GENERAL UNIVERSITY INFORMATION

A private, independent, international university

An equal opportunity/affirmative action employer

An announcement with information on administration, organization, admission and graduation requirements, and the courses of instruction in:

Undergraduate and Graduate Studies, 2019-2020

It is the policy of the University of Miami that no person within the jurisdiction thereof shall, on the basis of race, religion, color, sex, age, disability, sexual orientation, gender identity or expression, veterans status, or national origin, be excluded from, participation in, be denied the benefits of, or be subjected to discrimination or harassment (including all forms of sexual harassment and sexual violence) under any program or activity of the University, regardless of whether such program or activity occurs on-campus or off-campus. The University does not intend by this commitment to require compliance with this policy by governmental or external organizations that associate with but are not controlled by the University, except as required by law. The Executive Director of Workplace Equity and Performance is responsible for coordinating the University's effort to implement the nondiscrimination policy and Affirmative Action Programs for employees and students. The Executive Director may be contacted at the following address or telephone number:

Workplace Equity and Performance Office
Gables One Tower, Suite 100R
1320 S. Dixie Highway
Coral Gables, FL 33146
305-284-3064

More information regarding the student sexual harassment/violence policy may be found online in the Student Rights and Responsibilities Handbook (http://www.miami.edu/SRR/). For available resources and services contact the Dean of Students Office (http://www.miami.edu/sa/index.php/dean_of_students/), Phone: 305-284-5353; the Counseling Center (http://www.miami.edu/sa/index.php/counseling_center/), Phone: 305-284-5511; and/or the Sexual Assault Response Team (http://www.miami.edu/sa/index.php/counseling_center/current_students/special_programs/sexual_assault_response_team_sart/) (S.A.R.T).

The University of Miami is authorized under Federal law to enroll non-immigrant alien students.

The University reserves the right to change any provision or requirement, including, but not limited to fees and tuition, at any time without notice. Degrees, courses, programs, activities, and like academic or non-academic offerings of the University may also be changed from time to time without notice. The University further reserves the right to require a student to withdraw at any time under University policies, as may be promulgated from time to time. Further, admission of a student to the University of Miami for any semester does not imply that such student will be enrolled in any succeeding academic semesters. It also reserves the right to impose sanctions on any student whose conduct is unsatisfactory. Any admission on the basis of false statements or documents is void when the misconduct is discovered, and the student is not entitled to any credit hour for work which the student may have done at the University prior to any discipline that may be taken as a result of such misconduct. When a student is dismissed or suspended from the University for cause, there will be no refund of tuition or fees paid. If a dismissed student has paid only a part of his tuition and fees, the balance due the University will be considered a receivable and will be collected.

There will be no refund of tuition, fees, charges or any other payments made to the University in the event the operation of the University is suspended at any time as a result of any act of God, strike, riot, disruption, or for any other reason beyond the control of the University.

The University of Miami is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor's, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at:

1866 Southern Lane
Decatur, Georgia 30033-4097
or call 404-679-4500 for questions about the accreditation of the University of Miami.

Mission Statement

The mission of the University of Miami is to transform lives through education, research, innovation, and service.

Core Values

We are committed to freedom of inquiry—the freedom to think, to question, to criticize, and to dissent. We will pursue excellence in our research and educational missions with the single-mindedness that marks great commitments. We will prepare our students for rewarding lifelong careers and will instill in them a continued and permanent dedication to the search for knowledge and the search for truth. We will provide them with the foundations for ethical citizenship and service to others, a respect for differences among people, and a commitment to high standards of thought and communication. We will provide service to our community and beyond, including the delivery of high-quality, compassionate care through an academic health system. We will strive to transform the world in positive ways through innovative education, impactful research and scholarship, and the translation of knowledge into solutions.

Founded in 1925 by a group of Miami citizens who believed that an institution of higher learning was necessary for the development of their young and growing community, the University has matured into a major research university and academic health system. Located within one of the most dynamic and multicultural cities in the world, the University is a distinctive community with a variety of races, ethnicities, customs, genders, and faiths. Its geographic location uniquely positions the University to be both local and global in outlook and outreach.

We aspire at the University of Miami: to be a global university with an intentionally hemispheric strategy, pursuing inclusive engagement as a bridge across the Americas to the rest of the world; to be an excellent university, striving to achieve the highest standards of performance in every aspect of our work; to be a relevant university, connecting scholarship to real-world solutions; and to be an exemplary university, offering a model to society through the steadfast achievement of our mission.
University Policies

Course Information

Academic Calendar

The University of Miami adheres to a reasonable approximation of the Carnegie unit for contact time. In addition, students are expected to spend two hours outside of class in preparation for every classroom hour. The Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) is maintained by the University Registrar and is the official record of academic instruction.

The standard meeting times for three-credit hour courses are as follows:

- 50-minute, Monday-Wednesday-Friday schedule;
- 75-minute, Tuesday-Thursday schedule.

The calendar is planned to ensure 69 class days (41 Monday-Wednesday-Friday meeting days and 28 Tuesday-Thursday meeting days) and at least five days for final examinations in a 15-week semester. The policy allows a mandatory examination period to be counted in the Carnegie unit hours of instruction, but does not count reading days. The University has a required two-and-a-half-hour final examination policy, resulting in a minimum of 45 hours of classroom instruction in a three-credit hour course for all undergraduate and graduate terms in the Academic Calendar.

The calculation for summer sessions and other abbreviated terms follows this same standard which means longer class meeting times over the duration of the shortened term.

Miami Herbert Business School

In the Miami Herbert Business School, graduate programs include terms of varying length. The School follows federal and SACSOC guidelines for the credit hour. All graduate business programs have a minimum of 750 minutes of instructional contact time per credit hour, including the final examination. Students are expected to dedicate at least two hours of course-related work for each hour of instruction.

School of Law

The School of Law is accredited by the American Bar Association and follows federal and SACSOC guidelines for the credit hour. Ordinarily, full-time students must enroll for a minimum of 11 credit hours and a maximum of 16 credit hours (please consult the Student Handbook and Honor Code). For one credit hour, a student receives 700 minutes of instruction, exclusive of examination time. For a three-credit hour course, this equates to 2,100 minutes of classroom instruction. An additional 180 minutes of instruction is allotted for the final exam session in a three-credit hour course. The faculty expects students to spend at least two hours outside the classroom in preparation for each hour of instruction.

Miller School of Medicine

The Miller School of Medicine is accredited by the Liaison Committee on Medical Education (LCME). The School's Department of Physical Therapy is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). The length of all educational programs is appropriate for each degree, based on national standards and accreditation criteria. The School follows federal and SACSOC guidelines for the credit hour. Completion of the M.D. program ordinarily takes four years.

Although credit hours are not specified by the LCME, the medical education program leading to the M.D. must include at least 130 weeks of instruction.

Academic Credit

The University of Miami adopted the following Federal Definition of the Credit Hour at the Faculty Senate meeting on April 17, 2013 that appears in the Credit Hours policy statement of the Southern Association of Colleges and Schools Commission on Colleges (SACSOC).

Federal Definition of the Credit Hour

For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester credit hour, or ten to twelve weeks for one quarter credit hour, or the equivalent amount of work over a different amount of time, or
2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Application of Credit Hour Policy

This credit hour policy applies to all undergraduate and graduate programs that award academic credit (i.e., any course that appears on an official transcript issued by the University) regardless of the delivery method including, but not limited to, self-paced, online, hybrid, lecture, seminar, and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

The expectation of contact time inside the classroom and student effort outside the classroom is the same in all formats of a course whether it be online, a hybrid of face-to-face contact with some content delivered electronically, or one delivered in lecture or seminar format. The University operates on the semester system and, for its measure of academic course work, uses academic credits (referred to as semester credits, semester hours, credit hours, hours, or credits).

Courses that have less structured classroom schedules, such as research seminars, independent studies, internships, practica, studio work, or any other academic work leading to the award of credit hours, at a minimum, should state clearly learning objectives and expected outcomes and workload expectations that meet the standards set forth above.

Two or three laboratory hours each week throughout a semester are considered the equivalent of one lecture hour in counting credit hours earned in an undergraduate laboratory or studio course.

No grades or credit hours are given for audited courses.

Campus Processes - Curriculum Review

Each College or School within the University of Miami is charged with following the policy on credit hours in its review and approval of all undergraduate and graduate courses and for certifying that the expected student learning for the course meets the credit hour standard. The determination of credit hours is made when a new course or a revision to
an existing course is proposed. The submitted syllabus is examined for contact time as well as for assignments and evaluation mechanisms.

The Office of the University Registrar requires training for class scheduling before granting access to any departmental staff approved by a department for scheduling classes.

Cancellation of Courses

Students who select courses and fail to make payment and/or financial arrangements with the Office of Student Account Services (OSAS) prior to the payment deadline will have their course schedules canceled. Reinstatement of classes can only occur after payment arrangements have been made with the OSAS to cover all financial obligations including any reinstatement fees. Reinstatement to cancelled classes will be on an "as available" basis after financial arrangements have been completed.

Change or Drop of Course

- Course changes after the completion of registration must be approved by the student’s academic dean.
- Dropping of any course for which the student has registered is official only when the drop has been fully processed by the student successfully dropping the course via CaneLink or by the Office of the University Registrar.
- Please note: Failure to attend classes or merely giving notice to instructors of one’s absence will not be considered as an official withdrawal and may result in failure in the course.
- The last day to drop a course or make a change in credit-only option is noted on the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/).
- Students enrolled in a course after the withdrawal date must receive a final grade in the course.

Class Attendance and Absences

Regular and punctual class attendance is vital for all students. Instructors will distribute course syllabi which include policies regarding class attendance and missed or late work. Any student may be dropped from a course or receive a lowered grade for unauthorized absences in excess of those permitted by the instructor. It is each student's responsibility to know and understand the instructor's policies. It is also the student's responsibility to give the instructor notice one week prior to any anticipated absence and to contact the instructor within one week after any unanticipated absence.

All students are responsible for material covered during their absence. However, the instructor must allow each student who is absent for a University-approved reason either the opportunity to make up, or to be excused from, work missed, without any reduction in the student's final course grade as a direct result of such absence.

Other than absences for a University-approved reason, the instructor determines whether or not an absence is for an acceptable reason and whether or not students shall have the opportunity to make up missed work. If the instructor does not recognize the reason as acceptable, the student may appeal to the chair of the department in which the course is offered.

The following constitute University-approved reasons for absences:

1. Participation in an activity approved by the Academic Deans Policy Council, such as musical and debate activity, R.O.T.C. function, or varsity athletic trip; participation in a special academic activity such as a field trip or other special event connected with academic coursework. Verification of a student's participation shall be issued by the sponsor when authorized by the Office of the Executive Vice President and Provost.

2. Observance of a religious holy day as described in the Religious Holy Day Policy, below.

Religious Holy Day Policy

The University of Miami, although a secular institution, is determined to accommodate those students who wish to observe religious holy days. It seeks to reflect its awareness of and sensitivity to religious holy days whenever possible when scheduling University activities. The following provisions are meant to apply equitably to all religious groups and to provide opportunities to all to meet their religious obligations.

1. Except as specifically provided to the contrary, this policy is binding on all students in undergraduate programs. Schools offering graduate or professional programs, including undergraduate professional programs, are strongly encouraged to adhere to these policies to the maximum extent practicable.

2. Any student absent from class in observance of a religious holy day shall not be penalized in any way for an examination or assignment missed during the period of absence. Absence in observance of a religious holy day does not relieve students from responsibility for any part of the course work required during the period of absence. Students who are absent on days of examinations or class assignments shall be offered a reasonable opportunity to make up the work without penalty, if the student previously arranged to be absent. Nothing in this policy shall preclude faculty members from limiting the number of student absences to a reasonable number of absences for any reason. The faculty member has discretion to determine how the make-up obligation will be fulfilled. A faculty member who penalizes a student contrary to these provisions may have committed unprofessional conduct, and thus may be subject to a complaint to the Committee on Professional Conduct under the provisions of Section B4.9 of the Faculty Manual.

3. It is the student's obligation to provide faculty members with notice of the dates they will be absent due to observance of religious holy days, preferably before the beginning of classes but no later than the end of the first three class days. For religious holy days that fall within the first three class days, students must provide faculty members with notice no later than two class days before the absence. Missing a class due to travel plans associated with a particular religious holy day does not constitute an excused absence.

Absences due to observance of religious holy days that are not pre-arranged with the relevant faculty member within the first three class days may be considered unexcused, and the faculty member may therefore prevent the student from making up examinations or assignments missed during the period of absence.

4. Faculty members are encouraged to anticipate days when a substantial number of students will be absent due to observance of religious holy days and should avoid scheduling examinations and assignment deadlines on those days. Faculty members are expected to reasonably assist students in obtaining class information the student missed during the period of absence in observance of a religious holy day. In that regard, faculty members are urged to allow taping or recording of the class session, with the reproduction limited to the student's personal use, when a student misses a class due to observance of a religious holy day. To assist in identifying religious observance days, faculty members are encouraged to consult the illustrative list provided in the Interfaith Calendar. (http://
Regulations and Restrictions

must:

To be eligible to enroll for courses under the CR/NC option, a student normally be attached.

When listed in CaneLink's Course Offerings, a more descriptive title will be counted toward fulfilling major, minor, or general education requirements (including prerequisite work) of the University and the individual schools.

Grading standards for the credit only option are the same as for students who register for the course under the regular grading system. Letter grades will be submitted by instructors to the Office of the University Registrar. The Office of the University Registrar will be awarded for work that the American Council on Education Guide regards as college level. Students must have credit hours approved by their departmental chairperson.

Credit hour for military service and experience is usually in the elective area and may not take the place of subjects required for graduation. Such work is not assigned quality points and is not included in quality point computations.

Final Examination Policy

- Final Examinations may not be given during a regularly-scheduled class period.
- No examination shall be permitted during the reading period.
- Final Examinations may be rescheduled only with the permission of the school/college dean.
- No student shall be required to take more than two final examinations in a twenty-four hour period. A student having three or more final examinations scheduled during a twenty-four hour period may request the instructor of the course most easily rescheduled (normally the course with the smallest enrollment) to reschedule the examination for that individual. The request shall be made no later than two weeks before the last class day.
- A student who has a conflict between a final examination and a religious observation may request that the instructor reschedule that student's examination. The request shall be made no later than two weeks before the last class day.
- For the resolution of any problem pertaining to the scheduling of final examinations, a student should consult with the following entities or persons in this order: the relevant instructor, the department chair, the Dean or designee. If the matter cannot be resolved at the school or college, the student should contact the Office of the Provost.

Military Withdrawal

- Students who need to withdraw from a semester due to official orders to active duty with the Armed Forces of the United States must provide a copy of their official written orders when submitting the request to withdraw.
- Students who withdraw after the 12th week of the semester because of these official orders may either be awarded credit hour (CR) or an academic grade for any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
- Credit hour granted for courses under this policy should count toward graduation.
- There should be no refund of tuition for courses for which credit hour has been awarded. Refunds for courses not awarded credit hour should be on the same basis as complete withdrawals for military service.

Course Numbering System

The following course-numbering system is used:

- Courses in the 100 series are primarily for freshmen.
- Courses in the 200 series are primarily for sophomores.
- Courses in the 300 series are primarily for juniors.
- Courses in the 400 series are primarily for seniors.
- Courses in the 500 series are open only to seniors or other qualified undergraduates.
- Courses in the 600 through 800 are open only to graduate students.

Courses in some departments, with the specific numbers 100, 200, 300, 400 are offered, in most instances, on an experimental or trial basis. When listed in CaneLink’s Course Offerings, a more descriptive title will normally be attached.

Eligibility

To be eligible to enroll for courses under the CR/NC option, a student must:

1. Hold the standing of Sophomore or above, and, if a transfer, must have completed one semester of residency at the University of Miami;
2. At the time of registration have a minimum cumulative grade point average of at least 3.00;
3. Elect the CR/NC option within two weeks following the last day of registration for Fall and Spring semesters. Election of CR/NC options for Summer Sessions must occur no later than the fifth class day following the last day of registration. No changes except withdrawals from the course are permitted after this time.

Regulations and Restrictions

1. Eligible students may take one course per semester for credit only, to a maximum of 9 credit hours.
2. Only free electives may be taken under this option. Free electives are defined as courses not taken to fulfill the requirements for the major, minor, or general education requirements (including prerequisite course work) of the University and the individual schools.
3. ENG 105 and ENG 106 cannot be taken for credit only.
4. Grading standards for the credit only option are the same as for students who register for the course under the regular grading system. Letter grades will be submitted by instructors to the Office of the University Registrar. The Office of the University Registrar will change all grades A through C (including “C-“) to CR (Credit Received) for those enrolled under the CR/NC option.
5. A grade of NC (No Credit) will be recorded by the Office of the University Registrar for all grades of D and F. The student will not receive credit hours or quality points for the grade of NC.
6. Should a student subsequently change his/her major, free electives taken for credit only prior to the declaration of this major may be counted toward fulfilling major, minor, or general education requirements at the discretion of the department chairman and the academic dean.
• The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Registration
Registration dates are shown on the University Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/), and all students are expected to register on these days. If a student is permitted to register late, a fee may be charged.

Repeat Rules
A student may repeat a course, but the repetition will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the chair of the department in which the course is offered or, in the case of an undepartmentalized school, by the dean.

Illegal Repeat
A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

General Repeat Rule
• If the initial grade is D+ or lower (or a C- in cases where an academic unit requires a C or higher), both the initial grade and the repeat grade are included in the computation of the student's cumulative grade-point average (CGPA).
• If the initial grade is a D or D+ (or a C- in cases where an academic unit requires a C or higher) and the repeat grade is passing, the number of credit hours required for graduation will be increased by the number of credit hours repeated.
• Registrations that involve repeating a course in which a grade of C or higher (or C- in cases where an academic unit does not require a C or higher) has already been earned do not earn quality points or credit hours, nor count as credit hours attempted.
• Courses repeated after graduation will be posted to the transcript showing the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.

Undergraduate Repeat Rule
• A student may elect to repeat up to two courses that were taken at the University of Miami in which the student earned a grade of D (including D+) or F. Each repeated course must be taken at the University of Miami, must be the same course as the course initially taken, and must be completed within two regular semesters enrolled following the initial course.
• No course may be repeated more than once under this rule. A course repeated more than once under the University's General Repeat Rule will not qualify under the Undergraduate Repeat Rule.
• Enrollment for a second time in a course constitutes a repeat of that course for the purposes of this rule, unless the student withdraws from the course on or before the University's published Last Day to Drop a Course date.
• For each repeated course, only the second grade (whether higher, or lower, or the same as the first grade) will be used in the computation of the student's CGPA. The initial course will not count as credit hours attempted or earned, although the initial course grade will remain on the student's permanent record.

Graduate Repeat Rule
A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a "C-" or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated.

Miami Herbert Business School Graduate Repeat Rule
Graduate students in the Miami Herbert Business School who fall below the 3.0 GPA may be placed on academic probation. Within one semester after their GPA falling below 3.0, Master's students wishing to repeat a course may petition their program director to do so. If the petition is approved by the Graduate Program Director, the grade obtained in their second attempt will replace the original grade for purposes of calculating their GPA for clearance for graduation only. Authorization to repeat a course is limited to courses in which an unsatisfactory grade was earned (as determined by the Graduate Program Director). Additionally, a course may be repeated only once and students may not repeat more than two courses. The student's transcripts will continue to show all attempts and the GPA computation will include all grades earned for purposes other than computing the GPA for clearance for graduation. If a course in which an unsatisfactory grade of lower than a B- was earned is repeated and the repeat grade is 'C-' or higher, the number of credits required for graduation will be increased by the number of credits repeated. Registrations which involve repeating a course in which a grade of 'A' or 'B' has already been earned may not earn quality points or credit hours, nor count as credits attempted.

Undergraduate Schedules
Fifteen or sixteen credit hours constitutes a normal schedule at the University. Academic deans and advisors will determine the appropriate credit hour load for their students. (A schedule of charges for credit hours is found in the Financial Payment Policies section of this Bulletin.) The schedule of any student whose outside interests cause unsatisfactory scholastic attainment may be reduced by the dean.

Temporary/Permanent Withdrawal from the University
If a student decides to withdraw from the University of Miami, there are procedures in place to facilitate this process. In order to withdraw officially from the University, a student must follow the procedures outlined in this bulletin and on the University of Miami website (https://success.miami.edu/student-withdrawal/important-information/).
Failure to follow the outlined withdrawal process may result in monies owed to the university (e.g. tuition, fees, etc.), failing grades on a student’s academic record and/or other negative consequences.

Please note that dropping courses in a summer session, thereby reducing a student credit-hour load to zero is not construed as a formal withdrawal from the University.

Undergraduate Students
In order to officially withdraw from the University, Undergraduate students are required to speak with an Advisor in the ‘Cane Success Center. The ‘Cane Success Center is located on the 2nd Floor of the University Center, Suite 2275. Walk-in hours are available from 9:00 AM – 2:00 PM Monday thru Friday. You may also reach a ‘Cane Success Center Advisor by calling 305-284-4500 or via email (success@miami.edu) to initiate the withdrawal process.

For more details about the withdrawal process and for helpful hints on making a smooth transition out of the University, visit the Undergraduate Withdrawing Student Checklist (https://success.miami.edu/student-withdrawal/important-information/).

For students who are no longer on campus – If you have already left the University but did not complete the withdrawal process before your departure, please call or email (success@miami.edu) the ‘Cane Success Center at (305) 284-4500 to begin the withdrawal process. Your withdrawal will not be finalized until an Exit Interview is completed with a ‘Cane Success Center Advisor.

Undergraduate Appeal Process
Withdrawal Date Appeal Form – If you were unable to attend classes due to a serious accident or illness, and this prevented you from notifying the University of your withdrawal in a timely manner, a Withdrawal Date Appeal Form (https://success.miami.edu/student-withdrawal/important-information/) can be submitted for consideration by an Appeals Committee. Appeals are submitted AFTER completing the official withdrawal process above and must include supporting documentation as to what prevented a timely notification. All appeals must be submitted within 30 calendar days of the official withdrawal date established with the ‘Cane Success Center or if the appeal is being submitted for a semester that has already completed, it must be submitted within 30 calendar days of the last day of the semester in question. Appeals should be submitted via email (registrar@miami.edu) or by mail to:

University of Miami
Office of the University Registrar - Withdrawal Date Appeal
P.O. Box 248026
Coral Gables, FL 33124-6914

Merit-based Scholarship Status upon Return – If you withdraw from the University but choose to return within one calendar year, and you have continued to meet the requirements of your scholarship, then your merit scholarship will be waiting for you. Contact the ‘Cane Success Center to begin the process of readmission.

1 Frost School of Music students will need to re-audition after one semester away from the University.
2 Merit Scholarships are awarded as consecutive semesters. If you spent a semester or two away from the University, these would be terms counted as part of your total scholarship. Please refer to your scholarship agreement for details.

Student Groups with Special Concerns Regarding Withdrawing from the University
• Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefit bills must also be cleared by the Veterans Affairs Certifying Official.
• Varsity athletes or any athlete registered with the department of Athletics must obtain approval and be cleared by the Athletic department prior to any change in their registration status, including withdrawal from the university.
• Per U.S. Department of Homeland Security (DHS) regulations, international students in F-1 or J-1 visa status must notify their ISSS advisor prior to temporarily or permanently withdrawing from the University and must leave the U.S. within 15 days of withdrawing. Failure to comply with DHS regulations may result in the loss of your future eligibility to enter the U.S.

Refunds
During the academic year, tuition will be refunded on a prorated basis depending on the date that is noted as the ‘Total Withdrawal Date’. Tuition will be refunded on a prorated basis through 60 percent of the semester. Please see the Refund Policy (p. 27) under the Financial Payment Policies section.

Title IV financial aid and tuition will be refunded on a pro rated daily basis through 60 percent of the semester. This date is determined based on the student notifying the Cane Success Center (Undergraduate)/ Office of the University Registrar (Graduate) of his/her intent to withdraw. If the student fails to notify the appropriate office, federal guidelines for determining refunds will be followed.

Financial Assistance
https://finaid.miami.edu/

The Office of Student Financial Assistance (https://finaid.miami.edu/) and Employment (https://www.miami.edu/ofas/) administers federal, state, private and University financial assistance programs. Our office awards financial assistance for Undergraduate and Graduate/Professional students. We communicate with our students mainly through the CaneLink (https://canelink.miami.edu) system regarding any information we might need to complete the financial aid process. Medical students should contact their respective financial aid office.

Hours of Operation

Walk In Hours
Monday, Tuesday, Thursday, Friday 9:30 to 4:00
Wednesday 11:30 to 4:00

Phone Hours
Monday and Friday 9:00 to 5:00
Tuesday, Wednesday, Thursday 9:00 to 6:00

Office of Student Financial Assistance and Employment

Coral Gables, FL 33124-5240
Telephone: 305-284-6000
Fax: 305-284-4082
Undergraduate Financial Assistance

It is the purpose of the Office of Student Financial Assistance and Employment to provide need-based assistance and/or academic achievement awards to qualified students in the form of scholarships, grants, loans, and work programs (https://finaid.miami.edu/types-of-aid/) to the extent that resources are available. Professional financial aid and student employment advisors are ready to assist all students plan for the most efficient use of their financial resources for education.

Underlying the awarding of need-based financial assistance is the philosophy that the student and family have the primary responsibility for educational costs. Need-based financial assistance serves to supplement these primary resources.

- Students who require financial assistance to attend the University should apply for assistance each academic year.
- Candidates for admission should indicate their interest in financial assistance by checking the box provided for that purpose in the application for admission.
- The U.S. Department of Education’s Free Application for Federal Student Aid (FAFSA) (http://www.fafsa.ed.gov/) is used to determine eligibility for federal need-based assistance. The FAFSA must be completed for each academic year.
- The College Board’s CSS Financial Aid PROFILE Application is required to determine institutional need-based financial aid awards. The PROFILE application only needs to be completed once during your enrollment.

### Important Financial Aid Tips

- Financial aid applications are accepted throughout the year but it is important to note that the appropriate preference date for receipt of aid applications must be met as aid is awarded on a funds available basis.
- **DO NOT WAIT FOR YOUR ADMISSION DECISION TO APPLY FOR FINANCIAL AID.** Financial aid resources are limited and there is no guarantee of assistance for students who do not submit appropriate documentation by the deadline posted above. Your financial aid application will not be considered complete until all documents are received.
- Complete your CSS/Financial Aid PROFILE at css.collegeboard.org (https://student.collegeboard.org/css-financial-aid-profile/). After you complete your CSS/Financial Aid PROFILE, you will receive an e-mail from the College Board’s IDOC (https://idoc.collegeboard.org/idoc/) process with instructions on submitting the necessary documentation. All documents should be submitted directly to College Board.
- If you are not required to file a federal tax return and will not be filing, please submit the official IRS non-filer letter. This can be ordered through the IRS website www.irs.gov (https://www.irs.gov/individuals/get-transcript/).

### Financial Aid Census Date

Financial aid awards will be set according to a census date or date of fixed enrollment. All financial aid awards will be set according to the enrollment in effect at the close of business on the last day of the drop/add period each regular term semester. No adjustments will be made to the financial aid awards for any enrollment changes (increases or decreases) made after this date with two exceptions:

1. Bright Futures awards will continue to be adjusted (increased or decreased) according to any change in the enrolled credit hours.
2. The aid award package for students with federal financial aid and who completely withdraw (drop to 0 credit hours enrolled) will be adjusted according to the regulatory required Return To Title IV Calculation.

### Graduate and Doctoral Students

It is the purpose of the Office of Student Financial Assistance and Employment to provide federal financial aid assistance to qualified students in the form of loans and work programs (https://grad-prof.miami.edu/types-of-aid/) to the extent that resources are available. Professional financial aid and student employment advisors are ready to assist all students plan for the most efficient use of their financial resources for education. Law, Graduate and Doctoral students need only complete a few steps to receive notification and disbursement of federal awards.

1. **Apply for Admission to a Graduate Program or the Law Program at the University of Miami.**
2. **Complete the Free Application for Federal Student Aid (FAFSA).**
   a. Graduate/Doctoral Students: School Code 001536
   b. Law Students: School Code E00532
3. **Accept, reduce or decline your awarded aid via CaneLink.**
   a. First-time loan borrowers must complete Entrance Counseling at the Department of Education website (http://www.studentloans.gov/).
   b. A signed Promissory Note for both the Unsubsidized and the Graduate PLUS Loan are required if either loan is utilized. Each should be completed at the Department of Education website (http://www.studentloans.gov/).
   c. Students receiving the Graduate PLUS Loan must have an approved credit check conducted by the Department of Education for the loan to be disbursed.

Your financial aid award may consist of loans, scholarships, tuition waivers or a combination. Aid is offered to a student’s maximum eligibility as determined by enrollment and the Cost of Attendance (COA).

Some of the aid programs which may be offered to a Law, Graduate or Doctoral student:

**Federal Direct Unsubsidized Loan:** Eligibility is not based on need and is up to $20,500 for an academic year. This loan program does accrue interest while the student is enrolled.
Federal Direct Graduate PLUS Loan: Borrowers may be eligible to request up to the cost of attendance minus other financial aid. Your award letter includes your maximum loan eligibility for the Federal Graduate PLUS Loan. This loan is based on the borrower not having an adverse credit history. Once you have accepted the offered loan amount on CaneLink, a credit check will be conducted by the US Department of Education. You will be required to have completed a Master Promissory Notice as well as Entrance Counseling (first time borrowers only). In the event your loan is declined, you have the option of appealing that decision or reapplying with an endorser; however, the Department of Education will then require you complete Credit Counseling in order to approve the disbursement of your loan.

First-time borrowers will need to complete the online Federal Direct Loan Master Promissory Note (MPN) and Loan Entrance Counseling with the Department of Education. Students may complete all federal student loan applications and entrance counseling at the Department of Education website (http://www.studentloans.gov/).

Scholarships and Tuition Waivers are exclusively handled by the respective department. Our office is notified of scholarships/waivers by the department and it is then added to your award package. Adjustments to your Graduate PLUS Loan and/or other aid may take place upon notification to prevent an over award of aid.

To be considered for a graduate assistantship or fellowship, a graduate student must:
- Be admitted unconditionally to a post-baccalaureate degree program;
- Be enrolled for full-time study; and
- Maintain a cumulative graduate grade point average of 3.0 or above.

For additional information, please visit the Law School Website (http://www.law.miami.edu) or the Graduate School Website (http://www.miami.edu/grad/). For specific information regarding graduate programs, contact the Graduate Advisor of the respective program. For information regarding loan and work-study opportunities, visit the Office of Student Financial Assistance and Employment website (http://www.miami.edu/ofas/).

For United States citizens and eligible non-citizens, federal financial aid is available for online programs.
- Applying for Financial Aid (https://grad-prof.miami.edu/applying-for-aid/), UM
- Costs and Financial Aid (https://grad-prof.miami.edu/cost/), UM

Eligibility
Please see the University’s Financial Aid (https://grad-prof.miami.edu/applying-for-aid/terms-and-conditions/) website for eligibility criteria.

Applying for Financial Aid
To apply for financial aid, submit the Free Application for Federal Student Aid (FAFSA) (https://fafsa.ed.gov/). Be sure to include the University of Miami school code 001536.

Awarding and Disbursing Financial Aid
Key Points and associated deadlines:
- Awards are processed on a rolling basis and are done annually, one academic year at a time (3 terms per academic year: Fall, Spring and Summer).
- Students are strongly encouraged to begin the application process at least four weeks prior to the start date of their program or renewal date of their existing loan.
- Applications will be accepted in the last 30 days of the term, but the Office of Student Financial Assistance and Employment cannot be held responsible if funds are not available for disbursement for the term. Delays can occur that are outside of the control of the Office of Student Financial Assistance and Employment.

New Students
The Office of Student Financial Assistance and Employment will award Financial Aid for new students when:
- A student has been fully admitted
- FAFSA has been received
- Student has enrolled in classes
- Student has been billed for that term

Financial Aid will be disbursed to the Office of Student Account Services:
- After the last day to add/drop and when attendance has been confirmed by the Online Department.

Continuing Students
The Office of Student Financial Assistance and Employment will award Financial Aid for continuing students only when:
- FAFSA has been received
- The student has enrolled in classes
- Satisfactory Academic Progress has been determined
- Student has been billed for that term

Financial Aid will be disbursed to the Office of Student Account Services:
- After the last day to add/drop and when attendance has been confirmed by the Online Department.

Maintaining Eligibility, including Satisfactory Academic Progress
Students must maintain all federal aid eligibility requirements for the entire term. Please see the Satisfactory Academic Progress (https://grad-prof.miami.edu/applying-for-aid/satisfactory-academic-progress/) page for specific criteria for maintaining eligibility.

Satisfactory Academic Progress
Federal and Institutional Need-based SAP Policy
- In compliance with federal financial aid regulations, the University of Miami requires satisfactory academic progress (SAP) towards a degree as an eligibility requirement for federal and university need-based financial assistance. The SAP policy requires both a quantitative and a qualitative measure of a student’s progress.
- This policy is applicable to all undergraduate, law, graduate and doctoral students receiving financial aid through federal aid sources, including the Federal Parent Loan for Undergraduate Students (PLUS).
• At the end of each semester, the Office of Student Financial Assistance and Employment Services reviews the academic progress of all University of Miami financial aid recipients.

• If it is determined that a student is not making satisfactory academic progress at the end of the semester, a notification is sent to the student. The student will be placed on financial aid warning for one semester. Aid will not be withdrawn for the subsequent (warning) term, but at the end of that term, the student's academic record will be reviewed by Office of Student Financial Assistance and Employment and appropriate renewal or termination actions will be taken. Notification will be sent to the student detailing information on the appeal process.

• Federal academic progress policy is subject to change based on guidelines and changes made by the U.S. Department of Education.

Undergraduate Satisfactory Academic Progress

Review and Notification
To determine continued aid eligibility, the Office of Student Financial Assistance and Employment will review the academic progress at the end of each academic term for all undergraduate students receiving federal and institutional need-based aid, including the Federal Direct PLUS Loan; and at the end of each academic year for all Florida aid programs and merit scholarships.

Students who fail to meet Satisfactory Academic Progress will be notified by email. If a student is placed on academic probation they will be eligible for financial aid during that probationary period. A student may receive probationary scholarship assistance only once.

SAP Appeal
A student may appeal a failed SAP determination by completing and submitting to the financial aid office an Academic Progress Appeal Form (http://finaid.miami.edu/resources/forms/). Appeals may be granted only if the student failed to meet academic progress requirements as a result of an emergency and/or illness, and these circumstances must have occurred within the semester/academic year during which SAP requirements were not met. All appeals should be submitted no later than 30 calendar days from notice of ineligibility. All decisions made by the committee are final. Please be advised that students will only be eligible to receive one approved appeal during their enrollment at UM. Should a student fail to meet the minimum academic standards outlined in the conditions of their initial approved appeal, they will not be granted an additional appeal unless there are new mitigating circumstances.

Federal and Institutional Need-Based Aid Academic Requirements
For the purposes of these policies, an academic year is defined as Fall, Spring and Summer semesters.

GPA Requirement
Students must complete a minimum institutional GPA of 2.0.

Credit Completion Requirement
Students must earn 67% of the total credit hours attempted during his/her overall academic career. Rounding does not apply.

• Undergraduate and graduate credits cannot be combined to meet this standard.

• Withdrawals, incompletes, audits, NG (no grade) and F’s are attempted but not earned hours.

• Transfer credits are counted in the calculation, but not in a cumulative GPA.

Maximum Timeframe Requirement
Degree must be completed within 150% of normal completion as determined by the school or college catalog (example: Bachelor’s degree = 120 credits; 150% rule = 180 credits).

Warning Period
Federal and institutional need-based aid recipients will be placed on a ‘warning status’ for one semester following notice of failure to meet SAP requirements. Failure to meet the requirements by the end of the warning period will result in loss of aid eligibility for future periods of enrollment unless a student is granted a probationary semester as a result of a granted appeal.

Merit Scholarship Academic Requirements
Applies to undergraduate students receiving academic scholarships except Ronald A. Hammond Scholarship. Ronald A. Hammond Scholarship recipients should contact the Office of Academic Enhancement (http://www6.miami.edu/provost/oae/hammond/) to review their contract renewal terms.

GPA Requirement
Students must complete a minimum institutional GPA of 3.0.

• Only credits taken at UM count toward your GPA requirement.

Credit Completion Requirement
• At least 24 credit hours each academic year.

• At least 12-credit hours for full-time students enrolled for only one semester.

• Withdrawals, incomplete, audits, and F’s are attempted but not considered earned hours.

• Transfer credits are counted in the calculation, but not in a cumulative GPA.

• Credits earned and transferred from any institution may count toward the upcoming year’s total credits earned to satisfy this requirement.

For All Incoming Freshmen and Transfer Students:
Students who fail to meet the academic requirements to maintain their scholarship at the end of their first year will lose their eligibility. Students will not receive a probationary period.

Florida Financial Aid Requirements
The Florida Department of Education (http://www.fldoe.org/students/financialaid.asp) in Office of Student Financial Assistance (http://www.floridastudentfinancialaid.org/) has its own standards of progress for state financial assistance.

GPA Requirement
• Florida Academic Scholars must maintain a minimum institutional GPA of 3.0 for full renewal; 2.75 for partial renewal (equivalent to FL Medallion amount).

• Florida Medallion Scholars must maintain a minimum institutional GPA of 2.75.

• Effective Access to Student Education Grant (EASE), and Florida Student Assistance Grant (FSAG) must maintain a minimum institutional GPA of 2.0.
Credit Completion Requirement
At least 24 credit hours each academic year

- At least 12-credit hours for full-time students enrolled for only one semester.
- Withdrawals, incompletes, audits, and F’s are attempted but not considered earned hours.
- For EASE and FSAG students, classes taken in the previous summer may be included in calculating the completed hours
- Part-time Bright Futures recipients must earn a prorated number of credit hours.
  \( (9-11 \text{ credits per term} = 9 \text{ earned hours per term}) \)
  \( (6-8 \text{ credits per term} = 6 \text{ earned hours per term}) \).

Maximum Time Frame
Students receiving Florida Bright Futures awards may receive funding for up to five years from high school graduation for a maximum of 120 semester hours (or equivalent) toward the completion of a first baccalaureate degree.

Students receiving the Effective Access to Student Education Grant and/or the Florida Student Assistance Grant may only receive a maximum of 9 semesters of eligibility. Unused terms may not be used for further course funding after a student earns a baccalaureate degree.

Reinstatement of Florida Bright Futures
Recipients of the Florida Bright Futures program who do not receive any scholarships for the period of one academic year may apply for reinstatement of aid through the Florida Department of Education Office of Student Financial Assistance (OSFA) website at www.FloridaStudentFinancialAid.org (http://www.floridaeoufinancialaid.org/).

Florida Academic award recipients who fail to achieve a 3.0 institutional average, but achieve at least a 2.75 institutional average will renew at the lower Florida Medallion amount.

Bright Future eligible recipients who graduated from high school in 2009-2010 and thereafter who fail to achieve a minimum 2.75 institutional GPA and became ineligible during their first year of funding may apply for restoration in an academic year after which the 2.75 institutional GPA requirements were met. (The 2.75 institutional GPA must be met before the fall term for which the student is applying.)

The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at www.FloridaStudentFinancialAid.org (http://www.floridaeoufinancialaid.org/).

Students who do not meet the minimum earned hours requirement during any academic renewal period or who fail to meet the minimum institutional GPA requirement after their first year of funding will not be permitted a restoration opportunity.

Reinstatement of Effective Access to Student Education Grant
Reinstatement of the Effective Access to Student Education grant (EASE) may be obtained after one full academic year of ineligibility by earning a minimum of 24 credits and/or a minimum institutional GPA of 2.0.

Graduate/Professional Satisfactory Academic Progress

Graduate Students
Review and Notification
To determine continued aid eligibility, the Office of Student Financial Assistance and Employment will review the academic progress at the end of each academic semester for all graduate and professional students receiving federal aid, including the Federal Direct PLUS Loan.

Students who fail to meet SAP will be notified in writing by email. If a student is placed on academic probation they will be eligible for financial aid during that probationary period. A student may receive probationary scholarship assistance only once.

SAP Appeal
A student may appeal a SAP determination that results in loss of aid by completing and submitting to the financial aid office an Academic Progress Appeal Form. Appeals may be granted only if the student failed to meet academic progress requirements as a result of an emergency and/or illness, and these circumstances must have occurred within the semester/academic year during which SAP requirements were not met. All appeals should be submitted no later than 30 calendar days from notice of ineligibility. All decisions made by the committee are final.

Reinstatement of Aid
Reinstatement of aid may be obtained by earning additional University approved credits, achieving the indicated percent completion standard, or successfully appealing.

GPA Requirement
All University of Miami graduate and doctoral students must maintain a minimum 3.0 cumulative grade point average (CGPA). Graduate students who fail to meet the minimum credit hour or cumulative grade point average requirements have failed to meet the satisfactory academic progress standards established by the University. Those in violation of the satisfactory academic progress eligibility requirements will be notified in writing of their eligibility status and right to appeal.

Credit Completion Requirement
Students must earn 67% of the total credit hours attempted during his/her overall academic career. Rounding does not apply.

- Undergraduate and graduate credits cannot be combined to meet this standard.
- Withdrawals, incompletes, audits, NG (no grade) and F’s are attempted but not earned hours.
- Transfer credits are counted in the calculation, but not in a cumulative GPA.

Graduate students must be enrolled at least half-time in order to receive federal financial assistance. A minimum of 5 graduate credit hours constitutes at least half-time enrollment at the graduate level. The only exception to this credit hour requirement is enrollment in any of the 800-level research courses. Students enrolled in any of these courses are considered full-time and are eligible for federal loans.

Duration of Eligibility
All work must be completed within six years of the time of admission to a graduate program, for those studying for the various master’s degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master’s degree in field,
work must be completed within eight years. Individual programs may set a shorter time period.

Graduate students may receive federally funded assistance for the time to completion limits set up by the Graduate School - six (6) years for those studying for the various master’s degrees and 8 years for those studying for doctoral degrees. Students pursuing dual master’s degrees will receive aid for a maximum of six (6) years. Students in a combined master’s degree/doctoral degree program are eligible for assistance for a maximum of eight (8) years.

Merit Scholarships
Graduates scholarships awards are determined by the departments. A student’s academic progress and eligibility for an award is monitored and evaluated by the departments.

Law Students
Program specific requirements may be found online at http://grad-prof.miami.edu/applying-for-aid/satisfactory-academic-progress/law-sap/index.html (http://grad-prof.miami.edu/applying-for-aid/satisfactory-academic-progress/law-sap/)

Maximum Time Frame
Law Students are eligible to receive financial aid up to 33% over and above the maximum of credit hours required to obtain his/her law degree. All periods of enrollment (including Summer), will be counted toward the maximum time frame.

Treatment of Punitive and Non-punitive Grades and Courses
All courses with a grade of F, I, IP, NG, U, W and repeated courses will be considered in the calculation of credit hours attempted and will be subject to satisfactory academic progress. Audited courses are not considered in awarding financial aid; therefore, they will not be counted in the determination of satisfactory academic progress. Incomplete (I) grades will be calculated as failing grades in regard to credit hour completion until the course has been satisfactorily completed.

Notification of Satisfactory Academic Progress
Awards are considered estimated, until the final grades are reviewed by the Office of Financial Aid. Students are allowed their first term of failing to meet satisfactory progress, due to GPA or failure to meet the required 67%, as a probationary period. Students who have not met the minimum standards of satisfactory academic progress as outlined above, beyond a their probationary period or are academically dismissed, are considered on financial aid suspension and no longer eligible for aid.

Reinstatement of Financial Aid Eligibility
A student may regain eligibility by:
  • Achieving the required GPA and Credit Hour Completion as outlined.
  • Appealing the financial aid decision as described below.

Financial Aid Appeal Process
A student may appeal a SAP determination that results in the loss of aid by completing and submitting to the Office of Student Financial Assistance and Employment an Academic Progress Appeal Form. Appeals may be granted only if the student failed to meet academic progress requirements as a result of an emergency and/or illness, and these circumstances must have occurred within the semester during which SAP requirements were not met. All appeals should be submitted no more than 30 calendar days from notice of ineligibility. All decisions made by the appeals committee are final.

Student Employment
Student Employment (http://www.miami.edu/ose/) is responsible for assisting and guiding students (admitted and enrolled in a degree program at the University of Miami) through the job search and placement process while attending the University.

Student Employment provides job opportunities to all students regardless of sex, age, disability, sexual orientation, ethnicity, nationality, race or creed. University of Miami student employees are required to adhere to established federal, state and local employment regulation practices.

Employment programs for undergraduate students include the Federal Work Study, Student Assistant program, and Lead Miami program, all of which offer opportunities on campus and in the surrounding community. Employment programs for graduate students include: Federal Work Study, Student Assistant Program and Graduate Assistantships. Available positions are posted in JobX (https://umiami.studentemployment.ngwebsolutions.com/?)

Student employment program earnings are paid directly to the student as they work and are not applied as a credit toward tuition charges.

Federal Work Study
Federal Work Study is a need-based program that provides part-time job opportunities based on your financial aid eligibility. To apply for Federal Work Study, you must complete the Free Application for Federal Student Aid (FAFSA). Students who are awarded Federal Work Study obtain jobs available at the University of Miami campuses or at off-campus community service agencies that have been approved to participate in the program.

Student Assistant Program
All degree seeking, admitted, and enrolled students are eligible to apply for positions under the Student Assistant program. Student assistant positions are similar to Federal Work Study in terms of job responsibilities and rates of pay; however, they are not supported by federal funds.

LEAD Miami Program
The LEAD Miami program (http://admissions.miami.edu/undergraduate/financial-aid/lead-miami/) is available by invitation to a limited number of students based on Office of Admission referrals. To be considered, invited students must apply to the program by the published deadline.

Graduate Assistantship Program
Graduate Assistantships are mostly offered directly to selected students by their academic departments. Graduate Assistantships may include a tuition scholarship of varying amounts, in addition to work payment. Students must be admitted to a Graduate or Professional Degree Program at the University of Miami in order to be hired as a Graduate Assistant.

Off-Campus Employment
Students seeking career-related experiences and who have reliable transportation can work off-campus. Student Financial Assistance and Employment acts only as a referral service and makes no particular recommendations regarding off-campus employers. Off-Campus employers hire students directly and Student Financial Assistance and
Employment is not responsible for safety, wages, working conditions, or other aspects of off-campus employment.

The University of Miami participates in E-verify, an Internet-based system that allows an employer, using information reported on an employee’s Form I-9, to determine the eligibility of that employee to work in the United States. The E-Verify system is operated by the U.S. Department of Homeland Security (DHS) in partnership with the Social Security Administration (SSA). Students employees need to present original documents to complete the Form I-9 and E-verify. A list of other acceptable documents can be found online at https://www.uscis.gov/i-9-central/acceptable-documents/.

**Terms and Conditions**

**My UMiami E-mail Account**

The University of Miami Office of Student Financial Assistance and Employment (OSFAE) will communicate with students and their parents by e-mail. Students are required to monitor their CanLink account and will be responsible for checking their email account regularly. Failure to meet deadlines may result in a loss of aid eligibility.

**Estimated Financial Aid Awards**

Awards may be “ESTIMATED” due to a variety of issues that require resolution before financial aid can be disbursed. Students must monitor their outstanding requirements on CanLink and submit the necessary documentation as soon as possible. Failure to complete the financial aid process by the priority deadline, may impact aid eligibility.

**Financial Aid Over-Awards**

Students financial need is the determined based on the difference between the cost of attendance (COA) and the amount of a families expected family contribution (EFC) as calculated by the Institutional Methodology formula from data provided on the CSS Profile. Eligibility may change if students receive funds from another source that is not included on the initial financial aid award. OSFAE will communicate with students about award changes which can be viewed on CanLink.

**Outside Scholarship**

If a student receives an outside scholarship it may impact their aid award. Students are required to submit all information from the scholarship agency to the Office of Student Financial Assistance and Employment as soon as they are notified of the award. The Office of Financial Assistance Services will first fill any gap between the institutional EFC and federal EFC, and then reduce loans/work study, before reducing any need-based grant eligibility. Students can request that the financial aid office reduce federal work study before reducing loan eligibility, however, requests must be made in writing to the Office of Financial Assistance Services.

**Federal and Institutional Work Study Programs**

There are a variety of work study (federal and institutional) positions available on and off campus. It is the students responsibility to find a suitable employment opportunity that fits their needs, areas of interest and academic schedule. Once a position has been secured, students must complete a work study authorization form, I-9 form, W-4 form and a direct deposit authorization before work can begin. If Federal Work Study is awarded as part of the financial aid package, the amount indicated is the maximum amount a student may earn during the academic year. The amount awarded is not a guarantee of employment and that if a student applies too late in the hiring season, a suitable position may not be available.

**Institutional Aid Enrollment Requirements**

For all merit and need-based aid from the University of Miami, full-time enrollment is required. Full-time enrollment is defined as 12 credits or more each semester. The student must have the required full-time enrollment to qualify for institutional aid. Enrollment of less than 12 credits may result in the reduction or loss of some aid programs.

**Satisfactory Academic Progress**

Students must maintain Satisfactory Academic Progress to be eligible for federal, state and institutional financial aid programs. The University of Miami standards of SAP measure a student’s academic performance both qualitatively and quantitatively by reviewing the following three areas of performance: completion rate for coursework enrolled, cumulative grade point average earned, and the maximum time frame to complete a degree. The standards of SAP apply for all federal, state and college funded financial assistance programs. Students that fail to meet the minimum requirements to be eligible for financial aid, will lose their eligibility at the end of the period of review. Students have the opportunity to appeal the loss of financial aid within 30 days of notification; and if the appeal is approved, they will be granted one semester of aid eligibility. If the appeal is denied, there is no further recourse to reinstatement of financial aid at that time.

**Repeat Course Work**

If a student chooses to retake a course for which they have already received a passing grade, financial aid may be affected. At the end of the add/drop period, any student not enrolled in full-time credits, will have their financial aid eligibility reviewed and adjusted as needed to reflect their enrollment level. This may result in a loss or reduction in aid. Full-time enrollment is defined as 12 credits or more for the fall and spring semesters.

**Withdrawal or Leave of Absence**

Financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students earn a percentage of funds with each day of class attendance. If a student decides to leave school before the end of the semester or designated period of enrollment, federal regulations require University of Miami to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60% of the enrollment period, federal aid is considered fully earned for that period. This calculation and the subsequent return of federal funds may result in a balance that is the responsibility of the student to pay.

**Enrollment Freeze/Census Date**

At the end of the add/drop period for each semester each students enrollment level is determined. Any and all adjustments to a students course schedule should be made before the end of the add/drop period to avoid any problems with repeat courses or being under-enrolled. Once a students enrollment level has been determined, and any necessary adjustments have been made to the students award, Federal Pell Grants will not adjust regardless of any changes to enrollment. If a student makes adjustments to their course load that results in additional tuition
and fee charges they may be eligible to receive additional loan funds. Full-time enrollment is defined as 12 credits or more.

Some federal financial aid programs require at least half-time enrollment (six credits per semester) specifically, Federal Direct Loans. Most institutional and state financial aid requires full-time enrollment including need-based UM grants and merit scholarships. Adjustments to financial aid for enrollment changes after the Census Date will not be done except for Florida Bright Futures and in the case of a complete withdrawal from the University. There are no exceptions to this policy.

**RECONSIDERATION OF FINANCIAL AID AWARDS**

Students have the opportunity to appeal some financial aid decisions. If a student wishes to request a reconsideration of financial aid, a Request for Review (https://finaid.miami.edu/request-for-review/) with supporting documentation should be submitted to the Office of Student Financial Assistance and Employment. Only certain circumstances can be evaluated such as loss of income, unusual medical expenses (not premiums), separation/divorce of parent's, death of a family member, non-discretionary expenses incurred by the family.

**SUMMER LEAVE TERM EXPECTATION**

A portion of the family's contribution is the responsibility of the student. UM expects the student to contribute a minimum of $2,000 from income (summer and leave term employment opportunities) and any savings or other resources that may be available to the student. University of Miami follows this policy with the following exception: In an effort to encourage participation in summer internships, UM will provide need-based financial aid to replace the summer savings expectation for all students who are unable to earn and save all or a portion of their student contribution. In order to qualify for additional financial aid, students must meet posted deadlines for participation in a summer internship.

**SUMMER ENROLLMENT AND DISBURSEMENT**

Summer aid is processed once the student is enrolled for the summer term and completes the Summer Financial Aid Request Form (https://finaid.miami.edu/resources/forms/). Only undergraduate students enrolled at least half-time (6 credits or more) will be eligible to receive federal student loans. Financial aid for summer will not be disbursed until the first day of the term in which the student meets the minimum required enrollment for the aid program. Students who are not enrolled for summer but wish to request Federal Work Study for the summer term must submit a Summer Financial Aid Request Form on the OSFAE website (http://finaid.miami.edu/resources/forms/).

**Financial Payment Policies**

**Policy**

All semester charges (tuition, room, meal plans, and fees) are due by the date on the billing notification e-mail, unless an established Monthly Payment Plan contract has been finalized with the Office of Student Account Services. Previously unbillled and new charges are due and payable when incurred. Payment is considered complete only when all charges are paid or when satisfactory arrangements to pay have been finalized with the Office of Student Account Services.

**Consequences of Non-Payment**

Students that are delinquent in paying their tuition and fees statement balance and/or Monthly Payment Plan may be subject to having their class schedule cancelled. Also, there will be a hold on transcripts and course registration for the current and subsequent semester. Cancellation may also lead to the forfeiture of any financial aid the student may have been awarded.

Course selection will not be permitted for any past due accounts including Monthly Payment Plans. A late payment fee can be assessed to delinquent accounts.

**Registration Fees**

**Late Registration**

Student who register late for classes will incur a late registration fee. Any undergraduate or graduate student who enrolls after the last day to add (as defined by the academic calendar) will be assessed a late registration fee of $150.00.

**Reinstatement**

Students who are reinstated into classes after being cancelled for non-payment will be assessed a $150.00 reinstatement fee.

**Finance Charges**

No additional charges are imposed on an account once full payments are received by the payment due date. If, however, payment is received after the payment due date, a Finance Charge can be assessed.

**Anticipated Payments**

If financial aid funds are not available at the time the semester’s balance is due, the student is expected to pay the balance with a different payment method. Financial aid awards will be considered “anticipated” under the following conditions:

- The Office of Student Financial Assistance and Employment (OSFAE) is provided with a source of aid (other than College Work Study or Miami Commitment) on the student's award package.
- OSFAE awards the corresponding amount on the student's award package, i.e., outside scholarship information must be provided to both the Offices of Financial Assistance and Student Account Services in order to consider the aid as “anticipated.”
- OSFAE allocates the **guaranteed** award during the semester that the disbursement should be expected. This means the student completed all the 'To Do' check list items related to financial aid.
- Final guarantees have been processed by the appropriate alternative loan lender – preliminary approvals will not result in automatic disbursements of alternative loan funds.

**Examples**

Veterans Monthly Educational Benefit Checks: An amount not to exceed the total of the checks expected to be received during the semester (for fall and spring, this is typically three checks) may be credited. Arrangements for this type of tuition credit must be initiated with a representative of Veterans Affairs through the Office of the Registrar and the Office of Student Account Services. Students with VA benefits are required to sign a promissory note with the Office of Student Accounts in order to have their anticipated awards credited to their account.

International Students with Government Sponsorships: Payment of all or a portion of charges that can be billed directly to corresponding
unofficial withdrawals are a student ceases attendance and does not complete the withdrawal process as outlined in the University of Miami Academic Bulletin. This date is determined during the withdrawal process. The date the student notifies the University of Miami of their intent to withdraw. An official withdrawal occurs when a student completes the withdrawal process as outlined in the University of Miami Academic Bulletin.

Florida Prepaid Program
The University of Miami will assist with a student’s education expenses by billing for any available Florida Prepaid College Program funding directly to the Florida Prepaid College Board. Florida Prepaid participants may authorize the University of Miami to request a payment disbursement option that best matches your needs and current savings in the plan. We encourage participants to authorize a payment that will facilitate your financial planning objectives for your student’s enrollment at the University of Miami.

The University of Miami requires all students requesting FLPP to complete the “Florida Prepaid College Program Authorization Form” each academic year. In addition to this form, all students who plan to use their prepaid funds must contact Florida Prepaid at 1-800-552-4723 option 2, and request a separate Florida Prepaid “Transfer Form.” Upon your request, Florida Prepaid will mail the Transfer Form to you. The purchaser of the plan must complete this form and return it directly to Florida Prepaid. It is necessary that Florida Prepaid have the Transfer Form on file in order for students to use Florida Prepaid funds at the University of Miami.

Questions in reference to Florida Prepaid can be emailed (saccounts@miami.edu) with “Florida Prepaid” in the subject line. The required authorization form for the University of Miami and an example can be downloaded (http://www.miami.edu/finance/index.php/student_account_services/third_party_fl_prepaid/florida_prepaid/here (https://osas.miami.edu/paying-your-bill/types-of-payments/florida-prepaid/).

Policy on Previous and Unpaid Balances
Non-Payment
The University of Miami may declare due and payable at once the sum of all past due balances. In addition, the student will be responsible for interest accrued on all past due and unpaid amounts at the maximum rate permitted by law and any and all costs incurred by the University of Miami in enforcing its rights. The University reserves the right to withhold transcripts, diplomas, readmission, and future registration for non-payment of outstanding balances. The University’s Collection Department may also disclose the student's outstanding indebtedness, along with other relevant information, to credit information bureaus. A non-refundable $150 reinstatement fee will be charged to reinstate each unpaid and cancelled semester.

Withdrawal & Tuition Drop Refunds
Official Withdrawals: An official withdrawal occurs when a student completes the withdrawal process as outlined in the University of Miami Academic Bulletin.

Withdrawal Date: The date the student is officially withdrawn from the University. This date is determined during the withdrawal process.

Last Date of Attendance: The date the student notifies the University of their intent to withdraw.

Unofficial Withdrawals: An unofficial withdrawal (dropout) occurs when a student ceases attendance and does not complete the withdrawal process outlined in the student bulletin. Unofficial withdrawals are discovered through an audit of students with failing grades at the end of the semester.

Tuition Refunds
Withdrawals does not guarantee you a refund. Tuition will be credited to your student account on a prorated basis depending on the date noted as the “Withdrawal Date” for official withdrawals (refund schedule available online and subject to change). Tuition will not be refunded for unofficial withdrawals. Fees are nonrefundable after the first week of the semester.

Note: If you have financial aid, there may be adjustments to your aid after you withdraw. This may result in a lower overall refund, no refund, or a balance due to the University.

Return of Title IV Aid
In accordance with Federal Return of Title IV Aid regulations.

The Return of Title IV Aid is prorated based on the number of days attended. The Return of Title IV Aid calculates the amounts of aid earned (student keeps aid) by the student and the amounts of aid that must be returned to each financial aid program. The aid will be returned within 45 days after the last date of attendance. The unearned aid will be charged to the student’s account and returned to the applicable financial aid program.

The last date of attendance for unofficial withdrawals is the midpoint of the semester. The University must determine the last date of attendance within 30 days after the end of the payment period and return unearned Title IV Aid within 45 days from the date determined that the student withdrew.

Students who withdraw after 60% of the semester have earned 100% of the Title IV Aid.

Note: Return of Title IV Aid applies to complete withdrawals and do not apply to course load reductions.

Withdrawal Example
A student notifies the Registrar of withdrawal on the 50th day of the semester. If the total number of calendar days in a semester were 108*, the earned financial aid ratio would be 50 divided by 108 or 46.3 percent. The student would have earned 46.3 percent of the approved federal aid that the student was originally scheduled to receive for the term. The 53.7 percent of the student’s scheduled or disbursed aid remains unearned and must be returned to the Federal Program. If a student remains in school until the percentage of earned financial aid is 60% or more, then federal regulations consider the student to have earned 100% of their federal aid. For further information please refer to the 'Cane Success Center withdrawal information page (https://success.miami.edu/student-withdrawal/).

The return of Title IV Aid will be calculated at 53.7%.

* Total number of calendar days may vary from semester to semester

Title IV Aid Programs:
- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loan
- Direct Plus (Graduate Student)
- Direct Plus (Parent)
- Federal Pell Grant
- Federal Supplemental Education Opportunity Grant (SEOG)
• Academic Competitive Grant (ACG)
• National SMART Grant
• TEACH Grant
• Iraq and Afghanistan Service Grants (IASG)

Return of Non-Title IV Aid

University Aid
The return of University Aid is calculated using the tuition refund percentage. Unearned aid will be charged to the students account and returned to the applicable financial aid program.

State Aid
The Florida Bright Futures award is based on the actual number of credits the student is enrolled. When a student withdraws the full amount of the award is returned.

The EASE award (formerly known as the FRAG award) is returned in full if the withdrawal date is within the first week of the semester. If the withdrawal date is after the first week of the semester the student earned the EASE.

Other
The University will not return private education loans as the agreement is directly between the student and the lender.

Alumni Rate and Policy

Special Opportunity for UM Graduates

UM graduates may take undergraduate credit hour courses in the College of Arts and Sciences on a space available basis, at a special alumni rate. All University of Miami graduates are eligible for this special program.

Students may take whatever courses are of interest. From Anthropology to Theatre Arts and all the disciplines in between, participants may choose a course or collection of courses (maximum two courses per discipline) to meet professional or personal goals.

Interested students may call the Division of Continuing and International Education at 305-284-4000 to inquire about the benefit and/or the current tuition rate, request an application, or enroll in the courses. They will submit a simple, no-fee, one-page application, simply select an undergraduate course (open on a space available basis) and be on their way to continued learning at UM.

Policies Governing Enrollment in University of Miami Alumni Status

The University of Miami Alumni Status includes students who are not seeking a degree and meeting the following requirements. Enrollment in a non-degree program and/or satisfactory completion of courses does not imply admission to a degree program.

1. University of Miami graduates (completed degree);
2. U.S. citizens or permanent U.S. residents.

Conditions applying to University of Miami Alumni enrollment

1. Students may enroll in a maximum of 12 undergraduate credit hours per semester.
2. Students are limited to two courses per academic department.¹
3. Courses may be selected from the College of Arts and Sciences only.
4. International students will not be issued I-20 forms.
5. International students in B-1 (business) or B-2 (pleasure) visa status may engage in study as long as the educational activity is secondary to the principal activity for which the visa was sought.
6. Enrollment may be completed on a space-available basis only. (Course availability determined two days prior to semester start.)
7. Courses taken for undergraduate credit hour (including 500 level courses) will not be considered for graduate credit hour at a later date.

¹ Note: Not all courses and/or departments may be available.

Meal Plans

The Links below are where you can find the Meal Plan rates for the 2019-2020 academic year.

*Parking subject to change

Parking on the University of Miami’s Coral Gables campus is a privilege extended to those using the facilities of the University consistent with the terms of the University’s Parking Policies and Procedures and other policies of the University as they are set or amended by the Provost. Parking privileges are extended only to those eligible members of the university community including trustees, faculty, administrators, staff, students, vendors and visitors who have paid for a valid UM parking permit. In consideration of being allowed to use the University’s facilities for parking, the purchaser of a parking permit agrees to be bound by the rules set forth in the Parking Policies and Procedures, and agrees to pay to the University any fine or administrative charge assessed for non-compliance with this code.

Students, faculty, employees, and staff may not park in visitor parking spaces, and UM parking permits are not valid at parking meters.

First year resident students (students residing on the Coral Gables campus who are attending college on a full time basis for the first time) are restricted from purchasing a parking permit to park on the University of Miami’s Coral Gables campus. This policy applies to first year students living in University of Miami student housing on the Coral Gables campus.
For more information on Parking, please visit our website (http://www.miami.edu/parking/). Annual permits are valid August 16, 2019 through August 15, 2020.

**Payment Options**

The University Cashier accepts cash, personal checks, traveler’s checks, cashier’s checks, certified checks, money orders, and checks drawn against lines of credit. Personal check and credit card payments are accepted on line via CaneLink. Bank wire transfers are also accepted.

**Checks and Money Orders**

Payments must be in U.S. Dollars and drawn on a U.S. bank. Payments must be made payable to the University of Miami and include the student’s identification number to ensure credit to the student’s account. *Post-dated checks are not accepted.*

**Returned Checks Policy**

All returned checks are deposited twice, automatically, and without notice. A Returned Check Fine will be assessed to the student’s account, as listed below, after the second attempt. Check cashing privileges will be canceled for those students who have three (3) or more returned checks.

A notification letter will be mailed to the maker of the check by the University’s Collection Department detailing the amount and fine for the returned check. Check cashing privileges will be restricted until cash or certified funds (money order or cashier’s check) are presented for payment. A personal check will not be accepted to replace a dishonored check.

Returned check fines processed through CaneLink will incur a $20 fee. Checks not processed through CaneLink will incur the following charges:

<table>

</tr>
<tr>
<td>Checks for Monthly Payment Plan</td>
<td>$20.00 Fee</td>
</tr>
</tbody>
</table>

**Wire Transfer of Funds**

Students may pay their tuition by wire transfer. The wire transfer instructions can be obtained through CaneLink.

How to obtain wire transfer instructions:

1. Log into CaneLink and go to Student Center, click on the Account Inquiry button under the Finances.
2. Click on Make a Payment to pay your tuition and select Wire Transfer Payment (USA & International).
3. Select the country from the “What country are you paying from” dropdown list. For domestic wire instructions, select the US wire transfer payment option.
4. Create a Flywire account, to track your wire payment, and enter basic identification information for the University to identify your payment.
5. The bank account wire instructions will be provided.
6. An email will be sent with a unique wire identification number.

Students should make sure their full name, student ID number, and unique wire ID number are included with the wire transfer to ensure the funds are applied correctly.

**Tuition Payment Plans**

The Office of Student Account Services offers an optional financial alternative, monthly payment plan to assist students and parents. The University's payment option is designed to provide convenient alternative plans of budgeting and paying educational costs whether or not a financial assistance award is granted.

**Monthly Payment Plan (MPP)**

*Purpose:* This plan allows you to divide all or part of your semester educational expenses (tuition, fees, on-campus housing, and meal plan less financial assistance) into four convenient monthly payments for the fall. The payment plan can also include prior term balances. A four month payment plan is also available for the spring term as well. The University of Miami does offer a monthly payment plan option for the summer term.

*Contract length:* This plan is offered on a semester-by-semester basis for the fall, spring, and summer semesters.

*Fee:* A 3% non-refundable administration fee of the amount financed is charged and included in the established monthly payments.

*Conditions:* Payments are due on the 1st of each month with the first payment due on August 1st for the Fall semester. The first payment for Spring semester MPPs will be due on the first business day in January, and first week of May for Summer semester.

Students may apply for the Monthly Payment Plan on CaneLink. For more information regarding this option please follow this link to the Monthly Payment Plan FAQ page (https://osas.miami.edu/paying-your-bill/types-of-payments/monthly-payment-plan/).

1 Freshmen are typically assigned to Hecht and Stanford Residential Colleges but may be assigned to another residential college based on availability.
Graduate Housing

Housing in on-campus housing is not available for GRADUATE students in addition to married students, single parents with children, law students, and medical students. The Department of Housing and Residential Life does assist GRADUATE students with off-campus housing information and resources here (http://www.miami.edu/housing/).

Law Housing

Housing in on-campus housing is not available for LAW students in addition to married students, single parents with children, graduate students, and medical students. The Department of Housing and Residential Life does assist LAW students with off-campus housing information and resources that can be found here (http://www.miami.edu/housing/).

Tuition and Fees

Tuition

The basic undergraduate tuition rate covers the normal student load and is increased if the student carries an overload. Private instruction, e.g., music lessons, carries extra charges. Students who opt to participate in any of the University’s intersession courses will be billed for the intersession course separately from the flat rate cost of full-time tuition and fees.

For tuition charges in special programs and sessions, see announcements that are published concerning these components of the University’s academic program.

The following list of charges is effective for the academic year 2019-2010.

Undergraduates (All Colleges and Schools)

Undergraduate students carrying both undergraduate and graduate courses will be charged tuition at the rate in effect for undergraduate credit hours taken and appropriate fees. For example, tuition for a student carrying a total of 15 credit hours, of which 3 are graduate and 12 are undergraduate, would be charged at the $24,360.00 rate.

Undergraduate students taking graduate level coursework that is priced at a special level will be billed separately for these courses. Students should check with their advisors and/or the appropriate school’s department for more details on their course pricing requirements.

Full-time fees will be assessed according to student classification as an undergraduate or graduate.

The University reserves the right to change without notice tuition, fees, room and all other charges at the beginning of any academic year, and the right to change activities and meal plan fees at the beginning of any semester.

Graduate Students

| Pre-Master’s, Post-Master’s, and Doctoral Students per credit hour | $2,100.00 |
| Research in Residence (720 or 750) or Continuous Registration-Master’s Study (725), per fall/spring semester | $2,100.00 |
| Research in Residence (720 or 750) or Continuous Registration-Master’s Study (725), per summer session (0 Research Credit Courses) | $2,100.00 |
| Audit Work (No degree credit) Tuition, per course, non-refundable. | $2,100.00 |

Certain programs are conducted by the University under contract with the State of Florida. Florida residents who have been accepted as students in those contract programs are required to pay current state tuition for each credit hour taken and the state provides the University with additional funds in accordance with the terms of the contracts. Students involved in state contract programs should contact the appropriate school/college to ascertain the state tuition charge per credit hour that they are expected to pay.

Fees

Some fees depend upon full-time status. This is usually determined by the sum total of semester credit hours carried by the student in all divisions or enrollment in certain special programs that are classified as full-time regardless of credit hour load. Intersession classes are included with regular fall and spring semester classes in determining the student’s full- or part-time status. This determination will also result in the billing of required fees. Fees are subject to change.

Undergraduate students are classified full-time if they enroll in 12 or more credit hours in a regular semester or 12 or more credit hours in a summer session or if they are enrolled in a special program which is classified full-time regardless of credit hour load.
Graduate students are classified full-time if they enroll in nine (9) or more credit hours in a regular semester or six (6) or more credit hours in a summer session, or if they are enrolled in dissertation credit hours that are classified as full-time.

Student Right to Know Act

The Student-Right-to-Know and Campus Security Act requires institutions to disclose information about graduation rates and crime statistics to current and prospective students. Students interested in obtaining this type of information should contact the Office of Admission, 305-284-4323 or go to this website (http://www.miami.edu/hea/).

Family Educational Rights and Privacy Act (FERPA) Buckley Amendment

The purpose of this policy is to assure that students have access to their educational records and to assure the privacy of students by restricting the disclosure of information from education records to those persons authorized under the Act.

The policy is provided to all students in the Student Life Handbook. Copies can also be printed from the website (http://www.miami.edu/SRR/).

Security of Student Records

The Office of the University Registrar is charged with the responsibility of maintaining the security and integrity of student records. Student records created before 1985 have been electronically scanned. Student records created after 1985 are housed on an electronic database.

In order to maintain confidentiality, access to the student record system is limited to university personnel who have a legitimate need for this information. Each user is required to fill out an access form. A user name is created, and each user must also create a password that must be changed every 180 days. Periodic audits of records as well as reviews of who has access to the system are regularly scheduled to ensure a secure environment.

Students are assigned a UM ID number that is unique to them and they are encouraged to use it instead of their social security number. Students are required to provide their student ID or a photo ID when requesting academic record information from this office.

FERPA Training

FERPA, the Family Educational Rights and Privacy Act, provides established guidelines for universities to ensure that students have access to their educational records as well as to ensure the privacy of said records by restricting the disclosure of information from educational records to those persons authorized under the Act. FERPA guidelines must be followed when dealing with the disclosure of student information.

All staff who use the student records system are required to complete a FERPA tutorial. Periodic reviews are required.

Service Indicator (Hold) on Student Records

Schools and colleges, university administrative departments and other student related offices have the ability to put service indicators, also known as holds, on student records. These holds can be financial, academic or disciplinary in nature and may delay a student's ability to register, to receive an official transcript or to receive a diploma. Holds on a student's record normally require action on the part of the student, i.e., a payment, completion of paperwork, etc. Specific information on a hold and what is required to remove it can be found in the Student Services Center in CaneLink or can be obtained from the office/department that initiated the hold.
Student Services

Camner Center for Academic Resources

http://umarc.miami.edu/arc/index.html

Located on the second floor of the University Center, the Camner Center for Academic Resources offers free academic assistance to all UM students. The Camner Center offers individual peer tutoring by appointment in most subjects, study skills instruction with a Learning Specialist, free academic workshops, and many other valuable services. Please visit our website (http://www.umarc.miami.edu) or call 305-284-2800 to learn more and/or schedule an appointment.

Peer Tutoring

At the Camner Center, all UM students can take advantage of free individual peer tutoring to develop a deeper understanding of course work through additional, special, or corrective content instruction. All tutoring is course specific and taught by nationally certified peer tutors. All UM students are eligible for two hours of tutoring per week for each course. Please send us an email (tutoring.arc@miami.edu) for more information or to ask any questions.

Supplemental Instruction

Small group sessions are available to help students succeed in the University’s toughest courses. Group Peer Tutoring is done on a weekly basis where students sit down to discuss course content in a small group setting with the peer tutor serving as a facilitator.

Academic Workshops

This free workshop series instructs students on specific academic skills and strategies to enhance academic performance. Workshop topics include effective test-taking strategies, improving study strategies, utilizing technology, and organization and time management skills. Topics are updated every semester, and students may attend unlimited sessions. Please visit our website (http://www.umarc.miami.edu) for the current workshop schedule.

Learning Specialists

The Camner Center for Academic Resources provides the support of trained Learning Specialists to students experiencing difficulty with academic issues. Students may request a one-on-one meeting with a Learning Specialist to help develop the skills needed to achieve success in their academic careers. Skills covered during these appointments include time management, effective note-taking, college textbook reading, educational technologies, test taking, and other learning strategies. Students can request an appointment with a Learning Specialist through our website. Visit the website (http://www.umarc.miami.edu) for more information about the support services available to students.

Independent Learning Initiative

The Independent Learning Initiative is a fee-based academic support program that provides structure, support, instruction, and monitoring for students needing additional guidance during the college experience. During the semester, students will identify and understand their academic strengths and areas for growth, as well as learn strategies, skills, and technologies to enhance their academic and personal success in college. Participants learn to monitor their academic progress and critically evaluate their current skills and strategies to work towards becoming a successful independent student. For more information about the program or to apply, please visit our website (http://www.umarc.miami.edu).

UMX 100: The University of Miami Experience

The University of Miami Experience (UMX 100) is a graded, comprehensive virtual self-paced course specifically designed to assist first-year students in making a successful transition to the University of Miami. First-year and transfer students are automatically enrolled. UMX 100 provides an opportunity for students to utilize UM resources necessary for success in college and beyond. Specifically, students will be exposed to campus leadership opportunities, academic and career planning, university traditions, study abroad opportunities, personal wellness programs, as well as advising and registration through videos, power points, blogs, and more. These resources and opportunities are only a click away. Contact us at umx@miami.edu if you have any questions about (UMX 100).

The course will open on the following dates each semester:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td>July 1st</td>
</tr>
<tr>

Disability Services

camnercenter.miami.edu/

Office of Disability Services (ODS)

The Office of Disability Services (ODS) is the primary university office responsible for the coordination of auxiliary aids and services for students with disabilities. Please visit our website (http://www.umarc.miami.edu) for more information.

The Office of Disability Services (ODS) provides academic accommodations and support to ensure that students with disabilities are able to access and participate in the opportunities available at the University of Miami. Individuals with disabilities must request academic accommodations through the Office of Disabilities Services. Accommodations are determined on a collaborative and case-by-case basis and are based on the documentation provided by the individual. ODS staff will work collaboratively with students to determine what academic adjustments and educational auxiliary aids are reasonable to ensure that students with disabilities are not subject to discrimination.

Information is available to prospective and enrolled students, their parents and/or sponsors. The Office of Disability Services (ODS) is located in the Camner Center for Academic Resources in Whitten University Center N2400. ODS staff can be reached at 305-284-2374 (Voice) or 305-284-1999 (Fax). Office hours are 8:30 am to 5:00 pm, Monday through Friday. Individuals may email the office staff (disabilityservices@miami.edu) for quick responses to questions.

The following deadline dates apply for all requests for academic accommodations through the Office of Disabilities Services:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td>June 1st</td>
</tr>
<tr>
<td>Spring Semester</td>
<td>December 1st</td>

</tr>
</tbody>
</table>
Grievance Procedure

The University of Miami, through the Office of Disability Services, has adopted a grievance procedure providing for prompt resolution of complaints by persons who believe they have been subjected to discrimination based upon their disability.

- All complaints must be directed to the University of Miami, Office of Disability Services, P.O. Box 249003, Coral Gables, Florida 33124 and addressed to the Director of the Camner Center for Academic Resources.
- All complaints must be in writing and must contain the name and address of the complainant. In the grievance, the student or individual must set forth specific facts in support of his/her complaint. All grievances must be signed by the student or individual.
- All grievances must be filed within 90 days of the alleged discriminatory event. If the complaint involves the denial of a student’s request for auxiliary aids or services or other modifications, the grievance must be filed within ten (10) days after the student receives notification that their request for auxiliary aids and services or other modifications has been denied. All additional documentation regarding your appeal must be submitted at the time of the individual’s appeal request.
- The grievance will be reviewed and adjudicated by the Director of the Camner Center for Academic Resources, or her designee (the ‘Director’). In no event, will the designee be the same individual who made the initial determination as to the request for auxiliary aids, services, or other modifications or accommodations.
- An investigation, if deemed appropriate by the Director, will be conducted by the Director following receipt of the grievance. The Director may review information and documentation contained in a student’s file and/or any other information an individual may submit in support of his/her grievance.
- Within twenty (20) days of the receipt of the grievance, the grieving party will receive a written decision from the Director.
- The decision of the Director of the Camner Center for Academic Resources shall be considered the final decision on the matter.

Retaliation against a person who files a grievance, or opposes a policy he/she believes to be discriminatory is prohibited.

Persons may contact the Assistant Director of Disability Services, who is responsible for coordinating the University of Miami’s 504 compliance efforts at (305) 284-2374 (P.O. Box 249003, Coral Gables, Florida, 33124), with any questions or concerns.

Individuals, who believe that they were subjected to discrimination on the basis of disability by the University of Miami, are encouraged to use the grievance procedure to resolve their concerns. Individuals may file a complaint directly with the U.S. Department of Education, Office for Civil Rights, at 61 Forsyth St., Southwest, Suite 19T10 Atlanta, GA 30303. To file a complaint with the State of Florida, contact the Commission for Independent Education 325 W. Gaines Street, Suite 1414, Tallahassee, FL. 32399-0400.

Career Services
http://www.HireACane.com

Patricia and Harold Toppel Career Center
(305) 284-5451 | toppel@miami.edu

The Toppel Career Center provides innovative and dynamic career services to students and alumni of the University of Miami. Furnished with the latest technology, including video conferencing, 360-degree video recording, and lecture capture, the Center’s six interview suites, a technology lab, a conference room, and a multipurpose Loft offer a variety of spaces (http://hireacane.miami.edu/about/reserve-space/) for students to meet their career-related needs. The Center is often described by visitors as “like no other” and is a model for career services throughout the country. Over six times larger than the average career center, the 12,000 square-foot building on Ponce De Leon Boulevard houses career programs and workshops, networking events, professional individualized advising, practice interviews, industry panels, drop-in peer advising, company presentations, on-campus interviews, and more.

Career Education

Regardless of the path you take, a comprehensive career planning process begins as soon as you step on campus. Professional staff at the Center assist students with their career development utilizing a three-part model (http://hireacane.miami.edu/about/) that provides the tools necessary to Explore (strengths, interests, values, skills, and abilities), Prepare (career and industry research, practice interviews, and internships), and Connect (building meaningful relationships and growing a professional network).

Advising Services

You can stop by Toppel for an individual or small group advising session where highly trained and motivated peer advisors with industry-specific knowledge can provide you with guidance on potential career
paths. You can drop by any time Monday through Friday, 8:30am - 5pm, no appointment necessary. The Center even offers online career assessments (http://hireacane.miami.edu/explore/majors-careers/) that can help you narrow down career options by building self-awareness.

Programs and Workshops
A series of programs and workshops (http://hireacane.miami.edu/events/education/) is offered throughout the academic year both in-person and virtually. Each session provides information and skill-building activities in the areas of resume development, interviewing skills, social media for the job search, securing internships, and much more. In addition, programs designed to increase awareness of specific career paths and professional opportunities are offered. These are often conducted by outside speakers and panelists who are UM alumni and/or recognized specialists in their fields. If you’re looking for something more intensive, Toppel offers the Professional Development Academy (https://hireacane.miami.edu/gain-experience/career-readiness/academy/), a 9-week, 1-credit program designed to help you develop critical competencies that will get you career ready.

Career Preparation & Networking
Through the Center’s vision, Empowering and Connecting ‘Canes to Achieve a Lifetime of Career Fulfillment, the staff encourages students to develop meaningful relationships with professionals in their area(s) of interest. The Toppel Career Center provides many opportunities for you to network with employers and alumni, including panel programs, employer meet-ups, job shadowing (UShadow (http://hireacane.miami.edu/explore/ushadow/)), on-campus recruiting, and career fairs.

Career Fairs and On-Campus Recruiting
Career Expo (http://hireacane.miami.edu/events/fairs/) is the largest career fair, typically bringing in over 100 employers and 1,000 students and alumni bi-annually in late September or early October and again in February. Toppel also organizes smaller industry-specific career fairs that focus on more specialized areas. Representatives from a variety of industries from around the world visit campus to meet, interview, and discuss career opportunities with students. In addition, the On-Campus Recruiting (http://hireacane.miami.edu/gain-experience/on-campus-recruiting/) program brings employers to campus for company information sessions and to interview students for jobs and internships in the interview suites. Last year, over 1,000 interviews were conducted in the Center’s interview suites. You can apply for these positions through Toppel’s free online career management system Handshake (https://miami.joinhandshake.com/). If you’re in need of some professional clothes to wear to these events, stop by Toppel to rent attire for free from Sebastian’s Closet (https://hireacane.miami.edu/resources/dress-for-success/).

Toppel Internship Program
The Toppel Internship Program (TIP) (http://hireacane.miami.edu/gain-experience/tip/) is designed to provide valuable career-related work experience through internships with participating employers. TIP allows students to earn a 1-credit transcript notation from the Toppel Career Center for internships they have already secured.

Handshake
Students can search Handshake (https://miami.joinhandshake.com/) for thousands of job and internship opportunities available to them. Handshake is Toppel’s free online career management system where hundreds of employers from across the country, including all Fortune 500 companies, post open positions. Simply login with your UM Single-Sign-On credentials to activate your account. Then complete your profile with your interests and experiences and make your profile public so that recruiters can potentially reach out to you! Handshake will recommend different job openings to you based on what you’ve entered, making the job search process much easier. You can apply for the position directly on Handshake. Before doing so, we recommend uploading your resume for an online critique and checking out the Events page to register for Toppel’s programs/workshops.

Connecting with the Toppel Career Center
The Toppel Career Center’s vision is to empower and connect all ‘Canes to achieve a lifetime of career fulfillment. Evidence shows that students who visit the Career Center are more likely to earn internships and ultimately have better career outcomes at the time of graduation. For a look at some of these post-graduation outcomes, check-out our online interactive data dashboard at miami.edu/outcomes (https://hireacane.miami.edu/about/career-outcomes/). To make the most of all that Toppel has to offer, visit us in person at 5225 Ponce De Leon Blvd., online at HireACane.com (http://www.HireACane.com), or by logging into Handshake (https://miami.joinhandshake.com/) and activating your account as soon as you arrive on campus! You can also keep up with what we’re doing by reading our weekly e-newsletter and following any one of our social media platforms: Facebook (http://www.facebook.com/pages/Toppel-Career-Center-at-the-University-of-Miami/70221785028?ref=tbs/), Twitter (http://www.twitter.com/toppel/), Instagram (http://instagram.com/hireacane/), WordPress (http://toppelpeers.wordpress.com), and Pinterest (http://pinterest.com/umtoppel/).

Commuter Student Involvement
orientation.studentaffairs.miami.edu

The Department of Orientation and Commuter Student Involvement (OCSI) is located on the second floor of the Shalala Student Center, suite 203. OCSI offers a variety of services and programs for students from Miami-Dade and Broward Counties who live at home and commute to the University of Miami. For more information, please visit the department’s website (http://miami.edu/csi/).

Great Start Pre-Orientaiton Program for Incoming Commuter Students
Great Start is an overnight, pre-orientation program designed to promote and emphasize college adjustment and campus involvement opportunities for incoming commuter students (first-year, transfer and spring admitted students). The program’s goal is to help students feel like a part of the University and give them a chance to meet other commuter students. Students who participated in Great Start have said the program greatly contributed to a positive transition from their previous institution, whether that be high school or a previous college to the University of Miami. Commuter student leaders serve as Program Coordinators, Steering Committee members, and Counselors. Registration for the program is available via Canelink for incoming commuter students with a Miami-Dade or Broward County home address. For more information, please visit the program’s page (https://orientation.studentaffairs.miami.edu/commuter-students/great-start/).
Commuter and Transfer Assistant Program

Commuter Assistants and Transfer Assistants specialize in helping off-campus students transition to collegiate academics and find a niche on campus, as well as creating a welcoming, inclusive environment. Through newsletters, social events and intentional one on one meetings, CAs and TAs, help pave the way to a successful transition for new ‘Canes. All first-year commuter and first semester commuter transfer students are assigned to a CA or TA. Signature events hosted by the CAs and TAs in collaboration with various campus resources are Hey Commuters!, a monthly commuter appreciation program, the Newman Arsht Cultural Program, where students get to experience a free show at the Adrienne Arsht Center along with a faculty member once a semester, monthly Lunch and Learns touching on first-year and transfer student needs and trends, SportsFest, a university-wide sports competition in February and more. For more information about the CA/TA Program, please visit the department’s website (https://orientation.studentaffairs.miami.edu/).

Association of Commuter Students

The Association of Commuter Students (ACS) is a second home for its members. ACS, a student organization, provides social support, service opportunities, school spirit involvement, and a physical space through which commuters bond with fellow students and to participate in all that the University has to offer. ACS provides its members with a working knowledge of UM that gives them the opportunity to become fully involved in campus life. Brought together by a simple fact of life, commuting to campus, ACS members have forged bonds that extend beyond this commonality. For more information on ACS, please visit the organization’s page (https://orientation.studentaffairs.miami.edu/commuter-students/association-of-commuter-students/).

Tau Sigma

Tau Sigma is an academic honor society designed specifically to recognize and promote the academic excellence and involvement of transfer students. By establishing chapters at four-year institutions across the country, Tau Sigma is able to recognize the academic achievement of the most outstanding transfers nationwide and, in the process, help universities better serve their transfer populations.

Counseling Center

counseling.studentaffairs.miami.edu

The Counseling Center is the primary provider of mental health services for UM students. The Counseling Center provides short-term individual, couples, and group therapy as well as psycho-educational outreach programming and consultation. Urgent care and limited career and psychological assessment are also available. Psychiatric services are available to those under the care of a Counseling Center therapist. The Counseling Center staff consists of experienced professionals from the fields of mental health counseling, psychology, social work and psychiatry.

For hours of operation please click here (http://counseling.studentaffairs.miami.edu/appointments/hours-of-operation/). For appointments, students can call the Counseling Center directly at 305-284-5511 or request an appointment in person. The Counseling Center offers walk-in triage service for students in crisis. The Counseling Center is located at 5513 Merrick Drive.

After normal business hours, students can talk to a licensed mental health professional by calling the main Counseling Center phone number at 305-284-5511. This number turns over into an after-hours hotline for students.

Sexual Assault Response Team (SART)

The Counseling Center also coordinates the Sexual Assault Response Team (SART). SART is a 24/7 telephone response line to assist University of Miami students victims of sexual assault. This service is available during the academic year and is for both men and women. The SART hotline number is 305-798-6666.

For more information, visit the SART website (https://miami.edu/SART/).

Graduate Student Training

The Counseling Center participates in the graduate training programs in the Department of Psychology and the programs of the Department of Educational and Psychological Studies. Doctoral students in psychology take part in the Center’s professional activities and have first-hand contact with clinical problems. In addition, pre-doctoral interns obtain professional training at the Counseling Center through the Dr. Jess Spirer Pre-doctoral Internship in Professional Psychology. The pre-doctoral internship at the Counseling Center is accredited by the American Psychological Association.

Dean of Students

www.doso.studentaffairs.miami.edu

The Dean of Students Office fosters student development and holistic growth through services, programs, and partnerships that cultivate responsible decision-making, personal accountability, and community engagement. The staff works directly with academic, athletic, student affairs, and other administrators in the coordination of institutional efforts to address specific concerns, and enhance the overall quality of the student experience.

Students who are expelled or suspended will have a conduct notation made on their official and unofficial academic transcripts. If the suspension or expulsion is the result of sexual misconduct or physical violence that detail will also be noted.

Each area within the Dean of Students Office provides students with opportunities for support, involvement, and leadership. For more information about each of these areas, click the links below.

- Alcohol and Other Drug Education (https://doso.studentaffairs.miami.edu/units/alcohol-and-other/)
- Case Management (https://doso.studentaffairs.miami.edu/student-support/case-management/)
- Greek Life (https://doso.studentaffairs.miami.edu/units/greek-life/)
- Student Conduct (https://doso.studentaffairs.miami.edu/student-conduct/)
  - Student Rights and Responsibilities Handbook (http://www.miami.edu/srr/)
- Sexual Misconduct Resources - It’s On Us (http://itsonus.miami.edu/)
- Undergraduate Honor Council (https://doso.studentaffairs.miami.edu/units/undergraduate-honor-council/)
- University Chaplains Association (https://doso.studentaffairs.staging.miami.edu/units/chaplains-association/)
• Veteran Student Services (https://doso.studentaffairs.staging.miami.edu/units/veterans-services/)

The Dean of Students Office coordinates efforts in response to various student crises and employs an Associate Dean who is a Licensed Clinical Social Worker. The staff is knowledgeable and prepared to assist all students in their adjustments to campus life. The administration and record keeping of all undergraduate student disciplinary infractions are also the responsibility of the Dean of Students Office.

To contact the Dean of Students Office call 305-284-5353 or visit the University Center, Suite 2250.

The Honor Council - Undergraduate

Honor Council protects the academic integrity of the University by encouraging consistent ethical behavior by students in their academic work. The Honor Council investigates and adjudicates alleged violations of the Undergraduate Student Honor Code (http://www.miami.edu/honor-code/). The Council is responsible for educating the University community on Honor Code related issues and promoting academic integrity through a variety of educational programs. The Council consists of representatives from the undergraduate schools and colleges.

Members of the University community who would like to request Honor Council programming or an investigation of alleged academic dishonesty are encouraged to call the Honor Council at 305-284-5354.

International Student and Scholar Services (ISSS)

www.miami.edu/isss

ISSS represents the needs and interests of the University of Miami international community and provides support services and programs for international students, scholars, and academic departments at UM. Every year, approximately 3,600 international students (undergraduate and graduate) and scholars (professors and researchers) from 120 countries representing every region of the world study, teach, and conduct research at the University of Miami.

International students and scholars face some unique challenges as well as opportunities while pursuing their academic goals at UM. The professional and dedicated ISSS staff provides expert advice, information, services, acclimation and culturally relevant activities aimed at supporting their educational endeavors, enriching their U.S. experience, and ensuring their success over the entire course of their stay. ISSS support services and programs encompass:

• Pre-Arrival Information
• Immigration Advising for Students and Scholars in F-1 and J-1 Status
• Employment Information and Authorization
• Online Tax Return Preparation System
• Liaison with Sponsoring Embassies, Government and Agencies
• The International Student Grant
• Short-Term, Small Emergency Loans
• Assistance with Personal and Adjustment Problems
• Assistance in Coping with Crises
• Advocacy
• International Student Orientation

• International Scholar Orientation
• Advise the Council of International Students and Organizations (COISO)

On the ISSS website you will find detailed information regarding each of these services and programs. Please do not hesitate to contact us if you have any questions or require additional information. We look forward to assisting you.

1306 Stanford Drive
Whitten University Center, Suite 2275
Coral Gables, FL 33146-6929

Libraries

http://library.miami.edu/

The libraries of the University of Miami (http://welcome.miami.edu/academics/libraries/) rank among the top research libraries in North America with a combined collection of over 3.6 million volumes, with 95,600 current electronic and print serials. The libraries are located on the Coral Gables, Rosenstiel, and Medical campuses.

Access to Millions of Resources

Consult the library website (http://library.miami.edu) to get access to millions of articles, books, and other resources through our online catalog and databases.

Individual and Collaborative Study Space

Learn about the hours (http://library.miami.edu/hours/) we are open for you.

Learning Commons

Discover and explore the services and resources (http://library.miami.edu/learningcommons/) available to support you. Consult with peers and experts on writing, research, math, creativity tools and technologies, digital scholarship, and more.

Research Help Across the Disciplines

Librarians (http://sp.library.miami.edu/subjects/staff.php?letter=Librarians%20by%20Subject%20Specialty/) and Peer Research Consultants are available to support students in all courses and majors. Consider us part of your network.

Online Research Guides for Courses and Majors

Online research guides (http://sp.library.miami.edu) can help you find the resources you need for course assignments, research projects and more.
Ombudsperson and University Troubleshooters
ombuds.studentaffairs.miami.edu

The Ombudspersons and University Troubleshooters provide open channels of communication between students and the university by listening to student concerns, investigating the facts and attempting to resolve situations in the best possible way. Ultimately, the goal is to resolve matters and assist students in their success at the University. The Ombudspersons and University Troubleshooters do not bypass or circumvent those individuals who have responsibility for departments or classroom instruction. Nor will they eliminate certain structured grievance and appellate mechanisms already established by the University.

Ombudsperson
An Ombudsperson interprets University policy for students and make recommendations to the central administration when policy changes are needed. The University of Miami has two Ombudspersons for students. The Academic Ombudsperson works most closely with issues with faculty, coursework, grade appeals, etc. The Administrative Ombudsperson works most closely with administrative issues such as financial registration, access concerns, and university polices and procedures. Ombudspersons connect students to faculty and administrators who will listen, answer questions, interpret policies/procedures and provide guidance on the appropriate steps to consider for a resolution. The Ombudspersons seek to resolve matters informally before they become matters in a formal grievance/appeal proceeding and works with students in establishing next steps to assist in their success at the University. However, if a formal grievance/appeal is most appropriate, they can provide guidance on the process.

University Troubleshooters
University Troubleshooters are faculty members and administrators who serve as a resource for students seeking assistance. They represent in a wide range of campus departments, who assist students with academic and administrative related matters. If a student has spoken to the appropriate University Troubleshooter and have not brought resolution to a student’s concern, students should contact the Ombudsperson. For a listing of University Troubleshooters, click on the following links: Academic Troubleshooters (https://ombuds.studentaffairs.miami.edu/who-can-help/administrative-troubleshooters/) or Administrative Troubleshooters (https://ombuds.studentaffairs.miami.edu/who-can-help/administrative-troubleshooters/).

For more information, visit miami.edu/ombudsperson (http://www.miami.edu/ombudsperson/), call 305-284-4922, email ombudsperson@miami.edu or visit Ashe Building 244.

Student Health Service
https://studenthealth.studentaffairs.miami.edu/

The Student Health Service provides primary care, specialty care and pharmacy services to eligible (http://www.miami.edu/sa/index.php/student_health_center/general_information/#Eligibility) University of Miami students. You are not required to have the Health Center sponsored insurance plan to utilize our services. Appointments can be scheduled at mystudenthealth.miami.edu (https://caneid.miami.edu/cas/login?service=https://mystudenthealth.miami.edu/) and services are also available on a “drop in” basis.

Contact Information
Telephone: 305-284-9100
Fax: 305-284-4098

Hours of Operation
Fall and Spring semesters:

- Mondays, Tuesdays, Wednesdays, and Fridays: 8:30 a.m. to 5:00 p.m.
- Thursdays: 9:00 a.m. to 5:00 p.m.
- Sundays: 11:00 a.m. to 4:00 p.m.

Winter break, Spring break, and Summer sessions:

- Monday through Friday: 8:30 a.m. to 5:00 p.m.

The Health Service is closed on Saturdays and University holidays. After hours assistance is available by calling 305-284-9100.

For sudden, severe illness or serious accidents dial 911. For illnesses or injuries requiring immediate attention, students are urged to go to an Emergency Room. After hours assistance for urgent situations can be obtained by calling 305-284-9100. Students with United Healthcare insurance may also contact the United Healthcare Nurseline by calling 800-436-7709 and selecting the Health Resources option. For less urgent conditions, you may visit one of the local Urgent Care Centers (https://studenthealth.studentaffairs.miami.edu/_assets/pdf/urgent-care-centers.pdf).

Eligibility/Access
The Health & Counseling Centers Fee, is mandatory for students regardless of credit hour load and all students registered in an off-campus program who are enrolled in the University sponsored student insurance plan (https://studenthealth.studentaffairs.miami.edu/insurance-information/domestic-students/).

Employees may be charged the Health and Counseling Centers fee on their initial bill, however the charge will be removed from their bill soon after the registration changes.
Health Insurance

Domestic students enrolled in six or more credit hours per semester (or considered full time) are required to obtain adequate health insurance (see exceptions (https://studenthealth.studentaffairs.miami.edu/)). The annual premium for the health insurance plan offered through the University is added to each student's fees. Domestic students with adequate alternative coverage may request cancellation of the insurance fee via CaneLink. Insurance cancellation must be renewed each year via the United HealthCare (UHCSR) waiver portal (https://urldefense.proofpoint.com/v2/url?u=https-3A__studentcenter.uhcsr.com_&/d=DwMGaQ&). You or your designee will need your student ID (C#), date of birth, and insurance information in order to submit a waiver request. You will receive a waiver approval or denial (if we are unable to confirm insurance coverage) from waiverstatus@uhcsr.com within 5 business days of waiver submission.

Deadlines to waive the insurance are:

- July 15 for the Fall semester
- January 5 for the Spring semester
- April 25 for Summer I
- June 25 for Summer II

Domestic students can check the status of their insurance waiver/cancellation request via CaneLink. The insurance premium will be prorated for those students entering for the first time in the Spring or Summer semesters. No waiver and/or refund will be granted after the above dates.

Students who have previously waived the insurance charge can reinstate the insurance prior to the Spring semester or first Summer session by completing the reinstatement request form and checklist. Coverage can also be reinitiated at the start of the Fall semester by choosing not to re-waive the charge, or at other times during the academic year, if within 30 days of termination of other similar coverage, by completing the reinstatement request form and checklist (https://studenthealth.studentaffairs.miami.edu/insurance-information/domestic-students/). Documentation of termination may be requested.

Deadline for reinstatement of insurance is March 25th for the Spring semester. Please do not consider your reinstatement complete until reinstatement has been verified via CaneLink, i.e. the charge has been posted to your student account and all charges on your account have been paid.

All international students are required to enroll in the University sponsored health insurance program. The annual premium for this coverage is added to each student’s fees.

Any additional questions regarding the health insurance requirement should be directed to the Student Health Service at 305-284-9100 or to studenthealth@miami.edu.

Immunization

All students are required to provide proof of immunization against measles, mumps and rubella and tetanus, diphtheria and pertussis. All new students must also provide proof of immunization against hepatitis B (https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization/) and meningococcal meningitis (https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization/) or sign a waiver declining these immunizations. An immunization (https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization/) form must be completed and returned to the Student Health Service prior to arrival on campus. For students less than 18 years old, the meningitis/hepatitis vaccine waivers must be signed by a parent or legal guardian.

All international students must also be screened for tuberculosis by completing page two of the immunization form (https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization/).

Deadlines for submission of immunization records are Fall - August 22nd, Spring - January 15th, and Summer - April 15th. Failure to comply with this requirement will interfere with registration. Immunization information must be entered at mystudenthealth.miami.edu (https://mystudenthealth.miami.edu) prior to faxing or mailing the form to the Student Health Service for verification. Immunization compliance can also be verified at mystudenthealth.miami.edu (https://mystudenthealth.miami.edu). Instructions on the use of mystudenthealth.miami.edu (https://mystudenthealth.miami.edu) is available at miami.edu/student-health (http://www.miami.edu/student-health/).

Most students will be able to obtain the required immunization information from their prior medical providers or from their prior high school, college or university. Students who believe that they were previously immunized but are unable to provide proof of immunization may either obtain blood tests confirming immunity or obtain the necessary immunizations. Immunizations and blood tests documenting immunity are available at the Student Health Service. All charges are in addition to processing fees for late forms.

Immunization against varicella (chicken pox) is suggested and is available at the Student Health Service for a reasonable charge.

Pharmacy

Students with the Health Service sponsored insurance plan receive enhanced benefits if prescriptions are filled at the Walgreens pharmacy located on the first floor of the Lennar Medical Center.

Lennar Walgreens Pharmacy

Hours: Monday – Friday: 9:00 am – 6:00 pm
Phone: 305-351-0606
Fax: 305-351-0608

Study Abroad

Dept. Code: SAP

Opportunities for study abroad are available for some degree programs during the summer, fall, spring and intersession terms. Students may participate in programs led by faculty members or may participate in semester program options. In some programs it is possible to earn graduate credit hours for study taken abroad. The curriculum must be worked out by the student in conjunction with an advisor.
With over 80 unique opportunities overseas, students have many options to study abroad on UM programs that align with their interests. Students can live and learn abroad through short term and long term programs with UM faculty or at UM partner universities overseas. Programs with UM faculty are unique in their emphasis on experiential learning, pre-arranged group housing, excursions, and courses taught by UM professors and overseas academic experts. Examples of these programs include UM semester-on-locations in Prague, Shanghai, Paris, Buenos Aires, Cape Town, India, the Galapagos, and Rome, as well as short term faculty-led programs during the summer, January intersession, and spring break in Europe, Asia, Africa, and South America.

Students can also receive UM credit hours and grades while studying at any one of UM’s partner universities overseas. These programs can be undertaken for a semester, year, and/or during the summer. Among a multitude of other options, students can study Aboriginal studies at University of Sydney, be immersed in Spanish culture in Seville, explore Iceland’s unspoiled nature while studying earth sciences at the University of Iceland, immerse themselves in Japanese culture and business practices at Sophia University in Tokyo, or become acquainted with the changing panorama of international relations at University of San Andres in Argentina. Many of these programs are delivered in English so foreign language proficiency is not required for most study abroad opportunities.

Students who participate in UM Study Abroad programs will receive UM grades and credits and are able to use their existing financial aid towards semester program costs. With careful planning and academic department approval, students can apply their courses abroad to their majors, minors, cognates, or elective credits. Programs are open to sophomores, juniors, and seniors who meet posted eligibility requirements for admission such as minimum cumulative GPA.

The Schools and Colleges at UM encourage study abroad options for their students. With the assistance of the Study Abroad Office and the guidance of academic advisors, students can select a study abroad program to fit almost any major. Additionally, UM financial aid will apply to the costs of the UM programs. Students are advised to plan as early as freshman year so studying abroad can be incorporated into their academic plan.

The cost of studying abroad varies depending on the type, length, and location of the program. Students are often surprised at how affordable studying abroad can be. Students participating in a UM study abroad program will be able to use their financial aid abroad. Participants are charged full tuition for the term abroad and the financial aid package will be adjusted based on the estimated expenses of the program.

As studying abroad is seen as such an important aspect of a college career, many national and institutional scholarships are available. Interested students should begin to research scholarship opportunities early. The most prestigious study abroad scholarships, which grant up to $10,000 per semester, have applications with deadlines up to 18 months before the study abroad program begins. Several other scholarships, with deadlines similar to program application deadlines, are also available and grant up to $5,000. Learn more about finances and scholarships by visiting the Study Abroad website, speaking with the advisors in the Study Abroad Office and the Office of Financial Assistance Services.

Students enrolled in any study abroad program at a partner institution may not earn 25 percent or more of their credits toward any UM degree program (credit requirements may vary by major/level), including courses taught by UM faculty. A student who anticipates earning 25 percent or more of his/her degree credits while participating in a study abroad program must immediately inform his/her advisor or program chair, who will be responsible for notifying the appropriate parties so that advance approval can be obtained from the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

For additional information, contact:
Office of Study Abroad
Dooly Memorial Classroom Building, Suite 125
Coral Gables, FL 33146
Tel: 305-284-3434

Website: studyabroad.miami.edu (http://www.studyabroad.miami.edu)

Undergraduate Housing and Residence Life
hrl.studentaffairs.miami.edu

Housing and Residential Life

The University of Miami offers undergraduate on-campus housing in five residential colleges and University Village.

Each residential college has residential faculty members, an Area Director/Assistant Area Director, and student staff who all live in the residential college with the resident students to support and promote student well-being, safety, academic achievement, student learning, and development. Numerous social, educational, cultural, and recreational programs are offered throughout the academic year.

General Highlights

• The University has both single and double rooms. Singles are limited and assigned based on seniority living on campus and, thus, entering students are typically assigned to double occupancy rooms.
• All non-local freshmen students are required to live in University housing for two academic semesters, as long as space is available. This policy does not apply to freshmen students living with parents or legal guardians in Miami-Dade or Broward Counties. Non-local freshman must complete the Live-On Requirement exemption Request Form (https://hrl.studentaffairs.miami.edu/living-on-campus/what-to-expect/) in order to be exempt from this requirement.
• University Village, an apartment-style residential community, is an available option to juniors and seniors, who have completed 60 or more credit hours. The apartments are fully furnished and include in-apartment washers and dryers, full-size kitchen appliances (stove, refrigerator, microwave, & dishwasher), and reserved parking (extra fee).
• All housing facilities are co-educational with men and women living on alternate floors or alternating separate suites or apartments. Gender inclusive housing is available upon request.

Applying for On-Campus Housing

• Admitted undergraduate students, following verification of acceptance to the University and payment of the enrollment deposit, can apply for housing via CaneLink (http://www.canelink.miami.edu/).
• Students are encouraged to apply for housing as soon as possible after paying the enrollment deposit. New freshmen housing applications should be submitted by May 1; applications received
University of Miami Academic Bulletin

from new freshmen after May 1 will be accommodated on a space available basis.

- The $500 pre-payment is paid by credit card at the time of application.
- Assignments to buildings, rooms, and specific roommates are made according to the date of application, receipt of the housing prepayment, and overall availability.
- Whenever possible, requests for roommates are honored. However, if specific preferences are not available, the University reserves the right to assign students to other roommates.

The housing agreement is for the entire academic year (both fall and spring semesters), unless the applicant is:

1. applying only for spring semester housing
2. applying only for one of the offered summer housing sessions
3. graduating in December (must notify HRL directly)
4. participating in a University of Miami study abroad experience spring semester (must notify HRL directly)
5. not enrolling in the University spring semester (must notify HRL directly)

Housing cancellations received through May 31 will result in a $500 cancellation penalty. Cancellations received after May 31 will result in:

- the canceling student being responsible for the fall semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the $500 cancellation penalty

Housing cancellations for the spring semester received through December 1 will result in a $500 cancellation penalty. Cancellations for the spring semester received after December 1 will result in:

- the canceling student being responsible for the spring semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the $500 cancellation penalty for early termination

Note: Written notice of cancellations must be made to the Department of Housing and Residential Life office directly.

### Off-Campus Housing Resources

The Department of Housing and Residential Life also provides assistance to students, staff, and faculty with identifying off-campus housing options, including a web-based search engine of community listings.

For resources and more information about housing on-campus or assistance with off-campus housing, please visit our website (http://hrl.studentaffairs.miami.edu/), call 305-284-4505, or email (housing@miami.edu).

### University Dining Services

To read more about the University of Miami Dining Services program visit our website link below.

University of Miami Dining Service (http://business-services.miami.edu/departments/auxiliary-services/dining-services/)

### Veterans

#### Veterans' Benefits

The University of Miami maintains a Veterans’ Affairs (V.A.) Office in the:

Office of the University Registrar  
1306 Stanford Drive  
Whitten University Center, Room 1230  
Coral Gables, FL 33146

Mailing Address:  
P.O. Box 248026  
Coral Gables, Florida 33124-6914

This office assists veterans and dependents of veterans who are entitled to V.A. educational benefits under Chapter 30, 31, 33, or Chapter 35 of Title 38, U.S. Code, or Chapter 1606. The University of Miami participates in the Yellow Ribbon Program for qualified Chapter 33 recipients.1

Anyone needing information on Veterans’ Benefits is advised to contact the Office of the University Registrar or visit their website (https://registrar.miami.edu/forms-and-services/veterans-affairs/).

V.A. students with previous post-secondary educational training/experience must request an official transcript(s) be sent to the university. If the transcript has not been received prior to the end of the student’s initial semester, or as specified in the guidelines under the program, the Veterans’ Affairs Office will not re-certify the student for V.A. educational benefits. The Veterans’ Affairs Office may re-certify the student after the transcript has been received.

The V.A. student's previous training and/or experience will be evaluated by the university. Should credit(s) be accepted and/or awarded, the V.A. student’s tuition and training time may be reduced proportionally. The V.A. and the student will receive a written notice of the credit(s) allowed.

1 The University of Miami’s Yellow Ribbon Program is available to students in the Fall and Spring semesters only.

### Standards of Progress Policy for Veterans

Satisfactory progress is indicated by a Satisfactory Progress Average (SPA), which is a variation of the Quality Point Average (QPA). The SPA is computed by the following formula:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>E</td>
<td>0</td>
</tr>
<tr>
<td>IE</td>
<td>0</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
</tbody>
</table>
to the institution is pending from the VA. This school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent the student’s enrollment
- Assess a late penalty fee to the student
- Require the student to secure alternative or additional funding

University of Miami VA Pending Payment Compliance

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Note that “E’s”, “F’s”, “IE’s” and “IF’s” are included in the SPA.
- A grade of CR will be counted as CR=2.
- The SPA is determined by dividing the total quality points earned by the credits attempted.

When a course is dropped with a grade of ‘W’, the V.A. requires a student to repay any benefits received for that course unless the V.A. determines there are mitigating circumstances involved.

Benefits will not be paid for courses in which a student receives an NG or NC or IPs that do not convert to a letter grade.

- An SPA of 2.0 or greater for undergraduate students, or 3.0 or greater for graduate students, is satisfactory progress.
- Less than 2.0 for undergraduate, and less than 3.0 for graduate students, is not satisfactory.
- Law and M.D. students will be considered to be making satisfactory progress as long as they meet the academic standards set by their schools for retention in their degree programs.
- The SPA is non-cumulative. It is computed each term on a one-term basis.
- Any term a student’s SPA is less than 2.0 for undergraduate or 3.0 for graduate, he/she will be notified that he/she is not making satisfactory progress. He/she will be certified, in a probationary status, for only one additional semester.
- If, at the end of this additional semester, his/her SPA for that semester is still below the satisfactory level, the V.A. will be notified of the unsatisfactory progress and his/her educational benefits will be terminated.
- A student whose V.A. educational benefits have been terminated for unsatisfactory progress may petition the Veterans’ Affairs Office to be re-certified after one semester has elapsed. Please address your request to:
  VA Certifying Official
c/o Office of the University Registrar
University of Miami
P.O. Box 248026
Coral Gables Florida 33124-6914

- The Veterans’ Affairs Office may re-certify the student for V.A. educational benefits only if there is a reasonable likelihood that the student will be able to attain and maintain satisfactory progress for the remainder of the program.

For V.A. Payment of Benefits Purposes

All V.A. Students are required to notify the V.A. Certifying Official, every semester, in writing, their intent to use their benefits, and therefore to be certified for that semester.

- An "I" (incomplete) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of one calendar year unless permission for a delay is granted by the Academic Dean.
- An "NG" (no grade) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of one regular semester unless permission for a delay is granted by the Academic Dean.
- If permission is obtained, a memo signed by the Academic Dean must be given to the Veterans’ Affairs Office during the semester in which the ”I" or “NG" was to be removed. This memo should also state the period of time for which the delay is approved.
- If a memo giving permission for a delay in the "I" or "NG" removal is not received by the end of the semester in which the "I" or “NG" was to be removed, the V.A. will be notified of the incomplete grade resulting in a loss of educational benefits for that course.

Please consult with our office regarding regulations for “IP’s” received in Thesis, Research, or Dissertation.

There is an official period after each registration in which a student may drop a course without a “W” appearing on his/her grade report. This period is not to be confused with the last date to drop a course with a "W" grade. Please check the academic calendar on the University (http://www.miami.edu/registrar/) or Registrar’s website (http://www.miami.edu/index.php/registrar/calendar/) for dates.

Class Attendance and Absences

- Regular and punctual class attendance is vital for all students.
- It is the student's responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.
- A copy of the student’s transcript will be placed in the student’s permanent file maintained by the Veterans’ Affairs Office.

Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses. V.A. educational benefits will only pay for courses that are toward the program in which you are enrolled.

Veterans and children of deceased or totally disabled veterans receive training allowance in proportion to the schedule carried. The full load required to receive full training allowance is 12 credits in undergraduate school (9 credits in Graduate School).
Undergraduate Policies and Procedures

While the University makes every effort to provide academic counseling to its students, its basic policy places the responsibility for planning an academic program upon the student.

The University of Miami relies on electronic means, e.g. email, CaneLink (including its mobile application), for correspondence with students. Students are required to maintain a working email address and are expected to update their personal biographical information annually via their CaneLink account. Students who fail to maintain a working email account may not receive critical university information.

Students are expected to familiarize themselves with the requirements of:

- the University,
- the schools in which they are enrolled, and
- their major department.

Requirements refer to those stated in the Bulletin at the time of admission to degree status, unless a student has not been continuously enrolled. In such cases, the Bulletin in effect at the time of re-admission is the one to be used. Under special circumstances, a student may appeal the bulletin decision. In such cases, the determination of the Bulletin in effect is made by the readmitting School or College.

Academic core requirements will not be waived for students under any circumstances.

The work of each student is under the supervision of an academic Dean and of the appropriate Scholarship Committee. A student who fails to maintain an adequate academic record may be dismissed from the University.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters. If a student whose record is unsatisfactory is for some reason permitted to continue in attendance, the appropriate scholarship committee or Dean may specify the standard that must be attained, and any other conditions to be met.

A student who graduates and plans to enter a graduate school or professional school at the University of Miami must apply for admission to the appropriate school of the University in accordance with application deadlines of respective schools.

Not all the regulations and procedures described above pertain to the Graduate School, the Law School, and the School of Medicine. The specific regulations of these schools can be found in their school specific pages and/or website.

Admission

The University of Miami is a member of the National Association for College Admission Counseling and subscribes to its Statement of Principles of Good Practice.

Advanced Placement/Credit

The University allows students to receive college credit hour toward graduation from the following programs: Advanced Placement, International Baccalaureate, Dual Enrollment, and College Level Examination Program. To have Advanced Placement, International Baccalaureate, or College Level Examination Program credit hours evaluated, the student must submit an official test result report to the Office of Undergraduate Admission. The University of Miami does not give credit hour for CLEP Foreign Language and General Examinations. Students taking Dual Enrollment courses (college courses taken while still in high school) must submit an official college transcript for review of potential transfer credit hour. Please refer to the transfer student section for requirements to transfer college coursework.

A student must submit official AP, IB, Dual Enrollment transcripts or CLEP results no later than the end of the first semester of enrollment for review. Documents submitted after this time period will not be reviewed and credit hour will not be awarded.

The University will accept no more than 60 credit hours from these programs to count toward the 120 credit hours required for graduation.

Early Admission

A limited number of carefully selected students who are currently enrolled in high school and who have completed three years of study may be admitted to the University as first-year students. Early admission applicants typically have a very strong academic background and demonstrate a mature character.

Students who wish to apply under Early Admission must have the support of his/her parents, guidance counselor, and high school. Early applicants must also schedule an interview with the Office of Undergraduate Admission.

Early Admission applicants must submit official high school transcripts, SAT and/or ACT examination results, and all other supporting documents required to complete the application as part of the admission process.

Early Admission applicants will be notified of an admission decision by June 1 or after receipt of grades from the final high school year completed.

Since every applicant must be appraised individually, no general qualifications can be listed. Students interested in early admission may send inquiries and requests for applications to the Office of Undergraduate Admission.

First-Year Admission

The Admission Committee reviews applications and bases admission decisions on the following factors:

- **The Secondary School Record.** The applicant must be in the process of completing graduation requirements at a regionally accredited secondary school or must be a graduate of an accredited secondary school. The applicant must have successfully completed a solid college preparatory program including English, Mathematics, natural sciences, social sciences and foreign language.

- **Standardized Tests.** Applicants attending schools in the United States must submit official SAT or ACT results. The results of these tests, together with the secondary school record, provide a better measure of the ability of a candidate to perform college level work successfully than can be obtained by either measure alone.
Applicants graduating from a secondary school outside of the United States should not submit SAT or ACT results.

- **The Counselor's Evaluation Form.** This form is to be completed by the applicant's secondary school counselor and includes rank in class, test score information, and an evaluation of potential for academic success in the student's area of interest.

- **The Essay.** Since each applicant is considered individually, the Essay provides the opportunity to present information that may assist the Admission Committee as it evaluates the application for admission.

See admission procedures for first-year students (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/freshman/freshman_application_instructions/).

---

**First-Year International Admission**

**ELIGIBILITY FOR ADMISSION** (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/eligibility_requirements_by_country/)

**Admission Procedures for International Students**

**Educational Documents**

**Diplomas, Certificates**

Copies should be enclosed with the application. Students from countries following the British educational system must submit certified photocopies, or ask the examinations council to mail confidential results to the University of Miami. Reports of scores in school-leaving examinations (e.g., Baccalaureate) must also be submitted.

**Transcripts, Statements of Marks**

A transcript must contain the following information: subjects studied; marks (grades) awarded; length of class periods; number of periods per week for each subject; and grading scale with minimum passing mark. Year-by-year records of marks should be sent to the University of Miami directly from U.S. institutions. Certified records from foreign institutions may be submitted by applicants, but the University may sometimes insist that such transcripts be sent directly to the University of Miami from the issuing institutions. All secondary and tertiary transcripts must be submitted.

**English Translations**

Documents in a language other than English must be accompanied by certified English translations. Notarized translations will not be accepted. Translations supplement but do not replace original documents. Please remember to send both.

**Syllabus of University Study (description of each course or subject studied accompanied by certified English translations. Notarized translations will not be accepted).**

A current (within the past six months) bank or government sponsorship letter guaranteeing payment for tuition and fees, books, room and board, medical insurance and personal expenses for one calendar year (two semesters and two summer sessions) is required.

**Examinations for International Students**

All international students whose native language is not English, including those applying for transfer from U.S. institutions, are required to submit the results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The TOEFL code for the University of Miami is 5815.

Submitting ACT and/or SAT scores is optional for students graduating from a secondary school outside the United States.

Please see the TOEFL Score Requirements (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements/).

Conditional admission: Academically qualified applicants who are unable to take the TOEFL, or who have scored less than the required minimum, may be offered admission to undergraduate programs with the condition that they successfully complete level five of the University of Miami Intensive English Program or obtain a 550 TOEFL and higher. University of Miami TOEFL code number is 5815, and the IELTS code number is 4861.

Institutional TOEFL scores are designed for academic placement use at the University of Miami. Those needing TOEFL for admission to the University of Miami or for use elsewhere should take the TOEFL iBT instead. Visit www.ets.org/toefl/ (http://www.ets.org/toefl/) for more information about the TOEFL iBT.

Please see the IELTS Score Requirements (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements/).

IELTS is the International English Language Testing System. It measures ability to communicate in English across all four language skills – listening, reading, writing and speaking – for people who intend to study or work where English is the language of communication.

**Programs of Study**

International students are eligible to apply for all programs offered at the University of Miami. It should be noted that medicine and law are studied at the graduate level in the United States, and it is therefore inappropriate for undergraduate international applicants to request these programs.

**Financial Information**

The University of Miami has limited need-based financial aid and academic scholarships available for international applicants who qualify. To be eligible, international applicants must meet the stated deadlines and submit the required documentation.

**GED Scores**

**Submitting GED Scores**

An applicant may apply to the University upon completion of the GED in lieu of completing high school. When applying with the GED, the applicant must submit official high school transcripts up to the time of withdrawal, as well as the official GED score report and diploma.

Applicants submitting the GED must achieve the following scores to be considered for admission. These scores should be considered a guideline and do not guarantee admission to the applicant.
For exams taken in English:
A score of 175 or higher should be obtained on all four subject tests.

For exams taken in any language other than English:
A score of 175 or higher should be obtained on all four subject tests.

It is strongly suggested that applicants submitting the GED in any language other than English also submit a TOEFL score.

Non-Degree Enrollment

Adult Student Access Program (A.S.A.P.)
For information and policies regarding enrollment for classes in a Non-Degree seeking status, please visit this page: (p. 397)

305-284-4000

Transfer Admission

Transfer admission may be granted in most fields of study to students who have earned credit hours from other regionally accredited colleges or universities. Courses completed with passing grades of C or higher at other colleges and universities and acceptable for academic credit hours by the University of Miami, will be verified, and where appropriate, will be translated into University of Miami equivalents by the Office of Undergraduate Admission. However, the Dean of the College or School within the University from which the student plans to graduate determines which transferred courses may be counted toward meeting graduation requirements of that College or School.

Transfer of Credit Hours to UM

Work taken at other institutions will appear on the University of Miami transcript in separate entries as:

1. The total number of transferable credit hours attempted and quality points earned, regardless of grades, and
2. The total credit hours transferred, which shall be the total credit hours for which a grade of C or higher was earned.
   
   Note: Only the transfer totals earned are added to the University of Miami totals. Total credit hours attempted and quality points earned elsewhere are not included in the University of Miami totals.

The University does not accept transfer credit hours for courses in which a grade of C- and below (or the equivalent grade) was earned. However, grades of C, D, and F are used to calculate the transfer admission grade point average.

Credit hours are not transferred from institutions not accredited by the appropriate regional accrediting association. Limited exceptions may be made with the approval of the Dean in the College or School of the student’s major. Credit hours transferred from institutions not in existence long enough to attain regional accreditation must be validated by the attainment of a C average or better in the first 12 credit hours of course work taken at the University of Miami.

The University does not have a coursework forgiveness policy. The grades of any repeated courses will be averaged.

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

Upper division course requirements (300 level or above) at the University may not be satisfied with community college courses.

After being offered admission and enrolling, a student must submit any final college transcripts with grades, AP, IB, AICE or CLEP examination scores for review by the end of the first semester of enrollment. Any documents listed above which are submitted after this time period will not be reviewed and credit hours will not be awarded.

Required Credit Hours in Residence at the University of Miami

A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of 56 credit hours in residence at the University of Miami to earn an undergraduate degree.

A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of 45 credit hours in residence at the University of Miami to earn an undergraduate degree.

At least half of the credit hours required for the chosen Major or Minor must be completed at the University of Miami.

See Admission procedures for transfer students (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/transfer_applicants/transfer_application_instructions/).

Articulation Agreement with Miami Dade College (Honors College)

As part of the articulation agreement between Miami Dade College (Honors College) and the College of Arts & Sciences at the University of Miami, admitted students transferring from the MDC Honors College* will have the following benefits:

- No need to repeat courses/credits
- Guaranteed Junior (3rd-year) standing

*Limited to 300 spaces for fall semester, 150 for spring semester

Foote Fellows Honors Program

https://admissions.miami.edu/undergraduate/academics/honors-and-scholars-programs/foote-fellows/index.html

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Within the curricular framework of their school or college, Foote Fellows enjoy maximum freedom to explore a multitude of educational resources.
Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities and educational guidance, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

In addition, Foote Fellows have access to opportunities outside their school. Special Foote Fellow lectures are held throughout the academic year. “Books That Matter,” a rigorous, multidisciplinary seminar in reading and analyzing significant works of nonfiction, is offered to Foote Fellows. Foote Fellows also benefit from focused advising regarding post-baccalaureate distinguished fellowships and awards, support and information about co-curricular opportunities from a dedicated program manager, and networking events with other Foote Fellows from all disciplines.

To graduate with the Foote Fellows Honors Program distinction, Foote Fellow students must achieve a minimum GPA of 3.5 by the completion of the final semester.

Eligibility for the Foote Fellows Honors Program transcript distinction for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

General Education Requirements

Philosophy

The University of Miami’s General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged in a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methods and achievements in all areas of human inquiry and creative endeavor and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

As an institution of higher learning in an increasingly diverse and global community, our goals are to produce graduates who have been exposed to a broad spectrum of educational opportunities and to prepare them for successful participation in the world. The University’s General Education Requirements consist of coursework taken before, within, and in addition to students’ specialized study in their areas of concentration. The aims of the General Education Requirements are designed to ensure that graduates of the University will have acquired essential intellectual skills and exposure to a range of intellectual perspectives and academic disciplines. Whereas the requirements of majors specified by schools and colleges within the University emphasize depth of learning, the General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge.

Areas of Proficiency

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use quantitative skills with facility, and to reason cogently.

Written Communication Skills

Effective writing skills advance ideas efficiently and persuasively, so the expectation is that students become adept at using writing as an effective communication tool. Students fulfill this requirement by satisfactorily completing ENG 105 together with ENG 106 or ENG 107, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT examination may earn a student exemption from, but not credit for, ENG 105.

Students will be able to:

• Demonstrate effective written communication skills in relation to specific rhetorical tasks.
• Construct original, well-reasoned arguments using a range of materials.
• Integrate and synthesize appropriate and relevant primary and secondary sources in their writing.

Effective Fall 2017, new students without prior college credit in English Composition will be placed as follows:

• ENG 103: ACT English score below 18 or SAT Evidence-Based Reading and Writing or Critical Reading score below 430, or TOEFL iBT Writing score below 18.
• ENG 105: ACT English score 18-31 or SAT Evidence-Based Reading and Writing or Critical Reading score 430-690, or TOEFL iBT Writing score 18 or above.
• ENG 106 or ENG 107: ACT English score 32 or above or SAT Evidence-Based Reading and Writing or Critical Reading score 700 or above

Written Communication Skills General Education Requirements must be completed prior to attaining junior year classification.

Quantitative Skills

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to understand and use essential quantitative skills. The Quantitative Skills requirement helps students learn to use quantitative skills and tools to solve problems, including the interpretation, manipulation, and application of quantitative data. Students fulfill this requirement by completing either a Department of Mathematics course numbered MTH 108 or higher or a quantitative skills course approved by the student’s college/school and the University Curriculum Committee in consultation with appropriate academic units.

Students may be able to fulfill this requirement through credit earned through the following tests: AP, IB, A-Level, and Cambridge Pre-U. The University has an equivalency chart (http://admissions.miami.edu/undergraduate/application-process/ap-ib-clep-credits/) that illustrates how credit/exemption may be earned through these tests.

Students will be able to:

• Select and use appropriate quantitative methods and tools to solve problems.
• Interpret, manipulate, and apply quantitative data to solve problems.

Areas of Knowledge

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. Students satisfy this requirement through the Cognates Program, which aims to provide a broad array of intellectual and cultural exploration.

In the Cognate Program for the Areas of Knowledge requirement, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world. Students fulfill the requirement by completing three cognates, one from each of the three areas of the university curriculum: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM). A cognate is a group of at least three courses for at least nine credit hours with a shared theme or topic determined by the faculty. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the focus of the cognate.

While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed are listed on the students’ transcripts.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. All approved cognates are visible in a cognate search engine (https://cognates.miami.edu/) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the “Responsible Academic Unit” (RAU) for the cognate. Inquiries about a cognate should be directed to the cognate’s RAU.

The following rule applies to all cognates: A course may not be used to satisfy the requirements of more than one cognate. This rule applies whether the cognate requirement is being met by a major, a minor, or a designated cognate. The fact that a school requires students to take courses which the school construes as outside the major or minor, but must be taken to fulfill the requirements for that major or minor, does not allow the course to be counted for both purposes. On the other hand, the fact that a course is listed as one which must be taken to meet the requirements for a major or minor does not necessarily preclude a student from participating in a cognate which has that course as one of its options. In many cases, the student could take one of the other courses included in the cognate.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
- Understand the creation and performance of art.

The following departments and programs offer courses that are used in Arts & Humanities cognates: Africana Studies; American Studies; Architecture; Art & Art History; Cinema & Interactive Media; Classics; Creative Advertising; Dance; English; Game Design; History; Judaic Studies; Latin American Studies; Modern Languages & Literature; Motion Pictures; Music Theory – Composition; Musicology; Philosophy; Religious Studies; and Theatre Arts. Others will be added as cognates are approved.

People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

The following departments and programs offer courses that are used in People & Society cognates: Accounting; Advertising; Aerospace Studies; Africana Studies; American Studies; Anthropology; Business Law; Classics; Climate Science Policy; Communication Studies; Criminology; Economics; Ecosystem Science & Policy; Educational & Psychological Sciences; Electronic Media; Entrepreneurship; Geography; Health Communication; Health Sector Management; Hispanic Media; Human Resource Management; International Business; International Studies; Journalism & Media Management; Judaic Studies; Kinesiology & Sport Sciences; Latin American Studies; Legal Studies; Management; Marine Affairs; Marketing; Military Science; Modern Languages & Literature; Music Media & Industry; Nursing; Organizational Leadership; Philosophy; Political Science; Psychology; Public Health; Public Relations; Regional Studies; Religious Studies; Sociology; Strategic Communication; Sustainable Business; Teaching & Learning; Urban Studies; and Gender and Sexuality Studies. Others will be added as cognates are approved.

Science, Technology, Engineering & Mathematics (STEM)

Science, Technology, Engineering & Mathematics (STEM) cognates develop students’ abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.
Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.

The following departments and programs offer courses that are used in Science, Technology, Engineering & Mathematics cognates: Aerospace Engineering; Anthropology; Architecture; Atmospheric Science; Audio Engineering; Biochemistry; Biology; Biomedical Engineering; Business Analytics; Business Law; Business Technology; Chemistry; Cinema & Interactive Media; Civil, Architectural & Environmental Engineering; Climate and Science Policy; Computer Science; Economics; Ecosystem Science & Policy; Educational and Psychological Studies; Electrical & Computer Engineering; Engineering Science; Finance; Geography; Geological Sciences; Healthcare Science; Industrial Engineering; Interactive Media; International Finance & Marketing; Journalism & Media Management; Kinesiology & Sport Sciences; Management Science; Marine Science; Marketing; Mathematics; Mechanical Engineering; Microbiology & Immunology; Molecular Biology; Neuroscience; Nursing; Nutrition; Philosophy; Physics; and Psychology; Public Health; Real Estate; and Strategic Communication. Others will be added as cognates are approved.

NOTES
The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge but may be used to fulfill the cognate requirement in only one of those areas. A course may count in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates by application to the cognate’s RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course equivalencies can be used in cognates. Courses that transfer in with non-specific UM course credit hours can be used in cognates only by application to the cognate’s Responsible Academic Unit (RAU).

Transfer students entering the university with 30 or more credits may take an individualized cognate as one of the three required cognates. Individualized cognates allow for flexible use of transfer credits to fulfill a cognate requirement, as approved by the dean/advising office in the student’s school/college.

Grades

### Academic Standing, Probation, and Dismissal

At the end of each semester the University shall determine whether a student is in Good Academic Standing, on Academic Probation, or subject to Academic Dismissal. Some schools and colleges may have exceptions to the Good Academic Standing, Academic Warning, Academic Probation and Academic Dismissal policies listed below.

#### Grades

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>CGPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 33</td>
<td>1.7</td>
</tr>
<tr>
<td>33-64</td>
<td>1.8</td>
</tr>
<tr>
<td>65-96</td>
<td>1.9</td>
</tr>
<tr>
<td>More than 96</td>
<td>2.0</td>
</tr>
</tbody>
</table>

**First-semester freshmen who have a semester grade-point average below 1.3 shall be placed on Academic Probation.** In addition, students who fail to make satisfactory progress toward meeting the degree requirements specified by their School or College may be put on Probation by the Academic Standards Committee of the School/College. Students on Academic Probation must meet with their academic advisor prior to the following semester and shall be restricted to a 13-credit hour load.

#### Good Academic Standing

To be in Good Academic Standing a student must not be on Academic Probation or subject to Academic Dismissal.

#### Academic Probation

Students other than first-semester freshmen (non-transfer student) whose UM cumulative grade-point average (CGPA) in University of Miami courses is below the following levels shall be placed on Academic Probation.

#### Academic Dismissal

A student who remains on probationary status after two consecutive semesters on Academic Probation shall be subject to Academic Dismissal. A student who has been on Academic Probation for one semester and has a CGPA below 1.0 shall also be subject to Academic Dismissal. The decision to dismiss shall be made by the Academic Standards Committee of the School or College in which the student is enrolled. If a decision is made not to dismiss, the student shall remain on Academic Probation.

#### Appeals and Readmission

Students who wish to appeal their Academic probation or dismissal for academic reasons, must do so in writing to the School or College Academic Standards Committee within thirty days of the notice of dismissal. Those who have been dismissed for academic reasons shall not be considered for readmission to any school or college at the University until at least two regular semesters have elapsed since their dismissal.

#### Faculty Senate Student Affairs Committee Standard Academic Appeals Process

The Faculty Senate Student Affairs Committee (FSSAC) has responsibility for undergraduate student academic appeals. The FSSAC includes faculty representatives from all undergraduate schools as well as three non-voting ex officio representatives: a graduate and undergraduate student representative and the University ombudsperson. The FSSAC reviews undergraduate student academic appeals that have not been resolved at the department, school, or college levels. As noted in section II below, the FSSAC hears cases only after they have gone through the departmental and college process. The processes are the same for grade and non-grade appeals except as noted below.

#### I. Time Constraints

Appeals must be filed within a year of the occurrence of the academic action resulting in the appeal and prior to the completion of all degree
II. Order of Appeal
A student appeal regarding a faculty or administrative academic action must be addressed to the following entities or persons in this order:

1. The faculty member or administrator responsible for the course, program, or activity.
2. The department/program chair/director or administrative superior of the faculty member or administrator.
3. The Dean or designee of the school or college offering the course, program or activity.
4. If the school, college or administrative unit has a committee constituted to hear student appeals, that committee must be consulted before proceeding to the next level.
5. The ombudsperson. The student is to provide the materials listed in Section III below to the ombudsperson who will review the merits of the appeal, and attempt to resolve the matter. The ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by the FSSAC.
   If the matter is the appeal of a final grade, and only after all the other steps have been taken, the ombudsperson may refer the matter to the Provost who will decide whether or not to refer the appeal to the FSSAC.
   For a non-grade-appellate, the student has the final authority to decide whether to take the appeal to FSSAC. If s/he chooses to do so, the ombudsperson shall forward the appeal and the accompanying documentation to the FSSAC via the Faculty Senate Office.
6. The Provost may request that the FSSAC review an appeal. If, but only if, s/he does so, the FSSAC shall have jurisdiction to review a grade-related appeal.
   a. As part of the request, the Provost shall forward to the FSSAC, via the Faculty Senate Office, the materials submitted by the student as indicated in Section III, below.
   b. The FSSAC will review the student’s written appeal (see section III below), confer with the appropriate faculty, administrators, and others as it deems necessary in making its recommendation to the Provost. The FSSAC may request an interview with the student, additional information or access to records, interviews with relevant faculty or administrators, or additional information or access to records kept by faculty or administrators.
   c. The FSSAC will communicate its findings and recommendations to the Provost. Copies shall be provided to the Faculty Senate.
7. The final decision with respect to the grade-related appeal will be made by the Provost and communicated to the student in writing. Copies shall be provided to the Faculty Senate Office and to the Chair of the FSSAC.
8. For non-grade-related academic appeals:
   a. The FSSAC shall act upon those appeals and report its findings and recommendation to the Provost. The Committee shall forward to the Chair of the Faculty Senate a copy of its recommendation to the Provost.
   b. The Provost shall communicate his/her decision on each recommendation to the student concerned, to the Chair of the Committee, and the Chair of the Faculty Senate.

III. Materials for an Appeal
When bringing an appeal, the student must state in writing issues s/he wishes to have considered. The appeal must include:

1. An appeal letter clearly stating the conditions as seen by the student, and offering reasons for granting the appeal.
2. The appeal letter must indicate if the student wishes to make a personal appearance and, if so, the reasons why the appearance is necessary.
3. Documents of support (e.g., examinations, term papers, syllabi, or medical documentation of illness) that the student wishes to have examined.
4. All written decisions made at earlier levels of the appeal by individual faculty/administrators, departments/programs/administrative units, college or school committees, and deans which are available to the student or in the student’s possession.

IV. Other Notes and Special Conditions
1. If the appeal is based on or related to a charge made by the student of discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, age, or handicap, a representative of the appropriate University office will be contacted and, as appropriate, consulted in the appeal process.
2. If the appeal is based on or related to a disability:
   a. The ADA Coordinating Committee shall serve in an advisory capacity.
   b. The student is to include in the materials provided, the appropriate forms from the Office of Disability Services documenting:
      i. An evaluation of the disability
      ii. Recommendations related to the disability
   c. The FSSAC does not consider appeals based upon the grant, denial or modification of an accommodation by the Office of Disability Services. Instead, any such appeal is as prescribed by the Office of Disability Services Grievance Procedure only.

The Grading System

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent attainment</td>
</tr>
<tr>
<td>B</td>
<td>Good attainment</td>
</tr>
<tr>
<td>C</td>
<td>Fair attainment</td>
</tr>
<tr>
<td>D</td>
<td>Poor attainment (earns credit hour but may not fulfill requirement for a major)</td>
</tr>
<tr>
<td>F</td>
<td>Failure (effective Fall 1995)</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped on or before the last day for withdrawing from classes as published in the official calendar of the University. Credit hour can be earned only by successful repetition of the course.</td>
</tr>
<tr>
<td>WL</td>
<td>Late Withdrawal—Administrative; Only used for Complete Withdrawal (Effective Summer 2017)</td>
</tr>
</tbody>
</table>
Incomplete work in passing status with the instructor’s permission to complete the course. An “I” will be assigned only if the instructor is satisfied that there are reasonable non-academic grounds for the student’s incomplete work.³ An “I” is not intended to be assigned in order to permit a student to repeat a course without registration or to permit a student to do additional work in order to improve upon grades earned during the semester. The student who receives an “I” must complete the course with a passing grade within the time frame specified by the professor of the course but not longer than the end of one calendar year, or prior to graduation, whichever occurs first. An Academic Dean may approve an extension initiated by the course instructor. An “I” not completed prior to the student’s graduation shall be changed to an “IE” or “IF” by action of the student’s Academic Dean.²

Denotes in progress grade assigned upon satisfactory completion of the first semester of a two-semester sequence, with the final grade for both courses to be submitted at the end of the second semester of the sequence. Please note that all “IP”s must be converted to a letter grade or “IF” at graduation. “IP” will also be converted to “IF” upon any departure from the University for a period in excess of one year.⁵

Symbol indicating that an “I” grade was not appropriately completed.⁴ The symbol “IF” is equivalent to an “F” when computing a student’s average.

Completed

Grade signifying that credit only is awarded based on a “C” average or better.

Grade signifying that no credit hour is awarded based on a course average below a grade of “C”.

Symbol assigned by the Office of the Registrar indicating that the instructor has not reported the student’s grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student’s graduation, or by the end of one regular academic semester, whichever comes first. An Academic Dean may approve an extension initiated by the course instructor. An “NG” not replaced by a passing grade, or by a “W”, prior to the student’s graduation shall be changed to an “F” by action of the student’s Academic Dean.⁵

Credit Only Option

The credit only option has been established to encourage students to explore academic areas outside their major and minor fields of concentration. Students may use this option with free electives and receive a CR (Credit Received) or NC (No Credit). These courses become part of a student’s record, but they do not count in the grade point average as computed by the University of Miami.

Grade Point Average

The grade point average is used to determine:

- class rank
- graduation and university honor eligibility
- good standing, probation, and dismissal status
- scholarship eligibility

Your official grade point average is based only on the work you have completed at the University of Miami. The only exception to this policy is for determining whether a student qualifies for university honors established by the minimum grade point requirement at the time of graduation. For graduation purposes, cumulative grade point average is defined as either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere whether or not the transfer work is accepted toward a degree at the University of Miami, whichever is lower.

Quality points per credit hour are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>1.30</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>E</td>
<td>0.00</td>
</tr>
<tr>
<td>IE</td>
<td>0.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

Courses marked with an “IE” or “IF” count as credit hour attempted but are not counted in credit hours earned and do not carry quality points.³

Credit hours marked CR are counted as credit hours earned but are not counted in credit hours attempted and do not carry quality points. Courses marked with the symbols I, IP, W, NC, and NG do not carry credit hour attempted, credit hours earned, or quality points.

The grade point average is determined by dividing the total quality points earned by the total credit hours attempted.

Military service credit hour, some foreign university credit hour, correspondence course credit hour, credit by examination, etc., are not awarded quality points and do not enter the computation of the grade point average.

2. Faculty Senate legislation #2000-24(B)
3. Faculty Senate legislation #2001-29(B)
4. Faculty Senate legislation #85005(B) and #97001(B)
5. Faculty Senate legislation #85001(B)

Honor Code

The Honor Code, initiated at the request of the Undergraduate Student Body Government, ratified by student referendum, approved by the Faculty Senate, by the President of the University, and administered by students, protects the academic integrity of the University of Miami by encouraging consistent ethical behavior among its undergraduate students. The Code provides standards that prohibit all forms of scholastic dishonesty, including cheating, plagiarism, collusion, and falsification or misrepresentation of experimental data. The Code covers all written and oral examinations, term papers, creative works,
assigned computer related work, and any other academic work done at the University by an undergraduate student.

All undergraduate students are responsible for reading, understanding, and upholding the Honor Code. Signed pledges are required for written work submitted for evaluation, but the absence of a signed pledge does not free a student from the ethical standards required by the Code. Procedures for dealing with infractions of the Code, including provisions for appeals, are printed in the text of the Honor Code. Copies may be obtained from the Office of the Dean of Students or from the office of the Undergraduate Student Body Government, or online (http://www.miami.edu/honor-council/).

In keeping with the traditional prerogatives of university faculties, nothing in the Code infringes on the faculty's assignment of grades undertaken in a class. Instructors are informed when students have been found guilty of infractions involving their classes. Courses in which students have been failed for academic dishonesty may neither be dropped nor repeated under the terms of the freshman repeat rule.

Honor Rolls

The Dean's List
The Dean's List is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained high scholastic achievement for the semester. To attain the Dean's List, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding credit hours earned in courses taken for credit only);
2. have attained a quality point average of 3.50 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Dean's List will be announced by each college and school at the end of the semester. The Office of the Registrar will post this achievement to the student's permanent record.

The Provost's Honor Roll
The Provost's Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained a high scholastic achievement for the semester. To attain the Provost's Honor Roll, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit hour only);
2. have attained a quality point average of 3.75 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Provost's Honor Roll will be announced by the Provost's Office. The Office of the Registrar will post the achievement to the student's permanent record, and distribute the Provost's Honor Roll Certificate.

The President's Honor Roll
The President's Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained the highest possible scholastic achievement for the semester. To attain the President's Honor Roll a student must, for the semester:

1. have registered for and completed 12 or more graded credit hours (excluding credit hours earned in courses taken for credit only);
2. have attained a quality point average of 4.0 for the semester;
3. have no courses with pending grades (I or NG).

The President's Honor Roll will be announced by the Office of the Registrar who will post the achievement to the student's permanent record, and distribute the President's Honor Roll Certificate.

Graduation

Degrees
It is the responsibility of the student to be sure he/she makes satisfactory progress toward, and fulfills requirements for, the degree he/she seeks. He/she may obtain help in the office of his/her Academic Dean.

To receive a Bachelor's degree from the University, the student must earn at least 120 credit hours (more in some schools), with a C average (2.0) or better as well as a C average for all work done at the University of Miami.

Students must also meet all of the degree requirements of their respective schools and should not expect requirements in composition, mathematics, foreign languages, or other subject areas to be waived for any reason.

- A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of 56 credit hours in residence at the University of Miami to earn an undergraduate degree.
- A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of 45 credit hours in residence at the University of Miami to earn an undergraduate degree.
- In addition, each student must complete at least half of the credit hours specified for his or her major in residence at the University of Miami.
- Not more than 30 credit hours of correspondence work and extension work combined will be accepted toward a degree, and neither correspondence nor extension work may be credited as a part of the last 45/56 credit hours of the student's program.
- Not more than 30 credit hours based on military experience will be awarded toward the degree.
- Credit hours earned in a manner other than by course registration, i.e. proficiency examination, CLEP, placement tests, etc., may not be used to meet the final 45/56 credit hour residency requirement, however such credit by examination may be earned while the student is enrolled in the courses needed to meet the final 45/56 credit-hour residency requirement.
- Once a degree has been awarded, no changes will be made to the academic record.

Dual Degree
- To obtain two different undergraduate degrees, a student must complete all the requirements for each degree.
- A second undergraduate degree on the same level requires a different major and a different minor.
• If the degrees are in two different schools, a student must meet the requirements with distinctly different majors and minors, wherever applicable, in each school.
• Students must obtain approval from the Office of the Senior Vice Provost and Dean of Undergraduate Education to pursue dual degrees in different schools.

As a general rule, college credit hours more than 12 years old are not recognized for degree purposes. Students in this category should consult their academic deans.

A student must apply for graduation on CaneLink during the semester in which they expect to graduate.

**University Graduation Honors (Latin Honors)**

University Graduation Honors (Latin Honors - Summa / Magna / Cum Laude) will be determined by a minimum GPA unique to the school or college from which the student is graduating.

• University Graduation Honors only applies to undergraduate students.
• The GPA required will change each academic year (beginning with the fall semester) and will be based on the cumulative GPAs of the previous year’s graduating class. The GPAs are calculated every summer and the year specific criteria can be found here (https://registrar.miami.edu/graduation-and-transcripts/graduation-and-diplomas/).
• The top 5% of the graduating class will receive *Summa Cum Laude* within each individual school or college; the next 10% will receive *Magna Cum Laude* and the next 10% *Cum Laude*.
• For the determination of University Graduation Honors, cumulative GPA is never rounded off and is the lower of:
  - the average of all grades earned at the University of Miami (UM cumulative graduation GPA), OR
  - the combined average of all graded work taken at the University of Miami or elsewhere (whether or not the transfer work is accepted toward a degree at the University of Miami).
• Students must meet the required GPAs by the completion of the final semester within his/her school or college to be eligible to graduate with the honor.
• The appropriate honor will automatically be placed on the student’s final transcript and diploma.

**Departmental Honors**

Among the departments offering approved programs for honors study at the junior-senior level for both majors and elective students are American studies, art and art history, biochemistry and molecular biology, biology, business administration, chemistry, computer science, engineering, English, finance, French, German, history, international finance and marketing, international studies, Judaic Studies, marine science, mathematics, meteorology, microbiology and immunology, philosophy, political science, psychology, religious studies, sociology, Spanish, and women’s and gender studies. Admission into the program is by invitation, but any student who believes himself or herself qualified may apply to the Chairman or the Departmental Honors Advisor of the major department, preferably during the sophomore or early junior year. Upon successful completion of the required program and with approval by the faculty of the department, the notation Departmental Honors in ... is included in the candidate’s diploma and transcript.

Departmental Honors are designed primarily to provide an opportunity for the student to intensify and deepen his or her knowledge of the major, to permit closer associations with professors in the student’s area of concentration, and to prepare the student for research, thesis preparation, and other work at the graduate level in the major areas.

Departmental Honors requirements vary by departments; the prospective Departmental Honors student should confer with the Honors Advisor within the department about specific requirements for graduation with Departmental Honors.

**Diplomas and Transcripts**

No diplomas or official transcripts are released from the Office of the University Registrar without the approval of the Office of Student Account Services.

The last date on which application may be made for each graduation period is published in the Academic Calendar. The academic deans are the only officers authorized to approve placing the student’s name on the candidate degree list.

Diplomas are issued after the student’s graduation has been awarded by the school/college and noted on the student’s official transcript. The diploma must be issued in the name on the student’s academic record. Addition or omission of a middle name is acceptable. The addition of a middle name will be acceptable only as it appears on the student’s application for admission. If the middle name is not on the application or if the student wants another version, documented proof of a legal name change must be presented to the Office of the University Registrar.

Official transcripts are issued only upon receipt of a secure electronic request through the university’s online transcript system or a written and signed request from the student is received in the office. Payment for the transcripts is required before they will be sent.

Unofficial transcripts are available free of charge to students through CaneLink.

**Student Status**

**Academic Bankruptcy**

Students entering college sometimes perform at an unacceptable academic level. They either drop out or are dismissed. Some individuals with this experience re-evaluate their educational goals and desire to return to college. Their academic record, however, may present an insurmountable obstacle. Undergraduate students in this category who want the opportunity for a fresh start at the University without this handicap may apply for admission or readmission with the request that their prior academic record be disregarded.

In order to be considered for academic bankruptcy, a student’s combined college grade point average must be below 2.00 as calculated by the Office of Admission.

**Application for Initial Admission to the University with Academic Bankruptcy**

The applicant must apply to the Office of Admission and:
1. Must have been admissible to the University as a senior in high school,
2. Must have attended an accredited institution for at least one year and must not have attended any college or university for the preceding six months, and,
3. Must not be admissible to the University based on his or her college-level work.

**Application for Readmission to the University with Academic Bankruptcy**

A University of Miami student who has dropped out or who has been dismissed may request Academic Bankruptcy on meeting these conditions:

1. The student must apply to the Office of the University Registrar.
2. At least six months must have elapsed since the end of the semester in which the student was last in attendance at the University of Miami.
3. Detailed written evidence must be provided with the readmission application, showing that the conditions or factors that caused the poor performance have changed sufficiently, so that there is a reasonable expectation of future satisfactory performance.

**Conditions of Approval**

1. If Academic Bankruptcy is approved, no course credit hours earned previously will be displayed on the transcript for credit hours attempted, credit hours earned, or quality points earned; however, all grades earned previously will remain on the transcript.
2. Readmission applicants with approval from the dean of the accepting school, may have Academic Bankruptcy apply only to those credit hours taken by the student when last in attendance at the University of Miami, so that credit hours earned at another institution subsequent to the date the student last attended the University are not affected.  
   
   1 All grades, good or bad, are invalidated during this process and will not be reinstated at any future time.

**Academic Bankruptcy will be granted only once for any student.**

**Certification of Enrollment**

Students who require certification of enrollment for insurance or education loan purposes may obtain an enrollment letter via their CaneLink (https://canelink.miami.edu) account or by submitting a request in writing to the Office of the University Registrar. Enrollment verification via CaneLink is available after the last day to drop without a W. Please refer to the University's academic calendar for specific dates.

Enrollment Verification letters will include only information maintained in the university's official academic record system. The Office of the University Registrar will not alter, amend or add anything to the standard letter. Notarization is available upon request.

Students will be certified as currently enrolled once they have met their financial obligations. If a student is delinquent in paying his/her tuition and fees statement balance and/or Monthly Payment Plan, the University will not process transcript and/or diploma requests. Course selection/ modification will not be permitted for any previous, current or future semesters. The student is not considered enrolled during the term in question, which means that certification of enrollment cannot be provided for insurance, student loan deferment or repayment purposes. Non-payment also means the student is ineligible for financial assistance awarded for the term in question. A late payment fee may be assessed on delinquent accounts.

Students who require enrollment certification for scholarship purposes only, will be conditionally certified until financial obligations are met.  

1 For students who do not have a Social Security number, verification letters are generated by the Office of the University Registrar. Letters are typically generated in seven (7) business days but may take longer during our registration period and the first two weeks of classes.

**Classification of Students**

Students are classified in three ways:

1. By course load (full- or part-time)
2. By objective (degree sought, non-degree, transient, audit, etc.)
3. By year

**Course Load**

A student is a full-time student if he/she carries not less than the minimum normal load, 12 credit hours per semester in most schools, nine credit hours in the Graduate School (please refer to the Graduate section for exceptions). The minimum credit hour loads in a summer session will vary for each category, according to the length of the sessions. (A typical full-time class schedule for fall and spring semesters not requiring override approval from an advisor consists of 15 credit hours. In some cases, students are recommended to enroll in fewer than 15 credit hours.) Please refer to the university’s full-time/half-time policy (https://registrar.miami.edu/general-information/policies/full-time-half-time-policy/). For spring semester, Intersession courses can be included when evaluating full-time status. It is important to note that tuition charges for Intersession courses typically are separate from and in addition to charges for the spring semester. Full-time status may vary from one college or school to another. Students should consult with the dean of his/her college or school for details.

**Objective**

A degree student is one whose immediate educational objective consists wholly or principally of work normally credited to a University of Miami bachelor’s or higher degree. To qualify for this status, a student must meet the standards for admission.

A non-degree student is one who is not pursuing a degree program. Such students are those who, although eligible for degree candidacy, have requested permission to take a limited or special selection of credit hour courses without regard to requirements for a degree. This classification includes high school graduates and students with previous college credit hour

1. who do not want degree status;
2. whose applications for degree status are incomplete;
3. who are taking work toward teacher certification;
4. who are workshop applicants;
5. who are visiting summer school students. (Students under 21 years of age who have not completed high school will not be admitted to this status.) Non-degree students are sub-classified as transient, special, etc.

An undergraduate non-degree student may petition the Director of Admissions to have his/her status changed to that of degree student. Up
to 30 credit hours earned in non-degree status may be applied towards a degree, but only to the extent approved by the appropriate academic dean. It is therefore important that the degree student identify himself/herself as such, early in his/her program.

Transient Student
A transient student is one who is enrolled at the University of Miami with the sole intention of using credit hours earned toward graduation elsewhere.

Audit Student
An audit student is one who enrolls as an observer or listener only. Auditing is allowed only when there is space available in the class. Audit status may be restricted by the Dean in the case of laboratory, studio or performance courses where audit status is not appropriate. Audit students receive no credit hour; do not prepare written assignments or take examinations, are not eligible for residence in campus residence halls, and do not receive student privileges except for the use of the library. No entries are made on the permanent academic record for audited courses.

Students wishing to change from audit status to credit hour status must obtain all necessary approvals within two weeks following the last day of registration for Fall and Spring semesters and no later than the fifth class day following the last day of registration for Summer Sessions. No changes except withdrawals from the course are permitted after this time.

Note: Fee for auditing a course is non-refundable. Please refer to financial information section of the bulletin.

Year
- A freshman is a degree-seeking student who has earned 0 to 29 credit hours.
- A sophomore is a degree-seeking student who has earned 30 to 59 credit hours.
- A junior is a degree-seeking student who has earned 60 to 89 credit hours.
- A senior is a degree-seeking student who has earned 90 credit hours or more.

Undergraduates Taking Graduate Coursework
University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The application may be found on the Graduate School website (https://grad.miami.edu/).

1. Student must have a minimum of 3.00 G.P.A.
2. The submission of an Application for Undergraduates to Take a Graduate Course form (available on the Graduate School website) will be required. The application fee will be waived;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and the Graduate School Representative prior to registration.

Enrollment in graduate-level courses does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than six (6) graduate credit hours may be taken in one semester, and no more than a total of fifteen (15) hours of combined undergraduate and graduate courses per semester.¹

¹ If the total combined undergraduate plus graduate credits exceeds 15 credits, the Graduate School will require the undergraduate advisor and graduate dean to provide approval. Please note that the application form requires the student and a financial aid representative to sign and date the form acknowledging that the student understands the financial implications of this registration.

Eligibility for University Extracurricular Activities
Full participation in University-sanctioned extracurricular activities and organizations is open to all full-time students who are not on academic probation and who have been assessed the Student Activity Fee. Extracurricular activities include, but are not limited to the following: academic, athletic, dramatic, or musical organizations or teams; student organizations registered with the Committee on Student Organizations (COSO); fraternities and sororities; student publications; program boards; and University committees.

Students on probation may participate in any activity required as partial fulfillment of their degree program; may attend meetings of organizations; and may play intramural sports. They may not otherwise compete, perform, or hold a leadership position. At the beginning of each fall semester, the activity’s faculty or staff advisor or appropriate committee chairperson shall determine with the Office of the Provost the eligibility of each participating student. Some activities apply stricter standards, and may monitor academic progress and review eligibility during the academic year. Students should consult with the individual activity for specific requirements.

Readmission
Undergraduate students who have not attended the University for at least one semester should request readmission through the Office of the University Registrar no later than two weeks before the beginning of classes, in the semester they wish to re-enroll. Readmission to the University is contingent upon approval of the Dean of the school/college the student is applying to and clearance from the Office of Student Account Services.

International students who seek readmission must receive clearance from International Admissions and submit a bank letter to receive an I-20 from International Student and Scholar Services.

Specific details on the readmission process can be found here (https://registrar.miami.edu/general-information/policies/readmission/).
Students who have attended another college or university since they were last enrolled at the University of Miami, will be required to provide a transcript of their work. Failure to disclose all prior institutions attended may result in disciplinary action.

An undergraduate student who has applied to graduate for a given semester will not be eligible to register for any subsequent semester until the student applies for readmission or admission to a new program. A candidate for graduation may wish to continue his/her studies in one of the following situations:

1. If the student fails to graduate and further registration is needed, they must delete their application for graduation in CaneLink and within twenty-four hours, registration for subsequent semesters or sessions should be available. Students should contact the Office of the University Registrar for assistance.

2. If the student graduates and wishes to pursue a second bachelor's degree, the student must apply for readmission, stating his/her new degree objective.

3. If the student graduates and wishes to take additional course work without a degree objective, the student must apply for unclassified status.

Proof of immunization must be provided to the Student Health Service before readmission to the University of Miami. Failure to do so may prevent you from registering for classes.

Inactive Status

Inactive status is available to continuing, undergraduate, degree-seeking students who intend, and qualify, to re-enroll at the University of Miami after leaving the university for a designated period of time. This status is used when students will not be taking classes at another institution. Students interested in this option may obtain further information here (https://registrar.miami.edu/general-information/policies/inactive-status/) or by visiting the Office of the University Registrar.

Non-UM Programs

Students who study through a non-UM program, domestic or study abroad, and would like to have those credit hours applied toward their UM degree, should apply for Non-UM Program status. For more specific information on the Non-UM program please see the application (http://cdn.miami.edu/wda/registrar/Documents/non-um-program-application-2017.pdf).

Non-UM is only available in the Fall and Spring semesters.

As of July 1, 2017, the fee will be $350 per semester.

Student Identification Numbers

All students at the University of Miami will receive an identification number that is unique to them. This number supplements the social security number, which is also required by the university in order to provide information to the federal government and approved agencies. Access to social security numbers is limited to staff who have a legitimate need for that information.

Transfers Between Schools and Colleges

Undergraduate students who have compiled fewer than sixty (60) credit hours may transfer between schools and colleges provided that such students:

1. Demonstrate their academic admissibility to the new program (as defined by class rank and SAT scores) at the time of their original matriculation at the University;

2. Satisfy any special criteria required for admission by a particular program (e.g., auditions in the arts, portfolios in architecture, etc.); and

3. Obtain the approval of the Dean of the receiving school or college.

It is a general policy of the University that students admitted to degree seeking status may not transfer to an unclassified status.

Students who have compiled 60 or more credit hours with an average of 2.0 or higher and who have satisfied all of the above three conditions may be eligible to transfer between schools and colleges pending space availability and additional program requirements.

Graduate Policies and Procedures

grad.miami.edu

All graduate work (except for the Master’s Degree in Law, J.D. in Law and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various programs in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Admission requirements are described in the Bulletin of the Graduate School, and may be obtained from the individual department or program.

Applications are processed through the various Schools and Colleges. Visit the Graduate School website (http://grad.miami.edu) and click apply to review the application process.

Prospective students should note that “graduate study” means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative, and scholarship of the student. The term must be distinguished from “post-graduation study” which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor’s degree.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Academic Policies

Time to Completion

Time to completion starts when a student begins any program in the Graduate School, whether it be a master’s or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various master’s degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master’s degree in that field, work must be completed within eight years. Individual programs may set a shorter time period. Exceptions to the time to completion policy may
be granted by the Dean of the Graduate School at the request of the Graduate Program Director.

Recency/Validation for Over-Aged Credit Hours

Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.

Continuous Enrollment

To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and readmission must be granted. Doctoral students for whom course work is no longer appropriate should consult their program for registration guidance.

Registration

Graduate students can register on the first day of registration and through the registration period. For more information on registration, students should contact their respective School or College. See academic calendar for dates of registration periods here (http://www.miami.edu/index.php/registrar/calendar/).

Full-Time Study

The categories of full-time students include:

1. Graduate students taking 18 or more graduate credit hours during the calendar year (9 credit hours in a regular semester or 6 credit hours in a summer semester. In online programs, 6 credit hours in each regular semester and 6 credit hours during the summer.)
2. Graduate teaching and research assistants taking 16 or more graduate credit hours during the calendar year (8 credit hours in regular semester or 6 credit hours in a summer semester).
3. Graduate students enrolled in any course numbered 800 or above, i.e., any 800-level course required for the completion of the degree.
4. All MBA for Executive and Professional students are considered full-time.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School.

The maximum number of credit hours allowed for full-time study is 12 for each semester and six for each summer semester. Exception to this policy can only be made by the Dean of the Graduate School or his/her designee and requires a signed recommendation from the Program Director.

For thesis and dissertation students, full-time registration is required during the semester or summer session in which a candidate defends the thesis or dissertation. Students who wish to have this requirement waived must have a written request provided to the Graduate School by the Dean of their respective College or School, or the Dean’s designee.

No full-time faculty member may be a full-time student, whether or not working toward a degree. Nor may a full-time student be a full-time faculty member.

No full-time student will be a principal investigator in any grant or contract, whether in name or fact. And no principal investigator will be a full-time student.

Exceptions to these rules may be made in cases in which students are encouraged to apply individually for small research grants that are consistent with and contribute to their field of study and their dissertation work, and, in certain programs, in which students in a terminal degree status are obliged, as a part of their degree program, to teach as de facto faculty members. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue doctoral degrees in their home program/school.)

Withdrawals

Withdrawals, either from individual courses or from a graduate program, should be processed through the office of the Dean of the School or College of the student’s program. Students who wish to officially withdraw from joint or dual degree programs should consult the office of the Dean of the School or College for both disciplines. The date of withdrawal is that on which the student notifies the office of the Dean or the date of receipt of a letter requesting withdrawal. No withdrawal from the University is official until the student has consulted with the Dean of his/her school or college and has completed the necessary forms.

Students wishing to officially withdraw from the University of Miami must provide the Office of the Registrar notification of their intent to withdraw. Initial notification may be made in person, in writing, by fax, or by telephone. This notification will be recorded and used for notification purposes for the Federal Government. Repayment of any federal funds will be based on the date of notification.

Students must also follow the required process as set forth by their school/college for withdrawing from courses. This process often requires that a signature from a Dean or the Dean’s representative be obtained on a Change of Course form. In some cases, students can complete the Change of Course form (hard copy or through the CaneLink system) without an approving signature. Change of Course forms must be submitted to the Office of the Registrar for final processing/review.

To officially withdraw from the MBA Program or Master of Science in Professional Management program, students must inform the Office of Graduate Business Programs in writing prior to the beginning of a course/term. Tuition will be refunded on a prorated basis based on the number of class meetings attended. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. For further information contact: Office of Graduate Business Programs, 305-284-2510, email (mba@miami.edu).

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below under “Credit Hour for Courses After the 12th Week of the Semester”).

If you receive federal financial aid and withdraw before you complete 60% of the semester, a pro rate calculation will determine the amount of financial aid you have earned. It is based on the amount of time you were enrolled. This calculation is independent of any charges incurred at the university.
Credit Hour for Courses After the 12th Week of the Semester

The following statement of policy was adopted by action of the Academic Deans’ Council April 14, 1967:

1. On recommendation of the Dean of the school or college, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

2. Credit hour granted for a course under this policy should count toward graduation.

3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.

4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Veterans and children of deceased or totally disabled veterans attending the University as students under the government’s educational benefits bills must also clear their withdrawal with the main campus Veterans Affairs Officials in the Office of the Registrar who can be contacted at:

Phone: 305-284-2294 or
Email: registrar@miami.edu

Leave of Absence

Leave may be obtained by petition of the Program Director followed by the approval of the Dean of the Graduate School. Leave of Absence officially stops the time to completion clock. The Petition for Leave of Absence form may be found on the Graduate School website (http://grad.miami.edu).

Grades and Credit Hours

The same letter grades are used for graduate and undergraduate students, but with somewhat different meaning.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent accomplishment</td>
</tr>
<tr>
<td>A-</td>
<td>Good accomplishment</td>
</tr>
<tr>
<td>B</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).</td>
</tr>
<tr>
<td>B+</td>
<td>Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum, and internship credit hour. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of “S” to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of “S” reflects that a student is in good academic standing.</td>
</tr>
<tr>
<td>C</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).</td>
</tr>
<tr>
<td>C+</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).</td>
</tr>
<tr>
<td>D</td>
<td>Poor (not acceptable for credit hour toward the advanced degree)</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
</tbody>
</table>

NG Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student’s grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student’s graduation.1

W Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the university. Courses dropped after last date must have approval of Dean of the Graduate School. Credit hour can be earned only by successful repetition of the course.

I Incomplete work in passing status with the instructor’s permission to complete the course. (Not to be used for thesis or dissertation credit hours). The “I” should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student’s primary school or college and the Dean of the Graduate School approve the delay. If the “I” is not changed within one year, credit hour can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of “I”s on a student’s transcript).

NG Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student’s grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student’s graduation.1

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>

<td>0.00</td>
</tr>
</tbody>
</table>

1 Faculty Senate Legislation #85005(B)

An average of B (3.0) is required for a graduate degree, and no “D” credit hour may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded “D”.

No transferred credit hours are calculated into the University of Miami G.P.A.

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Quality points are awarded as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>1.30</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols “S”, “W”, and “I” are not counted as credit hour attempted.

Graduate Repeat Rule

A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization...
is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a "C-" or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated.

Graduate School of Business Repeat Rule

Graduate students in the Miami Herbert Business School who fall below the 3.0 GPA may be placed on academic probation. Within one semester after their GPA falling below 3.0, Master’s students wishing to repeat a course may petition their program director to do so. If the petition is approved by the Graduate Program Director, the grade obtained in their second attempt will replace the original grade for purposes of calculating their GPA for clearance for graduation only. Authorization to repeat a course is limited to courses in which an unsatisfactory grade was earned (as determined by the Graduate Program Director). Additionally, a course may be repeated only once and students may not repeat more than two courses. The student’s transcripts will continue to show all attempts and the GPA computation will include all grades earned for purposes other than computing the GPA for clearance for graduation. If a course in which an unsatisfactory grade of lower than a B- was earned is repeated and the repeat grade is ‘C’ or higher, the number of credits required for graduation will be increased by the number of credits repeated. Registrations which involve repeating a course in which a grade of ‘A’ or ‘B’ has already been earned may not earn quality points or credit hours, nor count as credits attempted.

Graduate Student Grade Appeal Process

The Academic community is unanimous in its position that the grade an instructor assigns to a student is the instructor’s responsibility and privilege. Any effort to alter this would be a violation of academic freedom. It is the instructor’s responsibility to establish criteria for assigning grades. Grounds for appeal of how a grade was assigned are:

1. Award of a grade based on the student’s race, religion, color, sex, age, disability, sexual orientation, gender identity or expression, veteran status, national origin or any other characteristic set forth in the University’s Non-Discrimination Policy;
2. Award of a grade based on conduct that violates the University’s anti-harassment or anti-retaliation policies; or
3. Failure to adhere to the grading criteria established for the course;
4. Violations of other policies/procedures for grading that are clearly defined in the Faculty Manual.

The Faculty Senate Student Affairs Committee (FSSAC) has responsibility for graduate student grade appeals, except for MD and JD programs. To facilitate grade appeals from graduate students, the FSSAC will have a non-voting ex officio faculty representative of the Graduate School. The FSSAC reviews graduate student grade appeals that have not been resolved at the department, school/college, or Graduate School levels. The FSSAC reserves the right to not hear appeals that require extensive knowledge of specialized or technical issues, including but not limited to, dissertations, theses, qualifying exams, recitals, and clinical/research assignments. The Graduate School has responsibility for all other academic appeals.

I. Time Constraints

The appeal process must be initiated before the completion of the following semester (i.e., Fall or Spring) of the assignment of the grade resulting in appeal and prior to the completion of all degree requirements or withdrawal from the University. Each level of appeal should aim to review the appeal and deliver a judgement within a 20 academic day period from the date the appeal is submitted. The entire process should be completed within one calendar year. Exceptions to this deadline may be permitted by the FSSAC for good cause.

Timeline Goals:

1. Student Appeal to the Graduate School Level must follow completion of all internal (i.e., home School or College) grade resolution and/or appeals processes, and then has 20 academic days from the completion date of the internal process to contact the Academic Ombudsperson and/or directly to the Dean of the Graduate School regarding an appeal.
2. Academic Ombudsperson has 20 academic days to review, provide a preliminary assessment to the student about whether it is reviewable by FSSAC, after receiving information from the student. The student may appeal directly to the Dean of the Graduate School (step 3).
3. The Dean of the Graduate School has 20 academic days to review, decide whether to forward to FSSAC, after receiving all information from the student.
4. FSSAC has 20 academic days to review/hear appeal, and to submit recommendation to Dean of Graduate School.
5. Dean of the Graduate School has 20 academic days to review recommendation of the FSSAC, and to inform student of final decision.

II. Order of the Appeal

Attempts to resolve issues regarding a grade must be addressed to the following entities or persons in this order:

1. The faculty member of administrator responsible for the course, program or activity.
2. The department/program chair/director and/or administrative superior(s) of the faculty member or administrator.
3. The Dean or designee of the school or college offering the course, program, or activity. If the school, college or administrative unit has a committee constituted to hear graduate student appeals, that committee must be consulted before proceeding to the next level, i.e., for advice from the Ombudsperson or appeal to the Graduate School.
4. The student is to provide the materials listed in Section IV below to the Academic Ombudsperson who will review the merits of the potential appeal, and attempt to resolve the matter. The Academic Ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by FSSAC. After, and only if, all other steps are taken, the Ombudsperson may refer the matter to the Dean of the Graduate School.
5. Appeal to the Graduate School Level. If the student has exhausted all levels of appeals in their School/College and has consulted with the Ombudsperson, then the student is to provide the materials listed in Section IV below to the Dean of the Graduate School, who will review the merits of the appeal and attempt to resolve the matter. As part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by FSSAC.
6. After, and only if, all the other steps are taken the Dean of the Graduate School (or designee) will decide whether or not to refer the appeal to the FSSAC. If, and only if, the Dean of the Graduate
School (or designee) does so, the FSSAC shall have jurisdiction to review a grade-related appeal. As part of the request, the Dean of the Graduate School shall forward to the FSSAC, via the Faculty Senate office, the materials submitted by the student as indicated in Section IV below.

III. Faculty Senate Student Affairs Committee (FSSAC) Appeals Process
The FSSAC will review the student’s written appeal (see Section IV below), confer with the appropriate faculty, administrators, and others as it deems necessary in making its recommendation to the Dean of the Graduate School. Students may present written materials to the FSSAC, or request an additional in-person meeting with the FSSAC. The FSSAC may request an interview with the student, additional information, or access to records, interviews with relevant faculty or administrators, or additional information or access to records kept by faculty or administrators.

The FSSAC will communicate its findings and recommendations to the Dean of the Graduate School. Copies shall be provided to the Faculty Senate. The final decision with respect to the grade-related appeal will be made by the Dean of the Graduate School and communicated to the student in writing. Copies shall be provided to the Faculty Senate Office and to the Chair of the FSSAC.

IV. Materials for an Appeal
When bringing an appeal, the student must state in writing issues they wish to have considered. The appeal must include:

1. An appeal letter clearly stating the circumstances of the grade as seen by the student, and offering reasons for granting the appeal.
2. The appeal letter must indicate if the student wishes to make a personal appearance and, if so, the reasons why the appearance is necessary.
3. Documents of support (e.g., examinations, term papers, syllabi, or medical documentation of illness) that the student wishes to have examined.
4. All written decisions made at earlier levels of the appeal by individual faculty/administrators, departments/program/administrative units, college or school committees, and/or deans which are available to the student or in the student's possession.

V. Other Notes and Special Considerations
If the appeal is based on or related to a charge made by the student of discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, age or handicap, a representative of the appropriate University office will be contacted and, as appropriate, consulted in the appeal process.

If the appeal is based on or related to a disability:

- The ADA Coordinating Committee shall serve in an advisory capacity.
- The student is to include in the materials provided the appropriate forms from the Office of Disability Services documenting:
  - An evaluation of the disability
  - Recommendations related to the disability

The FSSAC does not consider appeals based upon the grant, denial or modification of an accommodation by the Office of Disability Services. Instead, any such appeal is as prescribed by the Office of Disability Services Grievance Procedure only.

Levels of Graduate Study
Graduate study implies the need for a minimum of formal courses and a maximum of independent work under faculty supervision. Coursework, in itself, is not necessarily a determinant of graduate progress and achievement. The appropriate determinants are the ability of the qualified student to master the various qualifying and comprehensive examinations that a program requires of the student. All work taken by a graduate student in the major area or area of concentration shall be at the graduate level (600 or above). With the permission of the program of major concentration a student may take elective credit hours (not prerequisite to the major) at any level provided the following limits are observed:

<table>
<thead>
<tr>
<th>Total Graduate Course Credit Hours</th>
<th>Maximum Course Credit Hours Below 600 Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>30</td>
<td>3</td>
</tr>
<tr>
<td>31 or above</td>
<td>6</td>
</tr>
</tbody>
</table>

Approval for students enrolled in a graduate degree program to take undergraduate credit hours can be made only after a minimum of 12 credit hours are completed. Undergraduate credit may not count toward the graduate degree requirements. Undergraduate credit may not be awarded retroactively, nor are credit hours accepted from another institution.

RA, TA, GA Hourly Guidelines
To receive a stipend an RA, TA, GA must be a full-time student.

Graduate students with appointments as RAs, TAs or GAs will be expected to work 20 hours per week with the exception of efforts directly required for dissertation research.

International students may work on campus provided the student is maintaining F1 status and does not work more than a total of 20 hours per week (including any off campus work the student may have been authorized to perform) while school is in session. Questions regarding work for international students should be directed to International Student and Scholar Services (http://www.miami.edu/iss/).

Graduate students with Assistantships and Fellowships will be classified with the following designations. *(FE) Fellows, *(RA) Research Assistant, *(TA) Teaching Assistant, *(GA) Graduate Assistant, *(TR) Trainee.
*Please contact the Graduate School for specific codes.

Definitions
FE (Fellow)
Responsibilities do not include the provision of direct services to the University and require internal/external fellowship support.

RA (Research Assistant)
Responsibilities are mainly conducting research and/or assisting with research projects.

TA (Teaching Assistant)
Responsibilities are mainly teaching and/or assisting in the area of teaching.

GA (Graduate Assistant)
Responsibilities are mainly in professional support of University operations and programs. Graduate students should not be hired to perform clerical duties.
TR (Trainee)
Designated as such by specific federal guidelines which indicate a complex process wherein the trainee takes on an increasingly independent role in the selection, conceptualization, and execution of research projects under the supervision of an experienced mentor.

In definitions where the word “mainly” is used, “mainly” is defined as greater than 50%.

Requirements for Teaching Assistants
1. Graduate teaching assistants who are the instructors of record and responsible for assigning grades in a course must have a master’s in the teaching discipline or 18 graduate credit hours in the discipline.
2. Graduate teaching assistants must be directly supervised by a faculty member in the teaching discipline, must attend regular in-service training provided by the Graduate School and/or provided by the specific graduate program, and must be reviewed by the supervising faculty member at least once a semester.
3. Graduate Teaching Assistants who have previous teaching experience and indication of competency may be exempted from Teaching Assistant training by the Graduate Program Director in the discipline. The Graduate Program Director must then notify the Graduate School of any exemptions that are granted.

Policy on Outside Employment for RA/TA/GA
A graduate student must have prior approval from the chair or advisor to work outside the department, since such activities might impede progress toward his/her degree. Any question or concern should be discussed with the Dean of the Graduate School.

1. A graduate student is allowed to supplement his/her stipend by tutoring undergraduate students in courses in which he/she has no direct responsibility at the time.
2. A graduate student who is teaching a class or lab of a multi-section course using a common syllabus and common exams may not tutor any student in any section of that course.
3. A graduate student, like any other member of the teaching faculty, may offer review sessions for his or her students to which he or she may invite students from other sections of the same course. The graduate student arranging such sessions may not under any circumstances take money from the students in attendance.
4. A graduate student may use his or her office for tutoring or may ask departmental permission to use a classroom or other appropriate university facility.
5. The graduate advisor or department chair may require a graduate student to limit his or her outside employment or tutoring activity if, in the view of the department, such activity is impeding the graduate student’s academic progress or keeping him or her from fulfilling responsibilities within the department.
6. International students should clear their work instructions with International Student and Scholar Services. Questions regarding work for international students should be directed to International Student and Scholar Services. Phone: 305-284-2928, E-mail: isss@miami.edu.

Graduation
It is the responsibility of the student to apply for graduation through CaneLink during the student’s final semester before the date indicated on the Academic Calendar (https://registrar.miami.edu/dates-and-deadlines/academic-calendars/) and the Schedule of Classes. These dates are published here (http://www.miami.edu/index.php/registrar/calendar/). Students who previously applied for graduation but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students may walk in the commencement ceremony, but the program will indicate “in progress” if information is missing. Students will be degree candidates until they have been cleared for degree conferral by the Graduate School.

Commencement ceremonies are held in May and December only. Those completing degree requirements during the fall, spring or summer sessions may, if they wish, participate in the commencement ceremonies of the previous or following May or December. Doctoral students participating in the hooding ceremony and master’s students marching in the commencement ceremony must have the approval of the graduate advisor, director, or appropriate person in the program to participate in the ceremonies.

Participation in graduation for students in all graduate programs is contingent upon the following:
1. The student must have met the requirements for his or her program.
2. The student must have a minimum of 3.00 cumulative grade point average; all students receiving master’s degrees must have completed a minimum of 30 credit hours; all Ph.D., D.M.A., and Ed.D. students must have completed a minimum of 60 credit hours.
3. The student (Ph.D., D.M.A., and Ed.D. candidates) must be admitted to candidacy one semester prior to graduation.
4. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last semester of study must be paid in full by the beginning of the final semester.
5. The student must complete an electronic thesis or dissertation (ETD) according to the Graduate School’s requirements and submit the final three forms, online surveys and agreements (if required) in the semester the student wishes to graduate. All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (https://grad.miami.edu/electronic-thesis-and-dissertation/):
   1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay;
   2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the Dissertation Editor;
   3) Deadline to produce the final PDF; and
   4) Deadline for completion. It is recommended that students begin the ETD process early in the semester by discussing with their advisors a suitable timetable for completing the defense of their thesis or dissertation. Students should check the Academic Calendar (https://registrar.miami.edu/dates-and-deadlines/academic-calendars/) for the defense deadline date set for the semester they wish to graduate. The Graduate School also encourages students to familiarize themselves with the ETD process posted on the Graduate School website (http://grad.miami.edu/), or contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

Clearance for Degree Conferral
For the Graduate School to clear a student for graduation:
1. All original documents (official transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one semester before graduation. The Graduate
School does not require application to candidacy for master's, D.P.T., nor D.N.P. degrees.

3. Student must defend the dissertation, doctoral essay, lecture recital essay, or thesis by the deadline specified in the Academic Calendar for the semester the student wishes to graduate.

4. Student must upload one Dissertation Editor-approved PDF of the dissertation, doctoral essay, lecture recital essay, or thesis conforming in style to the standards set by the Graduate School to the ETD database and submit the final three forms to the Graduate School in the semester the student wishes to graduate. All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (https://grad.miami.edu/electronic-thesis-and-dissertation/):
   1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay; 2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the Dissertation Editor; 3) Deadline to produce the final PDF; and 4) Deadline for completion.

Class Attendance and Absences
Regular and punctual class attendance is expected of all graduate students. It is the student's responsibility to know the instructor's policies regarding examinations, penalties for absences, and late or missed work. V.A. students will be provided a grade report at the end of each semester period. A copy of the report will be placed in the student's permanent file maintained by the Veteran Affairs Office. Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.

Student Responsibility
Standards of study and conduct in the Graduate School are set and maintained, not by fiat of the Graduate School, but rather by the faculty who determine the standards. The Graduate School through its Council sets course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School devolves responsibility upon the student and the appointed committee. Within this broad responsibility the recommendation for the degree rests with the committee.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various departments in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements at the time specified.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

It is the responsibility of the student to be informed concerning all regulations and procedures required. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that he/she was not informed of it by an advisor or other authority. The student should become familiar with the Bulletin, including

1. The section presenting the requirements for the degree to be undertaken;
2. The offerings and requirements of the major department;
3. The Graduate Student Honor Code.

After the applicant has been admitted to the Graduate School but before the first registration, the student should consult the School or College program in which the major work will be done concerning course requirements, deficiencies, if any, the planning of a program or special regulations. Programs may have additional degree requirements that are not listed in this Bulletin. All registrations require the signature of the Dean of the School or College (or his/her representative) in which the degree is to be awarded.

Only a Graduate Program, with approval of the Dean of the Graduate School and/or the Graduate Council, may waive requirements stated in this Bulletin.

Graduate Student Code of Ethics
Graduate students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Any student found to be in violation of these standards is subject to disciplinary actions by the student's program and/or the Graduate School through the process described in the Graduate Student Honor Code. All graduate students are bound by the rules and regulations of the University of Miami that apply to them.

Graduate School Grievance Guidelines
Introduction
These University of Miami Graduate Grievance Procedures provide an opportunity for the resolution of disputes involving graduate students in a fair and collegial manner. These Graduate Student Grievance Procedures supersede all prior such procedures in effect or formerly utilized at the graduate level. They do not supplant UM Students Rights & Responsibilities or any other published policy or procedure relating to graduate students.

Purview of the Guidelines
The formal grievance process described herein is intended for cases not involving grades or matters covered by the Honor Code, which have not been resolved at the department or program level, and it is available only after a final determination within the relevant School or College has been reached. Students are encouraged to seek assistance from the University Ombudsperson for possible resolution before initiating the formal graduate grievance process. The procedures set forth here are applicable to any of the following types of grievances by graduate students who are enrolled in any graduate program at the University of Miami, except exclusively in the M.D. and J.D. programs:
1. grievances alleging improper dismissal or suspension from a graduate program;
2. grievances alleging the improper withholding or termination of financial support of any kind;
3. grievances alleging any other improper treatment, either substantive or procedural, of a graduate student by a faculty member, department or program, or university agency or administrator except:
   a. allegations of improper evaluation of the quality and/or quantity of academic work (see UM Student Rights & Responsibilities);
   b. allegations of unfair recommendation for employment or further graduate study;
   c. allegations of discriminatory treatment arising from the student complainant's age, race, gender, sexual preference, handicap, national origin, or religion. (Such allegations ordinarily are handled by the Office of Equality Administration).
   d. grade appeals (certain appeals are reviewed by the Faculty Senate Student Affairs Committee, FSSAC; see UM FSSAC Standard Grade Appeals Process Graduate Students).

**Constitution of the Committee and Grievance Panel**

The Graduate Council Grievance Committee (GCGC) is a standing committee comprised of the Schools' and Colleges' alternate representatives to the Graduate Council. Grievances as understood herein shall be heard by **ad hoc** appeals panels, constituted from time to time by the Dean of the Graduate School to review individual graduate grievances. The grievance review panel (GRP) shall consist of five disinterested members: four faculty members of the GCGC and one graduate student appointed by the executive board of the Graduate Student Association. Notice of the constitution of the GRP shall be given by the Office of the Dean of the Graduate School in writing to all parties to the grievance within ten (10) days after the grievance review request is properly filed.

Any party to the grievance may challenge the disinterestedness of a GRP member in writing to the Dean of the Graduate School within five (5) days after notification of the appointment. The challenge must specify reasons that would prevent the committee member or graduate student from making an unbiased recommendation with respect to the grievance. If such a challenge is determined to be valid by the Graduate Dean, a substitute appointment shall be made and the process will resume accordingly.

**Procedure and Time Limits for Filing a Grievance**

After a final determination has been made in the relevant School or College (or by the head of the relevant administrative office in the event of a grievance against a university agency), a student who believes he or she has grounds for appeal within the purview of these guidelines may file a written grievance review request with the Office of the Dean of the Graduate School. The request shall describe the student's allegations in a clear and concise fashion and shall clearly identify the individual(s), program(s), department, School or College, and/or University agency or administrator against whom the grievance is brought. The student's written grievance review request shall be filed within thirty (30) days of the final determination. No grievance review request nor any other appeal of any kind will be granted after this time limit has expired unless a written extension of time is granted by the Dean of the Graduate School based on a written request from the grievant stating good cause.

**Definitions and Assumptions**

**Burden of Persuasion**

The burden of persuasion is on the grievant.

**Final Determination**

This grievance process is available only after a final determination within the relevant School or College has been reached. This provision is intended to require the grievant to exhaust the remedies available within the relevant School or College before appealing to the Graduate Dean.

In the case of a student in an interdisciplinary program who does not yet have a chair and/or committee assembled, the Dean of the Graduate School shall make a final determination in the student's case subject thereafter to the appeal contemplated by this policy. An appeal of the decision of the Dean of the Graduate School follows this same procedure, except that the GRP shall be constituted by the Office of the Provost from the pool of GCGC members. Written notice of the constitution of the GRP in the case of a student in an interdisciplinary program without a chair or committee, shall be given by the Office of the Provost to all parties to the grievance within ten (10) days after the grievance review request is properly filed. All other deadlines, requirements, procedures, and the hearing format remain the same.

**Originals**

Wherever possible, the party in possession of an original document in support of or rebuttal to or at issue in the grievance shall provide it to the GRP within the time frames set out in the Hearing Materials and Preparation Deadlines. If a party has only a copy of a document not received by him, her, or it, the copy shall serve as an original. Digital documents or email messages in contention shall be printed and may then serve as originals.

**Party**

A party is the student grievant or the individual, program, department, School or College, or University agency or administrator against whom the student brings his or her grievance.

**Time Limits**

All time limits shall be calculated based on working days of the Fall and Spring Semesters, excluding reading and exam periods and University holidays. Grievances originally filed after the end of the Spring Semester will be heard at the beginning of the following Fall Semester. Any stated time limit herein may be extended with the written consent of the grievant and the Dean of the Graduate School.

**Written**

Any document to which these guidelines refer as written signifies electronic or paper (hard) copy. Email messages and digital or other electronic versions meet the requirement that a form or notice be provided in writing.

**Deadlines for Hearing Materials, Preparation, and Witness Identification**

All materials to be considered for review by the members of the GRP must be submitted in writing to the Office of the Dean of the Graduate School at least fourteen (14) days before the scheduled date of the hearing, at which time such materials will be distributed to all parties to the grievance and to the members of the GRP. Thereafter, to the extent that any of the parties wishes to have additional materials considered by the GRP, such materials must be received by the Executive Assistant to
the Dean of the Graduate School no later than seven (7) days before the scheduled date of the hearing, at which time all such additional written materials will be distributed to the parties as well as to the members of the GRP. Any party submitting written materials for consideration shall submit the original(s) and five (5) copies thereof to the Dean of the Graduate School at his, her, or its own expense.

The name of any witness to be called by any party at the hearing shall be provided in writing to the Office of the Graduate Dean no less than five (5) days before the scheduled date of the hearing, at which time the names will be distributed to the parties and members of the GRP.

Hearing
The grievance review hearing is chaired by a designated member of the GRP. The hearing is staffed by the non-voting Associate Dean of the Graduate School and the non-voting Executive Assistant of the Dean of the Graduate School, who will audio-record the hearing to assist the panel and Dean in rendering their decision. The audio-recording will be kept at the Graduate School for one year following the conclusion of the grievance. The hearing will proceed as follows:

1. GRP chair’s introduction, summary of issues, and process overview.
2. Student’s presentation of issues (15 minutes maximum).
3. University representative’s presentation of issues (15 minutes maximum).
4. Optional: Presentation(s) by witnesses (limited to 3 per side and a maximum of 15 minutes total per side).
5. Questions by members of the GRP.
6. All presenters and witnesses are excused.
7. Deliberation by GRP.

Presentation of the issues should be concise and relevant. Undoubtedly the dispute is somewhat complex or it would not have reached this stage. Points of dispute or ambiguity may be summarized or illustrated by anecdote at the hearing. Experience suggests, however, that the best approach is to minimize formal presentations and allow the GRP members maximum time for questions.

GRP Decision and Authority
No additional substantive information may be submitted by any party following the hearing, unless requested by the GRP. The GRP may but need not seek additional information from other sources during its deliberations, which will be conducted in closed session. Following its deliberations, and within ten (10) days of the date of the grievance review hearing, the GRP will make its confidential advisory recommendation to the Dean of the Graduate School [Office of the Provost in the event of a student in an interdisciplinary program who does not yet have a chair or committee]. The subsequent decision by the Dean of the Graduate School [Office of the Provost], which shall be rendered within ten (10) days of the GRP’s recommendation, is final.

Note: The above guidelines pertain only to matters which do not involve representation by an attorney. If an attorney is involved in the grievance, the Office of Legal Counsel at the University should be contacted.

Modifications
These procedures may be modified or withdrawn with or without notice.

Research Policies
University of Miami Policy on Inventions, Intellectual Property, and Technology Transfer

I. GENERAL

1.1 General

Although the University does not undertake research or developmental work principally for the purposes of commercialization, patentable inventions and other works with commercial application may result from activities carried out by Applicable Personnel. The University has an obligation to appropriately develop innovations to both benefit the public and generate resources that further support the academic mission of the University. The purpose of this policy is to outline rights and responsibilities regarding inventions, intellectual property and technology transfer and to provide guidelines for the protection, management and commercial application of Innovations.

1.2 The policy is applicable to:

1. All full- and part-time faculty, staff and employees, students, fellows and non-employees who use University funds, facilities or other resources, or participate in University-administered research, including visiting faculty and industrial personnel, regardless of obligations to other companies or institutions;

2. Innovations conceived, created, made or disclosed on or after the Effective Date of this policy, and to those prior Innovations disclosed to the Office of Technology Transfer (OTT) as agreed by Applicable Personnel.

1.3 Responsible Official: The Provost is responsible for administration of this policy.

Policy Review: The Technology Transfer Policy Committee (TTPC) is responsible for review of proposed changes to the Faculty Manual in relation to this policy.

II. DEFINITIONS and ABBREVIATIONS

For the purposes of this policy, the following definitions shall apply.

Applicable Personnel: all full- and part-time faculty, staff and employees, students, fellows and non-employees who use University funds, facilities or other resources, or participate in University-administered research, including visiting faculty and industrial personnel, regardless of obligations to other companies or institutions.

Commercialization Costs: costs incurred by the University for evaluating, protecting, defending, enforcing, marketing, negotiating, licensing, assigning, transferring and otherwise commercializing Innovations and/or University owned Intellectual Property.

Courseware: course syllabi, assignments, assessments, and/or other materials that are first created and made available to students as part of the educational curriculum at the University.

Creations: copyrightable works created in the course of Applicable Personnel’s scholarly and artistic pursuits, including literary works,
Innovations: patentable or un-patentable inventions, discoveries, processes, compositions, research tools, data, ideas, databases, know-how, copyrightable works that are not scholarly or artistic Creations and tangible property, including biological organisms, engineering prototypes, drawings, and software created, conceived or made by Applicable Personnel within their normal duties (including clinical duties), course of studies, field of research or scholarly expertise or making more than Incidental Use of University's resources.

Intellectual Property (IP): patent applications and patents, copyright registrations and renewals, trade secrets and trademarks. IP may be categorized as Creations or Innovations as detailed in Section III.

Net Revenue: Gross Revenue, less all Commercialization Costs and a 15% deduction for administration of OTT.

CDA: Confidential Disclosure Agreement
IP: Intellectual Property
MTA: Material Transfer Agreement
OTT: Office of Technology Transfer
TTPC: Technology Transfer Policy Committee

III. OWNERSHIP

3.1 Consistent with long-standing academic tradition, Creations are owned by the author(s), unless otherwise agreed in a contract between the University and Applicable Personnel, including:

1. the University has expressly commissioned the Applicable Personnel in writing to produce, or participate in production of, the work with University's funds for a specific University purpose;
2. the University has expressly assigned the Applicable Personnel in writing to produce or participate in the production of the work; or
3. the work is otherwise subject to contractual obligations.

3.2 Creations meeting one of the above criteria (a-c) will be treated as Innovations and shall be owned by the University.

3.3 Innovations are owned by the University; revenues derived from commercialization of Innovations will be shared with the Applicable Personnel as detailed in Section VI.

1. Applicable Personnel are required to assign and hereby do assign to the University all Innovations. This assignment includes the right for the University to claim priority and recover for third party infringement or misappropriation.
2. This assignment and abiding by this policy are conditions of employment and continued employment, access to University's resources and/or receipt of funding by the University.
3. This policy governs in the event of any inconsistent obligation to which Applicable Personnel may agree, including in any consulting agreement.

3.4 Intellectual property made or developed with not more than Incidental Use of University resources and not within normal duties (including clinical duties), course of studies, field of research or scholarly expertise or making more than Incidental Use of University's resources.

Criteria for ownership of Courseware developed by Applicable Personnel follow the guidelines for Creations and Innovations.

IV. ADMINISTRATION OF THE POLICY

4.1 The Provost is responsible for oversight and administration of this policy. The Director of the OTT reports to the Provost or Provost's designee.

4.2 The TTPC is a committee consisting of seven voting faculty members, including the Provost or Provost's designee, the Vice Provost for Research and 5 additional faculty members, chosen by the Provost in consultation with the Faculty Senate chair. The Director of OTT and a member of the Office of General Counsel will serve as advisors to the TTPC. The five faculty members will serve two-year terms, which may be renewed.

1. The TTPC is charged with review of proposed changes to the Faculty Manual in relation to this policy;
2. TTPC proposed changes must be approved by the Provost and subsequently undergo the standard procedure for changes to the Faculty Manual, with final approval by the President and the Board of Trustees; and
3. The TTPC will meet at least annually and otherwise as necessary and will be chaired by the Provost or Provost's designee.

4.3 The OTT:

1. Evaluates Disclosure Forms and determines the commercial potential and the most appropriate mechanism, if any, for protecting each Innovation;
2. Works with Applicable Personnel to identify and engage potential commercial partners for their Innovations;
3. Undertakes negotiation and execution of agreements pertaining to Innovations, including licenses, data transfers, assignments, Material Transfer Agreements (MTA) that cover transmission of Innovations (outbound MTA), as well as Confidential Disclosure Agreements (CDA);
4. Receives Gross Revenue and distributes Net Revenue received from commercialization of Innovations; and
5. Interacts with University's research, compliance and finance units, including the Office of the Vice Provost for Research, Office of General Counsel, Office of Research Administration, Business Services, University Advancement, University Compliance Services and other units to ensure appropriate conduct of business and protection of the University's interests and recommend contractual language related to all Innovations.

4.4 Appeal Process. Disagreements with decisions made pursuant to this policy should be addressed to the Provost for final resolution.

4.5 Failure by Applicable Personnel to comply with the requirements of this policy may constitute unprofessional conduct and may lead to penalties including:
   1. The individual being deemed ineligible to hold principal investigator status on sponsored projects;
   2. The individual being deemed ineligible to enter into technology transfer agreements; and
   3. In the case of University Faculty, referral to the Senate’s Committee on Professional Conduct for such other sanctions as it may recommend to the President and/or the Senate.

V. DISCLOSURE, REVIEW AND PROTECTION OF INNOVATIONS

5.1 Disclosure

1. Applicable Personnel are required to make timely and complete disclosure of Innovations to the OTT via submission of a Disclosure Form, available on the OTT website; early disclosure facilitates engagement of the OTT and allows for specific discussion and guidance toward determination of commercial potential.
2. In general, disclosure to the OTT should occur at least 45 days prior to public disclosure of the Innovations, including submitting an abstract, poster, article, grant application or talking about the Innovation outside the University; this allows time for the OTT to evaluate commercial potential and identify mechanisms for protection of the Innovation.
3. On the Disclosure Form, the Applicable Personnel will report:
   a. the percent contribution of each of the Applicable Personnel to the Innovation;
   b. primary department and school for each Applicable Personnel;
   c. any center, institute or other department that supported the work that led to the Innovation;
   d. any Intellectual Property or tangible materials of a third party, including those that were generated at a previous institution or place of employment that has relevance to the disclosure;
   e. any non-University inventors (i.e., inventors who are not Applicable Personnel as defined in this policy), including, individuals acting as independent contractors, or individuals at other universities, institutions, companies, foundations or other entities; and
   f. the source of funding for the work that led to the Innovation and details regarding specific technology transfer language (for example, ownership of allocations, sharing of revenue or licensing of intellectual property) in the funding agreements.

5.2 Review and Protection of Innovations

1. The OTT will evaluate each Innovation Disclosure Form to determine
   a. commercial potential;
   b. what Intellectual Property protection, if any, would be appropriate to facilitate the University’s ability to incentivize investment in the commercial development of the Innovation; and
   c. whether or not the Disclosure Form is premature or incomplete, in which case, the Applicable Personnel may be asked to resubmit the Disclosure Form when additional information is obtained.
2. Evaluation for such Innovation as described in Section 5.2(a) will be made to Applicable Personnel within 90 days of receipt of a complete Disclosure Form.
3. Applicable Personnel will cooperate with the OTT in its efforts to evaluate, protect and transfer Innovations, including executing documents and taking other actions as reasonably requested by OTT. The University encourages Applicable Personnel to participate through the OTT in the process of commercialization.
4. Applicable Personnel are required to consult with the OTT to ensure that appropriate agreements are in place prior to disclosing the University’s Innovations or sending materials embodying Innovations outside the University (for example, to another university, institution, company, foundation or other entity).
5. Lack of patentability need not eliminate commercial potential for an Innovation and will not alter the University’s ownership of the Innovation.
6. The OTT is responsible for directing the filing of University-owned Intellectual Property. The OTT may delegate this authority including by written agreement in connection with commercializing an Innovation. As an example, the University retains qualified law firms to draft, submit and prosecute patents.
7. The OTT decides when and whether to enter into agreements conveying Innovations and the terms and conditions in such agreements.
8. Applicable Personnel are required to record all research data and information accurately and clearly and to keep all such data in a permanent and retrievable form. In addition, with regard to a patentable Innovation, original laboratory data must be kept for the life of the patent. Tangible property, including biological materials, chemical compounds, etc., must be securely stored. All of the foregoing are the University's property. Exceptions to these requirements may be adopted in writing by the TTPC.
9. It is the University’s policy to publish research results as soon as possible; however, if publication may reveal an Innovation, Applicable Personnel should seek advice from OTT as to how and when to publish the results in order that patent or other protection is not compromised.
10. Applicable Personnel are obligated to refrain from any act that would impair the University’s rights in any Innovations and must maintain the confidentiality of Innovations, along with custody of applicable data and tangible property, consistent with the University’s decisions regarding protection and commercialization. This is especially
Sharing of Revenue - Guidelines

11. If Applicable Personnel leaves the University, all the Innovations arising prior to their departure remain the property of the University, and cannot be practiced, including being commercialized, without the University's written agreement;

5.3 Release of Technology

1. In rare cases, the OTT may recommend that the University return the rights to an Innovation to the Applicable Personnel. When this situation occurs, the University will generally transfer its rights, and if so by in a written agreement that will allow the University to practice and have practiced the Innovation for research, education and/or patient care, at no cost, and may include other provisions to protect the University's interests;

2. Such a release will not be given until all pre-existing commitments to third parties, including sponsoring agencies, with regard to Innovations have been cleared;

3. Prior to conducting activities, including research and clinical trials, that could reasonably appear to influence the financial value of the released Innovation, the Applicable Personnel must disclose the potential conflict of interest.

4. Improvements, new developments and modifications to these returned rights, otherwise satisfying the definition of Innovations, remain subject to this policy;

5. Release may be conditioned upon reimbursement to the University for all Commercialization Costs and 10% of the Applicable Personnel's net income from the released Innovation.

VI. DISTRIBUTION OF REVENUE DERIVED FROM COMMERCIALIZATION OF INNOVATIONS

6.1 Sharing of Revenue - Guidelines

1. Multiple units may contribute to the support of work that leads to an Innovation, including the departments and schools/colleges of Applicable Personnel, as well as centers or institutes of which the Applicable Personnel are members.

2. Distribution of Net Revenue will follow the percent allocation for Applicable Personnel as agreed upon on the Disclosure Form. Absent agreement on the percent allocation among Applicable Personnel, and subject to notice of a dispute being resolved pursuant to Section 6.1(i), the Applicable Personnel will share equally.

3. Distribution to departments will follow the percent allocation for Applicable Personnel. For those schools/colleges without departments, the department share will be distributed to the school/college.

4. The Applicable Personnel are responsible for disclosing whether a center or institute has provided financial or other support for the work that led to the Innovation, including laboratory space, supplies or significant administrative support. In such cases, upon disclosure of the Innovation, the involved department (or school/college in the absence of departments) will work with the center or institute to agree upon sharing of the department Net Revenue with the center or institute. As centers and institutes often include faculty from more than one school or college, the Provost or Provost's designee will mediate disputes related to the department's share.

5. In the event that departments, centers or institutes from different schools/colleges contribute to an Innovation, sharing of Net Revenue will follow the allocation as determined in 6.1(c) and (d).

6. University may make alternative arrangements for distribution of Gross Revenue or Net Revenue, whether due to co-ownership, grant, funding contract, gift or other agreement, only after review and approval of the Provost or Provost's designee.

7. The OTT is authorized to delay distribution where additional expenses are anticipated, including those associated with filing for patent protection in foreign countries.

8. The University has no fiduciary or other duty regarding whether or when to liquidate equity. Unless equity is liquidated, there is no Net Revenue to distribute.

9. Any dispute regarding the distribution of Net Revenue may be addressed as set forth in Section 4.4 of this policy.

6.2 Formula for Sharing of Revenue

1. Accrued as a result of Innovations licensed or assigned prior to the effective date of this policy, and in the absence of special funding/gift agreements:
   a. Commercialization Costs will be deducted from Gross Revenue; this does not include 15% for administration of OTT; and
   b. The first $1,000 of cumulative Net Revenue shall be paid to the Applicable Personnel

2. Cumulative Net Revenue will then be distributed 1/3 to the Applicable Personnel; 1/3 to the departments of the Applicable Personnel and 1/3 to the University.
   a. Accrued as a result of Innovations licensed or assigned on or after the effective date of this policy, and in the absence of special funding/gift agreements:
      b. Commercialization Costs will be deducted from Gross Revenue; however, the 15% for administration of OTT will not be deducted from Gross Revenue until initial cumulative Net Revenue equal to $25,000 has been distributed to the Applicable Personnel; after which
      c. Ongoing Commercialization Costs will be deducted from cumulative Gross Revenue, followed by deduction of 15% for administration of OTT;
      d. Cumulative Net Revenue greater than $25,000 and up to $2 million will be distributed 1/3 to the Applicable Personnel, 1/3 to the department(s), as well as institutes and centers, as described in Sections 6.1.c - 6.1.e and 1/3 to the University.
      e. Cumulative Net Revenue greater than $2 million will be distributed 1/3 to Applicable Personnel; 1/3 to the school/college, with the Dean of the Applicable Personnel school/college having the authority to determine sharing of Net Revenue between department(s)/center(s)/institute(s) within the school/college; 1/3 to the University.

6.3 Additional Information

1. In the absence of extenuating circumstances, distributions of Net Revenue will generally be made within three months of receipt but no less than semi-annually.

2. If Applicable Personnel should change departments within the University, the department share of revenue will generally not follow the Applicable Personnel, except under special circumstances and...
only as agreed upon by the Dean of the school/college in which the original department resides.

3. If an Applicable Personnel should leave the University, the portion allocated to the Applicable Personnel's department will remain with the department.

4. Payments made to Applicable Personnel must be made to the Applicable Personnel and cannot be assigned by the Applicable Personnel to other parties or entities, except upon the Applicable Personnel's death, in which case the personal representative of the Applicable Personnel's estate will notify the University Controller's Office, in order to ensure that the appropriate paperwork and permissions are received for distribution of the revenue to the Applicable Personnel's estate/heirs.

Admission

Eligibility for Admission

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body (or equivalent credential for international applicants), the applicant for admission to the Graduate School should have the prerequisite coursework required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of "B" or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score. University of Miami faculty members above the rank of instructor are not eligible to apply for the doctorate at the University of Miami. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue doctoral degrees in their home program/school.)

For specific admission requirements see also statements of the various programs.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

All those wishing to take courses for graduate credit hour, whether or not they wish to become candidates for a degree, must make application for admission directly to the program of interest prior to registration.

Requirements for Admission Application

1. The completed application form.
2. Official transcripts of all college work, both undergraduate and graduate. International applicants must have their educational credentials earned outside the United States verified by an approved international credentialing evaluation service. Contact the specific program to which you are applying for details on this process.
3. The official score report of the appropriate entrance examination.
4. Letters of recommendation sent directly to the graduate program director of the academic program.
5. Other requirements may be required/requested by individual programs. Contact the specific program to which you are applying for their requirements, or for exemptions from the entrance examination.
6. Application fee of $85 for all graduate programs except master's and doctoral programs in the Frost School of Music, which have a $100 application fee.
7. All materials and the fee should be sent directly to the program as indicated on the application.

Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.

Categories of Admission

1. Regular admission with or without specified deficiencies. Under circumstances in which it is difficult to evaluate the academic background of intellectually qualified applicants, they may be admitted with specified deficiencies based on evaluative criteria established and maintained by the school or college. Such status is often appropriate for international students or students with extensive professional experience relevant to the desired discipline. The Graduate School allows only one semester in deficiency status. Graduate Council notification is required for programs requesting deficiency status beyond one semester. For all regular admissions with deficiencies, students must receive a list of documented requirements to remove the deficiency and specific milestones. Students who fail to qualify at the end of that time will be requested to withdraw from the Graduate School.
2. Post-Baccalaureate. This category provides an opportunity for graduate study for:
   a. qualified applicants who, for good reason, do not wish to work toward an advanced degree. This would be appropriate for those students who have special objectives for professional study or scholarly work;
   b. students enrolled in a graduate program elsewhere but desiring to earn graduate credit hour at the University of Miami for the purpose of transferring it to the other institution;
c. students already holding the master’s degree or doctorate but who desire additional coursework in their field. Those admitted to a post-baccalaureate status should realize that their future admission to regular status is improbable unless they achieve the qualifications originally appropriate to admission to those categories. This is to say that the mere accumulation of graduate course credit hours is not sufficient to permit entrance into another graduate category. No more than a total of 12 credit hours may be taken while in post-baccalaureate status.

Transient students described in (b) above should have sent to the Graduate School a letter from the Dean of the School or College of the student’s program from which they expect to earn a degree, stating that they are in good standing there and have permission to transfer credit hour. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and graduate degree [to be sent directly by the issuing institution to the Graduate School].

3. Certification/Professional Goals. This category provides an opportunity for graduate study for qualified teachers or professionals who do not wish to work toward an advanced degree but, who for professional reasons, need to continue to take graduate courses and have already taken 12 credit hours in Post-Baccalaureate Status. No credit taken in this status can be applied toward a graduate degree at the University. A letter explaining the need for the course work by the student’s employer must accompany the application.

Every applicant for admission can be assured that all credentials will be carefully studied in an effort to select appropriately qualified students. Each application for admission is examined by the members of the faculty responsible for the graduate program. The program informs each applicant of the results.

It is expected that most applicants for admission will be candidates for an advanced degree. Except under unusual circumstances those who already hold an advanced degree are not admitted to candidacy for the same degree. Graduate programs vary as to whether students who do not hold the master’s degree are required to initiate graduate studies at that level.

Applicants should note the following:

1. M.B.A. applicants should send applications and all documents to:
   The Office of Graduate Business Programs
   Miami Business School
   P.O. Box 248505
   Coral Gables, FL 33124
   For further information you may contact mba@miami.edu
2. all other correspondence, applications, and documents should be sent directly to the academic department;
3. no action is taken until a file is complete and all documents are available;
4. application files should be complete at least one month before registration, much earlier for some applications, as specified elsewhere in this Bulletin;
5. admission to graduate status does not imply admission to candidacy for a degree;
6. some programs close admissions early because of limited capacity;
7. materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant.

International Students Admissions

All international students who have been admitted to a program of full-time study at the University of Miami need to enter the U.S. on a student visa. To apply for an F-1 visa, you must provide the U.S. Embassy or Consulate with a Form I-20 or DS-2019, passport, statement of funds, and other documents as required by the U.S. Embassy or Consulate. Please visit the International Student and Scholar Services (http://www.miami.edu/isss/) (ISSS) website for further information regarding visas, travel, pre-arrival information, etc. The Form I-20 or DS-2019 can only be issued after you have been admitted and have submitted proof of adequate financial support for your studies and living expenses. For questions regarding issuance of the Form I-20 or DS-2019, please contact your individual department.

Readmission

Students who have not been continuously enrolled must request readmission and adhere to the readmission deadlines outlined in the Academic Calendar (https://registrar.miami.edu/dates-and-deadlines/academic-calendars/). Students returning from a Leave of Absence must request readmission. Contact the appropriate program office well in advance of registration. If additional college work has been completed elsewhere since the last enrollment at the University of Miami, an official transcript of this will be required. Recency of credit hour rules will apply. The application for readmission to the Graduate School may be found on the Graduate School website (http://grad.miami.edu). If you are an applicant for readmission and also an international student, please contact International Student and Scholar Services at isss@miami.edu and 305-284-2928.

Dual Degree and Accelerated Degree Programs

The University offers unique combined degree programs that culminate with students receiving both the undergraduate and graduate degrees concurrently or an accelerated program of study in which they receive an undergraduate degree and then a graduate degree the following year. These programs are intended for exceptional students to acquire both undergraduate and graduate degrees, in five years rather than the 4 plus 2 years (approximately) that is traditionally expected.

Please note: Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Requirements

Students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application. Students should discuss the program and possibility of entering the program with an academic advisor. The program may require application at the time of matriculation to the undergraduate degree or prior to the beginning of final exams in the junior year.

Undergraduate students must take the GRE Examination before the end of their classification as a senior and attain a combined score of more than 297 on the verbal and quantitative portions.

Once admitted into a dual degree or accelerated program:

In their senior year, students may take a maximum of 12 graduate credit hours, with a maximum of 6 credit hours per semester. While in senior status, to register, students must complete and submit the
Graduate School's Application for Undergraduates to Take a Graduate Course form which is available on the Graduate School website (https://grad.miami.edu/). This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status. Add/Drop and/or Course Request forms without this approval form will not be processed. Undergraduate students must register for courses with graduate status in the Office of the University Registrar. This process cannot be facilitated via online registration.

Financial Implications
Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Students are eligible for undergraduate aid only as long as they are undergraduates. Students enrolled in combined or accelerated degree programs are permitted undergraduate federal and University aid for a maximum of four academic years or to the point at which the number of graduate credit hours in a term exceeds the number of undergraduate credit hours, whichever comes first. During that time frame the student's undergraduate enrollment status will be determined using only undergraduate level courses in which the student enrolls. Graduate level courses in which the student enrolls during such seminars will not be used to determine the student's undergraduate enrollment status. Once a student is registered at the graduate level for financial assistance his/her status is considered graduate for all subsequent semesters.

Once registered as a graduate student, a student cannot revert to undergraduate status.

For further information, contact the Office of Financial Assistance at ofas@miami.edu, call 305-284-6000, or visit the office in the Whitten University Center.

Graduation Clearance Requirements
For dual degree programs, the student must apply for undergraduate and graduate graduation at the same time. Degrees from dual degree programs are conferred at the same time.

For accelerated degree programs, the student must apply for undergraduate graduation in one semester, and for graduate graduation in a subsequent semester.

The student must meet the requirements of the Graduate School specified in the Bulletin for the awarding of the graduate degree.

Students enrolled in a dual degree or accelerated program can take a maximum of 6 graduate credit hours per semester in their senior year for a maximum of 12 graduate credit hours without incurring additional costs if they are full-time undergraduate students during this period.

Students should register for courses towards their graduate degree as 'G' credit hours and not as 'U' credit hours. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

Summary of Guidelines for Dual Degree and Accelerated Programs
• Take at least 12 undergraduate credit hours per semester. This qualifies you for the opportunity to take up to 6 graduate credit hours per semester at no additional cost.
• Graduate credit hours can be taken only in the senior year in a dual degree or accelerated program (based on the number of credit hours earned towards the undergraduate degree).
• The maximum number of graduate credit hours allowed per semester is 6.
• The maximum number of graduate credit hours the undergraduate student can take at no additional cost is 12.
• The Application for Undergraduates to take a Graduate Course form should be completed and all signatures must be obtained before registering for graduate credit hours.
• The student can change his/her status to ‘graduate’, or his/her status might be determined to be ‘graduate’ for financial aid purposes during or at the completion of the senior year. This will make the student eligible for graduate financial aid (for US citizens or permanent residents).
• The student cannot be a full-time undergraduate (taking 12 or more undergraduate credit hours) and a full-time graduate (taking 9 or more graduate credit hours) student at the same time.
• Once a student’s status changes to graduate (or after they have taken a full load of graduate credit hours) his/her status cannot revert to undergraduate status.
• In a dual degree or accelerated program, an undergraduate student cannot take graduate credit hours in any other year except in the senior year.
• The student should avoid taking any undergraduate credit hours after the student's status has changed to graduate.

For University of Miami Undergraduates
University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be allowed to take up to six (6) graduate-level credits.

The Graduate School’s Application for Undergraduates to Take a Graduate Course form is available on the Graduate School website (https://grad.miami.edu/).

1. Must have a minimum of 3.00 G.P.A.
2. The submission of an Application for Undergraduates to Take a Graduate Course form (available on the Graduate School website (https://grad.miami.edu/)) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and the Graduate School Representative prior to registration.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than 6 credit hours may be taken in one semester, and no more than a total of 12 credit hours may be taken while in graduate status. Students may take no more than 15 credit hours of combined undergraduate and graduate courses per semester.¹

¹ If the total combined undergraduate plus graduate credits exceeds 15 credits, the Graduate School will require the undergraduate advisor and undergraduate dean to provide approval. Please note that the application form requires the student and a financial aid representative to sign and date the form acknowledging that the student understands the financial implications of this registration.
Master's Degree

The minimum residence requirement is two semesters in full-time study or the equivalent in part-time work. In practice, most students need at least three semesters, or two semesters plus summer work, to complete degree requirements.

Foreign Language

The requirements in a foreign language or languages are established by the student's program. In those cases where the program deems it necessary that the student have competency in a foreign language, the student will be required to demonstrate such competency by examination in one or more languages. The choice of language or languages required will be by the program.

Thesis

Decision as to the thesis subject must be approved by the program. The thesis committee will consist of not less than three members. The committee chair must be Regular Faculty from the student's program or department of concentration (this includes secondary appointments). In addition to the chair, one of the remaining members must also be Regular Faculty or have Graduate Faculty status in the student's program or department of concentration; the third member must be an outside member. “Regular Faculty” are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the Chair of the Department and Dean of the Graduate School. A program may require additional members.

The committee is nominated by the Graduate Program Director of the program concerned. The duties of the thesis committee are similar to those of the dissertation committee. The student who presents a thesis must enroll for at least 6 credit hours of thesis. Ordinarly no more than 6 credit hours may be granted.

The Dissertation Editor will provide information on the guidelines and deadlines that will become critical in the final months of the degree process and this information is located on the Graduate School website (https://grad.miami.edu/). The Graduate School office telephone number is 305-284-4154 and the email address is grad.dissertation@miami.edu.

Master's degree students who are required to write a thesis must defend their thesis by the deadline specified in the Academic Calendar (https://registrar.miami.edu/dates-and-deadlines/academic-calendars/) and on the ETD website (https://grad.miami.edu/electronic-thesis-and-dissertation/), upload one Dissertation Editor-approved PDF confroming in style to the formatting standards set by the Graduate School to the ETD database, and submit the final three forms to the Graduate School in the semester the student wishes to graduate. Final forms include one Certificate of Defense Approval form, one ETD Final Content Approval form, and one ETD Availability Agreement form. The forms are available on the Forms page of the Graduate School website. (https://grad.miami.edu/policies-and-forms/forms/)

All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (https://grad.miami.edu/electronic-thesis-and-dissertation/):
1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay;
2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the

Dissertation Editor;
3) Deadline to produce the final PDF; and
4) Deadline for completion.

It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found on the Graduate School website (https://grad.miami.edu/). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami's Scholarly Repository (http://scholarlyrepository.miami.edu/). The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university's Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student's information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted on the Graduate School website (https://grad.miami.edu/) to ensure they fully understand the terms of access for their embargoed work.

Final Examination

A final public oral defense of the thesis is required. However, none but the members of the thesis committee may interrogate the candidate. In addition there may be required, if desired by the program, a final written integration examination to test the candidate's ability to integrate the whole graduate program and the thesis in relation to it. These examinations must be held at least two weeks prior to commencement.

Research in Residence

Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. (See Recency of Credit and Time to Completion sections of the Bulletin.) Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students.

Comprehensive Examination

In most master's programs (and some doctoral programs) a comprehensive examination, either written, oral, or both, is a requirement. When the thesis is not a part of the program, an examining board, at
least one of whose members must be a regular member of the Graduate Faculty, will be appointed by the program.

A student failing the comprehensive examination may be allowed one opportunity to retake it if the student's committee so advises. The re-examination may not be taken during the same semester or summer session, and must be taken within one calendar year.

Transfer of Credit Hour

Upon recommendation of the major program and the approval of the Graduate School, a maximum of 6 credit hours of graduate credit hour, with grades of B or above, may be transferred from another accredited graduate institution, in partial satisfaction of a master's degree requiring less than 36 credit hours. 9 credit hours of graduate credit hour may be approved for transfer to a degree program requiring 36 credit hours or more. Work taken more than six years prior to transfer will not be accepted. All work transferred is subject to examination by the program. Any student wishing to transfer credit hour must first be admitted to a graduate program at the University of Miami. The satisfaction of the requirements of another university does not relieve the student from the University of Miami's requirements. An official transcript of work to be transferred must be on file in the Graduate Office. Credit hours that pertain to or have been counted toward another degree cannot be transferred. Students enrolled in the Master of Business Administration program are not eligible for credit hour transfers.

Exceptions must be approved by the Dean of the Graduate School.

No transferred credit hours are calculated into the University of Miami G.P.A.

A Second Master's Degree

A student enrolled in a University of Miami master's degree program or holding a University of Miami master's degree may earn a second master's degree in a related area at the University by completing a minimum of 21 credit hours in residence toward the second degree, as long as all program and admission requirements for the degree are met and the total credit hours for both masters degrees is at least 60 credit hours. Each degree must have a separate thesis if two thesis options are elected. The second program decides if the areas are related enough to qualify for the reduced number of credit hours. The student must contact the second program during the application process for the second program to determine if the areas are related enough to qualify for the reduced number of credit hours.

Doctoral Degree

(For Ph.D., D.M.A., and Ed.D. candidates only)

General

The Graduate School does not specify course requirements for the Ph.D. However, the Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D., and not less than half of the total credit hours must be in work open only to graduate students. At least 24 credit hours must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken. Graduate students studying for the Ph.D. who have received their master's degree in the same field must take at least 24 credit hours in residence at the University of Miami in doctoral status.

The specific course requirements for the Ph.D. are established by the major department or program which may require such additional graduate credit hour as it deems necessary. Such requirements will be found in that part of the Bulletin which lists course offerings.

Dissertation

A student must take a minimum of 12 credit hours of dissertation research except where otherwise stated. Not more than 12 credit hours of research may be taken in a regular semester, nor more than 6 in a summer session.

Ph.D., D.M.A., and Ed.D. degree students must defend their dissertation, doctoral essay, or lecture recital essay by the deadline specified in the Academic Calendar (https://registrar.miami.edu/dates-and-deadlines/academic-calendars/) and on the ETD website, upload one Dissertation Editor-approved PDF conforming in style to the standards set by the Graduate School to the ETD database, complete any online requirements, and submit the final three forms to the Graduate School in the semester the student wishes to graduate. Final forms include one Certificate of Defense Approval form, one ETD Final Content Approval form, and one ETD Availability Agreement form. All three forms are available on the Forms page of the Graduate School website (https://grad.miami.edu/policies-and-forms/forms/).

All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (https://grad.miami.edu/electronic-thesis-and-dissertation/):
1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay; 2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the Dissertation Editor; 3) Deadline to produce the final PDF; and 4) Deadline for completion.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee a minimum of two weeks prior to the defense. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting the ETD deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found on the ETD website (https://grad.miami.edu/electronic-thesis-and-dissertation/). It is the duty of the student to acquire a copy of the formatting guidelines for preparing theses and dissertations and to conform to the requirements therein. All dissertations are also published by ProQuest/University Microfilms, Inc. The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

The dissertation may be written in a language other than English at the recommendation of the dissertation committee and with the approval of the program and the Graduate School. Graduate School approval will be determined on a case-by-case basis. The Dissertation Chair will submit a memorandum from the Department Chair to the Dissertation Editor together with the student's application for admission to candidacy explaining why it is both relevant and appropriate for the dissertation research to be written in a language other than English. Acceptable "relevant and appropriate" reasons for writing the dissertation in a
Electronic Theses and Dissertation (ETD) Embargo Policy
Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami's Scholarly Repository (http://scholarlyrepository.miami.edu/). The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university's Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form available on the Graduate School website (https://grad.miami.edu/) to ensure they fully understand the terms of access for their embargoed work.

Research in Residence
Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. Research in Residence status, while not required, may purchase or receive any prerequisites that are normally available to graduate students. (See Recency of Credit section.)

Residence
The student must spend at least two consecutive semesters beyond the first year's graduate work, wherever taken, in full-time study at the University of Miami. With program approval,

1. one summer of full-time study in two sessions can be substituted for one semester of residence, or
2. full-time study for two successive summers can be substituted for two regular semesters.

Residence requirements may be altered only by the Dean of the Graduate School. (At least 24 credit hours must be taken in residence.)

The Supervisory and Dissertation Committees
A supervisory committee is usually appointed when a student is formally admitted to a doctoral program. For the dissertation/doctoral essay/lecture recital essay committee a student needs no less than four members. The committee chair must be Regular Faculty from the student's program of concentration (this includes secondary appointments). In addition to the chair, two members must be Regular Faculty or have Graduate Faculty status in the student's program of concentration. The fourth member must be an outside member. "Regular Faculty" are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the Program Director (or Chair of the Department) and Dean of the Graduate School. A department, program, or school/college may require additional members.

This committee is nominated by the chairperson of the program concerned. It is appropriate for the chairperson to consult with the student regarding the membership of the committee. The supervisory committee is empowered to plan the course of study for the student; to determine deficiencies, if any; to set language and other requirements; to request applicable transfer of credit hour where appropriate and to make up and administer the qualifying examination.

When the student is admitted to candidacy, a dissertation committee is formed. This may be the supervisory committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The dissertation committee is nominated by the department or program concerned, and appointed by the Graduate Program Director and approved by the Department Chair. The dissertation committee is comprised of at least four members; this includes the committee chair (i.e. the primary research mentor/advisor), who may or may not be from the student's program, department or school (this includes secondary appointments), and must be a permanent member of the Graduate Faculty (https://grad.miami.edu/). Of the remaining members, it is also required that two shall be members of the program or department of concentration, as well as permanent members of the Graduate Faculty (http://grad.miami.edu), and one from outside the program or department of concentration. See Faculty Senate legislation 2017-13B (https://fs.miami.edu/_assets/pdf/facultysenate/Documents/2017-legislation/2017-13B-GradSchool-composition-of-dissertation-committee.pdf). A program may require additional members. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research;
2. To meet, at regular intervals, to review progress and expected results;
3. To read and comment upon the draft dissertation;
4. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved to the student's committee. Changes of committee members must be approved by the Graduate Program Director, and submitted to the Graduate School.
Qualifying Examinations
A written qualifying examination is to be taken by each doctoral degree candidate in all doctoral programs, with the exception of Physical Therapy, at the time that the student and the supervisory committee deem appropriate. The major program may specify that its students must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the supervisory committee shall notify the Graduate School and the instructional school or program that the student has passed or failed the examination. A student who fails the examination will be given one opportunity to retake it with the permission of the supervisory committee. After a qualifying exam is failed for a second time, the student is terminated from the program. Some programs do not administer qualifying examinations during the summer months. Check with the Graduate Program Director for specific program requirements.

Admission to Candidacy
When the student has met all requirements and passed the qualifying examinations, admission to candidacy for the degree is approved. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the defense of dissertation is scheduled.

Final Examination
A final public oral defense of the dissertation is required. Refer to the Academic Calendar (https://registrar.miami.edu/dates-and-deadlines/academic-calendars/) for the deadline regarding dissertation defense for each graduation. Graduate programs set the specific requirements and format of the defense. Please contact your Graduate Program Director for details.

Transfer of Credit Hour
Upon recommendation of the major program and the approval of the Graduate Program Director and Dean of the Graduate School, graduate credit hour from another accredited institution may be transferred in partial satisfaction of the doctoral degree. Any student wishing to transfer credit hour must first be admitted to a doctoral program at the University of Miami. The satisfaction of the requirements of another university does not relieve the student from the University of Miami’s requirements. Credit hour transferred is subject to the same recency rules as all other credit hour counted toward the degree, and is also subject to examination by the program. An official transcript of work to be transferred must be on file in the Graduate School. Credit hours that pertain to or have counted toward another degree cannot be transferred. No transferred credit hours are calculated into the University of Miami G.P.A.

Florida International University and University of Miami Agreement
Effective as of Fall 2007, students may take up to 6 credit hours at the host institution as long as the following requirements are met:

1. Must be Ph.D. student or Master’s student in Latin American Studies.
2. Approval from both home and host institution;
3. Approval of Graduate School Deans;
4. Space at the host institution is available.
5. Approval of the faculty member teaching the course.

Tuition and fees are to be paid at the home institution. Performance level is set at host institution. Contact the Graduate School for more information. The application form can be found here (http://grad.miami.edu).

* Pending Board of Trustees Approval. See Faculty Senate Legislation #2018-54(8) (https://nam01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fffs.miami.edu%2F_assets%2Fdocuments%2F2018-legislation%2F2018-54b-graduate-change-transfer-credit-policy.pdf&data=02%7C01%7Cjvargas%40miamiedu%7C0be4056110c147a18eb908d6f113f463%7C2a144b72f23942d48c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17c9e0b4c0e6f0f17
UNDERGRADUATE ACADEMIC PROGRAMS
Architecture
http://www.arc.miami.edu

Introduction
The School of Architecture offers a five-year, professional program leading to a Bachelor of Architecture degree. The program is accredited by NAAB (National Council of Architectural Registration Boards) and is designated as a STEM program, allowing international graduates to extend their F-1 visas to work in the United States for up to three years.

The first three years constitutes a core curriculum that focuses on Design, Visual Representation, History, Materiality and Assemblies. This foundation provides the basis for specialized architectural study in the fourth and fifth years, where students select from a wide array of elective studio and course offerings.

The School of Architecture’s location in Coral Gables, within the Miami metropolitan area, provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals. Students have the opportunity to work with faculty in the exploration of theoretical issues and the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Mission
• Prepare students for professional leadership and lifelong learning in architecture, urbanism and related fields.
• To advance knowledge and technology through research, and creative practice.
• To deploy knowledge and technology through professional engagement, real-world applications, and community service.
• To promote the goals of environmental responsibility, social equity, and economic sustainability.

The Strategic Orientation of the School of Architecture is:
To become a hemispheric leader in problem-based learning and project-based research while contributing solutions to the challenges facing urban environments locally and globally.

Accreditation
The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accrediting Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

The University of Miami School of Architecture offers the following NAAB-accredited degree programs:
B.Arch. (171 undergraduate credits)
M.Arch I (3-year Track – 105 graduate credits)
M.Arch II (2-year Track – 60 graduate credits)

The next accreditation visit for all programs will take place in 2023

Admission
Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the School of Architecture is selective and highly competitive. Applications to the Bachelor of Architecture program are requested by January 1st. Early applications are encouraged.

Freshman
Admission decisions are based on the following factors: secondary school record, SAT/ACT score, counselor’s evaluation and the student essay. Portfolio submission is not required for entering freshmen, but is highly encouraged. Portfolios submitted by Nov. 1st will be evaluated for additional Talent Based scholarships.

Transfer Students
The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 G.P.A. is required for transfer admission. A portfolio is required for advanced placement in the design sequence of the Bachelor of Architecture Program. Application deadline for the School of Architecture program is March 1st.

All transfer students requesting advanced placement in design must provide a portfolio of previous academic design and graphic work and three academic recommendations. Students accepted into third year design will be required to complete a design module during the summer prior to enrollment.

Student Responsibilities
Students in the School of Architecture are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Written requests for variation from program or school requirements are reviewed by a faculty committee.

Academic Progress and Probation
The School of Architecture will review each student’s record at the end of each semester. When a student’s semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with School of Architecture policies and procedures. Students on probation are not permitted to enroll in more than 13 credit hours, shall meet on a monthly basis with their academic advisor, and may have a STOP placed upon their future enrollment until grades for work-in-progress are reviewed. First semester freshmen who have a semester grade-point average below 2.0 shall be placed on probation.
Students must complete all Architecture Design studios with a grade of C- or higher. Students receiving two consecutive C- grades in architecture design studios will have to repeat the later course. Students receiving a grade of D+ or lower in an architecture design studio must repeat the studio and will be restricted to a 15 credit hour semester load. The student will meet with an academic advisor on a monthly basis and will be reviewed prior to continuation.

Academic Dismissal
A student in the School of Architecture whose CGPA or progress toward degree completion falls below the level of the minimum standards of the University of Miami may be dismissed. In the School of Architecture this includes a student who receives three grades of D+ or lower in design courses.

Class Attendance and Absences
Class attendance is mandatory for all architecture courses; three unexcused absences constitutes grounds for dismissal from the course and/or a failing grade. Students are required to be present for an entire design review, therefore, students arriving late or departing early from class will be considered absent. Excused absences require written notification and are granted by the instructor.

Failing Grades or Incompletes
A required architecture course in which a student receives a failing grade must be repeated during the first subsequent semester in which the course is offered. Incompletes can be given only for reasons of serious illness or exceptional hardship.

Student Work
The University may retain selected student work and may place it in the architecture archives for exhibition, publication, or other use as the University deems appropriate. Each student in architecture is encouraged to maintain a design portfolio of every project undertaken throughout the five-year program.

Permission to Take Courses at Another University
A form is available from the Office of Academic Services and should be completed and approved PRIOR to off-campus enrollment. Students are encouraged to provide complete documentation for each course request form. Each student requesting transfer credit hour must supply the University of Miami registrar with certified transcripts. Additionally, each student should review transfer evaluations to be certain that all courses are correctly evaluated for credit hour. The proper transmission and transfer of credit hours is the responsibility of the individual student. The last 45 credit hours towards the degree must be completed at the University of Miami.

Changes to Academic Requirements
The School reserves the right to change academic requirements.

### Credit Hours Earned

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>CGPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 33 credit hours</td>
<td>2.0</td>
</tr>
<tr>
<td>33-64 credit hours</td>
<td>2.1</td>
</tr>
<tr>
<td>65-96 credit hours</td>
<td>2.2</td>
</tr>
<tr>
<td>More than 96 credit hours</td>
<td>2.3</td>
</tr>
</tbody>
</table>

### Computer Requirement
Undergraduate and graduate students entering the program are required to purchase their own computers for use in the design studio. The School of Architecture computing resources are accessible via a wireless network with an approved device and subject to School and University policy. Suggested system requirements are published on the School of Architecture web site.

### Requirements for Graduation
As part of the 171 credits required for the Bachelor of Architecture curriculum, architecture students must complete a cognate in People and Society and a cognate in either Arts & Humanities or STEM.

### Resources
The school’s resources, including state-of-the-art computer lab, digital fabrication laboratories and model shop are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers. Other programs that offer academic opportunities for undergraduate architecture students include:

- Historic Preservation Certificate
- Classical Architecture Certificate
- Sustainable and Resilient Design Certificate*
- Construction Management Certificate*
- Urban Design Certificate*
- Real Estate Development and Urbanism Certificate*
- Hospitality Design Certificate*
- Healthcare Design Certificate*
- Master of Urban Design
- Master of Real Estate Development and Urbanism
- M.S. Architecture
- Master in Construction Management

Certificates require 15 credits. One related studio (6 cr) and 3 related electives (9 cr).

*Final Board of Trustees’ approval is pending

### Dual Degree Programs
A six year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Architecture is also available (BASE/MARCH). The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect.

### Major in Architecture
- Bachelor of Architecture (p. 79)

### Minor in Architecture
- Architecture (p. 83)
Joint Degrees in Architecture
• Bachelor of Science in Architectural Engineering and Master of Architecture (p. 81)

General overview of Foote Fellows
The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows at U_SoA
Foote Fellows at U_SoA benefit from priority advising, enrollment and design studio selection (including the Partnership Studio which places students in local firms as part of their academic experience). The English and Cognates general education requirements (24 credits) are replaced with course topics of their choice so they may explore the educational resources of the University and create their own program of study. Academic and professional career advising is personalized for each Foote Fellow to ensure a trajectory is established as early as the Sophomore year.

Henry Adams Medal
Awarded in conjunction with the American Institute of Architects to the highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Henry Adams Certificate
Awarded in conjunction with the American Institute of Architects to the second highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Other honors, distinctions, and awards are presented annually for excellent student performance.

1 **Curriculum Notes**

- The School reserves the right to retain all student projects done in for academic credit hour.
- MTH 130 AND ENG 105 are entry-level courses.

2 **Electives**

The program requires four types of electives:

- Architecture electives (7 courses): Investigations in areas of architectural interest beyond the core requirements
- Professional practice elective (1 course): Focused examination of a topic related to practice
- Non-Architecture electives (5 courses): Explorations of general University offerings
- Minor (4-5 courses) or 2 cognates (6 courses): Concentrated study in an area outside of architecture

A minor or its equivalent is required for all students who began the program prior to the Fall of 2013. All others shall complete the cognate requirements. Areas are selected in consultation with advisors.

3 **Policies and Procedures**

Specific procedures and policies are detailed in the student handbook available from the Office of Academic Services.

**Mission Goals**

- To prepare students for professional leadership and lifelong learning in architecture, urbanism, and related fields.
- To preserve and develop knowledge for the profession through research and practice.
- To share knowledge locally and internationally through community service.
• To promote building and community design goals of environmental responsibility, social equity, and economic sustainability.

**Student Learning Outcomes**

• Students will demonstrate the ability to effectively use basic architectural and environmental principles in design.

• Students will demonstrate the ability to raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards.

• Students will demonstrate the ability to read, write, speak and listen effectively.

• Students will demonstrate the ability to use appropriate representational media, such as traditional graphic and digital technology skills, to convey essential formal elements at each stage of the programming and design process.

**Bachelor of Science in Architectural Engineering and Master of Architecture**

A six-year dual-degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect.

### Minor in Architecture

A minor in architecture is available to non-architecture majors as an option in the undergraduate architecture program. The purpose of the minor is to provide a general understanding and appreciation of the discipline of architecture. The minor does not satisfy professional requirements in architecture but does offer an introductory basis for further study at the undergraduate or graduate level. The program requires 12 credit hours in architecture courses.

### Curriculum Requirements

Twelve architecture credits from the following list of courses may be taken to complete the requirements for the minor.

1. To be selected from approved lists of People and Society (PS)/Arts and Humanities (HA). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230 or ARC 630, ARC 268 or ARC 476 and ARC 594.

2. To be selected from approved list of Technical Electives
Arts and Sciences

http://www.as.miami.edu

Introduction

The College of Arts and Sciences at the University of Miami is a community of scholars and students that encourages the quest for a deeper understanding of the human experience and fosters a personal commitment to lifelong learning, intellectual growth, and the enduring values of the liberal arts.

The College is dedicated to helping students develop analytical and communication skills, creative abilities, and a sense of civic responsibility needed in an increasingly complex society. It strives to provide them with a rigorous grounding in their chosen field, an awareness of the interconnectedness of disciplines, and an exposure to the discovery of new knowledge.

The College seeks to create an intellectual environment that enhances individual growth and supports scholarly activities and creative endeavors that augment human knowledge and understanding.

Degree Programs

The College of Arts and Sciences offers courses leading to the degrees of:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Fine Arts
- Bachelor of Liberal Arts
- Bachelor of General Studies (offered in partnership with DCIE, for students who are at least 22 years old pursuing their first undergraduate degree)

Graduates with one of these degrees will have had a sound liberal arts introduction to the major fields of human knowledge. In addition to this background, each bachelor's candidate has the opportunity to select an area of academic or of occupational interest. Professional or pre-professional curricula leading to certification in teaching, or to dentistry, medicine, law, etc., can be built into the degree program.

Academic Policies

The College of Arts and Sciences follows the general university academic policies outlined in the General Academic Information section of this Bulletin.

Requirements for Graduation

Candidates for degrees in the College of Arts and Sciences must complete the credit hours of work and achieve the quality point average specified for students in the University at large. These requirements are indicated in the Academic Procedures and Information section of this Bulletin. Candidates must also complete the General Education requirements of the University, i.e., the Proficiencies: English Composition, Advanced Writing and Communication, and Quantitative Skills; completion of a cognate in each of the three areas: Arts & Humanities, People & Society, and Science, Technology, Engineering & Mathematics.

I. Additional Proficiencies and Areas of Knowledge Requirements

In addition to the university's general education requirements, the college has the following requirements and provisos:

Bachelor of Science

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.
- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must complete a calculus sequence: MTH 161-MTH 162, MTH 140-MTH 141-MTH 162, or MTH 171-MTH 172.
- Computing or Statistics Proficiency: Degree candidates must earn at least 3 credit hours in either
  1. a computing course approved by the major department; or
  2. a statistics course approved by the major department.
- Natural Science Area of Knowledge: Degree candidates must earn at least 3 credit hours in Natural Science, in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credit hours must be earned in courses that count toward a major in that department.

Bachelor of Arts

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.
- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.
- Natural Science Area of Knowledge: Degree candidates must earn at least 3 credit hours in Natural Science: Anthropology (only APY 203), Biology, Chemistry, Ecosystem Science and Policy (only ECS 111, ECS 112, ECS 202), Geography (only GEG 120), Geological Sciences, Marine Sciences (except MSC 313, MSC 314), Physical Sciences, and Physics.

Bachelor of Fine Arts

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student’s major discipline.
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.

Bachelor of Liberal Arts

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student’s major discipline.

BACHELOR OF GENERAL STUDIES

Requirements for the BGS degree can be found here (p. 397):

Details of the Second Language Proficiency

Second language requirements can be fulfilled through courses offered in the departments of Modern Languages and Literatures (Arabic, Chinese,
French, German, Haitian Creole, Hebrew, Italian, Japanese, Portuguese, and Spanish, except for courses numbered 310-319, Classics (Latin and Greek), and Teaching and Learning in the School of Education (American Sign Language). The department of Modern Languages and Literatures has special courses required of heritage learners who wish to use that language to fulfill the language requirement by taking courses in their heritage language. These courses are designated as “open to heritage learners.” Courses taken in order to meet second language requirements, including necessary prerequisite courses, cannot be used in cognates taken to fulfill the Areas of Knowledge requirement.

Students who have completed at least two years of full-time secondary schooling beyond the age of 14 in which the primary language of instruction was a language other than English are eligible for exemption from the A&S second language requirement. Exemption will be granted by A&S Office of Student Advising. To be granted the exemption, the student must have on file a transcript from the secondary institution providing proof that the primary language of instruction was a language other than English.

Details of the Advanced Writing and Communication Proficiency
Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student’s major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two transfer courses towards the writing requirement.

II. Major and Minor Fields (B.A. and B.S degrees)
B.A. and B.S. degree candidates must choose a major offered in the college by one of the disciplines with an undergraduate academic program in the college, and at least one other major or minor from any of the disciplines in the university. B.S. degree candidates must choose a major from one of the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Ecosystem Science and Policy, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Psychology. B.A. degree candidates must choose at least one major or minor from a field other than the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Business Technology, and Engineering. The majors and minors taken by a student must come from different fields of study. Multiple majors and minors may be taken from departments and programs that offer multiple fields of study. To find the requirements for majors and minors, consult this bulletin under the discipline concerned, and confer with the designated departmental representatives. Any student who does not make satisfactory progress towards a major may be required to change or relinquish candidacy for the degree.

Individual courses may be used to satisfy the requirements of multiple majors and minors. However, each major taken by a student must include at least 24 credits that are not counted towards any other major or minor, and each minor must include at least 9 credits that are not counted towards any other major or minor. If a major or minor is used to fulfill a cognate requirement, the 24/9 credits may also not be counted towards any other cognate.

III. Additional Bachelor of Fine Arts Requirements
B.F.A. degree candidates must satisfy the requirements of a major as determined by the Department of Art and Art History or the Department of Theatre Arts. B.F.A. studio majors must minor in Art History. Students must maintain at least a GPA of 3.0 in their major, and an overall GPA of 2.0 or above as specified in departmental and program sections of this bulletin.

IV. Additional Bachelor of Liberal Arts Requirements
B.L.A. degree candidates must complete 120 credit hours with an overall GPA of 2.0 or above. At least 60 of the 120 credit hours must be in 300, 400, or 500-level courses. Of these 60 credit hours, 30 credit hours must be completed in the College of Arts and Sciences. No more than 40 credit hours in 300-level or higher courses may be earned in any one department, and no more than 52 total credit hours may be earned in any one department. Up to 30 of the 120 credit hours may be courses from other schools and colleges of the university except for those courses expressly excluded from recognition by the college. Students may, but are not required to, elect a major in a department. If a student fulfills the departmental requirements for the major, it will be recorded on the official transcript. No minor may be elected.

V. Other Requirements
General Electives
Beyond the general education and major/minor courses, all students must complete sufficient general electives to reach a total of 120 credit hours. Students pursuing a dual degree, when one or more of the degrees are in the College of Arts and Sciences, must complete a minimum of 150 credit hours. General electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses.

Credit Only
Only general electives may be taken under this option. Courses that are used to satisfy the major, the minor, the distribution requirements of the College and the general education requirements of the University may not be taken for credit only.

Exemption
Exemption from a course or courses refers specifically to the following:
1. credit by examination through the Advanced Placement (AP) or International Baccalaureate (IB) programs;
2. advanced placement by proficiency examinations or test scores, with no credit earned;
3. advanced standing and/or placement, with credit earned.

Transfer Credit Hours
Credit hours transferred from other institutions may not count towards the completion of a major or minor without the written approval of the department or program.

Independent Major
The Independent Major allows students to pursue a BA or a BS degree in the College of Arts and Sciences, depending on the field of study and in consultation with the Guidance Committee. Students will fulfill all requirements for such degrees.

Students may begin to develop a proposal for the IM when they have reached sophomore standing. The proposal should explain why existing
majors are inappropriate or inadequate to satisfy the student’s interests. Students will be ineligible for declaring the IM upon reaching senior standing, that is, they must declare as a sophomore or a junior and spend at least two (2) full semesters in residence at UM in the IM. Students must have a cumulative UM GPA of 3.5 or higher to be eligible for the IM.

A student's Guidance Committee typically will comprise two tenured or tenure-track faculty, typically from different departments, who represent the disciplinary breadth of the courses selected for the IM. A third Guidance Committee member might be appropriate when the proposed course of study encompasses expertise from three Departments or disciplines. The Guidance Committee Chair, who has primary oversight responsibility regarding satisfactory completion of the major, will serve as the primary advisor for the student's senior research/creative project under most circumstances, and must be a tenure-track faculty. Exceptions to the Chair serving as the primary advisor might include situations where there are co-advisors.

The IM proposal must include at least thirty (30) credit hours of coursework beyond those needed to fulfill General Education requirements. Of those thirty (30), at least six (6) must be at the 300 level; additionally, six (6) credit hours will be satisfied by a Capstone project/thesis in the last two (2) semesters of the Bachelor's degree. Because many courses have variable availability and conflicts are inevitable, strong proposals will identify more than 30 credit hours of coursework before being submitted to the Advisory Committee for approval. If a student wishes to pursue the IM as a double-major, the Advisory Committee should give particular attention to the appropriateness of the student's plan of study; no double-counting of credit hours will be allowed between the two majors.

Independent Minor
The Independent Minor allows students at the University of Miami to complete a minor in a field that currently do not have a major in the College or elsewhere at the University of Miami. It consists of at least 15 graded credits and it requires one faculty member who will act as point of contact and advisor. Students may declare this minor starting with their second semester at UM and no later than the end of their junior year. A minimum GPA for 2.5 is required to declare this minor. An average of 2.5 is required to continue in the minor. Given that this minor requires students to work closely with a faculty member to select the appropriate courses at a level consistent with each field of study, students will not be able to apply more than two courses (6 credits) already taken to their minor.

Academic Appeal Policy and Procedures
The College’s Faculty Committee on Academic Appeals (FCAA) is responsible for reviewing and conducting hearings on appeals related to exceptions to academic policy under the authority of the College of Arts and Sciences. Appeals must be submitted directly by the student from their UM email account. Appeals will not be accepted from parents/guardians, doctors, attorneys, or anyone else other than the student. Please read below for a list of acceptable and unacceptable appeal requests. All appeals related to course drops/enrollment adjustments MUST be submitted within one (1) calendar year from the semester end date noted on the academic calendar for the semester in question. Transcripts will not be altered once a student has graduated and has a conferred degree. Appeal decisions will be delivered to students’ UM email account within 2 to 3 business weeks upon receipt of the appeal. All appeal decisions are final and non-negotiable. The student maintains full responsibility for the impact of an appeal decision, especially as it relates to their account, financial aid, visa status, academic progress, and graduation timeline.

Steps to Submit an Acceptable Appeal:
1. Draft an email to the Assistant Dean of Academic Services – see website for contact information. as.miami.edu/advising.
2. The appeal email must briefly describe the situation, the reason/justification for the request, the specific request/action, the specific year/term/course ID as applicable to the type of appeal, and the student’s name/ID.
3. Appeals must be accompanied by supporting documentation, if applicable to the type of appeal. Documentation must be submitted as an attachment to the appeal email. It is the responsibility of the student to determine what documentation best supports their appeal case. We will not pre-approve documentation before submission of the appeal. We will only accept documentation from the student submitting the appeal.

Appealable Actions for Committee Review:
1. Request for retroactive drop of one, or more, courses after the last date to drop without a W, and/or after the last day to drop a class for the semester in question. This type of appeal is only considered for cases of extreme, unforeseen circumstances or medical emergencies that can be documented. Retroactive drop action can NOT result in a complete withdrawal (all enrolled classes dropped).
2. Request for waiver of the 45 credit hour residency requirement
   a. Appeal must include the institution where credits will be/were taken, the year/term to be/were taken, and the exact number of credits to be considered for waiver.
   b. This process does not preapprove transfer equivalencies or guarantee transferability of courses. Students are responsible for adhering to all necessary policies and procedures related to transferring courses to UM.
3. Substitution for, or waiver from College of Arts and Sciences’ General Education Requirements (not University general education requirements – see below).

The following requested actions are not appealable through the College of Arts and Sciences FCAA:
1. Adjustment of academic record/transcript after graduation and a conferral of the degree: See University Bulletin
2. Retroactive withdrawals for Fall/Spring semesters
   a. The University has a formal withdrawal policy found here (https://success.miami.edu/student-withdrawal/).
3. Retroactive withdrawals for summer sessions that alters the effective date of the withdrawal
   a. See withdrawal policy linked above
4. Grade Appeals, including incomplete grades that are now IF grades
   a. See Faculty Senate Appeals process in Bulletin here (p. 57).
5. Waiver of University General Education Requirements as defined by the Bulletin: No appeals process available
6. Substitution for/waiver from any requirements related to a major or minor: Under respective department authority
7. Excused absences from a course(s): Absences are under the authority of individual instructors
8. Credit Only Option after deadline: No appeals process available

PreLaw Preparation
Although no specific curriculum is required in preparation for Law School, the Pre-Law Committee of the American Bar Association strongly
recommends that students considering a career in Law should have a well-balanced education. This education should include courses requiring intensive writing, logical reasoning and critical thinking and reading skills.

Prelaw Advising provides a variety of services to all students interested in attending Law School. For more information, please contact the Office of Student Academic Services in Ashe 200. These services include:

1. Pre-Law Advising: confidential advising in preparation for law school (i.e. application process, general information, discussion of your concerns).
3. Pre-Law Newsletter: information about programs and events.
4. LSAT and LSDAS registration booklets (for juniors and seniors).
5. Campus-wide programs for pre-law students such as Law Day.
6. Programs and seminars in coordination with other University of Miami departments such as: School of Law Career Planning Center, School of Law Center for Ethics and Public Service, Toppel Career Planning and Placement, the Counseling Center, and the Reading and Study Skills Center.

In order to take advantage of the services listed above a student should complete a Pre-Law registration card at the beginning of the academic year.

Max and Peggy Kriloff Fund

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available at [this link](http://www.as.miami.edu/academics/undergraduate-studies/scholarships/); and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the College of Arts and Sciences.

Foote Fellows pursuing degrees in the College of Arts and Sciences are exempt from all University-wide and College-specific general education requirements. They are eligible for priority admission into the daVinci program, first-year seminars, and internships in the Dean's office. Opportunities to learn by doing, through research or tutorials, as well as seed money for students interested in developing a business plan or a prototype are also available to A&S Foote Fellows. Questions? Read more [here](http://www.as.miami.edu/academics/undergraduate-studies/foote-fellows/) or go to Ashe 200 for answers!

The da Vinci Program encourages high-achieving, intellectually curious students to rethink the map of human knowledge. It emphasizes connections between humanistic and scientific inquiry and their modes of understanding: objectivity, critical analysis, self-reflexivity, the nature of proof, authority, and the logic and rhetoric of written expression. It also helps define the distinctive elements that humanities classes can offer to STEM-minded students: a chance to reflect on questions of human values, ethics, and aesthetics. At the same time, it introduces humanities students to conceptually new means of investigating the traditional fields.

Students are invited in the program before their first year and they take a seminar per semester in each of the first four semesters of study. Students in the da Vinci program are exempt from College-specific requirements. A capstone experience marks the conclusion of their undergraduate career. Read more [here](http://www.as.miami.edu/davinci/) about the Davinci Program.

The Advanced Program in Integrated Science and Math (PRISM) brings together top first-year students interested in the natural sciences. The program is designed for those who plan on pursuing postgraduate education and a career in science or medicine (Ph.D./M.D. track). Our outstanding faculty, lab directors, graduate assistants, and caring advisors are here to encourage integrated learning in STEM disciplines. PRISM students are exposed to new developments in science and are encouraged to become actively engaged in research during their undergraduate experience. PRISM classes are advanced versions of the typical track done by a first-year natural science student, so there are no additional classes to complete. Read more [here](http://www.as.miami.edu/prismrsvp/) about the PRISM program.

Dual Degree Honors Programs

Fellows in Latin American Studies (FILAS)

This innovative, dual B.A./M.A. honors degree in Latin American Studies allows outstanding incoming freshmen the opportunity to complete a master's degree in five years, following a rigorous, efficient, accelerated curriculum of 150 credits. This highly selective group of students will enjoy close faculty mentoring and the opportunity to engage in specialized research projects with faculty. Students will gain advanced competence in at least one major language of Latin America, intern for one semester in public or private organizations dealing with Latin America and/or the Caribbean, and take advanced seminars with UM's major Latin American scholars and visiting scholars. In addition, students will receive first-hand experience in their regions of focus by studying abroad. Most study abroad opportunities are for one semester (six months). FILAS students may arrange their own study abroad in consultation with the academic director or they may participate in the university's study abroad options. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Fellows in Latin American Studies (FILAS). The FILAS application form and supporting materials must be submitted no later than November 1st of the applicant’s senior year. A review of completed applications will begin by the end of November. Admitted first-semester freshmen interested in admittance to the FILAS program should contact the Academic Director of the Latin American Studies Programs for application information before October 1st. For further information and application forms please visit this website [here](http://www.miami.edu/dualdegree/).

Dual-Degree Program in Law for Undergraduates

To be considered as a High School Student, applicants must:

- have a minimum SAT I score of 1350 (combined Math and Critical Reading scores) or a 30 on the ACT;
- have three (3) letters of Recommendations from high school teachers;
- complete a Dual-Degree Program Supplemental Application [here](http://admissions.miami.edu/undergraduate/academics/programs-of-distinction/dual-degree-program/dual-degree-law/) for Law by November 1st.

To be considered as an Undergraduate Student, applicants must:
• have a minimum SAT I score of 1350 (combined Math and Critical Reading scores) or a 30 on the ACT;
• have an overall cumulative grade point average of 3.5 in all college-level courses;
• have Two (2) letters of recommendations from college-level professors;
• complete a Dual-Degree Program Supplemental Application (https://admissions.miami.edu/undergraduate/academics/programs-of-distinction/dual-degree-program/dual-degree-law/) for Law.

Students admitted into the program must successfully complete 90 credits earned toward their undergraduate degree, including requirements for their majors and any minors they may be undertaking. Students must complete 90 credits in college course work at the University of Miami, including advanced standing credits, before matriculating into the University of Miami School of Law. The University of Miami requires that the last 45 credits be taken in residence. Students will graduate from the College of Arts and Sciences (http://www.as.miami.edu/) upon completion of 120 credits including AP/IB credit. Please visit http://www.law.miami.edu/admissions/dual-degree-program-in-law-for-undergraduates (http://www.law.miami.edu/admissions/dual-degree-program-in-law-for-undergraduates/).

Aerospace Studies
afrotc.as.miami.edu

Dept. Code: AIS

Air Force Reserve Officer Training Corps (AFROTC)

AFROTC is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC classes are held on college campuses throughout the United States and Puerto Rico; students can register through normal course registration processes. AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as ‘cadets’) who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

For more information on AFROTC course descriptions, please review this webpage (http://www.as.miami.edu/afrotc/).

Enrollment

There is no military obligation to enroll in AFROTC. To enroll students must meet the following criteria:

• Prior to enrolling in Aerospace classes, students must speak with a professor/cadre member at (305) 284-2870.
• Be a U.S. citizen or resident alien, or be able to become a U.S. citizen prior to attending Field Training the summer following sophomore year
• Be full-time college students, enrolled in 12 credit hours per semester
• Be able to participate in a demanding physical fitness program
• Be able to pass a Department of Defense Medical Examination
• Have solid moral character
• Maintain AFROTC minimum required grade point average

Scholarships

More than 60% of Air Force ROTC scholarships are awarded to undergraduate students in engineering or other scientific and technical disciplines. However, students in every degree program enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily. Scholarships are awarded in increments of two, three, and four years. Air Force ROTC offers several types of scholarships. Type 1 covers full tuition and most required fees. Type 2 covers tuition and fees, but is capped at $18,000 annually. Type 7 scholarships are designated for in-state tuition-level institutions. All types of awards provide an allowance for books and a monthly non-taxable stipend. All scholarship cadets are required to meet academic, military, and physical fitness standards to earn and maintain scholarship benefits.

Additionally, University of Miami undergraduates enrolled in the Air Force ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University’s tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain continuous enrollment in the AFROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University’s undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University’s AFROTC detachment.

Benefits

All AFROTC cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon being commissioned a Second Lieutenant in the Air Force, you will receive a starting salary and allowances worth more than $58,000 annually. Free medical and dental care, 30 days paid annual vacation and educational benefits are also part of the compensation package.

Africana Studies
Africana.as.miami.edu
Dept. Code: AAS

Introduction
Africana Studies offers students the opportunity to confront and critically analyze distinctive Black intellectual and social-cultural traditions, and political-economic and historical structures. Situated in Miami, Florida, we are uniquely positioned in and between the US South and the Global South. Therefore, our translocal perspective finds blackness and Black people everywhere in the world. As the university’s center for Africana Studies, the Program reaches beyond undergraduate study—inviting a wide variety of local and international graduate students, artists, scholars, and community advocates into our intellectual community.

Africana Studies’ interdisciplinary structure offers students an opportunity to satisfy the increasingly rigorous expectations of graduate and professional school admissions committees and prospective employers, offering a broad liberal arts perspective that complements specialized knowledge of a field. Our curriculum and programmatic efforts uniquely help to prepare students to understand and effectively work toward social justice. We encourage all students, regardless of major, to enroll in Africana classes. Africana Studies can be taken either as a primary major, as one of two majors, or a minor.

Educational Objectives
1. To help students research, acquire, and disseminate information about the historical and social experiences of Africans and people of African descent on all sides of the Atlantic basin, but with special emphasis on the United States.
2. To facilitate students’ understanding of the multi-cultural, multi-ethnic, globalized society of our time.
3. To help students think critically about the global black experience.
4. To prepare students for graduate work and professional careers.

Departmental Honors
Carter G. Woodson Award - Best all-round student who combines intellectual excellence and community service.

Advanced Writing Requirement
To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in Africana Studies should take at least one English course or one History course related to Africana Studies and is listed as an advanced writing course, and any Africana Studies course with the Writing Credit designation.

Major in Africana Studies

Total Credit Hours 15

* A minor in Africana Studies consists of 15 credit hours.
** A grade of C- or higher with an overall GPA of 2.0, is required in each course taken for the minor.
*** A minimum of six credit hours must be numbered 300 or higher.

Mission Goals

Student Learning Outcomes

- Students will demonstrate interdisciplinary knowledge, including intellectual and social history, language and literatures, and social and global interconnectedness.
- Students will demonstrate the ability to identify and evaluate methodological approaches and schools of thought in Africana Studies, through written argumentation.
- Students will demonstrate marked improvement in (1) level of intellectual sophistication, (2) writing effectiveness, and (3) the ability to analyze and effectively present primary and secondary research data.

American Studies

Introduction

The Program in American Studies at the University of Miami fosters the interdisciplinary study of American culture and society, and explores the place of the United States in an increasingly interconnected world.
Our faculty come from a wide range of fields, including history, literature, political science, religion, art, philosophy, law, music, ethnic studies, anthropology, architecture, sociology, communications, and education. What unites them is the commitment to examining the U.S. from multiple perspectives, highlighting the diversity of people, cultures, and experiences that have shaped the past and present United States. The Program places analysis of globalization at its center, and encourages a hemispheric perspective that allows students and faculty to explore interests in the United States, the Caribbean, Latin America, the Pacific Rim, and other border crossings.

**Educational Objectives**

The undergraduate curriculum in American Studies encourages students to bridge the divide between disciplines by examining specific themes and topics in an engaging, dynamic, interdisciplinary manner. By exposing students to courses that place questions of cultural diversity, regional difference, ethnic and racial identity, gender and sexuality, class dynamics, and popular culture at the forefront of intellectual investigation, the Program in American Studies enables them to situate their own experiences in a wider context. It also exposes them to a multiplicity of perspectives that inform our understanding of the United States and its place in a global society. The Program encourages its majors to study abroad, and faculty members help students plan their curriculum to make that option feasible.

**Departmental Honors**

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

**Advanced Writing and Communication Requirement**

To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in American Studies should take at least one English course or one History course related to the American Studies discipline listed as an advanced writing course.

**Major in American Studies**

- B.A. in American Studies (p. 91)

**Minor in American Studies**

- American Studies (p. 92)

AMS 501 can take the form of an individual research project or an internship at a local cultural or civic institution. For the research option, students will identify an appropriate faculty member to supervise and grade the project, and then obtain approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will be determined by the faculty member and student in consultation with the program director. For the internship option, students will partner with any number of local institutions and produce a creative and/or scholarly project for evaluation. The internship will be arranged through the program director, in consultation with the Butler Center. The final product will be evaluated by the program director.

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

Students must take three courses, chosen in consultation with an American Studies advisor, in a specialized area of American Studies (200 level or higher). Students may work in areas including, but not limited to, Ethnic Studies, Caribbean Studies, Latino/a Studies, Environmental Studies, Communication Studies, Women’s Literature, Urban Studies, Africana Studies, Religious Studies, or Material Culture Studies. At least one of these courses must be either comparative or non-U.S.-based.

Students must take at least 18 hours at the 300 level or above. **Departmental Honors**

### Mission Goals

#### Student Learning Outcomes

- Students will demonstrate thorough knowledge of a variety of disciplinary research methodologies that shape the study of the culture, politics, and society of the United States, and the ability to analyze both primary and secondary sources, by using a wide variety of sources in their study of the U.S. in support of interdisciplinary learning.
- Students will demonstrate a thorough knowledge in history, culture, and politics of the U.S. in the context of larger-scale global changes and by making comparisons with other cultures and societies in history.
- Students will demonstrate the ability to directly relate themes, analyses, and methodologies they learned in their courses to their own research projects.

1. A total of 9 credits at the 300 level are required. Either the American History or American Literature course must be at the 300 level to meet this requirement.

* A grade of C- or better in each course is required, with a cumulative GPA of at least 2.0 in AMS courses.

### Anthropology

anthropology.as.miami.edu
Introduction
Anthropology is the scientific study of humankind, from its beginnings to the present. Of the many sciences that study aspects of humans and their behavior, only anthropology attempts to understand and integrate the entire panorama of human culture and biology in all times and places.

The Anthropology Department offers a wide range of courses for students in pursuit of the Bachelor of Arts degree, from the basic four fields of cultural anthropology, linguistics, biological anthropology, and archaeology, to advanced study of topics such as Maya archaeology, non-Western medical practices, primatology, gender and sexuality, and the evolution of language, among many others.

Anthropological training concentrates on broadly transferable skill areas such as understanding human diversity, building research skills for collecting and making sense of information, and communicating effectively. The skills developed through completing a degree in anthropology are useful for living and working in today’s globalized world, which increasingly means interacting with people from many different cultural backgrounds and nations.

The field is especially suited to a multi-ethnic, multi-lingual, and multiculturally urban center such as Miami, and the research programs of the department faculty reflect the compositions and concerns of our larger community.

Anthropological knowledge has taken an increasing role in the solution of practical problems in public health, cultural resource and heritage management, international business, legal and human rights issues, and many other areas. The anthropological view challenges ethnocentric perspectives and encourages the rigorous exploration of the world’s cultural diversity.

Educational Objectives
Students who graduate from our program in anthropology will have achieved:

1. Basic familiarity with each of the four subfields of our discipline: archaeology, cultural anthropology, linguistic anthropology, and physical or biological anthropology.
2. Extended familiarity with one or more of these subfields in terms of knowledge of content related to, for example, gender, food, primate behavior, art, ritual, museums and collections, the interaction of language and thought, material culture, the sounds of languages; and methodological skills involving field research in one or more of the subfields.
3. The ability to articulate the anthropological view of the human condition in terms of an operational definition of culture and a holistic perspective on how humans behave.
4. Sufficient skill in research to be able to produce a research paper based on original anthropological investigation.

Advanced Writing and Communication
To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in anthropology should take at least two courses designated as W (writing intensive) offered in the department. Writing courses are regularly offered by the department; however, it is the student’s responsibility to plan accordingly and to incorporate writing-designated courses into their graduation plans.

Degree Programs
The Department of Anthropology offers a major and a minor in the University’s array of Bachelor of Arts Degrees.

Departmental Honors
A student with junior or senior standing and a cumulative grade point average of 3.5 or higher may earn honors in anthropology by completion of a qualifying senior thesis encompassing an original research agenda under the direction of a member of the faculty in the Department of Anthropology. The scope of work will be set in a thesis proposal approved by at least two faculty (one may be from outside the Department) which will result in a submitted (although not necessarily accepted) manuscript/conference paper. Students who wish to complete a senior thesis shall enroll in senior thesis/independent study classes for at least two semesters (with three being ideal, or two plus summer), such that one semester could be devoted to a directed reading, one to data collections/analysis, and the final semester to writing.

Extraordinary Anthropology majors are also recognized via an invitation to join Lambda Alpha, the international honors society for anthropology. Lambda Alpha was founded with the purpose of encouraging and recognizing outstanding scholarship and research in anthropology. Each year the Department recognizes a graduating senior with the highest academic achievement both in and outside of the classroom with the Zora Neale Hurston Award in Anthropology.

Mission
To teach students to identify the principles of human behavior and action, understand their cultural production and significance, and compare our own behaviors with those of people from other times and places around the world. The latter demands evolutionary, cross-cultural studies of human behavior.
Goals
Students who major or minor in anthropology at the University of Miami will:

- Successfully complete all courses required of Anthropology majors
- Demonstrate understanding of key methods and concepts of the discipline's four sub-fields—biological anthropology, socio-cultural anthropology, linguistic anthropology, and archaeology
- Describe in depth the developments in research in at least one of the four subfields
- Receive a foundation in critical thinking and key disciplinary ideas so that they may continue their studies in doctoral, medical, or professional programs (i.e., law school, business school) or find employment in pertinent fields after graduation.

Student Learning Outcomes

- Students will demonstrate in-depth knowledge of concepts that unify the sub-fields, or what anthropologists study and why they do so.
- Students will demonstrate knowledge of research developments in at least one of the four subfields—biological anthropology, socio-cultural anthropology, linguistic anthropology, and archaeology. To this end, they will understand how contemporary anthropologists gain information and what they learn from data collected.
- Students will receive a foundation in critical thinking skills.

* A minor in Anthropology consists of 15 or more credit hours
** A grade of C- or higher is required with an overall GPA of 2.0 including any two 200-level anthropology courses.
*** Appropriate courses offered in other departments may also be counted toward the minor with approval of the Director of Undergraduate Studies.

Educational Objectives

The Department of Art and Art History provides facilities and instruction to serve the needs of the general student. The program fosters participation and appreciation in the visual arts for students with specialized interests and abilities preparing for careers in the production and interpretation of art and art history.

Degree Programs

The Department of Art and Art History offers two undergraduate degrees:

- The Bachelor of Arts, with tracks in:
  - Art (General Study)
  - Art History
  - Studio Art
- The Bachelor of Fine Arts in Studio Art, which allows for primary and secondary concentrations in:
  - Painting
  - Sculpture
  - Printmaking
  - Photography/Digital Imaging
  - Graphic Design/Multimedia
  - Ceramics

The B.A. requires a minimum of 36 credit hours in the department with a grade of C or higher. The B. A. major is also required to have a minor outside the department. Minor requirements are specified by each department and are listed in the Bulletin. The B.F.A. requires a minimum of 72 credit hours in the department, a grade of C or higher in each course, a group exhibition and at least a 3.0 average in departmental courses. The B.F.A. major is not required to have a minor outside the department.

Writing within the Discipline

To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is art or art history must take at least one of the following courses for a writing credit: ARH 343: Modern Art, and/or ARH 344: Contemporary Art.

Departmental Honors

In order to be eligible for Departmental Honors, candidates must have completed at least nine credit hours at the 300 level or above, and must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for Honors must request admission to Departmental Honors from the Department Chair, and identify an exhibition/thesis faculty supervisor.

In addition to fulfilling the regular major requirements, students must register in their senior for six credits of Independent Study at the 500 level. Art majors will be expected to work on an exhibition project. Art history majors will be expected to research and write an Honors Thesis.

The Department Chair and the faculty supervisor will determine whether the completed exhibition project or thesis merits Departmental Honors.
Audit

Due to the nature of studio courses, it is not possible for a student to audit courses offered in the studio areas.

Majors in Art and Art History

- B.A. in Art (General Study (p. 97))
- B.A. in Art History (p. 98)
- B.A. in Studio Art (p. 99)
- B.F.A. in Art (p. 100)

Minor in Art and Art History

- Art and Art History (p. 102)

B.A. in Art (General Study)

Mission
The Art History program provides students with a broad exposure to the history of art, with the opportunity to gain an in-depth knowledge in specified subfields (e.g., European modernism; modern art in the Americas; contemporary world art; history of photography; Islamic art; Caribbean art; and Asian art).

Goals
Students gain knowledge of major monuments, artists, styles, and art historical theories, and methodologies. Coursework promotes critical thinking, written and oral communication skills, visual analysis, curatorial studies, and independent research.

Student Learning Outcomes
- Students who major in art history will have a working knowledge of artists, art historical terminology, methodologies, and different interpretive frameworks of art.
- Students who major in art history will gain effective oral communication skills in relation to artworks and the study of art history.
- Students who major in art history will gain effective written communication skills in relation to artworks and the study of art history, and will be able to locate and analyze primary and secondary sources relevant to research in art history.

Mission
The Art Department is dedicated to promoting excellence in the visual arts by encouraging originality, discovery, creativity, and critical inquiry. Students will be exposed to a variety of technical and aesthetic approaches for the making of fine art as well as be educated in the history of western art. The BA program, as opposed to the BFA program, has a strong liberal arts component and the number of credits in the major are such that students can choose to also pursue a second academic major; it’s a great degree for students with more than one interest. The BA studio emphasis is to try a variety of media, whereas in the BFA students are tasked with specializing in a primary and secondary studio major.

Goals
Student Learning Outcomes

- Students will demonstrate knowledge on the relationship between materials and concepts, apply this knowledge in a variety art media and processes, and be able to problem solve in visual arts.
- Students will demonstrate proficient written and communication skills.
- Students will demonstrate knowledge of traditional and contemporary aesthetic positions, and working knowledge of the history of art from the pre-historic period to the present. BA students are required to take the two halves of the Survey plus one elective (usually either Contemporary or Modern Art).

ARH 207  History of Photography  3

Total Credit Hours  123

1  MTH 113 or appropriate level Math course.

*  BFA Exhibition
Unless otherwise instructed, each BFA candidate will take part in an exhibition of work screened and approved by a faculty member from their area of specialization, accomplished as an art major at the University of Miami, in the Fall or Spring semester of the senior year. The BFA exhibitions are held in the College Gallery.
At the time the candidates BFA exhibition is hung, a formal critique will be arranged between the student and the art faculty.

**  BFA Minor in Art History
All BFA studio majors automatically minor in art history. A minor outside the department is not required.

Maximum Credits in Studio Areas
A BFA student is limited to a maximum of 21 credit hours in any one studio area – Painting, Printmaking, Graphic Design/Multimedia, Photo/Digital, Ceramics, and Sculpture.

Minimum Major GPA
Students must maintain at least a 3.0 average in their major.

### Mission

The Art Department is dedicated to the promotion of excellence in the visual arts by encouraging originality, discovery, creativity, and critical inquiry. The department provides an educationally diverse environment where students can acquire the critical perspectives, historical knowledge, and technical skills that will prepare them for a variety of professional careers in the arts. The BFA program, as opposed to the BA-Studio program, requires twice as many credits in the major and fewer general education requirements, allowing the students to focus more on their study of fine arts; the emphasis in the BFA is to work in-depth on a primary and secondary studio major, with some electives, whereas the BA stresses trying a variety of media. BFA students usually either continue with their studies or find arts-related employment after graduation.
Goals

Student Learning Outcomes
- Students will demonstrate knowledge on the relationship between materials and concepts, apply this knowledge in a variety art media and processes, and be able to problem solve in visual arts. They will acquire skills in a primary and secondary studio major which will constitute their portfolio, to be exhibited at the end of their final semester.
- Students will demonstrate proficient written and communication skills.
- Students will demonstrate knowledge of traditional and contemporary aesthetic positions, and working knowledge of the history of art from the pre-historic period to the present. BFA students minor in Art History, as opposed to BA students who only take the two beginning surveys plus an elective, so the expectation for BFA students is higher; should they go on to graduate work, a thorough knowledge of Art History will be necessary.

Minor in Art and Art History

Curriculum Requirements

1. All BFA studio majors automatically minor in Art History. A minor outside the department is not required.
2. A BFA student is limited to a maximum of 21 credits in any one studio area - Painting, Printmaking, Graphic Design, Multimedia, Photography/Digital Imaging, Ceramics, or Sculpture.
3. Students must maintain at least a 3.0 average in their major.
4. A minor in Art and Art History consists of 15 credit hours (9 of which must be from the University of Miami).
5. All courses must be passed with a C or higher.

Astronomy

For courses in Astronomy see PHYSICS (p. 211), in particular PHY 110 and PHY 545.

Biochemistry and Molecular Biology

http://bm.med.miami.edu/

Dept. Code: BMB

(Code for the major is either Track 1: BCHM or Track 2: BCHN)

Introduction

Biochemistry is the chemistry of life. It includes or has large areas of overlap with molecular biology, biophysics, structural biology, cell biology, metabolism, neuroscience, nutrition, genetics, etc. It tries to explain what happens in living organisms and how biological processes are regulated. It is a relatively young science. Our understanding is still developing and students can learn something new every day. An Undergraduate Major in one of our two tracks, Track 1: Biochemistry and Molecular Biology (BCHM) or Track 2: Biochemistry and Nutrition (BCHN), provides an excellent preparation for:

1. Medical School
2. Graduate Studies in all basic medical sciences: Biochemistry, Molecular Biology, Cell Biology, Genetics, Neurobiology, Microbiology, Immunology, Pharmacology, Biophysics, Physiology, Bio-informatics, Biology, Nutrition, Environmental Science, and others.
3. Industry: Biotechnology, Pharmaceutical, Food Production, Food processing, and others.
4. Allied Health Professions: Nutrition, Dentistry, Forensics, Veterinary Medicine, Toxicology, Clinical Chemistry, Environmental Science, and others.

Educational Objectives

The undergraduate program in Biochemistry & Molecular Biology strives to provide

1. superior training in nutrition, biochemistry and molecular biology and
2. encouragement for self-study and research to students seeking a BS degree.

As part of a research-oriented university, the department, through its students, creates new knowledge. As a result of our teaching efforts, the new BS's created will be able to matriculate into professional and graduate schools or to find positions in teaching professions and/or industry. In addition, the department serves the community by providing expertise in matters related to nutritional and medical biochemistry. For example, it teaches biochemistry to pre-medical and other pre-health students across a wide variety of life science related majors including biology, microbiology, neuroscience, and biomedical engineering.

Degree Programs

As a member of the College of Arts & Sciences, the Department of Biochemistry and Molecular Biology offers an undergraduate BS degree. As a member of the Miller School of Medicine, it offers the following graduate degrees: PhD, Executive PhD, dual BS-PhD, and dual MD-PhD. Also, it offers a Molecular Medicine Pathway for MD students.

Departmental Honors

Departmental honors can be earned by biochemistry majors who have:

1. Successfully completed at least 6 credit hours of BMB 545. This research must be described in a brief thesis that needs to be approved by three BMB faculty members.
2. A 3.5 or higher grade point average in all BMB courses.
3. A 3.3 or higher grade point average in all courses taken at the University of Miami.

Dual Degree Honors Program

The Dual Degree BS-PhD Program in Biochemistry & Molecular Biology is offered to mature high school seniors with strong academic ability and achievement who seek careers in biological or biomedical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Philosophy Degree (PhD) in approximately 6 years. For information see our website (http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree Honors/).
Major in Biochemistry and Molecular Biology

• B.S. in Biochemistry and Molecular Biology or Nutrition (p. 103)

Minor in Biochemistry and Molecular Biology

• Biochemistry and Molecular Biology (p. 106)

B.S. in Biochemistry and Molecular Biology or Nutrition

Major

The Bachelor of Science (B.S.) degree in either BCHM or BCHN requires 23 total credits of BMB courses: 17 credits of required BMB courses plus six credits of elective BMB courses. At least two elective BMB credits must come from a BMB lab course, either BMB 145, BMB 245, BMB 402, or BMB 545. To satisfy the College of Arts and Sciences writing requirement in the discipline, BMB majors must complete for writing credit (W) either BMB 507, BMB 511, or BMB 545. For all students, a grade of C or better must be earned in each BMB course. For current UM students to declare either major or minor in BMB, a UM cumulative grade point average of 2.9 is required. For transfer students to declare either major or minor in BMB, a grade point average of 3.5 is required. The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities. The two possible academic tracks, BCHM and BCHN, differ by two required upper level BMB lecture courses.

Freshman Year

| Fall | 17 |
| Spring | 17 |

Sophomore Year

| Fall | 17 |
| Spring | 17 |

1. Writing credit (W) may be obtained in this course.
2. These courses may be taken more than once for additional credits.
3. To enroll in CHM 121/CHM 113, students must have completed or be co-enrolled in either MTH 140, MTH 141, MTH 161, MTH 171. If math placement is below MTH 140, then students must complete CHM 110. Completion of CHM 110 will qualify students for CHM 121. Completion of CHM 121/CHM 113, CHM 221/CHM 205, and CHM 222/CHM 206 satisfies requirements for Minor in Chemistry.
4. PRISM students take PHY 211/PHY 106 and PHY 212/PHY 108. Students who struggle with calculus are recommended to take PHY 101/PHY 106 and PHY 102/PHY 108. A more advanced physics course series can be substituted (e.g., PHY 221, PHY 222/PHY 224, and PHY 223/PHY 225).
5. PRISM students take MTH 171 and MTH 172. Students may also complete the series MTH 140/MTH 141/MTH 162.
6. PRISM students take CSC 210.
7. Students must complete at least one (1) 200-level course in a foreign language, e.g., SPA 201 (Intermediate I). Typically, students with appropriate high school training in a foreign language can safely begin with SPA 102 (Beginner II), totaling 6 language credits. If no background, then students will complete SPA 101 (Beginner I), SPA 102, and SPA 201, totaling 9 credits. These course numbers pertain to all foreign language courses at UM, e.g., Spanish (SPA), French (FRE), Italian (ITA), German (GER), Chinese (CHI), etc.
8. Elective credits (3-6) may include Beginner I and/or II language courses.

**Mission Goals**

**Student Learning Outcomes**

- BMB majors, in both BCHM and BCHN tracks, will demonstrate effective writing skills, especially related to the ability to compose a thorough scientific review article.
- BMB majors, in both BCHM and BCHN tracks, will demonstrate effective critical thinking skills, notably related to the ability to readily analyze, synthesize, and draw valid conclusions from published reports in the field of biochemistry.
- BMB majors, in both BCHM and BCHN tracks, will demonstrate essential skills required to conduct supervised research in the field of biochemistry.

Total Credit Hours  16

1 A grade of C or better must be earned in each BMB course.

Biology
biology.as.miami.edu

Dept. Code:  BIL

Introduction
The Department of Biology offers undergraduate programs for students interested in a natural science education that will prepare them for careers in medicine and other health-related fields, biological research, teaching, conservation and environmental management, and other fields that require a broad base of biological knowledge.

Educational Objectives
The Department of Biology trains students to understand and use the scientific method, and to engage in critical thinking and experimental design. We strongly encourage original laboratory and/or field research under the mentorship of biology faculty. The Bachelor of Science in Biology prepares the student for further training in natural science, such as biology graduate school, as well as medical, veterinary, dental or other health-care professions. The Bachelor of Arts degree prepares the student for a career in humanities-related fields such as teaching or environmental law.

Degree Programs
Two undergraduate degrees are available in Biology: the Bachelor of Science and the Bachelor of Arts.

Both require a major in Biology consisting of 34 credit hours in BIL with a minimum grade of C- in each course and an overall GPA of 2.0.

Additional course requirements for each degree are listed under Bachelor of Science and the Bachelor of Arts elsewhere in this Bulletin.

Advanced Writing and Communication Requirement
Degree candidates in the College of Arts and Sciences must complete at least four writing courses, and at least one such course must be in the student’s major discipline. Candidates for the B.S. or B.A. degree in Biology should consult the listings at http://www.as.miami.edu/academics/undergraduate-studies/writing-courses/ to find writing-intensive courses in BIL. Transfer students may use a maximum of two transfer courses towards the writing requirement.

Honors in Biology
The Biology Department recognizes students who have achieved excellence in original research and coursework by awarding Honors in Biology. Biology Honors students work closely with faculty members first to design a research project and then conduct it for a minimum of two semesters. The centerpiece of the program is a written thesis that is submitted to the Biology Department, and presentation of the thesis research in a public forum.

Students seeking research experience are welcome to contact individual faculty in Biology, or contact the Office of Undergraduate Research for help in finding research mentors. Applications for the Honors in Biology program are due no later than the first week of senior year (or, the first week of the semester preceding the semester of graduation). Contact the Director of the Biology Honors Program for more information on the application and program.

Curriculum requirements for Honors in Biology:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 495</td>
<td>Projects in Biology</td>
<td>2-6</td>
</tr>
<tr>

</tr>
<tr>
<td>BIL 498</td>
<td>Senior Thesis</td>
<td></td>
</tr>
<tr>
<td>BIL 499</td>
<td>Research Colloquium</td>
<td></td>
</tr>
</tbody>
</table>

1 Projects in Biology involve a research project carried out under the supervision of a member of the Department of Biology faculty or alternative faculty approved by the Office of Undergraduate Research.

2 Senior Thesis (BIL 498) and Research Colloquium (BIL 499) are taken in the spring semester of the last year of study.

Advanced placement, and in certain situations, course credit hours can be earned through the College Entrance Examination Board program, placement examinations, and departmental proficiency examinations.

For Graduate programs, consult the Graduate School section of this Bulletin.

Variations within the above program may be permitted by the Department in special cases.

Majors in Biology
• B.S. in Biology (p. 109)
• B.A. in Biology (p. 107)

Minor in Biology
• Biology (p. 112)

B.A. in Biology
The B.A. degree is recommended for students involved in interdisciplinary programs and for entrance to those professional schools and specific biological careers not requiring a B.S. degree with a major in Biology.

Mission Goals
Student Learning Outcomes
• Students will, through a required core of courses including laboratories, demonstrate a broad knowledge base in Biology.
• Students will, through exposure to biological concepts, inquiry-based learning and biological research, develop the ability to think critically and to formulate and test hypotheses.
• Students will, through courses intensive in research presentations, develop presentation skills sufficient to communicate scientific information to professional and public audiences.
• Students will, through exposure to biological concepts, inquiry-based learning and biological research, develop the ability to think critically and understand proper application of the scientific method.

B.S. in Biology
The B.S. degree is recommended as preparation for medical school, veterinary school, dental school, masters and Ph.D. programs in biology, careers in biological research, conservation and environmental management, and teaching at the high school and college level. Three options are available for students to specialize within Biology.

| Additional BIL electives | | 12 |
| At least three credit hours of additional BIL electives must be at the 400-level or higher |
| At least one BIL elective must be a CAPSTONE course. (Locate capstone courses in Class Search under ‘Additional Search Criteria’, subheading ‘Class Attributes’.) |
| Two biology laboratory or field courses beyond <BIL 151 or BIL 153> and <BIL 161 or BIL 163> are required as part of the additional BIL electives. Approved laboratory/field courses at the 300 level or higher in departments other than Biology (e.g., BMB, MIC, MSC, NEU) can be counted towards this lab requirement. Check with the Department of Biology to confirm that a specific course is allowed to fulfill this requirement. |
Up to eight credit hours toward the major may be selected from courses with a biological topic and numbered 300 or higher in MBE, MES, MSC, or OCE.

A maximum of two credit hours of the following may be applied towards the major.

- BIL 371: Readings in Biology
- BIL 372: Readings in Biology

A maximum of six credit hours of the following may be applied towards the major. (Only one of these may be counted towards the lab/field course requirement.)

- BIL 495: Projects in Biology
- BIL 496: Projects in Biology
- BIL 497: Projects in Biology

A maximum of three total credit hours from the following courses may be applied towards the major. Any course in this list may be taken only once to count towards the major. However, these courses may be taken additional times for general elective credit only.

- BIL 281: Undergraduate Learning Internship in Biology
- BIL 381: Workshop Leaders in Biology I
- BIL 382: Workshop Leaders in Biology II
- BIL 481: Undergraduate Teaching Assistant Training in Biology
- BIL 482: PRISM Teaching Fellow

Chemistry

Three semesters (16 credits) of chemistry are required for the biology major. Grades of C- or higher in each of these 6 chemistry courses, and average chemistry GPA of 2.0 or higher, will fulfill the requirements for the minor in chemistry.

- CHM 121 & CHM 113: Principles of Chemistry and Chemistry Laboratory I
- CHM 221 & CHM 205: Introduction to Structure and Dynamics and Chemical Dynamics Laboratory
- CHM 222 & CHM 206: Organic Reactions and Synthesis and Organic Reactions and Synthesis Laboratory

Statistics or Computer Language/Programming

Select one statistics or one computer language/programming course from the following:

- BIL 511: Advanced Biostatistics
- ECS 204: Environmental Statistics
- IEN 311: Applied Probability and Statistics
- MSC 204: Environmental Statistics
- MTH 224: Introduction to Probability and Statistics
- PSY 291: Introduction to Biobehavioral Statistics
- PSY 292: Introduction to Biobehavioral Statistics for Non-Majors
- CSC 120: Computer Programming I

Physics

Select one of the following Options:

**Option One:**

- PHY 101 & PHY 106: College Physics I and College Physics Laboratory I
- PHY 102 & PHY 108: College Physics II and College Physics Laboratory II

**Option Two:**

- PHY 201 & PHY 106: University Physics I for the Sciences and College Physics Laboratory I
- PHY 202 & PHY 108: University Physics II for the Sciences and College Physics Laboratory II

**Option Three:**

- PHY 211 & PHY 106: University Physics I for PRISM and College Physics Laboratory I
- PHY 212 & PHY 108: University Physics II for PRISM and College Physics Laboratory II

**Option Four:**

- PHY 221: University Physics I
- PHY 222 & PHY 224: University Physics II and University Physics II Lab
- PHY 223 & PHY 225: University Physics III and University Physics III Lab

Minor in a Natural Science

A minor in chemistry, ecosystem science and policy, physics, geological sciences, marine sciences, biochemistry and molecular biology, computer science, mathematics, or microbiology and immunology

Total credit hours for the minor will vary by department.

The CHM requirement for the BS in biology fulfills either 12 or 15 (depending on which option is selected) of the 16 credits necessary for the minor in Chemistry. To complete the minor in Chemistry, only 1-4 additional credits in CHM are required beyond those necessary for the BS in Biology.

**Additional Required Courses**

- ENG 105: English Composition I 3
- ENG 106 or ENG 107: English Composition II: Science and Technology 3
- MTH 161: Calculus I 4
- MTH 162: Calculus II 4

**Language Courses**

- 3-9

**Arts and Humanities Cognate**

- 9

**People and Society Cognate**

- 9

**Electives**

- 25-0

**Total Credit Hours**

- 145-142
A maximum of one credit hour may be applied towards the major or minor. These courses may be taken more than once each for general elective credit only, but only two credits from these options may count towards the major or minor.

This will fulfill the mathematics/statistics/computer programming requirement under the College of Arts and Sciences General degree requirements for the Bachelor of Science.

Mission Goals

Student Learning Outcomes

• Students will, through a required core of courses including laboratories, demonstrate a broad knowledge base in Biology.
• Students will, through exposure to biological concepts, inquiry-based learning and research, develop the ability to think critically and to formulate and test hypotheses.
• Students will, through courses intensive in research presentations, develop presentation skills sufficient to communicate scientific information to professional and public audiences.
• Students will, through exposure to biological concepts, inquiry-based learning and research, develop the ability to think critically and understand proper application of the scientific method.

Minor in Biology

Curriculum Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 200 or higher</td>
<td><em>The following courses CANNOT be used to satisfy the Biology Minor requirement: BIL 281, BIL 381, BIL 382, BIL 481, BIL 482</em></td>
<td>9</td>
</tr>
<tr>
<td></td>
<td>All credit hours for the Biology Minor must be taken in residence at University of Miami</td>
<td></td>
</tr>
</tbody>
</table>

The requirements for a major are flexible and should conform to the objectives of the student. A grade of C- or higher must be earned in all courses taken for major or minor credit hour, and the Chemistry GPA must be 2.00 or higher. Credit hours earned in CHM 381 and CHM 382 do not count toward the major or minor.

Educational Objectives

The mission of the Bachelor’s degree program in the Chemistry Department is to promote an understanding and appreciation of the role of chemistry in modern society, especially as it relates to and integrates with other biological and physical sciences and societal issues facing humanity today such as the environment, health issues and technological advances.

Degree Programs

Three programs lead to degrees with a chemistry major:

1. The B.A. degree
2. The B.S. degree
3. The B.S. degree with certification by the American Chemical Society Committee for Professional Training of Chemists.

Departmental Honors

Honors in Chemistry may be earned by students who complete the B.S. degree in chemistry, plus at least five credit hours of CHM 488 and one credit hour of CHM 490, all with an average grade of at least 3.30. A written Honors Thesis and oral defense on the subject of the Honors Research must be presented by the student and approved by a Department Honors Committee.

Writing Requirement

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Chemistry should take CHM 320 or ENG 233.

Credit for Courses at the 100- and 200-Level

Credit hour may be earned in only one of the courses CHM 103, CHM 121 or CHM 151. Credit hour may not be earned in both CHM 104 and CHM 221.

Majors in Chemistry

- B.A. in Chemistry (p. 113)
- B.S. in Chemistry (p. 114)
- Certified B.S. in Chemistry (p. 117)
- B.S. Dual major in Chemistry and Physics (p. 218)
Minor in Chemistry

- Chemistry (p. 119)

B.A. in Chemistry

http://www.as.miami.edu/chemistry/

The B.A. degree requires 27 credit hours of chemistry. This major is designed for premedical students, high school science teachers, and others who choose a non-science minor. It may be combined with business courses in an interdisciplinary program. Variations within the program may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner.

**Mission Goals**

**Student Learning Outcomes**

- Graduates will be able to demonstrate a broad understanding of fundamental chemical principles in all areas of the field.
- Graduates will be adept in a broad variety of chemical instrumentation and analytical techniques.
- Graduates will display effective and strong written communication skills pertaining to chemical research.

### B.S. in Chemistry

http://www.as.miami.edu/chemistry/

The B.S. degree requires 41 credit hours of chemistry. This major meets the minimum entrance requirements of many graduate programs in chemistry. Variations within the program may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner.

Mission
Goals
Student Learning Outcomes
• Graduates will be able to demonstrate a broad understanding of fundamental chemical principles in all areas of the field.
• Graduates will be adept in a broad variety of chemical instrumentation and analytical techniques.
• Graduates will display effective and strong written communication skills pertaining to chemical research.

B.S. / M.S. in Chemistry Five-Year

The BS/MS program is a five-year program emphasizing research in the senior year and in the Master’s year. Before they enter the program, students will be prepared for their research experience through existing laboratory courses and by mentored research with a Chemistry graduate faculty member. Whereas students may begin mentored research as early as their freshman year, it is expected that they should have at least one semester of research prior to the start of their senior year. Students will have access to capstone and interdisciplinary 500 level courses as seniors and to 600 level courses as Master’s students.

**Total Credit Hours:** 122-128

---

1. PHY 230 can substitute for PHY 222 and PHY 223.
2. Variations within the above programs may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department.
3. Students should make certain that math and physics prerequisites are fulfilled in a timely manner.

---

### Introduction

All culture and civilizations have their classics: those works of art that are seen as the best of their kind, have withstood the test of time, and embody the symbolic values of their society. In the Western tradition, the study of 'Classics' has focused upon the languages, thoughts, literatures, and cultures of ancient Greece and Rome, and their impact on the whole subsequent history of the Western world.

The study of Classics has been conceived in unusually broad terms; it is intended to encompass everything that can be known about the ancient Mediterranean world. There is room in Classics for the study of fields as disparate as literature, science, sculpture, history, architecture, religion, philosophy, theater, economics, music — in short, the entire panorama of human endeavor. It is no wonder that the study of Classics has always tended to attract some of the liveliest and most brilliant intellects; and it is equally unsurprising that students majoring in Classics find themselves extremely well-prepared for undertaking practically any type of career, whether that be in politics, law, medicine, teaching, publishing, research of all kinds, journalism, banking, or the corporate world. A degree in Classics marks the UM graduate as a person of superior analytical and critical skills, one who has proved able to cope with a rigorous academic curriculum, and who is exceptionally educated in the most fundamental aspects of what it means to be human. Thus, Classics is at the core of the humanities.

### Educational Objectives

The educational objectives of the Department of Classics may be stated in a variety of ways, and on a number of levels. In terms of linguistic competency, students majoring (or minoring) in Classics are required to reach an appropriate level of fluency in reading ancient Greek or Latin, or both. In terms of cultural literacy, students of the Classics are educated within a rigorous curriculum exposing them to the great literary works and material cultures of ancient Greece and Rome. In terms of critical thinking, students of the Classics are trained to hone the skills of memory, analysis, and synthesis, skills that they will be able to apply for the rest of their lives in any realm of thought or action whatsoever.

The goal of an education in Classics is to foster and inculcate an ever-burgeoning awareness of what Cicero referred to as *humanitas* — in short, everything it is to be human. It is the mission of Classics to expose its students to the greatest thoughts and endeavors of the human race, and to encourage them to think about what that greatness consists in, and how to enlarge upon it. The profoundest educational objective of the Department of Classics is to preserve and study all that is important about the past, in order best to prepare for the future.

### Degree Programs

The Department of Classics offers the Major and the Minor in Classics.

#### Major in Classics

The undergraduate Major in Classics at UM has four possible tracks. Greek, Latin, Greek and Latin, and Classical Civilization. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Classics should take three courses marked W from the list of GRE, LAT, and CLA courses offered in the catalog.

#### Departmental Honors

A student may earn Honors in Classics by completing a 'capstone' project with a grade of B or higher. This project can be the senior thesis (CLA 495 and CLA 496) or an Independent Study course (LAT 491, GRE 491, or...
CLA 491) that includes a substantial research paper. Either project must be supervised by a faculty member in the Classics Department. In order to qualify for a ‘capstone’ project, the student must have by the end of the junior year a minimum GPA of 3.5 in the Classics major and 3.3 overall.

In addition, Classics Majors, Classics Minors, and other students who meet certain academic criteria are eligible for membership in Eta Sigma Phi, the National Honors Society for Classics.

**Majors in Classics**

B.A. in Classics with Tracks in:

- Greek (p. 121)
- Latin (p. 124)
- Latin and Greek (p. 122)
- Classical Civilization (p. 120)

**Minor in Classics**

- Classics (p. 125)

**B.A. in Classics - Classical Civilization Track**

Mission Goals

The objectives of the program and of the Bachelor of Arts in Classics have remain the following:

- to train students in the Ancient Greek and/or Latin languages;
- to educate them about the literature, history, archaeology, and philosophy of the ancient Greco-Roman world;
- to hone their skills in written English; and
- to allow them to develop a broad knowledge of the arts of language and the logic and rhetoric of expression.

Like majors in English, History, and Philosophy, majors in Classics go on to a wide variety of graduate and professional programs: medical school, nursing school, other health professions, business school, the arts, museums, and library sciences. Majors in Classics receive superb preparation for law school, become bankers and entrepreneurs, and work for both government and non-government organizations such as charitable institutions and foundations. Our program trains students to enter these fields with strong intellectual values and well-honed skills in expository and analytical language.

Student Learning Outcomes

- Language Competence: To complete the degree in Classics the student must gain the ability to read Classical Latin and/or Greek texts, in the original language(s), at either an intermediate (Track IV) or an advanced (Tracks I-III) level of fluency.
- Cultural and Disciplinary Literacy: To complete the degree in Classics the student shall receive extensive exposure to Classical texts, both in the original language(s) and in English translation. In the process, s/he should also gain a solid grounding in the basics of the field, and a substantial basic awareness of several areas of the academic discipline: archaeology, philosophy, ancient history, and literature.

- Written and Analytical Expression: To complete the degree in Classics the student must demonstrate the ability to read intelligently, to think analytically, and to write critically about Classical literatures and cultures. S/he should also have developed an awareness of how such knowledge pertains to any individual's metaphysics, epistemology, and ethics—in other words, how Classics pertains to living richly and as a productive member of society. (It should be noted that the Department of Classics has been collecting data for this learning outcome, now required under the new Advanced Writing and Communication Requirement of the College of Arts and Sciences, since Fall 2011).

Computer Science

csc.as.miami.edu

Dept Code: CSC

Introduction

The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. The Department has faculty with strong accomplishments in the fields of algorithm engineering, automated reasoning, bioinformatics, computational complexity, computational geometry & computer graphics, cryptography & network security, data mining, data science, molecular computation, multimedia systems, music information retrieval, robotics, scientific computing, scientific visualization, semantic web, and wireless & mobile computing.

Educational Objectives

The Department of Computer Science educates students in the science of software development: the analysis of domain problems, the development of algorithms and programs, the use of specialist computing techniques, the system-software and hardware platforms, and the production and deployment of efficient and robust computer software. Instruction ranges from introductory programming classes and laboratories, through to research in various areas of computer science.

Degree Programs

The Department of Computer Science offers

- a Bachelor of Science (BS) major (p. 128)
- a Bachelor of Arts (BA) major (p. 126)
- a 5-year Bachelor of Science + Master of Science (BS+MS) (p. 674)
- a minor (p. 133)
Computer Science as a Second Major
An additional major in Computer Science is available to all students. An additional major in Computer Science requires completion of the requirements of a Computer Science major, either the Additional Major in Computer Science, Fundamentals (p. 126) or the Additional Major in Computer Science, with Tracks (p. 128).

Writing within the Discipline
To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is Computer Science must take at least one of the following courses for a writing credit: CSC 405, CSC 410, CSC 431, ENG 233.

Departmental Honors
In addition to the University's requirements for Departmental Honors, Departmental Honors in Computer Science requires completing a major and 6 additional approved credit hours (all CSC 4XX and CSC 5XX courses are approved). The major or additional credit hours must include at least 3 credit hours from CSC 410 and/or CSC 411.

Notes
• A grade of C- or better in all CSC courses is required in a major or minor.
• An overall GPA of 2.5 or better in all CSC courses is required in a major or minor. This GPA is computed using only courses from this department. If a course is repeated only the highest grade for the course is used.
• For a Computer Science major, at least 15 credit hours of CSC courses must be completed at the University of Miami.
• For a Computer Science minor, at least 9 credit hours of CSC courses must be completed at the University of Miami.

Majors in Computer Science
• B.S. in Computer Science (p. 128)
• B.A. in Computer Science (p. 126)

Minor in Computer Science
• Minor in Computer Science (p. 133)

Joint Degrees in Computer Science
• BS + MS in Computer Science - Five Year (p. 130)

---

1. CSC40X - Computer Science Practicum courses must be done at the same time as their host courses.
2. Maximally 6 credits from CSC481 - Undergraduate Teaching Assistant in Computer Science.
3. BTE 120, BTE 320, or ECE 118 may not be taken if CSC 120 is already taken.
4. ECE 481 and 482 may also be used to replace any requirement for CSC410 or CSC411.
5. For the Additional Major in Computer Science, Fundamentals, B.S. students in the College of Arts and Science should use the requirements of the B.S. in place of the additional requirements listed here. Students not in the College of Arts and Sciences should use the requirements of their school or college's degree.
**Mission**

The Department's mission is to educate and perform scholarly activities in the discipline of Computer Science, in order to meet national and international demand for trained computer scientists who are capable of building the robust computation structures upon which society is becoming increasingly dependent.

**Goals**

Students will acquire understanding and capability for the structure and developmental processes of software systems, from the translation of domain problems to forms amenable to software solution, through the production of efficient and robust computer programs, to the supporting systems and hardware components.

Students will acquire these abilities through a combination of classroom instruction, laboratory work, independent project work, and group project work.

Graduates will be prepared to work in industries that are directly involved in the development of fundamental computing resources (e.g., Microsoft, Apple, IBM, Intel, etc.), and in industries that rely on computation in support of their core businesses (e.g., banking, transport, manufacturing, medical, etc.).

Faculty and students will engage in activities that support and achieve the development of new techniques and software that can contribute to the science, and where appropriate contribute to the teaching objectives. Examples of such activities include academic research, development of novel techniques and software products, consulting and internship activities in local industries, and maintaining awareness of cutting edge approaches to Computer Science.

**Student Learning Outcomes**

- Students must be able to translate domain problems to forms amenable to software solution.
- Students must be able to produce efficient and robust computer programs.
- Students must be able to build and deploy a completed, integrated, and documented (Advanced Writing and Communication Skills) software solution to a domain problem.
- Students must have understanding and competence in the mathematical foundations of Computer Science.

### Mission

The Department’s mission is to educate and perform scholarly activities in the discipline of Computer Science, in order to meet national and international demand for trained computer scientists who are capable of building the robust computation structures upon which society is becoming increasingly dependent.

### Goals

Students will acquire understanding and capability for the structure and developmental processes of software systems, from the translation of domain problems to forms amenable to software solution, through the production of efficient and robust computer programs, to the supporting systems and hardware components.

Students will acquire these abilities through a combination of classroom instruction, laboratory work, independent project work, and group project work.

Graduates will be prepared to work in industries that are directly involved in the development of fundamental computing resources (e.g., Microsoft, Apple, IBM, Intel, etc.), and in industries that rely on computation in support of their core businesses (e.g., banking, transport, manufacturing, medical, etc.).

Faculty and students will engage in activities that support and achieve the development of new techniques and software that can contribute to the science, and where appropriate contribute to the teaching objectives. Examples of such activities include academic research, development of novel techniques and software products, consulting and internship activities in local industries, and maintaining awareness of cutting edge approaches to Computer Science.

### Student Learning Outcomes

- Students must be able to translate domain problems to forms amenable to software solution.
- Students must be able to produce efficient and robust computer programs.
- Students must be able to build and deploy a completed, integrated, and documented (Advanced Writing and Communication Skills) software solution to a domain problem.
- Students must have understanding and competence in the mathematical foundations of Computer Science.

### B.S. + M.S. in Computer Science - Five Year

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students enter the ‘MS-phase’ of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-Requisites for entry to Regular MS in Computer Science Program</td>
<td></td>
<td></td>

</tr>
<tr>
<td>CSC 220</td>
<td>Computer Programming II</td>
<td>4</td>
</tr>
<tr>
<td>CSC 314</td>
<td>Computer Organization and Architecture</td>
<td>3</td>
</tr>
</tbody>
</table>
Students in the MS-phase must complete 3 further credit hours of CSC 410 and/or CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree.

Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

ECE 482  Senior Project II 9
MTH 320  Introduction to Numerical Analysis
MTH 505  Theory of Numbers
MTH 520  Numerical Linear Algebra
MTH 521  Numerical Methods in Differential Equations
MTH 524  Introduction to Probability
MTH 525  Introduction to Mathematical Statistics
MTH 542  Statistical Analysis

**Additional Requirements for the B.S.** 10
ENG 105  English Composition I 3
ENG 106  English Composition II 3
Language Requirement 3-9
Arts and Humanities Cognate 9
People and Society Cognate 9
Electives 25-16

Total Credit Hours 120

---

1 These mathematics courses can also fulfill the requirements for a Minor in Mathematics (see here [http://bulletin.miami.edu/undergraduate-academic-programs/arts-sciences/mathematics/mathematics-minor/] for details).
2 Available to all students.
3 The Comprehensive Track provides coverage of the topics in Computer Science prescribed by the Association of Computing Machinery curriculum and the ABET Computing Accreditation Commission.
4 Requires permission of the Director of Undergraduate Studies.
5 In addition to the generally approved electives, CIM 416, CIM 424, MMI 504, and MMI 505 are approved for the Graphics and Games track.
6 This course may also be applied towards the Science requirement.
7 CSC 40X - Computer Science Practicum must be taken at the same time as host course.
8 Maximally 6 credit hours from CSC 481 - Computer Science Teaching Assistant.
9 ECE 481 and ECE 482 may be used to replace any requirement for CSC 410 and CSC 411.
10 For the Additional Major in Computer Science, with Tracks, students not in the College of Arts and Sciences should use the requirements of their school or college’s degree in place of the additional requirements listed here.

**M.S. Curriculum Requirements**
Students must complete the Graduate School requirements, and the Departmental requirements described here.

<table>

<tbody>
<tr>
<td>CSC 810</td>
<td>Master's Thesis</td>
<td>6</td>
</tr>
</tbody>
</table>

**Thesis Option**
24 credits from approved courses, including at least 9 credits from CSC7XX courses.

**Coursework Option**
30 credits from approved courses, including at least 12 credits from CSC7XX courses.

Total Credit Hours 30-36

---

1 For both options, at least 18 credit hours must be from CSC 6XX and CSC 7XX courses, and may not include more than 6 credit hours from CSC 670.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designate. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.

All Computer Science graduate TAs and RAs must complete Responsible Conduct of Research (RCR) training during their first semester in the department. All other Computer Science graduate students must complete RCR training before starting research work. Information about RCR training can be found from UM ethics programs: [http://www.miami.edu/index.php/ethics/projects/rcr/](http://www.miami.edu/index.php/ethics/projects/rcr/) (https://ethics.miami.edu/disciplines/research-ethics/responsible-conduct-of-research/).

1. A strong component of a social science education, training in analytical and statistical skills that are highly valued by potential employers.

2. A valuable undergraduate preparation for pursuing careers in such fields as law in society, in the local and state criminal justice systems (e.g., juvenile probation officer, pretrial services officer, crime analyst for criminal justice agencies), or in federal agencies (e.g., DEA).

3. An excellent and comprehensive training program for students wishing to pursue graduate study in criminology, law school, criminal justice, sociology, or other social and behavioral sciences.

Degree Programs

Students may earn a Bachelor of Arts degree in Criminology. The Department of Sociology also offers graduate programs leading to a PhD degree in the areas of:

- Criminology
- Medical Sociology
- Race, Ethnic Relations, and Immigration

Departmental Honors

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Criminology. They must also achieve a minimum of B in all Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.
2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee in the Department of Sociology. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor for all six credit hours.

3. Recruitment of eligible students is by departmental invitation during a student’s junior year.

**Advanced Writing and Communication Requirements**

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Criminology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered by the department; however, it is the student’s responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

**Alpha Phi Sigma**

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Phi Sigma, the National Criminal Justice Honor Society. Alpha Phi Sigma sponsors events that enhance the academic and social life of the department.

**Major in Criminology**

- B.A. in Criminology (p. 135)
- Criminology & Sociology Double Major; Combined Minor (p. 239)

**Minor in Criminology**

Additional Recommended Courses

- EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education
- PSY 291 or PSY 292 can be substituted for SOC 211 only by students who are Psychology majors or minors and also majoring in Sociology or Criminology; they will be required to take SOC 212, unless a Psychology major. PSY 390 can be substituted for SOC 212 only by students who are psychology majors.

* A minimum final grade of C- in all courses offered by the Department
** A minimum cumulative GPA of 2.0 in all courses offered by the Department
*** A minimum of 16 credit hours must be earned in residency in the Department; thus, only a maximum of 15 credit hours can be transferred from other institutions as eligible for the CRIMINOLOGY major

Mission Goals

The undergraduate program in Criminology has as its main objectives are to provide students with:

- A strong component of a social science education, training in analytical and statistical skills that are highly valued by potential employers.
- A valuable undergraduate preparation for pursuing careers in such fields as law in society, in the local and state criminal justice systems (e.g., juvenile probation officer, pretrial services officer, crime analyst for criminal justice agencies), or in federal agencies (e.g., DEA).
- An excellent and comprehensive training program for students wishing to pursue graduate study in criminology, law school, criminal justice, sociology, or other social and behavioral sciences.

Student Learning Outcomes

- Students will demonstrate a thorough understanding of Criminology, and the basic criminological theoretical concepts and knowledge base.
- Students will develop and demonstrate critical thinking skills through the comprehension, analysis and critique of criminological theories.
- Students will demonstrate an ability to understand and critique criminological research methodology. Students will have the ability to design and critique valid research studies and to identify reliable findings from such studies.

Total Credit Hours: 15

* A minimum final grade of C- in all courses offered by the Department.
** A minimum cumulative GPA of 2.0 in all courses offered by the Department.
*** A minimum of 9 credit hours must be earned in residency in the Department; thus, only a maximum of 6 credit hours may be transferred from other institutions as eligible credit hours for the Criminology major.

Economics

Introduction and Educational Objectives

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

A student pursuing the Economics major or minor will select one of two possible options: Political Economy (People and Society) or Quantitative Economics (Science, Technology, Mathematics, and Engineering). There is also a minor in Sustainable Business, which is available to all students.

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Students interested in pursuing the Doctor of Philosophy in Economics (p. 724) may seek additional information through the Department of Economics.

Major in Economics

- B.A. in Economics (p. 137)
• Minor in Political Economy for Non Business Students (p. 292)
• Minor in Quantitative Economics for Non Business Students (p. 293)
• Minor in Sustainable Business (p. 294)

B.A. in Economics

Curriculum Requirements

A student pursuing the major in Economics through the College of Arts and Sciences will select one of two possible options: Political Economy (the People and Society option) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering option) and complete the curriculum requirements as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>

### Quantitative Economics Required Courses (STEM):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 211</td>
<td>Principles of Microeconomics</td>
<td></td>
</tr>
<tr>
<td>ECO 212</td>
<td>Principles of Macroeconomics</td>
<td></td>
</tr>
<tr>
<td>ECO 301</td>
<td>Macroeconomic Theory</td>
<td></td>
</tr>
<tr>
<td>ECO 302</td>
<td>Microeconomic Theory (requires MTH 161 or equivalent as a pre-requisite)</td>
<td></td>
</tr>
<tr>
<td>ECO 430</td>
<td>Applied Econometrics</td>
<td></td>
</tr>
</tbody>
</table>

#### Major Choice Courses (STEM): Select five courses (15 credit hours). Only one course of the five major choice courses may be a People & Society ECO major choice course. Students must select four to five STEM-designated major choice courses (12-15 credit hours) from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 444</td>
<td>Game Theory in Economic Applications</td>
<td></td>
</tr>
<tr>

Students construct their individualized plans in collaboration with their assigned academic advisor.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition, mathematics, and modern language. Moreover, numerous plan variations are possible if a student enters the University with advanced college

Mission

Economics uses the principle of utility maximizing behavior to provide a unified framework for studying how people make choices. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of human behavior. The program provides excellent preparation for careers in business, government, research organizations, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as economics, law, business, international studies, public administration, and public health.

Goals

- To teach students foundational material to ensure they have a deep understanding of economic theories and quantitative methods.
- To prepare students with the skills essential for professional careers and admission to business school, law school, economics Ph.D. programs, or multidisciplinary programs.
- To ensure students demonstrate analytical thinking and problem-solving skills.
- To prepare students for using quantitative tools, analytical models, and conceptual frameworks to analyze economic data.
- To ensure students are able to demonstrate technical writing skills.

Student Learning Outcomes

- Students will demonstrate proficiency in the fundamentals of economic theories and quantitative methods.
- Students will be able to think analytically and demonstrate problem-solving skills.
- Students will be able to interpret quantitative data appropriately, and select and use appropriate models, conceptual frameworks, and quantitative tools to analyze economic data.

Ecosystem Science and Policy

abess.miami.edu

Dept. Code: ECS

Introduction

The undergraduate program in Ecosystem Science and Policy (ECS) is offered by the Leonard and Jayne Abess Center for Ecosystem Science and Policy. The goal of the program is to educate the next generation of environmental leaders. The ECS program provides students with a broad background in environmental issues from a variety of perspectives, along with in-depth education in an area of specialization.

Educational Objectives

The ECS major offers a series of problem-based learning courses, culminating in a capstone course in the senior year. Courses emphasize integration of science and policy approaches to real-world environmental issues. This preparation gives students both the theoretical background and technical skills to pursue environmental careers in, teaching and research, as well as for careers in government and private industries concerned with the environment.

Advanced Writing and Communication Requirement

To satisfy the Advanced Writing and Communication requirement, students majoring in ECS take three ECS writing intensive courses (ECS 113, 302, 403). They also receive instruction in scientific communication, including how to make charts, graphs, maps, meeting posters, and other representations of data, in ECS 112 and 301. Many ECS courses co-listed with other departments /programs are writing intensive or include instruction in visual communication.

Degree Programs

The Ecosystem Science and Policy program offers two undergraduate degree major programs: a Bachelor of Science (B.S.) and a Bachelor of Arts (B.A.). The minor consists of 15 credit hours. Majors are required to complete either an environmentally related internship or a research project with the Center for Ecosystem Science and Policy or with other UM faculty.

Only those courses passed with a grade of "C-" or better in the ECS core may be applied to the major or minor. All ECS majors are required to maintain an overall cumulative grade point average of 2.5 or better.

---

1 A calculus course is required for the Economics major. If a student wishes to take ECO 302 or selects the Quantitative Economics Major option, then MTH 161 or an equivalent must be taken. If a student has taken an 'applied' calculus course such as MAS 110 or MTH 130, then he/she will take ECO 300 instead of ECO 302 and must follow the Political Economy (P&S) Major option for Economics.
Majors in Ecosystem Science and Policy

- B.S. in Ecosystem Science and Policy (p. 143)
- B.A. in Ecosystem Science and Policy (p. 140)

Minor in Ecosystem Science and Policy

- Ecosystem Science and Policy (p. 149)

Certificate in Ecosystem Science and Policy

- Sustainability (p. 147)

B.A. in Ecosystem Science and Policy

The B.A. degree in Ecosystem Science and Policy is recommended in preparation for careers in law, government and business, including professional schools and careers in government and private industries concerned with the environment. Students pursuing the B.A. may choose to have the major fulfill either the STEM or People & Society cognate; they will need to complete the other cognate plus the Arts & Humanities cognate. Students with a second major in another school or college should consult their advisors regarding requirements for that major. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major. Students whose primary college is Arts & Sciences are required to complete four courses designated as 'Writing Intensive' (also known as 'W') courses. Those seeking a B.A. degree in ECS must complete at least two, but as many as four, ECS courses designated as 'W'. These include ECS 113, ECS 301, ECS 302, ECS 402, and ECS 403. Up to two 'W' courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

| Select three credit hours of environmentally-related People & Society electives: |                                                        | 3            |
| Select three credit hours of environmentally-related People & Society electives at 300 level or higher: |                                                        | 3            |
| APY 418 Seminar in Anthropology |                                                        |              |
Suggested Plan of Study - with Minor

In this plan, we are showing the case in which study abroad simply counts toward the total required for graduation, 120 credits. However, study abroad courses generally can be used as courses for ECS, for a minor, or for cognates, in which case there would be additional electives opened up in subsequent semesters.

**Course**  | **Title**                                                                 | **Credit Hours** |
---          |---------------------------------------------------------------------------|-----------------|
**Year One** |                                                                          |                 |

            | Arts and Humanities Cognate Course                                       | 3               |
            | **Credit Hours**                                                         | **15**          |

1 Additional courses may be approved by the ECS program.
2 APY, ARC, ECO, ECS, GEG, HIS, INS, LAS, MAF, POL, SOC
Mission

The mission of the Ecosystem Science and Policy (ECS) program is to educate the next generation of environmental leaders. Future leaders need to find ways to meet human demands, while protecting and restoring the natural environment that sustains us. As science increasingly demonstrates the complex interconnectedness of all the elements of natural systems, environmental decisions must take into account potential ecosystem-wide effects to be truly effective. Environmental scientists and non-scientist policy-makers, managers, and planners must communicate with each other in new and better ways as development and environmental policy decisions are made. The program offers two degrees, a Bachelor of Science and a Bachelor of Arts.
Goals
The Bachelor of Arts degree prepares students with knowledge in a broad background of environmental issues from a variety of perspectives, along with in-depth education in a related area of specialization. Students earning a Bachelor of Arts degree in ECS carry out intensive study in social science approaches to environmental issues.

Student Learning Outcomes
- Scientific Knowledge: Students will demonstrate a comprehensive understanding of ecosystem science.
- Policy Knowledge: Students will demonstrate an ability to evaluate the role of science and technology in society and demonstrate understanding of factors involved in the formulation and implementation of environmental policy.
- Communication Skills: Students will demonstrate communication skills to convey information, orally and in writing, to both scientific and lay audiences.

B.S. in Ecosystem Science and Policy
The B.S. degree in Ecosystem Science and Policy is recommended for students intending to attend graduate or professional schools in pursuit of research or academic careers (including secondary or higher education). It is also suitable for those preparing for technical careers in government and private industries concerned with the environment. Students pursuing the B.S. may choose to have the major fulfill either the STEM or People & Society cognate; they will need to complete the other cognate plus the Arts & Humanities cognate. Students with a second major in another school or college should consult their advisors regarding requirements for that major and school or college. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major. Students whose primary college is Arts & Sciences are required to complete four courses designated as ‘Writing Intensive’ (also known as ‘W’) courses. Those seeking a B.S. degree in ECS must complete at least two, but as many as four, ECS courses designated as ‘W’. These include ECS 113, ECS 301, ECS 302, ECS 402, and ECS 403. Up to two ‘W’ courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

ECS electives at the 300 level or higher
In addition, students must take the following courses, which may fulfill cognate or second major requirements:

Science Core Courses
- A science course at the 110 level or above with lab (BIL, GSC, MSC, PHY) | 4
- CAE 240 Environmental Pollution | 3
- CAE 340 Introduction to Environmental Engineering |
- CHM 121 Principles of Chemistry | 5
- CHM 113 and Chemistry Laboratory I |

Complete one of the ECS science tracks (see table below) | 9-22
- Environmental Chemistry Track
- Environmental Health track
- Geology track
- Geospatial Certificate track
- Mathematics track
- Conservation Biology track
- Climate Science & Policy track

Mathematics Courses
- Select one of the following: 8-9
- MTH 151 & MTH 162 Calculus I for Engineers and Calculus II
- MTH 161 & MTH 162 Calculus I and Calculus II
- MTH 171 & MTH 172 Calculus I and Calculus II
- Select one of the following Statistics courses: 3
- ECS 204 Environmental Statistics
- MSC 204 Environmental Statistics
- MTH 224 Introduction to Probability and Statistics
- PSY 292 Introduction to Biobehavioral Statistics for Non-Majors

Social Science Core Courses
- Select one of the following Economics/Political Science courses for BS: 3
- ECS 377 Topics in Environmental Economics and Development
- ECO 211 Principles of Microeconomics
- ECO 212 Principles of Macroeconomics
- INS 102 Global Economics
- INS 421 Poverty and the Environment
- MSC 345 Economics of Natural Resources and the Environment
- POL 201 Introduction to American National Government
Complete one of the following ECS science tracks:

</tr>
<tr>
<td>CHM 221</td>
<td>Introduction to Structure and Dynamics</td>
<td>7</td>
</tr>
</tbody>
</table>

**Total Credit Hours:** 120-134
CHM 222 Organic Reactions and Synthesis

Select one of the following:

BPH 208 Introductory Epidemiology
BMB 401 Biochemistry for the Biomedical Sciences
MIC 301 Introduction to Microbes and the Immune System
MIC 322 Medical Parasitology

Climate Science & Policy track: 8

MSC 111 Introduction to Marine Science
ATM 102 Introduction to Weather and Climate
or ATM 103 Survey of Modern Meteorology
MSC 346 Climate Science and Policy

Select two courses from the following:

MSC 220 Climate and Global Change
MSC 222 The Earth’s Climate: Past and Future
GSC 462 Earth’s Ancient Atmospheres, Climates, and Sea Levels

Other approved climate science course

Select one course from the following:

MSC 313 Coastal Law
MSC 314 Ocean Law
MSC 340 Ocean Policy
MSC 342 Decision Making and the Environment

Other approved climate policy course

Conservation Biology track: 9

BIL 150 General Biology
& BIL 151 General Biology Laboratory
BIL 160 Evolution and Biodiversity

Select 12 credits from the following (must include 3 credits in the field/lab category):

BIL 220 Evolution and Disease
BIL 226 General Botany
BIL 230 Introduction to Marine Biology
BIL 250 Genetics
BIL 315 Marine Biota and Biogeochemical Cycles
BIL 316 Global Primary Production
BIL 330 Ecology
BIL 350 Survey of Marine Mammals
BIL 360 Comparative Physiology
BIL 415 Coral Reef Science and Management
BIL 433 Conservation in Practice
BIL 435 Origins, Ecology and Conservation of Insular Diversity
BIL 441 Animal Behavior
BIL 539 Conservation and Protected Areas

Field/Lab Category:

BIL 227 General Botany Laboratory
BIL 231 Introduction to Marine Biology Laboratory
BIL 321 Invertebrate Zoology
BIL 328 Biology of Birds
BIL 331 Ecology Laboratory
BIL 332 Tropical Ecology
BIL 432 Ecology in the Galapagos
BIL 525 Herpetology

1 Note: ECS B.S. majors without a second major must take a GIS course, e.g. GEG310.
2 Note: For tracks having a higher credit count, the number of electives available is reduced.
3 Note: CHM121/113 must be taken before the Environmental Chemistry track. Fulfillment of the Environmental Chemistry track earns a Chemistry minor.
4 Note: Fulfillment of the Geology track earns a minor in Geological Sciences.
5 Note: Fulfillment of the Geospatial Certificate track PLUS GEG 110 earns a geography minor.
6 Note: Calculus II must be taken before the Mathematics track. Fulfillment of the Mathematics track earns a Mathematics minor.
7 Note: The 12-credit CHM121/221/222 sequence of the Environmental Health track replaces the normal 8 credit ECS B.S. CHM111/112/113/114 series, making the effective credit count for the Environmental Chemistry track 19-21. This track as described does not earn a minor; additional courses to finish a minor (or a separate minor) must be undertaken.
8 Note: MSC346 (co-listed with ECS403) taken to satisfy the Climate Science & Policy track cannot also satisfy the ECS403 core course requirement; a separate ECS403 section must be taken. Fulfillment of the track earns a minor in Climate Science & Policy.
9 Note: BIL539 (Co-listed with ECS403) taken to satisfy the Conservation Biology track cannot also satisfy the ECS403 core course requirement; a separate ECS403 section must be taken. Fulfillment of the Conservation Biology track earns a Biology minor.

* Students following the ECS Bachelor of Science must complete either a track (listed separately above) or a second major in a STEM field.

Suggested Plan of Study - with Track

Course | Title | Credit Hours
---|---|---
**Year One**
**Fall**
ECS 111 | Introduction to the Earth's Ecosystem | 3

|                                             | Science course + lab                        | 4            |
|                                             | Elective or 2nd minor                       | 3            |
| **Credit Hours**                            | **13**                                     |
Student Learning Outcomes

- **Scientific Knowledge**: Students will demonstrate a comprehensive understanding of ecosystem science.
- **Policy Knowledge**: Students will demonstrate an ability to evaluate the role of science and technology in society and demonstrate understanding of factors involved in the formulation and implementation of environmental policy.

Certificate in Sustainability

The certificate program is intended to equip students with knowledge and skills for implementing positive change through environmentally responsible practices in various fields; to serve as a curricular adjunct to sustainable initiatives at UM; to foster a culture of conservation at the University; to enhance students’ preparation for a variety of careers, including engineering, architecture, business, marketing, government, and more; and to affirm UM’s commitment to sustainability and complement its efforts to enhance environmental education.

To obtain the sustainability certificate, students will complete 18 credits from the courses below.

Students may take courses to align with their major or minor, or individual interests (e.g., energy, green buildings, natural resource management). Note that some courses on the list may require one or more prerequisites. It is the responsibility of students to obtain any permissions for substitutions in advance from the director or assistant director of ECS.

Prerequisite Courses

- POL 322 has a prerequisite of POL 201 or POL 202; it is only offered in Summer
- MSC 340 has a prerequisite of MSC 111
- ARC 223 has a prerequisite of ARC 102 and ARC 122
- INS 322 has a prerequisite of INS 102 or ECO 211 and ECO 212, or permission of instructor
- INS 421 has a prerequisite of INS 102 or permission of instructor
- ECO 345 has a prerequisite of ECO 211 and ECO 302
- MSC 345 has a prerequisite of ECO 211
- GEG 341 has a prerequisite of any 100 level GEG course.

**Mission**

Students will gain an understanding of how sustainability concepts have bearing on climate change, mass movements of populations, limits to energy and water supplies, and biodiversity.

**Goals**

The Certificate program is intended:

- to equip students with knowledge and skills for implementing positive change through environmentally responsible practices in various fields;
- to serve as a curricular adjunct to sustainable initiatives at UM;
- to foster a culture of conservation at the University;
- to enhance students’ preparation for a variety of careers, including engineering, architecture, business, marketing, government, and more; and
- to affirm UM’s commitment to sustainability and complement its efforts to enhance environmental education.

**Student Learning Outcomes**

- Students will demonstrate an understanding of human impacts on the environment.
- Students will demonstrate an understanding of methods of reducing human impacts on the environment.
- Students will demonstrate an ability to communicate effectively about sustainability.

**Minor in Ecosystem Science and Policy**

</table>

* The requirements for a minor in education consist of 12 credit hours passed with a C or higher, with an overall GPA of 2.5 in courses selected from the list of acceptable TAL departmental courses.

** American Sign Language courses do not count toward the Education minor (TAL 107, 207, 307, and 407). TAL 191 does not count toward the Education minor.

**Professional Training Option Certificate**

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the professional component, one of the requirements to become a certified teacher in the State of Florida.

The PTO minor is 18 credit hours. Students must successfully pass the required portions of the Florida Teacher Certification Exam (FTCE) prior to degree conferral. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a Temporary Teaching Certificate in the State of Florida. Please see an academic advisor in the School of Education and Human Development for exam requirements and course advising.

### Engineering

coe.miami.edu

#### Minor in Engineering

The College of Engineering offers the student in the College of Arts and Sciences a variety of 15/18 credit hour minors designed to give the student a basic understanding of the technologies that support and shape our civilization. Minors may be elected in Architectural, Civil, Computer, Electrical, Environmental, Industrial, or Mechanical Engineering. The student is given considerable freedom in choosing courses in accordance with the student's interests.

Faculty in the College is prepared to assist students seeking Engineering minors in the preparation of programs of study.

More detailed descriptions of these minors will be found in the College of Engineering (p. 424) section of this Bulletin.

### English

english.as.miami.edu

**Dept. Code:** ENG

#### Introduction

The English Department offers programs for students interested in a liberal arts education. While many English majors direct their studies toward careers in law, creative writing, secondary education, or university teaching and scholarship, a major in English is just as valuable to students considering careers in business, journalism, or any of the health professions. Students who would like to learn more about any of these programs are encouraged to consult the Director of Undergraduate Studies in the Department of English, Ashe Bldg. 321.

#### Educational Objectives

English as a discipline offers an opportunity for a general humanistic education, and it develops skills in communication and analysis essential in most careers. An education in English teaches students to write, to think critically, to weigh values, and to communicate ideas. At the same time, it develops their creativity and aesthetic understanding, and affords them a knowledge of our literary heritage in all of its historical and cultural dimensions.

#### Degree Programs

The major in English leads to the degree of Bachelor of Arts.

#### Advanced Writing and Communication Proficiency

All English courses (other than ENG 103, ENG 105, ENG 106, and ENG 107) are designated writing courses (WRIT credit). A student majoring in English will complete the advanced writing and communication requirement of the College of Arts and Sciences (which requires four writing classes, including at least one in one of the student’s major disciplines).

#### Major in English

Students majoring in English must earn 30 credit hours in English courses (36 credit hours for Departmental Honors) and must meet the requirements for one of the tracks described below:

- The Major in English (p. 151) (with a concentration in Literature),
- The Creative Writing Concentration (p. 155),
- The Concentration in British Literary History (p. 153), or
- The Women's Literature Concentration (p. 157).

Credit hours earned for courses in freshman composition (ENG 105, ENG 106, ENG 107, and ENG 208) may not be applied toward the total number of credit hours required for the major. In each English course, the English major must earn a grade of C- or better, with an overall GPA in the major of 2.0 or better.

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy the College of Arts & Sciences Advanced Writing and Communication requirement by completing their major.

#### Minor

The Department of English offers two minors:

- The Minor in English (p. 159) and
- The English Minor in Creative Writing (p. 158).
Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

**Departmental Honors in English**

Students interested in seeking Departmental Honors in English should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to meeting the requirements for the Major in English (with a concentration in Literature), the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #2 of the English Literature Major.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. (6 credit hours)
3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.
5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

**Total: 36 credit hours**

**Departmental Honors in Creative Writing**

Students interested in seeking Departmental Honors in Creative Writing should consult the Director of Creative Writing, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses (including courses in creative writing) and a 3.3 average overall. In addition to meeting the requirements for the Creative Writing Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #3 of the Creative Writing Concentration.
2. Complete a six-credit-hour Senior Creative Writing Project. The student undertaking this project normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. (6 credit hours)
3. Receive for the project a recommendation for honors by the director of the Senior Creative Writing Project and by one other faculty reader designated by the Director of Creative Writing.
4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

**Total: 36 credit hours**

**Departmental Honors in Women’s Literature**

Students interested in seeking Departmental Honors in Women’s Literature should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the Women’s Literature Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirements #2 and #3 of the Women’s Literature Concentration.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. (6 credit hours)
3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.
5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

**Total: 36 credit hours**

**Majors in English**

- B.A. in English (p. 151)
- B.A. in English with Concentrations in:
  - Creative Writing (p. 155)
  - British Literary History (p. 153)
  - Women’s Literature (p. 157)

**Minors in English**

- English (p. 159)
- Creative Writing (p. 158)

**B.A. in English**

**Curriculum Requirements**

Requirements for the Major in English (with a concentration in Literature) are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Select ONE of the following (N.B., ENG 210 may NOT be used to fulfill this requirement):</td>

<tr>
<td>ENG 205</td>
<td>Jewish Literature</td>
<td></td>
</tr>
<tr>
<td>ENG 211</td>
<td>English Literature I</td>
<td></td>
</tr>
</tbody>
</table>
ENG 212  
English Literature II

ENG 213  
American Literature I

ENG 214  
American Literature II

ENG 215  
English and American Literature by Women

ENG 260  
African-American Literature

ENG 261  
Literature of the Americas

2. Select FIVE LITERATURE courses numbered 300 or above.  
At least TWO must be numbered 400 or above. The courses must be distributed as follows:

- Select two courses numbered 300 or above in literature before 1700
- Select two courses numbered 300 or above in literature between 1700 and 1900
- Select one course numbered 300 or above in literature since 1900

3. Select FOUR additional English courses other than freshman composition 1

Total credits required for the major: 30 (36 credits required for Departmental Honors)

4. Additional Graduation Requirements:

<table>
<thead>
<tr>

<tr>
<td>Total Credit Hours</td>
<td></td>
<td>120</td>
</tr>
</tbody>
</table>

1 i.e., any four courses designated ENG and numbered 200 or above, excluding ENG 208.
2 If the student has a minor (or second major) that counts as ‘People & Society’, the student does not need to satisfy the requirement for a People & Society cognate.
3 If the student has a minor (or second major) that counts as ‘STEM,’ the student does not need to satisfy the requirement for a STEM cognate.
4 This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.
5 Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student’s major disciplines. Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy this requirement by completing their major.

6 A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

Suggested Plan of Study

This Suggested Plan of Study is a sample four-year plan, but an individual student’s actual plan is likely to vary from this sample plan in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student’s initial placement in composition, mathematics, and foreign language; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as ‘People & Society,’ and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as ‘STEM.’

Total Credit Hours 120

1 Students who are considering the possibility of writing a six-credit senior thesis for Departmental Honors in English their last year should replace this elective course with an ENG course for their major.

2 Students who are writing a six-credit senior thesis for Departmental Honors in English should, ideally, have completed eight ENG courses for their major prior to their senior year, and should therefore be able to replace this course with ENG 497.

3 Students who are writing a six-credit senior thesis for Departmental Honors in English should replace this elective course with ENG 498.

Goals

Student Learning Outcomes

- Student demonstrates broad and select knowledge of literary form, of works written in or translated into English, and of literary history.
- Student achieves critical and expressive fluencies relevant to GERs in writing-intensive courses, including control of Standard English, and demonstrates ability to integrate quotations and ability to edit his/her own work.
- Student demonstrates ability to analyze literature, ability to formulate and sustain an argument with appropriate evidence and documentation, and appropriate knowledge of relevant scholarship and criticism.

B.A. in English - Concentration in British Literary History

Mission

The mission of the English Department undergraduate program is to lead student learning in literary form and history; Standard English expression; critical thinking, writing, and research skills; and ethical reflection via the
study of literature and other cultural productions. Students who complete an undergraduate degree in English will be prepared for graduate study in areas such as English and law, or for employment in any position requiring skills in critical thinking and in writing.

**Goals**

**Student Learning Outcomes**

- Student demonstrates broad and select knowledge of literary form, of works written in or translated into English, and of literary history.
- Student achieves critical and expressive fluencies relevant to GERs in writing-intensive courses, including control of Standard English, and demonstrates ability to integrate quotations and ability to edit his/her own work.
- Student demonstrates ability to analyze literature, ability to formulate and sustain an argument with appropriate evidence and documentation, and appropriate knowledge of relevant scholarship and criticism.

**B.A. in English - Concentration in Creative Writing**

**Curriculum Requirements**

Students who declare a major in English with a Creative Writing Concentration should meet with the Director of Creative Writing.

</tbody>
</table>

2. Select one of the following (N. B., ENG 210 may NOT be used toward the fulfillment of this requirement): 3

- ENG 201 World Literary Masterpieces I
- ENG 202 World Literary Masterpieces II
- ENG 205 Jewish Literature
- ENG 211 English Literature I
- ENG 212 English Literature II
- ENG 213 American Literature I
- ENG 214 American Literature II
- ENG 215 English and American Literature by Women
- ENG 260 African-American Literature
- ENG 261 Literature of the Americas

3. Select FOUR LITERATURE courses numbered 300 or above, at least TWO of which must cover literature earlier than 1900. At least TWO of the four courses must be numbered 400 or above. 12

4. Select one additional LITERATURE course numbered 200 or higher 3

Total credits required for the major: 30 (36 credits required for Departmental Honors)

5. **Additional Graduation Requirements:**

- ENG 105 English Composition I 3
- ENG 106 English Composition II 3
- MTH 101 Algebra for College Students (not needed by students who place into MTH 113) 3
- MTH 113 Finite Mathematics (or any MTH course numbered 108 or higher) 3

Language Requirement (3-9 credits, depending on the student’s initial placement in the language chosen) 9

Minor 15

People & Society cognate 1 9

STEM cognate 2 9

Natural Science course 3 3

Advanced Writing & Communication 4 12

Electives 5 33

Total Credit Hours 120

1 If the student has a minor (or second major) that counts as ‘People & Society,’ the student does not need to satisfy the requirement for a People & Society cognate.

2 If the student has a minor (or second major) that counts as ‘STEM,’ the student does not need to satisfy the requirement for a STEM cognate.

3 This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.
Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student’s major disciplines. Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy this requirement by completing their major.

A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

**Suggested Plan of Study**

This Suggested Plan of Study is a sample four-year plan, but an individual student’s actual plan is likely to vary from this sample plan in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student’s initial placement in composition, mathematics, and foreign language; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as ’People & Society’, and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as ’STEM.’

1. Students who are considering the possibility of writing a six-credit senior thesis for Departmental Honors in Creative Writing their last year should replace this elective course with one of the literature courses required for the Creative Writing major.

2. Students who are writing a six-credit senior thesis for Departmental Honors in Creative Writing should, ideally, have completed eight ENG courses for their major prior to their senior year, and should therefore be able to replace this course with ENG 497.
Students who are writing a six-credit senior thesis for Departmental Honors in Creative Writing should replace this elective course with ENG 498.

Mission

The mission of the English Department undergraduate program is to lead student learning in literary form and history; Standard English expression; critical thinking, writing, and research skills; and ethical reflection via the study of literature and other cultural productions. Students who complete an undergraduate degree in English will be prepared for graduate study in areas such as English and law, or for employment in any position requiring skills in critical thinking and in writing.

Goals

Student Learning Outcomes

- Student demonstrates broad and select knowledge of literary form, of works written in or translated into English, and of literary history.
- Student achieves critical and expressive fluencies relevant to GERs in writing-intensive courses, including control of Standard English, and demonstrates ability to integrate quotations and ability to edit his/her own work.
- Student demonstrates ability to analyze literature, ability to formulate and sustain an argument with appropriate evidence and documentation, and appropriate knowledge of relevant scholarship and criticism.

** A grade of C- or better is required in each course along with an overall GPA in the minor of 2.0 or better.

Gender and Sexuality Studies

https://gss.as.miami.edu/

Dept. code: GSS

Introduction

The Gender and Sexuality Studies Program at the University of Miami seeks to encourage the rigorous investigation of gender as a significant issue in all areas of human experience. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures based on gender shape our lives. The program’s core objective is to foster the examination, open discussion, and lively debate of gender issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university’s academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

Educational Objectives

The undergraduate curriculum in Gender and Sexuality Studies explores the ways in which ideas about gender and sexuality shape social roles and identities, as well as the ways in which race, ethnicity, class, and nationhood influence the perception and experience of gender and sexuality within particular cultures. The curriculum is informed by recent scholarship that recognizes gender and sexuality as crucial components of human experience in social, cultural, economic, political, religious, and legal contexts. It includes courses that introduce students to feminist theory and scholarship, engaging ethical and political issues of equality and justice. The program encourages students to question their assumptions about the possible meanings of female and male through the comparative study of how different societies and historical periods have viewed manhood, womanhood, and relations between women and men. Courses in Gender and Sexuality Studies enable students to acquire critical and analytical skills that they can then apply in other aspects of their educational experience at UM and beyond the university in their careers and personal development.

The LGBTQ Studies minor is designed to allow students to explore sexuality and sexual minorities from a variety of perspectives. The course will provide students with an introduction to a broad array of LGBTQ issues including visual and performing arts, literature, languages, history, social science, various theories, public policy and the law, families and other types of intimate relationships, crime, popular culture, and LGBTQ identities and communities. This widely interdisciplinary field addresses work in a broad range of scholarly disciplines including biological and cultural studies, in literature and anthropology, in the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of popular culture to investigations into the development and social construction of sexual identity.
Advanced Writing and Communication Requirement
To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in GSS should take at least one GSS core course that is writing intensive (i.e., GSS 301).

Departmental Honors
Gender and Sexuality Studies majors with a cumulative GPA of at least 3.5 in GSS courses and an overall GPA of at least 3.0 may earn departmental honors by completing GSS 505 instead of the senior research project. Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as thesis adviser and then must complete a thesis proposal of approximately 400 words which must be approved by the thesis adviser and then the program director. The format and length of the thesis will vary according to the nature of the project. Most students writing an honors thesis as part of their GSS major will take GSS 505 twice (for a total of 6 credit hours).

1 All Majors have the option of completing GSS 501 (or GSS 505), which will take the form of an individual research project with a faculty member of the student’s choice; the student is responsible for finding an appropriate faculty member who is available to supervise the project and then must seek formal approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will vary according to the nature of the project.

* A grade of C- or better in each course, with a cumulative GPA of at least 2.0 in GSS courses is required.

* 300 level course selections must include at least 9 credit hours with no more than 6 credit hours in any one department or program or more than 3 credit hours of individual studies without the approval of the program director.

* A grade of C- or better in each course, and a cumulative GPA of at least 2.0 in LGBTQ courses is required.

---

**Mission**

The Program in Gender and Sexuality Studies seeks to encourage the rigorous investigation of gender as a significant issue in all areas of human experience. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures based on gender shape our lives.

**Goals**

The program's core objective is to foster the examination, open discussion, and lively debate of gender issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university's academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

**Student Learning Outcomes**

- Students will demonstrate understanding of gender and / or sexuality as categories of analysis and as components of human experience and investigate and challenge normative models and viewpoints.
- Students will build critical and analytical thinking skills.
- Students will build their verbal and written communications skills.

**Minor in Gender and Sexuality Studies**

**Geography**

gеography.as.miami.edu

**Dept. Code: GEG**

**Introduction**

Geography is the science of place and space. Geographers ask where things are located on the surface of the earth, why they are located where they are, how places differ from one another, and how people interact with the environment. There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence. Physical geographers study patterns of climates, landforms, vegetation, soils, and water. Thus, Geography links the social sciences and natural sciences.

Geographers use many tools and techniques in their work, and geographic technologies are increasingly among the most important emerging fields for understanding our complex world. They include Geographic Information Systems (GIS), Remote Sensing, Global Positioning Systems (GPS), online mapping platforms such as Google Earth, statistics, survey research, and others.

Geographers work in many different areas, such as environmental management, education, disaster response, city and county planning, community development, and more. Geography is an interdisciplinary field that offers diverse career opportunities.
The relevance and prestige of Geography as a discipline was helped enormously during the past 20 years by four key developments:

1. the emergence of “globalization” as a phenomenon requiring analysis and explanation;
2. the increasing recognition of space and place in cognate social and physical sciences;
3. deepening concern for nature-society interactions and issues of environmental sustainability, development, and climate change;
4. the development of geographic information systems (GIS and GIScience) and remote sensing technologies and their widespread adoption by organizations in both the public and private sectors.

Knowledge of GIS and Geospatial Technology can be important in the field of geography and cognate disciplines. The US Bureau of Labor Statistics has identified GIS as a top emerging field, with more than 41,000 GIS-related job postings in 2016, according to Education Advisory Board research.

Educational Objectives

Geography offers specializations in areas such as:

- Geographic Information Systems and Remote Sensing
- Medical Geography and Global Health
- Urban Geography and International Urbanization
- Environmental Studies

Geography offers courses that provide training in indispensable skills for everyone entering the present-day labor market:

- Research Methodology
- Statistics
- Computer Cartography
- Geographic Information Systems (GIS)
- Remote Sensing of the Environment
- Survey Research

Study Abroad

Majors are strongly encouraged to study abroad. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in a foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

Writing within the Discipline

To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is Geography must take at least one of the following courses for a writing credit: GEG 306, GEG 346, GEG 402.

Degree Programs

The major in Geography leads to a Bachelor of Arts Degree, or a Bachelor of Science Degree.

Departmental Honors in Geography

The Department of Geography encourages its majors and minors to intensify and deepen their knowledge of Geography through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in Geography that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in Geography or other disciplines.

Minimum requirements for the program are as follows:

1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in Geography of at least 3.50; and
3. a thesis that is approved by departmental faculty.

Students have 3 options for writing the thesis.

1. Students may take 6 credit hours of independent study (GEG 598 (http://bulletin.miami.edu/search/?P=GEG%20598/)) with one or more departmental faculty.
2. Students may take a 3 credit hour course offered at the 300-level or above and 3 credit hours of independent study (GEG 598 (http://bulletin.miami.edu/search/?P=GEG%20598/)).
3. In exceptional circumstances, a student’s thesis may be written as part of the requirements for earning 6 credit hours in Geography at the 300-level or above.

In all three cases, the thesis must be a single, coherent work of scholarship through which the student earns 6 credit hours in Geography over the course of two semesters.

A Geography faculty member must serve as the Honors thesis advisor, and a second reader, who may be from another department, must be selected in consultation with the thesis advisor. The thesis must be at least 30 pages in length (double spaced, 12 point font), not including tables and figures. Once the topic and committee are secured, students should turn in their signed Departmental Honors Thesis Form to the main office of the Geography Department. This form must be signed by the Director of Undergraduate Studies and submitted by October 15 for fall graduation and February 15 for Spring graduation.

In addition to completing the written thesis, students must orally present the results of their work to faculty and students at a special honors colloquium to be held at the end of the semester.

### Additional Electives

| 18 |

| Total Credit Hours | 120-126 |

---

1. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Geography must take at least one writing eligible course in Geography. GEG 501 satisfies this requirement for most students.
2. Students must complete at least 30 credit hours in Geography with a grade of C- or higher.
3. The overall GPA in courses counted toward the major must be 2.00 or higher.
4. The major requires 18 credits of electives at least 9 of which must be at the 300 level or above, exclusive of GEG 501.

| Credit Hours | 15 |
| Total Credit Hours | 120 |
Mission
The Department of Geography (GEG) seeks to encourage the rigorous investigation of human-environment interactions, and the analysis of spatial patterns related to societal processes. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us understand how ideas and structures result from the interaction of space, place and time. The department's core objective is to foster the examination, open discussion, and lively debate of geographic issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university's academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

Goals
Our undergraduate programs (BA and BS) aim to prepare students for positions in teaching, government, private business, urban and regional planning, geographic information systems (GIS), remote sensing (RS), resource management, and environmental analysis. We offer optional tracks in urban, environmental, and medical geography, as well as courses in geospatial technology which provide students with marketable skills for today’s job market: geographic information systems (GIS), digital cartography, satellite remote sensing, land use and land cover analysis, and spatial statistics. During their studies, our students develop global citizenship, which prepares them to examine global problems with a different lens, as well as develop skills to work effectively in multicultural environments and collaborative settings.

Student Learning Outcomes
• Students will demonstrate knowledge of concepts and theories in both human and physical geography including spatial patterns and processes, the interrelationships between people and places, and the interactions between people and nature.
• Students will integrate and apply concepts and theories to develop sound and original geographical questions as well as apply critical thinking to find explanations to geographical questions.
• Students will demonstrate effective written, cartographic, and oral communication.

<td></td>
<td>12</td>
</tr>
</tbody>
</table>

---

**Departmental Honors**

History majors with a cumulative GPA of at least 3.6 in history courses may earn departmental honors by completing a two-semester-long, 500-level Honors seminar course HIS 597 and HIS 598, held in the Spring and Fall respectively. Admittance to the History Honors program is by application in the Fall semester during course registration week. Also, students must have completed at least 6 courses in History worth 18 credit hours at the University of Miami.

**Major in History**

- B.A. in History (p. 167)

**Minor in History**

- History (p. 168)

**B.A. in History**

A major in history consists of at least 30 credit hours in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credit hours may include history courses taken for general distribution requirements, and must include at least 18 credit hours at the 300 level or above, of which at least 6 credit hours must be taken in the form of 500-level seminars. (HIS 599 does not count). All courses for majors will be selected by students in consultation with advisors designated by the department.

Credit hours from other institutions may be counted toward the major or minor, and to general distribution requirements as appropriate, but departmental approval is required in each case. Students who complete the Advanced Placement course in either United States or European history and pass the examination with a grade of 4 or 5 may receive credit in the appropriate history courses. Students who complete the International Baccalaureate program and pass the higher level history examination with a grade of 6 or higher will receive 3 credit hours in the appropriate entry-level history course. (However, in some cases students will only receive elective credit hours). At least 18 credit hours of the major and at least 9 credit hours of the minor must be completed at the University of Miami.

The department offers a variety of study abroad options with credit toward the major or minor.

---

**Educational Objectives**

All history courses expose students to historical interpretation and critical analysis.

- Courses at the 100 and 200 levels are intended as introductions to broad fields of history and are open to students with no previous college-level history experience.
- All 300 level history courses are writing intensive, are graded principally through essay examinations and short papers, and count toward the fulfillment of the University of Miami writing across the curriculum requirement.
- Courses at the 500 level require a 300 level history course as prerequisite. All 500 level courses deal extensively with the historiography of their particular subjects, and all require a written research project as a major component of the work of the course.
- Since all History courses at the 300-level and higher are officially designated as ‘Writing’ courses, History majors will automatically fulfill the College of Arts & Sciences’s Advanced Writing and Communication requirement by completing the major.

---

**Historical Analysis**

Critical analysis.

All history courses expose students to historical interpretation and analysis, a background in history is invaluable.

Multinational businesses demand that their executives understand the peoples and cultures around them, and be able to communicate that understanding effectively. If an occupation demands critical thinking and analysis, a background in history is invaluable.

---

**Introduction**

History is the systematic study of the past. The study of history includes training in how to gather information, how to research issues and problems, how to analyze data and construct arguments, and how to communicate ideas in writing. These are essential skills, tools that are prized in the world beyond the university. A major in history is an excellent beginning and solid stepping stone to professional school and the business world. For goals ranging from law to journalism, and from medicine to the MBA, history serves as a versatile undergraduate major.

**Mission**

The three principle objectives of coursework in history are to provide students with the (a) context in which issues and events, people and places, laws and society, progress and prosperity, problems and solutions are given root and foundation; give them the (b) critical reasoning skills for effective comprehension; and (c) supplement their cognitive knowledge base which is essential for career placement in the information-driven twenty-first century world of ideas, be that in education, business, technology, public or private sector employment or community service. Thus history with its study of how people function in complex social and cultural environments that change over time is an ideal discipline for honing the skills necessary to think clearly and critically whether that be applied as a practicing historian or a lawyer, physician, politician, governmental employee, private entrepreneur or simply a thoughtful, cultured, engaged member of society.

**Goals**

The program objectives are:

- to prepare students for employment in careers related to education or in careers which value critical reasoning; and
- to prepare them for admission to graduate or professional schools.

**Student Learning Outcomes**

- Students will demonstrate they think critically and analytically and construct persuasive arguments differentiating fact from conjecture.
- Students will demonstrate a breadth of understanding of historical information and narratives.
- Students must demonstrate an understanding of historical scholarship.

1. Courses for minors should be selected in consultation with a departmental advisor. These credit hours may include history courses taken for general distribution requirements, and must include at least 9 credit hours at the 300 level or above.

* A grade of C- or above in each course and a cumulative GPA of at least 2.0 are required in all history courses.

International Studies

international-studies.as.miami.edu

Dept. Code: INS

Introduction

The International Studies major provides a focused educational experience aimed at familiarizing students with the key structural features and dynamics of the international system and preparing them to enter the growing international job market. Processes of globalization, in part driven by global capital flows, expanding trade and the unrelenting development of communication and information technologies, have affected virtually everyone in every country, often in ways we are just beginning to understand. These developments often pose serious problems for government and other societal institutions, while also creating a demand for individuals who understand international processes. Jobs in virtually all sectors have acquired a decidedly international dimension, whether in trade, tourism, finance, public policy, government, or education. INS Graduates have moved on to the corporate world, the public sector, started their own businesses, or have continued their studies at the graduate level (i.e. Law, Business, and International Studies).

Educational Objectives

International Studies seeks to provide students with the ability to understand:

- International politics within the context of interstate relations and foreign policy.
- International economics and its sub-discipline international political economy, including such issues as trade and production, money and finance, and development.
- Social science research methods including qualitative, quantitative, comparative case study and formal modeling.

Students are encouraged to explore interdisciplinary options that further their understanding of international studies. This type of coursework can be taken in other disciplines offered at the university or taken outside the institution, either through exchange programs or other inter-institutional options provided by UM. Students will demonstrate the ability to synthesize the various thematic areas of the discipline through required participation in advanced seminars. Seminars will stress analytical participation, oral presentations and the ability to interpret and critique core theoretical readings.

Degree Programs

International Studies provides both a major and minor option for students. The flexibility of the program often allows students to double major without the need to extend their university studies. Students are encouraged to speak with the International Studies advisor to explore such possibilities. The major in International Studies leads to the degree of Bachelor of Arts.

Advanced Writing & Communication Requirements

Details of the Advanced Writing and Communication Proficiency.

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student’s major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two courses towards the writing requirement.

Departmental Honors

The Department of International Studies encourages its majors to intensify and deepen their knowledge of the field through its departmental honors program. The program is designed to give students the opportunity to explore various topics and problems in international studies that are of particular interest to them, to work more closely with departmental faculty, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in international studies and related fields.

Minimal requirements for the program are as follows:

1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in international studies of at least 3.50; and
3. a thesis that is approved, with a grade of at least B+, by a member of the departmental faculty.

After reaching agreement with a member of the faculty who will serve as the honors thesis advisor, students writing a senior honors thesis will enroll in INS 418 and INS 419, Honors Thesis, for a total of six credit hours [the credit hours may be spread over two semesters or taken in a single semester]. The thesis itself is expected to be an extended, coherent work of scholarship on an issue of relevance in the field of international studies.

1. These courses must be completed before taking the Thematic Core courses.
2. Additional classes will be counted toward the elective portion of the INS major, if taken. Other courses, including classes in other disciplines, may be taken with the approval of the INS Advisor.
3. With the approval of the INS Advisor, students may take courses from other departments outside of INS such as Geography and Regional Studies, History, Anthropology, Sociology, Political Science, Economics, Religion, Art History, Foreign Languages, Environmental Science, et cetera. Appropriate study abroad courses, an approved internship (INS 519), or an honors thesis (INS 418 & INS 419) may also be used to fulfill elective credit hour requirements.

Important Advising Notes for all International Studies Majors

1. **Double Counting:** Of the combined courses in the INS Electives, no more than 6 credit hours may count double towards a second major. A student may not count any course used to fulfill the requirements of the INS major toward a minor requirement.

2. **Study Abroad:** Students are strongly encouraged to study abroad for a summer, a semester, or an entire year, depending on the program. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit hour overloads or extended time spent in the program.

3. **Internship Credit Hour:** Students are encouraged to find a suitable internship during their undergraduate career. Upon approval by an advisor in the International Studies Undergraduate Program Office, 3 credit hours may be earned with an internship (INS 519), either toward the major or as elective credit hours (depending on the relevance of the particular internship to the INS major). The University’s Toppel Career Planning and Placement Center regularly advertises internships.

4. **Academic Standing:** Only courses in which a grade of C- or better is attained, may be counted towards the International Studies major and students must maintain a GPA of 2.75 or better in all major requirements (30 credit hours).

**Mission**

The INS Program promotes, through its interdisciplinary reach, the exploration of various theoretical and analytical approaches and methodological techniques intended to offer students a broad program of study focused on the interaction between the local and the global, from the historical to the contemporary, while tracking possible alternative future scenarios and developments in the international system.

**Goals**

- International Studies seeks to provide students with the ability to understand international politics within the context of interstate relations and foreign policy.
- International Studies seeks to provide students with the ability to understand international economics and its sub-discipline international political economy, including such issues as trade and production, money and finance, and development.
- International Studies seeks to provide students with the ability to understand social science research methods including qualitative, quantitative, comparative case study and formal modeling.

**Student Learning Outcomes**

- Students will demonstrate a comprehensive understanding of international studies within the context of interstate relations and foreign policy.
- Students will be encouraged to explore interdisciplinary options that further their understanding of international studies and will produce a paper project that demonstrates competencies in presenting interdisciplinary approaches to international studies. (This type of coursework can be taken in other disciplines offered at the university or taken outside the institution, either through exchange programs or other inter-institutional options provided by UM).
- Students will demonstrate a comprehensive understanding of international economics and its sub-discipline international political economy. Specific issues such as trade and production, money and finance, and development are categories for students to demonstrate their level of knowledge.
- Students will demonstrate the ability to design and conduct social science research after an introduction to qualitative, quantitative, and comparative case study, and formal modeling methods.
- Students will demonstrate the ability to write critical essays (average 25 pages) in all classes except those emphasizing economics and methodology.

Select two of the following core requirements:
Judaic Studies

INT 101 Global Perspectives
INT 102 Global Economics
INT 103 World in Crisis
INT 201 Globalization and Change in World Politics

Advanced Courses
Select three INS courses at the 300-level or above in order to graduate with a minor in International Studies 1

Total Credit Hours 15

1 Advanced level courses from other departments may be taken if approved by the INS advisor. Only courses in which a grade of C- or better is attained may be counted towards the minor in International Studies, and students must maintain a GPA of 2.75 or better in all minor requirements (15 credit hours).

Judaic Studies

judaicstudies.as.miami.edu

Dept. Code: JUS

Introduction
The George Feldenkreis Program in Judaic Studies is a broad, flexible, interdisciplinary program designed for undergraduates to gain an understanding of Jewish civilization and its diverse cultural experiences. The program, which is non-theological in orientation, is an academic exploration of the multi-faceted, socio-historical, 4,000-year record of the Jewish people. Courses taught by, and combined with the program highlight the variety of cultural, political, social, and religious experiences of Jews in different times and places.

Educational Objectives
The program is structured to provide an in-depth liberal arts education that will constitute a foundation for advanced academic study, professional careers in a variety of fields, and a more complex and rich understanding of the Jewish world. There are a total of 5 Judaic Studies Cognates. Judaic Studies cognates meet the requirements for People & Society and Arts & Humanities Cognates in the College of Arts and Sciences.

Advanced Writing and Communication Requirement
Students majoring in Judaic Studies satisfy the college of Arts and Sciences ’ Writing requirement in the discipline’ when they take any course in Jewish or Israeli literature offered by the Department of English and any Judaic Studies course with the Writing Credit designation.

Major in Judaic Studies
- B.A. in the George Feldenkreis Program in Judaic Studies (p. 172)

Minor in Judaic Studies
- The George Feldenkreis Program in Judaic Studies (p. 173)

1 To be designated as such and published by the JUS program director each semester. Students are strongly encouraged to take at least one course in Ancient Jewish History and Society and at least one course in Modern Jewish History and Society.

* A grade of "C+" or better must be attained in each course taken for the Minor, with an overall GPA of 2.0.
* Both JUS Minor concentrations will be listed in the student's transcript as a "Minor in Judaic Studies."
* Each of the JUS Minor concentrations are eligible to qualify as a cognate in either "Arts and Humanities" or "People and Society.” Students are encouraged to contact the JUS Undergraduate Advisor, who will make the determination based on whether at least three courses of the JUS Minor count toward either "Arts and Humanities" or "People and Society.”

Latin American Studies

las.as.miami.edu

Dept. Code: LAS

Introduction

The Latin American Studies Program at the University of Miami takes an interdisciplinary approach to the study of the politics, economics, cultures, and societies of Latin America and the Caribbean. Courses in the program are offered in departments from every school and college at the University of Miami, and the program’s faculty research topics range from development economics to immigrant health care, from indigenous music to Caribbean colonial literature, from the archaeology of the region’s earliest people to present-day questions of resource conservation and management. Our students become true experts who can speak to a wide range of issues confronting Latin America; experts who can contribute proactively to development and cooperation as well as to business and political analysis in ways that their peers with a more traditional disciplinary focus simply cannot.

Educational Objectives

The goal of the BA in Latin American Studies is to acquire, advance and disseminate knowledge of the history, literature, culture, politics, economics, and natural and social sciences of the regions within an interdisciplinary framework. This program also places special emphasis on the languages and cultures of Hispanophone, Francophone and Lusophone Americas, including the transnational study of Latin Americans, Caribbeans and their descendants in the United States.

Students should leave the program with the following:

• the analytical and methodological tools needed to conduct interdisciplinary research;
• the ability to read, write and think critically about primary and secondary sources;
• a general knowledge of the different regions that comprise Latin America, the Caribbean, and their Diaspora, as well as a critical understanding that the geographic, political, and cultural boundaries that have traditionally defined the “area” as an object of study are not isomorphic and are connected to the interests of European and North American powers;
• a critical understanding of the competing ways in which Latin American and Caribbean peoples have represented themselves paying particular attention to race/ethnicity, class, gender and sexuality, language, religion, migration, transculturation, and other historical, social, economic, and political factors;
• a language competency in either French, Spanish, Portuguese, or Haitian Creole at an intermediate level and a beginning competency in a second language spoken in the region (either French, Spanish, Portuguese, Haitian Creole, or an indigenous language of Latin America or the Caribbean);
• a “Beyond the Books” experience that will bridge the gap between the university and the surrounding communities, and will help solidify a long-term interest in and commitment to the regions.

Requests for Information

Dr. William J. Pestle
Academic Director, Latin American Studies Program
Merrick Hall 102-E
University of Miami
Coral Gables, FL 33124-2005
las@miami.edu (lasgrad@miami.edu)

The Latin American Studies major is designed for students who desire a comprehensive understanding of Latin America and the Caribbean; its history, cultures, languages, economics, politics, and societies. A total of 36 credits (including 6 credits in foreign language) are required for completion of the major. Majors often combine their studies with concentrations in other departments or schools. LAS majors also learn outside of the classroom, through interaction with visiting experts, participation in symposium and conferences, and travel courses. Students are required to attain at least competency in two Latin American languages, and are advised (but not required) to spend at least one semester in Latin America.

FILAS is a highly selective Honors Program, in which students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The
program provides exciting collaborative research, travel, and work opportunities. Working with UM's world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History.

**Majors in Latin American Studies**

- B.A. in Latin American Studies (p. 175)
- B.A./M.A in Latin American Studies (Fellows in Latin American Studies) (p. 176)

The minor in Latin American Studies is designed for students who have an interest in Latin America and the Caribbean, but may not have the flexibility to pursue a Major. The minor may be obtained by completing five courses (detailed below), or through participation in the UBUenos Aires program.

* A C- or better for all major courses, with a GPA of 2.0 are required for successful completion of the LAS Major.

1 12 credit hours (4 classes) of which must be completed at the 300-level or higher. Courses that are not combined with LAS but do have a significant focus on Latin America may be taken with the approval of the academic director. A freshman seminar with a significant focus (25% or more) on Latin America or the Caribbean may be counted towards this requirement. SPA 203 and FRE 203 may be counted towards this requirement if not used to satisfy the aforementioned language requirements.

**Mission**

The mission of the B.A. in Latin American Studies is to prepare students as they acquire knowledge of the history, literature, culture, politics, economics, and natural sciences of the regions of Latin America and the Caribbean. This knowledge acquisition should occur within an interdisciplinary framework that emphasizes the languages of the Hispanophone, Francophone, and Lusophone Americas, and which includes the transnational study of Latin American and Caribbean diasporic communities in the United States.

**Goals**

**Student Learning Outcomes**

- Students should graduate from the program with a deep understanding of Latin America, the Caribbean, as well as of the individual countries within the region, as acquired through internships, travel and study abroad.
- Students will demonstrate proficiency in Latin American regional learning, a critical analysis of and an engagement with complex, interdependent regional systems and legacies (such as natural, physical, social, cultural, economic, and political) and the lives and sustainable development of the region.
- Students will demonstrate proficiency in inquiry and analysis. Inquiry is a systematic process of exploring issues/objects/works through the collection and analysis of evidence that result in informed conclusions/judgments. Analysis is the process of breaking complex topics or issues into parts to gain a better understanding of them.

**B.A./M.A in Latin American Studies (Fellows in Latin American Studies)**

**FILAS (Fellows in Latin American Studies)**

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete two degrees (B.A./M.A.) in Latin American and Caribbean Studies in five years, less time than would be required to obtain the degrees separately. The program provides exciting collaborative research, travel, and work opportunities. While students typically apply to the FILAS program upon their initial application to UM, we also welcome applicants in their first year of study at the University.

Working with UM’s world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Law and Policy, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean. At least ten of these courses must be taken at the graduate level.
FILAS Admission Requirements
- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in FILAS, emphasizing prior language or area study
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

1. Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).
2. MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.
3. Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. FILAS students already fulfill this requirement when completing the language requirements cited below.
4. Degree candidates must complete at least four writing courses, and at least one such course must be in the student’s major discipline.
5. Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the Collage of Arts & Sciences, ‘three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, ECS 112, or ECS 202), Geological Sciences, Marine Science (except MSC 313 and MSC 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate.’
6. FILAS students also write a Master’s Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

Disclaimer: This is a model plan of study only. It is not guaranteed that every course will be available in the year/semester noted below.

</tbody>
</table>

1. Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).
2. MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.
3. Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. FILAS students already fulfill this requirement when completing the language requirements cited below.
4. Degree candidates must complete at least four writing courses, and at least one such course must be in the student’s major discipline.
5. Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the Collage of Arts & Sciences, ‘three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, ECS 112, or ECS 202), Geological Sciences, Marine Science (except MSC 313 and MSC 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate.’
6. FILAS students also write a Master’s Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

Minor in Latin American Studies

The minor in Latin American Studies is designed for students who have an interest in Latin America and the Caribbean, but may not have the flexibility to pursue a Major. The minor may be obtained by completing five courses (detailed below), or through participation in the UBuenos Aires program.

UBuenos Aires

This UM designed program offers students the opportunity to earn a Latin American Studies minor in one semester while studying in the Argentine capital of Buenos Aires. Students will also have the opportunity to carry out an internship. Students from all majors are welcome to apply. Students will earn UM credits while taking classes in English or Spanish with other students from U.S. institutions. In the fall semester, coursework will be completed at the University of Belgrano. In the spring semester, coursework will be completed at the CEA Study Center.

Further information is available from UM Study Abroad at https://goabroad.miami.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=10256.

Students wanting to apply these classes towards an LAS major should consult with the academic director of Latin American Studies for further guidance.

Mathematics

http://www.math.miami.edu

Dept. Code: MTH

Educational Objectives

The aim of our mathematics degree programs is to provide students with a core knowledge of mathematics essential to the understanding of science and other disciplines. Students should gain substantial problem solving and critical reasoning skills and should develop an understanding of the conceptual underpinnings of mathematics. The knowledge gained through these programs should provide the necessary background in mathematics for those students planning to go on to graduate study in mathematics and related fields. This knowledge should also prepare those students who will be immediately entering careers in science, business, education or other fields which are increasingly making use of mathematics.

Degree Programs

• Bachelor of Arts and Bachelor of Science

Major

The requirements for a major in mathematics (p. 179) vary according to the objectives of the student. There are seven courses required of all mathematics majors.

An additional four courses are required, selected from one of the following track options:

• Core Mathematics
• Applied Analysis
• Computational Mathematics
• Probability and Statistics
• Secondary School Teaching
• Mathematical Economics

Writing Requirement

In order to satisfy the College of Arts and Sciences writing requirement, students majoring in mathematics must obtain writing credit in one of the following courses: MTH 433, MTH 461, MTH 502, MTH 504,
MTH 520, MTH 533, MTH 561, and in three more writing courses from other departments.

**Minor**

A student seeking a minor in mathematics (p. 182) must have credit for a calculus sequence: MTH 161-MTH 162 or MTH 171-MTH 172.

In addition, a minor in mathematics requires three courses from a list of approved courses for the minor. (p. 182) All three courses must be taken in the Department of Mathematics, University of Miami. A grade of C- or better is required for each of the three courses applied toward the minor and the quality point average for the three courses must be 2.5 or above.

**Departmental Honors**

Requirements for Departmental Honors in Mathematics (p. 179):

The student must complete three sequences from a list of approved two-course sequences. The student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

For requirements leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees, with a major in mathematics, see the Bulletin of the Graduate School (p. 701).

B.A. or B.S. in Mathematics (p. 179) Minor in Mathematics (p. 182)

**Dual BS/MS Degree**

- Five-Year BS Math/MS Math Finance (p. 181)

**B.A. or B.S. in Mathematics**

www.math.miami.edu

**Dual Major in Meteorology and Mathematics**

A combined major in meteorology and mathematics (p. 511) is available. For specific information please see the Meteorology section of the bulletin.

**Curriculum Requirements**

The requirements of a major in mathematics vary according to the objectives of the student. There are seven courses required of all mathematics majors. An additional four courses are required selected from one of six track options:

</thead>
<tbody>
<tr>
<td>MTH 224</td>
<td>Introduction to Probability and Statistics</td>
</tr>
<tr>
<td>MTH 524</td>
<td>Introduction to Probability and Introduction to Mathematical Statistics</td>
</tr>
<tr>
<td>&amp; MTH 525</td>
<td>Introduction to Probability and Introduction to Mathematical Statistics</td>
</tr>
<tr>
<td>MTH 542</td>
<td>Statistical Analysis</td>
</tr>
</tbody>
</table>

**Secondary School Teaching Track:**

Select two of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MTH 502</td>
<td>History of Mathematics</td>
</tr>
<tr>
<td>MTH 504</td>
<td>Foundations of Geometry</td>
</tr>
<tr>
<td>MTH 505</td>
<td>Theory of Numbers</td>
</tr>
</tbody>
</table>

**Mathematical Economics Track:**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MTH 524</td>
<td>Introduction to Probability and Introduction to Mathematical Statistics</td>
</tr>
<tr>
<td>&amp; MTH 525</td>
<td>Introduction to Probability and Introduction to Mathematical Statistics</td>
</tr>
<tr>
<td>ECO 533</td>
<td>Advanced Microeconomic Theory</td>
</tr>
</tbody>
</table>

Select one of the following:
ECO 512  Topics in Mathematical Economics
ECO 520  Econometrics
ECO 521  Advanced Macroeconomic Theory

Other Requirements
University and School/College Specific General Education Requirements and Electives 85
Total Credit Hours 120

1 Course work in physics is desirable.
2 This option is only for those obtaining a teaching credential.
3 Students should satisfy the General Education Requirements stipulated by the University as well as their specific School/College. These requirements typically include proficiency requirements in language, along with requirements for advanced writing and communication skills.
4 All students must satisfy University cognate requirements. A mathematics major satisfies the STEM Cognate requirement.
5 Elective courses selected must include courses that satisfy the requirements of an additional major or a minor outside of mathematics.

* Notes
  - It would be useful for students planning to do graduate study in mathematics to complete the following courses: MTH 531, MTH 532, MTH 533, MTH 534, MTH 561, MTH 562.
  - Students interested in actuarial science should choose the Probability and Statistics option; for these students a finance minor is recommended.
  - Transfer students will be permitted to apply up to 14 transfer credit hours towards the major; however, the courses MTH 461 (or MTH 561) and MTH 433 (or MTH 533) must be completed at the University of Miami.
  - A grade of C- or better is required for each course applied toward the major; the overall quality point average for University of Miami courses applied toward the major must be 2.5 or above.

Possible Plan of Study
The B.A. and B.S. degrees in Mathematics differ only in the College of Arts and Sciences general education requirements. Here is a possible plan of study.

**Mission**

The objective of the Bachelor's degree in mathematics is to provide students with a core knowledge of mathematics essential to the understanding of science and other disciplines.

**Goals**

Students should gain substantial problem solving and critical reasoning skills, and they should develop an understanding of the conceptual underpinnings of mathematics. The knowledge gained through this program should provide the necessary background in mathematics for those students planning to go on to graduate study in mathematics and related fields. This knowledge should also prepare those students who will be immediately entering careers in science, business, education or other fields which are increasingly making use of mathematics.

**Student Learning Outcomes**

- Students will demonstrate an understanding of elementary real analysis and advanced calculus. They will understand the nature of analytic reasoning and logical analytic proofs. They will develop the ability to communicate ideas in analysis, and, in particular, the ability to formulate and present abstract arguments in analysis.
- Students will demonstrate an understanding of modern abstract algebra. They will understand the nature of algebraic reasoning and logical algebraic proofs. They will develop the ability to communicate algebraic ideas, and, in particular, the ability to formulate and present abstract algebraic arguments.
- Students will acquire a solid understanding of advanced material within a mathematics “specialty path” which synthesizes and extends their lower-division work. The path is selected by the individual student depending on his/her particular interests.

**Five-Year BS Math/MS Math Finance**

http://www.math.miami.edu/

The BS/MSMF program is a five-year program combining the Probability/Statistics track of the Mathematics undergraduate major with the graduate coursework required for the MS in Mathematical Finance degree. For undergraduates seeking careers in the fields of economics, finance and data science, the BS/MSMF degree offers the appropriate
training sought by companies worldwide. Students can achieve the required academic credentials in five years due to the integrated and focused nature of the BS/MSMF degree.

* A student seeking a minor in mathematics must have credit in a calculus sequence: MTH 161-MTH 162 or MTH 171-MTH 172.

** All three courses must be taken in the Department of Mathematics, University of Miami.
It is possible to select certain 500 level mathematics courses among the three, with prior approval of the Mathematics Department.

A grade of C- or better is required for each of these three courses and the quality point average for the three courses must be 2.5 or above; and in case the quality point average is below 2.5, an additional mathematics course must be taken.

Microbiology and Immunology

mic.as.miami.edu

Dept. Code: MIC

Introduction

Microbiology and Immunology is an ancillary department in the College of Arts and Sciences. Our primary goal is to educate students in their chosen field and instill into them a desire for lifelong learning. Research opportunities and laboratory engagement help create knowledge in our students while preparing them to become active members of the scientific and public communities. A major in Microbiology and Immunology requires thorough preparation in chemistry, biology, biochemistry, physics, and mathematics.

Educational Objectives

1. To expose students to the various disciplines within the field of Microbiology and Immunology, including virology, parasitology, microbial genetics, immunology and medical bacteriology.
2. To introduce students to special projects and/or research opportunities in laboratories at the School of Medicine.
3. To provide laboratory experience for the development of skills required for the conduct of research.
4. To make students aware of current cutting edge research in the field of Microbiology and Immunology by attending seminars of speakers from within and outside the University.

Degree Programs

- A Bachelor’s of Science degree is awarded to all microbiology and immunology majors upon completion of the requirements. A chemistry minor is automatically received however, a student’s choice of minor may be science or non-science.

Advanced Writing and Communication

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Microbiology and Immunology should take at least one course from the following: MIC 280, MIC 304, MIC 441.

Departmental Honors

Students that wish to gain a deeper understanding of Microbiology and Immunology can choose to write a thesis. The following program constitutes receiving Departmental Honors in Microbiology and Immunology.

1. Overall GPA 3.3 or higher
2. Six credit hours of Special Projects (MIC 451, MIC 452, MIC 453, MIC 454, MIC 455 or MIC 456) carried out under supervision of a member of the Microbiology and Immunology faculty, culminating in a senior thesis that includes 15 references. Once the mentor and student have revised and finalized the document a hard copy must be turned in to the Program Director.

Major in Microbiology and Immunology (Pre-Med and Graduate)

MCAT (https://students-residents.aamc.org/applying-medical-school/taking-mcat-exam/) or GRE (http://www.ets.org/gre/revised_general/register/)

- B.S. in Microbiology and Immunology (Pre-Medical and Graduate) (p. 183)

Double Major in Marine Science/Microbiology and Immunology

- B.S. in Marine Science/Microbiology and Immunology (p. 535)

Minor in Microbiology and Immunology

- Microbiology and Immunology (p. 186)

B.S. in Microbiology and Immunology

1. Required of all Microbiology and Immunology majors.
2. MIC 201, MIC 319, MIC 323, GSC 309 Fall Semester only or by announcement.
3. MIC 301, MIC 321, MIC 322, MIC 436, MIC 460 Spring Semester only or by announcement.
4. MIC 304, MIC 441 Fall and Spring Semesters.
5. MIC 451, MIC 452, MIC 453, MIC 454, MIC 455, MIC 456 all require that you have already completed 17 credit hours in MIC/MIC electives and a 3.0 cumm GPA with permission of Program Director or Roger Fall and Spring Semester.
6. Depends on Math placement from SAT/ACT or ALEKS score.
7. University writing credit course.
All MIC majors are required to have a minor (science or non-science). Students will receive a CHM minor provided that they earn a C- or better in every course of the minor while in residence at UM. All students should declare their CHM minor when they begin our program in ASHE 200 by filling out a change of major form. On this form, you can declare also additional majors/minors as well as cognates.

** Transfer students seeking a Microbiology and Immunology major must earn at least 10 credit hours taken in residence at UM beyond MIC 301 in the courses listed above for majors.

### Sample Plan of Study

This is a 4 year sample plan of study that assumes courses are taken during the fall and spring.

This is a guide and is not meant to take the place of the advice of your major advisor, you should consult with them before making any changes.

Mission

Our primary goal is to educate students in their chosen field and instill into them a desire for lifelong learning. Research opportunities and laboratory engagement help create knowledge in our students while preparing them to become active members of the scientific and public communities.

Goals

Major program objectives are:

- To expose students to the various disciplines within the field of Microbiology and Immunology, including virology, parasitology, microbial genetics, immunology and medical bacteriology.
- To introduce students to special projects and/or research opportunities in laboratories at the School of Medicine.
- To provide laboratory experience for the development of skills required for the conduct of research.
- To make students aware of current cutting edge research in the field of Microbiology and Immunology by attending seminars of speakers from within and outside the University.

Student Learning Outcomes

- Students will learn to write scientifically using the appropriate style, terminology and methodology pertaining to their major area of study.
- Students will demonstrate practical knowledge in microbiology and immunology.
- Students will be able to apply their knowledge in scientific manner to deduce outcomes.

Military Science

armyrotc.as.miami.edu

Dept. Code: MSL
Introduction

The Army Reserve Officer Training Corps is a college elective that will help students succeed in their desired career, whether civilian or military. Students who complete all ROTC requirements may be commissioned second lieutenants and serve in the Army, Army National Guard or Army Reserve.

The military science department’s Reserve Officers Training Corps (ROTC) program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers’ educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a 31-day summer camp, normally between the junior and senior years. Nursing students may attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The department offers both a four-year and a two-year program, each with its own special advantages. Students are invited to visit or write the Department of Military Science to obtain additional information.

Core Program

The program requires four years of military science courses which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as freshmen or as sophomores.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below.

Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Women are encouraged to enroll and will be commissioned as officers in the United States Army upon completion of the ROTC curriculum. Job opportunities for women officers in the Army are the same as those for men, excluding a few combat arms fields.

Basic Course

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course. Enrollment in ROTC requires proof of a doctor’s physical screening. Participation in regularly scheduled physical training is required. In addition to classroom instruction, a one and a half hour leadership laboratory period is required every other week.

Advanced Course

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet officers and noncommissioned officers. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (75 minutes) periods each week and a two hour (120 minutes) leadership laboratory period every week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course.

Army Nurse Corps Option

Students enrolled in the School of Nursing curriculum leading to the degree of Bachelor of Science in Nursing may simultaneously qualify for commissions as Second Lieutenants in the Army Nurse Corps. Nursing students qualify for entry into the Officer Development Course through satisfactory completion of the General Military Course, the Basic Camp option or equivalent training. Nursing students participate in a summer Advanced Camp training program and an Army nurse training program. They provide practical and leadership experience in the clinical setting. The focus is to provide nursing cadets an experience which integrates clinical, interpersonal and leadership knowledge and skills. Emphasis is placed on practical experience under the direct supervision of an Army Nurse Corps Officer who acts as the cadet’s preceptor throughout the camp period.

Professional Military Education

In addition to basic and advanced ROTC courses, cadets must complete professional military education requirements consisting of one course in each of the following areas: written and oral communication skills, U.S. military history, and computer literacy. Students should consult with the professor of military science to determine those University courses suitable for fulfilling these requirements.

Monetary Allowances

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of $450–$500 per month for up to 20 months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide approximately $4,800 per semester during the last two years of school. Both the United States Army Reserve and the National Guard offer additional monetary incentives for cadets who join their organizations (drill pay).

Army ROTC College Scholarship Program

Financial assistance is available in the form of two- or three-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive FULL Tuition and Fees. Additionally, Army scholarship recipients receive a flat-rate allowance of $1200 per year for textbooks and other expenses and $350–$500 per month stipend for up to 10 months per year. During the 32-day advanced course summer training between the junior and senior years, Army ROTC also pays attending cadets $27 per day plus room and board. There are also numerous national and organizational scholarships that students may compete for as a member of Army ROTC.

Additionally, University of Miami undergraduates enrolled in the Army ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University’s tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain...
continuous enrollment in the Army ROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University's undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University's Army ROTC detachment.

Uniforms and Textbooks
All uniforms and items of insignia incident to membership in the Army ROTC Program are furnished by the Department of Military Science. Textbooks are provided at no cost to students/cadets enrolled in the basic course.

Special Activities
Cadets have the opportunity to join and participate in a number of military affiliated organizations and activities, both on a voluntary and a selective basis. The Color Guard is a voluntary organization that functions as a military unit participating in military ceremonies and presenting the national colors at civic events. Cadets have the opportunity to qualify for and compete with cadets from other universities and colleges in a series of military events termed Ranger Challenge.

Awards and Decorations
Awards and decorations made available by national organizations, the University of Miami Army ROTC Alumni Association, and local and national military organizations, are presented to both basic and advanced officer course cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in Army ROTC and other University academic courses, and in outstanding campus and cadet corps leadership.

Prerequisite for Admission to the Professional Officer Course
1. Be at least 17 years of age at time of acceptance.
2. Be able to complete the professional officer course and graduate from the University of Miami prior to reaching the age of thirty (30) at the time of commissioning.
3. Selection by the professor of military science and acceptance by the University of Miami.
4. Execute a written agreement with the government to complete the professional officer course and accept an Army ROTC commission.
5. Enlist in the Army Reserve Component-ROTC (terminated upon receiving an Army officer commission).

Those students enrolled in the four-year Army ROTC program must complete the basic course or its equivalent, or have acceptable prior military service. Veterans and students with previous ROTC training are invited to write, visit, or call the Department of Military Science 305-284-3329 or 305-348-1619 to discuss their eligibility status.

Students desiring entry into the two-year Army ROTC program should contact the Department of Military Science one semester prior to the semester in which they wish to enroll in the professional officer course. This lead time is required to complete the application and a physical examination prior to enrollment in the professional officer course.

Leadership Laboratory
Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for two (120 minutes) hours every week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

Educational Objectives
To provide a base of knowledge in the areas of ethics, leadership, Communication skills, Military Leadership, U.S Military History, Tactics and Team building to include future Officer development.

Degree Programs
Students can receive degrees from the university in addition to being in the Army ROTC program, as well as being eligible (once requirements are met) to receive a minor in Military Science.

Modern Languages and Literatures
mll.as.miami.edu
Dept. Code: MLL

Introduction
The study of languages and cultures is an integral part of a modern, global university education. At the University of Miami, students can choose courses in Arabic, Chinese, French, German, Haitian Creole, Hebrew, Italian, Japanese, Portuguese, and Spanish. All majors (French, German, Spanish), minors (Arabic Studies, French, German, Italian, Portuguese, Spanish), and language programs (Chinese, Haitian Creole, Hebrew, Japanese) in the department are articulated through the notion of Global Literacy. Global literacy is the ability to participate in sociocultural practices by both interacting with others in different languages and by creating, presenting, and interpreting ideas through oral and written texts in more than one language. Consequently, global literacy involves awareness about oral and written texts, their conventions and genres, and their social, historical, political, and artistic uses. It entails linguistic proficiency in a language other than your own. You cannot be global if you only live in one language. Global Literacy includes written and oral communication, critical thinking and social responsibility, and appreciation of cultural artifacts, artistic products, and new technologies in more than one language.

Global Literacy and multilingualism foster success in business, economics, education, law, medicine, natural sciences, politics, social sciences, arts, and humanities. Language study most effectively enriches academic as well as personal experiences when students choose a language based on its relevance to possible careers, to research in particular fields, to personal heritage, or to the understanding of unfamiliar cultures. Students combine advanced modern language study with majors in other fields, such as International Studies, Communications, History, Political Science (and other pre-law fields), Biology (and other pre-med fields), Nursing, English, Finance, Latin American Studies, Anthropology, Psychology, Computer Science, Sociology, and Philosophy.
The Department has Undergraduate Advisors for each language (http://www.as.miami.edu/mll/undergraduate/advising/). You are encouraged to consult with them for placement, and must consult with them if you plan to major, minor, or study abroad (contact the Department office for names and office hours). If you plan to double major, you must have an advisor from each of your fields.

Students may qualify for a wide range of departmental awards (http://www.as.miami.edu/mll/undergraduate/student-awards/) for excellence in linguistic and literary achievement. The Modern Languages and Literatures Awards Reception takes place annually during graduation week. Some awards are conferred through nomination by professors; others require an application. Students may obtain information on specific awards in the Department office. The annual deadline for applications is usually in early March.

Placement Guidelines for MLL Courses

Most students studying a second language can determine their appropriate level by adhering to the following guidelines. However, various factors (i.e., the strength of the program in which the student previously studied the language, how long it has been since the student has used the language, the extent of the student’s exposure to the language at home/in social settings, the student's knowledge of other languages, etc.) make it such that these are only guidelines and individual cases may differ. For this reason, on the first day of class of each course section, the instructor conducts a diagnostic evaluation of students’ abilities. The instructor will then inform students whether that course is indeed the level or track that will benefit him/her the most or, if not, the instructor conducts a diagnostic evaluation of students’ abilities. The instructor will then inform students whether that course is indeed the level or track that will benefit him/her the most or, if not, which course he/she must take. Therefore, it is extremely important that students attend their language class on the first day of class for the semester.

Students who wish to study Spanish (as a second language, native language, or heritage language) can get more tailored placement advice through our on-line placement advisor (http://www.as.miami.edu/labs/resources/placement/).

The following are MLL’s general placement guidelines (http://www.as.miami.edu/mll/undergraduate/placement-guidelines/):

- If you have not studied Arabic, Chinese, French, German, Hebrew, Italian, Japanese, or Spanish in high school, or have completed one to two years of high school instruction, take 101; for Portuguese, take 105.
- If you have taken 101 or its equivalent at another institution, take 102.
- If you have completed three years of high school instruction in French or Spanish, or scored a 3 on the AP language exam take 105. If you have had three years of high school Arabic, Chinese, German, Hebrew, Italian, or Japanese, take 102.
- If you have taken four years of high school Arabic, Chinese, German, Hebrew, Italian, or Japanese, take 102.
- If you have taken four years of high school French or Spanish, scored a 4 on the AP language exam or a 4 on the IB exam in French or Spanish, or took the equivalent of 102 or 105 at another university, take 201. If you have taken four years of high school German, Italian or Portuguese, take 201. If you have taken four years of Arabic, Chinese, Hebrew, or Japanese, take 201.
- If you had five to six years of French, German, Italian, or Spanish in middle and high school, take 202.
- If you have taken the equivalent of 201 at another university or scored a 5 on the AP language exam, you have completed your language requirement. If you wish to continue your studies, take 202.
- If you took the equivalent of 202 in French or Spanish at another university or scored a 4 on the AP literature exam, you have completed your language requirement. If you wish to continue your studies, take 203. If you took the equivalent of 202 in German, Italian or Portuguese at another university, you have completed your language requirement. If you wish to continue your studies, take 301.
- If you scored a 5 on the AP literature exam in French, Italian or Spanish, you have completed your language requirement. If you wish to continue your studies, take 301.

The Department offers courses open to native speakers of French, German, Italian, Portuguese, and Spanish. Native speakers may not enroll in 101, 102, 105, 201, 202, 203, or 301 in their language. If you are a native speaker of French, German, Italian, or Portuguese, and graduated from a high school where that was the official language of instruction, you may take any course above 301 (consult with the respective Undergraduate Advisor). If you are a native speaker of Spanish and graduated from a high school where that was the official language of instruction, your first SPA course at UM must be either SPA 302 or SPA 303 or SPA 307 (which is a prerequisite for most other SPA courses).

The Department of Modern Languages & Literatures identifies as heritage learners of Spanish those students who begin their university studies of the language with little or no prior instruction in Spanish but who, because of family background or social experience, can already understand much casual spoken Spanish and have a passive knowledge of the language (though they may not usually speak the language themselves). In the great majority of cases, they have been born and fully educated in the United States, and may have grown up speaking principally English (or a ‘mix’ of Spanish and English, i.e. “Spanglish”) in the home with their grandparents, parents and siblings. Heritage learners may or may not consider themselves as “bilinguals” or “native speakers”, since both of these terms carry very different connotations—linguistic, social, and psychological—for different individuals. Some state that they “do not really speak Spanish” even though they are able to comprehend much spoken language (i.e., they are “passive bilinguals”). In the great majority of cases, they self-identify as “Hispanic” or “Latino/a”.

HERITAGE LEARNERS OF SPANISH MUST BE PLACED IN ONE OF THE FOLLOWING FOUR COURSES:

1. SPA 107 Basic Spanish for Heritage Learners is for those students with little or no prior instruction in Spanish who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language although they do not usually speak the language themselves. Generally, their abilities to read and write Spanish are at a beginning level. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.

2. SPA 207 Intermediate Spanish for Heritage Learners is for those students WHO HAVE ALREADY TAKEN AND PASSED SPA 107 or who have studied Spanish for AT LEAST TWO YEARS IN HIGH SCHOOL. They can understand casual spoken Spanish and have some functional ability in speaking, reading and writing the language. CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.

3. SPA 208 Advanced Spanish for Heritage Learners is for those students who have studied Spanish for four years in high school and who have developed functional abilities in speaking, reading and writing the language. Students who earned a score of 5 on the AP Spanish Language Exam or 4 in the AP Literature Exam should
register for this course. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**

4. **SPA 307 Interpreting Literary And Cultural Texts In Spanish For Heritage/Native Speakers** is intended for those students who have completed secondary and/or university studies in a Spanish-speaking country and for those heritage learners who demonstrate an advanced level of productive competence (in the written and spoken modes) in Spanish because of prior formal study of the language. Heritage learners who place directly into 307 have taken AP Spanish literature in high school and earned a score of 5.

**SPA 101, SPA 102, SPA 105, SPA 201, SPA 202 AND SPA 203 ARE NOT FOR HERITAGE LEARNERS. ANY HERITAGE LEARNER WHO ENROLLS IN ONE OF THESE COURSES WILL BE OBLIGATED TO SWITCH TO A HERITAGE LANGUAGE COURSE (SPA 107, SPA 207, SPA 208 OR SPA 307) DURING THE FIRST WEEK OF CLASS.**

**Arts and Sciences Language Requirement**

The College of Arts and Sciences requires all B.A. and B.S. degree students to show competency in a language other than English by successfully completing an approved college language course at the 200-level or higher. Students wishing to fulfill the language requirement in a language not taught at UM, may request an equivalency evaluation for a course at the appropriate level offered at an accredited institution, complete the approved equivalent course, and transfer the credits. Students requesting such an equivalency evaluation must submit appropriate documentation to the MLL department for approval. For a native speaker of the language in question, a course that transfers at UM’s 300-level will fulfill the language requirement. For a second language learner of the language in question, a course that transfers at UM’s 200-level will fulfill the language requirement.

**Writing Credits: Writing Across the Curriculum**

All of the Department’s 300- and 500-level courses and some 400-level courses offer writing credit. **NOTE: Courses may simultaneously fulfill General Education requirements and Writing Credit, or the Foreign Language Requirement and Writing Credit.**

**Cognates**

Most of the Department’s courses are part of cognates in one of two Areas of Knowledge: Arts & Humanities, and People & Society. A course cannot simultaneously complete a cognate in an Area of Knowledge and the College of Arts & Sciences’ Foreign Language Requirement.

**Degree Programs**

Students pursuing a single major in Arts and Sciences earn a BA.

**Majors**

The Department offers majors in French, German, and Spanish. Students majoring in any of these three languages must earn 24 credit hours in courses above 201 for French and above 202 for German and Spanish (30 credit hours for Departmental Honors). In consultation with their MLL advisor, students can have up to 1 course (3 credits) from among the MLL courses or the FRE, GER, and SPA courses taught in English (numbered 310-319) count toward their French, German, or Spanish major.

**Minors**

The Department offers minors in Arabic Studies, French, German, Italian, Portuguese, Spanish, and Modern Languages. You do not have to be a student of the College of Arts and Sciences to minor in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor. Except for Arabic Studies, French and Italian, all courses in the German, Portuguese, Spanish minors must be taught in the target language. The two 300-level courses for the additional language in the Modern Languages minor must also be taught in the target language.

Students may also pursue a minor in Chinese Studies or Japanese Studies as an Independent Minor. Please consult the requirements here. (p. 84)

**Study Abroad**

Students completing a major or a minor in a modern language are encouraged to study abroad. The Department offers faculty-led summer study abroad programs in France, Japan, and Spain. The Department and Study Abroad sponsor a semester-long study abroad program in Paris (UParis) for students of all majors and minors and all levels of ability in the French language; French majors and minors are especially encouraged to apply. For more information, please click here. Study Abroad (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit the Study Abroad office early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

**Departmental Honors**

Departmental Honors in Modern Languages are possible in the three languages for which the major is offered: French, German and Spanish. In order to request admission to Departmental Honors, candidates must have completed at least twelve credit hours at the 300 level or above. They must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for honors will identify an honors thesis supervisor and a second reader and request admission to Departmental Honors. Admission to candidacy must also be approved by the Director of Undergraduate Studies for the appropriate language.

In addition to fulfilling the regular major requirements, students must register in their Senior year for FRE or GER or SPA 594-595, Senior Honors Thesis. This is a two-semester, six credit hour sequence: 594 for research and 595 for the actual writing of the honors thesis.

The honors thesis advisor and the second reader will determine whether the finished thesis merits Departmental Honors.
**Majors in Modern Languages and Literatures**

- B.A. in French (p. 191)
- B.A. in German (p. 194)
- B.A. in Spanish (p. 197)

**Minors in Modern Languages and Literatures**

- Arabic Studies (p. 201)
- French (p. 201)
- German (p. 202)
- Italian (p. 202)
- Portuguese (p. 202)
- Spanish (p. 202)
- Minor in Two Modern Languages (p. 202)

**B.A. in French**

**Goals of the Major**

A major in French consists of at least 24 credit hours beyond FRE 201 with a grade of C- or higher in every course counting toward the major, and with a cumulative GPA of at least 2.5 in the major (see curriculum for course distribution). The major is designed to allow students to gain advanced linguistic, cultural, and literary competence in the communities that speak this language. With each course students further develop the capacity to communicate with and to critically see and understand the linguistic communities being studied. Not only do students learn to understand, interpret, and analyze communication patterns and cultural products (new technologies, film, literature, etc.) from other geopolitical positions, but this process also fosters a greater appreciation of the learners’ own language, culture, and society. As part of the development of analytical and critical skills, students learn to build coherent arguments orally and in writing; to develop tools for the interpretation of various texts; to perform research and write critical papers; to find and evaluate sources of information; to heighten their sensitivity to the contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the relevant history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The Department and Study Abroad sponsor a semester-long study abroad program in Paris (UParis) for students of all majors and minors and all levels of ability in the French language; French majors and minors are especially encouraged to apply. For more information, please click here. The Study Abroad Office (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit Study Abroad early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

Students with transfer credit hours must take at least 18 graded credit hours at or above the 300-level at the University of Miami; i.e., up to 6 credit hours may be transferred towards the French major from another institution or a study abroad program not administered by UM. Up to 12 credit hours taken abroad in a UM-administered program may count towards the major.

**Capstone Courses**

The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation of, synthesis, and reflection on a student’s experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Of the 24 credit hours required for the major, a minimum of 12 credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 credit hours from these programs may be applied toward the major. Up to 6 transfer credit hours from other institutions may count toward the major; whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:

- A student may use 3 transfer credit hours with UM equivalency and 9 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 6 transfer credit hours with UM equivalency and 6 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

Core Requirements

At least 15 credits must be at the 300 or 400 level. At least 3 credits of the 15 credits at the 300 or 400 level must focus on a pre-20th century period. The following courses meet this requirement:

- FRE 363: Medieval and Renaissance Topics in French
- FRE 364: Early Modern Topics in French
- FRE 365: 19th Century Topics in French

300 or 400 Level Courses

Capstone Requirement

FRE 501: Capstone 3

Additional Graduation Requirements

- ENG 105: English Composition I 3
- ENG 106: English Composition II 3
- MTH 101: Algebra for College Students Not needed by students who place into MTH 113 3
- MTH 113: Finite Mathematics 3

Language Requirement (3-9 credits)

Minor 15

People & Society Cognate 3

STEM Cognate 9

Natural Science Course 3

Advanced Writing & Communication 3

Electives 42

Total Credit Hours 120

Suggested Plan of Study

For students starting the major with FRE 101

| Spring   |                                            |              |
|----------|                                            |              |
| FRE 203  | Advanced French                            | 3            |
| STEM Cognate Course | 3 |
| Minor Course | 3 |
| Elective |                                            | 3            |

A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

1 In consultation with their FRE advisor students can have up to 1 course (3 credits) from among the MLL courses or FRE courses taught in English (numbered 310-319) count toward their major.

2 Students satisfy this requirement by the time they start the major with FRE 202.

3 If the student has a minor (or second major) that counts as ‘People & Society’, the student does not need to satisfy the requirement for a People & Society cognate.

4 If the student has a minor (or second major) that counts as ‘STEM’, the student does not need to satisfy the requirement for a STEM cognate.

5 This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.

6 Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student’s major disciplines. Since all FRE courses above 203/208 are designated as writing (WRIT) courses, all French majors satisfy this requirement by completing their major.

**Elective** 3

Credit Hours 15

Total Credit Hours 120
Goals of the Major

• To acquire a broad, structured knowledge of history, literature and culture in the French language.
• To develop analytical, critical, and communication skills.
• To attain information and communication technology literacy needed in an increasingly complex and globalized society.
• To acquire intercultural competence and learn to view themselves through the lens of another language and culture.

Student Learning Outcomes

• Students will develop oral communicative abilities in French by the time they complete their major.
• Students will develop written communicative abilities in French.
• Students will learn to reflect and critically think about language, literature, and culture, history, and politics of different societies by studying texts written in French and writing about them.

B.A. in German

Goals of the Major

A major in German consists of at least 24 credit hours beyond GER 202 with a grade of C- or higher in every course counting toward the major, and maintain a minimum overall average of 2.5 in the major (see curriculum for course distribution). The major is designed to allow students to gain advanced linguistic, cultural, and literary competence in the communities that speak this language. With each course students further develop the capacity to communicate with and to critically see and understand the linguistic communities being studied. Not only do students learn to understand, interpret, and analyze communication patterns and cultural products (new technologies, film, literature, etc.) from other geopolitical positions, but this process also fosters a greater appreciation of the learners’ own language, culture, and society. As part of the development of analytical and critical skills, students learn to build coherent arguments orally and in writing; to develop tools for the interpretation of various texts; to perform research and write critical papers; to find and evaluate sources of information; to heighten their sensitivity to the contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the relevant history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The Study Abroad Office (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit Study Abroad early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

Students with transfer credit hours at the 300-level must take at least 18 graded credit hours at or above the 300-level at the University of Miami; i.e., up to 6 credit hours may be transferred towards the German major from another institution or a study abroad program not administered by
University of Miami Academic Bulletin

Up to 12 credit hours taken abroad in a UM-administered program may count towards the major.

**Capstone Courses**
The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation of, synthesis, and reflection on a student’s experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Of the 24 credit hours required for the major, a minimum of 12 credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 credit hours from these programs may be applied toward the major. Up to 6 transfer credit hours from other institutions may count toward the major; whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:

- A student may use 3 transfer credit hours with UM equivalency and 9 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 6 transfer credit hours with UM equivalency and 6 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

Suggested Plan of Study

These Suggested Plans of Study are samples of four-year plans, but an individual student’s actual plan is likely to vary from these sample plans in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student’s initial placement in composition, mathematics, and German; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as ‘People & Society,’ and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as ‘STEM.’

**Student Learning Outcomes**

- Students will develop oral communicative abilities in German by the time they complete their major.
- Students will develop written communicative abilities in German.
- Students will learn to reflect and critically think about language, literature, and culture, history, and politics of different societies by studying texts written in German and writing about them.

**Goals of the Major**

A major in Spanish consists of at least 24 credit hours beyond SPA 202 with a grade of C- or higher in every course counting toward the major, and with a cumulative GPA of at least 2.5 in the major (see curriculum for course distribution). The major is designed to allow students to gain advanced linguistic, cultural, and literacy competence in the communities that speak this language. Students learn with each course to understand, interpret, and analyze communication patterns and cultural products (new technologies, film, literature, etc.) from the geopolitical positions of the linguistic communities they study. This learning process also fosters a greater appreciation of the students’ own language, culture, and society. As part of the development of analytical and critical skills, students learn to build coherent arguments orally and in writing to develop tools for the interpretation of various texts to perform research and write critical papers to find and evaluate sources of information to heighten their sensitivity to the contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the relevant history, literature, and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students with transfer credit hours must take at least 18 graded credit hours at or above the 300-level at the University of Miami, i.e., up to 6 credit hours may be transferred towards the Spanish major from another institution or non-UM study abroad program.

Spanish majors must take SPA 301 or SPA 307 (or equivalent), and they are advised to take this course as they start fulfilling their 300-level credit requirements. In consultation with their MLL advisor, students can have up to 1 course (3 credits) from among the MLL courses or SPA courses taught in English (numbered 310-319) count toward their Spanish major. Students must also take one pre-twentieth century course to fulfill their course requirements towards the major (SPA 353, SPA 354, SPA 363, or SPA 364). Only one professional Spanish course (SPA 432, SPA 433, SPA 434) will count towards the Spanish major, although students are free to take more than one.

**Capstone Courses**

The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation, synthesis, and reflection on a student's experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.
Study Abroad

Students completing a major in a modern language are encouraged to study abroad. The Department offers a faculty-led study abroad summer program in Spain. The Study Abroad Office (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of these opportunities, students should visit Study Abroad early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hours toward the major for courses taken abroad will be determined on an individual basis.

Of the 24 credit hours required for the major, a minimum of 12 graded credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 graded credit hours from these programs may be applied toward the major. As stated above, up to 6 transfer credit hours from other institutions may count toward the major. Whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:

- A student may use 3 transfer credit hours with UM equivalency and 9 graded credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 graded credit hours must be earned in courses taught by MLL faculty.
- A student may use 6 transfer credit hours with UM equivalency and 6 graded credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 graded credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 graded credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 graded credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

MTH 113 Finite Mathematics 3

Language Requirement (3-9 credits) 3

Minor 15
People & Society Cognate 9
STEM Cognate 9
Natural Science Course 6
Advanced Writing & Communication 7
Electives 48

Total Credit Hours 120

---

1 In consultation with their MLL advisor, students can have up to 1 course (3 credits) from among the MLL courses or the SPA courses taught in English (numbered 310-319) count toward their Spanish major.
2 Only one professional Spanish course (SPA 432, 433, 434) will count towards the Spanish major, although students are free to take all three.
3 Students satisfy this requirement by the time they start the major with SPA 203.
4 If the student has a minor (or second major) that counts as ‘People & Society’, the student does not need to satisfy the requirement for a People & Society cognate.
If the student has a minor (or second major) that counts as 'STEM', the student does not need to satisfy the requirement for a STEM cognate.

This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.

Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student's major disciplines, since all SPA courses above 203/208 are designated as writing (WRIT) courses, all Spanish majors satisfy this requirement by completing their major.

A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

These Suggested Plans of Study are samples of four-year plans, but an individual student's actual plan is likely to vary from these sample plans in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student's initial placement in composition, mathematics, and Spanish; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as 'People & Society,' and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as 'STEM.'

3. Or any other 300 level SPA course also satisfies Writing Credit.
4. Students can opt to take SPA 302 and SPA 442 in Santander, Spain during the summer.
Mission

The Department of Modern Languages and Literatures seeks to promote global literacy. All majors (French, German, Spanish) in the department are articulated through the notion of global literacy. In its undergraduate programs, the MLL Department’s mission is to provide rigorous instruction, speaker series, study abroad, research and service-learning opportunities allowing students to gain the advanced linguistic, literary and cultural competence needed as we strive to develop future leaders of our nation and the world. Through our courses and co-curricular activities, students acquire a broad, structured knowledge of history, literature and culture in the target language; they develop analytical, critical, and communication skills; and they attain information and communication technology literacy needed in an increasingly complex and globalized society. Finally, they acquire intercultural competence and learn to view themselves through the lens of another language and culture.

Goals

• To acquire a broad, structured knowledge of history, literature and culture in the Spanish language.
• To develop analytical, critical, and communication skills.
• To attain information and communication technology literacy needed in an increasingly complex and globalized society.
• To acquire intercultural competence and learn to view themselves through the lens of another language and culture.

Student Learning Outcomes

• Students will develop oral communicative abilities in Spanish by the time they complete their major.
• Students will develop written communicative abilities in Spanish.
• Students will learn to reflect and critically think about language, literature, and culture, history, and politics of different societies by studying texts written in Spanish and writing about them.

Minor in Arabic Studies

Curriculum Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select a minimum of three credit hours in a 200 level Arabic language course:</td>
<td>3</td>
</tr>
<tr>
<td>ARB 201</td>
<td>Intermediate Arabic I</td>
<td></td>
</tr>
<tr>
<td>ARB 202</td>
<td>Intermediate Arabic II</td>
<td></td>
</tr>
<tr>
<td>ARB 203</td>
<td>Arabic for Heritage Learners</td>
<td></td>
</tr>
<tr>
<td>or ARB 207</td>
<td>Advanced Arabic</td>

<td>Arabic 204: Advanced Arabic II</td>
<td></td>
</tr>
<tr>
<td>or ARB 208</td>
<td>Arabic for Heritage Learners II</td>
<td></td>
</tr>
</tbody>
</table>

Or the equivalent

Select a minimum of three additional credit hours at the 200 level.

Select a minimum of three credit hours in one of the following: ¹

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARB 310</td>
<td>Topics in Arabic Literature and Culture in Translation</td>
<td></td>
</tr>
<tr>
<td>ARB 312</td>
<td>Arab Cultures: A Cultural History of the Arab World</td>
<td></td>
</tr>
</tbody>
</table>

Select a minimum of three credit hours, outside of ARB courses, in humanities or social science courses focused on the Middle East, North Africa, Islam, or the Arab world.

3

1 Arabica Studies courses are taught in English.

³ A minor in Arabic Studies consists of a minimum of 15 credit hours, passed with a 'C' or higher.

² Up to 9 credit hours taken abroad in an Arabic-speaking country are eligible to fulfill the requirements for the minor. Up to 6 transfer credit hours from an accredited university or 4-year college in another region of the world are eligible to fulfill the requirements for the minor. In all cases, whether the credit hours are from a UM-affiliated study abroad program or transfer credit hours from any institution, the credit hours’ UM equivalency, if any, will be determined by the UM Arabic Studies Program Director; ARB 310 must be taken within the Department of Modern Languages and Literatures at UM; and the student must fulfill the distribution of requirements and other criteria stipulated above.

³ If a student has studied Modern Standard Arabic (fusha) in another setting (e.g., a high school foreign language program or schooling in an Arab country), she/he may request a proficiency evaluation from the Program Director. If the student’s Modern Standard Arabic is equivalent to, or beyond, the Intermediate level, the student may be exempted from the requirement to earn 3 credit hours in a 200-level Arabic language course; however, the student will still be required to take at least 9 credit hours of ARB courses and a total of 15 credit hours, as stipulated above, to complete the minor.

Minor in French

Curriculum Requirements

<table>

<td>or SPA 208</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Advanced Spanish for Heritage Learners</td>
<td>3</td>
</tr>
</tbody>
</table>

At least 9 credit hours of SPA at 300 and/or 400 level 9

Minimum of 6 graded credit hours from UM faculty

Maximum of 3 transfer credit hours

Total Credit Hours 12

\* Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

\* All courses towards the minor in Spanish must be taught in the target language.

\* 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.

Minor in Portuguese

Curriculum Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POR 202</td>
<td>Intermediate Portuguese II (or above)</td>
<td>3</td>
</tr>
</tbody>
</table>

At least 9 credit hours at 300 and/or 400 level 9

Minimum of 6 graded credit hours from UM faculty

Maximum of 3 transfer credit hours

Total Credit Hours 12

\* Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

\* All courses towards the minor in Portuguese must be taught in the target language.

\* 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.

Minor in Two Modern Languages

Curriculum Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary Language</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>Primary Language 300-Level or above</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>Secondary Language Any level</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours 24

\* For example, POR 201, POR 202, POR 301 and POR 321 along with SPA 101, SPA 102, SPA 201 and SPA 202 would constitute a Minor in Two Modern Languages; so would CHI 202, CHI 203, CHI 204 and CHI 310 along with FRE 101, FRE 102, FRE 201 and FRE 202. Many other combinations are possible. Please consult with the language and program advisors.
Neuroscience

neuroscience.as.miami.edu

Dept. Code (NEUR)

Introduction

Neuroscience is the study of the nervous system (i.e., the brain, spinal cord, and peripheral nerves), the mechanisms of behavior, and the nature of mind and consciousness. The Neuroscience Program is a rigorous, interdisciplinary program between the Department of Psychology (http://www.psy.miami.edu/), the Department of Biology, and the Miller School of Medicine. The neuroscience major provides a broad-based liberal arts background that can be applied to a variety of career fields. It is also excellent preparation for medical school or graduate study in neuroscience, psychology, biology or behavioral medicine.

Educational Objectives

The neuroscience major seeks to provide students with exposure to and a fundamental understanding of the neural and bio behavioral sciences by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic scientific inquiry, advising, and mentoring.

Degree Programs

All neuroscience majors are required to pursue a Bachelor of Science (B.S.) degree.

Departmental Honors

Students can earn Departmental Honors in Neuroscience by demonstrating excellence in their coursework and completing a Senior Honors Thesis in Neuroscience.

1. Excellence in Coursework – A minimum 3.3 combined GPA and a minimum 3.5 neuroscience GPA is required.
2. Senior Honors Thesis in Neuroscience – This is an independent empirical research project that is completed across two semesters (i.e., NEU 580 and NEU 581) under the supervision of a faculty mentor in the Neuroscience Program. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services in the Department of Psychology is also required.

Additional Information

The office of Undergraduate Academic Services for Psychology (UASP) provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508. Appointments are only necessary during the official advising period for registration.

Freshmen and Transfer Students

All freshmen psychology majors in the College of Arts and Sciences are required to participate in the Department of Psychology’s year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring). These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami). This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a psychology major after matriculation may be required to take part in an advising seminar prior to declaring the psychology major.

Prerequisites

Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any PSY course that is to serve as a prerequisite for another course in the psychology major. Students who enroll in PSY courses without the specified prerequisites may be dropped.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, psychology majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY area. Writing courses are already built into the required courses of the B.S. track of the psychology major; however, students who follow the B.A. track of the psychology major will need to plan accordingly to incorporate a writing-designated PSY course into their graduation plans.

Research Experience for Course Credit

Research experience is considered an integral part of the psychology major. Students may earn course credit (i.e., PSY 280, PSY 380, and/or PSY 480) by working in the laboratory of a Department of Psychology faculty mentor. Students can repeat PSY 280, PSY 380, and PSY 480 without penalty. A minimum 2.8 combined and psychology GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required. Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

Research Participation in PSY 110

As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more details. Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in psychology.
Senior Assessment
As part of the Department of Psychology’s accreditation plan, all senior psychology majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the students’ graduation status; however, failure to complete the assessment may delay or prevent graduation.

Transfer Courses
Courses from other colleges or universities may be assigned PSY credit at UM with written approval by UASP.

Cognates
Neuroscience majors may not use a cognate with a Responsible Academic Unit (RAU) of Psychology to fulfill their People and Society (P & S) area of knowledge.

Major in Neuroscience
• B.S. in Neuroscience (p. 204)

B.S. in Neuroscience
http://neuroscience.med.miami.edu/undergraduate-program

Overview
• Students must earn a minimum grade of C- in any course that is to count toward the neuroscience major.
• Students may repeat no more than two courses for the neuroscience major in which they received a D or an F.
• New freshmen and current students must have a minimum 1360 SAT, 30 ACT, or 3.5 combined, UM, and neuroscience GPA after 24 completed credit hours at UM to declare the neuroscience major. Note: At least 7 of these 24 credit hours must be in the BIL, CHM, or MTH courses required of the major and/or the degree.
• New transfer students must have a minimum 3.8 combined GPA to declare the neuroscience major, and at least 7 completed credit hours in the required BIL or CHM courses.
• Students are strongly advised not to continue with the neuroscience major if they have less than a 2.8 neuroscience GPA after 15 completed credit hours in the neuroscience major.
• Students must earn a minimum 2.6 neuroscience GPA and a minimum of 130 credits to graduate with the neuroscience major.

Notes
• There are limited seats in the neuroscience major so students may be required to join a waitlist before they are able to declare.
• Neuroscience majors are required to complete 130 total credit hours to complete their B.S. degree.
• The neuroscience major can only be declared as a first major for students who are enrolled in the College of Arts and Sciences.
• AP Credit for Statistics (i.e., PSY 292) cannot count toward the neuroscience major.
• Students who declare the neuroscience major after they transfer credit for PSY 292 or complete PSY 292 at UM can use PSY 292 as a substitute for PSY 291.

- NEU 400  Neurogenetics
- NEU 440  Neural Mechanisms of Psychiatric Disorders
- NEU 465  Cellular and Molecular Neuroscience
- NEU 468  Developmental Neuroscience.
- PSY 240  Abnormal Psychology
- PSY 320  Psychology of Drugs and Behavior
- PSY 345  Abnormal Child Psychology
- PSY 391  Tests and Measurements
- PSY 426  Health Psychology
- PSY 491  Advanced Biobehavioral Statistics

Auxiliary Courses

CHM sequences: 16

Chemistry for the Biosciences:

- CHM 121 & CHM 113  Principles of Chemistry and Chemistry Laboratory I
- CHM 221 & CHM 205  Introduction to Structure and Dynamics and Chemical Dynamics Laboratory
- CHM 222 & CHM 206  Organic Reactions and Synthesis and Organic Reactions and Synthesis Laboratory

Select one of the following PHY sequences: 10-11

College Physics:

- PHY 101 & PHY 106  College Physics I and College Physics Laboratory I
- PHY 102 & PHY 108  College Physics II and College Physics Laboratory II
- PHY 221  University Physics I 3
- PHY 222 & PHY 224  University Physics II and University Physics II Lab
- PHY 223 & PHY 225  University Physics III and University Physics III Lab
- PH 211 & PHY 106  University Physics I for PRISM and College Physics Laboratory I
- PHY 212 & PHY 108  University Physics II for PRISM and College Physics Laboratory II
- ENG 105  English Composition I 3
- ENG 106  English Composition II 3
- Arts & Humanities Cognate 9
- People & Society Cognate 9
- Minor 2 15-18
- Mathematics 3
- Foreign Language in 200 level or above 3
- Electives 6-9

Total Credit Hours 130-137

1 Note: NEU courses cannot double count for a BIL elective and another required course within the neuroscience major.
2 All neuroscience majors must complete a minor in Biochemistry, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.
Neuroscience majors may not earn majors or minors in Biology or Psychology. Neuroscience majors will fulfill a Chemistry minor automatically if taken in residence.

**Mission**

In accordance with the goals of the University of Miami, the mission of the interdisciplinary undergraduate neuroscience major is to acquire, advance, and disseminate knowledge within the neural and bio-behavioral sciences. In order to achieve these goals, the Neuroscience Program seeks a balance among several academic endeavors, including basic scientific research, applied research, undergraduate teaching, graduate teaching, professional training and development, and service to the community.

In pursuing these activities, the major seeks to attract and retain the highest quality faculty and students, foster respect for differences among people, nurture curiosity, and insist upon high standards of thought, study, and communication that should characterize the ethical, educated person.

**Goals**

The major seeks to provide undergraduate students with exposure to and a fundamental understanding of the neural and bio-behavioral sciences. It seeks to deliver an integrative educational experience by promoting interactions among faculty, graduate students, and undergraduate students in basic scientific inquiry, advising, mentoring, and community outreach.

**Student Learning Outcomes**

- Students will develop a fundamental knowledge base in neuroscience as a scientific discipline.
- Students will develop research and quantitative skills through core coursework and/or supervised laboratory experiences.
- Students will develop oral and written communication skills related to the science of neuroscience.

**Philosophy**

philosophy.as.miami.edu

**Dept. Code:** PHI

**Introduction**

The Philosophy Department offers a wide range of courses at the undergraduate level which cover every major area of philosophy as well as its history. Students can major or minor in the subject. In addition, the department sponsors two undergraduate philosophy organizations:

- the Philosophy Club, which is open to all UM undergraduates, and
- Phi Sigma Tau, a chapter of the National Honor Society in Philosophy.

Both groups afford students regular opportunities to meet, eat, and talk philosophy with each other and with graduate students and faculty in the department. All undergraduates who are interested in philosophy are welcome to participate in these philosophical events.

**Educational Objectives**

Philosophy is the study of the most basic moral, scientific, legal, aesthetic, religious, and metaphysical concepts and theories by which
we understand ourselves and our universe. It is a reasoned pursuit of fundamental truths, a quest for understanding, a study of principles of conduct. It analyzes the basic assumptions and concepts of other disciplines and the norms that govern interpersonal relations and the acquisition of knowledge. It seeks to establish standards of evidence, to provide rational methods of resolving conflicts, and to create techniques for evaluating ideas and arguments. Philosophers are dedicated to developing the following abilities: reasoning clearly, distinguishing between good and bad arguments, thinking through complicated questions, and using reason in situations that are often governed by emotions. Studies have shown that philosophy majors do extremely well on standardized tests, and in careers that require analytical abilities such as the practice of law and software development. But irrespective of career choice, philosophy deepens one’s sense of the meaning and varieties of human experience, and enhances self-knowledge, foresight, and sense of direction in life.

**Degree Programs**

The major in Philosophy leads to the degree of Bachelor of Arts. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in philosophy should take at least two (2) (properly approved writing and communication) philosophy courses.

**Pre-Law Major and Minor Tracks**

The Department offers major and minor tracks for students wishing to enhance their Pre-Law studies with relevant Philosophy coursework.

**Pre-Med Major and Minor Tracks**

The Department also offers major and minor tracks for students wishing to supplement their Pre-Med work with relevant Philosophy coursework.

**Departmental Honors**

A program of work toward graduation with Honors in Philosophy is available for qualified students. Interested students should consult the Departmental Director of Undergraduate Studies during their sophomore or junior years. Further information may be found under the section entitled HONORS PROGRAM.

**Advance Writing and Communication Requirement**

Philosophy degree candidates in the College of Arts and Sciences who matriculate under Bulletin 2015/2016 and forward must complete at least four writing courses, and at least one such course must have a course code starting with PHI.

Transfer students may use a maximum of two transfer courses towards the requirement. The following links to a table listing the courses that have approval as writing courses:

http://www.as.miami.edu/academics/undergraduate-studies/writing-courses/ (https://na01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.as.miami.edu%2Facademics%2Fundergraduate-studies%2FWriting-courses%2F%3F%3B%26data=82%7C01%7Clet%20miamiedu%7C0a5566ba936346ce7ff908d590057f8d%7C2a144b72f23942d48ce060f17c48e33%7C0%7C0%7C6365732756495569098)

These courses, and only these courses, can be used to fulfill the Writing & Communication proficiency requirement. This table will be updated regularly with further courses, as they are approved.

For requirements leading to the Master of Arts and Ph.D. degree (p. 708), see the Bulletin of the Graduate School.

### Mission

Philosophy majors should be able to think critically and imaginatively about philosophical questions and foundational issues in other disciplines. They should have a solid understanding of contemporary and historical philosophical texts; they should be able to evaluate complex philosophical arguments and to determine the logical validity or invalidity of arguments in any sphere.

### Goals

#### Student Learning Outcomes

- All undergraduate majors will demonstrate the ability to evaluate evidence and arguments.
- All undergraduate majors will demonstrate the ability to think critically about philosophical issues.
- All undergraduate majors will demonstrate a specialized knowledge of at least one philosophical topic or area.
- All undergraduate majors who take writing-credit courses will demonstrate the ability to:
  - (a) summarize the main ideas of historical or contemporary philosophical theories in written form,
  - (b) analyze the fundamental differences among important philosophical concepts in several paragraphs, and
  - (c) apply these concepts in a resolution of current debates in solid writing.

Physical Sciences
Dept. Code: PSC

Introduction
PSC 101 is an interdisciplinary physical science course designed primarily for the non-science major. It may be used to satisfy a physical science requirement in some degree programs. Students should consult the degree requirements listed elsewhere in the Bulletin as well as their advisors for the appropriateness of this course for their programs. See also under PHY 110.

Physics
http://www.physics.miami.edu

Dept. Code: PHY

Introduction
The requirements for a major or minor in the Department of Physics are flexible and may be adapted to the needs of the individual student.

A grade of C- or better is required in all courses counted toward the major or minor with an overall GPA of 2.0. Any lecture course in the Physics department may be passed by means of a proficiency examination.

Note that more mathematics beyond two semesters of calculus is typically required for most of the physics courses at the 300 level or higher. In order to complete any Physics major sequence in four years, the student should begin elementary calculus as soon as possible. Students are encouraged to discuss an appropriate math sequence with the physics advisor. The minimum math requirement for physics major typically is as follow:

<table>
<thead>

Total Credit Hours 17-18

Requirements for the Master of Science and Doctor of Philosophy (p. 710) degrees will be found in the Bulletin of the Graduate School.

Majors in Physics
- B.S. in Pure Physics (p. 211)
- B.S. in Applied Physics (p. 213)
- B.S. Dual Major in Chemistry and Physics (p. 218)
- B.S Dual Major in Engineering and Physics (p. 220)
- B.S. Dual Major in Marine Science and Physics (p. 220)

Minor in Physics
- Physics (p. 222)

B.S. in Pure Physics
The pure physics major is recommended for students intending to enter graduate school in Physics, or that want a deeper understanding of fundamental physics.

It consists of one of the University Physics sequences with two labs, plus PHY 306 (lab), PHY 321, PHY 340, PHY 350, PHY 351, PHY 360, PHY 362, PHY 506 (lab), PHY 540, and PHY 560.

Students interested in a Ph.D. program in physics are strongly encouraged to also take PHY 561.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Pure Physics are required to pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

Mission
The mission of the Physics B.S. program is to provide students with a rigorous grounding in classical and modern theory, experience in advanced experimental techniques, and exposure to a broad spectrum of topics in physics research.

Goals
It is expected that graduates will be capable problem solvers, proficient critical and scientific thinkers, and possess backgrounds that prepare them for success in graduate school or their desired career path. Graduates will also be able to communicate their scientific ideas in written form to both scientifically literate and general audiences.

Student Learning Outcomes
- Students will demonstrate the ability to solve problems in classical and modern physics and proficiency in theoretical and applied mathematics, making them competitive in their application at top graduate programs and/or in the job market.
- Students will be exposed to and engaged in forefront physics research. Students will learn first hand how research is performed in one of our labs, while contributing to one of our active research programs.

- Students will be able to report their work/ideas in written form to both the scientific community and a broader audience.

B.S. in Applied Physics
http://www.physics.miami.edu

This sequence is available for those intending careers in applied physics. The major is divided into tracks, depending on the student’s field of interest. The Physics for the Life Sciences track is designed for premedical students.

Students must complete the core set of courses AND one track in their field of interest. Multiple tracks are allowed with prior authorization from the Department of Physics.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Applied Physics should pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

Core Courses
The core set of courses is required for all tracks and it includes one of the University Physics sequences with two labs (see table below), plus PHY 350, and PHY 360.

Engineering Physics Track
Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 9 credits in Engineering with prior authorization from the Department of Physics.

Computational Physics Track
Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 2 courses from the Computer Science BS core (p. 128) and a third course in Computer Science with prior authorization from the Department of Physics.

Medical Physics Track
Additional 5 credits in physics at the 300 level or higher, including PHY 351 and one lab, plus BME 265, BME 310, and BME 330 (Note: BIL 150, BIL 151, and CHM 121 are prerequisites for the BME courses).

Physics for the Life Sciences Track
Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus required biology and chemistry courses. In biology, the required courses are BIL 150, BIL 151, BIL 160, BIL 161, BIL 255, and either BIL 360 or BME 265. In chemistry, the students are required to take the three-semester sequence of Chemistry for the Life Sciences (CHM 121, CHM 221, CHM 222) with laboratory (CHM 113, CHM 205, CHM 206).

Chemical Physics Track
Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus CHM 360, CHM 364, CHM 365, CHM 464, and one among CHM 530, CHM 553, or CHM 575.

Mission
The mission of the Physics B.S. program is to provide students with a rigorous grounding in classical and modern theory, experience in advanced experimental techniques, and exposure to a broad spectrum of topics in physics research.

Goals
It is expected that graduates will be capable problem solvers, proficient critical and scientific thinkers, and possess backgrounds that prepare them for success in graduate school or their desired career path. Graduates will also be able to communicate their scientific ideas in written form to both scientifically literate and general audiences.

Student Learning Outcomes
- Students will demonstrate the ability to solve problems in classical and modern physics and proficiency in theoretical and applied mathematics, making them competitive in their application at top graduate programs and/or in the job market.
- Students will be exposed to and engaged in forefront physics research. Students will learn first-hand how research is performed in one of our labs, while contributing to one of our active research programs.
- Students will be able to report their work/ideas in written form to both the scientific community and a broader audience.

B.S. Dual Major in Chemistry and Physics
The dual major in Chemistry and Physics is designed for students who are pursuing a regular B.S. degree in Chemistry (p. 112) and want to pursue a second major in Physics.

In addition to the major in Chemistry (p. 114), the dual major requires 22 credit hours in physics and specific courses in Chemistry. The physics courses must include one of the University Physics sequences with two labs, plus PHY 350 and PHY 360. The remaining courses must receive advanced permission from the physics advisor. The specific Chemistry courses include CHM 360, CHM 364, CHM 365, CHM 464, and one among CHM 530, CHM 553, or CHM 575.

Students pursuing this dual major will have to satisfy the College of Arts and Sciences writing requirement for the Chemistry major.

B.S. Dual Major in Engineering and Physics

Students in the College of Engineering (p. 424) can pursue a dual major in Engineering and Physics, which consists of a regular major in Engineering, plus selected courses in physics. The physics courses required are the complete University Physics sequence for Engineers, plus 11 additional credits in physics at the 300 level or higher, including PHY 350, PHY 360, and one between PHY 321, PHY 340, and PHY 560.

Students pursuing this dual major will take courses designed to provide them with the skills required for effective communication, both written and oral, within their discipline in the College of Engineering.

Other Required Courses

Select one of the following:  5

Sample Plan of Study

This plan of study includes only the Physics portion of the Dual major. Please refer to the corresponding Engineering major (p. 424) for the Engineering portion (including general education requirements).

Total Credit Hours | 120-122

1. At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
2. Chemistry for the Biosciences must be passed with a grade of "C-" or higher.
3. Calculus I and II must be passed with a grade of "C-" or higher.

Minor in Physics

Curriculum Requirements

A minor in physics consists of a University Physics Sequence (3 options), plus Modern Physics (PHY 360) and an additional 3-credit physics course at the 300-level or higher (other than PHY 315).

**Introduction**

A political science major prepares students for work in a number of fields including law, politics, public policy, public administration, and international affairs, as well as employment in business and the nonprofit sector.

**Educational Objectives**

Political science majors gain an understanding of American political and legal life, the workings of other countries’ political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

**Advanced Writing & Communication Requirements**

Details of the Advanced Writing and Communication Proficiency:

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student’s major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

---

* 6 elective courses must include:
  - 3 Arts and Humanities Cognate courses
  - 3 People and Society Cognate courses

1 Students must take one laboratory from MSC 232 or MSC 302.
Individual writing course offerings may make the writing component independent of the rest of the course. As such the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two courses towards the writing requirement.

**Degree Programs**
- Bachelor of Arts in Political Science
- Five year program: Bachelor of Arts in Political Science and Masters of Public Administration (A special curriculum for students specializing in public administration enables them to complete the requirements for both a Bachelor’s and Master’s degree in five years.)

**Departmental Honors**
To earn Departmental Honors a political science major must:

1. Graduate with an overall GPA of 3.500.
2. Graduate with a political science GPA of at least 3.700. All political science course grades on a student’s transcript are counted in the calculation of the major GPA. This includes all grades from courses that were completed more than once (e.g. to obtain a high enough grade to count towards the major).

**Major in Political Science**
- B.A. in Political Science (p. 223)
- B.A. in Public Administration (p. 226)

**Minors**
- Political Science (p. 228)
- Public Administration (p. 228)

**B.A. in Political Science**

**Additional Requirements**

- POL Electives (300-level or higher) 15
- ENG 105 English Composition I 3
- ENG 106 English Composition II 3
- MTH 108 Precalculus Mathematics II (or higher level MTH course) 3
- Language Requirement 3-9
- STEM Cognate 4 9
- Arts and Humanities Cognate 9
- Minor Requirement 15
- Electives 39
- Total Credit Hours 120

1. Students who complete INS 101 with a grade of C- or better will be given credit for POL 203.
2. This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are not seminars and do not fulfill this requirement: POL 520, POL 521, POL 563, POL 564, POL 589, POL 590.
3. Please note that some courses cover more than one sub-field. Students may not, however, use a single class to fulfill multiple sub-field requirements.
4. Please note that for the Natural Science Area of Knowledge Requirement degree candidates must earn at least 3 credit hours in the Natural Sciences. Departments offering these courses include Anthropology (only APY 203), Biology, Chemistry, Ecosystem Science and Policy (only ECS 111, ECS 112, ECS 202), Geography (only GEG 120), Geological Sciences, Marine Sciences (except MSC 313, MSC 314), Physical Sciences, and Physics. These credit hours may double count with any other requirement.

* All majors must complete a quiz for graduating seniors (to be used for assessment purposes) during their last semester of coursework.
** To satisfy the Advanced Writing & Communication proficiency requirement, students majoring in political science must complete at least one of the four required writing-intensive courses in the Department of Political Science.
*** A student may only share (i.e., ‘double count’) maximally 6 credits between majors and minors offered by the Department of Political Science.
To count toward the major, each course must be completed with a grade of C- or above, with an overall GPA of 2.0 or above.

1 This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are not seminars and do not fulfill this requirement: POL 520, POL 521, POL 563, POL 564, POL 590.

### Mission

The Department of Political Science (POL) is a community of scholars and students seeking a deeper understanding of politics, and fosters a commitment to lifelong learning, intellectual growth, and civic responsibility. POL is dedicated to helping students develop analytical abilities, communication skills, and the awareness of political processes in a complex global society. We provide students with rigorous training in the field of political science, and exposure to new knowledge through empirical social science research.

### Goals

Political science majors gain an understanding of American political and legal life, the workings of other countries’ political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

### Student Learning Outcomes

- Students will develop knowledge of key political science concepts.
- Students will develop the ability to analyze evidence and draw reasoned conclusions.
- Students will develop the ability to communicate clearly in written form.

### B.A. in Public Administration

**Total Credit Hours** 120

* A minimum grade of C- in all courses offered by the department is required.
** A minimum cumulative GPA of 2.0 in all courses offered by the department is required.
*** A minimum of 21 credits must be earned in residency in the Department, thus a maximum of 9 credits can be transferred from other institutions as eligible credit for the Public Administration major.

**Mission**

The Department of Political Science mission is to foster a community of scholars and students that encourages the quest for a deeper understanding of politics and develops a personal commitment to lifelong learning, intellectual growth, and civic responsibility. The Bachelor of Arts in Public Administration at the University of Miami provides the student a comprehensive understanding of the challenges facing
those in the public service with special emphasis on administrative and managerial functions of government.

**Goals**

Through the study of public administration, our graduates will develop the skills and techniques necessary to serve as effective leaders and managers. They will be trained to effectively, efficiently, and equitably translate public policies into public programs and projects. Public administration coursework includes a comprehensive treatment of the broad political, social, economic and legal environment that serves as the context for government administration. The program stresses theory, research, and practice. The program builds on arts and science foundations to develop analytical and communication skill and a deep understanding of the management of public organizations. The public administration program prepares students for a range of careers in public service and provides them with a solid foundation for additional education in graduate or professional schools.

**Student Learning Outcomes**

- Demonstrate thorough knowledge of public administration concepts.
- Demonstrate the ability to perform social science research independently, analyze evidence and arguments critically, and draw reasoned conclusions.
- Demonstrate the ability to communicate theoretical concepts and empirical findings clearly.

**Minor in Public Administration**

http://www.as.miami.edu/politicalscience/
Psychology

http://www.psy.miami.edu

Dept. Code: PSY

Introduction
Psychology is the study of how individuals think, behave, feel, and relate to others. Because of its broad and fundamental nature, the psychology major prepares students for graduate study and/or careers in a wide range of people-oriented professions (e.g., psychology, medicine, law, business, communication, etc.). Psychology majors learn about human behavior and gain the analytical and critical thinking skills that are highly-valued in the workforce.

Educational Objectives
The Department of Psychology seeks to provide students with exposure to and a fundamental understanding of psychological science by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

Degree Programs
The Department of Psychology offers a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree.

Departmental Honors
Students can earn Departmental Honors in Psychology by demonstrating excellence in their course work and completing a Senior Honors Thesis in Psychology.

1. Excellence in Coursework – A minimum 3.3 combined GPA and a minimum 3.5 psychology GPA is required.
2. Senior Honors Thesis in Psychology – This is an independent empirical research project that is completed across two semesters (i.e., PSY 580 and PSY 581) under the supervision of a faculty mentor in the Department of Psychology. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services is also required.

Additional Information
The office of Undergraduate Academic Services for Psychology (UASP) provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508. Appointments are only necessary during the official advising period for registration.

Freshmen and Transfer Students
All freshmen psychology majors in the College of Arts and Sciences are required to participate in the Department of Psychology’s year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring). These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami). This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a psychology major after matriculation may be required to take part in an advising seminar prior to declaring the psychology major.

Prerequisites
Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any PSY course that is to serve as a prerequisite for another course in the psychology major. Students who enroll in PSY courses without the specified prerequisites may be dropped.

Advanced Writing and Communication Requirement
To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, psychology majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY area. Writing courses are already built into the required courses of the B.S. track of the psychology major; however, students who follow the B.A. track of the psychology major will need to plan accordingly to incorporate a writing-designated PSY course into their graduation plans.

Research Experience for Course Credit
Research experience is considered an integral part of the psychology major. Students may earn course credit (i.e., PSY 280, PSY 380, and/or PSY 480) by working in the laboratory of a Department of Psychology faculty mentor. Students can repeat PSY 280, PSY 380, and PSY 480 without penalty. A minimum 2.8 combined and psychology GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required. Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

Research Participation in PSY 110
As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more details. Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in psychology.

Senior Assessment
As part of the Department of Psychology’s accreditation plan, all senior psychology majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the
students’ graduation status; however, failure to complete the assessment may delay or prevent graduation.

Transfer Courses
Courses from other colleges or universities may be assigned PSY credit at UM with written approval by UASP.

Cognates
Neuroscience majors may not use a cognate with a Responsible Academic Unit (RAU) of Psychology to fulfill their People and Society (P & S) area of knowledge.

Major in Psychology
- B.A. or B.S. in Psychology (p. 230)

Minor in Psychology
- Psychology (p. 232)

B.A. or B.S. in Psychology
The major in psychology requires 33 credit hours in PSY courses. AP Credit for Statistics (i.e., PSY 292) cannot count toward the psychology major. Students who declare the psychology major after they transfer credit for PSY 292 or complete PSY 292 can use PSY 292 as a substitute for PSY 291.

Only 6 credit hours of the following may count toward the psychology major:

<table>

All psychology majors who pursue a B.A. degree in the College of Arts and Sciences must complete a minor from the list of acceptable minors published by the College.

All psychology majors who pursue a B.S. degree in the College of Arts and Sciences must complete a minor in Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.

Other Requirements

- Students must earn a minimum grade of C- in a PSY course to count it toward the psychology major.
- Students must have a minimum 2.8 combined, UM, and psychology GPA to declare the psychology major.
- Students are strongly advised not to continue with the psychology major if they have less than a 2.5 psychology GPA after 15 completed credit hours in psychology.
- Students must earn a minimum 2.3 psychology GPA and a minimum of 120 credit hours to graduate with the psychology major.
- Students must complete at least half of their psychology major in residence, including all 300, 400, and 500 level PSY courses.
- Only 6 PSY credit hours at the 300, 400, and 500 level may be taken through a UM Study Abroad Program with prior written approval.
- Students completing a B.S. in Psychology must complete a minor in one of the following programs: Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Sciences, Mathematics, Microbiology & Immunology, or Physics. Students who complete a second major in one of the mentioned fields are not required to complete a minor.

Mission
In accordance with the goals of the University of Miami, the mission of the Department of Psychology is to acquire, advance, and disseminate knowledge within the psychological and biobehavioral sciences. In order to achieve these goals, the Department seeks a balance among several academic endeavors, including basic scientific research, applied research, undergraduate teaching, graduate teaching, professional training and development, and service to the community. In pursuing these activities, the Department seeks to attract and retain the highest quality faculty and students, foster respect for differences among people, nurture curiosity, and insist upon high standards of thought, study, and communication that should characterize the ethical, educated person.

Goals
In its undergraduate program, the Department seeks to provide students with exposure to, and a fundamental understanding of, the psychological sciences and related skills. Upon graduation, psychology majors will be able to apply this foundation to a variety of careers including business, law, human resources, and medicine. A psychology major will also prepare students for careers in psychology that do not require an advanced degree. The program seeks to deliver an integrative educational experience by promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

Student Learning Outcomes
- Students will develop a fundamental knowledge base in psychology as a scientific discipline.
- Students will develop written communication skills related to the science of psychology.
- Students will develop research and quantitative skills through coursework and/or supervised laboratory experiences.

Total Credit Hours  15

1  
• Only 3 credit hours of PSY 280, PSY 380, and/or PSY 480 may count toward the minor.
• PSY 106, PSY 190, PSY 206, PSY 305 do not count toward the minor.
Students must earn a minimum grade of C- in a PSY course to count it toward the minor.

Students must earn a minimum 2.0 psychology GPA to graduate with the minor.

Students must complete at least 9 of the 15 minor credit hours in residence, and only 3 of these credit hours may be taken through a UM Study Abroad Program with prior written approval.

Religious Studies
religion.as.miami.edu
Dept. Code: REL

Introduction
Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students’ broad and deep apprehension of religion’s place(s) in human experience. The department’s educational work aims to strengthen students’ capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

The University regards the academic study of religion as an integral part of liberal, humane learning and seeks to assist students in understanding the role religion plays in human existence and culture. Instruction in the Department of Religious Studies is non-sectarian and seeks an open analysis of all points of view. Courses are designed to provide a general orientation to the academic study of religion for the undergraduate student, as well as more advanced exposure for those who wish to pursue professional careers where a study of religious ideas and institutions would be helpful, such as in psychology, sociology, history, journalism, teaching, law, medicine, the fine arts, religious education, the ministry, and the rabbinate.

The Department sponsors a wide variety of speakers and events each year, including a Religious Studies Colloquium series and a Forum on Religion and Public Life. The Forum has enriched the existing curriculum by bringing to the campus outstanding scholars and public intellectuals.

Educational Objectives
The general educational objectives of the Department are

1. to explore texts, histories, and ways in which humans from various cultures have understood their world including the beliefs, ethics, rituals, artifacts, and organizations of religions;
2. to understand the changing relationship between religion and elements of the wider culture including the dynamics of politics, art, economics, literature, and society and their relationship to religions;
3. to become familiar with the theories and methods used in the study of religion.

Degree Programs
The Department offers two tracks by which students may earn a major or a minor. The first track is Religious Studies, which is designed for students who are seeking a broad and comprehensive understanding of the world’s major religions and the cultures in which they are practiced. The second track is Religion and Health Care, which is designed for students who are interested in any aspect of health care or who wish to supplement their pre-med concentration with coursework in the field of Religious Studies.

Departmental Honors
The Department of Religious Studies encourages its majors and minors to intensify and deepen their knowledge of religious texts, traditions, and issues through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in religion that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in religious studies or other disciplines.

Minimum requirements for the program are as follows:

1. A cumulative grade point average of at least 3.30;
2. A cumulative grade point average in religious studies of at least 3.50; and
3. A thesis that is approved by departmental faculty.

For the determination of honors, cumulative grade point average means either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere (whether or not the transfer work is accepted toward a degree at the University of Miami), whichever is lower.

Theta Alpha Kappa
Majors, minors, and other students who meet certain academic criteria are eligible for membership in Theta Alpha Kappa, the National Honor Society for Religious Studies and Theology. Theta Alpha Kappa sponsors events that enhance the academic and social life of the department.

URome
In keeping with its emphasis on a global approach to the study of religion and society, the Department sponsors a study abroad program known as URome. This semester-on-location program, which is open to all qualified University of Miami undergraduate students, is offered each spring semester in collaboration with the American University of Rome. A limited amount of scholarship support for the URome program is available for qualified Religious Studies majors and minors.

Mission

Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students' broad and deep apprehension of religion's place(s) in human experience.

Goals

The department’s educational work aims to strengthen students’ capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

Student Learning Outcomes

- Students will attain a grasp of the basic theories and methodologies of the discipline of religious studies.
- Students will acquire broad knowledge of the role that religions play in human life and society as well as deeper knowledge in the specific area of Religion and Health Care.
- Students will develop the ability to communicate their understanding of the phenomenon of religion clearly in writing.

1. A major in Religious Studies leading toward the B.A. degree requires 24 credit hours in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0.
2. For a list of Religious Studies courses see this page (p. 1682).
3. Minimum of 12 credit hours in courses numbered 300 or above
4. Writing credit (W) in at least one course in the department

To ensure that majors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who major in Religious Studies must complete at least 12 credits in department offered courses numbered 300 or above in residence at the Coral Gables Campus.

Suggested Plan of Study

This plan of study includes

- A Secondary Major in Public Health
- Cognates in Understanding Business and Earth Stars Wind and Water

Total Credit Hours 12

Sociology

sociology.as.miami.edu

Dept. Code: SOC

Overview

The Major in Sociology provides scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other. Increasingly, sociologists are also focused on understanding the processes of globalization that are currently transforming contemporary societies.

Courses for both majors are designated SOC; see course list below. For information on Criminology please see the Criminology (p. 134) section of the Bulletin.

Educational Objectives

The undergraduate program in Sociology has as its main objective to provide students with:

1. A strong component of a social science education, training in analytical and statistical skills that are highly valued by potential employers;
2. A valuable undergraduate preparation for pursuing careers in such fields as environmental studies, public health, law, journalism, politics, public relations, business or public administration and in other fields that involve investigative or analytical skills or working with diverse groups;
3. An excellent and comprehensive training program for students wishing to pursue graduate work in programs leading to academic positions, research expertise, or work in the field of applied sociology.

**Degree Programs**

Students may earn a Bachelor of Arts degree in Sociology. The Department of Sociology also offers graduate programs leading to a PhD degree in the areas of:

- Criminology
- Medical Sociology
- Race, Ethnic Relations, and Immigration

**Departmental Honors**

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Sociology or Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Sociology or Criminology. They must also achieve a minimum of B in all Sociology/Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.

2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor(s) for all six credit hours.

3. Recruitment of eligible students is by department invitation during a student's junior year.

**Advanced Writing and Communication Requirement**

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Sociology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered within the department; however, it is the student's responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

**Alpha Kappa Delta**

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Kappa Delta, the International Sociology Honor Society. Alpha Kappa Delta sponsors events that enhance the academic and social life of the department.

**Major in Sociology**

- B.A. in Sociology (p. 238)
- Sociology & Criminology Double Major; Combined Minor (p. 239)

**Minor in Sociology**

- Sociology (p. 240)
- Sociology & Criminology Double Major; Combined Minor (p. 239)

**Mission**

Course work in this major is designed to provide scientific training for understanding the organization and patterns of structure and change in contemporary society, in addition to the interrelations between social structures, processes, and culture, on the one hand, and between these macro-level phenomena and individuals and groups, on the other.

**Goals**

Sociology courses have several objectives, including: general education, preparation for pursuing careers in such fields as law, social gerontology, health, human resource management, and social planning, and preparation for graduate study in sociology.

**Student Learning Outcomes**

- Students will demonstrate a thorough understanding of sociology, and the basic sociological theoretical concepts and knowledge base.
- Students will develop and demonstrate critical thinking skills through the comprehension, analysis and critique of sociological theories.
- Students will demonstrate an ability to understand and critique sociological research methodology. Students will have the ability to design and critique valid research studies and to identify reliable findings from such studies.

**Sociology & Criminology Double Major**

Students may choose to double major in both Sociology and Criminology, or major in either Sociology or Criminology while minoring in the other.

**Sociology and Criminology Double Major**

Students wishing to complete a double major must complete the Declaration of Major form for the College of Arts and Sciences and fill in both majors. Students completing a double major are not required to complete a minor as well.

Other Requirements

A minimum final grade of C- and a GPA of 2.0 are required in all courses offered by the Department.

A minimum cumulative GPA of 2.0 in all courses offered by the Department.

A minimum of 9 credit hours must be earned in residency in the Department; thus, only a maximum of 6 credit hours can be transferred from other institutions as eligible credit hours for the sociology minor.

Theatre Arts

theatrearts.as.miami.edu

Dept. Code: THA

Introduction

The University of Miami Department of Theatre Arts offers two distinct undergraduate degrees:

- a liberal arts program leading to a Bachelor of Arts degree in Theatre Arts and
- a pre-professional conservatory-based theatre training program leading to a Bachelor of Fine Arts degree in either
  - Acting,
  - Musical Theatre,
  - Stage Management,
  - Theatre Management, or
  - Design/Production.

The Department produces a season of plays and musicals at the Jerry Herman Ring Theatre as well as smaller-scale works in the Studio Theatre located in Hecht Residential College.

Educational Objectives

BA degree students are empowered to engage with and explore their world using the tools of theatre and performance. As an interdisciplinary degree program pursued in conjunction with a second major or as a minor, the BA program fosters a sound knowledge of theatre practice along with a deep understanding of its history and diversity of applications. By emphasizing creative and critical approaches to both the study and practice of the theatre arts, the BA program aspires to produce skilled artists, educators, and leaders in the field of theatre and beyond.

The objective of the BFA programming is to prepare gifted creative artists with the experience, training and craft necessary for entry into the world of professional theatre, television and film. Intensive training is complemented by a liberal arts curriculum and access to the vibrant international community of South Florida.

Degree Programs

- THE BACHELOR OF FINE ARTS DEGREE
- THE BACHELOR OF ARTS DEGREE

The Bachelor of Fine Arts Degree in Theatre Arts

In addition to meeting the requirements for admission to the University of Miami, students seeking admission to the Department of Theatre Arts BFA program must:

1. Submit the Supplemental Application to the Department of Theatre Arts. This application may be found here http://www.as.miami.edu/theatrearts/prospective/supplemental-application/, as well as on the 'Undergraduate Admissions' page on the University website;
2. Schedule an audition or portfolio review. These auditions and reviews are held on the University of Miami campus as well as in major cities throughout the United States at the National Unified Auditions. Auditions schedules can be found on the Department of Theatre Arts website on the ‘Prospective Students’ page.

BFA transfer applicants must follow the Admission procedures described above and should note that if accepted, class standing in the program (freshman, sophomore, etc.) is determined by the BFA Theatre Arts Faculty and the Director of Undergraduate Studies.

Musical Theatre and Acting Majors are typically admitted to the Bachelor of Fine Arts degree program in the fall semester of each academic year.

The candidates for the degree of Bachelor of Fine Arts must satisfy the academic requirements established by the College of Arts and Sciences, including, but not limited to the demonstration of:

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student’s major discipline,
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 (http://bulletin.miami.edu/search/?P=MTH%20108/) or higher.

To remain in the program, BFA students in the Department of Theatre Arts must maintain a cumulative 2.7 (B-) grade point average in all theatre courses (and any other courses required in a student’s area of specialization) and a cumulative GPA of 2.0 (C) in all courses. Failure to maintain satisfactory academic standing will result in the student being placed on academic probation by the Department and may lead to dismissal from the BFA program.

BFA Theatre Arts courses are progressive in nature and students must successfully complete each course in sequence. Failure to pass the requirements of any particular class in the program may result in the student’s dismissal.

All BFA students are evaluated by the faculty on commitment to training, production work, growth, discipline, talent and professional potential at the end of each semester.

Departmental production requirements, student responsibilities, and disciplinary policies are detailed in the Student Handbook, available on the ‘Current Students’ page on the Department’s website.

* A grade of C- or higher in all Theatre Arts courses and a cumulative GPA of 2.0 in all courses are required.
** To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Theatre Arts are encouraged to complete THA 481 and/or THA 482.
*** Transfer students have a residency requirement of 18 Theatre Arts credit hours on campus.
**** The State of Florida recognizes the Bachelor of Arts and Bachelor of Fine Arts Degrees as meeting the Theatre Arts subject area requirements for teaching at the secondary level. In addition to earning the BA or BFA degree in Theatre, students desiring to teach in the field of Theatre Arts should complete the required education credit hours in order to be certified by the state.

1 All Stage Management majors are required to participate in a production capacity in one show per semester for all eight semesters.

2 All Stage Management majors are required to stage manage or assistant stage manage one show in their Sophomore, Junior and Senior years. This management assignment doubles as their production assignment for that particular semester.

3 THA 459 may be repeated for a maximum of 18 credit hours.

4 100 level THA electives must be approved by Stage Management Faculty.

1 All BFA Theatre Management majors are required to manage the front of house for at least one production at the Jerry Herman Ring Theatre in their sophomore, junior and senior years.

2 All BFA Theatre Management majors must actively participate in one season subscription renewal campaign at the Jerry Herman Ring Theatre, noted as THA 366 in the above bulletin.
The minor has a liberal arts orientation and includes perspectives from the social sciences, architecture, and history. It is a useful complement to majors such as Geography, History, Sociology, Anthropology, Literature, International Studies, Economics, Political Science, and others. A summer study abroad option in South Africa and Namibia is offered regularly in summer. In addition, it is possible to for a student to study in the spring semester in Cape Town, South Africa (UCape Town Program). The minor is also of particular interest to students in Architecture Communication and Business. Courses in the Minor are taught in the College of Arts & Sciences and the School of Architecture. Note that there are slightly different requirements for ARC students.

1 A minor in Theatre Arts consists of 15 credit hours of Theatre Arts classes with a minimum grade of C- in each course and an overall GPA of 2.0 or above.

Urban Studies
urbanstudies.as.miami.edu

Introduction
The minor in Urban Studies provides undergraduate students with a flexible concentration in interdisciplinary studies of cities, urbanism, and urbanity. Urban Studies is a long established academic field, especially prominent in major cities in the United States. Course work combines a practical focus on Metropolitan Miami with more general attention to urban theory and globalization.

1 All BFA Theatre Management majors are required to manage the front of house aspects of at least one production at the Jerry Herman Ring Theatre per year in sophomore, junior, and senior years.

2 All BFA Theatre Management majors must actively participate in one season subscription renewal campaign at the Jerry Herman Ring Theatre, noted as THA 366 in the above bulletin.
* Other courses may be approved upon request; please consult the program Director, Dr. Richard Grant: rgrant@miami.edu

** A minimum grade of C- with a 2.0 overall GPA are required.
Business
http://www.bus.miami.edu

Introduction
The University of Miami Herbert Business School offers courses leading to the degrees of

• Bachelor of Business Administration (BBA),
• Bachelor of Science in Business Administration (BSBA), and
• Bachelor of Science in Accounting and Finance (BSAF).

Undergraduate degrees in business are administered by the Vice Dean for Undergraduate Business Education.

Mission
The mission of the University of Miami Herbert Business School is to develop innovative ideas and principled leaders that transform global business and society.

Accreditation
The Bachelor of Science in Business Administration and the Bachelor of Business Administration as well as all Accounting programs are fully accredited by AACSB International — The Association to Advance Collegiate Schools of Business.

Academic Policies

Student Responsibilities

• Miami Herbert Business School students are responsible for planning their own academic programs and for meeting degree requirements.
• It is the students’ responsibility to understand fully, and to comply with, all the provisions of this Bulletin and any written changes to their program of study.
• Students are provided assistance by academic advisors and faculty members.
• Deviations from department, program, or school requirements are granted only by written approval from the Vice Dean or, in some cases, the relevant department chairperson.
• A student who is in violation of the provisions of this Bulletin may be administratively withdrawn from a class or classes, dismissed from Miami Herbert Business School, and/or have an electronic hold placed upon future enrollment.
• A student who is disruptive in class as determined by assigned faculty and the Vice Dean will be administratively dropped from the class.
• Information regarding appeal procedures and special requests relative to academic matters is available in Merrick 104, University of Miami Herbert Business School, Office of Undergraduate Business Education.

Admission to Miami Herbert Business School
Admission to the University for undergraduate study as a new freshman is sufficient for admission to Miami Herbert Business School prior to matriculation. However, strong quantitative skills are typically needed for success. Students who do not matriculate into Miami Herbert Business School in their first semester of study at the University may request an internal transfer to Miami Herbert Business School thereafter only according to the policies and procedures set out in the subsection below titled 'Internal Transfer to Miami Herbert Business School.'

Transfer Admission to Miami Herbert Business School
Transfer applicants from outside the University of Miami must submit a satisfactory academic record in compliance with the standards of the University of Miami Office of Admission. Admitted applicants will be in good academic standing at all institutions previously attended and have a minimum transfer cumulative grade point average (GPA) of 3.0. All previous transfer courses must be from an accredited institution, and a minimum grade of ‘C’ (2.0) must be earned in all transfer courses for UM credit to be awarded. This includes repeated courses under a forgiveness policy at any previous institution. Credit hours more than 12 years old are not recognized for degree purposes.

All transfer students to Miami Herbert Business School must have completed and received college credit for a calculus course equivalent to either MTH 161 (4 credit hours) or MTH 140/MTH 141 (8 credit hours), and earned a grade of “B” or better in the (se) course(s). The transfer calculus course must be approved by submitting the syllabus and textbook title to the University of Miami Department of Mathematics for evaluation.

All transfer coursework taken outside the University of Miami will be reviewed on a course-by-course basis for equivalency to Miami Herbert Business School course requirements. Any business class that is from a non-AACSB accredited institution will be accepted only as elective credit toward the overall degree requirements. Transfer applicants may appeal to have transfer classes from non-AACSB accredited institutions reviewed for possible application toward business course requirements by submitting the course syllabus and textbook title to the Office of Undergraduate Business Education.

A transfer student’s overall coursework must also meet specific curricular and residency requirements. Pursuant to Miami Herbert Business School policy, transfer students must complete a minimum of 50 percent of the Business Core at the University of Miami. Transfer students must also complete a minimum of 50 percent of all major and a minimum of 50 percent of all minor courses at the University of Miami. University Residency and other requirements, applicable to all students, are set out below in the section headed Requirements for Graduation.

Internal Transfer to Miami Herbert Business School
Students seeking internal transfer to Miami Herbert Business School from other Schools and Colleges must have a minimum of three full semesters (45 credits) remaining after transfer to MBS, within which to complete degree requirements, and must meet the following conditions prior to making a formal internal transfer request:

• an earned grade of ‘B’ or better in MTH 161 (4 credit hours) or MTH 151 (5 credit hours) or MTH 140 and MTH 141 (8 credit hours). If a student does not initially earn a ‘B’ or better in the calculus course, the student may repeat the calculus course to try to satisfy the required minimum ‘B’ grade. The second grade will be considered for purposes of meeting the criteria to transfer to Miami Herbert Business School. For information on repeated courses and grades, please refer to the University Policies on Repeat Rules. (p. 16)
• an earned minimum cumulative UM GPA of 3.0.
• documented attendance at a mandatory ‘Transfer to Miami Herbert Business School information Session’ offered at least monthly in fall and spring semesters (schedule available at reception in Merrick Building Room 104).
Academic Progress, Probation, and Dismissal

When a student's semester or cumulative GPA is below 2.0, or progress toward degree completion is unsatisfactory, the student will be warned, placed on academic probation, or dismissed in accordance with the University's or Miami Herbert Business School's policies and procedures:

- Warning: semester GPA lower than 2.0 but cumulative GPA above 2.0
- Probation: cumulative GPA lower than 2.0
- Probation with Dismissal: two consecutive semesters with cumulative GPA lower than 2.0, or failure to make progress toward degree completion
- Failure to make progress toward degree completion includes, but is not limited to:
  - failure to complete enough credit hours in the business degree program to graduate after ten regular semesters of enrollment.
  - failure to maintain a GPA sufficiently high to permit graduation in the ordinary course with the minimum 2.5 GPA.
  - failure in any business course the student repeats pursuant to the University's General Repeat Rule (p. 16) or otherwise.
  - failure to pass the required calculus course (MAS 110 or MTH 161 for the BBA degree, MTH 161 for the BSBA degree) by the fourth semester.
- A student on probation is not permitted to enroll in more than four courses (no more than 13 credit hours) and may have an electronic hold placed upon future enrollment until grades for work-in-progress are reviewed by the Undergraduate Business Education Academic Standards Committee.
- A student who is dismissed for failure to satisfactorily complete required business core courses, or for failure to make progress toward the degree, may not automatically be dismissed from the University. Accordingly, such a student may apply to another School or College within the University, and if accepted, may continue as an undergraduate student at the University of Miami. For such a student who is not accepted by another School or College, dismissal from Miami Herbert Business School may have the incidental effect of dismissal from the University of Miami as well.

University Repeat Rule at Miami Herbert Business School

The University's rules regarding repeating courses may be viewed in the General University Information pages of this Bulletin, which explain the University Policies on Repeat Rules (p. 16). The following policy is applied specifically to business students taking advantage of the University's Repeat Rule:

- The summer sessions are not counted as semesters, either individually or together, in determining the last semester in which a student may elect to repeat a course in which a "D" or "F" grade is earned under the University Repeat policy.
- A student who wishes to take advantage of the University Repeat Rule policy must complete a Repeat Rule Request Form, which is available from the student's academic advisor in Miami Herbert Business School, Office of Undergraduate Business Education. For additional information about the application of the Repeat Rule in Miami Herbert Business School, consult an academic advisor in the Office of Undergraduate Business Education.

Readmission

The requirements for readmission may be viewed in the Student Status - Readmission (p. 54) section of this Bulletin. The following special conditions related to readmission are also in effect for Miami Herbert Business School:

- A student requesting readmission, who was previously dismissed for academic reasons or who had below a 2.0 cumulative GPA, must present adequate evidence that the conditions and/or factors that caused the prior poor academic performance have changed sufficiently and that there is a reasonable expectation of satisfactory performance if the student is permitted to resume study at Miami Herbert Business School.
- A student dismissed for nonacademic reasons must provide written authorization from the Dean of Students' Office before re-enrollment will be permitted.
- A business student who did not earn at least a C grade in MTH 161 will not be readmitted to Miami Herbert Business School.
- A student seeking readmission may have conditions placed upon any such readmission. Failure to satisfactorily accomplish the stated conditions may result in dismissal or the student otherwise not being permitted to register for future semesters.

Changes to Academic Requirements

Miami Herbert Business School reserves the right to change academic requirements including course offerings, minimum grade requirements, and minimum required grade point averages, to ensure that students are receiving the latest knowledge and are maintaining the standards necessary to be professionally competitive. Changes are communicated to students either by written or electronic notice, or personally by their academic advisors.

Residency and Graduation Requirements

In addition to meeting the graduation requirements as set out in Degree Programs, below, a candidate for either the BBA or BSBA degree must complete the last 45 credit hours consecutively and exclusively in degree-seeking status in residence at Miami Herbert Business School, University of Miami. Credit by examination may not be used to meet the residency requirement. In addition, a minimum of 120 credit hours is required for graduation, not including ENG 103, TAL 191, MTH 099, or any UMI Internship course. The student's last 56 credit hours must be completed at a four-year institution.

After being admitted to the University of Miami, students must complete all business coursework in residence, including coursework required by the Business Core and specific coursework for the business major and minor areas of specialization. This policy applies equally to non-business students completing minor areas of specialization at Miami Herbert Business School. Any appeal for an exception to this policy must be submitted in writing to the Office of Undergraduate Business Education.

Grade Point Average (GPA)

To graduate, business students must earn a minimum cumulative grade point average (GPA) of 2.5 in all undergraduate courses taken (combined UM and transfer coursework) and must also earn a minimum cumulative GPA of 2.5 in all undergraduate courses taken at the University of Miami. (See the General University Information page in this Bulletin regarding
Degrees (p. 50.) Each major for the BBA or BSBA degree and/or minor area of specialization within Miami Herbert Business School requires a minimum 2.5 cumulative GPA in the specific coursework required for the major/minor area of specialization. The minimum grade for individual courses in the major/minor area of specialization may vary, but is specified for each major and minor. Students are responsible for understanding the minimum GPA requirements for their proposed major/minor area(s) of specialization.

Degree Programs
Bachelor of Business Administration (BBA)

All BBA students must complete areas A, B, C, D, and E as listed below. All courses, except some of those in area D, must be taken for graded credit. (See the General University Information page in this Bulletin regarding Credit Only Option (p. 50.).)

A. University of Miami’s General Education Requirements

Miami Herbert Business School participates in the University’s General Education requirements (p. 48). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University’s general education Areas of Proficiency: Written Communication Skills (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (MAS 110 or any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University’s general education distribution requirements in three Areas of Knowledge: Arts & Humanities (A&H), People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM).

Every BBA student must complete a cognate designated Arts & Humanities (A&H) outside Miami Herbert Business School. Additionally, each business major and minor area of specialization fulfills either the People & Society (P&S) Area of Knowledge or the Science, Technology, Engineering & Mathematics (STEM) Area of Knowledge. For specific information about majors/minors and Area of Knowledge designations, please refer to the chart of Majors and Minors for the BBA Degree that follows or the relevant Academic Bulletin page for each major/minor area of specialization.

Depending on the Area of Knowledge of the student’s major(s) and any minor(s), an additional cognate in either People & Society (P&S) or Science, Technology, Engineering, and Mathematics (STEM) Area of Knowledge. For specific information about majors/minors and Area of Knowledge designations, please refer to the chart of Majors and Minors for the BBA Degree that follows or the relevant Academic Bulletin page for each major/minor area of specialization.

Miami Herbert Business School’s program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic Written Communication Skills courses, ENG 105 and ENG 106, BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required either to repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C- before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BBA degree requirements upon successful completion of MAS 110 or MTH 161 (or a MTH 161 equivalent).

Total Credit Hours 51

NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements (p. 48). Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

NOTE: MAS 110/MTH 161 and MAS 201 must be completed with a “C-” or better.

C. Major and Minor Areas of Specialization - Requirements

All BBA students must complete at least one major area of specialization in the Miami Herbert Business School. Additionally, students may elect to complete a minor area of specialization either at Miami Herbert Business School or in another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for the major and minor areas of specialization are specified by each academic department. Every course completed in satisfaction of either a major or minor area of specialization must be taken for a grade and a grade of “C-” or higher earned, unless specified differently by the department. GPA minima for each business area of
specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the major/minor area of specialization.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

Major areas of specialization at Miami Herbert Business School are available only with completion of the required Business Core. A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or 'dual degree' student, must meet the minimum requirements for transfer to Miami Herbert Business School, although the student is not required to formally transfer to Miami Herbert Business School.

- The student must meet with the Assistant Dean for Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
- The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.
- The Office of the Provost completes the final approval of the Dual Degree Memorandum.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

D. Electives (as needed to meet the minimum 120 credit hours)
All undergraduate courses offered by the University may be used as electives, with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student’s cumulative GPA, and credit for the course is included in the student’s overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used as preparation for entrance to medical school must be taken for a grade.

E. International Focus Within the Curriculum
At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Bachelor of Science in Business Administration (BSBA)
The BSBA degree at Miami Herbert Business School emphasizes quantitative foundation courses. All BSBA majors at Miami Herbert Business School must complete areas A, B, C, D, and E as listed below. All courses, except some of those in area D, must be taken for graded credit. (See the General University Information page in this Bulletin regarding Credit Only Option (p. 50).)
A. University of Miami’s General Education Requirements

The Miami Herbert Business School participates in the University’s General Education requirements (p. 48). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University’s general education Areas of Proficiency: Written Communication Skills (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (MAS 110 or any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University’s general education distribution requirements in three Areas of Knowledge: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM).

Every BSBA student must complete a cognate designated Arts & Humanities (A&H) outside Miami Herbert Business School. Additionally, each business major and minor area of specialization fulfills either the People & Society (P&S) Area of Knowledge or the Science, Technology, Engineering & Mathematics (STEM) Area of Knowledge. For specific information about majors/minors and Area of Knowledge designations, please refer to the chart of Majors and Minors for the BSBA Degree that follows or the relevant Academic Bulletin page for each major/minor area of specialization.

Depending on the Area of Knowledge of the student’s major(s) and any minor(s), an additional cognate in either People & Society (P&S) or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BSBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

Miami Herbert Business School’s program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic Written Communication Skills courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required to either repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C- before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BSBA degree requirements upon successful completion of MTH 161 (or a MTH 161 equivalent).

Total Credit Hours 62

NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements (p. 48). Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

NOTE: MTH 161 and MAS 311 must be completed with a “C-” or better.

C. Major and Minor Areas of Specialization - Requirements

All BSBA students must complete at least one major area of specialization at Miami Herbert Business School. Additionally, students may elect to complete a minor area of specialization either at Miami Herbert Business School or in another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for the major and minor areas of specialization are specified by each academic department. Every course completed in
satisfaction of either a major or minor area of specialization must be taken for a grade and a grade of "C-" or higher earned, unless specified differently by the department. GPA minima for each business area of specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the major/minor area of specialization.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

Major areas of specialization at Miami Herbert Business School are available only with completion of the required Business Core. A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or 'dual degree' student, must meet the minimum requirements for transfer to Miami Herbert Business School, although the student is not required to formally transfer to Miami Herbert Business School.

- The student must meet with the Assistant Dean for Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
- The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.
- The Office of the Provost completes the final approval of the Dual Degree Memorandum.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

### D. Electives (as needed to meet the minimum 120 credit hours)

All undergraduate courses offered by the University may be used as electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student's cumulative GPA, and credit for the course is included in the student's overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used in preparation for entrance to medical school must be taken for a grade.

### E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

### Bachelor of Science in Accounting and Finance (BSAF)

The BSAF degree at Miami Herbert Business School is intended for quantitatively strong students arriving at the business school with a clear interest in careers in the financial services industry or in corporate.
financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics.

Students must maintain a minimum overall cumulative GPA of 3.0 to remain in the BSAF. Every course completed in satisfaction of the BSAF Business Core Requirements must be taken for a grade and a grade of "C-" or higher earned (except as noted for FIN 302 for which a grade of "B" or higher is required). Students must maintain a minimum cumulative GPA of 3.0 in Finance courses and in Accounting courses. A minimum of 125 credit hours is needed to graduate with the BSAF degree.

A. University of Miami's General Education Requirements

The Miami Herbert Business School participates in the University’s General Education requirements (p. 48). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University's general education Areas of Proficiency. Written Communication Skills (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (MAS 110 or any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University's general education distribution requirements in three Areas of Knowledge: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM).

The coursework contained within the BSAF degree will satisfy the Science, Technology, Engineering, and Mathematics (STEM) Area of Knowledge. Students pursuing the BSAF degree must complete any cognate designated People and Society (P&S) courses, as well as an Arts & Humanities (A&H) cognate. Students must declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

Miami Herbert Business School’s program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic Written Communication Skills courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required to either repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BSAF degree requirements upon successful completion of MTH 161 (or a MTH 161 equivalent).

### Minor Areas of Specialization

C. Major and Minor Areas of Specialization - Requirements

All BSAF students complete the requirements for the Finance major area of specialization and can also complete the requirements for the Accounting major area of specialization within the BSAF degree requirements. Students must maintain a minimum overall cumulative GPA of 3.0 to remain in the BSAF. Every course completed in satisfaction of the BSAF Business Core Requirements must be taken for a grade and a grade of "C-" or higher earned (except as noted for FIN 302 for which a grade of "B" or higher is required). Students must maintain a minimum cumulative GPA of 3.0 in Accounting courses and in Finance courses.

Additionally, students may elect to complete a minor area of specialization either at Miami Herbert Business School or in another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for minor areas of specialization are specified by each academic department. Every course completed in satisfaction of a minor area of specialization must be taken for a grade and a grade of "C-" or higher earned, unless specified differently by the department. GPA minima for each business area of specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the minor area of specialization.

No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than the required credit hours for graduation or more than eight semesters of study for graduation.

Business students may choose to pursue an additional major from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

### Major areas of specialization at Miami Herbert Business School are available only with completion of the required Business Core.

A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or "dual degree" student, must meet the minimum requirements for transfer to Miami Herbert Business School, although the student is not required to formally transfer to Miami Herbert Business School.

- The student must meet with the Assistant Dean for Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
- The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.
- The Office of the Provost completes the final approval of the Dual Degree Memorandum.

### D. Electives (as needed to complete the minimum 125 credit hours)

All undergraduate courses offered by the University may be used as electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student’s cumulative GPA, and credit for the course is included in the student’s overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used in preparation for entrance to medical school must be taken for a grade.
E. International Focus Within the Curriculum
At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Honors
Foote Fellows Honors Program
The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Select incoming students will receive an invitation to the Foote Fellows Honors Program. (p. 47)

Graduation (Latin) Honors
• Students who qualify based on their cumulative GPA (combined UM GPA and transfer course GPA) and class rank will graduate with University Honors: cum laude, magna cum laude, or summa cum laude.
• For details consult an academic advisor in the Office of Undergraduate Business Education and the Office of Academic Enhancement. (https://oae.miami.edu/)

General Business Honors, Miami Herbert Business School
Graduation with General Business Honors requires:
• Completion of all of the requirements of the BSBA degree program; and
• A minimum 3.75 cumulative GPA (combined UM GPA and transfer course GPA) at graduation.

For details, consult an academic advisor in the Office of Undergraduate Business Education.

Departmental Honors in Business
Graduation with Departmental Honors requires:
• A minimum 3.9 GPA in Miami Herbert Business School courses at the end of the junior year; and
• Completion of a 3-credit hour research project during the entire senior year on a topic that is of interest to both the faculty member supervising the research and the student responsible for completing it. The research and written deliverable must be deemed to be of exceptional quality, consistent with the workload of a 3-credit upper level independent study course, and worthy of a designation that is only open to the top 1% of Herbert Business School undergraduates; and
• A minimum 3.9 GPA in all Miami Herbert Business School courses at graduation; and
• Any other requirements, if any, established by the Department granting honors, as set forth in this Academic Bulletin.

Students who major in two distinct areas of specialization may complete their honors research project in the department of either business major specialization.

The 3-credit hour research project class is taken for ‘credit only’ and does not count toward the 120-credit hours required for graduation. Students who begin a research project but do not complete it will be retroactively withdrawn from the research course. Students receive credit for the project only if the work is deemed to be of exceptional quality.

Details related to Departmental Honors are available in the Office of Undergraduate Business Education.

Business Honor Societies
Students may be nominated for or elected into an honor society based on specific criteria. Contact the listed department for additional information.
• Beta Gamma Sigma (Highest Honors in Business) (Undergraduate Business Education (https://www.bus.miami.edu/academic-programs/undergraduate-business-education/))
• Beta Alpha Psi (Department of Accounting (http://www.bus.miami.edu/thought-leadership/academic-departments/accounting/))
• Omicron Delta Epsilon (Department of Economics (http://www.bus.miami.edu/thought-leadership/academic-departments/economics/))

The Bachelor of Science in Accounting and Finance
The BSAF degree (p. 295) at Miami Herbert Business School is intended for quantitatively strong students arriving at the Miami Herbert Business School with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics.

The General Business Program: An Individually-Designed Major for BBA and BSBA Students (People & Society or STEM)
The Individualized General Business major allows students at Miami Herbert Business School to tailor an area of business specialization creatively and to seek and develop connections among the business disciplines in ways that will suit their own academic interests and graduate school or career objectives. Building upon the strong foundation provided by the Business Core, students pursuing this program of study will be motivated to craft a unique business specialization that enhances their ability to respond to and compete in a dynamic economic marketplace.

Any BBA or BSBA degree-seeking student may pursue the customized Individualized General Business major. No additional admission or application is required. The student, however, must consult with his/her Business School academic advisor in order to select the Individualized General Business major. A three-person committee comprised of at least one faculty member and at least one undergraduate business academic advisor will be appointed by the Undergraduate Business Education Committee to oversee the student’s chosen academic program, provide feedback and assistance with course choices, and to connect the student to other relevant faculty or administrators for advice where indicated.

Curriculum for the Individualized General Business Major Area of Specialization
The student who wishes to pursue the BBA or BSBA in General Business must complete:

1. all University general education requirements, unless exempt (e.g. Foote Fellows), and
2. the Business Core requirements for either the BBA or the BSBA, including the international focus course, and
3. a minimum of 18 additional credit hours of upper-level (300-500 level) coursework chosen from among the course offerings of Miami Herbert Business School. The specific coursework selected to satisfy the Individualized General Business major may not be utilized to also satisfy the Business Core or the specific coursework requirements for any other major or minor area of specialization in Business. All coursework must be taken for a grade and within the current prerequisite structure.

A minimum of 120 credit hours is required for graduation. The Individualized General Business major area of specialization may fulfill either the People & Society or the STEM general education Area of Knowledge, based upon the preponderance of the specific coursework pursued and with the approval of the advising committee.

The Global Business Co-Major (People & Society)
The curriculum for the Global Business Co-Major consists of 18 credit hours of required and elective course choices. The Global Business Co-Major is available only to BBA or BSBA students who are also completing another undergraduate business major area of specialization.

Students completing the Global Business Co-Major will:
• Apply interdisciplinary and multidisciplinary approaches, including in relevant cases, foreign language skills, to critical analysis of business topics at the country or regional level.
• Evaluate and apply diverse perspectives to complex issues of comparative and/or global significance, in the face of multiple and sometimes conflicting positions (e.g., cultural, disciplinary, ethical)
• Engage in meaningful interaction with other culture(s) and gain an in-depth understanding of a country and/or region of the world where the student may expect to commence his or her global business career

Curriculum Requirements
Each student will work with an advisor to design an individualized course of study that enhances the student’s global perspective and provides an intellectual framework and immersive environment for studying a new country or region of the world. Each program of study will consist of a minimum of 18 credit hours, including coursework distributed among the following areas:

1. Economics related to the country or region
2. Political or regulatory environment of the country or region
3. Historical/cultural perspective on the country or region
4. Exposure to a language of the country or region, demonstrated by completion of a business course in the language of the region, or if unavailable, completion of a course in the language at the 200 level or above. Where the country or region that is studied is English speaking, the student may complete this requirement by demonstrating language proficiency at the 200 level or above in another language, or by taking an additional course related to economics, political/regulatory environment, or history/culture of the country or region.
5. One international/global focused upper level business elective, outside the student’s other business major

In order to further advance and integrate his/her regional, functional and pragmatic expertise, and to hone the student’s global mindset, there is a required Experiential Learning component.

- students must complete a learning experience in the country or region (i.e. study abroad).
- students must complete an approved international internship.
- students’ participation will be encouraged in any MBS Immersion Course that is offered for undergraduates in the region studied. These may take the form of summer or spring break study.
- students’ participation in programming on and off campus related to their region and career track will be encouraged and facilitated.

### The Global Business Studies Program: Latin America (People & Society)

The Global Business Studies Program (http://www.bus.miami.edu/academic-programs/undergraduate-business-education/special-programs/global-business-studies.html) is a co-major option available for incoming Miami Herbert Business School freshmen, who apply and are selected as GBS Scholars/Foote Fellows. Students in the program simultaneously pursue a major in a functional area of business and, in the co-major, region-specific global studies coursework.

Curriculum for Co-major in Global Business Studies (21-27 credit hours)

1. Introduction to the region (3 credit hours)
2. Demonstrated proficiency in the language of the region, or where this is not feasible, at least one language course at the 200 level or above (min. 3 credit hours) Students may demonstrate language proficiency by completing business coursework delivered in the language of the region selected.
3. Economics of the region (3 credit hours)
4. Political and/or Regulatory Environment of the region (3 credit hours)
5. History of the region (3 credit hours)
6. Introduction to International Business (Standard course is MGT 349. Recommended alternatives: MGT “Doing Business in [the Region]” where available, or other approved business course in-country) (total of 3 credit hours)
7. Seminar & Senior Thesis (6 credit hours)
8. Culminates in a written research paper examining a significant problem or proposal for a particular country, approached from an interdisciplinary standpoint
9. Carried out under the supervision of one or more faculty members
10. Oral presentation of the student’s findings and recommendations also required
11. Required internship or directed study in-country may allow for field research

8. Minimum of one semester “study abroad” in the studied region is required.
   - Students may choose to satisfy the co-major’s economics and/or history and/or politics/regulation course requirement in-country.

GBS Scholars are also invited to participate in a wide array of co-curricular activities, intentionally designed to enhance the Global Business Studies co-major. These include a faculty-led, international travel course in the summer following freshman year and cultural activities and events throughout the program, curated by the GBS Academic Program Director.

Please note that any student who does not complete these curricular and co-curricular requirements, or who is unable to maintain a cumulative GPA of 3.5, will be asked to exit the program and co-major.

### International Business Minor Area of Specialization (People & Society)

The International Business minor provides Miami Herbert Business School students an interdisciplinary perspective of international business to augment their studies in other areas of business specialization. The International Business minor may not be taken by students pursuing the International Finance and Marketing major or by non-business students. Students must complete all pre-requisite courses before enrolling in required International Business minor courses.

The International Business minor consists of 12 credit hours as follows:

<table>
<thead>
<tr>

Total Credit Hours 12

1 All specific coursework for the International Business minor must be completed with a grade of 'C-' or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework in this minor area of specialization.

All courses must be taken within the current pre-requisite structure.

Business Cognates Available to Non-Business Students

Understanding Business (People and Society)
The University of Miami Herbert Business School offers a general business cognate to non-business students: Understanding Business. Completion of this cognate fulfills the University's General Education requirement of a cognate in the Area of Knowledge labeled People & Society (P&S).

This cognate offers students an overview of the business environment with the goal of promoting awareness and understanding of the real-world issues that affect the global economy in the twenty-first century. Courses in the cognate deliver the essential business concepts that enable critical consideration of the questions that confront decision makers in the various functional areas of business. Students declare the cognate via their advisor at their home School or College.

The Understanding Business cognate consists of the following courses:

Business Analytics: Transforming data into insights for better informed decisions (STEM)
Professionals with deep analytical skills are in high demand across a variety of industries and organizations. Business analytics solutions use quantitative analysis to measure past performance and to guide and organization's future business planning. The Business Analytics cognate offers a selection of courses that cover important tools and techniques to help understand and analyze data, predict outcomes, and to improve decision-making in increasingly complex and interconnected business environments. Completion of this cognate fulfills the University's General Education requirement of a cognate in the Area of Knowledge labeled Science, Technology, Engineering, and Math (STEM). Students declare the cognate via their advisor at their home School or College.

Development Economics (People and Society)
The core courses in this cognate, ECO 211 Principles of Microeconomics and ECO 212 Principles of Macroeconomics, introduce the study of the economic behavior of individuals, firms, and markets, as well as the analysis of the economy as a whole, both in terms of short-run fluctuations (the business cycle) and long-run determinants of economic growth. Additionally, the student chooses an elective from a set of courses related to the economic aspects of the development process based on their specific interests. Students completing this cognate will acquire the tools and techniques to analyze and solve economic problems.

**Methods for Economic Analysis (STEM)**

Recommended for students who have completed MTH 130 or Higher.

The core course in this cognate, ECO 211 Principles of Microeconomics, introduces the study of the economic behavior of individuals, firms, and markets. Additionally, students choose two electives from a set of STEM courses based on their specific interests in the areas of mathematical modeling and empirical analysis. Students completing this cognate will acquire the tools and techniques to analyze and solve mathematical economics and econometric problems, and will learn to apply the theory to real-world economic events in their area of interest. Students declare the cognate via their advisor at their home School or College.

Please note that no course may double count for any major, minor, or cognate.

**Minors for Non-Business Students**

Students in other schools and colleges of the University may choose to pursue any of the following minor areas of specialization at Miami Herbert Business School by officially declaring the minor at their home School or College:

**Minor Areas of Specialization**

- Business Law (P&S) (p. 278)
- Business Technology (STEM) (p. 283)
- Economics - Political Economy (P&S) (p. 292)
- Economics - Quantitative Economics (STEM) (p. 293)
- Entrepreneurship (P&S) (p. 332)
- Finance (STEM) (p. 306)
- Health Management and Policy (P&S) (p. 311)
- Management (P&S) (p. 333)
- Marketing (P&S) (p. 344)
- Sustainable Business (p. 294)

Students interested in completing a minor offered by the University of Miami Herbert Business School should consult with an academic advisor in the School or College of their degree/major to determine if a business minor is acceptable. Neither advice nor consent from either the Office of Undergraduate Business Education or the relevant Miami Herbert Business School department is necessary for a student to choose or complete a Miami Herbert Business School minor. Instead the non-business student should simply declare the minor in CaneLink and complete the necessary specific coursework, according to the details listed in the appropriate department's section of this Academic Bulletin and the following supplemental guidelines, which are applicable to all minors unless otherwise provided by the department offering the minor area of specialization:

All courses within the minor must be taken for a grade and completed with a grade of "C-" or higher unless a higher minimum grade is prescribed by the department offering the minor. To be awarded the minor, the student must also achieve a minimum cumulative GPA of 2.5 in all minor courses, unless a higher grade or GPA is prescribed by the department offering the minor, as set out in that department’s section of this Academic Bulletin. All courses taken by the student in the department offering the minor will count toward the GPA in the minor.

**General Overview**

The Foote Fellows Honors Program (p. 47) recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation only.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows
leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is ‘Books That Matter’, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards. The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

To graduate with the Foote Fellows Honors Program distinction, Foote Fellow students must have achieved a minimum GPA of 3.5 at the completion of the final semester.

Eligibility for the Foote Fellows Honors Program transcript distinction for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combined GPA (UM cumulative graduation GPA + Transfer GPA)

**Foote Fellows in Business**

As the best and brightest of each incoming class, Miami Herbert Business School Foote Fellows are afforded the most stimulating academic and co-curricular experiences the School has to offer. They are invited to take part in Foote-only seminars, exclusive workshops on a variety of academic and career-oriented themes, and networking events with some of Miami Herbert Business School’s most honored speakers and guests.

Miami Herbert Business School Foote Fellows enroll in specially-designated sections of selected classes, such as MGT 100, BUS 255, BSL 212, ECO 213, and MKT 201. Business Foote Fellows also enjoy dedicated academic and co-curricular/career advisors, as well as opportunities for unique mentorship by prominent alumni.

**Accounting**

**Department Code:** ACC

**Introduction and Educational Objectives**

The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed upon general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

**Requirements to Become a CPA**

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Note: Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board.

The Florida State Board of Accountancy (BOA) separates the requirements to become a CPA into two parts:

1. Education requirements, which can be viewed here (http://www.myfloridalicense.com/DBPR/certified-public-accounting/education-requirements/).
2. Initial Licensure Requirements, which can be viewed here (http://www.myfloridalicense.com/DBPR/certified-public-accounting/licensure/).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the Florida Department of Business & Professional Regulation website (http://www.myfloridalicense.com/DBPR/certified-public-accounting/) for updates and rules that may apply in particular circumstances.

**Requirements to Sit for the CPA Exam**

To be eligible to take the CPA exam, you must have completed at least 120 credit hours including 24 credit hours of accounting (including taxation, auditing, financial, and cost) at the upper division (300-level or above) and 24 credit hours in upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division. As part of the general business credit hours, applicants are required to have at least 3 credit hours of business law courses. Excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable toward the required credit hours nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting. The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note: you do not have to have a bachelor’s degree in order to sit for the CPA exam.

**Requirements for Licensure**

In addition to passing all four parts of the CPA exam with at least a 75% within an 18 month rolling period, the BOA requires that you have completed a bachelor’s degree plus an additional 30 credit hours for a total of 150 credit hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is also required to become licensed. (This experience may be obtained before or after sitting for the exam; however, all requirements to sit for the exam must be met before the work experience commences.) If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 credit hours must include a minimum of 30 credit hours of accounting courses (including taxation, auditing, financial, and cost/managerial) at the 300-level or above and at least 36 credit hours of general business courses (including 3 credit hours of business law) at the 300-level or above (with some exceptions). Excess upper
division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

**Licensed in Another State**
If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition, if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

**Accreditation**
The Board accepts degrees from schools accredited by the following associations: Middle States Association of Colleges and Secondary Schools, New England Association of Schools and Colleges, North Central Association of Colleges and Secondary Schools, Northwest Association of Schools and Colleges, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association to Advance Collegiate Schools of Business (AACS), and Association of Independent Schools and Colleges who are regulated by the Commission of Independent Education, and Canadian, Mexican, Irish, and Australian academic accounting programs approved by the provincial educational bodies or the equivalent educational accreditation body for that country. If you have graduated from a school or college which is not accredited by the above-mentioned means, then you must use the provisions of F.A.C. 61H1-27.001(5).

**Duplicate Courses**
- No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.
- For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

**The Fifth Year Option**
Many of our graduates satisfy the additional 30 credit hour requirement (to reach the total required 150 hours) for the CPA by continuing on for a fifth year during which time they also can complete the requirements for either the Master of Accounting (MAcc) or Master of Science in Taxation (MST) degree. While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers/CFOs or financial analysts. The MST is designed for students interested in careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. Students interested in these programs should consult with the Program Director in the Department of Accounting.

**Special Programs**
- Accelerated Accounting Programs (p. 267)
- Bachelor of Science in Accounting and Finance (p. 295)
- Five-Year Accounting Program with Senior-Year Internship (p. 272)

**Accelerated Accounting Programs**

**Accelerated Master’s Programs**
In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) in the usual time frame involving one year of full-time study beyond the Bachelor’s level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while in the senior year.

The accelerated programs are available only to students who are undergraduate students at the University of Miami Herbert Business School. The programs are designed in such a way that students can expect to complete both their Bachelor’s and Master’s degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

**Accelerated Program Timeline**
1. Internship in summer after junior year
2. Twelve credit hours of work in senior year will count towards the MAcc or MST degree (only students in the accelerated programs are eligible to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and the CPA exam.
4. Complete remaining credit hours of graduate work in fall semester after senior year.

**Pre-requisites**
The following must be completed before students begin their senior year:
- A minimum of 102 credit hours
- All undergraduate degree requirements except for those that can be completed in the senior year
- FIN 303 before or during senior year (for those students who intend to select the MAcc-Corporate track)
- Note: MGT 401 is usually completed in the final semester of the undergraduate program.
- The following Accounting major requirements must be taken prior to senior year:

<table>

**Total Credit Hours** 15
Senior Year Curriculum (Senior-Graduate Status)

The program-specific curriculum for the senior year is the same for all tracks (except that students selecting the MAcc-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 301</td>
<td>Cost Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACC 404</td>
<td>Advanced Taxation</td>
<td>3</td>
</tr>
<tr>
<td>ACC 406</td>
<td>Accounting Systems</td>
<td>3</td>
</tr>
<tr>
<td>ACC 411</td>
<td>Advanced Accounting</td>
<td>3</td>
</tr>
<tr>
<td>FIN 303</td>
<td>Intermediate Financial Management (or other non-accounting undergraduate course approved by Program Director)</td>
<td>3</td>
</tr>
<tr>
<td>MGT 401</td>
<td>Strategic Management (usually taken in the final undergraduate semester)</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one additional non-accounting undergraduate course approved by the Program Director

Six (6) credit hours of 500-level courses approved by the Program Director

Six (6) credit hours of 600-level courses approved by the Program Director

Total Credit Hours 33

1 Program requirements are subject to change. Not all courses are offered every semester or term. Consult the Program Director for the recommended sequence.

Students must select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

Summer after Senior Year

Students must take one approved graduate course, such as ACC 620, in the summer following their senior year. Students are also REQUIRED to take an approved CPA review course during the summer following their senior year after graduation. Students who do not take a CPA review course must complete an additional six graduate credit hours which will likely delay graduation from December to the following May. Students are expected to pass part, if not all, of the CPA exam during this summer.

Final Fall Semester

In the final fall semester, students will complete the remaining 16 graduate credit hours including the requirements for their track and electives selected in consultation with the Program Director in the Department of Accounting.

Admission to the Accelerated Master's Programs

Incoming Freshmen

- Prospective students may apply to the accelerated program when they apply for admission to the University of Miami.
- SAT Reading and Math combined scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have a cumulative and an accounting major GPA of 3.3 or higher by their junior at the University of Miami. Students must then maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher to remain in the program.
- Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 30 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year including the following:

**NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

To continue as an accounting major, a student must have a minimum cumulative GPA of 3.0 in accounting courses before enrolling in ACC 312. In subsequent coursework specific to the Accounting major area of specialization, including ACC 312, a grade of ’C-' or better is acceptable as long as the overall GPA in the major is a 2.5.

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.
Mission

• To develop innovative ideas and principled leaders that transform global business and society.

Goals

The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting.

Student Learning Outcomes

• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
• BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
• BBA/BSBA graduates will demonstrate professional written communication skills.

### Caveats

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. To continue as an accounting major, a student must have a minimum cumulative GPA of 3.0 in accounting courses before enrolling in ACC 312. In subsequent coursework specific to the Accounting major area of specialization, including ACC 312, a grade of 'C-' or better is acceptable as long as the overall GPA in the major is a 2.5.
### Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

### Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

### Program Timeline
1. Junior Year: Complete an application to the program and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate degree and Accounting major.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

### Pre-requisites
The program is designed for University of Miami Herbert Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401.

### Senior Year Spring Semester Curriculum
In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include two accounting major courses and MGT 401.

### Mission
- To develop innovative ideas and principled leaders that transform global business and society.

### Goals
The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting.

---

**Objectives**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

**Five-Year Accounting Program with Senior-Year Internship**

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

**Program Timeline**

1. Junior Year: Complete an application to the program and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate degree and Accounting major.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

**Pre-requisites**

The program is designed for University of Miami Herbert Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401.

**Senior Year Spring Semester Curriculum**

In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include two accounting major courses and MGT 401.
Summer, Fall, and Spring after Senior Year

In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship

• Students must apply to the program in their junior year and obtain an “approved” internship through the Toppel Career Center.
• The internship must be scheduled to take place during the spring semester of their senior year.
• In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
• By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
• The GMAT will be waived for students admitted into the program.

Minor in Accounting

Minor Area of Specialization in Accounting (People & Society)

The Department of Accounting allows Miami Herbert Business School students to earn a minor in Accounting. The Accounting minor is not available to non-business students or to business students pursuing the BSBA degree.

Curriculum Requirements

Business students who choose to pursue the minor in Accounting must complete the following 9 credit hours of coursework in accordance with the current pre-requisite structure, which includes ‘Junior Status’ and either completion of ACC 211 and ACC 212 or completion of ACC 221 and ACC 222.

<table>

<tr>
<td>ACC 312</td>
<td>Intermediate Accounting II</td>
<td>3</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td></td>
<td>9</td>
</tr>
</tbody>
</table>

1 ACC 211 and ACC 212 or ACC 221 and ACC 222 (or equivalent) are pre-requisites for all other Accounting courses.
2 ACC 311 may be taken concurrently with ACC 222 for BSBA students.
3 To obtain a minor in Accounting a student must have a minimum cumulative GPA of 3.0 in Accounting courses before enrolling in ACC 312. This course has the additional pre-requisite of ACC 311. In all coursework specific to the Accounting minor, a grade of ‘C’ or better is acceptable as long as the overall GPA in the minor is a 2.5.

Business Law

Department Code: BSL

Introduction

The modern manager faces increasing legal implications in daily operations and in formulating business policy. Consequently, effective decision-making requires an appreciation of the social, ethical, economic, and political bases of law as it relates to business. Business law courses provide the student with fundamental insight into legal institutions, the regulatory environment, and the nature of legal discourse, as well as an array of substantive principles of law, including such areas as contracts, sales, business organizations, and domestic and international commercial relationships.

Educational Objectives

The primary goals of the Department of Business Law are to contribute to legal knowledge through conducting scholarly research, to disseminate it by publication in leading journals and law reviews, and to transmit that knowledge to students and the larger University-wide, business, and professional communities.

These goals both inform and drive the Department's educational objectives, which focus on:

• instilling in students a strong sense of the legal and ethical issues permeating business;
• aiding students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
• developing students’ analytical and problem solving ability, as well as their oral and written presentation skills.

Major in Legal Studies

• B.B.A. in Legal Studies (p. 273)
• B.S.B.A. in Legal Studies (p. 275)

Minor in Business Law

• Business Law for Business Students (p. 278)
• Business Law for Non-Business Students (p. 278)

B.B.A. in Legal Studies

The Bachelor of Business Administration (BBA) with a major area of specialization in Legal Studies is intended to enhance the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Legal Studies must complete
the BBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular 'Area of Knowledge' within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of Miami Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

- To instill in students a strong sense of the legal and ethical issues permeating business;
- To aid students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- To develop students’ analytical and problem solving ability, as well as their oral and written presentation skills.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

**B.S.B.A. in Legal Studies**

The Bachelor of Science in Business Administration (BSBA) with a major area of specialization in Legal Studies is intended to enhance the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Legal Studies must
complete the BSBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

**Total Credit Hours**: 120

1. **NOTE**: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major in Legal Studies must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be completed within the current pre-requisite structure.
Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular 'Area of Knowledge' within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

- To instill in students a strong sense of the legal and ethical issues permeating business;
- To aid students' comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- To develop students' analytical and problem solving ability, as well as their oral and written presentation skills.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
Minor in Business Law for Business Students

Minor Area of Specialization in Business Law (People & Society)

The Business Law minor is flexible, permitting students to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student's chosen corporate, creative, scientific, academic, professional, or personal endeavors. Students in the Miami Herbert Business School pursue the minor in Business Law by officially declaring the minor and by completing the coursework identified on the Curriculum tab.

Curriculum Requirements

Business Students

The 12-credit-hour minor in Business Law for Business School students consists of the following (all courses must be completed within the current pre-requisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSL 212</td>
<td>Introduction to Business Law (part of the Business Core for Business students; pre-requisite for all other BSL courses)</td>
<td>3</td>
</tr>
<tr>
<td>BSL 485</td>
<td>Managing the Legal Factor (required in the student's final semester)</td>
<td>3</td>
</tr>
</tbody>
</table>

Choice Courses for the Minor

Select two courses (6 credit hours) from the following:

- BSL 304 Corporate Law
- BSL 305 Legal and Social Aspects of Business Regulation
- BSL 306 Introduction to Corporate Sustainability
- BSL 324 Negotiation
- BSL 333 Legal Aspects of Real Estate Transactions
- BSL 401 The Law of Financial Transactions
- BSL 412 International Business Law
- BSL 424 Intellectual Property Law
- BSL 435 Law of Entrepreneurship
- BSL 460 Health Care Law and Ethics
- BSL 476 The Law of Risk
- BSL 498 Special Topics in Business Law
- BSL 499 Special Topics in Business Law

Total Credit Hours 12

NOTE: All specific coursework for the minor in Business Law must be completed with a grade of 'C-' or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Business Law for Non-Business Students

Minor Area of Specialization in Business Law (People & Society)

The Business Law minor is flexible, permitting students to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student's chosen corporate, creative, scientific, academic, professional, or personal endeavors. Non-Business students pursue the minor in Business Law by officially declaring the minor at their home school or college and by completing the coursework identified below. Interested students, before declaring the minor, should consult with an academic advisor in the School or College of their degree major to determine if the minor in Business Law is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Law Department is necessary.

Curriculum Requirements

Non-Business Students

The 12-credit-hour minor in Business Law for non-business students consists of the following (all courses must be completed within the current pre-requisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS 202</td>
<td>Introduction to the Legal Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

Choice Courses for the Minor

Select three courses (9 credit hours) from the following:

- BSL 304 Corporate Law
- BSL 305 Legal and Social Aspects of Business Regulation
- BSL 306 Introduction to Corporate Sustainability
- BSL 324 Negotiation
- BSL 333 Legal Aspects of Real Estate Transactions
- BSL 401 The Law of Financial Transactions
- BSL 412 International Business Law
- BSL 424 Intellectual Property Law
- BSL 435 Law of Entrepreneurship
- BSL 460 Health Care Law and Ethics
- BSL 476 The Law of Risk
- BSL 498 Special Topics in Business Law
- BSL 499 Special Topics in Business Law

Total Credit Hours 12

NOTE: All specific coursework for the minor in Business Law must be completed with a grade of 'C-' or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.
Business Technology

Department Code: BTE

Introduction

The Department of Business Technology serves the University as the focus for employing business technology and information management in the efficient solution of the entire range of business problems.

Today's business and government organizations rely heavily upon information management for efficient administration and management. Collection, storage, and retrieval of data by computers are involved in the wide range of business activities including daily operations, management decision-making, and long-range planning. As the dependence of management on business technology grows, so does the need for business technology specialists. The courses and degree programs are described below.

Educational Objectives

The Business Technology major is designed to provide the student with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

The Department also co-supervises the Minor in Financial Technology (Fintech) (p. 306). This 12-credit-hour minor is for Miami Herbert Business School students who wish to better understand the delivery and use of financial services through use of technological innovation and automation of the financial sector. The Fintech minor combines classes in both Finance and Business Technology and prepares students for careers in the broader Fintech industry.

Major in Business Technology

• B.B.A. in Business Technology (p. 279)
• B.S.B.A. in Business Technology (p. 281)

Minors in Business Technology and Financial Technology

• Business Technology (p. 283)
• Financial Technology (Fintech) (p. 306)

B.B.A. in Business Technology

Curriculum Requirements

Major Area of Specialization in Business Technology (STEM)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Business Technology must complete the BBA Business Core and the specific coursework for the Business Technology major area of specialization as follows:

Financial Technology (Fintech) (p. 306)

This 12-credit-hour minor is for Miami Herbert Business School students who wish to better understand the delivery and use of financial services through use of technological innovation and automation of the financial sector. The Fintech minor combines classes in both Finance and Business Technology and prepares students for careers in the broader Fintech industry.
Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td></td>
<td>120</td>
</tr>
</tbody>
</table>

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major in Business Technology must be completed with a grade of "C-" or higher. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

   All courses must be completed within the current pre-requisite structure. Each course may satisfy a requirement in only one major or minor area of specialization (i.e., no double counting).

or MKT 301 | Marketing Foundations

Quantitative Choice - Select one of these suggested courses approved by the academic advisor - check pre-requisites.

Mission

• To develop innovative ideas and principled leaders that transform global business and society.

Goals

The Business Technology major is designed to provide the student with the key information technology and management skills needed in today’s business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

Student Learning Outcomes

• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
• BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
• BBA/BSBA graduates will demonstrate professional written communication skills.

**BTE 565**: Mobile to Cloud: Developing Distributed Applications (pre-requisite BTE 320 & BTE 324)

**BTE 571**: AI Programming for Business Management

Total Credit Hours: 120

**NOTE**: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

All specific coursework for the major area of specialization in Business Technology must be completed with a grade of "C+" or higher. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be completed within the current pre-requisite structure. Each course may satisfy a requirement in only one major or minor area of specialization (i.e., no double counting).

**Sample Plan of Study**

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami School of Business and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the School of Business.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

The Business Technology major is designed to provide the student with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

**Minor in Business Technology**

Minor Area of Specialization in Business Technology (STEM)

Miami Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Business Technology by officially declaring the minor at their home school or college and completing the coursework specified below. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Business Technology is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Technology Department is necessary.
**Curriculum Requirements**

The 12-credit-hour minor in Business Technology consists of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BTE 320</td>
<td>Introduction to Programming</td>
<td>3</td>
</tr>
<tr>
<td>BTE 412</td>
<td>Foundations of Business Enterprise Technologies</td>
<td>3</td>
</tr>
</tbody>
</table>

**Choice Courses for the Minor**

Select two courses (6 credit hours) from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BTE 324</td>
<td>Object-Oriented Programming (pre-requisite BTE 320)</td>
<td>3</td>
</tr>
<tr>
<td>BTE 360</td>
<td>Systems Analysis and Design</td>
<td></td>
</tr>
<tr>
<td>BTE 389</td>
<td>Launching High Technology Ventures</td>
<td></td>
</tr>
<tr>
<td>BTE 400</td>
<td>Web-Mobile-Cloud (pre-requisite BTE 320)</td>
<td></td>
</tr>
<tr>
<td>BTE 401</td>
<td>Computers in an Inter-Networked Society</td>
<td></td>
</tr>
<tr>
<td>BTE 413</td>
<td>Big Data Strategy</td>
<td></td>
</tr>
<tr>

<td>Business Technology Internship</td>
<td></td>
</tr>
<tr>
<td>BTE 565</td>
<td>Mobile to Cloud: Developing Distributed Applications (pre-requisite BTE 320 &amp; BTE 324)</td>
<td>3</td>
</tr>
</tbody>
</table>

1 All courses must be completed within the current pre-requisite structure. Each course may satisfy a requirement in only one major or minor area of specialization (i.e., no double counting).

**Note:** All specific coursework for the minor in Business Technology must be completed with a grade of “C-” or better. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

---

**Economics**

**Department Code:** ECO

**Introduction and Educational Objectives**

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

A student pursuing the Economics major or minor area of specialization will select one of two possible options: Political Economy (People and Society) or Quantitative Economics (Science, Technology, Mathematics, and Engineering).

The Department also supervises the MBS minor in Sustainable Business, which is designed to provide students with a grounding in the business concepts of sustainability, as well as to offer additional perspectives from the science/technical and policy/social issues fields.

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Students interested in pursuing the Master of Science in Sustainable Business or a Doctor of Philosophy in Economics (p. 724) may seek additional information from the Department of Economics.

---

**Major in Economics**

- B.B.A. in Economics (p. 284)
- B.S.B.A. in Economics (p. 288)

**Minors in Economics**

- Minor in Political Economy for Business Students (p. 291)
- Minor in Political Economy for Non Business Students (p. 292)
- Minor in Quantitative Economics for Business Students (p. 293)
- Minor in Quantitative Economics for Non Business Students (p. 293)
- Minor in Sustainable Business (p. 294)

**B.B.A. in Economics**

Major Area of Specialization in Economics (People & Society or STEM)

Miami Herbert Business School students who wish to pursue the Economics major area of specialization will choose between two tracks:
Political Economy (P&S) or Quantitative Economics (STEM). In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Economics must complete the BBA Business Core and the specific coursework for one of the Economics major tracks as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>

Sample Plans of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular 'Area of Knowledge' within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission
• To develop innovative ideas and principled leaders that transform
global business and society.

Goals
The economics curriculum is designed to give business students an
understanding of economic theory and its application to a wide range of
problems.

Student Learning Outcomes
• BBA/BSBA graduates will be critical thinkers, able to select and apply
appropriate models, tools, and techniques, and frameworks to enable
them to render analytically sound business decisions.
• BBA/BSBA graduates will be able to identify, analyze and resolve
ethical issues in business scenarios.
• BBA/BSBA graduates will demonstrate professional written
communication skills.

B.S.B.A. in Economics
Curriculum Requirements
Major Area of Specialization in Economics (People & Society or STEM)

Miami Herbert Business School students who wish to pursue the
Economics major area of specialization will choose between two options:
Political Economy (P&S) or Quantitative Economics (STEM).
In the Political Economy option, People and Society courses are
predominant. In the Quantitative Economics option, courses in Science,
Technology, Engineering, and Mathematics are predominant.

In addition to satisfying the University General Education Requirements
and Electives, students pursuing the BSBA in Economics must complete
the BSBA Business Core and the specific coursework for one of the
Economics major options as follows:

<table>

**Total Credit Hours:** 120

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for a major area of specialization in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

5. No course may double count in any other major, minor, or cognate. Course pre-requisites vary by course.

**Sample Plans of Study**

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits,
wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

Minor in Political Economy for Non Business Students

Minor Area of Specialization in Political Economy (People & Society)

Curriculum Requirements

Non-Business Students

Interested students should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Political Economy is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Economics department is necessary for a student to choose or complete the Political Economy minor. Instead the non-business student should simply declare the Political Economy minor and complete the required 15 credit hours of Economics courses, according to the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 211</td>
<td>Principles of Microeconomics</td>
<td>3</td>
</tr>

Minor in Quantitative Economics for Non Business Students

Minor Area of Specialization in Quantitative Economics (STEM)

Curriculum Requirements

Non-Business Students

Interested students should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Quantitative Economics is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Economics department is necessary for a student to choose or complete a minor in Quantitative Economics. Instead the non-business student should simply declare the Quantitative Economics minor and complete the required 15 credit hours of Economics courses, according to the following:

<table>

Minor in Sustainable Business

Minor Area of Specialization in Sustainable Business (People & Society)

The 12-credit-hour minor in Sustainable Business is available to both Business and non-Business students alike. Interdisciplinary in nature, the coursework will provide students with a grounding in the business concepts of sustainability, as well as offer additional perspectives from the science/technical and policy/social issues fields. The minor includes a culminating project-based course. Interested students should consult with an academic advisor in the School or College of their degree/major to declare the minor in Sustainable Business.

1 No course may double count in any other major, minor, or cognate. All specific coursework for the minor area of specialization in Sustainable Business must be completed with a grade of “C-” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization. All courses must be taken within the current pre-requisite structure.

2 Many other relevant upper level courses with prerequisites, and Special Topics courses may be available at or offered by other UM Schools and Colleges. These may be approved to satisfy the appropriate ‘Science/Technical’ or ‘Policy/Social Issues’ course requirement, after consultation with the academic advisor.

Finance

Department Code: FIN

Introduction

The Finance major area of specialization is designed to prepare business students for a wide variety of careers. Because finance is focused on
valuing and decision making, it is applicable to virtually every possible type of organization.

The Real Estate major area of specialization is designed for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Educational Objectives

Finance
The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. We study these issues in a variety of contexts and industries.

The three primary areas of finance are financial management, investments, and financial markets and intermediaries. Financial management focuses on how an organization can accomplish its mission. For example, a corporation seeks to create and maintain wealth, and a non-profit organization seeks to improve the world in some way. All organizations want to achieve their mission to the greatest extent possible, and that requires making the best decisions with respect to value. The area of investments studies the purchase and sale of financial securities, such as stocks, bonds, options, and futures from the point of view of an investor. Financial markets are created to facilitate the trading (buying/selling) of financial securities. Financial intermediaries sell claims on themselves to investors, such as stock, life insurance, or a bank deposit. Financial intermediaries then invest the money from such sales in other assets such as loans, real estate, or other financial securities.

Real Estate
The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major area of specialization strengthens ties with important segments of the business community and builds on the University’s strategic strengths in architecture (New Urbanism) and urban planning.

Business students pursuing the major area of specialization in Real Estate should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 251) (For more information, contact the Director of the Urban Studies Program. (http://www.as.miami.edu/urbanstudies/contact/))

Bachelor of Science in Accounting and Finance (BSAF)
The BSAF degree at Miami Herbert Business School is intended for quantitatively strong students arriving at the business school with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics. Specially-designed courses allow for front-loading of accounting and finance courses early in the undergraduate career.

Important Note: To be eligible for any BBA or BSBA major specialization offered by the Finance Department, the following requirements must be met:

- A student must earn a grade of “B” (grade point of 3.0) or higher in FIN 302 (note that a grade of “B-” does not qualify).
- A student must have a cumulative University of Miami GPA of 2.5 or higher before enrolling in FIN 303 or FIN 320.
- All specific coursework for the major area of specialization must be completed with a grade of “C-” or higher (except for the minimum ‘B’ grade required for FIN 302 (http://bulletin.miami.edu/search/?P=FIN%20302/)), as noted).
- A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

Majors in Finance, International Finance and Marketing, and Real Estate

- B.S. in Accounting and Finance (p. 295)
- B.B.A. in Finance (p. 298)
- B.S.B.A. in Finance (p. 299)
- B.B.A. in International Finance and Marketing (http://bulletin.miami.edu/undergraduate-academic-programs/business/international-finance-marketing-bba/)
- B.S.B.A. in International Finance and Marketing (http://bulletin.miami.edu/undergraduate-academic-programs/business/international-finance-marketing-bsba/)
- B.B.A. in Real Estate (p. 301)
- B.S.B.A. in Real Estate (p. 303)

Minors in Finance, Financial Technology, and Real Estate

- Finance (p. 306)
- Financial Technology (Fintech) (p. 306)
- Real Estate (p. 306)

B.S. in Accounting and Finance

The Bachelor of Science in Accounting and Finance (STEM)
The Bachelor of Science in Accounting and Finance degree at Miami Business School is intended for quantitatively strong students arriving at the business school with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics.

Students must maintain a minimum overall cumulative GPA of 3.0 to remain in the BSAF. Every course completed in satisfaction of the BSAF Business Core Requirements must be taken for a grade and a grade of “C-” or higher earned (except as noted for FIN 302 for which a grade of “B” or higher is required). Students must maintain a minimum cumulative GPA of 3.0 in Accounting courses and in Finance courses. A minimum of 125 credit hours is needed to graduate with the BSAF degree.

Curriculum Requirements

In addition to satisfying the University General Education Requirements, students pursuing the BSAF in Accounting and Finance must complete the BSAF Business Core and the specific coursework as follows:

<table>

Total Credit Hours 125

1. NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. Students must maintain a minimum overall cumulative GPA of 3.0 to remain in the BSAF. Every course completed in satisfaction of the BSAF Business Core Requirements must be taken for a grade and a grade of “C+” or higher earned (except as noted for FIN 302 for which a grade of “B” or higher is required). Students must maintain a minimum cumulative GPA of 3.0 in Finance courses and Accounting courses. A minimum of 125 credit hours is needed to graduate with the BSAF degree. All courses must be taken within the current pre-requisite structure.

5. Students who wish to change from the BSAF to the BBA or BSBA after completing ACC 223 will receive credit for ACC 211 and must complete ACC 212 to satisfy the BBA or BSBA business core requirements. Students who wish to change from the BSAF to the BBA or BSBA after completing ECO 213 will receive credit for ECO 211 and must complete ECO 212 to satisfy the BBA or BSBA business core requirements. Conversely, BSAF students who have completed both ECO 211 and ECO 212 do not need to complete ECO 213, and BSAF students who have completed both ACC 211 and ACC 212 do not need to complete ACC 223.

6. Excluding FIN 300 and FIN 308.

7. The menu of Data Analytics courses will be periodically assessed by the Undergraduate Business Education Committee to ensure that it remains current and relevant.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, other plan variations are
possible if a student enters the University with advanced college credits, wishes to participate in study abroad, participates in the Foote Fellow program, or selects additional cognates or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University and therefore a separate cognate in these areas would not be required. Business School students are required to satisfy the Arts and Humanities Area of Knowledge by completing a cognate, minor, or major through another School or College at the University.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

The mission of the Miami Business School (MBS) is to develop innovative ideas and principled leaders that transform global business and society. Consistent with that mission, the proposed Bachelor of Science in Accounting and Finance (BSAF) is designed for quantitatively strong students arriving at the MBS with a clear interest in careers in the financial services industry or in corporate financial management. This program addresses the growing demand from recruiters for students with a strong background in finance, accounting, and data analytics. By allowing students to focus on finance, accounting, and data analytics early, this program provides students with the background necessary to secure valuable internships and excel in them, leading to a broader set of career opportunities.

Goals

First destinations of graduating seniors (i.e., job placement or graduate school) and student satisfaction rates will be used as program performance metrics. The first program goal is to have at least 90% of students with a secure first destination by six months after graduation. The second goal is for the mean of BSAF graduates’ responses to reflect at least 90% of students reporting satisfaction level of “Generally Satisfied” or above.
Student Learning Outcomes

- BSAF graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BSAF graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BSAF graduates will demonstrate professional written communication skills.
- BSAF graduates will have strong technical skills.

|     |                                               |              |
|     | Note: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300. In order to pursue a major in Finance, a student must earn a grade of 'B' (grade point of 3.0) or higher in FIN 302 (note that a grade of 'B-' does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320. All specific coursework for the major area of specialization in Finance must be completed with a grade of 'C-' or higher (except for the minimum 'B' grade required for FIN 302, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure. Students are strongly encouraged to take FIN 303 and FIN 320 during the same semester. Excluding FIN 300 and FIN 308. |

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.
Note that each major/minor at the University of Miami satisfies a particular 'Area of Knowledge' within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

The Finance major area of specialization is designed to prepare business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

</tbody>
</table>

### Total Credit Hours

<table>
<thead>
<tr>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>120</td>
</tr>
</tbody>
</table>

---

**NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

In order to pursue a major area of specialization in Real Estate, a student must earn a grade of 'B' (grade point of 3.0) or higher in FIN 302 (note that a grade of 'B-' does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

All specific coursework for the major in Real Estate must be completed with a grade of 'C' or higher (except for the minimum 'B' grade required for FIN 302, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.

The pre-requisite for FIN 348 is FIN 347.

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general
education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of Miami Herbert Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

</table>

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

The Real Estate major area of specialization is designed for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

**B.S.B.A. in Real Estate Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Real Estate must complete the BSBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

</tbody>
</table>

1 NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2 At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3 Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4 In order to pursue a major area of specialization in Real Estate, a student must earn a grade of ‘B’ (grade point of 3.0) or higher in FIN 302 (note that a grade of ‘B’ does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.
All specific coursework for the major area of specialization in Real Estate must be completed with a grade of 'C-' of higher (except for the minimum 'B' grade required for FIN 302, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.

The pre-requisite for FIN 348 is FIN 347.

BSBA in Real Estate - Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

- To develop innovative ideas and principled leaders that transform global business and society.
Goals
The Real Estate major area of specialization is designed for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

Minor in Finance
Minor Area of Specialization in Finance (STEM)
Miami Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue a minor in Finance by officially declaring the minor at their home school or college. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Finance is acceptable. If so, neither the advice nor the consent of either the Office of Undergraduate Business Education or the Finance Department is necessary.

Curriculum Requirements
The 12-credit-hour minor in Finance consists of the following (all courses must be taken within the current pre-requisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 302</td>
<td>Fundamentals of Finance (part of Business Core for Business students)</td>
<td>3</td>

<tr>
<td>FIN 303</td>
<td>Intermediate Financial Management ¹,²</td>
<td>3</td>
</tr>
<tr>
<td>FIN 320</td>
<td>Investment and Security Markets ¹</td>
<td>3</td>
</tr>
</tbody>
</table>

Choice Course for the Minor
Select one course (3 credit hours) at the 300 or 400 level from Finance departmental offerings. ³ 3

Total Credit Hours 12

¹ Pre-requisite is FIN 302
² Pre-requisites are FIN 302 and FIN 320
³ Pre-requisites are FIN 302 AND FIN 303 OR FIN 320

* NOTE: All specific coursework for the minor in Finance must be completed with a grade of 'C-' or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Financial Technology
Minor Area of Specialization in Financial Technology (STEM)
The minor in Financial Technology (Fintech) is for Miami Herbert Business School students who wish to better understand the delivery and use of financial services through use of technological innovation and automation of the financial sector. The Fintech minor combines classes in both Finance and Business Technology and prepares students for careers in the broader Fintech industry.

Curriculum Requirements
The 12-credit-hour minor in Financial Technology consists of the following (all courses must be taken within the current pre-requisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 302</td>

<tr>
<td>FIN 410</td>
<td>Financial Institutions and Markets ²</td>
<td>3</td>
</tr>
<tr>
<td>FIN 418</td>
<td>Fundamentals of Fintech ³</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 12

¹ Pre-requisite is FIN 302
² Pre-requisites are FIN 302 and FIN 320
³ Pre-requisites are FIN 302 AND FIN 303 OR FIN 320

* NOTE: All specific coursework for the minor in Financial Technology must be completed with a grade of ‘C’ or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Real Estate
Minor Area of Specialization in Real Estate (STEM)
The Miami Herbert Business School’s Real Estate minor is for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The Real Estate minor strengthens ties with important segments of the business community.
Curriculum Requirements

The Real Estate minor consists of the following classes:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 302</td>
<td>Fundamentals of Finance (taken as part of the Business Core for Business students)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 303</td>
<td>Intermediate Financial Management (pre-requisite FIN 302)</td>
<td>3</td>
</tr>
<tr>
<td>or FIN 320</td>
<td>Investment and Security Markets</td>
<td></td>
</tr>
<tr>
<td>FIN 344</td>
<td>Real Estate Investment Analysis (pre-requisite FIN 302 &amp; pre- or co-requisite FIN 303 or FIN 320)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 445</td>
<td>Real Estate Finance (pre-requisite FIN 344)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 446</td>
<td>Real Estate Market Analysis (pre-requisite FIN 344)</td>
<td>3</td>
</tr>
</tbody>
</table>

The following one-credit hour courses are strongly recommended, though not required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 347</td>
<td>Introduction to ARGUS (pre-requisite FIN 302)</td>
<td></td>
</tr>
<tr>
<td>FIN 348</td>
<td>Advanced ARGUS (pre-requisite FIN 347)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours 15

* NOTE: All specific coursework for the minor in Real Estate must be completed with a grade of 'C-' or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Health Management and Policy

Department Code: HMP

Introduction

The Health Management and Policy major area of specialization is designed for Miami Herbert Business School students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings. The curriculum enables students to gain skills and understanding in the specialized language of health care and to comprehend concepts of management, financing, politics, law, and ethics as applied to the health care sector. The major area of specialization is also ideal for students aspiring to earn advanced degrees in health administration, health economics, medical sociology, public health, or law.

Educational Objectives

The purpose of the major area of specialization in Health Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry. Appropriate candidates for the major area of specialization in Health Management and Policy include Miami Herbert Business School students interested in exploring the health care sector, working in the legal, management, or policy-making aspects of the health care sector or those wanting to have an augmentation to their pre-med, pre-law or pre-MBA, MPA or MPH studies, as well as those who expect to pursue a Ph.D. The minor area of specialization in Health Management and Policy is available to students from all University of Miami schools and colleges. Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers.

Major in Health Management and Policy

- B.B.A. in Health Management and Policy (p. 307)
- B.S.B.A. in Health Management and Policy (p. 309)

Minor in Health Management and Policy

- Health Management and Policy (p. 311)

B.B.A. in Health Management and Policy

Curriculum Requirements

Major Area of Specialization in Health Management and Policy (People & Society)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Health Management and Policy must complete the BBA Business Core and the specific coursework for the Health Management and Policy major area of specialization as follows:

<table>
<thead>

### NOTE 1:

ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

### NOTE 2:

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

### NOTE 3:

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

### NOTE 4:

All specific coursework for the major area of specialization in Health Management and Policy must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

### NOTE 5:

No one course may count toward more than one major or minor area of specialization.

### NOTE 6:

Students may not take both HMP 350 and ECO 386.

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.
Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

The purpose of the major area of specialization in Health Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

### Quantitative Choice - Select one of these suggested courses approved by the academic advisor - check pre-requisites:

- BTE 324: Object-Oriented Programming
- BTE 423: Database Management Systems
- ECO 430: Applied Econometrics
- ECO 510: Mathematical Economics and Applications
- MAS 342: Introduction to Optimization and Decision Making
- MAS 442: Stochastic Models in Operations Research
- MAS 547: Computer Simulation Systems
- MGT 445: Supply Chain Modeling and Analysis
- MGT 446: Supply Chain Strategy

### Major Area of Specialization in Health Management and Policy

- HMP 270: Introduction to Health Sector Management and Policy (pre-requisite for all HMP courses)
- or MGT 270: Introduction to Health Sector Organization and Management
- BSL 460: Health Care Law and Ethics (pre-requisite BSL 212)
- BTE 450: Introduction to Health Informatics
- HMP 310: Population Health (pre-requisite HMP 270 or MGT 270)
- HMP 350: Production and Consumption of Health and Health Care (pre-requisites HMP 270/MGT 270 & ECO 211 & ECO 212)
- MKT 388: Health Care Marketing (pre-requisite MKT 201 or MKT 201)

### Major Choice Course - Select one course (3 credit hours) from the following (check pre-requisites):

- HMP 498: Special Topics in Health Sector Management and Policy

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

The purpose of the major area of specialization in Health Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

**Minor in Health Management and Policy**

Minor Area of Specialization in Health Management and Policy (People & Society)

The purpose of the minor in Health Management and Policy is to provide the student with a basic understanding of the organizational, management, economic, and financial structure, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students interested in: exploring the health care sector; working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, pre-law or pre-MBA/MPA studies.

Miami Herbert Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Health Management and Policy by officially declaring the minor at their home school or college and completing the coursework specified below. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Health Management and Policy is acceptable. If so, neither advice nor consent from either the Office
Curriculum Requirements

The 12-credit-hour minor in Health Management and Policy consists of four courses—two required and two minor choice courses—as indicated below (all courses must be taken within the current pre-requisite structure).

Miami Business School students should take the following for the Health Management and Policy Minor:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMP 270</td>
<td>Introduction to Health Sector Management and Policy</td>
<td>3</td>
</tr>
<tr>
<td>HMP 320</td>
<td>Health Care Demand and Supply</td>
<td>3</td>
</tr>
<tr>
<td>or HMP 350</td>
<td>Production and Consumption of Health and Health Care</td>
<td>3</td>
</tr>
</tbody>
</table>

Choice Courses for the Minor

Select two courses (6 credit hours) from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMP 310</td>
<td>Population Health (pre-requisite HMP 270)</td>
</tr>
<tr>
<td>HMP 388</td>

</tr>
<tr>
<td>SOC 351</td>
<td>Business and Society</td>
</tr>
</tbody>
</table>

Total Credit Hours 12

1 HMP 270, foundational for the Health Management and Policy minor, is a pre-requisite for all other HMP courses.
2 The pre-requisites for HMP 350 are HMP 270/MGT 270, ECO 211, and ECO 212. No student should take both ECO 386 and HMP 320 or HMP 350.
3 BSL 460 and MKT 388 are intended for Business students who have declared the HMP minor and have the BSL 212 and MKT 201 or MKT 301 pre-requisites.

Note: All specific coursework for the minor in Health Management and Policy must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization. No one course may count toward more than one major or minor area of specialization.

Interdisciplinary Business

Introduction

Miami Herbert Business School offers both business discipline-based core and elective courses, and a number of interdisciplinary courses and programs. This section collects the latter.

Educational Objectives

Business is by nature both multidisciplinary and interdisciplinary. Miami Herbert Business School embodies this reality by delivering undergraduate degree programs that purposefully expose students to the array of business disciplines, providing a strong technical foundation for success in business. Moreover, modern business persons are expected to have strong non-technical skills such as communication and critical thinking. And, some project-based coursework is cross-disciplinary by
design. Some required and elective coursework offered in the School, therefore, does not fit neatly into disciplinary academic silos.

In addition, the School seeks to serve the non-business student population with general education coursework that provides an introduction to business decision-making in courses that are in some cases multidisciplinary. Faculty from a diverse set of business disciplines offer specialized cognate courses (p. 264) that blend or extend the functional areas of business to provide that multidisciplinary learning.

Finally, MBS offers several multidisciplinary programs of study blending Accounting and Finance (BSAF), Finance and Technology (Fintech minor), and Sustainable Business (minor). Majors and Minors in Entrepreneurship and Health Management and Policy are also multidisciplinary in nature.

The Bachelor of Science in Accounting and Finance

The BSAF degree (p. 295) at Miami Herbert Business School is intended for quantitatively strong students arriving at the business school with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics.

Entrepreneurship (People and Society)

The Entrepreneurship Major (p. 314) area of specialization prepares Miami Herbert Business School students to engage in the process of value creation, regardless of organizational context. Students will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit), or working effectively within an existing organization. Available for both the BBA and BSBA degrees, the Entrepreneurship major consists of coursework drawn from multiple disciplines, including finance, management, and marketing, with major choice courses available from those disciplines as well as from business law and business technology.

The General Business Program: An Individually-Designed Major for BBA and BSBA Students (People and Society or STEM)

The Individualized General Business Major (p. 262) allows students at Miami Herbert Business School to tailor an area of business specialization creatively and to seek and develop connections among the business disciplines in ways that will suit their own academic interests and graduate school or career objectives. Building upon the strong foundation provided by the Business Core, students pursuing this program of study will be motivated to craft a unique business specialization that enhances their ability to respond to and compete in a dynamic economic marketplace.

The Global Business Co-Major (People and Society)

The curriculum for the Global Business Co-Major (p. 331) consists of 18 credit hours of required and elective course choices. The Global Business Co-Major is available only to BBA or BSBA students who are also completing another undergraduate business major area of specialization.

Students completing the Global Business Co-Major will:

- Apply interdisciplinary and multidisciplinary approaches, including in relevant cases, foreign language skills, to critical analysis of business topics at the country or regional level.
- Evaluate and apply diverse perspectives to complex issues of comparative and/or global significance, in the face of multiple and sometimes conflicting positions (e.g., cultural, disciplinary, ethical)
- Engage in meaningful interaction with other culture(s) and gain an in-depth understanding of a country and/or region of the world where the student may expect to commence his or her global business career

The Global Business Studies Program: Latin America (People and Society)

The Global Business Studies Program (p. 262) is a co-major option for incoming Miami Herbert Business School freshmen, who apply and are selected as GBS Scholars/Foote Fellows. Students in the program simultaneously pursue a major in a functional area of business and, in the co-major, region-specific global studies coursework.

Health Management and Policy (People and Society)

The Health Management and Policy Major (p. 307) area of specialization is designed for Miami Herbert Business School students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings. The curriculum, which is multidisciplinary in nature, enables students to gain skills and understanding in the specialized language of health care and to comprehend concepts of management, marketing, economics, financing, informatics, politics, law, and ethics as applied to the health care sector.

Entrepreneurship for Business Students (People & Society)

This 15-credit-hour cross-disciplinary Minor in Entrepreneurship for Business Students (p. 332) is intended to acquaint Miami Herbert Business School students with the essential business tools and perspective of the entrepreneur. Eligible business students must have a declared business major other than Entrepreneurship.

Entrepreneurship for Non-Business Students (People & Society)

The 18-credit-hour multidisciplinary Minor in Entrepreneurship for Non-Business Students (p. 332) is for those who seek to learn about developing business plans or how to initiate and manage small business enterprises. Interested students should consult with an academic advisor.
in the School or College of their degree/major to determine if a minor in Entrepreneurship is acceptable.

Financial Technology (STEM)

The 12-credit-hour Minor in Financial Technology (Fintech) (p. 306) is for Miami Herbert Business School students who wish to better understand the delivery and use of financial services through use of technological innovation and automation of the financial sector. The Fintech minor combines classes in both Finance and Business Technology and prepares students for careers in the broader Fintech industry.

The required courses are FIN 302 and FIN 320 (pre-requisites for FIN courses), FIN 410, FIN 418, BTE 420, and BTE 422. All specific coursework for the minor must be completed with a grade of C- or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken for the Fintech minor.

Health Management and Policy (People & Society)

The purpose of the 12-credit-hour Minor in Health Management and Policy (p. 311) is to provide the student with a basic understanding of the organizational, management, economic, and financial structure, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students interested in: exploring the health care sector; working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, pre-law or pre-MBA/MPA studies.

International Business (People & Society)

The 12-credit-hour Minor in International Business (p. 262) provides Miami Herbert Business School students an interdisciplinary perspective of international business to augment their studies in other areas of business specialization. The International Business minor may not be taken by students pursuing the International Finance and Marketing major or by non-business students. Students must complete all prerequisite courses before enrolling in required International Business minor courses.

Sustainable Business (People & Society)

The 12-credit-hour Minor in Sustainable Business (p. 294) is available to both Business and non-Business students alike. Interdisciplinary in nature, the coursework will provide students with a grounding in the business concepts of sustainability, as well as offer additional perspectives from the science/technical and policy/social issues fields. The minor includes a culminating project-based course. Interested students should consult with an academic advisor in the School or College of their degree/major to declare the minor in Sustainable Business.

Management

Department Code: MGT

Introduction

The Department of Management at the University of Miami Herbert Business School is heterogeneous with respect to both research and teaching areas. Faculty are specialized in and teach courses that span a number of fields including entrepreneurship, human resources, international management, leadership, operations management, organizational behavior, strategic management, supply chain management, and teams. Given both the multinational context and diversity present in twenty-first century organizations, coursework in the Department of Management is focused on preparing business students to be productive and effective contributors to the various communities they are embedded within or impact. Students who select any of the Management major areas of specialization pursue a variety of careers after graduation including starting businesses, running family businesses, accepting management positions in domestic or international organizations, attending law school, or pursuing other advanced graduate degrees.

Educational Objectives

• The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
• The improvement of interpersonal skills and learning to work effectively in teams; and
• An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All area specific coursework for any major and/or minor in the Department of Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major and/or minor area of specialization.

 Majors in Entrepreneurship, Global Business (co-major), Human Resource Management, Management, and Organizational Leadership

• B.B.A. in Entrepreneurship (p. 314)
• B.S.B.A. in Entrepreneurship (p. 317)
• B.B.A. in Human Resource Management (p. 319)
• B.S.B.A. in Human Resource Management (p. 321)
• B.B.A. in Management (p. 323)
• B.S.B.A. in Management (p. 325)
• B.B.A. in Organizational Leadership (p. 327)
• B.S.B.A. in Organizational Leadership (p. 329)
• Global Business Co-Major (p. 331)

Minors in Entrepreneurship and Management

• Entrepreneurship for Business Students (p. 332)
• Entrepreneurship for Non-Business Students (p. 332)
• Management for Business Students (p. 333)
• Management for Non-Business Students (p. 333)

B.B.A. in Entrepreneurship

Major Area of Specialization in Entrepreneurship (People & Society)
The Entrepreneurship major prepares Miami Herbert Business School students to engage in the process of value creation, regardless of organizational context. Students will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit), or working effectively within an existing organization.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Entrepreneurship must complete the BBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

<table>

Total Credit Hours 120
NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

All specific coursework for the major area of specialization in Entrepreneurship must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular 'Area of Knowledge' within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Total Credit Hours 120
Mission
- To develop innovative ideas and principled leaders that transform global business and society.

Goals
- The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- The improvement of interpersonal skills and learning to work effectively in teams; and
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

B.S.B.A. in Entrepreneurship
Major Area of Specialization in Entrepreneurship (People & Society)
The Entrepreneurship major prepares Miami Herbert Business School students to engage in the process of value creation, regardless of organizational context. Students pursuing this major will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit) or working effectively within an existing organization.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Entrepreneurship must complete the BSBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

<table>

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major area of specialization in Human Resource Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

5. No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular 'Area of Knowledge' within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

### Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

### B.B.A. in Management

#### Major Area of Specialization in Management (People & Society)

Business students who pursue the Management major will be prepared for future careers in all areas of management, including small business and corporate levels. The Management major also provides a solid preparation for the pursuit of other graduate degree programs, particularly in law and business.

### Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Management must complete the BBA Business Core and the specific coursework for the Management major area of specialization as follows:

**NOTES:**

1. ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major area of specialization in Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

5. No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

6. Excluding any 100-level Management courses and MGT 401.
The major area of specialization in Organizational Leadership is designed to give Miami Herbert Business School students an understanding of the skills necessary to effectively work and influence as well as motivate others within organizational settings. Students with the major in Organizational Leadership will be exposed to an understanding of leadership as an academic discipline, coursework that helps to broaden their understanding of how to effectively influence others towards meeting organizational goals, and hands-on experiences that explore actually leading and working effectively in teams.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Organizational Leadership must complete the BBA Business Core and the specific coursework for the Organizational Leadership major area of specialization as follows:

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

- The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- The improvement of interpersonal skills and learning to work effectively in teams; and
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

All specific coursework for the major area of specialization in Organizational Leadership must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

Sample Plan of Study
This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of Miami Herbert Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

The undergraduate major in Organizational Leadership is designed to give students an understanding of the skills necessary to effectively work and influence as well as motivate others within organizational settings. Soft skill sets such as leading effectively are essential in every job position and industry today. Students who enroll in the BBA with a major in Organizational Leadership will be exposed to an understanding of leadership as an academic discipline; coursework that helps to broaden their understanding of how to effectively influence others towards meeting organizational goals; and hands-on experiences that explore actually leading and working effectively in teams.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- Organizational Leadership majors will demonstrate an understanding of leadership theories and their applications.
- Organizational Leadership majors will work effectively within and leading teams.
- Organizational Leadership majors will demonstrate interpersonal skill sets necessary to influence and engage others in the pursuit of goals.
- Organizational Leadership majors will effectively identify their own leadership strengths and areas for continuous improvement.

B.S.B.A. in Organizational Leadership

Major Area of Specialization in Organizational Leadership (People & Society)

The major area of specialization in Organizational Leadership is designed to give Miami Herbert Business School students an understanding of the skills necessary to effectively work with and influence as well as motivate others within organizational settings. Students with the major in Organizational Leadership will be exposed to an understanding of leadership as an academic discipline; coursework that helps to broaden their understanding of how to effectively influence others towards meeting organizational goals; and hands-on experiences that explore actually leading and working effectively in teams.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Organizational Leadership must complete the BSBA Business Core and the specific coursework for the Organizational Leadership major area of specialization as follows:

This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.
Global Business Co-Major

The Global Business Co-Major (People and Society)

The curriculum for the Global Business Co-Major consists of 18 credit hours of required and elective course choices. The Global Business Co-Major is available only to BBA or BSBA students who are also completing another undergraduate business major area of specialization.

Curriculum Requirements

Each student will work with an advisor to design an individualized course of study that enhances the student’s global perspective and provides an intellectual framework and immersive environment for studying a new country or region of the world. Each program of study will consist of a minimum of 18 credit hours, including coursework distributed among the following areas:

1. Economics related to the country or region
2. Political or regulatory environment of the country or region
3. Historical/cultural perspective on the country or region
4. Exposure to a language of the country or region, demonstrated by completion of a business course in the language of the region, or if unavailable, completion of a course in the language at the 200 level or above. Where the country or region that is studied is English-speaking, the student may complete this requirement by demonstrating language proficiency at the 200 level or above in another language, or by taking an additional course related to the economics, political/regulatory environment, or history/culture of the country or region.
5. One international/global focused upper level business elective, outside the student’s other business major

To further advance and integrate the student’s regional, functional and pragmatic expertise, and to hone the student’s global mindset, the curriculum includes a required Experiential Learning component.

- students must complete a learning experience in the country or region (i.e. study abroad).
- students must complete an approved international internship.
- students’ participation will be encouraged in any MBS Immersion Course that is offered for undergraduates in the region studied. These may take the form of summer or spring break study.
- students’ participation in programming on and off campus related to their region and career track will be encouraged and facilitated.

Mission

Global Business coursework will engage students in pointed critical thinking and discourse that will push them beyond the customary business curriculum, requiring them to consider in some depth the economic, socio-political, historical/cultural questions that embody the intellectual framework for the study of another country or region.

Goals

The Global Business curriculum will provide the rigor, flexibility, and depth to enable students to:

- Design an overall undergraduate curriculum that is consistent with their unique business and global interests,
• Undertake experiential learning activities, including internships, in cosmopolitan Miami and other locations worldwide, which will expand their perspective and allow them to gain a strong multicultural understanding.
• Learn from the perspectives and experiences of an outstanding and diverse group of professors, classmates, practitioners, and UM alumni from all over the world.

Student Learning Outcomes
Students completing the Global Business co-major will:
• Apply interdisciplinary and multidisciplinary approaches, including in relevant cases, foreign language skills, to critical analysis of business topics at the country or regional level.
• Evaluate and apply diverse perspectives to complex issues of comparative and/or global significance, in the face of multiple and sometimes conflicting positions (e.g., cultural, disciplinary, ethical).
• Engage in meaningful interaction with other culture(s) and gain an in-depth understanding of a country and/or region of the world where the student may expect to commence his or her global business career.

Minor in Entrepreneurship for Business Students
Minor Area of Specialization in Entrepreneurship for Business Students (People & Society)
This minor in Entrepreneurship is intended to acquaint Miami Herbert Business School students with the essential business tools and perspective of the entrepreneur. Eligible business students must have a declared business major other than Entrepreneurship.

Curriculum Requirements
The requirements of the 15-credit-hour minor in Entrepreneurship are the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGT 253</td>
<td>Introduction to Entrepreneurship</td>
<td>3</td>
</tr>
<tr>
<td>MGT 354</td>
<td>Growing the New Venture</td>
<td>3</td>
</tr>
<tr>
<td>MGT 455</td>
<td>Entrepreneurial Consulting</td>
<td>3</td>
</tr>
<tr>
<td>MGT 385</td>
<td>Marketing for Entrepreneurs (pre-requisite MKT 201 or MKT 301)</td>
<td>3</td>
</tr>
</tbody>
</table>

Choice Course for the Minor
Select one course (3 credit hours) from the following:
1. BSL 324 Negotiation
   or MGT 324 Negotiation Strategies
2. BSL 424 Intellectual Property Law
3. BTE 320 Introduction to Programming
4. BTE 324 Object-Oriented Programming
5. BTE 389 Launching High Technology Ventures
6. BTE 524 Mobile Apps Development

1. All courses must be taken within the current pre-requisite structure.
   * No one course may be applied toward more than one major or minor area of specialization.
   ** All specific coursework taken for any minor in the Department of Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Entrepreneurship for Non-Business Students
Minor Area of Specialization in Entrepreneurship for Non-Business Students (People & Society)
This minor is for non-business students who seek to learn about developing business plans or how to initiate and manage small business enterprises. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Entrepreneurship is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Management is necessary. Instead the non-business student should simply declare the minor and complete the required six courses, or 18 credit hours.

**Minor in Management for Non-Business Students**

Minor Area of Specialization in Management for Non-Business Students (People & Society)

Non-Business students in any school or college may pursue a minor in Management. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Management is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Management Department is necessary for a student to choose or complete a minor in Management. Instead the non-business student should simply declare the Management minor and complete the required 12 credit hours of Management courses.

1 All courses must be taken within the current pre-requisite structure.

2 pre-requisite of a Statistics 1 course, such as MAS 201, MAS 311, IEN 311, MTH 224, or the equivalent.

3 excluding MGT 401

**Note:** No one course may be applied toward more than one minor area of specialization in the Department of Management. All specific coursework for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

**Management Science**

Department Code: MAS
Introduction
Management Science uses the ideas and methods of science, mathematics, statistics, and computing, which collectively are often referred to as Business Analytics, to help managers make better business decisions. Management science techniques have been applied in a wide variety of areas including financial modeling, marketing research, organizational theory, transportation and logistics, health care, environmental protection, and manufacturing. Almost any decision can benefit from the methods of management science/analytics.

Educational Objectives
The Department of Management Science offers a major area of specialization in Business Analytics as well as a minor in Business Analytics. The Business Analytics curriculum is designed to give Miami Business School students the necessary educational background and experience to allow them to work as successful business analytics professionals.

Students pursuing the Bachelor of Business Administration (BBA) degree with a major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

For students pursuing the Bachelor of Science in Business Administration (BSBA) degree program, the major in Business Analytics requires a solid background in the sciences and mathematics. Additionally, students are required to take sequences of courses in optimization, decision science, and data analytics. A number of the courses in the Business Analytics curriculum require projects, in which the student evaluates a real-world system or process. As the system is studied and modeled, the student applies management science methods to find ways to improve the process. In such a course, written and oral presentation of findings is part of the learning and evaluation process.

A major or minor area of specialization in Business Analytics is recommended to qualified students as preparation for direct entry into the field of Analytics or as preparation for future graduate studies.

Highly-motivated students interested in pursuing both the BBA/BSBA and the Master of Science in Business Analytics may qualify for the dual degree program in Business Analytics (p. 732). Undergraduate students admitted to this program must be within thirty credit hours of completing the baccalaureate degree and have a minimum 3.0 GPA. The BBA/BSBA-MSBA program is designed in such a way that students can expect to complete both the Bachelor’s and Master’s degrees within 4 1/2 years. Students in this program can take up to twelve credits of graduate coursework in the senior undergraduate year and at least twenty credits of graduate coursework in the fall semester after completion of the undergraduate degree.

Major in Business Analytics
- B.B.A. in Business Analytics (p. 334)
- B.S.B.A. in Business Analytics (p. 336)

Minor in Business Analytics
- Business Analytics (p. 338)

B.B.A. in Business Analytics
Major Area of Specialization in Business Analytics (STEM)
The Department of Management Science offers a major area of specialization in Business Analytics for students pursuing the Bachelor of Business Administration degree. Students who choose the major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Business Analytics must complete the BBA Business Core and the specific coursework for the Business Analytics major area of specialization as follows:

Special Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and Mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. In order to declare the Business Analytics major, a BBA student needs to have earned a minimum A- (3.7) average for MTH 161, MAS 201, and MAS 202.

5. All specific coursework for the major area of specialization in Business Analytics must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

6. All courses must be taken within the current pre-requisite structure.

7. No course may double count in any other major, minor, or cognate.
### Mission

- To develop innovative ideas and principled leaders that transform global business and society.

### Goals

Students pursuing the Bachelor of Business Administration (BBA) degree with a major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

### Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

### B.S.B.A. in Business Analytics

#### Major Area of Specialization in Business Analytics (STEM)

The Department of Management Science offers a major area of specialization in Business Analytics for students pursuing the Bachelor of Science in Business Administration degree. Students who choose the major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

### Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Business Analytics must complete the BSBA Business Core and the specific coursework for the Business Analytics major area of specialization as follows:

<table>

Introduction
Rapidly increasing global competition, emergence of new markets, and technological advancements make today’s marketplace a highly dynamic and challenging environment for companies. Effective marketing is therefore crucial for organizations to survive and prosper in such an environment. Marketing is the process through which organizations develop and distribute products and services that satisfy the needs of customers. Customer satisfaction is critical to the profitable operations and growth of organizations and, as such, an integral component of modern-day marketing.

Educational Objectives
The marketing curriculum offers courses and programs to undergraduate and graduate students for their professional development in domestic and world business.

The primary goals of the Department of Marketing are:
1. to contribute to marketing knowledge through conducting scholarly research and disseminating the research findings through leading journals;
2. to excel in imparting marketing knowledge to students and honing their critical-thinking skills so as to prepare them for potentially successful careers in an increasingly competitive, dynamic, global, and service- and technology-oriented environment; and
3. to be of service to the business and professional communities at large.

A program of study in marketing offers business students a comprehensive understanding of such topics as:
- Marketing’s critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies.

Major in Marketing
- B.B.A. in Marketing (p. 339)
- B.S.B.A. in Marketing (p. 341)

Minor in Marketing
- Marketing for Business Students (p. 344)
- Marketing for Non-Business Students (p. 344)

B.B.A. in Marketing

Major Area of Specialization in Marketing (People & Society)
The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective. Additionally, the marketing program of study is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Marketing must complete the BBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

<table>

Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of Miami Herbert Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

<td>English Composition I</td>
<td>3</td>
</tr>
</tbody>
</table>

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. In order to pursue a major area of specialization in Marketing, a student must earn a grade of ‘B’ (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of B- does not qualify).

5. All specific coursework for the major area of specialization in Marketing must be completed with a grade of “C-” or higher (except for the minimum ‘B’ grade required for MKT 201/MKT 301 as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA.

6. MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher. Students may not take both MKT 201 and MKT 301.
### Mission
- To develop innovative ideas and principled leaders that transform global business and society.

### Goals
A program of study in marketing offers business students a comprehensive understanding of such topics as:
- Marketing’s critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies.

### Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

### B.S.B.A. in Marketing
**Major Area of Specialization in Marketing (People & Society)**
The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective. Additionally, the marketing program of study is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

### Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Marketing must complete:

Total Credit Hours: **120**
As assigned academic advisor.

Students construct their individualized plans in collaboration with their advisors through a major, minor, or cognate outside of the Business School. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

In order to pursue a major area of specialization in Marketing, a student must earn a grade of ‘B’ (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of B- does not qualify). All specific coursework for the major area of specialization in Marketing must be completed with a grade of “C-” or higher (except for the minimum ‘B’ grade required for MKT 201/MKT 301 as noted).

A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA. All courses must be completed within the current pre-requisite structure.

MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher. Students may not take both MKT 201 and MKT 301.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular ‘Area of Knowledge’ within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.
Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

A program of study in marketing offers business students a comprehensive understanding of such topics as:

- Marketing’s critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

Minor in Marketing for Business Students

Minor Area of Specialization in Marketing for Business Students (People & Society)

The 12-credit-hour minor in Marketing for Miami Herbert Business School students consists of 9 credit hours of Marketing courses beyond the core course MKT 201/MKT 301.

Curriculum Requirements

<table>

Choice Courses for the Minor

Select three courses (9 credit hours) from the Department of Marketing

Total Credit Hours 9

1 Important Note: In order to pursue the minor in Marketing, a student must earn a grade of “B” (grade point average of 3.0) or higher in MKT 201/MKT 301 (note that a grade of “B-” does not qualify).

2 MKT 201 is intended for freshman business students. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher. Students may not take both MKT 201 and MKT 301.

3 All courses must be taken within the current pre-requisite structure. At most, one course (3 credit hours) identified as STEM may be selected from the available choice courses.

* Note: All specific coursework for the minor in Marketing must be completed with a grade of “C-” or higher (except for the minimum ‘B’ grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

Minor in Marketing for Non-Business Students

Minor Area of Specialization in Marketing for Non-Business Students (People & Society)

Non-Business students in any school or college may pursue a minor in Marketing. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Marketing is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Marketing Department is necessary for a student to choose or complete a Marketing minor. Instead the non-business student should simply declare the minor and complete the required 12 credit hours of Marketing courses.

Choice Courses for the Minor

Select three courses (9 credit hours) from the Department of Marketing.

Total Credit Hours 12

1 Important Note: In order to pursue the minor in Marketing, a student must earn a grade of “B” (grade point average of 3.0) or higher in MKT 301 (note that a grade of “B-” does not qualify).

2 All courses must be taken within the current pre-requisite structure. At most, one course (3 credit hours) identified as STEM may be selected from the available choice courses.
* Note: All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum 'B' grade required for MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.
Communication

http://www.com.miami.edu/

Introduction
The School of Communication houses four departments that offer courses in nine majors leading to the Bachelor of Science in Communication degree. The departments are: Cinema and Interactive Media (Motion Pictures, Interactive Media), Communication Studies (Communication Studies), Journalism and Media Management (Broadcast Journalism, Electronic Media, Journalism, Media Management), and Strategic Communication (Advertising, Public Relations). In addition, the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees are offered in the School.

Students engage with a diverse faculty of communication scholars, artists and professionals in a variety of hands-on learning experiences embracing research, writing, production, creative problem-solving and multimedia storytelling. On-campus television and radio facilities, soundstages and multimedia labs are available for academic and extra curricular student projects. Students utilize contemporary digital imaging technology and learn skills that cut across a variety of media platforms. Digital editing, recording and mixing facilities are available. New media technology is incorporated throughout the curriculum and the School has numerous computer labs and digitally “smart” classrooms.

The School houses a film soundstage and two fully digital, high-definition television studios and state of the art control rooms. Two video-conference centers with broadcast-quality interactive capability for remote interviews and programming support the School’s mission. In addition, a fiber-optic linked studio allows for real-time, broadcast-quality transmissions to sites around the world. Under Communication faculty supervision, student-produced programming is distributed through the University’s cable facility and carried throughout the community by the local cable operator and is available through online streaming. The School operates several online sites that afford students outlets for multimedia, interactive and cross-platform writing, research, reporting and creative work.

The University’s FM radio station, and student online and print newspapers and magazines, offer additional opportunities for career development. The Bill Cosford Cinema, a 240-seat movie theatre, supports the Motion Picture Program and offers film programming for the Miami community. The School’s Norton Herrick Center for Motion Picture Studies is dedicated to research into the history and aesthetics of motion pictures and their social and cultural impact.

The School’s Center for Communication, Culture, and Change focuses on promoting positive social and behavioral change through communication research. The Center seeks to address urgent social issues, and make a positive difference in people’s lives.

The Koenigsberg & Nadal Interactive Media Center facilitates collaborative education for School of Communication students. With the latest technology seamlessly integrated into a flexible co-working space, students in the Interactive Media Center can easily work together and share their knowledge with one another. Whether students are using the dry erase walls to strategize a research project or touch-screen monitor to showcase their creative concepts to a client, the Interactive Media Center provides a student-driven and innovative experiential learning ecosystem unique to the School of Communication. In this space, groundbreaking ideas are born and innovative visions are able to come to life across all disciplines.

The School supports student chapters of the American Advertising Association, the Public Relations Society of America, the Society of Professional Journalists, the National Broadcasting Society, the University Film and Video Association and other professional organizations. In addition, the School sponsors a nationally competitive intercollegiate debate team, which annually produces several members of the All American Debate Team.

Internships in professional settings are available to Communication students at the sophomore, junior and senior levels. Professionals at daily and weekly newspapers, magazines, news bureaus, cable systems, radio and television stations and networks, production houses and motion picture studios cooperate in faculty-supervised internships. Executives of city and county governments, advertising agencies, public relations firms and other business and nonprofit organizations join in providing internship opportunities. The Stein Family Office of Career Services and Internships assists students seeking internships and offers career planning services. Summer and semester-length study abroad opportunities are also available.

Mission
The School of Communication is dedicated to a global educational perspective and is committed to providing a socially responsible and ethically grounded learning environment guided by a diverse faculty of scholars, artists and professionals. The School is committed to quality undergraduate and graduate programs in communication that emphasize the relationship between theory and practice. We believe in freedom of expression and creativity, and encourage both collaboration and independent thinking as we prepare future scholars, professionals and leaders for a lifetime of service and learning.

Accreditation
The University of Miami is accredited by:

The Southern Association of Colleges and Schools
1866 Southern Lane
Decatur, GA 30033-4097

Academic Policies

Internal Transfer into the School of Communication
A student enrolled at the University of Miami in a School or College other than the School of Communication may apply for admission into the School. Applications are accepted throughout the year. A minimum overall grade point average of 2.5 is necessary for consideration. Applications are available in the Admissions, Academic & Alumni Services Office of the School of Communication (2037 Wolfson Building) and must be submitted prior to the end of each semester. Admission decisions will be made promptly after semester grades are final. Students will be notified in writing of the School’s decision.

Transfer Students
A transfer student must complete in residence a minimum of 18 credit hours toward a Communication major or a minimum of 9 credit hours toward a Communication minor. Courses taken elsewhere in Communication or related disciplines are not automatically accepted toward a major or minor at the University of Miami. Students who have obtained the written approval of the appropriate department chair to use transfer credit hours to satisfy one or more requirements of that
major may be required to complete additional courses in residence at the University before being admitted to that major. Students should consult a School of Communication advisor to determine whether the transfer of Communication courses will increase beyond 120 the total number of credit hours required for a degree. In general, transfer credit hours will not be accepted to satisfy requirements for any course in any major or minor at the 300-level or above. Student petitions to transfer credit hours will be considered on an individual basis.

Transfer credit hours may not be used to satisfy requirements for any major or minor in Communication without the written approval of the Chair of the program concerned.

Academic Progress & Probation/Dismissal
Students must maintain a grade point average (GPA) of 2.5 or higher in courses taken in residence and submitted for their School of Communication major. Following the first semester in which any student’s GPA in the major falls below a 2.5, the School may issue a warning to that student that his or her work does not meet School expectations. Should that student’s GPA in the major be below a 2.5 in any subsequent semester, he or she may be placed on Academic Probation. The School may dismiss from the University any student who is on probation a total of two semesters (not necessarily consecutive). A student who has been dismissed from the School may apply for admission to one of the other Schools or Colleges within the University, but will not be readmitted to the School of Communication.

Those who wish to appeal their probation or dismissal must do so in writing to the Dean within 30 days of the notice of probation or dismissal.

Internship Credit Hours
All programs allow students to complete multiple internships for academic credit. Students should consult with their faculty advisor or the School’s academic advising office for their department’s specific internship credit hour policies.

Credit Hours and Advanced Placement Credit
Credit hours may be earned through Advanced Placement, IB, CLEP Examinations and Advanced Placement by Proficiency Examinations. These credit hours may be applied to the appropriate General Education Required Areas of Study or as electives except:

1. where prohibited by the University or a specific program area; or
2. if the course is remedial (e.g., ENG 103, MTH 099).

To earn credit hours, each student must pay a recording fee and have exempted course credit hours entered on his or her University transcript. An exemption may be granted for ENG 105 by the Department of English, but this exemption will not earn credit hours toward the 120 University credit hours required for graduation.

Grade Point Average
A candidate for the Bachelor of Science in Communication (B.S.C.) must complete the credit hours and achieve the grade point average specified for students in the University at large as stated in the section titled ACADEMIC PROCEDURES AND INFORMATION, subject to additional requirements specified in School and Program sections.

General Education Requirements
In April 2012, the University of Miami Faculty Senate adopted a new set of General Education Requirements (GERs). The new Cognate Program of General Education was implemented in the 2013-2014 academic year (AY 2014).

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

See GENERAL EDUCATIONAL REQUIREMENTS.

Degree Programs
The School of Communication offers courses in nine programs of study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Communication Studies, Electronic Media, Broadcast Journalism, Journalism, Media Management, Interactive Media, and Motion Pictures.

Minors
The School of Communication offers minors in its nine programs of study and a general minor in Communication (COM). School of Communication students may complete a minor in a specific program of study, but are not eligible for the general minor in Communication.

Concentrations
Most degree programs offer concentrations or tracks of study in specialty areas. See the individual program sections for details on these concentrations.

Requirements for Graduation with a Bachelor of Science Degree in Communication

Required University General Education Requirements
The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently. The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor.

All School of Communication students must complete the University’s General Education Requirements. These requirements can be found in the General Education Requirements section. Note that the General Education Requirements differ for incoming freshmen and transfer students.

Completion of each School of Communication major or minor fulfills one of the three cognate areas required by the University: People & Society, Arts & Humanities and STEM. (See individual program descriptions below identifying the specific cognate area covered.)

Students completing a second major or minor in the School which fulfills a cognate area different from their first major, and offered in a different department, may apply the second major or minor toward a second cognate area. No course submitted toward a School of Communication major or minor used to fulfill a University cognate may be applied toward any other cognate area. No more than two cognate areas may be completed in the School of Communication.
Students should meet with their advisors for assistance in completing all University and School requirements.

Developing Proficiency in Advanced Writing and Communication Skills

By their nature, Schools of Communication aspire to help students understand communication processes and develop high-level skills in writing, oral presentation and the use of digital communication technologies for crafting meaningful and effective messages. To fulfill the University’s Advanced Writing and Communication Skills requirement, all students enrolled in one of the eight undergraduate majors offered by the School will be required to complete their program’s core writing course, at least one public speaking/presentational skills course, and one digital skills course.

Major/Minor Requirements

In addition to completing a major in the School of Communication, students must also complete a minor (or a second major) in either a second Program of Study within the School or in an academic program outside of the School. Students completing majors and/or minors in the School must complete all School of Communication courses with grades of C or higher (a grade of C- or lower is not acceptable). Students may not enroll in a School of Communication course without grades of C or higher in prerequisite courses. Students completing a minor or second major outside the School of Communication should consult this Bulletin for minimum grade requirements.

The Major in the School of Communication

Majors in the School of Communication leading to a Bachelor of Science in Communication require between 36 and 42 credit hours in School of Communication courses specified in Program Statements (below). Courses within each major must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) In addition, students must maintain a grade point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication majors.

The Minor

Each Communication student, in addition to completing requirements for a Communication major, must complete a minor field in either a second Program of Study within the School or in an academic program outside the School. Each course submitted for a minor offered in the School of Communication must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) To find the requirements for a given minor, students should consult this Bulletin and confer with the appropriate department representative.

School of Communication advisors will aid students in identifying appropriate minors. The candidate for a Communication degree may choose from among any of the disciplines offering minors at the University for which they may qualify. The choice of a minor should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

The Second Major Option

Students may choose to complete a second major, either within the School or in an academic program outside the School, in place of the minor requirement. Some second majors are impractical within the minimum 120 credit hours degree program. Students should consult with a Communication advisor before selecting a second major. The choice of a second major should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

Double Counting

Students completing a major and a minor in the School of Communication, or two majors within the School of Communication, may count only COM 250 toward both Programs of Study. No other course duplication is allowed. Students should consult with the Department Chair of the minor or second major for acceptable course substitutions where appropriate.

Upper Division Credit Hours

In earning a Bachelor of Science in Communication, each School of Communication student must complete a minimum of 36 credit hours of course work at the 300-level or above. Upper division transfer credit hours also apply if completed at a four-year institution and if approved by the Department Chair.

Electives

Only Free Elective courses may be taken under the University's Credit Only option. Free Electives are defined as courses not taken to fulfill the requirements of the major within the School of Communication, of the second major or minor, or of the School’s General Education Requirements. Free Electives are courses that are not taken to meet any of the above requirements or their prerequisites, but taken solely to meet the requirement of a minimum total of 120 credit hours for the degree.

General Electives

A sufficient number of University electives must be completed to fulfill a minimum total of 120 credit hours. Electives may be chosen from any course offered by the University except certain unapproved courses such as:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>DAN 102</td>
<td>Stretching and Body Work</td>
<td>1</td>
</tr>
<tr>
<td>ENG 103</td>
<td>Basic Academic Writing</td>
<td>3</td>
</tr>
<tr>
<td>MTH 099</td>
<td>Intermediate Algebra</td>
<td>3</td>
</tr>
<tr>
<td>UMI Toppel Internship at any level</td>
<td>1</td>
<td></td>
</tr>
</tbody>
</table>

Students should consult a School of Communication advisor before selecting elective courses. Because specific courses are required in some School of Communication majors, students are advised to read Program Statements carefully and seek the advice of a School of Communication advisor prior to taking general University electives.

Schedules

Fifteen to sixteen credit hours constitute a normal semester schedule in the School of Communication. Students who wish to register for more than 18 credit hours must obtain prior approval from the Office of Admissions, Academic & Alumni Services (2037 Wolfson Building). Students who are on academic probation will be limited to a maximum of 13 credit hours.

Honors

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students must contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details about the School of Communication Honors Program.
Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under graduation honors.

**General Information**

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

**Foote Fellows in the School of Communication**

The School of Communication hosts several activities geared for our Foote Fellows throughout the academic year. School of Communication Foote Fellows will be receiving information from Assistant Dean Luis Herrera regarding our specific programs. For further inquiries, please contact him at lherrera@miami.edu.

**SCHOOL OF COMMUNICATION HONORS PROGRAM**

Admission to the School’s Honors Program is contingent upon admission to the Communication Honors Program as an incoming freshman. Transfer or continuing students may apply for admission to the School of Communication Honors Program after completion of their first full semester at UM. Admission into the School of Communication Honors Program is contingent upon:

1. a freshman student admitted in the fall semester attaining at least a 3.5 overall grade point average and a 3.75 cumulative grade point average in all School of Communication classes, or
2. a transfer student with at least a 3.5 overall grade point average at his or her previous school and a 3.75 grade point average in School of Communication classes.

Continuation in the School’s Honors Program is contingent upon satisfying the criteria set forth below over the student’s academic career. Students enrolled in the School of Communication Honors Program may choose from two academic paths: (1) an individualized major in communication created in consultation with the School’s Director of Honors or, (2) a concentrated major in one of the School’s programs of study.

Students admitted to the School of Communication Honors Program must maintain a minimum 3.5 grade point average in all university coursework and a minimum 3.6 cumulative grade point average in all School of Communication Honors Program classes (at least 15 credits of such course work must be completed). All Honors students must complete the following: (1) 15 credits of Honors-designated courses with grades of “B” or higher (grades of “B-” will not be acceptable).

All School Honors students must have worked out by the end of their second semester of UM enrollment a plan of studies, under the direction of the School’s Director of Honors.

In conducting a Senior Honors Project/Thesis the student, under the direction of an approved faculty mentor, will produce an original communication thesis/project. This project may take the form of original research, a theoretical examination of communication phenomena, a film or motion picture script, a radio or video drama or documentary, a teleplay, or a visual communication project incorporating web interactive design, photography, and multi-media.

Inquiries regarding the School of Communication Honors Program should be made through the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building).

**Minor in Communication**

A student seeking a minor in the general area of Communication must complete 15 credit hours, at least six of which must be at the 300-level or above.

- Students in the School of Communication cannot minor in Communication.
- Courses for this minor must be taken from the departments of Cinema and Interactive Media, Communication Studies, Journalism and Media Management and Strategic Communication. Course prefixes include: CIM, COM, COS, JMM and STC.
- Each course taken for a Communication minor must be completed with a grade of C or higher (a grade of C- or lower is not acceptable).
- At least 9 credit hours towards the minor must be completed at UM.
## Sample Communication Minor

<table>

Total Credit Hours: 15

1 STC 200 requires STC 114, STC 201 requires STC 116 and STC 202 requires STC 102. These courses cannot be taken concurrently. Any exceptions must be made by the STC Department Chair.

2 Please consult each department’s bulletin listing for course requirements. No exceptions, substitutions or waivers will be given if student does not meet requirements for a course.

3 Most 300 level or above Communication courses require at least junior standing and one or more of the following survey courses: CIM 103, CIM 126, CIM 151, COS 220, JMM 102, JMM 108, STC 102, STC 114, or STC 116. Please consult the Bulletin for course prerequisites.

Cinema and Interactive Media

http://com.miami.edu/programs

The Department of Cinema and Interactive Media offers majors in Motion Pictures and Interactive Media and minors in Motion Pictures (CMPT), Game Design (GAME) and Interactive Media (CIMI).

A Motion Pictures major selects from the following tracks: Studio, Production, Screenwriting, Business, or Critical Studies.

The Department of Cinema and Interactive Media prepares the next generation of storytellers, innovators, filmmakers, designers, creators, researchers, and entrepreneurs for the abundance of opportunities in world of film, digital media, and emerging technologies.

Design:

The majors and minors offered by the Department of Cinema and Interactive are designed to enable you to customize your education, within a learning environment that is collaborative and conducive to the pursuit, development, and exchange of ideas and information. The curriculum provides students with the training necessary to succeed in a range of careers defined by a rapidly changing media landscape, and equips them to best leverage emerging technologies and innovative developments in the field.

Goals of the Program are:

--To furnish students with the technical and practical skills needed to make them career-ready through hands-on learning, problem-solving based inquiry, and advanced study.

--To nurture the individual talent, creativity, and discovery process of every student by fostering principles of collaboration, professionalism, and intellectual curiosity.

--To support the educational process through mentoring and advising by renowned faculty and seasoned professionals.

--To encourage students to integrate theory and practice, to cultivate the capacity to think critically, and to connect technology and art and/or design.

--To familiarize students with theoretical, historical, and cultural approaches and expose them to a range of traditions within the field of study.

--To provide access to state of the art facilities, the most technologically advanced tools, and the latest technology.

--To continue to build on our reputation as a place of innovation and interdisciplinarity, as we educate students according to the highest professional and ethical standards.
**Major Cognate Area**
- Motion Pictures – Arts and Humanities
- Interactive Media – STEM

**Minor Cognate Areas**
- Motion Pictures – Arts and Humanities
- Game Design – Arts and Humanities
- Interactive Media – STEM

Please note: students completing majors and minors within the same department may only satisfy one required cognate area of study.

**Dept. Code: CIM**

**Requirements for the Majors in Motion Pictures and Interactive Media**

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the school’s General Education Required Areas of Study. Motion Pictures majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Before admission as a Motion Pictures (CMPT) major or Interactive Media (CIMI), a student must:

- Complete the Core courses in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Cinema and Interactive Media to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to that major, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

**Opportunities**

As a major or minor in the CIM department, many opportunities await you, including access to the following facilities and equipment: digital cameras; grip and electrical equipment; a soundstage; digital post-production image and sound facilities; a digital animation studio; a VR Lab, User Experience Lab, and a New Experience Research and Design Lab (NERDLab).

The department offers a Semester in Los Angeles Program each spring as well as summer sessions in Prague (FAMU), Greece, and Spain.

In addition to the chance to work on numerous student projects, there is an array of extracurricular activities in the School of Communication, including the award-winning cable channel UMTV and Delta Kappa Alpha, the National Professional Co-Ed Cinematic Arts Fraternity.

The Bill Cosford Cinema, a state-of-the-art movie theater exhibits first-run alternative, foreign and classic films and hosts numerous guest filmmakers and special events throughout the year. The Cosford Cinema serves as a venue for local film festivals as well as the annual Canes Film Festival featuring UM undergraduate and graduate work.

Students have the opportunity to compete in the UM Canes Film Festival to earn the chance to take their work to a professional showcase screening, held annually in Los Angeles.

**Majors in Cinema and Interactive Media**
- B.S.C. in Interactive Media (p. 352)
- B.S.C. in Motion Pictures - Business Track (p. 354)

*This program is Pending Board of Trustee Approval*

**Mission**

The Interactive Media major addresses the growing need for communicators who fluidly combine design, technology, visual arts and research to help stimulate comprehension and integration of technology into every aspect of daily life. This program will produce graduates who, in addition to being innovative and interdisciplinary, are responsive to cross-sector dynamics and therefore are industry ready.

**Goals**

The major in Interactive Media will provide students with expertise in designing and analyzing products and systems, incorporating rich interaction through the use of computational power.

**Student Learning Outcomes**

This program is designed to enhance our students’ abilities to:

- Conceptualize communication models based on possibilities offered by emerging technologies.
- Evaluate user experiences by conducting usability testing.
- Understand business models and the metrics driving online business models.
- Research, analyze, prototype and design concepts from concept to launch.
- Realize business goals with elegant and intuitive interactive designs.
- Conceive, research, synthesize, and implement creative solutions to complex problems posed by emerging technologies.
- Master dynamic communication techniques that give control to the user rather than the computer.
- Embrace, integrate and adapt quickly to a variety of disciplines in technology, art, design, science, education, healthcare and business.
- Learn to work in teams and manage projects.

**B.S.C. Motion Pictures - Business Track**

Intended for students interested in media industries, this track offers an in-depth view from a decision-making perspective. You will learn how content is made, while attaining advanced business skills in many aspects from traditional movie outlets to new distribution opportunities, defined by multi-platforms and omni-channels.

You will discover motives, tactics and tools for content creation as well as strategies for choosing which platform best serves a particular story. This track is an excellent choice for students who strive to think critically about the environment the industry operates in and how it can inform your own business strategy.

  3
**Additional Requirements**

1. **ENG 105 & ENG 106**
2. **MTH 113 or JMM 285 or STC 103**
3. **People and Society Cognate**
4. **STEM Cognate**
5. **Minor, Second Major and Electives**
6. **Total Credit Hours**

School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.

School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, University Cognates (http://www.miami.edu/cognates/) and the Advanced Writing and Communication Skills Proficiency requirement.

**Upper Level Elective Requirement**

36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

1. Students may only take CIM 462 or JMM 434. Both courses will not count for the major.

Mission
The B.S.C. in Motion Pictures focuses on media creation with an emphasis on combining advanced technical proficiency with innovative narrative skills. Students gain practical and theoretical mastery of their particular professional concentration in screenwriting, production, post-production, and producing. Additionally, all students engage in critical studies of film history and theory in order to develop the analytical skills necessary for creative experimentation.

Goals
The Program’s objective is to nurture individual creative voices and encourage independent thinking, as well as to support the unique creative collaborative process of media creation. Graduates are prepared to pursue careers as professional moving image artists, enter the teaching profession, provide service to the community and beyond, and enter moving image related professional fields.

Student Learning Outcomes
• Students will demonstrate proficiency in screenwriting, including mastery of script formatting, narrative storytelling skills, character development, and dramatic film structure.
• Students will demonstrate knowledge of major individual works, genres, national cinemas and movements, and their significance within the history and theory of the moving image.
• Students will demonstrate proficiency in the use of motion picture production techniques (directing, cinematography, editing and sound) and professional work ethic necessary for entry into professional practice.

B.S.C. Motion Pictures - Critical Studies Track
For students excited by the study of film and media, the Critical Studies track offers the opportunity to consider a wide range of perspectives on culturally, historically, and artistically significant works. You will engage with the aesthetic, political, and moral issues that inevitably arise when closely looking at examples, while broadening your horizons as you learn about the contexts in which they were produced.

You will cultivate analytical, conceptual, communication, and writing skills and gain research tools, all of which provide a strong foundation for media-related fields. Students in the Critical Studies track may go on to pursue graduate study. They are also well-positioned to choose creative careers or work in the media industry.

Graduates are prepared to pursue careers as professional moving image artists, enter the teaching profession, provide service to the community and beyond, and enter moving image related professional fields.

Student Learning Outcomes
• Students will demonstrate proficiency in screenwriting, including mastery of script formatting, narrative storytelling skills, character development, and dramatic film structure.
• Students will demonstrate knowledge of major individual works, genres, national cinemas and movements, and their significance within the history and theory of the moving image.
• Students will demonstrate proficiency in the use of motion picture production techniques (directing, cinematography, editing and sound) and professional work ethic necessary for entry into professional practice.

B.S.C. Motion Pictures - General Track
The general track gives students flexibility and range as well as depth of focus. This track offers a unique edge in today's expanding technological landscape, providing breadth, versatility, and the advanced skills that will position you to succeed in a number of media careers.

Students select a primary specialization from one of the following areas: production, screenwriting, business, documentary, graphics and animation, games, or critical studies. Students choose an additional six credits of electives. It is recommended, though not required, that these six electives be chosen from a single area creating a secondary specialization.

Some students prefer not to check just one box as they go along their academic journey. The general track appeals to students who like to step out of the box and customize the cinema major to their individual goals.

CIM 403  Film Directors  
CIM 404  Aspects of Contemporary Cinema  
CIM 405  Representations of Sport in Popular Culture  
CIM 406  Genres  
CIM 407  National Cinemas  
CIM 408  Women, Media, and Popular Culture  
CIM 444  Internet and Media Activism  
CIM 594  Special Topics in Cinema and Interactive Media  

Additional Requirements  
ENG 105 & ENG 106  
MTH 113 or JMM 285 or STC 103  
People and Society Cognate  
STEM Cognate  
Minor, Second Major and Electives  
Total Credit Hours  

1  Majors cannot double count courses without approval from faculty advisor and/or department chair.  
CIM 499 and CIM 594 should be selected in consultation with faculty advisor.  

School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.  
School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, University Cognates (http://www.miami.edu/cognates/) and the Advanced Writing and Communication Skills Proficiency requirement.  

Upper Level Elective Requirement  
36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

**Mission**

The B.S.C. in Motion Pictures focuses on media creation with an emphasis on combining advanced technical proficiency with innovative narrative skills. Students gain practical and theoretical mastery of their particular professional concentration in screenwriting, production, post-production, and producing. Additionally, all students engage in critical studies of film history and theory in order to develop the analytical skills necessary for creative experimentation.

**Goals**

The Program's objective is to nurture individual creative voices and encourage independent thinking, as well as to support the unique creative collaborative process of media creation. Graduates are prepared to pursue careers as professional moving image artists, enter the teaching profession, provide service to the community and beyond, and enter moving image related professional fields.

**Student Learning Outcomes**

- Students will demonstrate proficiency in screenwriting, including mastery of script formatting, narrative storytelling skills, character development, and dramatic film structure.
- Students will demonstrate knowledge of major individual works, genres, national cinemas and movements, and their significance within the history and theory of the moving image.
• Students will demonstrate proficiency in the use of motion picture production techniques (directing, cinematography, editing and sound) and professional work ethic necessary for entry into professional practice.

B.S.C. Motion Pictures - Production Track

Intended for students interested in intensive production, this track offers advanced technical skills in directing, cinematography, editing, sound, documentary, immersive storytelling, graphics and animation. You will learn about all stages of the creative process from writing and development, through production and post-production, to all forms of exhibition.

You will be encouraged to develop your individual talent and personal expression in a nurturing and collaborative environment, where you start making films in your first semester and participate in hands-on learning throughout the program.

Internships, extra-curricular organizations, guest master classes, CIM production-based, study-abroad programs (in Prague, Greece, and Barcelona), and the Semester in Los Angeles Program, give you ample opportunity to further your education in production outside of the classroom.

Mission
The B.S.C. in Motion Pictures focuses on media creation with an emphasis on combining advanced technical proficiency with innovative narrative skills. Students gain practical and theoretical mastery of their particular professional concentration in screenwriting, production, post-production, and producing. Additionally, all students engage in critical studies of film history and theory in order to develop the analytical skills necessary for creative experimentation.

Goals
The Program's objective is to nurture individual creative voices and encourage independent thinking, as well as to support the unique creative collaborative process of media creation. Graduates are prepared to pursue careers as professional moving image artists, enter the teaching profession, provide service to the community and beyond, and enter moving image related professional fields.

Student Learning Outcomes

- Students will demonstrate proficiency in screenwriting, including mastery of script formatting, narrative storytelling skills, character development, and dramatic film structure.
- Students will demonstrate knowledge of major individual works, genres, national cinemas and movements, and their significance within the history and theory of the moving image.
- Students will demonstrate proficiency in the use of motion picture production techniques (directing, cinematography, editing and sound)
and professional work ethic necessary for entry into professional practice.

**B.S.C. Motion Pictures - Screenwriting Track**

Intended for students interested in intensive scriptwriting, this track provides advanced skills in writing for film and series television. You will gain a familiarity with all stages of the creative process for film and TV (from writing and development, through production and post-production, to exhibition). You will attain advanced writing skills and techniques, such as story development, characterization, structure, and dialogue while acquiring extensive knowledge about the business of scriptwriting (including the submission process, agents, financing, television writers’ rooms, etc.).

You will be encouraged to develop your individual talent and personal expression in a nurturing and collaborative environment, where you start writing scripts in your first semester and continue with practical, applied learning throughout the program.

Internships, extra-curricular organizations, guest master classes, CIM project-based, study-abroad programs (in Prague, Greece, and Barcelona), and the Semester in Los Angeles Program, give you ample opportunity to further your education in writing outside of the classroom.

Total Credit Hours 15

1. A minimum grade of C or higher is required for all courses taken toward the minor.
2. Students *cannot double count* any CIM courses from the Game Design minor towards the Motion Pictures major and/or minor or the Interactive Media minor.
3. Students may only take one digital design course (JMM 106 or STC 102) towards the minor.

* Any exceptions or substitutions to the minor must be approved by the Director of the Interactive Media Program or CIM faculty advisor.

</tbody>
</table>

Total Credit Hours 18

1. Students *cannot double count* any CIM courses from the Interactive Media minor towards the Motion Pictures major and/or minor or the Game Design minor.
2. Only UX Design may count as the CIM 594 Special Topics in Motion Pictures elective for the Interactive Media minor. Other electives must be approved by the director or faculty advisor of the Interactive Media program.
3. Students, in conjunction with an advisor, can construct an Interactive Media minor focusing on one of these suggested areas: Development, Design and UX Research. These suggested areas listed below are noted on the transcript as an Interactive Media minor.

* All courses for the minor must be passed with a minimum grade of C or higher.

Communication Studies

http://com.miami.edu/programs

The Department of Communication Studies offers a major in Communication Studies and minors in Communication Studies (COS) and Health Communication (CHCO).

Introduction

The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, and professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete applications to particular contexts.

Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in communication, law and other areas.

Major Cognate Area

- Communication Studies
- People and Society

Minor Cognate Area

- Communication Studies
- People and Society
- Health Communication
- People and Society

Degree Programs

The Bachelor of Science in Communication is offered in Communication Studies.

Major in Communication Studies

A major is offered in Communication Studies.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Communication Studies majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Communication Studies major

Before admission as a Communication Studies (COS) major, a student must:

- Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Communication Studies to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School.

A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Major in Communication Studies

- B.S.C. in Communication Studies - General Track (p. 367)
- B.S.C. in Communication Studies - Intercultural Track (p. 368)
- B.S.C. in Communication Studies - Organizational Track (p. 370)
- B.S.C. in Communication Studies - Public Advocacy Track (p. 371)
Minors in Communication Studies
- Communication Studies (p. 373)
- Health Communication (p. 374)

School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.

School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, University Cognates (http://www.miami.edu/cognates/) and the Advanced Writing and Communication Skills Proficiency requirement.

Upper Level Elective Requirement
36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

### Mission

Students in the Communication Studies (COS) Department explore the role of communication in personal and professional relationships. This program is rooted in research and theory promoting student development in advanced knowledge of human communication in specific contexts.

### Goals

Program objectives provide students with an extensive understanding of communication principles, opportunity to develop oral and written communication skills, and application of critical analysis and research skills.

### Student Learning Outcomes

- Students will demonstrate an understanding of advanced communication concepts and critical analysis of research.
- Students will demonstrate advanced writing skills.
- Students will demonstrate advanced presentational skills.

### B.S.C. Communication Studies - Intercultural Track

### Mission

Students in the Communication Studies (COS) Department explore the role of communication in personal and professional relationships. This program is rooted in research and theory promoting student development in advanced knowledge of human communication in specific contexts.

### Goals

Program objectives provide students with an extensive understanding of communication principles, opportunity to develop oral and written communication skills, and application of critical analysis and research skills.

### Student Learning Outcomes

- Students will demonstrate an understanding of advanced communication concepts and critical analysis of research.
- Students will demonstrate advanced writing skills.
- Students will demonstrate advanced presentational skills.
- Students will demonstrate application of communication and professional skills.

Total Credit Hours 120

School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.

School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, University Cognates (http://www.miami.edu/cognates/) and the Advanced Writing and Communication Skills Proficiency requirement.

Upper Level Elective Requirement

36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

**Mission**

Students in the Communication Studies (COS) Department explore the role of communication in personal and professional relationships. This program is rooted in research and theory promoting student development in advanced knowledge of human communication in specific contexts.

**Goals**

Program objectives provide students with an extensive understanding of communication principles, opportunity to develop oral and written communication skills, and application of critical analysis and research skills.

**Student Learning Outcomes**

- Students will demonstrate an understanding of advanced communication concepts and critical analysis of research.
- Students will demonstrate advanced writing skills.
- Students will demonstrate advanced presentational skills.
- Students will demonstrate application of communication and professional skills.

**Minor in Communication Studies**

**Curriculum Requirements**

The minor in Communication Studies requires 15 credit hours, at least six of which must be at the 300-level or above. The additional credit hours must be chosen with prior approval of a Communication Studies advisor. A grade of C or higher is required in all courses (a C- is not acceptable).

Students, in conjunction with an advisor, can construct a Communication Studies minor focusing on areas of specific interest. These sample areas of concentration listed below are noted on the transcript as a Communication Studies minor. Possible areas of concentration include the following:

**Sample Concentration in General Communication Studies**

Offers a rich background in the field of human communication in a variety of contexts applicable to all personal, social and professional endeavors. Complements any major or academic/career objective.

* A grade of C or higher is required in all courses (a grade of C- or lower is not acceptable).

**Journalism and Media Management**

http://com.miami.edu/programs

The Department of Journalism and Media Management offers majors in Broadcast Journalism, Electronic Media, Journalism and Media Management and minors in Broadcast Journalism, Electronic Media, Hispanic Media, Journalism and Media Management.

**Dept. Code:** JMM

**Introduction**

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Four majors and five minors are offered in the Department of Journalism and Media Management. The department’s programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication’s Electronic Media and Broadcast Journalism majors are designed for students who intend to pursue professional work in electronic news, production operations and allied fields.

Students majoring or minoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available
to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School's Media Management major is designed for students interested in the business and management aspects of contemporary media. Students may pursue interests in entrepreneurship, sales, management, technology and research, among other topics. Students are encouraged to network with industry professionals at Media Management Association meetings and expand their knowledge of media business operations on various platforms through local and national internships.

The School’s major in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to online media and entrepreneurial ventures. We emphasize effective storytelling through writing, audio and video recording, photography, graphics and data visualization. Reporting skills, analytical thinking and journalistic ethics are stressed throughout the program. Students are encouraged to work for The Miami Hurricane, the student-run newspaper, Distraction magazine and the Ibis yearbook, all of which are nationally award-winning publications. The robust South Florida media market also provides off-campus opportunities at various professional publications and websites.

Students majoring in Journalism may concentrate their studies in one of several tracks or areas or they may customize their course of study. The suggested tracks include: Reporting and Writing (which is the general journalism or custom track); Media and Journalism Studies (a more conceptual and less applied track for students interested in media analysis); Visual and Documentary Journalism (which allows for the study of photography, web design and videography or documentaries); and Sports, Travel and Lifestyle Features (which focuses on these as related areas of content). These tracks allow students the flexibility to design programmatic concentrations in everything from writing to web design to documentary and visual storytelling.

The School's facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Degree Programs
The Bachelor of Science in Communication is offered in Journalism, Electronic Media, Broadcast Journalism, and Media Management.

Major
Majors are offered in:
- Electronic Media
- Broadcast Journalism
- Media Management
- Journalism

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. All majors must also complete a separate minor or second major within the School or in an academic program outside the School.

NOTE: Departmental Majors, if you wish to double major in the Department of Journalism and Media Management, you must first obtain the written approval of the JMM Department Chair.

Admission to the Electronic Media, Broadcast Journalism, Media Management and Journalism Majors
Before admission as an Electronic Media, Broadcast Journalism, Media Management or Journalism major, a student must:
- Complete the Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Majors in Journalism and Media Management
- B.S.C. in Broadcast Journalism (p. 376)
- B.S.C. in Electronic Media (p. 377)
- B.S.C. in Journalism (p. 379)
- B.S.C. in Media Management (p. 383)

Minors in Journalism and Media Management
- Broadcast Journalism (p. 385)
- Electronic Media (p. 386)

### Mission Goals

The goal of the broadcast journalism major is to teach students to identify news and recognize the story in a complex field of fact and opinion, conduct journalistic research, and to effectively produce content for various media formats. In addition, the major provides students with an appreciation of journalistic ethics and best practices in journalism. Although the term “broadcast” is still part of the official title of this major, the program recognizes the ongoing convergence of news media functions across all distribution platforms.

### Student Learning Outcomes

- Students will demonstrate the ability to acquire, critically analyze, and present journalistic messages in an appropriate format using sound reasoning and journalistic principles.
- Students will demonstrate proficiency in the use of contemporary equipment, technologies, and workflows, as well as key theoretical concepts of audio/visual/interactive storytelling.
- Students will demonstrate the ability to articulate and practice the values, ethics, laws, social responsibilities and expectations of the profession.

### Mission Goals

The goal of the Electronic Media major is to provide students with a broad-based understanding of the Electronic Media industries while allowing them to specialize in an area of their choosing. Students in this major have the opportunity to customize their program of study. While some students focus on electronic media production, others complete a more eclectic mix of electronic media production and industry-related course work.

### Student Learning Outcomes

- Students will demonstrate the ability to function effectively as a member of a team.
- Students will demonstrate proficiency in the use of contemporary equipment, technologies, and workflows, as well as key theoretical concepts of audio/visual/interactive storytelling.
- Students will demonstrate the ability to write and present media, information, or reports appropriate for a professional media industry environment.

**Mission**

The Journalism program at the University of Miami teaches students to identify news, recognize the story in complex matters, distinguish between fact and opinion, and present the story in the format best suited to the subject and audience.

**Goals**

Upon graduation, students are prepared to work in a variety of news and information settings and are equipped to gather and analyze information, critically evaluate it, and write and produce material for various media formats, all within the guiding ethical and legal principles of journalism.

**Student Learning Outcomes**

- Students will demonstrate the ability to acquire, critically analyze, and report stories in an appropriate format using sound reasoning and journalistic principles.
- Students will demonstrate proficiency in the use of contemporary equipment, technologies, and workflows, as well as key theoretical concepts of audio/visual/interactive storytelling.
- Students will demonstrate the ability to articulate and practice the values, ethics, laws, social responsibilities and expectations of the profession.

Please select 12 credits from the following courses with approval of a faculty advisor in JMM.

- JMM 245 Introduction to Electronic Media Production
- JMM 285 Applied Statistics for Journalism and Media Management
- JMM 304 Web and Media Analytics
- JMM 313 Media Sales
- JMM 331 Introduction to Infographics and Data Visualization
- JMM 403 Media Industry Trends
- JMM 306 Special Topics in Journalism and Media Management II or JMM 406 Special Topics in Journalism and Media Management III
- JMM 414 Evolution and Impact of Television Content: The American Sitcom
- JMM 434 Media Distribution for Film and Television
- JMM 461 Seminar in News Ethics and Problems
- JMM 495 Internship in Journalism and Media Management (1 to 3 credits per semester, not to exceed allowed maximum.)
- JMM 499 Projects and Directed Research (1 to 3 credits per semester, not to exceed allowed maximum)
- JMM 533 Social Media
- JMM 537 The Business of Modern Journalism
- JMM 592 Special Topics in Journalism and Media Management

Other JMM or SoC courses as approved by a faculty advisor in JMM.

Additional Suggested Courses

- ACC 211 Principles of Financial Accounting
- ECO 211 Principles of Microeconomics
- FIN 300 Fundamentals of Finance for Non-Finance Majors
- MKT 301 Marketing Foundations

School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.

School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, University Cognates (http://www.miami.edu/cognates/) and the Advanced Writing and Communication Skills Proficiency requirement.

**Upper Level Elective Requirement**

36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

## Mission
The Media Management major prepares students for careers on the business side of media, such as operations, sales, programming, marketing, research and finance. Media management students receive a more focused and practical grounding in the business of media that a conventional business school degree cannot provide. In particular, this major focuses on media economics, finance, technology, and strategic planning. The program recognizes the ongoing convergence of media business functions across all platforms.

## Goals
### Student Learning Outcomes
- Students will demonstrate knowledge of the practices and structures of mass media industries.

## Minor in Broadcast Journalism

Strategic Communication

http://com.miami.edu/programs

Dept. Code: STC

Introduction

The Department of Strategic Communication offers majors and minors in Advertising and Public Relations.

Students majoring in Advertising learn the art, craft and business of promoting brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development and media planning skills. The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally. The curriculum is hands-on and students learn how to create an advertising campaign that meets their client’s goals. Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School’s Advertising Program also has an active alliance with the American Advertising Federation.

Students majoring in Public Relations learn how to promote a client’s business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their public’s. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community. Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

Major Cognate Area

- Advertising Management Track:  
  - People and Society

- Advertising Creative Track:
  - People and Society or
  - Arts and Humanities

- Public Relations:  
  - People and Society

Minor Cognate Area

- Advertising Minor:  
  - People and Society

- Public Relations Minor:  
  - People and Society

- Strategic Communication Minor:  
  - People and Society

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

Degree Programs

The Bachelor of Science in Communication is offered in Advertising and Public Relations

Majors are offered in:

- Advertising Creative Track
- Advertising Management Track
• Public Relations General Track
• Public Relations Practice Track

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Advertising majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Advertising and Public Relations Majors
Before admission as an Advertising or Public Relations major, a student must:

• Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
• Students who have obtained the written approval of the Chair of Strategic Communication to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
• Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
• A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School.

Major in Advertising
Students majoring in advertising will choose one of two tracks:

• Advertising Management Track
• Advertising Creative Track

Major in Public Relations
Students majoring in public relations will choose one of two tracks:

• Public Relations General Track
• Public Relations Practice Track

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Public Relations majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Minors in Strategic Communication Department
The Department of Strategic Communication offers minors in:

• Advertising
• Public Relations
• Strategic Communication

The minors in Advertising, Public Relations and Strategic Communication require a grade of C or higher in all courses (a C- is not acceptable).

Majors in Strategic Communication
• B.S.C. in Advertising - Advertising Creative Track (p. 388)
• B.S.C. in Advertising - Advertising Management Track (p. 390)
• B.S.C. in Public Relations - General Track (http://bulletin.miami.edu/undergraduate-academic-programs/communication/strategic-communication/public-relations-general-track/)
• B.S.C. in Public Relations - Practice Track (p. 393)

Minors in Strategic Communication
• Advertising (p. 395)
• Public Relations (p. 395)
• Strategic Communication (p. 396)

Mission

The mission of the advertising program is to introduce students to advertising theory, research, and client services to prepare them for an advertising career.

Goals

The program prepares students to be critical thinkers problem-solvers, and globally aware professionals. In addition, in preparation for the ever-evolving advertising industry, students can elect to study general advertising or concentrate their efforts by specializing in advertising management or creative advertising.

Student Learning Outcomes

- Students will be able to conduct primary and secondary research, analyze data, interpret the results, and communicate the results, using statistical analyses and SPSS software for data analysis.
- Students will develop a budgeted media plan to meet reach and frequency goals for a given advertising client, meaning that they can identify the appropriate target audience(s) and reach them effectively with strategically selected media within a limited budget.
- Students will be able to create advertisements for a variety of media, applying appropriate design, art direction and copywriting skills. Students will also be able to develop an effective creative strategy and campaign executions across multiple media to meet client objectives for campaign development.
- Students will research, create, design, and present an advertising campaign of their own creation and then will present their work as they would at an advertising agency, demonstrating effective campaign development and campaign presentation skills.

### Mission

The Public Relations Program mission is to prepare professional communicators who understand and can demonstrate the use of theory, research, planning and evaluation in effective public relations practice. We are committed to building students’ ability to apply ethical principles to decision-making and to perceive each communication and its intended audience holistically, based on understanding and appreciating cultural and other differences.

### Goals

We seek to nurture students’ analytic and creative skills with the goal of graduating insightful, resourceful citizens of a global society, and to challenge them with multiple opportunities for learning, self-discovery and professional practice.

### Student Learning Outcomes

- Students will demonstrate an understanding of how research is conducted and findings are effectively applied to strategic communication planning and in the practice of public relations,
including the ability to conduct secondary and primary research, compile and analyze data via statistical analyses and SPSS software, and interpret and summarize the results.

- Students will write and design effective, audience-sensitive messages for public relations purposes in settings inside and outside the classroom that follow standards of professional practice.
- Students will demonstrate the ability to prepare and evaluate strategic communication plans/proposals at a professional level, which requires effective research, writing, design and oral presentation skills.

Continuing and International Education

http://www.continue.miami.edu

The University of Miami Division of Continuing & International Education (DCIE) is dedicated to providing the highest quality education and training — both on campus and online — to people of all ages, throughout every stage of their lives. DCIE offers undergraduate, graduate and noncredit courses (including online and hybrid options) that span a wide array academic disciplines. Our programs help advance and enrich students who are either beginning their academic journey to seasoned professionals pursuing career opportunities within the global community.

DCIE manages the following programs:

- Adult Student Access Program (p. 397) (non-degree status enrollment in undergraduate and graduate credit classes)
- Credit certificate programs (p. 399)
  - Noncredit professional certificate programs (p. 1045)
  - Bachelor of General Studies degree program for adults 22+ (p. 397)
  - Summer college credit programs for high school students (p. 1049)
  - Intensive English language programs for international students (p. 399)
  - Intensive language programs (p. 399)
  - Osher lifelong learning community for adults aged 50+
  - Corporate/custom training and workforce development programs

Adult Student Access Program

www.miami.edu/asap

Students that meet the minimum requirements may be eligible to enroll in a maximum of 30 credit hours in an undergraduate, non-degree seeking category. Classes may be applied to certain degree programs, after all application and degree-seeking requirements are met. In order to be enrolled in this category, students submit an online application (http://www.miami.edu/asap/) with any required documents. A minimum 2.5 G.P.A. is required to continue in the program beyond 12 attempted credit hours.

Students that meet the minimum requirements may enroll in up to 6 credit hours (600/700 lecture classes only), lifetime maximum, in a graduate non-degree seeking category. Classes may be applied to certain degree programs, after all application and degree-seeking requirements are met. Not all graduate departments participate in this program. In order to enroll in this category, students submit an online application (http://www.miami.edu/asap/), after securing the written permission of the participating graduate department.

For more information, contact: The Adult Student Access Program, Division of Continuing and International Education, University of Miami, umnondegree@miami.edu, 305-284-4000.
