advance in corporate finance functions without committing to a full degree program. This certificate is 16 credits taken over an eight-month period beginning in August, January or May. Students would typically be working in such functions as the controller’s office, treasury management, capital budgeting, or investor relations.
After completion, it is possible to apply for admission to the online Master of Science in Finance which would then take another 16 credits and 8 months to complete.

Certificate in Corporate Finance

For students who work in a financial setting and wish to further their understanding of finance but do not wish to commit to a full degree program. This certificate is 16 credits taken over an eight-month period beginning in August, January or May. Students would typically be working at a wealth management firm, a mutual fund, hedge fund, or pension fund. After completion, it is possible to apply for admission to the online Master of Science in Finance which would then take another 16 credits and 8 months to complete.

Master of Science in Management Studies

The Master of Science in Management Studies program, with a leadership specialization, shapes students into competent, versatile and dynamic leaders ready to navigate the complex workplace of the 21st century. The program helps participants develop the interpersonal skills needed to influence others and lead effectively in today’s challenging work environment. Not only does the program include coursework to provide students with a foundation of basic management skills, it includes a set of courses that focus on the skills needed to achieve performance at the highest levels possible.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/specialized-masters/leadership).

Master of Science in Taxation

The Master of Accounting (MAcc) and Master of Science in Taxation (MST) programs are similar in that they offer an opportunity to concentrate in accounting, but they differ in degree of specialization and career path orientation. The MAcc offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation. In addition to the traditional one year of full-time study beyond the Bachelor’s level, the MAcc and the MST programs are offered as accelerated programs for University of Miami undergraduates.

Scholarships

University of Miami School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

Accounting Summer Intensive Program

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

Non-Accounting Majors

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Accounting (MAcc) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MAcc or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate
degree is not in accounting. Summer Intensive students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. Although MST students must complete advanced taxation in the summer, MAcc students may complete the course in the summer or in term one of the spring semester.

Foreign Students
The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems, and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MAcc program will automatically also be considered applicants to the Accounting Summer Intensive Program.

Program Schedule
The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½ -week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

Program Prerequisite Accounting Courses
Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

Summer Intensive Program Course Offerings
The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>ACC 673</td>
<td>Taxation for Business and Investment Decisions</td>
<td>2</td>
</tr>
<tr>
<td>ACC 635</td>
<td>Auditing</td>
<td>2</td>
</tr>
</tbody>
</table>

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Entering the MAcc or MST Program
Upon successful completion of the intensive program, students immediately enter the MAcc or MST program in the fall semester. To graduate with their MAcc or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA Licensure Requirements
Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountant, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed here (http://www.myfloridalicense.com/dbpr/cpa/licensure.html).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam
To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor’s degree in order to sit for the CPA exam.

Requirements for Licensure
In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor’s degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the
supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida’s 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State
If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements
The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges, Association of Independent Colleges and Universities, and Canadian Schools who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)
Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses
No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

Admission Requirements
For admission to either the MAcc or MST, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant’s:

- Undergraduate grade point average
- GMAT score
- Grades in specific accounting courses,
- Rigor of the undergraduate program
- Other factors such as work experience

Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami’s Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami’s Accounting Summer Intensive Program to fulfill this requirement.

Master of Science in Taxation (MST)
This program affords the accounting major or equivalent the opportunity to specialize in the area of taxation. Through electives, students are able to expand their areas of expertise, so that they may adequately prepare themselves for careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. The program requires 30 semester hours consisting of six required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution and has completed ACC 403 Fundamentals of Taxation and ACC 404 Advanced Taxation, or their equivalents. Students who have taken only one tax course should plan to take an advanced taxation course (such as ACC 639 Income Taxation and Business Entities which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester).
In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MST degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

| FIN 671 | Advanced Topics in Corporate Finance |
| FIN 674 | Financial Analysis of Mergers and Acquisitions |

Total Credit Hours 30

1. Any other electives must be selected in consultation with the Program Director.
2. ACC 631 is not open to students that completed ACC 411 Advanced Accounting or equivalent at a US university.
3. ACC 639 is not open to students that have completed ACC 404 Advanced Taxation or equivalent at a US university.

### Accelerated Masters Programs

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor’s level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.

The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor’s and Master’s degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

### Accelerated Program Timeline

**Pre-Requisites**

A minimum of 102 credit hours

**Accounting Major Requirements**

| ACC 301 | Cost Accounting |
| ACC 604 | Advanced Taxation |
| ACC 402 | Auditing |
| ACC 403 | Fundamentals of Taxation |
| BSL 401 | The Law of Financial Transactions |

All UG degree requirements except those taken in the senior year.

### Admission after Senior Year

1. Twelve credits of work in senior year will count towards the MAcc or MST degree (only students in the accelerated program are eligible to take these classes during their senior year).

2. Students must take one accounting graduate course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620 Accounting Controls in Information Technology (offered every summer) or ACC 649 Issues in Tax Policy.

3. Students are also REQUIRED to take an approved CPA review course during the summer following their senior year. Students who do not take a CPA review course must complete an additional six graduate credits which will likely delay graduation to May instead of graduating in December. Students are also expected to pass part, if not all, of the CPA exam during this summer.

4. In the final fall semester students will complete the remaining 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

### Admission to the Accelerated Programs

#### Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year.

#### Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 15 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission.

The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.

- After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 403, BSL 401 and ACC 404.

### Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

#### Program Timeline

1. Fall semester of Junior Year: Complete an application to the program by September 15 and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate accounting degree in specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

#### Pre-requisites

The program is designed for University of Miami School of Business Administration undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses (ACC 301 and ACC 406) and MGT 401.

#### Senior Year Spring Semester Curriculum

In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.
Summer, Fall, and Spring after Senior Year
In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship
- Students must apply to the program in their junior year and obtain an "approved" internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.

Non-Degree Programs

School of Business Administration
Graduate Non Degree Programs
The School offers open enrollment certificate programs in general business as well as accounting and finance (online) which enable professionals to add basic business courses to their portfolios.

To obtain specific program information please visit the corresponding website.

- Certificate in Accounting Practice (online) (p. 600)
- Certificate in Business Administration (http://bus.miami.edu/graduate-programs/business-certificate)
- Certificate in Corporate Finance (online) (http://www.miami.edu/online/online-degrees/masters-finance/#degree-certificates)
- Certificate in Financial Decision Making (online) (http://www.miami.edu/online/online-degrees/masters-finance/#degree-certificates)

Certificate in Accounting Practice (online)

Certificate in Accounting Practice
Intended for candidates with no prior accounting credits, the Certificate of Professional Accounting program will provide the fundamental knowledge of financial and managerial accounting, as well as taxation and accounting information systems sufficient to equip students for entry-level jobs in corporate accounting.

The Certificate of Professional Accounting program strives to conform to the strategic priorities of the School of Business in the following ways:

1. Integrate knowledge from the latest field-based research into classroom discussion so that students better understand financial and managerial decision making in practice and can take a professional leadership role in assessing the pros and cons of standard quantitative tools used in accounting.

2. Recognize the context and implications of the conflicts of interest inherent in the accounting industry in both classroom discussion and extracurricular interaction with local leaders, in order to create principled leaders in the field of accounting.

3. Expose students to the global aspect of the field of accounting through both coursework and interaction with masters-level students in one of the most culturally diverse graduate business schools in the United States.

The specific CPrA program objectives are to address the growing demand for a masters-level business certificate focused in accounting by accomplishing the following goals:

- Provide focused, graduate level education to those wishing to pursue a professional career in accounting
- Develop communication skills critical to long-term success in the accounting profession
- Provide participants with an understanding of the day-to-day work environment accounting professionals face, and career guidance, through periodic interaction with other professionals

To obtain detailed program admission and curricula information please visit website (http://www.miami.edu/online/online-degrees/masters-professional-accounting).

Certificate in Business Administration

Certificate in Business Administration (CBA)
The Certificate of Business Administration (CBA) program provides professional and graduate students an opportunity to obtain valuable, fundamental business education and enhance their analytical skills, as well as soft skills. The program consists of four courses in business covering all fundamental functions central to any business operation. Students can take one or more courses for credit, but must satisfactorily complete all four courses to be awarded the certificate. One or more of these courses may also serve as part of the specialized master's degrees. The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited
colleges or universities. The GMAT and GRE are not required except from students seeking admission to the specialized master’s programs.

To obtain detailed program admission information, please contact the Office of Recruiting and Admissions at 305-284-2510 or visit our website. (http://www.bus.miami.edu/graduate-programs/business-certificate)

Certificate in Financial Decision Making (online)

Certificate in Corporate Finance (online)

This certificate is designed for students who are seeking a career change to corporate finance, or students wishing to advance in the corporate Treasurer’s office or similar structure. The certificate begins with a common core of financial tools. The core classes include an integrated foundation of finance, economics and accounting, as well as an integrated course on domestic and international corporate valuation, covering both financial and accounting problems. The certificate finishes with a course in applied corporate finance, which focuses on financial decision making from a corporation's perspective. Issues addressed include management of corporate liabilities, leasing and other asset-based financing techniques, short-term and long-term financing, capital budgeting decisions (CAPEX), corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, and other current issues in corporate finance.

Students completing the Master in Finance have the option of earning a certificate in either Corporate Finance or Financial Decision-Making to supplement their degree. Additionally, an individual certificate in each track can be earned online for those students who do not wish to complete the full degree at this time. The combined Certificate in Finance Decisions and Corporate Finance requires 20 credits, while the Certificate in Financial Decision Making requires 16 credits.

To obtain more information please visit the website (http://www.miami.edu/online/online-degrees/masters-finance).
Departments

The School of Communication offers:

- the Master of Arts in the Department of Communication Studies (M.A. in Communication Studies),
- the Master of Arts in the Department of Journalism and Media Management (M.A. in Journalism), and
- the Master of Arts in the Department of Strategic Communication (M.A. in Public Relations), and
- the Master of Fine Arts in the Department of Cinema and Interactive Media (M.F.A. in Motion Pictures and M.F.A. in Interactive Media).

The School also offers a Ph.D. in Communication.

Admission Requirements

Admission to Graduate Studies at the Master’s Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts or Master of Fine Arts degree in Communication:

- A baccalaureate degree from an accredited institution
- The School's official application
- A $65.00 non-refundable application fee
- Three letters of recommendation
- 500 word typed statement of academic and professional goals.
  - Note: for the Interactive Media M.F.A., please visit this website (http://com.miami.edu/interactive-media-mfa) for specific instructions about the statement
- Official transcripts of all college work, both undergraduate and graduate
  - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers your degree, with English translation for all degrees earned.
  - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
  - Note: Only for international applicants
- Copy of current passport
  - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores
  - Note: Required for M.A. applicants in Communication Studies and Public Relations.
  - Note: Journalism M.A. and Interactive Media M.F.A. applicants may send GRE scores or a portfolio
  - Note: Not required for Motion Pictures M.F.A. applicants
- Portfolio
  - Note: Required for Motion Pictures M.F.A. applicants

Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

Admission to Graduate Studies for the Juris Doctor/Master of Arts in Communication Joint Degree

Requirements for admission to graduate studies for the Juris Doctor/Master of Arts in Communication joint degree are:

- Students must be admitted to the Law School first, prior to enrollment in the School of Communication, checking a box on their application indicating their interest in the joint degree program. Once accepted to the Law School, the student’s law school application including LSAT score, undergraduate transcript, and letters of recommendation (two of them required for the J.D. program) will be sent to the School of Communication for review. The student will then receive notification from the School of Communication regarding his/her admission to the joint degree program.
  - The LSAT score may be submitted in lieu of the GRE score.

General notes

- Students will be admitted to the Law School J.D. program and the School of Communication (SoC) master’s program separately.
- Students in this joint degree program must commence law study first.
- Students who have already commenced work on the SoC MA are not eligible for the joint program.

Admission to Graduate Studies at the Doctoral Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Doctor of Philosophy in Communication program:

- A master’s degree in communication or another appropriate field. The degree must be in addition to a bachelor’s degree. All degrees must be from accredited institutions.
- The School’s official application
- A $65.00 non-refundable application fee
- Three letters of recommendation
- Official transcripts of all college work, both undergraduate and graduate
  - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers your degree, with English translation for all degrees earned.
  - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
  - Note: Only for international applicants
- Copy of current passport
  - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores
  - Note: Required for M.A. applicants in Communication Studies and Public Relations.
  - Note: Journalism M.A. and Interactive Media M.F.A. applicants may send GRE scores or a portfolio
  - Note: Not required for Motion Pictures M.F.A. applicants
- Portfolio
  - Note: Required for Motion Pictures M.F.A. applicants

- Note: Interactive Media M.F.A. applicants may send a portfolio or GRE scores
• Current Curriculum Vitae (CV)
• 500-word typed statement of your academic and professional goals, research area you want to pursue and why, and how your background has prepared you for this. A copy of the completed master’s thesis or comparable scholarly work if a master’s thesis has been completed. If the master’s thesis is in progress, submit completed chapters. If a thesis is not required by your master’s program, submit comparable scholarly work.

Degree Programs

The School of Communication offers graduate programs leading to the Master of Arts, Master of Fine Arts, and the Doctor of Philosophy degrees.

Communication Studies (M.A.)

COMMUNICATION STUDIES (M.A.) is a program designed to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. The 30 credit hour thesis track program emphasizes the student’s development of research skills. The 36 credit hour non-thesis track program focuses on a theoretical foundation with emphasis on applied communication. Students have the option to concentrate in Communication Studies, Health Communication, Intercultural Communication, or Organizational Communication.

Journalism (M.A.)

JOURNALISM (M.A.) is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today’s media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting and, travel and features). The program begins in the fall semester and lasts for 18 months. No prior training or experience in journalism is required.

Public Relations (M.A.)

PUBLIC RELATIONS (M.A.) offers two tracks. The 30 credit hour thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36 credit hour, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

Joint Degree Juris Doctor (J.D.)/M.A. in Communication

JOINT DEGREE JURIS DOCTOR (J.D.)/M.A. IN COMMUNICATION. A powerful background in law and in communication can be a launching pad for a career in law, business, entertainment or government. For this reason, the University of Miami School of Law and School of Communication have brought together these two dynamic fields to offer a joint degree program. Through this joint program, students can acquire a law degree and a master’s degree in communication in less time (3 to 3½ years). The joint degree program is intended for students with a variety of goals including students who plan to practice professionally in a communication field such as journalism or strategic communication with a law-related emphasis. Graduates of these programs may also work as in-house counsel for new communication technology companies, or serve with government agencies concerned with communication law or with law firms practicing in that field. This program also provides a solid foundation for future journalists who wish to report on legal affairs, and offers ideal preparation for the rapidly growing field of public affairs management, in which practitioners work in business, government and non-profits to communicate with key audiences.

The School of Communication M.A. degree programs participating in the joint J.D. program are:

• Communication Studies (Communication Studies, Health Communication, Intercultural Communication, Organizational Communication)
• Public Relations
• Journalism

Motion Pictures (M.F.A.)

MOTION PICTURES (M.F.A.) The Motion Picture graduate program provides a student-centered, learning experience within a globally diverse moving image context. The M.F.A. curriculum emphasizes the relationship between theory and practice and encourages both creative collaboration and independent thinking as it prepares motion picture professionals and artists. M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. During the second year of studies, candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies. This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

Graduate students are encouraged to pursue independent and critical thinking, research and creative work as appropriate to the fulfillment of the requirements of their degree. In addition, the graduate program seeks to support innovative approaches and ideas and to aid in the pursuit of relevant scholarly and creative endeavors.

Interactive Media (M.F.A)

INTERACTIVE MEDIA (M.F.A.) The Interactive Media graduate program aims to prepare a new generation of innovators and leaders in the field of interaction design. The M.F.A. curriculum emphasizes exploration of the use of technology, design, and human behavior, to impact, augment, and influence how people communicate. The multidisciplinary curriculum brings together students from different backgrounds to learn about interaction design, gaming, mobile, data visualization, human computer interaction, and other emerging technologies. The program trains students to research, prototype, design, and build projects in business, social, academic, and cultural contexts.

Communication

COMMUNICATION (Ph.D.) provides students with the theory and research skills required to use communication to make positive change in society, community, and individuals. Possible areas of specialization, within this overarching framework of social and behavioral change, include health communication (broadly defined), intercultural communication, organizational communication, international communication, advocacy,
and journalism studies and accompanying new/digital media foundations and skills.

# Cinema and Interactive Media

The Cinema and Interactive Media Department offers a complete curricular experience in critical understanding and effective creation of contemporary moving image media and interactive design. With two programs, the M.F.A. in Motion Pictures and the M.F.A. in Interactive Media, our mission is to explore the creative uses of narrative, documentary, technology, design and human behavior in order to entertain, impact, augment, and influence how people communicate. We prepare a new generation of innovators, storytellers and leaders in the fields of cinema, transmedia and interaction design.

The M.F.A. in Motion Pictures program requires that students complete a minimum of 66 credit hours. At least 24 of these credit hours must be at or above the 700-level. At least 12 credit hours must be earned at the 800-level for thesis work. Motion Picture students must maintain an overall minimum GPA of 3.0 or above for all courses. By the end of the second year, students are required to achieve a minimum 3.0 score on the program’s film and television literacy test.

Students in the Motion Picture program are strongly encouraged to explore not only a primary but also a secondary area of specialization and develop a minimum of 2 creative projects in consultation with their faculty advisory committee. The 3 year program culminates in a thesis portfolio. Students need to work closely with their primary advisor and committee to ensure they are fulfilling their degree expectations, which typically include a short motion picture project abroad and a summer internship.

The M.F.A. in Interactive Media program requires that students complete a minimum of 45 credit hours at the graduate level with an average of “B” and no grade lower than a “C-”. Prior written approval is required from both the chair of the CIM department and the director of graduate studies for transfer of credit hours, for course substitutions, as well as for taking a course at another university.

Interactive Media students are required to register for a capstone project seminar. To register for this course, students must complete all courses with a standing 3.0 GPA. The capstone course is designed to help students define and execute their final projects. To graduate, students must complete and present a fully articulated capstone project and related documentation.

Students must complete all master’s degree requirements within 6 years.

Electives
Students will be able to take 12 elective credits (four classes) of their choice under guidance of their advisor.

Capstone
CIM 691 Capstone 3
Total Credit Hours 45

M.F.A. in Motion Pictures
Students must complete a minimum of 66 credit hours with the approval of the faculty advisor. At least 24 must be at or above the 700-level and at least 12 must be earned for thesis. Motion Picture students must maintain an overall minimum GPA of 3.0 for all courses.

M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. Several courses are required during the second year of studies. Candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies.

All M.F.A. students must demonstrate deeper, critical understanding of motion picture practice in diverse social and cultural contexts. To this end, students are encouraged to take advantage of available study abroad programs. Students are also encouraged to participate in an internship during the summer of the first year or second year of studies.

By the end of the second year, students must complete a film and television literacy test, based on a list of 150 culturally and historically significant titles compiled by the faculty. The list is circulated to each student upon entrance into the program. The test is administered annually in the spring semester. Students are required to earn 85/100% on the test in order to complete the degree.

This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

Spring
Required course work:
CIM 694 Motion Picture Marketing and Distribution 3
CIM 815 MFA Thesis 1-6
Credit Hours 9
Total Credit Hours 66

No more than 9 credit hours will be allowed for graduate internships and advanced projects and directed research. Courses may be taken, with program director approval, from other programs or departments within the University of Miami.

Communication Studies
Two programs are offered in Communication Studies.
- The thesis program emphasizes the student’s development of research skills under faculty supervision (30 credit hours).
- The non-thesis program focuses on a theoretical foundation with emphasis on applied communication (36 credit hours).

Students will be prepared for leadership positions in public or private organizations at the national or international level, or pursue advanced degrees.

Thesis students must complete a minimum of 30 credit hours at the graduate level with the approval of a faculty advisor or department chair. Of the 30 credit hours, 15 credit hours must be at or above the 600-level.

Non-thesis students must complete a minimum of 36 credit hours at the graduate level with the approval of a faculty advisor or department chair.
Of the 36 credit hours, 18 credit hours must be at or above the 600-level. Communication Studies students must maintain an overall minimum GPA of 3.0 for all courses. Core courses must be completed during the first year of study, or by completion of 18 credit hours. No more than 6 credit hours will be allowed for advanced projects and directed research. Only one intersession course (3 credit hours) can be counted towards the degree. Electives credits must be chosen with prior approval of a Communication Studies advisor.

**Masters Programs in Communication Studies**

- M.A. in Communication Studies - Communication Studies Track (p. 606)
- M.A. in Communication Studies - Health Communication Track (p. 607)
- M.A. in Communication Studies - Intercultural Communication Track (p. 607)
- M.A. in Communication Studies - Organizational Communication Track (p. 608)

**M.A. in Communication Studies - Communication Studies Track**

The goals of the Master of Arts program in Communication Studies are to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. Students may complete coursework in persuasion, and interpersonal, intercultural, organizational, and health communication together with research methods applicable to these areas. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

M.A. in Communication Studies - Health Communication Track

Health Communication is an emerging specialty in the field of communication. This graduate program is designed to provide a broad introduction to human communication in a health-care context. Career opportunities in this area include public health leaders, practitioners, and researchers who design, evaluate, and disseminate health communication messages for private and governmental organizations, advertising, public relations and marketing agencies, and journalists. Students will explore the roles of patients and caregivers, social and cultural issues, communication in health organizations, and the role of mass media. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

M.A. in Communication Studies - Intercultural Communication Track

The Intercultural Communication Track is designed to provide students with an understanding of the way communication functions in intercultural settings, how culture affects the communication process, and the reciprocal effects of intercultural perceptions on policy in the history of Eastern-Western relations. Career opportunities in this field include corporate diversity trainer, communication director, human resource manager, international service representative, negotiator, and foreign correspondent with government and business organizations. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

M.A. in Communication Studies - Organizational Communication Track

Organizational Communication is designed to provide students with a comprehensive and advanced understanding of communication in the organizational environment. Courses are designed to extend oral, written, and critical thinking skills through application of concepts using practical challenges in organizations. Students have the opportunity to explore essential areas of organizational communication, presentational skills, leadership styles, interpersonal and small group interaction, decision making, persuasion, conflict management, and diversity training. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credits). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credits).

1 A maximum of 9 credit hours non-thesis track may come from outside the Department of Communication Studies (COS or COM courses). Elective credits must be chosen with prior approval from a Communication Studies advisor.

**Doctor of Philosophy in Communication**

The doctoral program is designed to provide students with the requisite foundation in theory as well as research skills for using communication to make positive change at the societal, community, and individual levels. The program allows learning across content and creative areas, methodological orientations, and platforms of expression for engaged scholarship and immersive experience, globally and locally. You will engage with communication theory, research, and practice using advocacy and storytelling, with particular attention to new and social media for social and behavioral change. This will be your niche: conducting research, engaging in immersive experience, and translating these into evaluation-based practice for the well being of community, society and the world.

The program includes field research experience and the teaching, writing, and media skills necessary for a career in higher education, research institutions, non-profits, government organizations, media, business, and industry. You may choose from health, environmental, international, intercultural and organizational communication as well as from journalism studies and media development to create an appropriate combination for your career goals.

For the doctoral program, students must complete 57 credit hours of course work beyond the master’s degree; 24 credit hours must be in courses at the 600-level. No transfer credit hours may count toward these 24 credit hours, and 12 of the 57 credit hours must be dissertation credit hours. Doctoral students cannot take intersession courses. The case for exceptions should be made by department chair/ adviser and student to the Graduate Admissions and Curriculum Committee.

**Required Core Courses**

| COM 601 | Theories of Communication | 3 |
| COM 602 | Methods of Communication Research | 3 |
| COM 603 | Qualitative Research Methodologies | 3 |
| COM 604 | Advanced Communication Research Methods and Statistics | 3 |
| COM 609 | Special Topics in Communication | 3 |
| COM 695 | Directed Readings 1 | 1-3 |
| COM 698 | Independent Research 1 | 3 |

**School of Communication Electives**

| COS 830 | Doctoral Dissertation | 1-12 |

Total Credit Hours 58-60

1 Students must take a total of 9 credit hours in COM 609 and/or COM 695/COM 698 or any combination of the three. Students are allowed to take up to 6 credit hours of Directed Readings/Independent Research in total.

**Qualifying Examinations**

All School of Communication Ph.D. students will take written and oral qualifying examinations following the conclusion of all course work prior to being admitted to candidacy for the Ph.D. degree. A student who fails the exam is given one opportunity to retake it with the permission of the exam committee and must pass it within one calendar year of failing the first exam. Any student who fails to be admitted to candidacy for the degree within this one-year period will be dismissed from the program. To be admitted to candidacy, students must have successfully completed qualifying exams and received approval from the department chair, have a minimum GPA of 3.0, and have submitted all original transcripts and standardized test results. A qualifying exams committee consists of a minimum of four members including the chair.

**Dissertation**

The dissertation committee may be the same as the student’s qualifying exams committee. The guidelines for the composition of the dissertation committee are the same as those for the qualifying exams committee. Students must complete 12 dissertation credit hours. These credit hours begin after students have successfully completed their qualifying exams. Students are required to defend a dissertation proposal to the dissertation committee. Students may proceed with the dissertation once the proposal has been approved by the committee and accepted by the director of graduate studies. The dissertation must be an investigation of a substantial scholarly topic and must be defended orally in the presence of the dissertation committee. Students should note that they cannot conduct human subjects research without approval from the University of Miami’s Institutional Review Board.
J.D./M.A. in School of Communication

This program allows students to earn a J.D. and an M.A. in Communication in 3 to 3½ years. The three School of Communication programs participating in the joint J.D./M.A. program are Communication Studies, Journalism, and Public Relations. This joint degree program will allow 9 J.D. credit hours to be applied to the M.A. degree and 6 M.A. credit hours to be applied to the J.D. degree, saving the student 15 credit hours between the two programs.

In the J.D. program, students will complete 82 credit hours in the School of Law. Additionally, 6 credit hours from the School of Communication program will be applied to their Law School transcript, for a total of 88 required J.D. credit hours. In the M.A. program, students will complete 27 credit hours in the School of Communication. Additionally, 9 law school credit hours will be applied toward their master’s degree, for a total of 36 required M.A. credit hours. As defined above, 15 credit hours will be counted toward both degrees: 6 credit hours from the School of Law and 9 credit hours from the School of Communication. During the first year of the joint program, students will be required to attend the J.D. program full-time. Students will be able to take courses in the School of Communication beginning in the fall of their 2L year. Students must complete all J.D. requirements and all M.A. requirements as defined by their programs. Participants in the joint J.D./M.A. program are not required to complete the M.A. capstone project. The thesis-track is open to students in the J.D./M.A. joint program without specific approval of the School of Communication. Students may take summer law courses, which may reduce the length of the joint degree program by up to one semester. Students may not take more than 16 credit hours each semester, excluding summer sessions. 17 credit hours per semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

Law School Requirements

9 Law School credit hours should come from the following courses:

- Administrative Law
- Communications law
- Constitutional Law II
- Copyright Law
- First amendment Law
- Intellectual Property Law
- Internet Law
- Mass Media Law

The Law School will accept 6 credit hours from the following School of Communication courses: (the courses selected will depend on the specific program, e.g., Communication Studies, Journalism, or Public Relations, though following consultation with, and approval by, a faculty advisor, substitutions may be allowed)

J.D./M.A. in Communication Studies

Communication Studies (M.A.)

The program has four tracks, each with 9 credits of required courses and 27 credits of elective courses but students in the joint program take 18 credits of electives and transfer 9 credit from the School of Law to make 27 credits. Communication Studies students must receive a "B" or higher in core courses (COM 601, COM 602, and COM 603), as well as maintain an overall minimum GPA of 3.0 for all courses. Core courses must be completed during the first year of study, or by completion of 18 credits.

Communication Studies Track - Non-Thesis

This program focuses on developing a theoretical foundation with emphasis on applied communication.

Journalism and Media Management

Journalism (M.A.)

Journalism is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today’s media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting and, travel and features). The program begins in the fall semester and lasts for 18 months. No prior training or experience in journalism is required.

Masters Program in Journalism and Media Management

- M.A. in Journalism (p. 612)

M.A. in Journalism

The Journalism M.A. program is designed to prepare students for professional participation in a number of digital and multimedia news environments, including television, online, mobile, magazine, and newspaper. Coursework stresses journalistic values, critical thinking, and storytelling, combined with the digital and technical skills to create content in the context of today’s dynamic and evolving media landscape.
In consultation with faculty advisors, students are strongly encouraged to develop areas of special interest, and are required to complete an individually produced, in-depth Qualifying Project.

Journalism M.A. students must complete a minimum of 36 credit hours at the graduate level with the approval of the Chair of the Department of Journalism and Media Management or Director of the Graduate Program in Journalism. Of the 36 credit hours, all must be at or above the 600 level. Students with strong prior experience in a particular area may request a written waiver of a required course from the department chair, upon the demonstration of sufficient expertise in that subject. The program begins in the fall semester with a mandatory bootcamp one week before classes begin and the program typically lasts 18 months, unless the student is attending on a part-time basis. Prior training or experience in journalism is preferred, but not required or necessary.

### Strategic Communication

#### Public Relations (M.A.)

The program offers two tracks. The 30-credit thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36-credit, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

### Masters Programs in Strategic Communication

- M.A. in Public Relations (p. 613)

### M.A. in Public Relations

#### Thesis Track

This program includes a thesis. Students must complete a minimum of 30 credit hours at the graduate level with the approval of a faculty advisor. Of the 30 credit hours, 15 credit hours must be at or above the 600 level. No more than 6 credit hours will be allowed for advanced projects and directed research (699). 6 credit hours will be earned for thesis work. Public Relations students must receive a “B” or higher in core courses (COM 601, COM 602 OR COM 603, STC 620, STC 621).

### Electives

Electives are chosen with the approval of a faculty advisor. These courses may come from either within or outside the School of Communication. It is highly recommended that students consider pursuing a professional internship for one of these electives.

Select five of the following:

- JMM 609 Internship In Journalism And Media Management
- JMM 610 Comparative Media Systems
- JMM 611 Newswriting and Reporting Seminar
- JMM 613 Computer-Assisted Reporting
- JMM 617 Television News Reporting
- JMM 619 Interactive Storytelling
- JMM 620 Reporting and the Internet
- JMM 623 Sports Reporting
- JMM 627 Television News Producing
- JMM 631 Database Journalism
- JMM 641 Advanced Audio Video Narratives
- JMM 644 Feature Writing
- JMM 650 3D Design and Graphics
- JMM 651 Advanced Programming
- JMM 695 Special Topics in Journalism
- JMM 699 Advanced Projects and Directed Research
- JMM 725 Journalism Internship
- CIM 645 Managing Interactive Media Projects

### Final Qualifying Project

Students, in consultation with a faculty committee of their choosing, will complete a final reporting project that reflects in-depth knowledge and analysis of a subject and professional competence in reporting and presenting it for the appropriate medium.

Total Credit Hours: 36

No written comprehensive examinations are required for this degree.
Education and Human Development

http://www.education.miami.edu

Departments

• Educational and Psychological Studies (EPS)
• Kinesiology and Sport Sciences (KIN)
• Teaching and Learning (TAL)

Degree Programs

Doctor of Philosophy in Education (Ph.D.)
The Doctor of Philosophy degree with a major in education is designed to develop personnel competent to conduct research in a particular field of education or behavioral sciences. Concentrations are offered in:

• Exercise physiology (KIN)
• Community well-being (EPS)
• Counseling psychology (EPS)
• Language and literacy learning in multilingual settings (TAL)
• Science, technology, engineering and mathematics (TAL)
• Special education (TAL)
• Research, measurement, and evaluation (EPS)

Doctor of Education (Ed.D.)
The Doctor of Education degree is designed to develop personnel in education competent to utilize the results of research in practical situations. The Ed.D. program offers a concentration in higher education leadership (EPS).

Specialist in Education (Ed.S.)
The Specialist in Education degree is an advanced terminal, practice-oriented degree that is designed to prepare recipients to assume positions of leadership within educational and affiliated settings. Concentrations are offered in:

• Advanced professional studies (TAL)
• Early childhood/special education (TAL)
• STEM education (TAL)

Master of Science in Education (M.S.Ed.)
The Master of Science in Education degree is a practice-oriented degree that is designed to prepare its recipients to assume professional positions that require advanced course work and post-graduate degrees. Concentrations are offered in:

• Advanced professional studies (TAL)
• Community and social changes (EPS)
• Counseling: Marriage and family therapy (EPS)
• Counseling: Mental health (EPS)
• Early childhood, special education (TAL)
• Education and social change (TAL)
• Exercise physiology: Clinical and applied exercise physiology (KIN)
• Exercise physiology: Nutrition for health and human performance (KIN)
• Exercise physiology: Strength and conditioning/Fitness entrepreneurship (KIN)
• Higher education: Enrollment management (EPS)

• Higher education: Institutional research and policy analysis (EPS)
• Higher education: Student life and development (EPS)
• Reading (TAL)
• Research, measurement and evaluation (EPS)
• Sport administration (KIN)
• Sports medicine (KIN)
• STEM education (TAL)

NOTE: The School of Education and Human Development’s graduate programs are governed by the rules, regulations and policies of the larger University and Graduate School. In places where what appears in the following is judged to be in conflict with these other policies, the University and/or Graduate School’s policies will take precedence.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration. Applicants must:

• achieve acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) and the GRE;
• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Doctor of Philosophy (Ph.D.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ph.D program will include the following:

• letters of recommendation should address the applicant’s academic potential;
• available student space in program;
• For TAL: availability of faculty advisor willing to mentor the student.
• For EPS: Counseling: receipt of completed applications by predetermined cut-off date. Please reference the SEHD web site, as doctoral applications are reviewed once each year.
Doctor of Education (Ed.D.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ed.D. program will include the following:

- letters of recommendation should address the applicant’s academic potential;
- available student space in program; and
- admissions interview.

Specialist in Education (Ed.S.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ed.D. program will include the following:

- completion of a master’s degree with an outstanding record from an accredited institution;
- adequacy of previous study in the field for which the Ed.S. is being requested;
- an appropriate period of successful teaching experience (TAL only);
- acceptable scores on the Graduate Record Examination (GRE); or in the case of TAL only, approval of a GRE waiver. Applicants who seek a GRE waiver must have taught for a minimum of three years in a full-time capacity, fill out and submit a GRE waiver form, and submit a 3-page essay on an important educational topic.

Master of Science in Education (M.S.Ed.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For some M.S.Ed. programs in TAL: Teachers with at least three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.
- For Community and Social Change (EPS): Professionals who have worked full-time for at least three years in a not-for-profit setting may apply for a waiver of the GRE requirement. Please contact the program directly for conditions governing this waiver.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the UM Office of International Admissions. For an appropriate link to these requirements, please visit the Graduate School (p. 517) web site.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study or Course Sequence Plan that must be on file in the Senior Associate Dean’s Office by the end of the first semester of study.

Honor Code

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

Continuous Enrollment

The School of Education and Human Development adheres to the Graduate School’s continuous enrollment requirement.

Financial Assistance

In addition to University-wide fellowships and the availability of student loans, the School of Education and Human Development provides many forms of financial assistance for students enrolled in its graduate programs. These include tuition-based scholarships (including federally funded scholarships), teacher-tuition scholarships, training fellowships, graduate student assistantships, and other forms of help. Notwithstanding a student’s time to completion, the SEHD limits a student’s eligibility for scholarships and other financial assistance that is under its control to five years from the time of initial enrollment.

Scholarship-based financial assistance is to be used only for courses that define each student’s program of study. Students who enroll in courses outside of their programs of study will be charged full tuition for those courses.

Teacher Tuition Scholarships do not apply to doctoral (Ph.D. and Ed.D.) programs.

Tuition scholarship assistance may not be applied to the retaking of courses for any reason whatsoever.

Financial assistance whose sources of funding are outside of the School of Education and Human Development, for example Federal loans provided by the University of Miami, shall be governed by all applicable rules, regulations and policies. Specifically, many federal loans and grants have conditions limiting the programs and/or courses to which they may be applied. Some federal loans are restricted to graduate courses only; some fellowships, grants or traineeships may entail post-graduation employment commitments. Alternatively, private scholarships or fellowships may have their own conditions. Before accepting any form of financial assistance, please be sure to ask about and to fully understand the conditions that govern whatever type of financial assistance you are offered.

Degree Requirements

In addition to the formal academic requirements (as outlined below), the School of Education and Human Development requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education and Human Development reserves the right to dismiss any students who are academically or personally unwilling or unable to carry out the professional responsibilities of the respective profession for which they are being trained. Conduct which may be considered unprofessional may include, but is not limited to, research or professional misconduct; dishonesty, cheating, plagiarism; exercise of professionally poor judgment; sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation; and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.
Doctor of Philosophy (Ph.D.)

Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Graduate Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The residence requirement is two full-time consecutive semesters of course work at the University of Miami.

The minimum total credit hours required beyond the Bachelor’s are 60, plus a minimum of 12 dissertation-research credit hours.

15 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

A student must pass a Qualifying exam before being admitted to candidacy for a doctorate. The content and conditions for administering the Qualifying examination are defined by the program area in which a student is enrolled.

A student’s score on the Qualifying examination is the professional judgment of the committee that was appointed to score that examination. As such, no academic appeals of scores on qualifying examination are possible.

If a student fails an initial attempt at passing a program’s Qualifying examination, the student’s advisory committee may allow a student a second opportunity to pass a new qualifying examination that is administered within a year of the original, at its sole discretion.

If a student fails a program’s qualifying examination may not proceed any farther in the program and is, instead, dismissed at the end of then-current term. Beyond the then-current term in which a student’s qualifying examination is scored, no additional financial assistance will be provided to a student who is scheduled to be dismissed from the program for failure in the qualifying examination.

Students are required to complete all Ph.D. requirements within 8 years of initial enrollment.

Doctor of Education (Ed.D.)

Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Academic Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The minimum total credit hours required beyond the bachelors are 60, including a minimum of 12 dissertation credit hours.

A supporting area consisting of at least 12 credit hours is required; the student must be qualified for admission to graduate status in this area, and receive approval for enrollment from the appropriate department and from the School of Education and Human Development.

A minimum of 12 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

Students are required to complete all Ed.D. requirements within 8 years of initial enrollment.

Specialist in Education (Ed.S.)

The Specialist in Education is a terminal degree that is independent of both doctoral degrees (Ph.D. and Ed.D.) that are offered by the SEHD. Although there is normally some overlap in coursework, admission to a specialist program does not imply that the student has been or will be admitted to a doctoral program.

A supervisory committee consisting of three faculty members in the student’s area of study will be appointed by the School of Education and Human Development.

Upon admission to the specialist program, a formal program of study is approved by the Supervisory Committee.

A minimum of 60 graduate credit hours, (or 30 credit hours after completion of the Master’s program) is required. The program must include at least 30 graduate credit hours earned at the University of Miami and at least 18 graduate credit hours earned following admission to the specialist program. The specialist program of study is developed in consultation with the Supervisory Committee that consists of 3 faculty members (a chairperson and 2 other members).

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen, a maximum of 6 credit hours may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student’s program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the Chairperson of the Specialist Supervisory Committee.
All specialist students must engage in teaching and/or research appropriate to their degree program.

All work for the degree of Specialist in Education must be completed within six years of initial enrollment.

**Master of Science in Education (M.S.Ed.)**
A minimum of 30 graduate credit hours is required.

TAL: Students enrolled in any certification program that has been approved by Florida Department of Education (e.g., the Professional Training Option) must fulfill any and all additional requirements (e.g., passing state teacher tests) that are specified by the program approval.

EPS: Students enrolled in any counseling program must complete the required “Personal Growth Experience” form.

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen (in the KIN Dept. or EPS Dept.), a maximum of 6 credit hours may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student’s program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the student’s advisor.

All work towards the Master’s degree must be completed within six years of initial enrollment.

Ed.D. in Higher Education Leadership

The Higher Education Leadership program, which offers a Doctor of Education degree (Ed.D.), is committed to preparing high-quality graduates for senior leadership positions in colleges and universities, state and federal agencies, and other educational organizations. The Ed.D. program is guided by a practitioner-scholar model that combines theoretical offerings with application to practical higher education problems. Students focus on areas of special interest and choose dissertation projects that address issues confronting the contemporary higher education workplace.

The Executive Track is an innovative option in the Ed.D. program explicitly designed to meet the needs of working professionals. Courses are offered on weekends, and a cohort design allows students to develop meaningful relationships, support one another, and learn from the diverse
experiences of fellow educators. Ed.D. students may also choose to take courses in a traditional weekly format.

An emphasis across the traditional and Executive Ed.D. curriculum is on how theory and empirical evidence inform the administrative, organizational, and policy contexts within postsecondary education. Unique to the University of Miami’s Higher Education Leadership program curriculum is its component in Enrollment Management, a comprehensive strategy that promotes the seamless integration of administrative responsibilities to efficiently and effectively meet institutional needs and promote student success.

M.S.Ed. in Higher Education Administration - Enrollment Management Concentration

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management, Student Life and Development, or Institutional Research and Policy Analysis, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today’s challenges from a broad-based, highly informed perspective.

Also offered is a Certificate Program for working professionals who already have Master’s degrees and seek career-furthering credentials and skills.

Enrollment Management Concentration

The Enrollment Management concentration (33 credit hours), the product of a unique collaboration between the School of Education and Human Development and the Division of Enrollments, integrates theory, research, teamwork, and effective communication. It is an interdisciplinary program, with courses also required in the School of Business Administration. Opportunities abound for integrating research and theory in daily practice.

### M.S.Ed. in Higher Education Administration - Institutional Research and Policy Analysis

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management, Student Life and Development, or Institutional Research and Policy Analysis, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today’s challenges from a broad-based, highly informed perspective.

Also offered is a Certificate Program for working professionals who already have Master’s degrees and seek career-furthering credentials and skills.

The Institutional Research and Policy Analysis concentration (33 credits) focuses on skills necessary to conduct applied research related to the effective functioning of postsecondary institutions. Areas of study extend beyond integrating research into effective administrative or policy initiatives to include understanding state and federal policies, higher education foundations, statistics, and data analytics.

| Each student must successfully pass a comprehensive exam that covers the content of the core 24 credits. This exam assesses the student’s competency in these core areas of research methodology and use of statistical software, and is based on content that is aligned with the material covered in the core 24 credits. | |

| Total Credit Hours | 30 |

1. Students work with faculty member(s) to select from a large number of graduate courses relevant to the students’ interests and professional goals. Appropriate courses may be related to advanced statistical modeling or other content areas.

2. Upon the approval of your academic advisor, you can take the classes from other departments.

**M.S.Ed. in Research, Measurement and Evaluation**

The curriculum of the M.S. Ed. in RME is structured around three components: (A) a core set of 24 credits (8 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of elective coursework; and (C) a comprehensive exam occurring upon the completion of the 24 credits of required coursework. The specific details of the curriculum are given below.

| Core Courses | 24 |
| EPS 700 Quantitative Methods I | |
| EPS 701 Introduction to Research Methods | |
| EPS 703 Applied Multivariate Statistics | |
| EPS 704 EPS 704 | |

| EPS 715 Qualitative Methods II: Case Studies and Grounded Theory | |
| EPS 716 Qualitative Methods II: Interviews and Content Analysis | |

| Total Credit Hours | 30 |

**Ph.D. in Community Well-Being**

The program in Community Well-Being trains community-engaged action-researchers committed to promoting social justice through rigorous theoretical analysis and community-based research. The program
Ph.D. in Counseling Psychology

The Counseling Psychology Program has been fully accredited by The American Psychological Association since 1989 and has a proud tradition of preparing students as scholars, clinicians and community leaders. Firmly committed to the foundational values of the discipline of counseling psychology, including its emphasis on prevention, optimal human development and the promotion of individual, family and community well-being, the program strives to prepare students who will make a difference in the world through research, scholarship and reflective practice. The mission of the program is to nurture the development of counseling psychology graduate students and faculty as reflective researchers and scientist-practitioners committed to promoting psychological well-being in a multicultural complex world.

Ph.D. in Research, Measurement, and Evaluation

The curriculum of the Ph.D. in RME is structured around six components: (A) a core set of 36 credits (12 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of a research apprenticeship, in which students conduct mentored research under the supervision of RME faculty members; (C) 6 credits of field experience in educational research, in which students play active roles in the design and analysis of an applied research or evaluation projects; (D) the doctoral qualifying exam; (E) 12 credits of the doctoral dissertation and (F) 6 credits of electives (12 credits of electives for students who do not hold a master degree).
Specific details of the curriculum are below.

For a minimum of 6 research apprenticeship credits, students work under the mentorship of RME faculty members (or approved faculty members outside of RME) on original studies pertinent to research, measurement, and evaluation. It is expected that the work completed during the apprenticeship culminates in a manuscript that is suitable for publication in an academic journal. The 6 credits of apprenticeship are documented as two 3-credit blocks of EPS799 (Advanced Individual Study). Form for registering for EPS799 can be found at [http://www.education.miami.edu/studentintranet/pdfs/grad-gen/appis.pdf](http://www.education.miami.edu/studentintranet/pdfs/grad-gen/appis.pdf); and the research apprenticeship must be completed prior to the commencement of dissertation hours (EPS830).

<table>

Students must complete a minimum of 6 credits in field experience related to educational research. The field experience involves providing methodological assistance to a research or evaluation project at the University of Miami or other approved organization (e.g., the evaluation division of Miami-Date County Public Schools). The nature of the field experience must be approved by the student’s advisor prior to commencing the credit hours. The field experience credits are currently documented as EPS712.

Kinesiology and Sport Sciences

Dept. Code: KIN

Programs

Doctor of Philosophy (Ph.D.)

- Exercise Physiology (p. 628)

Master of Science in Education (M.S.Ed.)

- Exercise Physiology (NOTE: accelerated tracks are offered in each of the following, pursuant to a BS degree in Exercise Physiology or Athletic Training from the University of Miami.)
  - Clinical and Applied Exercise Physiology (p. 626)
  - Nutrition for Health and Human Performance (p. 627)
  - Strength and Conditioning/Fitness Entrepreneurship (p. 626)
  - Sport Administration (p. 627)
  - Sports Medicine with a Concentration in Athletic Training (Note: an accelerated track is offered pursuant to a BS degree in Athletic Training from the University of Miami) (p. 628)

Certificate in Kinesiology and Sport Sciences (Non-Degree, Graduate Program)

- Women’s Health (p. 626)

Masters Programs in Kinesiology and Sport Sciences

- M.S.Ed. in Exercise Physiology (p. 626)
- M.S.Ed. in Exercise Physiology - Strength and Conditioning/Fitness Entrepreneurship Track (p. 626)
- M.S.Ed. in Nutrition for Health and Human Performance (p. 627)
- M.S.Ed. in Sports Medicine - Athletic Training Concentration (p. 628)
- M.S.Ed. in Sport Administration (p. 627)
Doctoral Programs in Kinesiology and Sport Sciences

• Ph.D. in Exercise Physiology (p. 628)

Certificate in Kinesiology and Sport Sciences

• Women's Health (p. 626)

Certificate in Women's Health

A certificate in women's health (12 credit hours) is available for those wishing to specialize in research issues, trends, and physiological concerns of women across the female lifespan. Students must earn a grade of "C" or higher in this specialty. Students will receive a certificate of completion upon completing all coursework in this specialty area. These courses may be considered as part of a student's outside supporting field in the doctoral program.

KIN 781 Issues Specific to Women's Health 3
KIN 782 Psychosocial Issues in Women's Health 3
KIN 783 Sports Medicine for the Female Athlete 3
KIN 784 Advance Neurological Mechanisms of Metabolism and Weight Regulation 3

M.S.Ed. in Exercise Physiology

Graduate students in this program receive a sound scientific education with opportunities for applied physiological research and hands-on clinical experiences.

Clinical and Applied Exercise Physiology

Required Core in the Major
KIN 621 Advanced Systemic Exercise Physiology 3
KIN 630 Cellular Exercise Physiology 3
KIN 631 Laboratory Experiences in Systemic Exercise Physiology, Laboratory Techniques in Functional Evaluation of Skeletal Muscle 3
KIN 679 Principles of Exercise Assessment: Cardiovascular 3
KIN 686 Exercise Prescription/Assessment Laboratory 3
KIN 740 Neurophysiology in Exercise Science 3

Restricted Electives
Select 6 credit hours of graduate KIN courses. 1

KIN 746 Research Methods in Kinesiology and Sport Sciences 3
EPS 700 Quantitative Methods I 3
or EPS 702 General Linear Modeling 3
EPS 799 Advanced Individual Study 3
or KINXXX: Elective and Comprehensive Exam 2

Total Credit Hours 36

1 For further information, please contact the Graduate Program Director.

NOTE: Those students taking the comprehensive exam must enroll in another KIN elective course to complete their master's degree requirements in exercise physiology.

Accelerated Track

30 credit hours are to be taken from among the following courses:

Required Core in the Major
KIN 630 Cellular Exercise Physiology 3
KIN 631 Laboratory Experiences in Systemic Exercise Physiology, Laboratory Techniques in Functional Evaluation of Skeletal Muscle 3
KIN 679 Principles of Exercise Assessment: Cardiovascular 3
KIN 686 Exercise Prescription/Assessment Laboratory 3
KIN 740 Neurophysiology in Exercise Science 3

Restricted Electives
Select 6 credit hours of graduate KIN courses. 1

KIN 746 Research Methods in Kinesiology and Sport Sciences 3

or EPS 702 General Linear Modeling 3
EPS 799 Advanced Individual Study 3
or KINXXX: Elective and Comprehensive Exam 2

Total Credit Hours 30

1 For further information, please contact the Graduate Program Director.

NOTE: Those students taking the comprehensive exam must enroll in another KIN elective course to complete their master's degree requirements in exercise physiology.

M.S.Ed. in Exercise Physiology - Strength and Conditioning/Fitness Entrepreneurship Track

This program is for persons interested in advanced skill in exercise programming and instruction, the fitness entrepreneur, and those looking for administrative positions in the fitness industry.

Regular Track

Select 36 credit hours from the following courses:

KIN 621 Advanced Systemic Exercise Physiology 3
KIN 630 Cellular Exercise Physiology 3
KIN 636 Strength and Conditioning I 3
KIN 637 Strength and Conditioning II 3
KIN 645 Therapeutic Lifestyle to Combat Chronic Disease 3
KIN 646 Elite Conditioning I 3
KIN 647 Elite Conditioning II 3
KIN 661 Facility Management 3

² For guidance, please contact the Graduate Program Director.

Note: 2/3 of all coursework must be at or above the 700 level. Students entering with a Master's degree in Exercise Physiology or a related degree must take a minimum of 30 credit hours of graduate coursework at the University of Miami in addition to 12 credit hours of dissertation.

Teaching and Learning
Dept. Code: TAL

Programs

Doctor of Philosophy (Ph.D.)
Teaching and Learning with specializations in:
- Language and Literacy Learning in Multilingual Settings (LLLMS) (p. 631)
- Science, Technology, Engineering and Mathematics (STEM) Education (p. 631)
- Special Education (p. 632)

This individually-tailored program is designed to help students achieve their professional research-based career goals. A central component of the doctoral program in Teaching and Learning includes work on research projects that support collaboration with faculty and the application of course work as students develop their own research ideas. TAL’s Ph.D. program emphasizes an understanding of theory in scholarly inquiry; the intellectual framing and conduct of empirical research; the placement of research within cultural contexts and policy settings; designing, implementing and testing of transformative learning-environments that promote deep learning; and critical analysis of policy, research and practice.

Specialist in Education (Ed.S.)
- Advanced Professional Studies (p. 629)
- Early Childhood Special Education (p. 629)
- STEM Education (p. 629)

Master of Science in Education (M.S.Ed.)
- Advanced Professional Studies (p. 629)
- Education and Social Change (p. 630)
- Early Childhood Special Education (p. 630)
- Reading (p. 631)
- STEM Education (p. 631)

Masters Programs in Teaching and Learning
- M.S.Ed. in Advanced Professional Studies (p. 629)
- M.S.Ed. in Education and Social Change (p. 630)
- M.S.Ed. in Early Childhood Special Education (p. 630)
- M.S.Ed. in Reading (p. 631)
- M.S.Ed. in STEM Education (p. 631)

Specialist Programs in Teaching and Learning
- Ed.S. Specialist in Education (p. 629)

Doctoral Programs in Teaching and Learning
- Ph.D. in Teaching and Learning - Language and Literacy Learning in Multilingual Settings (LLLMS) (p. 631)
- Ph.D. in Teaching and Learning - Science, Technology, Engineering and Mathematics (STEM) Education (p. 631)
- Ph.D. in Teaching and Learning - Special Education (p. 632)

Ed.S. Specialist in Education
- Advanced Professional Studies
- Early Childhood Special Education
- STEM Education

The Ed.S. degree is a terminal degree, for educators who already have a relevant Master’s degree and who wish to increase their proficiency in their chosen field.

The program requires 30 additional credit hours beyond the Masters Degree (minimum) and is individually designed after admission. Some programs for cohorts of teachers feature lock-step curricula. These programs typically combine students pursuing M.S.Ed. degrees with those pursuing Ed.S. degrees. While all students in these programs follow the same curriculum, students pursuing Ed.S. degrees receive additional or different assignments.

Please contact the Department of Teaching and Learning for a program sheet and course listings for the above programs.

M.S.Ed. in Advanced Professional Studies
Periodically, the Department of Teaching and Learning offers various Advanced Professional Studies programs to specific groups of teachers (cohorts). The purpose of these programs is to prepare teachers to assume leadership roles in various disciplines and to enhance the teachers’ current knowledge of “best practices” in education. Each

M.S.Ed. in Education and Social Change

The Education and Social Change program's conceptual framework focuses on the world of education beyond classroom walls, the classroom context of teaching, and the students in classrooms, comprising a holistic, developmental approach across the three areas. Overall, the goals of the program track are to improve instruction for diverse populations, to prepare teachers for leadership roles within their schools, and to develop capacity to lead future change efforts in support of public education.

There are two tracks with three possible program plans: 1) Teaching Track and 2) Social Change Track. The Teaching Track includes a choice of two program plans (1. Core Classes plus one course for the Teaching Track for those with a Florida Temporary or Full Teaching Certificate, or 2. Professional Teaching Option for those wishing to pursue a Florida Temporary Teaching Certificate upon successful completion of the Teaching Track, along with: 1)

Professional Teaching Option

Core Courses: 30 - 36 credit hours required

A minimum of 18 credit hours (6 courses) to a maximum of 24 credit hours (8 courses) from among the following:

Engineering
http://www.miami.edu/engineering

Degree Programs
The College of Engineering offers courses of graduate study leading to:

• Master of Science (Environmental Health and Safety),
• Master of Science (Occupational Ergonomics and Safety),
• Master of Science (Management of Technology),
• Master of Science in Architectural Engineering,
• Master of Science in Biomedical Engineering,
• Master of Science in Biomedical Engineering (Medical Physics),
• Master of Science in Civil Engineering,
• Master of Science in Electrical and Computer Engineering,
• Master of Science in Industrial Engineering,
• Master of Science in Industrial Engineering/Master of Business Administration, and
• Master of Science in Mechanical Engineering.

Ph.D. degrees are offered in the areas of:

1. Biomedical Engineering,
2. Biomedical Engineering (Medical Physics),
3. Civil Engineering,
4. Electrical and Computer Engineering,
5. Ergonomics and Human Factors
6. Industrial Engineering, and
7. Mechanical Engineering.

Admission Requirements
Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or Ph.D. track. Admission guidelines for the various tracks are as follows. Please refer to program specific sections of the bulletin for more information with respect to admission and degree requirements.

B.S. to M.S.
In engineering, the master’s – not the bachelor’s – degree is the first professional degree, so all engineers should seek to obtain an M.S. degree. In order to facilitate the obtainment of an M.S. degree, the University of Miami (UM) College of Engineering (CoE) offers the M.S. degree through a number of possible venues or entry points, as summarized below. Every one of our M.S. degree programs requires 10 courses or 30 credit hours to complete; this can be typically undertaken in one, 9-month academic year (i.e., by enrolling in 15 credit hours per semester).

<table>
<thead>
<tr>
<th>UM Entry Point</th>
<th>Typical Duration</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Freshman Year</td>
<td>4 + 1 years</td>
<td>Students enter UM CoE as a freshman and apply by their junior year to obtain a joint B.S./M.S. degree after 5 years.</td>
</tr>
<tr>
<td>2. Transfer Year</td>
<td>2 + 2 + 1 years</td>
<td>Students enter UM CoE as a transfer from another accredited program after 2 years and apply by their junior year to obtain a joint B.S./M.S. degree after 3 years.</td>
</tr>
<tr>
<td>3. Summer Semester</td>
<td>4 + 1 year Before M.S.</td>
<td>International students complete their B.S. capstone project at UM CoE as exchange students, then receive their B.S. from their home institution and transition – without leaving U.S. – into the M.S. program, beginning in the Fall semester.</td>
</tr>
<tr>
<td>4. First M.S. Semester On-Campus</td>
<td>1 year</td>
<td>Students enter M.S. program either after receiving a B.S. or after being in the workforce following their B.S. degree.</td>
</tr>
<tr>
<td>5. First M.S. Semester Off-Campus</td>
<td>1.5 to 3 years</td>
<td>Working professionals enter a specially customized M.S. degree program at an off-campus location.</td>
</tr>
</tbody>
</table>

General Admission Requirements
1. A B.S. degree from an accredited program.
2. Typically a cumulative grade point average of 3.0 on a 4.0 scale.
3. Typically a GRE score of 300 or higher (verbal + quantitative).
4. Typically for international students a TOEFL PBT score of 550 or higher, or a TOEFL iBT score of 80 or higher, or an IELTS score of 6.5 or higher.
Some students may be required to take additional pre-requisite coursework, depending on the nature and content of their B.S. degree.
permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

Further details on the various College of Engineering areas of specialization are given under the Departmental and Program headings that follow this section.

Students applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant’s abilities and background.

Students who hold a bachelor’s degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

A student’s overall program is planned by the student and the student’s advisory committee. Requirements for the M.S. thesis and non-thesis options (not available in all areas of specialization) are shown below.

Accepted M.S. applicants can apply and be considered on a competitive basis for partial tuition scholarships. Need-based aid also can be awarded, as determined through the financial aid process. A minimum graduate GPA of 3.0 must be maintained in order to maintain satisfactory progress.

Accepted Ph.D. applicants financial assistance is available in the form of fellowships, partial tuition scholarships, teaching and research assistantships, and graduate cooperative assistantships combining study and work assignments with private engineering and architectural firms and government agencies. A minimum graduate GPA of 3.3 must be maintained in order to maintain satisfactory progress.

Financial support is provided predominantly to students pursuing Ph.D. degrees.

For further information, contact David T. Poole, Director of Admission, College of Engineering at dtpoole@miami.edu or 305-284-4773.

## Degree Requirements

### Requirements for the Master of Science Degree (Thesis Option)
- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 6 course credit hours must be at the 700-level.
- 6 credit hours of the required 30 must be earned in thesis work.
- An oral examination in defense of the thesis.

### Requirements for the Master of Science Degree (Non-Thesis Option)
- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 12 of the course credit hours must be at the 700 level.
- In most departments a 3 credit hour graduating project is required.

### Requirements for the Doctor of Philosophy Degree
- The programs leading to the degree of Doctor of Philosophy comply in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and dissertation.
Applicants for admission to the Ph.D. program will be expected to have superior records in their M.S. and B.S. degree programs, well above average scores on the Graduate Record Examination, and strong letters of recommendation.

- At least 18 credit hours in courses must be taken beyond the requirements for the M.S. degree of which 6 credit hours must be at the 700 level.
- All candidates for the doctorate are expected to complete an appropriate integrated program of studies in preparation for the comprehensive Qualifying Examination.
- Students are expected to take their qualifying exams during the first year of enrollment. Admission to candidacy across College of Engineering Departments includes passing the qualifying exam and successful defense of a proposal for research.
- Minimum of one year beyond admission to candidacy is usually necessary for the completion of an acceptable dissertation (12 credit hours or more), whereupon the student is then expected to defend their Ph.D. thesis during the Final Oral Examination.
- Departments may have requirements in addition to the above general requirements for their own graduate programs.

For further information, contact Office of Admission, College of Engineering (David Poole, dtpoole@miami.edu or 305-284-4773).

Postgraduate Certificate Program

- A Postgraduate Certificate Program is available requiring the completion of a minimum of 15 credit hours of individually planned advanced course work in an area of engineering specialization, or interdisciplinary study.
- Course sequences culminate at an advanced level, but may begin at a basic level if a new area of specialization is to be undertaken.
- The Program must be completed with a grade average of at least C, within a period of five calendar years from the date of enrollment.
- No transfer credit hours will be accepted. International students requiring a student visa must be in a degree program, and cannot obtain a student visa for the Certificate Program; but international students with certain other types of visas may enroll in the Program.
- Basic admission requirement for the Program is a bachelor’s degree in a recognized field of engineering or registration as a Professional Engineer by examination.
- Students demonstrating marked ability in the Program may be encouraged to apply for admission to study for the Master’s Degree, and may apply up to 6 credit hours toward the M.S. degree.

Customized Engineering Master’s Program

The College of Engineering at the University of Miami has a unique graduate admission option for students wishing to be accepted into graduate studies to pursue a Master of Science degree in Engineering, but who are unable to demonstrate acceptable levels of English proficiency at the time of their application for admission. The IEP+ 1.5 Year Program is focused on helping non-native English applicants to obtain a Master of Science degree in Engineering.

Prospective students must complete and submit an application for graduate admission into the College of Engineering, providing all supporting documents as outlined in our graduate admission application and meet the following criteria:

1. Applicants must be academically admissible into graduate studies with appropriate academic credentials. They must have a Bachelor of Science degree in Engineering, or its equivalent, or be a candidate for one at the time of application.
2. Applicants must score a 146 or higher on the quantitative portion of the GRE.
3. Applicants must score a 450 or higher on TOEFL PBT (paper based test), or a 133 on TOEFL CBT (computer based test), or 45 on TOEFL iBT (internet based test) or 4.5 on ILETS (International English Language Testing System).

Students who are accepted under these criteria will enroll in our Intensive English Program (IEP) for a designated time, typically a year. The actual length of time a student will spend in IEP will be determined through a placement exam given once the student has arrived on the University of Miami Coral Gables campus. Students will also be required to enroll in a minimum of one graduate engineering course each semester while enrolled in IEP. Selection of these courses will be done after academic advising has taken place with our Associate Dean for Academics, Dr. Shihab Asfour at sasfour@miami.edu.

Ph.D. Course Exchange with Florida International University

University of Miami Ph.D. students are eligible to enroll in courses at Florida International University for a maximum of 6 credit hours. Enrollment in FIU courses requires approval through the student’s program of study committee. See FIU/UM Ph.D. exchange section of the Graduate School section of the bulletin for more details.

Biomedical Engineering

Dept. Code: BME

Degree Programs

The Department of Biomedical Engineering offers three different programs of graduate study leading to the degrees of Master of Science (MS) and Doctor of Philosophy (PhD) in Biomedical Engineering:

- BS/MS in Biomedical Engineering
- MS in Biomedical Engineering
- PhD in Biomedical Engineering.
The Bachelor of Science / Master of Science (BS/MS) program is available only to qualified undergraduate students enrolled within the Department of Biomedical Engineering. This program gives qualified internal undergraduate students the opportunity to receive a BS and MS degree in five years.

The graduate program in biomedical engineering includes a medical physics program accredited by the Commission on Accreditation of Medical Physics Educational Programs (CAMPEP). This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

The graduate programs in Biomedical Engineering at the University of Miami provide a diverse interdisciplinary training experience through collaboration with clinical programs at the University of Miami School of Medicine.

**Areas of Research**

The areas of research in Biomedical Engineering include:

- Biomedical instrumentation and devices
- Applications of medical imaging systems
- Diagnostic and therapeutic systems
- Biomechanics, biofluid dynamics
- Biomimetic scaffolds and hybrid biomaterials
- Fluidic microsystems, microfluidics, and nanofluidics
- Cell and tissue engineering and regenerative medicine
- Biomedical signal and image processing
- Rehabilitation, brain-computer-interface, and neural engineering
- Biomedical optics and lasers
- Medical physics and engineering
- Nanotechnology and drug delivery
- Immunoengineering

Graduate students receive training and conduct research at the Department of Biomedical Engineering and at clinical departments and research centers at the School of Medicine, including the Bascom Palmer Eye Institute, the Miami Project to Cure Paralysis, the Diabetes Research Institute, the University of Miami Ear Institute, Biomedical Nanotechnology Institute, the Departments of Pathology, Radiology, Radiation Oncology, Otolaryngology, and Surgery, and the Miami Veterans Administration Research Service. Many of our graduate students work closely with physicians to develop and investigate new therapies, devices, and technologies that address real-world clinical problems.

**Masters Program Objectives**

The goal of the MS program in Biomedical Engineering at the University of Miami is to prepare students for successful careers in the biomedical industry, academia, or government (FDA, US Patent Office), or for further study in doctoral or health-related programs.

The educational objective of the program is to provide students with the technical and intellectual skills required to solve complex technical or scientific problems at the interface of engineering and medicine or biology.

**Admission requirements**

The qualifications and documentation required for admission to the MS program in Biomedical Engineering are the same as for the College of Engineering.

The Department of Biomedical Engineering admits four types of students to its MS program:

1. Graduates of BS programs in Biomedical Engineering or related engineering disciplines.
2. Graduates of BS or MS programs in other engineering disciplines.
3. Graduates of BS or MS programs in Physics, Mathematics, Computer Science, Chemistry, Biology or other fields of natural or health science.
4. Graduates of medical schools or other health-related professional schools.

Students in the last two groups are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

**Curriculum**

The curriculum combines advanced coursework which provides depth in a specific area of concentration and advanced problem-solving skills, with supervised research or design in one of the laboratories of the faculty from the Department of Biomedical Engineering or the School of Medicine, or in the local biomedical industry.

Except for the Medical Physics program there are no formalized graduate curricular tracks in the MS program. Master’s students select a course of study together with the graduate advisor and/or with their mentor and the thesis committee (for the thesis option) based on their own needs or interests. Students can choose from any of the graduate course offerings, as long as they satisfy the general course requirements and the course prerequisites.

**Required Core Courses**

All students enrolled in the MS program in Biomedical Engineering are required to complete at least two of the following core graduate courses: Unified Medical Sciences I/II/III (BME 601/BME 602/BME 603, 3 credits each). Students enrolled in the BS/MS program must take exactly two of these three courses, no more and no less. Other students can choose to complete all three courses.

The three courses of the Unified Medical Sciences sequence are designed to provide a basic understanding of human physiology and anatomy and cellular and molecular biology.

Students with an MD from a medical school accredited by the World Health Organization are exempted from taking these courses. Students holding advanced degrees in the life sciences, or equivalent experience in the field, may also be exempt. Each such exception requires the approval of the Department Chairperson and Faculty member responsible for the course of concern.

Students with a background in an engineering or scientific field with no prior exposure to biology/medicine are required to complete all three courses.
Masters Programs in Biomedical Engineering
- B.S./M.S. Five-Year Program in Biomedical Engineering (p. 637)
- M.S. in Biomedical Engineering (p. 638): Non-Thesis Option
- M.S. in Biomedical Engineering (p. 638): Thesis Option

The Department of Biomedical Engineering also offers a special MS program in Medical Physics (p. 638).

Doctoral Program in Biomedical Engineering
- Ph.D. in Biomedical Engineering (p. 642)

B.S./M.S. Five-Year Program in Biomedical Engineering
The Department of Biomedical Engineering offers a dual-degree program that culminates with students receiving both Bachelor of Science and Master of Science (BS/MS) in Biomedical Engineering concurrently. This program is available only to qualified students enrolled in the undergraduate program in Biomedical Engineering at the University of Miami. This program is intended to give qualified Biomedical Engineering students the opportunity to acquire both a baccalaureate degree (BSBE) and a Master of Science (MSBE) degree in five years rather than the 4 plus 2 years (approximately) that is traditionally expected. The two degrees are awarded simultaneously when the combined requirements have been met for both degrees.

Admission Requirements
The dual BS/MS program is available only to qualified undergraduate students enrolled in the Department of Biomedical Engineering, in any of the four Concentrations (Electrical, Mechanical, Biomaterials and Tissue, PreMed). Typically, students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application.

Undergraduate students must take the Graduate Record Examination (GRE) before the end of their classification as a senior and attain a combined score of more than 300 on the verbal and quantitative portions. Students must meet all other pertinent graduate school and College of Engineering requirements.

Qualified students must apply prior to the beginning of final exams in the second semester of their junior year. Students are strongly advised to apply to the BS/MS program as early as possible in their junior year to facilitate academic advising and course selection in the second semester of their junior year. Before submitting an application, interested students should discuss the program and the possibility of entering the program with an academic advisor.

The College of Engineering Office of Admission will carefully review academic credentials for admission into the program and will notify students of their acceptance into the program. All admitted students will have a special advising appointment with Dr. Narasimhan, Assistant Dean for Undergraduate Studies, to discuss academic issues specific to the BS/MS program.

Graduation Requirements
Students accepted into the dual degree program must maintain at least a 3.0 Cumulative GPA, and meet all other pertinent Graduate School requirements, including a minimum of 3.0 GPA in the credits applied toward the MS degree.

Curriculum
In the dual-degree BS/MS program in the Department of Biomedical Engineering, the first four years of the curriculum are altered as follows:

- The 3 credits of Senior Design Project I/III (BME 402/BME 403) are eliminated.
- In Semester I of the senior year, one 3-credit Undergraduate Technical Elective is replaced with one 3-credit Graduate Technical Elective.
- In Semester II of the senior year, one 3-credit Undergraduate Technical Elective is replaced with BME 705 (MS Design Project I), or alternatively, one 3-credit Graduate Technical Elective.

Graduate Technical Electives taken in the senior year must be chosen from the BME graduate course offerings, with the approval of their academic advisor. The credits of Graduate Technical Electives completed in the fourth year are counted toward the 30 credits required for the MS degree.

Students admitted in the dual degree BS/MS program can take a maximum of six (6) graduate credits per semester in their senior year, for a maximum of twelve (12) graduate credits per year, without incurring additional costs if they are full-time undergraduate students during this period. Students should register for courses towards their graduate degree as “G” credits and not as “U” credits. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

To register for graduate credits during their senior year, students must be in senior status and must complete and submit the Graduate School’s "Application for Undergraduates to Take Graduate Coursework (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/five-year-program-biomedical-engineering-bs-ms/undergrad_take_grad_course.pdf)" form. This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status.

In the Senior year, students must be registered for a minimum of 12 undergraduate credits each semester to maintain full-time status as an undergraduate student. After completing the senior year, students must register as graduate students.

Typical BS/MS curricula:
- B.S./M.S.- Biomaterials and Tissue Concentration (p. 355)
- B.S./M.S.- Electrical Concentration (p. 357)
- B.S./M.S.- Mechanical Concentration
- B.S./M.S.- Premed Concentration (p. 360)

BS/MS Design Project (BME 705/706)
General Description
In lieu of the 3-credit senior design project (BME 402/BME 403) students enrolled in the dual-degree BS/MS program register for 6 credits of Master Design Project (BME 705/BME 706). The 6 credits of BME 705/BME 706 satisfy the undergraduate senior design project requirements and the non-thesis Master’s project requirement. The BME705/706 project must therefore include a significant capstone design component.
Project Mentor
The BME 705/BME 706 design project is monitored by one project mentor and one project coordinator. Students are encouraged to select a mentor and project topic as early as possible, preferably during the first semester of their senior year. The project mentor is generally a primary faculty member of the Department of Biomedical Engineering. The role of the project mentor is to help the student identify a suitable project, to monitor the progress of the student, to provide guidance and training in the relevant topics, and to review the final report and presentation.

Students may complete their project under the supervision of a faculty member from another Department at the University of Miami, or from the local biomedical industry, under the following conditions:

- The student must receive the approval of the Department Chairman and Graduate Program Director
- The student must identify a co-mentor who must be a primary faculty member of the Department of Biomedical Engineering. The co-mentor must be familiar with the topic of the proposed project. The role of the co-mentor will be to monitor the student progress and ensure that the Master's project report and presentation satisfy all of the relevant requirements.

Project Coordinator
The project coordinator is a member of the primary faculty of the Department of Biomedical Engineering who is responsible for teaching the BME705/706 course. The role of the project coordinator is to help students identify a project and mentor; ensure that the projects satisfy the program objectives; provide general guidance and biomedical design and graduate scholarship training; and ensure that the students are making suitable progress towards the project goals.

Project Report
Students will receive a grade for their project only after submission and acceptance of a detailed written report. The report must satisfy the requirements of the Senior Design Project report, and additionally satisfy the requirements of the non-thesis MS project report (See section titled, "Non-thesis MS project" (p. 638)). The report must be reviewed and approved by the project mentor(s) and the project coordinator. Once the report is approved by the mentor(s), one printed copy and one electronic version in PDF format must be submitted to the Project Coordinator by the specified deadline. The final report must be approved and signed by the Project Mentor(s), Project Coordinator and Graduate Program Director or Department Chairman (Template signature page (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/five-year-program-biomedical-engineering-bs-ms/Signature_Page_Template.pdf)).

Project Presentation
Students must give an oral presentation of their project. The oral presentation is generally scheduled during the scheduled final examination time of BME 705 or BME 706 in the semester of graduation.

Project Grade
The final grade for the project is given by the Project Coordinator. The final grade is a combination of a grade submitted by the Project Mentor(s) assessing the overall performance of the student on the project, and a grade given by the Project Coordinator assessing the quality of the oral presentation and report.

Certificate Program in Medical Physics
Associated with the Department of Biomedical Engineering’s graduate program in Medical Physics, the University of Miami offers a Certificate Program in Medical Physics. The Certificate Program is accredited by CAMPEP (Commission on Accreditation of Medical Physics Educational Programs) and is a non-degree granting program. The objective of this two-semester program is to allow qualified individuals who have obtained PhD degrees in Physics, Engineering or a related field with a physics-minor-equivalent background to transition into a career in medical physics.

Students enrolled in the Certificate Program in Medical Physics must complete at least 18 credit hours from the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tbody>
</table>

Total Credit Hours: 18-21

Credit hours completed by students enrolled in the certificate program are not eligible for degree application.

M.S. in Biomedical Engineering
Non-Thesis MS Program
The MS non-thesis option is intended for students with an undergraduate degree in biomedical engineering or related disciplines who seek advanced training or specialization in a specific area of biomedical engineering; for professional engineers with undergraduate degrees in other disciplines who want to enter the field of biomedical engineering; and for students who want to prepare for admission to advanced health-related or other professional programs.

Graduation Requirements
Graduation requirements for the MS Non-Thesis Option include:

<table>

Non-Thesis MS Project

General description
All students enrolled in the MS non-thesis program must complete a 3 credit Master's project (BME 706), under the supervision of a project mentor and departmental project coordinator. The project must demonstrate the candidate's ability to solve complex scientific or technical problems at the interface of engineering and medicine or biology.

The MS project can be a research or design project. The project must include a significant research or design component contributed by the M.S. student, including, but not limited to, the design of an experiment or process; the development of a device, instrument, or system; the development of a computer program; the analysis of experimental data. Projects cannot be limited solely to the review of literature, the development of research or design proposals, or the collection of experimental data.

At the completion of their project, students must submit a written project report and complete a public oral defense of their project.

Project Mentor
Students who select the MS non-thesis track must identify a project mentor and select a project before they register for their second semester of full-time study. The project mentor is generally a primary faculty member of the Department of Biomedical Engineering. The role of the project mentor is to help the student identify a suitable project, to monitor the progress of the student, to provide guidance and training in the relevant topics, and to review the final report and presentation.

Students may complete their project under the supervision of a faculty member from another Department at the University of Miami, or from the local biomedical industry, under the following conditions:

- The student must receive the approval of the Department Chairman and Graduate Program Director.

- The student must identify a co-mentor who must be a primary faculty member of the Department of Biomedical Engineering. The co-mentor must be familiar with the topic of the proposed project. The role of the co-mentor will be to monitor the student progress and ensure that the Master's project report and presentation satisfy all of the relevant requirements.

Project Coordinator
The project coordinator is a member of the primary faculty of the Department of Biomedical Engineering who is responsible for teaching the BME 706 course. The role of the project coordinator is to:

- Help students identify a project and mentor.
- Ensure that the projects satisfy the program objectives.
- Provide general guidance and graduate scholarship training.
- Ensure that the students are making suitable progress towards the project goals.

Project Abstract
Non-Thesis MS students must submit a one-page project abstract to the Department Chairman or Graduate Program Director and to the MS Project Coordinator at the time when they register for BME 706. The abstract must include the name of the project mentor (and co-mentor, if any), the title of the proposed project, and a brief description of the goals of the project and proposed methods. The abstract must be approved by the mentor, MS Project Coordinator, and Department Chairman or Graduate Program Director before the student can start work on the project. (Project Abstract Template (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/Abstract_Template.pdf))

Project Report
Non-thesis MS students must submit a detailed report describing the work completed during the project. The report must describe the objectives and significance of the work, and summarize the activities completed by the student as part of the MS project. The report must demonstrate that the work performed by the student satisfies the general project criteria. The typical length of non-thesis M.S. project reports is 20 to 30 pages. If the project resulted in the submission of a full-length peer-reviewed scientific article, the article can be submitted in lieu of a report, as long as the following conditions are satisfied:

- The student must be the first author of the article.
- The article must reflect the work performed by the student as part of the project.
- The article must be submitted for publication in a peer-reviewed journal or conference proceedings volume.
- A one to two page introduction must be submitted to summarize the project goals and main outcomes.

The report must be reviewed and approved by the project mentor (and co-mentor, if any). Once the report is approved by the mentor(s), one printed copy and one electronic version in PDF format must be submitted to the Project Coordinator by the specified deadline. The final report must be approved and signed by the Project Mentor(s), Project Coordinator and Graduate Program Director or Department Chairman. (Signature Page Template (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/Signature_Page_Template.pdf))
Project presentation
Non-thesis MS students must give an oral presentation of their project. The oral presentation is generally scheduled during the scheduled final examination time of BME 706 in the semester of graduation.

Project grade
The final grade for the project is given by the Project Coordinator. The final grade is a combination of a grade submitted by the Project Mentor(s) assessing the overall performance of the student on the project, and a grade given by the Project Coordinator assessing the quality of the oral presentation and report.

MS Thesis Program
The thesis option is typically selected by students who are oriented towards a career in academic or industrial research and development, or students who want to acquire an initial independent biomedical research experience before seeking admission to doctoral programs.

Graduation Requirements
Graduation requirements for the MS Thesis Option include:

<table>
<thead>
<tr>
<th>24 Graduate-Level Course Credits Including: †</th>
<th>24</th>

</tbody>
</table>

Students who are not able to complete their thesis during the 3rd semester and have completed all 30 required credits of graduate work, must enroll in 0 credits of Research in Residence (BME 820) to maintain full-time student status.

MS Thesis
General Description
The Master’s thesis is a research monograph which describes the significance of the research and summarizes the research activities completed as part of the MS degree requirements. The objective of the thesis is to evaluate the candidate’s competence in the area of the MS research. The thesis must demonstrate that the research is original and that the candidate has the ability to solve complex scientific and/or technical problems at the interface of engineering and medicine or biology.

Thesis Mentor
Students who select the MS thesis track must identify a thesis mentor before they register for their second semester of full-time study. The thesis mentor must hold a primary or secondary faculty appointment in the Department of Biomedical Engineering. Exceptions can be made only with approval of the Graduate Program Director and Department Chairman.

The thesis mentor supervises the research work of the student and provides training and guidance in the relevant research topics, including design of experiments, experimental techniques, and scholarship activities. The mentor helps the student select a thesis topic and develop a plan, and chairs or co-chairs the thesis committee. The mentor works closely with the student to ensure that there is satisfactory progress towards the thesis goals.

Thesis Committee
The thesis must be approved by a thesis committee. The duties of the thesis committee are:

- to consult with and to advise students on their research;
- to meet, at intervals, to review progress and expected results;
- to read and comment upon the draft thesis;
- to meet, when the thesis is completed, to conduct the final oral examination and to satisfy itself that the thesis work is original; that it demonstrates the candidate’s ability to solve complex scientific and/or technical problems at the interface of engineering and medicine or biology; that it is written in lucid and correct English; and that it is submitted in approved format.

The thesis committee will consist of not less than three members, with the following requirements:

- The committee chair shall be a Primary Faculty member of the Department of Biomedical Engineering, as well as a regular member of the Graduate Faculty. The Committee Chair is generally also the thesis mentor.
- A thesis mentor who is not a member of the Primary Faculty of the Department of Biomedical Engineering, can serve as Co-Chair of the Thesis Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering.
- It is an additional requirement of the Department of Biomedical Engineering that at least two committee members should be primary Faculty members from the Department.
- One committee member must be from outside the Department. Outside members of the thesis committee can include part-time faculty that teach within the Department.
• At least one committee member must be a regular member of the Graduate Faculty of the University of Miami.

The committee is nominated by the Graduate Program Director. Usually, the student consults with his/her research mentor and with the Chairperson or Graduate Program Director to select the Committee members.

**Thesis Format and Deadlines**

It is the duty of the student to ensure that the thesis defense is scheduled and that a final version of the thesis approved by the Dissertation Editor is submitted to the Dissertation Editor by the required deadlines set by the Graduate School. All information pertaining to the formatting and electronic guidelines for electronic thesis submission can be found on the Graduate School website (http://www.miami.edu/graduate_grad/grad opendir/forms/theses_electronic_guidelines.pdf).

Each thesis must be accompanied by a Certificate of Defense Approval for Master's Thesis (https://etd.library.miami.edu/grad_electronic_guidelines/grad_electronic_theses_dissertations.pdf) signed by all members of the Committee. Forms can be downloaded from the Graduate School website.

**Evaluation Forms**

The student is responsible for distributing dissertation evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/Department_of_Biomedical_Engineering/theses_electronic_guidelines.pdf) to the members of the Thesis Committee for the final oral examination. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The completed forms must be collected by the Thesis Mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

**Transfer to MS Non-Thesis Program**

Students enrolled in the MS thesis program who do not wish to complete their thesis can transfer to the MS non-thesis program and graduate from the MS program under the following conditions:

- The transfer must be approved by the Department Chair or Graduate Program Director.
- All requirements of the MS non-thesis option must be satisfied, including completion of a 3 credit MS project (BME 706), submission of a project report, and oral defense of project. Completed thesis credits may count towards the three credit MS project requirement.

**MS in Medical Physics**

The Department of Biomedical Engineering at the University of Miami offers a special MS program in Medical Physics. The objective of the Medical Physics program is to provide advanced knowledge in the field of therapeutic medical physics, and to provide the training required for students to become licensed medical physicists. This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

The program is open to students enrolled in the regular MS program, as well as the dual degree (BS/MS) program. Candidates are required to have completed a 3 credit course in Modern Physics (PHY 360 or equivalent) and a 3 credit course covering the physical foundations of medical imaging (BME 330 or equivalent) before they start their course work in the Medical Physics program.

Students in the Medical Physics Program must complete Unified Medical Sciences II (BME 602) and one of the remaining two courses from the Unified Medical Sciences (BME 601 or BME 603) course series, and the following 22-credit core curriculum in the area of medical physics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BME 620</td>
<td>Medical Imaging System</td>
<td>3</td>

<tr>
<td>BME 784</td>
<td>Medical Physics Journal Club</td>
<td>1</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td></td>
<td><strong>22</strong></td>
</tr>
</tbody>
</table>

Any remaining credits required to complete the degree must satisfy the general requirements of the MS program. Students enrolled in the MS program in Medical Physics may require a total of 31 credits (non-thesis option) or 34 credits (BS/MS and thesis option) to complete the program requirements.

The topic of the BS/MS project (BME 705/BME 706), MS project (BME 706, non-thesis option), or MS thesis must be related to medical physics. In general, the project is co-supervised by Faculty from the Department of Biomedical Engineering and the Department of Radiation Oncology.

**Curriculum**

Typical curricula for each option of the MS program in Medical Physics are shown in the following tables. The course sequence and timeline can be adjusted based on individual needs. The minimum resident requirement for the MS degree is two semesters in full-time study or the equivalent in part-time work.

**MS without Thesis**

### Ph.D. in Biomedical Engineering

#### Program Objectives

The goal of the PhD program in Biomedical Engineering at the University of Miami is to train students for independent research and innovation in biomedical engineering. The program is designed to prepare graduates for careers in academia, industrial research and development, or government (FDA, US Patent Office).

PhD students conduct research at the Department of Biomedical Engineering and at clinical departments and research centers at the School of Medicine, including the Bascom Palmer Eye Institute, the Miami Project to Cure Paralysis, the Diabetes Research Institute, the University of Miami Ear Institute, Biomedical Nanotechnology Institute, the Departments of Pathology, Radiology, Radiation Oncology, Otolaryngology, and Surgery, and the Miami Veterans Administration Research Service. Many of our doctoral students work closely with physicians to develop and investigate new therapies, devices, and technologies that address real-world clinical problems.

#### Admission Requirements

The qualifications and documentation required for admission to the PhD program in Biomedical Engineering are the same as for the College of Engineering.

---

**BS/MS - Medical Physics Program BS/MS**

Students must complete a total of 34 graduate credits in the BS/MS program in Medical Physics. Students who take 6 credits per semester in the senior year only need to register for 22 credits in the fifth year.

**Ph.D. in Biomedical Engineering**

#### Admission Requirements

The qualifications and documentation required for admission to the PhD program in Biomedical Engineering are the same as for the College of Engineering.
In general, the Department admits three types of students to its PhD program:

- Students with MS degrees in Biomedical Engineering or related science and engineering fields.
- Students with MD degrees with undergraduate degrees in sciences or engineering.
- Highly qualified students with BS degrees in engineering or sciences.

Students admitted with non-engineering degrees are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

The PhD program in biomedical engineering is also a degree-granting program of the University of Miami’s MD-PhD program.

Internal M.S. students (thesis or non-thesis) who wish to pursue a doctoral degree can transfer from the MS program to the doctoral degree program under the following general requirements:

- Submission of an application for admission to the PhD program. The application must be submitted on paper to the BME Department Chair.
- Submission of a letter of support by a faculty member who agrees to serve as the student’s Ph.D. dissertation advisor.
- Approval of the application by the Department’s Graduate Admissions Committee.

Graduation requirements

The general requirements for award of the Doctor of Philosophy include:

- Completion of a minimum of 60 course credits beyond the BS degree.
- Satisfactory completion of a written qualifying examination.
- The submission, oral defense, and approval of a dissertation proposal.
- The submission, oral defense and approval of a dissertation.
- Completion of the publication requirements.

All work, including credit transferred from other institutions, must be completed within 8 years of the time of admission to graduate work, and/or within four years of approval of the dissertation proposal. An average of B (3.0) is required for a graduate degree, and no "D" credit may be counted toward the degree. A C- is the lowest passing grade for graduate students.

Curriculum

The PhD curriculum was designed to provide the technical and intellectual skills required to identify and solve complex scientific or technical problems at the interface of engineering and medicine or biology. The curriculum combines advanced coursework which provides depth in a specific area of concentration, with independent original research in one of the laboratories of the faculty from the Department of Biomedical Engineering or the School of Medicine.

Except for the Medical Physics program there are no formalized graduate curricular tracks in the PhD program. The student’s mentor and supervisory committee work with the student to develop a personalized course plan, based on the student’s own needs and interests. The personalized course plan is designed to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering. The course plan can include any of the graduate course offerings, as long as the student satisfies the course prerequisites.

The proposed individualized course curriculum must be submitted to the Graduate Program Director for final approval or to the Department Chairperson when the Graduate Program Director is the student’s mentor.

Required Core Courses

There are four core graduate courses: Unified Medical Sciences I/II/III (BME 601/BME 602/BME 603, 3 credits each) and a Graduate Scholarship course (BME 780, 3 credits). The three courses of the Unified Medical Sciences sequence are designed to provide a basic understanding of human physiology and anatomy and cellular and molecular biology. The Graduate Scholarship course provides training in grant proposal writing, manuscript preparation and other doctoral-level research and professional skills.

All BME PhD students are required to take at least two of the three Unified Medical Sciences courses, with the following exceptions:

- Students enrolled in the MD-PhD program and students with an MD from a medical school accredited by the World Health Organization are exempted from taking these 3 courses.
- Students admitted in the direct BS to PhD track and all students with a background in a traditional engineering field with no prior exposure to biology/medicine are required to complete all three courses.
- With the permission of the graduate advisor, students who have completed these courses or similar coursework in a previous graduate course of study may substitute technical electives for this requirement.

MD-PhD program

Students enrolled in the MD-PhD program start the PhD program after completion of the first two years of medical school.

MD-PhD students who choose BME as their degree-granting program can count up to 15 credits of work completed during the first two years of medical school towards their PhD degree requirements (See: Credit Requirements). To receive credit, students enroll in the following courses:

- BME 711 - Accelerated Basic Science Medical Curriculum (9 credits). BME 711 satisfies the Unified Medical Sciences (9 credits) requirement.
- PIB 731 - Laboratory Research (1-6 credits). Students receive up to 3 credits for each research rotation that they complete during their first two years of medical school, up to a maximum total of 6 credits. To receive credit, students must submit a report for each rotation, following the guidelines for BME Independent Study reports.

All MD PhD students must complete a 3-credit biostatistics course. Students who have successfully completed equivalent coursework in a previous course of study can be exempted from this requirement.

Medical Physics Program

The Department of Biomedical Engineering at the University of Miami offers a special PhD program in Medical Physics accredited by CAMPEP. The objective of the Medical Physics program is to provide advanced knowledge in the field of therapeutic medical physics, and to
provide the training required for students to become licensed medical physicists. This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

Candidates are required to have completed a 3 credit course in Modern Physics (PHY 360 or equivalent) and a 3 credit course covering the physical foundations of medical imaging (BME 330 or equivalent) before they start their course work in the Medical Physics program.

Students enrolled in the Medical Physics Program must complete the following courses:

- BME 602 Unified Medical Sciences II 3
- BME 620 Medical Imaging System 3
- BME 681 Radiation Biology and Physics 3
- BME 682 Radiation Therapy Physics 3
- BME 683 Radiation Protection 3
- BME 729 Advanced Medical Imaging 3
- BME 781 Radiation Dosimetry And Physics 3
- BME 783 Radiation Therapy Physics Clinical Rotation 3
- BME 784 Medical Physics Journal Club 1

Students enrolled in the Medical Physics program must complete their PhD dissertation project on a topic related to medical physics. In general, the project is co-supervised by Faculty from the Department of Biomedical Engineering and the Department of Radiation Oncology.

Students enrolled in the Medical Physics program must also complete an additional separate qualifying examination focused on the medical physics curriculum (see below section on qualifying examination).

Additional information on the Medical Physics program can be found on the Department website (http://www.bme.miami.edu/medical_physics/medical_physics_laboratory.html).

**Credit Requirements**

The credit requirements are summarized below. Students admitted with non-engineering degrees are generally accepted conditionally, with the requirement to complete a set of undergraduate courses in engineering and/or mathematics before gaining full admission into the PhD program. The list of pre-requisite courses is defined before the start of the first semester of study by the Graduate Program Director and Department Chairperson, in consultation with the student mentor. Course pre-requisites are not counted towards the degree requirements.

**Direct BS to PhD Track**

**Total of 60 Course & Dissertation Credits**

<table>
<thead>
<tr>
<th>Course Credits</th>
<th>24-42</th>
</tr>
</thead>
</table>

At least two of the following three courses: 1

- BME 601 Unified Medical Sciences I (Cellular/Molecular) 6
- BME 602 Unified Medical Sciences II (Human physiology) 6
- BME 603 Unified Medical Science III (Neuroscience) 6

Graduate Scholarship Course 3

A minimum of 15 credits of additional courses 2 15+

**Responsible Conduct of Research Training** 3

- RST 611 Responsible Conduct of Research 0
- RST 612 Responsible Conduct Of Research 0

**Dissertation Work** 4

- BME 830 Pre-candidacy Doctoral Dissertation 12+
- BME 840 Post-Candidacy Doctoral Dissertation 12+

**Total Credits** 60

1. If the student has completed equivalent coursework, this requirement can be waived. However, these courses must be substituted with another 6 credits of coursework.
2. Beyond the minimum requirement of 9 course credits, the supervisory committee shall decide which additional courses, if any, will be required to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering. A three credit advanced biostatistics course is strongly recommended.
3. These courses are not counted towards the 30 credit requirement. More information about these courses can be found on the CoE website (http://www.coe.miami.edu/coenewsite/rcr.html) and the UM RCR website (http://www.miami.edu/index.php/ethics/projects/rcr).
4. A minimum of 12 credits of dissertation work must be completed. Students should enroll into BME 830 before admission to candidacy and BME 840 after admission to candidacy.

At least two of the following three courses: 1

- BME 601 Unified Medical Sciences I (Cellular/Molecular) 6
- BME 602 Unified Medical Sciences II (Human physiology) 6
- BME 603 Unified Medical Science III (Neuroscience) 6

Graduate Scholarship Course 3

**Responsible Conduct of Research Training** 3

- RST 611 Responsible Conduct of Research 0
- RST 612 Responsible Conduct Of Research 0

**Dissertation Work** 4

- BME 830 Pre-candidacy Doctoral Dissertation 12+
- BME 840 Post-Candidacy Doctoral Dissertation 12+

**Total Credits** 30

1. If the student has completed equivalent coursework, this requirement can be waived. However, these courses must be substituted with another 6 credits of coursework.
2. Beyond the minimum requirement of 9 course credits, the supervisory committee shall decide which additional courses, if any, will be required to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering. A three credit advanced biostatistics course is strongly recommended.
3. These courses are not counted towards the 30 credit requirement. More information about these courses can be found on the CoE website (http://www.coe.miami.edu/coenewsite/rcr.html) and the UM RCR website (http://www.miami.edu/index.php/ethics/projects/rcr).

Research in Residence

Once a student has completed all required course and dissertation credits, he or she must enroll in Research in Residence status (BME 850, 0 credit) until the degree has been granted. Research in Residence status is considered full time enrollment. Credit is not granted for research in residence, but a fee is charged for each enrollment.

Qualifying Examination

General Description

All students in the PhD program must pass a Comprehensive Qualifying Examination, which consists of two parts:

- A written examination which serves to assess proficiency in the core disciplines.
- The defense of a dissertation proposal

Upon completion of the examination process, the Supervisory Committee shall notify the Graduate School and the department that the student has passed or failed the examination.

Written Qualifying Examination

Format

The written examination is administered once a year (August) over a period of 1.5 days. The examination consists of three written tests on the topics of basic engineering, applied mathematics and computer science, and applied physiology and medical science. Each test lasts 2.5 hours and consists of a minimum of 12 independent questions or problems assigned by the primary faculty of the BME Department. In each test, students must select and satisfactorily answer 6 problems. Students enrolled in the MD-PhD program are exempt from taking the applied physiology and medical science section of the qualifying examination.

Schedule:

The examination must be taken the first time it is scheduled after completion of the first two semesters. The Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. In the Department of Biomedical Engineering, a student in good academic standing may take the examination after completing only one full semester of classes, with approval of his/her mentor, Graduate Program Director and Department Chairperson.

Repeat:

A student who fails the examination might be given the opportunity to repeat any or all parts of the examination once. Permission to retake the examination is not automatic. It requires approval of the program faculty. Under exceptional conditions, students may be allowed to repeat a single section a second time. Students who fail the qualifying examination are dropped from the program. Students admitted to the doctoral program with a BS degree that do not pass the qualifying examination may complete the MS degree.

Medical Physics Qualifying Examination

Students enrolled in the Medical Physics program must pass an additional written examination focused on topics covered in the Medical Physics curriculum. The examination is typically scheduled the semester following the regular BME screening examination, and consists of 6 separate written tests on the following topics, corresponding to courses in the curriculum: Anatomy/Radiobiology (BME 602/BME 681); Medical Imaging (BME 620/BME 729); Radiation Therapy Physics (BME 682);
Radiation Protection (BME 683); Radiation Dosimetry (BME 781); Medical Physics Clinical Rotation (BME 783). The entire examination is scheduled in a single day, with each test lasting 55 minutes. The minimum passing score for each test is 70%. Students who fail one or more of the tests must retake the test(s) before the end of the semester. Students who fail the same test twice are dropped from the Medical Physics program.

**Supervisory Committee**

In the Department of Biomedical Engineering, the PhD Supervisory Committee is appointed by the Chairperson during the first year of enrollment, in consultation with the student and his/her research mentor.

The role of the Supervisory Committee is to identify any additional courses required beyond the minimum course requirements, to oversee program milestones, and to administer any additional written or oral examination deemed necessary to complete the qualifying examination.

In the Department of Biomedical Engineering, the Supervisory Committee must be comprised of at least five members. The five members include the committee chair, who shall be a Primary Faculty member of the Department of Biomedical Engineering, as well as a regular member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from Graduate Faculty and one from outside the department. It is an additional requirement of the Department of Biomedical Engineering that two of the remaining members shall be primary Faculty members from the Department. A research mentor who is not a Primary Faculty member of the Department of Biomedical Engineering, can serve as Co-Chair of the Supervisory Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering.

**Dissertation Proposal**

**Format**

Each student must submit an original written proposal describing the goals of the dissertation research project, the significance of the work, preliminary studies, and the research plan. The proposal must be submitted to the Supervisory Committee and orally defended before the end of the fourth semester for students admitted with a BS degree and before the end of the first semester of the third year for students admitted with a MS degree. The student’s knowledge of the proposed research topic will be tested during the oral defense. If any deficiencies are discovered during the defense of the proposal, an additional written or oral examination may be required by the Ph.D. Supervisory Committee.

**Evaluation Forms**

The candidate is responsible for distributing dissertation proposal evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Supervisory Committee. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The forms must be completed by the Committee members after the dissertation defense. The completed forms must be collected by the Dissertation mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

**Admission to Candidacy**

A student who has passed the written qualifying examination, and successfully defended the dissertation proposal must:

- submit a signed “Approval of the Dissertation Proposal (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/Department_Dissertation_Proposal_Approval.pdf)” form to the Graduate Program Director of the Department of Biomedical Engineering.
- form a Dissertation Committee (see below)

Admission to candidacy recognizes the fact that a student enrolled in the PhD program has completed all doctoral degree requirements except completion of an acceptable dissertation project and defense of the dissertation. Completion of the required course credits and dissertation credits (BME 830 and/or BME 840) is not a requirement for admission to candidacy in the Department of Biomedical Engineering.

No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the dissertation defense is scheduled.

**Dissertation Committee**

In the Department of Biomedical Engineering, the Dissertation Committee is generally the same as the Supervisory Committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The Dissertation Committee is nominated by the Department, and is approved and appointed by the Dean of the Graduate School.

As with the Supervisory Committee, the Dissertation Committee must be comprised of at least five members, including the committee chair. The committee chair shall be a Primary Faculty member of the Department of Biomedical Engineering, as well as a regular member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from Graduate Faculty and one from outside the department. It is an additional requirement of the Department of Biomedical Engineering that of the remaining members, at least two should be primary Faculty members from the Department. A research mentor who is not a member of the Primary Faculty of the Department of Biomedical Engineering, can serve as Co-Chair of the Dissertation Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering. One additional requirement is that the Dissertation Committee of students enrolled in the MD-PhD program must include one member of the MD-PhD program committee.

The duties of the Dissertation Committee are:

- to consult with and to advise students on their research;
- to meet, at least once per year, to review progress and expected results (see below);
- to read and comment upon the draft dissertation;
- to meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved format.
Yearly Progress Review

The student must schedule a yearly meeting with the dissertation committee. The purpose of the meeting is to give the student an opportunity to present his/her doctoral research progress to the committee and to receive the committee's feedback and recommendations. The student must submit a brief progress report to the dissertation committee at least seven days before the meeting. During the meeting, the student will present his/her doctoral research progress to the committee. The presentation will be followed by a discussion session. The student will provide a written summary of the discussion and committee recommendations to the student and to the Graduate Program Director. Students who are not making adequate progress may be terminated from the program.

Doctoral Dissertation

General Description

The doctoral dissertation is a monograph which describes the significance of the research and summarizes the research activities completed as part of the doctoral degree requirements. The objective of the dissertation is to evaluate the candidate's competence in the area of the Ph.D. research. The dissertation must demonstrate that the research is original and that it makes a significant contribution to the field of study.

A final public oral defense of the dissertation is required. However, none but the members of the dissertation committee may interrogate the candidate. The defense must be held before the deadline published on the Graduate School website (http://www.miami.edu/gs/index.php/graduate_school/current_students/electronic_theses_dissertations), generally at least two weeks prior to the last day of class in the semester the student wishes to graduate. The student must submit the Defense Notice Form available on the Graduate School website and provide a copy to the Department of Biomedical Engineering.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work a minimum of two weeks prior to the defense.

Dissertation Format and Deadlines

It is the duty of the student to ensure that the dissertation defense is scheduled and that a final version of the dissertation approved by the Dissertation Editor is submitted to the Dissertation Editor by the required deadlines set by the Graduate School. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found on the Graduate School website (http://www.miami.edu/gs/index.php/graduate_school/current_students/electronic_theses_dissertations). The Graduate School also encourages students to contact the Dissertation Editor at the Graduate School when they start preparing their dissertation.

Students must inform the Department of Biomedical Engineering of their intent to defend at least 2 weeks in advance of the defense date, by email to the Department staff. The email must include the dissertation title and the date, time and location of the defense. The information will be posted in the Department's physical and online bulletin boards.

Each dissertation must be accompanied by Certificate of Defense Approval for Doctoral Dissertation (https://umshare.miami.edu/web/wda/grad/etd/forms/phd_cert_defense.pdf) signed by all members of the Committee. Forms can be downloaded from the Graduate School website.

Evaluation Forms

The candidate is responsible for distributing dissertation evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Dissertation Committee. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The forms must be completed by the Committee members after the dissertation defense. The completed forms must be collected by the Dissertation mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

Publication Requirements

As a requirement for graduation, all PhD Candidates at the University of Miami Department of Biomedical Engineering are expected to have published, or have in press (i.e., the manuscript must have received final acceptance), in high quality peer-reviewed journals, a minimum of 2 publications describing work related to the dissertation. The candidate must be the first author on at least one of these two publications. In addition, the candidate must have been the presenting author of at least 2 oral or poster presentations describing the dissertation work at major peer-reviewed international conferences.

Teaching Requirements

Students enrolled in the PhD program in Biomedical Engineering who passed their qualifying examination are required to participate in undergraduate teaching activities. The minimum requirement will be to teach one undergraduate classroom lecture per academic year, under the supervision of the primary or secondary mentor, and/or the faculty responsible for the course and to help supervise at least one undergraduate student research project per academic year. For each classroom lecture, the mentor will provide feedback to the student and complete and sign a teaching evaluation form (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/Grad_Teaching_Eval.pdf) which must be returned to the Graduate Program Director.

Civil, Architectural and Environmental Engineering

http://cae.miami.edu

Dept. Code: CAE

Degree Programs

The Department of Civil, Architectural, and Environmental Engineering offers graduate programs leading to the degrees of:

- Master of Science in Architectural Engineering
- Master of Science in Civil Engineering
- Master of Science in Civil Engineering - Environmental Engineering Emphasis
- Doctor of Philosophy in Civil Engineering
Masters Programs in Civil, Architectural and Environmental Engineering
- M.S. (p. 650) Civil Engineering (p. 650)
- M.S. (p. 649) Architectural Engineering (p. 649)
- B.S./M.S. Civil Engineering Program (p. 648)

Doctoral Program in Civil, Architectural and Environmental Engineering
- Ph.D. in Civil Engineering Program (p. 651)

B.S./M.S. in Civil Engineering

Admission Requirements

Undergraduate students of the department having a GPA of 3.0 or better are encouraged to apply to the 5-year BS/MS program during their junior year. Applicants are required to submit official transcripts, official GRE scores, and three letters of recommendation. Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements.

Graduation

Requirements for graduation are:
- Minimum of 30 graduate-level credits with a GPA of at least 3.0, and no grade lower than C
- Of the 30 graduate-level credits:
  - At least 24 credits of lecture-based courses
  - At least 15 credits in CAE
  - At least 12 credits of courses at the 700 level
  - At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study / Special Problems)
  - Up to 6 credits can be Independent Study (Special Problems and/or Master’s Design Project)

Thesis research (CAE 810) will not count towards the degree.

Transfer of credits from other institutions

A total of 6 credits of transfer and/or exchange coursework not counted towards the student’s BS may be taken at another institution and used to satisfy requirements for the M.S. The number of eligible credits for transfer is 9, when pre-approved coursework is taken as part of a semester abroad experience.

Curriculum

The program of study is tailored to the student’s background and goals by their advisor, and must be approved as constituting an MS in Civil or Architectural Engineering by the student’s Program of Study Committee. The committee comprises a minimum of 3 members, as follows:
- The CAE Committee Chair (Advisor) shall be a full-time faculty member from the CAE Department, one member must be from outside the Department and hold a Ph.D., and one member other than the CAE Committee Chair (Advisor) must be either a full-time or part-time member of the Department; and
• In addition to the Committee Chair, at least one of the members must be tenured/tenure-earning, or a member of the Graduate Faculty.

M.S. in Architectural Engineering

Graduation

Non-Thesis Option
Requirements for graduation are:

• Minimum of 30 graduate-level credits with a GPA of at least 3.0, and no grade lower than C
• Of the 30 graduate-level credits:
  • At least 24 credits of lecture-based courses
  • At least 15 credits in CAE
  • At least 12 credits of courses at the 700 level
  • At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study / Special Problems)
• Up to 6 credits of Independent Study are permitted

Thesis Option
Requirements for graduation are:

• Minimum of 30 graduate-level credits with a GPA of at least 3.0, and no grade lower than C
• At least 24 credits of lecture-based courses
• At least 15 credits in CAE
• At least 12 credits of courses at the 700 level
• At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study / Special Problems)
• Thesis requirement: 6 credits of Master’s Thesis (CAE 810)

Independent Study (Special Problems) will not count towards the degree. Master’s Project (CAE 705) will not count towards the degree.

Transfer of Credits from Other Institutions
A total of 6 credits of transfer and/or exchange coursework not counted towards the student’s BS may be taken at another institution and used to satisfy requirements for the M.S.

Admission Requirements
All students applying to the graduate program are required to submit GRE scores and three letters of recommendation. Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements. Both a Thesis Option and Non-Thesis Option are available for this M.S. Degree.

1. International students should consult the section on admissions.

Thesis Admission Requirement
Students who hold a bachelor’s degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

Non-Thesis Admission Requirement
Students who hold a bachelor’s degree in a field other than their proposed major may be admitted to the MS program upon completion of appropriate undergraduate deficiency courses as listed below, in addition to the regular requirements for the graduate degree.

Deficiency courses are as follows:

• Calculus, 10 semester credits
• Advanced Mathematics, 6 semester credits
• General Chemistry, 4 semester credits
• Physics (with Calculus), 8 semester credits
• Statics, 3 semester credits
• Engineering Science related to area of study, 3 semester credits
• Engineering Design related to area of study, 6 semester credits

In general, items 1 through 7 apply to students without an undergraduate degree in engineering, and items 6 and 7 apply to students with an undergraduate degree in engineering. The student’s graduate committee will select courses for items 6 and 7 on an individual basis.

### Additional Details
- Requirements for the M.S. degree are listed in this Bulletin under Engineering (p. 633) and under Master’s Degree General.
- A total of 6 credit hours of transfer and/or exchange coursework not counted towards the student’s bachelor’s degree may be taken at another institution and used to satisfy requirements for the M.S. degree.
- Both a thesis option and a non-thesis option are available.
- There is also a 5-year B.S./M.S. option available for qualified undergraduate students enrolled within the Department. For this combined degree program only, students are allowed to transfer up to 9 credit hours of graduate coursework from a semester spent abroad. The coursework resulting in the 9 credit hour transfer is to be approved by the student’s M.S. advisor prior to initiating the study abroad program.
- Of 30 required credit hours, up to 6 may be thesis research. At least 12 credit hours must be at the 600 level, of which up to 6 credit hours can be thesis research, independent study, or, for 5-year BS-MS candidates, Master’s Design Project.
- The student and an advisory committee plan the student’s overall program.
  a. The advisory committee consists of a minimum of 3 members.
  b. The chair of the committee shall be a full-time faculty member from the CAE Department, one member must be from outside the Department and hold a Ph.D., and one member other than the chair must be either a full-time or part-time member of the Department.
  c. In addition to the Committee Chair, at least one of the members must be tenured/tenure-earning, or a member of the Graduate Faculty.

---

### Ph.D. in Civil Engineering

#### Graduation Requirements

**For a Ph.D. following an MS**
- 30 credits, including at least 15 CAE credits, are required beyond the MS degree
- 18 credits of courses
- 6 credits of coursework at the 700 level in CAE courses other than independent study (Special Problems)
- 12 credits of dissertation (CAE 830 pre-candidacy, CAE 840 post-candidacy)

**For a Ph.D. without prior MS**
- 60 credits, including at least 30 CAE credits, are required beyond the BS degree
- 42 credits of courses
- 12 credits of coursework at the 700 level in CAE courses other than independent study (Special Problems)
- 18 credits of dissertation (CAE 830, CAE 840)

#### Transfer of Credits from Other Institutions
A total of 6 credits of transfer and/or exchange coursework (not counted towards the student’s BS or MS degrees) may be taken at another institution and used to satisfy requirements for the Ph.D. degree.

#### Admission Requirements
All students applying to the graduate program are required to submit GRE scores and three letters of recommendation. Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements.

1. International students should consult the section on admissions.
2. Students who hold a bachelor’s degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

#### Curriculum
The Program of Study is tailored to the student’s background and goals by their advisor, and must be approved as constituting a Ph.D. in Civil Engineering by the student’s Supervisory Committee. The Committee comprises a minimum of 4 members as follows:

- CAE Committee Chair (Advisor) shall be a full-time CAE faculty member and a member of the Graduate Faculty.
- Two other members must be members of the CAE faculty and the Graduate Faculty.
- One member must be outside CAE with an earned Ph.D.

#### Qualifying Examination
A Ph.D. student must pass a Qualifying Examination, generally taken at the end of the first year of study, before being allowed to defend a dissertation proposal. The exam is administered by the student’s Program of Study Committee. Three outcomes of this exam are possible: pass, fail, and fail with option to re-take once.
Dissertation Proposal Defense
Subsequent to passage of the Qualifying Examination, the student can defend their Dissertation Proposal to their Dissertation Committee, which is typically the same as the student’s Program of Study Committee or, if not, has makeup equivalent to the Program of Study Committee. All Committee members must approve the Proposal.

Admission to Candidacy
Admission of the student to Candidacy is subject to passage of the Qualifying Examination and passage of the oral Dissertation Proposal Defense.

Electrical and Computer Engineering
The Department of Electrical and Computer Engineering offers graduate programs leading to the degrees of Master of Science (thesis or non-thesis option) and Doctor of Philosophy in Electrical and Computer Engineering. Five-year BS and MS dual degree programs are available for qualified undergraduate students enrolled within the Department.

Current research interests of the faculty include:

- Statistical signal processing.
- Image and video processing, pattern recognition, computer vision, automation of visual tasks.
- Machine learning and big data analytics.
- Bioinformatics, computational biology, and genomics.
- Nano-photonics, plasmonics, micro/nano-electronic devices, nano-materials and structures.
- Fusion and learning in networks.
- Data mining, multimedia information systems, multimedia networking and security.
- Intelligent sensor microchips and MEMS, BioMEMS, implantable medical devices, VLSI, ASICs, system-on-a-chip, FPGAs.
- Integrated optics, holography, lithography, spectral imaging, optical coherence tomography.
- Game theory, multi-agent systems.

Masters Programs in Electrical and Computer Engineering
- M.S. in Electrical and Computer Engineering (p. 657)
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Electrical Engineering Option (p. 388)
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Audio Engineering Option (p. 386)
- Five-Year B.S.C.P.E.-M.S.E.C.E. Dual Degree - Computer Engineering Option (p. 382)
- Five-Year B.S.C.P.E.-M.S.E.C.E. Dual Degree - Software Engineering Option (p. 384)

Doctoral Program in Electrical and Computer Engineering
- Ph.D. in Electrical and Computer Engineering (p. 657)

Five-Year B.S.C.P.E.-M.S.E.C.E. Dual Degree - Computer Engineering Option

### Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Electrical Engineering Option

The first three years are the same as in the undergraduate B.S.E.E. program with 97 credit hours. The remaining 55 credit hours shown below should include at least ten graduate courses of which, at least four are at the 700 level. Also see description of electives under the Electrical and Computer Engineering Section.

#### Senior Year

| Fall   | ECE 112  | Introduction to Engineering II | 2 |
|        | ECE 118  | Introduction to Programming | 3 |
|        | ENG 107 | English Composition II: Science and Technology | 3 |
|        | MTH 162 | Calculus II | 4 |
|        | PHY 206 | University Physics II | 3 |
|        | PHY 208 | University Physics II Lab | 1 |
|        | Credit Hours | 16 |

#### Sophomore Year

| Fall   | ECE 201  | Electrical Circuit Theory | 3 |
|        | ECE 218 | Data Structures | 3 |
|        | MTH 311 | Introduction to Ordinary Differential Equations | 3 |
|        | PHY 207 | University Physics III | 3 |
|        | PHY 209 | University Physics III Lab | 1 |
|        | HA Cognate (Adv. HA Elective) | 3 |
|        | Credit Hours | 16 |

#### Fifth Year

| Fall   | ECE 204  | Electrical Circuits Laboratory | 1 |
|        | ECE 304 | Logic Design | 3 |
|        | ECE 305 | Electronics I | 3 |
|        | ECE 307 | Circuits, Signals And Systems | 3 |
|        | MTH 210 | Introduction to Linear Algebra | 3 |
|        | CHM 151 | Chemistry for Engineers | 3 |
|        | CHM 153 | Chemistry Laboratory for Engineers | 1 |
|        | Credit Hours | 17 |

#### Junior Year

| Fall   | ECE 301  | Electromagnetic Field Theory | 3 |
|        | ECE 306 | Electronics II | 3 |
|        | ECE 311 | Electronics Laboratory | 1 |
|        | ECE 315 | Digital Design Laboratory | 1 |
|        | ECE 336 | Discrete-Time Signals And Systems | 3 |
### M.S. in Electrical and Computer Engineering

The Electrical and Computer Engineering Department offers the Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.) with a thesis option (24 course credit hours and 6 thesis credit hours) or a non-thesis option (30 course credit hours and no thesis credit hours).

**Admission Requirements:** Same as the CoE general requirements.

**Graduation Requirements:** The M.S.E.C.E. program with the non-thesis option complies in full with the CoE degree requirements. In addition to the CoE degree requirements, the M.S.E.C.E. program with the thesis option requires the following:

- Appointment of a Thesis Defense Committee comprised of at least 3 members: the Chair of the committee is the Research Advisor who must have RF/GF status within ECE; at least one other member (excluding the Research Advisor) must have RF/GF status within ECE; at least one member must be from outside ECE.

Transfer of credits from other institutes complies with the rules of the graduate school.

### Ph.D. in Electrical and Computer Engineering

The Ph.D. degree is designed so that it

- offers students the theoretical, practical, and professional knowledge that will enable them to pursue discovery of new knowledge;
- allows students to conduct visible high-quality research that will advance the state of knowledge; and
- serves to train, motivate, and inspire our graduates to become leaders in their fields.

**Admission Requirements**

The minimum GRE requirement is 310 (verbal plus quantitative) for the B.S. to Ph.D. track, and 305 for the M.S. to Ph.D. track. Other requirements are identical to the CoE requirements.

**Graduation Requirements**

The average grade of course works should be B or better, and no grade can be below C. Other requirements are identical to the CoE requirements.

**Transfer of credits from other institutions**

It complies with the rules of the graduate school.

### Qualifying Examination

The Ph.D. Qualifying Examination is held twice a year, one week prior to the beginning of the Fall and Spring semesters. The applicant must select four subject areas listed in the following:

1. See description of electives under the Departmental Electives Section.
2. Offered only in the Fall semester.
3. Should be taken as Graduate (G) courses.
Dissertation Proposal Defense
An oral defense of a dissertation proposal on an original research topic before the dissertation committee is required.

Admission to Candidacy
Requirements are identical to the CoE requirements.

Industrial Engineering
Department Mission Statement
The Department of Industrial Engineering mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote lifelong learning; and contribute to emerging societal needs.

Degree Programs
The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- Master of Science in Occupational Ergonomics and Safety
- MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
- Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

- a Ph.D. program in Ergonomics and Human Factors
- a Ph.D. in Industrial Engineering.

Masters Program in Industrial Engineering

- M.S. in Industrial Engineering (p. 659)
- M.S. in Environmental Health and Safety (p. 658)
- M.S. in Management of Technology (p. 660)
- M.S.I.E./M.B.A. Executive Program (p. 660)

Doctoral Program in Industrial Engineering

- Ph.D. in Industrial Engineering (p. 659)
- Ph.D. in Ergonomics and Human Factors (p. 660)

M.S. in Environmental Health and Safety

Master of Science in Environmental Health and Safety
An interdisciplinary M.S. degree program in Environmental Health and Safety are offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student’s interests and career objectives.
1. The program will consist of a 36 credit hours in the areas of environmental health and safety.

2. Core Courses
   - EPH 601 Medical Biostatistics I 3
   - EPH 602 Biostatistics II 3
   - EPH 621 Fundamentals of Epidemiology 3
   - EPH 641 Integrated Aspects of Environmental Health 3
   - IEN 651 Accident Prevention Systems 3
   - IEN 657 Ergonomics And Human Factors Engineering 3
   - IEN 757 Ergonomics and Occupational Biomechanics 3
   - IEN 794 Master's Project 3
   - Electives (12 Credits) 12
   Total Credit Hours 36

1. Master of Science in Occupational Ergonomics and Safety

An interdisciplinary M.S. degree program in Occupational Ergonomics and Safety are offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student's interests and career objectives.

1. The program will consist of a 36 hour Master's degree program in Occupational Ergonomics and Safety in the Department of Industrial Engineering. The program will include 33 hours of course work in the areas of ergonomics and safety and 3 hours on internship in an industrial or health care related facility. Research areas will include musculoskeletal injuries, occupational stress, automation and design for older workers and special populations.

2. Common Core Courses
   - IEN 651 Accident Prevention Systems 3
   - IEN 657 Ergonomics And Human Factors Engineering 3
   - IEN 658 Industrial Hygiene I 3
   - IEN 712 Design of Experiments 3
   - IEN 757 Ergonomics and Occupational Biomechanics 3
   - IEN 758 Ergonomics and Special Populations 3
   - IEN 794 Master's Project 3
   - EPH 621 Fundamentals of Epidemiology 3
   - Electives (12 credits) 12
   Total Credit Hours 36

M.S. in Industrial Engineering

1. The Master of Science degree in Industrial Engineering includes the following areas of concentration:
   a. Engineering Management
   b. Ergonomics and Human Factors
   c. Health Care Systems
   d. Management of Technology
   e. Manufacturing Engineering
   f. Occupational Health and Safety
   g. Operations Research
   h. Productivity Engineering
   i. Quality

2. Students (other than University of Miami graduates) applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant's abilities and background. Students who hold a bachelor's degree in a field other than Industrial Engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree. A student's overall program is planned by the student and the Graduate Advisor.

3. Requirements for the Master of Science Degree (both thesis and non-thesis option):
   a. An approved integrated program with a minimum of 30 credit hours with a 3.0 average or better on all credit hours attempted and no single grade below “C” at the University of Miami while a graduate student.
   b. At least 12 course credit hours must be at the 700 level.

1 Note: All courses are 3 credit hours unless otherwise indicated

Notes:
   i In addition to the above required courses, the student will have to take other graduate level elective courses to fulfill the degree requirements. A list of approved electives is
maintained by the Graduate Advisor in the Department of Industrial Engineering. Substitution of courses is allowed, but must be approved by the Graduate Advisor and the Department Chairman.

ii 500-level courses are open to advanced undergraduates and to graduate students; 600-level courses are open only to graduate students.

iii 500-level and 600-level courses are also open to qualified graduate students majoring in other disciplines.

4. The Department of Industrial Engineering offers a 5-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering Program (BSIE/MSIE Program).

a. This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering.

b. The special conditions for this 5-Year BSIE/MSIE Program are as follows:

i The student must declare his/her intent to participate before the end of their Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.

ii A student wishing to withdraw from the 5-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 694 in order to get his/her BSIE degree.

iii To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.

iv The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all requirements are satisfied.

c. More details can be found in the Undergraduate bulletin (p. 393).

M.S. in Management of Technology

Master of Science in Management of Technology is an academically challenging program that allows you to gain significant training in both technology and management.

1. It is a 36 credit hour curriculum with 12 credits in Technology oriented courses and 12 credits in Management topics

2. A bachelor’s degree from a regionally accredited university with a GRE or GMAT score that is acceptable.

3. Industrial Engineering Core Courses

M.S.I.E./M.B.A. Executive Program

Dual MSIE/MBA Weekend Executive program makes it possible to earn two separate degrees at the same time, a Master of Business Administration Degree (MBA) and a Master of Science in Industrial Engineering (MSIE).

1. It is a 57 credit hour program that starts every January and is completed in two years and one semester. Classes are held on Saturdays and during intersessions.

2. A bachelor’s degree in any engineering discipline, an acceptable GRE score, and at least 3 years of work experience is required.

3. MSIE Courses

Electives (6 Credits) 6

Total Credit Hours 57

Ph.D. in Ergonomics and Human Factors

The Department offers a Ph.D. in Ergonomics and Human Factors for students with a background in engineering and/or related sciences. General requirements for award of the Doctor of Philosophy degree include:

- 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D.
- At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken.
1. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.

2. Once a student has completed all course and required research credit hours, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.

3. A written qualifying examination is to be taken by each doctoral degree candidate during the first year of graduate work. The department may specify that the student must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the Graduate Advisor notifies the Department Chairman that the student has passed or failed the examination. A student who fails the examination may be permitted to retake it, with the permission of the Graduate Advisor and the Chairman. Qualifying examinations normally will not be given during the summer months. The applicant must hold a 3.0 average on all credit hours attempted with no single grade below "C" at the University of Miami while a graduate student.

4. Each student in Ph.D. program in Ergonomics and Human Factors has to take and pass 5 qualifying exams in the following areas:
   - Ergonomics and Human Factors,
   - Industrial Hygiene,
   - Safety Engineering,
   - Biomechanics, and
   - Statistics & Regression analysis

5. Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.

6. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist of not less than four members, three from the Department’s graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:
   a. To consult with and to advise students on their research.
   b. To meet, at intervals, to review progress and expected results.
   c. To read and comment upon the draft dissertation.
   d. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
   e. The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.

7. There are no foreign language requirements for the Ph.D. degree.

**Ph.D. in Industrial Engineering**

The Department offers a Ph.D. in Industrial Engineering for students with a background in engineering. General requirements for award of the Doctor of Philosophy degree include:

- 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D.
- At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken.
- Course work requirements depend on the student’s background, and are established by the Graduate Advisor and the Department Chairman.

   e. The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.

7. There are no foreign language requirements for the Ph.D. degree.

Mechanical and Aerospace Engineering

Dept. Code: MAE

Degree Programs

The Department of Mechanical and Aerospace Engineering offers courses and provides facilities for two programs of graduate study and research in Mechanical Engineering, leading to the degrees of:

1. Master of Science (p. 663)
2. Doctor of Philosophy (http://bulletin.miami.edu/graduate-academic-programs/engineering/mechanical-aerospace-engineering/mechanical-engineering-phd)

The program of study must reflect the importance of underlying principles of the physical sciences and mathematical analysis to all phases of modern mechanical engineering.

Areas of Research

- Fluid Mechanics
- Biomechanics
- Solid Mechanics
- Composite Materials
- Optimization and Reliability
- Nano Mechanics
- Heat Transfer
- Hydrogen Energy
- Materials Science
- Internal Combustion Engines
- Controls and Design
- Aerodynamics and CFD
- Nano-Bio-Systems
- Fuel Cells

It is expected that each graduate student will indicate early in his/her graduate work (within the first year), the particular area in which he/she intends to concentrate his/her efforts as well as the faculty advisor for dissertation.

500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

Clean Energy Research Institute

1. The Clean Energy Research Institute in the Department of Mechanical and Aerospace Engineering acts as the focal point of energy and environment related activities in the College of Engineering.
2. Its goals are:
   - to conduct research and to generate research proposals to investigate energy and environmental problems;
   - to organize seminars, workshops and conferences using researchers within and without the University;
   - to assemble, compile, publish and disseminate information on every aspect of energy and environmental problems; and
   - to cooperate with other organs of the University, other academic institutions, government and private organizations in connection with the above listed activities.
3. The current activities of the Institute include research into hydrogen as a clean, inexhaustible synthetic fuel, environmental damage caused by fossil fuels, global warming and its remediation, instabilities in boiling systems, solar cooling and heating, hybrid solar collectors, remote sensing applied to energy related problems and solar energy, system optimization and reliability of solar and wind energy systems, and organization of national and international conferences and symposia on energy and environmental problems.

Research Laboratories

- Advanced Nano Systems Laboratory
- Aerospace Materials Simulation Laboratory
- Center for Advanced Multi-Scale Studies
- Computational Fluid Dynamics Laboratory
- Fuel Cells Laboratory
- Integrated Nano-Bio-Systems Laboratory
- Internal Combustion Laboratory
- Materials Laboratory
- Measurements Laboratory
- Multi-Functional Composite Materials Laboratory
- Optimization and Reliability Laboratory
- Robotics and Intelligent Systems Engineering Laboratory
Masters Programs in Mechanical and Aerospace Engineering

1. M.S. in Mechanical Engineering (p. 663)
   a. non-thesis option
   b. thesis option
2. B.S./M.S. in Mechanical Engineering (http://bulletin.miami.edu/undergraduate-academic-programs/engineering/mechanical-aerospace-engineering/mechanical-engineering-bs-ms)

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of 300 or more on the Graduate Record Examination (taken before the fifth year).

Doctoral Program in Mechanical and Aerospace Engineering

• Ph.D. in Mechanical Engineering (p. 663)

M.S. in Mechanical Engineering Admission Requirements

Students applying for acceptance to degree status must comply with the general requirements of the Graduate School. General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

1. One academic year, or equivalent, spent in full time graduate study will be the minimum time necessary for a student to fulfill the requirements for the degree of Master of Science in Mechanical Engineering.
2. Both a 30 credit hour thesis option and a 30 credit hour non-thesis option are available.
   a. The student taking the Thesis Option must take an oral examination in defense of the thesis.
   b. The student taking the Non-Thesis Option must complete a 3 credit hour Graduation Project at the end of the course program.
   c. The Master of Science Degree in Mechanical Engineering (Management Option) can only be taken under the Non-Thesis Option.
      i. This degree specialization combines 15 credit hours selected from graduate business courses with 15 credit hours in a graduate engineering area of concentration.
      ii. An undergraduate degree in engineering is required.

Graduation Requirements

General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

Ph.D. in Mechanical Engineering Admission Requirements

The program leading to the degree of Doctor of Philosophy in the Department of Mechanical and Aerospace Engineering complies in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and the dissertation.

1. All candidates for the Ph.D. degree are expected to complete an integrated program of studies in mechanical engineering, mathematics, physics and/or chemistry in preparation for the Qualifying Examination.
2. A qualifying examination is to be taken by each doctoral degree student within the first year. In the qualifying examination, the student is expected to demonstrate his/her competence in certain basic courses appropriate to modern mechanical engineering to the satisfaction of the department. A Ph.D. student will be admitted to candidacy after passing the qualifying examination as well as the defense of dissertation proposal.
3. There is no foreign language requirement.
4. One or two years beyond admittance to candidacy will usually be found necessary for the completion of an acceptable dissertation, whereupon the student will be required to pass the Final Oral Defense of the Dissertation.
5. The candidate may, if he/she so desires, pursue for his/her dissertation an investigation in connection with any of the research projects in progress in the Mechanical and Aerospace Engineering Department or, in the case of interdisciplinary programs, in other Colleges/Schools such as the School of Marine and Atmospheric Science or the Medical School.

Course Requirements

For students who joined the program in Spring 2009 or after:

For students with a M.S. degree in Engineering:

• Minimum 18 credits of course work + 12 credits of dissertation.
• Expected duration of the program: 3 years.

For students with only a B.S. degree in Engineering:

• Minimum 36 credits of course work + 12 credits (or more) of dissertation.
• At least 12 credits must be at the 700 level.
• Expected duration of the program is 4 years.

For Ph.D. students with a non-engineering degree:

• Required credits and the expected duration of the program as specified in the assistantship offer letter.

In order to register for courses and/or dissertation in each semester, students are required to select the courses and/or dissertation credits by consulting their respective dissertation (research) advisors. They
must also see the Graduate Advisor of the Department (Chair of the Department) for approval and signature.

Please note that the number of credits to be taken in various semesters is stated in each student’s Ph.D. assistantship offer letter.

For Dissertation Credits

- Register as MAE 830 before passing both parts of the Qualifying Exam
- Register as MAE 840 after becoming a PhD candidate (usually after PhD proposal is passed)
- Register as MAE 850 Research in residence (after completing the required 12 credits of dissertation through MAE 830 and MAE 840).

Qualifying Exam

Ph.D. students are required to pass a 2-part Qualifying Exam.

Part 1 of the Qualifying Exam:

It consists of a written examination (no oral exam). Each student is required to select three areas, including Methods of Analysis, out of the following six areas:

- Methods of Analysis (Level of MAE 601) – compulsory for all students
- Mechanics of Solids (Undergraduate level)
- Fluid Mechanics (Undergraduate level)
- Heat Transfer (Undergraduate level)
- Materials (Undergraduate level)
- Control and dynamics (Undergraduate level)

A list of topics in each course will be given to the student at least one month before the Exam. All three areas will be covered in one exam of 6-hour duration (2 hours for each of the three areas) with a 30-minute break. It is expected that each student passes Part 1 of Qualifying Exam within the first year. If a student fails in one or more areas, a second chance may be given (within 3 months of the first exam).

Part 2 of the Qualifying Exam:

It consists of an oral exam before the student’s Dissertation Committee.

- The student presents a research proposal (in the form of a written report) to the Dissertation Committee after completing some preliminary research work including the Literature Review.
- Part 2 of the Qualifying Exam is to be taken within 2 years if the student has a Master’s degree in Engineering and 2.5 years if the student has only a B.S. degree in Engineering.

Ocean Engineering

About the Program

The University of Miami has a long history in Ocean Engineering. The University of Miami’s College of Engineering together with the Rosenstiel School of Marine and Atmospheric Science offered a Master of Science degree in Ocean Engineering. The program and others of its kind in the nation, were popular in the 1970s and 1980s, but fell into decline during the 1990s as national circumstances and priorities changed. In particular, opportunities in ship building and underwater acoustics, two key sectors in the field, diminished significantly. The activity in the field at UM has been primarily a PhD focused program since the late 1990s.

However, in the past decade, several major incidents – the 2010 Deep Water oil spill in the Gulf of Mexico, a series of devastating hurricanes in 2003-2005 and the Japan Tsunami have turned our collective attention to the vulnerability of the nation’s coastal infrastructure. Furthermore there have been significant demands for an increased emphasis on port and harbor security in the post-September 11 era. These events have led to a revival in the field of Ocean Engineering, albeit with a new focus and broader scope. The revival of the MS in Ocean Engineering was approved by the President of the University of Miami was approved for the fall semester of 2014. We are accepting applications for program beginning on November 1, 2013.

OCEAN ENGINEERING

Ocean Engineering concentrates on problems associated with human interaction with the ocean.

1. The ocean engineer combines competence as an engineer with both a practical experience in and theoretical understanding of the ocean.
2. The Ocean Engineering program, offered jointly with the Rosenstiel School of Marine and Atmospheric Science, is intended to lay the foundation of this competence, experience and understanding.

3. The areas of faculty specialization in this program include coastal engineering, off-shore engineering, structures, turbulence, computer modeling of fluids, acoustics, remote sensing and maritime security.

For further information click here. (http://www.rsmas.miami.edu/academics/graduate-programs/degrees/master-of-science-in-ocean-engineering/about-the-program)
Marine and Atmospheric Science

http://www.rsmas.miami.edu/grad-studies

Introduction

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School’s present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969 the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution made through the Rosenstiel Foundation to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of 70 scientists who conduct sponsored research while offering graduate studies leading to the Master of Professional Science, Master of Science and Doctor of Philosophy degrees. The School offers curricula in atmospheric sciences, marine ecosystems and society, marine biology and ecology, marine geology and geophysics, meteorology and physical oceanography, ocean engineering and ocean sciences. The School also offers undergraduate programs leading to the Bachelor of Science in Marine and Atmospheric Science degree.

The Rosenstiel School uses multiple laboratory and high-performance computing facilities and a state-of-the-art catamaran.

The Marine Technology and Life Sciences Seawater Complex (MTLSSC), opened in 2014, houses studies that rely on seawater for observing air-sea interactions in a controlled environment and for holding, spawning and rearing marine organisms. This complex is the centerpiece of an updated Rosenstiel School campus.

The catamaran, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School has been in service since 2000. The 96-foot-long catamaran is able to explore the deep ocean as well as normally inaccessible shallow environments such as reefs, mangroves and grassbeds.

Degree Programs

The Rosenstiel School is made up of seven academic programs. These are:

- Atmospheric Sciences
- Marine Ecosystems and Society
- Marine Biology and Ecology
- Marine Geology and Geophysics
- Meteorology and Physical Oceanography
- Ocean Engineering
- Ocean Sciences

In conjunction with the University of Miami School of Law, the Department of Marine Ecosystems and Society at the Rosenstiel School also offers a joint degree program in Law and Marine Affairs. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and a Master of Professional Science in Marine Affairs and Policy from Rosenstiel.

The College of Engineering, together with the Rosenstiel School, offers a Master of Science degree in Ocean Engineering. Applicants for this graduate program apply directly to the College of Engineering.

Admission requirements and undergraduate preparation recommendations for all graduate programs are available at www.rsmas.miami.edu.

Degree Requirements

The Master of Professional Science (MPS) Program

The Master of Professional Science (M.P.S.) degree is offered in the disciplines of Marine Ecosystems and Society (Aquaculture Management, Coastal Zone Management, Coastal Sustainability, Exploration Science, Marine Conservation, Fisheries Management and Conservation, and Underwater Archaeology), Marine Biology and Ecology (Marine Mammal Science and Tropical Marine Ecosystem Management), Atmospheric Sciences (Broadcast Meteorology, Computational Meteorology and Oceanography, Weather, Climate and Society, and Weather Forecasting), and Ocean Sciences (Applied Remote Sensing and Natural Hazard and Catastrophes). It is expected that the normal time for completion of degree requirements for the Master of Professional Science degree will be ~ 15 months of full-time study.

Credit Hour Requirements

Students in the Master of Professional Science Program are required to complete 24 course credit hours and 6 internship credit hours. Within each track, there are compulsory classes and electives. Coursework is multidisciplinary and thus will be accepted from multiple departments. As the terminal part of the degree, students must complete an internship with an approved agency, institution, or business, culminating in a final report.

Comprehensive Examination

A comprehensive examination is required of all M.P.S. students after completing at least 18 course credit hours and prior to beginning an internship. In most cases, the exam will be written and will be based on M.P.S. coursework or the common body of knowledge relevant to each track. However, each division determines the content and form of the examination and establishes the test date for its students in a given year-class according to general school guidelines. In the event of a failure, a student may be re-examined once, upon the advice of the student’s advisor and at the discretion of the faculty of the division. If granted, the re-examination must be given before the end of the following semester. The Graduate Studies Office should receive written notification of the examination results. Students who fail the re-examination are subject to dismissal from the school.

Internship

Each student will be required to complete an internship with an organization engaged in some activity associated with marine and
Committee.

simply by fulfilling requirements. This right is reserved for the student's

directions. No student gains the right to be recommended for the degree

Committee should prepare a short report on progress and research
directions. No student gains the right to be recommended for the degree

at least annually to review the student's progress, and the student and

should meet at least annually to review the student’s progress, and the student and

Committee should prepare a short report on progress and research
directions. No student gains the right to be recommended for the degree

by the Committee Chair and must carry the endorsement of the Program

Director, and forwarded to GSO. Proposed changes to the

Committee form should be completed, signed by all members and

the Program Director, and forwarded to GSO. Proposed changes to the

membership of a Committee must be approved by the Committee Chair

and must carry the endorsement of the Program Director, before being

forwarded to GSO. The Committee should meet at least annually to

review the student’s progress, and the student and Committee should

prepare a short report on progress and research directions. No student

gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved for the student's Committee.

The M.S. Program

It is expected that the normal time for completion of degree requirements

for the Masters of Science degree will be two years of full-time study.

Credit Hour Requirements

24 graduate course credit hours are required for the Master of Science
degree. All students are required to take the Research Ethics Course

(RSM 700). In addition, the student must enroll for a total of 6 credit

hours of thesis research (810).

Comprehensive Examination

A comprehensive examination is required by the end of the third

semester. The exam can be written, oral or both. Each program
determines the content and form of the examination, and establishes
the test date for its students in a given year-class. The Graduate Studies
Office receives written notification of the results via a form completed
by the Program Director. In the event of a failure, a student may be
re-examined once, upon the advice of the student’s advisor and/or
committee, and at the discretion of the Program Academic Committee
with advice from the Comprehensive Exam Committee. If granted, the
re-examination must be given before the end of the following semester.

Students who fail the re-examination are subject to dismissal from the school.

Thesis

A thesis is normally required for the Master of Science degree in marine

and atmospheric science. A public oral defense of the thesis must take

place.

The “Supervisory Committee” and “Dissertation Committee” described in

the UM handbook are commonly known as the student’s “Committee” at

RSMAS, and are normally the same committee. Once the Committee

is formed (typically in the second year), the “Appointment to Student’s

Committee” form should be completed, signed by all members and

the Program Director, and forwarded to GSO. Proposed changes to the

membership of a Committee must be approved by the Committee Chair

and must carry the endorsement of the Program Director, before being

forwarded to GSO. The Committee should meet at least annually to

review the student’s progress, and the student and Committee should

prepare a short report on progress and research directions. No student

gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved for the student’s Committee.

The PH.D. Program

The Doctor of Philosophy degree is offered in applied marine physics,

marine biology and fisheries, marine and atmospheric chemistry, marine
geology and geophysics, and meteorology and physical oceanography.

It is expected that the total time to complete the requirements for the

Ph.D. degree will normally be four years of full-time study from the date of

receipt of the M.S. degree or, if the M.S. is bypassed, five years of full-
time study from the date of admission with a bachelor’s degree.

Credit Hour Requirements

Each program sets their own requirements with regard to course and

research credits as stated in the Program Handbook, as long as a

minimum of 60 credits are taken. Students entering with a Masters
degree can transfer up to 24 credits. Students with prior graduate
coursework can transfer course credits using the Petition to Transfer
form. In either case, students must fill out an Academic Plan form in the

first semester in residence if they wish to transfer prior credit.

All RSMAS Ph.D. students are required to take Research Ethics Course

(RSM 700).

If a student has been permitted to bypass the M.S. degree, 6 credits of

PGM 810 will be converted to PGM 830 (where “PGM” is the program

abbreviation).

Dissertation Committee

The “Supervisory Committee” and “Dissertation Committee” described in

the UM handbook are commonly known as the student’s “Committee” at

RSMAS, and are normally the same committee. Once the Committee

is formed (typically in the second year), the “Appointment to Student’s

Committee” form should be completed, signed by all members and

the Program Director, and forwarded to GSO. Proposed changes to the

membership of a Committee must be approved by the Committee Chair

and must carry the endorsement of the Program Director, before being

forwarded to GSO. The Committee should meet at least annually to

review the student’s progress, and the student and Committee should

prepare a short report on progress and research directions. No student

gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved for the student’s Committee.

Comprehensive Examination

A comprehensive examination is required by the end of the third

semester. The exam can be written, oral or both. Each program
determines the content and form of the examination, and establishes
the test date for its students in a given year-class. The Graduate Studies
Office receives written notification of the results via a form completed
by the Program Director. In the event of a failure, a student may be
re-examined once, upon the advice of the student’s advisor and/or
committee, and at the discretion of the Program Academic Committee
with advice from the Comprehensive Exam Committee. If granted, the
re-examination must be given before the end of the following semester.

Students who fail the re-examination are subject to dismissal from the school.

Qualifying Examination

The written qualifying examination is normally administered around the
time of the proposal defense. In addition, an oral qualifying examination
may be required by the program or the student’s committee. The
committee will prepare and administer the written examination (and oral
examination, if required) within the program guidelines. A form notifying
the Graduate Studies Office of the outcome of the Qualifying Exam will be
submitted by the Committee Chair and approved by the Program Director.
Dissertation Proposal
The dissertation proposal, containing the following items, must be defended and approved by the student’s committee:

1. tentative title
2. statement of the problem and objectives
3. methodology, including equipment and facilities required
4. timetable

A Proposal Approval Form must accompany the proposal and be signed by the members of the student’s committee and Program Director.

Admission to Candidacy
Upon completion of the following requirements, the student is admitted to candidacy:

1. have an approved committee on file in Graduate Studies
2. successfully pass the comprehensive examination
3.submit and successfully defend the dissertation proposal
4. successfully pass the qualifying examination
5. have a 3.0 average in all credit hours earned (≥ 12 credit hours although some programs require more)
6. remove all “I” or deficiencies

An application for Admission to Candidacy must be completed. All doctoral students must be admitted to candidacy at least one semester prior to the one they intend to graduate.

Dissertation
Students must be registered for research credits during the semester of defense. Defense must occur before the last day of the semester.

An Announcement of Defense form, signed by all committee members, must be turned in to the Graduate Studies Office by the student at least 14 days prior to the defense date. The student is responsible for obtaining signatures from all Committee members and program director. Each Committee members must be given no less than 14 days to review material prior to signing the Announcement of Defense form. Thus, the student must provide the committee with a complete version of the dissertation 28 days prior to the desired defense date. A Student Payroll End Date form (attached to the Announcement of Defense form), should also be submitted at the same time.

Students who wish to have their Defenses announced to the broader UM community should also fill out the University of Miami Graduate School defense notice form (http://www.miami.edu/gs/index.php/graduate_school/current_students/electronic_theses_%20dissertations/before_you_defend). Note that this cannot be used as a substitute for the RSMAS Announcement of Defense form.

The committee chair should notify GSO, in writing, of the outcome of the defense.

Atmospheric Sciences
- Dept. Code: ATM

Degree Programs
The Department of Atmospheric Sciences (ATM) of the Rosenstiel School of Marine and Atmospheric Science (RSMAS) is designed to prepare students with the tools, training, and education necessary to tackle critical research problems in the atmospheric sciences today. Our faculty (http://www.rsmas.miami.edu/people/faculty-index/?d=atmospheric-sciences) are experts in a wide range of research areas (http://www.rsmas.miami.edu/academics/graduate-programs/degrees/atmospheric-sciences/research), including tropical meteorology, climate dynamics, cloud and aerosol processes, and atmospheric chemistry. Their expertise and guidance and our world-class facilities (http://www.rsmas.miami.edu/academics/graduate-programs/degrees/atmospheric-sciences/resources) prepare our students for successful careers in the atmospheric sciences and related fields.

Three types of degrees are awarded by the Department:

1. Master of Science,
   • which requires 30 credit hours, including 24 credit hours in courses and 6 research credit hours.
2. Doctor of Philosophy,
   • which requires 60 credit hours, including a minimum of 26 course credit hours and a minimum of 12 research credit hours.
3. the Master of Professional Science (http://mps.rsmas.miami.edu),
   • which requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.

The most competitive ATM applicants have a strong foundation in the physical sciences and a bachelor’s and/or master’s degree in physics, mathematics, chemistry, meteorology, atmospheric science, or other related sciences.

MPS Degrees
The Master of Professional Science (MPS) degree prepares students for science careers in industry, government, and non-profit organizations, where employment demands are growing. MPS degrees were developed and implemented nationally in response to employer demands for well-rounded, highly trained employees with a breadth of knowledge and practical skills to address emerging environmental issues and improve the management of natural and cultural resources. The curriculum is structured to allow students to complete their degree in as little as 12 months, with the training and real-world experience necessary to prepare them for careers in today’s professional science job market.

There are four A (http://mps.rsmas.miami.edu/requirements) atmospheric sciences (http://mps.rsmas.miami.edu/requirements) (ATM) tracks for the Master of Professional Science (http://mps.rsmas.miami.edu) degree (M.P.S.).

M.P.S in Broadcast Meteorology
Broadcast Meteorology (BME) (http://mps.rsmas.miami.edu/degree-program/broadcast-meteorology)

This track option prepares student for both on-camera and behind-the-scenes careers in broadcast meteorology, as well as the opportunity to develop the knowledge and training necessary to enter the broader field of science journalism.
### Year One

#### Fall
- **ATM 651**: Introduction to Atmospheric Science
- **ATM 662**: Advance Weather Forecasting
- **JMM 607**: Broadcast Journalism
- **JMM 605 or 627**: News Technologies or Television News Producing

#### Spring
- **ATM 532**: Broadcast Meteorology
- **JMM 417**: Advanced Broadcast Journalism
- **ATM 765**: General Circulation of the Atmosphere
- **RSM 620**: Climate and Society

#### Summer
- **ATM 805**: MPS Internship

#### Credit Hours
- **Year One**: 12

### Additional Elective Options
- **RSM 620**: Climate and Society
- **ATM 731**: Air-Sea Interaction
- **ATM 732**: Climate Dynamics
- **ATM 663**: Mesoscale Meteorology and Severe Storms
- **ATM 765**: General Circulation of the Atmosphere
- **ATM 611**: Geophysical Fluid Dynamics I
- **ATM 712**: Large Scale Ocean Circulation Models and Observations
- **ATM 633**: Atmospheric Boundary Layer
- **ATM 661**: Tropical Atmosphere and Ocean
- **ATM 660**: Tropospheric Chemistry I
- **JMM 633**: Social Media

### Total Credit Hours
- **Year One**: 30

---

### M.P.S. in Weather Forecasting

#### Weather Forecasting (WFC) (http://mps.rsmas.miami.edu/degree-program/weather-forecasting)

This track is designed for students who have an undergraduate degree in meteorology and seek graduate level training and experience in applied weather forecasting.

#### Credit Hours
- **Year One**: 3

### Additional Elective Options
- **ATM 624**: Applied Data Analysis
- **ATM 765**: General Circulation of the Atmosphere
- **CSC 632**: Introduction to Parallel Computing
- **ATM 616**: Numerical Weather Prediction

---

### M.P.S. in Computational Meteorology and Oceanography

Computational Meteorology and Oceanography (CMO) (http://mps.rsmas.miami.edu/degree-program/computational-meteorology-oceanography)

The degree track in Computational Meteorology and Oceanography is designed to assist students in the pursuit of advanced training in the computational science aspects of meteorology and physical oceanography.

#### Credit Hours
- **Year One**: 3

### Additional Elective Options
- **ATM 624**: Applied Data Analysis
- **ATM 765**: General Circulation of the Atmosphere
- **CSC 632**: Introduction to Parallel Computing
- **ATM 616**: Numerical Weather Prediction
M.P.S. in Weather, Climate, and Society

M.S. in Atmospheric Sciences

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in this Handbook or by the Program Director.

All RSMAS courses are listed on the GSO website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the ATM Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the ATM Faculty.

Additional ATM requirements:

- Acc 671 Accounting for Decision Making (3)
- Rsm 670 Carbon and Climate (3)
- ATM 732 Climate Dynamics (3)
- MES 720 Coastal Law and Policy (3)
- MES 618 Coastal Zone Management (3)
- ATM 663 Mesoscale Meteorology and Severe Storms (3)
- MES 620 Economics of Natural Resources (3)
- FIN 602 Fundamentals of Finance (3)
- ATM 611 Geophysical Fluid Dynamics I (3)
- MES 662 Spatial Analysis: Intermediate Course in Marine GIS (3)
- MES 710 International Ocean Law And Governance (3)
- MES 660 Introduction to Marine Geographic Information Systems (3)
- MGT 600 Managing Responsible Behavior in Organizations (3)
- ATM 633 Atmospheric Boundary Layer (3)
- MES 616 Ocean Policy and Development and Analysis (3)
- RSM 645 Scientific Communication (3)
1. (a) Comprehensive Examination: Grade of MASTERS PASS, PASS or HIGH PASS

2. (b) Seminar: Attending the ATM seminar series every semester and giving at least one 15-minute presentation each year after the Comprehensive Examination

ATM M.S. students are required to complete at least 24 course credits. The required courses for ATM M.S. students are identical to those for ATM Ph.D. students. The remaining course credits can be obtained by taking other graduate courses offered by ATM, RSMAS, or UM.

Material from the required core courses will appear on the Comprehensive Examination for M.S. candidates (along with material from other courses from the first year).

M.S. candidates in ATM are not required to take a class outside ATM.

M.S. candidates should submit their thesis proposal to be approved by their thesis committee during the first Spring semester following their Comprehensive Examination. A meeting between the student and the committee to discuss the proposal is expected.

Expectations and Timeline for M.S. Degree

Year 1. End of Spring: Comprehensive Exam Year 2. Fall: Form M.S. Committee
Fall or Spring: M.S. Thesis Proposal

3. Expectation: Preliminary results and a clear research plan and timeline.

Spring or Summer: M.S. Thesis Submission and Defense

4. Expectation: Research results of quality equivalent to at least one full journal article.

Comprehensive Examination (end of first year)

These guidelines are applicable for students who will enter RSMAS during or after Academic Year 2015-16. Students who have completed their Comprehensive Examinations prior to Fall 2015 will not need to follow these guidelines.

All M.S. and Ph.D. students are required to take the Comprehensive Examination. For full-time students, the Comprehensive Examination should be taken before the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the ATM Graduate Program Director and the instructors (or assignees) of the first year courses taken by the students.

The purpose of this examination is to evaluate students’ understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed to the M.S. or Ph.D. program.

The Comprehensive Examination will consist of an oral part and a written part. The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions. The oral part, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.

The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.

A student’s performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of HIGH PASS, PASS, MASTERS PASS or FAIL is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.

High Pass: for students with no identifiable relevant weaknesses.

Pass: Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student’s academic career. **Note: This is a new category where a student is NOT required to defend a Masters thesis as was the case previously, but the student and advisor may of course still decide that a Masters in the appropriate next step.

Masters Pass: Students with this result will be required to defend a Masters thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.

Fail: Students with this result will have an opportunity to re-take the exam once.

PH.D. in Atmospheric Sciences

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in this Handbook or by the Program Director.

All RSMAS courses are listed on the GSO website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the ATM Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the ATM Faculty.

Additional ATM requirements:

1. (a) Comprehensive Examination: Grade of MASTERS PASS, PASS or HIGH PASS

2. (b) Seminar: Attending the ATM seminar series every semester and giving at least one 15-minute presentation each year after the Comprehensive Examination

ATM M.S. students are required to complete at least 24 course credits. The required courses for ATM M.S. students are identical to those for ATM Ph.D. students. The remaining course credits can be obtained by taking other graduate courses offered by ATM, RSMAS, or UM.

Material from the required core courses will appear on the Comprehensive Examination for M.S. candidates (along with material from other courses from the first year).

M.S. candidates in ATM are not required to take a class outside ATM.

M.S. candidates should submit their thesis proposal to be approved by their thesis committee during the first Spring semester following
their Comprehensive Examination. A meeting between the student and the committee to discuss the proposal is expected.

Expectations and Timeline for M.S. Degree

Year 1. End of Spring: Comprehensive Exam Year 2. Fall: Form M.S. Committee

Fall or Spring: M.S. Thesis Proposal

3. Expectation: Preliminary results and a clear research plan and timeline.

Spring or Summer: M.S. Thesis Submission and Defense

4. Expectation: Research results of quality equivalent to at least one full journal article.

Comprehensive Examination (end of first year)

These guidelines are applicable for students who will enter RSMAS during or after Academic Year 2015-16. Students who have completed their Comprehensive Examinations prior to Fall 2015 will not need to follow these guidelines.

All M.S. and Ph.D. students are required to take the Comprehensive Examination. For full-time students, the Comprehensive Examination should be taken before the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the ATM Graduate Program Director and the instructors (or assignees) of the first year courses taken by the students.

The purpose of this examination is to evaluate students’ understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed to the M.S. or Ph.D. program.

The Comprehensive Examination will consist of an oral part and a written part. The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions. The oral part, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.

The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.

A student’s performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of HIGH PASS, PASS, MASTERS PASS or FAIL is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.

High Pass: for students with no identifiable relevant weaknesses.

Pass: Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student’s academic career. **Note: This is a new category where a student is NOT required to defend a Masters thesis as was the case previously, but the student and advisor may of course still decide that a Masters in the appropriate next step.

Masters Pass: Students with this result will be required to defend a Masters thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.

Fail: Students with this result will have an opportunity to re-take the exam once.

Marine Biology and Ecology

http://www.rsmas.miami.edu/academics/graduate-programs/degrees/marine-biology-ecology/

Dept. Code: MBE

Degree Programs

The Marine Biology and Ecology academic program focuses on a wide range of field, laboratory, and theoretical coursework in a range of research areas, such as coral reef studies, biological oceanography and marine biology, fisheries biology, and the biology and behavior of marine animals.

MBE faculty, students, and their many international collaborators participate in multi-institutional, multi-disciplinary research programs. The UM Rosenstiel School hosts many research centers and groups, such as the experimental hatchery, The National Center for Coral Reef Research, the Rescue-a-Reef citizen science initiative, and the world-renowned NIH/University of Miami National Resource for Aplysia.

Graduate students can choose from a diversity of research areas and coursework taught by internationally recognized scientists studying corals and climate change, fisheries biology, and conducting biomedical research.

The Program in Marine Biology and Ecology offers primarily the PhD degree, since more funding opportunities in faculty laboratories are specifically for PhD students. MBE does not require a prior MS degree for the PhD program. It is highly recommended that prospective PhD students make contact with specific faculty to inquire about opportunities in their laboratories as well as undergraduate preparations necessary before they apply.

Funding opportunities for the MS program are very limited, and very few MS students are accepted. Prospective MS students must contact faculty before they apply to inquire about opportunities.

Academic requirements for both degrees require independent research, but the scope of the research is greater for the PhD degree. Your success in matching your scientific interest with the research area of one of our faculty is one of the most important criteria used in evaluating prospective students for graduate studies in MBE at RSMAS. Most applicants are interested in coral reef ecology, thus competition for admission is highest in that subject.

Master of Professional Science (MPS) degrees are also available with tracks in Marine Mammal Science and Tropical Marine Ecosystem Management.

Most successful applicants have a bachelor's degree in biological sciences including a strong foundation in physical sciences (chemistry,
physics, calculus) and basic biological sciences. However, applicants with a diversity of other degrees also are successful. Applicants should contact specific faculty to discuss mutual research interests. Applicants must take the GRE, and those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550. The advanced biology test is not required. Courses in marine biology and oceanography are not necessary for entrance into the program and are not recommended if taken in place of basic biology courses.

MPS Degrees

The Master of Professional Science (MPS) degree prepares students for science careers in industry, government, and non-profit organizations, where employment demands are growing. MPS degrees were developed and implemented nationally in response to employer demands for well-rounded, highly trained employees with a breadth of knowledge and practical skills to address emerging environmental issues and improve the management of natural and cultural resources. The curriculum is structured to allow students to complete their degree in as little as 12 months, with the training and real-world experience necessary to prepare them for careers in today's professional science job market.

There are two Marine Biology and Ecology (http://mps.rsmas.miami.edu/requirements) tracks for the Master of Professional Science (http://mps.rsmas.miami.edu) degree (M.P.S.).

M.P.S. in Marine Mammal Science

Marine Mammal Science (MMS)

Students in this degree track will prepare for employment in marine mammal management (including associated ecosystems), population assessments, acoustics, and care. Please see our departmental web site (http://mps.rsmas.miami.edu/degree-program/marine-mammal-science) for more information about this track.

M.P.S. in Tropical Marine Ecosystem Management

Tropical Marine Ecosystem Management (TME)

This track provides students with advanced training in the theoretical aspects of tropical marine ecology, as well as the practical aspects needed to begin a career in this field. Please see our departmental web site (http://mps.rsmas.miami.edu/degree-program/tropical-marine-ecosystem) for more information about this track.

M.S. in Marine Biology and Ecology

The MS program in Marine Biology and Ecology have the following subject emphases, from which each student choses a relevant curriculum:

Coral Reef and Coastal Ecology employs ecological, physiological and molecular approaches to understand, conserve, manage, and restore coral reefs, seagrasses, mangroves and their associated biota.

Marine Organismal and Biomedical Science focuses on how marine organisms respond to their environment on physiological and evolutionary time scales. This research integrates whole animal and cellular studies of physiology, biochemistry, neurobiology, genomics, molecular biology, aging, pathology and toxicology to understand factors controlling these responses and to develop these systems as models for human health.

Biological Oceanography focuses on adaptations, ecological interactions, food webs, and biogeochemical cycles of the ocean.

Fisheries Science studies the direct and indirect impacts of living marine resource exploitation on marine populations, communities and habitats and investigates solutions to the problems of unsustainable, habitat-damaging and/or inefficient fishing, including the minimization of bycatch and food web disruption.

In the first year, a MS student takes required course work, passes the comprehensive exam, forms a dissertation/thesis committee, and has the first committee meeting. MS students move quickly to execute preliminary research in support of the thesis. In the second year a student and the committee agree on a dissertation/thesis proposal topic, and the student writes and defends the proposal. MS students move quickly to execute research, write the thesis, defend it, and graduate.

Documentation for committees and committee meetings must be provided to the GSO, and description of annual progress must be provided to the MBE AC.

PH.D. in Marine Biology and Ecology

The PhD program in Marine Biology and Ecology have the following subject emphases, from which each student choses a relevant curriculum:

Coral Reef and Coastal Ecology employs ecological, physiological and molecular approaches to understand, conserve, manage, and restore coral reefs, seagrasses, mangroves and their associated biota.

Marine Organismal and Biomedical Science focuses on how marine organisms respond to their environment on physiological and evolutionary time scales. This research integrates whole animal and cellular studies of physiology, biochemistry, neurobiology, genomics, molecular biology, aging, pathology and toxicology to understand factors controlling these responses and to develop these systems as models for human health.

Biological Oceanography focuses on adaptations, ecological interactions, food webs, and biogeochemical cycles of the ocean.

Fisheries Science studies the direct and indirect impacts of living marine resource exploitation on marine populations, communities and habitats and investigates solutions to the problems of unsustainable, habitat-damaging and/or inefficient fishing, including the minimization of bycatch and food web disruption.

In the first year, a PhD student takes required course work, passes the comprehensive exam, forms a dissertation/thesis committee, and has the first committee meeting. PhD students must pass qualifying exams. A successful qualifying exam admits the PhD student to candidacy. In the third year and every year thereafter, a PhD student holds a committee meeting and provides an annual progress report to the committee. Committee chair and student should collaborate on a concise description of this meeting for their files, and the chair makes an annual summary to the faculty of the student’s satisfactory progress. To graduate with a PhD requires PhD candidacy and the candidate must apply to graduate one semester prior to defending. The complete written dissertation must be made available to the dissertation committee four weeks prior to the final oral defense.

to the oral defense. The announcement of defense, indicating that the committee tentatively approves of the dissertation, must occur 2 weeks prior to the defense. The student must provide an oral presentation and defend the dissertation in public. Documentation for committees and committee meetings must be provided to the GSO, and description of annual progress must be provided to the MBE AC. It is expected that a student will defend the PhD five years after entering the MBE graduate student program (four years if they hold a Master’s degree).

Marine Ecosystems and Society

- Dept. Code: MES

Degree Programs

Marine Ecosystems and Society (MES) students undertake basic and applied research and training activities that contribute to policy development and management of marine resources and tailor their course selections to match their individual career objectives. Graduates are equipped to deal with issues of conservation, preservation, allocation, and utilization of natural resources. MES also offers academic tracks in aquaculture management and underwater marine cultural resources.

Program areas include aquaculture science, technology, management, and environmental issues; integrated coastal zone management; marine resource economics; political and environmental ecology; underwater marine cultural resources; environmental, coastal, and ocean law; fisheries and aquaculture management; ocean policy and development; and marine geographic information systems.

MES offers Doctor of Philosophy (PhD), Master of Science (MS), and Master of Professional Science (MPS) degrees.

The MS degree program is for those wishing to pursue careers in marine policy and management. The MS can also lead into PhD specialization in marine policy, environmental law, maritime business, economics, anthropology, or environmental education or a PhD in pure sciences. The MS degree requires completion of 24 course credits and 6 thesis credits.

Applicants to the MS and PhD programs must possess a BS or BA in any relevant academic field. All applicants are required to take the Graduate Record Examination (GRE). Those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550.

MPS Degrees

The MPS degree requires completion of 24 course credits and 3 internship credits.

The Master of Professional Science (MPS) degree prepares students for science careers in industry, government, and non-profit organizations, where employment demands are growing. MPS degrees were developed and implemented nationally in response to employer demands for well-rounded, highly trained employees with a breadth of knowledge and practical skills to address emerging environmental issues and improve the management of natural and cultural resources. The curriculum is structured to allow students to complete their degree in as little as 12 months, with the training and real-world experience necessary to prepare them for careers in today’s professional science job market.

There are eight Marine Ecosystems and Society (MES) tracks for the Master of Professional Science (MPS) degree (http://mps.rsmas.miami.edu). The UM School of Law and the Rosenstiel School offer a joint degree program in law and marine ecosystems and society. Upon completion of this program, a student earns a Juris Doctor degree from the UM School of Law and the MPS degree in Marine Ecosystems and Society from the Rosenstiel School. Students completes requirements of both degrees within three-and-a-half years in an intensive program of six semesters and two full summers. This program is geared toward students who want a career in the field of law with a specialization in marine and environmental issues.

A dual BA/MPS program enables qualified students from the undergraduate marine affairs program to earn a BA and an MPS degree in Marine Ecosystems and Society in 5 years.
B.A./M.P.S. in Marine Ecosystems and Society

**B.A. / M.P.S.**

Marine Ecosystems and Society, in cooperation with the Undergraduate Marine and Atmospheric Science Program, also offers a five-year B.A./M.P.S. Program in Marine Affairs. This program enables qualified students to earn a B.A. in Marine Affairs in four years with the opportunity to earn an M.P.S. with only one additional year. Conditional acceptance to the MPS program is based on the student's GPA at the end of their sophomore year. Students must then take GRE exams and apply for acceptance to the graduate program at Rosenstiel during their junior year.

**J.D./M.P.S. in Marine Ecosystems and Society**

The University of Miami School of Law and the Rosenstiel School of Marine and Atmospheric Science (RSMAS) offer a joint degree program in law and marine ecosystems and society. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Professional Science in Marine Ecosystems and Society (http://mps.rsmas.miami.edu) from RSMAS, ranked as one of the top five geoscience institutions in the United States.

**M.P.S. in Aquaculture**

**Aquaculture (AQU) (http://mps.rsmas.miami.edu/degree-program/aquaculture)**

The Professional Masters Program in Aquaculture focuses on the environmental, technological, social, economic, legal, and political aspects of sustainable aquaculture. The program covers all stages of planning and development, from site and species selection to feasibility studies, resource evaluation, hatchery and grow-out technology, and commercialization.

**M.P.S. in Coastal Sustainability**

**Coastal Sustainability (CSU) (http://mps.rsmas.miami.edu/degree-program/coastal-sustainability)**

This track provides students with advanced training in the expanding field of sustainability, with a combined focus on the practical aspects of systems management and the theoretical understanding of whole-systems design and coastal resiliency.

M.P.S. in Coastal Zone Management

Coastal Zone Management (CZM) (http://mps.rsmas.miami.edu/degree-program/coastal-management)

Students will be introduced to the legal and governance frameworks on topics such as coastal fisheries management, marine protected areas, port management, tourism development, environmental impact assessment, and oil exploration.

There is no specific coursework required in this track. Curriculum will be decided on a case-by-case basis during academic advising with Professor Die

Potential Courses

- M.E.S. 601 Political Ecology of Marine Management 3
- M.E.S. 602 Economics of Natural Resources 3

M.P.S. in Exploration Science

Exploration Science (ESC) (http://mps.rsmas.miami.edu/degree-program/exploration-science)

Exploration Science is the applied practice and study of field research using a variety of methods, technologies, and approaches to drive question-based scientific endeavors.
### M.P.S. in Fisheries Management and Conservation

#### Fisheries Management and Conservation (FMC)
(http://mps.rsmas.miami.edu/degree-program/fisheries-conservation-management)

This track allows students to develop the professional skills required to be a fisheries scientist with curriculum options in various relevant areas of interest, such as fisheries management, fisheries surveys, and quantitative fisheries.

### M.P.S. in Marine Conservation

**Marine Conservation (MCO)** ([http://mps.rsmas.miami.edu/degree-program/marine-conservation](http://mps.rsmas.miami.edu/degree-program/marine-conservation))

The goal of the track is to advance conservation efforts, scientific literacy and communication, public outreach and integration, and education within the marine realm. Practical aspects of the program will vary between individuals but may include exposure to field methods and techniques, GIS and remote sensing of shallow water marine environments, the development of environmental impact statements, coastal law, the development of social media, scientific communication, and statistics for environmental management.

### M.P.S. in Underwater Archaeology

**Underwater Archaeology (UA)** ([http://mps.rsmas.miami.edu/degree-program/underwater-archaeology](http://mps.rsmas.miami.edu/degree-program/underwater-archaeology))

The MPS Underwater Archaeology track, focusing on the management of underwater cultural heritage (MUCH), is primarily technical, and will introduce participants to the legal and governance frameworks in this increasingly important discipline. Coursework will integrate topics such as legal aspects of submerged cultural resource management, marine protected areas, environmental impact assessment, and remote sensing surveys. While not a requirement, the opportunity to become an AAUS Science Diver is also available. Students also will have opportunities to engage in internships with private, public or non-governmental agencies (NGO’s) and conduct relevant fieldwork.

Credit Hours: 10-13
M.S. in Marine Ecosystems and Society

The MS degree program is for those wishing to pursue careers in marine policy and management. The MS can also lead into PhD specialization in marine policy, environmental law, maritime business, economics, anthropology, or environmental education or a PhD in pure sciences. The MS degree requires completion of 24 course credits and 6 thesis credits. Applicants to the MS and PhD programs must possess a BS or BA in any relevant academic field. All applicants are required to take the Graduate Record Examination (GRE). Those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550.

Program Areas:
- Aquaculture science, technology, management, and environmental issues
- Integrated coastal zone management
- Marine resource economics
- Political and environmental ecology
- Underwater marine cultural resources
- Environmental, coastal, and ocean law
- Fisheries and aquaculture management
- Ocean policy and development
- Marine Geographic Information Systems

Marine Geosciences

- Dept. Code: MGS

Degree Programs

The Marine Geosciences (MGS) graduate program is focused on studying the geology, geophysics, and geochemistry of the earth system, beneath, within, and above the oceans.

Students work closely with faculty at the forefront of research on earthquakes, volcanoes, plate tectonics, hydrothermal seafloor vents, and paleoclimate. MGS faculty and students also emphasize interdisciplinary study where geological phenomena interact with or are influenced by processes generally studied in other disciplines, such as ocean currents, climate, and biological evolution.

MGS research uses pioneering remote sensing techniques to assess the earth’s crustal movement and sedimentation in coastal zones. MGS degree programs are at the forefront of understanding carbonate deposit systems, and paleoclimate researchers are using stromatolites and reefs to learn more about past climate change by studying the interaction between biological and geological processes. Ocean observing systems, such as hydrological observatories, are playing prominently in research efforts as well.

M.S. and Ph.D. degrees. Interdisciplinary studies with expertise in physics, chemistry, mathematics, and/or biology are encouraged.

A certificate program is also offered for working professionals who seek specialization on applied carbonate geology.

M.S. in Marine Geosciences

http://www.rsmas.miami.edu/academics/graduate-programs/degrees/marine-geosciences/

Specific MGS Course Requirements and Recommendations

1. Course credits for completion of a Ph.D. in MGS: Whereas the RSMAS requirement is for 24 course credits, the MGS program requires a total of 36 course credits for the Ph.D. Of these, 3 course credits must be from outside of the MGS course curriculum.

2. Course credits for completion of an M.S.: 24 course credits that may all be from the MGS course curriculum.
M.S. in Meteorology and Physical Oceanography

Research Areas

Climate Variability and Change
Research covers a wide range of topics, both global and regional. We study climate variations on time scales from sub-seasonal to interannual to decadal, as well as ancient (paleo) climates and future climate changes. Efforts include analysis of satellite data, field observations and global data products, and a large focus on numerical climate modeling.

Large-Scale Ocean Circulation
Research covers a variety of topics, both global and regional. We study climate variations on time scales from sub-seasonal to interannual to decadal, as well as ancient (paleo) climates and future climate changes. Efforts include analysis of satellite data, field observations and global data products, and a large focus on numerical climate modeling.

Tropical Dynamics
The tropics have global impacts, from weather effects and hurricanes to El Niño and other climate variations. Research involves the myriad interactions of water vapor and clouds with air and wind and the underlying tropical oceans and landscapes. To see a sampling, use the forward arrow on this page (http://prezi.com/yfreabsbifndv/rsmas-mpo-themes-tdyn).

Hurricanes
RSMAS/MPO is ideally situated for the study of hurricanes through its location in Miami and its proximity to the NOAA Hurricane Research Division and National Hurricane Center. The research includes high-resolution coupled atmosphere-wave-ocean modeling, hurricane dynamics, and novel adaptive observing and data assimilation methods.

Regional and Coastal Oceanography
Studies focus on key processes in coastal and shelf areas, with special interest in regional seas around South Florida, the Gulf of Mexico and the Caribbean. Particular projects address events following the Deepwater Horizon oil spill, air-sea interaction associated with hurricanes, shelf dynamics, mixing, mesoscale and submesoscale circulations. Particular strengths include experimental oceanography, numerical modeling with a variety of comprehensive and conceptual models, data analysis and assimilation, and theoretical studies.
Clouds, Aerosol, Precipitation, and Radiation Interactions (CAPRI)
The cloud microphysical processes important to the global energy balance occur at spatial and time scales of seconds and meters. MPO studies such processes with aircraft and surface-based remote sensing (see this website (http://carob.rsmas.miami.edu)), in situ field measurements, and large-eddy simulations, and reconciles them with analyses done at the larger scales of satellites and regional climate models.

Satellite Remote Sensing
RSMAS hosts a real-time satellite reception and analysis facility. MPO is involved with retrieval algorithm development, validation and analysis of sea surface temperature, ocean color, sea surface topography and surface winds. These are analyzed in the context of climate research.

Ph.D. in Meteorology and Physical Oceanography
Research Areas
The MPO program has a strong foundation in several areas in atmospheric and ocean sciences, including those presented below. Research is conducted using a variety of techniques from direct observation to theoretical and numerical modeling. Students come from a diverse range of educational backgrounds, including marine science, meteorology, physics, mathematics, and engineering.

Climate Variability and Change
Research covers a wide range of topics, both global and regional. We study climate variations on time scales from sub-seasonal to interannual to decadal, as well as ancient (paleo) climates and future climate changes. Efforts include analysis of satellite data, field observations and global data products, and a large focus on numerical climate modeling.

Large-Scale Ocean Circulation
Research covers a variety of topics, highlighting the ocean’s role in climate, including dynamics and variability of boundary currents, meridional overturning and tropical circulations, as well interaction between large-scale, mesoscale and submesoscale circulations. Particular strengths include experimental oceanography, numerical modeling with a variety of comprehensive and conceptual models, data analysis and assimilation, and theoretical studies.

Tropical Dynamics
The tropics have global impacts, from weather effects and hurricanes to El Niño and other climate variations. Research involves the myriad interactions of water vapor and clouds with air and wind and the underlying tropical oceans and landscapes. Hurricanes
RSMAS/MPO is ideally situated for the study of hurricanes through its location in Miami and its proximity to the NOAA Hurricane Research Division and National Hurricane Center. The research includes high-resolution coupled atmosphere-wave-ocean modeling, hurricane dynamics, and novel adaptive observing and data assimilation methods.

Regional and Coastal Oceanography
Studies focus on key processes in coastal and shelf areas, with special interest in regional seas around South Florida, the Gulf of Mexico and the Caribbean. Particular projects address events following the Deepwater Horizon oil spill, air-sea interaction associated with hurricanes, shelf dynamics, mixing, submesoscale variability, biological-physical interactions in ecosystems, coral reef studies and the Everglades Restoration. The research involves high-resolution numerical modeling, experimental studies and data assimilation.

Clouds, Aerosol, Precipitation, and Radiation Interactions (CAPRI)
The cloud microphysical processes important to the global energy balance occur at spatial and time scales of seconds and meters. MPO studies such processes with aircraft and surface-based remote sensing (see this website (http://carob.rsmas.miami.edu)), in situ field measurements, and large-eddy simulations, and reconciles them with analyses done at the larger scales of satellites and regional climate models.

Satellite Remote Sensing
RSMAS hosts a real-time satellite reception and analysis facility. MPO is involved with retrieval algorithm development, validation and analysis of sea surface temperature, ocean color, sea surface topography and surface winds. These are analyzed in the context of climate research.

Ocean Sciences
Dept. Code: OCE

Degree Programs
The mission of the Ocean Sciences (OCE) graduate program is to provide our students with specialized knowledge in important ocean science sub-disciplines as well as a broad understanding of the ocean as a key component of the Earth System. Our students advance the understanding of physical, chemical, and biological processes in the ocean and their interactions. Students learn first-hand about instrumentation and methods to measure the ocean using both in-situ and space-based sensors, and about laboratory, analytical, and numerical models to understand oceanic processes. Our graduates develop into international leaders of ocean research, into teachers and communicators of ocean sciences, and into leaders and advisors of marine education, policy, and conservation.

MPS Degrees
The Master of Professional Science (MPS) degree prepares students for science careers in industry, government, and non-profit organizations, where employment demands are growing. MPS degrees were developed and implemented nationally in response to employer demands for well-rounded, highly trained employees with a breadth of knowledge and practical skills to address emerging environmental issues and improve the management of natural and cultural resources. The curriculum is structured to allow students to complete their degree in as little as 12 months, with the training and real-world experience necessary to prepare them for careers in today’s professional science job market.

There are two Ocean Sciences (http://mps.rsmas.miami.edu/requirements) (OCE) tracks for the Master of Professional Science (http://mps.rsmas.miami.edu) degree (M.P.S.).
Degrees Offered

- Doctor of Philosophy (Ph.D.) with concentrations (http://www.rsmas.miami.edu/academics/graduate-programs/degrees/ocean-sciences/research-concentrations) in Ocean Dynamics, Biophysical Interactions, Air-Sea Interactions and Remote Sensing, and Marine Biogeochemistry
- Master of Science (M.S.)
- Master of Professional Science (http://mps.rsmas.miami.edu) (M.P.S.) with tracks in Applied Remote Sensing and Natural Hazards and Catastrophes

Requirements

The best OCE applicants have a strong foundation in science, with a bachelor's and/or master's degree in physics, mathematics, chemistry, biology, engineering, geophysics, oceanography, marine science, or a related field. Applicants must take the GRE. Those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550.

M.P.S. in Applied Remote Sensing (ARS)

The MPS track “Applied Remote Sensing” (http://mps.rsmas.miami.edu/degree-program/applied-remote-sensing) offered by the University of Miami’s Rosenstiel School of Marine and Atmospheric Science (RSMAS) and Center for Southeastern Tropical Advanced Remote Sensing (CSTARS) is tailored to the needs of students who seek to gain theoretical knowledge and practical, real-world experiences geared towards a successful career in the field of remote sensing in both public and private sectors. This track is also appropriate for those already in the workforce who require additional training or are looking to expand upon their knowledge and skills.

M.P.S. in Natural Hazards and Catastrophes

Natural Hazards and Catastrophes (NHC)

The University of Miami’s Rosenstiel School of Marine and Atmospheric Science conducts world-class research on the earth systems responsible for these disasters, including the atmosphere, the ocean and solid earth. To meet society’s need for a skilled workforce, the Natural Hazards and Catastrophes program (http://mps.rsmas.miami.edu/degree-program/natural-hazards-catastrophe) offers an educational opportunity for students seeking to fill positions offered by the private and civil sectors to assess risks and exposures associated with natural hazards. The goal is to provide students with the skills and knowledge necessary to understand earth system natural hazards (atmospheric, oceanic, geological and hydrological) and the data analytics tools required to assess the associated risks (e.g. statistics, data management, programming, GIS, and remote sensing).

1. 9 of which must be at the 600 level
Biochemistry and Molecular Biology

Overview

Biochemistry and Molecular Biology are sciences at the epicenter of modern biomedical research. Understanding basic biochemical pathways is key to gaining new knowledge for the prevention and combating of disease, allowing for the expansion of current boundaries in medicine and science. In addition to medical applications, molecular biology is indispensable for the development of tools implemented for environmental and bionanotechnology problems. The Department of Biochemistry and Molecular Biology (BMB) at the University of Miami is committed to maintaining our discipline as a central science and strives for excellence by sustaining the current areas of strength, fostering interdisciplinary and clinical translational research, and expanding the research portfolio to evolving areas of inquiry and discovery. Our expertise in RNA biology, understanding DNA stability and repair, studying the biophysical nature of biomolecules, and gaining insight into cellular signaling pathways has been recently expanded by the arrival of researchers specialized in the design of natural and semi-synthetic biomolecules, as well as molecular-based devices that can be employed in translational medicine and other bionanotechnology applications. The commitment of the Miller School to increase growth in the basic sciences will continue to provide our department with new and exciting opportunities to enhance our prominence in biomedical research.

A chief mission of our department is to educate future generations of investigators and medical students to become critical thinkers and the leaders in their fields. The diverse composition of our department in regards to research interests creates a unique and intellectually stimulating learning environment for students at the undergraduate, graduate, and postgraduate levels. We offer a host of courses to fulfill the curriculum to obtain a BS in Biochemistry, a MS and a PhD in Biochemistry, as well as the basic science requirements for MD and MD / PhD students. Our courses address the basic principles of biochemistry and molecular biology as well as the emerging science and future of the fields.

The department serves the worldwide scientific community through leadership roles and active participation in national and international conferences, serving in study sections and on federal agency panels. Additionally, our department’s faculty roster encompasses editors of journals and members of editorial boards, as well as board members of national and international governmental centers and members of advisory boards of companies in the private sector. Moreover, the Department is committed to serve the community by participating in a variety of outreach events to promote awareness of the importance of science and technology in relation to public health and the environment.

Our department is also unique for hosting the internationally recognized annual Miami Winter Symposium, created by Professor William Whelan, the first leader and Chair of the Department. The Miami Winter Symposium is currently managed by Nature Publishing and features world-renowned speakers in emerging areas of science and technology. This event cements our department’s goal of furthering education and discovery in biochemistry and molecular biology on an international level.

Contact Information

Sapna Deo, Ph.D., (sdeo@med.miami.edu) Graduate Program Director
Diane Dames, (ddames@med.miami.edu) Senior Program Coordinator

University of Miami Miller School of Medicine
Office of Graduate and Postdoctoral Studies
1600 NW 10th Avenue (M-857), Suite 1128-A
Miami, Florida 33136
305 243 2468

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found online (http://biomed.med.miami.edu/apply).

Program Plan

The BMB graduate program director assists each entering student in tailoring a program to match his or her interests. First year students take courses in a core curriculum taught by the faculties from the basic science departments. Courses are taught not only by formal lectures but also as seminars and informal discussions. The BMB graduate program’s curriculum is designed to provide broad knowledge in the various aspects of molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student's interests.

Please note that the following is only a sample curriculum plan. Current students must discuss their plan with their program director to make adjustments as needed. It is the student's responsibility to contact the program to verify the information.

**Overview**

Programs in Biomedical Sciences (PIBS) at the University of Miami Miller’s School of Medicine (UMMSM) provides students a wide variety of research opportunities in the biological sciences across many disciplines and departments.

First-year students take a core curriculum that builds a solid foundation in the biomedical sciences. The common coursework in the first semester ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. Students have the flexibility to select breakout sessions that match their interests. The core curriculum also offers critical learning opportunities in biostatistics, genomic and analytical tools. In the second semester, students select individual modular courses offered in our eight disciplines. These courses cover topics of specific relevance to graduate programs or research topics. Students also complete a course in Biostatistics and a workshop in BioInformatics.
PhD Program Selection
During their first year in the umbrella program, students complete three to four laboratory rotations in various disciplines. This opportunity allows students to explore their interests before selecting a program and dissertation mentor. Students match with mentors in specific programs and achieve program affiliation at the end of their first year in one of the following programs (for years two through five):

• Biochemistry & Molecular Biology (http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology)
• Cancer Biology (http://biomed.med.miami.edu/graduate-programs/cancer-biology)
• Human Genetics & Genomics (http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics)
• Microbiology & Immunology (http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology)
• Molecular & Cellular Pharmacology (http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology)
• Molecular Cell & Developmental Biology (http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-development-biology)
• Neuroscience (http://biomed.med.miami.edu/graduate-programs/neuroscience)
• Physiology & Biophysics (http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics)

Admission Requirements
Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:
• Excellent academic record
• Competitive GRE exam scores
• Research experience in a laboratory setting
• Publications of abstract and / or papers
• Co-authorship in a peer-reviewed journal is recommended
• Strong letters of recommendation from research scientists who know the candidate well
• Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:
• Online Application

• Application Fee
• Official Academic Transcripts
• GRE General Test
• English Proficiency Exam (non-native speakers)
• Statement of Purpose
• Resume / CV

Full application instructions can be found here. (http://biomed.med.miami.edu/apply)

Plan of Study
Students enrolled in the first year program for the PhD in Biomedical Sciences complete the following core requirements. The curricula for years two through five can be found in the program links above.

Program Elective Courses
The following program courses are available to first year students in their spring semester. It is generally recommended that students only take courses in the program they wish to enter. This will put students on a timely path to graduation. Your options will be discussed in your spring course advising appointment.

Dept. Code: BST

Degree Programs

• Master of Science in Biostatistics (MS)
• Doctor of Philosophy in Biostatistics (PhD)

Masters Program in Biostatistics

• M.S. in Biostatistics (p. 688)

Doctoral Program in Biostatistics

• Ph.D. in Biostatistics (p. 688)

M.S. in Biostatistics

The Master of Science (MS) in Biostatistics is an applied one year program intended for quantitative students seeking training in applied biostatistics. The program emphasizes applications and understanding of statistical concepts rather than theoretical and mathematical principles. The program is meant to be a terminal degree providing students with the necessary background for applying good biostatistical practices in real world settings. Students will gain practical skills that can be applied immediately to a variety of data settings, which includes, but is not limited to, the biological life sciences public health, medical studies, and health services research.

The degree consists of 33 credits covering introductory probability, biostatistics, introductory epidemiology and public health, computing, clinical trials, introductory survival analysis, and introductory mathematical statistics. Enrichment will be provided by a statistical practicum and a seminar course.

Pre-requisites include:

1. Introductory calculus
2. Introductory linear algebra
3. Introductory computing

For more information about the MS in Biostatistics click here (http://www.biostat.med.miami.edu/academics/ms-in-biostatistics).

Ph.D. in Biostatistics

The PhD in Biostatistics, offered through the Division of Biostatistics in the Department of Public Health Sciences at the Miller School of Medicine, provides a flexible curriculum to cover the basics.

Admitted PhD students are expected to take a full suite of courses including several iterations of the seminar course, a consulting practicum (or advanced computing course), and a series of four to six courses that ensure the candidate has studied a subject matter discipline within biomedical research. PhD students are also expected to take high-level courses in statistical theory, survival analysis, and high-dimensional and complex data not generally taken by MS students. A sample program can be found here. (http://www.biostat.med.miami.edu/academics/phd-in-biostatistics.html)

PhD students are expected to pass a first-year written diagnostic exam at the end of their first year of study. A second oral and written exam will be administered at the end of the third year.

To obtain detailed program curricula on the PhD in Biostatistics, please contact our offices at the address below or visit our website. (http://www.biostat.med.miami.edu)

Cancer Biology

http://biomed.med.miami.edu/

Overview

The Sheila and David Fuente Graduate Program in Cancer Biology is a University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. The objective of this program is to provide a unique multidisciplinary training environment for highly qualified individuals that will prepare them for independent research and teaching careers. The overall philosophy of the program is to integrate basic and clinical research. The scientific focus is on the biology of cancer and the development of novel diagnostic and therapeutic approaches.

The program emphasizes a multidisciplinary approach which incorporates concepts and state-of-the-art techniques from molecular biology, biochemistry, cell biology, biostatistics, genetics, genomics, immunology, proteomics, structural biology, clinical oncology, and
translational research programs at the Sylvester Comprehensive Cancer Center. An important goal of the program is to provide students with a strong background in basic biomedical research coupled with an understanding of clinical aspects of cancer including diagnostic, prognostic, and therapeutic intervention. To achieve this goal, the program utilizes a unique program of study that includes lectures from both basic and clinical researchers. In addition, the program has a two-tier mentoring system in which students receive guidance from both a research mentor and a physician mentor. The research mentor is the dissertation advisor, while the physician mentor will provide the student with a clinical perspective in oncology. Through this dual mentorship, students conduct their doctoral research and obtain clinical knowledge in their area of study. The program aims to instill in students the ability to design multidisciplinary research programs in which scientific research is driven by unmet clinical challenges.

Courses in Cancer Biochemistry and Molecular Biology are prerequisites for all CAB courses. Required courses are Tumor Biology, Student Seminars, Tumor Boards, Special Topics in Cancer Research, Dialogues with Cancer Clinicians, and Logic and Reasoning in Translational Cancer Research. (Students can also choose electives in cancer epidemiology, cellular and molecular biology, immunology, pharmacology, and microbiology with permission of the CAB Director. After joining the program and choosing a research mentor, students formulate a proposal and take a qualifying exam. Their subsequent research is guided by an individually tailored dissertation committee, including the research advisor and physician mentor.)

Clinical and Translational Investigation

http://miamictsi.org/education/masters-program

Overview

This Master of Science in Clinical and Translational Investigation (MSCTI) at the University of Miami has been established to create a structured educational program that offers trainees of diverse cultural and educational backgrounds formal graduate training (http://mscti.med.miami.edu) in the principles and practice of translational science and clinical research. Our highly integrated, cross-disciplinary program has been designed to further the new discipline of translational science by providing a foundation for the development of future practitioners and leaders of translational science who are prepared to deal with the perceived bottlenecks that inhibit translational research: institutional culture and practice, scientific complexity of translational research design and methodology, and regulatory and ethical processes. The overall goal of this curriculum development award is to engage promising new and Early Stage Investigators in the discipline of translational science so that they make the pursuit of academic translational science their own professional goal.

Course of Study

The Masters in Clinical and Translational Investigation program can be completed in 1-3 years depending on goals and professional responsibilities the student. This thirty credit hour (http://mscti.med.miami.edu/program/program-basics) program includes completion of structured content courses, participation in small group interactive seminars and completion of a K-award, R21, or R01-type interdisciplinary clinical / translational research proposal. The proposal serves as a thesis or a formal master thesis, to be evaluated by a thesis committee consisting of one member of the Steering Committee, two faculty members, each representing one component of the translational focus (T1, T2, T3, T4) of the student, and another investigator not affiliated with the K30 program.

Successful completion of the MSCTI requires students to maintain a GPA of 3.0 or greater with no grade below C in any courses and successful completion of the thesis project.

Current students must discuss their plan with their program manager to make adjustments as needed. Students on a F-1 visa must enroll in a minimum of nine credits per semester.

Admissions Requirements

All individuals with strong research backgrounds are eligible to submit an application. Applications will be reviewed in batches, and admittance will be based on those most qualified for the program. We strongly encourage the following to apply:

• Individuals who have completed terminal healthcare degrees (e.g., MD, PhD, DO, RN) who are interested in pursuing additional formal didactic training (http://mscti.med.miami.edu/program/who-is-eligible) to become independent investigators in clinical and/or translational science;
• Individuals who have completed (http://mscti.med.miami.edu/program/who-is-eligible) terminal scientific degrees (e.g., PhD, DSci) who are interested in pursuing additional formal didactic training to improve knowledge and skills related to translation of basic to clinical applications; and
• Individuals who are currently enrolled in a terminal degree program (http://mscti.med.miami.edu/program/who-is-eligible) (e.g., MD, PhD) who are interested in adding a year to their program to obtain a MCTSI concurrent with their terminal degree.
• Students who have completed a Bachelor’s degree who have outstanding academic credentials and an interest in obtaining a MS prior to a career in clinical translational research or a graduate program will also be eligible.

Completed (http://mscti.med.miami.edu/admissions/admissions-requirements) application package consist of the following:

• Completed online application form
• Application fee (US dollars, non-refundable)
• Official transcripts from each college or university attended
• Resume (http://mscti.med.miami.edu/admissions/admissions-requirements) or Curriculum Vitae
• Three letters of recommendation
• Personal statement of career goals and interest in degree program (http://mscti.med.miami.edu/admissions/admissions-requirements).
• Members of the Admissions Committees examine each application for acceptance into the program. Materials submitted in support of an application are confidential and cannot be released for other purposes nor returned to the applicant.

A GRE is not required

Full application instructions can be found online (http://biomed.med.miami.edu/apply).

Human Genetics and Genomics

http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics

Overview

The Interdepartmental PhD Program in Human Genetics and Genomics is a multi-disciplinary program aimed at training scientists broadly in areas of human genetics and genomics relevant to human health and disease. The emerging practice of “precision medicine,” whereby clinical treatment decisions are based in part on an individual’s genomic profile, depends on “genomic literacy” among practitioners, researchers and patients. Human Genetics and Genomics is a multidisciplinary field that requires training in three core competencies: clinical, molecular, and statistical genetics. Individuals earning PhDs in Human Genetics and Genomics will have various career options, including clinical laboratory (after fellowship training and board certification), research laboratory or computational research in academia, healthcare, and the biotechnology industry.

During the first year PIBS curriculum, students will have the opportunity to take two introductory short courses: Variation & Disease and Family Studies & Genetic Analysis. Rotations through faculty laboratories provide students with hands-on experience in various research areas. The rotations also provide the student the background necessary to select their dissertation advisor and area of research.

During the second year, the curriculum focuses on core coursework in molecular and computational genetics, biostatistics, and seminars and journal clubs.

Also, during the second year, students choose to pursue one of two tracks within the program: molecular genetics or computational genetics. Course requirements differ slightly between these two paths: students in the molecular genetics track will take Advanced Topics in Molecular Genetics while the Computational Genetics track students take Fundamentals of Genetic Epidemiology and Medical Biostatistics II.

During the second and third years of study, students formulate and defend a dissertation proposal. All students participate in a 1-credit hour clinical rotation and complete a teaching practicum during their fourth or fifth years.

Applying to the Program

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive candidates will have the following:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstracts and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants must submit the following:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found at: biomed.med.miami.edu/apply (http://biomed.med.miami.edu/apply)

Program Plan

The PhD in Human Genetics and Genomics (HGG) curriculum allows candidates to pursue a track in molecular or computational genetics by their second year of training; however, all students complete a core curriculum in the first three years of graduate study. Students will also participate in seminars and journal clubs in the fall and spring semesters, through all years of study.

First-year students interested in Human Genetics and Genomics are strongly encouraged to take two introductory HGG short courses in the spring semester: HGG 630 – Variation and Disease and HGG 640 – Family Studies and Genetic Analysis which are requirements for completing the HGG degree. Courses in computational / quantitative skills, including biostatistics and bioinformatics will also form part of the first year PIBS curriculum. Each PIBS student completes at least three lab rotations of nine weeks each and chooses a dissertation laboratory (and graduate program) during the latter half of the spring semester. If necessary a fourth rotation may be possible, and in this case a laboratory choice may be deferred until June. All first year students will make short presentations to a group of faculty after each lab rotation. For these presentations the students will be divided into four groups with related research interests.

After choosing a mentor and laboratory at the end of the first year, a student becomes a member of the HGG Program. Students select and follow a track in molecular genetics or computational genetics in the first semester of year 2. At this point course requirements differ slightly between these two paths: Students in the molecular genetics track take Advanced Topics in Molecular Genetics (HGG 650) in the second semester, while the computational genetics track students take a second course in biostatistics (EPH 602) and a course in genetic epidemiology (HGG 621).

In addition to the required core courses, all students participate in a clinical rotation and serve one semester as a teaching assistant for a core course, in their fourth or fifth year.

It is expected that on average, students will complete the program in five years. Please review the complete course descriptions on the COURSE tab above. The general core curriculum is shown in the Plan of Study below:

Plan of Study - Molecular Track

**MD/PHD Program**

http://mdphd.med.miami.edu/

**Overview**

The Miller School of Medicine MD / PhD Program provides a unique training environment for exceptionally qualified individuals who want to pursue careers in academic medicine and research. The curriculum comprises the school's outstanding preclinical and clinical training, rigorous PhD graduate training and several elements, including professional development workshops and other activities, specifically designed to enhance the MD / PhD training experience. There has been a long tradition of research excellence and physician scientist training at the Miller School of Medicine. With the opportunities for basic and clinical research here, Miami's diverse population and access to Latin America and the Caribbean, the backdrop of a vibrant city, make the Miller School a unique place for MD / PhD training.

**PhD Programs**

The following doctoral programs, described elsewhere in this bulletin, participate in the MD / PhD Program. The MD / PhD Program office can provide you with further information about these programs and the research interests of their faculty.

- Biochemistry & Molecular Biology (http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology)
- Biomedical Engineering (http://www.bme.miami.edu/graduate_programs.php)
- Biostatistics (http://www.biostat.med.miami.edu/academics/phd-in-biostatistics)
- Cancer Biology (http://biomed.med.miami.edu/graduate-programs/cancer-biology)
- Epidemiology (http://publichealth.med.miami.edu/graduate-academic-programs/phd-in-epidemiology)
- Human Genetics & Genomics (http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics)
- Microbiology and Immunology (http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology)
• Molecular and Cellular Pharmacology (http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology)
• Neuroscience (http://biomed.med.miami.edu/graduate-programs/neuroscience)
• Physiology and Biophysics (http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics)
• Prevention Science & Community Health (http://publichealth.med.miami.edu/graduate-academic-programs/phd-in-prevention-science)

mdphd@miami.edu
www.mdphd.med.miami.edu (http://www.biomed.med.miami.edu/mdphd)

Admission Requirements
Admission to the MD/PhD Program is highly competitive, and interested applicants are advised to apply early in the fall. AMCAS applications must be received by the Medical Admissions Office no later than December 15. Applicants must complete the minimum course requirements (http://admissions.med.miami.edu/md-programs/general-md/prerequisites) of the MD Program to be considered for the MD / PhD Program. The Graduate Record Examination (GRE) is not required for matriculation into the MD/PhD Program.

Competitive applicants will have the following:

• Completed AMCAS & Secondary Application for MD / PhD
• Excellent academic record
• Strong MCAT scores
• Significant research experience
• Co-authorship on abstracts and / or peer-reviewed papers is desirable
• Strong letters of recommendation from research mentors and other scientists who can specifically address the applicant’s potential as a physician scientist
• Motivation to pursue a career as a physician scientist

Applications from under-represented groups, including minorities, individuals with disabilities and women, are encouraged.

All MD / PhD applicants are reviewed by both the MD Program Admissions Committee and the MD / PhD Program Admissions Committee. These evaluations proceed independently, and a student will still be considered for the MD program even after an unfavorable review by the MD / PhD Program. A successful applicant is granted admission to both the MD Program and the MD / PhD Program.

Full application instructions can be found here (http://mdphd.med.miami.edu/Admissions).

Program Sequence
The MD / PhD Program provides an integrated experience with exposure to clinical and research training throughout the medical and graduate phases of the program. Students complete the first two years of medical school, which are followed by their PhD training and then the final two years of clinical clerkships. Students are advised to begin the program in June to enable an early start on their research rotations as the MD program courses begin in mid-August. The summers before the second and third year are usually spent in research rotations (3 are required), but some students choose to continue their research rotations during the academic year of the first two years of medical school. It is recommended that students select a graduate program by February of their second year in the program and identify a research mentor no later than the beginning of the third year when they start graduate training. The third year is spent both in class to fulfill the graduate course requirements and in the mentor’s research group. Students should plan to take their PhD qualifying exam by the end of the third year. The following two or more years are spent carrying out original research for their dissertation. Students also participate in a clinical skills tutorial during graduate training to expand their exposure to the clinical setting. All PhD requirements must be completed before entry into the third year of medical school but most students continue research upon return to clinical clerkships.

Combined degree programs are long and challenging. To relieve pressure produced by the demands of the medical and graduate curricula, the University of Miami Miller, School of Medicine, MD / PhD Program provides a stimulating and supportive environment in which all combined degree students have frequent opportunities to meet and exchange ideas and for professional development. This includes a first and second year student journal club, all program clinical case discussions, opportunities to meet other physician scientists, student organized workshops and an annual MD / PhD student research symposium.

Microbiology and Immunology
http://biomed.med.miami.edu

Overview
Microbiology and Immunology is a multidisciplinary program encompassing the areas of cellular and molecular immunology, virology, microbial genetics, and pathogenic bacteriology.

The goals of the department’s graduate program are to provide each student with the opportunity to acquire the theoretical background and conceptual framework with the technical research skills necessary to attain a PhD. During the first year of study, a broad educational base in all disciplines together with laboratory rotations introduce students to the diverse array of research topics. Students then choose one area of concentration for their research. The varied interests of the faculty provide numerous opportunities for student participation and a broad choice in dissertation research.

Active research in immunology includes the areas of cytotoxicity, programmed cell death, cytokine receptor signaling, clinical and experimental bone marrow transplantation, stem cell biology, gene therapy for cancer treatment, antigen recognition, cell differentiation and communication, aging of the immune system, interleukins, genetic control of immunoglobulin production, gene activation, and evolution of the immune response. Research in other areas includes molecular biology of virus-host interaction in both animal and human systems,
control and regulation of bacterial pathogenesis, selective tumor chemotherapy and radiation therapy, and therapy of parasitic infections.

Goals
The goals of the MIC Graduate Program include training and acquisition of:

- A broad scientific reasoning ability and knowledge base in Microbiology and Immunology
- Technical skills required for experiments in the area of specialization
- Presentation skills required for teaching, scientific talks, manuscripts, and grants
- A preparation for a scientific career in academia, industry, or teaching within 5 ½ years

Admission Requirements
Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found here (http://biomed.med.miami.edu/apply).

</table>
In order to provide a wide range of current research opportunities, this program is interdisciplinary, comprised primarily of faculty from the department of Cell Biology and includes additional faculty from several other Departments and Centers at the Miller School of Medicine. These include: the Departments of Microbiology & Immunology, Molecular & Cellular Pharmacology, Medicine, Ophthalmology, Urology, Surgery, Neurosurgery and Neurology, the Sylvester Comprehensive Cancer Center, and the Miami Project to Cure Paralysis.

Students have the opportunity to do research in the many areas of modern cell, molecular and developmental biology. Research topics including the cytoskeleton, cell surface molecular biology, stem cells, lens, corneal and retinal biology, protein processing and sorting, signal transduction, airway biology, regulation of gene expression in development, podocyte biology, cancer biology, neuromuscular development, malignant transformation, growth factors, epithelial cell biology, organogenesis and tissue repair, pattern formation in early development, RNA localization, mitochondrial molecular biology and cancer therapeutics.

The primary objective of this interdisciplinary graduate program is to prepare students for careers as independent, PhD level researchers and educators, in both academic institutions and in the biotechnology industry and other venues.

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
The thesis is defended in front of the entire program and also in progress meetings every 6-9 months. Students normally meet with the committee for plans for the thesis. The student discusses his/her preliminary data and not the Qualifying Exam. Rather, it is a collegial meeting with the thesis committee where the student presents his/her preliminary data and discussion. The thesis proposal is expected to be passed during the second year, Summer semester. It is important to note that in the MDB program this is not the Qualifying Exam. The goals of the QE are (1) to assess the student's technical proficiency of the student, especially his/her ability to design experiments and to write a competitive grant application; and (2) to aid the student in tailoring a program to match his/her interests. First year students take courses in a core curriculum taught by faculty from the medical basic science departments. Courses are taught not only by formal lectures, but also as seminars and informal discussions. The curriculum is designed to provide broad knowledge in the various aspects of modern cell biology, developmental biology, molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student's interests. In the remaining years of student, nearly all of the student's time is spent on original laboratory research. Students are usually admitted in the Fall semester.

Minimum credit requirements for the PhD degree are set by the University at 36 course credits (including specific required courses) and 24 credit hours of research (for a total of 60 credits). The course credits must be earned in graduate level (600 and above) courses. Students may elect to take any of the graduate courses offered by the MDB program, in addition to the mandatory courses, or choose from a large variety of advanced courses offered by other basic science programs at the University of Miami Miller School of Medicine.

Mandatory courses for the program include Biostatistics (EPH 601), Advanced Cell Biology: Approaches to Molecular Medicine (MDB 751), Current Topics in Mammalian Development (MDB 752), Histology (MDB 753), and *Tumor Biology (MDB 765). The latter may be replaced by any graduate level course in human disease or neuronal cell biology. *These courses are electives for MD/PhD students.

Throughout the program the students are expected to attend department seminars (Tuesdays at noon), journal club (once a month, Wednesday at noon), and student presentations (once a month, Wednesday at noon). The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. At the end of the Fall semester of the second year, students are required to take the Qualifying Exam (QE). The goals of the QE are (1) to assess the student's technical proficiency of the student, especially his/her ability to design experiments and to write a competitive grant application; and (2) to aid the student in tailoring a program to match his/her interests. Students normally meet with the committee for progress meetings every 6-9 months.

The thesis proposal is expected to be passed during the second year, Summer semester. It is important to note that in the MDB program this is not the Qualifying Exam. Rather, it is a collegial meeting with the thesis committee where the student discusses his/her preliminary data and plans for the thesis. Students normally meet with the committee for progress meetings every 6-9 months.

The thesis is defended in front of the entire program and also in a meeting with the committee. The average time-to-completion is 5.5 years.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

**Molecular and Cellular Pharmacology**

http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology

**Overview**

Scientists in the Molecular and Cellular Pharmacology Program make use of the knowledge and techniques of biology, chemistry and physics to study the action of drugs, hormones and neurotransmitters on living systems and, more generally, the mechanisms through which signals are recognized and transduced by cells.

The goals of the research in this department are:

- to identify new targets and pathways for development of pharmaceuticals
- to use drugs as tools in the study of basic biological processes
- to develop and study agents that may be beneficial in the treatment of disease

A variety of technical approaches is used, including genetics, molecular biology, protein biochemistry and biophysics, fluorescence microscopy, immunology, computer modeling, cell culture, imaging, gene expression profiling, proteomics and whole animal studies including transgenic and genetically engineered mouse models. The faculty are a mixture of senior scientists who are recognized leaders in their respective fields and more junior faculty with recent training in state-of-the-art approaches to important biomedical problems.

**Research interests of the faculty include:**

**Cardiovascular Pharmacology / Signaling / Muscle Contraction**

Investigators in this area study transcriptional regulation of gene expression and intracellular signals associated with the growth and function of the heart. They study ion channels, membrane events, blood vessels, etc. Studies of cardiac muscle contraction and the effect of disease causing mutations in the contractile apparatus of the heart on heart performance and morphology are also being pursued.

Current research areas include structure/function relationships in the proteins of the thin (troponin complex) and thick (myosin) filaments in health and disease, the role of specific ion channels in ventricular hypertrophy and its alleviation, excitation-contraction coupling in skeletal and cardiac muscle, proto-oncogene regulation of cardiac-specific genes, signaling in cardiac myocytes including the characterization of multimolecular enzyme complexes, apoptosis during myocardial ischemia, the role of microRNAs in cholesterol biosynthesis and smooth muscle cell plasticity, and the potential of stem cell based therapy for cardiac disease. A new study has been launched to investigate the effect of bone marrow stem cells in cardiac repair.

**Neuropharmacology / Neuroscience**

Investigators in this area study the development, function, pharmacology, and diseases of the nervous system.

Current research interests include neuronal signaling through G-proteins, Ca^2+^, and cyclic nucleotides, growth and guidance of axons during development and regeneration after injury, molecular control of dendrite development, control of physiological functions by the nervous system; molecular mechanisms and cell biology of olation and phototransduction; the genetic and cellular basis of neural development.
and degeneration using the fruit fly *Drosophila melanogaster* as a model system.

**Cell Biology / Cancer**

Investigators in this area study cell cycle control and cancer, gene expression, mechanisms of hormone action, signal transduction, cytoskeleton, membrane transport, stem cells, and novel therapeutics.

Current research interests include steroid hormone regulation of gene expression and cell proliferation; cell cycle checkpoints during DNA replication; protein trafficking including endocytosis and exocytosis; control of cell polarity and morphogenesis; cilia in pulmonary function; molecular basis of human lymphoma; endocrine-related cancers including prostate and breast; stem cell maintenance and therapy; stem cell differentiation in hematopoiesis and physiochemical and metabolic aspects of drug design.

**Model Systems**

Many investigators are using model organisms for their studies. These include transgenic and knock-out/knock-in mouse models Xenopus, Drosophila and yeast models. Yeast and Drosophila are important models because of the powerful molecular and genetic approaches and tools available. Xenopus provides a unique system for studying development and for protein expression and analysis. These systems are being used to study fundamental processes such as apoptosis, cell cycle, signal transduction, membrane dynamics, cytoskeleton, cell polarity, olfaction, development of the cardiovascular system, neurogenesis and neuronal degeneration. All of these processes are conserved in humans, so these systems serve as important models of human diseases. Investigators are also using these systems to screen for therapeutic agents and to identify targets of toxins and other natural, synthetic or pharmacologically relevant compounds.

**Contact Information**

Andrea Leiseca (aleiseca@med.miami.edu), Senior Program Coordinator  
University of Miami Miller School of Medicine  
Office of Graduate and Postdoctoral Studies  
1600 NW 10th Avenue (M-857), Suite 1128-A  
Miami, Florida 33136  
305 243 2492  
aleiseca@med.miami.edu (ogs@med.miami.edu)

**Admission Requirements**

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

**COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:**

- Excellent academic record  
- Competitive GRE exam scores  
- Research experience in a laboratory setting  
- Publications of abstract and / or papers  
- Co-authorship in a peer-reviewed journal is recommended  
- Strong letters of recommendation from research scientists who know the candidate well  
- Motivation to pursue state-of-the-art biomedical research

**APPLICANTS MUST SUBMIT THE FOLLOWING:**

- Online Application  
- Application Fee  
- Official Academic Transcripts  
- GRE General Test  
- English Proficiency Exam (non-native speakers)  
- Statement of Purpose  
- Resume / CV

Full application instructions can be found here (http://biomed.med.miami.edu/apply).

**Plan of Study**

In the first year, students receive a solid foundation in biomedical science. The core coursework ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of student development. In subsequent semesters, students take core courses encompassing mechanisms of drug action, neuropharmacology, cardiovascular pharmacology and intracellular signal transduction. A variety of elective courses are offered by this program and other basic science programs at the Miller School of Medicine.

Students begin their dissertation research at the end of the first year and complete their course requirements in the second year. In subsequent years, students devote their efforts to original thesis research.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

## Overview

The Neuroscience Graduate Program, established in 1992, is an interdisciplinary / interdepartmental PhD program designed to guide trainees through the process of acquiring the research skills and the intellectual rigor needed to become independent professional neuroscientists. The program achieves these goals through coursework, journal clubs, dissertation research committee guidance, and outstanding faculty mentorship. The program also provides multiple annual forums for students to showcase their own research and learn from international research leaders.

More than 80 participating faculty are located in several departments and schools on three UM campuses including Biochemistry, Cell Biology and Anatomy, Molecular and Cellular Pharmacology, Physiology and Biophysics, and Genetics on the Medical campus. From the Coral Gables campus, we have faculty from Biology, Biomedical Engineering and Psychology, as well as several clinical departments such as Medicine, Neurological Surgery, Neurology, Ophthalmology, Otolaryngology, Pathology, Physical Therapy, and Psychiatry. In addition, we have faculty from the Rosenstiel School of Marine and Atmospheric Sciences.

Neuroscience faculty pursue a wide variety of research interests, including cellular and molecular mechanisms involved in signal transduction, gene expression in electrically excitable cells, synapse formation, neuronal growth and survival, integrative neuroscience, neuroimmunology, stroke, neuronal regeneration, autonomic control, brain metabolism and cerebral blood flow, spinal cord and brain injuries,

**Admission Requirements**

Admission to the Neuroscience Program is through the common umbrella of (PIBS) Programs in the Biomedical Sciences, for all biomedical PhD programs.

For more information, please visit this website (http://biomed.med.miami.edu/graduate-programs/programs-in-biomedical-sciences-pibs).

**Course of Study**

Graduate training is the major goal of the program, with emphasis on cellular, molecular, and genetic approaches to Neuroscience. A single core curriculum provides the didactic scaffold of the program. This curriculum consists of courses in Developmental Neuroscience, Membrane Biophysics, Introductory Neuroscience, Neural Systems, and Neuroanatomy. The core courses are supplemented with a variety of Special Topics Short Courses. Students also attend research seminars and a scientific journal club. The Neuroscience Steering Committee guides the students, overseeing their coursework, until they have passed their qualifying exams. From then on, their progress is supervised by individually tailored dissertation committees.

To be eligible to receive the PhD, students are required to complete a minimum of 60 (sixty) credit hours, including at least 36 required graduate course credits and 24 credits of dissertation research. Typically, at least 18 of the 36 credits for coursework will be in NEU courses.

The Mission of the Department of Physical Therapy (revised in December, 2000; re-affirmed in 2012) in accordance with the Mission of the Miller School of Medicine is to provide excellence in physical therapist education, to expand evidence-based practice of physical therapy through research, to provide high quality care to all who need it, and to be a community partner.

Admission Requirements

Doctor of Physical Therapy (entry level DPT)

Applicants should have a baccalaureate degree in a related field and 3.0, or "B" average or better in the following courses:

Total Credit Hours: 34-37

Application Procedure

We are accepting applications through Physical Therapist Centralized Application Service (PTCAS). Click here (http://www.ptcas.org) to apply.

The next application cycle will open on July 1. The application deadline is October 17; we encourage you to apply early. Classes begin in May of each year. Application requirements consist of the following:

1. Submission of all application materials to PTCAS. Completion of prerequisites or plan to complete by time of matriculation, with a minimum GPA of 3.0 on a 4.0 scale.
2. Demonstration of knowledge concerning the physical therapy profession by submitting:
   - A minimum of 100 hours of first-hand observation and/or work experience related to the practice of physical therapy.

---

Physical Therapy

http://www.pt.med.miami.edu

Dept. Code: PTS

The Department of Physical Therapy is committed to providing quality educational experiences that enable its graduates to effectively carry out the expanding responsibilities of physical therapists as autonomous health care providers practicing in preventive, evaluative, maintenance, acute care, rehabilitation, outpatient settings, and in educational and research environments.

The individual and collective efforts of the members of the Physical Therapy faculty are directed toward attaining specific goals and objectives as expressed in the philosophic statement of the American Physical Therapy Association.
This experience must be substantiated in writing by a registered/licensed physical therapist. The name and email of the physical therapist(s) is required for verification.

3. Submission of three to four (3-4) letters of recommendation from people who can address both the applicant’s moral character and potential as a physical therapist.
   - At least one letter must be written by a registered/licensed physical therapist, and one or more from faculty.

4. An on-site interview is required and will be offered to those applicants who have met the admission criteria.

5. Graduate Record Exam (GRE). Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 3.0 on the analytical section is also required.

6. International students are to complete the PTCAS application and submit official transcripts to the DPT program instead of PTCAS. Transcripts that are not in English must include an official translation. International applicants must have all transcripts evaluated by the University of Miami’s Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation. International applicants must meet ALL the necessary requirements to qualify for a student visa.

For more information contact:
Admissions Office
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
Phone 305-284-4535
Email: physicaltherapy@miami.edu
Website: www.pt.med.miami.edu (http://www.pt.med.miami.edu)

**Doctor of Philosophy in Physical Therapy (PhD)**

**Application Requirements**

Applicants to the Physical Therapy PhD Studies Program must have a clinical degree in physical therapy from an accredited physical therapy program and be eligible for licensure to practice physical therapy in the United States. Students enrolled in the PhD in Physical Therapy program at the University of Miami work closely with a faculty mentor from their first days in the program. As a first step in the application process, the applicant must identify an area of interest and contact a faculty mentor involved in that area. Students are admitted to the program upon endorsement of a faculty mentor and completion of all admission requirements, with final selection made by the PhD Studies Committee. Stipend and tuition support is potentially available for qualified applicants.

The applicant must meet all the general admissions requirements of the University of Miami Graduate School. Additionally, stipulations include:

- Direct entry into the PhD program is dependent upon having any of the degrees below:
  - An entry-level Master’s Degree in Physical Therapy

- An advanced Master’s Degree with a Bachelor’s Degree in Physical Therapy
- A Bachelor’s Degree in Physical Therapy.

An applicant with a Bachelor’s Degree in Physical Therapy, though able to commence course work in the PhD Program, will be required to complete additional credit hours before final admission to the PhD Program.

- Official Transcripts of all college work.
- Three completed recommendation forms with at least one form completed by a physical therapist.
- A letter indicating career goals and objectives.
- Licensure or eligibility for licensure, as a physical therapist in the State of Florida (must be licensed within 1 year of admission).
- GRE scores current within the past 5 years (see minimum requirements below)

Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Graduate Admissions will be using this concordance table when reviewing exam scores. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 4.0 on the analytical section is also required. International applicants must submit a complete application and have all transcripts evaluated by the University of Miami’s Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation.

The research areas of the faculty are diverse, reflecting the clinical and scientific emphasizes areas of the faculty. Please refer to the Faculty Section for specifics.

For more information on the PhD degree contact:

Kathryn E. Roach, PhD, PT, Graduate Program Director
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
phone: 305-284-4535
e-mail: kroach@miami.edu

**Degree Programs**

**Doctor of Physical Therapy (entry level DPT)**

The Department offers the clinical Doctor of Physical Therapy (DPT). The DPT program recognizes the importance of in-depth basic and applied science knowledge and the humanities. As such, the curriculum is carefully sequenced to allow students to develop skills in both classroom and clinical settings.

Faculty also understand the importance of presenting problem-solving skills in conjunction with fundamental physical therapy concepts so that students will develop the professional attitudes and insights required for sustained and continued growth throughout their careers.

The entry-level doctoral program (DPT) is offered under the auspices of the Department of Physical Therapy, University of Miami Miller School of Medicine.
Doctor of Philosophy in Physical Therapy (PhD)
The University of Miami Doctor of Philosophy in Physical Therapy program develops physical therapist students for leadership positions in academic and research settings. Along with guiding students in the development of requisite knowledge and skills, the program promotes professional socialization into the role of academic faculty. We believe preparation to teach and undertake research in a physical therapy curriculum at the university level requires excellence in three dimensions:

1. Expertise in a specified content area;
2. Advanced knowledge and skill in research methods, design, and implementation of analysis and communication of results; and
3. Proficiency in instructional design, teaching methods, and evaluation.

The successful integration of these three dimensions, each complex in its own right, provides the means for the student to develop expertise in testing, analyzing, researching, and teaching about disorders that interfere with function. Unifying these three core areas is the process of socialization to the role of a faculty member, including an awareness of academic responsibilities and sensitivity to the needs of the adult learner.

In keeping with this philosophy, students develop breadth of knowledge through completion of coursework from three basic core areas:

- Concentration Core,
- Research Core, and
- Education Core.

They develop depth by completing elective courses with the intent to build expertise in their respective areas of concentration. The successful graduate of this program will have the requisite knowledge and skills to integrate research findings and scientific theory with clinical observations. On this basis, the graduate will be prepared to perform original research aimed at developing new knowledge to advance the scientific basis of clinical practice and theoretical principles that will advance the profession of physical therapy. The program offers opportunities for the student to gain skill in communicating theories, concepts and research findings and to experience the roles and responsibilities of an academic faculty member. Students complete a dissertation project in which they develop and conduct a unique and significant research investigation with the guidance of a Physical Therapy faculty member as research advisor.

Doctoral Programs in Physical Therapy

- D.P.T. Doctor of Physical Therapy (Entry Level) (p. 706)
- Ph.D. in Physical Therapy (p. 707)

D.P.T. Doctor of Physical Therapy (Entry Level)

To receive the Doctor of Physical Therapy degree, the candidate must:

1. Complete all coursework (104 credit hours) as required with an overall GPA of 3.0 or better.
2. Complete at least 3 credit hours of Elective coursework, in addition to the 104 credit hours.
3. Successfully complete the clinical internships (I-IV) required.

The University of Miami, Department of Physical Therapy has affiliations with 350 clinical sites locally and throughout the country. Distant internships may incur additional expenses for the student.

**Ph.D. in Physical Therapy**

The curriculum for all three core content areas (Musculoskeletal, Motor Control, and Outcomes Research) consist of:

- 19 - 21 credit hours in a core concentration area (i.e., Motor Control, Outcomes Research, or Musculoskeletal Prosthetics and Amputee Rehabilitation)
- 12 credit hours in core education courses,
- 12 credit hours in core research courses,
- 6 - 21 credit hours in electives in area of concentration and
- 12 credit hours of Doctoral dissertation for a total of 60-75 credit hours.
- Credit hours may vary depending on educational background of applicants.

**Physiology and Biophysics**

biomed.med.miami.edu

**Overview**

Physiology and Biophysics is focused on how human organism function by applying principles of physics to the underlying molecules and cells. The training and research emphasis in the Graduate Program in Physiology and Biophysics at the University of Miami School of Medicine is directed at determining the molecular mechanisms underlying physiological functions, such as how does the heartbeat, how does the brain work, and how do we see, smell, and taste, using biophysical techniques and analyses. More specifically, research facilities and guidance for graduate work are available in developmental neurobiology, sensory receptor mechanisms, axonal electrophysiology, ionic mechanism of the nerve impulse, electrophysiological and molecular aspects of synaptic and neuromuscular transmission, mechanisms of ion channel gating, selectivity and conductance, metabolic aspects of nervous function, molecular neuroscience, neuroimmunology, protein structure-function studies, molecular recognition, ligand-receptor interactions, axonal growth, neurotrophic factors, cytokines, gene targeting, neuronal apoptosis, nerve regeneration, molecular adhesion, and regulation of muscle contraction.

The Graduate Program in Physiology and Biophysics trains its students to use and develop state-of-the-art biophysical techniques that address fundamental questions related to molecular and cellular physiology and biophysics and developmental and molecular neuroscience. In addition, the students receive training in related biological disciplines and also in systemic physiology in order to obtain a broad viewpoint. This training prepares the students for future careers in research and teaching in academic institutions and also for careers in industry.

**Admission Requirements**

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.
COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and/or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume/CV

Full application instructions can be found here (http://biomed.med.miami.edu/apply).

Program Plan

The Department of Physiology and Biophysics' PhD program trains highly qualified students for successful careers in research, teaching and industry. A high faculty to student ratio assures that each student receives individualized help from the faculty together with access to the latest scientific instrumentation.

Student training is enhanced by research seminars and student-oriented discussions presented by world-renowned visiting scientists, as well as by participation in research seminars and research discussion groups. We seek to provide a congenial and supportive environment in which each student develops to the fullest their abilities to reason critically, design and conduct incisive experiments, and communicate research results effectively in both written and oral formats. Our faculty's wide collective experience as successful researchers, teachers, journal editors, and peer reviewers is available to help graduates prepare for and attain research and teaching positions in academia and industry.

Please note that the following is only a sample curriculum plan. Current students must discuss their plan with their program director to make adjustments as needed. It is the student's responsibility to contact the program to verify the information.

All application materials, including transcripts, test scores, personal statement, resume, and letters of recommendation, must be submitted online through SOPHAS (<a href="http://sophas.org">http://sophas.org</a>).</td>
</tr>
</tbody>
</table>

| Official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-US transcripts must be evaluated by the World Education Service (WES) using their ICAP Course-by-course evaluation service. Non-US transcripts are evaluated exclusively through WES. |

| Official GRE test scores Applicants are required to submit GRE general exam (http://www.ets.org/gre/revised_general/about) scores taken within the last five years. Alternatively we accept the MCAT, LSAT, GMAT and DAT for the MPH/MSPH degree programs only. Applicants to the MPH/MSPH program who hold advanced degrees (MD, PhD, JD) are encouraged but not required to submit test scores. |

| TOEFL/IELTS International students whose native language is not English are required to submit TOEFL (http://www.ets.org/toefl/ibt/about) Or IELTS scores. |

| Resume/Curriculum Vitae including employment, activities, community service, education, academic or professional honors. |

| Statement of purpose detailing your academic interest in our program as well as your future career goals. This statement should discuss any experience you have in public health including field experience, training, education, or other related qualifications. Discuss how earning this degree will contribute to your future and the future of public health. |

| Three letters of recommendation from people who are best able to assess your ability to be successful in a public health degree program. Ideally, your recommenders are recent professors, researchers, or employers in a related field. You will be asked for your recommenders’ contact information on the online application. They will be sent an online form to complete via email. |

To obtain detailed program curricula on the MPH/MSPH, PhD in Epidemiology, and joint degree programs, please contact our offices at the address below or visit our website (http://publichealth.med.miami.edu). |

- Doctor of Philosophy in Prevention Science and Community Health (PhD) |

The Graduate Programs in the Department of Public Health Sciences at the University of Miami Miller School of Medicine are at the forefront of public health science with emphasis on research, education, and evidence-based public health service. The Graduate Programs promote an environment of learning and inquiry, stressing the scientific method as a way of generating knowledge about common pathways in health and illness. The mission of the Graduate Programs in Public Health is to develop leaders who can expand and translate knowledge into policy and practice to promote health and prevent disease in human populations.
M.A. in Public Health

The MPH degree is a professional degree for students who require a broad general academic experience in public health. Students will acquire competency in the fundamental public health disciplines. This includes research design and conduct, data analysis and policy analysis, communications, program planning and administration, public health systems and the organization of health services in the United States and Latin America, recognition and analysis of ethical issues in public health and professional practice, the needs of special populations, and the integration of these core disciplines in public health decision making. The MPH degree is a 45 credit hour program that is accredited by the Council on Education for Public Health.

The 45 credit hour degree program consists of:

- Core Courses (18 credits)
- Elective Courses (21 credits)
- Capstone Program - Field Experience and Project (6 credits)

The Capstone Field Experience and the Capstone Project are both vital components of the MPH program, and together form the Capstone Program. The Capstone Field Experience is designed to provide students with real world experience in the field of public health. This experience places students in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student. The Capstone Project is intended to build upon this fieldwork and is geared toward providing the student with an opportunity to apply public health academic theory and acquired skills to community health problems. Students are encouraged to build their Capstone Program in such a way that supports their academic and professional interests as they advance in their careers as public health professionals.

Full-time students can expect to complete the MPH degree requirements within 2 years. An elective credit waiver may be available for students who enter the MPH degree program with an earned advanced degree (e.g., MD, DDS, DVM, JD).

M.S.P.H. Master of Science in Public Health

The MSPH is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia, or private institutions. Studies will include many of the core disciplines included in the MPH degree with an additional emphasis on advanced research methods and quantitative analysis skills. The MSPH program is accredited by the Council on Education for Public Health.

The 45 credit hours degree consists of:

- Required Core Courses (21 credits)
- Required Methods Courses (6 credits)
- Elective Courses (12 credits)
- Research Thesis Project (6 credits)

The public health thesis project requires an individual investigation of a current public health problem and allows the student to demonstrate competency in the development and implementation of a research question. Students will work closely with a faculty project advisor and project committee during their investigation.

Full-time students can expect to complete the MSPH degree requirements within 2 years. An elective credit waiver may be available for students who enter the MSPH degree program with an earned advanced degree (e.g., MD, DDS, DVM, JD).

Ph.D. in Epidemiology

The Doctor of Philosophy (PhD) in Epidemiology is an intensive research training program for students with prior training in Epidemiology or related disciplines. It provides advanced education and training for students seeking a professional career in medical and health-related research, as well as for physicians and other persons who have attained professional degrees and are seeking to integrate epidemiological research and methods into their ongoing careers.

As a research-focused degree, students are given the skills necessary to approach health problems to generate consequential research questions and use the most appropriate epidemiological methods to address them. The methodologically rigorous training comprises both formal classroom education and guided research with faculty mentors. Key research areas include: chronic disease epidemiology, including cancer, diabetes, and obesity; behavioral epidemiology relating to substance abuse and HIV/AIDS, occupational disease epidemiology; and health disparities.

Pre-requisites: The program is primarily designed for persons who have completed an MPH degree, as well as for physicians and others who have a master or doctoral degree in a related discipline. At a minimum, students should have successfully completed a graduate-level, foundation of epidemiology course as well as two biostatistical courses.

All PhD in Epidemiology students are required to complete 63 credit hours. These include:

- core courses in epidemiology and biostatistics
- elective coursework
- the dissertation

Please visit our website (http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-epidemiology) for additional information.

M.S.P.H. Master of Science in Public Health

The MSPH is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia, or private institutions. Studies will include many of the core disciplines included in the MPH degree with an additional emphasis on advanced research methods and quantitative analysis skills. The MSPH program is accredited by the Council on Education for Public Health.

The 45 credit hours degree consists of:

- Required Core Courses (21 credits)
- Required Methods Courses (6 credits)
- Elective Courses (12 credits)
- Research Thesis Project (6 credits)

The public health thesis project requires an individual investigation of a current public health problem and allows the student to demonstrate competency in the development and implementation of a research question. Students will work closely with a faculty project advisor and project committee during their investigation.

Full-time students can expect to complete the MSPH degree requirements within 2 years. An elective credit waiver may be available for students who enter the MSPH degree program with an earned advanced degree (e.g., MD, DDS, DVM, JD).

Ph.D. in Prevention Science and Community Health

The PhD in Prevention Science and Community Health will prepare students with the necessary expertise and interdisciplinary background to contribute to 21st century prevention and community health research. Students will be trained in both traditional and innovative areas of prevention science. These include etiology, intervention design and
evaluation, innovative data collection and analyses, and implementation science.

The Prevention Science program offers students the unique opportunity to interact with faculty who specialize in all stages of the intervention development and evaluation process, as well as in various methodologies such as community-based participatory research and mixed-methods research. Program faculty are experts in cultural diversity and health disparities. They are focused on acculturation, cultural predictors of health disparities, and efficacious methods, strategies, and programs for reducing health disparities locally, nationally, and internationally. Key research areas include: substance use, HIV, cancer, diabetes, obesity, delinquency and depression.

All PhD in Prevention Science students are required to complete 74 credit hours. These include:

- course courses in intervention design, implementation science and statistics
- elective coursework
- the dissertation

Please visit our website (http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-prevention-science) for additional information.

   c. Piano Performance – Conc. Code: MKPF
   d. Vocal Performance – Conc. Code: MVPF

Entrance Exams
The Frost School of Music requires certain incoming graduate students to take entrance exams in Musicology and Music Theory prior to enrolling in courses. Graduate students are expected to be well-prepared for these exams. Any student who does not achieve the designated 80% pass rate must fulfill a remediation requirement prior to completion of the final project as required for the graduate degree. Please access the following link (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/musicology_placement_exam) for more information.
Degree Requirements: Doctoral Degrees

Doctor of Musical Arts (DMA)

The purpose of the Doctor of Musical Arts is to train the most promising musicians at the highest musical and intellectual level for prominent careers in their field. The degree stresses excellence in performance, composition, scholarship, and teaching. By its nature, the Doctor of Musical Arts provides opportunities for students with proven accomplishment to prepare themselves for the professorship.

For the Doctor of Musical Arts in Performance, Keyboard Performance and Pedagogy, Composition, Jazz Composition, Jazz Performance, Vocal Pedagogy and Performance, and Conducting, the candidate must meet all the general requirements for the PhD degree with respect to residence, total minimum credit hours, and written and oral examinations. The main distinction between the two degrees pertains to the required creative activity. The DMA emphasizes performance ability, as well as performance-related research. These creative efforts replace the dissertation requirements traditionally found in the PhD. In addition to specific courses and credit hours listed in the following pages, students pursuing the DMA must meet the requirements listed below.

Doctoral Committee for the DMA

This committee can be the same or different from the student’s recital committee. The committee should consist of four members, including three members from the student’s major area (one of whom is the committee chair), and one member from another department of the Frost School. The committee chair will be Regular Faculty and/or hold a doctoral degree (i.e., DMA or PhD) as well as graduate faculty status. Two other committee members will be Regular Faculty or members of the Graduate Faculty. At least one member of the committee must hold a doctoral degree (i.e., DMA or PhD). Committees are first approved by the committee chair and then the Associate Dean of Graduate Studies in the Frost School before students apply for candidacy. Requests for exceptions to these committee requirements can be submitted in writing to the Associate Dean of Graduate Studies. Completion of the cognate will appear on the student’s transcript at time of degree conferral.

Responsibilities of the committee shall include the following:

1. Overseeing all of the students work prior to admission to candidacy, including academic program planning and advising as to recital repertoire.
2. Advising the student regarding relevant research competencies and ensuring that the student demonstrates these competencies prior to admission to candidacy.
3. Adjudging the quality of the student’s recitals, pedagogy, presentations, or compositions.
4. Overseeing the doctoral essay or lecture recital, including approval of the topic and proposal, supervision of the writing of the essay or lecture recital, assessment of the quality of the final essay or lecture recital, and the quality of the final essay defense. In cases where special faculty expertise is needed for a particular essay topic, changes in membership of the doctoral committee may be made. Membership of the essay committee is recommended by the department or program concerned, and approved first by the Associate Dean of Graduate Studies in the Frost School and subsequently by the Dean of the Graduate School.

DMA Cognates

Students pursuing a Doctor of Musical Arts degree may select an additional formal area of study known as a cognate. The 12 credit hours devoted to the cognate apply to the 60 credit hours required for the degree. The Department in which the cognate resides administers the cognate. Students must apply to the cognate Department for admission. The admission process may include an audition, interview, portfolio, or testing as determined by the cognate Department. Students must complete all requirements specified for a cognate to be recognized as having completed the cognate. Otherwise, the credit hours will be considered electives. No credits required in the DMA program can apply to the cognate. Any overlap will require approved course substitutions within either the DMA program or the cognate as determined to be most appropriate by the Associate Dean of Graduate Studies. Completion of the cognate will appear on the student’s transcript at time of degree conferral.

Procedures for Entering a Cognate

See Procedures for Completing a Cognate in the Frost School Graduate Student Handbook (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks):

List of Cognates and Respective Departments:

- Doctoral Cognate in Accompanying/Chamber Music, Department of Keyboard Performance
- Doctoral Cognate in Conducting: Choral, Department of Vocal Performance
- Doctoral Cognate in Conducting: Instrumental, Department of Instrumental Performance
- Doctoral Cognate in Higher Education, Department of Music Education and Music Therapy
- Doctoral Cognate in Instrumental Performance, Department of Instrumental Performance
- Doctoral Cognate in Jazz Performance, Department of Studio Music and Jazz
- Doctoral Cognate in Keyboard Pedagogy, Department of Keyboard Performance
- Doctoral Cognate in Music Business, Department of Music Media and Industry
- Doctoral Cognate in Music Education, Department of Music Education and Music Therapy
- Doctoral Cognate in Music Technology, Department of Music Theory and Composition
- Doctoral Cognate in Music Theory, Department of Music Theory and Composition
- Doctoral Cognate in Musicology, Department of Musicology
- Doctoral Cognate in Vocal Pedagogy, Department of Vocal Performance
- Doctoral Cognate in Vocal Performance, Department of Vocal Performance
- Doctoral Cognate in Vocal Accompanying, Department of Vocal Performance
 DMA Qualifying Examinations

Qualifying examinations represent a significant milestone in the doctoral degree. All students pursuing the Doctor of Musical Arts degree must pass Doctoral Qualifying Examinations prior to proposing the DMA Essay, and prior to applying for candidacy. These exams represent a comprehensive and in-depth assessment of graduate student knowledge and skill level in the major discipline as acquired over a lifetime of academic and practical experience. Students who fail a qualifying exam (or a portion of the exam) can re-take the exam in the subsequent semester. A student who fails a qualifying examination (or portion of the exam) for a second time will be dismissed from his/her respective degree program.

Students pursuing the DMA in the following degree programs are required to take qualifying examinations in Musicology and Music Theory:

- Collaborative Piano
- Choral Conducting
- Composition
- Instrumental Conducting
- Instrumental Performance, including Multiple Woodwinds
- Keyboard Performance and Pedagogy
- Piano Performance
- Vocal Pedagogy and Performance
- Vocal Performance

Students pursuing the DMA in Jazz Composition or Jazz Performance (Instrumental or Vocal) are required to take qualifying examinations in Jazz History, as well as Jazz Studies (i.e., jazz harmony/theory, aural and rhythm proficiency, keyboard harmony proficiency, and jazz arranging).

Students pursuing the DMA in Composition are required to complete qualifying examinations in Composition.

Additional information on Doctoral Qualifying Exams can be found on our Graduate Studies website (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/doctoral_qualifying_exam).

All DMA students are strongly encouraged to contact their advisors and Department Chairs to obtain more information on exam scheduling, expectations, and preparation.

Performance and jazz performance majors must present a qualifying recital during the first semester in residence.

Admission to Candidacy

Doctoral students may apply for candidacy after successful completion of all qualifying examinations. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

Performance and Creative Requirements

DMA students in performance, jazz performance, or keyboard performance and pedagogy may present one recital before the qualifying examination (provided they have passed their qualifying recital). Before the second or third recital, depending upon program, students must have passed the Qualifying Examinations. All recitals are to be presented during either Fall or Spring semesters when classes are in session.

Performance Majors

Students accepted into the program must present three full-length (60 minute) doctoral recitals, and may choose from these options as decided in consultation with their studio teacher:

1. Three solo recitals
2. Two solo recitals and one chamber recital
3. Solo recitals may also include some chamber music which features the student’s instrument or voice

Vocalists are expected to execute one or more substantial roles in a large scale work, e.g., opera or oratorio in addition to the solo recitals. Students majoring in accompanying and chamber music will present one solo recital, one chamber music recital, and three accompanying recitals. For Keyboard Performance and Pedagogy, an approved combination of recitals and pedagogy presentations is required.

Jazz Performance Majors

Students must present three full-length recitals.

Conducting Majors: Choral

No less than two approved full recitals shall be presented by each candidate.

Conducting Majors: Instrumental

Three approved public recitals (or the equivalent) with suitable performing groups must be given during the period of residency and prior to the oral examination.

Composition Majors

1. The candidate will be required to compose a piece of substantial proportions.
2. The candidate will be required to write a doctoral essay. The text will either detail the doctoral composition or discuss another topic as approved by the doctoral committee chair.
3. A public presentation of the candidate’s compositions will be required. A series of smaller performances presented each semester on- or off-campus, a larger festival performance(s), or a cumulative solo recital at the terminal stages of the degree exemplify how this requirement can be fulfilled. Other options are possible with faculty approval.

DMA Final Project

By means of a written Doctoral Essay or Lecture Recital, all DMA candidates are expected to demonstrate their ability to conduct an original scholarly investigation and present its results in an articulate manner. All DMA students must pass a public oral defense of the Doctoral Essay or Lecture Recital. Detailed information on these projects and defense procedures is provided in the Frost School of Music Graduate Student Handbook (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks).

Doctor of Philosophy (PhD)

The Doctor of Philosophy degree is offered in Music Education, and Music Education with Music Therapy Emphasis. This rigorous curriculum prepares students to become innovative researchers, scholars, and outstanding leaders in these disciplines. Graduates are uniquely-prepared for careers in higher education, research, and administration. Candidates must meet all general requirements for the PhD degree as defined by the Graduate School of the University of Miami with respect to
residence, total minimum credit hours, and written and oral examinations. In addition to specific courses and credit hours listed in the following pages, students pursuing the PhD must meet the requirements listed below.

**PhD Qualifying Examination**
All PhD students must complete a qualifying examination that includes two components. The first component consists of writing three scholarly papers that are independent of or significant extensions of documents written as part of other coursework. The second component consists of a one-hour, oral examination focusing on the written papers. Students in the PhD degree program should contact their graduate advisor to obtain detailed guidelines on the entire qualifying examination process. After successfully completing this exam, students can defend the dissertation proposal and apply for Doctoral Candidacy. Students who fail a qualifying exam (or a portion of the exam) can re-take the exam in the subsequent semester, with committee approval. A student who fails a qualifying examination (or portion of the exam) twice will be dismissed from the degree program.

**Doctoral Committee for the PhD**
All students pursuing the Doctor of Philosophy degree must establish a Doctoral Committee to oversee the dissertation. The committee should consist of five members, including three members from the student’s major area (one of whom is the committee chair), and one other member from another department within the Frost School, and one faculty member from outside the Frost School. The committee chair and two other members must be members of the Graduate Faculty. Requests for exceptions to these committee requirements can be submitted in writing for consideration by the Associate Dean of Graduate Studies in the Frost School.

**Admission to Candidacy**
Doctoral students may apply for candidacy after successful completion of all qualifying examinations as well as a successful defense of the dissertation proposal. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

**PhD Final Project: the Dissertation**
The culminating project for the PhD is the Doctoral Dissertation. A PhD is traditionally considered a research-oriented academic degree, thus the dissertation should consist of independent, original research that demonstrates the candidate’s mastery of both subject matter and scholarly method. All PhD students must pass a public oral defense of the Dissertation. Detailed information, including defense procedures, is provided in the Frost School of Music Graduate Student Handbook (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks).

**Degree Requirements: Masters Degrees**
**Master of Music Degree (MM) in:**
- Collaborative Piano
- Conducting, Choral or Instrumental
- Instrumental Performance
- Keyboard Performance
- Jazz Performance
- Vocal Performance

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

**Ensemble Requirements**
The curricula for Master of Music degrees in performance and conducting include participation in one ensemble during each semester that a student is registered for 7 credit hours or more. Certain performance degrees have additional ensemble requirements as found on the respective bulletin pages.

**Credit Hours and Grades**
All masters degrees require a minimum of 30 credit hours. However, many masters degrees in the Frost School require more than 30 credit hours. Students are therefore advised to carefully read the respective bulletin pages for their chosen degree program. To graduate, students must have a cumulative GPA of 3.0 (B average). Grades below C are not considered passing.

**Conducting Recital Guidelines**
**Master’s Recital**
A compilation on DVD of conducting single or multiple works of live performances of major ensembles spread across the Masters’ experience. These performances are arranged in consultation with the major professor who assists in the preparation of the performances.

**Master’s Advanced Recital**
A full-length conducting recital is prepared and presented. The ensemble(s) and repertoire will be selected in close consultation with the major professor who will assist in the preparation process. All aspects of performance preparation including scheduling, venue arrangements, program notes, and the like will be carried out by the student under the guidance of the major professor.

**Performance Recital Guidelines**
**Master’s Recital**
A full-length recital performed publicly by the student that may include chamber music in which the student’s instrument plays a prominent role. Selection of repertoire is determined in consultation with the major professor who assists in the preparation of the performances.

**Master’s Advanced Recital**
An optional full-length recital in which all music performed features the recitalist as a soloist. The recitalist will prepare extended program notes on the repertoire performed. Portions of the extended program notes are to be included with the recital program distributed to the audience. The performance is to be recorded in both audio and video so that the recitalist presents a DVD as evidence of the recital to the Dean of Graduate Studies prior to the end of the semester in which the recital was given. Repertoire will be selected in consultation with the major professor, who will assist in the preparation process. The student under the guidance of the major professor will carry out all aspects of performance preparation including scheduling, venue arrangements, program notes, and the like.

**Final Projects**
All masters degrees in performance require the successful completion of a final, culminating project. For example, in some performance degrees, students must perform and defend an extended comprehensive jury. In other performance degrees, students must complete a scholarly
document in the form of either a Recital Paper or Extended Program Notes which must be defended before the masters recital committee. Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks).

Students are advised to carefully read the respective bulletin pages and consult with their assigned advisor to obtain more information on the required final project for their degree program.

**Master of Music Degree (MM) in:**
- Composition
- Digital Arts and Sound Design
- Keyboard Performance and Pedagogy
- Media Writing and Production
- Musicology
- Music Education
- Music Therapy
- Sound Recording Arts
- Studio Jazz Writing

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

**Credit Hours and Grades**
All masters degrees require a minimum of 30 credit hours. However, many masters degrees in the Frost School require more than 30 credit hours. Students are therefore advised to carefully read the respective bulletin pages for their chosen degree program. To graduate, students must have a cumulative GPA of 3.0 (B average). Grades below C are not considered passing.

**Masters Thesis or Masters Project**
Students in these Master of Music degree programs must complete either a thesis or masters project and must pass a public, oral defense of their work. Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks).

**Comprehensive Examinations**
Certain masters degree programs also require students to take written Comprehensive Examinations. Students should contact their advisors to obtain specific details regarding comprehensive examination requirements. The exam is typically written and evaluated by a committee of faculty members in the student’s department who are familiar with the student’s discipline.

Per Graduate School policy, students who fail the comprehensive exam may be given one opportunity to retake the exam, with the committee’s approval. The re-take of the comprehensive exam may not be taken during the same semester as the original exam, or during a summer session. Additionally, the re-take must be completed within one calendar year of the original exam.

**Master of Music Degree (MM) in:**
- Jazz Pedagogy

**Music Business and Entertainment Industries**
In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

**Credit Hours and Grades**
All masters degrees require a minimum of 30 credit hours. However, many masters degrees in the Frost School require more than 30 credit hours. Students are therefore advised to carefully read the respective bulletin pages for their chosen degree program. To graduate, students must have a cumulative GPA of 3.0 (B average). Grades below C are not considered passing.

**Cumulative Exit Exam**
Students must pass a cumulative exit exam as part of the Master of Music degree in Music Business and Entertainment Industries or Jazz Pedagogy.

**Master of Arts Degree (MA) in:**
- Arts Presenting and Live Entertainment Management

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Arts degree must meet all requirements listed below.

**Cumulative Exit Exam**
Students must pass a cumulative exit exam as part of the Master of Arts degree in Arts Presenting and Live Entertainment Management.

**Master of Science Degree (MS) in:**
- Music Engineering Technology

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Science degree must meet all requirements listed below.

**Masters Research Project**
Students pursuing the Master of Science degree in Music Engineering Technology must complete a substantial final project in the form of independent research that is defended before a faculty committee. Detailed information on this project and defense procedures are provided in the Frost School of Music Graduate Student Handbook (http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks).

**Degree Requirements: Artist Diploma**

**Artist Diploma (AD) in:**
- Instrumental Conducting
- Instrumental Performance
- Keyboard Performance
- Vocal Performance

The Artist Diploma is an intensive, one-year immersion in performance or conducting study for candidates with highly-developed skills. In addition to specific courses and credit hours listed in the following pages, students pursuing the AD program must also complete two, full-length (60 minute) recitals.
Instrumental Performance

http://www.miami.edu/frost/index.php/instrumental_performance/

The Frost School of Music’s Department of Instrumental Performance has programs tailored to meet the needs and interests of students – like you – who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

As an instrumental performance major, you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (http://www.miami.edu/frost/index.php/instrumental_performance).

A.D. in Instrumental Performance

Artist Diploma in Instrumental Conducting or Performance

The Artist Diploma is a program of advanced study designed for the outstanding career-oriented performer. The curriculum emphasizes preparation for major competitions, auditions, apprenticeships, and the development of a performance career. Entrance to the program is limited to those individuals who have demonstrated exceptional skills in performance or conducting by audition. A fully enrolled student can complete the 18 credit hour program in one year.

Keyboard Performance

http://www.miami.edu/frost/index.php/keyboarke_performance/

The Department of Keyboard Performance at the Frost School of Music is a dynamic center for music scholarship. Regardless if a student is more versed in classical or contemporary repertoire, the performance and academic opportunities are exceptional and for all areas of keyboard study. A degree from the Frost School will ensure broad comprehensive training for a student in a performance-intensive environment. Degree programs incorporate performance, music research, pedagogy, and professional skills to cultivate students for a professional life in music. Graduates may seek careers as concert performers, collaborative pianists/accompanists, and/or as artist teachers. For more information,
please visit the website for the department of Keyboard Performance (http://www.miami.edu/frost/index.php/keyboard_performance).

- MKP 649 Keyboard Pedagogy II: Keyboard Pedagogy Diagnostics 2
- MKP 650 Keyboard Pedagogy III: Practice Strategies 2
- MKP 747 Seminar in Keyboard Pedagogy 2

**Final Project**
M.M. in Piano Performance

The candidate must have acquired the principles of tone production and velocity and their application to scales, arpeggios, chords, octaves, and double notes, and must have a balanced repertoire comprising the principal baroque, classic, romantic, and modern compositions which should include compositions by representative American and foreign composers. Candidates must have had experience in ensemble playing and should be capable sight-readers.

Music Therapy

Music therapy involves using music as a tool to help people regain or develop important life skills, such as communication, physical movement, attention and memory, emotional growth or social skills. Therapeutic techniques are based on scientific knowledge regarding how the human brain and body respond to and utilize musical stimuli.

Music therapists work with individuals of all ages who require treatment due to deficits in physical, cognitive or social/emotional functioning. Potential employment sites include medical or psychiatric hospitals, clinics, nursing homes, rehabilitation centers, special education or early intervention school settings, hospices, or correctional settings. Music therapy can be a rewarding career for the individual who has a strong musical background and who is interested in a health care profession.

For more information, please visit the website (http://www.miami.edu/frost/index.php/music_therapy) for the department of Music Therapy.

Music Education

A basic premise of the Music Education program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical and practical foundation in music education. Carefully coordinated courses emphasize sequencing of instruction in terms of student's musical development and incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners. For more information, please visit the website (http://www.miami.edu/frost/index.php/department_of_music_education) for the department of Music Education.

Ph.D. in Music Education

The Doctor of Philosophy program is offered in Music Education, as well as in Music Education with Music Therapy Emphasis. Requirements for the degree conform to those for the general Doctor of Philosophy degree, listed elsewhere in this Bulletin. The Ph.D. is a research degree requiring 60 credit hours beyond the Master’s degree or 90 credit hours beyond a Bachelor’s degree. Enrollment for the Ph.D. degree is limited. Acceptance into the program is based on academic credentials, Graduate Record Examination Scores, personal suitability, recommendations, experience, and demonstrated professional competency.

Students are admitted to candidacy after successful completion of at least three semesters of coursework, including MED 795 Doctoral Research Project, as well as the MED Qualifying Examination. Research tools are selected in consultation with the student’s advisor, as relevant to the proposed dissertation research.

Music Media and Industry

Music Business and Entertainment Industries

In today’s fast changing, multi-billion dollar international music and entertainment industries, there are more record labels, publishers, media companies, distributors, retailers, and product manufacturers actively promoting the sale and use of music than ever before. As the market for music shifts away from physical products and traditional methods to digital online and mobile, a greater number of competent, highly-skilled executives and entrepreneurs will be needed to meet the specialized demands of the new music industry. Since 1964, the Music Business and Entertainment Industries program has been at the forefront of music business education. The MBEI program has been carefully designed to prepare qualified music business students for these emerging opportunities.

Our graduate program, where students earn a Master of Music, focuses primarily on music business courses, with the opportunity to pursue additional coursework in both the School of Business and School of Communications. We also offer the only joint degree Juris Doctor (J.D.) and Master of Music in Music Business and Entertainment Industries (M.M.). For more information, please visit the website for the department of Music Business (http://www.miami.edu/frost/index.php/music_business).

Music Engineering Technology

Since 1975, the Music Engineering Technology program at the University of Miami Frost School of Music has pioneered education in music and technology, setting the standard by which the National Association of Schools of Music (NASM) accredits other such programs around the United States. Alumni of the program have contributed significantly to the music and audio industries and upon graduation pursue careers ranging from recording engineer to software designer.

The Music Engineering Technology program offers a two-year Master of Science graduate degree for students who have completed an undergraduate degree in electrical engineering or computer science. These students study the software and hardware design of audio systems and perform independent research that culminates in a thesis.
project. Upon graduation, these students are widely placed in top corporations that span the audio industry. For more information, please visit the website for the department of Music Engineering (http://www.miami.edu/frost/index.php/music_engineering).

Arts Presenting and Live Entertainment Management

Arts Presenting (AP Live) is a Live Entertainment Management Program with an emphasis on the performing arts and commercial music industries. AP Live offers a curriculum that's distinctly tailored to provide a thorough understanding of marketing, promotion, management, legal aspects, risks and finance of a diversity of live entertainment endeavors. AP Live students gain hands on experience producing events, marketing and promoting concerts and working with venues on all aspects of a live entertainment performance. For more information, please visit the website for the Arts Presenting Program (http://www.miami.edu/frost/index.php/arts_presenting).

Masters Programs in Music Media and Industry

- M.A. in Arts Presenting (p. 723)
- M.M. in Music Business and Entertainment Industries (p. 723)
- M.S. in Music Engineering Technology (p. 724)

J.D./M.M. in Music Business and Entertainment Industries

The University of Miami School of Law and the Frost School of Music offer the first ever joint degree program in law and music business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Music in Music Business and Entertainment Industries degree from the School of Music.

In this specialization, students not only learn the essentials of law, but also the common practices of the music business — essential skills for becoming a successful attorney in the music industry. Through this joint program, students can complete both degrees in less time (3 to 4 years) while studying at a top law school and one of the best music schools in the country. And, as one of the four major music cities in the U.S. and as the music center for the Latin American Divisions of all major music companies, Miami offers exceptional internship and work opportunities. For more information, please visit our website (http://www.law.miami.edu/academics/jd-music.php?op=0).

J.D./M.A. – Master in Arts Presenting & Live Entertainment Management

The University of Miami School of Law in partnership with the University of Miami's esteemed Frost School of Music, Department of Music Business and Entertainment Industries, now offers a joint J.D./M.A. in Law and Arts Presenting & Live Entertainment Management.

This combination of degrees is ideal for Law School students looking to:

- Prepare for a career in entertainment law
- Develop a focus on the presentation of concerts, exhibitions, performances, and events
- Apply legal knowledge in the areas of contracts, risk management, marketing, and finance to the live entertainment/performance fields.

This program is similar to the J.D./M.M. program in Music Business and Entertainment Industries, but has a focus on the concert/performance arena.

Music Theory - Composition

Degree Programs

Known for its aesthetic diversity and openness to the ever-changing and progressive world of composition, the Frost School of Music’s Department of Music Theory and Composition has a long tradition of distinguished faculty and students. When today’s post-baccalaureate composers decide to pursue a Master’s Degree in Composition, Digital Arts and Sound Design, or Media Writing and Production, they look to Frost faculty composers for inspiration and mentoring. At Frost, graduate students are well coached to take the next steps toward their professional maturation. They work one-on-one with our dedicated faculty to expand their music portfolios, enter competitions, apply for commissions and network in the music profession. Candidates for the Doctor of Musical Arts in Composition (D.M.A.) develop advanced research and teaching skills that are applicable to careers in higher education.

Musicology

Degree Programs

Graduate students seeking the M.M. in Musicology at the Frost School of Music enjoy a balanced curriculum of study in music literature, analysis, performance, and research methods.

Our stellar faculty and extensive library resources help students fulfill their musical and academic goals while preparing for advanced study. Musicology majors interact and collaborate with others in a variety of musical disciplines, gaining insight into the role their own specialization plays in a thriving musical environment.

1 Musicology students are expected to demonstrate proficiency in a language other than English, normally German, French, or Spanish. Proficiency examinations will be administered by the Department of Modern Languages and will consist of 1-2 passages from representative scholarly readings. Alternatively, enrolling in ITA 625, FRE 625, or an equivalent course at the graduate level may fulfill the requirement. This requirement should be completed by the beginning of the second year to facilitate research on the master’s thesis.

Studio Music and Jazz

http://www.miami.edu/frost/index.php/studio_music_and_jazz/

Degree Programs

The mission of the Studio Music and Jazz Instrumental Degree Programs is to: (1) prepare jazz instrumentalists to enter the music profession or further jazz studies; (2) identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career; (3) foster faculty creativity and performance which serves as a role model for students; (4) develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities; (5) produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact discs, radio and Internet broadcast; and (6) provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Vocal Performance
http://www.miami.edu/frost/index.php/vocal_performance/

Graduate students seeking a degree in the department of Vocal Performance have already proven themselves to be highly accomplished artists. They come to the Frost School of Music to further hone their skills, to discover new perspectives, and to gain a competitive edge for the next step in their professional careers. Candidates for our advanced degrees in performance, conducting, and pedagogy (http://www.miami.edu/frost/index.php/vocal_performance/degrees) are leaders in the various programs of the Department of Vocal Performance, and they, in turn, go on to become leaders in their respective areas of specialty. For more information please visit the website for the department of Vocal Performance (http://www.miami.edu/frost/index.php/vocal_performance).

Doctoral Programs in Vocal Performance
  • D.M.A. in Choral Conducting (p. 727)
  • D.M.A. in Vocal Pedagogy and Performance (p. 727)
  • D.M.A. in Vocal Performance (p. 728)

Masters Programs in Vocal Performance
  • M.M. in Choral Conducting (p. 728)
  • M.M. in Vocal Performance (p. 728)

Artist Diploma in Vocal Performance
  • A.D. in Vocal performance (p. 727)

A.D. in Vocal Performance

Artist Diploma in Vocal Performance

The Artist Diploma in Vocal Performance is a program of advanced study designed for the outstanding career-oriented performer. The curriculum emphasizes preparation for major competitions, auditions, apprenticeships, and the development of a performance career. Entrance to the program is limited to those individuals who have demonstrated exceptional performance skills by audition. A fully enrolled student can complete the 18 credit hour program in one year.

D.M.A. in Vocal Pedagogy and Performance

Performance Courses
Applied Lessons  8
Opéra Theater  2
Vocal Performance Preparation  2

Creative Activities
MVP 832  Doctoral Recital  2
MED 702  DMA Essay Proposal  1
MVP 831  Doctoral Essay  9

Vocal Pedagogy
Vocal Literature for Teaching
Select 18 credit hours of the following:  18
  • MVP 710  Vocal Literature For Teaching: English
  • MVP 712  Vocal Literature for Teaching: German

Recital  2
Approved Studies in Music  6
Total Credit Hours  18

D.M.A. in Choral Conducting

Conducting Courses
Applied Lessons  4
Choral Conducting  2
  • MVP 772  Choral Conducting: Major Work Emphasis  2
  • MVP 773  Choral Conducting Workshop: Smaller Choral Works  4
Ensembles MVP 700 level (1 credit hour each)  2

Cognate/Electives
Select 12 credit hours of Cognate/Electives  12
Total Credit Hours  60

1  Choral Conducting courses can be taken in any combination for two credits.
### D.M.A. in Vocal Performance

**Performance Courses**
- Applied Lessons: 12 credits
- Vocal Performance Preparation: 6 credits
- Opera Theater: 3 credits

**Creative Activities**
- MED 702: DMA Essay Proposal: 1 credit
- MVP 831: Doctoral Essay: 8 credits
- MVP 832: Doctoral Recital: 3 credits

**Allied Music Courses**
- Musicology (Art Song Literature and Opera Literature or other MCY courses): 6 credits
- MTC 717: Analytical Techniques (or other MTC course): 3 credits
- Performance Seminars: 2 credits
- MVP 738: Advanced Vocal Pedagogy: 3 credits
- MED 790: Teaching Music in College: 1 credit

**Cognate/Electives**
- Select 12 credit hours of Cognate/Electives: 12 credits
- Total Credit Hours: 60 credits

### M.M. in Vocal Performance

**Admission Requirements**
The candidate must demonstrate the ability to sing in English, French, German, and Italian; be knowledgeable of the more difficult arias of opera and oratorio and of recitative in both the free and measured forms; have a thorough acquaintance with the general song literature; and be able to present a creditable recital. Each student who enters the Master of Music Degree Program in Voice must show undergraduate credit hour equivalent, or enroll for the following courses before graduation:

- MCY 622: Operatic Literature: 3 credits
- MCY 625: Art Song Literature: 3 credits
- MVP 638: Vocal Pedagogy: 2-3 credits
- MVP 738: Advanced Vocal Pedagogy: 3 credits
- Two semesters of college-level Italian: 1 credit
- Two semesters of college-level French: 1 credit
- Two semesters of college-level German: 1 credit
- Total Credit Hours: 11-12 credits

**Curriculum Requirements**

- Major Area:
  - Applied Lessons: 4 credits
  - Performance Ensembles: 4 credits
  - Vocal Performance Preparation: 4 credits
  - MVP 738: Advanced Vocal Pedagogy: 3 credits
  - MVP 812: Master’s Recital: 1 credit
  - MED 701: Recital Paper Preparation: 1 credit
  - MVP 811: Master’s Recital Paper: 2 credits

- Other Studies in Music:
  - MTC 717: Analytical Techniques: 3 credits
  - Approved Musicology Course: 3 credits

- Electives:
  - Approved Electives: 5 credits

- Total Credit Hours: 30 credits

---

**M.M. in Choral Conducting**

**Major Area**
- Applied Lessons: 2 credits
- MVP 608: Choral Score Study: 2 credits
- MVP 638: Vocal Pedagogy: 2 credits

**Choral Conducting**
- 2 credits
  - MVP 772: Choral Conducting: Major Work Emphasis
  - MVP 773: Choral Conducting Workshop: Smaller Choral Works

**Choral Ensembles**
- MED 701: Recital Paper Preparation: 1 credit
- MVP 812: Master’s Recital: 1 credit
- MVP 811: Master’s Recital Paper: 2 credits

**Other Studies in Music**
- MTC 717: Analytical Techniques (or other MTC course): 3 credits

**Electives**
- Approved Electives: 5 credits

- Total Credit Hours: 26 credits

---

1. Choral conducting courses can be taken in any combination for two credits.
Nursing and Health Studies

http://www.miami.edu/sonhs

The University of Miami (UM) School of Nursing and Health Studies (SONHS) is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are available for students to study and earn course credit in a variety of local and international settings.

Mission

The mission of the SONHS is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

Nursing Accreditation

The MSN and DNP programs in the SONHS are accredited by the following:

- Commission of Collegiate Nursing Education (CCNE)
  One DuPont Circle NW, Suite 530
  Washington, DC 20036
  (202) 887-6791

- Council on Accreditation of Nurse Anesthesia Education Programs (COA)
  222 South Prospect Avenue
  Park Ridge, IL 60068-4001
  (847) 692-7050 (ext. 1154)

Graduate Degrees and Academic Programs

The SONHS offers a variety of academic programs across six graduate degrees:

1. **Doctor of Philosophy (PhD) in Nursing Science**
   - BSN-to-PhD
   - MSN-to-PhD

2. **Doctor of Nursing Practice (DNP)**
   - BSN-to-DNP, Nurse Anesthesia Track
   - MSN-to-DNP (1 Year, 1 Year Plus, and 2 Year)

3. **Master of Science in Nursing (MSN)**
   - Adult-Gerontology Acute Care Nurse Practitioner (Full-time and Part-time)
   - Adult-Gerontology Primary Care Nurse Practitioner (Full-time and Part-time)
   - Family Nursing Practitioner (Full-time and Part-time)
   - Nursing Informatics (online)

4. **Master of Science (MS)**
   - Health Informatics (online)

5. **Post-Master's Certificate**
   - Adult-Gerontology Acute Care Nurse Practitioner
   - Adult-Gerontology Primary Care Nurse Practitioner
   - Family Nursing Practitioner

6. **Post-Bachelor's Certificate**
   - Health Informatics (online)

Admission

Admission to graduate programs in the SONHS is subject to the rules, regulations, and procedures as set forth in the Academic Bulletin, the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks), and the SONHS website (http://www.miami.edu/sonhs/index.php/sonhs/admissions), as determined by each graduate nursing program, the Graduate School, and the Office of International Admission. Applicants must meet specific admission requirements before they may be evaluated for admission to the SONHS’ graduate programs. Applications for the SONHS’ graduate programs, except for the online Informatics programs, are submitted through NursingCAS (http://www.nursingcas.org). Applications for the online Informatics programs are submitted through UOnline (http://www.miami.edu/online/admissions).

Degree Requirements

The degree requirements for each SONHS graduate program are outline under the "MASTERS (p. 732)" and "DOCTORAL (p. 733)" tabs above. All graduate programs are lock-step, meaning students must follow the Plan of Study under which they were admitted as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks), and they must successfully complete the courses in each semester to progress to the next. Students should contact their appropriate Associate Dean or Program Director, or a staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

Doctor of Philosophy (PhD) in Nursing Science

The PhD with a major in Nursing Science requires a minimum of 41 credit hours of coursework beyond the master’s degree or 62 credit hours of coursework beyond the bachelor’s degree. The principal goal of the PhD with a major in Nursing Science is to prepare scholars and researchers who will contribute to the growth of science in nursing through recognized methods of scholarly inquiry. Admission to the doctoral program is competitive.

Doctor of Nursing Practice (DNP)

The DNP degree is a practice-focused doctorate designed for nurses seeking a terminal degree in nursing practice. The program is offered in two formats: the MSN-to-DNP and the BSN-to-DNP, Nurse Anesthesia track. The BSN-to-DNP, Nurse Anesthesia program is available as an entry into practice degree, meaning it is available to post-baccalaureate nurses with or without a master’s degree in nursing.

The outcome objectives for graduates of the DNP program are to:

- Integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice that address health care disparities
- Evaluate research methods and findings to create an evidence base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities
• Synthesize knowledge gained from traditional and innovative learning methods to lead quality, cost-effective health care collaborations addressing health care disparities
• Demonstrate expert clinical judgment and knowledge of health care systems to design, deliver and evaluate evidence-based care interventions to reduce health care disparities
• Model expert nursing practice and serve as mentors to nursing colleagues in their efforts to improve nursing practice and health care systems
• Employ knowledge of health care policy and economics to develop and evaluate programs to address health care disparities

Master of Science in Nursing (MSN)
The MSN degree is designed for professional nurses holding a Bachelor of Science in Nursing (BSN) degree. Registered nurses with baccalaureate degrees in other fields are also eligible to apply for admission. The following specialty tracks available in the SONHS focus on selected areas of advanced practice nursing and nursing education:

- Adult-Gerontology Acute Care Nurse Practitioner
- Adult-Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner
- Nursing Informatics (online)

Degree requirements may be completed in three semesters of full-time study or five semester of part-time study for all programs except Nursing Informatics.

Master of Science (MS)
The MS in Health Informatics online program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within healthcare. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic healthcare record systems.

Post-Master’s Certificate
Post-Master’s Certificate options are available in each of the following areas to students who possess a MSN degree and who wish to focus on selected areas of advanced practice nursing and nursing education:

- Adult-Gerontology Acute Care Nurse Practitioner
- Adult-Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner
- Psychiatric Mental Health Nurse Practitioner

All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Post-Bachelor’s Certificate
The Post-Bachelor’s Certificate program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within healthcare. UOnline’s flexible Informatics programs give students the option to complete their MS in Health Informatics or MSN in Nursing Informatics while earning a Post-Bachelor’s Certificate in Health Informatics along the way or to focus on just earning the Post-Bachelor’s Certificate itself. The 15 credit Post-Bachelor’s Certificate is made up of the first 5 classes of the MS and MSN programs. Credits completed for the Post-Bachelor’s Certificate can be applied toward the MS or MSN degree.

Academic Policies
Student Responsibilities
Students in the SONHS are responsible for fulfilling their degree requirements. Students are also responsible for complying with all provisions outlined in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks), as well as all written changes to the plan of study.

Students are provided assistance by faculty advisors and other faculty members. Requests for deviation from the Plan of Study or SONHS requirements are granted only by written approval from the Associate Dean or Dean. Students who are in violation of the provisions of this Academic Bulletin may be withdrawn from classes unilaterally or have a stop placed upon their future enrollment by appropriate SONHS officials. The SONHS reserves the right to change academic requirements to include course offerings that ensure students receive the highest-quality and most-current education. Classes may be held on weekdays or weekends and will be listed as such in the course schedule. Any programmatic changes are transmitted by written notice in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) or by an official in the SONHS.

Academic Bulletin and Student Handbook
In addition to the material listed in the Academic Bulletin, all SONHS students are held to the policies, procedures, and requirements listed in the most current Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for their respective degree program. Please note the material included in the Student Handbook is subject to change throughout the academic year and may not be reflected in the Academic Bulletin. The Student Handbook contains the most current information. Consult the appropriate Associate Dean or Program Director or reach out to a staff member in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss questions related to academic requirements and opportunities.

Technical Standards
Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the UM SONHS at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

1. Observation
2. Communication
3. Motor
4. Conceptual-Integrative
5. Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment. Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes.
Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant’s ability to complete all components of the program.

**Observation**
The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.

**Communication**
Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

**Motor**
Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

**Conceptual-Integrative**
These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

**Behavioral-Social**
Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

**Clinical Clearance**
Before students can enter the SONHS’ graduate nursing programs, they must successfully complete a drug test and a background check. Students must have a background report without any infractions, regardless of how they were resolved or adjudicated. Accordingly, if a student’s background report contains any infractions, regardless of how they were resolved or adjudicated, he/she will not be able to successfully complete the background check and he/she will be withdrawn from the nursing program.

Students must also provide current immunizations as outlined by the SONHS and obtain a Basic Life Support (BLS) for Healthcare Providers certification from the American Heart Association prior to entry into clinical coursework. The BLS certification must include content on Automated External Defibrillators (AEDs). Additional certifications may be required for specific graduate programs.

Refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more information.

**Grades**
Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to grades, progression, and dismissal.

Graduate nursing students must each a B or higher in each course to progress. Any graduate student who receives a “C” or lower in a nursing course will be dismissed from his or her program. A grade of “B-” or “C+” for a course is below graduate standards, and the student must repeat that course. However, a student may only repeat one course, one time. The student will be dismissed if he/she fails a second course even if he/she retook and passed the previous failed course. A passing grade in all clinical experiences is required to pass a course having a clinical component (generally listed as a “lab section” by UM). Students who are not making satisfactory progress may also receive an academic alert at mid-semester or mid-course. All grades are included in the computation of the UM overall grade point average including those that are failed or repeated.

When a course must be repeated, progression in the graduate program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the graduate program.

**Grade Point Averages (GPAs)**
Students should refer to the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for more detailed information on the SONHS’ policies related to GPAs, progression, and dismissal.

**Requirements to Continue**
Students who are enrolled in SONHS’ graduate programs must maintain a 3.0 GPA to progress.

**Requirements to Graduate**
Students who are enrolled in SONHS’ graduate programs must maintain a 3.0 GPA to graduate.

**Prerequisites and Corequisites**
Students must successfully complete all specified prerequisites with a B or higher. Students must also register for all required corequisites at the time of enrollment. If students enroll in a course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Program Director, Associate Dean, or Dean. Students should contact their appropriate Associate Dean or Program Director, or a staff member in the OSS (http://
www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to course enrollment.

**Transfer Credit**
SONHS graduate students may, depending on their program, transfer up to 9 credits toward their graduate degree at the discretion of their Associate Dean. Detailed course descriptions or syllabi are required for transfer equivalency reviews.

**Pre-immersion Course**
Prior to enrollment in any SONHS graduate program, except for the Informatics programs, students must complete a mandatory online pre-immersion, orientation, and/or writing express course. These courses are listed in students’ first term of enrollment but it does not affect students’ GPAs. Failure to complete these courses may delay entry into the clinical nursing courses. Information about these courses will be provided to eligible students by the SONHS.

**Research Experience**
Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research) during their time at the UM. Students should speak with their appropriate Associate Dean or Program Director to learn more about the research opportunities available to them at the UM.

**Accommodations Policy for Students with Disabilities**
The SONHS adheres to standards of the Americans with Disabilities Act. Any student needing special accommodations should seek assistance through the Office of Disability Services (ODS) (http://umarc.miami.edu/arc/ODS.html), which is the primary on-campus resource responsible for the coordination of services for students with disabilities. Students must follow ODS’ policies, procedures, and timelines to request assistance. Please note ODS has strict deadlines to apply for accommodations; only students who are officially registered with ODS may be granted accommodations.

**Financial Assistance**
Students interested in obtaining financial assistance in the form of student loans, grants, etc. should contact the Office of Financial Assistance (http://www.miami.edu/admission/index.php/ofas).

The SONHS also offers limited merit-based and need-based scholarships to continuing students. The types of scholarships available and the qualifications for them vary by semester. Continuing students who wish to be considered for SONHS scholarships must apply for such scholarships through the SONHS General Scholarship Application. Calls for applications are e-mailed to continuing students once each semester to prompt students to apply who wish to be considered for a scholarship for the next term. Additional information on SONHS scholarships as well as health science-, nursing-, and public health-related outside scholarships can be found on the SONHS Scholarships website (http://www.miami.edu/sonhs/index.php/sonhs/scholarships).

Full-time PhD students are considered for financial support, which may include:

1. **Tuition Scholarships**: These awards vary in amount and are intended to assist the recipient in pursuit of study and research as required by the degree. These scholarships are awarded on a competitive basis.

2. **Graduate Stipends**: These cash awards, paid monthly, are intended as part of an educational assistance program for PhD degree students. The stipends require service in the form of teaching, research assistance, or other appropriate educational activities that may be designated by the supervisor of the recipient.

Students may speak with a representative in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) if they have any questions.

**Facilities**
The SONHS is located on the Coral Gables Campus. The four-story, Jerusalem-stone and stucco M. Christine Schwartz Center for Nursing and Health Studies opened in Fall 2006. The building features classrooms and clinical practice labs, conference rooms, a computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000 square foot facility supports the work of more than 40 nurse-scientists and clinical educators and approximately 950 undergraduate and graduate students enrolled in the SONHS’ health science, nursing, and public health programs.

In Fall 2015, SONHS broke ground on the new, state-of-the-art, 41,000 square foot, 5 story Simulation Hospital (http://www.miami.edu/sonhs/index.php/simulation_hospital). The Simulation Hospital is projected to open on the Coral Gables Campus in Spring 2017. It is a one-of-a-kind facility as it is one of the first education-dedicated simulation facilities located on a college campus. This new facility will use the latest simulation technology to provide SONHS students with the highest-quality healthcare education through a variety of simulated clinical environments. It will also provide opportunities for public health-related simulation experiences and create ample opportunities for interprofessional education (IPE).

Library resources for SONHS students are available at the Otto G. Richter Library (http://library.miami.edu) on the Coral Gables Campus and the Louis Calder Memorial Library (http://calder.med.miami.edu) on the Medical Campus.

Clinical experiences are offered in a variety of hospitals and health-related agencies in the community, including the University of Miami Hospital, Jackson Health System, Sylvester Comprehensive Cancer Center, Nicklaus Children’s Hospital, and approximately 170 other community partners.

**Master of Science in Nursing (MSN) Programs**

- BSN-to-DNP, Nurse Anesthesia Track (p. 733)
- MSN-to-DNP (p. 741)

BSN to DNP - Nurse Anesthesia Track

BSN-to-DNP, Nurse Anesthesia Track Degree Requirements

The BSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

To receive the BSN-to-DNP, students must:

1. Complete all course work as required with an overall GPA of 3.0 or better
2. Complete all required clinical and practice immersion hours
3. Successfully complete the capstone project before graduation
4. Successfully complete annual benchmark exams, before progressing into next phase of the program
5. Successfully pass the DNP comprehensive examination, which is an integrative experience to demonstrate students’ mastery of the outcome objectives of the program
6. Pass a comprehensive clinical nurse anesthesia oral board examination

BSN-to-DNP, Nurse Anesthesia Track Plan of Study

- Post-Master’s Certificate, Family Nurse Practitioner (p. 748)
- Post-Master’s Certificate, Psychiatric Mental Health Nurse Practitioner (p. 749)

MS, Health Informatics Degree Requirements

The health informatics field is growing. The Bureau of Labor Statistics projects that employment in the field of health informatics increases 23% by 2022, much faster than average of 11% for all occupations nationwide. The UM’s online Health Informatics program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within health care, including hospitals, government, health insurance providers, medical vendors, pharmaceutical and biotechnology companies, and consulting firms. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic health care record systems.

The Health Informatics program prepares graduates to enter or excel in this field by offering rigorous courses, which cover:

- Information security
- Data analytics
- Project management
- Public health informatics
- Health information exchange
- Database design

The program includes a 3 credit capstone practicum, which allows students to apply the informatics knowledge they have gained to real-world situations and problems.

The Health Informatics program is a lock-step program. Students must complete the coursework in the order specified in the Plan of Study below, and they must successfully complete each course to progress to the next. Students are admitted to begin the program in the fall, spring, or summer. Questions related to degree requirements should be directed to the UOnline Academic Advisors (http://www.miami.edu/online/student-services).

### MSN - Adult-Gerontology Acute Care Nurse Practitioner

#### MSN, Adult-Gerontology Acute Care Nurse Practitioner Degree Requirements

The Adult-Gerontology Acute Care Nurse Practitioner program may be completed by finishing one of the following tracks:

- Full-time (3 Semesters)
- Part-time (5 Semesters)

The Adult-Gerontology Acute Care Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

#### MSN, Adult-Gerontology Acute Care Nurse Practitioner Plan of Study (listed by track)

The Adult-Gerontology Acute Care Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for the specific track under which they were admitted. ### MSN - Nursing Informatics (online)

#### MSN, Nursing Informatics Degree Requirements

The informatics field is growing. The Bureau of Labor Statistics projects that employment in the field of informatics increases 23% by 2022, much faster than average of 11% for all occupations nationwide. The UM’s online Nursing Informatics program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within health care, including hospitals, government, health insurance providers, medical vendors, pharmaceutical and biotechnology companies, and consulting firms. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic health care record systems.

The Nursing Informatics program prepares graduates to enter or excel in this field by offering rigorous courses, which cover:

- Information security
- Data analytics
- Project management
- Public health informatics
- Health information exchange
- Database design

The program includes a 3 credit capstone practicum, which allows students to apply the informatics knowledge they have gained to real-world situations and problems.

The Nursing Informatics program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the UOnline Academic Advisors (http://www.miami.edu/online/student-services).

#### Admission

For information on admission to the program please click here (http://www.miami.edu/online/online-degrees/masters-health-informatics).
### MSN to DNP

#### MSN-to-DNP Degree Requirements

The MSN-to-DNP program may be completed by finishing one of the following tracks:

- 1 Year
- 1 Year Plus
- 2 Year (Fall Entry)
- 2 Year (Spring Entry)

The MSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

To receive the MSN-to-DNP, students must:

1. Complete all coursework as required with an overall GPA of 3.0 or better
2. Complete all required clinical hours
3. Successfully complete the capstone project
4. Successfully pass a comprehensive examination, which is an integrative experience to demonstrate students’ mastery of the outcome objectives of the program

#### MSN-to-DNP Plan of Study (listed by track)

The MSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for the specific track under which they were admitted. PhD - Nursing Science

PhD, Nursing Science Degree Requirements

The PhD in Nursing Science program may be completed by finishing one of the following tracks:

- BSN-to-PhD
- MSN-to-PhD

The PhD in Nursing Science program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or
staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

To receive the PhD degree, the candidate must meet all the general requirements for the PhD degree with respect to course work, residency, the qualifying examination, 12 credit hours of dissertation, and successful defense of the dissertation.

Students in the SONHS are responsible for meeting their degree requirements. It is the student's responsibility to understand fully and comply with all the provisions of the Academic Bulletin and written changes to their Plan of Study. Students are provided assistance by faculty advisors and other faculty members. Requests for deviation from the Plan of Study or SONHS requirements are granted only by written approval from the Associate Dean or Dean. Students who are in violation of the provisions of this Academic Bulletin may be withdrawn from classes unilaterally or have a stop placed upon their future enrollment by appropriate SONHS officials. The SONHS reserves the right to change academic requirements to include course offerings that ensure students receive the highest-quality and most-current education. Classes may be held on weekdays or weekends and will be listed as such in the course schedule. Any programmatic changes are transmitted by written notice in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) or by an official in the SONHS.

**PhD, Nursing Science Plan of Study**

The PhD in Nursing Science program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for the specific track under which they were admitted. Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

Note: The first summer session follows the Summer B Academic Calendar. All other summer semesters follow the Summer C Academic Calendar. Students in the BSN-to-DNP program must successfully complete 12 dissertation credits to complete their degree.
### Post-Master's Certificate, Adult-Gerontology Acute Care Nurse Practitioner Degree Requirements

A Post-Master’s Certificate in Adult-Gerontology Acute Care Nurse Practitioner is available to students who possess a MSN degree and who wish to focus in this specific area of advanced practice nursing and nursing education. All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Once the gap analysis is complete, students will be issued a Plan of Study specific to their level of preparation. The Post-Master’s Certificate program is then lock-step, which means students must successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

### Post-Master’s Certificate, Adult-Gerontology Acute Care Nurse Practitioner Sample Plan of Study

A Post-Master’s Certificate in Adult-Gerontology Acute Care Nurse Practitioner is available to students who possess a MSN degree and who wish to focus in this specific area of advanced practice nursing and nursing education. All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Once the gap analysis is complete, students will be issued a Plan of Study specific to their level of preparation. The Post-Master’s Certificate program is then lock-step, which means students must complete the coursework as specified in their Plan of Study and must successfully complete the courses in each semester to progress to the next. Post Masters Certificate - Adult Gerontology Primary Care Nurse Practitioner

Post-Master’s Certificate, Adult-Gerontology Primary Care Nurse Practitioner Degree Requirements

A Post-Master’s Certificate in Adult-Gerontology Primary Care Nurse Practitioner is available to students who possess a MSN degree and who wish to focus in this specific area of advanced practice nursing and nursing education. All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Once the gap analysis is complete, students will be issued a Plan of Study specific to their level of preparation. The Post-Master’s Certificate program is then lock-step, which means students must complete the coursework as specified in their Plan of Study and must successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

**Post Masters Certificate - Psychiatric Mental Health**

**Post-Master's Certificate, Psychiatric Mental Health Nurse Practitioner Degree Requirements**

The Psychiatric Mental Health Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

**Post-Master’s Certificate, Psychiatric Mental Health Nurse Practitioner Plan of Study**

The Psychiatric Mental Health Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook:

Post-Bachelors Certificate - Health Informatics (online)

Post-Bachelor’s Certificate, Health Informatics Degree Requirements

UOnline’s flexible Informatics programs give students the option to complete their MS in Health Informatics or MSN in Nursing Informatics while earning a Post-Bachelor’s Certificate in Health Informatics along the way or to focus on just earning the Post-Bachelor’s Certificate itself. The 15 credit Post-Bachelor’s Certificate is made up of the first 5 classes of the MS and MSN programs. Credits completed for the Post-Bachelor’s Certificate can be applied toward the MS or MSN degree.

The health informatics field is growing. The Bureau of Labor Statistics projects that employment in the field of health informatics increases 23% by 2022, much faster than average of 11% for all occupations nationwide. The UM’s online Post-Bachelor’s Certificate program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within health care, including hospitals, government, health insurance providers, medical vendors, pharmaceutical and biotechnology companies, and consulting firms. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic health care record systems.

The Post-Bachelor’s Certificate program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the UOnline Academic Advisors (http://www.miami.edu/online/student-services).

Admission

For information on admission to the program please click here (http://www.miami.edu/online/online-degrees/masters-health-informatics).

Post-Bachelor’s Certificate, Health Informatics Plan of Study

The Post-Bachelor’s Certificate program is a lock-step program. Students must complete the coursework in the order specified in the Plan of Study below, and they must successfully complete each course to progress to the next. Students are admitted to begin the program in the fall, spring, or summer. Questions related to degree requirements should be directed to the UOnline Academic Advisors (http://www.miami.edu/online/student-services).

Message from the Dean

Graduate school at the University of Miami is a place where students gain proficiency in a specialty with the guidance of dedicated faculty in the presence of a community of world-class scholars. UM students are thought leaders and innovators whose accomplishments are showcased on a global stage. Our students represent the best and the brightest and their engagement with our faculty continues to elevate the University.

The Graduate Student Handbook for Online Students

The Graduate Student Handbook for Online Students is an excellent resource for graduate online students at the University of Miami. The Handbook contains all applicable policies and valuable information for graduate online students compiled into one comprehensive manual. Online graduate student enrollment is governed by this Handbook. This handbook describes policies and procedures pertaining to the Graduate School and online graduate study at the University of Miami. Policies or procedures for online graduate students may vary from policies or procedures of campus-based graduate students. This Graduate Student Handbook is applicable to Online Students only. In the event of a conflict between this handbook for online graduate students and any other applicable University policies or procedures, the terms of this handbook shall control. It is the student’s responsibility to be aware of and comply with all policies, procedures and deadlines. Although the Handbook contains general information, students should be aware of regulations and policies that directly pertain to individual graduate programs, as many programs have additional requirements of their own, as well as a program handbook.

Policies Modification

This is the official University of Miami source for the enrollment, business, and financial policies associated with the University’s UOnline programs. The University reserves the right to amend and update these policies at any point in the future. Amendments to these policies will be published on the University Registrar’s website.

Please also consult these additional University of Miami policies:

- Our privacy statement (http://www.miami.edu/index.php/privacy_statement) for our privacy and data collection policies.
- Technology policies
  - http://www.miami.edu/it/index.php/a060_acceptable_use_of_info_tech_resources_by_students/

About the Graduate School

The Graduate School is the administrative body overseeing all master’s and doctoral programs.

Mission and Goal Statement

The mission of the Graduate School is to promote graduate education, scholarship and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally, the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the faculty.

Academic Calendar

Please visit the Office of the Registrar (http://www.miami.edu/registrar) website for the most recent academic calendar for online programs.

Definitions

New Student

A new student is a student who has been admitted to a program and paid the enrollment deposit but not yet completed the first 7 days of the first program course.

Continuing Student

A continuing student is a student who has completed at least the first 7 days of the first course in their program and not yet graduated from the program.

Course

A course is an educational component made up of academic content, assignments and activities, the successful completion of which earns a student credit hours toward completion of a program. A course is delivered and accessed online via a learning management system (LMS). A course is 7 weeks long.
Academic Plan/Program of Study
A series of courses that make up a full degree or certificate program. All courses in a program must be successfully completed for a student to be considered for graduation.

Academic Year
The academic year is August through July and consists of 3 terms (Fall, Spring, Summer).

Term
A term is the discrete length of time in which courses are offered. A term is 15-weeks long and encompasses two 7-week sessions with a 1-week break in between them.
- Fall Term is August – December
- Spring Term is January – April
- Summer Term is May – July

Session
A session is the discrete length of time during which a single course is completed. A session is 7-weeks long.

General Academic Requirements and Regulations
All graduate work (except for the master’s degree in Law, J.D. in Law, and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council. All graduate students at the University of Miami are subject to the general standards and requirements of their programs in regard to attendance, examinations, payment of fees and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Prospective students should note that “graduate study” means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative and scholarship of the student. The term must be distinguished from “post-graduation study” which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor’s degree.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right, to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Time to Completion
Time to completion starts when a student begins any program in the Graduate School. All work must be completed within three (3) years of the start date to the graduate program, for those studying for the various master’s degrees. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director. Course availability may vary by program and term; therefore students who may need to withdraw or take a break from their program should work directly with their Academic Advisor to ensure timely completion within the three (3) year window.

A student is ineligible for financial aid when it becomes mathematically impossible for him/her to complete the program within 150% of the length of the program. The length of the program is the amount of time necessary for a student to complete all requirements for a degree or certificate.

Each online degree program has a minimum time within which a student may complete the degree if the student takes the courses on a continually enrolled basis. Online degrees are flexible, and the actual time to completion, within the three-year limit, can vary by student. However, if a student is not continuously enrolled for a period greater than one year, he or she must reapply to the program and will lose any tuition discounts previously applied to their account. A student may be eligible for any tuition discounts available to new students at the time of the student's re-admission, and should contact the Online Enrollment Office to see if they qualify.

Graduate Transfer Credits
- Transfer credits from an outside institution may not be applied toward any online degree in the School of Business.
- A maximum of 6 credit hours may, with the permission of Program Director, be applied to the M.S. Ed. in Sport Administration degree online.
- Certain UOnline business courses may be transferable to other UOnline business programs. Students should contact their Academic Advisor at uonlineadvising@miami.edu to see if their courses are eligible to transfer.
- Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.
- Students in the UOnline degree programs may not transfer or transfer credit hours from the online degree version of these programs to the campus based versions of the programs without the permission of the Program Director and the Dean of the school.
- Students may not transfer any credits from any campus-based program to any of the UOnline programs without the permission of the Program Director and the Dean of the school.
- Students may not take any individual UOnline course and transfer into an existing campus program using the online course as an elective course option.
- Transfer credit hours grades will not be factored into a student’s cumulative grade point average at the University. Transfer credit hours only impact the number of credit hours earned.

Registration
Registration and Online Course Access
Registration starts about 4 weeks before each term. Each term contains two 7-week sessions with about a 1-week break in between each session. Students will have access to their online course approximately four (4) days before the first day of class. New and continuing students will be automatically registered by their advisor, and are only registered for classes at the beginning of each semester. Students may take time off from their program, but run the risk of exceeding the time to completion
requirements depending on when their course is offered again. Students who wish to take time off should contact their Academic Advisor prior to their withdrawal to ensure appropriate course availability and to determine their ability to complete their degree program in the required time frame upon the student’s return.

New Student Registration
Students will be eligible for registration once the University has received their enrollment deposit, paid in full. Students will be registered into courses for the entire first term, both first and second sessions (2 courses per term), by the Registrar’s Office. In some cases, students may be registered for their Session I course prior to the start of the term and registered for their Session II course approximately 10 days after Session I begins. If this occurs, a student may request to have their Session II course added prior to the start of the term by contacting Academic Advising (https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7). Students will have access to the online course approximately 4 days before each session start date.

Continuing Student Registration
Students will be eligible for registration provided they have no financial or other holds on their account or are not withdrawn. If a student has previously withdrawn from their UOnline program, and it has been less than one year since they have been enrolled, the student should contact their Academic Advisor (https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7) to be re-enrolled for the upcoming term. Please refer to the UOnline Academic Calendar for important deadlines regarding registration for continuing students. Students will be registered into courses for the entire term, both first and second sessions (2 courses per term), by the Registrar’s Office. Students will have access to their course approximately 4 days before each session start date.

Financial, Academic and Other Holds
If students have any financial or other holds, they will not be registered into a course until they have met the requirements to remove the hold. Please refer to the UOnline Academic Calendar for important dates regarding registration for continuing students and readmission. Students will not be registered past the deadline due to delayed payments on the students account.

Full-Time Study
All online programs are designed for students to attend full time. Students are considered full time pending they meet the credit requirements posted by the Office of the Registrar (p. 517). Students should contact their Academic Advisor (https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7) for further information on part time study. The Registrar’s Office.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School and the Registrar’s Office.

No full-time faculty member may be a full-time online student, whether or not working toward a degree. Nor may a full-time online student be a full-time faculty member.

No full-time online student will be a principal investigator on any grant or contract, whether in name or fact. And no principal investigator will be a full-time online student.

Admissions
Applying to the Online Programs
If students would like to apply to a UOnline program, they will need to create a profile and apply online via our on line application portal found here (https://myonline.miami.edu/). Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all the components and required documents for their application. Students’ Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions. Students will work with their Enrollment Advisor through week 1 of class and then transition to their designated Academic Advisor for the remainder of their program.

TOEFL (Test of English as a Foreign Language)
If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit this web page (http://www.ets.org/toefl) to arrange to take the test. The TOEFL code for the University of Miami is 5815.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program:

| TOEFL Internet Minimum Score | 94 |
| TOEFL Computer Minimum Score | 240 |
| TOEFL Paper Minimum Score | 600 |

The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

- Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
- Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
- Students have lived and worked in an English-speaking country for the past two or more years.

Letters of Recommendation
Students will input their recommender’s information directly into the online application which will generate an email with a unique link sent directly to the recommender. Letters of Recommendations must be submitted directly by the student’s recommender using the unique link provided to them via email. Letters of Recommendation received in a Word document, body of an email, or any other format will not be accepted. The student’s Enrollment Advisor may provide guidance to the recommender if they have technical trouble or questions regarding the process.

Admissions & Admissions Decisions
Once the University receives the student’s complete application with all required documents, the admissions review process will start.

Regular Admit (with Official Transcripts)
If the application meets the standard admissions requirements and the University has received all official transcripts (please see the Transcripts (p. 23) section), the student will receive an offer of full admission in...
approximately 48 business hours after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

**Conditional Admit (with Unofficial Transcripts and/or Test Scores)**

If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended and/or the student’s unofficial test scores (if required). Unofficial transcripts may be considered acceptable ONLY IF the document is in a pdf format and ALL of the following items are legible on the transcript document:

- Name of the institution
- Student name
- Cumulative Grade Point Average (preferred)
- Course numbers
- Course names
- Credit hours earned
- Grades earned
- Degree conferred with date (if applicable)
- No other documents will be accepted

Students receive notification typically within 48 business hours after the University has received a complete application (including other required documentation) that the student has been Conditionally Admitted. The notification of Conditional Admission will also address the requirements the student will have to satisfy in order to be officially admitted. The failure to meet any of these conditions will be grounds for the withdrawal of the Conditional Admission and/or the withdrawal from all programs. The student will receive an official email from his/her Enrollment Advisor and be able to view the admissions decision via your Online Application portal.

Students MUST pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, they may be eligible to receive financial aid within the same term, provided the University has granted the student full admission during the same academic year. Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial Aid award no later than the first day of class. Student’s Financial Aid funds will not be disbursed until all official admissions documents and all required Financial Aid documents have been received.

Students will not be registered for the next term until their current balance is paid in full. In the event the student’s financial aid award is delayed, students should work directly with their Enrollment Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar) for important deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) (p. 756) section for guidance on setting up a monthly payment plan, as well as the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options and is only available to online students at this time. UM Employees are not eligible for Monthly Payment Plans at this time.

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline Academic Calendar (http://www.miami.edu/index.php/registrar/calendar) for official transcript deadlines.

**Offer of Admission Expiration**

Offers of Admission are valid 1 calendar year (or 365 days) from the date of the admission offer as noted on their official admission letter sent via email. To officially accept the offer of admission, a student must log into Canelink (https://myonlinesupport.miami.edu/recently-admitted) and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within a year of issuance, he/she must reapply to the University and program. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

**Reapplying/Readmission**

There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:

- A student’s original Offer of Admission has expired and he/she never started the online program.
- A student requests to change to a different program.
- A student has been withdrawn from his/her program for more than 1 year.
- A student failed to meet the requirements of a Conditional Admission.

To reapply, students can login and start the Online Application (https://myonline.miami.edu/signup) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application.

**Not Admitted**

If a student’s application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically within 48 business hours after the University received the student’s completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal (https://myonline.miami.edu/signup).
If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal. Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student’s Enrollment Advisor will contact a student to discuss their options.

Transcripts for Admissions

Official Transcripts

- MUST Arrive in a sealed envelope with the school’s stamp/seal across the back or on the institution’s official envelope
- Be opened only by a member of the University of Miami admission staff
- Have a Registrar’s signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami Online Enrollment Office 1320 South Dixie Highway Gables One Tower –Suite 902, Locator Code: 2991
Miami, FL 33146

Please ensure that the locator code is included in the address. Transcripts may not be received if address is missing the locator code or sent to another address on campus. Students are responsible for ensuring that they have their transcripts sent to the address above and are subject to all deadlines as per the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar).

Electronic Transcripts

Electronic transcripts will be considered official only if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student’s Enrollment Advisor will be considered as unofficial and will need to be re-sent to the official etranscripts address.

Official Transcripts, Scores & Conditional Admission

The University must receive official transcripts for all institutions attended before any student can be considered fully admitted into the University.

Official Transcripts Due Date

If a student was Conditionally Admitted into a program with unofficial transcripts, the University MUST receive the student’s official transcripts from all institutions attended by the last day of the 1st session of the first term as entered on their online application. A student’s Admissions letter will provide the exact due date for the official transcript(s) and he/she may check Canelink to verify that the University has received the student’s official test scores. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar) for important due dates.

Financial Aid & Tuition Payment

If students apply for Financial Aid, Financial Aid will be NOT be awarded until the University has received the official transcripts from all institutions attended and/or test scores, if required. Please see the Financial Aid (p. 30) section for more information about Financial Aid eligibility and awarding.

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student MUST pay the tuition bill by the payment due date. Students should review the Payment policies for payment options and consequences for non-payment.

Official Transcripts and Test Scores Not Received

If Official Transcripts and/or Test Scores (if required) are NOT received by the due date:

- A student will be removed from the next course
- A student will be administratively withdrawn and may be reinstated if the University receives the student’s official transcripts.

Enrollment Deposit

Once students have received their offer of admission or conditional admission, they will pay a non-refundable enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be registered for their online orientation and first courses by their Enrollment Advisor.

What the Enrollment Deposit Is

The enrollment deposit payment is:

- Paid one time per UOnline program
- Non-refundable including if the student’s Offer of Admission has expired and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
- Due no later than the date listed on the academic calendar.
- Applied against a student’s 1st tuition bill
- Valid for as long as the Offer of Admission is valid:
  - If a student’s Offer of Admission for their UOnline program has expired and he/she reappplies to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
  - Transferrable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.
- Not transferrable to any campus-based program.

Paying the Enrollment Deposit

After a student has received the Offer of Admission, the student will be provided access to Canelink (https://canelink.miami.edu) to pay the student’s enrollment deposit with the following payment options:

- Online Credit Card payment:
  - MasterCard
  - Visa
• American Express
• Discover
• E-check (drawn on a US bank only)
• Bank-to-Bank, Exchange Bureau or Wire Transfer.
• Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.

New Students

Student Readiness Orientation

Once a student has been admitted and paid the non-refundable enrollment deposit, a student will be enrolled into the Student Readiness Orientation. (https://myonline.miami.edu/signup) The Student Readiness Orientation (SRO) is an interactive series of required activities in the University’s social media environment. and will be accessed by students through their UOnline student portal (https://myonline.miami.edu/signup). During the Orientation, students will meet other students, prepare for online learning at the University of Miami and familiarize themselves with their support structures and University academic policies.

A student’s Enrollment Advisor will remind students to complete the readiness activities, address any concerns students may have, and ensure students fully understand each of the activities so that students may be prepared to start their first course. For students to be fully prepared for their courses, completion of the SRO is highly recommended. Additional activities, such as the New Student Checklist, (https://myonlinesupport.miami.edu/2015/08/13/new-student-checklist) may be recommended or required in order for students to be prepared for class. Student should work closely with their Enrollment Advisor to receive guidance on completion of these additional activities.

Successful Completion

Once students have successfully completed all required activities in the Student Readiness environment, they will be able to start the 1st course in the program. Students should complete these activities at least 7 days before their chosen start date.

Program Change

If a student changes his/her program, the student may be required to complete some program-specific portions of the Student Readiness Orientation (https://myonline.miami.edu/signup) or New Student Checklist (https://myonlinesupport.miami.edu/2015/08/13/new-student-checklist). If so, the student’s Enrollment Advisor will inform the student and provide access to the relevant Student Readiness Orientation activities.

Offer of Admission Expiration

If a student’s Offer of Admission has expired and he/she has not started a program, the student will be required to re-take the Student Readiness Orientation (https://myonline.miami.edu/signup) once he/she has been re-admitted into the program.

Technical Requirements

To help ensure success, students should be proficient using e-mail, the Internet, and common desktop productivity software. During the course of the program, requirements (either hardware or software) may change from the original technology recommendation. Students should consult the software/hardware requirements within the program or with the faculty member or Student Support Team (https://www.emailmeform.com/builder/form/ift36G870a5UABMY) for any technology recommendations that may have changed since the original recommendation mentioned below or within the program of study. Below are some initial recommendations. Please note that these recommendations and requirements may change as technology changes and may also vary from course to course. Also please note that specific programs of study may have other specific requirements:

Recommended Setup

• Internet access required; 6-10 Mbps speed or higher recommended;
• Broadband is recommended as students with dial-up may experience degraded performance
• Windows Vista/7 or Mac OS X with virtualization software (like Parallels with Windows OS)
• 2GB of RAM minimum
• 40GB hard drive
• speakers, and headphone connected to the computer
• Inkjet or laser printer
• Scanner or Scanning Application for mobile devices
• Portable media (thumb drive)

Software Requirements

• Recommended Web browser—current version of Chrome
• Other Web browsers (Internet Explorer ver. 9.0 or higher or Firefox’s current and next most recent releases).
• Microsoft Office
• Adobe Reader ver. 10.1 or higher
• Adobe Flash Player ver. 11.7 or higher
• Apple QuickTime ver. 7.7 or higher
• Windows Media Player ver. 11 or higher
• Antivirus software (e.g., McAfee or Norton) installed, running, and kept current by promptly installing the upgrades and patches made available by the software manufacturer

Tablet/Laptop Recommendation

Students enrolled in programs that require participation in academic residencies are encouraged to use a laptop or tablet computer for their work. Some coursework may not be fully compatible with use of a tablet or mobile device; therefore, it is recommended that students have a desktop/laptop available if needed.

Additional Technology Requirements

Some programs may require additional technology requirements that are not mentioned above. Please refer to the program course(s) syllabi or course materials list in the UOnline Support Center (https://myonlinesupport.miami.edu) to review any special technology requirements for the program of study.

Cost, Fees, Billing and Payment

Tuition Includes

• Online learning environment and courses
• Application processing
• **Non-refundable** Enrollment Deposit (paid separately and deducted from 1st tuition bill)
• Technology fee
• Access to the online library, career center, and disability services
• Student and Technical Support

**Tuition Does NOT Include**
• Course Materials, Books and e-books
• Late Payment Fees, if assessed
• Graduation related fees

**Your Tuition Invoice and Payment**
Immediately after students have been registered into class, their tuition bill will be available in their student center through Canelink (https://canelink.miami.edu). Payment in full is due or arrangements to pay finalized by the 1st day of the 1st class of each term. If the University does not receive payment in full by this date, students will be removed from the online classes. **Students are responsible for ensuring their payments are made on time regardless of whether they are utilizing a third party for payment.** Students who are utilizing a third party for payment may need to find alternative payment arrangements to ensure they meet the payment deadlines as per the Academic Calendar. (http://www.miami.edu/index.php/registrar/calendar)

**Payment Currencies**
A student invoice is in **United States Dollars (USD)** and the University accepts payment only in **United States Dollar, USD**.

**Payment Methods**
The University offers several payment methods, described below. A student’s tuition invoice will contain instructions for using these payment methods.

**Credit Card**
A student may pay by credit card via the University’s partner, Elavon. A student can pay with:
• MasterCard
• Visa
• American Express
• Discover

**eCheck (ACH)**
Students may pay their tuition by e-check (ACH) online through your Canelink account:

• Click on the “Student Home” tab
• Navigate to Finances section
• Click on “Account Inquiry”
• Click on “Payment” and follow the instructions.

**Wire Transfer**
Students may pay their tuition by wire transfer, using these instructions:
• Bank of America, N.A.
  1500 South Dixie Highway
  Coral Gables, FL 33146
• ABA # 026009593
• For Credit To: University of Miami Concentration Account # 5508319094
• For Further Credit To: Students Full Name & ID Number
• International Wires SWIFT Code: BOFAUS3N

Students should make sure that their full name and ID number are included with the wire transfer to ensure the funds are applied correctly.

**Wire/Bank Transfer Fees**
Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payment. The University is not responsible for any fees students may incur during the transfer process.

**Payment by a Third Party**
A Third Party Sponsorship allows someone other than the student to pay a student’s tuition (employer, for example). Students with this type of assistance must inform the Financial Aid Office to ensure that financial aid is awarded appropriately and that funds are applied appropriately.

If a student’s tuition is paid via Third Party Sponsorship, the student will still remain subject to all policies, including due dates, late payment fees and financial hold rules and consequences.

**Monthly Payment Plan (MPP)**
Through the Monthly Payment Plan, term tuition payment is divided into 4 monthly payments for the Fall and Spring terms. The Summer term payment schedule is divided into 3 monthly payments and is only available to online students at this time. Each monthly payment is due on the 1st of the month and is not directly debited from the student’s account. **UM Employees are not currently eligible to enroll in the Monthly Payment Plan at this time.** UM Employees are encouraged to reach out to the Enrollment Advisor for other payment options.

• Students must pay each term in full before they will be registered for the next term (see payment methods section). This chart details the Monthly Payment Plan option available during the Fall and Spring Terms only.

<table>

**Late Payment**
• If payment is not received by payment due date, a registration hold will be placed on a student’s account the next business day.

For additional help, contact the Student Support Team (https://www.emailmeform.com/builder/form/ift36G870a5UA0MY).
• Once payment has been received, the registration hold issued for late payment will be removed.

**Tuition Reductions, Scholarships, Special Offers**

During the Enrollment and Admissions process and at the University’s discretion, tuition reductions and scholarships may be offered to incoming students. Existing students will not be eligible for any new tuition reductions offered to incoming students. A tuition reduction will remain on a student's account for the duration of the online program for which they received the reduction provided the student remains academically eligible and does not withdraw from the program for longer than one-year. Any student who is not enrolled in their program for greater than one year, will no longer be eligible for their initial tuition reduction and must reapply for admission to a program. A student may be eligible for any new tuition reductions being offered upon reapplication to a UOnline program. Students should contact an Enrollment Advisor for current offerings and qualifying criteria.

If students qualify for a tuition reduction, their Enrollment Advisor will provide them, in writing, the formal terms and conditions specific to that tuition reduction. The reduction will be included in a student’s tuition statement/note in Financial Aid package if applicable and deducted from tuition accordingly. If financial aid is awarded prior to the tuition reduction being applied to a student’s bill, the financial aid award will be adjusted accordingly. Student should contact (gradprof.finaid@miami.edu) the Financial Aid Office if they have questions regarding this adjustment.

**Tuition Increase**

The University reviews tuition rates each year and reserves the right to increase tuition for existing students.

If the University does increase tuition:

• The increase will be implemented at the beginning of the Fall term and will apply forward to any future unbilled tuition.
• Students' tuition invoices moving forward will be adjusted to reflect the increase.

**Change Payment Plan**

Students may request to change payment plans. Currently the options are:

• Payment in Full to Monthly Payment Plan.
• Monthly Payment Plan to Payment in Full.

Payment Plan changes will be implemented only at the beginning of the next term. Students must complete any payments due for the current term as agreed under their current payment plan before they can request a new payment plan.

Students should contact the Student Support Team for more information about changing their payment plan. Formal requests must be in writing/online form.

**Billing Support**

The student’s Enrollment Advisor and Student Support Team will be able to answer questions or provide information about a student’s invoice.
Denotes in progress grade given by instructor for any course (600, 700, or 800 level) in which a student has made expected or clearly satisfactory progress during the term, but has yet fully to complete requirements for the course. “IP” is to be given for 800-level internships, research, thesis and dissertation courses that have not been completed. Upon satisfaction of all Graduate School requirements, the Assistant Director, Programs of the Graduate School will issue final credit hour for all master’s thesis and doctoral dissertation courses (e.g., 810, 820, 830, 835, 840 and 850). Zero-credit hour courses (e.g., 820 and 850) will be changed to “S.” Please note that all “IP”s must be converted to “S,” letter grade, or “I” at graduation. “IP” will also be converted to “I” upon any departure from the University for a period in excess of one year.

Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student’s grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student’s graduation.

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols “S”, “W”, and “I” are not counted as credit hour attempted.

## Repeating Courses

A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record and the student is responsible for tuition and other costs related to the repeated course. A course may be repeated only once unless written authorization is provided by the Program Director, Dean of the School and Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a “C-” or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated. If a student attempts to retake a passed course, taking the same course to obtain a better grade, financial aid may be affected.

Registrations which involve repeating a course in which a grade of “A” or “B” has already been earned may not earn quality points or credit hours, nor count as credit hours attempted.

### Attendance

#### Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below). A student should contact their Academic Advisor if they need to request a military withdrawal.

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University.

1. On recommendation of the Dean of the school, students who withdraw after the 5th week of the session because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

2. Credit hour granted for a course under this policy should count toward graduation.

3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.

4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

#### Attendance and Participation, 1st Week (new and continuing students)

Online courses are not independent study courses. They involve a mixture of independent work outside the online course environment and presence within the course room. Authentic student engagement includes activities such as doing assigned readings, preparing and presenting quality assignments and participating substantively in online discussion. Logging into the online course alone does not demonstrate adequate engagement or participation.

Attendance during the first week of each course ensures you are on the right path to successfully completing your course and helps ensure that all students are assigned to groups with active participants to support quality group work. Participation in an online course is defined as the submission of a gradable assignment and/or discussion post about academic matters.

Students are required to attend, engage and participate in each of their online course(s) in an active and timely fashion. For each course, a student must participate by submitting their Week 1 assignments/discussion(s) during the first 7 calendar days from the course start date. This policy is the same for both New and Continuing students. If a new or continuing student logs in, but does not participate in any Week 1 activities by the end of day 7 (Eastern Standard Time) of a course, they will be administratively withdrawn from the program and must contact their Enrollment Advisor or Academic Advisor regarding steps for readmission. If a student’s instructor has approved submission of late work in Week 1, the student is still responsible for submitting the
work no later than day 7 of the course or they will still be administratively withdrawn due to lack of participation regardless of any extensions made by their instructor.

Attendance by Day 7
By the end of the Day 7 (Eastern Standard Time) of each Course, a student must log into the Blackboard classroom to actively indicate his/her intention to participate in and complete that course. If by Day 7 the student has logged in and submitted an assignment and has not formally rescheduled his/her start date or withdrawn from the program the student will:

• Be considered as attending the course.
• Be obligated to pay for the course in full or make all payments in accordance with the monthly payment plan.
• Be responsible for adhering to all University policies and course policies

No Attendance by Day 7
Starting on the first day of each course the Enrollment Advisor or Academic Advisor will contact the student if the student has not yet logged in to the Blackboard classroom, and remind the student to do so. If the student does not log into the Blackboard classroom the end of Day 7 (Eastern Standard Time), the student will be removed from the current course and will no longer be able to attend class. The student will be administratively withdrawn from the term and will need to contact their Enrollment Advisor or Academic Advisor to discuss their options for returning the following term.

If a student is a new student and his/her Enrollment Advisor has been able to contact the student, the student will be encouraged to reschedule his/her start date so that the student is able to continue in the program. A student who chooses to remain in the course will be subject to all applicable deadlines as stated in the course syllabus.

If a student is a continuing student and the Academic Advisor has been able to contact the student, the student will be encouraged to submit a withdrawal request with a return date to ensure he/she is not withdrawn from the program. A student who chooses to remain in the program will be subject to all applicable deadlines as stated in the course syllabus.

The Enrollment Deposit will remain on the student’s account and remains non-refundable. If the student has a tuition balance, it will be voided and reissued on the 1st day of the next course for which the student is registered should the student choose to change their start date.

Removed from Course Erroneously
If a student believes he/she has been removed from the course erroneously, the student should contact his/her Academic Advisor to discuss options.

No Contact or Response by Day 7
A student will be designated as a non-starter, if a student has not logged into the Blackboard classroom by Day 7 and the Enrollment Advisor or Academic Advising Team has not been able to contact the student.

New Students
If an Enrollment Advisor cannot reach the student, or does not receive response from the student by Day 7 of the term, the student will be administratively withdrawn from the term. If the Offer of Admission expires, the student will be required to reapply to the program.

Continuing Students
If the Academic Advising Team cannot reach or does not receive response from the student by Day 7 of the term, the student will be administratively withdrawn from the program. The student should contact the Academic Advising Team if they intend to return in the future and should review the Academic Calendar for all applicable deadlines regarding readmission.

On-going Attendance
Students should continue to login and attend class every week. Students who do not participate in their courses as indicated by course requirements, or fail to notify the University that they are no longer attending will be administratively withdrawn. This may result in the requirement for the return of previously awarded federal financial aid. If the University is required to return federal student aid funds, the student will be required to pay any outstanding balance owed the University.

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. This Federal Financial Aid calculation is separate and in addition to the Refund Policy and Schedule. If a student has questions pertaining to either policy, they should contact their Academic Advisor.

Student Change Requests
Reschedule Start Date, Student Initiated
A new student may reschedule his/her start date before or by the end of Day 7 (Eastern Standard Time) of the 1st Course. The student may reschedule the start date provided the Offer of Admission has not expired.

Students must submit their request in writing to their Enrollment Advisors and discuss the options and any financial and academic consequences no later than the end of Day 7 to ensure they do not incur further costs, because all students are subject at all times to the Refund Policy and Schedule. In extra ordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor for more information regarding the UOnline Student Appeal process.

Choosing to Remain in the Course
If after discussing with their Enrollment Advisors students decide to remain in the course, students’ Enrollment Advisors will confirm this verbal decision with the students formally, in writing via email, reiterating the financial and academic obligations. Students should reply to the email and confirm their wish to remain in the course. Otherwise, the original written request to reschedule will be honored.

Choosing to Reschedule
If after discussing with their Enrollment Advisors students decide to reschedule their start date, the Enrollment Advisors will process the formal request and:

• Students will be removed from any courses currently enrolled.
• Students will be enrolled into the courses for the term of the requested start date.
Students may lose any associated tuition reductions (please see tuition reduction’s terms and conditions).

The Enrollment Advisor should confirm formally within 1-2 business days that the start date change has been completed. The student may also view their start date change in Canelink.

The Enrollment Deposit will remain on the student’s account. If a student has received the 1st tuition balance, it will be voided and reissued before the 1st day of the new start date.

Financial Obligations After Day 7
If a student does not contact his/her Enrollment Advisor and formally submit in writing his/her request to reschedule the start date by the end of Day 7, after Day 7 the student will be obligated to pay for the course in accordance with the refund policy and schedule and is not eligible for a credit of tuition towards the rescheduled terms.

Offer of Admission Expired
If a student’s Offer of Admissions has expired, he/she will not be able to reschedule the start date and must reapply to the Program.

Add a Course
Each active student will be registered at least 14 days before each term start into the appropriate course(s) according to the sequence and rules of the program. Any student requested changes will be implemented by 1 day before the course start to ensure proper section and group assignments. New students must contact their Enrollment Advisor to discuss any changes or concerns about course registration. Continuing students should contact their Academic Advisor to discuss any changes or concerns about course registration.

Drop a Course
A student may drop a course only before or by the end of Day 7 (Eastern Standard Time) in order to avoid financial or academic (grading) consequences as per the refund policy and course syllabus.

If a student is a new student, he/she must contact the Enrollment Advisor to discuss the need to drop a course and potentially reschedule the start date. Due to the scheduling and sequence of courses, new students may need to be dropped from all courses in the term and may need to wait to be rescheduled at the beginning of the next available term for their program.

If the student is a continuing student he/she must contact the Academic Advisor to discuss the need to drop a course and withdraw from the program. In some cases, due to course scheduling and sequence, a student may need to drop all courses from the term and wait to enroll in a future term. Continuing students should work closely with their Academic Advisor to discuss all rescheduling options and ensure they are meeting the required times-to-completion for their program.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. If a student plans to drop a course or to withdraw from their program, they should consult both the Financial Aid withdrawal policy as well as the Refund Policy for UOnline programs to determine their financial responsibilities.

Retaking the Entire Course
If a student is required to retake an entire failed course:

- The student will be re-registered for the failed course the next time it is offered or in the next session
- If the student has already been registered into the next course in the program sequence, the registration will be adjusted.
- The student will be billed the full course tuition.
- The student can receive Financial Aid to pay for the second course retake, but if the student fails and takes the course a THIRD time, Financial Aid will not be available and the student must pay for the course tuition out-of-pocket. A student may contact their Academic Advisor for more information on payment options.

Change of Program
Students may request to change from their current program to another online program. The student must apply to the new program and provide information necessary for admission into that program. The student’s Enrollment Advisor will work with the student and the admissions staff to determine if the student is qualified to apply for a new program. Please note that program changes will be implemented as per the University’s Online academic calendar.

If the student is still a new student (has not completed the 1st 7 days from the start date) the student should contact their Enrollment Advisor. If the student is a continuing student he/she should contact the Academic Advisor to discuss all of the options and the new program admissions requirements. Tuition and any applicable tuition discounts that were previously applied to a new or continuing student's balance will be subject to change upon changing the program.

Non-Standard Change of Program
If a student is eligible to change into a new program, he/she will be registered into the appropriate course and start the new program in the next available term. Approved completed courses will be transferred into the new program. Students will not be charged another enrollment deposit.

If a student does not meet the admissions requirements, the student should continue to work with the Enrollment Advisor or Academic Advising on other options available.

Withdraw from Course but Not Program
If a student needs to withdraw from a course but does not wish to withdraw from the program, the student should contact their Academic Advisor to discuss the academic and financial implications. The student should also review the academic calendar for important dates regarding withdrawal from a course and how the withdrawal will be reflected on the transcript. In some cases, due to course scheduling and sequencing, a student may need to drop all courses from the term and may have to wait longer than one term to be rescheduled. Continuing student should work closely with their Academic Advisor to discuss all rescheduling options and ensure they meet time-to-completion requirements for their program.

If after discussions with the their Academic Advisor the student decides to withdraw from a course, the deadlines for withdrawal, as they appear on the academic calendar, will apply. Additionally, if students withdraw from the course after the “last day to drop without a W” as per the Academic Calendar, they will:
• Be required to pay for the course in accordance with the refund policy and schedule for online programs.

• Receive a Withdrawn (W) grade for that course and, for this reason, will remain registered in that course until the course end date so the final grade can be posted to the student’s official record.

Withdraw from Program
If students are withdrawn from the program, this means they are permanently suspended from continuing with their studies. Therefore, students will not be registered for future courses or have access to the online student community, the academic environment or other related program privileges.

If a student is considering withdrawing from the program, he/she should be aware of the financial and academic consequences for doing so. There are different consequences for withdrawing before and after Day 7.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University as per the refund policy and schedule. Students should contact their Academic Advisor before withdrawing to fully understand their financial obligations upon withdrawal.

Student-Initiated Withdraw from Program BEFORE Day 7

Should a student wish to withdraw from the program before, or by the end of Day 7 (Eastern Standard Time) of their first course, new students must contact the Enrollment Advisor in writing (via email) to make the request and discuss alternatives. Continuing students who wish to withdraw from the program before or by the end of Day 7 (Eastern Standard Time) of their current course must contact their Academic Advisor in writing (via email) to make the request and discuss alternatives. If the student decides to withdraw from the program by end of Day 7 of the current course:

• The student will be removed from their course(s).

• The student will be refunded for the course(s) in accordance with the refund policy for online programs (minus the enrollment deposit).

• The course(s) will not appear on the student’s record.

A student’s Enrollment Advisor or Academic Advisor will submit the initial request as the effective program withdrawal date and should confirm formally within 1-2 business days that the student’s program withdrawal request has been completed.

The Enrollment Deposit remains non-refundable. If the student received a tuition invoice, it will be recalculated or cancelled in accordance with the refund policy and schedule and effective date of program withdrawal.

Student-Initiated Withdraw from Program AFTER Day 7

If the student would like to withdraw from the program after Day 7 (Eastern Standard Time) of the course start, he/she must contact the Academic Advisor in writing (via email) to make the request and discuss alternatives. If the student decides to withdraw from the program:

• The student will be removed from any course currently enrolled.

• The student will receive a Withdrawal (W) on the student’s record for their course.

The student’s Academic Advisor will submit the student’s initial request as the effective program withdrawal date, and the student should confirm formally within 1-2 business days that the program withdrawal request has been completed. The enrollment deposit remains non-refundable. Any tuition payments made by the student for the course through the time of withdrawal will not be applied or credited towards any future courses the student may enroll into. If a student is using Financial Aid, a recalculation of financial aid may be required to determine if any funds need to be returned to Title IV. In this case, the recalculation may take up to 45 days from the effective date of withdrawal to appear on the student’s account. Students may check Canelink to review their account balance.

Administration-Initiated Withdraw from Program

The student may be withdrawn from the program for academic progress issues, academic integrity, non-payment or other administrative issues. In this event, the student will receive formal notification that he/she will be withdrawn from the program.

The student will still be responsible for completing payment on any previously taken courses and will be subject to all billing, payment and collections policies.

Withdraw from Institution

If the student requested to withdraw from the program, he/she will be formally withdrawn from the Institution within 1-calender year/365 days of the effective withdrawal date on record. Until this time, the student may still request to be reinstated to the program under certain circumstances. A student should contact Academic Advising for next steps on reinstatement if they choose to return after that time.

If the student is withdrawn from the program, he/she will withdraw from the Institution immediately and may not be reinstated either to the program or Institution.

Withdrawal Appeal Process

In extraordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor (https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7) for more information on the Online Withdrawal Appeal process. The appeal form must be submitted within 30 calendar days from the date of withdrawal from the University or if the appeal is being submitted for a semester that is completed, the form must be submitted within 30 calendar days of the last day of the end of the semester in question. Students must adhere to the specific documentation requirements as stated on the Appeal Form and submit all required documentation, along with the completed form to registrar@miami.edu. A decision will be sent electronically to the email address provided on the Appeal Form within a month from the date it was received.

Reinstatement to Program

If a student has been withdrawn from the program, he/she may be reinstated to the program if:

• The student was not withdrawn from the program for academic progress or misconduct reasons.

• The student was not withdrawn from the Institution or is not in the process of being withdrawn from the Institution.

• The student has no unpaid tuition balance.
• The student has been withdrawn from the program for less than 1 calendar year (365 calendar days). If the student is withdrawn for more than 1 calendar year, he/she must reapply to the program.

Students may not credit any previously paid tuition to courses they register into once reinstated and should contact their Academic Advisor (https://www.emailmeform.com/builder/form/u0FtnTh276J4GycEdx7) to discuss the reinstatement process and requirements.

**Late Payments, Holds, Collections and Refunds**

**Late Payment Fees**
A payment is considered late if it has not been paid by 1 day after the payment due date. Late fees may be assessed to the student’s account.

**Financial Hold**
Students are expected to pay tuition on time. Paying on time ensures timely registration into subsequent courses so that a student can continue to advance toward completing the program. Students must pay for each term in full before they can continue on to the next term.

If a student is 15 or more days past due on 1 or more invoices, he/she will be placed on Student Account/Financial Hold.

If a Student Account/Financial hold is placed, students:
• will be able to complete the current course
• will not be registered into future courses until all outstanding invoices have been paid.
• will not be able to receive transcripts or a diploma

**Placement on Student Account Hold**
Students will receive a reminder that payment is due as well as overdue. Students will also be notified once a Student Accounts Hold is placed on their account.

**Removal From Student Account Hold**
Once students have made their overdue payment, the Student Accounts Hold will be removed within 24 hours and students will be registered into the next course in the next available term.

**Third Party Collections**
The University utilizes third party collections services to collect on unpaid balances.

**Refund Schedule**
A student who withdraws or is withdrawn from the program may be entitled to a refund according to the rules outlined below.

**By or Before Day 7 (Week 1) of Each Course**
If a student withdraws from the program by, or before Day 7 (Eastern Standard Time) of a course, he/she will be refunded 100% of tuition paid for that course, excluding the enrollment deposit. If the student withdraws during the refund period and has not yet paid any tuition owed for that course, the Student Accounts Office will cancel the balance for that course.

**Day 8-14 (Week 2) of Each Course**
If a student withdraws from the program after Day 7, but not later than Day 14, he/she will receive a 50% refund.

**Day 15-49 (Week 3-Week 7) of Each Course**
If a student withdraws from the program on or after Day 15, he/she will receive no refund and will be obligated to pay for the entire course they are currently enrolled.

The effective withdraw date is:
• If initiated by the student, it is the date the student formally requested to be withdrawn in writing via email.
• If initiated by the Administration, it is the date the administration formally entered/processed the withdrawal.

**Overpaid Tuition**
After students have withdrawn, if they paid more than what they owed on a course, they will be refunded the difference between what they paid and the amount due as determined by the refund schedule and effective withdraw date. Overpayment tuition refunds are typically processed on or about 14 days after the start of each term; however, in certain circumstances this time frame may be delayed. Students may check their Canelink account to view when refunds have been processed.

**Refund Policy and Schedule - Timeline and Methods**
All refunds will be paid via the payment method paid and within 30 days of the effective withdrawal date on record.

**Ethics, Student Rights and Responsibilities**
Students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics, or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the student’s program and/or the Graduate School. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The Graduate Honor Code can be reviewed on the Dean of Students (p. 764) website.
Disciplinary and Grievance Procedures for Graduate Students

Two types of procedures exist:

- Academic and
- Nonacademic.

Procedures for handling disciplinary and grievance matters are handled by the Graduate Student Appeals Committee. Contact the Graduate School for details about the appeals process. The Graduate School expects an appeal to have gone through the program or department and then the School's Academic Dean prior to its being heard by the Graduate School. The University Ombudsperson may also be consulted. For more information, please refer to the Academic Bulletin (p. 517).

Honors and Awards

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Who’s Who Among Students in American Universities and Colleges

The Graduate School solicits nominations for this award annually. Nominations are provided by Graduate Program Directors at the beginning of the spring term.

- Graduate Student Awards
- Graduate Student Organization Award
- GSA Executive Award
- Senate Award
- Academic Award
- Graduate Student Award

Requirements for Commencement

It is the responsibility of the student to apply for graduation through Canelink during the student’s final term prior to the deadline for the next commencement ceremony.

Both the dates for commencement and the deadline to apply for graduation are published in the online academic calendar (http://www.miami.edu/index.php/registrar/calendar). Students who previously applied for graduation but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students will be degree candidates until they have been cleared by the Graduate School.

Participation in the commencement ceremony or the listing of a student’s name in the commencement book in no way implies or ensures graduation. A student’s graduation is contingent upon the following:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the student at least one term before graduation. The Graduate School does not require application to candidacy for master’s, D.P.T., nor D.N.P. degrees.
3. The student must defend his/her thesis or dissertation (if applicable) no later than two weeks before the last day of class in the term he/she wishes to graduate.
4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the term he/she wishes to graduate for their clearance to be processed in time.

Clearance for Degree Conferral

For the Graduate School to clear a student for graduation:

1. The student must have met the requirements for the program.
2. The student must have a minimum of 3.00 cumulative grade point average;
3. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last term of study must be paid in full by the beginning of the final term.

Graduate Student Association

The primary function of the GSA is to promote effective graduate student participation in University affairs. The GSA serves as a liaison between graduate students, faculty, and the administration. In addition, the GSA exists as a forum to support and improve the quality of the graduate student environment at the University of Miami. The University of Miami Graduate Student Association is an active member of the National Association of Graduate-Professional Students. All graduate students at the University of Miami are members of the GSA.

Graduate Council

The mission of the Graduate Council is to promote graduate education, scholarship, and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities and to maintain high ethical and academic standards in graduate studies.

Student Resources

Dean of Students Office

The mission of the Dean of Students Office is to foster the personal development of students by providing a range of programs and services that create an optimal learning and living environment. The Graduate Honor Code (http://www.miami.edu/sa/index.php/
policies_and_procedures/honor_code) and the Student Rights and Responsibilities Handbook (https://umshare.miami.edu/web/wda/deanstudents/pdf/20132014SRR.pdf) are two methods in which the University encourages ethical behavior in all its students. The Graduate Honor Council is a student organization which investigates violations of the Graduate Honor Code and decides appropriate action. The Dean of Students Office also oversees the University Chaplains Association, which consists of various campus ministries to serve the spiritual needs of students. For more information on these and other services offered by the Dean of Students Office, call 305-284-5353 or visit our website (http://www.miami.edu/dean-students).

Career Development

The Toppel Career Center assists undergraduate students, graduate students, and alumni in formulating their career plans and in pursuing internship opportunities.

It is the intent and desire of the University of Miami and the Toppel Career Center to provide equal employment opportunities for students and graduates regardless of race, color, national origin, religion, gender, sexual orientation, age or disabilities.

HireACane.com is a management system where students can access internships, jobs, on-campus recruiting information, career programs, and companies/organizations attending Careers Expos and Fairs. Students can only access these additional online resources by activating and logging into their HireACane.com account.

Student Disability

The Academic Resource Center (ARC) provides academic resources and support to ensure that students with documented disabilities are able to access and participate in the opportunities available at the University of Miami.

All students seeking accommodations for a disability must register with the Office of Disability Services. Students should register as soon as possible so that the office has sufficient time to receive and review the necessary documentation and coordinate reasonable accommodations. To register, schedule an appointment with the ARC at 305-284-2374 or e-mail us (disabilityservices@miami.edu).

Before a determination is made regarding a request for accommodations, the student must complete the proper forms and submit current, appropriate, and full documentation of the disability as required by ARC.

SPECIAL PROGRAMS

Miami Semester

http://www.miami.edu/miamisemester

The Miami Semester – Visiting Student Program provides the opportunity for degree-seeking students attending other colleges to spend one or two semesters in Miami living, studying and doing research at the University of Miami. Domestic or international students may enroll in this program, taking advantage of our geographical location, renowned faculty, and unique environmental features.

The Miami Semester – Visiting Student Program is limited to degree-seeking undergraduates in good standing attending other universities and colleges. Participating students will be required to take a minimum of twelve credits.

Course offerings are subject to change depending on availability.

American Studies

This program allows students to select one to two courses from among the American Studies (AMS) Program’s core courses, and classes from other departments based on availability and interests. It is an interdisciplinary approach for students to reflect on the interrelated nature of subjects like, but not limited to, Sociology, Geography, History, and Anthropology, and topics that are relevant to today’s society such as cultural diversity, the global economy, regional and geographical norms, and popular culture. The goal of this program is to assist in students’ understanding of the world around them by analyzing events, policies, societal norms and cultures, and historical events. Students may take any combination of courses that equal at least 12 credit hours.

Audio Engineering

Audio Engineering allows for students currently majoring in Electrical Engineering to study areas such as circuit theory, electronics, signal processing and multimedia with audio studies in acoustics, digital audio, recording and postproduction. Students must enroll in a minimum of two Electrical Engineering courses from the core courses. Students may also opt to add courses in other areas based on availability and interests.

Ecosystem Science and Policy

The Certificate in Ecosystem Science and Policy provides an opportunity for students from other universities to explore the South Florida environment, ecology and culture via interdisciplinary courses and experiential learning.

Students must take at least two core courses in Ecosystem Science and Policy. Miami Semester students will complete their schedules with courses chosen from among the interdisciplinary ECS courses and from other departments based on availability and interests.

<table>

The Certificate in Marine Science is a hands-on study opportunity for those interested in marine science, oceanography, geology and marine physics. Students must enroll in a minimum of three Marine Science courses. In addition, highly qualified students may be eligible for an independent study research project. Students may also opt to add courses in other areas based on availability and interests.

MSC courses should be selected in consultation with your advisor. See the courses page (p. 1101) for a list of MSC courses.

Core courses are chosen in conjunction with an advisor.

### Sport Administration

Sport Administration is an opportunity for students who are interested in the ethics, leadership, and business of managing athletic organizations. Students will have the opportunity to participate in an internship that fits their interest area as well taking hands-on courses in the Department of Exercise & Sport Sciences. Internships may take place within the UM Athletic Department or local professional sport franchises. Students make take any combination of courses that equal at least 12 credit hours.

### Study Abroad

www.miami.edu/studyabroad

Dept. Code: SAP

With over 80 unique opportunities overseas, students have many options to study abroad on UM programs that align with their interests. Students can live and learn abroad through short term and long term programs with UM faculty or at UM partner universities overseas. Programs with UM faculty are unique in their emphasis on experiential learning, pre-arranged group housing, excursions, and courses taught by UM professors and overseas academic experts. Examples of these programs include UM semester-on-locations in Prague, Buenos Aires, Cape Town, India, the Galapagos, and Rome, as well as short term faculty-led programs during the summer in Europe, Asia, Africa, and South America.

Students can also receive UM credit hours and grades while studying at any one of UM's exchange partner universities overseas. These programs can be undertaken for a semester, year, and/or during the summer. Among a multitude of other options, students can study marine biology on the edge of Australia's Great Barrier Reef at James Cook University, be at the center of Europe and study business at the Vienna University of Economics and Business Administration, explore Iceland's unspoiled nature while studying earth sciences at the University of Iceland, immerse themselves in Japanese culture and business practices at Sophia University in Tokyo, or become acquainted with the changing panorama of international relations at Uppsala University in Sweden. Many of these programs are delivered in English so foreign language proficiency is not required for most study abroad opportunities.

Students who participate in UM Study Abroad programs will receive UM grades and credits and are able to use their existing financial aid towards semester program costs. With careful planning and academic department approval, students can apply their courses abroad to their majors, minors, cognates, or elective credits. Programs are open to sophomores, juniors, and seniors who meet posted eligibility requirements for admission such as minimum cumulative GPA.

The Schools and Colleges at UM encourage study abroad options for their students. With the assistance of the Study Abroad Office and the guidance of academic advisors, students can select a study abroad program to fit almost any major. Additionally, UM financial aid will apply to the costs of the UM programs. Students are advised to plan as early as their freshman year so studying abroad can be incorporated into their academic plan.

The cost of studying abroad varies depending on the type, length, and location of the program. Students are often surprised at how affordable studying abroad can be. Students participating in a UM study abroad
program will be able to use their financial aid abroad. Participants are charged full tuition for the term abroad and the financial aid package will be adjusted based on the estimated expenses of the program. If the estimated expenses of the program are lower than the costs of attending UM, participants may be eligible for less in loans, but scholarships and grants will stay the same.

As studying abroad is seen as such an important aspect of a college career, many national and institutional scholarships are available. Interested students should begin to research scholarship opportunities early. The most prestigious study abroad scholarships, which grant up to $10,000 per semester, have applications with deadlines up to 18 months before the study abroad program begins. Several other scholarships, with deadlines similar to program application deadlines, are also available and grant up to $5,000. Learn more about finances and scholarships by visiting the Study Abroad website, speaking with the advisors in the Study Abroad Office and the Office of Financial Assistance Services.

Students enrolled in any study abroad program at a partner institution may not earn 25 percent or more of their credits toward any UM degree program (credit requirements may vary by major/level), including courses taught by UM faculty. A student who anticipates earning 25 percent or more of his/her degree credits while participating in a study abroad program must immediately inform his/her advisor or program chair, who will be responsible for notifying the appropriate parties so that advance approval can be obtained from the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

Summer Scholars Program

http://www.miami.edu/ssp

The Summer Scholars Program (SSP) provides a unique opportunity for high school students to study at the University of Miami for three weeks during the second summer semester and earn 6 credit hours. Students will either live on campus or participate as a commuter. SSP is designed to expose high school students to university academics and campus life before commencing undergraduate studies. Interested high school students should seek further information and application requirements (http://www.miami.edu/ssp).

Summer Sessions and InterSessions

http://www.miami.edu/summersessions
The Summer Sessions program at the University of Miami is an exceptional opportunity for students to enhance their educational goals in a concentrated time period and for the South Florida community to take part in some of the innovative and unusual courses taught by outstanding faculty and well-known guest lecturers.

**Special Academic Programs – InterSessions**

- January (First) and Spring Break (Second) InterSessions (http://www.miami.edu/intersession)
- Summer A (First) and Summer B (second) InterSessions (http://www.miami.edu/summersessions)

January, Spring Break, May, and June InterSession are short term credit hour courses designed so you can concentrate fully on topics not normally offered during regular semesters; getting individual quality time with distinguished faculty members; and sharing knowledge with other students.

Tuition charges for January and Spring Break InterSession are separate from and in addition to your spring tuition charges (ARE NOT included in the full time 12-20 credit hours “Flat Rate” of Spring Semester).

Due to the intense format of the InterSession courses, there are special drop and refund policies.
Accounting Business Administration (ACC)

ACC 211. Principles of Financial Accounting. 3 Credit Hours.
Course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 212. Managerial Accounting. 3 Credit Hours.
Introduction to managerial accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective.
Prerequisite: ACC 211.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 301. Cost Accounting. 3 Credit Hours.
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. Course is designed to provide students with the necessary skills to perform basic cost accounting.
Prerequisite: ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 311. Intermediate Accounting I. 3 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows.
Prerequisite: ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 312. Intermediate Accounting II. 3 Credit Hours.
A continuation of ACC 311. Course focuses on more complex accounting applications such as leases, postretirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.
Prerequisite: ACC 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 315. Accounting for Health Care Organizations. 3 Credit Hours.
This course develops a working knowledge of the financial accounting and reporting processes in health care, service industry, and governmental organizations. Focus is on accounting in health care, service industry and for-profit organizations.
Prerequisite: ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 402. Auditing. 3 Credit Hours.
Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports.
Prerequisite: ACC 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 403. Fundamentals of Taxation. 3 Credit Hours.
Basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. The fundamentals of tax research are also introduced. For students who need to take ACC 303, this course satisfies that requirement.
Prerequisite: ACC 311
Components or Corequisite: ACC 311.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 404. Advanced Taxation. 3 Credit Hours.
Study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, reorganization, distribution, and liquidation of corporations and partnerships. Also includes an introduction to estate and gift taxation.
Prerequisite: ACC 403.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 406. Accounting Systems. 3 Credit Hours.
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool.
Prerequisite: ACC 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ACC 411. Advanced Accounting. 3 Credit Hours.
The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships. For accounting majors who need to take a 500-level accounting course, this course satisfies that requirement. Prerequisite: ACC 312.
Components: LEC.
Typically Offered: Fall, Spring, & Summer.
Grading: GRD.

ACC 506. Internal Auditing. 2 Credit Hours.
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 524. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 522. Advanced Issues in Auditing. 3 Credit Hours.
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 500. Accounting for Decision-Making and Control. 3 Credit Hours.
The course focuses on the use and understanding of basic financial and managerial reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirements needed to sit for the CPA exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 555. Accounting Honors Research Project. 3.00 Credit Hours.
Research project to fulfill requirements for Departmental Honors Accounting.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

ACC 572. Advanced Financial Analysis. 2 Credit Hours.
This course builds on the analytical techniques developed in the prerequisite financial accounting courses to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The view point is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm’s profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.
Prerequisite: ACC 312. Requisite: Accepted into the Accounting Accelerated Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 599. Directed Readings. 1-3 Credit Hours.
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project is required at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 600. Accounting for Decision-Making and Control. 3 Credit Hours.
The course focuses on the use and understanding of basic financial and managerial reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirements needed to sit for the CPA exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 601. Trends in Present Day Accounting. 2 Credit Hours.
Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of third financial data to meet the needs of third parties, and surveys accounting literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ACC 602. Analysis of Financial Statements. 1-3 Credit Hours.
Course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis (including ratio analysis) and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 603. Studies in Financial Reporting Issues. 2 Credit Hours.
An exploration of complex financial reporting issues using the case method.
Components: LEC.
Grading: GRD.

ACC 604. Seminar in Cost Accounting. 2 Credit Hours.
Course covers four major segments. First, it reviews the basic concepts and tools associated with management control systems. Second, it underscores the importance of decentralization and the impact it has on decision making. Third, it examines the strategic place for cost management. Examples include the adoption of the balanced scorecard, quality control, productivity, and environmental cost management. Fourth, the course brings costing and control tools into the discussion of decision making.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 605. Financial Accounting & Reporting. 3 Credit Hours.
Basic concepts of accounting designed to increase understanding of the function of accounting statements and their limitations. The generally accepted principles governing the preparation of financial reports and the use of accounting information in investment and credit decisions. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ACC 606. Managerial Accounting. 3 Credit Hours.
Current managerial accounting techniques and theories. Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 607. Accounting Controls in Information Technology. 2 Credit Hours.
The objective of the course is to familiarize students with researching financial information of publicly traded companies and to provide an introduction to accounting research related to the content and presentation in SEC filings. The course will emphasize searching and accessing as well as understanding and interpretation of financial information presented in SEC filings (e.g., 10-K, 10-Q, Proxy Statements). Accounting topics covered will include accounting information and the capital markets, earnings management, earnings quality, effect of recognition vs. disclosure in accounting reports and the role of the SEC in regulating financial reporting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 608. Internal Auditing. 2 Credit Hours.
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 609. CPA Review I. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA exam (Regulation and Financial Accounting and Reporting). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 610. CPA Review II. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA Exam (Business Environment and Concepts, and Auditing and Attestation). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.
Components: LEC.
Grading: GRD.

ACC 611. Auditing Seminar. 2 Credit Hours.
Practical applications of auditing and research into audit matters. Emphasis of the course is placed on cases involving audit failures, appropriate auditing procedures, reporting, and exercise of audit judgment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 612. Financial Reporting Research. 2 Credit Hours.
The objective of the course is to familiarize students with researching financial information of publicly traded companies and to provide an introduction to accounting research related to the content and presentation in SEC filings. The course will emphasize searching and accessing as well as understanding and interpretation of financial information presented in SEC filings (e.g., 10-K, 10-Q, Proxy Statements). Accounting topics covered will include accounting information and the capital markets, earnings management, earnings quality, effect of recognition vs. disclosure in accounting reports and the role of the SEC in regulating financial reporting.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 613. CPA Review I. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA exam (Regulation and Financial Accounting and Reporting). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 614. CPA Review II. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA Exam (Business Environment and Concepts, and Auditing and Attestation). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.
Components: LEC.
Grading: GRD.

ACC 615. Financial Accounting & Reporting. 3 Credit Hours.
Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ACC 622. Advanced Issues in Auditing. 3 Credit Hours.
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact in audit practice. Not open to students with credit in ACC 522.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 623. International Accounting and Taxation. 2 Credit Hours.
Course covers tax accounting and business considerations in the global business environment. U.S. tax issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering and uses of accounting information in managing an international business. Not open to students with credit for ACC 523.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ACC 624. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities. Not open to students with credit for ACC 524.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 630. International Financial Reporting Standards. 1 Credit Hour.
This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 631. Advanced Financial Accounting Topics. 2 Credit Hours.
Coverage of the Generally Accepted Accounting Principles governing business combinations, the preparation of consolidated financial statement including local and foreign subsidiaries, and other financial reporting topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 632. Intermediate Accounting I. 2 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 633. Intermediate Accounting II. 2 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
Components: LEC.
Grading: GRD.

Typically Offered: Summer.

ACC 634. Cost Accounting. 2 Credit Hours.
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. This course does not count towards the credits needed to graduate.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 635. Auditing. 2 Credit Hours.
Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This course does not count towards the credits needed to graduate.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 636. Accounting Systems. 2 Credit Hours.
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool. This course does not count towards the credits needed to graduate.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 639. Income Taxation and Business Entities. 2 Credit Hours.
This course is designed to be the second tax course students who are interested in the business applications of federal income tax laws, as they affect corporations, partnerships, and their owners. Emphasis is placed on tax planning aspects of formation, operation, liquidation, and distributions of corporations and partnerships. Not open to students with credit in ACC 404 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 640. Corporate Taxation 1. 2 Credit Hours.
Course covers treatment of the corporate form of organization, its related opportunities, and problem areas, including formation, tax formula, non-liquidating and liquidating distributions, capital structure, reorganizations, alternative minimum tax.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 641. Corporate Taxation II. 2 Credit Hours.
An in-depth study of taxable and nontaxable corporate reorganizations. An introduction to affiliated corporations, requirements for consolidated returns, and their associated problems and opportunities are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 642. Seminar in Taxation. 2 Credit Hours.
Investigation of current topical areas in taxation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 643. Tax Research. 2 Credit Hours.
Study of the tax practice environment including the Treasury Department, the Courts, and the legislative history of the Internal Revenue Code. Ethics in tax practice are also examined. Course includes training in the use of tax services such as RIA Checkpoint and LEXIS, in performing tax research. A research methodology for solving tax problem cases is studied and cases to be researched are assigned.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 645. Partnership Taxation. 2 Credit Hours.
Taxation of partners and other flow-through entities. Partnership formation, termination, distribution, liquidation, and sales of partnership interests are covered. Limited partnerships in conjunction with their use as tax shelters are discussed as well as family partnerships, limited liability companies, and LLPs.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 647. Estates and Gift Taxes. 2 Credit Hours.
Estate and gift planning for shifting wealth from one individual to another by death, gift, or by the use of trusts. Property included in the decedent’s gross estate valuation methods, gifts in contemplation of death, jointly held property, life insurance, transfers with retained life estates, bequests, revocable transfers, the marital deduction, powers of appointment, gifts of present and future interest, and gifts to minors are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 648. Financial Reporting Implications of Income Taxes. 2 Credit Hours.
This course is designed to provide the foundation necessary to understand the financial accounting and reporting of book-tax differences. The course will cover the preparation of the income tax provision and related financial statement disclosures in conformity with U.S. GAAP (FASB ASC 740)
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 649. Issues in Tax Policy. 2 Credit Hours.
This course looks at the process through which our tax laws are created and the important policy issues inherent in individual and corporate income taxes, consumption taxes, and wealth transfer taxes. Topics in this course are not limited to U.S. taxation and include an examination of systems used in other countries (such as the VAT) as possible alternatives to our current tax.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 650. Accounting Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 660. Managerial Accounting in Healthcare Organizational. 3 Credit Hours.
This course covers Managerial Accounting concepts applied to healthcare organizations. Topics include cost allocation and management control systems.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 662. Taxation of Multinational Corporations. 2 Credit Hours.
This course introduces the fundamental tax concepts underlying U.S. taxation of international transactions. Topics include the taxation of U.S. corporations with income from foreign sources, intercompany pricing, anti-tax avoidance provisions, and tax treaties.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 664. Global Mergers and Acquisitions: Accounting and Related Issues. 2 Credit Hours.
This course focuses on the financial, cultural, and strategic aspects of international mergers and acquisitions (M&A) activity and has a global, cross-cultural perspective. It presents a strategic view of the M&A process, examining managerial decision making in the planning, execution, and post-merger phases. Prerequisite: ACC 402 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ACC 670. Financial Reporting and Analysis. 2 Credit Hours.
The course focuses on the analysis and use of financial accounting information in the evaluation of corporate performance. The course initially demonstrates the accounting process and resulting generation of financial statements. Building on these core accounting concepts, the course emphasizes the understanding of financial statements prepared under U.S. and International Accounting Standards and the analysis of these financial statements including common size analysis, ratio analysis, the impact of taxes, and credit analysis. Completion of the course enhances the student’s ability to read, interpret, and analyze financial statements for making investment, credit, acquisition, and other evaluation decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 671. Accounting for Decision Making. 2 Credit Hours.
The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, break-even analysis and pricing, including the impact of taxes. Completion of the course will enhance the student’s ability to understand managerial accounting reports and use this information in making business decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 672. Advanced Financial Analysis. 2 Credit Hours.
Advanced Financial Analysis and Valuation builds on the analytical techniques developed in the basic financial statement analysis course, Accounting 670: Financial Reporting and Analysis, to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm’s profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 673. Taxation for Business and Investment Decisions. 2 Credit Hours.
This course is designed to be the first tax course for students who are interested in acquiring the basic knowledge that all executives and investors should have about our federal income tax system. It studies basic concepts of federal income taxation applicable to all taxpayers. The basic income tax formula is studied including income exclusions, deductions, exemptions, and credits as well as property transactions. Completion of this course will enhance the students’ appreciation of the role of taxation in making investment, employment-related, and business decisions. Not open to students with credit in ACC 403 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 675. Compensation, Incentives and Strategic Control. 2 Credit Hours.
Internal control is the process by which owners influence manager’s of organization to implement the organization’s strategies. They key idea is that different organizations typically have different strategies which in turn require different control systems for effective implementation. Internal control involves both formal systems and informal processes. Accounting 675 will begin by describing the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation. We will then explore the economic and financial reporting consequences (perhaps unintended) of various performance measurement mechanisms. In particular, we will focus on issues of short-termism, earnings, management, and attendant control failures that plague Corporate America today. Finally, we will discuss some of the regulatory changes brought about in recent times (e.g., Sarbanes Oxley) to address the apparent widespread control system failures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 677. Forensic Accounting. 2 Credit Hours.
This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. You will learn how to investigate and quantify fraud, and how it can be detected and prevented as well as the accountants’ role in litigation, such as acting as expert witness.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 681. Introduction to Financial and Managerial Accounting. 4 Credit Hours.
The first half of the course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from both a preparer as well as user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. Topics covered in the second half include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information in decision making from a managerial perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 682. Intermediate Accounting. 4 Credit Hours.
The accounting principles guiding the financial reporting practices of entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. The course begins with a detailed discussion of the components of the income statement as well as the balance sheet followed by more complex accounting applications such as leases, post retirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.
Prerequisite: ACC 681.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 683. Taxation. 4 Credit Hours.
The course begins with a discussion of basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, exclusions, statutory deductions, exemptions, and credits. This is followed by a study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, distribution, and liquidation of corporations and partnerships.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 684. Accounting Information Systems. 4 Credit Hours.
Course covers the nature, design, and implementation of accounting information systems. The objective of the course is to develop students’ understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 685. Financial Statement Analysis and Valuation. 4 Credit Hours.
This course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions including the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 686. Auditing. 4 Credit Hours.
The course focuses on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This is followed by discussion of advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 687. Advanced Cost Accounting. 4 Credit Hours.
The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, pricing, and in making other business decisions. Topics include in-depth studies of techniques and issues surrounding cost allocation methods, approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation will be discussed.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 688. Advanced Accounting and Financial Reporting. 4 Credit Hours.
The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, the accounting principles and practices applied to foreign operations and partnerships will be discussed along with foreign currency translation issues. This will be followed by an exploration of complex financial reporting issues of contemporaneous interest.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 689. Current Issues in Accounting. 4 Credit Hours.
Current issues in accounting focuses on international financial reporting standards and accounting for governmental and not-for-profit organizations. This course introduces core concepts and tools of accounting and financial reporting for managers of global, governmental, and not-for-profit organizations.
Prerequisite: ACC 682.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 690. Fraud and Forensic Accounting: Ethics & Legal Environment. 4 Credit Hours.
This course focuses on conducting fraud examinations and includes discussion of procedures used in forensic accounting examinations and the rationale supporting such procedures.
Requisite: ACC 682 And ACC 685.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 698. Selected Topics. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 699. Directed Readings. 1-3 Credit Hours.
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ACC 701. Empirical Accounting Research. 3.00 Credit Hours.
This is the first course in Empirical Accounting Research for Ph.D.
students. The course introduces students to the data sources; current
techniques for accessing and analyzing accounting data; research
methods employed in hypothesis testing; and the literature on positive
accounting theory, accounting anomalies, institutional accounting, and
disclosure. The emphasis will be on current research with a historical
perspective.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ACC 702. Empirical Accounting Research II. 3.00 Credit Hours.
This is the second course in Empirical Accounting Research for Ph.D.
students. In this course, students will explore research on analyst
estimates and stock recommendations, industry research in accounting,
and empirical research on compensation. The course will critically
evaluate the theory, research design, and methodology employed in these
studies. PREREQUISITE: ACC 701 TOPICS IN EMPIRICAL ACCOUNTING
RESEARCH I, OR PERMISSION FROM THE INSTRUCTOR.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 823. Topics in Empirical Accounting Research I. 3 Credit Hours.
This is the first course in Empirical Accounting Research for Ph.D.
students. The course introduces students to the data sources; current
techniques for accessing and analyzing accounting data; research
methods employed in hypothesis testing; and the literature on positive
accounting theory, accounting anomalies, institutional accounting, and
disclosure. The emphasis will be on current research with a historical
perspective.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ACC 824. Topics in Empirical Accounting Research II. 3 Credit Hours.
This is the second course in Empirical Accounting Research for Ph.D.
students. In this course, students will explore research on analyst
estimates and stock recommendations, industry research in accounting,
an empirical research on compensation. The course will critically
evaluate the theory, research design, and methodology employed in these
studies.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

ACC 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credit
as determined by their advisor, but not for less than a total of 24. Not
more than 12 hours of ACC 730 may be taken in a regular semester, nor
more than six in a summer session. Where a student has passed their
qualifying examinations they may take the maximum allowable credit
stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Aerospace Studies (AIS)

AIS 101. The Foundations of the United States Air Force I. 1 Credit Hour.
Survey course designed to introduce students to the United States Air
Force and Air Force Reserve Officer Training Corps. Featured topics
include: Air Force heritage, military customs and courtesies, career
opportunities, Air Force Core Values, interpersonal communications,
and team building. Leadership Laboratory is mandatory for AFROTC cadets
and complements this course by providing cadets with followership
experiences.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AIS 102. The Foundations of the United States Air Force II. 1 Credit Hour.
Survey and follow on course to AIS101, designed to introduce students
to the United States Air Force and Air Force Reserve Officer Training
Corps. Featured topics include: Air Force heritage, military customs and
courtesies, career opportunities, Air Force Core Values, interpersonal
communications, and team building. Leadership Laboratory is mandatory
for AFROTC cadets and complements this course by providing cadets
with followership experiences.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AIS 150. Leadership Laboratory. 0 Credit Hours.
Leadership Laboratory (LLAB) is a dynamic and integrated grouping
of leadership developmental activities designed to meet the needs
and expectations of prospective Air Force second lieutenants and
complement the AFROTC academic program. It is a student planned,
organized, and executed practicum conducted under the supervision of
the Detachment 155 Commander and Operations Flight Commander.
Components: LAB.
Grading: CNC.
Typically Offered: Fall & Spring.

AIS 201. The Evolution of USAF Air and Space Power I. 1 Credit Hour.
Survey and follow-on course to AIS 101/102 designed to examine
general aspects of the employment of air and space power through
a historical perspective. Historical examples assist in understanding
the development of Air Force distinctive capabilities and missions. In
addition, the students continue discussing the importance of the Air
Force Core Values with the use of operational examples and historical
Air Force leaders. Students also continue to develop communication
skills. Leadership Laboratory is mandatory for AFROTC cadets and
complements this course by providing cadets with followership
experiences.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
AIS 202. The Evolution of USAF Air and Space Power II. 1 Credit Hour.
Continuation of AIS 201 which provides students with knowledge level understanding for general element and employment of air and space power. Discusses the importance of Air Force Core Values with use of operational examples and historical Air Force leaders. Continues to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AIS 301. Air Force Leadership Studies I. 3 Credit Hours.
Aerospace Studies 301 teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AIS 302. Air Force Leadership Studies II. 3 Credit Hours.
Continuation of AIS 301 and is a study of Air Force personnel and evaluation systems, leadership ethics, and communication skills required of Air Force junior officers. Case studies are used to examine Air Force leadership and management situations. Mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AIS 401. National Security Affairs/Preparation for Active Duty I. 3 Credit Hours.
Aerospace Studies 401 is designed to examine national security process, regional studies, advanced leadership ethics, and Air Force Doctrine. Special topics of interest focus on the military as a profession, officer, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism with a continuing emphasis on the refinement of communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AIS 402. National Security Affairs/Preparation for Active Duty II. 3 Credit Hours.
Continuation of AIS 401 which examines regional studies and advanced leadership ethics. Special topics of interest focus on the military as a profession, officer, military justice, preparation for active duty, and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. Mandatory Leadership Laboratory complements this course by providing students advanced leadership experiences.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

Africana Studies (AAS)

AAS 150. Introduction to Africana Studies. 3 Credit Hours.
Experiences of African American and other African-descended peoples with emphases on social, cultural, political, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

AAS 260. History of Slavery in the Atlantic. 3 Credit Hours.
The emergence and eventual abolition of the Trans-Atlantic slave trade and its effects on both old and new world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AAS 290. Special Topics. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AAS 350. Black Leadership in the U.S.. 3 Credit Hours.
Black leaders and leadership organizations. Emphasis on their role in overcoming oppression and barriers to advancement.
Prerequisite: 3 Credits in AAS.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

AAS 390. Special Topics. 3 Credit Hours.
Content varies by semester.
Prerequisite: 3 Credits in AAS.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

AAS 490. Senior Seminar in Africana Studies. 3 Credit Hours.
Content varies by semester.
Prerequisite: AAS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
American Studies (AMS)

AMS 101. Introduction to American Studies. 3 Credit Hours.
An interdisciplinary approach to American Studies with attention to a particular theme or period.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

AMS 301. Topics In American Studies. 3.00 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AMS 310. The United States In The World. 3 Credit Hours.
The culture and history of the United States in a global framework.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AMS 321. Topics in American Studies: History. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 322. Topics in American Studies: Literature. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 323. Topics in American Studies: Politics. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 324. Topics in American Studies: Religion. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 325. Topics in American Studies: Law. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 326. Topics in American Studies: Education. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 327. Topics in American Studies: Film. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 328. Topics in American Studies: Music. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 329. Topics in American Studies: Art. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 330. Topics in American Studies: Sociology. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 331. Topics in American Studies: Geography. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 332. Topics in American Studies: Anthropology. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 333. Topics in American Studies: Environmental Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 334. Topics in American Studies: Ethnic Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 335. Topics in American Studies: Women's and Gender Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 336. Topics in American Studies: LGBTQ Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 337. Topics in American Studies: Cultural Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 338. Topics in American Studies: International Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 339. Topics in American Studies: Urban Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 350. History And Culture Of South Florida. 3 Credit Hours.
The history and culture of South Florida from a multidisciplinary perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AMS 399. Independent Study. 1-3 Credit Hours.
By arrangement with instructor; content varies.
Components: LEC.
Grading: CNC.
Typically Offered: Offered by Announcement Only.
AMS 401. Seminar in American Studies. 3 Credit Hours.
Content varies by semester.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

AMS 499. Independent Study. 3 Credit Hours.
By arrangement with instructor; content varies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

AMS 501. Senior Project. 3 Credit Hours.
All majors must complete either an individual research project or an internship at a local cultural or civic institution. Either option must be approved by the program director.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

AMS 505. Honors Thesis. 3 Credit Hours.
American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505: honors thesis. Candidates for departmental honors are responsible for finding a faculty member to serve as the thesis advisor. Students would take AMS 501 in the fall semester or the senior year and AMS 505 in the spring to complete the honors thesis.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

Anthropology (APY)

APY 100. Introduction to Forensic Investigation. 3 Credit Hours.
Students will go into the field to gain an introductory understanding about skeletal identification and crime lab processes.
Requisite: Plan of Summer Scholar Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 101. Introduction to Anthropology. 3 Credit Hours.
A broad overview of archaeology, cultural anthropology, biological anthropology, and linguistics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 105. HIV: Sex, Science, and Society. 3 Credit Hours.
The important role that science plays and has played in ameliorating suffering for mankind. We will include an analysis of the scientific, human, and policy-related issues associated with HIV/AIDS.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 109. Anthropology of Religion. 3 Credit Hours.
Through themes such as myth, word and text, symbol, gender, pilgrimage, embodiment, and ritual, students learn about lived religion through anthropological research and field methods. The course also exposes introductory-level students to diverse world religious traditions: Korean folk religion, Indonesian Islam, Hinduism in diaspora, Judaism across cultures, Japanese temple Shinto traditions, and more.
Components: LEC.
Grading: GRD.

APY 200. Introduction to Forensic Anthropology. 3 Credit Hours.
Students will learn the basics of the human bone structure and how it relates to anthropology and forensic studies.
Requisite: Plan of Summer Scholar Program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 201. Principles of Archaeology. 3 Credit Hours.
History, methods, and theory of archaeology with an outline of the main characteristics of the prehistoric record throughout the world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 202. Principles of Cultural Anthropology. 3 Credit Hours.
Cultural anthropology, including such topics as economics, politics, kinship and families, health systems, religion, and personality.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 203. Principles of Physical Anthropology. 3 Credit Hours.
The origin and biological development of the human species; human evolution explored by means of the fossil record of prehistoric population; differentiation and adaptation of contemporary populations in various world environments; the comparison of humans and other primates with respect to biological and behavioral variability.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 204. Principles of Linguistic Anthropology. 3 Credit Hours.
Human linguistic principles of phonology, morphology, and grammar to construct a framework for understanding the operation of language in cultural context. The functions of human language in structuring ideological, economic, and political realms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 205. Medicine, Health Care In Society. 3 Credit Hours.
A sociohistorical analysis of the intersection between medicine, health care and society, using examples throughout the world. It will reflect on ‘taking-for-granted’ concepts such as the ‘body, risk, illness and healing’ and their relationships to culture, power, and society, as well as the plurality of narratives and discourses on health and healing practices.
Requisite: Anthropology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 208. Short-Changed in the City. 3 Credit Hours.
Marginalization plagues sub-populations in almost every large city. An anthropological view of this problem and its origins, presented through readings, discussions, lectures and field trips.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
APY 230. The Sounds of the World’s Languages. 3 Credit Hours.
The range of sounds produced by the speakers of the world’s languages.
An introduction to phonetics, with a focus on acoustically-oriented
methods used in contemporary phonetics.
Prerequisite: APY 204.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 300. Societies and Cultures in Latin America and the Caribbean. 3 Credit Hours.
This course is designed to give students an understanding of issues
related to social and processes in Latin American and Caribbean
societies, with emphasis on history, class, gender, ethnicity, religion,
politics and power, family and migration processes as well as literary and
artistic creations. We will begin our study by analyzing the sociohistorical
‘production’ of these regions, subject formation and processes of political
organizing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 301. World Prehistory. 3 Credit Hours.
The global prehistoric record, with emphasis on the development of
social complexity and ancient states.
Prerequisite: APY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 306. Human Evolution. 3 Credit Hours.
The macroevolution of humans using the fossil record of vertebrates,
including the development of uniquely human behavioral and anatomical
adaptations, and of diversity in living populations.
Prerequisite: APY 201 or APY 203.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 307. Human Adaptation. 3 Credit Hours.
Human biological adaptation to different environments and stress
is examined anthropologically within an evolutionary framework.
Mechanisms of adaptation to temperature extremes and other climatic
variables, high altitude, disease, nutritional stress, urbanization,
extraterrestrial conditions, and other environmental challenges are
described in relation to biological and behavioral variations among
human populations. The limits of human performance and human
adaptive potential in the present and future are explored.
Prerequisite: APY 201, APY 202, APY 203, BIL 101, and BIL 109.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 308. Human Variation: Anthropology of Race. 3 Credit Hours.
Human biological diversity is viewed historically within a cross-
cultural, evolutionary framework. Patterns of variation in human
morphological, anatomical, physiological, biochemical, genetic, and
behavioral characteristics are investigated in peoples living in different
environments throughout the world. Observed differences among human
populations are discussed with reference to traditional theories of racial
taxonomy and modern perspectives in human classification.
Prerequisite: APY 201, APY 202, APY 203, BIL 101, and BIL 109.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 309. Evolution of Human Behavior. 3 Credit Hours.
Origins and evolution of human behaviors as determined by fossil
and archaeological evidence, primate research, and the cross-cultural
analysis of behavioral variations in contemporary societies. The
interaction of human biological and behavioral evolution.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 310. Primate Behavior and Adaptation. 3 Credit Hours.
The taxonomy, distribution, anatomy, social behavior and adaptations to
habitats of human and non-human primates as seen from an evolutionary
perspective.
Prerequisite: APY 203 and BIL 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 315. Folk and Alternative Medicine. 3 Credit Hours.
Historical and cultural backgrounds of health therapies, including
theoretical bases of traditional ethnomedical, nonwestern, and
complementary medical systems.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 320. The Evolution of Language. 3 Credit Hours.
Popular contemporary hypotheses on the origins and development of
language.
Prerequisite: APY 204.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 336. Cultural Dynamics. 3 Credit Hours.
Components: LEC.
Grading: GRD.

APY 340. Marine Archaeology. 3 Credit Hours.
Location, excavation, and study of submerged sites.
Prerequisite: APY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 345. Blood And Chocolate: Ancient Civilizations Of Mesoamerica. 3 Credit Hours.
An archaeological approach to understanding the major pre-Columbian
cultures of Mesoamerica, from Olmec to Aztec periods, with emphasis
on the ancient Maya. The particular accomplishments of this area such
as the domestication of chocolate and corn, hieroglyphic writing, and
elaborate sacrificial rituals will be explored.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 360. Anthropology of Food. 3 Credit Hours.
Evolution of human diet, basic nutrition, food taboos, effects of
domestication, effects of diet on skeletal remains, analysis of your own
food habits, and the impact of certain foods on our biocultural evolution
of our species.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
APY 361. Gender and Language. 3 Credit Hours.
The ways in which language is used in the constitution of gender from a cross-cultural perspective. Course is co-listed with WGS 361
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 362. The Languages of the World. 3 Credit Hours.
The world's languages. The primary focus is on major differences and similarities among the structural properties of languages from diverse regions and linguistic families. In short, an introduction to linguistic typology.
Prerequisite: APY 204.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 376. Economic Anthropology. 3 Credit Hours.
The structure and operation of the small-scale economy in the social system is examined. The interrelationship between social and economic systems, and the formation of non-market economies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 377. Anthropology of Political Systems and Discourse. 3 Credit Hours.
Political systems and processes in tribal societies, with special emphasis on dispute settlement, the organization of political control, and the use of oratory. Case studies from Latin American and African examples.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 384. Caribbean Archaeology. 3 Credit Hours.
An examination of human lifeways in the Antillean archipelago from first settlement through the development of complex socio-political structures in the Late Ceramic Age and ultimately the arrival of European and African migrants.
Prerequisite: APY 201. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 385. Caribbean Cultures. 3 Credit Hours.
Caribbean societies, including ethnic diversity, production and exchange, domestic organization, and belief systems.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 386. Psychological Anthropology. 3 Credit Hours.
The interaction between personality and cultural settings. Topics include cross-cultural child rearing and enculturation, behavioral development and adjustment, "deviance," and ethnopsychiatry.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 387. Cultural Evolution. 3 Credit Hours.
Evolution of social systems and technologies, from hunting and gathering bands through industrial states.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 389. Gender in Ancient Cultures. 3 Credit Hours.
A cross-cultural examination of the role gender played in ancient complex culture areas, such as Mesoamerica, Mesopotamia, and the Mediterranean, with emphasis on using the archaeological record to reconstruct social roles.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 390. Sex and Culture. 3 Credit Hours.
A cross-cultural examination of sex roles and sexuality; gender identity, division of labor, functions of marriage, sexual practices, reproductive control, and political relationships between the sexes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 393. Drugs and Culture. 3 Credit Hours.
Cross cultural review of human drug use with special attention to the use of drugs in cultural context.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 394. Comparative Religion. 3 Credit Hours.
A cross-cultural investigation of differing levels of religious belief systems examined from both etic and emic points of view.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 395. Gender, Race & Class. 3 Credit Hours.
Conceptions and intersections of gender, race, and class in historical and contemporary cultures; the impact of these experiences on individuals and society as a whole.
Prerequisite: APY 202 and WGS 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 396. Youth Culture, Identity and Globalization. 3 Credit Hours.
Youth cultural practices and experiences in various urban contexts in the world. Particular emphasis is placed on marginalization, identity and commodification of violent practices as embedded in the globalization processes.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 397. Violence And Ritual. 3 Credit Hours.
Various theories of ritual and violence with reference to ethnographically-based topics. It will explore the role of symbols, rituals and ideologies in shaping and contesting power within nations and other political communities.
Prerequisites: APY 202 or any Social and Behavioral Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
APY 398. Coastal Cultures. 3 Credit Hours.
Fishermen and their special relations to the environment, from Thailand and Sri Lanka to Alaska and the West Indies. Decision-making processes among fishermen, business concepts, responses to technology and myths of the sea.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 399. The Anthropology of Kinship and Family in America. 3 Credit Hours.
Theories of kinship and the family. It will examine emergence of new patterns of kinship networks and construction of individuals. Ethnographic materials will be drawn from the Americas and the Caribbean, particularly Brazil, Cuba, Haiti, Jamaica and the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 405. Readings in Anthropology. 1-3 Credit Hours.
Supervised readings on special topics in Anthropology.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

APY 406. Readings in Anthropology. 1-3 Credit Hours.
Supervised readings on special topics in Anthropology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 413. Medical Anthropology. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 414. Forensic Anthropology I: Human Osteology. 3 Credit Hours.
Identification and interpretation of the human skeleton, including age, sex, hard tissue pathology and traumas.
Prerequisite: APY 203.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 415. Forensic Anthropology II: Fieldwork. 3 Credit Hours.
The investigation, analyses, and legal aspects of human remains recovered from crime scenes and mass disasters.
Prerequisite: APY 203 or APY 414 or permission.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 417. Archaeometry: The Science Of Material Culture. 3 Credit Hours.
The archaeological application of a physical science (physics, chemistry, geology, etc.) techniques to answer pertinent anthropological questions about past societies.
Prerequisite: APY 201. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 419. Politics of the Past. 3 Credit Hours.
The intersection of archaeology, politics, capitalism, and discrimination to consider the presentation, misconstrual, revision, and reclamation of the past. Lecturing will be kept to a minimum, as the bulk of the class will be devoted to discussion and debate.
Prerequisite: APY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 420. Archaeology, Architecture, and the City. 3 Credit Hours.
Ancient architectural remains in the global anthropological perspective, emphasizing the role of architecture in shaping the evolution of social and political interactions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 422. Pseudoscience in Archaeology. 3 Credit Hours.
Reconstructions of how people lived in the past that claim scientific validity, use the terminology of science, but are unsupported by evidence, can be called pseudoscientific. This course critically evaluates the field of pseudoscientific archaeology by applying the scientific method, logic, and common sense.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
APY 423. Paleopathology: Health and disease in ancient peoples. 3 Credit Hours.
Paleopathology aims to familiarize students with the range of health conditions that present in preserved human remains and to explain the linkages between disease prevalence and culture, economics, and politics.
Prerequisite: APY 414 and APY 416. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 435. Anthropology of Nature and Environment. 3 Credit Hours.
This course is an introduction to the anthropological investigation of nature, biology, and environment. Taking examples from cultural anthropology and the subfields of environmental anthropology, political ecology, and the anthropology of science, the course builds an understanding of the various ways in which ideas about nature and human nature and nature making practices shape our contemporary world: its places, spaces, life forms, and forms of life.
Prerequisite: APY 202.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 480. Undergrad Internship Anthropology. 3-9 Credit Hours.
The purpose of the undergraduate internship is practical application of coursework to hands-on learning with field and laboratory research conducted in partnership with an academic, governmental, non-profit and/or private sector business entity. The goal is to acquire and practice skill sets required for advancement in professional careers. Students may elect to participate in more than one internship because of the four-field approach of the discipline of Anthropology.
Prerequisite: APY 201 Or APY 202 Or APY 203 Or APY 204.
Components: DIL.
Grading: GRD.
Typically Offered: Summer.

APY 484. Anthropological Theory. 3 Credit Hours.
Theoretical frameworks directing data collection and research methodology in anthropology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 485. Archeological Theory and Technique. 3 Credit Hours.
Theoretical traditions that shape modern archaeological research design and interpretation.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 501. Methods of Anthropological Research. 3-6 Credit Hours.
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
APY 602. Advanced Seminar in Cultural Anthropology. 3 Credit Hours.
The application of the anthropological perspective, data collection and analyses methods, and theoretical foundations of traditional cultural anthropology to understanding and working on solving human problems in the modern world. Topics include the design, conduct, and application of modern ethnological methods to research venues in business, governmental/NGO agencies, conflict studies, natural disasters, medical, globalization and financial organizations.
Requisite: Graduate Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 603. Advanced Seminar in Biological Anthropology. 3 Credit Hours.
The historical and theoretical foundations of modern biological anthropology. Topics include ethics and standards for human subjects; applied bioarchaeology, biological anthropology in medical/legal settings, primatology, human biology and adaptive diversity, modern perspectives on race, and skeletal biology of modern peoples. The development of professional research and writing skills for the discipline is integral to course goals.
Requisite: Graduate Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 604. Advanced Seminar in Linguistic Anthropology. 3 Credit Hours.
Core aspects of linguistics theory, and consider the ways in which modern linguistic techniques can be applied in the investigation of both common and uncommon typological patterns in the world’s 7000+ languages. Requisite: Graduate Status or Permission of Instructor.
Requisite: Graduate Status or Permission of Instructor. Typically Offered: Fall & Spring.

APY 606. Museum Internship. 3 Credit Hours.
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 605. Methods of Anthropological Research. 3-6 Credit Hours.
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 611. Advanced Medical Anthropology. 3 Credit Hours.
Applications of theories and methods of medical anthropology to problems in human health and disease.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 612. Advanced Museum Internship. 3 Credit Hours.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 615. Advanced Museum Internship. 3 Credit Hours.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 616. Advanced Workshop in Anthropology. 3-6 Credit Hours.
This course is designed for graduate students to participate in special topics in Anthropology and related fields.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 628. Advanced Graduate Seminar. 3 Credit Hours.
Specialized topics in Anthropology to involve students into current research specializations.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 690. Teaching Practicum In Anthropology. 3 Credit Hours.
Logistics and pedagogical issues of teaching anthropology, including skill set and materials suitable for employment in settings for which the master’s is the required, e.g., two-year schools. The student will evaluate texts, create teaching materials for a given subfield, master commonly-available electronic teaching and learning tools, and teach one class as directed.
Requisite: Graduate Status and Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 702. Field Studies in Anthropology. 3-6 Credit Hours.
Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 805. Graduate Internship: Professional Practice of Anthropology. 1-9 Credit Hours.
An internship designed to provide valuable career-related work experience in a real-world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid. This course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 810. Master’s Degree Thesis Preparation and Writing. 1-9 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Applied Marine Physics (AMP)

AMP 536. Modeling of Physical-Biological Interactions. 3 Credit Hours.
The course is designed to teach students the basics components for building coupled physical biological models. Students will be able to understand the processes affecting from low- to high-trophic level organisms in the planktonic environment. Emphasis will be given on numerical simulations of mechanisms involved in: Plankton distribution and patchiness; Trophic interactions (NPZD); Larval behavior and transport; Marine population connectivity.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
AMP 805. Special Project. 1-6 Credit Hours.
Supervised project for students pursuing the Master of Arts degree.
Consists of a paper which is researched and written on a topic approved
by the student's advisory committee, and presented as a seminar to the
student's division. Six credits are required for graduation.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Applied Music (MAP)

MAP 264. VOCAL TECHNIQUES. 2 Credit Hours.
Components: LEC.
Grading: GRD.

Arabic (ARB)

ARB 100. Elementary Arabic Discussion. 1 Credit Hour.
Corequisite: ARB 101 Or ARB 102.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

ARB 101. ARB 101 - Elementary Arabic I. 4 Credit Hours.
Fundamental grammatical principles; drill in pronunciation; simple
reading and translation. Closed to native speakers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 102. ARB 102 - Elementary Arabic II. 4 Credit Hours.
Reading and translation; oral and written exercises. Closed to native
speakers.
Prerequisite: ARB 101 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 201. Intermediate Arabic. 3 Credit Hours.
Continuation of ARB 102. Reading and translation; oral and written
exercises. Closed to native speakers.
Prerequisite: ARB 102 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 202. Intermediate Arabic II. 3 Credit Hours.
Continuation of Arabic 201. Readings designed to integrate listening
comprehension, speaking, reading, writing skills. Discussion of Arab
society, history and culture. Closed to native speakers.
Prerequisite: ARB 201 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 203. Advanced Arabic. 3 Credit Hours.
5th semester course in Modern Standard Arabic, the Arabic used in
almost all written communication and in formal speech throughout the
Arab world. Continued development of all four language skills (listening,
speaking, reading, and writing) together with study of cultural aspects of
the Arab world. Conducted in Arabic. Closed to students who graduated
from a high school in which the primary language of instruction was
Arabic.
Prerequisite: ARB 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 204. Arabic 204: Advanced Arabic II. 3 Credit Hours.
The sixth course of the Modern Standard Arabic sequence within the
Arabic Studies Program. The three primary goals of the Arabic language
sequence are: (1) developing oral and written communicative abilities in
Arabic; (2) understanding the rich culture of the Arabic-speaking world
through engaging with texts and cultural artifacts; (3) studying and
understanding the Arabic language, from grammar and spelling to writing
with coherence, cohesion and accuracy.
Prerequisite: ARB 203.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 207. Arabic For Heritage Learners. 3 Credit Hours.
Arabic for Heritage Learners is a 200 level course specifically designed
for students of Arab descent who fulfilled the equivalent of ARB 201. The
course will hone students' ability in critical reading, writing, debate, and
discussion of pertinent topics in Arab culture. The course material will
focus on the history of Arab culture, literature, film, and music. By the end
of the semester students will develop their ability in critical reading and
writing in MSA.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARB 208. Arabic for Heritage Learners II. 3 Credit Hours.
Arabic 208 is combined with the sixth course of the Modern Standard
Arabic sequence within the Arabic Studies Program. The three primary
goals of the Arabic language sequence are: (1) developing oral and written
communicative abilities in Arabic; (2) understanding the rich culture of the
Arabic-speaking world through engaging with texts and cultural artifacts;
(3) studying and understanding the Arabic language, from grammar and spelling to writing with coherence, cohesion and accuracy.
Prerequisites: ARB 202 or ARB 207.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 251. Levantine Colloquial Arabic I. 3 Credit Hours.
This course will enable students to converse in the colloquial Arabic
dialects of the Levant (Jordan, Lebanon, Palestine, and Syria).
Development of communicative abilities in speaking and comprehension,
as well as reading and writing (as used in social media, theater, etc.) of
colloquial Levantine Arabic. Closed to native speakers (students educated in
schools where Arabic was the language of instruction); heritage
learners at the beginning level may be accommodated.
Prerequisite: ARB 201 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARB 300. Elementary Arabic Discussion. 1 Credit Hour.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

ARB 310. Topics In Arabic Literature And Culture In Translation. 3 Credit Hours.
Specific topics within the literature and cultures of the Arabic-speaking world, including literary, cinematic, and artistic representations of central themes or issues, and the cultural production of particular historical periods or national or immigrant groups. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary.
Prerequisite: ENG 106 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 312. Arab Cultures: A Cultural History Of The Arab World. 3 Credit Hours.
Study of the main points of Arab cultural history, from Pre-Islamic times to the period following European colonization with an emphasis on intellectual history and literary and visual arts. This course is taught in English and does not fulfill the CAS foreign language requirement. Writing Credit.
Prerequisite: ENG 106 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 315. Topics In Gender And Sexuality In Translation. 3 Credit Hours.
Topics in gender and sexuality in the context of the Arab world, through literary and/or cultural studies. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary. Writing Credit.
Prerequisite: ENG 106 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 394. ARB 394 Internship. 3 Credit Hours.
The internship is intended to provide the student with an opportunity to apply analytical, interpretive, expressive, and creative skills developed in coursework. Internships ordinarily take place outside the University. They involve UM-faculty supervision as well as supervised on-site experience in an Arabic-speaking cultural, business, or not-for-profit organization. Student needs to fill out the internship application form. Normally 40 internship hours are required per credit earned (the host will supply documentary evidence of hours worked).
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 410. Language And Power In The Arab World. 3 Credit Hours.
The multiple languages and linguistic registers present in the Arab world and, through materials from linguistics, anthropology, political science, music, art, and literature, leads them into an exploration of the main socio-linguistic features of Arabic and their broader cultural ramifications. This course is conducted in English. It does not fulfill the College of Arts & Sciences language requirement.
Prerequisite: ENG 106 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 591. Directed Readings. 1-3 Credit Hours.
Directed readings (Independent study) in Arabic Studies.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 625. Arabic for Graduate Students. 0 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARB 641. Elementary ARB I for Graduate Students. 0 Credit Hours.
Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Arabic, as well as to provide an introduction to the Arabic-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 642. Elementary ARB II for Graduate Students. 0 Credit Hours.
Continuation of ARB641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Arabic, and continued study of the Arabic-speaking world.
Prerequisite: ARB 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 651. Intermediate ARB I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of elementary-level Arabic. Designed to enhance graduate students' communication skills at the intermediate level. Intended principally for students who will carry out research in areas related to the Arabic-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 652. Intermediate ARB II for Graduate Research. 0 Credit Hours.
Prerequisite: ARB 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 653. Advanced ARB I for Graduate Research. 0 Credit Hours.
Designed to enhance graduate students' communication skills in the Arabic language at the advanced-low level. Intended principally for students who will carry out research related to the Arabic-speaking world.
Prerequisite: ARB 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 654. Advanced ARB II for Graduate Research. 0 Credit Hours.
Designed to enhance graduate students' communication skills in the Arabic language at the advanced-intermediate level. Intended principally for students who will carry out research related to the Arabic-speaking world.
Prerequisite: ARB 653.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 101. Architecture Design I. 6 Credit Hours.
The study of architecture as an intellectual and aesthetic discipline. Topics include concept, site, form and technique. Corequisite: ARC 111, 121.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 102. Architecture Design II. 6 Credit Hours.
Architectural response to shelter, space and setting requirements. Topics include programming, program analysis and design, anthropometrics, and architecture psychology. Corequisite: ARC 112, 122.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 109. Introduction to Architecture. 3 Credit Hours.
(Includes Design & History) Introduction to architectural ideas and principles including composition, space, form, function, history and methods of exploring architectural and urban design problems. Students will learn the relationship between two dimensional and 3 dimensional spaces through analytical drawing and model making. Course pedagogy includes weekly lectures in history and theory to better inform the design process. This course will encourage intuitive action, rapid visual analysis and interpretation.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 110. Visual Studies. 3 Credit Hours.
Concurrent with the ARC 109 course, the visual studies course explores architectural drawing as a means of discovery, exploration, analysis and representation. Coursework begins with freehand drawing, in which students explore and refine their observation and representational skills, followed by an introduction to digital drawing and 3-d fabrication used in the profession today. The students will develop a portfolio in book format that illustrates the body of work produced during the three-week program.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 111. Drawing I. 3 Credit Hours.
An introduction to graphic representation as exploration, selection, coordination and acquisition of visual knowledge in three methods: freehand, mechanical and digital drawing. This course covers topics of orthographic and oblique projections, geometric constructions, lettering, parti sketches, shade and shadow, portfolio design and basic knowledge of digital programs; Adobe Photoshop, Adobe In-Design, Sketch-up Pro, and Autocad. Prerequisite: Corequisite: ARC 101, 121.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 112. Drawing II. 3 Credit Hours.
An intermediate course that continues methods integration introduced in Drawing I focusing on conical projections, color theory, measured drawings, Sketchup-up Pro, Autocad, and Revit. Prerequisite: ARC101, 111, Corequisite ARC 102, 122.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 121. Architecture and Culture. 1 Credit Hour.
Architecture as an intellectual and aesthetic discipline. Focus on design theory, language, typology, image, form, context, and case studies. Corequisite: ARC 101, 111.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 122. Architecture and Behavior. 1 Credit Hour.
Those aspects of environmental psychology which affect architectural design. Studies in human behavior and the design process, application of psychological factors to the design of buildings and their environment. Corequisite: ARC 102, 112.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 141. On-Site Survey of European Architecture and Urbanism. 3-6 Credit Hours.
On site introduction to architecture and the city with a historical review of most European periods from classical to contemporary. Survey of European architectural and urbanistic precedents in important selected locations. Elective course open to all majors; lecture and seminar format.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
ARC 203. Architecture Design III. 6 Credit Hours.
Architectural response to natural environment and site requirements. Focus on site analysis and design, climate, access and circulation, landscape, relation to larger context. Corequisite: ARC 223.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 204. Architecture Design IV. 6 Credit Hours.
Building materials and structure as active constituents of architecture design. Focus on orientation, enclosure, low-energy responses, selection and assembly of construction materials, short and intermediate span structural systems. Corequisite: ARC 231.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 213. Drawing III. 3 Credit Hours.
An advanced representation course that builds on the tools and methods of Drawing I & II while introducing students to more advanced techniques of three dimensional modeling that integrates hand drawing and computer drawings. Topics covered include: diagramming, research/analytical drawing, designing in perspective, and integration of the following digital programs, Revit, Rhino, Maya, 3-D Max, and Archicad. Prerequisite: ARC 102, 111, 112 or permission of the instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 223. Architecture and the Environment. 1 Credit Hour.
Architectural response to natural environmental requirements. Focus on climate, control, natural energy use, ecosystems, energy flow, environmental interventions, case studies of indigenous buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 230. Building Technology I: Materials & Methods. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 231. Building Technology: Structural Systems. 3 Credit Hours.
Structural systems: the tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral building envelope and financial considerations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 267. History of Architecture I: Ancient, Medieval and Renaissance. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Corequisite: ARC 203.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 268. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present. Corequisite: ARC 204.
Components: LEC.
Grading: LEC.
Typically Offered: Spring.

ARC 292. Introduction to Architecture Design I. 3 Credit Hours.
Survey of the architecture profession and introduction to architecture design for non-architecture majors. Role, opportunities, vocabulary, visual awareness, techniques and procedures of design.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 293. Introduction to Architecture Design II. 3 Credit Hours.
Continuation of ARC 292 and an introduction to the interactions between architecture and the engineering disciplines for non-architecture majors. Theories of building and site design, technology as an integral component of design, program, site, climate and methodology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 294. Introduction to the Development of Architecture. 3 Credit Hours.
Introduction to architecture for non-architecture majors. Vocabulary, themes, principles and processes of design, cultural, social, economic and technological influences demonstrated through historic examples.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 301. Architecture Design. 3 Credit Hours.
Comprehensive building and site design for students transferring into the architecture program at third year level. Topics include human, environmental, cultural and technological factors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 305. Architecture Design V. 6 Credit Hours.
Environmental systems and structure as active constituents of architectural design. Topics include the integration of enclosure, structure, environmental and mechanical systems in intermediate and long span structures. Corequisite: ARC 362, CAE 213.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 306. Architecture Design VI. 6 Credit Hours.
Government and finance as active constituents of architecture design. Topics include zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies. Corequisite: ARC 351, CAE 313.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 323. On Site Study of Selected Architecture and Urbanism. 3-6 Credit Hours.
On site study of specific architectural and/or urbanistic precedents at selected locations. Focus on specific period(s) and/or architect(s). Elective course open to all majors.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
ARC 324. On Site Graphic Analysis of Selected Architecture and Urbanism. 3 Credit Hours.
On site analysis and illustration of specific architectural and/or urbanistic precedents at selected locations. Diagrams, sketches, and drawings recording, analyzing and evaluating buildings and places. Focus on specific period(s) and/or architect(s). Elective course open to all majors.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
ARC 362. Environmental Building Systems I. 3 Credit Hours.
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyor systems; plumbing - fixtures and pipes; safety systems - fire safety and emergency and signal systems. Corequisite: ARC 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 363. Environmental Building Systems II. 3 Credit Hours.
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces. Principles and applications of electrical equipment and wiring design. Corequisite: ARC 306.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 371. Ancient Architecture. 3 Credit Hours.
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 373. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 382. Architecture and Culture in Italy. 3 Credit Hours.
A cultural and historical framework in preparation for participation in the Rome program. A range of topics, including architecture, art, history, cinema, literature and politics presented by University faculty from a variety of disciplines. Required for participation in the Rome Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 390. History of Cities. 3 Credit Hours.
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 407. Architecture Design VII. 6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 408. Architecture Design VIII. 6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 452. Management of Professional Practice. 3 Credit Hours.
Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 475. Colonial Architecture. 3 Credit Hours.
History of architecture and human settlements. Colonial Architecture from the 16th through the 19th centuries in North and South America, the Caribbean, India and Africa.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 476. 19th and 20th Century Architecture. 3 Credit Hours.
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 481. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 482. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 483. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 500. Architecture Theory. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 501. Architecture Design and Theory I. 6 Credit Hours.
Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 502. Architecture Design and Theory II. 6 Credit Hours.
Technology component: materials, structure, and environmental control systems as a framework for architectural design. Construction materials and methods, structural systems, mechanical systems.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 503. Architectural Design and Theory III. 6 Credit Hours.
Legal and economic component; government and finances as active constituents of architecture design. Zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 504. Architecture Design and Theory I. 6 Credit Hours.
Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 507. Architecture Design. 6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 509. Architecture Design IX. 6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 510. Architecture Design X. 6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 511. Drawing. 3 Credit Hours.
Graphic representation of visual ideas through increased awareness of visual and graphic vocabulary, stressing projections, light, shade and shadow, perspective and freehand sketching.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 512. Advanced Visual Analysis. 3 Credit Hours.
Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 513. Computing. 3 Credit Hours.
An introduction to new electronic design tools and technology available to architects today. Lectures on the history and future of computing in the profession.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 514. Michelangelo. 3 Credit Hours.
Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 515. Computer Modeling. 3 Credit Hours.
Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 516. Architectural Watercolor Renderings. 3 Credit Hours.
This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 517. Construction Documents. 3 Credit Hours.
Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 518. **Documentation of Historic Architecture. 3 Credit Hours.**
Principles of preservation and restoration, research methods, measured drawings, surveying methods, case studies.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Summer.

ARC 519. **Architecture and Color. 3 Credit Hours.**
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Summer.

ARC 523. **Interior Architecture Design. 3 Credit Hours.**
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

ARC 524. **Selected Topics in Interior Architecture Design. 3 Credit Hours.**
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

ARC 525. **Landscape Arch Design I. 3 Credit Hours.**
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 526. **Landscape Arch Design II. 3 Credit Hours.**
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 527. **Architecture Photography. 3 Credit Hours.**
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 528. **Historic Preservation. 3 Credit Hours.**
Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior’s Standards for rehabilitation.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

ARC 529. **Research in Design-Methods and Procedures. 3 Credit Hours.**
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 531. **Building Technology II: Structural Systems. 3 Credit Hours.**
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Summer.

ARC 532. **Building Structures I. 3 Credit Hours.**
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
**Prerequisite:** ARC 532.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Summer.

ARC 533. **Building Structures II. 3 Credit Hours.**
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
**Prerequisite:** ARC 532.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 534. **The Palazzo in Italian Architecture. 3 Credit Hours.**
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 535. **Historic Italian Urbanism. 3 Credit Hours.**
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 536. **Italian Gardens. 3 Credit Hours.**
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 537. **Research in Rome. 3 Credit Hours.**
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.
ARC 541. Seminar on Town Design. 3 Credit Hours.
Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; inter disciplinary presentations, review, and criticism of current town and urban design projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 542. Seminar on Housing. 3 Credit Hours.
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 543. Seminar on Retrofit of Suburbia. 3 Credit Hours.
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 545. Urban Composition. 3 Credit Hours.
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 546. Studies of Havana. 3 Credit Hours.
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 547. Architecture and Urban Identity. 3 Credit Hours.
Study of the relationship between architecture and urbanism focusing on the ways in which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 548. Seminar in Community Development. 3 Credit Hours.
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 550. Professional Lecture Series. 3 Credit Hours.
Exposure to the various professional disciplines in South Florida that make contributions to the design process. Case study analysis and evaluation of current building project, from time of initial formulation through completion, including research, diagrammatic studies, site visits and lectures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 551. Contemporary Theories of Architecture. 3 Credit Hours.
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, con sumerism, rationalism, classicism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 552. Seminar on South Florida. 3 Credit Hours.
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 553. Structural Design Theory. 3 Credit Hours.
Relationship of structural systems to architectural design. Case studies in the ories of structure, form and construction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 554. Architecture of South Florida. 3 Credit Hours.
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 555. Design and Fabrication Techniques: Carved Panels. 3 Credit Hours.
Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 556. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Corequisite: ARCS02.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 558. Theories of Landscape Architecture. 3 Credit Hours.
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 559. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Corequisite: ARCS02.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 569. Directed Readings. 3 Credit Hours.
A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 570. Modern Architecture. 3 Credit Hours.
History of architecture, landscape, and city design in the modern era.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 572. Selected Topics in World Architecture. 3 Credit Hours.
History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 574. Renaissance Architecture. 3 Credit Hours.
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 577. The Architecture of Alvar Aalto. 3 Credit Hours.
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 578. Italian Rationalist Architecture. 3 Credit Hours.
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 581. Special Problems. 1-3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 582. Special Problems. 3-6 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 583. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 584. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 585. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 586. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 587. History of Cities. 3 Credit Hours.
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 590. History of Cities. 3 Credit Hours.
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 593. Computer Animation. 3 Credit Hours.
Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 594. Geographic Information Systems in Urban Design. 3 Credit Hours.
Introduction to urban principles, documentation, lexicon of urbanism, urban codes, and architectural guidelines (Studio Format - Rome Program).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 596. Interactive Multimedia in Design. 3 Credit Hours.
Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
ARC 601. Special Problems. 3-6 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 602. Urban Design II: General Urban to Urban Core. 6 Credit Hours.
Studio projects focusing on urban retrofit and the repair of suburbia.
Design topics may include typo-morphological studies, sustainable
development, down-town redevelopment, neighborhood retrofit, urban
agriculture, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 603. Urban Design III: Regional/Informal Urbanism. 6 Credit Hours.
Studio projects focusing on regional design, everyday urbanism,
informalities and other urbanisms. Design topics may include open space
and rural design, informal communities, affordable and manufactured
housing, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 604. Architecture Design and Theory I. 6 Credit Hours.
Cultural, human and environment component and architectural responses
to these: Social and aesthetic concepts, architectural psychology,
climatic principles, programming analysis and design.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 605. Architecture Design and Theory II. 6 Credit Hours.
Technology component; materials, structure, and environmental control
systems as a framework for architectural design. Construction materials
and methods, structural systems, mechanical systems.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 606. Architectural Design and Theory III. 6 Credit Hours.
Legal and economic component; government and finances as active
constituents of architecture design. Zoning regulations, building codes,
principles of public health, safety and welfare, market and feasibility
studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 607. Architecture Design.. 6 Credit Hours.
Architecture Design: Comprehensive Component. Topics include zoning
regulations, building codes, principles of public health, safety and
welfare, market and feasibility studies.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 608. Architecture Design. 6 Credit Hours.
Specialization component: student and faculty select areas of in-depth
study in housing. Low-income housing, elderly housing, suburban
housing, housing types, etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 609. Architecture Design. 6 Credit Hours.
Comprehensive project. Programming, design development, formulation
of alternative solutions, detailing, presentation.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 610. Architecture Design Degree Project. 6 Credit Hours.
Special component: student/faculty selected area of special study.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 611. Drawing. 3 Credit Hours.
Graphic representation and exploration of visual ideas through increased
awareness of visual and graphic vocabulary, stressing projections, light,
shade and shadow, perspective, and freehand sketching.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 612. Advanced Visual Analysis. 3 Credit Hours.
Drawing as a means of analyzing and recording visual experience.
Composition, form, light, color and drawing as a primary device in the
mental registration of visual experience.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 613. Computing. 3 Credit Hours.
An introduction to new electronic design tools and technology available
to architects today. Lectures on the history and future of computing in
the profession.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 614. Michelangelo. 3 Credit Hours.
Drawing as a form of research across mediums to understand historical
research and interpretation of Michelangelo’s work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 615. Visualization Techniques. 1 Credit Hour.
Survey of digital and analogue representation techniques for urban
designers.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 616. Architectural Watercolor Renderings. 3 Credit Hours.
This course will use freehand drawing and watercolor painting as a
vehicle to study and record the urban and architectural conditions of
Coral Gables and other South Florida sites. Particular emphasis will be
placed on the analytical potential of sketches (recording space, light,
surfaces and color).
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 617. Construction Documents. 3 Credit Hours.
Working drawings and specifications. Form, content and role of
constituent parts of working drawings and specifications by using case
studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 618. Documentation of Historic Architecture. 3 Credit Hours.
Principles of preservation and restoration, research methods, measured drawings, surveying methods, case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 619. Architecture and Color. 3 Credit Hours.
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 620. Architecture Theory. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 621. History-Theory II: Housing, Transportation and Infrastructure.. 3 Credit Hours.
Part I: Survey of housing theories and projects with emphasis on morphological context, typology and composition - focus on topics of modernity. Part II: Introduction to thoroughfare design and walkability principles; description of urban, suburban, rural and regional infrastructure.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 622. History-Theory III: Urban Design Theory.. 3 Credit Hours.
Advanced survey of urban design theories in print and practice - emphasis on issues of modernity. (Seminar Format)
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 623. Public Participation Methods - Charrette with MRED+U Program.. 3 Credit Hours.
Introduction to planning and public participation methods. Design workshop in collaboration with students in the master in Real Estate and Urbanism program. (Some travel may be required)
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 624. Architecture Theory. 3 Credit Hours.
Review and criticism of current theoretical work in architecture. Design theory, language, typology, image, form, context.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 625. Roman Architecture and Urbanism I. 3 Credit Hours.
Historical overview of architecture and town planning in ancient Rome from the Etruscan period through the Imperial period.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 626. Landscape Arch Design II. 3 Credit Hours.
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 627. Architecture Photography. 3 Credit Hours.
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 628. Historic Preservation. 3 Credit Hours.
Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior’s Standards for rehabilitation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 629. Research in Design-Methods and Procedures. 3 Credit Hours.
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 630. Building Technology: Materials & Methods. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry, concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes, assemblies, detailing and basic building code concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 631. Building Technology II: Structural Systems. 3 Credit Hours.
Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 632. Building Structures I. 3 Credit Hours.
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 633. Building Structures II. 3 Credit Hours.
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.
ARC 634. The Palazzo in Italian Architecture. 3 Credit Hours.
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 635. Historic Italian Urbanism. 3 Credit Hours.
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 636. Italian Gardens. 3 Credit Hours.
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 637. Research in Rome. 3 Credit Hours.
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 638. Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.
Components: LEC.
Grading: GRD.

Typically Offered: Fall & Spring.

ARC 639. Selected Topics in Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 641. Seminar on Town Design. 3 Credit Hours.
Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; inter disciplinary presentations, review, and criticism of current town and urban design projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 642. Seminar on Housing. 3 Credit Hours.
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 643. Seminar on Retrofit of Suburbia. 3 Credit Hours.
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 644. The Architecture of Palladio. 3 Credit Hours.
On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 645. Urban Composition. 3 Credit Hours.
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 646. Studies of Havana. 3 Credit Hours.
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 647. Architecture and Urban Identity. 3 Credit Hours.
Study of the relationship between architecture and urbanism focusing on the way in which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 648. Seminar in Community Development. 3 Credit Hours.
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 650. Professional Lecture Series. 3 Credit Hours.
Real estate transactions and deal structuring from the development perspective. Using the case study method, the course explores the key components and the disciplines needed for successful real estate transactions and projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 651. Contemporary Theories of Architecture. 3 Credit Hours.
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 652. Environmental Building Systems I. 3 Credit Hours.
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 653. Structural Design Theory. 3 Credit Hours.
Relationship of structural systems to architectural design. Case studies in the ories of structure, form and construction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 654. Architecture of South Florida. 3 Credit Hours.
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 657. Design and Fabrication Techniques: Carved Panels. 3 Credit Hours.
Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 658. Theories of Landscape Architecture. 3 Credit Hours.
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 661. Building Technology I: Materials and Methods. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction tech-niques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 662. Environmental Building Systems I. 3 Credit Hours.
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 663. Environmental Building Systems II. 3 Credit Hours.
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 664. Landscape Arch Design I. 3 Credit Hours.
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 665. Computer Modeling. 3 Credit Hours.
Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 666. History of Architecture I. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 667. History of Architecture II. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 668. History of Architecture II. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 669. Directed Readings. 3 Credit Hours.
A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student’s chosen area of interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring & Summer.

ARC 670. Modern Architecture. 3 Credit Hours.
History of architecture, landscape, and city design in the modern era.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 671. Ancient Architecture. 3 Credit Hours.
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 672. Selected Topics in World Architecture. 3 Credit Hours.
History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 673. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 674. Renaissance Architecture. 3 Credit Hours.
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 675. Colonial Architecture. 3 Credit Hours.
History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 676. 19th and 20th Century Architecture. 3 Credit Hours.
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 677. The Architecture of Alvar Aalto. 3 Credit Hours.
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 678. Italian Rationalist Architecture. 3 Credit Hours.
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 681. Special Problems. 1-3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 682. Special Problems. 3-6 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 683. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 684. Special Problems. 1-3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 685. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 686. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 687. History of Cities. 3 Credit Hours.
Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlement
Components: LEC.
Grading: GRD.

ARC 688. Geographic Information Systems in Urban Design. 3.00 Credit Hours.
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 689. Interactive Multimedia in Design. 3 Credit Hours.
Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 696. Advanced Topics. 3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics will be shown in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 699. Directed Research. 1-6 Credit Hours.
Individually supervised projects. Required 6 credit course for all Master of Architecture in Computing students who exercise final project rather than thesis option.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 701. Masters Final Project. 6 Credit Hours.
Individually supervised projects. Required as a 6 credit course for all Master of Architecture in Computing students electing a final project.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 720. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis or final project for the master's degree after the student has enrolled for the permissible cumulative total in ARC 699 or ARC 710 (usually six credits). Credit not granted. May be regarded as full-time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Art (ART)

ART 101. Introduction to Drawing I. 3 Credit Hours.
Contour, cross-contour, perspective, proportion, chiaroscuro, and gesture in pictorial composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ART 102. Introduction to Drawing II. 3 Credit Hours.
Experimentation, chance, exaggeration, movement, texture, and color in pictorial composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 103. Two-Dimensional Design. 3 Credit Hours.
Line, rhythm, shape, pattern, value and color in pictorial composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ART 104. Introduction To 3D Techniques In Clay, Glass, Metal, Wood. 3 Credit Hours.
Basic 3D design principles and techniques in clay, metal, and wood. Students will rotate into each of the areas and learn to use the equipment in each area and make projects in each of the materials.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 105. Figure Drawing. 3 Credit Hours.
Drawing the human figure: proportion, anatomy, perspective, gesture, and expressive line.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 107. Introduction to Drawing III. 3 Credit Hours.
Continuation of ART 101 with emphasis on Renaissance perspective and alternative systems of spatial representation. Survey of materials and methods. Introduction of color.
Prerequisite: ART 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ART 109. Introduction to Electronic Media. 3 Credit Hours.
Computer skills for desktop publishing and digital imaging.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 180. Studies in Studio Art. 1-3 Credit Hours.
Studio studies taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ART 202. Introduction to Painting. 3 Credit Hours.
Materials and techniques of easel painting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 210. Introduction To Digital Photography. 3 Credit Hours.
DSLR Camera and Lens Techniques and Adobe LightRoom Processing In Digital Photography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 217. Introduction to Sculpture. 3 Credit Hours.
Integrated approach to concept development, craftsmanship and appropriate use of materials.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 251. Introduction to Printmaking. 3 Credit Hours.
Drypoint, engraving, etching, aquatint, and softground; relief and intaglio printed collographs; relief printing from linoleum.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 253. Silkscreen I. 3 Credit Hours.
Beginning silkscreen: monotyping with screens, reduction printing, multiple run silkscreen printing and beginning photo silkscreen.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 254. Computer Applications for Printmaking. 3 Credit Hours.
Software programs used as printmaking manipulation tools to aid in the planning of prints.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 260. Special topics in Ceramics. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 261. Hand-built Ceramics I. 3 Credit Hours.
Beginning hand-building techniques: pinching, coiling, slab construction; introduction to glazing and firing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 262. Wheel Thrown Ceramics I. 3 Credit Hours.
Introduction to wheel throwing, glazing and firing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 263. Introduction to Glass Blowing. 3 Credit Hours.
Forming shapes and vessels from molten glass by the use of a blow pipe and glass tools.
Prerequisite: ART 104.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 268. Figure In Clay I. 3 Credit Hours.
Introduction to modeling the human figure in clay with emphasis on form, volume, proportion, basic anatomy, and gesture.
Prerequisite: ART 104 or ART 261.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 293. Typography. 3 Credit Hours.
Type and image compositions, history, arrangement, style, aesthetics of printed communications, type software and calligraphy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 294. Multimedia II/ Animation. 3 Credit Hours.
Animation using time-based media.
Prerequisite: ART 109.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 301. Intermediate Painting I. 3 Credit Hours.
Painting in oil and acrylic. Emphasis on experimentation and creative expression.
Prerequisite: ART 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 302. Intermediate Painting II. 3 Credit Hours.
Continuation of ART 301.
Prerequisite: ART 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 310. Intermediate Digital Photography. 3 Credit Hours.
Prerequisite: ART 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 311. Color Digital Photography. 3 Credit Hours.
Prerequisite: ART 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 312. Alternative Processes Photography. 3 Credit Hours.
Nineteenth Century Photographic Processes. From the Cyanotype to the Collodion Print, all in the service of creative expression.
Prerequisite: ART 311.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ART 315. Socially Engaged Art. 3 Credit Hours.
Contemporary art practices and the role of visual arts in creating social change, through lectures, group discussions, Individual art projects and a collaborative, hands-on community-based art project. Note: this is a new course implemented as part of the Engaged Faculty Fellows program to provide students with the opportunity for civic engagement within the context of artmaking.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ART 317. Intermediate Sculpture I. 3 Credit Hours.
Incorporation of symbol and metaphor to achieve meaning, use of additional materials and technical processes.
Prerequisite: ART 217.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 318. Intermediate Sculpture II. 3 Credit Hours.
Continuation of ART 317.
Prerequisite: ART 317.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 330. ART OF EGYPT MESOPOT. 3 Credit Hours.
Components: LEC.
Grading: GRD.

ART 339. Archaeological Survey. 6 Credit Hours.
Components: LEC.
Grading: GRD.

ART 351. Intaglio/Relief II. 3 Credit Hours.
Continuation of ART 251. Additional processes such as mezzotint, relief printing from woodblocks, multiple block printing, photographic xerox transfers and photo etching.
Prerequisite: ART 251.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 352. Lithography II. 3 Credit Hours.
Continuation of ART 252. Color printing from stones, aluminum plates and photo litho plates. Combination of lithography with other print media.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 353. Silkscreen II. 3 Credit Hours.
Continuation of ART 253, including silkscreening on canvas, larger format work, and advanced photo silkscreen techniques.
Prerequisite: ART 253.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 354. Computer Assisted Printmaking: Lithography and Silkscreen. 3 Credit Hours.
The use of inkjet and laser printers to make positives for black and white and process color work in photo lithography; custom color separations for multiple screen printing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 355. History of Philosophy of Art. 3 Credit Hours.
An examination of the history of philosophical work on the arts (including literature, visual art, and music) from ancient times through the mid twentieth century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 361. Hand-Built Ceramics II. 3 Credit Hours.
Continuation of ART 261.
Prerequisite: ART 261.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 362. Wheel Thrown Ceramics II. 3 Credit Hours.
Continuation of ART 262.
Prerequisite: ART 262.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 363. Cast Glass Processes. 3 Credit Hours.
The art of cast glass including sand casting and lost wax techniques.
Prerequisite: ART 263 or ART 104.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 364. Intermediate Glass Blowing. 3 Credit Hours.
Exploration of glass working techniques.
Prerequisite: ART 263.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 368. Figure in Clay II. 3 Credit Hours.
As continuation of ART 268, this intermediate course will focus on modeling The human figure in clay with emphasis on form, volume, proportion, anatomy, and gesture.
Prerequisite: ART 268.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 391. Graphic Design II. 3 Credit Hours.
Development of form and conceptual design. Contemporary visual rhetorical strategies such as metaphors, puns, irony and methonomy.
Prerequisite: ART 291.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 392. Multimedia III. 3 Credit Hours.
Video art, multimedia, installation art and interactive animation.
Prerequisite: ART 109.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 401. Advanced Painting I. 3 Credit Hours.
Development of a personal style in painting.
Prerequisite: ART 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 402. Advanced Painting II. 3 Credit Hours.
Continuation of ART 401.
Prerequisite: ART 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 405. Advanced Figure Drawing. 3 Credit Hours.
Continuation of ART 305.
Prerequisite: ART 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 407. Special Topics: Renaissance and Baroque Art. 3 Credit Hours.
Seminar on changing topics in Renaissance and Baroque Art.
Prerequisite: ARH 132. Requisite: Two additional art history courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 410. Advanced Digital Photography I. 3 Credit Hours.
Development of a personal style in digital imaging. Course is designed for students to pursue a semester long thematic project.
Prerequisite: ART 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 411. Experimental Photography. 3 Credit Hours.
Course content determined by faculty member teaching it from studio lighting class to the Artist Book Project. May be repeated for credit.
Prerequisite: ART 311.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 417. Advanced Sculpture I. 3 Credit Hours.
Individual and collaborative installation and site-specific art.
Prerequisite: ART 317.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 418. Advanced Sculpture II. 3 Credit Hours.
Development of a personal visual vocabulary.
Prerequisite: ART 417.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 451. Intaglio/Relief III. 3 Credit Hours.
Continuation of ART 351.
Prerequisite: ART 351.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 452. Lithography III. 3 Credit Hours.
Continuation of ART 352.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 453. Silkscreen III. 3 Credit Hours.
Continuation of ART 353.
Prerequisite: ART 353.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 454. Computer Assisted Printmaking: Intaglio and Relief. 3 Credit Hours.
Continuation of ART 354, photo etching and relief processes.
Prerequisite: ART 354.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 462. Advanced Ceramics. 3 Credit Hours.
Development of expressive skills in either handbuilding or wheel throwing techniques.
Prerequisite: ART 361 or ART 362.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 475. Advanced Silkscreen III. 3 Credit Hours.
Continuation of ART 375.
Prerequisite: ART 375.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 491. Graphic Design III. 3 Credit Hours.
Advanced page layout coupled with extensive use of typography with applications in page design for advertising and collateral projects.
Prerequisite: ART 391.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 493. Illustration. 3 Credit Hours.
Contemporary illustration for print, new media, portfolio and exhibition.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 499. Honors Thesis. 3-6 Credit Hours.
Formal thesis and project including an exhibition supervised by member of the department faculty.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 501. Advanced Painting III. 1-6 Credit Hours.
Course content decided between student and professor.
Prerequisite: ART 401 or ART 402.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 502. Advanced Painting IV. 1-6 Credit Hours.
Continuation of ART 501.
Prerequisite: ART 501.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 503. Advanced Painting V. 1-6 Credit Hours.
Course content decided between student and professor. An independent study course may be repeated.
Prerequisite: ART 502.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 504. Advanced Painting VI. 1-6 Credit Hours.
Course content decided between student and professor. An Independent Study course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 505. Advanced Painting VII. 1-6 Credit Hours.
Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 509. Independent Study in Other Media. 1-6 Credit Hours.
Course content decided between student and professor. Independent study course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 510. Advanced Digital Photography 2. 3 Credit Hours.
Course content decided between student and professor. May NOT be repeated for credit.
Prerequisite: ART 410.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 511. Advanced Digital Photography 3. 3 Credit Hours.
Continuation of ART 510. May NOT be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 512. Independent Study in Photography. 1-6 Credit Hours.
Course content decided between student and professor. An independent study course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 517. Advanced Sculpture III. 3 Credit Hours.
Examination of ongoing work in relationship to historical and contemporary interpretations issues.
Prerequisite: ART 418.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 518. Advanced Sculpture IV. 3 Credit Hours.
Continuation of ART 517.
Prerequisite: ART 517.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 551. Intaglio/Relief IV. 3 Credit Hours.
Advanced work in intaglio/relief processes: course requirements decided between student and professor.
Prerequisite: ART 451.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 552. Lithography IV. 3 Credit Hours.
Advanced work in lithography: course requirements decided between student and professor.
Prerequisite: ART 452.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 553. Silkscreen IV. 3 Credit Hours.
Advanced work in silkscreen.
Prerequisite: ART 453.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 554. Computer Assisted Printmaking. 3 Credit Hours.
Advanced work in computer assisted printmaking; course requirements decided between student and professor.
Prerequisite: ART 454.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 555. Topics in Printmaking. 1-6 Credit Hours.
Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 562. Contemporary Ceramic Art. 3 Credit Hours.
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.
Prerequisite: ART 462.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 563. Independent Study in Ceramics/Glass. 1-6 Credit Hours.
Course content decided between student and professor. An independent study course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 564. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.
Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 591. Portfolio/Business of Design. 3 Credit Hours.
Individually supervised graphic design portfolio. Professional practices in design.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 592. Special Projects/Multimedia/Portfolio. 3 Credit Hours.
Video Art, print design, illustration or multimedia portfolio preparation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 593. Seminar in Professional Practices. 1-6 Credit Hours.
Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 599. Exhibition Preparation. 3 Credit Hours.
A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 602. Advanced Painting Ix. 1-6 Credit Hours.
Continuation of ART 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 603. Problems in Studio Art. 1-6 Credit Hours.
Course content will be decided in conference between candidate and instructor. This course may be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 604. Seminar in Studio Art. 3 Credit Hours.
Special topics in selected area of studio art.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ART 609. Independent Study in Other Media. 1-6 Credit Hours.
Course content decided between student and professor. Independent study course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 630. Graduate Digital Photography I. 1-6 Credit Hours.
Advance Digital Photography Course: Content decided between student and professor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 631. Graduate Digital Photography II. 1-6 Credit Hours.
Advance Digital Course: Content decided between student and professor-
Lecture
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 632. Graduate Independent Study in Photography. 1-6 Credit Hours.
Independent Study in Photography: Content decided between student and professor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 633. Graduate Digital Photography III. 1-6 Credit Hours.
Content decided in conference between candidate and instructor. Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 634. Graduate Digital Photography IV. 1-6 Credit Hours.
Continuation of ART 610.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 641. Graduate Painting I. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 642. Graduate Painting II. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 643. Graduate Painting III. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 644. Graduate Painting IV. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 645. Graduate Painting V. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 646. Advanced Painting VIII. 1-6 Credit Hours.
Professional and concentrated experiences in media and subject matter decided in conference between candidate and instructor. 
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 651. Intaglio/Relief. 1-6 Credit Hours.
Advanced intaglio/relief processes: course requirements decided between candidate and professor.
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 653. Silkscreen. 1-6 Credit Hours.
Advanced work in silkscreen.
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 663. Portfolio/Business of Design. 3 Credit Hours.
Individually supervised graphic design portfolio. Professional practices in design.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 666. Multimedia. 3 Credit Hours.
Advanced graduate projects in multimedia.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 671. Graduate Sculpture I. 1-6 Credit Hours.
Examination of ongoing work in relationship to historical and contemporary interpretations issues.
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 672. Graduate Sculpture II. 1-6 Credit Hours.
Continuation of ART 517
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 674. Sculpture. 3 Credit Hours.
Continuation of ART 617.
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 681. Writing About Art. 3 Credit Hours.
Writing about art on a professional level.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 682. Contemporary Ceramic Art I. 1-6 Credit Hours.
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 683. Contemporary Ceramic Art II. 1-6 Credit Hours.
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 684. Contemporary Ceramics Art III. 1-6 Credit Hours.
Content to be decided in conference between candidate and instructor. 
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 685. Contemporary Ceramics Art IV. 1-6 Credit Hours.
Continuation of ART 661.
Requisite: Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 686. Contemporary Ceramic Art V. 1-6 Credit Hours.
Prerequisite: ART 685.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 687. Contemporary Ceramic Art VI. 1-6 Credit Hours.
Prerequisite: ART 686.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 688. Independent Study in Ceramics/Glass. 1-6 Credit Hours.
Theory, history and practice of Video Ari and contemporary documentary
film and their various manifestations. Creation of conceptual videos for
exhibition, web and interactive media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 689. Directed Research and Projects in Ceramics/Glass. 3 Credit
Hours.
Historical to contemporary approach to ceramics; furthering of the
technical ability, and development of artistic style.
Requisite: Graduate Status and Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 693. Seminar in Professional Practices. 1-6 Credit Hours.
Advanced course with a required placement in a professional design
or multimedia setting. Classroom sessions on professional topics and
issues. Portfolio required.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 699. Exhibition Preparation. 3 Credit Hours.
A seminar class devoted to the preparatory work needed to plan and
promote a solo exhibition, including installation/lighting concerns.
Preliminary written assignments will also be given in preparation for ART
710 Thesis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's
degree after the student has enrolled for the permissible cumulative total
in ART 710 (usually six credits). Credit not granted. May be regarded as
full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

Art History (ARH)

ARH 107. History of Photography. 3 Credit Hours.
A study of photography as a visual medium of expression and
communication: a chronological examination of its origins, styles and
uses.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARH 131. Survey of Western Art I. 3 Credit Hours.
The art of western cultures from pre-history through the Middle Ages.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARH 132. Survey of Western Art II. 3 Credit Hours.
The art of western cultures from the Renaissance through the 20th
century.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARH 220. Student Docent Practicum at the Lowe Art Museum. 1 Credit
Hour.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARH 225. Introduction to Museum Studies. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 250. Special Topics In Non-European Art. 3 Credit Hours.
Special Topics in Non-European Art
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 260. Islamic Art. 3 Credit Hours.
Islamic art from the 7th to the 17th century including architecture,
manuscript illumination, textiles, ceramics, and small-scale luxury
objects. Study of Islam as a religious and political entity showing how the
Islamic world defined itself in cultural creation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARH 270. Spanish Art. 3 Credit Hours.
A chronological study from prehistory to the present, addressing significant periods in Spanish art history, and establishing the unique characteristics of this art. How the effects of historical conditions (Islamic presence on the peninsula, American colonies, Franco) have defined Spain as distinct from its European neighbors.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 321. Andean Art. 3 Credit Hours.
South American art from formative times through the Incan empire and the Spanish conquest (A.D. 1521).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 325. Museum Studies Internship. 3 Credit Hours.
The Museum Studies internship is an independent study course in which the student works on educational projects or programs in a museum.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 326. The Art of South Asia. 3 Credit Hours.
The Arts of South Asia with selections from India and Thailand.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 332. Greek Art. 3 Credit Hours.
The art of ancient Greek civilization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 333. Roman Art. 3 Credit Hours.
Roman art from the 1st century B.C. through the 4th century A.D.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 335. Early Christian & Byzantine Art. 3 Credit Hours.
Christian art from the second through the fifteenth centuries in Rome and the Byzantine Empire.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 336. Medieval Art. 3 Credit Hours.
Western European art from the 4th through the 12th century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 337. Italian Renaissance Art. 3 Credit Hours.
The painting, sculpture, and architecture of Florence in the 15th century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 338. Sixteenth Century Italian Art. 3 Credit Hours.
The painting, sculpture, and architecture of Italy in the 16th century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 339. Northern Renaissance Art. 3 Credit Hours.
The painting of France and the Netherlands in the 14th and 15th centuries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 340. Baroque Art. 3 Credit Hours.
Art and architecture of the seventeenth century, focusing on major cultural centers in Europe and the Americas. Prerequisite: ARH 132. Requisite: Two additional art history courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 341. Eighteenth-Century European Art. 3 Credit Hours.
European art from 1700-1820, including Rococo and Neoclassicism, ending with Goya in Spain. Prerequisite: ARH 132. Requisite: Two additional art history courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 342. Nineteenth-Century European Art. 3 Credit Hours.
Neo-Classicism, Romanticism, Realism, Impressionism, 1760-1900.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 343. Modern Art. 3 Credit Hours.
Cezanne to Surrealism. Primarily European Art c. 1880-1940 in the context of the development of Modernism and its aesthetic theories.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 344. Contemporary Art. 3 Credit Hours.
American and European Art from the Second World War to the present in its social, political, and theoretical contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARH 346. History of Graphic Design. 3 Credit Hours.
Evolution of Graphic Design from the invention of writing through the twentieth century concentrating on contemporary themes and technical innovations. Prerequisite: ARH 131 or ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 347. Special Topics in Art History. 3 Credit Hours.
Prerequisite: ARH 131 or ARH 132.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARH 349. Special Topics in Art and the Law. 3 Credit Hours.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 357. Critical Issues in the History Photography. 3 Credit Hours.  
The history and theory of photography in visual culture and an exploration of debates regarding how this medium of mass communication has transformed our perceptions and conceptions of art, society, and culture over the past two centuries.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 360. Art and Cinema. 3 Credit Hours.  
Exploration of the relationship between art, art history, and cinema.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 365. Latin American Modernism. 3 Credit Hours.  
The art and theories of Latin American Modernism.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 385. Studies in Art History. 1-3 Credit Hours.  
Art History studies taken at other institutions with no direct equivalents.  
Components: LEC.  
Grading: GRD.

ARH 405. Special Topics in Medieval Art. 3 Credit Hours.  
Changing topics in Medieval Art.  
Prerequisite: ARH 131. Requisite: Two additional art history classes.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 408. Special Topics in Modern Art. 3 Credit Hours.  
Seminar on changing topics in Modern Art.  
Prerequisite: ARH 132. Requisite: Two additional art history courses.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 409. Special Topics in Contemporary Art. 3 Credit Hours.  
Seminar on changing topics in contemporary art.  
Prerequisite: ARH 132. Requisite: Two additional art history courses.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 411. Special Topics: Museum Studies. 3 Credit Hours.  
Seminar on changing topics in Museum studies.  
Prerequisite: ARH 225. Requisite: Two additional art history courses.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 506. Problems in Art History. 3 Credit Hours.  
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.  
Components: THI.  
Grading: GRD.  
Typically Offered: Fall & Spring.

ARH 507. Museum Studies Seminar. 3 Credit Hours.  
The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 508. Museum Exhibition. 3 Credit Hours.  
Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 509. Museum Internship. 1-3 Credit Hours.  
UM sponsored internship with Miami-area museum.  
Components: THI.  
Grading: GRD.  
Typically Offered: Fall & Spring.

ARH 510. Arts Administration Internship. 1-3 Credit Hours.  
UM sponsored internship with Miami-area arts institution.  
Components: THI.  
Grading: GRD.  
Typically Offered: Fall & Spring.

ARH 511. Artlab @ The Lowe. 3 Credit Hours.  
Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.  
Prerequisites: ARH 131, ARH 132. Requisite: Two additional art courses and Permission of Instructor.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

ARH 530. Seminar in Art History. 3 Credit Hours.  
Special topics in western and nonwestern art. Semester's topic will be announced.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

ARH 540. Seminar in The History of Museums and Collecting. 3 Credit Hours.  
The history of museums and collecting practices in Western Europe and the United States from the sixteenth to the twentieth century.  
Components: SEM.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.
ARH 550. Seminar in Theory and Methodology in the History of Art. 3 Credit Hours.
Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 560. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.
Special topics including museum practices and theory, women’s art and contemporary issues.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 570. Seminar in Non-European Art. 3 Credit Hours.
Special Topics in Non-European Art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 598. Seminar in Contemporary American Art. 3 Credit Hours.
Issues in Art since 1960. Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ARH 605. Problems in Art History. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 606. Problems in Art History. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 607. Museum Studies Seminar. 3 Credit Hours.
The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 608. Museum Exhibition. 3 Credit Hours.
Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 609. Museum Internship. 3 Credit Hours.
UM sponsored internship with Miami-area museum.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 610. Arts Administration Internship. 1-3 Credit Hours.
UM sponsored internship with Miami-area arts institution.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 611. Artlab @ The Lowe. 3 Credit Hours.
Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARH 630. Seminar in Art History. 3 Credit Hours.
Special topics in western and non-western art. Semester’s topic will be announced.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 640. Seminar in The History of Museums and Collecting. 3 Credit Hours.
History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 650. Seminar in Theory and Methodology in the History of Art. 3 Credit Hours.
Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 660. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.
Special topics including museum practices and theory, women’s art and contemporary issues.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 670. Seminar in Non-European Art. 3 Credit Hours.
Issues in Art since 1960. Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ARH 698. Seminar in Contemporary Art. 3 Credit Hours.
Issues in Art since 1960. Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.
ARH 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in ARH 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

Atmospheric Science (ATM)

ATM 102. Introduction To Weather And Climate. 3 Credit Hours.
The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 103. Survey of Modern Meteorology. 3 Credit Hours.
Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to majors or minors with permission of instructor.
Prerequisites: MTH 108 or MTH 113 or MTH 140 or MTH 161 or MTH 171 or MTH 162 or MTH 172.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 118. Current Weather Topics. 2 Credit Hours.
Weather-and Climate-related phenomena such as hurricanes, severe storms, global warming, and acid rain. (Notes and analysis materials provided)
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 220. Climate And Global Change. 3 Credit Hours.
The Earth’s climate system and the role of natural and anthropogenic processes in shaping climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ATM 243. Weather Forecasting. 3 Credit Hours.
Application of physical principals to weather forecasting. Use interpretation of computer-generated forecast guidance products of the U.S. Weather Service.
Prerequisite: ATM 103 or MSC 103 and MTH 108 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 265. Atmospheric Chemistry. 3 Credit Hours.
ATM 265 is focused on those aspects of environmental chemistry of most relevance to meteorology students. The class fulfills the American Meteorological Society (AMS) chemistry expectations for a Bachelor’s Degree in Meteorology, and in addition, addresses further recommendations from the AMS. AMS expects knowledge of atomic structure and chemical bonding, and, of the properties of gases. Recommended “beyond the basics” goals include air quality and environmental science applications. ATM 265 fulfills the chemistry requirement for the undergraduate meteorology program. Students interested in pursuing upper-level chemistry courses, including MSC 215 (Chemical Oceanography), and pre-med majors, are recommended to take CHM 111 to meet requirements for the Meteorology B.S. Degree.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 303. Meteorological Instrumentation and Observation. 3 Credit Hours.
Techniques for measuring meteorological variables at the ground and in the free atmosphere.
Prerequisite: ATM 103, and PHY 101 or PHY 205.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 305. Atmospheric Thermodynamics. 3 Credit Hours.
Equation of state; water vapor and moist air thermodynamics; phase changes and latent heat; buoyancy and atmospheric convection; thermodynamic diagrams. Prerequisites: PHY 205
Prerequisite: PHY 205.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 306. Advanced Principles In Broadcasting Meteorology. 3 Credit Hours.
Broadcast meteorology including the production of professional weather briefings and weather news for on camera delivery. Emphasis on accurately communicating complex meteorological concepts, use of computer graphics, and on-camera delivery.
Prerequisite: ATM 103. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 307. Introduction To The Physics Of Climate. 3 Credit Hours.
The Physical mechanisms which govern the earth’s climate and climate variability.
Prerequisite: ATM 305 or MSC 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 321. Scientific Programming In The Atmospheric Sciences. 3 Credit Hours.
An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.
Prerequisites: CSC 120.
Prerequisite: CSC 120.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 371. Readings In Atmospheric Science. 1-2 Credit Hours.
Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

ATM 405. Atmospheric Dynamics I. 3 Credit Hours.
Derivation and scaling of the equations of atmospheric motion; hydrostatic and geostrophic balance; circulation and vorticity.
Prerequisite: MSC 305 Or ATM 305 and MTH 310 Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 406. Atmospheric Dynamics II. 3 Credit Hours.
Baroclinic and barotropic instability; boundary layer dynamics; mathematical principles of numerical weather prediction; maintenance of the general circulation.
Prerequisite: MSC 405 or ATM 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 407. Weather Analysis. 4 Credit Hours.
Three-dimensional analysis of synoptic-scale weather systems; application of the fundamental laws of atmospheric dynamics to observed weather patterns; practical questions of worldwide data exchange and display.
Prerequisite: ATM 305 or MSC 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 409. Cloud Physics, Radiation, and Remote Sensing. 3 Credit Hours.
Atmospheric radiation; absorption and scattering principles of remote sensing of the atmosphere; cloud microphysics; nucleation, coalescence, ice crystal growth, atmospheric electricity and lightning.
Prerequisite: MSC 305.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 411. Projects In Atmospheric Science. 1-3 Credit Hours.
Individual, independent research projects with faculty supervision. A formal written report is required that satisfies signed contract with faculty supervisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 511. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 532. Broadcast Meteorology. 3 Credit Hours.
Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on communication skills, computer graphics, and on-camera delivery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 533. Atmospheric Boundary Layer. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 551. Introduction to Atmospheric Science. 3 Credit Hours.
Thermodynamics of dry and moist processes; elementary dynamical meteorology; description of weather systems and phenomena on all scales; structure and mechanics of the general circulation. Corequisite: MPO 552.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 553. Climate Change. 3 Credit Hours.
Overview of the physical processes which regulate the earth’s climate and response to forcing.
1 year of Calculus 1 year Physics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 560. Tropospheric Chemistry I. 3 Credit Hours.
Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 561. Tropical Atmosphere and Ocean. 3 Credit Hours.
Observed structure of large-scale tropical circulations, including the Trades, the intertropical Convergence Zone, the Walker circulation, and equatorial wave disturbances. An overview of tropical climate, including El Nino/Southern Oscillation, and tropical monsoons is included as well as the formation, structure, and dynamics of tropical cyclone interactions between tropical convection and large-scale circulations, equatorial waves, and flow instabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 562. Advance Weather Forecasting. 3 Credit Hours.
Prerequisite: ATM 243, ATM 305, and ATM 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ATM 563. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.
Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 581. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 582. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 583. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 584. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 585. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 611. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 616. Numerical Weather Prediction. 3 Credit Hours.
Review of fundamental equations and principal wave solutions. Course topics include finite differences, the filtering problem, the equivalent-barotropic model, multi-level primitive equation models, model initialization and verification, and models currently used by the weather service.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 624. Applied Data Analysis. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 631. Physical Meteorology. 3 Credit Hours.
Electromagnetic and acoustic wave propagation, absorption, and emission. Application to remote sensing, basic physics of dry aerosols, clouds and precipitation, fundamentals of atmospheric electricity, charge separation processes, and electrical field effects are also discussed. Other topics include air pollution physics, dispersal, and removal of particulate and gaseous materials from natural and anthropogenic sources.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 633. Atmospheric Boundary Layer. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 646. Presentation Bootcamp. 1 Credit Hour.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 651. Introduction to Atmospheric Science. 3 Credit Hours.
Thermodynamics of dry and moist processes; elementary dynamical meteorology; description of weather systems and phenomena on all scales; structure and mechanics of the general circulation. Corequisite: MPO 552.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 653. Climate Change. 3 Credit Hours.
Overview of the physical processes which regulate the earth's climate and response to forcing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 660. Tropospheric Chemistry I. 3 Credit Hours.
Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 661. Tropical Atmosphere and Ocean. 3 Credit Hours.
Observed structure of large-scale tropical circulations, including the Trades, the Intertropical Convergence Zone, the Walker circulation, and equatorial wave disturbances. An overview of tropical climate, including El Nino/Southern Oscillation, and tropical monsoons is included as well as the formation, structure, and dynamics of tropical cyclone interactions between tropical convection and large-scale circulations, equatorial waves, and flow instabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 662. Advance Weather Forecasting. 3 Credit Hours.
Students will learn the skills needed in researching and preparing a
professional weather forecast. There are a plethora of forecast resources
available online. Students will learn about using these forecast resources
and share resources of their own. Specifically we will cover topics such
as the basics of atmospheric meteorology, large and small scale weather
forecasting, operational weather forecasting, tropical weather, severe
weather, nor'easters, lake effect snow, oscillations and various
other weather phenomena. During the course of the semester a couple of
Guest speakers in various parts of the field will visit to discuss relevant
topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 663. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.
Course topics include the structure and dynamics of clouds,
thunderstorms, and mesoscale convective systems, radar and satellite
observations of clouds and precipitation, severe storm forecasting,
mesoscale disturbances, frontal and orographic clouds, and precipitation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 681. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related
to Meteorology and Physical Oceanography
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 682. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 683. Special Topics. 1-4 Credit Hours.
Lectures, special projects or directed readings in special topics related to
Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 684. Special Topics. 1-4 Credit Hours.
Lectures, special projects or directed readings in special topics related to
Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 685. Special Topics. 1-4 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 711. Geophysical Fluid Dynamics II. 3 Credit Hours.
The focus of this course is on the effects of stratification, on time
variable phenomena, and on the interaction between large-scale
circulation and mesoscale eddies. Course topics include quasi-
geostrophic scale analysis, Rossby waves, barotropic and baroclinic
instability, wave-mean flow interaction and non-geostrophic waves.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 712. Large Scale Ocean Circulation: Models and Observations. 3
Credit Hours.
Course topics include theoretical models of the oceanic current systems,
wind-driven and thermohaline circulation, effects of bottom topography,
and lateral bounding.
Components: LEC.
Grading: GRD.

ATM 724. Statistical Modeling of Geophysical Fields. 3 Credit Hours.
An advanced course in statistical modeling, analysis, and assimilation of
dynamics. Emphasis is placed on practical applications of
ground software, and new nonstandard techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 731. Air-Sea Interaction. 3 Credit Hours.
Components: LEC.
Grading: GRD.

ATM 732. Climate Dynamics. 3 Credit Hours.
Basic understanding of the Earth's Climate System and its variability
on time scales ranging from weeks to millennia. Topics include internal
atmospheric variability, coupled ocean-atmosphere interactions, and the
theory, observations and modeling of climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 734. Cloud Physics And Radiative Transfer. 3 Credit Hours.
This class provides a modern update to what has traditionally been
labeled as "Physical Meteorology": the fundamental physical processes
that can occur in one day or less, and within one km or less. Such small-
scale processes include aerosol, cloud and precipitation physics, and the
radiative transfer through the atmosphere. We add to this a consideration
of the interactions of aerosols and clouds with the larger meteorological
field, as only through understanding the covariations between the aerosol
and cloud physics and the larger-scale dynamical/thermodynamical
fields can each influence be identified. Current issues pertinent to climate
and to weather will be explored, and modeling approaches treated. The
radiative transfer unit will develop a deeper appreciation of the concepts
and mathematical tools, with exposure to radiative transfer codes. The
course is split into 2 halves: the first half covers cloud physics, the 2nd
half covers atmospheric radiation. Spring break provides a neat division
of the two halves. The course assumes knowledge at the Wallace and
Hobbs level. The course work will include computer programming and
some computer literacy is assumed.
Prerequisite: MPO 551.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 750. Reaction Kinetics and Molecular Dynamics. 3 Credit Hours.
Theories and experimental techniques for studying kinetics in the
gas-phase, association, unimolecular and bimolecular reactions,
chain reactions, flames, statistical theories, potential energy surfaces,
collision dynamics, kinetics in solution and the solid-state, experimental
methods, diffusion-controlled processes, transition state theory, thermal
decomposition, and nucleation are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 752. Vortex Dynamics. 3 Credit Hours.
This course will cover fundamental to advanced topics in vortex dynamics. A review of fluid dynamics and vorticity in two dimensions will be followed by studies of vortex dynamics in three-dimensional, incompressible flow and in three-dimensional, stratified flow.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 761. Tropospheric Chemistry II. 3 Credit Hours.
Chemical and physical properties of tropospheric aerosols. Topics include properties of aerosols, dynamics of single aerosol particles, thermodynamics of aerosols, nucleation theory, aerosol growth, heterogeneous processes, dynamics of aerosol populations, and radiative properties of atmospheric aerosols.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 762. Computer Models in Fluid Dynamics. 3 Credit Hours.
Course topics include numerical techniques of dealing with dynamic problems in meteorology and oceanography. Dynamic prediction models, initial data conditioning, computational stability, and error estimates are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 764. Atmospheric and Oceanic Turbulence. 3 Credit Hours.
Structure and dynamics of planetary boundary layers, turbulent transport processes, Fickian and statistical theories of turbulence, influence of stratification, and rotation on turbulent motion are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 765. General Circulation of the Atmosphere. 3 Credit Hours.
Course topics include structure and behavior of planetary scale motions, energy, momentum, and moisture budgets of the general circulation, and models of the general circulation and climatic change.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 767. Spectral And Finite Element Methods In Computational Fluid Dynamics. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 768. Enso Dynamics, Prediction And Predictability. 3 Credit Hours.
This course will provide students with a comprehensive observational and mechanistic understanding of the El Nino and the Southern Oscillation (ENSO) phenomena and how ENSO impacts the natural variability of the global climate system. Topics will include: Observations and theories of the seasonal and interannual changes in the ocean circulation and temperature, and interactions with the atmosphere; equations of motion and theories of tropical ocean and atmosphere circulation; tropical wave dynamics; large scale air-sea coupling; mechanisms for ENSO: delayed oscillator theory, recharge oscillator theory, slow SST modes; ENSO prediction and predictability; ENSO-monsoon-Indian Ocean interactions; Global climate response to ENSO; decadal ENSO variability; ENSO in a changing climate. This course has a phenomenological focus, which complements current MPO course offerings. In particular, students who have taken dynamic and physical meteorology, ocean general circulation or geophysical fluid dynamics will be exposed to how general theory (e.g., wave dynamics) relates to particular phenomena and current research foci. In addition, student will have the opportunity to design and implement numerical hypothesis testing experiments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 774. Advanced Studies. 1-4 Credit Hours.
Supervised study of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 805. MPS Internship. 1-6 Credit Hours.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 810. Master Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 830. Doctoral Dissertation. 1-12 Credit Hours.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Biochemistry and Molecular Biology (BMB)

BMB 110. Scientific Basis of Forensic Analysis. 3 Credit Hours.
Basic science topics including mathematics, physics, chemistry, and biology are introduced and related to understanding specific topics in forensic analysis such as fingerprint and blood type analyses. Heavy emphasis is given to hands on, in class projects in which students learn to analyze and interpret experimental observations and outcomes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BMB 145. Introduction To BMB Research. 2 Credit Hours.
Students will collaborate on a research project and learn valuable laboratory skills. The goal for this course is to make students "research-ready" through an active, inquiry-based, platform for developing core competencies in biology, genetics, BMB (biochemistry & molecular biology), bioinformatics, scientific discourse and ethics.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 151. Freshman Seminar. 1 Credit Hour.
Students acquire and discuss basic BMB information in a group project setting. Topics are identified by the instructor but refined in response to student interest and discovery. As students create a scientific review manuscript suitable for publication, they learn about the publication process, research ethics and politics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 245. Foundations in BMB Research. 2 Credit Hours.
Students shadow a research assistant in the lab of a BMB faculty member and learn about the research projects and techniques used by the group. Students will assist in preparing reagents, conducting experiments, analyzing data and generating brief reports. Attendance in lab group meetings is expected. Students maintain a weekly online journal and will write a paper describing the research in the lab and proposing a research problem and approach to solve in BMB545.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 251. Sophomore Seminar. 1 Credit Hour.
Students acquire and discuss basic BMB information in a group project setting. Topics are identified by the instructor but refined in response to student interest and discovery. As students create a scientific review manuscript suitable for publication, they learn about the publication process, research ethics and politics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring.

BMB 260. Introduction to Biochemistry and Nutrition. 3 Credit Hours.
The composition of food and the composition and functioning of a typical cell are described in chemical terms, leading to an understanding of how life processes such as digestion, and metabolism occur and are regulated at the level of individual molecule and reactions. Applications of biochemistry and nutrition are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 400. Principals Of Experimental Biochemistry And Molecular Biology. 2 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 401. Biochemistry For The Biomedical Sciences. 3 Credit Hours.
The biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids are rigorously described, emphasizing problem solving strategies required of biomedical field applications.
Prerequisite: CHM 201 or CHM 222.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 402. Principles of Experimental BMB. 2 Credit Hours.
An active, inquiry-based, platform for developing core competencies in biochemistry & molecular biology, making students "research ready". Corequisite or Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 411. Readings in BMB. 1 Credit Hour.
Students read and discuss one BMB primary research article each week and answer a set of questions meant to provoke critical evaluation of the work. The course introduces students to critical reading of the primary literature in BMB and is open to students at any level. Peer-mentoring and informal student-led instruction is central to the course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 417. Nutritional Biochemistry. 3 Credit Hours.
This course will provide thorough understanding of the role of different nutrients, their occurrence in food, uptake in the digestive system, transport in blood or lymph, uptake in cells, storage, function and metabolism and excretion. Biosynthesis of nutrients in plants and microorganisms will also be considered. The students will be taught how to gather information about the course topics.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 501. Senior Seminars. 1 Credit Hour.
Students attend seminars of their own choice; presented by either visiting/residing faculty or graduate/postdoctoral students on recent research topics in BMB or any other discipline in the basic biomedical sciences. Students write short reports on these seminars and critically evaluate the presentations. This course can be taken more than once. Prerequisite: BMB 401.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 506. Biomedical Case Studies. 1 Credit Hour.
Students explore topics in BMB in the context of solving problems presented in a clinical/biomedical framework. Students work in small groups and independently to acquire, critically evaluate, synthesize and present information.
Corequisite or Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
Typically Offered:

Grading:

Components:

BMB 507. Protein Structure, Function, & Biology. 3 Credit Hours.
The physical characteristics and behavior of proteins are described, including structure, folding, dynamics, modifications, and interactions. In addition, experimental approaches to protein structure and function are addressed. Readings include both textbook assignments and current research articles, and a term paper is written and submitted for writing credit.
Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 509. Molecular Biology of the Gene. 3 Credit Hours.
Biochemical processes involved in the flow of genetic information in both prokaryotes and eukaryotes are described, including DNA replication, repair, genetic recombination, RNA transcription and processing, protein synthesis, control of gene expression, cell differentiation, and recombinant DNA technology. Extensive classroom discussion is mandatory. Reading includes BMB primary research papers, course notes and a textbook.
Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 511. Topics in BMB. 2-3 Credit Hours.
Students independently explore the literature in BMB with guidance by a BMB Faculty mentor. BMB primary research literature in an area of mutual interest to the student and the Faculty mentor (usually a content expert in that area) is discussed. Students prepare a paper or other appropriate product (e.g. computer software, a structural model, a dynamic simulation) for evaluation. Writing credit is available for papers.
Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 519. Nutrition and Genetics. 3 Credit Hours.
The influence of nutrition on gene expression through modification of DNA and proteins in chromatin is described (i.e., epigenetics). Also, genetic variations, as well as the influence of bacterial flora of the digestive tract, are considered with respect to abilities to metabolize various dietary components. Students learn how to gather information about course topics and present their findings
Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 545. Research Problems in BMB. 3-12 Credit Hours.
Students actively participate in the research laboratory of a faculty mentor to work on an independent research project. Students develop abilities to formulate good questions and sound hypotheses, design practical experiments, collect and analyze useful data, and make justifiable conclusions. Students maintain a weekly online journal, write a paper, and present their research in the lab. Two semesters of BMB 545 is required to write a thesis (pre-requisite for graduating with honors in BMB). Writing credit is available for papers.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 617. Readings in Molecular Biology. 1 Credit Hour.
Discussion of classical papers in molecular biology beginning with the concept of the gene and continuing into modern studies. Format consists of student presentations and group discussions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 645. Research Problems in Biochemistry, Cell and Molecular Biology. 2-3 Credit Hours.
Laboratory research problems in various areas of biochemistry, cell biology, and molecular biology, including literature search, experimental design, data gathering, and evaluation of results. This course is the mechanism by which graduate laboratory rotations are done in preparation for selection of Ph.D. mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 680. Research Ethics. 0 Credit Hours.
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 701. Research Journal Club. 1 Credit Hour.
All registered BMB students must participate in the Journal Club/Seminar. Students are required to critically review published paper(s) of their choice and describe in detail the findings described therein. Senior students will present their own research.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 702. Biochemical Science Seminar. 1 Credit Hour.
The Biochemistry and Molecular Biology (BMB) department has an active seminar program that meets on every Friday at noon. In this program seminars are presented by the BMB faculty (primary and secondary), invited speakers within the University of Miami and from other universities, government agencies, and industry. All BMB Graduate Students enrolled in this course will be required to attend this seminar and will have informal interactions with speaker, and exchange ideas at lunch on the seminar day.
Components: LEC.
Grading: GRD.
Typically Offered: By Announcement Only.

BMB 705. Principles of Biochemistry and Molecular Biology. 1-6 Credit Hours.
The biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids are rigorously described, emphasizing problem solving strategies required of biomedical field applications.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.
BMB 709. Advanced Biochemistry and Molecular Biology. 3 Credit Hours.
This course is a continuation course for BMB 616. It covers essentially the same topics as BMB 616 but at a more advanced level. It brings the student to the forefront of research in Molecular Biology. The course material is discussed exclusively in the form of original research papers. Based on this experience, students are required to propose experimental approaches to biological problems and defend them.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 710. Advanced Topics in Biochemistry & Molecular Biology. 1-5 Credit Hours.
This course is offered by various faculty members in the department on a rotating basis depending upon their expertise. For example, an advanced topic course in Nanomedicine offered by Dr. Deo and Dr. Dhar covers these topics through lectures.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

BMB 714. Molecular Genetics. 2 Credit Hours.
This course deals with mechanisms and fundamental concepts of genetic inheritance. The first part of the course is devoted to the genetics of bacteria and bacteriophages. Topics include genetic implementation, recombination, suppression, transposition, conjugation, transformation, transaction, and regulation of prokaryotic gene expression. The second part of the course covers selected topics in eukaryotic genetics (including molecular genetics of yeast, mitochondria, Drosophila, mice and humans). Problem solving is emphasized in homework and exams. The objective of the course is to provide students with an appreciation of the value of molecular genetics as a tool they can use to solve a wide variety of problems in bio-medical research.
Components: DIL.
Grading: GRD.
Typically Offered: Summer.

BMB 715. Structural Biology and Applications to Drug Discovery. 2 Credit Hours.
This course focuses on the relationships between structure and function in biological macromolecules, and how this knowledge has led to the discoveries of new drugs.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 716. Bioinformatics of Gene Regulation and Protein Function. 3 Credit Hours.
Among the skills required to become a successful interdisciplinary life scientist is the ability to navigate biological databases to better understand gene and protein function. Genome sequences contain the signals that guide differential gene expression and encode structural RNAs, regulatory RNAs and proteins. This course will introduce the tools, databases and evolutionary considerations that help us understand the regulation of gene expression and predict protein function. The bioinformatic and regulatory functions encoded in genomic DNA sequences will be explored using bioinformatics techniques including gene finding, BLAST searches, PubMed searches, high-throughput dataset mining, multiple alignments, phylogenetic analysis, identification of conserved functional domains and motifs, assessment of protein-protein and protein-ligand interactions, gene context and co-occurrence analysis. secondary and tertiary structural analysis, metabolic and cellular modeling, and phenotypic analysis. The databases, tools and tutorials available at websites developed by the National Center for Biotechnology Information, EMBL-EBI, the Protein Data Bank, and others will be used as supporting course materials. Each week will have a set of online videos and instructions to complete before the weekly live lecture. The live lecture consist of a one hour slide presentation and one half-hour of Q&A discussions. Competency in bioinformatics will be assessed by a midterm and a final exam.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

BMB 719. Fundamentals of Epigenetics. 3 Credit Hours.
The influence of nutrition on gene expression through modification of DNA and proteins in chromatin is described (i.e., epigenetics). Also, genetic variations, as well as the influence of bacterial flora of the digestive tract, are considered with respect to abilities to metabolize various dietary components. Students learn how to gather information about course topics and present their findings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 720. Research in Residence. 0 Credit Hours.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in BMB 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 731. Special Work. 1-3 Credit Hours.
Special work, lecture, or laboratory or a combination of these, as determined by advisor in accord with student’s individual interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for this credit. In most departments not to exceed six credits, as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.
BMB 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BMB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BMB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.
Required for all PhD candidates. The student will enroll for credits as determined by the Office of Graduate and Postdoctoral Studies.
Components: DIL.
Grading: SUS.
Typically Offered: Fall & Summer.

BMB 850. Research In Residence. 0 Credit Hours.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: DIL.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Biology (BIL)

BIL 101. Introductory Biological Science. 3 Credit Hours.
An introduction to life sciences for the non-major. Students with credit in BIL 150 may NOT take this course to fulfill the natural science requirement. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 102. Elementary Biotechnology. 3 Credit Hours.
Major aspects of the biotechnology field for the non-science major. Food biotechnology, enzymes, environmental biotechnology, transgenic animals and plants, analytical biotechnology and more. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 103. Introduction to Ecology. 3 Credit Hours.
Overview of ecological and evolutionary principles; Relationships of organisms to living and non-living aspects of their environment; human impact on ecosystems. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 104. Genetics and Society. 3 Credit Hours.
The impact of new knowledge in genetics and heredity on society, including a consideration of questions about the inheritance of I.Q. and behavior, racial differences, genetic screening, control of reproduction, genetic engineering, forensic applications. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 105. Biology of Plants. 3 Credit Hours.
Evolution and diversity of the plant kingdom; economic and cultural importance of plants to humans. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 106. Biology of Animals. 3 Credit Hours.
Evolution and diversity of the animal kingdom and the relationship between humans and other animals. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 107. Introduction to Evolution. 3 Credit Hours.
Processes and mechanisms of evolution. A scientific approach to the study of evolution by natural selection, concepts of fitness and adaptation, genetic and developmental bases of evolutionary change, how new species arise, major trends in evolution, extinction and human evolution. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 108. Molecular Journey To Being Human. 3 Credit Hours.
With a focus on the human species, students will explore the nature of DNA and proteins, the origin of life, RNA World hypothesis, the origins of human ancestors and modern humans, the recently-completed Human Genome Project, the genetic basis human diversity, and the ethics of using genetic knowledge to improve the quality of human life.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 109. Human Biology. 3 Credit Hours.
A survey of human anatomy and physiology and the relationship of our species to its environment and other species. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 110. Human Hereditary Disease. 3 Credit Hours.
an overview of genetics, emphasizing human traits and disorders and their effects on individuals, families, and society. Discover the beauty of human nature, and our knowledge of it, as you develop an understanding of human genetics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 111. General Biology Honors Seminar. 1 Credit Hour.
Special topics in biology correlated with BIL 150.
Corequisite: BIL 150.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

BIL 112. General Biology Honors Seminar. 1 Credit Hour.
Special topics in biology correlated with BIL 160.
Components: DIS.
Grading: GRD.
Typically Offered: Spring.
BIL 149. First Year Information. 1.00 Credit Hour.
First year seminar for incoming Biology majors. Facilitation and encouragement of development of critical thinking skills, proficiency in oral and written expression, and an ability to solve problems by integrating knowledge from different disciplines in Biology.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

BIL 150. General Biology. 4 Credit Hours.
Principles of biology at the cellular, genetic, and organismal levels of organization. Cell structure and function, energy transduction, biological information transfer, genetics, physiology. Prerequisite: ENG 105 or ENG 106 and MTH 107 or Higher. Or Corequisite: ENG 105 or ENG 106 and MTH 107 or Higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Summer.

BIL 152. HHMI General Biology Laboratory. 1 Credit Hour.
Laboratory exercises to accompany BIL 150. Students teams engage in two inquiry-based laboratory research projects, each lasting six weeks, per semester.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BIL 153. Introductory Biology/Chemistry Laboratory I. 1 Credit Hour.
Integrated biology and chemistry laboratory exercises for first year students.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BIL 156. Evolution and Biodiversity. 4 Credit Hours.
Mechanisms of evolution from an organismal perspective. Systematics, biodiversity, evolutionary theory and mechanisms with emphasis on the morphological, ecological, and behavioral adaptations of selected representatives of the Domains of living organisms. Prerequisite: ENG 105 or ENG 106 and MTH 107 or Higher. Or Corequisite: ENG 105 or ENG 106 and MTH 107 or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 161. Evolution and Biodiversity Laboratory. 1 Credit Hour.
A laboratory approach to applying the scientific method. Experimental design and hypothesis testing at the organismal and ecological level. Corequisite: BIL 160.
Components: LAB.
Grading: GRD.
Typically Offered: Spring & Summer.

BIL 162. HHMI Evolution And Biodiversity Laboratory. 1 Credit Hour.
Laboratory exercises to accompany BIL 160. Student teams engage in two inquiry-based laboratory research projects, each lasting six weeks, per semester.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BIL 163. Introductory Biology/Chemistry Laboratory II. 1 Credit Hour.
Integrated biology and chemistry laboratory exercises for first year students. Co-requisites: BIL 160, CHM 112 or CHM 221.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BIL 175. First Year Seminar in Biology. 1 Credit Hour.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 178. Community Science: Autism. 3 Credit Hours.
Student citizens in both science and communication will collaboratively develop content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder, as well as the neuroscience and genetic basis of autism spectrum disorders. Students will connect with people in the local community, to lend these issues a face and context. Information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 190. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

BIL 194. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

BIL 195. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

BIL 212. Human Genetics. 3 Credit Hours.
A review of genetics, emphasizing human traits and disorders and their effects on individuals, families, and society. After briefly reviewing cellular and reproductive biology, we will explore genetics more deeply while examining the implications of genetic processes and heredity patterns for human health. We will then examine the genetic basis of human evolution, finishing the semester with a discussion of genetic technologies and their implications for human welfare.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 220. Evolution and Disease. 3 Credit Hours.
Evolutionary insights on the origins and emergence of diseases, drug resistance, and how diseases have shaped human evolution.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 222. Plant Identification in an Evolutionary Context. 3 Credit Hours.
Plant Identification in an Evolutionary Context An exploration of the plants in the on-campus Gifford Arboretum as well as other plants that students interact with in their daily environment (foods, beauty products, fibers, medicines, poisons, etc.)
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 223. Plants and People. 3 Credit Hours.
A multi-disciplinary survey of ethnobotany and economic botany, emphasizing the ecosystem services that plants provide to humans.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 226. General Botany. 3 Credit Hours.
Survey of the plant kingdom, including evolution, plant diversity, reproduction, structure, function and ecology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 228. Medical Botany. 3 Credit Hours.
History of medical botany, approaches to health by different cultures, separation and identification of secondary compounds and mechanisms of action. Molecular and physiological action of different secondary compounds in the treatment of common western ailments. In vivo identification of local medicinal plants.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 230. Introduction to Marine Biology. 3 Credit Hours.
The sea as an environment. Marine life, its special problems and adaptations. Emphasis on Caribbean organisms. Lecture, 3 hours.
Identical to Marine Science 230.
Corequisite: BIL 231.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 231. Introduction to Marine Biology Laboratory. 1 Credit Hour.
Experimental laboratory exploring ecology, physiology and behavior of marine organisms in southern Florida marine habitats. Exercises cover laboratory techniques in behavior, functional morphology, productivity, fisheries research, osmoregulation and community ecology.
Corequisite: BIL 230.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BIL 244. Hormones And Behavior. 3 Credit Hours.
A comparative approach to the relationship between hormonal mechanisms and behavior in both animal model systems and humans. An introduction to the endocrine system, sex differences in behavior, parental behavior, hormones and social behavior, learning and memory, stress and affective disorders, interactions between brain, hormones and behavior from a historical perspective viewing the emergence of key theories.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 250. Genetics. 3 Credit Hours.
The nature, organization, replication, expression, and evolution of the genetic materials.
Prerequisites: BIL 150, BIL 151, BIL 160, BIL 161.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 251. Genetics Laboratory. 2 Credit Hours.
Prerequisite: BIL 250. Or Corequisite: BIL 250.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 252. HON: Honors Laboratory in Genetics. 2 Credit Hours.
Laboratory exercises in genetics.
Prerequisite: BIL 250. Or Corequisite: BIL 250.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BIL 255. Cellular and Molecular Biology. 3 Credit Hours.
Structure, molecules, and functions of cells.
Prerequisites: BIL 150, BIL 151, BIL 160, BIL 161.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 256. Cellular and Molecular Biology Laboratory. 2 Credit Hours.
Laboratory exercises in cellular and organismal biology involving current research techniques and applications.
Prerequisite: BIL 255 Or BIL 259.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BIL 258. Core Laboratory Techniques. 2 Credit Hours.
Conceptual and applied "methods" course in modern analytical techniques. It will expose students to the Department of Biology's three best-developed core laboratory facilities for imaging, molecular biology, and element analysis.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 259. Life In The Cell. 3 Credit Hours.
A comprehensive overview of the molecular biology of the cell, cells, and genomes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 267. Community Science. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 268. Neurobiology. 3 Credit Hours.
Neurons, organization of the nervous system, electrical properties of neurons, neurotransmitters, receptors, synaptic transmission, sensory and motor system, and complex brain functions.
Prerequisites: BIL 150, BIL 151, BIL 160, BIL 161.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 280. Writing in Biology. 0 Credit Hours.
Writing instruction by faculty using biological topics in BIL courses offered at the 200 level.
Components: IND.
Grading: SUS.
Typically Offered: Fall & Spring.

BIL 281. Undergraduate Learning Intern in Biology. 1 Credit Hour.
Undergraduate Learning Intern in Biology Students serve as peer mentors in a laboratory setting, assisting a graduate laboratory instructor in teaching basic biological concepts to first year undergraduates in BIL 151 and BIL 161.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 284. Special Laboratory Topics in Biology. 1-4 Credit Hours.
Topics relevant to the biological sciences, listed as subtitle. May be combined/co-listed with other departments or programs.
Prerequisite: BIL 150 And BIL 151 And BIL 160 Or permission of instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 285. Special Topics in Biology. 3 Credit Hours.
Topics relevant to the biological sciences, co-listed with other departments or programs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 299. Seminar in Research Problems. 2 Credit Hours.
Discussion of current research of the Biology Faculty.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 311. Biostatistics. 3 Credit Hours.
Descriptive and inferential univariate and bivariate statistics applied to biological data. Probability, probability distributions, data description and presentation, hypothesis testing, decision making and experimental design.(Not open to students with credit in MTH 224, PSY 204 or equivalent).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 312. Biostatistics Laboratory. 1 Credit Hour.
Computer laboratory exercises to complement BIL 311.
Prerequisite: BIL 311. Or Corequisite: BIL 311.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 315. Marine Biota and Biogeochemical Cycles. 3 Credit Hours.
The diverse sources, transformations, and sinks of chemical constituents in the sea; distribution of dissolved and particulate materials in the sea. Role of marine organisms in marine biogeochemical cycling and the marine carbon cycle and its interaction with the terrestrial biosphere and atmosphere.
Prerequisite: MSC 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 316. Global Primary Production. 3 Credit Hours.
Photosynthesis supports the vast majority of life on planet earth. Although terrestrial and aquatic photoautotrophs share the same basic photosynthetic mechanisms, the physical environment and the fate of primary product on differ on land versus in the sea. This course reviews the magnitude and processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.
Prerequisite: BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 321. Invertebrate Zoology. 4 Credit Hours.
Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 324. The Biology of Fishes. 3 Credit Hours.
Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.
Prerequisite: BIL 255 or BIL 360.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 328. Biology of Birds. 3 Credit Hours.
General biology of birds, field identification, natural history and migrations of southern Florida species. Lecture, 2 hours; laboratory, 3 hours; six weekend field trips, 6 hour each. Binoculars required.
At least one BIL course at the 200 - level.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BIL 329. Marine Vertebrate Zoology. 3 Credit Hours.
The form and function of the vertebrate lineage of marine animals from early chordates to the evolution of cartilaginous and bony fish and the emergence of tetrapods, those that evolved from marine ancestors and have since returned to the seas. A comparative point of view will be used to assess the anatomy and physiology of each taxonomic group as well as behavioral and ecological adaptations related to their life history. Topics will include the emergence of the vertebrate body plan and the evolution of fish from agnathans through modern teleosts, as well as the tetrapod lineage of marine reptiles, marine birds, and marine mammals. Discussion of critical points in vertebrate evolution where genome-wide duplication events occurred as well as instances of convergent evolution in various lineages.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 330. Ecology. 3 Credit Hours.
The interactions of living organisms with each other and with their abiotic environment.
Prerequisite: BIL 250 or BIL 255, Calculus strongly recommended.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 331. Ecology Laboratory. 2 Credit Hours.
Lab and field exercises in ecology. Some Saturday field trips required.
Prerequisite: BIL 330. Or Corequisite: BIL 330.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 332. Tropical Ecology. 3 Credit Hours.
Tropical ecosystem including world distribution of tropical climate biogeographical regions, deserts and environmental factors, grassland and primary production, savannah population dynamics, energy flow, biogeochemical cycling, succession, and biodiversity of tropical ecosystem.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 333. Conservation Biology. 3 Credit Hours.
The challenges facing conservation practitioners and the toolkit that has been developed to face these threats. Examination of important conservation cases and how endangered species and ecosystems are distributed across the globe; common threats to biodiversity and methods that have been developed to face these threats at both species and landscape scales; government implementation of conservation strategies. Students will read papers from the primary literature on a weekly basis that provide examples of how conservation tools are developed and implemented. Biology 330 (Ecology) is recommended.
Prerequisite: BIL 150 And BIL 151 And BIL 160 And BIL 161, BIL 330 recommended.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
