Theories and empirical findings on the causes of civil wars, their termination and conduct. Questions addressed in the course include: Why do civil wars occur? Are economic or political causes more important? How do civil wars end? Are ethnic civil wars different from wars fought for political ideology or material gains? What role do natural resources play in civil wars? Why are civilians especially likely to be victimized in some civil wars but not in others? Why do warring parties resort to terrorism? How do civil wars end? What factors are more conducive to long-lasting peace?
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 341. Nationalism, Ethnicity, and Political Conflict. 3 Credit Hours.
Examines theories of ethnic and national conflict focusing on contemporary issues throughout the world.
Prerequisite: POL 203 or INS 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 342. State Government and Politics. 3 Credit Hours.
State constitutions, political parties, legislatures, executives court systems, administrative systems and services, financial problems, city and county governments, local-state, federal-state and interstate relations. Special emphasis on governments in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

POL 343. Government in Metropolitan Areas. 3 Credit Hours.
This course will introduce the student to the organization and functions of counties and municipalities in the United States. On occasion guest speakers will be featured. We will examine Miami-Dade County as a concrete example of the course content.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 344. Gender and Politics. 3 Credit Hours.
Compares the roles played by men and women in political systems worldwide; examines public policy outcomes with significant gender-based effects, including policies on sexuality & reproductive health, gender-based violence, work & the family, and access to education.
Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
POL 345. The United States and Asia. 3 Credit Hours.
Political, economic, and security aspects of America's relations with the Asian-Pacific area. Trade and alliance relationships. Actions and interactions of Asian states, their alignments with each other; the impact of these alignments on their relationships with the United States and in the global balance of power. 
Prerequisite: POL 203 or INS 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 346. U.S.-Latin American Relations. 3 Credit Hours.
Systematic survey of U.S.-Latin American relations highlighting contending paradigms in the study of hemispheric relations. Examines issues in East-West and North-South relations and political economy of Brazil, Mexico, and Argentina. Considers alternative U.S. foreign policies. 
Prerequisite: POL 202 or POL 203 or INS 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 347. American Foreign Policy. 3 Credit Hours.
This course investigates how American primacy came to be, what its consequences are, and what will drive American foreign policy in the future. Students use social science to evaluate claims and understand the world, improve their ability to advance and defend arguments, and develop a broad base of knowledge about American foreign policy history and issues.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 348. United States Relations with the Middle East. 3 Credit Hours.
Evolution of American relations with the Middle East. Analysis of the motivations and calculations, including domestic and external sources of policy-making and implementation. Emphasis on post-World War II period, with particular attention to the current administration.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 349. U.S. Defense Policy. 3 Credit Hours.
Examination of key problems of national security in the post-Cold War environment. Emphasis on the structure and functioning of the U.S. defense establishment and its interactions with its most probable adversaries and allies. Consideration of the constraints on, and options open to, policy planners, and with the institutional elements of the decision making process.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

POL 351. Public Opinion. 3 Credit Hours.
Political functions of public opinion; opinion dynamics in the U.S.A.; quantitative analysis of elements in opinion change; principles of political control via mass media in the U.S.A.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 352. Political Parties. 3 Credit Hours.
Analysis of political organizations and electoral processes in the United States: their history, current status, and present trends. Consideration of the organization, control, and finances of political parties and pressure groups, their characteristic practices, and their relationship to political democracy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 353. Interest Groups and Lobbying. 3 Credit Hours.
Analysis of lobbying and political interest groups in the United States; history, current status, and present trends. The organizations, control, and finances of pressure groups, their characteristic practices, and their relationship to democracy. Also, lobbying by citizens and groups more broadly, including the role of campaign contributions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
POL 354. The CIA and the World of Intelligence. 3 Credit Hours.
What the CIA does, how it does it, and the ways in which the CIA works with other intelligence agencies. Topics explored include: notable intelligence successes and failures, key intelligence issues, and ethical debates about intelligence activities including covert action.

Components: LEC.
Grading: GRD.

Typically Offered: Fall.

POL 359. International Organizations. 3 Credit Hours.
International organizations which, in addition to contributing to the solution of international problems, also help to provide rules and structures to manage state-to-state relationships.

Components: LEC.
Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

POL 360. Ending Wars and Building Peace. 3 Credit Hours.
How local and international actors build sustainable peace strategically through peacekeeping, peace accords, reconciliation, education, human rights, international law, and state-building.

Components: LEC.
Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

POL 361. Social Movements. 3 Credit Hours.
Addresses questions central to social movement activists and researchers. Draws on examples from across the Americas and on current social movement research.

Components: LEC.
Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

POL 367. The Historical Roots of American Imperialism. 3 Credit Hours.
Examines the assertive and exploitative aspects of U.S. foreign policy.
Prerequisite: POL 203 or INS 101.

Components: LEC.
Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

POL 370. Global Energy Politics. 3 Credit Hours.
Energy use throughout history has shaped humanity's politics and economics; the politics of the depletion of fossil fuels; global warming; "green" alternative energies: solar; wind; waves; civilian nuclear power.

Components: LEC.
Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

POL 372. Introduction to Criminal Justice. 3 Credit Hours.
Selected topics in criminal law with an emphasis on constitutional criminal procedure and post-9/11 developments in federal criminal law: constitutional principles covering investigation and arrest, racial profiling, warrant-less searches, controversial interrogation techniques, rights of "enemy combatants" and the imposition of capital punishment.

Components: LEC.
Grading: GRD.

Typically Offered: Spring.

POL 373. Constitutional Law I. 3 Credit Hours.
A study of the development of the principles of American Constitutional Law, with a course focus upon those constitutional principles developed from the original document. Areas of study include judicial review, separation of powers, the Commerce Clause, the Contract Clause, and the Due Process Clauses.

Components: LEC.
Grading: GRD.

Typically Offered: Fall.
POL 374. Constitutional Law II. 3 Credit Hours.
This course will cover some of the 27 amendments to the U.S. Constitution. It will mainly focus on the constitutional limits placed on the national and state governments by the Bill of Rights and the Fourteenth Amendment. This study of the historical, political and legal development of constitutional law in the area of civil liberties will be done in large part by reading and discussing the major U.S. Supreme Court opinions related to these amendments and others.
Prerequisite: POL 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 378. African Politics. 3 Credit Hours.
An opportunity for students to develop their own interests in African Politics through extensive research and analysis. Students critically evaluate the process of economic development in the region with respect to the interaction of politics and economics. Included within this evaluation is an understanding of the benefits and detractions of development strategies, a working knowledge of development policy and an appreciation of the complex processes leading to the success or failure of development efforts.
Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 379. South East Asian Politics. 3 Credit Hours.
The politics, economics, and history of Southeast Asia. Provides the opportunity for students to develop their own interests in the topic through extensive research and analysis.
Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 381. West European Politics (Previous Title: European Politics and Government). 3 Credit Hours.
Examination of political and economic developments in western European countries.
Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 382. Government and Politics of the Federal Republic of Germany. 3 Credit Hours.
An examination of Germany's political system, its political parties, and the country's economic, social and foreign policies.
Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 383. Politics in China. 3 Credit Hours.
Development and nature of Chinese domestic politics in theory and practice; problems of political stability and conflict; the role of historical and cultural traditions, institutions, social, economic and personality factors in Chinese politics; process of change and problems of leadership succession; the significance of changes in the character and style of Chinese leadership.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 384. Postcommunist Russian Politics. 3 Credit Hours.
Examines the demise of the USSR and the tumultuous post-communist transition in Russia from Gorbachev to Putin and Medvedev. The foundations of state power, the political party system, civil society, petro-state capitalism, endemic corruption, current politics, and Russian nationalism are examined through the lens of western and Russian political science theories.
Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
POL 385. Politics and Society in Latin America. 3 Credit Hours.
Introduction to the politics of Latin American countries focusing on 20th century history, the impact of the Cold War and home-grown social struggles, economic development models, the difficulties of democratic consolidation, U.S-Latin America relations, the emergence of new political actors such as women's and indigenous movements, and current political constellations. The course combines a study of thematic issues with case studies. Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

POL 386. Democratic Consolidation. 3 Credit Hours.
Explore the general concept of "democratic consolidation" which has become a timely topic in the discourse of today's foreign policy. We will examine the central theoretical concepts that frame the discourse and then examine several case studies. Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 387. Politics of the Middle East. 3 Credit Hours.
Comparative analysis of the political development of the Middle East in terms of nations and as a region. Particular stress is on the relationships within the region and with other regions of the world. Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 388. Politics of Israel. 3 Credit Hours.
It is the purpose of this course to examine the Israeli system. Three themes will structure this investigation. The first considers the complex, and evolving, identity questions and politics that attend Jewishness, Zionism and being Israeli; the second investigates legitimacy, the nature and dynamics of the Israeli political system; and the third engages the multidimensional nature of Israeli security. Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 389. Special Topics in Comparative Politics. 3 Credit Hours.
A lecture course in Comparative Politics, designed to give the student a greater degree of knowledge of a particular subject within this subfield. This topic may be repeated for credit. Prerequisite: POL 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 390. Special Topics in American Politics. 3 Credit Hours.
A lecture course in American Politics, designed to give the student a greater degree of knowledge of a particular subject within this subfield. This topic may be repeated for credit. Prerequisite: POL 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 391. Special Topics in International Relations. 3 Credit Hours.
A lecture course in International Relations, designed to give the student a greater degree of knowledge of a particular subject within this subfield. This topic may be repeated for credit. Prerequisite: POL 203 or INS 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 392. International Terrorism. 3 Credit Hours.
Study of phenomenon of low-intensity warfare known as international terrorism in all its variations: state, state-sponsored, state-supported, domestic revolutionary terrorism and counter-terrorism. Also examines governmental policies of countering terrorism. Prerequisite: POL 202 or POL 203 or INS 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 393. Special Topics in Public Administration, Policy, and Law. 3 Credit Hours.
A lecture course in Public Administration, Policy, and Law, designed to give the student a greater degree of knowledge of a particular subject within this subfield. This topic may be repeated for credit.
Prerequisite: POL 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 394. Special Topics in Political Theory and Methods. 3 Credit Hours.
A lecture course in Political Theory and Methods, designed to give the student a greater degree of knowledge of a particular subject within this subfield. This topic may be repeated for credit.
Prerequisite: POL 201 or POL 202 or POL 203 or INS 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 395. Transfer Credit in Political Theory and Methods. 1-9 Credit Hours.
Course for which there is no direct UM equivalent.
Components: LEC.
Grading: GRD.

POL 396. Transfer Credit in Public Administration, Policy, and Law. 1-9 Credit Hours.
Interdisciplinary workshops will treat different policy issues with a view toward developing a theory of deliberate social change. The scenario will include the stance and role of the change agent and the institutional forms involved in changing urban settings.
Components: LEC.
Grading: GRD.

POL 397. Transfer Credits in International Relations. 1-9 Credit Hours.
Course for which there is no direct UM equivalent.
Components: LEC.
Grading: GRD.

POL 398. Transfer Credit in Comparative Politics. 1-9 Credit Hours.
Course for which there is no direct UM equivalent.
Components: LEC.
Grading: GRD.

POL 399. Transfer Credit In American Politics. 3 Credit Hours.
Course on American politics for which there is no direct UM equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 401. The Election. 3 Credit Hours.
In a democracy, the actions of the government are based on the wishes of the citizenry. We will examine the vital role that elections play in this process, specifically focusing on the issues and events surrounding the on-going elections.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 402. Latino Politics. 3 Credit Hours.
An examination of the impact of Latinos on domestic politics, the impact of transnational migration on hemispheric politics, and the impact of recent waves of immigration on U.S. society, Latin American Society, the economy, workforce, education, media, culture, healthcare, and law enforcement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 491. Immigration Reform and the 2014 Election. 3 Credit Hours.
This is a unique experience that will include high-profile guest speakers. The course encourages active student participation through social media. We will examine the debate on immigration including both documented and undocumented workers. The course examines the impact of recent waves of immigration on U.S. society, market, workforce, education, media, culture, healthcare, and law enforcement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
POL 499. Special Topics. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 501. Budget and Financial Management and Administration. 3 Credit Hours.
Role of the budget in shaping public policy; managing public revenues; budgetary theory, politics, and fiscal management. Examples from state, municipal and federal governments.

Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 502. Politics of Civil Rights. 3 Credit Hours.
An examination of civil rights policy and politics from Reconstruction to the present, with a focus on the enactment of landmark civil rights bills in the 1960s.
Prerequisite: POL 201.

Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 503. Organizational Dynamics and Management. 3 Credit Hours.
Organizational dynamics and management in public and non-profit organizations. Focus on organizational theories, leadership, behavior, goals, effectiveness, and change, with an emphasis on the distinctiveness of public organizations, public-private partnerships, new public management, and digital governance.

Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 504. Biology and Politics. 3 Credit Hours.
Political scientists traditionally study political decision-making as a product of individual level characteristics. For example, a person’s partisan identification is highly predictive of their vote choice. Political scientists have also begun to assess the influence of social forces on our politics. For example, it has been shown that everyday discussions about politics with friends, neighbors, and coworkers influence political attitudes and behaviors. More recently, political scientists have begun to examine the influence that our biology has on our politics. This seminar is a survey of this growing area of research.

Components: SEM.
Grading: GRD.
Typically Offered: Summer.

POL 506. From Plato Through Rawls. 3 Credit Hours.
Political thought of the past with more recent insights and concepts, often drawn from the work of theorists who question what is taken for granted in traditional political theory.
Prerequisite: POL 201 or POL 202 or POL 203 or INS 101.

Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 508. Equity and Diversity in Public Administration. 3 Credit Hours.
Federal and state policies, laws, and court decisions as means for helping public administrators develop policies and procedures that meet legal requirements and recognize the values of equity and diversity in the treatment of its citizenry and public employees.

Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 509. Issues in Judicial Pol.. 3 Credit Hours.
The Supreme Court of the United States (SCOTUS) through the lens of upcoming cases on the SCOTUS’s docket and through recently decided cases that were of important legal precedent.

Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 510. Statistics for Politics and Public Administration. 3 Credit Hours.
This course focuses on the use of statistics to conduct quantitative research (i.e., statistics) in political science and public administration. The course emphasizes hands-on data work. Students will learn how to perform political analyses – and present findings in an appropriate manner – using SPSS statistical software.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 511. Security in the Arabian Peninsula. 3 Credit Hours.
Examines the security environment of the Arabian Peninsula.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 512. Advanced Political Analysis. 3 Credit Hours.
This course teaches students how to do social science research using the applied techniques of statistics and case study analysis while exposing them to research in the leading sub-fields of political science. Students will produce an original paper that evaluates an academic question using empirical social science evidence.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 513. Models of Politics. 3 Credit Hours.
Hands-on examination of the process by which quantitative and qualitative models are constructed in political science. The course focuses on the creative aspect of model building and diverse forms of theory construction.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 514. Art and Politics. 3 Credit Hours.
Explores the issues of, political legitimacy, international relations, and concepts of justice by examine the interrelatedness of works of art and politics.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 515. Media Content Analysis. 3 Credit Hours.
There are few facets of our lives which are not directly affected by media content. From cell phones to televisions, the media is with us all the time. But what messages are contained in the mass media? What methods can we employ to study media content scientifically? This course will explore methods of analyzing media sources including movies, newspapers, magazines, and television Course topics will include political bias, campaign coverage, and news content. Students will design their own projects and implement their own coding strategies.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 516. Experiments in Political Science. 3 Credit Hours.
Examines the experimental method in the study of politics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

POL 517. Introductory Statistical Methods in Political Science. 3 Credit Hours.
The tools needed to manipulate and analyze quantitative data rigorously so you may answer questions of political interest. First in a two-course sequence (followed by POL 518).
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 518. Advanced Statistical Methods in Political Science. 3 Credit Hours.
The maximum likelihood framework for statistical inference in the study of politics. Second in a two-course sequence (preceded by POL 517).
Components: SEM.
Grading: GRD.
Typically Offered: Spring.
POL 519. Introduction to Game Theory for Political Science. 3 Credit Hours.
The rudiments of non-cooperative game theory. Mainly intended for political science students, but presents applications from other academic disciplines such as economics, business administration, sociology, and psychology.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 520. Internship. 3 Credit Hours.
Provides advanced political science majors with an opportunity to participate in a structured, supervised internship. 25-35-page research paper required. Permission of instructor is required before starting the internship.
Requisite: Plan of Political Science.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 521. Public Affairs Internship. 3 Credit Hours.
Opportunity for the advanced student specializing in public administration to participate in an administrative capacity in an agency of state or local government. Periodic conferences with adviser and paper required. Permission of instructor is required before starting the internship.
Requisite: Plan of Political Science.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 522. Introduction to Graduate Public Administration. 3 Credit Hours.
Introduction to concepts, issues, problems, theories and process in the field of public administration and/or public management.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

POL 523. Problems in Public and Non-Profit Management. 3 Credit Hours.
Nature of the power vested in administrative bodies and problems involved in management procedures. Special emphasis on local or non-profit administration.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 524. Non-Profit Organizations: Law, Policy, and Management. 3 Credit Hours.
This course teaches students the essential requirements for creation and operation of tax-exempt nonprofit organization in accordance with state and federal law. The course covers a wide range of relevant topics including guidelines for charitable giving and charitable solicitation, pitfalls that can result in personal liability for officers and directors, and statutory constraints on legislative lobbying and political activities.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 525. Comparative Public Policy and Administration. 3 Credit Hours.
Comparison and analysis of the organizational and managerial policy problems of developed and developing nations. The administrative process will be considered within the institutional and cultural framework of each nation. Case studies will be used to focus on transition from traditional to modern techniques of public management.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 526. Administrative Law. 3 Credit Hours.
Administrative law is the study of the legal relationship of government agencies to legislatures, courts, and private parties. The course examines the legal dimensions of bureaucratic power and procedures as well as constitutional and statutory constraints on regulators and administrators. Topics include rule making, adjudication, investigation and enforcement, political controls on agencies, judicial review of agency decisions, governmental liability and immunity, public records and open meetings laws. Both federal law and Florida law are covered. The course assumes a basic knowledge of the American legal system, constitutional law and bureaucracy.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
POL 527. Comparative Political Institutions. 3 Credit Hours.
The concept of institutionalism by studying three major sets of democratic institutions: electoral systems, legislatures, and political regimes.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 528. Advanced Seminar on Electoral Behavior. 3 Credit Hours.
This seminar examines the opinions that Americans have and how those opinions are expressed through participation in elections. At the end of the semester we will also examine other forms of political participation (e.g., interest groups).
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 529. Conducting U.S. Elections. 3 Credit Hours.
Fair and free democratic elections are the heart of US democracy. This course will examine who gets to vote, whether election laws and rules are fair (and fairly implemented), and proposals to reform the way elections are run.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 530. Intelligence and National Security Decision Making. 3 Credit Hours.
This course will study the US national security community structure and decision making process. The course will look at the National Security Council, the principal national security agencies (such as the CIA, Defense Department, and State Department), how they interact, and their roles in dividing and executing policy. We will also examine the role and function of senior policy decision makers such as the President. We will study recent policy challenges such as Iraq and Afghanistan as examples of National Security policy.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 531. Global Environmental Politics. 3 Credit Hours.
Examination of the environment within the context of economic globalization. Contrasts the international trading regime and those regimes designed to protect the environment, with specific attention to the issues of global warming and bio-diversity.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 532. Art and Politics in Paris. 3 Credit Hours.
Analysis of the relationship between narratives, aesthetics (beauty) and the political/social world. By successfully completing this course, students will understand how humans interpret the political, social, and physical world through narrative. Come to see how most/all political controversies involve competing narratives. How false narratives are deployed to manipulate the public. Realize that through art important analytical arguments are made, which impart substantial insight into social, political, and physical phenomena. See how philosophy is intelligently conveyed through art - including approaches to political legitimacy, justice, and how important analytical arguments are made. To analyze the relationship between art and politics, we draw on renaissance, modern, contemporary, and indigenous art. Paris is arguably the center of the art world, with a number of museums holding a surfeit of socially and politically important works. We visit a number of these museums. After visits to these museums, time in class will be dedicated to discuss those works you, the students, find significant. A requirement for this class is a camera (a camera phone is acceptable), with which you photograph those works you’d like to discuss in class.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

POL 533. Courts and Controversy. 3 Credit Hours.
Course places the students in the role of advocate, justice, or court observer for the purposes of arguing and deciding current or recent Supreme Court cases.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 534. Applied Policy Analysis. 3 Credit Hours.
Examines a variety of policy problems through the framework of problem definition, formulation of alternatives, assessment of alternatives, and policy impact evaluation. Students will also be introduced to cost-benefit analysis and evaluation methods.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 536. U.S. Health Care Crisis: Politics and Policies. 3 Credit Hours.
This seminar will explore the politics and policies of healthcare in the United States. Our examination of the current crisis in cost and coverage will draw on experience from the debates on comprehensive and incremental reform over the past decade. In addition, we will explore the politics and policies of other health and science issues. Students will be expected to attend every class and be actively involved in class discussions. There will be two examinations, one at mid-term and a final based on readings and course discussions.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 537. Microeconomics for Public Policy. 3 Credit Hours.
Describes and explains principles and theories of microeconomics in the context of public policy applications.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 540. Human Resource Management in Public Service. 3 Credit Hours.
Topics include human resource management in public service: job analysis and design, evaluation and appraisal, recruitment and interviewing, training and development, wages and benefits, and health and safety. Unionization, regulation of wages, hours and working conditions, financial security for workers, manpower planning and job anti-discrimination legislation are considered.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 541. Philosophy of Law. 3 Credit Hours.
Case-based study of jurisprudence designed to illuminate and explain philosophies of law. Examination of theories of free expression; bio-ethical matters; theories of punishment and legal responsibility; and the placement of religious discourses in liberal systems of law. Special attention to cases involving fundamental rights and liberties; the role of the individual and the state in civil society; and the capacities of individual to be legally competent in contemporary systems of law.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 544. Chinese Foreign Policy. 3 Credit Hours.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 545. Environmental Policy Making. 3 Credit Hours.
Examination of different ethical approaches to the environment; the federal government's management of natural resources; selected environmental policies; international environmental policy issues. Topics include federal management of national grazing lands, national forests, and minerals in the public domain. Analyzes environmental policies such as air, water, toxic wastes, energy, and environmentally-related issues in international trade and national security.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 546. Public Policy Process and Implementation. 3 Credit Hours.
Examination of public policy issue areas including education, health, welfare, urban mass transit. Limits to effectiveness of federal, state and local governments in providing services. Techniques for analyzing the effectiveness of public policies; research techniques for the assessment of future policy alternatives.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 547. Congressional Representation. 3 Credit Hours.
This course examines how and when citizens influence legislators' behavior. More specifically, we examine how legislators' floor behavior reflects citizens' preferences and how these preferences influence the manner in which legislators build electoral coalitions.
Requisite: POL 201 Or POL 202 Or POL 203 Or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 548. Civic Participation and Democracy. 3 Credit Hours.
Citizens participate in the governing process by communicating their preferences and pressuring the government to respond. In this course we examine these various mechanisms of "civic participation", and discuss the meaning and consequences of participatory democracy. The course focuses on the contemporary United States, but we will devote some time to discuss civic participation in other countries as well.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 549. Energy Policy: Technology, Politics, and Society. 3 Credit Hours.
An interdisciplinary introduction to energy policy, focusing on studying three major and interrelated themes from a comparative perspective: technology, politics, and society. Covers energy policy examples from the United States, the European Union, China, India, and other countries.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 550. Advanced Seminar on American Politics. 3 Credit Hours.
This seminar provides students with a survey of significant research on major topics in American Politics. We will read influential works of the past, as well as recent cutting-edge research. Particular attention will be paid to discussing the methods and theories used in the research we will read. The purpose of the course is to acquaint students with the literature on American Politics, while also providing an opportunity for students to develop skills in critically assessing and skillfully conducting social science research.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 551. Productivity in the Public and Non-Profit Sectors. 3 Credit Hours.
Definitions and measures of productivity. Evaluation of government programs, and methods of productivity improvement.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

POL 553. The Environmental Movement: Groups, Beliefs and Values. 3 Credit Hours.
Exploration of the origins and political impact of environmentalism in the United States and, to a lesser extent, in the global context. Impact of democratic participation on environmental politics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 555. Total Quality Public Service Management: Achieving High Performance Government. 3 Credit Hours.
Examination of the theory and practice of Total Quality Management (TQM) in the government and non-profit sector. Focuses on budgetary, customer service, employee and process improvements that facilitate increased public and non-profit performance. Special emphasis to TQM's contribution to improved service delivery.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 556. Politics and Ethics. 3 Credit Hours.
Personal, professional, organizational, and societal levels of ethical analysis. Ethical theories will be reviewed and applied to actual cases that focus on public policy and/or the officials who create and implement it. Profiles of moral exemplars in public life will be examined. Course is usually offered during the January Intersession.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 557. Ethical and Managerial Issues in Government, Business and Non-Profit Organization.. 3 Credit Hours.
Governments at all levels in this country—national (Larry Craig, David Vitter, Mark Foley, Bill Clinton, Randy Cunningham, Tom DeLay, William Jefferson, James Traficant, Robert Torricelli, Jack Abramoff), state (former Illinois, Louisiana, New York, Ohio, and Arizona governors), and local (Miami, Providence city officials; Miami-Dade, Broward, and Palm Beach counties)—have encountered scandals involving ethical wrongdoing. Businesses (Enron, Worldcom) and nonprofit organizations (Boy Scouts, United Way) have faced similar problems. Countless less-visible examples of unethical and ethical behavior occur in organizations daily. This course examines the causes and consequences of such actions and the managerial strategies and competencies needed to effectively cope with the ethical issues confronting individuals and organizations.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
POL 558. From Electronic Government to Digital Governance. 3 Credit Hours.
Graduate and advanced undergraduate seminar explores the transition from electronic government (e-gov) to digital or d-governance, emphasizing political participation, citizen-centric public administration and the proliferation of global information technologies and social media.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 559. International Organizations. 3 Credit Hours.
International organizations which, in addition to contributing to the solution of international problems, also help to provide rules and structures to manage state-to-state relationships.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 561. Ending Wars and Building Peace. 3 Credit Hours.
How local and international actors build sustainable peace strategically through peacekeeping, peace accords, reconciliation, education, human rights, international law, and state-building.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 563. Senior Thesis. 3 Credit Hours.
General reading, preparation of research design and collection of information for senior thesis.
Requisite: Plan of Political Science.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

POL 564. Senior Thesis II. 3 Credit Hours.
Continuation of POL 563: writing and defense of the theses.
Requisite: Plan of Political Science.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

POL 565. The World Before European Domination. 3 Credit Hours.
Examines the historical roots of the contemporary international system, and questions the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 566. Activism. 3 Credit Hours.
Explores what activism is, the history and developments of activism around the world, and which activists strategies work best. Assignments will send students into the community to participate in local politics, work with local organizations, and engage in activism.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 569. LGBTI Politics. 3 Credit Hours.
Describes and explains global variance in government policies of interest to lesbian, gay, bisexual, transgender and intersex citizens including sodomy laws, anti-discrimination ordinances, same-sex marriage and adoption, military service, and the right to change one’s sex or identify as neither male nor female. POL 344 or WGS 344 Strongly Recommended
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 570. Uniting States in International Perspective. 3 Credit Hours.
How states form and fragment; The main actors in nation formation; the elements of continuity and change; the impact outsiders can have on the process.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
POL 571. Sex, Babies, and the State. 3 Credit Hours.
In one of the most profound revolutions of the past century, gender roles have irreversibly changed and equal rights for women and men has become a stated goal in western societies, even if not the reality. This course examines policies on reproduction, work and the family in advanced industrialized countries including Latin American Countries.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 572. Government and Business. 3 Credit Hours.
Government-business-society relations with emphasis on the social, economic, political, technological, ethical, and ecological environment.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 575. The Politics of Civil-Military Relations. 3 Credit Hours.
Course examines the relationship between states and their soldiers across various historical periods and regional contexts, and how this relationship has been altered in an era where the viability of old structures of state authority are no longer self-evident.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

POL 576. On Violence: The Politics of Extremes. 3 Credit Hours.
Literary and theoretical treatments are considered for what they can tell us about the causes, characteristics and consequences of violence. These insights are enlisted to help us understand violence enacted by states against their societies, societies against states, and within society itself.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 577. Security in South Asia: The Conflicts of Afghanistan, Pakistan, and India. 3 Credit Hours.
The security system of South Asia’s northern reaches and the current conflict involving Afghanistan, Pakistan, and India: considerations of sovereignty and the role of frontiers in world politics.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

POL 578. Energy and Security in Eurasia. 3 Credit Hours.
Engages the intersection of energy and security within the contested space of Eurasia.
Prerequisite: POL 202 or POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 579. The politics of post-communist transactions. 3 Credit Hours.
Examination of the creation, breakdown, and aftermath of communist governments in Eastern Europe and the USSR. Develops a theoretical framework for understanding cross-national patterns of post-communist development in the context of country-specific experiences.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 580. Ethnicity, Nationalism and Secession. 3 Credit Hours.
Examination of the creation, breakdown, and aftermath of communist governments in Eastern Europe and the Soviet Union. Using empirical evidence from four case studies, develops a theoretical framework for understanding cross-national patterns of post-communist development in the context of country-specific experiences.
Prerequisite: POL 202 or POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.
POL 581. Comparative Political Economy of Post-Industrial Democracies. 3 Credit Hours.
This seminar examines four key turning points in the development of capitalism: the industrial revolution, the aftermath of the depression and world wars, the oil crisis of the 1970's, and today's "globalization". We will compare the relationships between government and the economy in Western Europe, Canada, the U.S., Australia, New Zealand, and Japan in each period, and attempt to evaluate why these countries react similarly or differently to identical changes in world economy.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 582. Political Economy of Development. 3 Credit Hours.
Overview of the principal theoretical paradigms of the development process Comparative analysis of issues such as the role of the state, strategies of industrialization, changes in social structure, basic needs and the trade-offs between growth and equity.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 584. Contemporary Latin American Politics. 3 Credit Hours.
This course assumes a basic knowledge of Latin American politics, and is designed to foster deeper understanding of political processes in the region and to provide an overview of key debates among political scientists specializing in Latin America. We discuss issues related to democratic consolidation, political participation, representation and governance.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 585. Post-Communist Russian Foreign Policy. 3 Credit Hours.
Exploration of the various forms of political movements in Latin America, including parties, populists and radical groups. Examines diverse means of organizing and mobilizing support, the range of goals sought, and the conditions that give rise to the various movements. Special attention to the contemporary revival of populism in the region and its implications for democracy. Prerequisite: POL 211 and 212 or graduate standing.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 586. Conflict in the Middle East and Africa. 3 Credit Hours.
Introduction to major paradigms for the explanation of war and conflict in two of the most unstable regions of the world. Reading and class discussions on select cases of current and past conflicts in each region in order to discern patterns of conflict within and across regions, gain a clearer understanding of what drives violent conflict, and assess strategies of resolution.
Prerequisite: POL 202 Or POL 203 Or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 587. Illicit Trade in the Global Economy. 3 Credit Hours.
Examines the rise of illicit trade, the actors and groups involved, and international and national attempts to stop it
Components: DIS.
Grading: GRD.

POL 588. Politics in China. 3 Credit Hours.
Development and nature of Chinese domestic politics in theory and practice; problems of political stability and conflict; the role of historical and cultural traditions, institutions, social, economic and personality factors in Chinese politics; process of change and problems of leadership succession; the significance of changes in the character and style of Chinese leadership.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 589. Directed Research. 1-3 Credit Hours.
Provides an opportunity for students to assist faculty members with research for course credit. A student may only sign up if s/he has found a professor who has agreed to work with him/her. Does not count for credit in a 500-level seminar.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 590. Directed Reading. 1-3 Credit Hours.
Provides an opportunity for students to organize an independent study with a particular tenure-line faculty member. A student may only sign up if s/he has found a professor who has agreed to work with him/her. This course does not count for credit in a 500-level seminar.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 591. International Security. 3 Credit Hours.
Analysis and evaluation of approaches to international conflict, resolution, reduction and stabilization such as international organization, law, collective security, balance of power, functionalism, world government, morality, and conscience. Special emphasis on recent problems and efforts at institutionalizing social control.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 592. International Political Economy. 3 Credit Hours.
This course introduces students to the study of International Political Economy (IPE). It combines a focus on the main theoretical and methodological approaches used in the study of IPE with the analysis of historical and contemporary issues.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 593. International Relations of the Middle East. 3 Credit Hours.
Regional and inter-regional analysis of the foreign relations of Middle Eastern nations, domestic and geopolitical factors.
Prerequisite: POL 203 or INS 101, and POL 387.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 594. European Security. 3 Credit Hours.
Examines regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy, and related issues.
Prerequisite: POL 203 or INS 101.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 595. Special Topics in Political Theory and Methods. 3 Credit Hours.
A seminar in Political Theory and Methods; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis. The senior seminars may be taken in any sequence.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 596. Special Topics in Public Administration, Policy, and Law. 3 Credit Hours.
A seminar in public policy, administration and law; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis. The senior seminars may be taken in any sequence.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 597. Special Topics in International Relations. 3 Credit Hours.
A seminar in International Relations; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis. The senior seminars may be taken in any sequence.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 598. Special Topics in Comparative Politics. 3 Credit Hours.
A seminar in Comparative Politics; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis. The senior seminars may be taken in any sequence.
Prerequisite: POL 202.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 599. Special Topics in American Politics. 3 Credit Hours.
A seminar in American Politics; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

B.A. in Political Science

Program Overview

The major in political science requires 30 credit hours in POL courses. 21 of those credits must be completed in residence.

Students who complete INS 101 with a grade of C- or better will be given credit for POL 203.

This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are not seminars and do not fulfill this requirement: POL 520, POL 521, POL 563, POL 564, POL 589, POL 590.

Please note that some courses cover more than one sub-field. Students may not, however, use a single class to fulfill multiple sub-field requirements.

Please note that for the Natural Science Area of Knowledge Requirement degree candidates must earn at least 3 credit hours in the Natural Sciences. Departments offering these courses include Anthropology (only APY 203), Biology, Chemistry, Ecosystem Science and Policy (only ECS 111, ECS 112, ECS 202), Geography (only GEG 120), Geological Sciences, Marine Sciences (except MSC 313, MSC 314), Physical Sciences, and Physics. These credit hours may double count with any other requirement.

* All majors must complete a quiz for graduating seniors (to be used for assessment purposes) during their last semester of coursework.

** To satisfy the Advanced Writing & Communication proficiency requirement, students majoring in political science must complete at least one of the four required writing-intensive courses in the Department of Political Science.

*** A student may only share (i.e., "double count") maximally 6 credits between majors and minors offered by the Department of Political Science.

**** To count toward the major, each course must be completed with a grade of C- or above, with an overall GPA of 2.0 or above.

1 This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are not seminars and do not fulfill this requirement: POL 520, POL 521, POL 563, POL 564, POL 590.

Mission
The Department of Political Science (POL) is a community of scholars and students seeking a deeper understanding of politics, and fosters a commitment to lifelong learning, intellectual growth, and civic responsibility. POL is dedicated to helping students develop analytical abilities, communication skills, and the awareness of political processes in a complex global society. We provide students with rigorous training in the field of political science, and exposure to new knowledge through empirical social science research.

Goals
Political science majors gain an understanding of American political and legal life, the workings of other countries' political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

Student Learning Outcomes
- Students will develop knowledge of key political science concepts.
- Students will develop the ability to analyze evidence and draw reasoned conclusions.
- Students will develop the ability to communicate clearly in written form.

Total Credit Hours: 15

1 A minimum grade of C- or better and a 2.0 gpa are required for all courses within the department.
2 A minimum of 9 credits must be earned in residence, thus a maximum of 6 credits can be transferred in.
3 One of the two elective courses must be a 500 level course.

Psychology
http://www.psy.miami.edu

Dept. Code: PSY

Introduction
Psychology is the study of how individuals think, behave, feel, and relate to others. Because of its broad and fundamental nature, the psychology major prepares students for graduate study and/or careers in a wide range of people-oriented professions (e.g., psychology, medicine, law, business,
Psychology majors learn about human behavior and gain the analytical and critical thinking skills that are highly-valued in the workforce.

Educational Objectives
The Department of Psychology seeks to provide students with exposure to and a fundamental understanding of psychological science by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

Degree Programs
The Department of Psychology offers a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree.

Departmental Honors
Students can earn Departmental Honors in Psychology by demonstrating excellence in their course work and completing a Senior Honors Thesis in Psychology.

1. Excellence in Coursework – A minimum 3.3 combined GPA and a minimum 3.5 psychology GPA is required.

2. Senior Honors Thesis in Psychology – This is an independent empirical research project that is completed across two semesters (i.e., PSY 580 and PSY 581) under the supervision of a faculty mentor in the Department of Psychology. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services is also required.

PSY 106. Freshman Advising Contact Term (Fact). 1 Credit Hour.
Educates students about the structure and function of a research university, introduces them to the academic rules and regulations of the University of Miami and the Department of Psychology, enables them to think critically about their own graduation plan, and prepares them to enter the professional world.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 110. Introduction to Psychology. 3 Credit Hours.
A survey of modern scientific psychology. Topics include learning, memory, perception, cognition, personality, motivation, emotion, development, abnormal psychology, and social psychology. Participation in a small number of experiments is required to ensure that students become acquainted first hand with the experimental laboratory methods used in Psychology. Students may choose to satisfy this requirement by writing a small number of methodology papers instead.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 175. Special Topics. 1-3 Credit Hours.
Content varies by semester.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 190. Faculty Overview of Research and Undergraduate Mentoring (FORUM). 1 Credit Hour.
Critical discussion of research reports in psychology.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 206. Transfer to the University of Miami (TUMS). 1 Credit Hour.
Educates students about the structure and function of a research university, introduces them to the academic rules and regulations of the University of Miami and the Department of Psychology, enables them to think critically about their own graduation plan, integrates them into the social atmosphere of the University, and prepares them to enter the professional world.
Requisite: Permission of a UASP advisor, C- or higher in PSY 110.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
PSY 210. Social Psychology. 3 Credit Hours.
The major theories, methods and research findings in social psychology. Attitude formation and change, person perception, interpersonal attraction, aggression, group structure, leadership, conformity and mass phenomena. Emphasizes the individual as the basic unit of analysis (compare SOC 302). Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 220. Psychobiology. 3 Credit Hours.
Behavior viewed from a biological perspective. Survey of biological factors subserving sensation, perception, sleep, emotions, motivation, learning, memory, and development. Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 230. Child and Adolescent Development. 3 Credit Hours.
Survey of significant aspects of growth and development throughout the lifespan. Emphasis placed on childhood and adolescence. Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 240. Abnormal Psychology. 3 Credit Hours.
Diagnostic formulations of the clinical syndromes; theories of psychopathological states. Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 250. Cognitive Psychology. 3 Credit Hours.
Survey of theory and research on human information processing and cognitive processes. Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 260. Personality Psychology. 3 Credit Hours.
A survey of the area of personality, including the relation of personality to general psychology, history of theory and research in the field, definition, assessment, and research findings in major substantive areas. Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 270. Industrial and Organizational Psychology. 3 Credit Hours.
Applications of psychology in business, industry, and to organizational effectiveness in general. Supervisory, leadership, morale, personnel selection, training, human factors engineering, and consumer psychology. Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 275. Special Topics. 3 Credit Hours.
This course focuses on the features that characterize science and the ways that pseudoscience (e.g., ESP, astrology, energy therapy, aliens, ghosts) deviates from these. Students will learn about the factors that influence human thinking, decision making, and behavior as well as how to critically evaluate the credibility of claims and arguments. This course will help students improve their analytical and reasoning skills, support their arguments and evaluate the arguments made by others, and become better consumers of information. Prerequisite: C- or higher in PSY 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
PSY 280. Introduction to Research Projects I. 1-3 Credit Hours.
Students assist on a research project in psychology under supervision of a faculty member. Activities include library research, data collection and management, and attendance at research team meetings.
Prerequisite: PSY 110. Requisite: Permission of a UASP advisor.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 290. Introduction to Research Methods. 3 Credit Hours.
An introduction to research methods in psychology. We will discuss the scientific concepts, principles, and ways of thinking that are central to the study of psychology. Topics to be covered include the goals of psychological research, ethical issues in the design and implementation of research studies, research design strategies and types of measurement, and methods of presenting data. A variety of in-class assignments will provide students with the opportunity to reflect upon the ways in which research is conducted, presented, and interpreted.
Prerequisite: PSY 110 and MTH 101 or mathematics placement above MTH 101. Corequisite: PSY 291. Requisite: PSY or NEU major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 291. Introduction to Biobehavioral Statistics. 3 Credit Hours.
The basics of descriptive and inferential statistics, but the focus will be on the latter. We will cover only enough descriptive statistics to enable us to introduce the inferential concepts of regression, t-tests ANOVA and Chi Square.
Prerequisite: PSY 110 and MTH 101 or mathematics placement above MTH 101. Co-requisite: PSY 290. Requisite: PSY or NEU Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 292. Introduction to Biobehavioral Statistics for Non-Majors. 3 Credit Hours.
The basics of descriptive and inferential statistics, but the focus will be on the latter. Descriptive statistics to introduce the inferential concepts of regression, t-tests ANOVA and Chi Square.
Prerequisite: PSY 110 and MTH 101 or math placement above MTH 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 305. Introduction to Research and Graduate School. 1 Credit Hour.
Introduction to research and graduate school in psychology and psychology-related fields. The course will focus on different opportunities available to students at the University and on the graduate school application process.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 306. Introduction to Research and Graduate School. 1 Credit Hour.
Introduction to research and graduate school in psychology and psychology-related fields. The course will focus on different opportunities available to students at tile University and on the graduate school application process.
Requisite: Permission of a UASP advisor, 2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.

PSY 310. Attitudes and Persuasion. 3 Credit Hours.
An analysis of the major theories and research findings relating to attitude formation and change, including a review of widely used persuasion techniques.
Requisite: 2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292 or 2.5 PSY GPA, 9 credits in PSY courses including PSY 291 or PSY 292, and 3 credits in MKT, CAD, COM, COS, CNJ, CPR, or CVJ courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 311. Emotion. 3 Credit Hours.
Theory and research concerning the development, arousal, and expression of emotional reaction.
Requisite: 2.5 PSY GPA, 12 credits in PSY courses including PSY 291 or PSY 292 or 2.5 PSY GPA, 9 credits in PSY courses including PSY 291 or PSY 292, and 3 credits in BIL courses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
PSY 312. Psychology of Gender. 3 Credit Hours.
Psychological theories and research related to understanding issues of gender across the lifespan.
Requisite: 2.5 GPA, 12 Credits in PSY including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 313. Romantic Relations. 3 Credit Hours.
An introduction to how social scientists think about, study, and intervene with romantic relationships.
Requisite: 2.5 GPA, 12 Credits in PSY including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 320. Psychology of Drugs and Behavior. 3 Credit Hours.
The psychological and physiological effects of drugs. Includes psychosocial aspects of drug use and the treatment and prevention of abuse. An introduction to psychopharmacology.
Requisite: 2.5 PSY GPA, 12 credits in PSY courses including PSY 220 and PSY 291 or PSY 292 or 2.5 PSY GPA, 9 credits in PSY courses including PSY 291 or PSY 292, and 3 credits in BIL 150 or higher or CHM 111 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 330. Psychology of Language Development. 3 Credit Hours.
The study of language acquisition, primarily focusing on infancy through 5 years. Topics covered include biological bases of language, sound discrimination abilities, babbling and speech production.
Requisite: 2.5 GPA and 12 Credits in PSY courses including PSY 230, PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 331. Psychology of Adulthood and Aging. 3 Credit Hours.
Major developments during the middle and later years of adulthood including changes in family and peer relationships, cognitive changes, physical changes, and psychological aspects of death and dying.
Requisite: 2.5 GPA and 12 Credits in PSY courses including PSY 230, PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 345. Abnormal Child Psychology. 3 Credit Hours.
Reviews definitions, theories, and causes of mental and cognitive disorders in youth, including anxiety, depression, conduct problems, and learning and intellectual disabilities.
Requisite: 2.5 GPA and 12 Credits in PSY courses including PSY 230, PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 355. Psychology of Thinking and Learning in Children. 3 Credit Hours.
Development of perceptions, thought, and language processes throughout the lifespan with an emphasis on early and middle childhood.
Requisite: 2.5 GPA and 12 Credits in PSY courses including PSY 230, PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 356. Psychology of Intellectual and Developmental Disabilities. 3 Credit Hours.
The etiological, social, and psychological aspects of intellectual and developmental disabilities.
Requisite: 2.5 PSY GPA and 12 credits in PSY courses including PSY 230 and PSY 291 or PSY 292 or 2.5 PSY GPA, 9 credits in PSY courses including PSY 230 and PSY 291 or PSY 292, and 3 credits in BIL or TAL courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PSY 360. Personality Theory. 3 Credit Hours.
The role of structure, development, dynamics, individual differences, assessments, and deviations.
Requisite: 2.5 GPA, 12 Credits in PSY including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 370. Psychology of Human Sexual Behavior. 3 Credit Hours.
Interaction of biological and social factors in normal sexual development, and behavior patterns; etiologies of dysfunctions, paraphilias and gender-identity disorders; assessment and intervention procedures.
Requisite: 2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292 or 2.5 PSY GPA, 9 credits in PSY courses including PSY 291 or PSY 292, and 3 credits in BIL 150 or higher, CHM 103 or higher or HCS 212.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 371. Stress Management. 3 Credit Hours.
Physiology and psychology of stress, with emphasis on mind-body (stress-health) connection. Integrates scientific knowledge with practice techniques such as muscle relaxation, cognitive restructuring, meditation, anger management, yoga, exercise, assertiveness training, and social support.
2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 372. Applied Behavioral Analysis. 3 Credit Hours.
The concepts, methods, and procedures used in behavior analytic research and clinical work. In this course, students will become familiar with the scientific foundations of behavioral science and the basic concepts and principles of behavior analysis. The course will emphasize terminology and definitions of behavioral concepts, as well as introduce the application of those concepts to bring about behavior change.
2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.

PSY 375. Special Topics. 1-3 Credit Hours.
Content varies by semester.
Requisite: 2.5 GPA, 12 Credits in PSY including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 380. Introduction to Research Projects II. 1-3 Credit Hours.
Students assist on a research project in psychology under supervision of a faculty member. Activities include library research, data collection and management, and attendance at research team meetings.
Requisite: Permission of a UASP advisor, 2.5 PSY GPA, and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 390. Intermediate Research Methods and Biobehavioral Statistics. 3 Credit Hours.
Students will conduct two (or more) pre-planned experiments. For each experiment, students will analyze the data and write up the components of a research report. In addition, students will receive detailed feedback on the assignments they submit, as an aid to improving their writing skills, reinforcing and reviewing their knowledge of research design and methodology, and expanding their understanding of statistical analyses as well as their interpretation and presentation.
Requisite: 2.5 GPA and 12 Credits in PSY including PSY 290 and PSY 291 or PSY 292 or 9 credits in PSY including PSY 290, and PSY 291 or PSY 292, BIL 268 or NEU 280, NEU 380 or NEU 480.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 391. Tests and Measurements. 3 Credit Hours.
Theory and principles of construction, use, evaluation, and interpretation of psychological tests and testing procedures.
Requisite: 2.5 GPA, 12 Credits in PSY including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
PSY 410. Social Interaction Processes. 3 Credit Hours.
An in-depth analysis of variables leading to, and processes involved in, human social interactions ranging from superficial encounters to intimate relationships.
Requisite: 2.5 PSY GPA and 15 credits in PSY courses including PSY 210, PSY 291 or PSY 292 and PSY 390.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 411. Relationships and Health. 3 Credit Hours.
Interpersonal processes that play out in the course of chronic physical illnesses. An integrated foundation on theories and concepts of interpersonal relationships in psychology and a comprehensive introduction to how these theories and concepts can be applied to relationships among family members dealing with physical illnesses. Students will be introduced to diverse perspectives on interpersonal relationships and to a broad perspective on physical illnesses as “family” diseases, across the illness trajectory.
Requisite: 2.5 PSY GPA and 15 credits in PSY courses including PSY 291 or PSY 292 and PSY 390.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 412. Social and Cultural Neuroscience. 3 Credit Hours.
Human neuroimaging research on social behavior (e.g., person perception, intergroup relations, and social learning), and the relationships between culture and the brain (e.g., cultural learning and neural mechanisms underlying cross-cultural differences). The course will also cover foundations of social and cultural neuroscience (e.g., shared and unique aspects of human culture and social behavior, and techniques for studying culture and social behavior using neuroscience methods).
Requisite: 2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 413. Cultural Diversity in Psychology. 3 Credit Hours.
An evaluation of psychology from cultural perspectives and promote critical thinking about various topics within psychology. The first half of this course will cover topics such as research methods, enculturation, developmental processes, cognition, gender, sexuality, health, emotion, language, and communication from a cultural perspective. During the second half of the course we will discuss the role of culture in personality, abnormal psychology, treatment of abnormal behavior, social behavior and organizations.
Requisite: 2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 425. Psychobiology. 3 Credit Hours.
Basic neuroanatomy, neurophysiology, and neurochemistry followed by an introduction to the physiological bases of sensation, motor systems, motivation, emotion, learning and memory.
Requisite: 2.5 PSY GPA, 15 PSY credits including PSY 220, PSY 290, PSY 291 or PSY 292 or 2.5 PSY GPA, 12 Credits in PSY including PSY 290, and PSY 291 or PSY 292, BIL 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 426. Health Psychology. 3 Credit Hours.
The psychosomatic and biopsychosocial models of illness.
Requisite: 2.5 PSY GPA, 15 credits in PSY courses including PSY 220, PSY 290, and PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 427. Psychoneuroimmunology. 3 Credit Hours.
The most current literature in psychoneuroimmunology (PNI) allowing students to connect psychological, neuroendocrine and immunological processes and mechanisms. Students will apply this information within the context of chronic disease prevention, progression and intervention.
Requisite: 2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PSY 430. Psychology of Infancy. 3 Credit Hours.
Perceptual, motor, cognitive and social development during the first two years of life. Specialized research methods and assessment procedures.
Requisite: 2.5 PSY GPA; 15 PSY credits, including PSY 230, PSY 291 or PSY 292, PSY 390.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 431. Psychology of Social and Emotional Development. 3 Credit Hours.
Social and emotional growth; topics include family and peer relationships, sex roles, self-control, and moral development.
Requisite: 2.5 PSY GPA; 15 PSY credits, including PSY 230, PSY 291 or PSY 292, PSY 390.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 432. Prenatal Development. 3 Credit Hours.
A detailed understanding of prenatal development including conception, embryonic and fetal development, and birth. The effects and interplay of genetic and environmental factors on the health and well-being of the developing baby will be discussed throughout the course. The important role of preconception and prenatal care will also be discussed.
Prerequisite: GPA of 3.0 or higher;PSY 230.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 445. Cultural, Values, Religiosity, and Mental Illness. 3 Credit Hours.
Cultural differences in the manifestations, course, and outcome of severe mental illness (those in which psychosis is likely to occur). This seminar also explores the growing body of research on the relationship between chronic mental disorders and the following socio-cultural factors: ethnicity, religious values, family cohesion, attributions of control, and world-view. Finally, we will explore cultural differences in societies’ reactions to, and treatment of mentally ill patients.
2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 446. Issues in Clinical Psychology. 3 Credit Hours.
The scientific and theoretical bases of psychotherapy. The course has three distinct components: (1) An introduction to the concept of psychotherapy, including its historical context and the research evidence supporting its efficacy and effectiveness; (2) An interactive overview of major theories underpinning the practice of psychotherapy; and (3) A brief review of evidence-based treatment models for varying forms of psychopathology and clinical conditions.
2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 455. Evolution and Sex. 3 Credit Hours.
A biological/evolutionary approach to the study of human sexuality and cognition. The evolution of sexual reproduction and the evolution of the two sexes. Initial discussions will introduce the theory of evolution by natural selection and address the different levels at which selection operates. Building on this foundation, the class will focus on why sex evolved and the myriad physiological and psychological adaptations that evolved as a consequence. Topics to be covered include sexual selection, mate selection, pregnancy, and parent-offspring conflict.
Requisite: 2.5 PSY GPA, 15 credits in PSY courses including PSY 290 and PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 456. Genetic and Developmental Disorders. 3 Credit Hours.
The diagnostic, etiological, and intervention issues in genetic and developmental disorders with a particular emphasis on the current state-of-the-science with regard to empirically supported concepts. The course will present information that will allow students a greater understanding of specific disorders and strategies for understanding developmental problems. Current research will be placed within a contemporary context that seeks to integrate educational, psychological and biomedical disciplines.
2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PSY 471. Positive Psychology. 3 Credit Hours.
Presents an introduction to the core assumptions and research findings in the field of positive psychology; explores interventions and applications informed by this field as applied to personal well-being, social relationships, and psychotherapy.
2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 472. Evolutionary Psychology. 3 Credit Hours.
Evolutionary psychology integrates concepts and evidence from evolutionary biology, behavioral ecology, anthropology, and cognitive science to better understand the evolved cognitive underpinnings of human behavior. The course covers topics such as natural selection, inclusive fitness, life history theory, emotions, aggression, cooperation, mating, morality, and religion.
2.5 PSY GPA and 12 credits in PSY courses including PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 474. Special Topics. 1-3 Credit Hours.
Content varies by semester.
Requisite: 2.5 PSY GPA and 15 credits in PSY courses including PSY 290 and PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 480. Research with Writing Credit. 1-3 Credit Hours.
Students assist on a research project in psychology under supervision of a faculty member. Activities include library research, data collection and management, and attendance at research team meetings. Students are also expected to complete a writing component that fulfills the University's criteria to receive writing credit.
Requisite: Permission of a UASP advisor, 2.5 PSY GPA and 15 credits in PSY courses including PSY 291 or PSY 292, PSY 390.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 490. Advanced Research Methods. 3 Credit Hours.
Students will develop, conduct and write up two research projects: (i) a project that uses descriptive methods and associated statistical techniques and (ii) a project that uses experimental methods and associated statistical techniques. These projects will integrate the concepts and skills learned in the Introductory and Intermediate Methods courses as well as the Introductory and Intermediate Statistics courses. Students will be asked to select a research topic and first develop a survey to examine the relationship between two predictor variables and an outcome variable. They will collect and analyze their data using correlational techniques (e.g., regression analyses) and will write up a methods and results section. Next, students will turn their descriptive study into an experiment. They will collect and analyze their data and write up a publishable research report that includes the findings from both the descriptive and experimental studies. The project will serve as a capstone, requiring them to find and critically evaluate relevant literature on their topic of choice, design a study taking into account time demands, sample characteristics and their effect on the hypotheses they are able to test, decide on instrument selection, consider potential extraneous and confounding variables (and how they will handle them if at all), select appropriate analyses for their data and hypotheses, and then present the results of their work in both poster and research report format.
Requisite: 2.5 PSY GPA, 15 PSY credits including PSY 291 or PSY 292, and PSY 390, Senior Status, BS in Psychology major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 491. Advanced Biobehavioral Statistics. 3 Credit Hours.
This course builds upon the material covered in PSY 390. After a brief review, analysis of variance and multiple regression will be covered using a general linear model (GLM) approach. The goal is to prepare students for graduate level work in applied statistics.
Requisite: 2.5 PSY GPA and 15 credits in PSY courses, including PSY 291 or PSY 292, PSY 390.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 520. Psychoneuroimmunology. 3 Credit Hours.
This course is designed to present some of the basic information necessary to interpret the current literature in psychoneuroimmunology (PNI) and to design research in this area.
Requisite: 2.8 PSY GPA, 18 credits in PSY, including PSY 390.
Components: LEC.
Grading: GRD.
PSY 540. Culture, Values, Religiosity, and Mental Illness. 3 Credit Hours.
Cultural differences in the manifestation, course, and outcome of serious mental disorders; the relationship between chronic mental disorders and ethnicity, religious values, family cohesion, attributions of control, and world view; cultural differences in societies' reactions to and treatment of mentally ill patients.
Components: LEC.
Grading: GRD.

PSY 575. Special Topics. 1-3 Credit Hours.
Content varies by semester.
Requisite: 2.8 PSY GPA, 18 PSY credits including PSY 390.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 580. Senior Honors in Psychology I. 3 Credit Hours.
Students work closely with a faculty member to design a unique research study and write a scientific paper to report on the results. Limited to undergraduate students only.
Requisite: Permission of UASP and faculty required, 3.5 Major GPA, 3.3 Combined GPA, PSY or NEU major, 18 PSY credits, including PSY 390.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 581. Senior Honors in Psychology II. 3 Credit Hours.
Students work closely with a faculty member to design a unique research study and write a scientific paper to report on the results. Limited to undergraduate students only.
Requisite: Permission of UASP and faculty required, 18 PSY credits including PSY 580.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

B.A. or B.S. in Psychology

Overview
The major in psychology requires 33 credit hours in PSY courses. AP Credit for Statistics (i.e., PSY 292) cannot count toward the psychology major. Students who declare the psychology major after they transfer credit for PSY 292 or complete PSY 292 can use PSY 292 as a substitute for PSY 291.

Only 6 credit hours of the following may count toward the psychology major:

<table>
<thead>
<tr>

</tbody>
</table>

All psychology majors who pursue a B.A. degree in the College of Arts and Sciences must complete a minor from the list of acceptable minors published by the College.

All psychology majors who pursue a B.S. degree in the College of Arts and Sciences must complete a minor in Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.

1. Note: At least 3 of these credit hours must be in a 400 level PSY writing course.

### Other Requirements

- Students must earn a minimum grade of C- in a PSY course to count it toward the psychology major.
- Students must have a minimum 2.8 combined, UM, and psychology GPA to declare the psychology major.
- Students are strongly advised not to continue with the psychology major if they have less than a 2.5 psychology GPA after 15 completed credit hours in psychology.
- Students must earn a minimum 2.3 psychology GPA and a minimum of 120 credit hours to graduate with the psychology major.
- Students must complete at least half of their psychology major in residence, including all 300, 400, and 500 level PSY courses.
- Only 6 PSY credit hours at the 300, 400, and 500 level may be taken through a UM Study Abroad Program with prior written approval.
Students completing a B.S. in Psychology must complete a minor in one of the following programs: Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Sciences, Mathematics, Microbiology & Immunology, or Physics. Students who complete a second major in one of the mentioned fields are not required to complete a minor.

**Mission**

In accordance with the goals of the University of Miami, the mission of the Department of Psychology is to acquire, advance, and disseminate knowledge within the psychological and biobehavioral sciences. In order to achieve these goals, the Department seeks a balance among several academic endeavors, including basic scientific research, applied research, undergraduate teaching, graduate teaching, professional training and development, and service to the community. In pursuing these activities, the Department seeks to attract and retain the highest quality faculty and students, foster respect for differences among people, nurture curiosity, and insist upon high standards of thought, study, and communication that should characterize the ethical, educated person.

**Goals**

In its undergraduate program, the Department seeks to provide students with exposure to, and a fundamental understanding of, the psychological sciences and related skills. Upon graduation, psychology majors will be able to apply this foundation to a variety of careers including business, law, human resources, and medicine. A psychology major will also prepare students for careers in psychology that do not require an advanced degree. The program seeks to deliver an integrative educational experience by promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

**Student Learning Outcomes**

- Students will develop a fundamental knowledge base in psychology as a scientific discipline.
- Students will develop written communication skills related to the science of psychology.
- Students will develop research and quantitative skills through coursework and/or supervised laboratory experiences.
### Minor in Psychology

</table>

1. Only 3 credit hours of PSY 280, PSY 380, and/or PSY 480 may count toward the minor.
2. PSY 106, PSY 190, PSY 206, PSY 305 do not count toward the minor.

* Students must earn a minimum grade of C- in a PSY course to count it toward the minor.
** Students must earn a minimum 2.0 psychology GPA to graduate with the minor.
*** Students must complete at least 9 of the 15 minor credit hours in residence, and only 3 of these credit hours may be taken through a UM Study Abroad Program with prior written approval.

---

### Religious Studies

religion.as.miami.edu

**Dept. Code:** REL

#### Introduction

Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students’ broad and deep apprehension of religion’s place(s) in human experience. The department’s educational work aims to strengthen students’ capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

The University regards the academic study of religion as an integral part of liberal, humane learning and seeks to assist students in understanding the role religion plays in human existence and culture. Instruction in the Department of Religious Studies is non-sectarian and seeks an open analysis of all points of view. Courses are designed to provide a general orientation to the academic study of religion for the undergraduate student, as well as more advanced exposure for those who wish to pursue professional careers where a study of religious ideas and institutions would be helpful, such as in psychology, sociology, history, journalism, teaching, law, medicine, the fine arts, religious education, the ministry, and the rabbinate.

The Department sponsors a wide variety of speakers and events each year, including a Religious Studies Colloquium series and a Forum on Religion and Public Life. The Forum has enriched the existing curriculum by bringing to the campus outstanding scholars and public intellectuals.

#### Educational Objectives

The general educational objectives of the Department are

1. to explore texts, histories, and ways in which humans from various cultures have understood their world including the beliefs, ethics, rituals, artifacts, and organizations of religions;
2. to understand the changing relationship between religion and elements of the wider culture including the dynamics of politics, art, economics, literature, and society and their relationship to religions;
3. to become familiar with the theories and methods used in the study of religion.

#### Degree Programs

The Department offers two tracks by which students may earn a major or a minor. The first track is Religious Studies, which is designed for students who are seeking a broad and comprehensive understanding of the world's major religions and the cultures in which they are practiced. The second track is Religion and Health Care, which is designed for students who are interested in any aspect of health care or who wish to supplement their pre-med concentration with coursework in the field of Religious Studies.
Departmental Honors
The Department of Religious Studies encourages its majors and minors to intensify and deepen their knowledge of religious texts, traditions, and issues through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in religion that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in religious studies or other disciplines.

Minimum requirements for the program are as follows:

1. A cumulative grade point average of at least 3.30;
2. A cumulative grade point average in religious studies of at least 3.50; and
3. A thesis that is approved by departmental faculty.

For the determination of honors, cumulative grade point average means either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere (whether or not the transfer work is accepted toward a degree at the University of Miami), whichever is lower.

Theta Alpha Kappa
Majors, minors, and other students who meet certain academic criteria are eligible for membership in Theta Alpha Kappa, the National Honor Society for Religious Studies and Theology. Theta Alpha Kappa sponsors events that enhance the academic and social life of the department.

URome
In keeping with its emphasis on a global approach to the study of religion and society, the Department sponsors a study abroad program known as URome. This semester-on-location program, which is open to all qualified University of Miami undergraduate students, is offered each spring semester in collaboration with the American University of Rome. A limited amount of scholarship support for the URome program is available for qualified Religious Studies majors and minors.

Total Credit Hours 120-126

* A major in Religion and Health Care leading toward the B.A. degree requires 24 credit hours in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0.
* A minimum of 12 credit hours in courses numbered 300 or above is required.
* Transfer students who major in Religion and Health Care must complete at least 12 credit hours in department offered courses numbered 300 or above in residence at the Coral Gables campus.

** Writing credit (W) in at least one course in the department
*** To ensure that majors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

**Suggested Plan of Study**

This plan of study includes:

- A minor in Chemistry
- Spanish language requirement
- Cognates: People and Society: Living on a Finite Planet, STEM: Data Structures, Algorithms and Techniques
- Pre-Med Track

### Mission

Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students’ broad and deep apprehension of religion’s place(s) in human experience.

### Goals

The department’s educational work aims to strengthen students’ capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

### Student Learning Outcomes

- Students will attain a grasp of the basic theories and methodologies of the discipline of religious studies.
- Students will acquire broad knowledge of the role that religions play in human life and society as well as deeper knowledge in the specific area of Religion and Health Care.
- Students will develop the ability to communicate their understanding of the phenomenon of religion clearly in writing.

Mission
Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students’ broad and deep apprehension of religion’s place(s) in human experience.

Goals
The department’s educational work aims to strengthen students’ capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

Student Learning Outcomes
• Students will attain a grasp of the basic theories and methodologies of the discipline of religious studies.
• Students will acquire broad knowledge of the role that religions play in human life and society as well as deeper knowledge in a specific area.
• Students will develop the ability to communicate their understanding of the phenomenon of religion clearly in writing.

Minor in Religion and Healthcare
Curriculum Requirements
FOR STUDENTS FIRST ENROLLED IN OR AFTER FALL SEMESTER 2015

Minors are strongly encouraged to enroll in REL 499: Method and Theory in the Study of Religion
Transfer students who minor in Religious Studies must complete at least 6 credits in department offered courses numbered 300 or above in residence at the Coral Gables campus.

Sociology
sociology.as.miami.edu

Dept. Code: SOC

Overview
The Major in Sociology provides scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other. Increasingly, sociologists are also focused on understanding the processes of globalization that are currently transforming contemporary societies.

Courses for both majors are designated SOC; see course list below. For information on Criminology please see the Criminology (p. 284) section of the Bulletin.

Educational Objectives
The undergraduate program in Sociology has as its main objective to provide students with:

1. A strong component of a social science education, training in analytical and statistical skills that are highly valued by potential employers;
2. A valuable undergraduate preparation for pursuing careers in such fields as environmental studies, public health, law, journalism, politics, public relations, business or public administration and in other fields that involve investigative or analytical skills or working with diverse groups;
3. An excellent and comprehensive training program for students wishing to pursue graduate work in programs leading to academic positions, research expertise, or work in the field of applied sociology.

Degree Programs
Students may earn a Bachelor of Arts degree in Sociology. The Department of Sociology also offers graduate programs leading to a PhD degree in the areas of:

- Criminology
- Medical Sociology
- Race, Ethnic Relations, and Immigration

Departmental Honors
Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Sociology or Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Sociology or Criminology. They must also achieve a minimum of B in all Sociology/Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.
2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor(s) for all six credit hours.
3. Eligible students meeting requirements will need to complete the honors thesis agreement with their supervising faculty member and submit it to the Director of Undergraduate Studies in time for spring registration of their junior year.

Advanced Writing and Communication Requirement
To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Sociology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered within the department; however, it is the student's responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

Alpha Kappa Delta
Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Kappa Delta, the International Sociology Honor Society. Alpha Kappa Delta sponsors events that enhance the academic and social life of the department.
SOC 101. Introduction to Sociology. 3 Credit Hours.
The scientific study of society and several sociological concepts, including, but not limited to: social theory, social research, social economy, social interaction, social class, social construction, gender stratification, race and ethnicity, family, and deviance. This course will help students to examine the social world around them using the sociological imagination. Students will learn how to connect research to concepts, deepening their understanding of the social world and social phenomena and develop critical thinking skills.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SOC 103. Social Problems. 3 Credit Hours.
Sociological theories and methods will be used to interpret data, evaluate social policies, and analyze the manner in which ideologies perceive and frame problems. This course will develop critical thinking skills necessary to assess social problems, as well as the ability to recognize, exercise, and develop one’s agency to address these issues.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 210. Introduction to Social Research. 3 Credit Hours.
This course provides students with an overview of the social science research process and introduces them to the various methodological strategies used by social scientists. The various steps by which research is conducted will be examined such as study design and implementation, data collection and interpretation of findings. Students will also be able to critique the strengths and limitations of difference research methodologies.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SOC 211. Quantitative Methods for Sociologists. 3 Credit Hours.
This course is designed to introduce students to descriptive and inferential statistics used in sociology, criminology, and other social sciences. We will cover measures of central tendency and variation, probability distributions, hypothesis testing, and bivariate techniques such as correlation and an introduction to regression.
Prerequisite: SOC 101, 210. Corequisite: 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 212. Quantitative Methods Lab. 1 Credit Hour.
Statistical lab associated with SOC 211 introduces the use of computer statistical packages for analyzing quantitative data.
Prerequisite: SOC 101 and SOC 210 And Corequisite: SOC 211 or PSY 291 or PSY 292.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 270. Deviant Behavior. 3 Credit Hours.
An introduction to the study of deviant behaviors. We will examine the ways in which deviance is constructed and defined. Major sociological perspectives and theories will be applied in order to understand how they aid in the formation and development of social deviance. In addition, various forms of deviant behaviors will be discussed, including: drug use, sexual deviance, violence, suicide, LGBT issues, inequality and crime. The role of social control will also be examined in terms of how it impacts the way in which deviance is understood in society.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 271. Criminal Justice. 3 Credit Hours.
Provide students with both an introduction to the basics of the criminal justice system and a critical approach to contemporary issues in the field. We will focus on the nature of crime and how it is measured; issues in policing and law enforcement; the judicial system and legal process; sentencing; corrections; and prison life. Throughout the course we will focus on current controversies and debates, including such issues as the war on drugs, racism in the criminal justice system, violent crime rates, and incarceration rates.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 291. Special Topics. 3 Credit Hours.
Content will vary by semester.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

SOC 292. Special Topics. 3 Credit Hours.
This course is designed to address a specific topic which will vary by semester.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 293. Special Topics. 3 Credit Hours.
This course is designed to address a specific topic which will vary by semester.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 301. Social Organization. 3 Credit Hours.
The focus of this course is formal organizations, with an emphasis on the workplace. The topics that are discussed include theories of work, organizational paradigms, bureaucracy, impact of technology, unionization, and the new workplace. The fundamental theme is how organizational style influences productivity.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 302. Social Psychology: Sociological Perspective. 3 Credit Hours.
The influence of human groups, social processes, and social structures on behavior and self, with some attention devoted to the effect of social interaction on groups, processes, and structures. Topics of study include the development of the self, the process of social interaction, the significance of language, and the social construction of reality.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 303. Social Inequalities. 3 Credit Hours.
An overview of the sociological approach to the analysis of structured socioeconomic inequality (a.k.a. "social stratification") in contemporary American society. In this regard, emphases are placed on identifying trends, causes, and consequences of the distribution of a wide range of material (e.g. income, wealth) and symbolic (status, prestige) rewards in American society.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 304. Dynamics of Poverty in the United States. 3 Credit Hours.
Examines trends in the incidence and causes of major types of poverty among the urban underclass, the homeless, migrant laborers, the working poor. Also explores policy-related solutions.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 305. Globalization and Society. 3 Credit Hours.
Concepts and theories that are currently in use to understand globalization both as a process and as a structure: social aspects and narratives of globalization, and theoretical sociological models as scaffolding for understanding many of the disparate characteristics of globalization. Globalization as it spans disciplinary division and its understanding: the emergence of novel economic forms and practices as a pivotal driving force for globalization. Human migrations and their consequences on cultural identity and diffusion, and the role of the technology in the creation and consolidation the global world. New and complex structures of socioeconomic inequality at national and at transnational levels, the disproportionately important roles that women play in these new structures of inequality, and the social forces and movements that have emerged to resist globalization or to alter it in important ways.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

SOC 306. Wealth and Poverty in Contemporary America. 3 Credit Hours.
The causes and consequences of rapidly changing patterns of concentration of socioeconomic resources, such as wealth and income in America. This changing concentration is associated with the proliferation of impoverishment and privilege in America. Analyzes macro-economic changes, demographic shifts, technological advances, and evolving ideological postures as sources of these trends.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

SOC 320. Social Epidemiology: Illness and Death in Society. 3 Credit Hours.
Social epidemiology and the sociological study of health and longevity. Specifically, this course examines the ways in which key sociological variables structure, shape, or patterns the health and longevity of the US population. This course covers several variables of sociological interest, including socioeconomic status, race/ethnicity, sex/gender, age, family status, and religion.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

SOC 321. Applied Health Policy. 3 Credit Hours.
The role of public and private institutions in health promotion, health care delivery, and health insurance. We will explore the theoretical and practical reasons for intervention in health-related decisions and health care markets, the related empirical evidence, and the effects of these interventions on health outcomes and social welfare. Students will understand how and why government and society in general attempts to influence health-related behaviors and health insurance markets, and the resulting effects on individuals' choices, expenditures, health outcomes, and overall quality of life.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

SOC 332. Collective Behavior. 3 Credit Hours.
Classical theories, issues, and research on fads, fashions, riots, crowd behavior, social movements and other forms of collective behavior.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 335. LGBTQ Communities. 3 Credit Hours.
Gender, race, age and class differences in the experiences of gays and lesbians. A life-span perspective guides the course after the presentation of some background of biological, psychological, and sociological theories pertaining to homosexuality.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

SOC 340. Sociology of Religion. 3 Credit Hours.
Social foundations of religion, growth and change within religious institutions and relationships of religion to other institutions.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 341. Social and Cultural Change. 3 Credit Hours.
Survey of major theories of change; analysis of the processes and mechanisms of change. Contemporary transitions in the underdeveloped regions of the world.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 342. Contemporary Latin American Societies. 3 Credit Hours.
Social characteristics of Latin American societies and their comparison with North American society.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 345. Population and Society. 3 Credit Hours.
Demographic analysis of fertility, mortality, sex-age structure, migration, urbanization and population control.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 350. Sociology of the Family. 3 Credit Hours.
A critical investigation of the family while applying sociological theories, perspectives, and concepts, based on current research in the field. As the family is an important institution in social life, and one in which we have all experienced in some way, we will see that there is not "one" particular way of experiencing this institution. The various definitions and versions of the family will be addressed historically, with an emphasis on how they are shaped by public perception. In addition, more recent trends in family life will be addressed, including cohabitation, marriage, divorce, parenthood, family policy, family structure, and marginalized family types.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 351. Business and Society. 3 Credit Hours.
The influence of business objectives, values, and ethics on American culture, moral standards, and societal institutions. A careful analysis of the choices made by individuals, companies, and governments will demonstrate that sensible "choice architecture" can successfully nudge people toward better decisions without restricting their freedom of choice. Specific topics include: corporate social responsibility; ethical issues in business; business and government in a global society; business and public policy: the corporation and the natural environment; business and technological change; and business relationships with consumers and employees.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 352. Sport and Society. 3 Credit Hours.
The status position and role of sport in society. Our primary focus will be upon delineating and analyzing sport as a major social institution in American society. Thus our perspective will be that of the sociologist (i.e., critical more in analysis than in judgement) rather than that of a sports journalist or sports fan. We shall examine both amateur and professional sports in terms of their interlocking relationships with each other and with other major social institutions (e.g., education, economics, and politics) as well as their significance for promoting and maintaining cultural values such as competition, fair play, teamwork, gender roles, and the like. The objective is to provide students with critical assessment and analytical skills for examining and understanding the impact of sports on both individuals and society.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 359. The Sociology of Human Sexuality. 3 Credit Hours.
A socio-historical survey of sexual ideologies, attitudes and behavior in human societies, with emphasis on social and biological factors.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 365. Internship. 3 Credit Hours.
Exposure to and insight into the operations of community non-profit or government based social service agencies. The course involves prearranged study and supervised work in a variety of organizations and institutions, affording students the opportunity to use their sociological imagination while providing a "hands-on" sociological experience in the local community.
Prerequisite: SOC 101.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 368. Violence in America. 3 Credit Hours.
Issues relevant to the study of violence in the United States will be covered. While the emphasis throughout will be on street violence (i.e., homicide, robbery, rape, and aggravated assault), other forms (e.g., corporate violence, intimate partner violence) will also be covered. In particular, we will: Examine violence in historical, international, and situational contexts, examine the major explanations of violence, and examine the factors associated with violent crime. We will also consider how we seek to control violence in the U.S.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 369. Crime and Public Policy. 3 Credit Hours.
The dimensions and causes of the crime problem in America, and the uses and limits of the criminal justice system in dealing with it. We will examine the enormous expansion of the American prison system in recent years, and ask how much it has affected the crime rate. Additionally, we will consider a variety of possible strategies for preventing or controlling so-called "street" crime, both within the criminal justice system and beyond it-including prevention and rehabilitation programs as well as expanding social and economic opportunities. Along the way, we will pay particular attention to several controversial issues, including the death penalty, drugs, and gun control.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

SOC 370. Juvenile Delinquency. 3 Credit Hours.
Application of sociological perspectives and concepts to examine juvenile delinquency and the juvenile justice system. The course takes into account the various social factors that shape juvenile delinquency and its control, such as race, ethnicity, socioeconomic status, gender, and sexuality. In addition, students will take a critical view of the policies developed to control such behavior.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 371. Criminology. 3 Credit Hours.
The concepts of crime and criminal law, reviews several theoretical approaches to studying crime and criminal behavior, and focuses on several types of crime. In particular, it includes such topics as definitions of crime, sources of crime statistics, correlates and causes of crime, terrorism, genocide, corporate crime, and cybercrime.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 372. Criminology: Police and Community. 3 Credit Hours.
A study of policing in U.S. society. Interaction with groups and institutions. The overall objective of this course is to provide students with an understanding of the role of the police in American society. The source will focus on the sociological study of policing, not professional training to become a police officer. Students will gain a better understanding of the history of the police, their role in American society and in the American system of criminal justice. In addition, students will discuss and critique important issues and trends in modern policing
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.
SOC 373. Criminology: Courts and Society. 3 Credit Hours.
The importance of the criminal courts and the impact that the criminal courts have on society. You will gain a realistic sense of what it is like to work in and be a part of the criminal justice system. The roles and responsibilities of the major courthouse players will be discussed. You will discover the challenging situations that judges must navigate as well as the difficulties that confront prosecutors and defense attorneys as they deal with victims, defendants and crushing caseloads.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 374. Criminology: Corrections. 3 Credit Hours.
Corrections in the U.S. society; philosophies of rehabilitation, punishment, and incapacitation.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 375. Sociology of Mental Health and Illness. 3 Credit Hours.
An introduction to sociological theories and research regarding the definition, experience, and treatment of mental illness.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 377. Sociology of Drug Abuse. 3 Credit Hours.
Application of sociological perspectives and concepts to examine drug use and abuse. The course examines the historical and theoretical understanding of the social causes and consequences of drug use, as well as the correlates of use and abuse. The course also takes a critical perspective of the policies developed to reduce the harms associated with drug use and abuse.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 378. Criminology: Law and Society. 3 Credit Hours.
How law, crime, and justice systems in the United States relate to social structure. The course covers two major themes: lawmaking (and how it relates to lawbreaking) and the justice system.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 380. Sociology of Gender. 3 Credit Hours.
The phenomenon of gender in society using sociological theory and research. Topics of focus include the social construction of gender, gender identity, and gender discrimination within various social institutions such as the family, the educational system, the media, the world of employment, and more.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 381. Aging in Society. 3 Credit Hours.
The aging processes, the aged and social institutions; special issues.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 382. The U.S. Jewish Community. 3 Credit Hours.
Application of minority group analysis to the U.S. Jewish community.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 383. Sociology of Education. 3 Credit Hours.
The examination and analysis of education as a major social institution. As such, this course assesses the structure, processes, and interaction patterns within the educational system. All levels (elementary, secondary, and postsecondary), and types (public and private) of education are considered. The course also examines the impact of education on social stratification, social mobility, and socioeconomic inequality, especially along race, gender, and class lines.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 384. Medical Sociology. 3 Credit Hours.
A brief early history, methods, theory and concepts of social science research on health and health care mainly from the last half of the previous century to the present. We will explore gender, race, class, age, social and cultural differences in the experiences of individuals as they deal with health and illness across the life course. The course will provide students with a sociological analysis of a broad array of health/illness issues and the health services industry.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 385. U.S. Latinos. 3 Credit Hours.
Sociological perspectives are employed in the examination of the historical, social, economic, and cultural experiences of Latino/as in the United States.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 386. U.S. Immigration. 3 Credit Hours.
The major sociological debates in the field of immigration with an emphasis on recent immigrants to the U.S.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 387. Race and Ethnic Relations. 3 Credit Hours.
The nature and dynamics of race and ethnic relations with particular emphasis on racial and ethnic groups in the United States. We examine basic concepts and major theories in the analysis of race and ethnic relations, racial and ethnic inequality, past and recent immigration experiences, and the historical and current status of specific racial and ethnic groups. Students will also be engaged in a variety of exercises designed to develop critical assessment and analytical skills for examining and understanding issues related to race and ethnicity.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 388. The Black Ghetto in Urban Society. 3 Credit Hours.
The origin and development of the concept of “ghetto” and application of this concept to both past and contemporary-views of black life in America. Students are introduced to the historical and social significance of the black ghetto in the context of the larger body of literature on the ghetto phenomenon. Emphasis is placed on gaining an understanding and developing critical insight into issues and prospects for the resolution of issues related to black ghettoization.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

SOC 389. The Black Athlete in White America. 3 Credit Hours.
The impact of racism on sport in the United States with a specific focus on the Black athlete. Drawing upon the literature on race and sport in America, the course takes a historical view of the social context in which black athletes have competed and excelled in their craft against tremendous odds both inside and outside of sport competition.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
SOC 390. Directed Studies. 1-3 Credit Hours.
Individually supervised readings or research on special topics offered by arrangement with instructor.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 391. Special Topics. 3 Credit Hours.
Content will vary by semester.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 401. Sociological Theory. 3 Credit Hours.
The work of theorists such as Comte, Durkheim, Marx, Weber, Parsons, and symbolic interactionists. The epistemology, methodology, and social ontology is each theory is discussed, along with the social context and chief concerns of each theorist.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 410. Social Research Practicum. 1-3 Credit Hours.
Each student will work directly with a designated faculty mentor to obtain general research training, data analysis techniques, and technical writing skills. AB part of the research practicum, students will work in collaboration with their faculty mentor to prepare a journal-length research manuscript and assemble related research materials to gain practical knowledge of the scientific research process. This one-on-one experience will also enhance students' training in sociology and provide them with useful analysis and writing skills when they enter the job market.
Prerequisites: SOC 101 and SOC 210 and SOC 211 and SOC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SOC 470. Theories of Deviant Behavior. 3 Credit Hours.
Various theories of causes of deviance/crime. It begins with an overview of the early classical and positivist foundations of criminological thought and then moves on to discussing more recent extensions of social disorganization, strain, control, social learning, and other contemporary theories of crime. It also covers the role of theory in scientific research, familiarizes with the foundations of current theoretical debates in criminology, and introduces the empirical research on the reviewed theories.
Prerequisite: SOC 101 and SOC 371.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SOC 480. Health Disparities in the U.S.. 3 Credit Hours.
A comprehensive examination of U.S. health disparities based on a variety of social variables, including race and ethnicity, gender, socioeconomic status, sexual orientation, and the environment. In doing so, this course will draw on theoretical perspectives from multiple disciplines to examine the relationship between social factors and health outcomes. The most pressing U.S. health disparities will be discussed and put into a historical and global context in order to identify priorities for the elimination of health disparities. After exploding the known and suspected causes of disparities in health outcomes, attention will turn to an overview of the common multi-level strategies used to reduce health disparities. Students will go away with a broad-based understanding of current health disparities issues and the ability to critically examine these issues.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

SOC 487. Race, Ethnicity, and Criminal Justice. 3 Credit Hours.
An in-depth examination of the relationships involving race, ethnicity, immigration, crime, and the criminal justice system. We will consider why these are important issues to study, how and what we know about these relationships, and how we might explain them. We will direct attention to research on defining race and ethnicity, racial and ethnic variations in criminal victimization and offending, population distributions, policing, the court system and sentencing, corrections, and the death penalty. Our approach will primarily be sociological, although where appropriate we will draw from other disciplines (e.g., political science, history, etc.) as well. Prerequisite: Six credits in Sociology.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
SOC 488. Gender and Crime. 3 Credit Hours.
Examination of gender, power, and crime, including feminist theories and the criminal justice system.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 490. Directed Studies in Sociology. 1-3 Credit Hours.
Supervised independent study on special topics. Arrangement with individual faculty.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 491. Special Topics. 3 Credit Hours.
This upper level course is designed to address a specific topic which will vary by semester.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 492. Special Topics. 3 Credit Hours.
This upper level course is designed to address a specific topic which will vary by semester.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 493. Special Topics. 3 Credit Hours.
This upper level course is designed to address a specific topic which will vary by semester.
Prerequisite: SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 498. Senior Honors Thesis in Sociology or Criminology I. 3-6 Credit Hours.
Independent research project.
Prerequisites: SOC 101 and SOC 210 and SOC 211 and SOC 212.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 499. Senior Honors Thesis in Sociology or Criminology II. 3-6 Credit Hours.
Independent research project.
Prerequisites: SOC 101 and SOC 210 and SOC 211 and SOC 212.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

**B.A. in Sociology**

**Overview**
The Major in Sociology provides scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other. Increasingly, sociologists are also focused on understanding the processes of globalization that are currently transforming contemporary societies.

**Mission**

Course work in this major is designed to provide scientific training for understanding the organization and patterns of structure and change in contemporary society, in addition to the interrelations between social structures, processes, and culture, on the one hand, and between these macro-level phenomena and individuals and groups, on the other.

**Goals**

Sociology courses have several objectives, including: general education, preparation for pursuing careers in such fields as law, social gerontology, health, human resource management, and social planning, and preparation for graduate study in sociology.
Student Learning Outcomes

- Students will demonstrate a thorough understanding of sociology, and the basic sociological theoretical concepts and knowledge base.
- Students will develop and demonstrate critical thinking skills through the comprehension, analysis and critique of sociological theories.
- Students will demonstrate an ability to understand and critique sociological research methodology. Students will have the ability to design and critique valid research studies and to identify reliable findings from such studies.

Sociology & Criminology Double Major

Students may choose to double major in both Sociology and Criminology, or major in either Sociology or Criminology while minoring in the other.

Sociology and Criminology Double Major

Students wishing to complete a double major must complete the Declaration of Major form for the College of Arts and Sciences and fill in both majors. Students completing a double major are not required to complete a minor as well.

Core Courses

Sociology Courses

- SOC 401 | Sociological Theory                                   | 3            |

Select two of the following:

- SOC 301 | Social Organization                                   | 3            |
- SOC 302 | Social Psychology: Sociological Perspective          | 3            |
- SOC 303 | Social Inequalities                                   | 3            |

Criminology Courses

- SOC 371 | Criminology                                             | 3            |
- SOC 470 | Theories of Deviant Behavior                           | 3            |

Select one of the following:

- SOC 271 | Criminal Justice                                       | 3            |
- SOC 370 | Juvenile Delinquency                                   | 3            |

Departmental Electives

- 30

Additional Required Courses

- ENG 105 | English Composition I                                  | 3            |
- ENG 106 | English Composition II                                 | 3            |
- MTH 113 | Finite Mathematics                                     | 3            |
- Arts and Humanities Cognate                           | 9            |
- STEM Cognate                                           | 9            |
- Minor                                                | 15           |
- Science Course                                        | 3            |
- Foreign Language                                       | 3-9          |
- Electives                                            | 14           |
- 120-126

Other Requirements

* GEG 306 can be substituted for SOC 210 and EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education.

** A minimum final grade of C- and a GPA of 2.0 are required in all courses offered by the Department

*** A minimum of 31 credits must be earned in residency in the Department; thus, only a maximum of 27 credits can be transferred from other institutions as eligible credits for the SOCIOLOGY/CRIMINOLOGY DOUBLE major
Sociology and Criminology Major-Minor Program
A minor in either Sociology or Criminology while majoring in the other program requires 12 additional credits offered by the Department to the major program requirements, totaling 43 credit hours.

- 6 of these credits must be 300-level or higher.
- Sociology majors must take SOC 371 Criminology.

*** A minimum of 9 credit hours must be earned in residency in the Department; thus, only a maximum of 6 credit hours can be transferred from other institutions as eligible credit hours for the sociology minor.

Theatre Arts
theatrearts.as.miami.edu

Dept. Code: THA

Introduction

The University of Miami Department of Theatre Arts offers two distinct undergraduate degrees:

- a liberal arts program leading to a Bachelor of Arts degree in Theatre Arts and
- a pre-professional conservatory-based theatre training program leading to a Bachelor of Fine Arts degree in either
  - Musical Theatre,
  - Stage Management,
  - Theatre Management, or
  - Design/Production.

The Department produces a season of plays and musicals at the Jerry Herman Ring Theatre as well as smaller-scale works in the Studio Theatre located in Hecht Residential College.

Educational Objectives

BA degree students are empowered to engage with and explore their world using the tools of theatre and performance. As an interdisciplinary degree program pursued in conjunction with a second major or as a minor, the BA program fosters a sound knowledge of theatre practice along with a deep understanding of its history and diversity of applications. By emphasizing creative and critical approaches to both the study and practice of the theatre arts, the BA program aspires to produce skilled artists, educators, and leaders in the field of theatre and beyond.

The objective of the BFA programming is to prepare gifted creative artists with the experience, training and craft necessary for entry into the world of professional theatre, television and film. Intensive training is complemented by a liberal arts curriculum and access to the vibrant international community of South Florida.

Degree Programs

- THE BACHELOR OF FINE ARTS DEGREE
- THE BACHELOR OF ARTS DEGREE
The Bachelor of Fine Arts Degree in Theatre Arts

In addition to meeting the requirements for admission to the University of Miami, students seeking admission to the Department of Theatre Arts BFA program must:

1. Submit the BFA Application to the Department of Theatre Arts. This application may be found on the "Undergraduate Admissions" page on the University website;
2. Schedule an audition or portfolio review by contacting the Department of Theatre Arts office at 305. 284.4474. Auditions and reviews are held on the University of Miami campus as well as in major cities throughout the United States at the National Unified Auditions. Audition dates can be found on the Department of Theatre Arts website on the "Prospective Students" page.

BFA transfer applicants must follow the admission procedures described above and should note that if accepted, class standing in the program (freshman, sophomore, etc.) is determined by the BFA faculty in consultation with Department administration.

Musical Theatre Majors are typically admitted to the Bachelor of Fine Arts degree program in the fall semester of each academic year.

The candidates for the degree of Bachelor of Fine Arts must satisfy the academic requirements established by the College of Arts and Sciences, including, but not limited to the demonstration of:

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline,
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 (http://bulletin.miami.edu/search/?P=MTH%20108) or higher.

To remain in the program, BFA students in the Department of Theatre Arts must maintain a cumulative 2.7 (B-) grade point average in all theatre courses (and any other courses required in a student's area of specialization) and a cumulative GPA of 2.0 (C) in all courses. Failure to maintain satisfactory academic standing will result in the student being placed on academic probation by the Department and may lead to dismissal from the BFA program.

BFA Theatre Arts courses are progressive in nature and students must successfully complete each course in sequence. Failure to pass the requirements of any particular class in the program may result in the student's dismissal.

All BFA students are evaluated by the faculty on commitment to training, production work, growth, discipline, and professional potential at the end of each semester.

Departmental production requirements, student responsibilities, and disciplinary policies are detailed in the Student and Production Handbooks, available on the "Current Students" page on the Department's website.

THA 101. Introduction to Theatre. 3 Credit Hours.
Intro survey course in theatre--what it is now, how it works, its practitioners and the relationship of theatre to the contemporary world. Attendance at Ring Theatre productions is required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 102. Introduction to the Audition. 2 Credit Hours.
Students will learn the methods and techniques used to create a successful performance audition. The student will learn how to choose appropriate audition material and how to rehearse the material for an effective and professionally-minded audition.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

THA 103. Introduction to Theatre Crafts. 1 Credit Hour.
Students will learn the techniques and methods used to create costumes, scenery and stage properties for theatrical productions. Lectures and hands-on projects will allow students to practice their skills in scenic construction, scenic painting, sewing, and costume crafting.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

THA 104. Performance Practicum. 3 Credit Hours.
Students will be cast in and rehearse a performance piece with a stage director. Students will learn effective methods for memorizing text and best professional practices in their collaboration with the director and artistic team. The piece will be performed in front of a live audience at the end of the course.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
THA 105. Introduction to Acting. 3 Credit Hours.
Basic tools of acting craft including analysis, physical action and reacting in the moment explored through exercises, scripted work and readings. A doing class, making attendance essential.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

THA 106. Introduction to Acting for the Musical Theatre. 3 Credit Hours.
Basic tools of Musical Theatre Acting craft including vocal approaches for the actor, theatrical and musical analysis, physical action and an introduction to musical theatre acting styles explored through exercises, scripted work with an extensive listening component.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 108. Introduction to Standardized Patient Simulation. 3 Credit Hours.
Standardized patients are actors who are trained to realistically portray a specific patient’s history, subtext, personality, physical infirmities and emotional states within a simulated interview or simulated physical examination session with a medical student. Students will learn basic acting skills and physiological knowledge needed to support and serve interactive clinical training.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 110. Freshman Performance Laboratory. 1 Credit Hour.
Laboratory component to supplement Theatre Arts BFA Performance training courses.
Corequisite: THA 111 or THA 112.
Components: LAB.
Grading: SUS.
Typically Offered: Fall & Spring.

THA 111. Acting I-A. 2 Credit Hours.
Introduction to the elements of drama and theatre, and to the basic tools of acting craft.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 112. Acting I-B (Script Analysis). 2 Credit Hours.
Continued work on basic tools of craft including script analysis.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 113. Movement I-A. 1 Credit Hour.
The integrated method of voice, movement and acting training known as The Expressive Actor developed by Michael Lugering.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 114. Movement I-B. 1 Credit Hour.
A continuation of THA 113, this course challenges students to apply the fundamentals of the Expressive Actor training to character building and scene work.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 116. Dance I-A. 2 Credit Hours.
Beginning ballet and jazz for Musical Theatre with strong focus on technique and terminology.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
THA 117. Dance I-B. 2 Credit Hours.
Continuation of THA 116.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

THA 120. Freshman Studio I. 1-2 Credit Hours.
First year theatre laboratory with strong focus on ensemble, rehearsal, and performance skills.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

THA 121. Freshman Studio II. 1-2 Credit Hours.
A continuation of THA 120.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

THA 131. Musical Theatre Skills I. 2 Credit Hours.
The first semester of a four semester practical course sequence designed to teach musical skills, techniques, keyboard skills and theory relevant to the contemporary musical theater actor.
BFA Musical Theatre majors (THTR7_BFA) only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

THA 132. Musical Theatre Skills II. 2 Credit Hours.
The second semester of a four semester practical course sequence designed to teach musical skills, techniques, keyboard skills and theory relevant to the contemporary musical theater actor.
BFA Musical Theatre majors (THTR7_BFA) only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

THA 140. Introduction to Dance. 3 Credit Hours.
Beginning dance skills and stylistic elements of theatrical forms of dance (repeatable).
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

THA 141. Introduction to Scenic, Costume, and Light Design in Theatre and Film. 2 Credit Hours.
Beginning facets of the scenic, costume, and lighting design process mainly for theater, and some aspects of film. Students will learn the basic role of scenic, costume, and lighting designers in theater and film. The course will put students into practice of the professional process by which theatrical designers analyze a text, provide visual research, create preliminary drawings, and create final drawings for stage designs. The main objective of the course is to develop "designer's eye". Each project will challenge students to cultivate artistry, creativity, and skills to search metaphor for designs. This introductory course serves as the prerequisite of most of higher level theatrical design courses. It is important for all students who are interested in taking other design or drawing courses to gain knowledge of the basic design languages and tools in this course. Students are required to take the accompanying THA 143 Lab in order to gain more hands-on experience with the use, maintenance, and operation of actual theatrical equipment
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

THA 142. Introduction to Theatre Technology. 2 Credit Hours.
A hands-on course providing skills in the operations necessary to execute scenic or lighting design: basic scenery construction, materials and techniques, scenic painting and lighting hang and focus procedures.
**Components:** EXP.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.
THA 143. Backstage Crew Lab. 1 Credit Hour.
Participation in the backstage running crew during technical rehearsals and performances of one production in the Jerry Herman Ring Theatre season. Evening and weekend hours required.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 144. Production Crew Lab. 1 Credit Hour.
Hands-on work in the preparation of technical elements (scenery, costumes, props, lighting, sound) or front-of-house services for Jerry Herman Ring Theatre productions.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 150. Musical Theatre Vocal Techniques. 1 Credit Hour.
Fundamentals of Vocal Productions explored through group lessons. Enrollment limited to first-year BFA students. May be taken twice for credit. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 160. Dance Styles. 3 Credit Hours.
A variety of ethnic dance forms that will vary from one semester to the next. Different cultural dance styles will be offered on a rotating basis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 161. Beginning/Intermediate Tap. 1-3 Credit Hours.
Beginning/intermediate tap class. Not a lecture class; students will be dancing during each class period. Tap shoes are required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 162. Intermediate/Advanced Tap. 1-3 Credit Hours.
Intermediate/advanced tap class, Not a lecture class; students will be dancing during each class period. Tap shoes are required.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 191. Introductory Applied Music Theatre Voice I. 1 Credit Hour.
One-half hour individual lessons tailored to the individual needs of the students. Enrollment is limited to first-year BFA music theater students. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 192. Introductory Applied Music Theatre Voice II. 1 Credit Hour.
One-half hour individual lessons tailored to the individual needs of the student. Enrollment is limited to first-year BFA music theater students. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 194. Singing for Actors. 1-2 Credit Hours.
Fundamentals of singing to include breath control, tone production, articulation. An ensemble approach to exploring and gain self-confidence in the skill of singing for the American musical stage.
Requisite: Theatre Performance Major or Additional (THA2_BFA, THTR2_AS_A).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 196. Singing for the Stage I-A. 1-2 Credit Hours.
The selection of learning process and performance of Musical Theatre Songs with emphasis on lyrics. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
THA 197. Singing for the Stage I-B. 1-2 Credit Hours.
Continuation of THA 196.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 198. Voice and Speech I-A. 1 Credit Hour.
Fundamentals of relaxation and breath management, alignment, tone production, pitch and resonance. Anatomy and physiology of the vocal
structures. Introduction to the International Phonetic Alphabet (IPA).
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 199. Voice and Speech I-B. 2 Credit Hours.
Development of General American speech production and articulation skills through further phonetic study. Explorations in range, inflection, resonance, tempo and rhythm within the application of voice to text.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 206. Acting for Musical Theatre. 3 Credit Hours.
Intermediate tools of Acting for the Musical Theatre including analysis and investigations in style.
Prerequisite: THA 105 or THA 106.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 208. Intermediate Standardized Patient Training. 3 Credit Hours.
Standardized patients are healthy people who are trained to realistically portray a specific patient’s history, subtext, personality, physical infirmities and emotional states within a simulated interview or simulated physical examination session with a medical student. Students with previous SP experience will learn intermediate acting skills and work with patient histories that deal with behavioral health.
Prerequisite: THA 108.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 210. Sophomore Performance Laboratory. 1 Credit Hour.
Laboratory component to supplement Theatre Arts BFA Performance training courses.
Corequisite: THA 211 or THA 212.
Components: LAB.
Grading: SUS.
Typically Offered: Fall & Spring.

THA 211. Acting II-A. 2 Credit Hours.
Intensive scene study for sophomore conservatory actors. Basic tools of craft developed through use of contemporary plays, script analysis, and rehearsal techniques.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 212. Acting II-B. 2 Credit Hours.
A continuation of THA 211.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
THA 214. Movement II. 1 Credit Hour.
Stage combat utilizing the Dueling Arts International Level-1 curriculum for the Unarmed, Broadsword, and Single Rapier disciplines. Students will have the option of submitting their skills tests for adjudication and possible certification through Dueling Arts International.
Prerequisite: THA 114.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 216. Dance II-A. 1 Credit Hour.
Intermediate Musical Theatre dance taught through ballet and jazz, with an emphasis on technique and style.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 217. Dance II-B. 2 Credit Hours.
A continuation of THA 216 incorporating characterization and additional style.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 231. Music Theatre Skills II. 2 Credit Hours.
The third semester of a four semester practical course sequence designed to teach musical skills, techniques, keyboard skills and theory relevant to the contemporary musical theatre actor.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 232. Music Theatre Skills IV. 2 Credit Hours.
The fourth and final semester of a four semester practical course sequence designed to teach musical skills, techniques, keyboard skills and theory relevant to the contemporary musical theatre actor.
Prerequisite: THA 231.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 240. Introduction to Dance II. 3 Credit Hours.
Continuation of THA 140 (repeatable).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 241. Basic Costume Sewing and Scenic Painting. 3 Credit Hours.
Basic scenic painting and costume construction techniques. Scenic painting includes fundamentals in wood, marbles, brick, stones, lights and shadows. Costume construction includes fundamentals in hand/machine sewing, dyeing, distressing and pattern reading.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 242. Drafting for the Theatre. 3 Credit Hours.
Drafting standards and techniques used for the theatre to produce scenic and lighting plans. Hand drafting and computer aided drafting.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 243. Beginning Theatre Design How to Sketch Your Idea. 3 Credit Hours.
Basic sketching, mechanical drawing and rendering techniques used for costume and scenic design. Basic black and white figure drawing, lights and shadows and perspective elevations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
THA 244. Theatre Design and Collaboration - Three Dimensional Creativity for Scenery and Costumes. 3 Credit Hours.
Advanced training in drawing and rendering used for costume and scenic design for the theatre. Color costume plates and scenic renderings.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 245. Technical Planning for Theatrical Productions. 3 Credit Hours.
Characteristics and structure of Scenery, Properties, Scenic Art, Costumes, Lighting, Sound and Video departments for theatrical performance. Study of each production department's budgeting, scheduling and logistical needs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 246. Survey of Design for Theater and Live Entertainment. 3 Credit Hours.
Principles and procedures of the design and technical production aspects of theatre and live entertainment.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 247. Master Electrician for the Stage. 3 Credit Hours.
Training for the position of Master Electrician and Assistant Lighting Designer (or theatrical productions. Practical application of production planning, lighting paperwork, overseeing lighting crews, advanced electrical theory, power distribution, and creative problem solving.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 248. Introduction to Design for Film. 3 Credit Hours.
Various aspects of costume design and production in films by introduction to the designer' roles, design models, design language, and collaborative efforts in film to the student. Later in the semester students will experience developing their own designs through simpler projects, such as designing a song or scene from novels.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 251. Intermediate Acting I. 3 Credit Hours.
Basic tools of the actor's craft are developed through script work, scene study, and improvisational techniques.
Prerequisite: THA 105 or THA 106.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 252. Intermediate Acting II. 3 Credit Hours.
A continuation of THA 251 focusing on script analysis and choice making for scene work.
Prerequisite: THA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 253. Special Topics in Voice for the Stage. 3 Credit Hours.
Study of vocal production in both broad and specialized areas including general vocal training for stage or public speaking, voice over techniques and dialects.
Prerequisite: THA 105.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 254. Movement for Actors. 3 Credit Hours.
Physical range and control, physicalization and condition of character, and stage violence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
THA 281. History of Western Theatre Architecture. 3 Credit Hours.
Covers the evolution of performance spaces in Europe and the United States, from Ancient Greek structures to modern-day multi-venue Performing Arts complexes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 291. Beginning Applied Music Theatre Voice I. 1 Credit Hour.
One-Hour individual lessons tailored to the individual needs of the students. Enrollment is limited to second-year BFA music theater students. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 292. Beginning Applied Music Theatre Voice II. 1 Credit Hour.
One-hour individual lessons tailored to the individual needs of the student. Enrollment is limited to second-year BFA music theater students. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

THA 294. Singing for Actors II-A. 2 Credit Hours.
Development of musical theatre singing technique for BFA Acting majors. Skills to be developed include proper breathing, tone, articulation, lyric interpretation, and physical presentation. Course is repeatable. Requisite: Theatre Performance Major or Additional (THA2_BFA, THTR2_AS_A).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 296. Singing for the Stage II-A. 1 Credit Hour.
A continuation of ideas presented in THA 196 and 197. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 297. Singing for the Stage II-B. 1 Credit Hour.
The study of material derived from the popular music canon (pop, rock, et al), melding contemporary vocal styling with the traditional narrative aims of theatrical storytelling. The incorporation of concurrent musical theatre skills training in the creation of vocal arrangements. BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 298. Voice and Speech II-A. 1 Credit Hour.
Improvement of individual voice and speech skills: through in-depth examination of habitual speech formation and vocal patterns. Application of the IPA within American accent study. Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 299. Voice and Speech II-B. 2 Credit Hours.
Strengthening the connection between the acting impulse and speaking voice. Extended voice production within scene work. Introduction to Shakespeare’s verse structure. Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
THEA 301. Theater and the Holocaust. 3 Credit Hours.
Through readings, research, class discussions and personal reflections this course explores the philosophical and historical context of Holocaust-related plays written in the aftermath of World War II.
Prerequisite: ENG 106.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THEA 302. People, Places and Play: Theatre that Changed the World. 3 Credit Hours.
An examination through the lens of the drama, the seminal events that brought about the death of romanticism and gave birth to the modern era. Emphasis is placed on social change as evidenced through theatre as a mirror to the world in events, dramatic literature and the people that shaped it from the Revolutions of 1848 to the present; exploring the great minds outside the world of theatre and the effect this had on the great minds in the theatre. *Not open to Theatre Majors or Minors: for BGS students only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

THEA 310. Junior Performance Lab. 1 Credit Hour.
Laboratory Component to supplement Theatre Arts BFA Performance training courses, specifically TBA 311, THA 312, THA 316, THA 313, THA 396, THA 398 & THA 399
Components: LAB.
Grading: SUS.
Typically Offered: Fall & Spring.

THEA 311. Acting III-A. 2 Credit Hours.
An in-depth study of acting Shakespeare, focusing on text and physicality. The source material may include texts of fellow Elizabethan/Jacobean playwrights as well as other 16th/17th Century European playwrights. The student is expected to incorporate period movement and style, voice technique, and acting skills studied in prerequisite and concurrent courses
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THEA 312. Acting III-B. 2 Credit Hours.
A continuation of THEA 311 with focus on high style and Comedy of Manners. May include Shaw, Wilde, and Coward.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THEA 313. Movement III. 1 Credit Hour.
A focus on the physical performance techniques and requirements of a variety of historic theatrical periods.
Prerequisite: THA 214.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THEA 314. Movement II-B. 1 Credit Hour.
Fundamentals of mask work through the study of a "personal clown"; the character mask and/or an in-depth study of Commedia dell'Arte masks and character types.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THEA 315. Auditioning I. 2 Credit Hours.
First semester of a two semester sequence designed to aid BFA students in the development of material and techniques necessary for professional audition circumstances.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
THA 316. Dance III-A. 2 Credit Hours.
Advanced Musical Theatre Dance incorporating high technical proficiency for expression, characterization and style.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 317. Dance III-B. 2 Credit Hours.
A continuation of THA 316.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 341. Sound for the Theatre. 3 Credit Hours.
A basic sound design class to develop an ear for music and sound.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 342. Scenic Design. 3 Credit Hours.
Techniques for analyzing, planning and designing stage scenery, executing color rendering and stage models.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 343. Costume Design. 3 Credit Hours.
Techniques for analyzing, planning, and designing theatrical costumes. Executing color rendering plates.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 344. Lighting Design. 3 Credit Hours.
Techniques for analyzing, planning and designing theatrical lighting. Executing light plots and corresponding paperwork.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 345. Scenic Materials and Structures. 3 Credit Hours.
Materials used in scenic construction and advantages of each. Students will perform basic structural analysis on scenery built with these materials and will study rigging systems and knots used in backstage work.
Prerequisite: THA 142.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 347. Stage Make-Up. 3 Credit Hours.
A lecture-laboratory course in make-up for the stage, television and motion picture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

THA 350. Musical Theatre Vocal Techniques II. 1 Credit Hour.
Advanced Musical Theatre Vocal Techniques explored through group or private lessons.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 351. Auditioning and Preparing for the Profession. 3 Credit Hours.
How to succeed in the theatre profession. Students will prepare audition pieces and learn resume preparation, headshots, interviewing, and other aspects of searching for and obtaining work. Not for BFA Studens.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
THA 352. Singing for the Musical Theater. 3 Credit Hours.
The process of acting and singing a song for a musical play or review. Song selection, technical and acting mechanics, and how to deliver the song using 16 and 32 bar material.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 356. Improvisational Acting. 1-3 Credit Hours.
An introduction to the basic craft of Improvisational Acting through an exploration of short form and long form improvisational acting styles.
Prerequisite: THA 112 or THA 252.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 364. The Theatre Industry. 3 Credit Hours.
Producing trends on Broadway, the Road, and Regional Theatre. The basics of producing, managing, and marketing a play from securing the performance rights to closing night.
Prerequisite: THA 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 365. Principles of Stage Management. 3 Credit Hours.
The study of the basic work of a theatrical stage manager from pre-production to post production, including preliminary work, auditions, rehearsals, coordinating of departments, technical & dress rehearsals, performance and post production duties. Much class time is devoted to discussing the role of the stage manager as a theatre collaborator. Also discussed are stage and business techniques as applied to the entertainment industry with a focus on strengthening organizational and interpersonal skills in order to function successfully as an effective leader.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 366. Theatre Management Practicum I. 3 Credit Hours.
Practical experience on the annual season ticket campaign, marketing, finances, house management, and facilities management at the Jerry Herman Ring Theater. Open only to Theatre Management majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 367. Theatre Management Practicum II. 3 Credit Hours.
Practical experience on the annual season ticket campaign, marketing, finances, house management, and facilities management at the Jerry Herman Ring Theatre. Open only to Theatre Management majors.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 369. Producing New Plays and Musicals. 3 Credit Hours.
The components needed to produce a new body of theatrical work. Topics that will be discussed are the selection of a creative team, developmental timelines, budgeting, and approaches to managing a new work from both a business and creative perspective. This is a hands-on class that will span the entire process from creation of a script to performance.
Prerequisite: THA 364.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 370. Popular Culture and Entertainment: Performance, Spectacle, and Audience Experience. 3 Credit Hours.
An exploration of the ways in which performance uses spectacle to create events that captivate audiences. What purpose does popular entertainment serve for the general public in different eras? How does entertainment encourage us to play? What does this playful diversion do for us as individuals? Why do artists use spectacle to manipulate our experience and perception of the world?
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
THA 375. Introduction to Playwriting. 3 Credit Hours.
Understanding of the basic principles involved in play construction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 376. Beg, Borrow and Steal: Adapting for the Stage. 3 Credit Hours.
A writing workshop supplemented with readings, discussions, and staging in which classical texts are adapted into new stage translations for contemporary audiences. Utilizing today's best theatre acting/directing methodologies, students will complete a series of short adaptation exercises as well as a longer, co-directed project.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 377. Make Them Laugh: How to Write Comedy. 3 Credit Hours.
Analysis of comedic masters in order to create your own comedic material.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 381. Play Analysis I. 3 Credit Hours.
Play structure from the viewpoints of the actor, director, designer, and audience. Understanding the play and making production choices.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 382. Play Analysis II. 3 Credit Hours.
A continuation of THA 381. Emphasis on non-realistic theatre.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

THA 383. Queer Theatre: Body Politics/Staging Sexuality. 3 Credit Hours.
Examines theatrical representations of GLBTQ issues in the U.S. from the 1960s to the present, in terms of the aesthetic/political project of "Queer Theater." Considering theater as a transformative social form, students will have opportunities for creative practice and scholarship. May be taken for Writing Credit.
Prerequisite: ENG 106.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 384. Music in the American Theatre: Its Dramaturgy, Music, and Cultural. 3 Credit Hours.
A survey of the history of musical theater in America, from its earliest days with American colonial works to our present era of Internet-facilitated global artistic exchange. As a result, the course encompasses a vibrant diversity of intimately related musical-theatrical forms, styles, methods, and cultural responses, represented by such heterogeneous labels as ballad opera, minstrel show, operetta, and mega-musical, to name just a few.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 385. History of Interior Design and Furniture. 3 Credit Hours.
The history and evolution of western interior decor and furniture design from Classical Greece through the present. Lectures and design exercises highlight changing aesthetics in architectural design, interior design and the decorative arts for theatrical designers and production designers for film.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 386. History of Fashion. 3 Credit Hours.
A history of clothing and other visual elements that provide a research background for theatrical design, prehistoric through present.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
THA 388. African American Theatre History. 3 Credit Hours.
African-Americans struggles for self-definition against prevailing hegemonies using theatre as a tool for expressing the truth of their identities.
Prerequisite: ENG 106.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 391. Intermediate Applied Music Theatre Voice I. 1 Credit Hour.
One-hour individual lessons tailored to the individual needs of the student. Enrollment is limited to third-year BFA music theater students.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 392. Intermediate Applied Music Theatre Voice II. 1 Credit Hour.
One-hour individual lessons tailored to the individual needs of the student. Enrollment is limited to third-year BFA music theater students.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

THA 396. Singing for the Stage III-A. 1-2 Credit Hours.
Instruction and coaching of advanced vocal and audition material drawn from American musical theatre.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 398. Voice and Speech III-A. 1 Credit Hour.
Application of voice and speech in classic texts-particularly that of Shakespeare and translation plays. Accent monologues and scenes.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 399. Voice and Speech III-B. 1 Credit Hour.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 401. Internship. 1-3 Credit Hours.
Prescribed work and study at a theatre, opera, or dance company as it pertains to the major’s concentration of study. Collateral reports, readings, conferences with faculty supervisor.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 402. Internship. 3 Credit Hours.
Continuation of THA 401.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 403. Internship. 3 Credit Hours.
Continuation of THA 402.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 404. Internship. 3 Credit Hours.
Continuation of THA 403.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
THA 410. Independent Study. 1-3 Credit Hours.
Individualized instruction on special topics.
**Components:** THI.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

THA 411. Acting IV-A. 2 Credit Hours.
An in-depth scene study from the works of 19th Century European playwrights writing in the styles of Naturalism and Realism. Playwrights may include but are not limited to Ibsen, Strindberg and Chekhov. A focus on incorporating period movement and style, voice technique, and the further development of acting skills studied in prerequisite courses.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

THA 412. Acting IV-B. 2 Credit Hours.
Scene study focusing on contemporary playwrights who use elevated language. May include Pinter, Stoppard, Mamet, Anouilh, Churchill, and others.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

THA 413. Movement III-A. 3 Credit Hours.
Unarmed combat for the stage: basic and advanced techniques including punches, slaps, kicks, rolls and fight choreography. As sanctioned by the Society of American Fight Directors (SAFD).
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

THA 415. Auditioning I. 2 Credit Hours.
A course dedicated to the business of theatre for actors. Students will prepare three to five audition pieces. Covers headshots, resumes, income tax situations, unions, and methods of searching for and obtaining work.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

THA 416. Auditioning-II. 2 Credit Hours.
Continuation of THA 415.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

THA 420. Senior Studio. 3 Credit Hours.
Rehearsal and production of a showcase culminating in a New York performance for agents and casting directors.
Requisite: BFA Performance or Musical Theatre majors only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

THA 421. The American Theatre: Industry Journeys and Careers. 3 Credit Hours.
Theatre business career paths of the American theatre, lecture by prominent industry leaders from around the nation with theatre department faculty. Topics of study include Broadway, Off Broadway, touring productions, regional theatres and performing arts center management; as well as business skills development including knowledge and interview evaluation.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.
THA 431. Musical Theatre Styles I. 2-3 Credit Hours.
Focus on the preparation of a professional musical theatre audition book. Emphasis on all current musical theatre song styles. 16 and 32 bar audition cuts, full songs and appropriate monologues.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 432. Musical Theatre Styles II. 2-3 Credit Hours.
Musical scene study class exploring scenes from various styles and genres of musical theatre. Scenes will consist of spoken dialogue and singing. Continuation of THA 431.
Requisite: BFA Performance or Musical Theatre majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 441. Advanced Design and Management Practicum I. 3 Credit Hours.
Hands on practicum training working as a designer or technical craftsperson for a mainstage or studio production; or as an assistant designer or assistant technical craftsperson for a mainstage production. Repeatable once for credit toward major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 442. Advanced Design and Management Practicum II. 3 Credit Hours.
Hands on practicum training working as a designer or technical craftsperson for a mainstage or studio production; or as an assistant designer or assistant technical craftsperson for a mainstage production.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 450. Special Topics in Performance. 1-3 Credit Hours.
Intensive study and practical exploration of a specialized area of performance such as Social Theatre, Physical Theatre, Classical Greek Theatre, Commedia dell’arte, Solo Performance, Dance Auditioning, Musical Theatre Performance, among others. Final performances before an invited audience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 451. Advanced Acting: Classical Poetic Text. 3 Credit Hours.
An introduction to styles focusing on the Greeks, Shakespeare, Restoration and other plays on poetic language.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 452. Advanced Acting: Contemporary Poetic Text. 3 Credit Hours.
Acting and scene study focusing on contemporary playwrights who use poetic language, such as Mamet, Stoppard, Pinter, Shepard, Vogel, and Churchill.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 453. Theatre Arts Capstone. 3 Credit Hours.
An opportunity to implement the knowledge and skills gained in course work in the areas of design and technical theatre, acting, directing, and playwriting within a student-driven, faculty-supervised, collaborative performance project. This course is the required capstone for seniors majoring in Theatre Arts but open to and repeatable for underclassmen.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.
THA 455. Acting for the Camera. 3 Credit Hours.
An advanced set of professional skills and practices for motion picture acting through scene work, episodic series work and collaboration. Upon completion of this class each actor will have performed in staging and shooting exercises and a variety of shot scenes. They will work with an editor to cut their reels, collaborate with a variety of directors, learn how camera and editing affects performance and learn to work efficiently and optimally on a professional film set.
Prerequisite: THA 312.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 456. Improvisational Acting II. 1-3 Credit Hours.
The further study of improvisational skills and the development of long form techniques.
Prerequisite: THA 356.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 459. Stage Management Practicum. 3 Credit Hours.
Practical experience as a stage manager for a production. Weekly individual meetings with instructor for analysis of performance and evaluation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 461. Play Direction I. 3 Credit Hours.
The art and craft of stage direction.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 462. Play Direction II. 3 Credit Hours.
A continuation of THA 461 in which the student directs a one act play. Enrollment limited.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 463. Advanced Stage Management I. 3 Credit Hours.
A study of stage management techniques and practices as applied to the professional theatre: Career preparation including cover letter and resume skills. This course provides discussion on the Actor's Equity LORT Rule Book, the discovery and understanding of personality types and traits, goal setting and cue calling skills.
Prerequisite: THA 365.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 464. Advanced Stage Management II. 3 Credit Hours.
Advanced stage management techniques and practices as applied to the professional theatre: Touring, including an analysis of the basic practices and procedures of Advance Calls, Route Sheets and Itineraries. Cueing: reading, writing and calling in "Dance Eights." This course also provides leadership assessments and an examination of leadership styles and methodologies.
Prerequisite: THA 463.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 465. Broadway and the Road. 3 Credit Hours.
An examination of the historical and contemporary practices of Broadway production taught through a series of lectures by renowned guest speakers from the theatre industry. Topics discussed include the career paths of experts in the field, business structures, current developments and trends on Broadway and in commercial Broadway tours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
THA 466. Theatrical Unions. 3 Credit Hours.
History of theatrical unions in America. Major unions and their contracts: actors, directors and choreographers, playwrights, composers and lyricists, designers and non-union personnel management and organizational structure.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 467. Producing for Regional Theatre. 3 Credit Hours.
History of American Regional Theatre. Forming the non-profit corporation; the mission statement; the Board of Directors; legal and tax requirements; budgeting and record keeping; staffing and organizational management.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 468. Professions of the American Theatre. 3 Credit Hours.
A detailed examination of several administrative professions in the theatre and the roles these professions play in play production. Careers studied include casting direction, company management, artistic direction, development, marketing, education and literary management.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 469. Producing Musical Theatre II. 3 Credit Hours.
Designed to develop, refine, rehearse, mount, and present a new musical.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 471. Directing the Actor for Film. 3 Credit Hours.
The craft of directing actors for work before a camera.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

THA 472. Where Stage and Film Meet. 3 Credit Hours.
The relationship between theatre and film combining a theoretical-critical as well as a practical perspective. Viewing of seminal films and readings from a selection of texts from the early days of cinema until the 2000's touch on the point or view or critics, playwrights, and directors. Also explores the concept of theatricality in film, or the ways in which different theatrical practices, concepts, and techniques can play fundamental roles in filmmaking.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

THA 475. Lyric Writing for Musical Theatre. 3 Credit Hours.
Lyric-writing laboratory for musical theatre, operating on a workshop model. Following a study of musical theater's basic lyrical forms and functions, students will, on a weekly basis, craft their own theatre lyrics - intended to be set to music-according to studied models and will share them in a safe, collaborative environment for consideration and critique.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 481. Theatre History I. 3 Credit Hours.
Theatre history from the Greeks through European Renaissance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 482. Theatre History II. 3 Credit Hours.
Theatre history from the 17th century to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 485. Playwriting II. 3 Credit Hours.
Further examination of dramatic writing techniques including Hero's Journey model, adaptation and experimental structures.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
THA 487. Advanced Projects. 3 Credit Hours.
Advanced practical projects in directing, stage management, dramatic writing or dramaturgy. Repeatable up to four times for credit towards minor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

THA 491. Advanced Applied Music Theatre Voice I. 1 Credit Hour.
One-hour individual lessons tailored to the individual needs of the student. Enrollment is limited to fourth-year BFA music theater students.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

THA 492. Advanced Applied Music Theatre Voice II. 1 Credit Hour.
One-hour individual lessons tailored to the individual needs of the student. Enrollment is limited to fourth-year BFA music theater students.
BFA Musical Theatre majors (THTR7_BFA) only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

* A grade of C- or higher in all Theatre Arts courses and a cumulative GPA of 2.0 in all courses are required.
** To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Theatre Arts are encouraged to complete THA 481 and/or THA 482.
*** Transfer students have a residency requirement of 18 Theatre Arts credit hours on campus.
**** The State of Florida recognizes the Bachelor of Arts and Bachelor of Fine Arts Degrees as meeting the Theatre Arts subject area requirements for teaching at the secondary level. In addition to earning the BA or BFA degree in Theatre, students desiring to teach in the field of Theatre Arts should complete the required education credit hours in order to be certified by the state.

1 A minor in Theatre Arts consists of 15 credit hours of Theatre Arts classes with a minimum grade of C- in each course and an overall GPA of 2.0 or above.

**Urban Studies**

urbanstudies.as.miami.edu

**Introduction**

The minor in Urban Studies provides undergraduate students with a flexible concentration in interdisciplinary studies of cities, urbanism, and urbanity. Urban Studies is a long established academic field, especially prominent in major cities in the United States. Course work combines a practical focus on Metropolitan Miami with more general attention to urban theory and globalization.

The minor has a liberal arts orientation and includes perspectives from the social sciences, architecture, and history. It is a useful complement to majors such as Geography, History, Sociology, Anthropology, Literature, International Studies, Economics, Political Science, and others. A summer study abroad option in South Africa and Namibia is offered regularly in summer. In addition, it is possible to for a student to study in the spring semester in Cape Town, South Africa (UCape Town Program). The minor is also of particular interest to students in Architecture Communication and Business. Courses in the Minor are taught in the College of Arts & Sciences and the School of Architecture. Note that there are slightly different requirements for ARC students.

**URB 201. Metropolitan Miami. 3 Credit Hours.**

This course provides interdisciplinary perspectives on the urbanization of South Florida and on Miami’s urban milieu. The course uses the case of Metropolitan Miami to introduce and illustrate a range of basic concepts in urban studies.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**URB 301. Cities in Time and Space. 3 Credit Hours.**

This course provides interdisciplinary perspectives on the city, urbanity, and urbanization through a series of wide-ranging historical-geographical contexts.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.

Total Credit Hours: 15

1. ARC students may select no more than one ARC course while NonARC students must select at least one ARC course. Note that URB 201 or URB 301 will suffice as prerequisites for any of these courses.

* Other courses may be approved upon request; please consult the program Director, Dr. Richard Grant: rgrant@miami.edu

** A minimum grade of C- with a 2.0 overall GPA are required.

---

## Business

http://www.bus.miami.edu

### Introduction
The University of Miami Herbert Business School offers courses leading to the degrees of

- Bachelor of Business Administration (BBA),
- Bachelor of Science in Business Administration (BSBA), and
- Bachelor of Science in Accounting and Finance (BSAF).

Undergraduate degrees in business are administered by the Vice Dean for Undergraduate Business Education.

### Mission
The mission of the University of Miami Herbert Business School is to develop innovative ideas and principled leaders that transform global business and society.

### Accreditation
All Business degree programs, including individual Accounting programs are fully accredited by AACSB International — The Association to Advance Collegiate Schools of Business.
Academic Policies

Student Responsibilities

• Miami Herbert Business School students are responsible for planning their own academic programs and for meeting degree requirements.
• It is the students’ responsibility to understand fully, and to comply with, all the provisions of this Bulletin and any written changes to their program of study.
• Students are provided assistance by academic advisors and faculty members.
• Deviations from department, program, or school requirements are granted only by written approval from the Vice Dean or, in some cases, the relevant department chairperson.
• A student who is in violation of the provisions of this Bulletin may be administratively withdrawn from a class or classes, dismissed from Miami Herbert Business School, and/or have an electronic hold placed upon future enrollment.
• A student who is disruptive in class as determined by assigned faculty and the Vice Dean will be administratively dropped from the class.
• Information regarding appeal procedures and special requests relative to academic matters is available in Merrick 104, Miami Herbert Business School, Office of Undergraduate Business Education.

Admission to Miami Herbert Business School

Admission to the University for undergraduate study as a new first year student is sufficient for admission to Miami Herbert Business School prior to matriculation. However, strong quantitative skills are typically needed for success. Students who do not matriculate into Miami Herbert Business School in their first semester of study at the University may request an internal transfer to Miami Herbert Business School thereafter only according to the policies and procedures set out in the subsection below titled “Internal Transfer to Miami Herbert Business School.”

Transfer Admission to Miami Herbert Business School

Transfer applicants from outside the University of Miami must submit a satisfactory academic record in compliance with the standards of the University of Miami Office of Admission. Admitted applicants will be in good academic standing at all institutions previously attended and have a minimum transfer cumulative grade point average (GPA) of 3.0. All previous transfer courses must be from an accredited institution, and a minimum grade of "C" (2.0) must be earned in all transfer courses for UM credit to be awarded. This includes repeated courses under a forgiveness policy at any previous institution. Credit hours more than 12 years old are not recognized for degree purposes.

All transfer students to Miami Herbert Business School must have completed and received college credit for a calculus course equivalent to either MTH 161 (4 credit hours) or MTH 140/MTH 141 (8 credit hours), and earned a grade of "B" or better in the(se) course(s). The transfer calculus course must be approved by submitting the syllabus and textbook title to the University of Miami Department of Mathematics for evaluation.

All transfer coursework taken outside the University of Miami will be reviewed on a course-by-course basis for equivalency to Miami Herbert Business School course requirements. Not all business courses taken at other institutions serve as equivalents to Miami Herbert courses. For example, any business class that is from a non-AACSB accredited institution will be accepted only as elective credit toward the overall degree requirements. Transfer applicants may appeal to have such classes from non-AACSB accredited institutions reviewed for possible application toward business course requirements by submitting the course syllabus and textbook title to the Office of Undergraduate Business Education.

A transfer student’s overall coursework must also meet specific curricular and residency requirements. Pursuant to Miami Herbert Business School policy, transfer students must complete a minimum of 50 percent of the Business Core at the University of Miami. Transfer students must also complete a minimum of 50 percent of all major and a minimum of 50 percent of all minor courses at the University of Miami. University Residency and other requirements, applicable to all students, are set out below in the section headed Requirements for Graduation.

Internal Transfer to Miami Herbert Business School

Students seeking internal transfer to Miami Herbert Business School from other UM Schools and Colleges must have a minimum of three full semesters (45 credits) remaining, after transfer to MHBS, within which to complete degree requirements. They also must meet the following conditions prior to making a formal internal transfer request:

• an earned grade of "B" or better in MTH 161 (4 credit hours) or MTH 151 (5 credit hours) or MTH 140 and MTH 141 (8 credit hours). If a student does not initially earn a "B" or better in the calculus course, the student may repeat the calculus course to try to satisfy the required minimum "B" grade. The second grade will be considered for purposes of meeting the criteria to transfer to Miami Herbert Business School. For information on repeated courses and grades, please refer to the section below entitled Repeat Rules at Miami Herbert Business School, as well as University Policies on Repeat Rules. (p. 27)
• an earned minimum cumulative UM GPA of 3.0.
• documented attendance at a mandatory "Transfer to Miami Herbert Business School information Session," offered at least monthly in fall and spring semesters (schedule available at reception in Merrick Building Room 104 and at the MHBS Undergraduate Business Education website).

Academic Progress, Probation, and Dismissal

When a student’s semester or cumulative GPA is below 2.0, or progress toward degree completion is unsatisfactory, the student will be warned, placed on academic probation, or dismissed in accordance with the University’s or Miami Herbert Business School’s policies and procedures:
• Warning: semester GPA lower than 2.0 but cumulative GPA above 2.0

• Probation: cumulative GPA lower than 2.0

• Probation with Dismissal: two consecutive semesters with cumulative GPA lower than 2.0, or failure to make progress toward degree completion

• Failure to make progress toward degree completion includes, but is not be limited to:
  • failure to complete enough credit hours in the business degree program to graduate after ten regular semesters of enrollment.
  • failure to maintain a GPA sufficiently high to permit graduation in the ordinary course with the required minimum 2.5 GPA.
  • failure in any business course the student repeats pursuant to the University’s General Repeat Rule (p. 27) or otherwise.
  • failure to pass the required calculus course (MAS 110 or MTH 161 for the BBA degree, MTH 161 for the BSBA degree) by the fourth semester.

• A student on probation is not permitted to enroll in more than four courses (no more than 13 credit hours) and may have an electronic hold placed upon future enrollment until grades for work-in-progress are reviewed by the Undergraduate Business Education Academic Standards Committee.

• A student who is dismissed for failure to satisfactorily complete required business core courses, or for failure to make progress toward the degree, is not automatically dismissed from the University. Accordingly, such a student may apply to another School or College within the University, and if accepted, may continue as an undergraduate student at the University of Miami. For such a student who is not accepted by another School or College, dismissal from Miami Herbert Business School may have the incidental effect of dismissal from the University of Miami as well.

Repeat Rules at Miami Herbert Business School
The following policies apply to business students taking advantage of the University’s Repeat Rules (http://bulletin.miami.edu/general-university-information/university-policies/course-information/#text), which also dictate treatment of grades in repeated courses for purposes of GPA calculation. Please note that in all cases, grades earned in both the first and second attempts in a course remain on the student’s transcript as a permanent record.

General Repeat Rules
• The student may not repeat any business course more than once. (Two completions in total).
• Repeated business course(s) must be taken for a grade; the student may not elect “credit/no credit” for a repeated course.
• The student may repeat a threshold course(s) to demonstrate the qualifying grade for continuing in the major or minor.
• Business courses in which a C- is insufficient to earn credit toward the major or minor must be repeated using the General Repeat Rule and may not be repeated using the Undergraduate Repeat Rule.

Undergraduate Repeat Rule
• The summer sessions are not counted as semesters, either individually or together, in determining the last semester in which a student may elect to repeat a course in which a “D” or “F” grade is earned under the Undergraduate Repeat Rule.

• A student who wishes to take advantage of the Undergraduate Repeat Rule policy must complete a Repeat Rule Request Form, which is available from the student’s academic advisor in Miami Herbert Business School, Office of Undergraduate Business Education. For additional information about the application of the Undergraduate Repeat Rule in Miami Herbert Business School, consult an academic advisor in the Office of Undergraduate Business Education.
• The student may not use the Undergraduate Repeat Rule if the initial grade is C- or higher.

Readmission
The requirements for readmission may be viewed in the Student Status - Readmission (p. 81) section of this Bulletin. The following special conditions related to readmission are also in effect for Miami Herbert Business School:

• A student requesting readmission, who was previously dismissed for academic reasons or who had below a 2.0 cumulative GPA, must present adequate evidence that the conditions and/or factors that caused the prior poor academic performance have changed sufficiently and that there is a reasonable expectation of satisfactory performance if the student is permitted to resume study at Miami Herbert Business School.
• A student dismissed for nonacademic reasons must provide written authorization from the Dean of Students’ Office before re-enrollment will be permitted.
• A business student who did not earn at least a C grade in MAS 110 or MTH 161 will not be readmitted to Miami Herbert Business School.
• A student seeking readmission may have conditions placed upon any such readmission. Failure to satisfactorily accomplish the stated conditions may result in dismissal or the student otherwise not being permitted to register for future semesters.
Changes to Academic Requirements
Miami Herbert Business School reserves the right to change academic requirements including course offerings, minimum grade requirements, and minimum required grade point averages, to ensure that students are receiving the latest knowledge and are maintaining the standards necessary to be professionally competitive. Changes are communicated to students either by written or electronic notice, or personally by their academic advisors.

Residency and Graduation Requirements
In addition to meeting the graduation requirements as set out in Degree Programs, below, a candidate for either the BBA or BSBA degree must complete the last 45 credit hours consecutively and exclusively in degree-seeking status in residence at Miami Herbert Business School, University of Miami. Credit by examination may not be used to meet the residency requirement. In addition, a minimum of 120 credit hours is required for graduation, not including ENG 103, TAL 191, MTH 099, or any UMI internship course. The student’s last 56 credit hours must be completed at a four-year institution.

After being admitted to the University of Miami, students must complete all business coursework in residence, including coursework required by the Business Core and specific coursework for the business major and minor areas of specialization. This policy applies equally to non-business students completing minor areas of specialization at Miami Herbert Business School. Any appeal for an exception to this policy must be submitted in writing to the Office of Undergraduate Business Education.

Grade Point Average (GPA)
To graduate, business students must earn a minimum cumulative grade point average (GPA) of 2.5 in all undergraduate courses taken (combined UM and transfer coursework) and must also earn a minimum cumulative GPA of 2.5 in all undergraduate courses taken at the University of Miami. (See the General University Information page in this Bulletin regarding Grades (p. 75).) Each major for the BBA or BSBA degree and/or minor area of specialization within Miami Herbert Business School requires a minimum 2.5 cumulative GPA in the specific coursework required for the major/minor area of specialization. The minimum grade for individual courses in the major/minor area of specialization may vary, but is specified for each major and minor. Students are responsible for understanding the minimum GPA requirements for their proposed major/minor area(s) of specialization.

Degree Programs
Bachelor of Business Administration (BBA)
All BBA students must complete areas A, B, C, D, and E as listed below. All courses, except some of those in area D, must be taken for graded credit. (See the General University Information page in this Bulletin regarding Credit Only Option (p. 75).)

A. University of Miami’s General Education Requirements
Miami Herbert Business School participates in the University’s General Education requirements (p. 73). See descriptions in the General University Information section of this Academic Bulletin.

All undergraduate students must satisfy the University’s general education Areas of Proficiency: Written Communication Skills (ENG 105 and ENG 106), Advanced Writing and Communication Skills, and Quantitative Skills (Department of Mathematics course numbered MTH 108 or higher or a quantitative skills course approved by the student’s college/school and the University Curriculum Committee in consultation with appropriate academic units).

The University Quantitative Skills proficiency requirement is satisfied within the BBA degree requirements upon successful completion of MAS 110 or MTH 161 (or a MTH 161 equivalent). Miami Herbert Business School’s program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic Written Communication Skills courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required either to repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C- before enrolling in BUS 300.

In addition, all undergraduate students must satisfy the University’s general education distribution requirements by completing cognates in each of three Areas of Knowledge: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM). Every BBA student must complete a cognate designated Arts & Humanities (A&H) outside Miami Herbert Business School. Each business major and minor area of specialization fulfills either the People & Society (P&S) Area of Knowledge or the Science, Technology, Engineering & Mathematics (STEM) Area of Knowledge. For specific information about majors/minors and Area of Knowledge designations, please refer to the chart of Majors and Minors for the BBA Degree that follows or the relevant Academic Bulletin page for each major/minor area of specialization.

Depending on the Area of Knowledge of the student’s major(s) and any minor(s), a cognate in either People & Society (P&S) or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

</tbody>
</table>
### Major Areas of Specialization - Requirements

All BBA students must complete at least one major area of specialization in the Miami Herbert Business School. Additionally, students may elect to complete a minor area of specialization either at Miami Herbert Business School or in another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for the major and minor areas of specialization are specified by each academic department. Every course completed in satisfaction of either a major or minor area of specialization must be taken for a grade and a grade of "C-" or higher earned, unless specified differently by the department. GPA minima for each business area of specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the major/minor area of specialization.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

**Major areas of specialization at Miami Herbert Business School are available only with completion of the required Business Core.** A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or "dual degree" student, must meet the minimum requirements for transfer to Miami Herbert Business School, although the student is not required to formally transfer to Miami Herbert Business School.

- The student must meet with the Assistant Dean for Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
• The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.

• The Office of the Provost completes the final approval of the Dual Degree Memorandum.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

**D. Electives (as needed to meet the minimum 120 credit hours)**

All undergraduate courses offered by the University may be used as electives, with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student’s cumulative GPA, and credit for the course is included in the student’s overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.

- No more than 8 credit hours in applied music, including band, may be used.

- Any science course taken as an elective and used as preparation for entrance to medical school must be taken for a grade.

**E. International Focus Within the Curriculum**

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the Vice Dean for Undergraduate Business Education.
Bachelor of Science in Business Administration (BSBA)

The BSBA degree at Miami Herbert Business School emphasizes quantitative foundation courses. All BSBA majors at Miami Herbert Business School must complete areas A, B, C, D, and E as listed below. All courses, except some of those in area D, must be taken for graded credit. (See the General University Information page in this Bulletin regarding Credit Only Option (p. 75).)

A. University of Miami’s General Education Requirements

Miami Herbert Business School participates in the University’s General Education requirements (p. 73). See descriptions in the General University Information section of this Academic Bulletin.

All undergraduate students must satisfy the University’s general education Areas of Proficiency: Written Communication Skills (ENG 105 and ENG 106), Advanced Writing and Communication Skills, and Quantitative Skills (Department of Mathematics course numbered MTH 108 or higher or a quantitative skills course approved by the student’s college/school and the University Curriculum Committee in consultation with appropriate academic units).

The University Quantitative Skills proficiency requirement is satisfied within the BSBA degree requirements upon successful completion of MTH 161 (or a MTH 161 equivalent). Miami Herbert Business School’s program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic Written Communication Skills courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required either to repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C- before enrolling in BUS 300.

In addition, all undergraduate students must satisfy the University’s general education distribution requirements by completing cognates in each of three Areas of Knowledge: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM). Every BSBA student must complete a cognate designated Arts & Humanities (A&H) outside Miami Herbert Business School. Each business major and minor area of specialization fulfills either the People & Society (P&S) Area of Knowledge or the Science, Technology, Engineering & Mathematics (STEM) Area of Knowledge. For specific information about majors/minors and Area of Knowledge designations, please refer to the chart of Majors and Minors for the BSBA Degree that follows or the relevant Academic Bulletin page for each major/minor area of specialization.

Depending on the Area of Knowledge of the student’s major(s) and any minor(s), a cognate in either People & Society (P&S) or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BSBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

**Total Credit Hours**: 62

**NOTE**: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements (p. 73). Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

**NOTE**: MTH 161 and MAS 311 must be completed with a “C-” or better.

### C. Major and Minor Areas of Specialization - Requirements

All BSBA students must complete at least one major area of specialization at Miami Herbert Business School. Additionally, students may elect to complete a minor area of specialization either at Miami Herbert Business School or in another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for the major and minor areas of specialization are specified by each academic department. Every course completed in satisfaction of either a major or minor area of specialization must be taken for a grade and a grade of "C-" or higher earned, unless specified differently by the department. GPA minima for each business area of specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the major/minor area of specialization.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for the major or minor area of specialization may be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

**Major areas of specialization at Miami Herbert Business School are available only with completion of the required Business Core.** A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or "dual degree" student, must meet the minimum requirements for transfer to Miami Herbert Business School, although the student is not required to formally transfer to Miami Herbert Business School.

- The student must meet with the Assistant Dean for Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
- The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.
- The Office of the Provost completes the final approval of the Dual Degree Memorandum.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

D. Electives (as needed to meet the minimum 120 credit hours)

All undergraduate courses offered by the University may be used as electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student's cumulative GPA, and credit for the course is included in the student's overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used in preparation for entrance to medical school must be taken for a grade.

E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the Vice Dean for Undergraduate Business Education.

Bachelor of Science in Accounting and Finance (BSAF)

The Bachelor of Science in Accounting and Finance (BSAF) degree at Miami Herbert Business School is intended for quantitatively strong students arriving at the business school with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics.

Because of the accelerated sequencing and unique course requirements, the BSAF program is lockstep in the first two years. Therefore, it is open only to first year students starting in fall who are prepared to successfully complete Calculus I (MTH 161) and Introduction to Business Statistics (MAS 201) in their first semester. Except in rare cases, the BSAF program is not open to transfer students.

Students must maintain a minimum overall cumulative GPA of 3.0 in order to remain eligible for the BSAF degree, calculated at the end of each semester or term, including the first. The University Repeat Rule may be utilized by BSAF students to replace a D or F only if the cumulative GPA meets the requisite 3.0 GPA without the repeat. Given the accelerated pace of the BSAF core, repeated courses are not to be used to retroactively reinstate a student into the program.
Every course completed in satisfaction of the BSAF degree (with the possible exception of some electives) must be taken for a grade. A minimum grade of "C-" or higher must be earned for all BSAF Business Core Requirements, except for ACC 223 and FIN 302 for which a grade of "B" or higher is required. (A grade of "B-" is not sufficient in either course.) To graduate with the BSAF degree, students must maintain a cumulative GPA of 3.0 in all Accounting courses and in all Finance courses. Students who do not meet program requirements at any point in the degree's completion will be converted to the BBA or BSBA program, as appropriate.

A minimum of 125 credits is needed to graduate with the BSAF degree.

A. University of Miami's General Education Requirements

Miami Herbert Business School participates in the University's General Education requirements (p. 73). See descriptions in the General University Information section of this Academic Bulletin.

All undergraduate students must satisfy the University's general education Areas of Proficiency: Written Communication Skills (ENG 105 and ENG 106), Advanced Writing and Communication Skills, and Quantitative Skills (Department of Mathematics course numbered MTH 108 or higher or a quantitative skills course approved by the student's college/school and the University Curriculum Committee in consultation with appropriate academic units).

The University Quantitative Skills proficiency requirement is satisfied within the BSAF degree requirements upon successful completion of MTH 161 (or a MTH 161 equivalent). Miami Herbert Business School's program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic Written Communication Skills courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required either to repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C- before enrolling in BUS 300.

In addition, all undergraduate students must satisfy the University's general education distribution requirements by completing cognates in each of three Areas of Knowledge: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM). The specific coursework of which the BSAF degree is comprised satisfies both the People and Society (P&S) and the Science, Technology, Engineering, and Mathematics (STEM) Areas of Knowledge. Students pursuing the BSAF degree must complete any Arts & Humanities (A&H) cognate outside the Miami Herbert Business School. Students are required to declare their cognate with the Office of Undergraduate Business Education prior to the start of the junior year.

**Total Credit Hours**

**NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements (p. 73). MTH 161 and MAS 201 must be completed with a “C-” or better.

Students who wish to change from the BSAF to the BBA or BSBA after completing ACC 223 will receive credit for ACC 211 and must complete ACC 212 to satisfy the BBA or BSBA business core requirements. Students who wish to change from the BSAF to the BBA or BSBA after completing ECO 213 will receive credit for ECO 211 and must complete ECO 212 to satisfy the BBA or BSBA business core requirements. Conversely, BSAF students who have completed both ECO 211 and ECO 212 do not need to complete ECO 213, and BSAF students who have completed both ACC 211 and ACC 212 do not need to complete ACC 223.

**C. Major and Minor Areas of Specialization - Requirements**

Upon fulfilling the requirements for the BSAF degree, students will have completed the required coursework for both the Accounting major area of specialization and the Finance major area of specialization, as well as for the cognate or minor in Business Analytics. Students must maintain a minimum overall cumulative GPA of 3.0 in order to remain eligible for the BSAF degree, calculated at the end of each semester or term, including the first. The University Repeat Rule may be utilized by BSAF students to replace a D or F only if the cumulative GPA meets the requisite 3.0 GPA without the repeat. Given the accelerated pace of the BSAF core, repeated courses are not to be used to retroactively reinstate a student into the program.

Every course completed in satisfaction of the BSAF degree (with the possible exception of some electives) must be taken for a grade. A minimum grade of “C-” or higher must be earned for all BSAF Business Core Requirements, except for ACC 223 and FIN 302 for which a grade of “B” or higher is required. (A grade of “B-” is not sufficient.). To graduate with the BSAF degree, students must maintain a cumulative GPA of 3.0 in all Accounting courses and in all Finance courses. Students who do not meet program requirements at any point in the degree's completion will be converted to the BBA or BSBA program, as appropriate.

Additionally, students may elect to complete a minor area of specialization either at Miami Herbert Business School or from another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for minor areas of specialization are specified by each academic department. Every course completed in satisfaction of a minor area of specialization must be taken for a grade and a grade of “C-” or higher earned, unless specified differently by the department. GPA minima for each business area of specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the minor area of specialization.
No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than the required credit hours for graduation or more than eight semesters of study for graduation.

Business students may choose to pursue an additional major from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

Major areas of specialization at Miami Herbert Business School are available only with completion of the required Business Core. A student in another School or College at the University of Miami pursuing a business degree as a “second degree” or “dual degree” student, must meet the minimum requirements for transfer to Miami Herbert Business School, although the student is not required to formally transfer to Miami Herbert Business School.

- The student must meet with the Assistant Dean for Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
- The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.
- The Office of the Provost completes the final approval of the Dual Degree Memorandum.

### D. Electives (as needed to complete the minimum 125 credit hours)

All undergraduate courses offered by the University may be used as electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student’s cumulative GPA, and credit for the course is included in the student’s overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used in preparation for entrance to medical school must be taken for a grade.

### E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the Vice-Dean for Undergraduate Business Education.

### Honors

#### Foote Fellows Honors Program

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Select incoming students will receive an invitation to the Foote Fellows Honors Program. (p. 72)
Graduation (Latin) Honors
• Students who qualify based on their cumulative GPA (combined UM GPA and transfer course GPA) and class rank will graduate with University Honors: cum laude, magna cum laude, or summa cum laude.
• For details consult an academic advisor in the Office of Undergraduate Business Education and the Office of Academic Enhancement. (https://oae.miami.edu/)

General Business Honors, Miami Herbert Business School
Graduation with General Business Honors requires:
• Completion of all of the requirements of the BSBA degree program; and
• A minimum 3.75 cumulative GPA (combined UM GPA and transfer course GPA) at graduation.

For details, consult an academic advisor in the Office of Undergraduate Business Education.

Departmental Honors in Business
Graduation with Departmental Honors requires:
• A minimum cumulative 3.9 GPA at the end of the junior year; and
• Completion of a 3-credit hour research project during the entire senior year on a topic that is of interest to both the faculty member supervising the research and the student responsible for completing it. The research and written deliverable must be deemed to be of exceptional quality, consistent with the workload of a 3-credit upper level independent study course, and worthy of a designation that is only open to the top 1% of Business School undergraduates; and
• A minimum cumulative 3.9 GPA at graduation; and
• Any other requirements, if any, established by the Department granting honors, as set forth in this Academic Bulletin.

Students who major in two distinct areas of specialization may complete their honors research project in the department of either business major specialization.

The 3-credit hour research project class is taken for "credit only" and does not count toward the 120-credit hours required for graduation. Students who begin a research project but do not complete it will be retroactively withdrawn from the research course. Students receive credit for the project only if the work is deemed to be of exceptional quality. Details related to Departmental Honors are available in the Office of Undergraduate Business Education.

Business Honor Societies
Students may be nominated for or elected into an honor society based on specific criteria. Contact the listed department for additional information.
• Beta Gamma Sigma (Highest Honors in Business) (Undergraduate Business Education (https://www.bus.miami.edu/academic-programs/undergraduate-business-education/))
• Beta Alpha Psi (Department of Accounting (http://www.bus.miami.edu/thought-leadership/academic-departments/accounting/))
• Omicron Delta Epsilon (Department of Economics (http://www.bus.miami.edu/thought-leadership/academic-departments/economics/))

• Finance (p. 780)
• Health Management and Policy for Non-Business Students (p. 791)
• Management for Non-Business Students (p. 829)
• Marketing for Non-Business Students (p. 861)
• Sustainable Business (p. 754)

The Bachelor of Science in Accounting and Finance

The BSAF degree (p. 769) at Miami Herbert Business School is intended for quantitatively strong students arriving at the business school with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics.
The General Business Program: An Individually-Designed Major for BBA and BSBA Students (People & Society or STEM)

The Individualized General Business major allows students at Miami Herbert Business School to tailor an area of business specialization creatively and to seek and develop connections among the business disciplines in ways that will suit their own academic interests and graduate school or career objectives. Building upon the strong foundation provided by the Business Core, students pursuing this program of study will be motivated to craft a unique business specialization that enhances their ability to respond to and compete in a dynamic economic marketplace.

Any BBA or BSBA degree-seeking student may pursue the customized Individualized General Business major. No additional admission or application is required. The student, however, must consult with his/her Business School academic advisor in order to select the Individualized General Business major. A three-person committee comprised of at least one faculty member and at least one undergraduate business academic advisor will be appointed by the Undergraduate Business Education Committee to oversee the student’s chosen academic program, provide feedback and assistance with course choices, and to connect the student to other relevant faculty or administrators for advice where indicated.

Curriculum for the Individualized General Business Major Area of Specialization

The student who wishes to pursue the BBA or BSBA in General Business must complete:

1. all University general education requirements, unless exempt (e.g. Foote Fellows), and
2. the Business Core requirements for either the BBA or the BSBA, including the international focus course, and
3. a minimum of 18 additional credit hours of upper-level (300-500 level) coursework chosen from among the course offerings of Miami Herbert Business School. The specific coursework selected to satisfy the Individualized General Business major may not be utilized to also satisfy the Business Core or the specific coursework requirements for any other major or minor area of specialization in Business. All coursework must be taken for a grade and within the current pre-requisite structure.

A minimum of 120 credit hours is required for graduation. The Individualized General Business major area of specialization may fulfill either the People & Society or the STEM general education Area of Knowledge, based upon the preponderance of the specific coursework pursued and with the approval of the advising committee.

The Global Business Co-Major (People & Society)

The curriculum for the Global Business Co-Major consists of 18 credit hours of required and elective course choices. The Global Business Co-Major is available only to BBA or BSBA students who are also completing another undergraduate business major area of specialization.

Students completing the Global Business Co-Major will:

• Apply interdisciplinary and multidisciplinary approaches, including in relevant cases, foreign language skills, to critical analysis of business topics at the country or regional level.
• Evaluate and apply diverse perspectives to complex issues of comparative and/or global significance, in the face of multiple and sometimes conflicting positions (e.g., cultural, disciplinary, ethical)
• Engage in meaningful interaction with other culture(s) and gain an in-depth understanding of a country and/or region of the world where the student may expect to commence his or her global business career

Curriculum Requirements

Each student will work with an advisor to design an individualized course of study that enhances the student’s global perspective and provides an intellectual framework and immersive environment for studying a new country or region of the world. Each program of study will consist of a minimum of 18 credit hours, including coursework distributed among the following areas:

1. Economics related to the country or region
2. Political or regulatory environment of the country or region
3. Historical/cultural perspective on the country or region
4. Exposure to a language of the country or region, demonstrated by completion of a business course in the language of the region, or if unavailable, completion of a course in the language at the 200 level or above. Where the country or region that is studied is English speaking, the student may complete this requirement by demonstrating language proficiency at the 200 level or above in another language, or by taking an additional course related to economics, political/regulatory environment, or history/culture of the country or region.
5. One international/global focused upper level business elective, outside the student’s other business major

In order to further advance and integrate his/her regional, functional and pragmatic expertise, and to hone the student’s global mindset, there is a required Experiential Learning component.
Business

• students must complete a learning experience in the country or region (i.e. study abroad).
• students must complete an approved international internship.
• students’ participation will be encouraged in any MBS Immersion Course that is offered for undergraduates in the region studied. These may take the form of summer or spring break study.
• students’ participation in programming on and off campus related to their region and career track will be encouraged and facilitated.

The Global Business Studies Program: Latin America (People & Society)

The Global Business Studies Program (http://www.bus.miami.edu/academic-programs/undergraduate-business-education/special-programs/global-business-studies.html) is a co-major option for incoming Miami Herbert Business School freshmen, who apply and are selected as GBS Scholars/ Foote Fellows. Students in the program simultaneously pursue a major in a functional area of business and, in the co-major, region-specific global studies coursework.

Curriculum for Co-major in Global Business Studies (21-27 credit hours)

1. Introduction to the region (3 credit hours)
2. Demonstrated proficiency in the language of the region, or where this is not feasible, at least one language course at the 200 level or above (min. 3 credit hours) Students may demonstrate language proficiency by completing business coursework delivered in the language of the region selected.
3. Economics of the region (3 credit hours)
4. Political and/or Regulatory Environment of the region (3 credit hours)
5. History of the region (3 credit hours)
6. Introduction to International Business (Standard course is MGT 349. Recommended alternatives: MGT “Doing Business in [the Region]” where available, or other approved business course in-country) (total of 3 credit hours)
7. Seminar & Senior Thesis (6 credit hours)
8. Culminates in a written research paper examining a significant problem or proposal for a particular country, approached from an interdisciplinary stand point
9. Carried out under the supervision of one or more faculty members
10. Oral presentation of the student’s findings and recommendations also required
11. Required internship or directed study in-country may allow for field research

12. Minimum of one semester “study abroad” in the studied region is required.

• Students may choose to satisfy the co-major’s economics and/or history and/or politics/regulation course requirement in-country.

GBS Scholars are also invited to participate in a wide array of co-curricular activities, intentionally designed to enhance the Global Business Studies co-major. These include a faculty-led, international travel course in the summer following freshman year and cultural activities and events throughout the program, curated by the GBS Academic Program Director.

Please note that any student who does not complete these curricular and co-curricular requirements, or who is unable to maintain a cumulative GPA of 3.5, will be asked to exit the program and co-major.

International Business Minor Area of Specialization (People & Society)

The International Business minor provides Miami Herbert Business School students an interdisciplinary perspective of international business to augment their studies in other areas of business specialization. The International Business minor may not be taken by students pursuing the International Finance and Marketing major or by non-business students. Students must complete all pre-requisite courses before enrolling in required International Business minor courses.

The International Business minor consists of 12 credit hours as follows:

<table>

Total Credit Hours: 12

1. All specific coursework for the International Business minor must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework in this minor area of specialization. All courses must be taken within the current pre-requisite structure.

**Business Cognates Available to Non-Business Students**

**Understanding Business (People and Society)**

The University of Miami Herbert Business School offers a general business cognate to non-business students: Understanding Business. Completion of this cognate fulfills the University's General Education requirement of a cognate in the Area of Knowledge labeled People & Society (P&S).

This cognate offers students an overview of the business environment with the goal of promoting awareness and understanding of the real-world issues that affect the global economy in the twenty-first century. Courses in the cognate deliver the essential business concepts that enable critical consideration of the questions that confront decision makers in the various functional areas of business. Students declare the cognate via their advisor at their home School or College.

The Understanding Business cognate consists of the following courses:

Business Analytics: Transforming data into insights for better informed decisions (STEM)
Professionals with deep analytical skills are in high demand across a variety of industries and organizations. Business analytics solutions use quantitative analysis to measure past performance and to guide and organization’s future business planning. The Business Analytics cognate offers a selection of courses that cover important tools and techniques to help understand and analyze data, predict outcomes, and to improve decision-making in increasingly complex and interconnected business environments. Completion of this cognate fulfills the University's General Education requirement of a cognate in the Area of Knowledge labeled Science, Technology, Engineering, and Math (STEM). Students declare the cognate via their advisor at their home School or College.

Development Economics (People and Society)
The core courses in this cognate, ECO 211 Principles of Microeconomics and ECO 212 Principles of Macroeconomics, introduce the study of the economic behavior of individuals, firms, and markets, as well as the analysis of the economy as a whole, both in terms of short-run fluctuations (the business cycle) and long-run determinants of economic growth. Additionally, the student chooses an elective from a set of courses related to the economic aspects of the development process based on their specific interests. Students completing this cognate will acquire the tools and techniques to analyze and solve economic problems, and will learn to apply the theory to real-world economic events in their area of interest. Students declare the cognate via their advisor at their home School or College.

Please note that no course may double count for any major, minor, or cognate.

Methods for Economic Analysis (STEM)
Recommended for students who have completed MTH 130 or Higher.

The core course in this cognate, ECO 211 Principles of Microeconomics, introduces the study of the economic behavior of individuals, firms, and markets. Additionally, students choose two electives from a set of STEM courses based on their specific interests in the areas of mathematical modeling and empirical analysis. Students completing this cognate will acquire the tools and techniques to analyze and solve mathematical economics and econometric problems, and will learn to apply the theory to real-world economic events in their area of interest. Students declare the cognate via their advisor at their home School or College.
Please note that no course may double count for any major, minor, or cognate.

**Minors for Non-Business Students**

Due to sequencing and space constraints, it is not feasible to complete a business minor in two semesters. Moreover, business courses may not be completed outside Miami Herbert Business School. Therefore, students desiring to complete business minors must plan well ahead.

Students in other schools and colleges of the University may choose to pursue any of the following minor areas of specialization at Miami Herbert Business School by officially declaring the minor at their home School or College:

**Minor Areas of Specialization**

- Business Law (P&S) (p. 722)
- Business Technology (STEM) (p. 734)
- Economics - Political Economy (P&S) (p. 752)
- Economics - Quantitative Economics (STEM) (p. 754)
- Entrepreneurship (P&S) (p. 828)
- Finance (STEM) (p. 780)
- Health Management and Policy (P&S) (p. 791)
- Management (P&S) (p. 829)
- Marketing (P&S) (p. 861)
- Sustainable Business (P&S) (p. 754)

Students interested in completing a minor offered by the University of Miami Herbert Business School should consult with an academic advisor in the School or College of their degree/major to determine if a business minor is acceptable. Neither advice nor consent from either the Office of Undergraduate Business Education or the relevant Miami Herbert Business School department is necessary for a student to choose or complete a Business minor. Instead the non-business student should simply declare the minor in CaneLink and complete the necessary specific coursework, according to the details listed in the appropriate department’s section of this Academic Bulletin and the following supplemental guidelines, which are applicable to all minors unless otherwise provided by the department offering the minor area of specialization:

All courses within the minor must be taken for a grade and completed with a grade of “C-” or higher unless a higher minimum grade is prescribed by the department offering the minor. To be awarded the minor, the student must also achieve a minimum cumulative GPA of 2.5 in all minor courses, unless a higher grade or GPA is prescribed by the department offering the minor, as set out in that department’s section of this Academic Bulletin. All courses taken by the student in the department offering the minor will count toward the GPA in the minor.

**General Overview**

The Foote Fellows Honors Program (p. 72) recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Within the curricular framework of their school or college, Foote Fellows enjoy maximum freedom to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.
At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities and educational guidance, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

In addition, Foote Fellows have access to opportunities outside their school. Special Foote Fellow lectures are held throughout the academic year. "Books That Matter," a rigorous, multidisciplinary seminar in reading and analyzing significant works of nonfiction, is offered to Foote Fellows. Foote Fellows also benefit from focused advising regarding post-baccalaureate distinguished fellowships and awards, support and information about co-curricular opportunities from a dedicated program manager, and networking events with other Foote Fellows from all disciplines.

To graduate with the Foote Fellows Honors Program distinction, Foote Fellow students must achieve a minimum GPA of 3.5 by the completion of the final semester.

Eligibility for the Foote Fellows Honors Program transcript distinction for each student is determined by the lower of two GPAs:
1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

**Foote Fellows in Business**

As the best and brightest of each incoming class, Miami Herbert Business School Foote Fellows are afforded the most stimulating academic and co-curricular experiences the School has to offer. They are invited to take part in Foote-only seminars, exclusive workshops on a variety of academic and career-oriented themes, and networking events with some of Miami Herbert Business School’s most honored speakers and guests.

Miami Herbert Business School Foote Fellows enroll in specially-designated sections of selected classes, such as BSL 212, BUS 255, and MKT 201. Business Foote Fellows also enjoy dedicated academic and co-curricular/career advisors, as well as opportunities for unique mentorship by prominent alumni.

**Accounting**

**Department Code: ACC**

**Introduction and Educational Objectives**

The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed upon general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

**Requirements to Become a CPA**

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. **Note:** Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board.

The Florida State Board of Accountancy (BOA) separates the requirements to become a CPA into two parts:

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the Florida Department of Business & Professional Regulation website [http://www.myfloridalicense.com/DBPR/certified-public-accounting/](http://www.myfloridalicense.com/DBPR/certified-public-accounting/) for updates and rules that may apply in particular circumstances.

**Requirements to Sit for the CPA Exam**

To be eligible to take the CPA exam, you must have completed at least 120 credit hours including 24 credit hours of accounting (including taxation, auditing, financial, and cost) at the upper division (300-level or above) and 24 credit hours in upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division. As part of the general business credit hours, applicants are required to have at least 3 credit hours of business law courses. Excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never
acceptable toward the required credit hours nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting. The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note: you do not have to have a bachelor’s degree in order to sit for the CPA exam.

Requirements for Licensure
In addition to passing all four parts of the CPA exam with at least a 75% within an 18 month rolling period, the BOA requires that you have completed a bachelor’s degree plus an additional 30 credit hours for a total of 150 credit hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is also required to become licensed. (This experience may be obtained before or after sitting for the exam; however, all requirements to sit for the exam must be met before the work experience commences.) If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 credit hours must include a minimum of 30 credit hours of accounting courses (including taxation, auditing, financial, and cost/managerial) at the 300-level or above and at least 36 credit hours of general business courses (including 3 credit hours of business law) at the 300-level or above (with some exceptions). Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State
If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition, if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

Accreditation
The Board accepts degrees from schools accredited by the following associations: Middle States Association of Colleges and Secondary Schools, New England Association of Schools and Colleges, North Central Association of Colleges and Secondary Schools, Northwest Association of Schools and Colleges, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association to Advance Collegiate Schools of Business (AACSB), and Association of Independent Schools and Colleges who are regulated by the Commission of Independent Education, and Canadian, Mexican, Irish, and Australian academic accounting programs approved by the provincial educational bodies or the equivalent educational accreditation body for that country. If you have graduated from a school or college which is not accredited by the above-mentioned means, then you must use the provisions of F.A.C. 61H1-27.001(5).

Duplicate Courses
- No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.
- For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

The Fifth Year Option
Many of our graduates satisfy the additional 30 credit hour requirement (to reach the total required 150 hours) for the CPA by continuing on for a fifth year during which time they also can complete the requirements for either the Master of Accounting (MAcc) or Master of Science in Taxation (MST) degree. While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers/CFOs or financial analysts. The MST is designed for students interested in careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. Students interested in these programs should consult with the Program Director in the Department of Accounting.

Special Programs
- Accelerated Accounting Programs (p. 701)
- Five-Year Accounting Program with Senior-Year Internship (p. 710)

ACC 211. Principles of Financial Accounting. 3 Credit Hours.
Course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ACC 212. Managerial Accounting. 3 Credit Hours.
Introduction to managerial accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective.
Prerequisite: ACC 211 or ACC 221 or ACC 223 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 221. Accelerated Principles of Financial Accounting. 3 Credit Hours.
This course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. This course is not open to students with credit for ACC 211.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 222. Accelerated Managerial Accounting. 3 Credit Hours.
This course provides an introduction to managerial/cost accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective. This course is not open to students with credit in ACC 212.
Prerequisite: ACC 221.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 223. Principles of Financial and Managerial Accounting. 4 Credit Hours.
This course provides an introduction to financial and managerial accounting. Since this course focuses on accounting's role in providing information for management decisions, it also includes techniques for planning and controlling business operations to achieve company goals. Topics include the accounting cycle, financial statements, and financial ratios. From a managerial perspective, topics include job-order, process costing, activity-based costing, cost behavior, cost volume profit analysis, budgets, variances, and capital budgeting.
Prerequisite: MTH 161 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 301. Cost Accounting. 3 Credit Hours.
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. Course is designed to provide students with the necessary skills to perform basic cost accounting.
Prerequisite: ACC 212 or ACC 222 or ACC 223 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ACC 311. Intermediate Accounting I. 3 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows.
Prerequisite: ACC 212 Or ACC 223 or Pre/Corequisite: ACC 222 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ACC 312. Intermediate Accounting II. 3 Credit Hours.
A continuation of ACC 311. Course focuses on more complex accounting applications such as leases, postretirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.
Prerequisite: ACC 311 And Requisite: BUSINESS SCHOOL.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
ACC 315. Accounting for Health Care Organizations. 3 Credit Hours.
This course develops a working knowledge of the financial accounting and reporting processes in health care, services industry, and governmental organizations. Focus is on accounting in health care, service industry and for-profit organizations. This will not count as an accounting course for accounting majors and will not satisfy any accounting requirements needed to sit for the CPA exam in Florida.
Prerequisite: ACC 212 or ACC 222 and Requisite: HSMP major.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 402. Auditing. 3 Credit Hours.
Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports.
Prerequisite: ACC 311 And Requisite: BUSINESS SCHOOL.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 403. Fundamentals of Taxation. 3 Credit Hours.
Basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusion, inclusions, statutory deductions, exemptions, and credits. The fundamentals of tax research are also introduced.
Prerequisite or Corequisite: ACC 311 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 404. Advanced Taxation. 3 Credit Hours.
Study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, reorganization, distribution, and liquidation of corporations and partnerships. Also includes an introduction to estate and gift taxation.
Prerequisite: ACC 403 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 406. Accounting Systems. 3 Credit Hours.
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool.
Prerequisite: ACC 311 And Requisite: BUSINESS SCHOOL.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 411. Advanced Accounting. 3 Credit Hours.
The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships.
Prerequisite or Corequisite: ACC 312 AND Requisite: Business School and Junior Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 496. Directed Studies in Accounting. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 497. Directed Studies in Accounting. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ACC 498. Special Topics in Accounting. 3 Credit Hours.
Special topics in selected non-STEM areas of Accounting.
Requisite: Business School And Junior Or Senior Status.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 499. Special Topics in Accounting. 3 Credit Hours.
Special topics in selected STEM areas of Accounting.
Requisite: Business School And Junior Or Senior Status.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 506. Internal Auditing. 2 Credit Hours.
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
Prerequisite: ACC 402. And Requisite: Accepted into the Accelerated Program.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 522. Advanced Issues in Auditing. 3 Credit Hours.
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
Prerequisite: ACC 402. And Requisite: Accepted into the Accelerated Program.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 524. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities.
Prerequisite: ACC 312 and Requisite: Accepted into the Accounting Accelerated Program.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 530. International Financial Reporting Standards. 1 Credit Hour.
This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).
Prerequisite: ACC 312 and Requisite: Accepted into the Accounting Accelerated Program.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 550. Accounting Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman is required at time of registration.
Requisite: Business School.

Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 555. Accounting Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors Accounting.

Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.
ACC 572. Advanced Financial Analysis. 2 Credit Hours.
This course builds on the analytical techniques developed in the prerequisite financial accounting courses to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.
Prerequisite: ACC 312. And Requisite: Accepted into the Accounting Accelerated Program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

Accelerated Accounting Programs

Accelerated Master's Programs
In addition to offering the Master of Science in Accountancy (MSA) and Master of Science in Taxation (MST) in the usual time frame involving one year of full-time study beyond the Bachelor's level, the MSA-Assurance Track, MSA-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while in the senior year.

The accelerated programs are available only to students who are undergraduate students at the University of Miami Herbert Business School. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline
1. Internship in summer after junior year
2. Twelve credit hours of work in senior year will count towards the MSA or MST degree (only students in the accelerated programs are eligible to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and the CPA exam.
4. Complete remaining credit hours of graduate work in fall semester after senior year.

Admission to the Accelerated Master's Programs

Incoming Freshmen
• Prospective students may apply to the accelerated program when they apply for admission to the University of Miami.
• SAT Reading and Math combined scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
• Students are required to have a cumulative and an accounting major GPA of 3.3 or higher by their junior at the University of Miami. Students must then maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
• Students will need to have completed a minimum of 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

Academic Requirements
• Students should apply to the accelerated program by September 30 of their junior year.
• Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
• After admission, to remain in the program, students must maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
• Students will need to have completed a minimum of 102 credit hours by the start of their senior year including the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 311</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ACC 312</td>

<tr>
<td>BSL 401</td>
<td>The Law of Financial Transactions</td>
<td>3</td>
</tr>
<tr>
<td>Total</td>
<td>Credit Hours</td>
<td>15</td>
</tr>
</tbody>
</table>
Additional Requirements
1. Students must apply to the program at the start of their junior year and obtain an “approved” internship through the Toppel Career Center.
2. The internship must be scheduled to take place during the summer between their junior and senior year.
3. In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Faculty Director in the Department of Accounting.
4. By the fall semester of their senior year, students must have applied for admission to the graduate accounting program and submitted their verification enrollment fee to pursue a Master of Science in Accountancy or Master of Science in Taxation degree in the fall semester immediately following their senior year.
5. The GMAT will be waived for students admitted into the program.

Pre-requisites
The following must be completed before students begin their senior year:

- A minimum of 102 credit hours
- All undergraduate degree requirements except for those that can be completed in the senior year
- FIN 303 before or during senior year (for those students who intend to select the MSA-Corporate track)
- Note: MGT 401 is usually completed in the final semester of the undergraduate program.
- The following Accounting major requirements must be taken prior to senior year:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 311</td>
<td>Intermediate Accounting I</td>
<td>3</td>

</tr>
</tbody>
</table>

Senior Year Curriculum (Senior-Graduate Status)
The program-specific curriculum for the senior year is the same for all tracks (except that students selecting the MSA-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 301</td>
<td>Cost Accounting</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>FIN 303</td>
<td>Intermediate Financial Management (or other non-accounting undergraduate course approved by Program Director)</td>
<td>3</td>
</tr>
<tr>
<td>MGT 401</td>
<td>Strategic Management (usually taken in the final undergraduate semester)</td>
<td>3</td>
</tr>
<tr>
<td>Select one additional non-accounting undergraduate course approved by the Program Director</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Six (6) credit hours of 500-level courses approved by the Program Director. Examples of approved courses include ACC 522 Advanced Issues in Auditing (3 credit hours) and ACC 530 International Financial Reporting Standards (one credit hour)</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>Six (6) credit hours of 600-level courses approved by the Program Director. Examples of approved courses include ACC 648 Financial Reporting Implications of Income Taxes (2 credit hours) and BUS 610 Critical Thinking and Persuasion for Business (2 credit hours)</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td></td>
<td>33</td>
</tr>
</tbody>
</table>

1 Program requirements are subject to change. Not all courses are offered every semester or term. Consult the Program Director for the recommended sequence.

Students must select their track (MSA-Assurance, MSA-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

Summer after Senior Year
Students must take one approved graduate course, such as ACC 620, in the summer following their senior year. Students are also REQUIRED to take an approved CPA review course during the summer following their senior year after graduation. Students who do not take a CPA review course must
complete an additional six graduate credit hours which will likely delay graduation from December to the following May. Students are expected to pass part, if not all, of the CPA exam during this summer.

**Final Fall Semester**

In the final fall semester, students will complete the remaining 16 graduate credit hours including the requirements for their track and electives selected in consultation with the Program Director in the Department of Accounting.

**Senior Year Curriculum (Senior-Graduate Status)**

The program-specific curriculum for the senior year is the same for all tracks (except that students selecting the MSA-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of the following courses:

<table>
<thead>

1. Program requirements are subject to change. Not all courses are offered every semester or term. Consult the Program Director for the recommended sequence.

Students must select their track (MSA-Assurance, MSA-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

**Summer after Senior Year**

Students must take one approved graduate course, such as ACC 620, in the summer following their senior year. Students are also REQUIRED to take an approved CPA review course during the summer following their senior year after graduation. Students who do not take a CPA review course must complete an additional six graduate credit hours which will likely delay graduation from December to the following May. Students are expected to pass part, if not all, of the CPA exam during this summer.

**Final Fall Semester**

In the final fall semester, students will complete the remaining 16 graduate credit hours including the requirements for their track and electives selected in consultation with the Program Director in the Department of Accounting.

**Mission**

The mission of the Accounting Department is to provide an environment recognized for educational excellence through our academic programs, intellectual contributions, and service to the academic and professional communities.

**Student Learning Outcomes**

Students who complete this program will be able to:

1. Demonstrate an understanding of International Financial Reporting Standards (IFRS) including its basic history, its standard setting structure, and significant accounting and professional communities.
2. Define individual business disciplines and their relationship to the international business environment.
3. Prepare financial statements based upon generally accepted accounting principles.
4. Identify basic U.S. tax laws applicable to businesses and individuals.
5. Explain the attestation function and describe generally accepted auditing standards.
6. Describe the basic concepts of cost and managerial accounting and explain its role in business.
7. Apply mathematical concepts and technology to interpret, understand and communicate quantitative data.
8. Effectively produce, interpret and analyze written text, oral messages and multimedia presentations used in business.

**B.B.A. in Accounting**

**Overview**

Major Area of Specialization in Accounting (People & Society)

The accounting major prepares business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed on general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Accounting must complete the BBA Business Core and the specific coursework for the Accounting major area of specialization as follows:

<table>

**Total Credit Hours: 120**

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. To continue as an accounting major, a student must have a minimum cumulative GPA of 3.0 in accounting courses before enrolling in ACC 312. In subsequent coursework specific to the Accounting major area of specialization, including ACC 312, a grade of "C-" or better is acceptable as long as the overall GPA in the major is a 2.5.

5. No courses used to satisfy a major area of specialization may be used to satisfy the requirements for a different business major or minor area of specialization.

### Mission
- To develop innovative ideas and principled leaders that transform global business and society.

### Goals
The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting.

### Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

### B.S.B.A. in Accounting

#### Overview
Major Area of Specialization in Accounting (People & Society)
The accounting major prepares business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed on general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Accounting must complete the BSBA Business Core and the specific coursework for the Accounting major area of specialization as follows:

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

### Mission

- To develop innovative ideas and principled leaders that transform global business and society.

### Goals

The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting.

### Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.
Five-Year Accounting Program with Senior-Year Internship

Overview
The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Science in Accountancy or Master of Science in Taxation degree.

Program Timeline
1. Junior Year: Complete an application to the program and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate degree and Accounting major.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Science in Accountancy (MSA) or Master of Science in Taxation (MST) Program.

Pre-requisites
The program is designed for University of Miami Herbert Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401.

Admission to the Five-Year Accounting Program with Senior-Year Internship

Academic Requirements
The program is designed for University of Miami Herbert Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401 (http://bulletin.miami.edu/search/?P=MGT%20401).

Additional Requirements
1. Students must apply to the program at the start of their junior year and obtain an “approved” internship through the Toppel Career Center.
2. The internship must be scheduled to take place during the spring semester of their senior year.
3. In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Faculty Director in the Department of Accounting.
4. By the fall semester of their senior year, students must have applied for admission to the graduate accounting program and submitted their verification enrollment fee to pursue a Master of Science in Accountancy or Master of Science in Taxation degree in the fall semester immediately following their senior year.
5. The GMAT will be waived for students admitted into the program.

Pre-requisites
The program is designed for University of Miami Herbert Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401.

Senior Year Spring Semester Curriculum
In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include two accounting major courses and MGT 401.
Summer, Fall, and Spring after Senior Year

In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Science in Accountancy or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Mission

The mission of the Accounting Department is to provide an environment recognized for educational excellence through our academic programs, intellectual contributions, and service to the academic and professional communities.

Student Learning Outcomes

Students who complete this program will be able to:

1. Demonstrate an understanding of International Financial Reporting Standards (IFRS) including its basic history, its standard setting structure, and significant accounting and professional communities.
2. Define individual business disciplines and their relationship to the international business environment.
3. Prepare financial statements based upon generally accepted accounting principles.
4. Identify basic U.S. tax laws applicable to businesses and individuals.
5. Explain the attestation function and describe generally accepted auditing standards.
6. Describe the basic concepts of cost and managerial accounting and explain its role in business.
7. Apply mathematical concepts and technology to interpret, understand and communicate quantitative data.
8. Effectively produce, interpret and analyze written text, oral messages and multimedia presentations used in business.

Minor in Accounting

Overview

Minor Area of Specialization in Accounting (People & Society)

The Department of Accounting allows Miami Herbert Business School students to earn a minor in Accounting. The Accounting minor is not available to non-business students or to business students pursuing the BSAF degree.

Curriculum Requirements

Business students who choose to pursue the minor in Accounting must complete the following 9 credit hours of coursework in accordance with the current pre-requisite structure, which includes "Junior Status" and either completion of ACC 211 and ACC 212 or completion of ACC 221 and ACC 222.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 301</td>
<td>Cost Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACC 311</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ACC 312</td>
<td>Intermediate Accounting II</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours: 9

1 ACC 211 and ACC 212 or ACC 221 and ACC 222 (or equivalent) are pre-requisites for all other Accounting courses.

2 ACC 311 may be taken concurrently with ACC 222 for BSBA students.

3 To obtain a minor in Accounting a student must have a minimum cumulative GPA of 3.0 in Accounting courses before enrolling in ACC 312. This course has the additional pre-requisite of ACC 311. In all coursework specific to the Accounting minor, a grade of "C" or better is acceptable as long as the overall GPA in the minor is a 2.5.

Business Law

Department Code: BSL

Introduction

The modern manager faces increasing legal implications in daily operations and in formulating business policy. Consequently, effective decision-making requires an appreciation of the social, ethical, economic, and political bases of law as it relates to business. Business law courses provide the student with fundamental insight into legal institutions, the regulatory environment, and the nature of legal discourse, as well as an array
of substantive principles of law, including such areas as contracts, sales, business organizations, and domestic and international commercial relationships.

**Educational Objectives**

The primary goals of the Department of Business Law are to contribute to legal knowledge through conducting scholarly research, to disseminate it by publication in leading journals and law reviews, and to transmit that knowledge to students and the larger University-wide, business, and professional communities.

These goals both inform and drive the Department’s educational objectives, which focus on:

- instilling in students a strong sense of the legal and ethical issues permeating business;
- aiding students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- developing students’ analytical and problem solving ability, as well as their oral and written presentation skills.

**BSL 212. Introduction to Business Law. 3 Credit Hours.**

Introduction to business law and ethics for the undergraduate student. Topics include business ethics, contracts (the nature and requisites, formation, interpretation, performance and breach, and remedies), and sales (Uniform Commercial Code, Convention on the International Sale of Goods, transfer of title, warranties, and rights and remedies of buyers and sellers).

*Requisite: Business School.*

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall, Spring, & Summer.

**BSL 304. Corporate Law. 3 Credit Hours.**

Introduction to the law and regulation of corporations and other business entities. Topics include: tort and other business liabilities, agency and fiduciary duty, partnerships, limited liability companies, corporations (including the legal relationships underpinning their financial structure, director and officer liability, and laws relative to change of control), securities regulation, and antitrust law.

*Prerequisite: BSL 212 or equivalent or BUS 202.*

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**BSL 305. Legal and Social Aspects of Business Regulation. 3 Credit Hours.**

An introduction to the legal and ethical issues arising out of business and the regulatory environment. Topics include business ethics and subjects as environmental law antitrust, securities, administrative process, consumer protection, and employment regulation.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Offered by Announcement Only.

**BSL 306. Introduction to Corporate Sustainability. 3 Credit Hours.**

This course introduces students to issues associated with business and sustainability, through the lens of corporate governance and corporate citizenship. Readings, lectures, class discussion, and student projects are designed to instill in students a practical understanding of key corporate sustainability frameworks, challenges and opportunities, institutions, and actors in the global corporate context. Students will learn to apply alternative decision making models to current business activities. BSL 304 recommended as a prerequisite, but not required.

*Prerequisite: BSL 212 or equivalent or BUS 202.*

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.

**BSL 324. Negotiation. 3 Credit Hours.**

This experiential course is designed to introduce undergraduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.

*Requisite: Business School or Business Law minor AND Prerequisite: BSL 212 or equivalent or BUS 202 AND Sophomore Standing or higher.*

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.
BSL 333. Legal Aspects of Real Estate Transactions. 3 Credit Hours.
Legal principles controlling the acquisition, ownership, financing, and development of real property. Topics include nature and acquisition of rights in real property, theory of estates, co-ownership, fixtures, easements, legal descriptions, evidence of title, title insurance, deeds, mortgages, closing the sales and mortgage transactions, condominiums and cooperatives, brokers, and land use.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 401. The Law of Financial Transactions. 3 Credit Hours.
Overview of the law of commercial finance as it relates to existing and emergent payment systems, secured credit, and bankruptcy. Topics include: negotiable instruments, bank deposits and collections, secured transactions, personal and commercial bankruptcies, and accountant liability.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 412. International Business Law. 3 Credit Hours.
International law and organizations, international sales, credits and commercial transactions, U.S. trade law, and the regulation of the international market place are discussed.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 424. Intellectual Property Law. 3 Credit Hours.
This course is designed to acquaint the business student with the general framework of laws that regulate innovation, marketing, competition, and business development in the U.S. Special emphasis will be placed on discussion of ethical issues in information property, unfair competition, and management of intellectual property across various industries.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 435. Law of Entrepreneurship. 3 Credit Hours.
Overview of the legal aspects of entrepreneurship and business management. Special emphasis on entity formation, intellectual property protection, capital formation, securities, tax planning, and risk management.
Prerequisite: BSL 212 or equivalent or BUS 202 or Entrepreneurship Minor for Non-Business Students AND Sophomore Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 460. Health Care Law and Ethics. 3 Credit Hours.
This course is designed to offer students an appreciation of the legal foundations and ethical considerations in healthcare administration in the U.S. The readings and classroom discussion assist the student in (1) understanding the legal framework of relationships and institutions in healthcare, and (2) appreciating some of the particularly delicate ethical implications of decision-making in this field. Case study will promote the ability to analyze both. Special emphasis is placed on discussion of ethical issues in healthcare administration, including access to care, allocation of scarce resources and privacy.
Prerequisite: BSL 212 or equivalent or BUS 202 AND Business School or Business Law minor AND Sophomore Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 476. The Law of Risk. 3 Credit Hours.
This course offering will analyze risk in business and examine the tools that the law offers to identify danger and risk in the workplace and shift and minimize potential losses. This highly interactive course will first examine the various sources of legal risk, from criminal liability to employment discrimination to personal injury claims and toxic tort exposures. It will then examine the ways business and law pool, shift, and minimize risk. This seminar-style course will also include a significant experiential, hands-on component. Students will also practice contract construction and interpretation in a workshop environment.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BSL 485. Managing the Legal Factor. 3 Credit Hours.
This course offers the business manager a frank and analytical view of law and legal practice as they affect business decision-making. It addresses both the issues of cost containment and relationships between counsel and the company with the objective of achieving a more effective management of the legal function in business.
Prerequisite: BSL 212 or equivalent AND Requisite: Senior Status and Legal Studies major or Business Law minor. For Business Students only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 496. Directed Studies in Business Law. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 497. Directed Studies in Business Law. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 498. Special Topics in Business Law. 3 Credit Hours.
Special topics in selected non-STEM areas of Business Law.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 499. Special Topics in Business Law. 3 Credit Hours.
Special topics in selected STEM areas of Business Law.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 555. Business Law Departmental Honors Research Project.. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Business Law.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

B.B.A. in Legal Studies

Overview

Major Area of Specialization in Legal Studies (People & Society)

The Bachelor of Business Administration (BBA) with a major area of specialization in Legal Studies is intended to enhance the interaction between the business manager and legal counsel, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Legal Studies must complete the BBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

<table>

### NOTE:
- **ENG 105 and ENG 106**, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.
All specific coursework for the major area of specialization in Legal Studies must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

All courses must be completed within the current pre-requisite structure.

## Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

### Mission

- To develop innovative ideas and principled leaders that transform global business and society.

### Goals

- To instill in students a strong sense of the legal and ethical issues permeating business;
- To aid students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- To develop students’ analytical and problem solving ability, as well as their oral and written presentation skills.

### Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

### B.S.B.A. in Legal Studies

#### Overview

Major Area of Specialization in Legal Studies (People & Society)

The Bachelor of Science in Business Administration (BSBA) with a major area of specialization in Legal Studies is intended to enhance the interaction between the business manager and legal counsel, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.
## Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Legal Studies must complete the BSBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

<table>

### Mission

- To develop innovative ideas and principled leaders that transform global business and society.
**Goals**

- To instill in students a strong sense of the legal and ethical issues permeating business;
- To aid students’ comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- To develop students’ analytical and problem solving ability, as well as their oral and written presentation skills.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

**Minor in Business Law for Business Students**

**Overview**

Minor Area of Specialization in Business Law (People & Society)

The Business Law minor is flexible, permitting students to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student’s chosen corporate, creative, scientific, academic, professional, or personal endeavors. Students in the Miami Herbert Business School pursue the minor in Business Law by officially declaring the minor and by completing the coursework identified on the Curriculum tab.

**Curriculum Requirements**

**Business Students**

The 12-credit-hour minor in Business Law for Business School students consists of the following (all courses must be completed within the current pre-requisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSL 212</td>
<td>Introduction to Business Law (part of the Business Core for Business students; pre-requisite for all other BSL courses)</td>
<td>3</td>
</tr>
<tr>
<td>BSL 485</td>
<td>Managing the Legal Factor (required in the student’s final semester)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Choice Courses for the Minor**

Select two courses (6 credit hours) from the following:

- BSL 304 Corporate Law
- BSL 305 Legal and Social Aspects of Business Regulation
- BSL 306 Introduction to Corporate Sustainability
- BSL 324 Negotiation
- BSL 333 Legal Aspects of Real Estate Transactions
- BSL 401 The Law of Financial Transactions
- BSL 412 International Business Law
- BSL 424 Intellectual Property Law
- BSL 435 Law of Entrepreneurship
- BSL 460 Health Care Law and Ethics
- BSL 476 The Law of Risk
- BSL 498 Special Topics in Business Law
- BSL 499 Special Topics in Business Law

**Total Credit Hours** 12

**NOTE:** All specific coursework for the minor in Business Law must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.
Minor in Business Law for Non-Business Students

Overview
Minor Area of Specialization in Business Law (People & Society)

The Business Law minor is flexible, permitting students to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student’s chosen corporate, creative, scientific, academic, professional, or personal endeavors. Non-Business students pursue the minor in Business Law by officially declaring the minor at their home school or college and by completing the coursework identified below.

Interested students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Business Law is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Law Department is necessary.

Curriculum Requirements
Non-Business Students
The 12-credit-hour minor in Business Law for non-business students consists of the following (all courses must be completed within the current prerequisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>

<td>Special Topics in Business Law</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours 12

NOTE: All specific coursework for the minor in Business Law must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Business Technology

Department Code: BTE

Introduction
The Department of Business Technology serves the University as the focus for employing business technology and information management in the efficient solution of the entire range of business problems.

Today’s business and government organizations rely heavily upon information management for efficient administration and management. Collection, storage, and retrieval of data by computers are involved in the wide range of business activities including daily operations, management decision-making, and long-range planning. As the dependence of management on business technology grows, so does the need for business technology specialists. The courses and degree programs are described below.

Educational Objectives
The Business Technology major is designed to provide the student with the key information technology and management skills needed in today’s business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify
for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

The Department also co-supervises the Minor in Financial Technology (Fintech) (p. 780). This 12-credit-hour minor is for Miami Herbert Business School students who wish to better understand the delivery and use of financial services through use of technological innovation and automation of the financial sector. The Fintech minor combines classes in both Finance and Business Technology and prepares students for careers in the broader Fintech industry.

**BTE 120. Introduction to Business Technology and Programming. 3 Credit Hours.**
This course covers the fundamentals of technology focusing on programming logic and structured programming principles including problem solving, algorithm design, and program development using Python. The course introduces the student to object-oriented programming through a study of the concepts of program specification and design, algorithm development, and coding and testing using a modern software development environment. Students learn how to write programs in an object-oriented high-level programming language (Python). Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, arrays, and strings, data structures and object oriented programming. Throughout the semester, problem-solving skills will be stressed and applied to solving computing problems. Weekly assignments will provide hands-on experience in topics covered in this course.

**Components:** LEC.
**Grading:** CRD.
**Typically Offered:** Offered by Announcement Only.

**BTE 210. Fundamentals of Business Technology and Innovation. 3 Credit Hours.**
This course covers the fundamental technologies used in business today. Topics include information technology platforms; enterprise technology concepts; network infrastructure; enterprise resource planning; information security; technology architectures; internet; cloud, mobile, and web platforms; analytical technologies; business intelligence; expert systems, and Big Data. Students work on an innovation project to create a specification/business canvas for a new technology product.

**Requisite:** Business School.

**Components:** LEC.
**Grading:** CRD.
**Typically Offered:** Fall & Spring.

**BTE 320. Introduction to Programming. 3 Credit Hours.**
This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development—using a high level programming language. Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, arrays, and strings, pointers, and data structures.

**Requisite:** Miami Business School or BTE Minor or CSC Major or Minor.

**Components:** LEC.
**Grading:** CRD.
**Typically Offered:** Fall, Spring, & Summer.

**BTE 324. Object-Oriented Programming. 3 Credit Hours.**
This course introduces the concepts and fundamental techniques of object-oriented programming. Topics include: data abstraction, encapsulation, inheritance, polymorphism, class library, graphics/GUI, exception handling, multithreading, multimedia, files and streams, Internet applets, application development, integrated development environment, interactive program debugging and the eXtensible Markup Language (XML).

**Prerequisite:** BTE 320 or equivalent.

**Components:** LEC.
**Grading:** CRD.
**Typically Offered:** Spring.

**BTE 360. Systems Analysis and Design. 3 Credit Hours.**
This course introduces the techniques of systems analysis and design. Topics include: the Software Development Life Cycle (SDLC), Agile Programming, Extreme Programming, lean software development, Universal Modeling Language (UML), requirements modeling, data modeling, user interface design, data design, normalization, systems architectures, implementation methods, and testing methodologies.

**Prerequisite:** BTE 320 or CSC 120 or ECE 118 or equivalent.

**Components:** LEC.
**Grading:** CRD.
**Typically Offered:** Fall.

**BTE 361. Design of Information Systems. 3 Credit Hours.**
Continuation of BTE 360. Topics include concepts, tools, and techniques of systems design, prototyping, file/database design, and physical process modeling. Students work in groups to design an application system for a business related problem.

**Prerequisite:** BTE 360.

**Components:** LEC.
**Grading:** CRD.
**Typically Offered:** Offered by Announcement Only.
BTE 389. Launching High Technology Ventures. 3 Credit Hours.
This course develops an understanding of the entrepreneurial processes as they apply to new technology ventures. Topics include: venture formation, venture and angel investments, innovation and creativity, business plan creation, human capital, ethics, and intellectual property.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 400. Web-Mobile-Cloud. 3 Credit Hours.
This course introduces the basics of the cloud computing paradigm and examines how to implement different algorithms for different web and mobile applications in the cloud. The course covers the principles, systems, and applications of cloud computing that integrate web applications, smart phones, and tablets with cloud computing infrastructure. The student will be introduced to the basics of Infrastructure, Platform, and Software as a Service (IaaS/PaaS/SaaS), as well as to cloud platforms such as Google App Engine, Microsoft Azure, and Amazon Web Services (AWS).
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 401. Computers in an Inter-Networked Society. 3 Credit Hours.
This course provides students with fundamental knowledge of the technology and tools that integrate big data, cloud, and mobile computing within a business and social context. Students will study these technologies and their impact on socioeconomic, political, organizational, and personal environments. The course covers the cultural components of a social media society and examines the systems and processes that need to be developed for effective management of that environment.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 412. Foundations of Business Enterprise Technologies. 3 Credit Hours.
This course provides an understanding of the foundations of enterprise technologies. Topics include: making the business case for technology, distributed architectures, customer relationship management systems (CRM), enterprise resource planning systems (ERP), requirements modeling and design for enterprise systems, software development and outsourcing for the enterprise, enterprise productivity technologies (RFID, Internet of things, machine data), 3D-design technologies, cloud technologies, and technologies for the global enterprise.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 413. Big Data Strategy. 3 Credit Hours.
This course provides an introduction to the area of business intelligence termed Big Data. The concepts of high volume, velocity, and variety data are examined. The course examines how big data can be used to create business intelligence strategies in the areas of marketing, product development, systems deployment, and innovation. The course utilizes business intelligence software and Structured Query Languages (SQL) to analyze data. Other Big Data topics covered include the ethics, security, streaming data, sourcing, emergent technologies, and international data regulations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BTE 417. Fundamentals of Tech Project Management. 3 Credit Hours.
This course is designed to provide the fundamental project management knowledge necessary for a business manager, consultant, project manager, IT professional, and/or team member to successfully initiate and plan IT and other business projects. It is structured to provide principles, methodology, and practical information through a combination of lectures, group collaboration and hands-on exercises. Emphasis is placed on the importance of standardization and best practices as defined by the PMI's Project Management Body-of-Knowledge (PMBOK®).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 420. Python Programming for Fintech. 3 Credit Hours.
The course covers the fundamentals of object-oriented programming, logic and structured programming principles including problem solving, algorithm design, and program development using Python with focus on financial programming applications. Topics covered include fundamentals of algorithms, flowcharts, problem-solving, programming concepts and methodologies, control structures, arrays, and strings, classes and class-methods, data structures and object oriented programming concepts including classes, methods, inheritance and polymorphism.
Requisite: Sophomore Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 421. Design of Information Systems. 3 Credit Hours.
Continuation of BTE 420. Topics include concepts, tools, and techniques of systems design; prototyping; file/database design; and physical process modeling. Students will work in groups to design an application system for a business related problem. Prerequisite: BTE 420.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 422. Tech Foundations of Fintech. 3 Credit Hours.
The course covers multiple disciplines of technology and how they are individually and collectively applied in financial systems, transactions, payments, and data lifecycles. The course aims to develop a student's understanding of key technological components such as cloud computing, Internet of Things (IoT), Big Data and Machine Learning, Artificial Intelligence, Blockchain technologies, data security, privacy and technology regulations as they relate to financial transactions, financial institutions, public and private business entities, governments, regulations and an overall monetary system. Requisite: Sophomore Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 423. Database Management Systems. 3 Credit Hours.
This course covers the foundations of database management systems (DBMS). Topics include: database systems design, SQL, the relational model, entity-relationship modeling, distributed DBMS, object DBMS, web technology and DBMS, semi-structured data, XML, business intelligence, data warehousing, data warehousing design, introduction to OLAP and a brief overview of data mining. Students will engage in hands-on exercises for the design and implementation of database business applications. Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 430. Business Networks. 3 Credit Hours.
In this course, students will learn the underlying concepts and technologies in the field of business networks with specific focus on their applications in businesses. Topics covered include: network types, networking standards, protocols, and architectures; the characteristics of physical and logical networking components and technologies; the security issues that affect network systems and their implications on business applications; the technical and organizational issues concerning wireless networks; emerging networking technologies and software tools for designing and troubleshooting various aspects of networks.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 450. Introduction to Health Informatics. 3 Credit Hours.
The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 465. Web Application Development. 3 Credit Hours.
This course will explore Internet and mobile application development methodologies. Topics include: HTML 5, CSS3, scripting languages (JavaScript); jQuery, AJAX, web services, Web Servers (IIS and Apache) and relational databases (MySQL/Apache Derby/Java DB)—all the skills and tools needed to create dynamic Web-based and mobile applications. The coverage will be both on the client side and the server side of Web-based applications, and the course will provide instruction on building rich Internet applications that enhance the presentation of online content and give web applications the look and feel of desktop applications. Students in the course will build Web-based, client/server, database-intensive, multi-tier, and mobile business applications. Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 496. Directed Studies in Business Technology. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 497. Directed Studies in Business Technology. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 498. Special Topics in Business Technology. 3 Credit Hours.
Special topics in selected non-STEM areas of Business Technology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 499. Special Topics in Business Technology. 3 Credit Hours.
Special topics in selected STEM areas of Business Technology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 523. Big Data Development. 3 Credit Hours.
This course covers foundational techniques and tools required for data science and big data analytics. The course delivers a thorough overview of and hands-on experience with Big Data technologies, including: Hadoop, Mapreduce, Association rules, Large scale supervised machine learning, Data streams, Clustering, NoSQL systems (Casadenra, Pig, Hive), and applications, including recommendation systems, Web, and security. Students will also examine current research and publications in Data Science/Big Data Analytics, with emphasis on systems and algorithms for large-scale advanced data analysis.
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 524. Mobile Apps Development. 3 Credit Hours.
This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development for mobile environments—with a focus the Android Platform. The course introduces the requirements and methodologies for developing dedicated and client-server applications that target smartphones, tablet computers, and other mobile devices. Topics include: memory management, communications, power systems, APIs, and among others. The techniques studied are applicable to and can be transitioned to the iOS or Windows 8 platforms.
Prerequisite: BTE 320 and BTE 324.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 535. Information Security. 3 Credit Hours.
This course introduces the principles of computer security. Information is an important strategic and operational corporate asset that needs to be protected from data breaches. This course investigates some of the security measures that can be employed to safeguard information and explores some of the tools and techniques used in designing these measures. Students will examine how system designs, network protocols, and software engineering practices can result in vulnerabilities. They will also explore how to detect and mitigate vulnerabilities in existing systems and, so, how to design and implement better future systems. Additional topics include ethical hacking, social engineering strategies, and other approaches to managing vulnerabilities.
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 550. Business Technology Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight in information technology practice in the area of career interest. Periodic reports and conferences are required.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BTE 555. Business Technology Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Business Technology.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BTE 556. Mobile to Cloud: Developing Distributed Applications. 3 Credit Hours.
This course introduces students to the basics of the emerging cloud computing paradigm. It also examines how to implement different algorithms for different applications in the cloud and how to deploy mobile applications in the cloud. The course covers the principles, systems, and applications of mobile cloud computing that integrates smart phones and tablets with virtualized distributed computing infrastructure. Students will learn the fundamentals of a variety of systems such as virtual machines, the principles and practices of client/server architectures, the concepts and practices of Infrastructure, Platform, and Software as a Service (IaaS/PaaS/SaaS), cloud platforms such as Google App Engine, Microsoft Azure, and Amazon Web Services(AWS), as well as security issues.
Prerequisite: BTE 320 and BTE 324.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 557. AI Programming for Business Management. 3 Credit Hours.
Overview of AI programming languages and technologies. Topics include: Functional Programming, Logical Programming, Software methodologies for development of AI systems and software.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

B.B.A. in Business Technology

Overview
Major Area of Specialization in Business Technology (STEM)

The business technology major provides students with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Business Technology must complete the BBA Business Core and the specific coursework for the Business Technology major area of specialization as follows:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

**Total Credit Hours**

120

**NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2 At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3 Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.
All specific coursework for the major in Business Technology must be completed with a grade of "C-" or higher. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be completed within the current pre-requisite structure. Each course may satisfy a requirement in only one major or minor area of specialization (i.e., no double counting).

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

### Mission
- To develop innovative ideas and principled leaders that transform global business and society.

### Goals
The Business Technology major is designed to provide the student with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

### Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

### B.S.B.A. in Business Technology

#### Overview
Major Area of Specialization in Business Technology (STEM)

The business technology major provides students with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied.

#### Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Business Technology must complete the BSBA Business Core and the specific coursework for the Business Technology major area of specialization as follows:

<table>

BTE 571  AI Programming for Business Management

Total Credit Hours 120

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major area of specialization in Business Technology must be completed with a grade of “C-” or higher. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be completed within the current pre-requisite structure. Each course may satisfy a requirement in only one major or minor area of specialization (i.e., no double counting).

---

**Sample Plan of Study**

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

The Business Technology major is designed to provide the student with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

Minor in Business Technology

Overview

Minor Area of Specialization in Business Technology (STEM)

Miami Herbert Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Business Technology by officially declaring the minor at their home school or college and completing the coursework specified below. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Business Technology is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Technology Department is necessary.

Curriculum Requirements

The 12-credit-hour minor in Business Technology consists of the following:

BTE 571  AI Programming for Business Management

Total Credit Hours 12

1  All courses must be completed within the current pre-requisite structure. Each course may satisfy a requirement in only one major or minor area of specialization (i.e., no double counting).

Note: All specific coursework for the minor in Business Technology must be completed with a grade of "C-" or better. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Economics

Department Code: ECO

Introduction and Educational Objectives

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

A student pursuing the Economics major or minor area of specialization will select one of two possible options: Political Economy (People and Society) or Quantitative Economics (Science, Technology, Mathematics, and Engineering).

The Department also supervises the MHBS minor in Sustainable Business, which is designed to provide students with a grounding in the business concepts of sustainability, as well as to offer additional perspectives from the science/technical and policy/social issues fields.

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Students interested in pursuing the Master of Science in Sustainable Business or a Doctor of Philosophy in Economics (p. 1935) may seek additional information from the Department of Economics.

ECO 211. Principles of Microeconomics. 3 Credit Hours.
Fundamental course devoted to the development and application of basic analytical tools and principles required for an understanding of major economic problems and policy alternatives available for their solution. A particular emphasis is devoted to microeconomic analysis. Topics include the study of markets under varying conditions of competition, including market deficiencies such as pollution, prices, and resource allocation distribution of income, including poverty problems, the economics of the firm and the government, and international economic relations.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 212. Principles of Macroeconomics. 3 Credit Hours.
Fundamental course devoted to macroeconomic analysis. Topics include national income and employment analysis, money and banking, economic growth, and comparison of different economic systems, including the problems of developing the less developed world.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 213. Principles of Economics. 4 Credit Hours.
This course introduces the study of the economic behavior of individuals, firms, and markets; as well as the analysis of the economy as a whole, both in terms of short-run fluctuations (the business cycle) and long-run determinants of economic growth.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECO 300. Microeconomic Theory and Applications. 3 Credit Hours.
Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition. It focuses on the process of decision-making by individuals and firms, and the welfare consequences. Special attention is devoted to economic applications.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 301. Macroeconomic Theory. 3 Credit Hours.
Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.
Prerequisite: ECO 212, MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 302. Microeconomic Theory. 3 Credit Hours.
Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition, as well as in the determination of wages, rent, interest, profits, and public policy.
Prerequisite: ECO 211 or ECO 213 and MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 303. Macroeconomic Theory. 3 Credit Hours.
Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.
Prerequisite: ECO 212 or ECO 213 and MAS 110 or MTH 130 or MTH 141 or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 307. Public Economics. 3 Credit Hours.
This course studies the role of governments in the economy by surveying several topics in public finance and public policy; it is designed to be a link between the theory and several policy-relevant applications. Students will acquire the microeconomic tools and techniques to identify, analyze, and solve public policy and political economy problems. Students will also learn to apply the theory to current events such as the policy debates over social security, health care, education, and tax reform. Selected topics: budget analysis and scoring; correction of externalities and provision of public goods; public choice theory and government failure; fiscal federalism and redistribution; role of government in education, social security, and health care; income distribution and welfare programs; optimal taxation and tax inefficiencies; taxes on labor supply, savings, capital gains, and business income; fundamental tax reform and consumption taxation. This is an elective class addressed to economics majors, minors, and any student with an interest in the topics.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 311. Labor Economics (I). 3 Credit Hours.
Course surveys the structure and functioning of labor markets. Topics include determinants of labor supply and labor demand, economics of wage differentials, economic impact of labor unions, discrimination in labor markets, and the labor market effects of various government policies such as payroll and income taxes, educational subsidies, and minimum wage laws. The central goal of the course is to provide the student with a framework for analyzing diverse issues related to the labor sector of the economy.
Prerequisite: ECO 300. Or ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 333. Industrial Economics and Public Policy. 3 Credit Hours.
This course surveys several topics in industrial economics, regulation, and antitrust; it is designed to be a link between the theory and several applications. Students will acquire the microeconomic tools and techniques to identify, analyze, and solve industrial economics and government competition policy problems, and will learn to apply the theory to many real-world markets and current economic events. Selected topics: price discrimination; product differentiation; advertising; network effects; consumer search and digital markets; auctions; bargaining; vertical restraints and mergers; collusion and cartels; innovation and intellectual property; natural monopolies and regulation; and antitrust policies. This is an elective class addressed to economics majors, minors, and any student with an interest in the topics.
Requisite: ECO 300 OR ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECO 345. Environmental Economics. 3 Credit Hours.
This course determines the appropriate way to regulate economic activity so as to achieve an optimal balance between competing environmental and economic goals. Economic reasoning is used to evaluate causes and consequences of environmental problems. The course rigorously evaluates various types of environmental regulation, including "cap-and-trade," command and control mandates, and pollution taxes. Other specific topics include public goods, externalities, cost benefit analysis, non-market valuation, and international trade and development and the environment.
Prerequisite: ECO 211 or ECO 213.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 351. Economics of Development. 3 Credit Hours.
This course studies factors underlying economic development, measures of and goals for development, principles applicable to problems of development, the role of markets and planning in development, social, cultural, and political factors affecting economic development, and comparative rates of progress in different countries.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 371. Latin America and the Global Economy. 3 Credit Hours.
An analysis of the historical growth of major Latin American countries, with emphasis on the post World War II period. Topics include industrialization, foreign investment, international trade and regional integration, agrarian reform, inflation, and development strategies and planning within the context of Latin America.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 379. The Political Economy of Growth. 3 Credit Hours.
This course studies the causes of economic growth such as geography, culture, institutions, human and physical capital, as well as technology. It examines the role they play in the development process, casting light in their order of importance for growth and into which growth determinants are amenable to policy change.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 386. Health Economics. 3 Credit Hours.
The course applies the tools of microeconomic analysis to the health care sector. It examines how models of demand and supply apply to the health care sector in general, and in particular to the health insurance, the hospital, the physicians, and the pharmaceutical sectors. By examining the actors and issues in this market, students are able to discuss policy issues from an economic perspective.
Prerequisite: ECO 300. Or ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 403. Monetary Economics. 3 Credit Hours.
Analysis of the role of money in economic affairs. Topics include the determinants of the money supply and interest rates, money and prices, money and stability, and growth. Emphasis is placed on current problems and policies.
Prerequisite: ECO 301 or ECO 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 420. Economic Growth. 3 Credit Hours.
Course covers selected topics in economic growth. Topics include stylized facts associated with economic growth, the theoretical study of economic growth, and empirical tests of those theories. Course work is supplemented by case studies of individual countries, particularly developing countries.
Prerequisite: ECO 301 or ECO 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
**ECO 430. Applied Econometrics. 3 Credit Hours.**
This course introduces basic econometric techniques for analyzing economic data. The goal is to make students sophisticated consumers and skillful producers of empirical analysis, which will be attained by extensive work on a variety of real-world data like students’ test scores, CEO wages, mortgage applications, cigarette demand, stock market capitalization, inflation, GDP and interest rates. Learning how to use econometric analysis software is an integral part of the course.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**ECO 441. International Trade Theory. 3 Credit Hours.**
Study of the principles of comparative advantage and the gains from international trade. Analysis of tariffs, quotas, and protectionism is included.
Prerequisite: ECO 300. Or ECO 302.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**ECO 442. International Monetary Economics. 3 Credit Hours.**
Analysis of models of the exchange rate, the balance of payments, and monetary policy in an open economy.
Prerequisite: ECO 301 or ECO 303.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**ECO 443. Economic Analysis of Energy and Commodity Markets. 3 Credit Hours.**
This course explores the principles of energy economics, commodity markets and advanced macroeconomics. It discusses the main trends in energy production and consumption, the methods of analysis in energy and commodity markets, and the main challenges in the energy sector. The analysis of oil prices and the economics of oil exporting countries is emphasized.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**ECO 444. Game Theory in Economic Applications. 3 Credit Hours.**
This course is an introduction to the techniques and questions of modern microeconomics. The course will expose you to the techniques of game theory, the workhorse of modern microeconomics, and will apply those techniques to the analysis of a variety of economics situations and institutions.
Prerequisite: MAS110 or MTH 130 or MTH 141 or higher.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**ECO 445. Global Economics: Trade and Currencies. 3 Credit Hours.**
In this course, students are exposed to two fundamental topics which are primalordial to the understanding of any economic, political and/or social circumstance in any given country at any given time: (1) The evolution and meaning of the business cycle and capitalism, and (2) The effect of international trade and currencies. These two themes have sparked debates for centuries as they have great implications in the development of countries. Also, this course challenges students’ critical thinking and analytical skills with a wide range of controversial readings on these two topics. This course is divided into four sections. The first one introduces students to the idea of the business cycle. The second section aims at explaining how capitalism was born and how it has evolved in the 19th and 20th centuries. Then, the course centers on explaining capitalism today and presents criticisms. And finally, students analyze how the business cycle and capitalism has unfolded and affected certain countries in Latin America.
Prerequisite: ECO 301 or ECO 303.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**ECO 460. Industrial Organization. 3 Credit Hours.**
This course shows how microeconomic theory can be used to understand the diverse practices encountered in real-world markets between the extreme cases of perfect competition and monopoly. Topics to be covered include strategic pricing behavior, collusion, advertising and information, vertical integration, vertical restraints, regulation and a review of empirical literature.
Prerequisite: ECO 302.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.
ECO 496. Directed Studies in Economics. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 497. Directed Studies in Economics. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 498. Special Topics in Economics. 3 Credit Hours.
Special topics in selected non-STEM areas of Economics.
Prerequisite: ECO 300. Or ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 499. Special Topics in Economics. 3 Credit Hours.
Special topics in selected STEM areas of Economics.
Prerequisite: ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 510. Mathematical Economics and Applications. 3 Credit Hours.
The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave/convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 511. Empirical Labor Economics. 3 Credit Hours.
A theoretical and empirical analysis of how labor markets operate. A survey of the literature, problems, and methodology of modern labor economics. Human capital analysis, the wage structure, job search and job-matching models, time-allocation models, the economic impact of labor unions, labor market discrimination, the determinants of labor demand and supply, and the factors affecting government policy relating to the labor sector is also included.
ECO 430.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 512. Topics in Mathematical Economics. 3 Credit Hours.
This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world economic applications are examined.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 520. Econometrics. 3 Credit Hours.
Statistical methods of estimating and testing mathematical model of economic relationships.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
**ECO 521. Advanced Macroeconomic Theory. 3 Credit Hours.**  
The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.  
Prerequisite: ECO 301 or ECO 303.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall, Spring, & Summer.

**ECO 532. History of Economic Thought. 3 Credit Hours.**  
Historical development of economic doctrines and theory. Topics and individuals discussed include mercantilism, physiocracy, Adam Smith, Thomas Malthus, David Ricardo, J. S. Mill, Karl Marx, marginal analysis, Alfred Marshall, and J. M. Keynes. Special emphasis is placed on the effect of historical insights upon the contemporary core of economic theory.  
Prerequisite: ECO 213 or ECO 211 and ECO 212.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

**ECO 533. Advanced Microeconomic Theory. 3 Credit Hours.**  
An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.  
Prerequisite: ECO 302.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.

**ECO 555. Economics Departmental Honors Research Project. 3 Credit Hours.**  
Research project to fulfill requirements for Departmental Honors in Economics.  
Components: THI.  
Grading: SUS.  
Typically Offered: Offered by Announcement Only.

---

**B.B.A. in Economics**

**Overview**

Major Area of Specialization in Economics (People & Society or STEM)

The economics major brings students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies.

Miami Herbert Business School students who wish to pursue the Economics major area of specialization will choose between two tracks: Political Economy (P&S) or Quantitative Economics (STEM). In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Economics must complete the BBA Business Core and the specific coursework for one of the Economics major tracks as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

**Quantitative Economics Track Required Courses (STEM):**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 211</td>
<td>Principles of Microeconomics (taken as part of the Business Core)</td>
</tr>
</tbody>
</table>
### Sample Plans of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

B.S.B.A. in Economics

Overview

Major Area of Specialization in Economics (People & Society or STEM)

The economics major brings students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies.

Miami Herbert Business School students who wish to pursue the Economics major area of specialization will choose between two tracks: Political Economy (P&S) or Quantitative Economics (STEM). In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Economics must complete the BSBA Business Core and the specific coursework for one of the Economics major tracks as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>

</tr>
<tr>
<td>ECO 533</td>
<td>Advanced Microeconomic Theory</td>
</tr>
</tbody>
</table>

Total Credit Hours 120

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for a major area of specialization in Economics must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

5. No course may double count in any other major, minor, or cognate.

Course pre-requisites vary by course.
**Sample Plans of Study**

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

• To develop innovative ideas and principled leaders that transform global business and society.

Goals

The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems.

Student Learning Outcomes

• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
• BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
• BBA/BSBA graduates will demonstrate professional written communication skills.
• BSBA graduates will have strong technical skills.
Minor in Political Economy for Business Students

Overview

Minor Area of Specialization in Political Economy (People & Society)

The Minor in Political Economy equips students with solid analytical tools supporting critical thinking on economic issues. Students will be able to comprehend major economic trends and build competence in the application of economic theories to specific fields.

Business students may pursue a minor in Political Economy by taking 12 credit hours of Economics courses in addition to the Business Core.

Minor in Political Economy for Non Business Students

Overview
Minor Area of Specialization in Political Economy (People & Society)

The Minor in Political Economy equips students with solid analytical tools supporting critical thinking on economic issues. Students will be able to comprehend major economic trends and build competence in the application of economic theories to specific fields.

Non-Business students may pursue a minor in Political Economy by taking 15 credit hours of Economics courses.

Curriculum Requirements for Non-Business Students
Interested students should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Political Economy is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Economics department is necessary for a student to choose or complete the Political Economy minor. Instead the non-business student should simply declare the Political Economy minor and complete the required 15 credit hours of Economics courses, according to the following:

*NOTE: All specific coursework for the minor in Political Economy must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.
No course may double count in any other major, minor, or cognate.
Minor in Quantitative Economics for Business Students

Overview

The Minor in Quantitative Economics equips students with solid analytical tools supporting critical thinking on economic issues. Students will be able to comprehend major economic trends and build competence in the application of economic theories to specific fields. This program emphasizes the interpretation and development of quantitative economics applications.

Business students may pursue a minor in Quantitative Economics by taking 12 credit hours of STEM-designated Economics courses, per the curriculum requirements, in addition to the Business Core courses.

Minor in Sustainable Business

Overview

Minor Area of Specialization in Sustainable Business (People & Society)

The 12-credit-hour minor in Sustainable Business is available to both Business and non-Business students alike. Interdisciplinary in nature, the coursework will provide students with an introduction to the business concepts of sustainability, followed by additional perspectives from the science/technical and policy/social issues fields, and concluding with an integrative, experiential, project-based capstone course that requires students to
Interested students should consult with an academic advisor in the School or College of their degree/major to declare the minor in Sustainable Business.

No course may double count in any other major, minor, or cognate. All specific coursework for the minor area of specialization in Sustainable Business must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization. All courses must be taken within the current pre-requisite structure.

Many other relevant upper level courses with prerequisites, and Special Topics courses may be available at or offered by other UM Schools and Colleges. These may be approved to satisfy the appropriate "Science/Technical" or "Policy/Social Issues" course requirement, after consultation with the academic advisor.

Finance

Department Code: FIN

Introduction

The Finance major area of specialization is designed to prepare business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

The Real Estate major area of specialization is designed for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

The Bachelor of Science in Accounting and Finance (BSAF) degree at Miami Herbert Business School is intended for quantitatively strong first-year students arriving at the Miami Herbert Business School with a clear interest in careers in the financial services industry or in corporate financial management.

Educational Objectives

Finance

The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. We study these issues in a variety of contexts and industries.

The three primary areas of finance are financial management, investments, and financial markets and intermediaries. Financial management focuses on how an organization can accomplish its mission. For example, a corporation seeks to create and maintain wealth, and a non-profit organization seeks to improve the world in some way. All organizations want to achieve their mission to the greatest extent possible, and that requires making the best decisions with respect to value. The area of investments studies the purchase and sale of financial securities, such as stocks, bonds, options, and futures from the point of view of an investor. Financial markets are created to facilitate the trading (buying/selling) of financial securities. Financial intermediaries sell claims on themselves to investors, such as stock, life insurance, or a bank deposit. Financial intermediaries then invest the money from such sales in other assets such as loans, real estate, or other financial securities.

Real Estate

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major area of specialization strengthens ties with important segments of the business community and builds on the University’s strategic strengths in architecture (New Urbanism) and urban planning.

Business students pursuing the major area of specialization in Real Estate should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 677) (For more information, contact the Director of the Urban Studies Program. (http://www.as.miami.edu/urbanstudies/contact/))

Bachelor of Science in Accounting and Finance (BSAF)

The BSAF degree at Miami Herbert Business School is intended for quantitatively strong students arriving at the Miami Herbert Business School with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics. Specially-designed courses allow for front-loading of accounting and finance courses early in the undergraduate career.

Important Note: To be eligible for any BBA or BSBA major specialization offered by the Finance Department, the following requirements must be met:

- A student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify).
- A student must have a cumulative University of Miami GPA of 2.5 or higher before enrolling in FIN 303 or FIN 320.
- All specific coursework for the major area of specialization must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302 (http://bulletin.miami.edu/search/?P=FIN%20302), as noted).
- A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

Dual Degree

- BBA/BSBA - MSF Dual Degree Programs (p. 779)
FIN 144. Investing in Real Estate. 3 Credit Hours.
This course covers the fundamentals of commercial real estate. The aim of the course is to give you broad exposure to the landscape of commercial real estate markets. After a discussion of the relation between property prices and rents, the first part of the course is focused on property-level analysis of real estate equity as an investment, especially property valuation. This portion will culminate in a valuation case, based on a proposed development project in downtown Miami. After this, we will look at the fundamentals of real estate debt (mortgages) and equity markets (REITs).
Requisite: Summer Scholars Program.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

FIN 300. Fundamentals of Finance for Non-Finance Majors. 3 Credit Hours.
This course provides an overview of modern finance for non-business majors. Topics include: how financial markets work, understanding financial pages in newspapers and the Internet, how stock and bond prices are determined, how investment portfolios are structured, concepts of risk and return, how companies manage their cash and investments and international finance. Not for credit for business students.
Requisite: Non Business Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 302. Fundamentals of Finance. 3 Credit Hours.
Introduction to the basic tools and concepts in finance. This is the core class in finance for our undergraduate program. Topics include the financial framework of a business entity, taxes, the time value of money, capital market theory, financial risk measures, and capital budgeting. Note: to be eligible to major in finance, a student must earn a grade of B or higher in this class (a grade of B- does not qualify).
Prerequisite: MAS 201 or MAS 311 or MTH 224 or IEN 311 or IEN 310 or PSY 292 and ACC 211 or ACC 221 or Pre/Corequisite ACC 223.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 303. Intermediate Financial Management. 3 Credit Hours.
This course provides an overview of financial decision-making by corporations. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to corporate financial decision-making including capital structure, capital budgeting, dividend policy, leasing, securities issuance and the role of investment banks, and mergers and acquisitions. Note: a student must have obtained a B or higher grade in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate that requirement.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring.

FIN 308. Intermediate Financial Management for Entrepreneurs. 3 Credit Hours.
This course is primarily for students majoring in entrepreneurship. It provides an overview of financial decision-making by entrepreneurs. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to entrepreneurial financial decision-making involved with such things as capital structure, working capital budgeting, leasing, hedging and risk management, securities issuance and the role of investment banks, and mergers and acquisitions. Note: Students cannot take both FIN 308 and FIN 303, so this class is not open to students who have taken FIN 303.
Prerequisite: FIN 302 and Requisite: Entrepreneurship Major.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 320. Investment and Security Markets. 3 Credit Hours.
This course introduces students to both practical and theoretical aspects of investment with an emphasis on financial markets. Topics include valuation of financial securities such as stocks, bonds and options; modern portfolio theory; the process and institutional characteristics of investing. Note that this course does not address the details of individual security valuation and selection, i.e., this course is not about stock picking or about how to get rich by investing in the markets. Instead, this course attempts to help you develop a lasting conceptual framework in which to view the investment process and to analyze future ideas and changes in investment environment. This class is essential to any student considering a finance concentration. Note: A student must have obtained a B or higher in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate this requirement.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FIN 330. International Finance. 3 Credit Hours.
This course applies the principles of finance to international business decisions. Topics include the analysis of foreign exchange rates, balance of payments, characteristics and use of international financial institutions and instruments, the analysis and management of financial risk in the international environment, and financing multinational corporations. Note: a student must have a B or higher in FIN 302 to major in International Finance and Marketing (or Finance). Earning an A in this class or any other class or classes does not eliminate this requirement.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 340. Real Estate Principles. 3 Credit Hours.
This course provides an introduction to basic principles and fundamental practices in the real estate industry. Students learn how to apply the principles of finance to the real estate industry. Topics include common institutional aspects, brokerage, contracting, financing, ownership, management, valuation, appraisal, and investment analysis.
Prerequisites: FIN 302 or FIN 300.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 344. Real Estate Investment Analysis. 3 Credit Hours.
This course introduces the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications. Each student will complete a written evaluation and investment analysis of an existing or proposed commercial real estate project in Miami-Dade, Broward or Monroe County.
Prerequisite: FIN 302 and FIN 320 or FIN 303 OR Co-requisite: FIN 320 or FIN 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 347. Introduction to ARGUS. 1 Credit Hour.
ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 348. Advanced ARGUS. 1 Credit Hour.
At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.
Prerequisites: FIN 302 and FIN 347.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 355. Smif Fund Analyst I. 1 Credit Hour.
The course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester; students must commit to and enroll in the follow-up class. Admission to the course is through a competitive application process.
Pre-requisite or Co-requisite: FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 356. Smif Fund Analyst II. 1 Credit Hour.
This course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester. Enrollment in the course is limited.
Prerequisite: FIN 355.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 404. Applications in Corporate Finance. 3 Credit Hours.
An application of the concepts and tools of corporate finance. Primary emphasis on analyzing real-world cases dealing with liquidity issues, capital budgeting, firm valuation, advanced corporate financing, hedging with options and futures, corporate financial strategy, and other current issues in corporate finance.
Prerequisites: FIN 302, FIN 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 405. Financial Modeling. 3 Credit Hours.
This course takes a variety of finance topics, which have been covered in the prerequisite courses, and implements them using practical spreadsheet models. Students will use the internet and financial databases to obtain input data for their models. Students will use Visual Basic for Applications (VBA) and design functions and macros to enhance their models. Students must have a solid working knowledge of Windows and Excel, as well as a good understanding of the material taught in the prerequisite finance classes. Students must have a mobile (lap-top) computer with the capability to run Windows-based software.
Prerequisites: FIN 302, FIN 303, FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 408. Introduction to Mergers and Acquisitions. 3 Credit Hours.
This course introduces students to the world of mergers and acquisitions (M&A). More specifically, the course is designed to develop an understanding of (i) the economic, financial, and strategic issues involved in the acquisition of a (public or private) company; (ii) the analytical tools used to value an acquisition target; and (iii) academic research that reports results from large samples of M&A deals. Students will apply their understanding of these issues by analyzing various actual and potential acquisitions.
Prerequisites: FIN 302, FIN 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 409. Introduction to Private Equity and Venture Capital. 3 Credit Hours.
In this course, you will learn about the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The focus is on how PE investors evaluate, select, value, and structure deals. This course has several goals. First, the course will deepen your current understanding of corporate finance by applying key concepts and tools to a new and increasingly important industry. Second, the course seeks to introduce you to the institutions of the PE industry. This involves examining, for example, how funds are raised and how term sheets are structured. Finally, a goal is to understand the valuation process used by PE investors.
Prerequisites: FIN 302 and FIN 303 or FIN 308.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 410. Financial Institutions and Markets. 3 Credit Hours.
This course examines financial institutions, such as banks (commercial, investment, mortgage, savings), credit unions, insurance companies, pension funds, and mutual funds and the money markets in which they operate, and focuses on why they exist and how to manage them. Topics include financial intermediation and transmutation, monetary theory and policy, Federal Reserve management of the money supply, velocity of money, fiscal theory and policy, interest rates, and immunization.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 411. Commercial Bank Management. 3 Credit Hours.
This course introduces the theory and practice of asset-liability management by large publicly traded commercial banks, including the fundamental principles of structuring loans into balance sheets. A major objective of this class is to provide students sufficient background to enter the credit department in the executive development program of major money center bank.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
FIN 412. Financial Planning and Wealth Management. 3 Credit Hours.
This course examines the investment and financial issues arising from financial planning and personal wealth management activities. It covers various topics required for the construction of a comprehensive financial plan including the identification of client financial status and goals, asset allocation, securities trading, managed funds, tax planning, risk management and insurance, and estate planning.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 415. Trading and Markets. 3 Credit Hours.
This course provides an introduction to the functioning of financial markets and the fast changing field of market microstructure. On the equity trading side, the course covers major exchanges such as NYSE Euronext and Nasdaq OMX, and new players such as BATS and Direct Edge/ISE. Students also learn about dark pools, options and futures exchanges, electronic bond trading platforms, and currency trading systems. In addition, the course provides a summary of different market structures, the role of market participants, different order types, trading strategies, and trading externalities. The course draws on theories and tools from economics and behavioral finance, current institutional practices and market regulation.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 418. Fundamentals of Fintech. 3 Credit Hours.
This course introduces students to Fintech, the emerging world of applications, concepts, developments, business models, and companies at the interface of Finance and Technology. The course format is a mixture of introductory topical lectures, class discussions, and interactive seminar-style student presentations. It covers the main Fintech areas like Peer-to-Peer-Lending, Crowdfunding, Mobile Payment Systems, Cryptocurrencies and ICOs, Robo Advising, Insurtech (insurance technology), and RegTech (regulatory technology). A special emphasis is given to how and by whom these emerging technologies are currently used, and how they may potentially change the landscape of finance and financial services in the future.
Prerequisites: FIN 302 and FIN 303 or FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 421. Investment Portfolio Management. 3 Credit Hours.
This course provides an introduction to quantitative active management of equity portfolios. The course begins with a discussion on the sources of stock market inefficiencies. The course then covers the five key dimensions of the quantitative portfolio management process: forecasting relative stock returns using quantitative signals, measuring portfolio risk relative to a benchmark, portfolio optimization, controlling transaction costs, and measuring and evaluating portfolio returns. The course focuses on practical application and relies heavily on experiential learning and Excel spreadsheets.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 422. Speculative Markets and Derivatives. 3 Credit Hours.
This course is an introduction to derivative securities, and examines the nature of derivatives and applications of such instruments in investment and corporate settings. The emphasis is on derivatives of equity-based securities (such as stocks and stock indices), but coverage includes derivatives of debt-based securities (such as Treasury and Eurodollar securities). Topics include options, futures, forwards, and other derivatives, such as options on futures, foreign currency derivatives, swaps, exotic options, real options, as well as financial engineering using derivatives.
Prerequisites: FIN 302, FIN 303, FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 423. Introduction to Alternative Investment. 3 Credit Hours.
The objective of this course is to provide an introduction to alternative financial instruments and how capital market participants utilize them. The course covers a large set of investment choices, with a specific focus on fixed income and alternative instruments, such as commodities, interest rates and currency. While covering each instrument, the course also examines with how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
FIN 425. Business and Security Valuation. 3 Credit Hours.
Applications of finance theory to the problem of valuing public and non-public companies. Multiplier models, discounted cash flow analysis, and the strengths and weaknesses of traditional security valuation methods are addressed in detail. Financial spreadsheet programs and data sources are an integral part of the course. 
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 427. Fixed Income Markets and Analysis. 3 Credit Hours.
This course examines financial markets that trade fixed income securities. A fixed income security is based primarily on a debt contract, such as a bond, debenture, note or Treasury bill. Topics include the valuation, computation of return, and computation of various measures of risk for fixed income securities, as well as the analysis of the term structure of interest rates and various option features commonly included in debt contracts and fixed income securities. Students must have a solid working knowledge of Excel to take this class.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 431. International Financial Management. 3 Credit Hours.
This is an advanced class in international finance from the viewpoint of multi-national organizations, including corporations, investment banks, and commercial banks. Topics include managing the various sources of risk, such as economic, political, and currency; cash receivables, inventory, and payables management; financing; transfer pricing; taxation; currency netting; capital budgeting; and hedging.
Prerequisites: FIN 302, FIN 320, FIN 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 433. Case Studies for Financial Professionals. 1 Credit Hour.
This one-credit course explores key concepts at the interface of Corporate Finance and Accounting, using carefully selected case studies. Each case study is designed to serve as the basis for in-depth class discussion and to reinforce fundamental concepts with numerical examples. The course relies on interactive, discussion-based learning that engages students in critical analysis, while developing confidence to apply their knowledge to specific real world examples.
Prerequisites: FIN 303 and FIN 320 and ACC 311 and ACC 312 and Requisite: BSAF degree.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 445. Real Estate Finance. 3 Credit Hours.
This course introduces the theoretical concepts and analytical techniques used to make a decision to finance the purchase or development of a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Students are also encouraged to use their semester projects to apply for one of the numerous case competitions.
Prerequisite: FIN 344.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 446. Real Estate Market Analysis. 3 Credit Hours.
This course is an introduction to the fundamental concepts of real estate market analysis. The major topics to be covered include site analysis, economic-demographic, supply and demand analyses. This course shall also include a global prospective of real estate market analysis. This shall be accomplished by means of conducting portions of a market analysis for foreign cities of your individual choosing.
Requisite: Pre/Corequisite: FIN 344.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 456. Behavioral Finance. 3 Credit Hours.
The goal of this course is to expose you to selected topics from the upcoming field of behavioral finance. This will include a discussion of prospect theory and different types of behavioral biases such as representativeness, disposition effect, overconfidence, narrow framing, familiarity bias, and the house-money effect. In addition, the course will cover the implications of behavioral biases for asset pricing, corporate finance, and the overall macro-economy. Simple experiments will be conducted in class to illustrate some key behavioral concepts.
Prerequisites: FIN 302, FIN 303, FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FIN 457. SMIF Fund Portfolio Manager I. 1 Credit Hour.
The course is designed to introduce the student to the investment management process, including the tools used to compose a diversified portfolio that covers each of the major industrial sectors. The course is one credit and meets once a week each semester. Enrollment in the course is limited. Prerequisite: FIN 356.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 458. SMIF Fund Portfolio Manager II. 1 Credit Hour.
The course is designed to introduce the student to the investment management process, including the management of an investment organization and the evaluation of portfolio performance. The course is one credit and meets once a week. Enrollment in the course is limited. Prerequisite: FIN 457.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 496. Directed Studies in Finance. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 497. Directed Studies in Finance. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 498. Special Topics in Finance. 3 Credit Hours.
Special topics in selected non-STEM areas of Finance. Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 499. Special Topics in Finance. 3 Credit Hours.
Special topics in selected STEM areas of Finance. Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 555. Finance Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Finance.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

B.B.A. in Finance

Overview
Major Area of Specialization in Finance (STEM)

The finance major prepares business for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Finance must complete the BBA Business Core and the specific coursework for the Finance major area of specialization as follows:

</table>

**NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

In order to pursue a major in Finance, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

All specific coursework for the major area of specialization in Finance must be completed with a grade of "C-" of higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.
Students are strongly encouraged to take FIN 303 and FIN 320 during the same semester.

Excluding FIN 300 and FIN 308.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular “Area of Knowledge” within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

• To develop innovative ideas and principled leaders that transform global business and society.

Goals

The Finance major area of specialization is designed to prepare business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

Student Learning Outcomes

• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
• BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
• BBA/BSBA graduates will demonstrate professional written communication skills.

B.B.A. in Real Estate

Overview

Major Area of Specialization in Real Estate (STEM)

The real estate major is designed for students who want to apply theoretical and analytical concepts to real estate lending, investment and development. The program builds on real estate development and new urbanism concepts, while maintaining a strong emphasis on quantitative methods in finance.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Real Estate must complete the BBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

</tr>
</tbody>
</table>

**NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.
Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

In order to pursue a major area of specialization in Real Estate, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

All specific coursework for the major in Real Estate must be completed with a grade of "C-" of higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.

The prerequisite for FIN 348 is FIN 347.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

### Mission

- To develop innovative ideas and principled leaders that transform global business and society.

### Goals

The Real Estate major area of specialization is designed for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

### Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
B.S. in Accounting and Finance

Overview
The Bachelor of Science in Accounting and Finance (BSAF) degree at Miami Herbert Business School is intended for quantitatively strong students arriving at the business school with a clear interest in careers in the financial services industry or in corporate financial management. This degree allows students to accelerate coursework in the Accounting and Finance disciplines simultaneously, as well as encourages the development of quantitative skills in data analytics.

Students must maintain a minimum overall cumulative GPA of 3.0 in order to remain eligible for the BSAF degree, calculated at the end of each semester or term, including the first. The University Repeat Rule may be utilized by BSAF students to replace a D or F only if the cumulative GPA meets the requisite 3.0 GPA without the repeat. Given the accelerated pace of the BSAF core, repeated courses are not to be used to retroactively reinstate a student into the program.

Every course completed in satisfaction of the BSAF degree (with the possible exception of some electives) must be taken for a grade. A minimum grade of “C-” or higher must be earned for all BSAF Business Core Requirements, except for ACC 223 and FIN 302 for which a grade of “B” or higher is required. (A grade of “B-” is not sufficient.) To graduate with the BSAF degree, students must maintain a minimum cumulative GPA of 3.0 in all Accounting courses and in all Finance courses. Students who do not meet program requirements at any point in the degree's completion will be converted to the BBA or BSBA program, as appropriate.

A minimum of 125 credit hours is needed to graduate with the BSAF degree.

Curriculum Requirements
Students pursuing the Bachelor of Science in Accounting and Finance must complete the University General Education Requirements, the BSAF Business Core Requirements, and the specific coursework as follows:

Total Credit Hours: 125

---

1. Students must maintain a minimum overall cumulative GPA of 3.0 to remain in the BSAF. Every course completed in satisfaction of the BSAF Business Core must be taken for a grade and a grade of "C-" or higher earned (except as noted for ACC 223 and FIN 302 for which a grade of "B" or higher is required). Students must maintain a minimum cumulative GPA of 3.0 in Finance courses and in Accounting courses. A minimum of 125 credit hours is needed to graduate with the BSAF degree. All courses must be taken within the current pre-requisite structure.

2. Students who wish to change from the BSAF to the BBA or BSBA after completing ACC 223 will receive credit for ACC 211 and must complete ACC 212 to satisfy the BBA or BSBA business core requirements. Students who wish to change from the BSAF to the BBA or BSBA after completing ECO 213 will receive credit for ECO 211 and must complete ECO 212 to satisfy the BBA or BSBA business core requirements. Conversely, BSAF students who have completed both ECO 211 and ECO 212 do not need to complete ECO 213, and BSAF students who have completed both ACC 211 and ACC 212 do not need to complete ACC 223.

3. Excluding FIN 300 and FIN 308.

4. At least one course with an international focus must be completed within the degree requirements. The academic advisor determines the appropriateness of the course.

5. ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements.

6. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, other plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, participates in the Foote Fellow program, or selects additional cognates or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University and therefore a separate cognate in these areas would not be required. Business School students are required to satisfy the Arts and Humanities Area of Knowledge by completing a cognate, minor, or major through another School or College at the University.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

The mission of the Miami Herbert Business School (MHBS) is to develop innovative ideas and principled leaders that transform global business and society. Consistent with that mission, the proposed Bachelor of Science in Accounting and Finance (BSAF) is designed for quantitatively strong students arriving at the MHBS with a clear interest in careers in the financial services industry or in corporate financial management. This program addresses the growing demand from recruiters for students with a strong background in finance, accounting, and data analytics. By allowing students to focus on finance, accounting, and data analytics early, this program provides students with the background necessary to secure valuable internships and excel in them, leading to a broader set of career opportunities.

Goals

First destinations of graduating seniors (i.e., job placement or graduate school) and student satisfaction rates will be used as program performance metrics. The first program goal is to have at least 90% of students with a secure first destination by six months after graduation. The second goal is for the mean of BSAF graduates’ responses to reflect at least 90% of students reporting satisfaction level of “Generally Satisfied” or above.

Student Learning Outcomes

- BSAF graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BSAF graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BSAF graduates will demonstrate professional written communication skills.
- BSAF graduates will have strong technical skills.

B.S.B.A. in Finance

Program Overview

Major Area of Specialization in Finance (STEM)

The finance major prepares business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. Finance majors study these issues in a variety of contexts and industries.

Although the finance function is especially prominent in major corporations, and the investments, banking, real estate, and insurance industries, every organization and industry includes a finance function.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Finance must complete the BSBA Business Core and the specific coursework for the Finance major area of specialization as follows:

<td>120</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.
Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

In order to pursue a Finance area of specialization, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

All specific coursework for the major area of specialization in Finance must be completed with a grade of "C-" of higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

Students are strongly encouraged to take FIN 303 and FIN 320 during the same semester.

Excluding FIN 300 and FIN 308.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

### Total Credit Hours

**120**

---

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

The Finance major area of specialization is designed to prepare business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

**B.S.B.A. in Real Estate**

**Overview**

Major Area of Specialization in Real Estate (STEM)
The real estate major is designed for students who want to apply theoretical and analytical concepts to real estate lending, investment and development. The program builds on real estate development and new urbanism concepts, while maintaining a strong emphasis on quantitative methods in finance.

## Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Real Estate must complete the BSBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

FIN 427  Fixed Income Markets and Analysis (pre-requisites FIN 302 & FIN 320)

Optional Course (Strongly Recommended)
FIN 348  Advanced ARGUS (offered as a one-credit enhancement in the spring semester)  6

Total Credit Hours  120

1 **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2 At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3 Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4 In order to pursue a major area of specialization in Real Estate, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

5 All specific coursework for the major area of specialization in Real Estate must be completed with a grade of "C-" of higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

6 All courses must be taken within the current pre-requisite structure.

The pre-requisite for FIN 348 is FIN 347.

### BSBA in Real Estate - Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission
• To develop innovative ideas and principled leaders that transform global business and society.

Goals
The Real Estate major area of specialization is designed for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Student Learning Outcomes
• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
• BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
• BBA/BSBA graduates will demonstrate professional written communication skills.
• BSBA graduates will have strong technical skills.

BBA/BSBA - MSF Dual Degree Programs
Overview
The dual degree programs allows business school students to efficiently complete both a bachelor’s and master’s degree in as little as 4 ½ years. The current BBA and BSBA programs require successful completion of 120 credit hours. The MSF program will require successful completion of 30 credit hours in the dual degree program because BUS 640 Quantitative and Analytical Fundamentals for Finance (4 credit hours) is not required. Students graduating from UM’s BBA and BSBA programs and matriculating directly into the MSF dual degree program will not require this course because the material is covered in their undergraduate programs.

To qualify for admission to the BBA/BSBA-MSF programs, a student must:
1. Complete FIN 302 and receive a grade of B or higher (a B- in FIN 302 does not fulfill this requirement).
2. Complete at least 96 credit hours of undergraduate courses with a cumulative grade point average of 3.3 or higher.
3. Apply to the program by the end of the semester in which the student completes 96 undergraduate credit hours. (Typically, application submission will be required by the end of the spring semester of a student’s junior year.)

In the dual degree programs, a student must:
1. Comply with all undergraduate degree requirements for a BBA major (undergraduate degree need not be in finance) for the BBA-MSF program or a BSBA major (undergraduate degree need not be in finance) for the BSBA-MSF program.
2. Comply with all MSF degree requirements in the newly revised MSF curriculum effective Fall 2019 except for the BUS 640 (commonly known as the boot camp) waiver as described below.
3. Enroll in a minimum of 12 undergraduate credit hours of courses per semester until the requirements of the student’s selected undergraduate degree (BBA or BSBA degree) have been met.
4. Enroll in a maximum of 6 graduate credit hours of courses per semester during the last two semesters of the student’s selected undergraduate degree (BBA or BSBA degree) program. Typically, a student would enroll in 4 credit hours of graduate coursework per semester for a total of 8 graduate credit hours in the last two semesters (senior year).
5. Maintain a cumulative grade point average of 3.0 or higher in all undergraduate course work after enrolling in the BBA/BSBA-MSF program.
6. Maintain a cumulative grade point average of 3.0 or higher on all graduate course work after enrolling in the BBA/BSBA-MSF program.

Undergraduate Curriculum
The individual BBA or BSBA degree requirements must be fulfilled as described in the University Bulletin.

In addition, during the last two semesters of the student’s selected undergraduate degree (BBA or BSBA degree) program, a student may enroll in up to 6 graduate credit hours per semester selected from courses in the MSF curriculum with prior approval of the MSF Faculty Director. A student will typically enroll in four graduate courses worth a total 8 credit hours their last two semesters (senior year).
Graduate Curriculum
The MSF degree requirements must be fulfilled as described in the newly revised curriculum effective Fall 2019 in the University Bulletin with the exception that the BUS 640, Quantitative and Analytical Fundamentals for Finance, (4 credits; commonly known as the "boot camp" 4) requirement for the MSF degree will be waived for dual degree program students, thereby reducing the MSF degree required credit hours from 34 to 30.

Conferral of Undergraduate Degree and Withdrawal from Dual Degree Programs
Students will be awarded their undergraduate degree (BBA or BSBA) as usual upon completion of all standard undergraduate degree requirements. In addition, withdrawal from the dual degree program will not affect the award of the bachelor’s degree.

Minor in Finance

Overview
Minor Area of Specialization in Finance (STEM)

Miami Herbert Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue a minor in Finance by officially declaring the minor at their home school or college. Interested non-business students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Finance is acceptable. If so, neither the advice nor the consent of either the Office of Undergraduate Business Education or the Finance Department is necessary.

Curriculum Requirements
The 12-credit-hour minor in Finance consists of the following (all courses must be taken within the current pre-requisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 302</td>
<td>Fundamentals of Finance (part of Business Core for Business students)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 303</td>
<td>Intermediate Financial Management ¹, ²</td>
<td>3</td>
</tr>
<tr>
<td>FIN 320</td>
<td>Investment and Security Markets ¹</td>
<td>3</td>
</tr>
</tbody>
</table>

Choice Course for the Minor
Select one course (3 credit hours) at the 300 or 400 level from Finance departmental offerings. ³

Total Credit Hours 12

¹ Pre-requisite is FIN 302
² Business students who combine the Entrepreneurship major area of specialization with the Finance minor do not take FIN 303. They are required to take FIN 308 for the Entrepreneurship major and an additional FIN 300 or 400 level course for the Finance minor to replace the FIN 303 requirement.
³ excluding FIN 300 and FIN 308

* NOTE: All specific coursework for the minor in Finance must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Financial Technology

Overview
Minor Area of Specialization in Financial Technology (STEM)

The minor in Financial Technology (FinTech) is for Miami Herbert Business School students who wish to better understand the delivery and use of financial services through use of technological innovation and automation of the financial sector. The FinTech minor combines classes in both Finance and Business Technology and prepares students for careers in the broader FinTech industry.

Curriculum Requirements
The 12-credit-hour minor in Financial Technology consists of the following (all courses must be taken within the current pre-requisite structure):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 302</td>

<td>Financial Institutions and Markets ²</td>
<td>3</td>
</tr>
<tr>
<td>FIN 418</td>
<td>Fundamentals of Fintech ³</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 12

1 Pre-requisite is FIN 302
2 Pre-requisites are FIN 302 and FIN 320
3 Pre-requisites are FIN 302 AND FIN 303 OR FIN 320

* NOTE: All specific coursework for the minor in Financial Technology must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Real Estate

Overview

Minor Area of Specialization in Real Estate (STEM)

The Miami Herbert Business School's Real Estate minor is for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The Real Estate minor strengthens ties with important segments of the business community.

Curriculum Requirements

The Real Estate minor consists of the following classes:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 302</td>
<td>Fundamentals of Finance (taken as part of the Business Core for Business students)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 303</td>
<td>Intermediate Financial Management (pre-requisite FIN 302)</td>
<td>3</td>
</tr>
<tr>
<td>or FIN 320</td>
<td>Investment and Security Markets</td>
<td></td>
</tr>
<tr>
<td>FIN 344</td>
<td>Real Estate Investment Analysis (pre-requisite FIN 302 &amp; pre- or co-requisite FIN 303 or FIN 320)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 445</td>
<td>Real Estate Finance (pre-requisite FIN 344)</td>
<td>3</td>
</tr>
<tr>
<td>FIN 446</td>
<td>Real Estate Market Analysis (pre-requisite FIN 344)</td>
<td>3</td>
</tr>
</tbody>
</table>

The following one-credit hour courses are strongly recommended, though not required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 347</td>
<td>Introduction to ARGUS (pre-requisite FIN 302)</td>
<td></td>
</tr>
<tr>
<td>FIN 348</td>
<td>Advanced ARGUS (pre-requisite FIN 347)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours 15

* NOTE: All specific coursework for the minor in Real Estate must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Health Management and Policy

Department Code: HMP

Introduction

The Health Management and Policy major area of specialization is designed for Miami Herbert Business School students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings. The curriculum enables students to gain skills and understanding in the specialized language of health care and to comprehend concepts of management, financing, politics, law, and ethics as applied to the health care sector. The major area of specialization is also ideal for students aspiring to earn advanced degrees in health administration, health economics, medical sociology, public health, or law.
Educational Objectives

The purpose of the major area of specialization in Health Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry. Appropriate candidates for the major area of specialization in Health Management and Policy include Miami Herbert Business School students interested in exploring the health care sector, working in the legal, management, or policy-making aspects of the health care sector or those wanting to have an augmentation to their pre-med, pre-law or pre-MBA, MPA or MPH studies, as well as those who expect to pursue a Ph.D. The minor area of specialization in Health Management and Policy is available to students from all University of Miami schools and colleges. Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers.

HMP 270. Introduction to Health Sector Management and Policy. 3 Credit Hours.
This course develops a basic understanding of the elements of the health services industry in the United States. It examines the history of the components of our health care system and moves on to current and potential future system dynamics. Sectors include physician services, hospital and hospital systems, long-term care providers, mental health services, and pharmaceutical services. Basic concepts associated with the financing of health services are examined as well as indemnity insurance, capitation, and the role of managed care, consumer driven health care and integrated delivery systems in theory and practice. The role of government is explored as well.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

HMP 310. Population Health. 3 Credit Hours.
Population health is emerging as a field of study of health determinants, a concept of health, and a goal of achieving measurable improvements in the health of a defined population. These populations can encompass geographic regions, such as communities, states, or nations, but can also be groups, including groups based on need, employees, ethnicity, members of Accountable Care Organizations, and other populations with relevance to policymakers. In this course, students will gain an understanding of the determinants of population health, health outcomes of the population, and policies and interventions that link the determinants and outcomes.
Prerequisite: HMP 270 Or HSM 270 Or MGT 270.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

HMP 320. Health Care Demand and Supply. 3 Credit Hours.
This course will introduce students to the fundamental concepts of health economics, and cover the principles of microeconomic theory as they relate to health care. No previous background in economics is assumed. The basic framework of this course is to introduce students to individual behavior (demand), firm behavior (supply), and how these forces interact to determine market prices that allocate scarce health care resources. Students will learn how policies, such as the Affordable Care Act of 2010, can be viewed via the lens of health economics.
Prerequisite: HMP 270 Or HSM 270.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

HMP 321. Applied Health Policy for Business. 3 Credit Hours.
This course examines the role of people and institutions in health promotion, risky behaviors, health care delivery, and health insurance. We will explore the theoretical and practical reasons for intervention in health-related decisions and health care markets, the related empirical evidence, and the effects of these interventions on health outcomes and social welfare. Students will understand how and why government and society in general attempts to influence health-related behaviors and health insurance markets, and the resulting effects on individuals’ choices, expenditures, health outcomes, and overall quality of life.
Prerequisite: HMP 270 Or HSM 270 Or MGT 270.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

HMP 350. Production and Consumption of Health and Health Care. 3 Credit Hours.
All societies must deal with the allocation of scarce resources. In our society, primary reliance is placed on markets and prices. This course will introduce students to the application of economic principles and production and consumption of health and health care. Some of the major topics include the production of and demand for health, demand for and supply of medical care, uncertainty and insurance, models of physician and hospital behavior, externalities and market failure, the role of government in health and medical care, and economic evaluation of health care services and interventions. Health economics concepts will be linked to current policy debates at the state and federal levels. Numerous real-world applications and case studies will be presented to demonstrate decision-making techniques for health care organizations and consumers.
Prerequisite: HMP 270 Or HSM 270 Or MGT 270 And ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
HMP 388. Health Care Marketing. 3 Credit Hours.
This course is devoted to the study of healthcare marketing and the healthcare system involved with the task of marketing products and services. As healthcare reform continues to evolve current market conditions transform existing organizations into new practices, this course will focus on the how managed care providers, hospitals, physicians, federal government, device and pharmaceutical companies will embrace the new patient centered market in their marketing strategies.
Non-Business students And Health Management and Policy minors And Sophomore Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

HMP 460. Health Care Law and Ethics. 3 Credit Hours.
This course is designed to offer students an appreciation of the legal foundations and ethical considerations in healthcare administration in the U.S. The readings and classroom discussion assist the student in (1) understanding the legal framework of relationships and institutions in healthcare, and (2) appreciating some of the particularly delicate ethical implications of decision-making in this field. Case study will promote the ability to analyze both. Special emphasis is placed on discussion of ethical issues in healthcare administration, including access to care, allocation of scarce resources and privacy.
Non-Business students And Health Management and Policy minors And Sophomore Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

HMP 496. Directed Studies in Health Sector Management and Policy. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HMP 497. Directed Studies in Health Sector Management and Policy. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HMP 498. Special Topics in Health Sector Management and Policy. 3 Credit Hours.
Special topics in selected non?STEM areas of Health Management and Policy.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HMP 499. Special Topics in Health Sector Management and Policy. 3 Credit Hours.
Special topics in selected STEM areas of Health Management and Policy.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HMP 555. Health Management and Policy Departmental Honors Research. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Health Management and Policy.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

B.B.A. in Health Management and Policy
Overview
Major Area of Specialization in Health Management and Policy (People & Society)
The health management and policy major area of specialization is designed for Miami Herbert Business School students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings.
Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Health Management and Policy must complete the BBA Business Core and the specific coursework for the Health Management and Policy major area of specialization as follows:

<table>

Total Credit Hours 120
NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

All specific coursework for the major area of specialization in Health Management and Policy must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

No one course may count toward more than one major or minor area of specialization.

Students may not take both HMP 350 and ECO 386.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

• To develop innovative ideas and principled leaders that transform global business and society.

Goals
The purpose of the major area of specialization in Health Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry.

Student Learning Outcomes
• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
• BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
• BBA/BSBA graduates will demonstrate professional written communication skills.
B.S.B.A. in Health Management and Policy

Overview

Major Area of Specialization in Health Management and Policy (People & Society)

The health management and policy major area of specialization is designed for Miami Herbert Business School students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Health Management and Policy must complete the BSBA Business Core and the specific coursework for the Health Management and Policy major area of specialization as follows:

<table>

**Total Credit Hours:** 120

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major area of specialization in Health Management and Policy must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

5. No one course may count toward more than one major or minor area of specialization.

6. Students may not take both HMP 350 and ECO 386.

## Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Minor in Health Management and Policy for Business Students

Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

The purpose of the major area of specialization in Health Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

Minor in Health Management and Policy for Business Students

Overview

Minor Area of Specialization in Health Management and Policy (People & Society)

The purpose of the minor in Health Management and Policy is to provide the Miami Herbert Business School student with a basic understanding of the organizational, management, economic, and financial structure, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students interested in: exploring the health care sector; working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, pre-law or pre-MBA/MPA studies.

Curriculum Requirements

The 12-credit-hour minor in Health Management and Policy for Business Students consists of four courses—two required and two minor choice courses—as indicated below (all courses must be taken within the current pre-requisite structure).

Total Credit Hours 12

¹ HMP 270/MGT 270, foundational for the Health Management and Policy minor, is a pre-requisite for all other HMP courses.
² The pre-requisites for HMP 350 are HMP 270/MGT 270, ECO 211, and ECO 212. No student should take both ECO 386 and HMP 320 or HMP 350.
BSL 460 and MKT 388 are intended for Business students who have declared the HMP minor and have the BSL 212 and MKT 201 or MKT 301 pre-requisites.

*Note:* All specific coursework for the minor in Health Management and Policy must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization. No one course may count toward more than one major or minor area of specialization.

## Minor in Health Management and Policy for Non-Business Students

### Overview

**Minor Area of Specialization in Health Management and Policy (People & Society)**

The purpose of the minor in Health Management and Policy is to provide the student with a basic understanding of the organizational, management, economic, and financial structure, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students interested in: exploring the health care sector; working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, pre-law or pre-MBA/MPA studies.

Non-Business students in the other schools and colleges of the University of Miami, may pursue the minor in Health Management and Policy by officially declaring the minor at their home school or college and completing the coursework specified below. Interested students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Health Management and Policy is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Health Management and Policy is necessary.

### Curriculum Requirements

The 12-credit-hour minor for in Health Management and Policy for Non-Business Students consists of four courses—two required and two minor choice courses—as indicated below (all courses must be taken within the current pre-requisite structure).

1. HMP 270, foundational for the Health Management and Policy minor, is a pre-requisite for all other HMP courses.
2. Non-business who do not meet the pre-requisites to take HMP 350 should take HMP 320 instead. No student should take both ECO 386 and HMP 320 or HMP 350.

*Note:* All specific coursework for the minor in Health Management and Policy must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization. No one course may count toward more than one major or minor area of specialization.

---

### Interdisciplinary Business

#### Introduction

Miami Herbert Business School offers both business discipline-based core and elective courses, and a number of interdisciplinary courses and programs. This section collects the latter.
Educational Objectives

Business is by nature both multidisciplinary and interdisciplinary. Miami Herbert Business School embodies this reality by delivering undergraduate degree programs that purposefully expose students to the array of business disciplines, providing a strong technical foundation for success in business. Moreover, modern business persons are expected to have strong non-technical skills such as communication and critical thinking. And, some project-based coursework is cross-disciplinary by design. Some required and elective coursework offered in the School, therefore, does not fit neatly into disciplinary academic silos.

In addition, the School seeks to serve the non-business student population with general education coursework that provides an introduction to business decision-making in courses that are in some cases multidisciplinary. Faculty from a diverse set of business disciplines offer specialized cognate courses that blend or extend the functional areas of business to provide that multidisciplinary learning.

Finally, MHBS offers several multidisciplinary programs of study blending Accounting and Finance (BSAF), Finance and Technology (Fintech minor), and Sustainable Business (minor). Majors and Minors in Entrepreneurship and Health Management and Policy are also multidisciplinary in nature.

BUS 150. Business Analytics. 3 Credit Hours.
The primary purpose of this course is to build skills in learning and using software technologies to support business-oriented problem solving and decision making. Specifically, you will develop the ability to solve problems, to organize and analyze data using spreadsheet and database software, and to learn to distribute information to others through the effective use of collaborative technologies and the Web. Case problems will cover areas such as accounting, finance, marketing, statistics and operations management. Professors from several business school departments will discuss how their disciplines use spreadsheets to solve problems.
Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BUS 155. Exploration of Faculty Research in SBA. 1 Credit Hour.
Students will be exposed to some of the SBA's top faculty researchers to learn more about research opportunities and styles of research methodologies within business.
Components: LEC.
Grading: CNC.
Typically Offered: Offered by Announcement Only.

BUS 156. Global Business Studies Introductory Seminar. 1 Credit Hour.
The honors seminar provides an experiential introduction to culture, history, and geography of the region, as well as economic challenges and successes of business in the region. Course involves social interaction among Global Business Studies cohort through cultural visits and workshops/talks, both on and off campus. Travel component is designed to showcase key sectors of a regional economy, and includes case-study and presentation activities.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

BUS 200. Introduction to Business. 3 Credit Hours.
Businesses today operate in an exceedingly complex environment. Such factors as commodity prices, labor and capital markets, as well as trends in tastes and preferences are constantly changing. This course will explore many of the key issues facing business decision makers in the contemporary environment, including an introduction to business ethics and corporate social responsibility. The course will take an interdisciplinary perspective, touching on essentially all of the business functions including economics, finance, accounting, marketing, management, and business communications. Using approaches from different business disciplines, students will gain insight into the structures and systems of business, as well as the strategies that firms use to compete effectively in the global business environment. BUS200 serves as the foundational course for the Business Cognate in People & Society, and it is offered for Gen Ed credit only.
Requisite: Non Business Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 201. Money. 3 Credit Hours.
Financial decisions are at the heart of success in today's economy. Thus, financial literacy and the ability to manage personal finances is increasingly important. This GENERAL EDUCATION course delivers a comprehensive introduction to savings and borrowing, investments, and insurance, including such topics as budgeting, banking and consumer credit, the purchase of residential real estate, planning for retirement, starting a business, and understanding basic financial statements. Not for credit toward any business major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BUS 202. Introduction to the Legal Environment of Business. 3 Credit Hours.
The course provides an overview of legal principles impacting business. Students will explore fundamental features of the U.S. judicial system, conflict resolution, the domestic system of property rights, the U.S. Constitution, and the regulatory process, as they relate to the business firm or business as a societal actor. Topical areas may include business ethics, consumer protection, employment discrimination laws, privacy concerns, the law of competition, and environmental regulation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 203. Managing Effectively: A Skills Development Approach. 3 Credit Hours.
This Business Cognate course focuses on the seven core skills used by successful managers in their day to day work. Students will explore these skills, how they are applied and practiced in organizational settings, how they enable organizational success, and how they fit with the students’ own capabilities. The course uses an action-based learning format that makes students participants in the process whereby they assess, practice, and enhance their own managerial skills.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 204. Intro to Corporate Sustainability. 3 Credit Hours.
This course introduces students to issues associated with business and sustainability, through the lens of corporate governance and corporate citizenship. Readings, class sessions, and assignments are designed to instill in students a practical understanding of key corporate sustainability frameworks, challenges and opportunities, institutions, and actors in the global corporate context. Students will learn to apply alternative decision making models to current business activities.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 206. Principles of International Business. 3 Credit Hours.
This course is designed to provide nonbusiness students with an understanding of what global business is, in particular how international business is conducted across countries with different sets of formal and informal institutions. It also addresses the issues facing multi-national corporations and the factors influencing their success or failure globally.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 211. Professional Development for Finance and Accounting. 1 Credit Hour.
This one-credit course is designed to immerse undergraduate BSAF students in professional development, including inculcating in them a deeper understanding of areas of specialization within accounting and finance, and of careers within those specialties, creation of a career direction and trajectory, development of job search strategies, enhancing their communication and networking skills, building and creating a compelling resume for these industries, and both general and specific interview techniques. It is designed to improve these students’ preparedness to find and secure internships and permanent placement offers, and ultimately to be successful in these industries.
Requisites: BSAF degree and Sophomore Status or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BUS 255. Business and Society: Inquiry and Discourse. 1-3 Credit Hours.
This course will explore the relationships between business firms and their regulatory, ethical, political, cultural, and social environments. Students will be exposed to a wide range of source materials and academic activities, with the objective of developing their capacity for principled professionalism.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

BUS 256. Global Business Studies Seminar II. 1 Credit Hour.
This honors seminar introduces the key political movements and concepts that have shaped society in the region studied.
Components: THI.
Grading: GRD.
Typically Offered: Fall.
BUS 300. Critical Thinking and Persuasion for Business. 3 Credit Hours.
The modern businessperson faces a constantly evolving environment and must be able to confront and respond to an array of business issues. At
the heart of an effective response is a critical, comprehensive analysis coupled with the ability to meaningfully and persuasively communicate that
assessment and recommendations to a variety of constituencies. This course prepares business students for this by exposing them to a three-step
process of problem solving in which they critically analyze the problem, and then communicate their analysis both in writing and orally.
Prerequisite: ENG 106 with a C- or better AND Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 356. Global Business Studies Seminar III. 1 Credit Hour.
This honors seminar facilitates understanding of economic challenges faced by business communities, connecting regional studies work with
business curriculum. May be conducted in language of the region.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

BUS 400. Senior Experience for Business Students. 0 Credit Hours.
The Miami Business School Senior Experience (SBX) is a virtual, self-paced, credit/no credit course specially designed to assist business seniors in
successfully navigating the final year at the University of Miami Business School. The course collects the various tasks required of business seniors
under a single LMS-enhanced umbrella, making it easier for students to track completion of mandated assignments within established deadlines. SBX
also serves as a hub for peer networking and for access to relevant resources for senior-level students, related to professional life, graduate study, and
young alumnus leadership opportunities. Videos, power points, blogs, threaded discussions, as well as detailed instructions and web-links for required
activities for graduating seniors are only a click away.
Requisite: Business School And Junior Or Senior Status.
Components: DIL.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 428. Multidisciplinary Action Projects. 1-3 Credit Hours.
The University of Miami Business School's Multidisciplinary Action Projects course (UMAP) places students with organizations throughout the world
to address pressing organizational challenges. Students work in teams with guidance from faculty advisors to develop actionable and valuable
recommendations for sponsoring organizations.
Components: EXP.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 456. Global Business Studies Seminar IV. 1 Credit Hour.
The honors seminar is designed to introduce students to research methods and structuring a thesis question/argument.
Requisite: Global Business Studies co-major.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 496. Directed Studies in Business. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by
special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 497. Directed Studies in Business. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by
special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 498. Special Topics in Business. 1-3 Credit Hours.
Special topics in selected non-STEM areas of Business.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BUS 499. Special Topics in Business. 1-3 Credit Hours.
Special topics in selected STEM areas of Business.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 555. Business Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Business.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BUS 556. Global Business Studies Seminar V. 1 Credit Hour.
This directed study course provides individual supervision in thesis writing.
Requisite: Global Business Studies co-major.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

This honors seminar is designed for completion of the thesis writing and individualized preparation for thesis defense.
Requisite: Global Business Studies co-major.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

Management
Department Code: MGT

Introduction
The Department of Management at the University of Miami Herbert Business School is heterogeneous with respect to both research and teaching areas. Faculty are specialized in and teach courses that span a number of fields including entrepreneurship, human resources, international management, leadership, operations management, organizational behavior, strategic management, supply chain management, and teams. Given both the multinational context and diversity present in twenty-first century organizations, coursework in the Department of Management is focused on preparing business students to be productive and effective contributors to the various communities they are embedded within or impact. Students who select any of the Management major areas of specialization pursue a variety of careers after graduation including starting businesses, running family businesses, accepting management positions in domestic or international organizations, attending law school, or pursuing other advanced graduate degrees.

Educational Objectives
• The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
• The improvement of interpersonal skills and learning to work effectively in teams; and
• An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All area specific coursework for any major and/or minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major and/or minor area of specialization.

MGT 100. Managing for Success in the Global Environment. 3 Credit Hours.
This course will introduce students to the basics of management success in a multi-cultural, international environment. Course topics include an introduction to effective management and communication, understanding cultural differences, working in teams, and the role of the individual in managing his or her own success during the college experience, through such things as career/major exploration, development and building of a resume, and presentation techniques. The course utilizes both a lecture and workshop format, and culminates in a group project presentation integrating course topics.
Requisite: Miami Business School and Freshman Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MGT 199. Professional Development and Success in the Workplace. 1 Credit Hour.
This one-credit course is designed to expose undergraduate business students to advanced professional development topics, including organization of a career search, practices for updating a résumé, job search mechanics, and proper networking and interview strategies. It also improves students' preparedness to find and secure internships or permanent placement offers, with a focus on critical communication skills and a strategic approach to success in the workplace.
Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 251. Nature and Foundations of Entrepreneurship. 3 Credit Hours.
This course seeks to understand some of the basic social, legal, cultural, and economic infrastructure that enables and sustains the creation of new enterprises. Although conventional perspectives on entrepreneurship often overlook political or religious activists whose "products" are not "sold" in traditional markets, a more expansive view considers actions that transform ideas into enterprises that generate intellectual, social, cultural, religious, or economic value. Theory, data, and case study will be covered to help students to think both broadly and deeply about what it means - and what it takes - to be an entrepreneur, and what characterizes the entrepreneurial society.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 253. Introduction to Entrepreneurship. 3 Credit Hours.
Focuses on the process of identifying entrepreneurial opportunities and the operations of a small business. Topics include organization, location, financial planning, record-keeping, unit costs, merchandising, credit, and recruitment of personnel. This course is open to SBA students, ENT minors, or MGT minors.
Requisite: Business School or MGMT minor or ENTR minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 270. Introduction to Health Sector Organization and Management. 3 Credit Hours.
This course provides a basic understanding of the components of the health care sector and their interrelationships. The role of hospitals, ambulatory care (including physicians), long-term care, mental health care, hospice care, and pharmaceuticals will be examined. The role of government financed (Medicare and Medicaid) and private health insurance in affecting decision making by health care consumers and providers will be examined as well. A historical context will be used.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 302. Human Resource Management. 3 Credit Hours.
Theory and practice of modern personnel management related to the other management functions in the conduct of the enterprise. Attention is focused on the needs of the line executive as well as those intending to pursue a staff career.
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 303. Operations Management. 3 Credit Hours.
Problems and methods of planning the efficient utilization of capital, labor, equipment, and materials. Sales forecasting, production planning, production control, scheduling, routing, dispatching, expediting, materials planning, inventory control, capital budgets, and costing are discussed. The application of quantitative techniques in problem solving and decision making are included as well as case problems.
Prerequisite: MAS 201 or MAS 311 or MTH 224 or IEN 311 or PSY 291 or PSY 292.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 304. Organizational Behavior. 3 Credit Hours.
First professional course in management. Concepts of organization, motivation, leadership, dynamics of the group, personality, organizational development strategies, and other behavioral aspects involved in the effective management of an organization are discussed.
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MGT 307. Advanced Organizational Behavior. 3 Credit Hours.
Continuation of MGT 304—primarily for, but not limited to, MGMT OR HRMG majors. Through case analysis and other relevant exercises, theories are applied to specific situations in organizational settings.
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 308. Training and Development. 3 Credit Hours.
An examination of key issues in designing training and development programs. Topics include organizational needs analysis, training design and implementation, evaluation techniques, and understanding of how such programs interact with other human resource functions.
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGT 324. Negotiation Strategies. 3 Credit Hours.
A skills-based approach to learning the art and science of negotiation. Course covers preparation, and negotiation skills such as establishing trust and relationship-building. Topics include power, persuasion, creativity, problem-solving, ethics, and cross-cultural negotiation. Skills and self-insight will be acquired through self-assessment, role-play negotiation exercises, and case studies.
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGT 349. International Business. 3 Credit Hours.
This course is designed to introduce students to the study of international business. Through discussions and analyses of the unique challenges and opportunities faced by multinational corporations (MNCs) and their managers, students gain an understanding of how to conduct business across different cultural, political, economic, and legal environments, as well as how to function effectively and succeed in MNCs. The course work and usage of teaching methods such as case analyses, experiential learning exercises, and debates seek to help students develop a global mindset and skills for effective global management (e.g., conceptual, analytical, cross-cultural communication, negotiation, and presentation skills).
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 354. Growing the New Venture. 3 Credit Hours.
Covers the basics of scaling a start-up. Topics include sources of capital, market choices, division of the equity pie, choice of distribution channels, choosing an accountant and a legal advisor, preparation of a business plan, and product design. Teams of students develop business plans to start new enterprises.
Prerequisite: MGT 253.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 357. Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO. 3 Credit Hours.
This course provides students with unique entrepreneurial experiences derived from starting and running businesses through computer simulation. Topics include: opportunity and environment assessment for potential businesses; initiation, organization, administration, and launch of the businesses; operation of the businesses in a competitive environment; responsibilities, functioning, and issues of entrepreneurial teams; evaluation, measurement, and competitive ranking of business success.
Requisite: Must be in the Business School or have a MGMT minor or ENTR minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 359. Comparative Management. 3 Credit Hours.
Analysis of professional management as affected by the cultural environments in which it operates in major industrial nations. The problems of trans-cultural managers in multinational structures is examined.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MGT 360. Effective Leadership. 3 Credit Hours.
This course covers the key theories, models, and frameworks about the effective leadership of people in organizations. A multimedia approach is taken, using readings, films, lecture, discussion, and case analyses. The emphasis is on building a sound grasp of good practice, and on developing the ability to apply such knowledge to everyday leadership situations.
Prerequisite: MGT 304.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 371. Doing Business in Latin America. 3 Credit Hours.
This elective examines the key local, regional, and global forces affecting the conduct of business in the main Latin American markets of Mexico, Brazil, Venezuela and Chile. These forces include historical, cultural and demographic factors as well as the fast-changing politics and economics of the region. Students will be introduced to the complex relationships between business and government in LatAm as well as the unique advantages and disadvantages of companies based in the region.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 401. Strategic Management. 3 Credit Hours.
An integrative approach to strategy formulation and implementation, from a domestic and international perspective, is the focus of this core capstone course. All the primary areas of business are emphasized using cases and readings. Course is required of all graduating seniors in Business.
Requisite: Business School and Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 422. Leading Teams. 3 Credit Hours.
The objectives of this course are to develop interpersonal communication and conflict management skills necessary to work in teams and exercise leadership in teams. Topics include team development, decision making, and managing conflict.
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 423. Leading with Emotional Intelligence. 3 Credit Hours.
Emotional Intelligence is one of the keys to high performance leadership, as well as promoting the wellbeing of employees in organizations. Emotional intelligence provides a framework for understanding how people's emotions contribute to their optimal functioning at work. In this class, students will learn how to perceive emotions in themselves and others, how to understand the sources and consequences of emotions, and techniques for managing their own emotions as well as the emotions of others. By learning the theoretical foundations of emotional intelligence and engaging in experiential activities, students will enhance their leadership potential through the development of their emotional skills.
Prerequisite: MGT 304 and MGT 360.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 428. Compensation and Benefits Design. 3 Credit Hours.
Examines techniques and theories related to the design and management of compensation and benefits programs within organizations. Compensation includes cash compensation, such as base pay, merit pay, seniority pay, individual, group and organization-wide incentive plans, skills-based pay, and pay-for-knowledge. Benefits include health care plans, pension and profit-sharing plans, life and disability plans, and paid time off.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGT 445. Supply Chain Modeling and Analysis. 3 Credit Hours.
This course will introduce students to managerial decision problems in modern supply chains, and will develop structured mathematical tools to model and solve these problems. Students will also learn to apply these tools through problem-solving exercises, experiential games, and spreadsheet-based case studies.
Prerequisite: MGT 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MGT 446. Supply Chain Strategy. 3 Credit Hours.
This course will deal with issues such as inventory management, supply chain design/coordination, revenue management, and sourcing. Each module discusses how a real company practices some aspect of supply chain strategy, and then reviews the concepts behind that practice. Tools are provided to analyze the concepts, distill their principles, and suggest guidelines for implementation and improvement.
Prerequisite: MGT 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 448. Global Sourcing. 3 Credit Hours.
Global sourcing is the collaborative and structured process of critically analyzing an organization's spending and using this information to make business decisions about acquiring commodities and services more effectively and efficiently. This course will provide students a framework for thinking about strategic sourcing and tools to effectively implement the global sourcing process.
MGT 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 450. MGT Internship. 1 Credit Hour.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Cannot be used toward major requirements.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGT 451. Supply Chain Analytics Practicum. 3 Credit Hours.
The Supply Chain Analytics Practicum course (SCAP) places students with organizations throughout the world to address pressing challenges related to operations and/or supply chain. Students work in teams with guidance from faculty advisors to develop actionable and valuable recommendations for sponsors.
Prerequisite: MGT 445 and Pre/Corequisite: MGT 446 And Requisite: Senior Status.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

MGT 455. Entrepreneurial Consulting. 3 Credit Hours.
Students review techniques, methods, and analytic frameworks of management consultants. Emphasis is on problems of small business, particularly start-ups. Consulting practice is provided through preparation of reports on written cases and guest speakers, as well as hands-on projects in actual business firms or start-ups.
Prerequisite: MGT 253 And MGT 354.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 459. International and Multinational Management. 3 Credit Hours.
Foreign environment for overseas operations with a survey involving economics, political, and social constraints. The effects of overseas investments on foreign economies with emphasis on the emerging managerial structures is included.
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGT 480. Leading Change. 3 Credit Hours.
Course is intended for students who are interested in learning about how to manage, plan, and implement large-scale change efforts within organizations. Part of the course is devoted to organizational analysis techniques and the remainder addresses behavioral intervention strategies (including survey feedback, technostructural interventions, and team building).
Requisite: Must be in the Business School or have a MGMT minor plan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MGT 481. Leadership Practicum. 3 Credit Hours.
The Leadership Practicum requires having students observe (shadow) actual leaders to learn more about the respective leader's actual daily behaviors within his/her unique organizational context. Students will keep detailed journals containing field notes which they will then analyze based on the conceptual frameworks learned within the required course of the Leadership major.
Requisites: Senior status and Leadership majors only.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

MGT 496. Directed Studies in Management. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 497. Directed Studies in Management. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 498. Special Topics in Management. 3 Credit Hours.
Special topics in selected non-STEM areas of Management.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 499. Special Topics in Management. 3 Credit Hours.
Special topics in selected STEM areas of Management.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 555. Management Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Management.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

B.B.A. in Entrepreneurship

Overview
Major Area of Specialization in Entrepreneurship (People & Society)

The Entrepreneurship major prepares Miami Herbert Business School students to engage in the process of value creation, regardless of organizational context. Students will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit), or working effectively within an existing organization.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Entrepreneurship must complete the BBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

  Special Topics in Management (Families in Business; Innovators for the Americas; or Social Entrepreneurship)

- **MKT 302**  
  Marketing Research and Market Analysis

- **MKT 310**  
  Consumer Behavior and Marketing Strategy
Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission
• To develop innovative ideas and principled leaders that transform global business and society.

Goals
• The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
• The improvement of interpersonal skills and learning to work effectively in teams; and
• An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

Student Learning Outcomes
• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
B.S.B.A. in Entrepreneurship

Overview

Major Area of Specialization in Entrepreneurship (People & Society)

The Entrepreneurship major prepares Miami Herbert Business School students to engage in the process of value creation, regardless of organizational context. Students pursuing this major will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit) or working effectively within an existing organization.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Entrepreneurship must complete the BSBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

<table>
<thead>
<tr>

</table>

**Total Credit Hours**: 120

---

1. **NOTE**: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.
All specific coursework for the major area of specialization in Entrepreneurship must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.

No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

- The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- The improvement of interpersonal skills and learning to work effectively in teams; and
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

**B.B.A. in Human Resource Management**

**Overview**

Major Area of Specialization in Human Resource Management (People & Society)

The Human Resource Management major area of specialization is designed for Miami Herbert Business School students who intend to pursue a career in human resources or personnel.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Human Resource Management must complete the BBA Business Core and the specific coursework for the Human Resource Management major area of specialization as follows:
<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>
NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or ENG 230 with at least a C- before enrolling in BUS 300.

All specific coursework for the major area of specialization in Human Resource Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular “Area of Knowledge” within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**
- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**
- The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- The improvement of interpersonal skills and learning to work effectively in teams; and
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

**Student Learning Outcomes**
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.
B.B.A. in Management

Overview
Major Area of Specialization in Management (People & Society)

Business students who pursue the Management major will be prepared for future careers in all areas of management, including small business and corporate levels. The Management major also provides a solid preparation for the pursuit of other graduate degree programs, particularly in law and business.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Management must complete the BBA Business Core and the specific coursework for the Management major area of specialization as follows:

- BBA/BSBA graduates will demonstrate professional written communication skills.

### B.S.B.A. in Management

#### Overview

Major Area of Specialization in Management (People & Society)
Miami Herbert Business students who pursue the Management major area of specialization will be prepared for future careers in all areas of management, including small business and corporate levels. The study of Management also provides a solid preparation for the pursuit of other graduate degree programs, particularly in law and business.

## Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Management must complete the BSBA Business Core and the specific coursework for the Management major area of specialization as follows:

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major area of specialization in Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

5. No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

6. Excluding any 100-level Management courses and MGT 401

### Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Goals**

- The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- The improvement of interpersonal skills and learning to work effectively in teams; and
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

**Student Learning Outcomes**

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
B.B.A. in Organizational Leadership

Overview
Major Area of Specialization in Organizational Leadership (People & Society)

The major area of specialization in Organizational Leadership is designed to give Miami Herbert Business School students an understanding of the skills necessary to effectively work and influence as well as motivate others within organizational settings. Students with the major in Organizational Leadership will be exposed to an understanding of leadership as an academic discipline, coursework that helps to broaden their understanding of how to effectively influence others towards meeting organizational goals, and hands-on experiences that explore actually leading and working effectively in teams.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Organizational Leadership must complete the BBA Business Core and the specific coursework for the Organizational Leadership major area of specialization as follows:

<table>

### Mission

- To develop innovative ideas and principled leaders that transform global business and society.

### Goals

The undergraduate major in Organizational Leadership is designed to give students an understanding of the skills necessary to effectively work and influence as well as motivate others within organizational settings. Soft skill sets such as leading effectively are essential in every job position and industry today. Students who enroll in the BBA with a major in Organizational Leadership will be exposed to an understanding of leadership as an academic discipline; coursework that helps to broaden their understanding of how to effectively influence others towards meeting organizational goals; and hands-on experiences that explore actually leading and working effectively in teams.

### Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- Organizational Leadership majors will demonstrate an understanding of leadership theories and their applications.
• Organizational Leadership majors will work effectively within and leading teams.
• Organizational Leadership majors will demonstrate interpersonal skill sets necessary to influence and engage others in the pursuit of goals.
• Organizational Leadership majors will effectively identify their own leadership strengths and areas for continuous improvement.

**B.S.B.A. in Organizational Leadership**

**Overview**

Major Area of Specialization in Organizational Leadership (People & Society)

The major area of specialization in Organizational Leadership is designed to give Miami Herbert Business School students an understanding of the skills necessary to effectively work with and influence as well as motivate others within organizational settings. Students with the major in Organizational Leadership will be exposed to an understanding of leadership as an academic discipline; coursework that helps to broaden their understanding of how to effectively influence others towards meeting organizational goals; and hands-on experiences that explore actually leading and working effectively in teams.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Organizational Leadership must complete the BSBA Business Core and the specific coursework for the Organizational Leadership major area of specialization as follows:

**Total Credit Hours**: 120

---

**NOTE**: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

All specific coursework for the major area of specialization in Organizational Leadership must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

---

**Sample Plan of Study**

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

### Mission

- To develop innovative ideas and principled leaders that transform global business and society.
Goals
The undergraduate major in Organizational Leadership is designed to give students an understanding of the skills necessary to effectively work and influence as well as motivate others within organizational settings. Soft skill sets such as leading effectively are essential in every job position and industry today. Students who enroll in the BBA with a major in Organizational Leadership will be exposed to an understanding of leadership as an academic discipline; coursework that helps to broaden their understanding of how to effectively influence others towards meeting organizational goals; and hands-on experiences that explore actually leading and working effectively in teams.

Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.
- Organizational Leadership majors will demonstrate an understanding of leadership theories and their applications.
- Organizational Leadership majors will work effectively within and leading teams.
- Organizational Leadership majors will demonstrate interpersonal skill sets necessary to influence and engage others in the pursuit of goals.
- Organizational Leadership majors will effectively identify their own leadership strengths and areas for continuous improvement.

Global Business Co-Major
Overview
The Global Business Co-Major (People and Society)

The curriculum for the Global Business Co-Major consists of 18 credit hours of required and elective course choices. The Global Business Co-Major is available only to BBA or BSBA students who are also completing another undergraduate business major area of specialization.

Curriculum Requirements
Each student will work with an advisor to design an individualized course of study that enhances the student’s global perspective and provides an intellectual framework and immersive environment for studying a new country or region of the world. Each program of study will consist of a minimum of 18 credit hours, including coursework distributed among the following areas:

1. Economics related to the country or region
2. Political or regulatory environment of the country or region
3. Historical/cultural perspective on the country or region
4. Exposure to a language of the country or region, demonstrated by completion of a business course in the language of the region, or if unavailable, completion of a course in the language at the 200 level or above. Where the country or region that is studied is English-speaking, the student may complete this requirement by demonstrating language proficiency at the 200 level or above in another language, or by taking an additional course related to the economics, political/regulatory environment, or history/culture of the country or region.
5. One international/global focused upper level business elective, outside the student’s other business major

To further advance and integrate the student’s regional, functional and pragmatic expertise, and to hone the student’s global mindset, the curriculum includes a required Experiential Learning component.

- students must complete a learning experience in the country or region (i.e. study abroad).
- students must complete an approved international internship.
- students’ participation will be encouraged in any MBS Immersion Course that is offered for undergraduates in the region studied. These may take the form of summer or spring break study.
- students’ participation in programming on and off campus related to their region and career track will be encouraged and facilitated.

Mission
Global Business coursework will engage students in pointed critical thinking and discourse that will push them beyond the customary business curriculum, requiring them to consider in some depth the economic, socio-political, historical/cultural questions that embody the intellectual framework for the study of another country or region.
Goals

The Global Business curriculum will provide the rigor, flexibility, and depth to enable students to:

• Design an overall undergraduate curriculum that is consistent with their unique business and global interests,
• Undertake experiential learning activities, including internships, in cosmopolitan Miami and other locations worldwide, which will expand their perspective and allow them to gain a strong multicultural understanding,
• Learn from the perspectives and experiences of an outstanding and diverse group of professors, classmates, practitioners, and UM alumni from all over the world.

Student Learning Outcomes

Students completing the Global Business co-major will:

• Apply interdisciplinary and multidisciplinary approaches, including in relevant cases, foreign language skills, to critical analysis of business topics at the country or regional level.
• Evaluate and apply diverse perspectives to complex issues of comparative and/or global significance, in the face of multiple and sometimes conflicting positions (e.g., cultural, disciplinary, ethical).
• Engage in meaningful interaction with other culture(s) and gain an in-depth understanding of a country and/or region of the world where the student may expect to commence his or her global business career.

Minor in Entrepreneurship for Business Students

Overview

Minor Area of Specialization in Entrepreneurship for Business Students (People & Society)

This minor in Entrepreneurship is intended to acquaint Miami Herbert Business School students with the essential business tools and perspective of the entrepreneur. Eligible business students must have a declared business major other than Entrepreneurship.

Curriculum Requirements

The requirements of the 15-credit-hour minor in Entrepreneurship are the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGT 253</td>
<td>Introduction to Entrepreneurship</td>
<td>3</td>
</tr>
<tr>
<td>MGT 354</td>
<td>Growing the New Venture</td>
<td>3</td>
</tr>
<tr>
<td>MGT 455</td>

</tr>
</tbody>
</table>
Overview

Minor Area of Specialization in Entrepreneurship for Non-Business Students (People & Society)

This minor is for non-business students who seek to learn about developing business plans or how to initiate and manage small business enterprises. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Entrepreneurship is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Management is necessary. Instead the non-business student should simply declare the minor and complete the required six courses, or 18 credit hours.

¹ All courses must be taken within the current pre-requisite structure.

² pre-requisite of a Statistics 1 course, such as MAS 201, MAS 311, IEN 311, MTH 224, or the equivalent.

³ excluding MGT 401

Note: No one course may be applied toward more than one minor area of specialization in the Department of Management. All specific coursework for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Management Science

Department Code: MAS
Introduction
Management Science uses the ideas and methods of science, mathematics, statistics, and computing, which collectively are often referred to as Business Analytics, to help managers make better business decisions. Management science techniques have been applied in a wide variety of areas including financial modeling, marketing research, organizational theory, transportation and logistics, health care, environmental protection, and manufacturing. Almost any decision can benefit from the methods of management science/analytics.

Educational Objectives
The Department of Management Science offers a major area of specialization in Business Analytics as well as a minor in Business Analytics. The Business Analytics curriculum is designed to give Miami Herbert Business School students the necessary educational background and experience to allow them to work as successful business analytics professionals.

Students pursuing the Bachelor of Business Administration (BBA) degree with a major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

For students pursuing the Bachelor of Science in Business Administration (BSBA) degree program, the major in Business Analytics requires a solid background in the sciences and mathematics. Additionally, students are required to take sequences of courses in optimization, decision science, and data analytics. A number of the courses in the Business Analytics curriculum require projects, in which the student evaluates a real-world system or process. As the system is studied and modeled, the student applies management science methods to find ways to improve the process. In such a course, written and oral presentation of findings is part of the learning and evaluation process.

A major or minor area of specialization in Business Analytics is recommended to qualified students as preparation for direct entry into the field of Analytics or as preparation for future graduate studies.

Highly-motivated students interested in pursuing both the BBA/BSBA and the Master of Science in Business Analytics may qualify for the dual degree program in Business Analytics (p. 1969). Undergraduate students admitted to this program must be within thirty credit hours of completing the baccalaureate degree and have a minimum 3.0 GPA. The BBA/BSBA-MSBA program is designed in such a way that students can expect to complete both the Bachelor's and Master's degrees within 4 1/2 years. Students in this program can take up to twelve credits of graduate coursework in the senior undergraduate year and at least twenty credits of graduate coursework in the fall semester after completion of the undergraduate degree.

MAS 105. Quantitative Methods in Business I. 3 Credit Hours.
This course provides a background in algebra, linear equations, matrices, quadratic, exponential, and logarithmic functions appropriate for the successful understanding, interpretation, and use of these concepts and their application to business and economics within the Business School curriculum and in career endeavors. The course also provides an introduction to the mathematics of finance, interest rates, discounting of future returns, and linear programming.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 110. Quantitative Applications in Business. 3 Credit Hours.
Review of algebra emphasizing its application to supply and demand functions, market equilibrium, compound interest, and amortization. Differential calculus emphasizing its applications to marginal cost and revenue functions, maximization, taxation in competitive markets, and elasticity of demand are discussed. The application of integral calculus to total cost and profit of demand, to total cost and profit functions, consumer’s and producer’s surplus, computation of present value, and constrained optimization using partial differentiation are also included.
Requisite: Bus Schl and Prerequisite: ALEKS score >= 76, or SAT MATH score >=700,or SAT Math Section Score >= 730,or ACT Math score >= 31,or score of 4 AP Calculus (AB),or score of 3 in AP Calculus (BC) or MTH 108,or MTH 107 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 201. Introduction to Business Statistics. 3 Credit Hours.
Data analysis and presentation, cross tabulations, descriptive statistical measures, probability, sampling, statistical inference, hypothesis testing for one and two populations, covariance and correlation analysis. Utilization of microcomputer statistical packages is also included.
Prerequisites: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MAS 202. Intermediate Business Statistics. 3 Credit Hours.
Chi-squared goodness of fit tests, and contingency tables, analysis of variance, simple linear regression, multiple regression, time series, forecasting, statistical methods of quality. Utilization of microcomputer statistical packages, case analyses, and presentations are also included.
Prerequisite: MAS 201 or MAS 311 or MTH 224 or IEN 311 or PSY 291 or PSY 292 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 311. Applied Probability and Statistics. 3 Credit Hours.
Descriptive statistics, basic probability, probability distributions, distribution theory, point and interval estimation, and single sample hypothesis testing.
Prerequisite: MTH 162 or MTH 172. Or Corequisites: MTH 162 or MTH 172 including equivalents.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 312. Statistical Methods and Quality Control. 3 Credit Hours.
Two sample hypothesis testing, simple and multiple regression, analysis of variance, design of experiments, and statistical quality control.
Prerequisite: MAS 311 or IEN 311 or Equivalent and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 332. Data Acquisition, Preparation and Visualization. 3 Credit Hours.
This course provides an in depth view of working with data to extract and present valuable information. Students will learn to collect, clean, manipulate, analyze, and visualize data from various sources correctly and efficiently. Through hands-on application, students will gain an understanding of what problems can occur when dealing with a variety of data and what solutions exist. Computing is a major component of this course, and students will learn a number of in-demand technical skills.
Prerequisite: MAS 202 or MAS 312.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 342. Introduction to Optimization and Decision Making. 3 Credit Hours.
This course introduces the principles and techniques of applied mathematical programming and computational methods for managerial decision-making. Computer software will be used extensively to solve both small-scale and large-scale optimization problems. The course covers theory and applications of Linear Programming, Mixed Integer Programming, Binary Programming, Non-linear Programming, Network Optimization.
Prerequisite: MAS 201 or MAS 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 352. Sports Analytics. 3 Credit Hours.
In this course students investigate questions that sports organizations face in business operations (ticketing, pricing, sales, and finance), and in team operations (scouting, coaching, and player personnel). Students will learn statistical and machine learning techniques such as mixed-effects regression models, random forests, neural networks, clustering, and support vector machines. Focus of the course will be on data management, data visualization, predictive modeling, forecasting, as well as written and verbal communication of the results of analysis. The programming language R will be used extensively in this course.
Prerequisite: MAS 332.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 343. Data Analysis. 3 Credit Hours.
This course introduces students to the analysis of various data types, with an emphasis on interpreting and communicating result. The course begins with linear regression modeling of normally distributed outcomes, and extends the concepts to other important data types frequently encountered in practice. Students will gain a firm understanding of a wide range of statistical models, when each is appropriate, and how to implement, interpret, and communicate results.
Prerequisite: MAS 202 or MAS 312 or IEN 312 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MAS 442. Stochastic Models in Operations Research. 3 Credit Hours.
Introduction to probabilistic models and their applications. Topics include inventory theory, stochastic processes (queueing systems, Markov chains), and computer simulation. Lecture, 3 hours.
Prerequisite: MAS 311 or IEN 311 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAS 496. Directed Studies in Business Analytics. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 497. Directed Studies in Business Analytics. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 498. Special Topics in Business Analytics. 3 Credit Hours.
Special topics in selected non-STEM areas of Business Analytics.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 499. Special Topics in Business Analytics. 3 Credit Hours.
Special topics in selected STEM areas of Business Analytics.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 547. Computer Simulation Systems. 3 Credit Hours.
Introduction to discrete-event computer simulation and hands-on development of simulation models. Topics include introduction to queuing theory, input and output analysis, random number generation, and variance reduction techniques. Students practice their modeling skills using commercial state-of-the-art simulation software. Assigned readings of real-life simulation projects complement the material learned in the classroom. Lecture, 3 hours.
Prerequisite: MAS 311 or IEN 311 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 548. Data Mining and Knowledge Acquisition. 3 Credit Hours.
This course provides an introduction to the principles and techniques of data mining. Topics covered include the data mining process, data preprocessing, data mining techniques and data mining evaluation. The course will involve a combination of lectures, labs, projects and case studies.
Prerequisite: MAS 432.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAS 549. Big Data Analytics. 3 Credit Hours.
As firms have the ability to access and store large amounts of customer and business data, they are faced with the complexities associated with Big Data. This class will discuss the challenges and potential solutions in working with Big Data through use cases and applications. Hands-on tools and methodologies that are needed when handling, visualizing, and/or analyzing Big Data to solve business critical questions will be presented.
Prerequisite: MAS 332 and MAS 432.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MAS 550. Management Science Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Permission of department chair is required prior to registration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 551. Business Analytics Capstone. 3 Credit Hours.
The goal of the Business Analytics Capstone course is to apply the skills learned throughout the undergraduate degree in Business Analytics to a single data analytics project. Students will work in groups on a project assigned to them by the instructor. Project topics will vary depending on availability, but reasonable efforts will be made to match projects with student interest. The project will expose students to the entire spectrum of Business Analytics; from initiating a project and defining the scope and goals, to data collection, cleaning, and exploration, to modeling and suggesting recommendations based on results. Along the way, students will practice effectively communicating with stakeholders who may or may not be familiar with the complex analytical methods implemented.
Prerequisite: MAS 332 and MAS 342 and MAS 432.
Components: EXP.
Grading: GRD.
Typically Offered: Spring.

MAS 555. Management Science Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Management Science.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

B.B.A. in Business Analytics

Overview
Major Area of Specialization in Business Analytics (STEM)
The Department of Management Science offers a major area of specialization in Business Analytics for students pursuing the Bachelor of Business Administration degree. Students who choose the major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

Curriculum Requirements
In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Business Analytics must complete the BBA Business Core and the specific coursework for the Business Analytics major area of specialization as follows:

Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

Students pursuing the Bachelor of Business Administration (BBA) degree with a major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.

B.B.A./M.S. in Business Analytics Dual Degree

Bachelor of Business Administration in Business Analytics and Master of Science in Business Analytics

The dual BBA and Master of Science in Analytics program is designed in such a way that students can expect to complete both their Bachelor’s and Master’s degree within four and a half years. This accelerated program is designed to assist highly-motivated undergraduate students seeking an efficient path and an expedient start to their professional careers without sacrificing quality of education.

Students enroll in up to twelve credits of graduate work in their senior year*. Then, at least twenty credits of graduate work is completed in the fall semester after the senior year.

* Students in this program will only be permitted to take graduate classes if they are within 30 credits of completing the baccalaureate degree and have a minimum 3.0 GPA.

Admission Requirements

To qualify for admission to the BBA/BSBA-MSBA programs, a student must:

- Be within 30 credits of completing the baccalaureate degree with a cumulative grade point average of 3.0 or higher.

Requirements for Admission

- Completed application for admission submitted through BusinessCAS
- Academic transcript(s)
  - An unofficial copy of your current transcript must be uploaded with your online application.
  - Request official evaluations of transcripts from all previously attended non-U.S. institutions to be sent to BusinessCAS.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. In order to declare the Business Analytics major, a BBA student needs to have earned a minimum A- (3.7) average for MTH 161, MAS 201, and MAS 202.

5. All specific coursework for the major area of specialization in Business Analytics must be completed with a grade of “C-” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

6. All courses must be taken within the current pre-requisite structure.

7. No course may double count in any other major, minor, or cognate.

8. Students may take MAS 652 Capstone Project as a replacement of MAS 650 Management Science Internship if an internship cannot be obtained.

9. Electives are based on class demand.

10. MAS 627 is replaced with MAS 691 or BTE 601 for students who received an A- or better in MAS 332.

11. MAS 631 is replaced with an approved elective for students who received an A- or better in MAS 311.

12. MAS 632 is replaced with an approved elective for students who received an A- or better in MAS 342.

13. MAS 637 is replaced with MAS 681 for students who received an A- or better in MAS 432.

14. MAS 648 is replaced with an approved elective if students take MAS 681.

### B.S.B.A. in Business Analytics

**Overview**

The Department of Management Science offers a major area of specialization in Business Analytics for students pursuing the Bachelor of Science in Business Administration degree. Students who choose the major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

**Curriculum Requirements**

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Business Analytics must complete the BSBA Business Core and the specific coursework for the Business Analytics major area of specialization as follows:

<table>
<thead>
<tr>

</table>

**Major Choice Courses - Select two courses (6 credit hours) from the following:** 6

- At least one course must be selected from MAS 547 or MAS 548.
- BTE 324 Object-Oriented Programming (pre-requisite BTE 320) 5
- BTE 423 Database Management Systems (pre-requisite BTE 320) 5
- MAS 547 Computer Simulation Systems (pre-requisite MAS 311; offered in the fall semester) 5
- MAS 548 Data Mining and Knowledge Acquisition (pre-requisite MAS 432; offered in the spring semester) 5

**Total Credit Hours** 120

---

1 **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2 At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3 Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4 All specific coursework for the major area of specialization in Business Analytics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.
may not double count as both the Quantitative Choice and a Major Choice unless Business Analytics is an additional major
may not double count as both the Quantitative Choice and the major requirement unless Business Analytics is an additional major

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student’s 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within the Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

- To develop innovative ideas and principled leaders that transform global business and society.

Goals

For students pursuing the Bachelor of Science in Business Administration (BSBA) degree program, the major in Business Analytics requires a solid background in the sciences and mathematics. Additionally, students are required to take sequences of courses in optimization, decision science, and data analytics. A number of the courses in the Business Analytics curriculum require projects, in which the student evaluates a real-world system or process. As the system is studied and modeled, the student applies management science methods to find ways to improve the process. In such a course, written and oral presentation of findings is part of the learning and evaluation process.

Student Learning Outcomes

- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

B.S.B.A./M.S. in Business Analytics Dual Degree

Bachelor of Science in Business Administration in Business Analytics and Master of Science in Business Analytics

The dual BSBA and Master of Science in Analytics program is designed in such a way that students can expect to complete both their Bachelor’s and Master’s degree within four and a half years. This accelerated program is designed to assist highly-motivated undergraduate students seeking an efficient path and an expedient start to their professional careers without sacrificing quality of education.

Students enroll in up to twelve credits of graduate work in their senior year.* Then, at least twenty credits of graduate work is completed in the fall semester after the senior year.
*Students in this program will only be permitted to take graduate classes if they are within 30 credits of completing the baccalaureate degree and have a minimum GPA of 3.0.

**Admission Requirements**

To qualify for admission to the BBA/BSBA-MSBA programs, a student must:

- Be within 30 credits of completing the baccalaureate degree with a cumulative grade point average of 3.0 or higher.

**Requirements for Admission**

- Completed application for admission submitted through BusinessCAS
- Academic transcript(s)
  - An unofficial copy of your current transcript must be uploaded with your online application.
  - Request official evaluations of transcripts from all previously attended non-U.S. institutions to be sent to BusinessCAS.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.

**QUESTIONS?**

### Additional Required Courses

Electives

### Total Credit Hours

152

---

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. All specific coursework for the major area of specialization in Business Analytics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

5. Students may take MAS 652 Capstone Project as a replacement of MAS 650 Management Science Internship if an internship cannot be obtained.

6. Electives are based on class demand.

7. MAS 627 is replaced with MAS 691 or BTE 601 for students who received an A- or better in MAS 332.

8. MAS 631 is replaced with an approved elective for students who received an A- or better in MAS 311.

9. MAS 632 is replaced with an approved elective for students who received an A- or better in MAS 342.

10. MAS 637 is replaced with MAS 681 for students who received an A- or better in MAS 432.

11. MAS 648 is replaced with an approved elective if students take MAS 681.

---

<td>Data Mining and Knowledge Acquisition</td>
</tr>
<tr>
<td>MAS 549</td>
<td>Big Data Analytics</td>
</tr>
</tbody>
</table>

Total Credit Hours: 12

1 All courses must be taken within the current pre-requisite structure. In order to declare this minor, students will need to have earned a minimum 3.6 average for MTH 161, MAS 201, and MAS 202.
2 offered in fall semester
3 offered in spring semester
4 Note: All specific coursework for the minor in Business Analytics must be completed with a grade of "C-" or better. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

No course may double count in any other major, minor, or cognate.

Marketing

Department Code: MKT

Introduction

Rapidly increasing global competition, emergence of new markets, and technological advancements make today's marketplace a highly dynamic and challenging environment for companies. Effective marketing is therefore crucial for organizations to survive and prosper in such an environment.
Marketing is the process through which organizations develop and distribute products and services that satisfy the needs of customers. Customer satisfaction is critical to the profitable operations and growth of organizations and, as such, an integral component of modern-day marketing.

**Educational Objectives**

The marketing curriculum offers courses and programs to undergraduate and graduate students for their professional development in domestic and world business.

The primary goals of the Department of Marketing are:

1. to contribute to marketing knowledge through conducting scholarly research and disseminating the research findings through leading journals;
2. to excel in imparting marketing knowledge to students and honing their critical-thinking skills so as to prepare them for potentially successful careers in an increasingly competitive, dynamic, global, and service-and technology-oriented environment; and
3. to be of service to the business and professional communities at large.

A program of study in marketing offers business students a comprehensive understanding of such topics as:

- Marketing's critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies.

**MKT 101. Marketing in the 21st Century. 3 Credit Hours.**

This is an introduction to the marketing function designed to provide students with an overview of marketing concepts, tools, and methods of analysis. Business Environment today is very competitive. As such, businesses are required to combine traditional marketing practices with new digital technologies to connect with the consumers and develop relationships with them. The course broadly covers the controllable strategic variables of marketing (product, price, place, and promotion) in the context of the uncontrollable environment in which marketing operates, accompanied by discussions of the ethical implications of marketing and the growing demographic diversity and globalization of the marketplace. In a modular format: three modules spread over a period of three weeks, the students will get introduced to the fundamentals of marketing and the exciting world of digital marketing and marketing analytics. Methods of instruction will include lecture, discussion, analytical problem solving, experiential (involvement) learning, and case analysis.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Summer.

**MKT 201. Foundations of Marketing. 3 Credit Hours.**

Understanding and satisfying consumer need through product planning, pricing, promotion, and distribution. Students identify and analyze marketing problems. Discovery and application of marketing skills are developed by marketing planning assignments, computer simulations, and case analysis. Freshman or Sophomore AND Business School.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MKT 301. Marketing Foundations. 3 Credit Hours.**

Understanding and satisfying consumer needs through product planning, pricing, promotion, and distribution. Students identify and analyze marketing problems. Discovery and application of marketing skills are developed by marketing planning assignments, computer simulation, and case analysis. Requisite: Sophomore Standing or Higher.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall, Spring, & Summer.

**MKT 302. Marketing Research and Market Analysis. 3 Credit Hours.**

Examination of the process, role, and function of marketing research, including research problem formation, research methods and procedures, data acquisition, sampling theory and practice, data analysis, presentation of results, ethical issues, and application for each of the above. Prerequisite: MKT 201 or MKT 301 and MAS 202 or MAS 312 and Requisite: Business School.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.
MKT 310. Consumer Behavior and Marketing Strategy. 3 Credit Hours.
The study of behavioral science research findings, principles, and theories, especially those from psychology and sociology, as they relate to the determinants of consumer buying behavior. The case approach is utilized to stimulate the development of creative marketing strategy. Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 311. Pricing. 3 Credit Hours.
Pricing decisions require a synthesis of economic and marketing principles, an appreciation of ethical constraints, and the ability to use accounting, financial, and market research data. This course is designed to teach students how to price goods and services by providing a framework for understanding pricing strategies and tactics. We will take an integrative approach, combining strategic, economic, marketing, and psychological considerations. Topics covered include economic value and break-even analysis, price elasticity, markup and profit margin, price bundling, among others. Prerequisite: MKT 201 or MKT 301 And BUS 150 And ECO 211 or ECO 213.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 320. Retailing. 3 Credit Hours.
Retail store management, location, buying, merchandise control, policies, services, pricing, expenses, profits, training and supervision of retail sales force, and administrative problems are discussed. Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKT 340. Professional Selling. 3 Credit Hours.
Nature of the professional selling function and its relationship and contribution to the marketing strategy of organizations. Special emphasis is placed on broadly applicable principles and effective personal communication skills during the sales process. Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKT 350. Luxury Marketing. 3 Credit Hours.
The course will develop a framework for understanding the essential elements of effective marketing of luxury brands, a 1.36 Trillion dollars market worldwide in 2017 (Bain & Company). Through cases, business visits, and experiential projects the students will distinguish the unique nature of luxury, understand the opportunities and challenges confronted by luxury marketers and apply proven strategies. Students will also work on an actual project created exclusively for the class exposing them to internship opportunities in the luxury market sector. Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 360. International Marketing. 3 Credit Hours.
The major current factors affecting international marketing. Course is designed to acquaint students with the growing importance of world marketing in the U.S. and the strategic issues involved. Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 361. Brand Content Management. 3 Credit Hours.
Brand Content Management (BCM) is the process any organization can use to efficiently create, distribute and control brand-related content. BCM has a lot of moving parts (content, channels, audience segments and measurement tools), so the goal of this course is to provide a comprehensive conceptual framework and familiarity with implementation strategies that are critical to manage those factors and achieve brand equity goals at scale and on time. BCM skills are also crucial to anticipate and deal with brand fatigue and reputation crisis, which are the most demanding cases of Brand Content Management. Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MKT 365. Brand Story Telling. 3 Credit Hours.
This course explores the use of storytelling to build emotional connections, demonstrates the value of real engagement through immersive experiences and it illustrates how to create a compelling brand storytelling program from both the brand and the agency perspectives. As such, the course is uniquely positioned to train students to experience a rounded view of their role either on the brand side as an entrepreneur or working in a client’s marketing team.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKT 369. Marketing Analytics. 3 Credit Hours.
Netfix, Amazon, Google, Facebook these are some of the firms that harness data is one of the key strategic assets that firms possess. Analytics is the means by which managers transform data into actionable insights. One area where managers find analytics useful is marketing. Today managers can use analytics to identify profitable customers, analyze clickstream data to predict purchase, monitor brand health, develop dynamic pricing models, deliver advertising through rule based systems, test hundreds if not thousands of advertising and promotional material simultaneously and develop digital brand content from user generated sources. The objectives of this course are to give you hands-on experience with data and analytics and show you how to draw actionable marketing insights from data. It will enable you to make marketing decisions with greater precision without merely relying on “gut” decisions. This is not to say that intuition and creativity do not play a role in marketing. It means that analytical approaches combined with intuition makes for better marketing decisions. The class will mainly have in-class lectures and exercises. Through these you will: • Prerequisite: MKT201 or MKT 301 And MAS 202 or MAS 312 And BUS150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 370. Cases in Marketing Analytics. 3 Credit Hours.
Organizations today are faced with the challenge to make best use of the data they have and collect from their marketing, sales and customer interactions. Through cases and hands on exercises you will learn what types of data firms collect and how to use this data to come up with data-driven solutions to marketing problems such as the optimal number of market segments, seeking out the most valuable customers, arriving at the value maximizing price, formulating the optimal marketing mix and how best to deploy digital marketing.
Prerequisite: MKT 201 or MKT 301 And MAS 201 or MAS 311.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 371. Application of Artificial Intelligence in Marketing. 3 Credit Hours.
Artificial Intelligence (AI) represents a paradigm shift that is driving the scientific progress as well as the modern business. Of special interest to business is the fast transition of AI from a narrow research area in limited number of academic labs to a key topic in the business world. Today the adoption and successful use of AI capabilities has become a requirement for company's competitive advantage. One of the biggest challenges in accomplishing this goal is the deficit of educated labor force in this area. The class will fill this gap by clear explanations of the main principles of the different AI approaches with less of a focus on theoretical details, demonstrating their value creation potential with appropriate use cases, and describing a methodology for developing and deploying practical AI solutions in business settings. The list of selected AI approaches includes: cognitive computing (rule-based systems and IBM Watson), machine learning (neural networks and Support Vector Machines - SVM), deep learning (key deep neural network structures and image processing), decision trees (random forest), evolutionary computation (genetic programming), and other technologies (intelligent agents, chatbots, and Natural Language Processing – NLP).
Prerequisites: MKT 201 or MKT 301 and MAS 202 or MAS 312.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 372. Text and Image Analysis for Marketing. 3 Credit Hours.
Marketing in the 21st century requires analysis of vast quantities of unstructured text and image data. This data comes in the form of product reviews on e-commerce platforms, tweets, Facebook and Instagram posts, online news, voice activated devices such as Alexa and blogs. This information source provides marketers a rich source of data to understand their customers, design products and drive marketing campaigns. However, this also requires the ability to analyze text and image data using specialized tools. This course provides an overview of the concepts, technologies, and tools necessary to analyze text and image data and to support online analytics initiatives. It will enable you to uncover underlying themes or concepts contained in large document collections; automatically group documents into topical clusters; classify documents into predefined categories; and integrate text data with structured data to enrich predictive modeling endeavors and give you a preliminary understanding of how to analyze image data.
Prerequisites: MKT 201 or MKT 301 and BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MKT 380. New Product Development. 3 Credit Hours.
This course enables students to appreciate the systematic approach that goes into the creation and marketing of new products. Practical aspects of developing and marketing new products are inculcated through two assignments and one class project.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 385. Marketing for Entrepreneurs. 3 Credit Hours.
This course is focused on the study and practice of marketing all aspects of an entrepreneurial venture: the new company itself as well as its products or services. Topics will include: branding, pricing and costing, buying behavior, market segmentation, channel management, as well as exploring issues such as intellectual property, customer service, corporate versus product web sites, media exposure and PR, and maintaining an integrated plan for building the venture’s brand.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 386. Advertising Management. 3 Credit Hours.
In this course, students learn about the components involved in researching, planning, creating, and executing advertising strategies. The class gives students a better understanding of how advertising can be effectively used in a marketing strategy. Students also learn how advertising both influences and is influenced by cultural trends. Implications of this to both marketers and society as a whole are discussed.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 387. Digital Marketing. 3 Credit Hours.
This course will introduce students to the principles of digital marketing from both perspectives of theory and practice. On the theory side, students will learn foundations and recent research and development of digital marketing. Main contemporary digital marketing issues will be extensively discussed in class, including search engine optimization, search engine marketing, online advertising, web analytics, email marketing, social media marketing, and reputation management. Students will also learn how to form an appropriate strategy for a digital marketing campaign and use quantitative skills to analyze the effectiveness of such a campaign. On the practice side, students will collaborate in teams and participate in applied learning exercises. Students will grasp critical concepts of search engine optimization by working with a local business client, laying out a suitable pre-campaign strategy, implementing and modifying the campaign in real time, and summarizing the campaign results in a meaningful and concise manner when it is over.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 388. Health Care Marketing. 3 Credit Hours.
This course is devoted to the study of healthcare marketing and the healthcare system involved with the task of marketing products and services. As healthcare reform continues to evolve current market conditions and transform existing organization into new practices, this course is focused on how managed care providers, hospitals, physicians, federal government, device and pharmaceutical companies will embrace the new patient centered market in their marketing strategies.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 389. Fundamentals of Digital Marketing Analytics. 3 Credit Hours.
This course introduces the student to the basics of evolving new media business metrics and corresponding forms of audience and competitive marketplace analysis. Students will research and evaluate business models for multiplatform new media products that use any combination of print, radio, television, internet, or mobile technologies. Product evaluations will be set within the context of comparative media economics, new media market dynamics, and advertising revenue projections. The goal will be to evaluate whether an existing or a current media product has the critical mass required for profitable advertiser metrics. Students will be exposed to developing new media usage patterns, cross platform media support strategies, new models of entertainment and news gathering, and corporate media acquisitions and mergers. Local media executives, and entrepreneurs will be invited to class to review current trends and discuss strategies for success.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MKT 403. Marketing Management. 3 Credit Hours.
Marketing Management is a capstone course that examines new concepts and insights regarding marketing management. Through case analysis the course covers important aspects of marketing management. The students also participate in a simulation in which they manage multi-segment markets.
Prerequisite: MKT 201 or MKT 301 and FIN 302 and MKT 302 or Corequisite: MKT 302 and Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 469. International Marketing Management. 3 Credit Hours.
International Marketing Management is a capstone course that examines new concepts and insights regarding international marketing management. Through case analysis the course covers important aspects of international marketing management. The students also participate in a simulation in which they manage multi-country markets.
Prerequisite: MKT 360 and MKT 302 or Corequisite: MKT 302.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 496. Directed Studies in Marketing. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Requisite: Business School.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 497. Directed Studies in Marketing. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Requisite: Business School.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 498. Special Topics in Marketing. 3 Credit Hours.
Special topics in selected non-STEM areas of Marketing.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 499. Special Topics in Marketing. 3 Credit Hours.
Special topics in selected STEM areas of Marketing.
Prerequisite: MKT 201 or MKT 301.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 555. Marketing Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Marketing.
Components: THI.
Grading: SUS.
Typically Offered: Spring.

B.B.A. in Marketing

Overview
Major Area of Specialization in Marketing (People & Society)

The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective. Additionally, the marketing program of study is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.
## Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Marketing must complete the BBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

<table>
<thead>
<tr>

Total Credit Hours 120

1. **NOTE**: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. In order to pursue a major area of specialization in Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of B- does not qualify).

5. All specific coursework for the major area of specialization in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301 as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA. All courses must be completed within the current pre-requisite structure.

6. MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher. Students may not take both MKT 201 and MKT 301.

**Sample Plan of Study**

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Mission

• To develop innovative ideas and principled leaders that transform global business and society.

Goals

A program of study in marketing offers business students a comprehensive understanding of such topics as:

• Marketing’s critical role within organizations;

• Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;

• The nature of global competition and identification of viable competitive strategies;

• Methods used in planning and implementing marketing strategies.

Student Learning Outcomes

• BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.

• BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.

• BBA/BSBA graduates will demonstrate professional written communication skills.

B.S.B.A. in Marketing

Overview

Major Area of Specialization in Marketing (STEM)

Marketing is the main area of business that is transforming because of the emergence of social media platforms and analytical techniques such as text mining. To succeed as marketing professionals, future marketers will need to know not only the time-tested marketing fundamentals but also how to effectively deploy these modern technologies and tools. This major area of specialization prepares students to practice marketing in this changing environment. Besides covering the 4Ps this program will cover areas such as Marketing Analytics, Cases in Marketing Analytics, Artificial Intelligence in Marketing, Text Analytics, Brand Content Management and Digital Media Metrics.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Marketing must complete the BSBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

<table>

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student’s plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Herbert Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.
Goals
A program of study in marketing offers business students a comprehensive understanding of such topics as:

- Marketing’s critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies.

Student Learning Outcomes
- BBA/BSBA graduates will be critical thinkers, able to select and apply appropriate models, tools, and techniques, and frameworks to enable them to render analytically sound business decisions.
- BBA/BSBA graduates will be able to identify, analyze and resolve ethical issues in business scenarios.
- BBA/BSBA graduates will demonstrate professional written communication skills.
- BSBA graduates will have strong technical skills.

Minor in Marketing for Business Students
Overview
Minor Area of Specialization in Marketing for Business Students (People & Society)

The 15-credit-hour minor in Marketing for Miami Herbert Business School students consists of 9 credit hours of Marketing courses beyond the required courses MKT 201/MKT 301 and MKT 302.

Choice Courses for the Minor
Select three courses (9 credit hours) from the Department of Marketing 3

Total Credit Hours 15

1 Important Note: In order to pursue the minor in Marketing, a student must earn a grade of “B” (grade point average of 3.0) or higher in MKT 201/MKT 301 (note that a grade of “B-” does not qualify).

2 MKT 201 is intended for freshman business students. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher. Students may not take both MKT 201 and MKT 301.

3 All courses must be taken within the current pre-requisite structure. At most, one course (3 credit hours) identified as STEM may be selected from the available choice courses.

* Note: All specific coursework for the minor in Marketing must be completed with a grade of “C-” or higher (except for the minimum “B” grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

Minor in Marketing for Non-Business Students
Overview
Minor Area of Specialization in Marketing for Non-Business Students (People & Society)

Non-Business students in any school or college may pursue a minor in Marketing. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Marketing is acceptable. If so, neither advice nor consent from either the Office of
Undergraduate Business Education or the Marketing Department is necessary for a student to choose or complete a Marketing minor. Instead the non-business student should simply declare the minor and complete the required 15 credit hours of Marketing courses.

Choice Courses for the Minor

Select four courses (12 credit hours) from the Department of Marketing.

Total Credit Hours: 15

1 **Important Note:** In order to pursue the minor in Marketing, a student must earn a grade of "B" (grade point average of 3.0) or higher in MKT 301 (note that a grade of "B-" does not qualify).

2 All courses must be taken within the current pre-requisite structure. At most, two courses (6 credit hours) identified as STEM may be selected from the available choice courses.

* **Note:** All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

---

**Communication**

http://www.com.miami.edu/

**Introduction**

The School of Communication houses five departments that offer courses in nine majors leading to the Bachelor of Science in Communication degree. The departments are: Cinematic Arts (Motion Pictures), Communication Studies (Communication Studies), Interactive Media (Interactive Media), Journalism and Media Management (Broadcast Journalism, Electronic Media, Journalism, Media Management), and Strategic Communication (Advertising, Public Relations). In addition, the Master of Arts, the Master of Science, Master of Fine Arts, and Doctor of Philosophy degrees are offered in the School.

Students engage with a diverse faculty of communication scholars, artists and professionals in a variety of hands-on learning experiences embracing research, writing, production, creative problem-solving and multimedia storytelling. On-campus television and radio facilities, soundstages and multimedia labs are available for academic and extra curricular student projects. Students utilize contemporary digital imaging technology and learn skills that cut across a variety of media platforms. Digital editing, recording and mixing facilities are available. New media technology is incorporated throughout the curriculum and the School has numerous computer labs and digitally "smart" classrooms.

The School houses a film soundstage and two fully digital, high-definition television studios and state of the art control rooms. Two video-conference centers with broadcast-quality interactive capability for remote interviews and programming support the School's mission. In addition, a fiber-optic linked studio allows for real-time, broadcast-quality transmissions to sites around the world. Under Communication faculty supervision, student-produced programming is distributed through the University's cable facility and carried throughout the community by the local cable operator and is available through online streaming. The School operates several online sites that afford students outlets for multimedia, interactive and cross-platform writing, research, reporting and creative work.

The University's FM radio station, and student online and print newspapers and magazines, offer additional opportunities for career development. The Bill Cosford Cinema, a 240-seat movie theatre, supports the Motion Picture Program and offers film programming for the Miami community. The School's Norton Herrick Center for Motion Picture Studies is dedicated to research into the history and aesthetics of motion pictures and their social and cultural impact.

The School's Center for Communication, Culture, and Change focuses on promoting positive social and behavioral change through communication research. The Center seeks to address urgent social issues, and make a positive difference in people's lives.

The Koenigsberg & Nadal Interactive Media Center facilitates collaborative education for School of Communication students. With the latest technology seamlessly integrated into a flexible co-working space, students in the Interactive Media Center can easily work together and share their knowledge with one another. Whether students are using the dry erase walls to strategize a research project or touch-screen monitor to showcase their creative concepts to a client, the Interactive Media Center provides a student-driven and innovative experiential learning ecosystem unique to the School of Communication. In this space, groundbreaking ideas are born and innovative visions are able to come to life across all disciplines.

The School supports student chapters of the American Advertising Association, the Public Relations Society of America, the Society of Professional Journalists, the National Broadcasting Society, the University Film and Video Association and other professional organizations. In addition, the School sponsors a nationally competitive intercollegiate debate team, which annually produces several members of the All American Debate Team.
Internships in professional settings are available to Communication students at the sophomore, junior and senior levels. Professionals at daily and weekly newspapers, magazines, news bureaus, cable systems, radio and television stations and networks, production houses and motion picture studios cooperate in faculty-supervised internships. Executives of city and county governments, advertising agencies, public relations firms and other business and nonprofit organizations join in providing internship opportunities. The Stein Family Office of Career Services and Internships assists students seeking internships and offers career planning services. Summer and semester-length study abroad opportunities are also available.

Mission
The School of Communication is dedicated to a global educational perspective and is committed to providing a socially responsible and ethically grounded learning environment guided by a diverse faculty of scholars, artists and professionals. The School is committed to quality undergraduate and graduate programs in communication that emphasize the relationship between theory and practice. We believe in freedom of expression and creativity, and encourage both collaboration and independent thinking as we prepare future scholars, professionals and leaders for a lifetime of service and learning.

Accreditation
The University of Miami is accredited by:

The Southern Association of Colleges and Schools
1866 Southern Lane
Decatur, GA 30033-4097

Academic Policies

Internal Transfer into the School of Communication
A student enrolled at the University of Miami in a School or College other than the School of Communication may apply for admission into the School. Applications are accepted throughout the year. A minimum overall grade point average of 2.5 is necessary for consideration. Applications are available in the Admissions, Academic & Alumni Services Office of the School of Communication (2037 Wolfson Building) and must be submitted prior to the end of each semester. Admission decisions will be made promptly after semester grades are final. Students will be notified in writing of the School's decision.

Transfer Students
A transfer student must complete in residence a minimum of 18 credit hours toward a Communication major or a minimum of 9 credit hours toward a Communication minor. Courses taken elsewhere in Communication or related disciplines are not automatically accepted toward a major or minor at the University of Miami. Students who have obtained the written approval of the appropriate department chair to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major. Students should consult a School of Communication advisor to determine whether the transfer of Communication courses will increase beyond 120 the total number of credit hours required for a degree. In general, transfer credit hours will not be accepted to satisfy requirements for any course in any major or minor at the 300-level or above. Student petitions to transfer credit hours will be considered on an individual basis.

Transfer credit hours may not be used to satisfy requirements for any major or minor in Communication without the written approval of the Chair of the program concerned.

Academic Progress & Probation/Dismissal
Students must maintain a grade point average (GPA) of 2.5 or higher in courses taken in residence and submitted for their School of Communication major. Following the first semester in which any student's GPA in the major falls below a 2.5, the School may issue a warning to that student that his or her work does not meet School expectations. Should that student's GPA in the major be below a 2.5 in any subsequent semester, he or she may be placed on Academic Probation. The School may dismiss from the University any student who is on probation a total of two semesters (not necessarily consecutive). A student who has been dismissed from the School may apply for admission to one of the other Schools or Colleges within the University, but will not be readmitted to the School of Communication.

Those who wish to appeal their probation or dismissal must do so in writing to the Dean within 30 days of the notice of probation or dismissal.

Internship Credit Hours
All programs allow students to complete multiple internships for academic credit. Students should consult with their faculty advisor or the School's academic advising office for their department's specific internship credit hour policies.

Credit Hours and Advanced Placement Credit
Credit hours may be earned through Advanced Placement, IB, CLEP Examinations and Advanced Placement by Proficiency Examinations. These credit hours may be applied to the appropriate General Education Required Areas of Study or as electives except:

1. where prohibited by the University or a specific program area; or
2. if the course is remedial (e.g., ENG 103, MTH 099).
To earn credit hours, each student must pay a recording fee and have exempted course credit hours entered on his or her University transcript. An exemption may be granted for ENG 105 by the Department of English, but this exemption will not earn credit hours toward the 120 University credit hours required for graduation.

Grade Point Average
A candidate for the Bachelor of Science in Communication (B.S.C.) must complete the credit hours and achieve the grade point average specified for students in the University at large as stated in the section titled ACADEMIC PROCEDURES AND INFORMATION, subject to additional requirements specified in School and Program sections.

General Education Requirements
In April 2012, the University of Miami Faculty Senate adopted a new set of General Education Requirements (GERs). The new Cognate Program of General Education was implemented in the 2013-2014 academic year (AY 2014).

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

See GENERAL EDUCATIONAL REQUIREMENTS.

Degree Programs
The School of Communication offers courses in nine programs of study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Communication Studies, Electronic Media, Broadcast Journalism, Journalism, Media Management, Interactive Media, and Motion Pictures.

Minors
The School of Communication offers minors in its nine programs of study and a general minor in Communication (COM). School of Communication students may complete a minor in a specific program of study, but are not eligible for the general minor in Communication.

Concentrations
Most degree programs offer concentrations or tracks of study in specialty areas. See the individual program sections for details on these concentrations.

Requirements for Graduation with a Bachelor of Science Degree in Communication

Required University General Education Requirements
The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently. The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor.

All School of Communication students must complete the University’s General Education Requirements. These requirements can be found in the General Education Requirements section. Note that the General Education Requirements differ for incoming freshmen and transfer students.

Completion of each School of Communication major or minor fulfills one of the three cognate areas required by the University: People & Society, Arts & Humanities and STEM. (See individual program descriptions below identifying the specific cognate area covered.)

Students completing a second major or minor in the School which fulfills a cognate area different from their first major, and offered in a different department, may apply the second major or minor toward a second cognate area. No course submitted toward a School of Communication major or minor used to fulfill a University cognate may be applied toward any other cognate area. No more than two cognate areas may be completed in the School of Communication.

Students should meet with their advisors for assistance in completing all University and School requirements.

Developing Proficiency in Advanced Writing and Communication Skills
By their nature, Schools of Communication aspire to help students understand communication processes and develop high-level skills in writing, oral presentation and the use of digital communication technologies for crafting meaningful and effective messages. To fulfill the University’s Advanced Writing and Communication Skills requirement, all students enrolled in one of the eight undergraduate majors offered by the School will be required to complete their program’s core writing course, at least one public speaking/presentational skills course, and one digital skills course.

Major/Minor Requirements
In addition to completing a major in the School of Communication, students must also complete a minor (or a second major) in either a second Program of Study within the School or in an academic program outside of the School. Students completing majors and/or minors in the School must
complete all School of Communication courses with grades of C or higher (a grade of C- or lower is not acceptable.) Students may not enroll in a School of Communication course without grades of C or higher in prerequisite courses. Students completing a minor or second major outside the School of Communication should consult this Bulletin for minimum grade requirements.

The Major in the School of Communication

Majors in the School of Communication leading to a Bachelor of Science in Communication require between 36 and 42 credit hours in School of Communication courses specified in Program Statements (below). Courses within each major must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) In addition, students must maintain a grade point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication majors.

The Minor

Each Communication student, in addition to completing requirements for a Communication major, must complete a minor field in either a second Program of Study within the School or in an academic program outside the School. Each course submitted for a minor offered in the School of Communication must be completed with a grade of C or higher (a grade of C- or lower is not acceptable). To find the requirements for a given minor, students should consult this Bulletin and confer with the appropriate department representative.

School of Communication advisors will aid students in identifying appropriate minors. The candidate for a Communication degree may choose from among any of the disciplines offering minors at the University for which they may qualify. The choice of a minor should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

The Second Major Option

Students may choose to complete a second major, either within the School or in an academic program outside the School, in place of the minor requirement. Some second majors are impractical within the minimum 120 credit hours degree program. Students should consult with a Communication advisor before selecting a second major. The choice of a second major should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

Double Counting

Students completing a major and a minor in the School of Communication, or two majors within the School of Communication, may count only COM 250 toward both Programs of Study. No other course duplication is allowed. Students should consult with the Department Chair of the minor or second major for acceptable course substitutions where appropriate.

Upper Division Credit Hours

In earning a Bachelor of Science in Communication, each School of Communication student must complete a minimum of 36 credit hours of course work at the 300-level or above. Upper division transfer credit hours also apply if completed at a four-year institution and if approved by the Department Chair.

Electives

Only Free Elective courses may be taken under the University’s Credit Only option. Free Electives are defined as courses not taken to fulfill the requirements of the major within the School of Communication, of the second major or minor, or of the School’s General Education Requirements. Free Electives are courses that are not taken to meet any of the above requirements or their prerequisites, but taken solely to meet the requirement of a minimum total of 120 credit hours for the degree.

General Electives

A sufficient number of University electives must be completed to fulfill a minimum total of 120 credit hours. Electives may be chosen from any course offered by the University except certain unapproved courses such as:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>DAN 102</td>
<td>Stretching and Body Work</td>
<td>1</td>
</tr>
<tr>
<td>ENG 103</td>
<td>Basic Academic Writing</td>
<td>3</td>
</tr>
<tr>
<td>MTH 099</td>
<td>Intermediate Algebra</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>UMI Toppel Internship at any level</td>
<td>1</td>
</tr>
</tbody>
</table>

Students should consult a School of Communication advisor before selecting elective courses. Because specific courses are required in some School of Communication majors, students are advised to read Program Statements carefully and seek the advice of a School of Communication advisor prior to taking general University electives.

Schedules

Fifteen to sixteen credit hours constitute a normal semester schedule in the School of Communication. Students who wish to register for more than 18 credit hours must obtain prior approval from the Office of Admissions, Academic & Alumni Services (2037 Wolfson Building). Students who are on academic probation will be limited to a maximum of 13 credit hours.
Honors

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students must contact the School’s Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details about the School of Communication Honors Program.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under graduation honors.

General Information

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad. At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows in the School of Communication

The School of Communication hosts several activities geared for our Foote Fellows throughout the academic year. School of Communication Foote Fellows will be receiving information from Assistant Dean Luis Herrera regarding our specific programs. For further inquires, please contact him at lherrera@miami.edu.

SCHOOL OF COMMUNICATION HONORS PROGRAM

Admission to the School’s Honors Program is contingent upon admission to the Communication Honors Program as an incoming freshman. Transfer or continuing students may apply for admission to the School of Communication Honors Program after completion of their first full semester at UM. Admission into the School of Communication Honors Program is contingent upon:

1. a freshman student admitted in the fall semester attaining at least a 3.5 overall grade point average and a 3.75 cumulative grade point average in all School of Communication classes, or

2. a transfer student with at least a 3.5 overall grade point average at his or her previous school and a 3.75 grade point average in School of Communication classes.

Continuation in the School’s Honors Program is contingent upon satisfying the criteria set forth below over the student’s academic career. Students enrolled in the School of Communication Honors Program may choose from two academic paths: (1) an individualized major in communication created in consultation with the School’s Director of Honors or, (2) a concentrated major in one of the School’s programs of study.

Students admitted to the School of Communication Honors Program must maintain a minimum 3.5 grade point average in all university coursework and a minimum 3.6 cumulative grade point average in all School of Communication Honors Program classes (at least 15 credits of such course work must be completed). All Honors students must complete the following Honors-designated courses with grades of “B” or higher (grades of “B-” will not be acceptable):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM 101</td>
<td>Mass Media Communication in Society (or approved alternate for transfer honors students)</td>
<td>3</td>
</tr>
<tr>
<td>COM 250</td>
<td>Freedom of Expression and Communication Ethics</td>
<td>3</td>
</tr>
<tr>
<td>COM 395</td>
<td>Honors Seminar in Communication</td>
<td>3</td>
</tr>
</tbody>
</table>
All School Honors students must have worked out by the end of their second semester of UM enrollment a plan of studies, under the direction of the School's Director of Honors.

In conducting a Senior Honors Project/Thesis the student, under the direction of an approved faculty mentor, will produce an original communication thesis/project. This project may take the form of original research, a theoretical examination of communication phenomena, a film or motion picture script, a radio or video drama or documentary, a teleplay, or a visual communication project incorporating web interactive design, photography, and multi-media.

Inquiries regarding the School of Communication Honors Program should be made through the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building).

**Minor in Communication**

A student seeking a minor in the general area of Communication must complete 15 credit hours, at least six of which must be at the 300-level or above.

- Students in the School of Communication cannot minor in Communication.
- Courses for this minor must be taken from the departments of Cinematic Arts, Communication Studies, Interactive Media, Journalism and Media Management and Strategic Communication. Course prefixes include: CCA, CIM, COM, COS, JMM and STC.
- Each course taken for a Communication minor must be completed with a grade of C or higher (a grade of C- or lower is not acceptable).
- At least 9 credit hours towards the minor must be completed at UM.

Total Credit Hours: 15

1. STC 200 requires STC 114, STC 201 requires STC 116 and STC 202 requires STC 102. These courses cannot be taken concurrently. Any exceptions must be made by the STC Department Chair.

2. Please consult each department's bulletin listing for course requirements. No exceptions, substitutions or waivers will be given if student does not meet requirements for a course.

3. Most 300 level or above Communication courses require at least junior standing and one or more of the following survey courses: CCA 103, CCA 126, CCA 151, COS 220, JMM 102, JMM 108, STC 102, STC 114, or STC 116. Please consult the Bulletin for course prerequisites.

### Cinematic Arts

http://com.miami.edu/programs

The Department of Cinematic Arts offers a major and minor in Motion Pictures.

A Motion Pictures major selects from the following tracks: Business, Critical Studies, General, Production, or Screenwriting.

The Department of Cinematic Arts prepares the next generation of storytellers, innovators, filmmakers, researchers, and entrepreneurs for the abundance of opportunities in world of film, digital media, television and emerging technologies.

**Design:**

The curriculum offered by the Department of Cinematic Arts is designed to enable you to customize your education, within a learning environment that is collaborative and conducive to the pursuit, development, and exchange of ideas and information. It provides students with the training necessary to succeed in a range of careers defined by a rapidly changing media landscape, and equips them to best leverage innovations in the field.

**Goals of the Program are:**
- To furnish students with the technical and practical skills needed to make them career-ready through hands-on learning, problem-solving based inquiry, and advanced study.

- To nurture the individual talent, creativity, and discovery process of every student by fostering principles of collaboration, professionalism, and intellectual curiosity.

- To support the educational process through mentoring and advising by renowned faculty and seasoned professionals.

- To encourage students to integrate theory and practice, to cultivate the capacity to think critically, and to connect technology and art and/or design.

- To familiarize students with theoretical, historical, and cultural approaches and expose them to a range of traditions within the field of study.

- To provide access to state-of-the-art facilities, the most technologically advanced tools, and the latest technology.

- To continue to build on our reputation as a place of innovation and interdisciplinarity, as we educate students according to the highest professional and ethical standards.

**Major Cognate Area**

- Motion Pictures - Arts and Humanities

**Minor Cognate Area**

- Motion Pictures - Arts and Humanities

**Dept. Code: CCA**

**Requirements for the Major in Motion Pictures**

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. Motion Pictures major must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Before admission as a Motion Pictures (CMPT) major a student must:

- Complete the Core courses in residence at the University, all with grades of C or higher (C- is not acceptable). Students who have obtained the written approval of the Chair of Cinematic Arts to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.

- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

**Opportunities**

As a major or minor in the CCA department, many opportunities await you, including access to the following facilities and equipment: digital cameras; grip and electrical equipment; a soundstage; digital post-production image and sound facilities; a digital animation studio; a VR Lab and Design Lab (NERDLab).

The department offers a Semester in Los Angeles Program each spring and regularly hosts summer study abroad in such locations as Paris, Amsterdam, Spain, Greece, and Prague (FAMU).

In addition to the chance to work on student projects, there is an array of extracurricular activities in the School of Communication, including the award-winning cable channel UMTV and Delta Kappa Alpha, the National Professional Co-Ed Cinematic Arts Fraternity.

The Bill Cosford Cinema, a state-of-the-art movie theater exhibits first-run alternative, foreign and classic films and hosts guest filmmakers and special events throughout the year. The Cosford Cinema serves as a venue for local film festivals as well as the annual Canes Film Festival featuring UM undergraduate and graduate work.

Students have the opportunity to compete in the UM Canes Film Festival to earn the chance to take their work to a professional showcase screening, held annually in Los Angeles.

**Majors in Cinematic Arts**

- B.S.C. in Motion Pictures (p. 877)
Minors in Cinematic Arts

- Motion Pictures (p. 892)

CCA 103. Survey of Motion Pictures. 3 Credit Hours.
Examination of the aesthetic, social, and economic aspects of the motion picture industry. Concentration on the present state of the medium with particular emphasis on future trends.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 113. Documentary Approaches. 3 Credit Hours.
Students will explore the varied forms and narrative approaches used in contemporary documentary filmmaking to understand the position of the filmmaker as a storyteller.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 126. Introduction to Screenwriting. 3 Credit Hours.
Creation and formatting of narrative material for motion pictures. Emphasis on writing the short film.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 151. Introduction to Digital Filmmaking. 3 Credit Hours.
Lectures and laboratory work to acquaint the student with the basic techniques of motion pictures. Students make short films using digital equipment to develop an understanding of the motion picture as a creative tool of communication and expression.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 206. History of International Cinema. 3 Credit Hours.
This course is an examination of the origin and history of the motion picture. Narrative and non-fiction genres, in the American and World Cinemas, from 1890 to the present are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 251. Motion Picture Workshop: Storytelling. 3 Credit Hours.
The practice of the grammar of cinematic language including shot selection, composition, pacing, story clarity, performance, pre-visualization and pre-planning for the creation of short narrative projects. Through critiques, students encounter and interact with an audience of their peers. This course requires students to master contemporary technology in use in the profession.
Prerequisite: CCA 103 and CCA 151.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 294. Special Topics in Cinematic Arts. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 326. Intermediate Screenwriting. 3 Credit Hours.
Study of, and practice in, writing feature length, narrative motion pictures. Development of story line in treatment form, attention to cinematic structure, the development of character, and its presentation on screen is discussed.
Prerequisite: CCA 126.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 329. Writing for Series Television. 3 Credit Hours.
An introduction to the structures and techniques of writing situation-comedy and dramatic series television.
Prerequisite: CCA 126.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CCA 351. Intermediate Filmmaking. 3 Credit Hours.
This course is an introduction to intermediate level techniques and methodologies for digital production of all contemporary media genres including narrative, documentary, experimental and music performance. Students will work in crews, collaboratively, with specific assigned roles throughout the production work flow.
Prerequisite: CCA 206 and CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 353. Post Production Sound Editing and Design. 3 Credit Hours.
Post production sound editing and design is a seminar/workshop that provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course explores the process from production recording through the final mix.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 355. Essentials of Documentary Film. 3 Credit Hours.
This course is designed to teach students how to tell compelling cinematic documentary stories with a clear and effective point-of-view. We will compare and analyze various styles of documentary storytelling and use these methods in creating effective documentaries films. An emphasis will be put on the various styles of documentary filmmaking.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 356. Cinematography. 3 Credit Hours.
An overview of the cinematographer's process from script to screen. Working with camera, lighting, and grip equipment on exercises and projects is discussed.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 357. Editing. 3 Credit Hours.
Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students' understanding of aesthetic, and technical considerations in the art of dramatic editing.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 364. Business of Motion Pictures. 3 Credit Hours.
Students will get an overview of how content is created and who the players are. They will practice synthesizing information and translating it into a strategic plan for a business or individual career path in the entertainment industry.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 386. Online Screenwriting. 3 Credit Hours.
This is an online course on screenwriting. Students will learn to analyze films through the lens of genres, including Drama, Comedy, Horror, Romance, Sci-Fi, and Coming of Age, to write scripts, and to critique genre conceits of assigned films.
Prerequisite: CCA 126.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 394. Special Topics in Cinematic Arts. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CCA 395. Directing Techniques I. 3 Credit Hours.
To teach the craft of directing through exercises, screen work, and readings.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 401. Nonfiction Film and Digital Media. 3 Credit Hours.
An examination of American and world nonfiction films and media.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 402. Global Issues and Filmmaking: An Interdisciplinary Approach. 3 Credit Hours.
A trans-disciplinary approach to study and analyze a variety of complex global Issues such as climate change, human security, globalization, and rise of nationalism while gaining hands-on experience to develop short analytical documentary films about such topics. Prior film-making experience is NOT required
Requisite: Permission of Instructor.
Components: HRK.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 403. Film Directors. 3 Credit Hours.
The study of the film authorship through a focus on specific directors.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 404. Aspects of Contemporary Cinema. 3 Credit Hours.
Study of contemporary movements in American and world cinemas.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 405. Representations of Sport in Popular Culture. 3 Credit Hours.
This course presents approaches to understanding and contextualizing representations of sports in cinema, television, and digital media. Students gain valuable skills in critical thinking, analysis, and evaluation as they learn to reflect on the various ways sports are portrayed in selected media and popular culture.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 406. Genres. 3 Credit Hours.
Study of selected genres from a variety of critical perspectives. Issues pertaining to methodologies of defining and categorizing film are discussed.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 407. National Cinemas. 3 Credit Hours.
Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social, political and cultural contexts.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CCA 408. Women, Media, and Popular Culture. 3 Credit Hours.
Examination of film, media, and gender representation from the perspective of feminist theory and cultural studies. Students explore the many ways that women have been portrayed, and how they have portrayed themselves, within popular culture.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 409. Legal Aspects of Motion Pictures. 3 Credit Hours.
The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 426. Advanced Screenwriting. 3 Credit Hours.
A continuation of CIM 326. Study of, and practice in, writing feature length, narrative motion picture scripts. Attention is given to cinematic structure, the development of character, and its presentation on screen. Emphasis is placed on bringing the script to a completed draft.
Prerequisite: CCA 326.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 429. Advanced Television Writing. 3 Credit Hours.
This course explores how to create, format, and write the original Television Pilot and treatment. The class will cover TV pilot format, length, structure as well as techniques in creating TV characters and situations for both comedy and dramatic episodic TV.
Prerequisite: CCA 329.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 451. Advanced Filmmaking Workshop. 3 Credit Hours.
The theory and practice of motion pictures production from script to screen. Lecture and laboratory. Students will develop and produce a narrative, a documentary, or an experimental work of their choice.
Prerequisite: CCA 351.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 455. Science Documentary: Autism. 3 Credit Hours.
This course brings together student citizens across science, communication, and education to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder. In addition to learning the neuroscience and genetics that underlie autism spectrum disorders, students will connect with people in the local community - to lend these issues a face and context. Students will gather information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 456. Advanced Cinematography. 3 Credit Hours.
Advanced work with camera, lighting, and grip equipment on exercises and projects.
Prerequisite: CCA 356.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 457. Advanced Editing. 3 Credit Hours.
Advanced concepts in aesthetics and theories of picture and sound editing, mixing, color correction, and finishing techniques.
Prerequisite: CCA 357.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 458. Documentary Production. 3 Credit Hours.
Students produce two short digital documentaries and explore various approaches to the documentary film.
Prerequisite: CCA 151.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

CCA 462. Motion Picture Marketing and Distribution. 3 Credit Hours.
Economic and marketing considerations in the production and distribution of motion pictures.
Prerequisite: CCA 364.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

CCA 465. Creative Producing. 3 Credit Hours.
Students will discover what their creative voice is as a producer; sharpen their communication skills (networking, pitching, coverage & notes); and will learn the nuts and bolts of what a producer does.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

CCA 469. Motion Picture Internship. 1-3 Credit Hours.
The internship is designed to provide valuable career-related work experience in a real-world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid.
**Components:** IND.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

CCA 489. Projects in Screenwriting. 1-3 Credit Hours.
Individual study. This course and CIM 499 cannot count for more than three credits towards a Communication major or minor.
**Components:** THI.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

CCA 494. Special Topics in Cinematic Arts. 3 Credit Hours.
Prescribed study and supervised work with practitioners in motion pictures.
Requisite: Sophmore Status And Cumulative GPA 2.5.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

CCA 499. Projects and Directed Research. 1-3 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
**Components:** THI.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

CCA 501. Principles of Aesthetics and Analysis. 3 Credit Hours.
Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

CCA 510. Foundation of Screenwriting. 3 Credit Hours.
This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.
Prerequisite: CCA 126.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.
CCA 511. Writing the Short Film. 3 Credit Hours.
A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character. Prerequisite: CCA 510.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 514. Motion Picture Studio. 3 Credit Hours.
This course allows students the time to enhance and exhibit their knowledge and skills in Motion Picture. Students will fine-tune their final film projects, polishing their final cuts for film festival submission to film festivals and professional consideration. Motion Picture Major and Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 518. Seminar in Documentary Film History: Cinéma-vérité. 3 Credit Hours.
The primary focus of this course will be on the half-century old school or tradition of documentary filmmaking associated with the terms "Cinéma-vérité" and "direct cinema". Through close analysis of selected classic and contemporary documentaries, the class will explore their historical significance, their aspirations and achievements as films, and their ways of addressing the aesthetic, epistemological, political and moral issues that inevitably arise when filmmakers take their sync-sound camera into the world and undertake to film life as it is really lived.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 519. Seminar in Documentary Production. 3 Credit Hours.
The Seminar in Documentary Production is the capstone production class within the documentary track of the Cinema and Interactive Media Department. Students are entered into the course based on a proposal that outlines their documentary project.
Prerequisite: CCA 458 Or JMM 541.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 523. Advanced 3D Character Design and Motion Capture. 3 Credit Hours.
This course covers the 3D game art development pipeline from modeling, texturing, rigging and animation to motion capture, and special effects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 526. Adaptation. 3 Credit Hours.
This course will examine the craft and techniques of adapting sources such as novels, short stories, plays, articles, comic books, Shakespeare to the screen.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 529. Nonfiction Film. 3 Credit Hours.
An examination of American and world nonfiction films.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 550. Motion Graphics and Compositing. 3 Credit Hours.
Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design, and green screen. Prerequisite: CCA 206.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 551. Advanced Motion Graphics and Compositing. 3 Credit Hours.
Extend the 2D skills of students who have taken CIM 550 to 3D motion graphics and animation. Emphasis on title design and animation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 553. Advanced Motion Picture Marketing and Distribution. 3 Credit Hours.
Advanced marketing considerations in the distribution of motion pictures.
Prerequisite: CCA 462.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 560. Directing the Actor. 3 Credit Hours.
The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal: to train students to articulate their ideas to actors and film crew.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 566. Character and Dialogue. 3 Credit Hours.
An examination of the craft and techniques of creating original characters and dialogue.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 594. Special Topics in Cinematic Arts. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 595. Directing Techniques II. 3 Credit Hours.
To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

B.S.C. in Motion Pictures

Overview
The Department of Cinematic Arts offers a major in Motion Pictures.

A Motion Pictures major selects from the following tracks: Business, Critical Studies, General, Production, or Screenwriting.

The business track is intended for students interested in media industries, this track offers an in-depth view from a decision-making perspective. You will learn how content is made, while attaining advanced business skills in many aspects from traditional movie outlets to new distribution opportunities, defined by multi-platforms and omni-channels.

You will discover motives, tactics and tools for content creation as well as strategies for choosing which platform best serves a particular story. This track is an excellent choice for students who strive to think critically about the environment the industry operates in and how it can inform your own business strategy.

You will be encouraged to develop your individual talent in a nurturing and collaborative environment, where you begin learning through practical, problem-solving based classes from your first semester on.

Internships, extra-curricular organizations, guest master classes, CCA project-based, study-abroad programs and the Semester in Los Angeles Program, give you ample opportunity to further your education in business outside of the classroom.

The critical studies track is for students excited by the study of film and media, and offers the opportunity to consider a wide range of perspectives on culturally, historically, and artistically significant works. You will engage with the aesthetic, political, and moral issues that inevitably arise when closely looking at examples, while broadening your horizons as you learn about the contexts in which they were produced.

You will cultivate analytical, conceptual, communication, and writing skills and gain research tools, all of which provide a strong foundation for media-related fields. Students in the Critical Studies track may go on to pursue graduate study. They are also well-positioned to choose creative careers or work in the media industry.

The general track gives students flexibility and range as well as depth of focus. This track offers a unique edge in today’s expanding technological landscape, providing breadth, versatility, and the advanced skills that will position you to succeed in a number of media careers.
Students select a primary specialization from one of the following areas: production, screenwriting, business, documentary, graphics and animation, or critical studies. Students choose an additional six credits of electives. It is recommended, though not required, that these six electives be chosen from a single area creating a secondary specialization.

Some students prefer not to check just one box as they go along their academic journey. The general track appeals to students who like to step out of the box and customize the cinema major to their individual goals.

The production track is intended for students interested in intensive production, this track offers advanced technical skills in directing, cinematography, editing, sound, documentary, immersive storytelling, graphics and animation. You will learn about all stages of the creative process from writing and development, through production and post-production, to all forms of exhibition.

You will be encouraged to develop your individual talent and personal expression in a nurturing and collaborative environment, where you start making films in your first semester and participate in hands-on learning throughout the program.

Internships, extra-curricular organizations, guest master classes, CCA production-based, study-abroad programs and the Semester in Los Angeles Program, give you ample opportunity to further your education in production outside of the classroom.

The screenwriting track is intended for students interested in intensive scriptwriting, this track provides advanced skills in writing for film and series television. You will gain a familiarity with all stages of the creative process for film and TV (from writing and development, through production and post-production, to exhibition). You will attain advanced writing skills and techniques, such as story development, characterization, structure, and dialogue while acquiring extensive knowledge about the business of scriptwriting (including the submission process, agents, financing, television writers’ rooms, etc.).

You will be encouraged to develop your individual talent and personal expression in a nurturing and collaborative environment, where you start writing scripts in your first semester and continue with practical, applied learning throughout the program.

Internships, extra-curricular organizations, guest master classes, CCA project-based, study-abroad programs and the Semester in Los Angeles Program, give you ample opportunity to further your education in writing outside of the classroom.

</table>

1. Students may only take CCA 462 or JMM 434. Both courses will not count for the major.
2. If these electives are outside the Motion Pictures major (but within the School of Communication) they must be approved by the chair.
3. Majors cannot double count courses without approval from faculty advisor and/or department chair. CCA 499 and CCA 594 should be selected in consultation with faculty advisor.
4. Only a maximum of 9 combined credits of internship and/or independent study can be applied towards the major.
School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.

School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, University Cognates (http://www.miami.edu/cognates/) and the Advanced Writing and Communication Skills Proficiency requirement.

**Upper Level Elective Requirement**

36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

- CCA 403 | Film Directors | 3 |
Mission

The B.S.C. in Motion Pictures focuses on media creation with an emphasis on combining advanced technical proficiency with innovative narrative skills. Students gain practical and theoretical mastery of their particular professional concentration in screenwriting, production, post-production, and producing. Additionally, all students engage in critical studies of film history and theory in order to develop the analytical skills that support creative experimentation.
Goals
The Program's objective is to nurture individual creative voices and encourage independent thinking, as well as to support the unique collaborative process of media creation. Graduates are prepared to pursue careers as professional moving image artists, enter the teaching profession, provide service to the community and beyond, and enter cinematic arts related professional fields.

Student Learning Outcomes
- Students will demonstrate proficiency in screenwriting, including mastery of script formatting, narrative storytelling skills, character development, and dramatic film structure.
- Students will demonstrate knowledge of major individual works, genres, national cinemas and movements, and their significance within the history and theory of the moving image.
- Students will demonstrate proficiency in the use of motion picture production techniques (directing, cinematography, editing and sound) and professional work ethic necessary for entry into professional practice.

Minor in Motion Pictures
Overview
The Department of Cinematic Arts offers a minor in Motion Pictures. (CMPT)

The Department of Cinematic Arts prepares the next generation of storytellers, innovators, filmmakers, researchers, and entrepreneurs for the abundance of opportunities in world of film, digital media, television and emerging technologies.

The curriculum offered by the Department of Cinematic Arts is designed to enable you to customize your education, within a learning environment that is collaborative and conducive to the pursuit, development, and exchange of ideas and information. It provides students with the training necessary to succeed in a range of careers defined by a rapidly changing media landscape, and equips them to best leverage innovations in the field.

As a minor in the CCA department, many opportunities await you, including access to the following facilities and equipment: digital cameras; grip and electrical equipment; a soundstage; digital post-production image and sound facilities; a digital animation studio; a VR Lab and Design Lab (NERDLab).

1 Journalism majors will need a permission code to enroll in courses. CCA faculty advisor will determine if the student has equivalent JMM course prerequisites before waiving or substituting requirements.
Communication Studies

http://com.miami.edu/programs

The Department of Communication Studies offers a major in Communication Studies and minors in Communication Studies (COS) and Health Communication (CHCO).

Introduction

The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, and professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete applications to particular contexts.

Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in communication, law and other areas.

Major Cognate Area

- Communication Studies
  - People and Society

Minor Cognate Area

- Communication Studies
  - People and Society
- Health Communication
  - People and Society

Degree Programs

The Bachelor of Science in Communication is offered in Communication Studies.

Major in Communication Studies

A major is offered in Communication Studies.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. Communication Studies majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Communication Studies major

Before admission as a Communication Studies (COS) major, a student must:

- Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Communication Studies to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

COS 112. Interpersonal Communication. 3 Credit Hours.
Overview of current theories of interpersonal communication. Consideration is given to impression formation, relationship between self-concept and others, function of language in social interaction, and development and maintenance of relationships.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
COS 120. Exploring Human Communication. 3 Credit Hours.
Course content focuses on behavioral science research highlighting verbal and nonverbal skills, knowledge, and abilities necessary for effective communication in a broad range of contexts, including romantic relationships, business interactions, political campaigns, health promotion, and persuading and influencing people in general.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 210. Writing for Communication Studies. 3 Credit Hours.
Principles of writing, reviewing literature, and synthesizing research for communication studies and the social sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 211. Public Speaking. 3 Credit Hours.
Introduction to effective audience communication including theory and extensive practice in oral presentations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 212. Interview Skills. 3 Credit Hours.
Study of interview skills, listening techniques, voice and diction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 220. Communication Theory. 3 Credit Hours.
Survey of basic communication theories and models. Study of processes, functions, levels, and general principles of human communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 304. Intercollegiate Debate Theory and Practice. 1 Credit Hour.
A course designed to teach students how to compete successfully in intercollegiate debate, and to reinforce training through practice and competition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

COS 311. Advanced Oral Advocacy. 3 Credit Hours.
Advanced presentational speaking to persuade including theory and extensive practice.
Prerequisite: COS 211.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 314. The Power of Dialogue. 3 Credit Hours.
Students learn how to engage in and lead constructive dialogue about sensitive, emotional, and controversial issues in the public and private spheres.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 316. Small Group Communication. 3 Credit Hours.
Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 318. Nonverbal Communication. 3 Credit Hours.
Theory and application of selected areas of research in nonverbal communication is addressed. Discussion of environment, space, body movement, posture, eye contact, facial expression, vocal cues, and physical appearance is included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
COS 324. Health Communication. 3 Credit Hours.
This course is designed to provide a broad introduction to human communication in a health-care context. Emphasis will be on issues of social support, patient-health professional/caregiver interaction, organizational culture, planning health promotion campaigns, and cultural conceptions of health and illness.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 325. Communication in Health Organization. 3 Credit Hours.
This course looks at the dyadic, small group, and institutional communication patterns that can affect health outcomes within and between health organizations including hospitals and other allied health services.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 328. Sports As Communication. 3 Credit Hours.
This is a course which introduces students to the study of spectator and participation sports as communication and to communication within sports.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 330. Conflict Management. 3 Credit Hours.
This course provides an understanding of conflict dynamics and strategies for constructive conflict management.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 333. Business Communication. 3 Credit Hours.
Study and practice in the major forms of spoken and written communication in the context of businesses and other professional organizational settings.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

COS 336. Political Communication. 3 Credit Hours.
A review of the history, strategies, theories and trends in political campaign communication in the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 343. Introduction to Intercultural Communication. 3 Credit Hours.
Introduction to communication among people from diverse cultures. Application of communication theory to intercultural sensitivity and cultural diversity is emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 351. Qualitative Research Methods. 3 Credit Hours.
Course is designed to introduce students to a sample of qualitative research methods used in communication.
Prerequisites: COM 110, COS 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 352. Critical Research in Communication. 3 Credit Hours.
This is a course in rhetorical criticism. Students will gain an understanding of rhetorical theory as it is applied to the analysis and evaluation of significant public communication events.
Prerequisites: COM 110, COS 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
COS 353. Quantitative Communication Research Methods and Analyses. 3 Credit Hours.
Introduction to communication research methods. Application of quantitative measurement techniques and statistical analyses will be discussed as well as the use of microcomputer statistical programs.
Prerequisites: COM 110, COS 210.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

COS 354. Organizing for Action. 3 Credit Hours.
Students will learn a range of communication strategies and tactics to advocate for and effect social change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 355. Applied Communication Research Methods. 3 Credit Hours.
Students learn to read and interpret quantitative and qualitative research methods. Students develop skills in basic qualitative methods (focus groups, observation) and quantitative methods (surveys, polls, comparisons, basic statistical analysis) for use in daily and professional life.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 360. Speech Writing. 3 Credit Hours.
This is a course on written speeches, speechwriting, and delivering speeches from manuscripts. Students will write, review and edit their own work, and will work in teams engaging peer review and corporate authorship to produce manuscripts for a variety of types and purposes of speeches employing a broad range of strategies for proof, language, and engagement.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 377. Argumentation and Critical Thinking. 3 Credit Hours.
Argumentation theory and practice are discussed. Rhetorical and philosophical foundations of argumentation and their application in various settings including academic debate are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 391. Undergraduate Special Topics in Communication Studies. 3 Credit Hours.
Course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 405. Practicum in Communication Studies. 1-3 Credit Hours.
Structured participation in programmatic research and applied practice in the community.
Requisite: Junior Status.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 418. Organizational Communication. 3 Credit Hours.
Introduction to organizational communication theory. Consideration of structure, function, and effects of communication in organizations are analyzed. Emphasis is placed on principles needed for decision making and effective management of organizational communication processes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 426. Patient-Provider Communication. 3 Credit Hours.
This class focuses on the interpersonal environment of patient-provider interaction. The primary purpose of this course is to describe best practices for coming to shared meaning and decision-making between medical professionals and patients in healthcare settings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
COS 427. Health Behavior and Risk. 3 Credit Hours.
This course introduces students to different theories and models of health communication that are frequently used to develop persuasive health messages. It draws on health communication messaging theory, as well as literature in public health, psychology, and medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 472. Persuasion. 3 Credit Hours.
A review of theory, research, and practice of the intentional use of symbols to influence attitudes, beliefs, and actions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 473. Words that Shaped the World. 3 Credit Hours.
A study of great speakers and speeches in important international settings.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 474. Presidential Debates. 3 Credit Hours.
History, impacts, content and strategies of televised presidential campaign debates.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 477. Engaged Communication. 3 Credit Hours.
Capstone course designed for communication studies majors. Provides students opportunities to apply knowledge of communication theory and associated research skills through their personal engagement in community or organizational service and action research.
Prerequisites: COM 110, COS 210, COS 351, COS 354. Requisite: Senior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 479. Capstone for Communication Studies. 3 Credit Hours.
Capstone course designed for communication studies majors. Provides students with the opportunity to apply knowledge of communication theory and research skills through development of capstone project.
Prerequisites: COM 110 and COS 210 and COS 351 and COS 353. Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 498. Communication Studies Internship. 1-3 Credit Hours.
Prescribed study and supervised work with practitioners in organizations.
Requisite: Junior Status.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 499. Projects and Directed Research. 1-3 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 545. Intercultural Communication: International Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 546. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
COS 560. The Executive Communicator. 3 Credit Hours.
Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.
Prerequisite: COS 211. Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 591. Advanced Special Topics in Communication Studies. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 599. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. Course may be repeated to a maximum of six credits.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

B.S.C. Communication Studies

Overview
The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experimental learning, and professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete applications to particular contexts.

Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in communication, law and other areas.

**Mission**

Students in the Communication Studies (COS) Department explore the role of communication in personal and professional relationships. This program is rooted in research and theory promoting student development in advanced knowledge of human communication in specific contexts.

**Goals**

Program objectives provide students with an extensive understanding of communication principles, opportunity to develop oral and written communication skills, and application of critical analysis and research skills.
Student Learning Outcomes

- Students will demonstrate an understanding of advanced communication concepts and critical analysis of research.
- Students will demonstrate advanced writing skills.
- Students will demonstrate advanced presentational skills.
- Students will demonstrate application of communication and professional skills.

Minor in Communication Studies

Overview

The minor in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, and professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete applications to particular contexts.

Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in communication, law and other areas.

Curriculum Requirements

The minor in Communication Studies requires 15 credit hours, at least six of which must be at the 300-level or above. The additional credit hours must be chosen with prior approval of a Communication Studies advisor. A grade of C or higher is required in all courses (a C- is not acceptable).

Students, in conjunction with an advisor, can construct a Communication Studies minor focusing on areas of specific interest. These sample areas of concentration listed below are notated on the transcript as a Communication Studies minor. Possible areas of concentration include the following:

Sample Concentration in General Communication Studies

Offers a rich background in the field of human communication in a variety of contexts applicable to all personal, social and professional endeavors. Complements any major or academic/career objective.

Minor in Health Communication

The School of Communication (SoC) in collaboration with the School of Nursing and Health Studies (SONHS) offers a minor in health communication, which is available to all students. Students must have a minimum of a 2.0 UM GPA to declare the minor and they must earn a C or higher in each course for the minor for it to count; a grade of C- or lower is not acceptable for the health communication minor. Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

* A grade of C or higher is required in all courses (a grade of C- or lower is not acceptable).
Interactive Media
http://com.miami.edu/programs

The Department of Interactive Media offers majors in Interactive Media and minors in Game Design (GAME) and Interactive Media (CIMI).

The Department of Interactive Media strives to foster active learning in the design and research of technologies that improve society and people’s lives. Our hands-on curriculum allows students to explore the role that interactive technologies play in communication and how they shape our world.

The majors and minors offered by the Department of Interactive Media are designed to enable students to customize their education within a learning environment that is collaborative and conducive to the pursuit, exchange, and development of ideas and information. The curriculum also further provides students with the tools necessary to succeed in a range of careers defined by a rapidly changing technology and media landscape and equips them to best leverage interactivity, emerging technologies, and innovative developments in the field.

Goals of the Program are:

• To provide students with the technical and practical skills needed to make them career-ready through hands-on learning, problem-solving based inquiry, and advanced study.

• To nurture the individual talent, creativity, and discovery process of every student by fostering principles of collaboration, professionalism, and intellectual curiosity.

• To support the educational process through mentoring and advising by renowned faculty and seasoned professionals.

• To encourage students to integrate theory and practice, to cultivate the capacity to think critically, and to connect technology and art and/or design.

• To familiarize students with theoretical, historical, and cultural approaches and expose them to a range of traditions within the field of study.

• To provide access to state-of-the-art facilities, technologically advanced tools, and the latest technology platforms.

• To continue to build on our reputation as a place of innovation and interdisciplinarity

• We educate students according to the highest professional and ethical standards.

Major Cognate Area

• Interactive Media -- STEM

Minor Cognate Areas

• Game Design -- Arts and Humanities
• Interactive Media -- STEM

Please note: Students completing majors and minors within the same department may only satisfy one required cognate area of study.

Dept. Code: CIM

Requirements for the Majors in Interactive Media

Each candidate for the degree of Bachelor of Science in Communication (B.S.C.) will complete the School of Communication’s requirements including courses in the School’s General Education Required Areas of Study.

Before admission as an Interactive Media major (CIMI), a student must:

• Complete the Core courses in residence at the University, all with grades of C or higher (C- is not acceptable).

• Students who have obtained the written approval of the Chair of Interactive Media to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.

• Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.

• A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Opportunities
As a major or minor in the CIM department, many opportunities await you, including access to the following facilities and equipment: the Emerging Media Lab used for fabrication, board games, physical computing, and digital screen-based games; the XR Studio is used for virtual reality, volumetric captures studio and augmented reality experimentation, the User Experience (UX) Lab supports interdisciplinary research on understanding how people use information systems. The New Experience Research & Design Lab (NERDLab) is a student-faculty cooperative driven by research, development, and an enthusiasm for social impact.

More Information on our facilities and labs can be viewed at https://interactive.miami.edu/spaces/

The Ribeiro Innovation Fund is an endowed fund support lectures and workshops that instill creative confidence in students. It enriches the academic curriculum promoting innovation in the field of interactive media by inviting industry leaders and innovators; thus tightening the link between the Interactive Media program and industry.

CIM 101. Internet, Media, and Society. 3 Credit Hours.
Internet, Media, and Society is a foundational course intended to give perspectives on the continuing progression of technology through the lens of media and popular culture. Students will learn about the historical roots of the internet and early tech pioneers, including the various technologies, trends, and subcultures that bubbles up along the way, creating our current media and technological landscapes. From this perspective, students will gain an appreciation and greater understanding of how things came to be, especially the Internet's role in shaping society and their everyday lives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 102. Interaction Design I. 3 Credit Hours.
In this class, students will familiarize themselves with the disciplines of user experience (UX) and interaction design (IxD), including design principles, postures, and patterns and visual design concepts specific to designing interactive digital products. Students will learn how to use a digital prototyping tool in order to first design low fidelity, structural wireframes and then turn them into high fidelity interactive prototypes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 103. Web Lab. 3 Credit Hours.
This course is a practical introduction to web design. Students will learn how to produce websites using the latest web practices and techniques. Throughout each unit of the course, students will learn the skills to plan, layout, and build websites using HTML, CSS, and Javascript. Students will also learn how to optimize and market their websites.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 104. Introduction to Game Studies. 3 Credit Hours.
This course is an introduction to the study of games as cultural, historical, and socially relevant artifacts. Students will gain an understanding of how games are used to accomplish specific communications goals and will also learn how society can often shape and be shaped by games. The course provides students with the foundation needed to be effective at critiquing, designing, and evaluating games.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 202. Interaction Design II. 3 Credit Hours.
This course will give a deeper knowledge of interaction design and its practical application (building on Interaction Design I). Students will learn to formulate design problems and limit the scope of the design, carry out field studies and contextual analyses, lead design workshops, to carry out evaluation work, and understand technical limitations and produce deliverables adapted to those limitations.
Prerequisite: CIM 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 203. Intro to Creative Coding. 3 Credit Hours.
This course will introduce students to the building blocks of creative coding within the visual and media environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CIM 204. Introduction to Game Design. 3 Credit Hours.
This is an introductory course about game design, theory, and development, and how games align themselves as a lens of study for all interactive media.
Prerequisite: CIM 104.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 383. Physical Computing. 3 Credit Hours.
This course explores how to build a bridge between the physical and digital world. Students will learn to develop software and hardware to sense and respond to physical interaction. Through various projects, students will learn how to program sensors and other electronic components to convert the human senses into creative inputs and outputs, such as lights, sounds, and movement. Students will learn the ideation and design process through challenges presented in their assignments and personal projects. In this course students will also learn how to design for and use various digital fabrication tools, such as 3D printing, laser and paper cutting, and CNC milling. Students will have access to work hands on with these fabrication tools to enhance and build their prototypes.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 389. Special Topics in Interactive Media. 3 Credit Hours.
This course is designed to keep up with the fast-changing world of interactive media allowing for contemporary classes to be periodically added to the curriculum. Special topics classes will be added to the Interactive Media curriculum as electives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 412. Human Computer Interaction. 3 Credit Hours.
This course will teach students about the importance human computer interaction (HCI) in the design, implementation, and evaluation of interactive computing systems for human use. The course will provide both practical application and theoretical knowledge of HCI, with practical concerns balanced by discussion of relevant theory from the literature of computer science, human factors, and interaction design.
Prerequisite: CIM 102 and CIM 202 and CIM 443. And Requisite: Junior or Above.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CIM 413. Mobile Application Development. 3 Credit Hours.
This course will provide students the ability to conceptualize, design, and develop a mobile application of their choosing. It covers various approaches to the development of mobile software applications using current development environments, frameworks, and programming paradigms. This course focuses on hands-on learning through which students practice with programming assignments and demonstrate the apps through virtual simulators and physical mobile devices.
Prerequisite: CIM 203 Or ECE 118 Or CSC 120.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 418. Internet and Media Activism. 3 Credit Hours.
In this course, students will examine the role of media in shaping social reform to document social issues such as poverty, human rights, social inequities, the environment, and powerless groups. We will review the philosophy and history of media as activism ranging from photography, documentary, cinema, the Internet, social media and newer forms of media. Emphasis is placed on developing a critical understanding of current media advocacy practices with a conscious goal; awareness, change minds, to affect policy, and action. At the end of the semester, students will have a fully developed project concept.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 422. Human Centered Design. 3 Credit Hours.
This course takes a comprehensive look at human limitations and abilities and how they are key to interaction design and a great user experience. Students will learn about human behavior and how to apply UX guidelines to the design of digital interfaces. Students will also learn how to produce design deliverables for real world practice.
Prerequisite: CIM 102 and CIM 202 and CIM 443. And Requisite: Junior or Above.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
CIM 423. Building Virtual Worlds. 3 Credit Hours.
The purpose of this course is to explore the construction of virtual environments. Students will learn the principles of constructing interactive 3D environments using a game engine. Students will be responsible for creating a world that can be interacted with on various platforms, including virtual and mixed reality.
Prerequisite: CIM 203 Or ECE 118 Or CSC 120.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CIM 433. Augmented Reality. 3 Credit Hours.
This course will provide students the ability to design and develop augmented reality apps. It covers various approaches to designing and programming augmented reality apps using the latest technologies and devices. Students will be given hands-on programming assignments and learn about the key advantages in each of the approaches via in-class discussions.
Prerequisite: CIM 203 Or ECE 118 Or CSC 120.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CIM 443. Front End Fundamentals. 3 Credit Hours.
This course focuses on the job-ready skills and production workflow techniques in highest demand for front end web developers. Students will learn, practice and demonstrate the skills and principles needed to make effective use of these technologies.
Prerequisite: CIM 103 Or JMM 341.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 444. Designing Games for Impact. 3 Credit Hours.
Students will explore the use of games as a communication tool for social good and will create their own game-based interventions.
Prerequisite: CIM 204.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 453. Dynamic Data. 3 Credit Hours.
This course teaches data analysis through the development of interactive web applications. The course focuses on communicating through computer programming. Students will learn to build and use databases as a primary source and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.
Prerequisite: CIM 103 or CIM 203 Or JMM 341.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CIM 458. 360° Immersive Filmmaking and Storytelling. 3 Credit Hours.
A hands-on course dedicated to design and produce VR/360° immersive video. Through a wide selection of materials, including videos, 360° films, articles, and presentations, students will develop a strong foundation on storytelling techniques, technologies (cameras, microphones, VR headsets, software), and best practices used across immersive media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 464. Video Game Spectatorship and Esports. 3 Credit Hours.
This course covers the historical and contemporary practices of game spectatorship, journalism, and Esports. It teaches the industry and best practices used in sharing video games through traditional media, streaming services, and Esports.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 469. Internship in Interactive Media. 1-3 Credit Hours.
The internship is designed to provide valuable career-related work experience in a real-world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid.
Requisite: Sophomore Status, Cumulative GPA 2.5.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
CIM 474. 2D Character Design. 3 Credit Hours.
This is a comprehensive course devoted to the development of skills in creating characters for 2D animation and games. Students will develop an understanding of how shape language relates to the characters personality through the creation of weekly exercises. The course will be delivered in the form of studio projects, individual and class critiques, lectures, discussions, workshops and readings.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 489. Special Topics in Interactive Media. 3 Credit Hours.
This course is designed to keep up with the fast-changing world of interactive media allowing for contemporary classes to be periodically added to the curriculum. Special topics classes will be added to the Interactive Media curriculum as electives.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 499. Projects and Directed Research. 1-3 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CIM 501. Prototyping Techniques. 3 Credit Hours.
This course covers accepted prototyping techniques introducing students to a wide variety of approaches for different kinds of user experience design problems and platforms. Students will learn to develop preliminary iterations of a solution to a design problem in order to communicate the essence of their idea without committing to a costly implementation.
Prerequisite: CIM 103.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 502. Designing Innovation. 3 Credit Hours.
In this course you will be introduced to and will apply human centered design techniques and systems thinking to achieve goal-directed design of interactive systems. Students will work in small teams to iteratively generate and refine design concepts and to thoroughly document their design process.
Prerequisite: CIM 102 and CIM 202 And Requisite: Junior or Higher.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 504. Designing Playful Experiences. 3 Credit Hours.
Students will analyze and design games to gain vocabulary and tools to design playful interactive systems. Students will be exposed to a range of popular game prototyping technologies and will create several mini-projects as well as one final game project created using the platform of their choice.
Prerequisite: CIM 104 and CIM 204.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 505. Technology Trends. 3 Credit Hours.
Trends is a foundation course intended to promote a dialogue about the current state of business, art, health, culture, and innovation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 511. Interactive Media Studio. 3 Credit Hours.
The Interactive Media Studio is designed to allow a student to enhance his or her accumulated knowledge and skills in interactive Media. This course prepares students to gain employment in the field by creating and producing a professional design portfolio and resume. Students will also gain knowledge about how to set up, prepare for, and conduct themselves during professional interviews.
Prerequisite: CIM 101 and CIM 103 and CIM 202 and CIM 203 and CIM 383 And Requisite: Senior Standing And Interactive Media Majors.
Components: STU.
Grading: GRD.
Typically Offered: Spring.
CIM 515. Interactive Media Business Essentials. 3 Credit Hours.
This course takes a comprehensive look at managing interactive media projects from inception to implementation and maintenance.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 563. Design with AI. 3 Credit Hours.
This course will provide students with the ability to understand the purpose, strengths and limitations of artificial intelligence (AI) technologies in order to design smart applications for everyday use. It covers topics including state-of-the-art AI technologies and the design principles for developing applications with such technologies. Issues such as ethics, bias, accountability, and privacy in these applications will also be discussed.
Prerequisite: CIM 203.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 579. Practicum in Interactive Media. 1-3 Credit Hours.
Students will engage in the applied practice of Interactive Media to enhance classroom learning and provide opportunities to gain practical experience.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 582. UX Research Methods. 3 Credit Hours.
This course provides a comprehensive overview of User Experience research methods and how they are incorporated into the product development lifecycle. Students will learn about user-centered design and will conduct a wide range of research methods including ethnography, questionnaires, online studies, and usability testing. There will be considerable focus on practicing research skills and reporting findings from these activities.
Prerequisite: CIM 102 and CIM 202 and CIM 443. And Requisite: Junior or Above.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 594. Game Development Studio. 3 Credit Hours.
Game Dev Studio is a project-based course devoted to developing a game. In groups, students will start with a concept and create prototypes that will be refined through multiple iterations and playtests. Your final game will either be a well-polished 2D or 3D digital game.
Prerequisite: CIM 202 and CIM 204 or CIM 423 or CIM 504 or CIM 444.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

B.S.C. in Interactive Media

Overview
The Department of Interactive Media offers a major in Interactive Media.

The Department of Interactive Media strives to foster active learning in the design and research of technologies that improve society and people’s lives. Our hands-on curriculum allows students to explore the role that interactive technologies play in communication and how they shape our world.

The major offered by the Department of Interactive Media is designed to enable students to customize their education within a learning environment that is collaborative and conducive to the pursuit, exchange, and development of ideas and information. The curriculum also further provides students with the tools necessary to succeed in a range of careers defined by a rapidly changing technology and media landscape and equips them to best leverage interactivity, emerging technologies, and innovative developments in the field.

As a major in the CIM department, many opportunities await you, including access to the following facilities and equipment: the Emerging Media Lab used for fabrication, board games, physical computing, and digital screen-based games; the XR Studio is used for virtual reality, volumetric captures studio and augmented reality experimentation, the User Experience (UX) Lab supports interdisciplinary research on understanding how people use information systems. The New Experience Research & Design Lab (NERDLab) is a student-faculty cooperative driven by research, development, and an enthusiasm for social impact.

More Information on our facilities and labs can be viewed at https://interactive.miami.edu/spaces/

The Ribeiro Innovation Fund is an endowed fund support lectures and workshops that instill creative confidence in students. It enriches the academic curriculum promoting innovation in the field of interactive media by inviting industry leaders and innovators; thus tightening the link between the Interactive Media program and industry.

* School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.

* School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, University Cognates (http://www.miami.edu/cognates/) and the Advanced Writing and Communication Skills Proficiency requirement.

### Upper Level Elective Requirement

36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

Mission
The Interactive Media major addresses the growing need for communicators who fluidly combine design, technology, visual arts and research to help stimulate comprehension and integration of technology into every aspect of daily life. This program will produce graduates who, in addition to being innovative and interdisciplinary, are responsive to cross-sector dynamics and therefore are industry ready.

Goals
The major in Interactive Media will provide students with expertise in designing and analyzing products and systems, incorporating rich interaction through the use of computational power.

Student Learning Outcomes
This program is designed to enhance our students’ abilities to:

• Conceptualize communication models based on possibilities offered by emerging technologies.
• Evaluate user experiences by conducting usability testing.
• Understand business models and the metrics driving online business models.
• Research, analyze, prototype and design concepts from concept to launch.
• Realize business goals with elegant and intuitive interactive designs.
• Conceive, research, synthesize, and implement creative solutions to complex problems posed by emerging technologies.
• Master dynamic communication techniques that give control to the user rather than the computer.
Embrace, integrate and adapt quickly to a variety of disciplines in technology, art, design, science, education, healthcare and business.

Learn to work in teams and manage projects.

**Minor in Game Design**

**Overview**

The Department of Interactive Media offers a minor in Game Design (GAME).

The Department of Interactive Media strives to foster active learning in the design and research of technologies that improve society and people's lives. Our hands-on curriculum allows students to explore the role that interactive technologies play in communication and how they shape our world.

The minors offered by the Department of Interactive Media is designed to enable students to customize their education within a learning environment that is collaborative and conducive to the pursuit, exchange, and development of ideas and information. The curriculum also further provides students with the tools necessary to succeed in a range of careers defined by a rapidly changing technology and media landscape and equips them to best leverage interactivity, emerging technologies, and innovative developments in the field.

As a minor in the CIM department, many opportunities await you, including access to the following facilities and equipment: the Emerging Media Lab used for fabrication, board games, physical computing, and digital screen-based games; the XR Studio is used for virtual reality, volumetric captures studio and augmented reality experimentation, the User Experience (UX) Lab supports interdisciplinary research on understanding how people use information systems. The New Experience Research & Design Lab (NERDLab) is a student-faculty cooperative driven by research, development, and an enthusiasm for social impact.

More Information on our facilities and labs can be viewed at [https://interactive.miami.edu/spaces/](https://interactive.miami.edu/spaces/)

The Ribeiro Innovation Fund is an endowed fund support lectures and workshops that instill creative confidence in students. It enriches the academic curriculum promoting innovation in the field of interactive media by inviting industry leaders and innovators; thus tightening the link between the Interactive Media program and industry.

Total Credit Hours 15

* A minimum grade of C or higher is required for all courses taken toward the minor.
* Students cannot double count any CIM courses from the Game Design minor towards the Motion Pictures major and/or minor or the Interactive Media minor.
* Students may only take one digital design course (JMM 106 or STC 102) towards the minor.
* Any exceptions or substitutions to the minor must be approved by the Director of the Interactive Media Program or CIM faculty advisor.
Minor in Interactive Media

Overview

The Department of Interactive Media offers a minor in Interactive Media (CIM).

The Department of Interactive Media strives to foster active learning in the design and research of technologies that improve society and people’s lives. Our hands-on curriculum allows students to explore the role that interactive technologies play in communication and how they shape our world.

The minors offered by the Department of Interactive Media is designed to enable students to customize their education within a learning environment that is collaborative and conducive to the pursuit, exchange, and development of ideas and information. The curriculum also further provides students with the tools necessary to succeed in a range of careers defined by a rapidly changing technology and media landscape and equips them to best leverage interactivity, emerging technologies, and innovative developments in the field.

As a minor in the CIM department, many opportunities await you, including access to the following facilities and equipment: the Emerging Media Lab used for fabrication, board games, physical computing, and digital screen-based games; the XR Studio is used for virtual reality, volumetric captures studio and augmented reality experimentation, the User Experience (UX) Lab supports interdisciplinary research on understanding how people use information systems. The New Experience Research & Design Lab (NERDLab) is a student-faculty cooperative driven by research, development, and an enthusiasm for social impact.

More Information on our facilities and labs can be viewed at https://interactive.miami.edu/spaces/

The Ribeiro Innovation Fund is an endowed fund support lectures and workshops that instill creative confidence in students. It enriches the academic curriculum promoting innovation in the field of interactive media by inviting industry leaders and innovators; thus tightening the link between the Interactive Media program and industry.

Total Credit Hours 18

1 Students cannot double count any CIM courses from the Interactive Media minor towards the Interactive Media major and/or minor or the Game Design minor.

2 Students, in conjunction with an advisor, can construct an Interactive Media minor focusing on one of these suggested areas: Development, Design and UX Research. These suggested areas listed below are notated on the transcript as an Interactive Media minor.

* All courses for the minor must be passed with a minimum grade of C or higher.
Journalism and Media Management

http://com.miami.edu/programs

The Department of Journalism and Media Management offers majors in Broadcast Journalism, Electronic Media, Journalism and Media Management and minors in Broadcast Journalism, Electronic Media, Hispanic Media, Journalism and Media Management.

Dept. Code: JMM

Introduction

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Four majors and five minors are offered in the Department of Journalism and Media Management. The department’s programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication’s Electronic Media and Broadcast Journalism majors are designed for students who intend to pursue professional work in electronic news, production operations and allied fields.

Students majoring or minoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School’s Media Management major is designed for students interested in the business and management aspects of contemporary media. Students may pursue interests in entrepreneurship, sales, management, technology and research, among other topics. Students are encouraged to network with industry professionals at Media Management Association meetings and expand their knowledge of media business operations on various platforms through local and national internships.

The School’s major in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to online media and entrepreneurial ventures. We emphasize effective storytelling through writing, audio and video recording, photography, graphics and data visualization. Reporting skills, analytical thinking and journalistic ethics are stressed throughout the program. Students are encouraged to work for The Miami Hurricane, the student-run newspaper, Distraction magazine and the Ibis yearbook, all of which are nationally award-winning publications. The robust South Florida media market also provides off-campus opportunities at various professional publications and websites.

Students majoring in Journalism may concentrate their studies in one of several tracks or areas or they may customize their course of study. The suggested tracks include: Reporting and Writing (which is the general journalism or custom track); Media and Journalism Studies (a more conceptual and less applied track for students interested in media analysis); Visual and Documentary Journalism (which allows for the study of photography, web design and videography or documentaries); and Sports, Travel and Lifestyle Features (which focuses on these as related areas of content). These tracks allow students the flexibility to design programmatic concentrations in everything from writing to web design to documentary and visual storytelling.

The School’s facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Major Cognate Area

- Broadcast Journalism
  - People and Society
- Electronic Media
  - People and Society
- Journalism
  - People and Society
- Media Management
  - People and Society

Minor Cognate Area

- Broadcast Journalism
  - People and Society
- Electronic Media
  - People and Society
- Hispanic Media
Degree Programs

The Bachelor of Science in Communication is offered in Journalism, Electronic Media, Broadcast Journalism, and Media Management.

Major

Majors are offered in:

- Electronic Media
- Broadcast Journalism
- Media Management
- Journalism

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. All majors must also complete a separate minor or second major within the School or in an academic program outside the School.

NOTE: Departmental Majors, if you wish to double major in the Department of Journalism and Media Management, you must first obtain the written approval of the JMM Department Chair.

Admission to the Electronic Media, Broadcast Journalism, Media Management and Journalism Majors

Before admission as an Electronic Media, Broadcast Journalism, Media Management or Journalism major, a student must:

- Complete the Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

JMM 102. Understanding Media and Content in the Digital Age. 3 Credit Hours.
This course examines how traditional and new media industries are economically structured and how various media content influences audiences and culture. Historical, technological, and regulatory issues related to the different media platforms will also be discussed from a comparative perspective.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 106. Visual Design. 3 Credit Hours.
This course is an introduction to the principles of design, typography, color theory, usability and interactivity as they apply to the layout and design of content for print and digital media.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 108. Writing for the Digital Age. 3 Credit Hours.
This course provides students with an understanding of writing styles appropriate for communicating in the digital age, with particular emphasis on grammar, spelling, syntax and clarity. It provides a solid foundation for further practice and specialization in various types of multimedia communication.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
JMM 206. Special Topics in Journalism and Media Management I. 3 Credit Hours.
This course subject matter varies according to announced special topics. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 208. Fundamentals of Newsgathering. 3 Credit Hours.
Skill development in gathering facts and other material for, and in preparation of, news stories in a variety of genres across platforms. Focus on gathering information from multiple sources, analyzing and organizing information for dissemination, and presenting the most pertinent facts clearly and cohesively to multiple media outlets.
Prerequisites: JMM 111 or JMM 108.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 210. Writing About the Arts. 3 Credit Hours.
The aim of JMM 210 is to help you develop skills in writing and reporting about entertainment and the arts.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 221. Introduction to Documentary Photography. 3 Credit Hours.
Course is designed to develop skills in visual storytelling. Students will learn to produce images and recognize what makes good photographs in terms of content, composition, and technical quality.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 233. Television Performance. 3 Credit Hours.
Introduction to communication concepts and skills involved in on-camera duties such as anchoring, interviewing and live reporting.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 235. Radio Production and Performance. 3 Credit Hours.
Introduction to equipment and procedures of radio. Production of radio programs and formats, editing, announcing, sequencing program elements, and designing program formulas are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 245. Introduction to Electronic Media Production. 3 Credit Hours.
Introduction to the theory, process, and procedure of electronic media production. Lecture and laboratory are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 285. Applied Statistics for Journalism and Media Management. 3 Credit Hours.
This course provides students an introduction to descriptive and bivariate inferential statistics to better understand and use media research and analysis. Computer applications are included.
Prerequisite: MTH 101 or ALEKS Score >= 60 or Math SAT >= 630 or Math ACT>= 28.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 300. Journalism Practicum. 1-3 Credit Hours.
Prescribed study and supervised work with faculty and staff of the student newspaper or related news media. Students receive first-hand knowledge and experience in a working news environment.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
JMM 301. Media Research and Analysis. 3 Credit Hours.
Survey of qualitative and quantitative research methods used to collect and analyze data on media audiences. Course also covers metrics used by media industries. Practice in conducting small-scale audience measurement is included.
Prerequisite: JMM 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 302. Electronic Media Law. 3 Credit Hours.
Course provides analysis of laws and other forces that influence broadcasting, cable, and online media operations. Examines the application of the First Amendment to media operations with a focus on press law.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 303. Communication Law and Policy. 3 Credit Hours.
A study of First Amendment law and theories concerning libel, privacy, copyright, advertising, corporate communications, reporter privilege, free-press/fair trial, pornography, access to government information, broadcasting and new communication technologies. Discussion of international perspectives on media regulation
Prerequisite: JMM 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

JMM 304. Web and Media Analytics. 3 Credit Hours.
This course covers the computations, interpretations, and applications of metrics used to measure media audiences across electronic, print, and online platforms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 305. Legal Issues in Media Management. 3 Credit Hours.
Examination of the legal environment affecting contemporary media businesses including broadcasting, advertising, public relations, web-based media, and print publications. Focus on U.S. law, with introduction of international and comparative perspectives.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 306. Special Topics in Journalism and Media Management II. 3 Credit Hours.
This course subject matter varies according to announced special topics. See class schedule for details.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 307. Mobile Journalism. 3 Credit Hours.
This course provides an introduction to the fundamental procedures in the production and development of mobile storytelling.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 309. Data Journalism. 3 Credit Hours.
This course teaches how to extract meaning from data for more powerful reporting.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 313. Media Sales. 3 Credit Hours.
Operation of sales departments within media outlets. Course includes the preparation and delivery of sales presentations as well as the use of audience reports.
Prerequisite: JMM 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
JMM 314. Media Programming. 3 Credit Hours.
Course covers categories and sources for selecting program materials used in radio, television, cable television, and other program services. Strategies employed in devising program schedules and understanding audience behaviors are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 317. Broadcast Journalism. 3 Credit Hours.
Preparation of materials for presentation through the broadcast/cable media with emphasis on news writing for oral presentation by studio anchors and field reporters. Course examines issues facing the profession of broadcast journalism, radio, and TV reporting techniques and news program formats.
Prerequisite: JMM 108 and JMM 208 and JMM 245.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 319. History of Journalism. 3 Credit Hours.
The development and impact of American journalism.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 331. Introduction to Infographics and Data Visualization. 3 Credit Hours.
This course is an introduction to the visual display of information with a special focus on the encoding of data by means of graphs, charts, maps, and diagrams.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 333. Social Media and Journalism. 3 Credit Hours.
Examination of best practices for use of social media for gathering, disseminating, and promoting information.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 341. Web Design. 3 Credit Hours.
This course covers the basic aspects of interaction design and web development, focusing on production processes. It provides an overview of web design concepts including usability, accessibility, information architecture, basic animation, and graphic design; all discussed in the context of the web environment. This course further offers an introduction to fundamental and emerging web trends.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 345. Intermediate Electronic Media Production. 3 Credit Hours.
Planning and execution of complex field, studio, and multimedia production in a variety of lengths and formats. High level skills in television control room situations and non-linear editing will be used to produce audio, video, and online content.
Prerequisite: JMM 245.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 361. Advanced Documentary Photography. 3 Credit Hours.
Advanced Documentary Photography is a class designed to improve the visual storytelling news gathering, and photographic technical skills introduced in the introductory course.
Prerequisite: JMM 221.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 381. Newspaper Editing and Layout. 3 Credit Hours.
Introduction to electronic editing and development of skills in copy editing, headline writing, picture editing, and newspaper layout.
Prerequisite: JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
JMM 382. Publication Planning and Editing. 3 Credit Hours.
Introduction to editing and design, with emphasis on the development of skills in editing copy and photos, writing headlines, news judgment, and designing print publications and websites.
Prerequisites: JMM 216 or JMM 208, JMM 106.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 401. Editorial Interpretation of Contemporary Events. 3 Credit Hours.
Critical examination of fundamental issues in public life. Preparation of editorials and interpretive articles for mass media are included.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 402. Strategic Media Management. 3 Credit Hours.
This course focuses on strategy analysis, formulation, implementation, and evaluation in managing media enterprises. Media cases are used to apply and discuss strategies.
Pre-requisite: JMM 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 403. Media Industry Trends. 3 Credit Hours.
This course examines the organizational and economic issues that influence today's mass media environment.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 404. Latinos and the Media. 3 Credit Hours.
This course examines the history, politics, production and reception of Latino-oriented media. It considers Latino media production processes, as well as Latina/o audiences' immigration, incorporation and media reception patterns. The course takes advantage of Miami as a vibrant immigration media production site through field trips and independent research projects.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 406. Special Topics in Journalism and Media Management III. 3 Credit Hours.
This course subject matter varies according to announced special topics. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 407. Media Entrepreneurship. 3 Credit Hours.
Students generate comprehensive business plans for a proposed media enterprise. Organizational, financial, and marketing aspects of starting a media business are discussed.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 408. International Electronic Media Systems. 3 Credit Hours.
Seminar on world broadcasting systems and trans-national communication services. Discussion of contemporary issues involving electronic media systems worldwide.
Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
JMM 409. Advanced Feature Design. 3 Credit Hours.
Advanced newspaper, magazine, and electronic design. Students will develop the skills necessary to produce strong visual packages combining type, photography, artwork, and white space. The course will cover advanced design and traditional reproduction techniques for art and copywriting as well as on-line presentations.
Prerequisite: JMM 106. Or STC 202. Or STC 203.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 414. Evolution and Impact of Television Content: The American Sitcom. 3 Credit Hours.
The seminar will examine how social, economic and political factors impacted the development and evolution of the content of sitcoms, as well as the impact such content had on American society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 417. Advanced Broadcast Journalism. 3 Credit Hours.
This capstone course concentrates on gathering and preparing news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural TV elements, writing, producing and performing for on-air presentation. Lecture and laboratory are included.
Prerequisites: JMM 245, JMM 317.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 419. Interactive Storytelling. 3 Credit Hours.
This course explores how storytelling is reinventing itself utilizing the new digital communication tools available. It will cover linear and non-linear storytelling techniques and production processes.
Prerequisites: JMM 106 and JMM 245 and JMM 341. Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 422. Programming for Interactivity. 3 Credit Hours.
This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories. Programming taught in this class caters specifically for non-programmers who want to learn how to present their work online in an interactive manner.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 427. Television Newscast. 3 Credit Hours.
Studio anchoring, newscast producing, and field reporting for news and public affairs programming.
Prerequisite: JMM 417.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 429. Advanced Infographics and Data Visualization. 3 Credit Hours.
This course is a seminar designed to introduce interactive data visualization concepts in a web environment. Students will be introduced to code libraries which assist in this task, best practices for interactivity and data visualization. The course will also briefly cover working with data (i.e., how to find sources, cleaning and preparing data for visualizations, etc.).
Prerequisite: JMM 331 and JMM 422.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 434. Media Distribution for Film and Television. 3 Credit Hours.
This course covers the various aspects of the distribution process for films and television programs through conventional and emerging channels. Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
JMM 435. Media Technology. 3 Credit Hours.
This course examines the deployment, use, and impact of communication technologies in various media contexts from an economic, regulatory, and social perspective.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 437. The Business of Modern Journalism. 3 Credit Hours.
Provides an examination of the evolving business models for legacy news organizations as well as discussion of entrepreneurial opportunities for news content in new media and digital platforms.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 438. Travel Journalism. 3 Credit Hours.
This course is designed to teach travel journalism, which includes travel storytelling through writing, photography and videography.
Prerequisite: JMM 245.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 439. Infographics and Data Visualization Studio. 3 Credit Hours.
A studio course in which the student will design a large visualization project that meets the standards of quality for professional publication. The student will be required to learn new technologies and to apply tools learned in a previous class.
Prerequisite: JMM 331 and JMM 429 or JMM 550 or JMM 309.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 442. Online Journalism. 3 Credit Hours.
A study of the issues, skills and practices related to the online presentation of news and information in a convergent media environment.
Prerequisite: JMM 108.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 443. Covering the Arts. 3 Credit Hours.
The aim of this course is to help you develop skills in writing and reporting about entertainment and the arts, from covering business and government news related to the arts, to telling the stories of people leaving a mark in the art world, to reviewing and critiquing works. You will report stories, write reviews and maintain a blog in the discipline of your choice.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 444. Public Affairs Reporting. 3 Credit Hours.
Emphasis on reporting, writing and analysis about institutions, issues and actions of local government, and their effects on society.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 445. Advanced Electronic Media Production. 3 Credit Hours.
The integration of the producer's role and the structure of program design as they relate to day-to-day production operations. Lecture and laboratory are included.
Prerequisite: JMM 345.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
JMM 446. Travel Writing. 3 Credit Hours.
A study of the major types and styles of travel news and features stories for newspapers, magazines, newsletters, and websites.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 447. In-depth Journalism and Media Convergence. 3 Credit Hours.
A capstone experience that requires students to use effectively their full range of journalistic knowledge, newsgathering, and writing skills to prepare news and information for different media platforms.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 448. Sports and the Media. 3 Credit Hours.
This course examines the relationship between sports and the media, including stakeholders and the financial component of sports and media, sports production and content, and sports media audience. The course provides an understanding of the social and economic relationships between sports and media and the effects those relationships have on sports consumers.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 449. Web and Media Analytics. 3 Credit Hours.
This course covers the computations, interpretations, and applications of metrics used to measure media audiences across electronic, print, and online platforms.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 451. Seminar in News Ethics and Problems. 3 Credit Hours.
Ethical, practical, and professional problems of news communicators in society.
Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 453. Applied Data Analytics for Journalism and Media Management. 3 Credit Hours.
This course introduces students to the procedures used for extracting, processing, and analyzing datasets on web and social media sites.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 455. Internship in Journalism and Media Management. 1-3 Credit Hours.
Prescribed study and supervised work with professionals in Journalism and Media Management.
Requisite: Sophomore Status, cumulative GPA of 2.5, and Permission of Instructor.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

JMM 459. Projects and Directed Research. 1-3 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

JMM 510. Latin American Media Systems. 3 Credit Hours.
This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
JMM 511. Global Media. 3 Credit Hours.
An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 513. Computer-Assisted Reporting. 3 Credit Hours.
Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 515. Reporting and the Internet. 3 Credit Hours.
Overview of uses of online computer services for newsgathering and distribution with emphasis on the Internet.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 517. Television News Reporting. 3 Credit Hours.
Gathering and preparation of news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural elements, writing, producing and performing for on-air presentation.
JMM 345 and JMM 317.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 521. Seminar in Visual Storytelling. 3 Credit Hours.
An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 523. Sports Reporting. 3 Credit Hours.
A hands-on sports journalism course that will develop students' skills in sports reporting and sports writing. Discussions range across the entire field of sports reporting, including broadcasting, but the greatest emphasis is concentrated on sports reporting and writing for print, online, social media and media relations. Students will go off-campus to cover professional and college sporting events live on deadline, hear from guest speakers across the industry, and cover on-campus UM sports beats.
Prerequisites: JMM 216 or JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 527. Television News Producing. 3 Credit Hours.
Studio anchoring, newscast producing and field reporting for news and public affairs programming. Live field reporting and field and studio interviewing techniques are covered.
Prerequisites: JMM 417 or JMM 517.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 533. Social Media. 3 Credit Hours.
Examination of best practices for use of social media for gathering, disseminating, and promoting information.
Prerequisite: JMM 208.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
JMM 541. Advanced Audio Video Narratives. 3 Credit Hours.
This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 544. Feature Writing. 3 Credit Hours.
Analyzing and writing feature articles for magazines, newspapers, and other news media.
Prerequisite: JMM 108.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 547. Magazine Planning. 3 Credit Hours.
This course is a magazine planning class where students will create a 32-page print/digital cross-platform niche publication from scratch. It will be based on a business model creating a design and content for a specific audience.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 550. 3D Design and Graphics. 3 Credit Hours.
This course focuses on the use of 3D Design software for communication and how to integrate with other print and digital technologies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 551. Advanced Programming. 3 Credit Hours.
This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zendand, Symfony will also be covered in the class.
Components: LEC.
Grading: SUS.
Typically Offered: Summer.

JMM 560. Team Multimedia Project. 1-3 Credit Hours.
Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, infographic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

JMM 592. Special Topics in Journalism and Media Management. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Requisite: Junior Or Senior Or Graduate Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 599. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. Course may be repeated to a maximum of six credits.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
B.S.C. Broadcast Journalism

Overview

The Department of Journalism and Media Management offers a major in Broadcast Journalism. The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Four majors are offered in the Department of Journalism and Media Management. The department's programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication's Electronic Media and Broadcast Journalism majors are designed for students who intend to pursue professional work in electronic news, production operations and allied fields.

Students majoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School's facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Credit Hours: 15

Note: The table represents a course of study for a specific program, detailing the courses to be taken each semester, along with credit hours and remarks for each.
Mission
The goal of the broadcast journalism major is to teach students to identify news and recognize the story in a complex field of fact and opinion, conduct journalistic research, and to effectively produce content for various media formats. In addition, the major provides students with an appreciation of journalistic ethics and best practices in journalism. Although the term “broadcast” is still part of the official title of this major, the program recognizes the ongoing convergence of news media functions across all distribution platforms.

Goals
The goal of the broadcast journalism major is to teach students to identify news and recognize the story in a complex field of fact and opinion, conduct journalistic research, and to effectively produce content for various media formats. In addition, the major provides students with an appreciation of journalistic ethics and best practices in journalism. Although the term “broadcast” is still part of the official title of this major, the program recognizes the ongoing convergence of news media functions across all distribution platforms.

Student Learning Outcomes
- Students will demonstrate the ability to acquire, critically analyze, and present journalistic messages in an appropriate format using sound reasoning and journalistic principles.
- Students will demonstrate proficiency in the use of contemporary equipment, technologies, and workflows, as well as key theoretical concepts of audio/visual/interactive storytelling.
- Students will demonstrate the ability to articulate and practice the values, ethics, laws, social responsibilities and expectations of the profession.

B.S.C. Electronic Media
Overview
The Department of Journalism and Media Management offers a major in Electronic Media.

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Four majors are offered in the Department of Journalism and Media Management. The department’s programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication’s Electronic Media and Broadcast Journalism majors are designed for students who intend to pursue professional work in electronic news, production operations and allied fields.

Students majoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School’s facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Mission
The goal of the Electronic Media major is to provide students with a broad-based understanding of the Electronic Media industries while allowing them to specialize in an area of their choosing. Students in this major have the opportunity to customize their program of study. While some students focus on electronic media production, others complete a more eclectic mix of electronic media production and industry-related course work.

Goals
The goal of the Electronic Media major is to provide students with a broad-based understanding of the Electronic Media industries while allowing them to specialize in an area of their choosing. Students in this major have the opportunity to customize their program of study. While some students focus on electronic media production, others complete a more eclectic mix of electronic media production and industry-related course work.

Student Learning Outcomes
• Students will demonstrate the ability to function effectively as a member of a team.
• Students will demonstrate proficiency in the use of contemporary equipment, technologies, and workflows, as well as key theoretical concepts of audio/visual/interactive storytelling.
• Students will demonstrate the ability to write and present media, information, or reports appropriate for a professional media industry environment.

B.S.C. Journalism
Overview
The Department of Journalism and Media Management offers majors in Broadcast Journalism, Electronic Media, Journalism and Media Management.

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.
Four majors are offered in the Department of Journalism and Media Management. The department's programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School's major in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to online media and entrepreneurial ventures. We emphasize effective storytelling through writing, audio and video recording, photography, graphics and data visualization. Reporting skills, analytical thinking and journalistic ethics are stressed throughout the program. Students are encouraged to work for *The Miami Hurricane*, the student-run newspaper, *Distraction* magazine and the *Ibis* yearbook, all of which are nationally award-winning publications. The robust South Florida media market also provides off-campus opportunities at various professional publications and websites.

Students majoring in Journalism may concentrate their studies in one of several tracks or areas or they may customize their course of study. The suggested tracks include: Reporting and Writing (which is the general journalism or custom track); Media and Journalism Studies (a more conceptual and less applied track for students interested in media analysis); Visual and Documentary Journalism (which allows for the study of photography, web design and videography or documentaries); and Sports, Travel and Lifestyle Features (which focuses on these as related areas of content). These tracks allow students the flexibility to design programmatic concentrations in everything from writing to web design to documentary and visual storytelling.

The School’s facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

**Advanced Writing and Communication Skills Requirement**

Choose one of the following:

- COS 211: Public Speaking
- COS 333: Business Communication
- JMM 233: Television Performance

**Track Requirement**

Choose one of the following:

- JMM 303: Communication Law and Policy
- JMM 444: Public Affairs Reporting
  - or JMM 544: Feature Writing
- JMM 461: Seminar in News Ethics and Problems

**Visual and Documentary**

- JMM 245: Introduction to Electronic Media Production
- JMM 303: Communication Law and Policy
- JMM 345: Intermediate Electronic Media Production
- JMM 533: Social Media

**Media and Journalism Studies**

- JMM 301: Media Research and Analysis
- JMM 303: Communication Law and Policy

**Sports, Travel and Lifestyle Features**

- JMM 303: Communication Law and Policy
- JMM 444: Public Affairs Reporting
  - or JMM 544: Feature Writing

**JMM Electives - Based on track and selected with approval of JMM Faculty Advisor**

**Additional Requirements**

- ENG 105: English Composition I
  - 3
ENG 106 English Composition II 3

Choose one of the following:

- MTH 113 Finite Mathematics
- JMM 285 Applied Statistics for Journalism and Media Management ¹
- STC 103 Statistical Reasoning for Strategic Communication

Arts and Humanities Cognate 9
STEM Cognate 9
Minor or Second Major and Electives ² 51-54

Total Credit Hours 120

¹ Students majoring in the Media and Journalism track should take JMM 285 which will count for both the major and the math requirement.
² SoC students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.

**Upper Level Elective Requirement**

36 credits at the 300 level or higher are required for graduation. These credits may be earned from you major, minor, and/or second major and electives.

Mission
The Journalism program at the University of Miami teaches students to identify news, recognize the story in complex matters, distinguish between fact and opinion, and present the story in the format best suited to the subject and audience.

Goals
Upon graduation, students are prepared to work in a variety of news and information settings and are equipped to gather and analyze information, critically evaluate it, and write and produce material for various media formats, all within the guiding ethical and legal principles of journalism.

Student Learning Outcomes
- Students will demonstrate the ability to acquire, critically analyze, and report stories in an appropriate format using sound reasoning and journalistic principles.
- Students will demonstrate proficiency in the use of contemporary equipment, technologies, and workflows, as well as key theoretical concepts of audio/visual/interactive storytelling.
- Students will demonstrate the ability to articulate and practice the values, ethics, laws, social responsibilities and expectations of the profession.

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive |
media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Four majors are offered in the Department of Journalism and Media Management. The department's programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School's Media Management major is designed for students interested in the business and management aspects of contemporary media. Students may pursue interests in entrepreneurship, sales, management, technology and research, among other topics. Students are encouraged to network with industry professionals at Media Management Association meetings and expand their knowledge of media business operations on various platforms through local and national internships.

The School's facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Mission
The Media Management major prepares students for careers on the business side of media, such as operations, sales, programming, marketing, research and finance. Media management students receive a more focused and practical grounding in the business of media that a conventional business school degree cannot provide. In particular, this major focuses on media economics, finance, technology, and strategic planning. The program recognizes the ongoing convergence of media business functions across all platforms.

Goals
Students will demonstrate knowledge of the practices and structures of mass media industries; the ability to critically analyze industry data and technology advances and use them to assess trends and opportunities; and the ability to write and present reports appropriate for a media business and/or research setting.

Student Learning Outcomes
- Students will demonstrate knowledge of the practices and structures of mass media industries.
- Students will demonstrate the ability to critically analyze industry data and technology advances and use them to assess trends and opportunities.
- Students will demonstrate the ability to write and present reports appropriate for a media business and/or research setting.
Minor in Broadcast Journalism

Overview
The Department of Journalism and Media Management offers minors in Broadcast Journalism, Electronic Media, Hispanic Media, Journalism and Media Management.

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Five minors are offered in the Department of Journalism and Media Management. The department’s programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication’s Electronic Media and Broadcast Journalism minors are designed for students who intend to pursue professional work in electronic news, production operations and allied fields.

Students minoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School’s facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

**Minor in Journalism**

**Overview**

The Department of Journalism and Media Management offers minors in Broadcast Journalism, Electronic Media, Hispanic Media, Journalism and Media Management.

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Five minors are offered in the Department of Journalism and Media Management. The department's programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School's minor in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to online media and entrepreneurial ventures. We emphasize effective storytelling through writing, audio and video recording, photography, graphics and data visualization. Reporting skills, analytical thinking and journalistic ethics are stressed throughout the program. Students are encouraged to work for *The Miami Hurricane*, the student-run newspaper, *Distraction* magazine and the *Ibis* yearbook, all of which are nationally award-winning publications. The robust South Florida media market also provides off-campus opportunities at various professional publications and websites.
The School's facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Strategic Communication

http://com.miami.edu/programs

Dept. Code: STC

Introduction

The Department of Strategic Communication offers majors and minors in Advertising and Public Relations.

Students majoring in Advertising learn the art, craft and business of promoting brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development and media planning skills. The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally. The curriculum is hands-on and students learn how to create an advertising campaign that meets their client’s goals. Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School’s Advertising Program also has an active alliance with the American Advertising Federation.

Students majoring in Public Relations learn how to promote a client’s business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their public’s. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community.

Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

Major Cognate Area

- Advertising Management Track:
  - People and Society
- Advertising Creative Track:
  - People and Society or
  - Arts and Humanities
- Public Relations:
  - People and Society

Minor Cognate Area

- Advertising Minor:
  - People and Society
- Public Relations Minor:
  - People and Society
- Strategic Communication Minor:
  - People and Society

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

Degree Programs

The Bachelor of Science in Communication is offered in Advertising and Public Relations

Majors are offered in:

- Advertising Creative Track
- Advertising Management Track
- Public Relations General Track
- Public Relations Practice Track
Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Advertising majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Advertising and Public Relations Majors
Before admission as an Advertising or Public Relations major, a student must:

- Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Strategic Communication to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Major in Advertising
Students majoring in advertising will choose one of two tracks:

- Advertising Management Track
- Advertising Creative Track

Major in Public Relations
Students majoring in public relations will choose one of two tracks:

- Public Relations General Track
- Public Relations Practice Track

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Public Relations majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Minors in Strategic Communication Department
The Department of Strategic Communication offers minors in:

- Advertising
- Public Relations
- Strategic Communication

The minors in Advertising, Public Relations and Strategic Communication require a grade of C or higher in all courses (a C- is not acceptable).

STC 102. Graphic Design for Strategic Communication. 3 Credit Hours.
An introduction to the art of visual communication as it relates to design for advertising and public relations. Students will learn how to use Adobe Photoshop and InDesign as tools for applying basic graphic design techniques used in print and promotional materials. Topics include typography, design principles, art & image manipulation, conceptualization and layout stages, color theory and color reproduction, and printing processes.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 103. Statistical Reasoning for Strategic Communication. 3 Credit Hours.
An introduction to statistical reasoning for advertising and public relations.
Prerequisite: MTH 101 or Requisite: ALEKS MTH >= 60 or SAT MTH Section Score >= 620 or ACT MTH Score >=28.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
STC 114. Principles of Advertising. 3 Credit Hours.
An introduction to the principles and practice of advertising in a free-market economy. Students will be introduced to several areas of advertising including account planning, creative strategy, media planning, research methods, consumer behavior, and integrated marketing. Emphasis on cultural, social, ethical, and regulatory aspects of advertising.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 116. Principles of Public Relations. 3 Credit Hours.
An introduction to the principles and practice of public relations. Students will learn how public relations operates within organizations, its impact on publics and its functions in society. Students will study the professional development of the field; concepts, issues and principles in the practice; and models of theories guiding the practice. They will also be challenged to critically evaluate the practice and purpose of public relations in contemporary American society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 200. Advertising Strategy Development. 3 Credit Hours.
Introduction to the development of effective advertising strategies. Topics include strategic, industry and competitor analysis, brand analysis and development, consumer behavior and segmentation, insight development, and writing a strategic and creative brief.
Prerequisite: STC 114.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 201. Public Relations Strategy Development. 3 Credit Hours.
This course introduces students to research-based strategy development and planning at the core of public relations practice.
Prerequisite: STC 116.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 202. Advanced Graphic Design for Advertising. 3 Credit Hours.
This course will delve more deeply into the concepts of graphic design as they relate to the field of advertising. More specifically, this course will touch upon the use of art, illustration, and photography in advertising design. Topics also will include brand design, visual identity guidelines, and campaign building from a visual standpoint. Students will learn to use Adobe Illustrator as a tool for creating artwork in both traditional and non-traditional media. This course serves as a foundation for advertising portfolio development.
Prerequisite: STC 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 203. Advanced Graphic Design for Public Relations. 3 Credit Hours.
Graphic design techniques for public relations and the use of computer software as layout and design tools. Selection, preparation, and study of design principles and production processes for typography, photography, art work, and white space.
Prerequisites: STC 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 231. Creative Advertising Concepts and Copywriting. 3 Credit Hours.
An introduction to creative advertising. Students learn how to create advertising campaign ideas as well as the fundamentals of writing for television, the internet, print, social media, and others.
Prerequisite: STC 114. And JMM 108.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 232. Writing for Public Relations. 3 Credit Hours.
Principles and techniques for the development of creative strategies, concepts, and writing of effective public relations messages for all types of media.
Prerequisites: JMM 108, STC 116 or STC 114 or JMM 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
**STC 233. Writing for Advertising Account Management. 3 Credit Hours.**
Introduction to writing for the business side of advertising. This course will prepare students to write and create comprehensive reports and prepare presentations related to the function of account management, including agency credentials and pitch presentations, writing for research and creative strategies, and preparing briefing and summary documents.
Prerequisite: STC 114. And JMM 108.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**STC 290. Special Topics in Strategic Communication. 3 Credit Hours.**
This course subject matter varies according to announced special topic. See class schedule for details.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**STC 302. Advanced Graphic Design and Photography. 3 Credit Hours.**
This course builds upon photography and image manipulation techniques for varied formats in graphic design, including print, outdoor and non-traditional media. Students will create visual messages and focused visual statements, as well as gain an understanding of how to produce complex conceptual images for advertising using Adobe Creative Suite software. Topics will include conceptual thinking, photography, image manipulation, and creative strategy development and execution.
Prerequisites: STC 102 and STC 202 or STC 203.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**STC 303. Typography and Brand Design. 3 Credit Hours.**
This course will provide an advanced experience in the development and understanding of brand design and typography. Students will develop a custom typeface and create a branding project that will encompass all facets of a brand's experience. Topics included are: typographic essentials, typographic design, creating effective logos and trademarks, visual identity guidelines, packaging, merchandise design and environmental graphics.
Prerequisite: STC 102, and STC 202.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**STC 304. Project Management for Advertising. 3 Credit Hours.**
This course will introduce students to project management methodology, the use of project management tools in the advertising industry and in advertising campaign management, and the key components and approaches to successful project management. Topics include defining a project scope, writing a project plan, defining objectives and metrics of success, and elements of managing a project successfully.
Prerequisite: STC 103.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**STC 311. Public Relations Research. 3 Credit Hours.**
Public relations research techniques focusing on applications of strategic planning, message evaluation, opinion research, and theory testing of public relations programs. Emphasis on qualitative and quantitative methods and data analysis.
Prerequisite: STC 103 OR JMM 285 OR PSY 291 OR PSY 292 OR MAS 201 OR STC 201 OR STC 200.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**STC 312. Research Methods for Advertising. 3 Credit Hours.**
Application of research techniques used in the field of advertising. Students will learn to collect, analyze, and report secondary and primary research findings as they apply to advertising decision-making.
Prerequisite: STC 103 OR JMM 285 OR PSY 291 OR PSY 292 OR MAS 201 OR STC 201 OR STC 200.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**STC 316. Ethics in Strategic Communication. 3 Credit Hours.**
This course will focus on ethical issues as they relate to the fields of advertising and public relations. Case studies will focus on the application of personal and professional ethical standards as applied to contemporary industry practices.
Prerequisite: STC 116 AND Prerequisite: STC 114.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.
STC 330. Travel and Tourism. 3 Credit Hours.
Development of tourism and destination promotion strategies and initiatives. Overview of public relations account structures within the tourism industries of airlines, travel destinations, hotels, and others.
Prerequisite: STC 114 Or STC 116 And Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 331. Advanced Copywriting. 3 Credit Hours.
An advanced course in creative advertising concepts and copywriting. Students learn advanced techniques to create, execute, and pitch persuasive advertising ideas for television, print, social media, radio, and the Internet.
Prerequisite: STC 231.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

STC 334. Social Media Messaging and Strategies. 3 Credit Hours.
This course will examine the utility of major social media platforms as they relate to strategic communication. Topics will include message and campaign development, targeting, engagement, writing across social media platforms, social media management, and analytics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 340. Digital and Mobile Advertising. 3 Credit Hours.
This course will explore the use and effectiveness of digital and mobile advertising platforms for contemporary advertising campaign development, focusing on concepts such as consumer targeting, message development, and the determination of appropriate media selections.
Prerequisite: STC 114.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 346. Public Relations Message Development and Execution. 3 Credit Hours.
This course teaches students to integrate public relations writing and design techniques in order to effectively reach a desired target audience. Students will learn to create strategic messages in multiple outlets, such as enewsletters and brochures, and also will learn how to create and execute successful media pitches.
Prerequisites: STC 203 and STC 232.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 350. International and Cross-cultural Advertising. 3 Credit Hours.
This course will explore the economic, political, and socio-cultural issues that drive the strategies behind multicultural advertising in the U.S., as well as international advertising in the global marketplace. Emphasis will be placed on understanding cultural similarities and differences as they relate to multicultural and international advertising.
Prerequisite: STC 114.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 380. Advertising Internship. 1-3 Credit Hours.
Students select an internship in the field of advertising for on-the-job training. The student will work a minimum of 45 hours per credit. No more than three (3) credits of internship may be completed in any given semester.
Requisite: Sophomore Status, Cumulative GPA 2.5.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 381. Public Relations Internship. 1-3 Credit Hours.
Students select an internship in the field of public relations for on-the-job training. The student will work a minimum of 45 hours per credit. No more than three (3) credits of internship may be completed in any given semester.
Requisite: Sophomore Status, Cumulative GPA 2.5.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
STC 384. Advertising Creative Strategy and Execution. 3 Credit Hours.
This course will have students engaged in the development of creative advertising campaigns. Students will be immersed in the development of big ideas and the execution of those ideas across multiple media platforms to meet specific campaign objectives.
Prerequisite: STC 200. And STC 202. And STC 231.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 388. Media Planning. 3 Credit Hours.
An introduction to the principles and concepts of advertising media planning including media selection, media plan development, forecasting, and budgeting.
Prerequisite: STC 200 or JMM 102 and JMM 108.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 389. Media Buying and Advertising Sales. 3 Credit Hours.
Students will learn the art of buying media in all categories, as well as how to sell advertising space in these media.
Prerequisite: STC 201 and JMM 102 and JMM 108.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 390. Art Direction. 3 Credit Hours.
This course will teach students art direction skills highly focused on the conceptual development and execution of campaigns across multiple media platforms, including print, tv/video, interactive, digital, and social media.
Prerequisites: STC 202 or STC 203 and STC 231 or STC 232.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 401. Seminar in Advertising and Society. 3 Credit Hours.
This course will examine the ethical, persuasive, cultural, societal, and economic effects of advertising, focusing on the theoretical frameworks that explain how advertising works in these arenas.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 404. Advertising Entrepreneurship. 3 Credit Hours.
This course focuses on the entrepreneurial aspects of working in the advertising industry, from the perspective of assisting in the launch of a new brand or company, and from that of the process of defining and starting a new advertising agency business.
Prerequisite: STC 200 and Junior Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 412. Public Opinion and Mass Communication. 3 Credit Hours.
An exploration of the formation and role of public opinion in mass communication. Emphasis is placed on its role in advertising and promotion.
Topics include the evolution and history of public opinion in American culture, the application of public opinion on attitude formation and persuasion, measurement of public opinion, and propaganda.
Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 414. Advanced Research Methods for Advertising. 3 Credit Hours.
This course focuses on the application of advanced research techniques and methods related to the advertising field. Students will focus on practical quantitative and qualitative research techniques, as well as conducting experimental and creative research.
Requisite: Junior Standing or Higher.
Components: RSC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
STC 415. Advanced Business and Advertising Strategy Development. 3 Credit Hours.
This course focuses on the holistic understanding and application of concepts in developing contemporary marketing, advertising and business strategies. Students will learn how to analyze industry, business, consumer, and organizational environments to develop strategic plans and implement an advertising strategy accordingly.
Prerequisite: STC 200 and Junior Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 423. Crisis Communication and Management. 3 Credit Hours.
This course introduces the student to crisis communication and management from a strategies, theory-based approach steeped in case research from historical cases and business case studies.
Prerequisite: STC 116 and STC 201 and Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 424. Media Relations. 3 Credit Hours.
Students in this course will get the inside scoop on how to communicate with reporters, will learn why different media outlets cover the same story in different ways, and how fake news is impacting the field of journalism.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 425. Cases in Public Relations Administration. 3 Credit Hours.
This course will examine the management and administrative functions of public relations using a case-study approach.
Pre-requisites: STC 116. And Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 426. Sports, Publicity, and Promotions. 3 Credit Hours.
This course will provide a review, examination and practical application of sports communications, publicity and promotions in strategic communications.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 428. Public Relations Management. 3 Credit Hours.
Principles and practice of public relations management in a variety of contexts including agency, consultancy, corporate, and nonprofit.
Prerequisite: STC 116 and STC 201 and Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 434. Advertising Campaigns. 3 Credit Hours.
Capstone course in which students develop a full-scale advertising campaign. Students are responsible for conducting secondary and primary research, strategic planning, development of creative executions, planning and executing media selections, and campaign evaluation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 435. Advanced Research Methods for Public Relations. 3 Credit Hours.
This course examines the measures, mechanisms, and necessary considerations for measuring public relations outcomes and communication effectiveness, as well as evaluating the impact of public relations efforts.
Rerequisite: STC 311 & Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
STC 436. Public Relations Campaigns. 3 Credit Hours.
The capstone course for seniors in their last year of study. Theory and principles, audience research, strategic planning, and targeted communication
are applied in developing a campaign to influence attitudes and behavior on behalf of a real client. A written plan, professional presentation, and
teamwork are emphasized.
Prerequisites: Public Relations Requisites by Track.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 437. PR and Politics. 3 Credit Hours.
This course will examine the candidates in current political elections, their likability factors, truthfulness, strengths and weaknesses, and how they get
their messages out to the world.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 438. Practicum in Advertising. 1-3 Credit Hours.
Students will work in the advertising field for advanced on-the-job training in their specific area of advertising specialization.
Prerequisite: STC 380. Requisite: Senior Standing.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 439. Public Relations Practicum. 1-3 Credit Hours.
Students will work in the public relations field for on-the-job training. Students must work a minimum of 45 hours per credit earned.
Prerequisite: STC 381. Requisite: Senior Standing.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 444. Social Media Analytics. 3 Credit Hours.
This course will provide an overview and practical application of various public and commercial social media analytics and tools, and will cover
sources of data, metrics, analyses, and tools used in the development of successful social media campaigns.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 450. Strategic Communication in Health Care. 3 Credit Hours.
This course provides a general introduction to the role of media and strategic communication in healthcare industry. A variety of topics are addressed
from handling internal and external communication practice of health-related organizations to applying the principles of strategic communication to
areas such as healthcare public relations and social marketing.
Prerequisite: STC 114 or STC 116 and STC 200 or STC 201.
Components: LEC.
Grading: GRD.

STC 460. Corporate Communication and Public Relations. 3 Credit Hours.
This course focuses on exploring external and internal environment of organizations. Students will learn how organizations use public relations
and other forms of communication to strategically and effectively communicate with external and internal publics in today's complex business
environment.
Prerequisite: STC 116 and STC 201 and Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 482. International Public Relations. 3 Credit Hours.
This course provides a general introduction to the study and practice of public relations within a global marketplace. A variety of topics are addressed
including the role of culture in global public relations, differences in styles of public relations practices across international groups and the role
organizations play in this process.
Prerequisite: STC 116 and STC 201 and Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
STC 483. Integrated Marketing Communication. 3 Credit Hours.
An exploration of how brands are built and promoted through the integration of advertising, public relations, sales promotion, personal selling, direct marketing, and e-commerce.
Prerequisites: STC 114 or STC 116 or MKT 201.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 488. Digital, Mobile, and Web Media Evaluation. 3 Credit Hours.
Focus on the evaluation of digital, mobile, and web-based advertising as part of integrated advertising media plans. Topics include audience estimation, cost-gathering, and evaluation of potential effectiveness.
Prerequisite: STC 388.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 490. Special Topics in Advertising. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Pre-requisite: STC 114.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 491. The Business of Account Management. 3 Credit Hours.
This course will to lead to a stronger understanding of the role of account management in marketing communication and advertising agencies. Topics will include advertising agency management, client services, and financial planning within the agency.
Prerequisite: STC 200 or Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

This course will provide an advanced creative experience working in teams, while focusing on the creation of award-winning work. Projects are determined by industry award briefs.
Prerequisite: STC 202 and STC 231 and STC 384.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 493. Special Topics in Public Relations. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

STC 495. Advertising Management. 3 Credit Hours.
Students will learn to approach advertising problems at both micro and macro levels from the perspective of a manager in charge of solving such problems. Emphasis will be on problem identification, development of alternative strategies to solve problems, tactics for executing strategies, and evaluation of proposed solutions.
Prerequisites: STC 200 and STC 233 and STC 312 and STC 388. Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

STC 496. Advertising Portfolio Development. 3 Credit Hours.
This course will assist students in putting together a professional-quality advertising portfolio of their work.
Pre/Corequisite: STC 384 and Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
B.S.C. Advertising

Overview

The Department of Strategic Communication offers a major in Advertising.

Students majoring in Advertising learn the art, craft and business of promoting brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development and media planning skills. The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally. The curriculum is hands-on and students learn how to create an advertising campaign that meets their client's goals. Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School's Advertising Program also has an active alliance with the American Advertising Federation.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community. Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

The program offers two tracks: Advertising Creative or Advertising Management. The Advertising Creative track fulfills the Arts & Humanities area of knowledge requirement. The Advertising Management track fulfills the People & Society area of knowledge requirement.

**Mission**

The mission of the advertising program is to introduce students to advertising theory, research, and client services to prepare them for an advertising career.

**Goals**

The program prepares students to be critical thinkers problem-solvers, and globally aware professionals. In addition, in preparation for the ever-evolving advertising industry, students can elect to study general advertising or concentrate their efforts by specializing in advertising management or creative advertising.

Student Learning Outcomes

- Students will be able to conduct primary and secondary research, analyze data, interpret the results, and communicate the results, using statistical analyses and SPSS software for data analysis.
- Students will develop a budgeted media plan to meet reach and frequency goals for a given advertising client, meaning that they can identify the appropriate target audience(s) and reach them effectively with strategically selected media within a limited budget.
- Students will be able to create advertisements for a variety of media, applying appropriate design, art direction and copywriting skills. Students will also be able to develop an effective creative strategy and campaign executions across multiple media to meet client objectives for campaign development.
- Students will research, create, design, and present an advertising campaign of their own creation and then will present their work as they would at an advertising agency, demonstrating effective campaign development and campaign presentation skills.

**B.S.C. Public Relations**

**Overview**

The Department of Strategic Communication offers a major in Public Relations.

Students majoring in Public Relations learn how to promote a client’s business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their public’s. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community. Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

**Total Credit Hours:** 120
STC 424  Media Relations
STC 426  Sports, Publicity, and Promotions
STC 428  Public Relations Management
STC 460  Corporate Communication and Public Relations
STC 482  International Public Relations
STC 493  Special Topics in Public Relations

Marketing Requirement
MKT 301  Marketing Foundations  3

Additional Requirements
ENG 105 and ENG 106  6
STC 103 (Double Counts for Major and Math Requirement)  3
Arts and Humanities Cognate  9
STEM Cognate  9
Minor, Second Major or Elective  51
Total Credit Hours  120

* Students must complete at least one course with an international or intercultural focus. Courses that meet this requirement include: STC 350, STC 482, COS 343, and COS 545. Other courses may be used to fulfill this requirement with the approval of an Advertising faculty advisor. Studying abroad also fulfills this requirement.
* School of Communication students are required to complete a minimum of a minor (inside or outside of the school) in addition to their Communication major to graduate. For an optional 2nd major, please see your advisor.
* School of Communication students must complete 6 credits of English Composition unless exempt based on SAT/ACT score or AP/IB exam, 3-6 credits of Mathematics, http://www.miami.edu/cognates/ and the Advanced Writing and Communication Skills Proficiency requirement.

Upper Level Elective Requirement
36 credits at the 300 level or higher are required for graduation. These credits may be earned from your major, minor and/or second major, and electives.

Mission
The Public Relations Program mission is to prepare professional communicators who understand and can demonstrate the use of theory, research, planning and evaluation in effective public relations practice. We are committed to building students' ability to apply ethical principles to decision-making and to perceive each communication and its intended audience holistically, based on understanding and appreciating cultural and other differences.

Goals
We seek to nurture students' analytic and creative skills with the goal of graduating insightful, resourceful citizens of a global society, and to challenge them with multiple opportunities for learning, self-discovery and professional practice.

Student Learning Outcomes
- Students will demonstrate an understanding of how research is conducted and findings are effectively applied to strategic communication planning and in the practice of public relations, including the ability to conduct secondary and primary research, compile and analyze data via statistical analyses and SPSS software, and interpret and summarize the results.
- Students will write and design effective, audience-sensitive messages for public relations purposes in settings inside and outside the classroom that follow standards of professional practice.
- Students will demonstrate the ability to prepare and evaluate strategic communication plans/proposals at a professional level, which requires effective research, writing, design and oral presentation skills.

Minor in Advertising
Overview
Students minoring in Advertising learn the art, craft and business of promoting brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development and media planning skills. The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally. The curriculum is hands-on and students learn how to create an advertising campaign that meets their client's goals. Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School's Advertising Program also has an active alliance with the American Advertising Federation.

Minor in Public Relations

Overview

Students minoring in Public Relations learn how to promote a client’s business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their public’s. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community. Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

* A grade of C or higher is required in all courses (a C- is not acceptable).

**Minor in Strategic Communication**

**Overview**
The Department of Strategic Communication offers minors in Advertising, Public Relations and Strategic Communication.

Students minoring in strategic communication learn about the fields of both advertising and public relations and how each approach contributes to the effective promotion of products, brands, services, non-profit organizations, and various other entities.

**Continuing and International Education**

http://www.continue.miami.edu

The University of Miami Division of Continuing & International Education (DCIE) is dedicated to providing the highest quality education and training — both on campus and online — to people of all ages, throughout every stage of their lives. DCIE offers undergraduate, graduate and noncredit courses (including online and hybrid options) that span a wide array of academic disciplines. Our programs help advance and enrich students who are either beginning their academic journey to seasoned professionals pursuing career opportunities within the global community.

DCIE manages the following programs:

- Adult Student Access Program (p. 975) (non-degree status enrollment in undergraduate and graduate credit classes)

  - Credit certificate programs (p. 978)
    - Noncredit professional certificate programs (p. 2992)
    - Bachelor of General Studies degree program for adults 22+ (p. 976)
    - Summer college credit programs for high school students (p. 2998)
    - Intensive English language programs for international students (p. 979)
    - Intensive language programs (p. 979)
    - Osher lifelong learning community for adults aged 50+
    - Corporate/custom training and workforce development programs

**Adult Student Access Program**

www.miami.edu/asap
Students that meet the minimum requirements may be eligible to enroll in a maximum of 30 credit hours in an undergraduate, non-degree seeking category. Classes may be applied to certain degree programs, after all application and degree-seeking requirements are met. In order to be enrolled in this category, students submit an online application (http://www.miami.edu/asap/) with any required documents. A minimum 2.5 G.P.A. is required to continue in the program beyond 12 attempted credit hours.

Students that meet the minimum requirements may enroll in up to 6 credit hours (600/700 lecture classes only), lifetime maximum, in a graduate non-degree seeking category. Classes may be applied to certain degree programs, after all application and degree-seeking requirements are met. Not all graduate departments participate in this program. In order to enroll in this category, students submit an online application (http://www.miami.edu/asap/), after securing the written permission of the participating graduate department.

For more information, contact: The Adult Student Access Program, Division of Continuing and International Education, University of Miami, umnondegree@miami.edu, 305-284-4000.

Bachelor of General Studies

www.miami.edu/bgs

Introduction

Under the leadership of Collegiate Studies, the College of Arts and Sciences offers the Bachelor of General Studies (BGS) degree program through the DCIE, which provides a solid and rigorous, interdisciplinary academic experience for adult students. It is designed specifically for adults who have previously attended college but have not yet completed their undergraduate degrees, as well as for those who have never had the opportunity to pursue post-secondary studies. Admitted students may attend in either a part-time of full-time status. Prospective students are eligible for admission if graduated from high school at least four years ago, have not attended the University of Miami during the past calendar year, have a minimum of 2.2 grade-point average on previous college work, and are U.S. citizens or permanent residents. Students must be pursuing first undergraduate degree.

The BGS curriculum allows an individual the flexibility to design an area of concentration to enhance professional or personal goals. Designed to strengthen critical thinking and writing skills of the students, each course is taught by University of Miami faculty who are committed to the adult student.

Advisors offer personalized attention in career exploration and academic advising and discuss educational alternatives with potential students. Every effort is made to ensure that the process - from admission to registration - is efficient, convenient, and flexible. Students may complete their degree by attending online and on-campus courses.

To underscore its commitment to the adults in our community, the University offers a special tuition to students in the Bachelor of General Studies program which enables the adult, part-time student to pursue this degree at an affordable tuition rate.

The admission process takes into consideration that one's grade-point average, while significant, is only one factor in determining an applicant's qualification for acceptance. Therefore, an advising session with an enrollment advisor from DCIE will be scheduled, by calling Collegiate Studies at 305-284-4000, to supplement the information you provide on the BGS application form (https://bgs.dcie.miami.edu/apply_now/how_to_apply/).

Requirements for Graduation

I. Candidates for the Bachelor of General Studies (BGS) degree must complete the required credit hours and achieve the quality point average specified for students in the University at large as stated in the section Academic Regulations and Procedures. Candidates must earn a C or better in approved classes of their Area of Concentration. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours for that subject as a general requirement for graduation, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied towards the 120 required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

### Arts and Humanities
Select a total 9 credit hours in any of the following disciplines:
- American Studies in Humanities
- Art
- Art History
- Communications (Motion Pictures)
- Dance
- Theatre Arts
- Musicology
- English
- Philosophy
- Religion or Women's Studies in Humanities

### People and Society
Select a total of 9 credit hours in any of the following disciplines:
- African American Studies
- American Studies in Social Science
- Anthropology
- Communication
- Economics
- Education and Psychological Studies
- Geography
- Judaic Studies
- Political Science
- Psychology and Sociology

### STEM
Select one 3 credit hour course in computer information systems, business technology or media management
Select 6 credit hours in one or more of the following disciplines:
- Biology
- Chemistry
- Geological Sciences
- Environmental Science
- Marine Sciences
- Physics and Physical Sciences

### Degree Requirements

#### Additional Arts and Humanities
Select a total of 12 credit hours in each of the following disciplines:
- Art History
- Literature
- Philosophy
- Religious Studies

#### Foreign Languages
Select a minimum of 3 credit hours of foreign language at the 200 course level or higher.
History Survey Sequence
Select a total of 6 credit hours in a single two semester sequence

Area of Concentration
Every candidate for a degree must select an area of concentration. 2
ENG 333 Writing the Research Paper 3

Secondary Focus 4
Select four more secondary courses to compliment AOC (previously Interdisciplinary courses)

Electives
Select elective courses in consultation with their advisor to meet the 120 credit hour graduation requirement

Total Credit Hours

During the first year of enrollment in the School.

The candidate designs an area of concentration that meets his/her professional and personal goals. The course of study is reviewed and approved by the Dean and/or Director of the program. Candidates must earn a C or better in approved classes.

ENG 333 Writing the Research Paper is a Pre-requisite to completing courses in Area of Concentration and/or Secondary Focus.

Secondary Focus courses are especially designated to complement the AOC, enhance professional knowledge, cultural perspective and its relation to contemporary society.

Mission
The mission of the BGS program is to provide adult learners (over age 22) with a pathway to a high quality, flexibly scheduled undergraduate education tailored to their academic and career goals.

Goals
This program balances student interests, represented by their areas of concentration, with intellectually broadening interdisciplinary coursework, and it advances their written communication skills.

Student Learning Outcomes
• Students will demonstrate advanced levels of written communication.
• Students will demonstrate in depth knowledge of historical, social and cultural perspectives and their relation to contemporary society.
• Students will demonstrate their critical thinking abilities.

Credit Certificate Programs
miami.edu/ccp

Not everyone needs or wants a complete degree program. Recognizing this, the DCIE - in cooperation with several other colleges and schools of the University - offers special Credit Certificate Programs.

Focusing on a single subject, these certificate programs allow students to concentrate on courses that offer the specific knowledge and skills needed for career advancement. All courses are taught by University of Miami faculty at the undergraduate level and are taken for academic credit hour.

Each certificate program varies in the number of required credit hours. While required courses are noted, students may work with an advisor in developing an individually-designed program.

If accepted to the Credit Certificate Program (CCP) a student will acknowledge that in order to receive the certificate they must remain continuously enrolled in the Credit Certificate Program Plan earning the required number of credits/courses. If a student becomes enrolled in another academic program plan (graduate or undergraduate) before completing the Credit Certificate Program the student will automatically be discontinued in the Credit Certificate Program and will no longer be eligible to receive the Certificate.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.
Certificate in Accounting

The Undergraduate Certificate in Accounting is awarded by the Division of Continuing and International Education and the Department of Accounting. It is designed for those who hold at least an undergraduate degree (preferably in business) from an accredited college or university, and whose present interest or occupation is accounting. The program requires students to take the same 24 credit hours of accounting courses (as listed below) required for the undergraduate major in Accounting. To sit for the Certified Public Accountant (CPA) examination in Florida, students must have completed 120 credit hours, including 24 credit hours of accounting (above the elementary level) and 24 credit hours of business courses, including a minimum of six credit hours of business law. There are additional educational requirements to become licensed as a Certified Public Accountant in Florida. Students may wish to consider either the Graduate Certificate in Accounting or the Graduate Certificate in Taxation (offered by the School of Business) to meet those additional education requirements.

Business Technology

The Business Technology (previously CIS) program is designed to provide a broad background in business computer information systems and to develop the technical skills one needs to stay competitive in this challenging field. The program will be of particular benefit to programmers and to management information systems analysts. The certificate is awarded by the DCIE and the Department of Business Technology upon the successful completion of 18 credit hours as listed below.

Intensive Language Institute

The Intensive Language Institute (ILI) offers comprehensive language instruction for academic, professional, and personal purposes. It is part of the Division of Continuing and International Education. Our offices are located in 111 Allen Hall. Inquires about any of our programs may be directed to 305-284-2752.
The School of Education and Human Development (SEHD) offers undergraduate majors in:

**Introduction**

The School of Education and Human Development (SEHD) offers undergraduate majors in:
• Human and Social Development
  • Track I: Individual and Relational Development
  • Track II: Community and Program Development
  • Track III: Human and Social Development Studies
• Exercise Physiology
• Sport Administration
  • Elementary (K-6)/Exceptional Student Education (K-12) with ESOL and Reading Endorsements (K-12)

The degrees of Master of Science in Education, Specialist in Education, Doctor of Education, and Doctor of Philosophy are available in various departments within the School. These programs are under the supervision of the Dean of the Graduate School and the School of Education and Human Development Sr. Associate Dean for Graduate Studies.

Vision/Mission
Our vision is to be a center of excellence in the study, promotion and integration of educational, psychological, and physical well-being in multicultural communities.

Our mission is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community.

Academic Policies
Academic Integrity Statement
Academic integrity is fundamental to scholarship, good citizenry, and individual success. All students in the School of Education and Human Development are expected to abide by the University of Miami Honor Code (https://doso.studentaffairs.miami.edu/_assets/pdf/policies/student_rights_and_responsibilities_handbook.pdf#page=10). It was established “to preserve the academic integrity of the student body, to encourage consistent ethical behavior among undergraduates, and to foster a climate of fair competition.” Please become thoroughly familiar with the provisions of the Code, academic dishonesty and violations of the Honor Code will not be tolerated.

Admission
Applications for incoming freshman are processed and reviewed by the Office of Admission.

Application to the Bachelor of Science in Education program is requested by February 1st.

Early application is encouraged.

Transfer students: The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 GPA is recommended for transfer admission.

Application deadline for transfer students is March 1st.

Students admitted into the SEHD programs are held to the program requirements stated in the Bulletin for that term.

Student Responsibilities
Students are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with the provisions set forth in this Bulletin and written changes to their program of study. Written requests for variation from program or school requirements are reviewed by an administrative committee.

Matriculated students who elect to transfer courses from another institution over a summer or intersession term, must receive departmental or program approval prior to enrolling in the course. Students are responsible for adhering to the residency rule which states that the last 45 consecutive credits must be earned at UM.

A student advising compact specifies the dual responsibilities between students and advisors in each program.

Transfer Approval for Coursework from other Institutions
The Associate Dean for Undergraduate Academic Services makes the final determination for transfer course equivalency. Transfer courses for minors and cognates will not be accepted once students have matriculated to the University of Miami. New transfer students may be awarded a maximum of one course toward a cognate (3 credits) and a maximum of two courses or 6 credits toward a minor.

The school has a very strict transfer policy regarding on-line course work from matriculated students. Students must present a syllabus for course evaluations.
Students who are transferring into the Department of Teaching and Learning's Elementary Education/Special Education program, must submit official scores of the General Knowledge Test (GKT), first of the required tests for the Florida Teacher Certification Exams (FTCE). Students who do not submit these scores will not be allowed to enroll in any TAL course.

**Academic Progress and Probation**

The School will review each student's record at the end of each semester.

When a student's semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with the School of Education and Human Development policies and procedures.

Students on probation are not permitted to enroll in more than 12 credit hours, shall make arrangements to meet on a monthly basis with their academic advisor, and may have a STOP placed on their future enrollment until grades are further reviewed. The following criteria will determine probationary status.

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>CGPA</th>
<th>CGPA (Exercise Physiology Majors Only)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 30 credit hours</td>
<td>1.7</td>
<td>2.0</td>
</tr>

<td>2.0</td>
<td>2.5</td>
</tr>
<tr>
<td>60+ credit hours</td>
<td>2.3</td>
<td>2.5</td>
</tr>
</tbody>
</table>

Note: The minimum GPA required for graduation from a Teacher Education Program is 2.5.

**Subject to Dismissal**

A student who remains on academic probation twice during their undergraduate studies can be designated as “Subject to Dismissal” and will be dismissed the following semester if not removed from probationary status. It is **not** required to be on this status to be dismissed from the School of Education and Human Development or from the University of Miami.

**Academic Dismissal**

A student in the School of Education and Human Development whose CGPA or progress toward degree completion, falls below the level of the minimum standards of the University of Miami and/or the School of Education and Human Development, may be dismissed. Faculty may recommend that a student be dismissed from a program due to academic concerns.

Students should familiarize themselves with their program's undergraduate handbook that outlines specific student responsibilities. Student responsibilities include but are not limited to appropriate dress and professional conduct when working in an internship, research, or field experience capacity. Students may be dismissed from a program by the department's faculty for violations outlined in the handbook.

**Accreditation**

Kinesiology and Sport Sciences offers the Athletic Training Program that is accredited by the Commission on Accreditation of Athletic Training Education (CAATE); the Sport Administration Program is approved by the North American Society of Sport Management.

The Department of Teaching and Learning in The School of Education and Human Development offers Teacher Education Programs approved by the Florida Department of Education. In conjunction with the Phillip and Patricia Frost School of Music, the School of Education and Human Development offers Teacher Education Programs in Music Education at the undergraduate and graduate levels. Students who successfully complete their program of studies and submit an application to the Florida Department of Education - Bureau of Educator Certification are eligible to receive a Professional Teaching Certificate.

The policy for practicum, internship and clinical lab credit hours will vary by program. Please check the specific program requirements with your academic advisor or program director.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years. President Foote passed away in the spring, 2016 but his legacy lives on through the Foote Fellow Honors Program that recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources within the curricular framework of their school or college. Many Foote Fellows leverage this opportunity to pursue additional majors and/or minors and to study abroad.

The School of Education and Human Development (SEHD) offers a first year inter-disciplinary seminar exclusively for Foote Fellows lead by the dean of the school.

Foote Fellows have preferential advising for course registration with their advisor, Associate Dean, Gina Astorini. Dean Astorini assists Foote Fellows to chart their academic path and to attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships. They also have early registration appointments thus providing optimal access to the most exciting and popular courses on campus.
Foote Fellows are invited to participate in the Research Honors Program. This is a two year program where students complete the following components:

- 2 consecutive semesters of faculty mentored research (2-credits each semester)
- A Thesis (20 page minimum-faculty mentored)
- Seminar and poster presentation at the Undergraduate Research, Creativity and Innovation Forum in the spring
- Students who complete the program will have their transcripts stamped with Research Honors Designation.

The SEHD has partnered with the Melissa Institute of Miami. The Melissa Institute, conducts research and sponsors conferences, forums and seminars throughout the year addressing school bullying, domestic violence, prevention, education, awareness and community engagement directed at reducing violence. The SEHD, through the generosity of the Melissa Institute, offers complimentary tickets to Foote Fellow students in our program to attend these conferences/seminars during the semester.

Foote Fellows are invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Additionally, Foote Fellows benefit from early move-in to the residential colleges and receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellow Program will provide an enriching experience for students who have been accepted by UM.

**Honors Program in Exercise Physiology (HPEP)**

The Kinesiology and Sport Sciences Department offers an accelerated Master degree program for students who have completed their 4-year undergraduate program in Exercise Physiology. It allows students to complete a Masters degree in Applied Exercise Physiology within one year of earning a BS degree in Exercise Physiology.

The additional year of study will enable students to complete all requirements leading to a Master of Science degree in the School of Education and Human Development (M.S. Ed.). Applicants must be in the top 10% of their high school graduating class. Students must have a combined Math and Verbal SAT score of 1300 or an ACT score above 30 and an unweighted minimum GPA of 3.0 or above. The Exercise Physiology and HPEP application forms and supporting materials must be submitted no later than September 1st of the applicant's senior year. A review of completed applications will begin by the end of September.

For further information and application forms please visit this website (http://www.miami.edu/dualdegree/).

**Educational and Psychological Studies**

Dept. Code: EPS

**Bachelor of Science in Education: Human and Social Development**

The major in Human and Social Development (HSD) focuses on the promotion of healthy development and well-being. It prepares students to work with people in multiple contexts and settings:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements
- socially responsible business and entrepreneurial organizations

By exploring the scholarly and practical interconnections among individual, interpersonal, and community approaches to change, students learn to identify barriers to well-being and to implement effective change-oriented strategies and policies. HSD coursework emphasizes theory, research, and skills. It culminates in a practicum in a setting related to students' area of interest and prepares them for both graduate studies and careers.

Students choose between three areas of concentration (tracks).

- **Track I: Introduction to Counseling** (Track Code: HSDI)
  This track emphasizes individual, relational, and family well-being. Focusing on context and diversity in mental health and on strength-based, preventive, and empowering approaches, courses cover family studies, counseling theories and techniques, interviewing skills, and the basics of human service work. Students are well-prepared for graduate study in the helping professions and careers in health and human services.

- **Track II: Community and Program Development** (Track Code: HSDC)
  This track promotes healthy individual and community development by emphasizing how social, institutional, and community dynamics affect personal well-being. Stressing the role of non-government agencies in fostering well-being for people with diverse backgrounds, HSDC prepares students to diagnose institutional and community challenges and offer strategies for positive change. Courses include community-focused
planning, needs assessment, and change strategies and nonprofit program development, implementation, and evaluation. Students are well prepared for graduate study in community psychology and public policy and careers in community organizations.

- **Track III: Human and Social Development Studies (Track Code: HSDS)**
  This is a general track which offers a menu of courses relating to individual and community development. HSDS students are free to combine classes from the Individual (HSDI) and Community (HSDC) tracks. This track meets the needs of students who seek greater flexibility in course work and are less concerned with specializing in the individual or community tracks.

HSD students must declare an approved second major or a minor either in the School of Education or through any other school or college.

**Requirements for Graduation**

**Bachelor of Science in Education**

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only. Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education and Human Development.

V. Required Areas of Study

1. **English Composition 3 – 6 credit hours**
   Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105. Courses satisfying the English Composition requirement may not be used to fulfill the Advanced Writing and Communication Requirement.

2. **Mathematics**
   B.S.Ed. degree candidates in the Department of Educational and Psychological Studies are required to take EPS 351. This course fulfills a Math requirement for the HSD major. Prior to taking EPS 351, students must complete MTH 101 or be exempt from MTH 101 based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics.

3. **Foreign Languages (not applicable)**

**Areas of Knowledge and Cognate Requirements**

The University of Miami’s General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a Cognate, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement, one in the **Arts & Humanities (A&H)**, one in **People & Society (P&S)**, and one in **Science, Technology, Engineering & Mathematics (STEM)**.
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
• In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in that one area.
  • Exercise Physiology and Athletic Training majors will fulfill the STEM cognate.
  • Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the P&S cognate.
• An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Skills Requirement

Every student majoring in Human and Social Development, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses in the HSD major which meet the Advanced Writing and Communication Skills Requirement are EPS 321, EPS 371 and EPS 579.

VII. Major in Human and Social Development

• Every candidate for the B.S.Ed. degree in the Department of Educational and Psychological Studies must choose a major in Human and Social Development.
• Students choose among three areas of concentration:
  • Track I – Introduction to Counseling (HSDI);
  • Track II – Community and Program Development (HSDC);
  • Track III – Human and Social Development Studies (HSDS).
   To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.
• Students majoring in HSD must complete a Diversity requirement that is fulfilled by taking one of the following courses: EPS 411, EPS 412, or EPS 430. Students should discuss this requirement with their advisor.
• HSD majors must maintain a minimum overall grade point average of 2.0 with a grade of "C" or better in all courses in the major.
• HSD students must declare an approved second major or a minor in the School of Education and Human Development or through any other UM school or college.

VIII. Minor

B.S.Ed. majors in Human and Social Development are required to declare a minor.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

For further information, address all inquiries to:

Associate Dean
School of Education and Human Development
P. O. Box 248065
University of Miami
Coral Gables, Florida 33124
Telephone: 305-284-3711

EPS 201. Psychosocial Change and Well-being. 3 Credit Hours.
Introduction to personal and interpersonal approaches to well-being. Includes theoretical, historical, philosophical, and psychological bases of well-being. Emphasis will be placed on real-life applications of theory and practice to the promotion of psychosocial change and well-being.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
EPS 270. Lifespan Human Development. 3 Credit Hours.
Processes and theories of human development from birth to old age are explored. Areas to be covered include: physical development, cognitive development, social and personality development, moral development, and language development. Emphasis is placed on development as a life-long process and its importance in understanding human behavior.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 280. Introduction to Family Studies: Dating, Coupling, Parenting. 3 Credit Hours.
Theory and practice of romantic relationships and parent-child relationships, including discussion and skills building. Research based information on how to maximize the quality of these interpersonal relationships will be examined.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 291. Community and Character Development. 3 Credit Hours.
The course covers moral and psychological dimensions pertaining to character development as it occurs in communities. Topics include contemporary theory and research regarding perspectives on virtue and morality, states of character, ethical decision making, and character development. The reciprocal relationships between character and community will be a central theme in exploring ethical issues that arise in working with individuals, institutions, and communities. Theory and research will be linked to relevant applications.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 306. Insanity and Humanity: Mental Illness, Society, Stigma and Services. 3 Credit Hours.
The genesis for this course was the generally poor, inaccurate and stigmatized understanding of mental illness in society based on portrayals in popular media including Hollywood produced films. However, over the past several years the depth and accuracy of awareness and knowledge has changed, as the depiction of mental illness and treatment services in films has improved and the availability of narrative accounts has increased. This course is designed to allow Human and Social Development majors, with a particular interest in wellness and human services, to explore varying portrayals of mental illnesses in popular media. The course will foster critical analysis of narrative and film depictions of illness, as well as connect these depictions to a broader narrative on stigma, social determinants of illness and wellness, prevention and intervention.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 311. Group Processes and Development. 3 Credit Hours.
Research findings concerning the nature of small groups and patterns of behavior associated with them are explored. Students experience an ongoing group process to which theories and concepts can be applied. Emphasis is placed on learning to be a participant observer of group behavior and processes, learning about one’s own behavior in groups, and developing skills to be a more effective member and leader in task groups.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 321. Understanding Human Service Organizations. 3 Credit Hours.
Focus on unique role of community-bases human services organizations in society with an overview and history of community organizations, which provide services, support, advocacy, and organizing in today’s communities. Review of the systems, cultures, structures, and processes of community organizations with a special emphasis on promoting well-being in communities. This course has a 10 hours field research experience requirement.
This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.
Prerequisite: EPS 201 or Co-requisite: EPS 311.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 340. Psychology and Sociology of Sexual Identity. 3 Credit Hours.
History, psychology, and sociology of gay, lesbian, and transgendered populations.
Prerequisite: PSY 110 or SOC 101.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
EPS 351. Introduction to Statistics and Research Design. 3 Credit Hours.
The course will cover basic statistics relevant to the social sciences (e.g., central tendency, variation, t-tests, correlations), with emphasis on real world applications employing commonly used research designs. Students will acquire the tools necessary to interpret elementary statistical analyses and a foundation in the basic analytic methods used in conducting quantitative research in the behavioral sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 360. Educational Psychology. 3 Credit Hours.
A review of basic educational psychology principles including cognitive and language development, personal, social and moral development, learning theories, and motivation. A review of basic concepts that contribute to effective learning and other aspects of education.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
EPS 361. Community Psychology and Development. 3 Credit Hours.
Community psychology is about the prevention of psychosocial problems and the promotion of mental health and well being through the creation of equitable and just social settings, neighborhoods, communities, and societies. Course topics include: stress and social support; oppression and human diversity; primary prevention, social intervention and health promotion; self-help; mediating structures; community mental health; alternative settings; community development and social change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
EPS 365. Psychological Study of Children, Families, and the Law. 3 Credit Hours.
This course will introduce students to the psychological research and practice that has a bearing on legal policy and practice. Psychological research (social, clinical, developmental, and community) will be emphasized along with legal rulings, especially from the Supreme Court. Throughout the course, the underlying question will be, "How can psychological research and theory inform the law in matters that relate to children, families, and communities?"
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 371. Applied Social Research Methods. 3 Credit Hours.
The study of the ethics, philosophies, designs, methods and techniques of research in the behavioral and social sciences. This course provides a brief orientation to quantitative, qualitative, mixed-methods, and participatory research designs and approaches used in the collection, analysis and interpretation of social research data. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 411. The Psychology of Diversity. 3 Credit Hours.
This course critically examines how diversity and social justice issues impact everyday life. The focus is on how personal, group, and cultural identities (race, ethnicity, gender, sexual orientation, age, disability, religion, immigration status, and social class), and the intersections of these identities influence individuals’ lives and experiences. This is primarily a survey course, designed to introduce major concepts, models, theories, and research that emanate from the literature on diversity and multicultural psychology. This is a critical backdrop to prepare students to be multiculturally responsive in this increasingly global society. Borrowing from history, cultural anthropology, social psychology, indigenous psychology, counseling psychology, and general psychology, the curriculum will engage students in theoretical, research-based, and experiential exercises in order to develop a comprehensive understanding that will lead to culturally responsive and ethical mindsets and practice.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 412. Migration, Well Being, and Human Development. 3 Credit Hours.
This course explores the social and psychological processes involved in migration and issues relevant to well-being of diverse immigrant groups including immigration policies, the psychology of immigration and acculturation, ethnic identities, issues in immigrant families, immigrant communities, educational, health, and mental health issues.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 420. Introduction to Counseling and Psychotherapy. 3 Credit Hours.
This course is a survey of the theories and practical applications of counseling and psychotherapy. Students will acquire an understanding of a variety of theories of psychotherapy, the basic requirements and skills for effective, ethical counseling, and an appreciation for the role of values and human differences in counseling and psychotherapy. This course does not prepare students for practice in mental health professions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 430. Intergroup Dialogues. 3 Credit Hours.
The Intergroup Dialogue course will provide an opportunity for students to engage in dialogue across difference. Students will have the opportunity to learn about and discuss social identities and intersectionality in relation to various social identities, with a focus on social justice. The course will focus on understanding of perspectives and ideas that facilitate intellectual advancement as well as personal development as members of the UM community, and the larger community in which we are situated. Note: the focal social identity varies by class section: please refer to the Class Notes for information on the social identity that will be the main focus of this section.
Components: IDG.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 440. Listening and Helping Skills. 3 Credit Hours.
Listening and Helping Skills is an introductory course to the foundational skills used in helping relationships. Through lectures, discussions and role-plays, students will learn the rationale behind basic helping skills and their application to diverse settings and contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 452. Community Program Development and Evaluation. 3 Credit Hours.
This course addresses the theoretical and practical principles of designing, planning, implementing, and evaluating programs in community-based settings. The students will learn about prevention, effective program development, program approaches, program components, program evaluation, and cultural proficiency in program development and evaluation. Students will acquire and practice skills for becoming effective workers and leaders in community-based agencies. The course will consist of readings, presentations, and applied knowledge.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 462. Community Consultation and Leadership. 3 Credit Hours.
This course will cover strength based, preventive, empowering approaches to institutional and community change, and will address related skills, stages, processes and outcomes; Conflict resolution, facilitation, strategic planning, visioning, advocacy, change management, and community mobilization will be studied and practiced in class.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 504. Mentored Research Studies. 1-3 Credit Hours.
Under the guidance of EPS faculty and graduate students, undergraduate students, will have an opportunity to get involved in various components of research study; gain valuable knowledge and research experience; and expand their undergraduate academic experience.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 533. Organization and Administration of Higher Education I. 3 Credit Hours.
Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 578. Human and Social Development Practicum. 3-6 Credit Hours.
The practicum serves an integrative function: it allows students to apply their academic training, to further develop their career goals, and to hone their skills while gaining experience in real-world settings. Practica are unpaid, supervised experiences. Students choose from a menu of settings that have been approved as HSD practicum sites and spend a minimum of 120 hours (3 credits) or 250 hours (6 credits) at their chose setting over the course of the semester. Must be taken concurrently with EPS 481.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.
EPS 579. Human and Social Development Practicum Seminar. 3 Credit Hours.
The Practicum Seminar brings theory and research to bear on the student's practicum experiences, and provides a forum for further professional skill development and growth. Students will complete a major project integrating their experiences. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 587. Special Topics in Human and Social Development. 1-3 Credit Hours.
This course is designed for students wishing to focus on a specific area of study within the umbrella of Human and Social Development. Topics will be offered based on current trends in the field as well as student and faculty interest. Students will be given supervision and support in a structured seminar setting.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 589. Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 592. Workshop in Education. 1-3 Credit Hours.
Study in special interest areas in education.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 593. Workshop in Education. 3 Credit Hours.
Study in special interest areas in education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 595. Research Project I. 2 Credit Hours.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 596. Research Project II. 2 Credit Hours.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 597. Research Project - Thesis Writing. 1-3 Credit Hours.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 598. Research Project - Seminar. 1 Credit Hour.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor. Students are required to present at the undergraduate Research, Creativity, and Innovation Forum.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 599. Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
B.S.Ed. in Community and Applied Psychological Studies

Overview

The major in Community and Applied Psychological Studies (CAPS) focuses on the promotion of healthy development and well-being. It prepares students to work with people in multiple contexts and settings:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements
- socially responsible business and entrepreneurial organizations

By exploring the scholarly and practical interconnections among individual, interpersonal, social, and community approaches to change, students learn to identify barriers to well-being and to implement effective change-oriented strategies and policies. CAPS coursework emphasizes theory, research, and skills. It culminates in a practicum in a setting related to students' area of interest and prepares them for both graduate studies and careers.

Students choose between three areas of concentration (tracks).

- **Track I: Individual and Relational Development (Track Code: HSDI)**
  This track emphasizes individual, relational, and family well-being. Focusing on context and diversity in mental health and on strength-based, preventive, and empowering approaches, courses cover family studies, counseling theories and techniques, interviewing skills, and the basics of human service work. Students are well-prepared for graduate study in the helping professions and careers in health and human services.

- **Track II: Community and Program Development (Track Code: HSDC)**
  This track promotes healthy individual and community development by emphasizing how social, institutional, and community dynamics affect personal well-being. Stressing the role of non-government agencies in fostering well-being for people with diverse backgrounds, HSDC prepares students to diagnose institutional and community challenges and offer strategies for positive change. Courses include community-focused planning, needs assessment, and change strategies and nonprofit program development, implementation, and evaluation. Students are well prepared for graduate study in community psychology and public policy and careers in community organizations.

- **Track III: Human and Social Development Studies (Track Code: HSDS)**
  This is a general track which offers a menu of courses relating to individual and community development. HSDS students are free to combine classes from the Individual (HSDI) and Community (HSDC) tracks. This track meets the needs of students who seek greater flexibility in course work and are less concerned with specializing in the individual or community tracks.

CAPS students must declare an approved second major or a minor either in the School of Education or through any other school or college.

Mission

The major in Community and Applied Psychological Studies (CAPS) seeks to train leading thinkers, professionals, and future scholars in the pursuit of innovative, scientific, and practical approaches to the promotion of healthy development and well-being. Students are exposed to scholarly and applied knowledge bases regarding the interconnectedness of personal, interpersonal, institutional, and community change, barriers to healthy development and well-being at these levels, and strategies and policies that promote well-being in individuals, families, and communities.

Goals

The CAPS major prepares students to enter competitive graduate programs and to work with people in multiple contexts and settings, including:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements
- socially responsible corporations.

Student Learning Outcomes

- Students will demonstrate in-depth knowledge of the field including intrapersonal, interpersonal, institutional, and community development and well-being; common barriers to well-being at various ecological levels; and strategies to promote healthy development and well-being in individuals, institutions, and communities.
- Students will demonstrate reflective and critical thinking skills.
- Students will demonstrate superior and skillful writing proficiency using language and grammar accurately, efficiently and effectively.

</tbody>
</table>

* The requirements of the minor are 15 credit hours with a grade of C or better.
  Nine of these 15 credit hours must be earned at the University of Miami; with prior approval, three of these nine may be taken through the UM Study Abroad Program.

** All transfer course equivalencies, (up to 6 credits), must be approved by the EPS department.

*** The undergraduate coursework in Human and Social Development is open to all qualified University of Miami students.
Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student’s degree granting college or school.

## Kinesiology and Sport Sciences

Dept. Code: KIN

The School of Education and Human Development offers undergraduate studies in the Kinesiology and Sport Sciences Department. The Department provides some of the strongest programs in the field, providing a structured classroom setting immersed in theory and knowledge with clinical and practical experiences. The department is committed to fostering unique and collaborative efforts within our diverse University community. Students are encouraged to engage in various work and clinical experiences including opportunities at the Medical School, the Miami Project to cure paralysis, UM Varsity Athletics Department, South Florida sports industry, Sports Medicine Clinics, Veterans Administration Hospital, and local high schools. Students can choose to major in one of the following areas:

- Exercise Physiology (with a pre-medical or pre-physical therapy track)
- Sport Administration

## Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education and Human Development.

V. Required Areas of Study.

1. **English Composition**
   - Students must take ENG 105 and ENG 106 (or their equivalent) during the first year of enrollment in the School. Admission to ENG 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and ENG 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

2. **Mathematics**
   - B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests. Statistics does not satisfy the Math requirement. B.S. in Athletic Training and B.S. in Exercise Physiology have different Math requirements. Please see specific program requirements.

3. **Foreign Languages (applicable to Sport Administration majors only)**
   - Students must earn at least 3 credit hours of a foreign language at the 200 course level or higher. Special 200-level courses are required of native speakers who choose to fulfill the language requirement. Two semesters of American Sign Language constitutes an acceptable alternative for the Foreign Language Requirement.

## Areas of Knowledge and Cognate Requirements

The University of Miami’s General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a Cognate, which is a cluster of courses arranged by their content, field and interest.
A cognate is a group of at least three related courses for at least 9 credit hours.

- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement,
  - one in the Arts & Humanities (A&H),
  - one in People & Society (P&S), and
  - one in Science, Technology, Engineering & Mathematics (STEM).

- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
  - Exercise Physiology and Athletic Training majors will fulfill the STEM cognate.
  - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the P&S cognate.
- An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Requirement

Every student majoring in a program from the Kinesiology and Sport Sciences Department will meet the Advanced Writing and Communication Requirement upon fulfillment of the courses for that major. These courses have a prerequisite of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral components will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. The following courses meet the Advanced Writing and Communication Skills Requirement for the major:

- Athletic Training: KIN 250 and KIN 260
- Exercise Physiology: KIN 365 and KIN 457
- Sport Administration: KIN 308 and KIN 498

VII. Majors

Every candidate for the B.S. Athletic Training degree must choose Athletic Training as a major. Every candidate for the B.S. EXPH degree must choose Exercise Physiology as a major. Every candidate for the B.S. Ed. degree must choose a major in Sport Administration. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.

The choice of majors should be made no later than the beginning of the junior year and must be approved by the major department. Any student making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

Students who are majoring in either Athletic Training or Exercise Physiology must be Students in the School of Education and Human Development. Students who are double majoring with any program must have the first major declared as either Athletic Training or Exercise Physiology.

VIII. Minors

B.S. Ed. majors in Sport Administration and B.S. EXPS majors in Exercise Physiology are required to declare a minor. Sport Administration students require department approval before declaring a minor. Exercise Physiology students may choose not to declare a minor if following the pre-med track. Students must complete all of the pre-med courses in order to be waived from the minor requirement. Please consult an advisor for clarification of this requirement.

Athletic Training majors are not required to have a minor.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

Minors

A minor in any of the three areas below consists of 15 credit hours:

Exercise Physiology
Sport Administration

Sports Medicine

- A grade of C or better is required for each course applied toward the minor; the overall grade point average for the minor must be 2.5 or above.
- The undergraduate coursework in Exercise Physiology, Sports Medicine, and Sport Administration are open to all qualified University of Miami students. A student can minor in either Exercise Physiology or Sports Medicine but not both.
- Athletic Training majors are not allowed to minor in Sports Medicine.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student's degree granting college or school.
- Seniors are required to participate in the General Education Assessment as part of the SACS review process.

For further information, address all inquiries to:

Associate Dean
School of Education and Human Development
P. O. Box 248065
University of Miami
Coral Gables, Florida 33124
Telephone: (305) 284-3711

KIN 100. Leadership, Management, and Ethics in Sports. 3 Credit Hours.
Students will gain an understanding of skills and philosophies of leadership, management, and ethic necessary for a position in the sport industry.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 105. Introduction to Athletic Training and Sports Medicine. 3 Credit Hours.
In this practical, hands-on course, the students will learn to identify basic sport injuries that afflict the major joints of the body, and review basic methods to treat these injuries. The student will also learn how nutrition, improper biomechanics, and poor training can all impact sport performance. Plus, participants will be given the opportunity to learn and practice techniques or procedures (such as athletic taping or bracing) that may be useful in minimizing the incidence of injury.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 110. Translational Health in Nutrition and Kinesiology. 3 Credit Hours.
This class will consist of an introduction to the field of Sports Medicine and Exercise Science. Basic information relevant to appropriate exercise prescription, proper nutritional habits, implications on health, longevity and performance will be addressed. Hands-on practical experiences will supplement theoretical concepts learned in the classroom setting.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 137. Introduction to the Theory, Application, and Practice of Yoga. 2 Credit Hours.
A critical examination of theories underlying yoga practice, benefits of different styles, using specific techniques to target practitioners’ needs.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 140. Introduction to Athletic Training. 2 Credit Hours.
Introduction to the profession of athletic training. Introduction to Athletic Training with emphasis on study of the sports medicine team, legal concerns, nutrition, and pre-participation physicals. Course will discuss the basic principles of injury prevention including the role of conditioning, equipment, and protective padding. Emphasis will be familiarization with various community and university agencies, as well as the University of Miami athletic training staff, and policies and procedures used in the clinic/athletic facilities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
KIN 141. Introduction to Athletic Training Lab. 1 Credit Hour.
Introduction to clinical athletic training for pre-athletic training major. Hands-on knowledge for the entry level athletic training student. Observation hours in the athletic training room will give the student the opportunity to use the knowledge, skills, and techniques learned in this course. The student must complete 35 clinical observation hours. There is a $65 lab fee for this class. Corequisite: KIN 140. Requisite: ATHT, PAT Majors only and a Sophomore Status.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 145. Responding to Emergencies. 3 Credit Hours.
Students will become familiar with accident, injury, and illness situations, techniques for immediate first aid, and legal parameters involved when administering emergency care. There is a $45 lab fee for this class. Requisite: ATHT Majors only and Sophomore Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 150. General Nutrition for Health and Performance. 3 Credit Hours.
Fundamentals and theories of nutrition with a specific focus on nutrition for both sports and fitness.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 155. Biological Bases for Physical Activity and Health. 3 Credit Hours.
This course serves as an introduction to the field of exercise physiology. Students will learn the biological need for physical activity, discuss specific mechanisms on how physical activity reduces disease risk and understand the relationship between physical activity and chronic diseases such as coronary heart disease, obesity, diabetes, cancer, aging and mental health.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 184. Athletic and Sport Injuries. 3 Credit Hours.
Students will become familiar with athletic injuries in sports that occur over the principal joints in the body and the inclusion of anatomical structures that are frequently damaged. Basic operational treatments and rehabilitation programs after surgery will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 200. Survey of Sports Administration. 3 Credit Hours.
Students will examine the employment opportunities and skills needed in professional, collegiate, and amateur sports as well as the health and fitness industry.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 201. Introduction to Sport Administration. 3 Credit Hours.
Basic overview of the fields of sport management. Majors must receive a grade of C or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 202. Applied Nutrition for Health and Performance. 3 Credit Hours.
The study of nutrition, diet analysis, biochemical processes in energy metabolism, nutrition and health problems, and nutrition as it relates to physical performance. The class will have 3 sections: 1) nutritional links to chronic disease; 2) nutrition before, during and after exercise bout; and 3) nutritional supplements for health and performance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
**KIN 203. Introduction to Gaming and Casino Management. 3 Credit Hours.**
The course will focus on the management of gaming and casino operations. Gambling has emerged as a major segment of the sport industry, comprising 10% of sport expenditures and injecting over $20B annually into the economy. Students will be exposed to the managerial requirements and organizational structures of various gaming operations. They will also learn about the history of the gaming industry and its impact on the South Florida and the Caribbean economy. The course will provide an introductory level of knowledge regarding the managerial nuances which make working within the industry unique to the traditional sport business environments.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**KIN 204. Administration of Collegiate Athletics. 3 Credit Hours.**
A comprehensive overview of all aspects of the administration of college athletics programs, with emphasis of various components contained within. Course will include lecture, group activities and expert guest speakers.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**KIN 205. Sports Sales. 3 Credit Hours.**
The focus of this class is to examine the sales process and best practices in ticket sales and other forms of revenue generation. This course will provide hands-on experience featuring ticket sales 101, guest speakers, individual and group role-playing to simulate sales calls and will culminate with students entering The Sports Sales Tank.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**KIN 206. Sport Facilities and Event Management. 3 Credit Hours.**
This course is an overview of the policy and procedures necessary to organize and develop sport events and facilities. In depth review of all programs, functions and procedures necessary for the operation of events and facilities are examined.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**KIN 210. Foundations in Athletic Training. 2 Credit Hours.**
Students will be introduced to the study of etiology and mechanisms of injury, pathology, and recognition of clinical signs and symptoms of athletic injury. The student must complete 50 clinical observation hours, which are required for the retention process of the Athletic Training Program. Requisite: Sophomore Standing or Higher.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.

**KIN 211. Introduction to Campus Recreation. 3 Credit Hours.**
This course is an introductory course and provides a broad overview of campus recreation. It will include information on how to plan, and execute programs such as intramurals, club sports and fitness and wellness. Risk management will be stressed in every aspect in the field along with other important topics such as sponsorships, budgeting, and evaluating programs and employees. Students will gain an understanding of what campus recreation is and its importance to a healthy lifestyle on campus.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**KIN 212. Elements of Sports Psychology. 3 Credit Hours.**
Introduction to the field of sport and exercise psychology by examination of psychological theories and research related to sport and exercise behavior.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**KIN 221. Exercise Physiology: Biochemistry and Skeletal Muscle. 3 Credit Hours.**
This course will offer an overview of the biochemistry pertaining to neuroendocrine responses, nutrition, and neuromuscular function; as well as the physiological and biochemical plasticity within skeletal muscle associated with various interventions, diseases, injuries, and aging. Majors must receive a grade of B- or higher.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall, Spring, & Summer.
KIN 222. Exercise Physiology Laboratory Practicum: Neuromuscular. 3 Credit Hours.
This course examines the nature of data collection in exercise physiology. Students will receive information on collection theory and its application to the measurement of a number of physiological systems during exercise. The course is designed to establish a clear linkage between the chronic and acute changes that occur during exercise and the laboratory methods that are used to assess those changes. Co-requisite: KIN 221.

Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 230. Medical Terminology and Documentation. 1 Credit Hour.
Terminology, note writing, and documentation techniques in sports medicine. A treatment cycle model will be introduced.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 232. Basic Human Physiology. 3 Credit Hours.
This course presents a general overview of the major systems of the human organism with an examination of how they function in the human body. Majors must receive C or higher.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 233. Basic Anatomy Lab. 2 Credit Hours.
This course presents a general overview of the anatomy of the major body systems, such as the skeletal, muscular, cardiovascular, nervous, digestive, respiratory and reproductive systems as well as the integumentary system and special senses.

Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 234. Functional Human Anatomy. 3 Credit Hours.
The study of human anatomy specifically for the sports medicine practitioner.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 235. Personal and Community Health. 3 Credit Hours.
Overview of current strategies and practices for healthy living, including health maintenance and disease prevention.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 245. Kinesiology. 3 Credit Hours.
Structure and function of Neurology, Osteology, Arthrology and Myology, with emphasis on the mechanics of the movement of the human body.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 250. Orthopedic Assessment: Lower Extremity. 3 Credit Hours.
Common types of orthopedic/sports dysfunctions to the lower extremity will be discussed. Injuries will be discussed from the following viewpoints: etiology and mechanism of injury, pathology, recognition and evaluation techniques, protocols, and prevention.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 251. Orthopedic Assessment: Lower Extremity Lab. 1 Credit Hour.
Techniques used to evaluate orthopedic and sports injuries occurring to the lower extremity. The student must complete 100 clinical education hours. Clinical education hours will emphasize lower extremity orthopedic assessment, goniometry, manual muscle testing techniques, and gait evaluations.

Components: LAB.
Grading: GRD.
Typically Offered: Fall.
KIN 256. Globalization of Sport. 3 Credit Hours.
This course will address the intertwined relationship between globalization, sport, and development from a critical global perspective. This course highlights the extent to which contemporary sport cultures are the result of an interplay between local and global forces. We will explore the international character of professional and amateur sports including international competitions, league expansions beyond national boundaries, and the movement of athletes. Course topics include international sport organization, international competition, sport governance, international dispute resolution, international sports law, and new media.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 257. Research Experience in Exercise Physiology. 3 Credit Hours.
This course provides students the opportunity to be immersed in the research process within the discipline of exercise physiology. This includes the entire research process starting with conceptualization of the study and proceeding through research design, implementation (assessment and equipment use), data handling, statistical analysis, and culminating in preparation of manuscripts or presentations.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 260. Orthopedic Assessment: Upper Extremity. 3 Credit Hours.
Common types of orthopedic/sports dysfunctions to the upper extremity will be discussed. Injuries will be discussed from the following viewpoints: etiology and mechanism of injury, pathology, recognition and evaluation techniques, protocols, and prevention.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 261. Orthopedic Assessment: Upper Extremity Lab. 1 Credit Hour.
Techniques used to evaluate orthopedic and sports injuries occurring to the upper extremity. The student must complete 100 clinical education hours. Clinical education hours will emphasize upper extremity orthopedic assessment, goniometry, and manual muscle testing techniques.
Corequisite: KIN 260.

Components: LAB.
Grading: GRD.
Typically Offered: Spring.

KIN 264. General Medical Conditions Evaluation. 2 Credit Hours.
This class is the study of the clinical signs and symptoms of General Medical conditions that will present to the Certified Athletic Trainer. Emphasis will be placed on the techniques and instrumentation used for performing appropriate evaluation procedures.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 297. Practicum in Sport Administration. 1-3 Credit Hours.
A comprehensive program of observation and supervised experience for one semester under the direction of a professional in the sports field. Supervised by Sport Administration program Internship Director. Course only open to Sport Administration Majors & Minors.

Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 301. Athletic Injuries and Sport First Aid. 3 Credit Hours.
Course will help coaches, camp counselors, teachers, personal trainers, and athletes of all levels to fulfill the role of being a competent first responder to athletic injuries and illnesses. Upon completion of this course, students will have knowledge of basic sport first aid skills, anatomy and sport injury terminology, and knowledge of specific athletic injuries and illnesses. These will include head injuries, sudden illnesses, weather-related problems, upper and lower body musculoskeletal injuries, respiratory emergencies and illnesses, and internal injuries. Students will also learn basic hands-on skills such as splinting, taping, and bracing as it relates to preventing and treating athletic injuries.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 302. Sport Marketing. 3 Credit Hours.
This course is designed as a marketing course that deals exclusively with Sport Marketing. Students are expected to develop comprehensive marketing and sponsorship plans. This course will require moderate to heavy computer knowledge. This course is designed to maximize the practical applications of marketing theory to the sport business environment.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
KIN 305. Careers in Sports. 3 Credit Hours.
This course is designed to provide a basic overview of careers in the sports industry. Students will develop an understanding of the foundations of sport administration and various topics related to the professional growth within this field. The course will also provide basic fundamentals and skills to prepare students for potential employment within the sports world.

Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 306. Essential Leadership in Sports and the Professions. 3 Credit Hours.
A variety of leadership and management skills will be examined, including communication, problem solving, conflict management, group dynamics, and leadership theory. Practical application to sport and allied professions will be included. Self-assessment opportunities and exercises will be utilized.
Prerequisite: KIN 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 307. Motivational Strategies in Sport and the Professions. 3 Credit Hours.
This course will examine the concepts of motivation as it pertains to sport and leadership responsibilities in work environments. Principles of extrinsic and intrinsic motivation, peak performance, goal setting, motivation strategies, and theories will be integrated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 308. Ethical Decision Making in Sport and the Professions. 3 Credit Hours.
This course will examine ethical dilemmas in decision-making and other contemporary issues in sports management and campus and community environment. Real and hypothetical situations will be utilized. This course is a designated Upper Level Communication Requirement. Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent) is required for this course.
Prerequisite: KIN 201 AND KIN 306.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 310. Adolescent Growth and Maturation. 3 Credit Hours.
This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes that impact physical performance. Additionally, students will learn the basis of training pediatric populations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 321. Introduction to Systemic Exercise Physiology. 3 Credit Hours.
The structure, function, and training of the cardiorespiratory system. Special emphasis on structural changes in the systems with exercise and their influence on cardiovascular performance, body composition, exercise efficiency and health.
Requisite: EXPH or EXPS Major or Minor and Prerequisite: KIN 221 with a grade of C or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 322. Exercise Physiology Laboratory Practicum: Cardiorespiratory. 3 Credit Hours.
This course concentrates on collection of cardiorespiratory data. In addition, the application of these data to exercise prescription for specific athletic and non-athletic populations will be covered. Corequisite: ESS 321.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

KIN 330. Medical Terminology. 3 Credit Hours.
Terminology, note writing, and documentation techniques in sports medicine/athletic training.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
KIN 340. Strength and Conditioning. 3 Credit Hours.
Introduction to Sport Specific Strength Training. Students will learn the practice of Olympic Weight Lifting and related exercise techniques.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 344. Gross Anatomy for Kinesiology and Sport Sciences. 3 Credit Hours.
Human dissection of the major muscles, arteries and nerves of the body.
Requisite: EXPH or EXPS Major or Minor and Prerequisite: KIN 233 with a grade of C or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 345. Kinesiology. 3 Credit Hours.
Structure and function of the skeletal, joint, and muscular systems, with emphasis on the mechanics of the movement of the human body and its relationship to sport and physical performance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 365. Exercise Programming. 3 Credit Hours.
This class is the study of the theory and principles behind the development of exercise programs. Students will learn how to accurately evaluate and develop individual exercise prescription based upon sound scientific research. Exercise prescriptions will be developed in accordance with the guidelines set forth by the National Strength and Conditioning Association and the American College of Sports Medicine. This course is a designated Upper Level Communication Requirement; Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG105 and ENG106 (or equivalent) is required for this course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 366. Exercise Physiology Laboratory: Assessment. 3 Credit Hours.
This lab course is designed to complement the ESS 365 lecture course (Principles of Exercise Prescription): Cardiovascular. Students will apply practical field assessments for body composition, aerobic capacity, muscular fitness, and joint range of motion, and will employ exercise strategies to improve each of the assessed fitness components. Students will also prescribe exercises to improve performance-based fitness, such as coordination, balance, agility, speed and power while learning proper exercise training techniques. Must be a declared Exercise Physiology (EXPH) major and receive a grade of "C" or better to satisfy requirements.
Requisite: EXPH or EXPS Major or Minor and Prerequisite: KIN 233 with a grade of C or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 369. Introduction to Exercise Prescription. 3 Credit Hours.
Students will learn various assessment of health and wellness, and discover how to most effectively prescribe exercise strategies to treat the assess needs of an individual. This course provides the competencies required for cognate students to attain a personal training credential through accredited personal training certification agencies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 370. Sociocultural Aspects of Athletic Training and Sports Medicine. 3 Credit Hours.
Sports Medicine can produce the “perfect storm” of unique medical situations that lead to ethical dilemmas. This class will explore topics of professional and moral behavior, cultural competence, foundational behaviors of professional practice, and ethical decision-making in the fields of Athletic Training and Sports Medicine. Students will be required to read numerous case studies and novels that depict these issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 399. Neuromuscular Basis for Training. 3 Credit Hours.
A critical examination of neuromuscular training techniques, their strengths, weaknesses and scientific bases.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
KIN 401. Legal Aspects of Sport. 3 Credit Hours.
This course will focus on legal issues applicable to sport administration, including tort law, risk management, negligence, and constitutional law. Relevant legal cases and concepts will be incorporated.
Prerequisite: KIN 201 + Sophomore or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 402. Sport Sponsorship and Promotion. 1-3 Credit Hours.
This course is designed to provide a detailed examination of the relationship between sport and corporate sponsorship. Topics covered will include the theoretical premise of sponsorship, alignment marketing, strategic communication through sponsorship, determining the value of sponsorship, and evaluation of sponsorship activities. Perspectives from the property offering a sponsorship and from the organization functioning as the sponsor will be considered.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 403. Sport Information Management. 3 Credit Hours.
This course centers upon the development of those skills that are necessary for Sport Information Directors. Specifically, these traditionally include marketing, media, promotion, and public relations. This course hopes to provide detailed knowledge to allow the student to participate in these activities in a professional manner.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 405. Finance and Budget in Sport Administration. 3 Credit Hours.
This course seeks to develop those financial skills necessary to understand a wide variety of financial concepts that impact sport managers. Such topics would include but not be limited to: Sport franchise value/valuations; economic impact of sport; risk-return models; financial statement analysis, and budgeting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 410. Problems and Issues in Sport Administration. 3 Credit Hours.
This course is designed as a seminar course. Topical issues in high school, collegiate and professional sport are presented and discussed in detail. A number of student-centered activities are introduced to aid in the development of the student.
Requisite: SPAD major and Prerequisites: KIN 201 and KIN 306 and KIN 308.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 411. International Club/Sport Management-Brazil. 3 Credit Hours.
This course is designed to examine the various sport-based organizations that comprise the sport industry in Brazil. Examined areas will include products/services offered, marketing opportunities and challenges, public relations, economic impact on the local community, physical facilities, internship/employment opportunities, strengths, weaknesses, opportunities, threats, and the unique aspects and challenges of sport in Brazil. The class will also compare and contrast sport in the United States and sport in Brazil.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 412. Psychophysiology. 3 Credit Hours.
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular system, and the pulmonary system. Students will be able to understand and interpret terminology and research literature published in the field.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 415. Evidence Based Sports Medicine. 3 Credit Hours.
This course will introduce the student to clinical epidemiology and the evaluation of the efficacy of prevention, diagnostic, and treatment strategies in athletic training and sport medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
KIN 416. Research Methods in Exercise Physiology. 3 Credit Hours.
This course will introduce the student to clinical epidemiology and the evaluation of the efficacy of prevention, diagnostic, and treatment strategies in exercise physiology and related professions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 417. Research Methods for the Sport Sciences. 3 Credit Hours.
This course seeks to provide a full introduction to research methods in sport studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 421. Advanced Systemic Exercise Physiology. 3 Credit Hours.
This course examines the short and long term physical responses to exercise and provides a general overview of the field of exercise physiology with reference to the latest trends in modern physiological research.
Requisite: EXPH or EXPS Majors or Minors. And Prerequisite: KIN 232 and KIN 321 with a grade C or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 435. Clinical Biomechanics for Sport Medicine Professionals. 3 Credit Hours.
A lecture course stressing the biomechanics of joints and pathomechanics of orthopedic injuries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

KIN 443. Clinical Athletic Training Lab I. 2 Credit Hours.
The application of athletic training practices in selected clinical education settings. The student must complete 150 hours of documented clinical education hours, which apply toward the graduation requirement of 1000 hours. Clinical education hours will emphasize emergency procedures, first aid, and protective equipment. Prerequisite: Successful completion of the retention process and formal admittance into the clinical portion of the Athletic Training Program. Students are required to return to campus for pre-season orientation prior to the start of the school year.
Requisite: ATHS Majors Only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 444. Clinical Athletic Training Lab II. 2 Credit Hours.
The application of athletic training practices in selected clinical and educational settings. The student must complete 150 hours of documented clinical education hours, which apply toward graduation requirement of 1000 hours. Clinical education hours will emphasize general medical conditions, nutritional issues, psychosocial intervention, and injury prevention and risk management. Depending on the student's clinical education rotation, students may be required to start their clinical education hours prior to the start of the semester.
Prerequisite: KIN 443.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

KIN 455. Clinical Athletic Training Lab III. 2 Credit Hours.
The application of athletic training practices in selected clinical and educational settings. The student must complete 150 hours of documented clinical education hours, which apply toward graduation requirement of 1000 hours. Clinical education hours will emphasize acute care of injuries and illnesses, lower extremity orthopedic assessment, and risk management and injury prevention. Students are required to return to campus for pre-season orientation prior to the start of the school year.
Prerequisite: KIN 444.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 456. Clinical Athletic Training Lab IV. 2 Credit Hours.
The application of athletic training practices in selected clinical and educational settings. The student must complete 150 hours of documented clinical education hour. Clinical education hours will emphasize upper extremity orthopedic assessment, conditioning and rehabilitation, and therapeutic modalities. Depending on the student's clinical education rotation, students may be required to start their clinical education hours prior to the start of the semester.
Prerequisite: KIN 455.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.
KIN 457. Practicum in Kinesiology and Sport Sciences. 1-3 Credit Hours.
A comprehensive program of observation and supervised experience under the direction of a professional in the field for one semester. Supervised by University faculty. This course is a designated Upper Level Communication Requirement; Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG105 and ENG106 (or equivalent) is required for this course.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 458. Practicum in Kinesiology and Sport Sciences. 3 Credit Hours.
A comprehensive program of supervised experience conducted under the direction of a professional in the field. Must culminate in research or hands-on experience conducted in the exercise science field.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 461. Therapeutic Modalities. 2 Credit Hours.
Students will acquire the theoretical knowledge necessary for the clinical application of therapeutic modalities. Principles of electrophysics and biophysics, specific physiological effects and therapeutic indications and contraindications associated with cyotherapy, paraffin, ultrasound, electrotherapeutic and hydrotherapeutic modalities, intermittent compression, massage, and other contemporary modalities will be discussed. Corequisite: KIN 462. Requisite: Athletic Training.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 462. Therapeutic Modalities Laboratory. 1 Credit Hour.
This laboratory will help students apply the techniques and clinical skills related to the application of therapeutic modalities. Clinical education hours will give the student the opportunity to use the knowledge, skills, and techniques learned in this course. Students must complete 50 hours of documented clinical education hours.
Corequisite: KIN 461.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 463. Therapeutic Rehabilitation. 2 Credit Hours.
Students will acquire the theoretical knowledge for the clinical application of a rehabilitation program, physical examination, principles of therapeutic exercise, open and closed chain exercise, muscle reeducation, and special therapeutic techniques such as aquatic therapy. Corequisite: KIN 464. Requisite: Athletic Training.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 464. Therapeutic Rehabilitation Laboratory. 1 Credit Hour.
This laboratory will place emphasis on the techniques and clinical skills relating to the rehabilitation of athletic injuries. Clinical education hours in a therapeutic rehabilitation facility will give the students the opportunity to use the knowledge, skills, and techniques learned in this course. The student must complete 100 hours of documented clinical education hours, which apply toward the clinical education requirement for graduation.
Corequisite: KIN 463.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 465. Pharmacology. 1 Credit Hour.
Introduction to the basic principles of pharmaceutical intervention and the implications for rehabilitation as related to the Certified Athletic Trainer. Requisite: ATHS Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 470. Administrative Aspects of Athletic Training. 2 Credit Hours.
Basic concepts of legal liability, budget, financial management, inventory control, facilities design and maintenance will be addressed. Additionally, the student will discuss the day to day supervision, scheduling and general administration of the athletic training facility.
Requisite: ATHS Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
KIN 473. Sports Governance. 3 Credit Hours.
This course provides the students with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and olympic levels. In addition, policy development in sport management will be explored.
Prerequisite: KIN 401.
Components: LEC.
Grading: GRD.

KIN 476. Seminar in Athletic Training. 2 Credit Hours.
Topics in Athletic Training with discussions covering the NATA competencies and objectives in written and oral practical formats. Students will be required to register and take the BOC exam as a class requirement. Approx. cost $350.00
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

KIN 477. Advanced Nutrition for Health and Fitness. 3 Credit Hours.
This course is an in-depth study of nutritional concerns of today’s athlete. From dehydration to classic carbohydrate loading and from the Female Athlete Triad to ergogenic aids in sports, this course provides state of the art information on the latest nutritional issues for the exercising individual and for the athlete.
Requisite: EXPH or EXPS Major or Minor and Prerequisite: KIN 202 with a grade of C or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 488. Gross Anatomy. 3 Credit Hours.
The essentials of Myology, Osteology, and Arthrology. Major nerves and arteries are also dissected. Many of the dissection areas are major injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. There is a laboratory fee of $100 required for this course.
Requisite: ATHS Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 490. Special Topics in Kinesiology and Sports Sciences. 3 Credit Hours.
This course is designed for students wishing to focus on a specific area of study within the umbrella of the field of Kinesiology. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 491. Undergraduate Teaching Assistant Training in KIN. 1-3 Credit Hours.
This course involves training and teaching assistant experience under the supervision of faculty. Students will have the opportunity to assist faculty and/or doctoral students in the teaching of clinical laboratory and/or undergraduate theory courses offered in the KIN department.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 492. Undergraduate Teaching Assistant Training in KIN II. 1-3 Credit Hours.
This course involves training and teaching assistant experience under the supervision of faculty. Students will have the opportunity to assist faculty and/or doctoral students in the teaching of clinical laboratory and/or undergraduate theory courses offered in the KIN department.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 493. Undergraduate Research Assistant Training in KIN. 1-3 Credit Hours.
This course entails research training for a specific topic in the areas of Kinesiology under the supervision of faculty. It will enable the student to understand the fundamentals of following up on a research question, setting up research design and following up with data collection for the purposes of acquiring clinical training and/or assisting in manuscript preparation.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
KIN 494. Undergraduate Research Assistant Training in KIN II. 1-3 Credit Hours.
This course entails research training for a specific topic in the areas of Kinesiology under the supervision of faculty. It will enable the student to understand the fundamentals of following up on a research question, setting up research design and following up with data collection for the purposes of acquiring clinical training and/or assisting in manuscript preparation.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 495. Individual Study. 1-3 Credit Hours.
The Application for Admission to Advanced Individual Study Form will be required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 496. Individual Study. 1-3 Credit Hours.
The Application for Admission to Advanced Individual Study Form will be required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 497. Internship in Sport Administration. 1-9 Credit Hours.
KIN 497: Internship in Sport Administration Filed Experience that requires the student to participate in the work environment (Formally ESS 497). Requisites: SPAD Majors and Senior Status.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.

KIN 498. Seminar in Sport Administration. 3 Credit Hours.
Professional seminar to accompany internship in sport administration. Students will be required to interact with other internship students and supervisors on a regular basis and additionally, students will be required to submit comprehensive reports regarding their internship experiences. This course is a designated Upper Level Communication Requirement; Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG105 and ENG106 (or equivalent) is required for this course.
Requisites: SPAD Majors and Senior Status.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

KIN 502. Sport Sponsorship and Promotion. 1-3 Credit Hours.
This course is designed to provide a detailed examination of the relationship between sport and corporate sponsorship. Topics covered will include the theoretical premise of sponsorship, alignment marketing, strategic communication through sponsorship, sponsorship sales and service, determining the value of sponsorship, and evaluation of the Olympics will be examined in-depth. Objectives, risks, and benefits from the property or platform offering a sponsorship and from the sponsoring organization will be considered.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 503. Advanced Sport Information Management. 3 Credit Hours.
This course examines the complex fields of sport communication. Students will investigate the unique, symbiotic relationship that exist between sport and the media; examine various theoretical framework (e.g., agenda set, hegemonic, uses and gratification, elaboration likelihood model) that are pertinent to developing an understanding of the sport/media complex.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

KIN 515. Nutrition Diet and Exercise. 3 Credit Hours.
Students will learn the latest concepts in weight management, physical fitness, and healthy eating. They will be able to understand the complex interplay of carbohydrates, protein, fat, water, fiber, vitamins, and minerals in the nourishment of their body and overall well-being. They will also examine serious health issues such as the use/misuse of anabolic steroids, weight control, and eating disorders.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
KIN 520. Cellular Exercise Physiology. 3 Credit Hours.
The course examines Bioenergetics and Muscular Physiology in training and detraining. Topics include the energy systems and their functional application during exercise, muscle structure and function, cellular and sub-cellular modifications of organelles and contractile mechanisms as result of training and physiological bases of training techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 521. Advanced Systemic Exercise Physiology. 3 Credit Hours.
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular and the pulmonary systems. Students will be able to understand and interpret terminology and research literature published in the field.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 522. Basic Statistics in Kinesiology and Sport Sciences. 3 Credit Hours.
Introduction to basic statistical techniques commonly used in the Exercise and Sport Sciences. Designed as a prerequisite for KIN 646 (Formally ESS 646).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

KIN 523. Athletic Training Techniques - Assessment. 3 Credit Hours.
This course will introduce the basic concepts related to injury evaluation. With this information, and with the development of basic skills, the student should be able to form an impression of the nature of most musculoskeletal injuries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 524. Athletic Training Techniques - Rehabilitation. 3 Credit Hours.
This course will introduce theoretical concepts that must be understood in order to be able to rehabilitate a musculoskeletal injury. Regarding actual rehabilitation techniques, the emphasis will be on therapeutic exercise with only a brief introduction to therapeutic modalities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 525. Advanced Kinesiology. 3 Credit Hours.
In-depth study of the human skeletal and muscular systems with a focus on the mechanics of movement as related to physical activity, sports, and athletics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 527. Community and Global Nutrition. 3 Credit Hours.
This course is designed to provide an overview of nutritional issues & related aspects of infectious and chronic disease impacting the health and performance of athletes, individuals & groups domestically & globally. Economic and environmental issues which impact nutritional status and deficiency in the Western societies & third world countries will be addressed. An international and cultural perspective on food, eating behaviors and customs will be explored.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 530. Laboratory Techniques in Functional Evaluation of Skeletal Muscle. 3 Credit Hours.
This course examines the theories of data collection and collection techniques used to evaluate musculo-skeletal and neuromuscular function. The application of both computerized and non-computerized collection systems for performance evaluation is covered. The course is also designed to establish a clear linkage between the acute and chronic musculo-skeletal and neuromuscular changes that occur during exercise and the laboratory methods used to assess those changes. Collection theory, musculoskeletal and neuromuscular function, methods of strength evaluation, anaerobic power testing, electromyography, and a number of other functional parameters will be discussed.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.
KIN 531. Laboratory Experiences in Systemic Exercise Physiology. 3 Credit Hours.
This course provides a laboratory assessment of physiological principles and theories learned in the classroom setting. Focus will be on systemic application to exercise as an acute or chronic stressor. Corequisite: ESS 521.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 532. Sports Injuries: Prevention and Treatment. 3 Credit Hours.
Prevention, diagnosis, treatment and rehabilitation of sports injuries. Anatomical and Kinesiological application to sports injuries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 534. Integrative and Functional Nutrition. 3 Credit Hours.
This course will discuss integrative and functional medicine and how it emerged. This course will analyze the healthcare models that include personalized care and the whole-person perspective. In this course we will discuss various factors that influence disease including diet and nutrition, stress, activity level, pharmaceuticals and environmental pollutants. Alternative approaches to treatment will also be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 535. Clinical Biomechanics for Sport Medicine Professionals. 3 Credit Hours.
A lecture course stressing biomechanics of joints and pathomechanics of orthopedic injuries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

KIN 536. Strength and Conditioning I. 3 Credit Hours.
This course serves as the practical/technical foundation for major compound movements and Olympic lifts. It also provides comprehension of movement specific dynamic warm-ups, advanced stretching techniques, methods for identifying movement compensations and underlying issues as well as evaluating Olympic techniques. Due to the practical nature of the course, all the sections of this course are held in the Hecht Athletic Center (HAC).
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 537. Strength and Conditioning II. 3 Credit Hours.
This course is the continuation of Strength and Conditioning I (KIN 536). It provides more advanced Olympic weightlifting techniques and ballistic training, alongside a continued focus on corrective exercises to ensure a reduced risk of injury. The course also provides an introduction to exercise programming including specialized training techniques for athletic development. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center (HAC).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 538. Nutrition during the Lifecycle. 3 Credit Hours.
This course is designed to examine the changes in nutrition requirements during the life cycle, particularly as related to growth, development and aging. Psychosocial, cultural, and economic issues related to food intake at various life stages will be reviewed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 539. Dietary Supplements and Human Performance. 3 Credit Hours.
Evidence-based examination of supplements, food phytochemicals, and their relation to disease & performance.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 540. Exercise Psychobiology. 3 Credit Hours.
This course is designed primarily for graduate level Exercise and Sport science students who are interested in the biochemical basis of personality as affected by exercise and sport. The course involves interdisciplinary integration and comprehensive reviews of ancient and current literature dealing with exercise, stress, emotional, personality, immune system function and neuroendocrine function.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
KIN 541. Neurophysiology in Exercise Science. 3 Credit Hours.
Examination of the functions of the central, peripheral, and autonomic nervous systems in regulating exercise homeostasis and the structural and functional modifications to the systems through training. NOTE: This course is a writing intensive course. This means that all examinations and papers include a critical evaluation of the student’s ability to convey information using the written word.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 542. Strength and Conditioning. 3 Credit Hours.
A comprehensive overview of strength and conditioning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 543. Professional Training and Counseling for Integrative Health. 3 Credit Hours.
Students will learn the integrative health care model, theories, behavior change models, approaches & techniques used in nutritional counseling to help athletes, individuals and groups implement and sustain behaviors, lifestyles, and attitudes to achieve optimal health. Lecture & personal application will allow for the development of skills in each of these areas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 545. Special Sport Populations. 3 Credit Hours.
This course presents an in-depth examination of chronic conditions and medical problems commonly observed in athletes. Students will learn about the etiology of the medical condition, how exercise affects the condition, and the most recent therapeutic treatments prescribed for the condition.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 546. Elite Conditioning I. 3 Credit Hours.
Elite Conditioning I provides an introduction to evaluation techniques catered specifically to the athletic population including tests for strength, power, speed, agility, balance and stability. The courses also provides instruction on how to apply these evaluations to their respective sports/positions. These evaluation techniques provide data that students will use in the process of corrective exercise prescription. Students are taught how to implement corrective strategies to improve athletic performance. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center(HAC).
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 547. Elite Conditioning II. 3 Credit Hours.
Elite Conditioning II is the continuation of Elite Conditioning I (KIN 546). This course provides students with an understanding of the design and implementation of periodized conditioning programs for athletes based on the testing, evaluation, and applications to specific sports learned in Elite Conditioning I. The course focuses on speed agility and quickness for sports. It also includes practical implementation of ballistic, plyometric, speed, and conditioning drills emphasizing evidence based methods and training techniques. Due to the practical nature of the course, all sections of this course are held in Hecht Athletic Center(HAC).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 549. Nutrition Assessment and Lab. 3 Credit Hours.
Application of the principles of normal and therapeutic nutrition, nutrition assessment, evaluation and intervention as related to sports performance and the management and treatment of disease states. Laboratories will allow for the development of skills in each of these areas.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 550. Nutrition Biochemistry. 3 Credit Hours.
To learn the fundamental biochemical structure and pathways governing nutrient intake and utilization. Students will learn how major forms of nutrients (macronutrients, vitamins, minerals and trace elements) are processed and utilized by different organs with a particular emphasis on muscle metabolism. Students will also learn how to relate their newly acquired knowledge to health and disease outcomes with focus on lifestyles disease related to metabolism such as diabetes and obesity.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
KIN 555. Medical Nutrition Therapy. 3 Credit Hours.
The role of nutrition in the prevention and treatment of various disease states including diabetes, cardiovascular disorders, endocrine and gastrointestinal disorders, eating disorders, renal disease, cancer and AIDS/HIV, and weight management. This course instructs on the use of the Nutrition Care Process for assessment and documentation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 557. Diagnostic Imaging Techniques in Sports Medicine. 3 Credit Hours.
This course is designed as an elective for undergraduate KIN students or graduate students. The basic physics of radiological imaging will be covered including radiology, fluoroscopy, CT scan, ultrasound, MRI, and nuclear medicine including image archiving. Normal anatomy will be compared to the corresponding radiographic anatomy. Common sports injuries will be evaluated by multiple radiographic modalities and will be correlated with the clinical condition. Discussion will include bony pathology as well as soft tissues such as ligaments, tendons, and menisci.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 561. Facility Management. 3 Credit Hours.
Facility management provides students with an understanding of fitness entrepreneurship, giving students a comprehensive understanding of the laws, regulations, policies, and work involved in setting up a fitness facility such as a gym, wellness center, or athletic training center. Students are responsible for developing a viable sports or fitness complex including all aspects of administrative and facility management.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 562. Fiscal Management in Sport Administration. 3 Credit Hours.
Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 563. Facilities and Event Management. 3 Credit Hours.
This course is designed to introduce students to principles and practices of planning, funding and managing facilities associated with sports participation including professional sport venues, college sports, parks, recreational sport and health/fitness clubs. Students will gain an understanding of promoting, marketing, and maintaining sport facilities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 564. Principles of Sport Marketing. 3 Credit Hours.
This course will focus on the vast world of sports marketing. The basic principles of marketing and marketing management will be introduced and integrated with application of these principles to sport and sports-related organizations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 565. Legal Aspects of Sports and Exercise Science. 3 Credit Hours.
Legal liability, personal injury, negligence and other related legal aspects of sports and exercise science.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 566. Organization and Administration of Sports Programs. 3 Credit Hours.
Administrative and organizational procedures and problems specific to athletic administration, recreation and leisure sports administration, and physical education.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

KIN 567. Elements of Sports Psychology. 3 Credit Hours.
Introduction to the study of sport and exercise psychology including theory, current research and practical application.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
KIN 568. Developmental Sports Psychology. 3 Credit Hours.
Examination of the concept of sport psychology which includes but is not limited to performance, enhancement, student performance and academic application.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

KIN 569. The Foundations of Exercise Prescription. 3 Credit Hours.
Students will learn various assessments of Health and Wellness, and discover how to most effectively prescribe exercise strategies to treat the diagnosed needs of an individual.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 570. Advanced Programming. 3 Credit Hours.
Advance programming allows students to dissect sports by movement, metabolism and limitation. The course investigates current trends and evidenced based applications of specific training techniques for optimal sport performance. Students will perform complete sports analysis and develop periodized programs for major sports.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 571. Sport Industry in South Florida. 3 Credit Hours.
This course will examine the various sport based organizations/events that are part of the sport industry in South Florida. Study of these organizations/even ts will include (a) products/services produced, (b) organizational structure, (c) economic impact on the local community, (d) key management personnel, (e) physical facilities, and (f) internship/employment opportunities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 572. Creative Approaches to Problem Solving and Conflict Management. 3 Credit Hours.
This hands-on course will examine the concepts of problem solving and conflict management from both personal and organizational perspectives. Students will have the opportunity to study in-depth both of these concepts (and the relationship between them) through a combination of lecture, theory, individual and group activities, readings, practical exercises, and self-assessment tools.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 574. Ethical Decision Making in Sports and the Professions. 3 Credit Hours.
This course will examine ethical decision-making in a variety of environments with an emphasis on sport professions. Real and hypothetical situations will be utilized, and the course will combine theory with practical application. The case method in sport ethics will be incorporated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 575. Essential Leadership in Sport and the Professions. 3 Credit Hours.
This course will examine the concept of leadership as it pertains to sports and other professions. Various leadership and management skills will be included with a focus on practical applications in a work environment. Theory and self-assessment strategies will be incorporated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 576. Practical Approach to Motivation and Ethical Decision Making. 1-3 Credit Hours.
A critical study of practical problems of professionals in Exercise and Sport Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 577. Advanced Nutrition for Health and Fitness. 3 Credit Hours.
This course presents an in-depth study of the nutritional concerns of today's Recreational and competitive athlete. Topics include dehydration, classic carbohydrate loading, protein needs, ergogenic aids, and more. State-of-the-art research in the field is provided. This is also a writing intensive course. Thus, writing skills will represent an integral part of one's grade.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
**KIN 578. Pharmacology for Allied Health Professionals. 3 Credit Hours.**
The study of drug families and drugs in common use across spectra of age, illness, disease, and disability. Students will understand body systems treated with current pharmaceuticals over-the-counter (OTC) medications, and neutraceuticals. Actions, key adverse effects, and influences on individuals undergoing physical activity will be emphasized.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Spring.

**KIN 579. Principles of Exercise Assessment: Cardiovascular. 3 Credit Hours.**
This course presents a comprehensive overview of the physical, physiological and metabolic responses of the human body to exercise testing and training both in health and disease. The successful student will gain an understanding of the process involved in prescribing safe and effective therapeutic exercise in healthy individuals as well as patients with heart and lung disease, diabetes and obesity. An overview of environmental and legal considerations in the prescriptive process will also be discussed.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Spring.

**KIN 580. Principles of Exercise Prescription: Neuromuscular. 3 Credit Hours.**
An examination of the scientific bases of modern training techniques designed to optimize performance, their functional application and potential impact on performance in sport and everyday activity.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Spring.

**KIN 581. Issues Specific to Women's Health. 3 Credit Hours.**
This course focuses upon the physiological effects of exercise on the female athlete as it relates to her performance and health. Physiological differences between males and females will be examined as it impacts the woman's performance capabilities and potential. Gender specific problems regarding the exercising female will be explored.

*Prerequisite:* KIN 221 and KIN 321 or KIN 421.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Fall, Spring, & Summer.

**KIN 582. Psychosocial Issues in Women's Health. 3 Credit Hours.**
This course covers a broad perspective of women and their self-esteem, their femininity, and their role in the family household. Attention will be paid to the historical, cultural, and anthropological development of women and their role in society. The influence of gender will explore several areas which include a) pregnancy, b) menopause, c) menstrual cycle, d) stress and career vs. family, e) depression, and f) body image.

*Prerequisite:* KIN 212.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Fall, Spring, & Summer.

**KIN 583. Sports Medicine for the Female Athlete. 3 Credit Hours.**
This course focuses on the physiological effects of exercise on the female athlete as it relates to her performance and health. Physiological differences between male and female will be examined as it impacts the women's performance capabilities and potential. Gender specific problems regarding the exercising female will be explored.

*Prerequisite:* KIN 321 or KIN 421.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Fall, Spring, & Summer.

**KIN 584. Energetics of Obesity and Weight Management. 3 Credit Hours.**
This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis, as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition and management of the overweight patient. This includes determination of basal metabolic rate, thyroid function, determination of percent body fat, quantification of adipocyte number and mass, and research on exercise as a therapeutic intervention. Students will learn to design exercise programs for hypothetical obese patients and the impact of both diet and exercise on long-term weight management.

*Prerequisite:* KIN 221 or KIN 421.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Fall, Spring, & Summer.
KIN 585. Neurological Mechanisms of Metabolism and Weight Regulation. 3 Credit Hours.
This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition and management of the overweight patient. The course will also examine adipocyte morphology and the health implications of being overweight and obese. Students will examine the impact of both diet and exercise on long-term weight management.
Requisite: Must have 3.0 in the Exercise Physiology Major and a B- or better in KIN 221 and KIN 232.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 586. Exercise Prescription/Assessment Laboratory. 3 Credit Hours.
This course presents an overview of the laboratory techniques used to assess cardiovascular endurance and general fitness, pulmonary function and anaerobias observed during competition.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 587. Laboratory Experience in Sports Nutrition. 3 Credit Hours.
This laboratory class provides case study analyses and computerized nutrient analysis systems designed to evaluate nutrition and hydration needs of the recreational and competitive athlete. From urinalysis and blood work, to body composition and computerized nutrient data base systems, this laboratory provides a clinical approach to evaluating the nutrition status of the exercising individual. Corequisite: ESS 577.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 588. Advanced Gross Anatomy in Kinesiology and Sport Sciences. 3 Credit Hours.
Human dissection of the major muscles, arteries and nerves of the body. Course is held at the University of Miami, Medical Campus, cadaver laboratory. Special consideration is given to injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. Students are required to pay a $100 laboratory fee for the class. This course is to be taken by undergraduate Athletic Training majors and for the 5-year Sports Medicine with a Concentration in Athletic Training program students only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 589. Directed Readings in Kinesiology and Sport Sciences. 3 Credit Hours.
Directed Readings focusing on research and contemporary trends in the field.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 590. Special Topics in Kinesiology and Sport Sciences. 1-3 Credit Hours.
This course is designed for students wishing to focus on a specific area of study within the umbrella of the Kinesiology and Sport Sciences curriculum. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 595. Research Honors Project. 2 Credit Hours.
This course has been designed for SEHD students who have been accepted into the Research Honors Program and are working with a faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 596. Research Honors Project. 2 Credit Hours.
This course has been designed for SEHD students who have been accepted into the Research Honors Program and are working with a faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 597. Research Honors Project - Thesis Writing. 2 Credit Hours.
This course has been designed for SEHD students who have been accepted into the Research Honors Program and are working with a faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
KIN 598. Research Honors Project - Seminar. 1 Credit Hour.
Seminar section of School of Education & Human Development Research Honors Program. This seminar culminates with the presentation of your research at the Undergraduate Research, Creativity, and Innovation Forum (RCIF).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 599. Advanced Programming for Endurance Athletes. 3 Credit Hours.
This course provides students with training techniques to improve aerobic capacity, endurance, and lactate threshold for optimal performance. Students will review evidenced based principles of sports nutrition, strategies to ensure proper hydration, thermoregulation, and fuel (substrate) availability during prolonged exercise as well as develop programs for competitive sports including triathlon, marathon, and cycling.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

B.S.E.D. Sport Administration

The Sport Administration major at the University of Miami is an undergraduate education program designed to prepare students for careers in the sport industry. The program is committed to the professional development of students so that competencies and skills relevant to the Sport Industry can be acquired over time. Specific competencies in organization, ethics, marketing, leadership and legal issues are emphasized.

• Field experience and internships are an essential component of the major. The KIN department is actively engaged in placing students in visible sports settings and appropriate sport environments so that students acquire relevant competencies and gain pragmatic hands-on experiences that are necessary for success in today's sport industry.
• The Sport Administration major is a 42 credit hour major in Kinesiology coursework plus a class in public speaking (COS 211).
• Students are required to meet a foreign language component. This may be satisfied with two semesters of American Sign Language (TAL 107 and TAL 207), or any intermediate course (200+) in a foreign language that is offered at UM.
• Sport Administration students may elect to participate in Kinesiology Department’s sponsored Study Abroad opportunities that will count toward their major or minor requirements. Please consult with the academic advisor for the Sport Administration Program.
• Students transferring from another college or university must have a cumulative GPA of 2.5 or above in order to be considered for admission to the major.
• Students are required to complete a 9-credit internship upon successful completion of ALL coursework for the Sport Administration Major. Exceptions to this policy must be approved by the Undergraduate Program Director and the Associate Dean.
• A minor in any field is required. A Business minor is suggested to complement the Sport Administration major and provide a well-rounded comprehensive background to the Sport Administration field.
• Students pursuing a degree in Sport Administration must receive a grade of C or higher in KIN 201 in order to continue with the major. Students are allowed to retake KIN 201 to achieve the minimum C grade only once per University of Miami policy.
• The Writing Requirement (Upper Level Communication Requirement) is satisfied by taking the following two courses in the major:
  • KIN 308
  • KIN 498
• Students will be allowed to retake a course once.
• All 400-level courses are restricted to declared Sport Administration majors and minors only.
• A degree in Sport Administration requires a major GPA of 2.5 or higher and an overall GPA of 2.3 or higher.
• KIN 306 and KIN 308 may not be taken in the same semester and must be taken during junior year. KIN 308 must be taken before KIN 410.
• A grade of C or better is required for each course applied toward the major.
• Study Abroad opportunities offered that are led by Sport Administration faculty may count toward the SPAD major or minor. Please see an advisor for more information.

Mission
The University of Miami Sport Administration program strives to be an international leader in the training of a diverse student population seeking careers in the sport industry. The program will prepare the next generation of leaders, researchers, and agents of change and well-being in the sport community, to promote knowledge within the widespread realm of the sport sciences and prepare graduates for careers in the sport industry and academia, reflective of our multicultural community.

Goals
The University of Miami program in Sport Administration prepares individuals for a wide variety of career options in this field according to their personal and professional goals.

Student Learning Outcomes
- Students will demonstrate an overall knowledge and understanding of the core concepts and practical skills in Sport Administration.
- Students will demonstrate strong written communication skills.
- Students will demonstrate strong oral communication skills.

B.S. in Exercise Physiology
Program Overview
The Undergraduate program in Exercise Physiology at the University of Miami, is designed for students to acquire a sound knowledge base in the sciences followed by the application of that knowledge base to human movement, exercise and sports performance. Clinical laboratory experiences supplement applied scientific theory in a rigorous academic setting.

- Students may pursue a pre-med track concurrent with the Exercise Physiology major and should inform their advisor if selecting this track.
- Students are required to complete a minimum of 8 credits in chemistry. The academic advisor will advise on the correct sequence of chemistry based on the individual student’s career goals.
- Exercise Physiology requires that students maintain a major GPA of 2.75. Students with a major GPA below 2.75 will have one semester to raise their GPA to meet the requirement. Failure to do so may lead to dismissal from the major.
• Students transferring from another college or university must have a cumulative GPA of 3.0 or above in order to be considered for admission to the major.

• Students who meet the above requirements and select Exercise Physiology as their major, must transfer into the School of Education and Human Development and set Exercise Physiology as the first major.

• A grade of “C” or better is required for each course applied toward the major. Students are allowed to retake a course one time.

• All 100 level courses and KIN 202, KIN 212 are open to non-majors. All other courses are open to majors and minors only. KIN 202 is only open to science majors.

• Students MAY NOT take KIN 150 and KIN 202 as course material overlaps.

• All 300- and 400-level courses except those in a STEM cognate, are restricted to declared Exercise Physiology majors only.

• KIN 399 should be taken in the Spring semester of the junior year.

• Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.

**Honors Program in Exercise Physiology (HPEP)**

KIN 458 will be available for honors credit for Exercise Physiology students provided the following stipulations are met:

1. The course is under the direction of a full-time faculty member in Exercise Physiology.
2. The student completes an honors project permission form and submits this form to the instructor within the first three weeks of the semester.
3. The student completes assigned writing credit work by the end of the semester.
4. Assignments completed for honors credit hour are sent to the University of Miami Writing Center for review.

The University of Miami currently offers an accelerated programs for undergraduate Exercise Physiology majors who want to obtain a Master’s Degree in Exercise Physiology, Strength & Conditioning/Fitness Entrepreneurship, or Nutrition for Health & Human Performance. This can be done by taking one additional year of graduate courses. These students must take two graduate courses in Exercise Physiology in their senior undergraduate year in order to earn an M.S.Ed. degree in one additional year. Please visit our website (http://www.education.miami.edu) for additional information on the accelerated master’s programs. To be eligible students must apply for admission to the accelerated master’s program no later than the end of the Fall semester of their senior year.

ENG 106 English Composition II 3

Credit Hours 16

Year Two

Fall
KIN 321 Introduction to Systemic Exercise Physiology 3
KIN 322 Exercise Physiology Laboratory Practicum: Cardiorespiratory 3
### Mission

The mission of the Exercise Physiology, B.S., is to provide a fundamental working knowledge of the field in order to obtain a career in outside employment, work in professional services and/or enter higher institutions of learning in this or other health-related fields.

### Goals

#### Student Learning Outcomes

- Students will demonstrate the ability to critique research evidence in key areas of human physiology, which pertain to optimal health and the etiology of common disease.
Students will be able to explain the physiological bases for a test accurately describe test administration procedures, interpret data collected during each laboratory session and explain these results as they relate to their own performance and in comparison to specific clinical populations and discuss the importance of each test as an acute and chronic measure of performance.

**Minor in Exercise Physiology**

A minor in Exercise Physiology is open to all students at the University of Miami. Students should complete the required 5 courses in order to earn the EXPH minor. Athletic Training students are not eligible for the EXPH minor.

A minor in Sports Medicine is available to all students at the University of Miami. Students should take the following 5 courses in the course list for a total of 15 credits. A grade of C or higher is required in each course.

**Please note that students majoring in Athletic Training are ineligible for the Sports Medicine minor.**

***KIN 370 Sociocultural Aspects of Sports Medicine may be substituted for one of the courses listed above for the minor.***

**Teaching and Learning**

At a minimum, students will receive an automatic FAIL for any assignment that shows even minimal evidence of any of the violations listed in the Student Handbook such as cheating, plagiarism, misrepresentation, collusion, falsification of data and documents, or fabrication of findings. The professor of record will have absolute discretion to judge the severity of an offense involving plagiarism and/or violation of The Honor Code, including extending the penalty to an F in the course.

Students will receive an automatic FAIL on any **assignment or action** which shows a violation of the Florida Educators Accomplished Practice (FEAP) 6: Code of Ethics and the Principles of Professional Conduct of the Education Profession of Florida, pursuant to Rules 6A-10.080 and 6A-10.081, F.A.C. Students are required to fulfill the expected obligation to students, the public and the education profession. The student will not be allowed to improve that grade and, for students completing the teacher preparation program, pending a committee review, FEAP 6 will be marked as permanently failed in the student's record of Uniform Core Curriculum mastery.

A failure of FEAP 6 will result in disqualifying the student from earning the School of Education and Human Development's State certification and endorsements. Additionally, Faculty may recommend to the Dean or Dean's designee that students committing an honor code violation be dismissed from their teacher preparation program.

**PROCESS**

The process below will be followed when a student is found to have violated the Ethics/Professional FEAP (FEAP 6):

- Any violation of the Ethics/Professionalism FEAP will be reported to the TAL Chairperson and the Dean's Office and student will receive prior notice of the possibility of disqualification and/or dismissal from the accredited program
- A recommendation will be made to disqualify the student from earning the State of Florida accreditation and School of Education and Human Development transcript endorsement and/or dismiss the student from the accredited program.
- A decision will be made to convene a committee.
- A committee composed of TAL faculty and the Dean's designee will review all pertinent documentation and meet with the student.
- The student will have the opportunity to present documentation or mitigating circumstances.
- The committee will confer and render a decision about what action will be taken.
- Student will be notified of the committee's decision in writing. Consequences may include dismissal from the teacher preparation program and/or a report to the Dean of Student's Office for an Honor Council hearing.
- The student may file a written appeal within 30 days of the committee's decision to the Dean of the SEHD, University Ombudsperson, Faculty Senate Grade Appeals Committee.

Either the TAL Chair or the Dean's office will refer the student to the University Honor Council. The outcome of the University Honor Council hearing will be independent of the TAL Committee's decision to dismiss the student from the program. Consequences for violating the Honor Code include disciplinary warning, disciplinary probation, suspension or expulsion from the university.

Dept. Code: TAL

The Department of Teaching and Learning offers a Bachelor of Science in Education Degree in **Elementary Education (K-6)/Exceptional Student Education (K-12)** with ESOL (English for Speakers of Other Languages, K-12) and Reading (K-12) endorsements.

The Department offers two minors:

1. A traditional Education Minor consisting of 12 credit hours and
2. A Professional Training Option minor of 18 credit hours that fulfills the State of Florida "Professional Training Option" (PTO) for teaching in secondary-schools. Candidates must select a minor area of study in English, math, Secondary Science or Secondary Social studies or other areas of recognized certification. In order to obtain teaching credentials from the State of Florida, a PTO completer must successfully teach in an accredited school in Florida for one academic year.
Teacher Preparation Programs

One of the roles of the School of Education and Human Development is to serve as the professional school to conduct and coordinate programs for the preparation of teachers and other educational personnel at the University of Miami. Membership is held in the American Association of Colleges for Teacher Education, the National Association of State Directors of Teacher Education & Certification and in the Florida Association of Colleges for Teacher Educators. Teacher Preparation Programs (TPP) are accredited by the Florida Department of Education for the preparation of elementary/exceptional student education teachers, secondary teachers, music teachers and other school service personnel.

Professional Development Schools

Bel-Aire Elementary, Henry S. West Laboratory Elementary, Sunset Elementary, Ponce de Leon Middle School and Booker T. Washington Senior High School are operated by Miami-Dade County Public Schools. These schools provide the most up-to-date teaching environments, both in terms of design and curriculum, in partnership with the University of Miami. Students are welcomed at these facilities for field experiences and student teaching, and both students and faculty have the opportunity to contribute to the high quality functioning of these professional development schools.

Teacher Preparation Programs

Teacher Preparation Programs/majors in Elementary/Exceptional Student Education and Secondary Education that lead to professional certification and applicable endorsements are approved by the Florida Department of Education (FLDOE). Please be advised that the State may implement new requirements for certification. These requirements will be mandatory with or without notice in this bulletin. The student is responsible for securing the application for certification and submitting the necessary documents and fees to the Florida Department of Education to obtain certification and endorsement. The DOE Certification Ombudsman in the School of Education and Human Development is available to assist with certification and re-certification matters.

Academic Policies

Admission

Selection for the Teaching Profession

The faculty of the School of Education and Human Development conceives its ultimate obligation to be to the children, adolescents, and adults who will be taught by teachers who have completed teacher preparation programs at the University. The quality of students admitted into the teacher education curriculum is as important as the skills, content, and concepts to be learned.

Students who intend to transfer to the University of Miami into the School of Education and Human Development’s accredited program must take the General Knowledge Test (GKT) that is part of the Florida Teacher Certification Exam (FTCE). Official GKT results must be sent to the Associate Dean for Undergraduate Education prior to enrolling in any Teaching and Learning Course.

Most courses in the teacher education program require school site-based field experiences, culminating in a full-time 15-week internship. School districts require a criminal background check for field placement students and interns. Fingerprinting and FBI background check procedures are at the applicant’s expense. Students with felony arrests may wish to consider these requirements carefully and, if necessary, seek advice from an advisor in the School before applying for admission to the program. Students without a valid social security number will not be eligible for placement in the school district.

All students who wish to be considered for admission and/or retention in curricula leading to Florida Teacher Certification will be formally screened at certain points in their program of study with respect to the following criteria:

1. Admission to Teacher Candidacy (see requirements below).
2. Acceptable grade point averages (C or better for courses in the major).
3. Acceptable evaluations by University of Miami faculty.
4. Evaluations by clinical faculty at various field experience sites.
5. Satisfactory progress toward the completion of the Florida Educators Accomplished Practices requirement.

Students who receive a grade below C in their Student Teaching semester will not be recommended for teacher certification.

Note: The Associate Dean of the School of Education & Human Development and the Chairperson of the Department of Teaching and Learning (TAL) jointly approve appeals to the above policies.

Requirements for Admission to Teacher Candidacy

2. Completion of 45 credit hours. In addition, transfer students must have a minimum of 9 credit hours of acceptable credit earned at the University of Miami.
3. A 2.5 GPA in education core courses. No education classes lower than C.
4. A 2.5 GPA in the content area teaching major (for secondary education majors).
5. Completion of the Course Advisement Plan (CAP).
6. Completion of at least one Field Experience requirement.
7. Further enrollment in teacher education course work offered by the School of Education and Human Development is contingent upon the student meeting requirements 1-6 above.

8. All students must successfully complete M-DCPS fingerprinting process. Forms are available in the Office of Undergraduate Academic Services.

NOTE: Appeals to the policies stated 1-6 above must be directed to the Associate Dean of the School of Education and Human Development.

Please note: Students may not register for any class above TAL 420 without admission to Teacher Candidacy.

Requirements for Admission to Student Teaching
Students submit a formal application to the Department of TAL for admission to Student Teaching. Application materials are available and are to be completed by students no later than October 15 (Fall semester) or March 15 (Spring semester).

The following requirements must be met:

1. Admission to a Teacher Preparation Program (Teacher Candidacy).
2. Completion of application for admission to Student Teaching
3. Approval of the Associate Dean for Undergraduate Studies and the Department of TAL Chairperson.
4. Recommendations from two members of the faculty familiar with the student's academic proficiency. One of these must be from a faculty member in the School of Education and Human Development.
5. Earned a minimum of 90 credit hours.
6. Submission of the Florida Educator's Accomplished Practices (FEAP) Portfolio via Live Text to the Assistant Director of Accreditation in the Department of TAL. The FEAP Portfolio must include evidence at the indicator level in the first five FEAPs.
7. All Elementary/ESE majors must have completed ALL of the courses for the Elementary/ESE major.
8. Earned a minimum of 2.5 grade point average in core courses offered by the School of Education and Human Development.
9. A grade of C or better is required of each course applied to the major.
10. Earned a minimum of a 2.5 grade point average overall.
11. Successfully completed pre-internship field experiences.
12. Demonstrate satisfactory progress towards the completion of the FEAP requirement, as indicated in #6 above.
13. Passed the Florida General Knowledge Test.
14. Taken and passed one of the following exams: the Professional Education Test or the Subject Area Exam in either Elementary Education (K-6) or ESE (K-12).

NOTE: A MAXIMUM OF 12 CREDIT HOURS MAY BE TAKEN DURING THE STUDENT TEACHING SEMESTER. No outside job may be held or additional classes taken during the Student Teaching semester.

NOTE: The Associate Dean and the Chairperson of TAL in the School of Education and Human Development must approve appeals to the above policies.

Students must complete the FEAPs and the P-12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints:

1. TAL 306, and TAL 429; and application to student teaching
2. Students enrolled in all teacher-education programs will submit complete portfolios at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via Live Text as follows

- TAL 306 Field Experience Seminar I (Must submit artifacts in order to receive a passing grade).
- TAL 429 Field Experience Seminar II (Must submit artifacts in order to receive a passing grade).
- Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Licensure/Certification Information

Only students who have completed all requirements for any State approved degree or certificate program will have their transcripts stamped as meeting State approved requirements for certification as well as appropriate endorsements. Students must meet requirements of the School of Education and Human Development as well as the college or school issuing the second major. Evidence of successful completion of all twelve Florida Educator Accomplished Practices is required to receive the FLDOE stamp on the graduate's final transcript.

Transcript stamp is contingent upon the student taking at least half of the coursework in teacher education at the University of Miami, including the Student Teaching component. At least half of the coursework in the students teaching content area(s) must be taken at the University of Miami in the School of Education and Human Development, Frost School of Music, or other UM schools or colleges as determined by the program in which the student is enrolled.
Department's Honor Code, Ethics FEAP and Plagiarism Policy

At a minimum, students will receive an automatic FAIL for any assignment that shows even minimal evidence of any of the violations listed in the Student Handbook such as cheating, plagiarism, misrepresentation, collusion, falsification of data and documents, or fabrication of findings. The professor of record will have absolute discretion to judge the severity of an offense involving plagiarism and/or violation of The Honor Code, including extending the penalty to an F in the course.

Students will receive an automatic FAIL on any assignment or action which shows a violation of the Florida Educators Accomplished Practice (FEAP) 6: Code of Ethics and the Principles of Professional Conduct of the Education Profession of Florida, pursuant to Rules 6A-10.080 and 6A-10.081, F.A.C. Students are required to fulfill the expected obligation to students, the public and the education profession. The student will not be allowed to improve that grade and, for students completing the teacher preparation program, pending a committee review, FEAP 6 will be marked as permanently failed in the student’s record of Uniform Core Curriculum mastery.

A failure of FEAP 6 will result in disqualifying the student from earning the School of Education and Human Development’s State certification and endorsements. Additionally, Faculty may recommend to the Dean or Dean’s designee that students committing an honor code violation be dismissed from their teacher preparation program.

PROCESS

The process below will be followed when a student is found to have violated the Ethics/Professional FEAP (FEAP 6):

- Any violation of the Ethics/Professionalism FEAP will be reported to the TAL Chairperson and the Dean's Office and student will receive prior notice of the possibility of disqualification and/or dismissal from the accredited program
- A recommendation will be made to disqualify the student from earning the State of Florida accreditation and School of Education and Human Development transcript endorsement and/or dismiss the student from the accredited program.
- A decision will be made to convene a committee.
- A committee composed of TAL faculty and the Dean's designee will review all pertinent documentation and meet with the student.
- The student will have the opportunity to present documentation or mitigating circumstances.
- The committee will confer and render a decision about what action will be taken.
- Student will be notified of the committee’s decision in writing. Consequences may include dismissal from the teacher preparation program and/or a report to the Dean of Student's Office for an Honor Council hearing.
- The student may file a written appeal within 30 days of the committee’s decision to the Dean of the SEHD, University Ombudsperson, Faculty Senate Grade Appeals Committee.

Either the TAL Chair or the Dean’s office will refer the student to the University Honor Council. The outcome of the University Honor Council hearing will be independent of the TAL Committee’s decision to dismiss the student from the program. Consequences for violating the Honor Code include disciplinary warning, disciplinary probation, suspension or expulsion from the university.

Certificate in Teaching and Learning

- Professional Training Option (p. 1043)

TAL 103. Psychological Foundations of Education. 3 Credit Hours.

The first half of this course addresses the following topics related to the psychological foundations of education: the teaching-learning process in the classroom, human development, learning theories, and motivation. The second half of the course will address the following topics related to the social foundations of education: critical perspectives of education and schooling in the USA, issues such as accessibility, language hegemony, and race and racism through the lens of history, philosophy, anthropology, sociology and cultural studies.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 107. American Sign Language I. 3 Credit Hours.
This course is designed to allow participants to learn about Deaf Culture and be able to sign with sufficient fluency to discuss work, social, and family topics using two to four sentence responses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 191. Developmental Reading for College Students. 3 Credit Hours.
Instruction in college level reading strategies based on individual student needs. Emphasis on vocabulary, comprehension and techniques of test preparation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 203. Children's Literature. 3 Credit Hours.
History, trends, and genres of children's literature with emphasis on children's literature as a curriculum resource.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 204. Building Positive Relationships in Diverse Inclusive Secondary Schools.. 3 Credit Hours.
Course is designed to assist general education teachers in meeting the needs of diverse secondary school students. Emphasis is placed on language and culture in the classroom, as well as students with disabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 205. Contemporary Issues in Disability Studies. 3 Credit Hours.
This course allows students to explore contemporary issues individuals with disabilities face with an emphasis on the more personal aspects of living with a disability and issues that influence their daily lives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 207. American Sign Language II. 3 Credit Hours.
This course is designed to allow participants to learn about Deaf Culture and be able to sign with sufficient fluency to discuss work, social, and family topics using four to six sentence responses. Students will be able to independently participate in a signed conversation without the use of voicing.
Prerequisite: TAL 107.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 305. Classroom and Behavior Management. 3 Credit Hours.
The principles of behavior analysis and classroom management strategies, both preventative and problem solving. Special emphasis includes effective communication with students, parents and other stakeholders; meeting the needs of all learners based on individual differences, cultural and linguistic diversity; knowledge of research-based strategies that support intellectual, personal and social well-being and development of all students; planning and conducting lessons in a safe, efficient and supportive learning environment. Field experience required.
Corequisite: TAL 306.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 306. Teacher Preparation Seminar I. 0 Credit Hours.
This hybrid zero credit course has been designed to provide additional support for students in our teacher preparation programs. Students will enroll in this course while they participate in a series of field experiences where they gain practical experience integrating theory and practice while working with students in K-12 settings. Major topics include: the Florida Educator Accomplished Practices, Live Text, and guidelines and procedures. Co-requisite TAL 305
Corequisite: TAL 305.
Components: SEM.
Grading: CNC.
Typically Offered: Fall & Spring.
TAL 307. American Sign Language 3. 3 Credit Hours.
This course is designed to allow participants to learn more about Deaf Culture and be able to sign with sufficient fluency to discuss work, social, and family topics at a conversational level.
Pre-requisite: TAL 107 And TAL 207.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 308. Language Development for Linguistically and Culturally Diverse Children. 3 Credit Hours.
Course provides an introduction to theories of linguistics as well as first and second language acquisition. Readings and lectures serve to highlight the development of language and language challenges faced by students for whom Standard English is a second language and/or a second dialect. Theories of linguistics are used to identify, explain and assess literacy challenges. Field experience required. This course counts as one of two required stand-alone ESOL courses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 322. Mathematics Instruction in the Elementary School. 4 Credit Hours.
Principles and practices in the teaching of elementary school mathematics. Attention is paid to infusion of technology, linguistic and cultural diversity, students with exceptionalities, and the origins of gender bias. Field experience required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 323. Interdisciplinary Methods in the Content Areas. 3 Credit Hours.
This course aims to discuss the goals and objectives for interdisciplinary learning in the content areas, and help practice, design, and enact interdisciplinary learning activities appropriate for elementary school. During the semester, the class will create an engaging environment to help you: Understand what is the nature of interdisciplinary understanding and practices; Examine elementary curricula and state/national standards that speak to interdisciplinary learning; Develop and enact authentic lessons/units for interdisciplinary learning; Create supportive learning environments that engage diverse students; Assess student interdisciplinary learning using multiple methods; and Learn to use a variety of innovative educational technologies that facilitate interdisciplinary learning. Field Experience required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 324. Education and the Arts. 3 Credit Hours.
Exploration of the fine and performing arts and their relation to Pre-K to 12 education. Emphasis is placed on experiential learning and methods of incorporating the arts in school curricula. The course also includes a focus on the value of the arts to the individual and society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 330. Introduction to the Education of Exceptional Individuals. 3 Credit Hours.
A survey course providing a general orientation to Exceptional Individual Education as an integral part of the general education structure. Includes an introduction to appropriate educational programs for exceptional individuals.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 332. Assessment of Exceptional Students. 3 Credit Hours.
A survey of assessment instruments used to classify, assess and evaluate exceptional students in inclusive and special education settings. Advanced written, digital, and oral communication proficiencies, to include research and report-writing as well as oral presentation skills, are emphasized in this course.
Prerequisite: ENG 105 And ENG 106 prerequisite of enrollment is required for this course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 360. The Teacher in American Society. 3 Credit Hours.
This course focuses on the historical development of teaching in the US, contemporary educational reform and social change, issues involving teacher work, the impact of technology on schooling, ethical and legal issues in teaching, topics involving Race, Gender Social Class and Equity. Popular Culture sources are emphasized in the course's content.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 370. Pop Culture and Education. 3 Credit Hours.
This course examines how popular culture influences and is influenced by the work and culture of schools. In examining artifacts and trends in popular culture today and the past, the forms of popular culture we will analyze will include: motion pictures, television programs, mainstream news, music, books, magazines, zines, fashion, web-based content, graffiti, tattoos, street art, mobile communication, video games, social networking, and more.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 371. Race and Racism in the Making of US Public Education. 3 Credit Hours.
This course will examine the roles of race and racism in the social construction of education and schooling in United States, with an emphasis on how said constructions have impacted the lived experiences of marginalized racial and ethnic minorities, with a particular emphasis on Black Americans. The central themes of the course will be how and why schools in the United States of America were constructed and continue to act as sites of State-sponsored racism, paying attention not only to whom this process marginalizes but also whom it benefits. While the focus of the course will be on race, it is impossible to study race alone, in a vacuum. Therefore, a great deal of attention will be paid to issues of intersectionality, with particular emphases paid to the intersections of race and ethnicity, class, gender, sexual identity, geography, historical specificity, and disability. The semester will begin with a historical overview of the roles education and schooling have played in the lives of African Americans. Our starting point will be roughly 1850. It is important to note that the distinction is made between school and education. The course will examine the roles schools (Saturday Schools, public schools, religious schools, and Historically Black Colleges and Universities to name a few) have played, but it is also crucial to examine the roles of education outside of the context of formalized schooling. The course will examine crucial educational sites such as religious institutions and traditions (outside of religious schools), family life, community education, and oral traditions.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 390. Topics in Education. 3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 404. Content Area Literacy in the Secondary Classroom. 3 Credit Hours.
Essentials of literacy instruction in various subject areas for middle, junior and senior high schools; instructional methods and materials for development of reading, writing and study strategies. Emphasis is also placed on selecting appropriate materials, motivating students, and helping students with exceptional needs and students who are English Language Learners.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 407. American Sign Language 4. 3 Credit Hours.
This course is designed to allow participants to learn more about Deaf Culture and be able to understand signed conversations in a small group and sign with sufficient fluency to discuss work, social, and family topics at a conversational level.
Prerequisite: TAL107, TAL 207, TAL 307.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 420. Introduction to Literacy, Assessment, and Instruction in Elementary School. 3 Credit Hours.
Multidisciplinary survey of reading and writing acquisition in the elementary school. Assessment and instruction in the major components of reading: phonological awareness, word identification and phonics, fluency, vocabulary, and comprehension. Field Experience required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 421. Language Arts and Social Studies in the Elementary School. 3 Credit Hours.
Addresses Language Arts competencies in reading, writing, listening, speaking, viewing and visual literacy, following state/national standards. Research based strategies and approaches for teaching content areas, with a focus on Social Studies competencies, are modeled and integrated through Social Studies content and literature. Field experience required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
TAL 422. Mathematics Instruction in the Elementary School. 3 Credit Hours.
Principles and practices in the teaching of elementary-school mathematics. Attention is paid to infusion of technology, linguistic and cultural diversity, students with exceptionalities, and the origins of gender bias. Field experience required.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 425. Inclusive Classrooms in the Elementary School. 3 Credit Hours.
The course prepares elementary school teachers to meet the individual needs of students with exceptionalities who have been integrated into the general education classroom. Field experience required.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 426. Practicum in Reading. 3 Credit Hours.
Supervised practicum in reading and writing. Emphasis is on assessment and interventions for elementary students with a range of academic, linguistic and cultural challenges in becoming proficient readers. This course is a designated Upper Level Communications Requirement; advanced written digital and/or oral communication proficiencies will be emphasized in this course.

Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 428. ESOL Curriculum and Methods and Assessments. 3 Credit Hours.
The course addresses the application of TESOL theories, principles, and current research to the use of curriculum, methods, and assessment. In doing so, the course focuses on an understanding of the differences between curriculum, methods, and assessment designed for children who are native speakers of Standard English and those designed for ESOL. Specific TESOL modifications appropriate for content areas are also addressed. Field experience required. This course counts as the second of two required ESOL specific courses. Advanced written, digital, and oral communication proficiencies, to include research and report-writing as well as oral presentation skills, are emphasized in this course.

Prerequisite: TAL 308 and Co-requisite: TAL 429.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 429. Teacher Preparation Seminar II. 0 Credit Hours.
This hybrid zero credit course has been designed to provide additional support for students in our teacher preparation programs. Students will enroll in this course while they participate in a series of field experiences where they gain practical experience integrating theory and practice while working with students in K-12 settings. Major topics include: the Florida Educator Accomplished Practices, Live Text, and guidelines and procedures. Co-requisite: TAL 428 for students in programs that lead to the ESOL Endorsement; TAL 506 for students in MED and SEC except Secondary English majors.
Corequisite: TAL 428 or TAL 506.
Components: SEM.
Grading: CNC.
Typically Offered: Fall & Spring.

TAL 432. Inclusive Models of Teaching. 3 Credit Hours.
This course focuses on models of inclusion and the educational roles to support student success in inclusive settings. Topics addressed include: differentiated staffing patterns; working as a member of a team; successful collaborative practices; effective communication; understanding of varied cultural backgrounds; strategies for facilitating successful inclusion including differentiation of instruction and application of principles of Universal Design for Learning (UDL); co-teaching; strategies for working effectively with students, families, parents, guardians, administrators, general education teachers, paraprofessionals and other professionals, including students, families, and team members; and creating school partnerships.
Field Experience required.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 434. Specialized Instructional Strategies/Transition. 3 Credit Hours.
This course focuses on evidence-based interventions and models of support for students with disabilities in K – 12 settings and strategies for preparing students for transition from school. Topics addressed include: strategies for using Assistive Technology effectively; strategies for enhancing self-advocacy and self-determination for students with disabilities; strategies for enhancing family involvement in career development and post school employment; transition services and models; preparing students with disabilities for employment and post-secondary education; residential alternatives; recreation and leisure for students with disabilities. Field Experience required.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
TAL 444. Instruction in Secondary Science. 2-3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching science in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 461. Pidgins, Creoles and African-American English in Education. 3 Credit Hours.
The course examines some of the most commonly spoken languages in the African diaspora in North and South America as well as in the Caribbean, namely, pidgins, creoles and African-American English. The course also explores the linguistic contributions that West African and European languages have made to the development of Atlantic Pidgins, Creoles and African-American English. Analyses of their lexicons, morphological and grammatical features are addressed along with the ways in which these linguistic structures are used to index different identities in the African-American and Creole cultures. Additionally, the course renews the call for a responsive agenda that recognizes the obstacles faced in formal education by child speakers of Creoles and African-American English and the need for public awareness of the extensively researched merits of accommodating these vernaculars in the classroom.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 470. Student Teaching in the Elementary School. 9 Credit Hours.
A comprehensive semester-long program in observation and supervised teaching in the elementary school. The student spends full time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 471. Student Teaching in the Elementary Schools for K-12 Areas. 3-6 Credit Hours.
A comprehensive program in observation and supervised teaching in the elementary school. The student spends full-time for one half a semester in an elementary school, participating in all activities of the teacher under the guidance of school and university personnel.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 473. Associate Teaching in the Secondary School for K-12 Areas. 3-6 Credit Hours.
A comprehensive program in observation and supervised teaching in the secondary school. The student spends full time for one half a semester in a secondary school, participating in all activities of the teacher under the guidance of school and university personnel.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 480. Seminar On Teaching. 3 Credit Hours.
The seminar is designed to support teacher candidates during the associate teaching experience. Students receive support and assistance in completing Florida Educator Accomplished Practices (FEAP) electronic portfolios. Students share, reflect, and discuss their daily experiences in class during culminating experience in the field.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 491. Applied Research in Education. 3 Credit Hours.
Introduction to basic research methods, ethics in education research, and the implications of research on the practice of teaching. Assist a TAL faculty member with a research project.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 493. Online Teaching and Leadership. 3 Credit Hours.
Introduction to teaching-learning process in online learning environments, including asynchronous modalities, assessment and evaluation, technology and digital copyright usage.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 495. Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study will be required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
TAL 496. Undergraduate Research Honors. 1-3 Credit Hours.
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study will be required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 501. Classroom Based Assessment. 1-3 Credit Hours.
Principles and classroom applications of educational measurement and assessment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 502. Classroom Based Research. 3 Credit Hours.
Application of research principles to evaluation and improvement of teacher effectiveness. Use of scientific methods in problem solving and decision making in the classroom. Student experiences in the planning, conduct, analysis and reporting of classroom research are included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 503. Technology Applications in Education. 3 Credit Hours.
This course is designed to help you better understand why and how to use modern technologies in educational settings. Throughout the course, you will identify and share accessible technological resources, participate in hands-on activities, conduct mini-teaching, and create technology-enhanced instructional materials. You will examine the affordances and constraints of a variety of technologies including mobile learning, computer-based visualizations, web-based curriculum platforms, augmented and mixed reality, and online collaboration tools. You will discuss with the instructor and peers critical issues and policy relevant to the effective use of technologies in K-12 classrooms or informal learning environments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 504. Building Positive Relationships in Inclusive Secondary Schools. 3 Credit Hours.
Designed to assist general education teachers in meeting the needs of diverse secondary school students. Focus on students with disabilities, language and culture in the classroom, and developing culturally competent classroom management methods.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 506. Issues and Strategies for ESOL. 3 Credit Hours.
This course provides a comprehensive foundation in ESOL (English for Speakers of Other Languages) competencies based on Florida's mandates and TESOL standards. Theory and practice will be emphasized in the areas of applied linguistics, cross cultural communication and understanding, methods of teaching, assessment, and curriculum and material development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 508. Language Development for Linguistically and Culturally Diverse Students. 3 Credit Hours.
Course will provide an introduction to theories of linguistics, first and second language acquisition, as well as foundations of English learner education. Readings and lectures will serve to highlight the development of language and literacy, including challenges faced by students for whom Standard English is a second language and/or a second dialect. This course will be the first in a two- course ESOL sequence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 517. Curriculum, Assessment, Teaching and Learning for Physical Science. 3 Credit Hours.
Analysis of content knowledge, pedagogy, and materials appropriate for teaching physical science in the elementary school. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in physical science, pedagogy, and student literacy in physical science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 518. Curriculum, Assessment, Teaching and Learning for Number, Operations, and Algebra. 3 Credit Hours.
This course examines topics that address the mathematical ideas underlying number, operations and algebra. Related curriculum, instructional and assessment issues will be also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 522. Curriculum, Assessment, Teaching and Learning in the Earth Sciences. 3 Credit Hours.
Analysis of content knowledge, pedagogy, and materials appropriate for teaching Earth science in the elementary school. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in Earth science, pedagogy, and student literacy in life science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 523. Curriculum, Assessment, Teaching and Learning for Data Analysis and Probability. 3 Credit Hours.
Data in the elementary school: how to gather (biased and unbiased samples), store, manage, represent, analyze. Probabilistic inferences in elementary school: chance, odds, counting, related topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 524. Education and the Arts. 3 Credit Hours.
Exploration of the fine and performing arts and their relation to PreK-12 education. Emphasis is placed on experiential learning and methods of incorporating the arts in school curricula. The course also includes a focus on the value of the arts to the individual and society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 526. Practicum in Reading. 3 Credit Hours.
Supervised practicum in reading and writing. Emphasis is on assessment and interventions for elementary students with a range of academic, linguistic and cultural challenges in becoming proficient readers.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 527. Language and Assessment in ESOL. 3 Credit Hours.
Study of language systems with a focus on understanding and applying linguistic terms. Course prepares teachers to conduct informal and formal assessment procedures with English language learners. Field experience with English language learners is required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 528. ESOL Curriculum, Methods, and Assessment.. 3 Credit Hours.
This course focuses on applying TESOL theories, principles, and current research to the development and use of instructional materials, curriculum, and methods. The course will enhance participant's knowledge of the regular English language arts curriculum in comparison with the ESOL curriculum.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 531. Educating Exceptional Students. 3 Credit Hours.
A survey course in special education emphasizing characteristics and problems associated with various categories of exceptional learners. Policy, issues, and trends in special education will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 540. Instruction and Assessment in the Secondary School.. 3 Credit Hours.
Research-based instructional processes in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 541. Instruction and Assessment in Secondary English Language Arts. 3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching language arts in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 542. Instruction and Assessment in Secondary Mathematics. 3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching mathematics in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
TAL 543. Instruction and Assessment in Secondary Science. 3 Credit Hours.
Analysis of methods, content and assessments appropriate for teaching science in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 544. Instruction and Assessment in Secondary Social Studies. 3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching the social sciences in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 545. Methods of Teaching in the Elementary School. 3 Credit Hours.
Theories and research-based practices for reading/language arts, science, social studies, and math instruction for all learners, including diverse populations in elementary classrooms.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 550. Language and Early Reading Instruction. 3 Credit Hours.
Factors related to emergent literacy with an emphasis on diverse aspects of language that influence literacy and learning; development of emergent literacy and word perception; emergent literacy curriculum development; appropriate assessment and instructional techniques. Understanding of reading as a process of student engagement in fluent decoding and construction of meaning. Writing intensive.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 552. Reading Comprehension. 3 Credit Hours.
Development of comprehension, rate, and study skills; reading in the content areas; evaluation of materials, organization of programs; issues, problems, and exceptional readers. Emphasis is placed on understanding reading as a process of student engagement in fluent decoding of words and construction of meaning.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 553. Mentoring and Internship in Classroom Teaching. 3-6 Credit Hours.
A comprehensive program of supervised teaching in elementary or secondary class rooms.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

TAL 554. Literacy and Learning Strategies in the Content Area. 3 Credit Hours.
Literacy instruction in content areas for grades 6 through 12; instructional methods and materials for development of language arts, reading, and study skills. Emphasis on appropriate materials, motivation, and support for students with exceptional needs and English language learners.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 557. Exceptional Student Education and Classroom Management. 1-5 Credit Hours.
Introduction to theories and methods of effective classroom management and learning environments, perceptions of disabilities, addressing disruptive behaviors in classrooms and behavioral assessment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 558. ESOL Strategies and Classroom Management. 1-5 Credit Hours.
This course provides a general overview of foundation in ESOL (English for Speakers of Other Languages) competencies based on Florida’s mandates and ESOL Standards. Theory and practice will be emphasized in the areas of applied linguistics, cross cultural communication and understanding, methods of teaching, assessment, and curriculum and material development. A Classroom Management Plan will be developed based on current issues and effective classroom strategies for diverse populations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 568. Education Reform, Policy, and the Social Organization of Schooling. 3 Credit Hours.
This course is designed to introduce students to the politics and policy debates in American education, including how the U.S. K-12 public education is organized as a socially-constructed system. We will examine the politics of a variety of recent reforms at the local, federal and state levels and their impact on institutions, students and the public.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 569. Teaching and Management for Diverse Classrooms. 3 Credit Hours.
This course will emphasize building a classroom culture and community that meets the needs of all students, including learners with disabilities and learners with culturally and linguistically diverse backgrounds. A history of major legal requirements for diverse populations is examined, including the meaning of learning differences, definitions and causes of disabilities, language acquisition processes, and methods for teaching diverse populations. An introduction to theories and methods of effective classroom management for building learning communities is integrated throughout the course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 570. Student Teaching in the Elementary School. 9 Credit Hours.
A comprehensive semester-long program in observation and supervised teaching in the elementary school. The student spends full-time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel.
Corequisite: TAL 580.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 572. Student Teaching in the Secondary School. 6-9 Credit Hours.
A comprehensive program in observation and supervised teaching in the secondary school. The student spends full-time in a secondary school participating in all activities of the teacher under the guidance of school and university personnel.
Corequisite: TAL 580.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 577. Human Development, Learning and Schooling. 3 Credit Hours.
Major theories of child development and learning will be discussed with a focus on how they apply to teaching and learning in K-12 schools.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 580. Seminar on Teaching. 1-3 Credit Hours.
Topical seminar to accompany associate teaching
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 584. Topics in the Professional Development and Supervision of Teachers. 3 Credit Hours.
Topics include the preparation of clinical teachers to induct, guide, and supervise the field experiences of students and associate teachers; techniques in the observation and supervision of in-service teachers; creation and implementation of professional development plans; reading in the research on teacher development across the career.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 590. Topics in Education. 3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
TAL 591. Workshop in Education. 1-6 Credit Hours.
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 593. Online Teaching and Leadership. 3 Credit Hours.
Introduction to teaching-learning process in online learning environments, including asynchronous modalities, assessment and evaluation, technology and digital copyright usage.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 595. Research Honors Project. 2 Credit Hours.
Faculty mentored research project. This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 596. Research Honors Project. 2 Credit Hours.
Faculty mentored research project. This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 597. Research Honors Project - Thesis Writing. 2 Credit Hours.
Faculty mentored research project. This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 598. Research Honors Project - Seminar. 1 Credit Hour.
Faculty mentored research project. This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 599. Workshop in Education. 1-6 Credit Hours.
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

B.S.E.D. Elementary/Exceptional Student Education (ESE) with ESOL and Reading Endorsements

The Department of Teaching and Learning offers a major in Elementary/Exceptional Student Education that leads to certification in Elementary Education (K-6)/ESE (K-12) with ESOL and Reading endorsements. The requirements for Elementary/ESE Education are a major in Elementary/ESE Education and a minor outside of the Department of Teaching and Learning.

Requirements for Graduation

Bachelor of Science in Education

1. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin.
**Exemption**
Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);
4. Statement of Foreign Language Requirements;

**Florida Teacher Certification (FTCE)**
Students must pass the Professional Education, General Knowledge and Subject Area tests of the Florida Teacher Certification Examination (FTCE).

**Florida Educator Accomplished Practices (FEAPS)**
Students must complete the Florida Educator Accomplished Practices (FEAPs) and the P-12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints: Students enrolled in all teacher-education programs will submit complete portfolios at

1. application to student teaching and
2. at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via Live Text as follows

- TAL 306 Field Experience Seminar I (Must submit artifacts in order to receive a passing grade).
- TAL 429 Field Experience Seminar II (Must submit artifacts in order to receive a passing grade).

**Departmental Proficiency Examinations**
Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

**Credit Only**
Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

**Transfer Credit**
Transferred credit hours may not count toward the completion of a major without the written approval of the Associate Dean of the School of Education and Human Development.

**Transfer Students**
Transfer Students must take the General Knowledge Test (GKT), of the Florida Teacher Certification Exam, before enrolling in any Teaching and Learning Course. Students may submit their scores directly to the Associate Dean of the School of Education and Human Development.

**Required Areas of Study**

**English Composition 3 – 6 credit hours**
Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105. Courses satisfying the English Composition requirement may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

**Mathematics**
B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

**Foreign Languages (not applicable)**

**Areas of Knowledge and Cognate Requirements**
The University of Miami’s General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a Cognate, which is a cluster of courses arranged by their content, field and interest.
A cognate is a group of at least three related courses for at least 9 credit hours.

- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Student must take three cognates to fulfill the Areas of Knowledge requirement,
  - one in the Arts & Humanities (A&H),
  - one in People & Society (P&S), Satisfied by the Elementary Education/Special Education major.
  - one in Science, Technology, Engineering & Mathematics (STEM).
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
  - Exercise Physiology and Athletic Training majors will fulfill the STEM cognate.
  - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the P&S cognate.
- An approved list of cognates can be found on the University of Miami website.

**Writing**

Every student majoring in Teaching and Learning, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses for the TAL Major which meet the Advanced Writing and Communication Skills Requirement are TAL 332 and TAL 428.

**Majors**

Every candidate for the B.S. Ed. degree in the Department of Teaching and Learning must choose a major in Elementary/Exceptional Student Education (ESE) with ESOL and Reading endorsements.

**Minors**

Every candidate for a B.S. Ed. in Elementary Education/ESE must select a minor outside of the department of TAL.

**Electives**

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above. Students may select elective course credits beyond the major, minor and general education requirements to complete a total of 120 credits required for the degree.

Note: Common prerequisites and total length for state-approved teacher education programs are subject to revision based on legislative and State of Florida Department of Education rule changes.

**General Education Assessment**

Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Please note: Students may not register for any class above TAL 332 without admission to Teacher Candidacy. Please see the requirements for Teacher Candidacy on the TAL Department page (p. 1025).

Please note: Students are strongly encouraged to register for TAL 203 and TAL 324.

### Mission

The mission of the University of Miami (UM) School of Education and Human Development is to prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community. The Department of Teaching and Learning (TAL) is the unit that oversees all Teacher Preparation Programs at UM.

### Goals

The goal of Teacher Preparation Programs in the Teaching & Learning Department is to prepare University of Miami students to teach K-12 students in Elementary/Exceptional Student Education with ESOL & Reading Endorsement. The major, once completed, leads to eligibility for State of Florida Professional Teaching Certification.

### Student Learning Outcomes

- Students in the Elementary/Exceptional Student Education with ESOL & Reading Endorsement Program will demonstrate in-depth knowledge in their area of specialization by correctly answering 80% of the questions on the Florida Teacher Certification Examinations (FTCE) by the time they graduate.
- Students will demonstrate Mastery of the Florida Educator Accomplished Practices.
- Students will demonstrate knowledge of Pedagogy and Effective Teaching Practices.

1. All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
2. It is strongly recommended that students enroll in courses for this minor which do not include Field Experience. Please see an advisor for a list of those courses.
3. TAL 107, TAL 207, TAL 307, TAL 407, and TAL 191 do NOT count toward the minor.
4. This minor does not lead to teaching credentials.

Professional Training Option Minor

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring or minoring in a teachable subject.

The PTO is an 18 credit minor.

1. Students must pass the specified tests of the Florida Teacher Certification Exam. These tests include the General Knowledge Test (all four sections) and the Subject Area Exam of the student's discipline area (Biology, English, Math etc...). These tests must be passed prior to graduation in order to be eligible for the State of Florida Stamp applied to transcripts.
2. All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
3. Students must pass all 4 sections of the General Knowledge Exam (GKT), part of the FTCE, in order to be eligible for 400 level courses or higher.

Professional Training Option Minor

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring in a teachable area in order to participate in the program.

The PTO minor consists of 18 credit hours passed with a C or higher with an overall GPA of 2.5 or higher. Upon successful completion of the coursework and passing the required Florida Teacher Certification Exams (FTCE) student's UM transcripts will indicate that the student has completed a Florida State-approved PTO program. Students will then be eligible to apply for a 3-year Temporary Teaching Certificate in the State of Florida. There is a one-year of successful teaching requirement in an accredited school in Florida in order to apply for a Professional Teaching Certificate. Please note: Students must have passing scores on the FTCE prior to graduation in order to be eligible for the PTO Stamp.

## Engineering

http://www.miami.edu/engineering

### Mission

The College of Engineering transforms lives by: creating new knowledge, re-creating knowledge for education, translating knowledge for commercialization, and applying knowledge to serve the community.

The objective of the College of Engineering is to serve society by offering high quality educational programs in the professional areas that it covers, and by performing research and community service, with high professional standards. The College is dedicated to educating engineers to deal with the major issues of society over the next generation - enhancing competitiveness, advancing health care, coming into harmony with the environment, utilizing technology for humankind's benefit, and supporting a sophisticated infrastructure. The goal of the faculty is to prepare students to be employed effectively in manufacturing, consulting, construction, information technology, service industries, and those related to the medical industry and health care, in roles involving planning, design and implementation at all levels of decision making. Students are broadly prepared in technical, leadership, and management skills. Student development accrues both inside and outside the classroom, with input from faculty, employers, alumni, and other students. They are made acutely aware of environmental and international perspectives. Professional competence in the traditional sense is complemented by a broad capability to function in society. The College places great emphasis on providing students with a learning experience which will enable them to develop productive careers while creating engineering solutions to problems of our society. Learning is centered around real life experiences, which involve an understanding of science, mathematics, social values, and aesthetics, to produce economical solutions to physical problems which society encounters. Protection and enhancement of the environment is stressed at all levels, and emphasis is placed on the creative application of knowledge which will improve the quality of life.

### Department and Programs

The College of Engineering has five departments -

- Biomedical Engineering,
- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical and Aerospace Engineering

Offering curricula leading to Bachelor of Science degrees in the following fields:

- Aerospace Engineering,
- Architectural Engineering,
- Biomedical Engineering,
- Civil Engineering,
- Computer Engineering,
- Electrical Engineering,
- Engineering Science,
• Environmental Engineering,
• Industrial Engineering, and
• Mechanical Engineering.

Interdisciplinary areas of study, areas of specialization within departments, and study in two entirely different areas are available through options, concentrations and dual degree programs.

Accreditation
The programs in Aerospace Engineering, Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering are accredited by the Accreditation Commission of ABET, http://www.abet.org
415 North Charles Street
Baltimore, MD 21201
telephone: 410-347-7700

The program in Engineering Science is not accredited.

The College offers graduate programs leading to degrees both in the traditional and interdisciplinary areas of study. Programs leading to the M.S. degree may include specialization in the following areas of study: Architectural Engineering, Biomedical Engineering, Civil Engineering, Electrical and Computer Engineering, Engineering Management, Environmental Engineering, Industrial Engineering, Mechanical Engineering, Medical Informatics, Structural Engineering, and Thermal and Fluid Sciences.

Engineering Laboratories
The College of Engineering maintains a variety of well-equipped laboratories adequate for undergraduate instruction and providing for graduate and sponsored research.

Computer Laboratory
• Clarke Computational Laboratory
• Computer Graphics Laboratory

Biomedical Engineering Laboratories
• Biomedical Design and Instrumentation Laboratory
• Biomaterials/Circulatory Assist Device Laboratory
• Biomedical Atomic Force Microscopy Laboratory
• Biomedical Optics Laboratory
• Diabetes Tissue Engineering Laboratory
• Joint Bioengineering and Endourology Laboratory
• Measurements Laboratory
• Medical Imaging Laboratory
• Neuroprosthetics Research Group
• Neurosensory Engineering Laboratory
• Stem Cell and Mechanobiology Laboratory
• Tissue Biomechanics Laboratory
• Tissue Engineering Laboratory

Civil, Architectural and Environmental Engineering Laboratories
• Environmental Engineering Laboratory
• Geotechnical Engineering Laboratory
• Mechanics of Solids and Materials Laboratory
• Structures and Materials Laboratory
• Sustainable Building Systems Laboratory

Electrical and Computer Engineering Laboratories
• Electronics Laboratory
• Wireless Communications Laboratory
• Digital Signal Processing Laboratory
• Electrical Machinery Laboratory
• Digital Design Laboratory
• Microprocessor Laboratory
• Photonics and Micro-Devices Laboratory
• Distributed Decision Environments Laboratory
• Underwater Imaging Laboratory
• Networks Laboratory
• Embedded Systems Laboratory
• Computer Vision and Image Processing Laboratory
• Information Technology Laboratory
• Multimedia Laboratory
• Digital Audio and Speech Processing Laboratory
• Optics and Fiber Communications Laboratory
• ECE Computer Laboratory
• Nanophotonics and Devices Laboratory
• MEMS and VLSI Laboratory

**Industrial Engineering Laboratories**
• Computer Integrated Manufacturing Laboratory
• Industrial Hygiene Laboratory
• Biomechanics and Gait Laboratory
• Human Factors and Aging Research Laboratory
• Productivity Research Laboratory
• Work Design Laboratory
• Work Physiology Laboratory
• Systems and Operations Research Laboratory
• Industrial Ventilation Laboratory
• Robotics Laboratory

**Mechanical and Aerospace Engineering Laboratories**
• Aerospace Materials Simulation Laboratory
• Aerodynamics and Computational Fluid Dynamics Laboratory
• Design and Manufacturing Laboratory
• Fuel Cells Laboratory
• Thermo-Fluid Mechanics Laboratory
• Integrated Nano-Bio-Systems Laboratory
• Internal Combustion Laboratory
• Materials Laboratory
• Materials Modeling Laboratory
• Measurements Laboratory
• Multifunctional Composite Materials Laboratory
• Optimization and Reliability Laboratory
• Robotics and Intelligent Systems Engineering Laboratory
• Stress Analysis Laboratory
• Tissue Biomechanics Laboratory
• Wind Tunnel Laboratory

**Academic Policies**

**Admission**
Admission to the College of Engineering is covered under the section on Admission to the University in the General Information section of this Bulletin. Algebra, trigonometry, analytic geometry, chemistry, computer literacy, and physics are high school subjects that are appropriate for students planning on entering the College.
The academic work of each transfer student will be evaluated on an individual basis, and the student will be enrolled in the College at an appropriate level.

Requirements for Graduation

The College believes that emphasis should be placed on the student’s ultimate level of attainment in selected subject areas. For those students whose preparation is advanced beyond that of the average secondary school graduate, the University provides proficiency examinations and schedules the students for more advanced work. Graduation for these students may be accelerated. For those students whose secondary school preparation has not provided an adequate background, the University offers preparatory courses. Graduation for these students may be delayed accordingly.

The student's program of study is selected jointly with an adviser, with special attention to the individual student's needs. Flexibility is ordinarily possible within the framework of sound education in the essential fundamentals and within the development of depth in selected fields of design and analysis. An examination of a typical curriculum given under the various department sections of this Bulletin shows that there is a strong common core of studies. Therefore, students uncertain of their ultimate field of specialization retain a high degree of mobility to enable them to transfer from one curriculum to another.

Each student must demonstrate upon admission an adequate preparation in the necessary skills of reading, writing, and mathematics. Placement test scores will indicate which, if any, supplementary courses must be taken the first semester. Although these courses are recorded for University credit hour, the student must take the full curriculum, as listed, in addition to these courses. Students not prepared in these areas are advised to make every effort to correct deficiencies before the first semester.

Completion of any of the prescribed curricula, except Engineering Science, with an overall grade point average of at least 2.0 (C) in all course work, to include all accepted work from other institution(s), is the basic requirement for graduation in the College. An average of C also must be attained in all work attempted at the University of Miami and the professional studies. The Engineering Science curriculum, because of its special purpose, has a higher requirement, i.e., a grade point average of 3.0 (B).

The requirements for graduation as specified by each Department and Program reflect the general education requirements of the University of Miami and the requirements of the appropriate accrediting agencies. The curricula contain required courses and elective courses. No course required for graduation may be taken under the credit-no credit (Credit-Only) option.

Students are expected to make satisfactory progress toward graduation by meeting the criteria established above. Whenever a student fails to demonstrate positive academic progress, he/she may be placed on academic probation or dismissed by the College of Engineering Scholastic Standards and Advising (SSA) Committee.

General Educational Requirements

Areas of Knowledge

Students at the College of Engineering fulfill the Areas of Knowledge requirement by completing three cognates, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

For students in the College of Engineering, their engineering major will count as a cognate in Science, Technology, Engineering & Mathematics. These students have to complete a cognate in People & Society and Arts & Humanities.

A cognate is a group of at least three courses for at least nine credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate. While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students’ transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates/) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate’s RAU.

Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. These requirements are specified under each department.

The student’s official records are maintained by the Office of Enrollment Services. It is the student’s obligation to take the initiative to assure that all requirements are being met in conformity with his/her own graduation plans.
Degree Programs

Dual Majors
Dual majors are offered for engineering students with strong interest in related fields of study such as Physics or Mathematics. In order to obtain a
dual major in one of these areas, the student will have to obtain, in parallel, a degree in one of the engineering programs, plus additional course work
approved by the dual majors department. Further information on this dual major program may be obtained from the Dean's Office of the College.

Minors
Minors are offered by the College of Engineering. The departments of:

- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical Engineering

offer minors with various areas of specialization. Details of each area of concentration and its requirements may be found under each departmental
listing.

Engineering students can earn a minor offered by any other College/School within the University of Miami, including the College of Engineering.
In cases where the major degree requirements satisfy some of the requirements for the minor, at least six credit hours beyond the major degree
requirements must be taken in the minor subject area to earn a minor. Minors in Engineering require a minimum GPA of 2.0 in the courses required for
the minor.

Departmental Honors Program
A student in the College of Engineering may graduate with Departmental Honors noted upon his/her diploma and transcript upon fulfillment of the
following requirements:

1. Completion of at least 18 credit hours of course work in honors courses and/or in courses at the 500 level, including 6 credit hours in independent
study, senior thesis, or designated advanced or special honors courses specified by the department, with grades of at least B in these 6 credit
hours.
2. Attainment of at least a 3.4 overall grade point average. Transfer students must also attain at least a 3.4 grade point average in all work taken at
the University of Miami.
3. Attainment of at least a 3.5 average in the departmental major courses.
4. A written request from the student to the departmental faculty during his/her semester of expected graduation stating the desire to graduate with
Departmental Honors, and specifying those courses taken in compliance with section (A) above.

Certificate Programs in Engineering
In cooperation with the University's School of Continuing Studies, the College of Engineering offers practicing engineers advanced or specialized
training without having to meet the stringent entrance requirements of the Graduate School. Persons holding Bachelor's degrees, registered as
Professional Engineers, or possessing equivalent qualifications can be granted Certificates of Proficiency by the University after completing fifteen
credit hours of course work in a specified field of engineering. Study programs are arranged on an individual basis by each student and his/her advisor.
Detailed information on Certificate Programs can be requested from the Office of the Dean of Engineering.

The Internship Cooperative Program
The Cooperative Program takes its name from the close cooperation that exists between the College and participating employers. This arrangement
attempts to insure that each student’s academic and work experience will integrate and contribute significantly to his/her overall growth and
professional development. Interviews and screening by both the employer and Cooperative Program personnel attempt to match the needs of the
employer carefully with the interests and capability of the student.

Advantages to the Student

1. Offers on-the-job experience to supplement the academic degree program.
2. Offers potential long term career employment with the Cooperative Program employer.
3. The experience obtained makes the student, upon graduation, potentially much more valuable to any future employer. Upon completion of an
appropriate amount and level of experience, graduation in the Cooperative Program may be recognized by a special seal on the student's diploma.
4. Helps the student to verify whether or not his/her career or specialty choice is correct.
5. Tends to increase motivation and to make academic studies more meaningful.
6. Earnings from Cooperative Program employment can cover a significant portion of the student’s college expenses.
7. Certain work experience may shorten the experience requirements, after graduation, for eligibility for professional registration.
8. Helps to develop the students understanding of human relations and the lifelong need of learning to balance appropriately the demands on one’s time of multiple duties such as studying, employment, daily necessities, family obligations, etc.

Advantages to the Employer

1. Offers an opportunity to recruit and screen potential employees in the fields of engineering.
2. The Cooperative Program maintains an up-to-date roster of available undergraduate and graduate students, many with previous experience. This roster offers employers means of obtaining employees to meet fluctuating work loads, on relatively short notice.
3. Students in the Cooperative Program can provide good company public relations with their classmates.
4. Participation in a Cooperative Program serves the profession by providing opportunities for many capable and well deserving young persons to attend a University, who otherwise might lack the financial ability or motivation to attend.

Types of Cooperative Program Arrangements

Continuous Work-Study
An arrangement involving a combination of part-time employment (15 or more hours per week) and a credit hour academic load which is appropriately reduced from the normal full-time load to balance the employment duties. Full-time employment may be undertaken during the summer period. Two students may be used during the year to share the hours of a full-time position (20 hours each student). In some instances, an individual student will hold a full-time position and carry a light academic load in evening and/or early morning classes.

Alternating Work-Study
An arrangement involving two students alternating full-time employment and full-time study. Students alternate positions of work and study at the end of each semester (including the summer), and thereby provide the equivalent employee time of a full-time position year-round.

Student Eligibility for the Program
University of Miami students enrolled in the College of Engineering are eligible to enter the Cooperative Program. Initial entry into the Program is limited to superior students. Normally, work assignments are not given until the equivalent of one or two semesters of full-time academic work is completed. Currently, most students in the Program are under continuous work-study arrangements.

Study Abroad Programs
The College of Engineering encourages its students to take advantage of one of the University of Miami’s numerous study abroad options in Latin America, Europe, Asia, Australia and the Middle East, especially through partners in the Global Engineering Education Exchange (GE3). Of particular interest to Engineering students are the following: internships (unpaid and paid) in Spain, England, France, Argentina, Colombia, Chile, and Australia in which professional work experience is carried out abroad; course work at Engineering schools abroad for a semester or an academic year; summer programs in intensive Language instruction, Humanities and Social Sciences abroad. The cost of attending these programs is equivalent to University of Miami tuition and fees. Almost all University of Miami financial aid is granted. With prior approval and detailed curriculum advice, courses taken abroad will apply towards graduation.

The Management of Technology Supplemental Program
The objective of this program is to educate engineers in how to exploit their technological knowledge. This is a vital, but often neglected, link in achieving competitiveness in the global marketplace. The basic premise motivating this approach is the recognition that in today’s world, technology is the backbone of the business enterprise system and that wealth can only be created through production of goods and services. This program will educate engineers in a multitude of subjects bridging the gap between product technology, production technology and the marketplace, which is the ultimate customer of engineering contributions.

The program consists of four courses:
1. Quality in Design of Products and Production Systems
2. Entrepreneurship for Engineers
3. Production Systems Design

A project is required at the end of the program, but is threaded throughout the program starting with the first course. Upon completion of the program, the student will receive a special certificate of completion. This program is available to all qualified students in all departments of the College of Engineering.

Admission to the Program
Admission to this supplemental program will be by application submitted by the candidate or by nomination by an advisor or department chair. All applications will be reviewed by a standing committee. Students must meet the prerequisite of each course before enrolling in it.
Requirements for the Certificate
The program is an add-on to existing curriculum. Students must complete all courses designated in order to qualify for the certificate. A notation will be made on the student’s transcript recognizing their completion of the special program. No designation will be made on the diploma.

Course Sequence
Courses are recommended to be taken in the sequence indicated above.

Team Work
Students will be encouraged to work on projects in teams. Multidisciplinary teams will also be encouraged.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Addition is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

Combined BS/MS Program
The College offers a five-year Bachelor of Science and Master of Science BS/MS degree program in Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering. This program is specifically designed for those students who want to pursue their graduate study as they are completing their undergraduate study. Both degrees are awarded at the completion of required coursework for both the BS and MS degrees. The special conditions and processes for the five-year BS/MS Program are as follows:

Requirements
You must be an undergraduate student in the College of Engineering (CoE). A master’s degree is considered the first professional degree in engineering. The Admission Committee will carefully review academic credentials for admission into our M.S. program. Students should discuss the program and possibility of entering with an academic adviser. Completed applications are due prior to the beginning of your junior year.

Application Process
Interested CoE students must complete the application process during their “junior” year. Applicants will need to provide all the required documentation outlined on the on-line graduate application including 3 recommenders, a UM transcript sent directly from the UM Office of the Registrar. An admission decision will not be made until all required application materials have been received and processed for review by the Admission Committee.

Financial Implications
Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree. For further information contact the University of Miami Financial Aid Office.

Once admitted into BS-MS program
In your senior year when you have a full time undergraduate status, you may take a maximum of twelve (12) graduate credit hours (a maximum of six (6) credit hours per semester) with approval of your academic advisor. In order to register for these classes, you must complete and submit the UM Graduate School “Application for Undergraduate to Take Graduate Course” special form.

During your last one or two semesters, when you are taking graduate course work only, register as a graduate student.

A student wishing to withdraw from the BS/MS Program without the MS degree must complete all the requirements for the BS degree.

To qualify for the MS degree, the student must meet all the pertinent Graduate School requirements, including a minimum of 3.0 GPA in the credit hours applied toward the MS degree.

The student is awarded both the BS and MS degrees at the end of the fifth year when all degree requirements are satisfied.

The Doctor of Philosophy Degree is currently offered in the area of:

- Biomedical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Ergonomics and Human Factors
- Industrial Engineering
- Mechanical Engineering
The Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

The Bulletin of the Graduate School (p. 2203) presents more detailed information on these graduate programs.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Addition is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

Foote Fellows in CoE

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows in the College of Engineering are exempt from the Cognates Program of General Education requirements within the curricular framework of their major. Within the curricular framework of their majors, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated adviser helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Biomedical Engineering

http://www.miami.edu/bme

Dept. Code: BME

Introduction

Biomedical engineering is a multidisciplinary field that addresses problems at the interface of engineering, medicine, and the life sciences. Examples include the design of medical devices, implants and prostheses; the development of new biomaterials or drug delivery systems; the engineering of cells and tissues; the design of optical and laser systems for diagnostic and therapy; the development of medical imaging systems and algorithms for medical image processing; and the acquisition, interpretation and use of physiological signals to assess and control physiological function, such as the use of brain signals to control movement in brain computer interfaces. Biomedical engineering has an impact on virtually all fields of medicine.

The Department of Biomedical Engineering at the University of Miami was formally created in 1979 as a graduate program. The four-year undergraduate program leading to the B.S degree in BME was established approximately ten years later to address the need for professional biomedical engineers. The undergraduate BME program at the University of Miami was the first of its kind in Florida, with the first class of B.S.B.E. students graduating in 1993. It has been continuously accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board of Engineering and Technology (ABET) since 1997. The Department of Biomedical Engineering also offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees and it includes a graduate program in Medical Physics. The PhD program in Biomedical Engineering is also a degree-granting program of the University’s MD/PhD program. In addition, qualified undergraduate students may apply for the combined BS/MS program (details are provided following the curricula for the BS degrees).

Graduates of the biomedical engineering undergraduate program find employment in industry or continue their studies either in graduate school or in a professional school in medicine and other health-related disciplines (such as dentistry, optometry, orthotics), law or business.

Some special features of the program include the small class size and open-door policy of the faculty, which facilitates student-faculty interaction. The Department has very strong ties with the University of Miami Miller School of Medicine and with industry. Undergraduate students have a wide range of research and internship opportunities in some of the leading research laboratories in their respective field. The Department strongly encourages undergraduate student participation in research and professional activities.
Program Description
Curriculum
The two educational objectives of the Biomedical Engineering program are achieved via the implementation of a curriculum with four parallel concentrations which include a common core and concentration-specific courses. The core curriculum is designed to provide a broad foundation in the basic sciences and in engineering. Concentration-specific courses provide the depth required to be proficient engineers.

The four concentrations are:
• Biomaterials and Tissue (B)
• Electrical (E),
• Mechanical (M),
• Premedical (P)

The Biomaterials and Tissue concentration provides training in the fundamental aspects of cell and tissue biology, design of biomaterial scaffolds and implants, and the application of tissue engineered constructs toward repair, restoration, and regeneration of damaged cells, tissues and organs. The Electrical concentration provides training in the fundamental aspects of electronics and signal processing, design of instrumentation, sensors, imaging systems and neural interfaces, and the application of biomedical technology to the measurement, control and rehabilitation of tissue and organ function. The Mechanical concentration provides training in the fundamental aspects of solid, fluid, and computational mechanics, design and modeling of biomedical devices such as artificial implants, and prostheses and the application of biomechanical principles toward assessment and restoration of tissue and organ function. The Premedical concentration is designed for students who plan to seek admission to medical school. In addition to providing core training in biomedical engineering, the Premedical concentration ensures that students meet the general requirements for admission to medical school.

The curriculum is designed to provide all graduates with the analytical and design skills required to formulate and solve problems at the interface of engineering, medicine and the life sciences. Required courses in the humanities and social sciences provide students with an awareness of social, ethical and environmental issues related to their profession. The curriculum has been carefully designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to complete the upper level course requirements successfully. The curriculum includes two or three technical electives selected by the student based on their individual professional interests. The curriculum places a special emphasis on written and oral communication skills. Many of the Biomedical Engineering courses, as well as the capstone design project, include a requirement for a written term paper and oral presentation on a course-related topic related to the class.

Advanced Writing and Communication Skills
Biomedical Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Biomedical Engineering students acquire Advanced Writing and Communication skills in the following core courses:

Design Experience
The biomedical engineering design experience is integrated in the curriculum throughout the four years of study, starting in the freshman year with the Introduction to Biomedical Engineering course. Each semester includes classroom or laboratory courses which place a heavy emphasis on theoretical and practical biomedical engineering design concepts. In the second semester of the junior year, students complete a 3 credit-hour course which covers the principles of biomedical engineering design, from problem identification and design conception to implementation and testing, including regulatory aspects. The design experience culminates in the senior year with a yearlong capstone Senior Design Project. The Senior Design Project is typically completed by teams of two to four students who build on their knowledge and previous design experience to solve one major design problem which integrates the various components of the curriculum.

Teaching and Design Laboratories
The Department of Biomedical Engineering houses several teaching laboratories which provide students hands-on experience in core areas of the curriculum, including cell and tissue engineering, tissue mechanics, medical instrumentation, measurements, and optics and physiology, among
others. In particular, the Ben-Josef Cell and Tissue Laboratory provides undergraduate and graduate students a unique opportunity to gain hand-on experience in the field of cell and tissue engineering, biomaterials and tissue mechanics. The Department also houses a state-of-the-art Scanning Electron Microscope and 3D printer which are used by students in their design and research projects. In addition, students have access to the College of Engineering's maker space and Johnson & Johnson 3D Printing Center of Excellence Collaborative Laboratory. The facility provides access to a wide variety of advanced 3-D printers and fabrication equipment, and has a full-time engineer/scientist available for training purposes. Students can use the facility for their design projects.

Undergraduate Research and Internships
Biomedical Engineering students are strongly encouraged to gain research or professional experience through internships. Most undergraduate students conduct research in laboratories at the Department of Biomedical Engineering and at the School of Medicine, or are hired as interns by the local biomedical industry.

Degree Programs
The department offers one degree program with four concentrations: Electrical, Mechanical, Biomaterials and Tissue, and Premed. A list of the core science and engineering courses common to all four concentrations is provided below, followed by a tabular listing of the course requirements for the degree Bachelor of Science in Biomedical Engineering for each concentration.

Dual Major
The College of Engineering offers a dual major in Biomedical Engineering for students that are majoring in another engineering Department. In order to obtain the dual major in Biomedical Engineering, the student will have to obtain, in parallel, a major in one of the fundamental engineering programs, plus 24 credit hours of course work, including 19 credit hours of required course work and 5 credit hours of elective course work from the lists given below. Of this total of 24 credit hours, at least 12 have to be at the level of 400 and above.

The required courses for the dual major are:

The electives are to be chosen from the BME course list.

Departmental Honors
Upon request departmental honor is noted in a student’s diploma and transcript upon fulfillment of the requirements specified in the College Bulletin.

BME 100. Introduction to Biomedical Engineering for Summer Scholars. 3 Credit Hours.
This introductory course is designed to expose high school students to biomedical engineering. The program is designed for the exemplary high school student interested in applied mathematics and science. The students will be provided with an understanding and some hands-on experience on topics relative to the discipline of Biomedical Engineering. The course content changes throughout the 3-week duration and includes topics on lasers, medical imaging, biomaterials, bioelectricity and biomechanics. The students will be able to understand the challenges associated with the design, testing and FDA clearance of biomedical devices and the importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with the design and testing of a bioelectric device. Summer Scholar Students only.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

BME 110. Introduction to Innovation: Learning About Innovation by Innovating. 3 Credit Hours.
Introduction to diverse methods and tools that promote and nurture student creativity, entrepreneurship, team-work, and skills for creating business plans that consider ethical, global and financial issues. Students will learn to use the Maker Space facility to implement their design ideas.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BME 111. Introduction to Engineering I. 3 Credit Hours.
Use of engineering tools for problem solving are discussed. Topics include the use of computer techniques for data acquisition, analysis, presentation, software design, computer aided drafting, and development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 112. Introduction to Biomedical Engineering. 2 Credit Hours.
Introduction to Engineering II provides an introduction to biomedical engineering analysis, design, and manufacturing processes. Ethics, Regulatory Factors, and Biomedical Design Tools (mechanical, electrical, and computer tools) are introduced. Students will also be given lectures from both Biomedical Engineering researchers and industrial professionals concerning their experiences and the current trends within the field. Hands on experience is provided.
Prerequisite: BME 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 123. Explorations in Engineering. 3 Credit Hours.
Introduction to engineering for non-engineers with emphasis on real-world engineering systems and services which are changing the way we live, communicate, learn, play, and care for ourselves, our communities and our planet. Students will learn how to use modern tools to observe and design simple engineering systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 211. Introduction to Programming for Biomedical Engineers. 3 Credit Hours.
This course will provide a comprehensive introduction to programming using MATLAB. The students will learn MATLAB functions for importing, analyzing, visualizing and exporting data, numerical computation, modeling and solving biomedical engineering problems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 265. Medical Systems Physiology. 3 Credit Hours.
Human physiological processes from a bioengineering and medical point of view. Pertinent aspects of anatomy, biophysics, biochemistry, and disease mechanisms are also included.
Prerequisite: BIL 150. And CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 266. Human Physiology Laboratory. 1 Credit Hour.
This course provides a series of laboratory experiments to assist students to learn human physiology through noninvasive measurements by using the Powerlab Physiology Data Acquisition station. Following introductory lectures in the lab, students will assemble measurement probes, connect different devices, collect data under normal and stimulating conditions, and perform data analysis. Lab report is required for each experiment.
Prerequisite: Or Corequisite: BME 265.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 302. Cellular Engineering. 3 Credit Hours.
Cellular engineering addresses issues related to understanding and manipulating cell structure-function relationships. This course is intended to bridge between cell biologists and engineers, to understand quantitatively cell biological aspects. Central to biomaterial and tissue engineering is our use of cells and our understanding of their interactions with their environment. It is important to understand how cells respond to external signals from their substrata or their milieu, how they move, and what they need in order to perform their desired function. Students are provided with an introduction to engineering principles and modeling at the cellular level. Of particular interest are cytomechanics, receptor/ligand binding, genetic engineering, enzyme kinetics, and metabolic pathway engineering.
Prerequisite: BIL 150. And CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 303. Cell Engineering Lab. 1 Credit Hour.
The principles of cell engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques, cell imaging, DNA cloning and cell transfection, microcontact printing. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment and fabrication of 2D culture substrates.
Prerequisite: BIL 150 and BIL 151.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 305. Biomedical Technology. 3 Credit Hours.
Non-mathematical introduction to technical and clinical aspects of biomedical engineering. Biomedical signals and instrumentation, sensors, transducers, physiological measurements, laboratory instrumentation, implants, cardiac assist devices, radiology, ultrasound, CT, MRI, transmission, and scanning electron microscopy. Field trips to clinical and research laboratories are included. Open only to non-BME students.
Prerequisite: BIL 150 and CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 310. Mathematical Analysis in Biomedical Engineering. 3 Credit Hours.
Mathematical modeling of physiological and other biomedical engineering systems and devices. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological regulation and control in biosystems.
Prerequisite: MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 312. Biomedical Statistics and Data Analysis. 3 Credit Hours.
The course will provide a comprehensive introduction to biostatistical models and methods, with applications in clinical trials research, observational studies, physiology, genomics and public health. Various examples will be solved using MATLAB and the results will be compared and discussed. A brief introduction to R will be provided.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 320. The Evolution of Technology. 3 Credit Hours.
Organized and taught by an interdisciplinary team, this innovative course is designed for juniors and seniors. An experimental elective, the course uses multimedia to explore the ways in which innovation is driven by the needs of society and individuals, and nurtured by improvements in tools and production. Five broad subject areas will receive special attention: survival, communication, transportation, entertainment and medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 330. Foundations of Medical Imaging. 3 Credit Hours.
Physical and biological principles of medical imaging, including ultrasound, X-ray, nuclear, magnetic resonance, electrical impedance and optical imaging. Propagation and interaction of ultrasonic waves, light waves, X-ray photons, and nuclear radiation in hard and soft biological tissue.
Corequisite: BME 310.
Prerequisite: PHY 222. And PHY 223. Or Pre/Corequisite: BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 335. Biomaterials. 3 Credit Hours.
Introduction to the field of Biomaterials. Review of materials science for four main types of biomaterials: ceramics, metals, polymers, and composites. Lectures on special topics given by guest lecturers who are active in their specific areas, under supervision of the instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 375. Fundamentals of Biomechanics. 3 Credit Hours.
Application of solid and fluid mechanics to describe the mechanical behavior of human motion, mechanical behavior of soft and hard biological tissues, cells and biofluids. Review of fundamental concepts and techniques of mechanics (stress, strain, constitutive relations). Focus on mechanical properties of specific tissues, including tendon, skin, smooth muscle, heart muscle, cartilage, and bone. Cellular and biofluid mechanics will be presented.
Prerequisite: MTH 311. And PHY 221.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 395. Undergraduate Research in Biomedical Engineering. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 399. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. May be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 401. Biomedical Design. 3 Credit Hours.
Introduction to the clinical problem-based design for undergraduate biomedical engineering students. Focus will be on need identification, concept generation, prototype development and testing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 402. Senior Design I. 2 Credit Hours.
This course deals with the introduction phase of an individual or group project for seniors. Need identification, screening, technical and economic feasibility, proof of concept development and killer experiment will be performed by students working on teams. Scheduled individual or group report presentations are required.
Prerequisite: BME 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 403. Senior Design II. 1 Credit Hour.
This course deals with the completion phase of an individual or group project for seniors. Concepts on projects related to the hypotheses/testing protocols, design limitations (constraints), and validation of the design in Biomedical Engineering will be discussed. Scheduled individual or group report presentations are required.
Prerequisite: BME 402.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 440. Biomedical Measurements. 4 Credit Hours.
Introduction to the principles of measurements in physiological and biological systems, as well as a discussion of measurable parameters, transducers, sensors, signal conditioning, and processing. Laboratory experiments are conducted in parallel with the course.
Prerequisite: ECE 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 450. Biomedical Transport Phenomena. 3 Credit Hours.
Fundamentals of transport phenomena in biological systems including diffusion, osmosis, convection, electrophoresis, and transport with binding. Applications to cell electrophysiology and drug delivery. Introduction to physiological fluid flow in tissues.
Prerequisite: BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 460. Introduction to Physiological Fluid Mechanics. 3 Credit Hours.
The role of transport processes in biological systems, mathematical modeling of physiological fluid transport, conservation of mass and momentum rheology of blood flow in large and small vessels, approximation methods for the analysis of complex physiological flow, fluid flow in the circulation and tissue. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological fluid flow. 
Prerequisite: BME 310 and PHY 222.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 470. Biomedical Signal Analysis. 3 Credit Hours.
Time and frequency description, analysis and processing of biophysical and physiological signals. This course covers analytical and computational tools for measuring, manipulating and interpreting signals fundamental to biomedical engineering. Fourier analysis, Fourier transform, data acquisition, averaging, digital filter design, discrete Fourier transform, correlation, convolution, coherence are discussed. 
Prerequisite: BME 211.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 480. Biomedical Instrumentation. 3 Credit Hours.
Analysis and design of systems and electronic circuits in biomedical instrumentation including modeling and simulation of dynamic measurement systems and implementation of analog signal processing. The functional principles, operation, clinical context and technological trends of medical instrumentation systems used in clinical and research applications will be discussed. 
Prerequisite Or Corequisite: BME 440.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 506. Computer Aided Design in Biomedical Engineering. 1 Credit Hour. 
Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design. 
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 507. LabView Applications for Biomedical Engineering. 1 Credit Hour.
Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 510. Introduction to Medical Robotics. 3 Credit Hours. 
This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.
Prerequisite: BME 211. And BME 310. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 512. Regulatory Control of Biomedical Devices. 3 Credit Hours.
Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 513. Biomedical Systems Engineering. 3 Credit Hours.
This course provides students with an understanding and appreciation of Biomedical Systems Engineering with emphasis on current day industrial project management and product development processes. The components of Systems Engineering to be presented include: functional system analysis, requirements analysis, translation of functions and requirements into a system and product architecture, and, finally, testing methods to verify the biomedical product meets all design requirements. Decision methodology, alternative concept analysis, trade-off studies, integration of human factors, manufactureability, reliability, maintainability, feasability demonstration, and safety are all addressed as part of the product design system. The entire product development life cycle will be analyzed with relevant concepts from initial market evaluation, to requirement development, through final product manufacturing and product launch. The regulatory environment for biomedical devices will also be presented for both US FDA and international compliance. The lectures will provide detailed notes on the subjects; other articles as handouts or additional readings will also be assigned.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 520. Medical Imaging Systems: X-ray and CT. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include imaging fundamentals, radiographic imaging (X-ray) system, and computed tomography (CT) system.
Prerequisite: ECE 201. And BME 211. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 521. Medical Imaging Systems: MRI, NMI and Ultrasound. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include magnetic resonance imaging (MRI) system, nuclear medicine imaging (NMI) system, and ultrasound imaging system.
Prerequisite: ECE 201. And BME 211. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 522. Scanning Electron Microscopy for Engineers. 3 Credit Hours.
Physics of transmission and scanning electron microscopy including x-ray spectroscopic analysis. Students will learn to independently operate and use the SEM for imaging in its role in research and engineering. Each student will be responsible for several imaging assignments and an independent research project related to their field of interest.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BME 523. Neurosensory Engineering. 3 Credit Hours.
Biophysics of neural communication, quantitative electroencephalography and evoked potentials, sleep, seizure, anesthesia and intraoperative monitoring, neural stimulation, neural signal processing, cochlear and visual implants.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 524. Neuromotor Engineering. 3 Credit Hours.
Advances in Neural Engineering have led to improved medical-device designs with novel functions. This course focuses on the fundamental engineering approaches, technical principles, neurophysiology, and applications of neuroprosthetics. We will cover Neural Engineering theory and applications from the perspectives of electronics design, neural signal analysis, and neurophysiology.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 525. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BME 526. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 535. Advanced Biomaterials. 3 Credit Hours.
Applications of biomaterials in different tissue and organ systems. Relationships between physical and chemical structure of materials and biological system responses are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.
Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 540. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.
Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.
Prerequisite: ECE 315. And ECE 304. Or ECE 211.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 541. Medical Electronic Systems Laboratory. 2 Credit Hours.
Laboratory course for BME 540/640. Design of medical instruments integrated with microcomputers and telemetry devices.
Pre/Corequisite: BME 540. Or BME 640.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BME 545. Biomedical Optical Instruments. 3 Credit Hours.
Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 546. Medical Applications of Lasers. 3 Credit Hours.
Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 555. Fundamentals of Computational Neuroscience. 3 Credit Hours.
Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.
Prerequisite: BME 265 and Corequisite: BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 565. Principles of Cellular and Tissue Engineering. 3 Credit Hours.
Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.
Prerequisite: BME 302. And BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BME 566. Cell and Tissue Engineering Laboratory. 1 Credit Hour.
The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment. Pre/Corequisite: BME 565 Or BME 302.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 567. Tissue Engineering Lab. 1 Credit Hour.
The principles of tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include hydrogel spectroscopy analysis, swelling tests, permeability tests, rheological tests, cell culture techniques, cell imaging, cell culture in hydrogels. Cell & Tissue engineering topics include cell cycle/metabolism, adhesion, biomaterials synthesis and characterization, biocompatibility.
Prerequisite: BME 302 and BME 303. And Corequisite: BME 335 or BME 565.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 570. Advanced Biomedical Signal Processing. 3 Credit Hours.
This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.
Prerequisite: BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 571. Introduction to Biosignal Processing Lab. 1 Credit Hour.
Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.
Prerequisite: BME 570. Or Corequisite: BME 570.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 575. Tissue Mechanics. 3 Credit Hours.
Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.
Prerequisite: BME 375. And BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 581. Radiation Biology and Physics. 3 Credit Hours.
The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis.
Prerequisite: BME 265.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 582. Radiation Therapy Physics. 3 Credit Hours.
The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.
Prerequisite: BME 310. Or Pre/Corequisite: BME 581.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 583. Radiation Protection. 3 Credit Hours.
This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff. Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and clinical needs. Prerequisite: BME 581. Or Pre/Corequisite: BME 582.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 585. Immunoengineering. 3 Credit Hours.
Immunoengineering is a novel interdisciplinary field that combines biomaterial science and bioengineering design with immunology to develop cutting edge technology for the prevention, rapid diagnosis and treatment of infectious diseases, cancer, autoimmune and inflammatory diseases. The goal of this course is to provide a basic background in immunology that will allow understanding the need for immunoengineering and providing the tools to be able to design novel vaccines, anti-inflammatory agents, and immunotherapy. Application of biomaterials for immunoengineering applications will be reviewed through lectures, reading assignments and journal clubs. This course will provide valuable knowledge of an emerging field that will impact both the academic and industrial world. Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 587. Finite Element Analysis for Engineers. 3 Credit Hours.
Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electromagnetic, optical, and fluid flow problems. Prerequisite: MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 595. Current Trends in Regenerative Medicine. 3 Credit Hours.
This team-taught course provides background, clinically-relevant applications and ethical aspects of regenerative medicine as it applies to multiple types of cell, tissues and organs. The course is divided into modules focused on one application of regenerative medicine and taught by an expert in that specific topic area. The course includes hands-on demonstrations of key techniques and problem-based group projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 599. Cooperative Education.. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

B.S. in Biomedical Engineering

http://www.miami.edu/bme (http://www.miami.edu/bme/)

Dept. Code: BME

Introduction

Biomedical engineering is a multidisciplinary field that addresses problems at the interface of engineering, medicine, and the life sciences. Examples include the design of medical devices, implants and prostheses; the development of new biomaterials or drug delivery systems; the engineering of cells and tissues; the design of optical and laser systems for diagnostic and therapy; the development of medical imaging systems and algorithms for medical image processing; and the acquisition, interpretation and use of physiological signals to assess and control physiological function, such as the use of brain signals to control movement in brain computer interfaces. Biomedical engineering has an impact on virtually all fields of medicine.

The Department of Biomedical Engineering at the University of Miami was formally created in 1979 as a graduate program. The four-year undergraduate program leading to the B.S. degree in BME was established approximately ten years later to address the need for professional biomedical engineers. The undergraduate BME program at the University of Miami was the first of its kind in Florida, with the first class of B.S.B.E. students graduating in 1993. It has been continuously accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board of Engineering and Technology (ABET) since 1997. The Department of Biomedical Engineering also offers graduate courses leading to the Master of
Science and Doctor of Philosophy degrees and it includes a graduate program in Medical Physics. The PhD program in Biomedical Engineering is also a degree-granting program of the University’s MD/PhD program. In addition, qualified undergraduate students may apply for the combined BS/MS program (details are provided following the curricula for the BS degrees).

Graduates of the biomedical engineering undergraduate program find employment in industry or continue their studies either in graduate school or in a professional school in medicine and other health-related disciplines (such as dentistry, optometry, orthotics), law or business.

Some special features of the program include the small class size and open-door policy of the faculty, which facilitates student-faculty interaction. The Department has very strong ties with the University of Miami Miller School of Medicine and with industry. Undergraduate students have a wide range of research and internship opportunities in some of the leading research laboratories in their respective field. The Department strongly encourages undergraduate student participation in research and professional activities.

**Program Description**

**Curriculum**

The two educational objectives of the Biomedical Engineering program are achieved via the implementation of a curriculum with four parallel concentrations which include a common core and concentration-specific courses. The core curriculum is designed to provide a broad foundation in the basic sciences and in engineering. Concentration-specific courses provide the depth required to be proficient engineers.

The four concentrations are:

- Biomaterials and Tissue (B)
- Electrical (E),
- Mechanical (M),
- Premedical (P)

The Biomaterials and Tissue concentration provides training in the fundamental aspects of cell and tissue biology, design of biomaterial scaffolds and implants, and the application of tissue engineered constructs toward repair, restoration, and regeneration of damaged cells, tissues and organs. The Electrical concentration provides training in the fundamental aspects of electronics and signal processing, design of instrumentation, sensors, imaging systems and neural interfaces, and the application of biomedical technology to the measurement, control and rehabilitation of tissue and organ function. The Mechanical concentration provides training in the fundamental aspects of solid, fluid, and computational mechanics, design and modeling of biomedical devices such as artificial implants, and prostheses and the application of biomechanical principles toward assessment and restoration of tissue and organ function. The Premedical concentration is designed for students who plan to seek admission to medical school. In addition to providing core training in biomedical engineering, the Premedical concentration ensures that students meet the general requirements for admission to medical school.

The curriculum is designed to provide all graduates with the analytical and design skills required to formulate and solve problems at the interface of engineering, medicine and the life sciences. Required courses in the humanities and social sciences provide students with an awareness of social, ethical and environmental issues related to their profession. The curriculum has been carefully designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to complete the upper level course requirements successfully. The curriculum includes two or three technical electives selected by the student based on their individual professional interests. The curriculum places a special emphasis on written and oral communication skills. Many of the Biomedical Engineering courses, as well as the capstone design project, include a requirement for a written term paper and oral presentation on a course-related topic related to the class.

**Advanced Writing and Communication Skills**

Biomedical Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills.

**Design Experience**

The biomedical engineering design experience is integrated in the curriculum throughout the four years of study, starting in the freshman year with the Introduction to Biomedical Engineering course. Each semester includes classroom or laboratory courses which place a heavy emphasis on theoretical and practical biomedical engineering design concepts. In the second semester of the junior year, students complete a 3 credit-hour course which covers the principles of biomedical engineering design, from problem identification and design conception to implementation and testing, including regulatory aspects. The design experience culminates in the senior year with a yearlong capstone Senior Design Project. The Senior Design Project is typically completed by teams of two to four students who build on their knowledge and previous design experience to solve one major design problem which integrates the various components of the curriculum.

**Teaching and Design Laboratories**

The Department of Biomedical Engineering houses several teaching laboratories which provide students hands-on experience in core areas of the curriculum, including cell and tissue engineering, tissue mechanics, medical instrumentation, measurements, and optics and physiology, among others. In particular, the Ben-Josef Cell and Tissue Laboratory provides undergraduate and graduate students a unique opportunity to gain hands-on experience in the field of cell and tissue engineering, biomaterials and tissue mechanics. The Department also houses a state-of-the art Scanning Electron Microscope and 3D printer which are used by students in their design and research projects. In addition, students have access to the College
of Engineering’s maker space and Johnson & Johnson 3D Printing Center of Excellence Collaborative Laboratory. The facility provides access to a wide variety of advanced 3-D printers and fabrication equipment, and has a full-time engineer/scientist available for training purposes. Students can use the facility for their design projects.

**Undergraduate Research and Internships**

Biomedical Engineering students are strongly encouraged to gain research or professional experience through internships. Most undergraduate students conduct research in laboratories at the Department of Biomedical Engineering and at the School of Medicine, or are hired as interns by the local biomedical industry.

**Degree Programs**

The department offers one degree program with four concentrations: Electrical, Mechanical, Biomaterials and Tissue, and Premed. A list of the core science and engineering courses common to all four concentrations is provided below, followed by a tabular listing of the course requirements for the degree Bachelor of Science in Biomedical Engineering for each concentration.

**Dual Major**

The College of Engineering offers a dual major in Biomedical Engineering for students that are majoring in another engineering Department. In order to obtain the dual major in Biomedical Engineering, the student will have to obtain, in parallel, a major in one of the fundamental engineering programs, plus 24 credit hours of course work, including 19 credit hours of required course work and 5 credit hours of elective course work from the lists given below. Of this total of 24 credit hours, at least 12 have to be at the level of 400 and above.

The required courses for the dual major are:

<table>

¹ PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates/). Each cognate should be a minimum of 3 courses (9 credit hours).

Technical Electives are chosen from the BME course offerings (300 level and above) with the approval of the advisor. Any other courses selected need to be approved by the advisor and the chairperson.

### Technical Elective Lab

- BME 303
- BME 395
- BME 507
- BME 567

### PS/HA Cognate

- Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates/). Each cognate should be a minimum of 3 courses (9 credit hours).

### Technical Electives

- Technical Electives are chosen from the BME course offerings (300 level and above) with the approval of the advisor. Any other courses selected need to be approved by the advisor and the department chairperson.

### Suggested Plan of Study

#### Pre-Med Concentration

##### Freshman Year

### Mission

The mission of the biomedical engineering program is to prepare students to become knowledgeable and skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.
Goals
The educational objectives of the program are to graduate engineers who will apply their knowledge, technical skills, and ability to solve problems at the interface of engineering and life sciences. Within a few years after graduation they will be:

1. Working as professionals in biomedical engineering or related fields.
2. Continuing their education to advance their careers through professional development activities or through the pursuit of advanced degrees.

Student Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

B.S./M.S. in Biomedical Engineering
Overview
The Department of Biomedical Engineering offers a dual-degree program that culminates with students receiving both Bachelor of Science and Master of Science (BS/MS) in Biomedical Engineering concurrently. This program is available only to qualified students enrolled in the undergraduate program in Biomedical Engineering at the University of Miami. This program is intended to give qualified Biomedical Engineering students the opportunity to acquire both a baccalaureate degree (BSBE) and a Master of Science (MSBE) degree in five years rather than the 4 plus 2 years (approximately) that is traditionally expected. The two degrees are awarded simultaneously when the combined requirements have been met for both degrees.

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.
- The participants complete BME 705 (http://bulletin.miami.edu/search/?P=BME%20705) in lieu of BME 402 (http://bulletin.miami.edu/search/?P=BME%20402)/BME 403 (http://bulletin.miami.edu/search/?P=BME%20403).
- Up to 6 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree. If their schedule allows, students may be able to complete an additional 3 credits of graduate classes during their fourth year.
- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their fourth year.
- Students can register for a maximum of 6 graduate credit hours in each semester of their fourth year.
- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

Admission Requirements
The dual BS/MS program is available only to qualified undergraduate students enrolled in the Department of Biomedical Engineering, in any of the four Concentrations (Electrical, Mechanical, Biomaterials and Tissue, PreMed). Typically, students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application.

Undergraduate students must take the Graduate Record Examination (GRE) before the end of their classification as a senior and attain a combined score of more than 300 on the verbal and quantitative portions. Students must meet all other pertinent graduate school and College of Engineering requirements.

Qualified students must apply prior to the beginning of final exams in the second semester of their junior year. Students are strongly advised to apply to the BS/MS program as early as possible in their junior year to facilitate academic advising and course selection in the second semester of their junior year. Before submitting an application, interested students should discuss the program and the possibility of entering the program with an academic advisor.

The College of Engineering Office of Admission will carefully review academic credentials for admission into the program and will notify students of their acceptance into the program. All admitted students will have a special advising appointment with Dr. Narasimhan, Assistant Dean for Undergraduate Studies, to discuss academic issues specific to the BS/MS program.
Curriculum Guidelines

In the dual-degree BS/MS program in the Department of Biomedical Engineering, the first four years of the curriculum are altered as follows:

- The 3 credits of Senior Design Project (BME 402/BME 403) are eliminated.
- In Semester I of the senior year, one 3-credit Undergraduate Technical Elective is replaced with BME 705 (MS Design Project I).
- In Semester II of the senior year, one 3-credit Undergraduate Technical Elective is replaced with one 3-credit Graduate Technical Elective.

Graduate Technical Electives taken in the senior year must be chosen from the BME graduate course offerings, with the approval of their academic advisor. The credits of Graduate Technical Electives completed in the fourth year are counted toward the 30 credits required for the MS degree.

Students admitted in the dual degree BS/MS program can take a maximum of six (6) graduate credits per semester in their senior year, for a maximum of twelve (12) graduate credits per year, without incurring additional costs if they are full-time undergraduate students during this period. Students should register for courses towards their graduate degree as "G" credits and not as "U" credits. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

To register for graduate credits during their senior year, students must be in senior status and must complete and submit the Graduate School's "Application for Undergraduates to Take Graduate Coursework (https://www.grad.miami.edu/policies-and-forms/forms/)", form. This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status.

In the Senior year, students must be registered for a minimum of 12 undergraduate credits each semester to maintain full-time status as an undergraduate student. After completing the senior year, students must register as graduate students.

BS/MS Design Project (BME 705/706)

In lieu of the 3-credit senior design project (BME 402/BME 403) students enrolled in the dual-degree BS/MS program register for 6 credits of Master Design Project (BME 705/BME 706). The 3 credits of BME 705 satisfy the undergraduate senior design requirements, in which students complete a year-long capstone design project that follows the same guidelines and format as BME 402/BME 403. Students enroll in BME 705 during the first semester of their senior year and receive their final project grade at the end of their senior year. The 3 credits of BME 706 satisfy the non-thesis Master’s project requirement. Students enroll in BME 706 during the first semester of their fifth year. The BME 706 project can be a continuation of the student's BME 705 project, or an entirely new project. The format and guidelines for BME 706 are described in the MS section of the bulletin.

Graduation Requirements

Students accepted into the dual degree program must maintain at least a 3.0 Cumulative GPA, and meet all other pertinent Graduate School requirements, including a minimum of 3.0 GPA in the credits applied toward the MS degree.

Curriculum Requirements

BSBE/MSBE (Biomaterials and Tissue Concentration)

Students in the BSBE Biomaterials and Tissue concentration are required to complete the following courses for the dual degree:

---

1. PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates/). Each cognate should be a minimum of 3 courses (9 credit hours).
2. Technical Electives are chosen from BME course offerings (300 level & above) with the approval of the advisor.
3. Graduate courses are 600 or 700 level courses chosen from the BME course offerings with the approval of the advisor. Up to 6 credits of graduate courses can be taken in other engineering disciplines.
4. Students may be able to register for this additional graduate class if their course load allows.
### Sophomore Year

**Fall**
- BIL 150 \ General Biology \ 4
- BIL 151 \ General Biology Laboratory \ 1
- ECE 201 \ Electrical Circuit Theory \ 3
- MTH 311 \ Introduction to Ordinary Differential Equations \ 3
- PHY 223 \ University Physics III \ 3
- PS/HA Cognate \ 3

**Spring**
- BME 211 \ Introduction to Programming for Biomedical Engineers \ 3
- BME 265 \ Medical Systems Physiology \ 3
- BME 266 \ Human Physiology Laboratory \ 1
- BME 310 \ Mathematical Analysis in Biomedical Engineering \ 3
- ECE 203 \ Electrical Circuits Laboratory \ 1
- PHY 225 \ University Physics III Lab \ 1
- PS/HA Cognate \ 3

**Credit Hours** 17

### Junior Year

**Fall**
- BME 312 \ Biomedical Statistics and Data Analysis \ 3
- BME 375 \ Fundamentals of Biomechanics \ 3
- BME 450 \ Biomedical Transport Phenomena \ 3
- ECE 202 \ Electronics I \ 3
- ECE 211 \ Logic Design \ 3
- PS/HA Cognate \ 3

**Spring**
- BME 330 \ Foundations of Medical Imaging \ 3
- BME 335 \ Biomaterials \ 3
- BME 401 \ Biomedical Design \ 3
- BME 440 \ Biomedical Measurements \ 4
- ECE 315 \ Digital Design Laboratory \ 1
- PS/HA Cognate \ 3

**Credit Hours** 18

### Senior Year

**Fall**
- BME 470 \ Biomedical Signal Analysis \ 3
- BME 507 \ LabView Applications for Biomedical Engineering \ 1
- BME 512 \ Regulatory Control of Biomedical Devices \ 3
- Undergraduate Technical Elective \ 3
- BME 705 \ Senior Design Project \ 3
- Graduate Course \ 3

**Spring**
- BME 480 \ Biomedical Instrumentation \ 3
- BME 540 \ Microcomputer-Based Medical Instrumentation \ 3
- BME 541 \ Medical Electronic Systems Laboratory \ 2
- Undergraduate Technical Elective \ 3
- Technical Elective Lab \ 1
- PS/HA Cognate \ 3
- Graduate Course \ 3

**Credit Hours** 16

**Credit Hours**: 9

**Total Credit Hours**: 157-160

¹ PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates/). Each cognate should be a minimum of 3 courses (9 credit hours). Students in the Pre-Med concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.

² Technical Electives are chosen from BME course offerings (300 level & above) with the approval of the advisor.
Technical Lab Elective is selected from BME 395, BME 506, BME 507, or BME 567.

Can be replaced with an Advanced Bioscience Elective chosen from BIL 250, BIL 255, BIL 268, CHM 222 or BMB 401. Note that CHM 222 is a pre-requisite for BMB 401. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.

Can be replaced with a science lab that complements the Advanced Bioscience Elective, see footnote 4 (e.g., CHM or BIL lab).

Graduate courses are 600 or 700 level courses chosen from the BME course offerings with the approval of the advisor. Up to 6 credits of graduate courses can be taken in other engineering disciplines.

Students may be able to register for this additional graduate class if their course load allows.

† Students planning on taking the MCAT should take BMB 401 (http://bulletin.miami.edu/search/?P=BMB%20401) as their first Adv. Bioscience Elective.

Civil, Architectural and Environmental Engineering

http://www.cae.miami.edu

Dept. Code: CAE

The department offers three undergraduate degrees:

- Bachelor of Science in Civil Engineering,
- Bachelor of Science in Architectural Engineering, and
- Bachelor of Science in Environmental Engineering.

Civil Engineering
Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

Architectural Engineering
Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, facility management companies, HVAC equipment manufacturers, architectural firms, government agencies, and universities.

Environmental Engineering
Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature's beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.

Advanced Writing and Communication Skills
Civil, Architectural, and Environmental Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills.

Civil, Architectural, and Environmental Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- CAE 111 - Introduction to Engineering
- CAE 212 - Structures Laboratory (Civil and Architectural Engineering)
- CAE 345 - Environmental Laboratory (Environmental Engineering)
- CAE 371 - Geotechnical Laboratory (Civil and Architectural Engineering)
- CAE 402 - Professional Engineering Practice
CAE 100. Introduction to Civil, Architectural, and Environmental Engineering. 3 Credit Hours.
This introductory course is designed to expose high school students to a variety of specific disciplines within the civil engineering arena to assist them in making informed decisions about possible college majors. The program is designed for the exemplary high school student interested in applied mathematics and science. All students enrolled in this course will gain experience in problem solving, engineering mechanics, computer simulation, and laboratory activity. The course content changes throughout the 3-week duration and includes topics on civil engineering, environmental engineering, and architectural engineering. The students will be provided with an understanding and some hands-on experience on topics relative to the disciplines of civil, architectural, and environmental engineering. Via an introduction to several case histories, the students will be able to understand the challenges associated with the design and construction and importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with bridge building, material testing, water purification, and building systems.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

CAE 111. Introduction to Engineering I. 3 Credit Hours.
Use of engineering tools for problem solving. Computer techniques for data acquisition, analysis and presentation, software design, and computer aided drafting are covered. Development of design skills is achieved through several design and building competitions. Introduction to professional ethics and intellectual property rights, MATLAB, AutoCAD, and programming in C++ is also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 112. Introduction to Engineering II. 2 Credit Hours.
Hands-on applications of various surveying instruments for leveling, angles and distance measurements, and other engineering applications. Hands on application of Geographic Information Systems, including ArcView and extensions.
Prerequisite: CAE 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 115. Introduction to Engineering II (Surveying). 1 Credit Hour.
Hands on application of various surveying instruments. Leveling, angles and distance measurements.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 210. Mechanics of Solids I. 3 Credit Hours.
Vectors, force systems, equilibrium, analysis of frames, machines, trusses for internal forces, friction, centroids, moment of inertia, and shear and bending moment diagrams are discussed. This course may be offered in the Flipped Classroom format, which emphasizes discussion-based learning.
Prerequisite: Engineering Program - PHY 221 And MTH 151 Or 161 Or 171. Non-Engineering Program - PHY 101 Or 103 Or 160 Or 201 And MTH 130 Or 141 Or 161 Or 171.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 211. Mechanics of Solids II. 3 Credit Hours.
Fundamental material behavior including stresses, strains, and deformations associated with axial, bearing, flexural, shear, thermal, and torsional loading. Composite beams, elastic buckling of columns, combined loading, Mohr’s Circle, and statically indeterminate analysis of axial members is also included.
Prerequisite: CAE 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 212. Structural Laboratory. 1 Credit Hour.
Laboratory techniques, tests for tension, compression, shear, bending, and torsion are discussed. Models, similitudes, buckling of columns, and review of current research are also included. Laboratory 3 hours.
Pre or Corequisite: CAE 211 and IEN 311.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
CAE 213. Behavior of Structural Systems I. 3 Credit Hours.
The course begins with a review of basic structural principles. From this basis, analysis and design of simple axial loaded structural systems and members is covered. Through the use of project based learning the students are introduced to the principles of statics using both graphical and calculated methods. Concurrent and non-concurrent systems are defined and analysis of concurrent systems is covered in this course. Structural systems based on concurrent forces are covered including cable suspension structures, concrete shells, trusses, fan like structures and membrane structures. The requirements of building codes are included in the lectures. The class concludes with discussion of structural materials and failure modes accompanied with a visit to the Civil/Architectural Engineering Laboratory.
Prerequisite: ARC 231.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 240. Environmental Pollution. 3 Credit Hours.
Exploration of contemporary environmental issues. Introduction to engineering approaches for protecting and cleaning up the environment, techniques for assessing the impact of human activity on the environment, strategies for pollution control and implementation of environmental mitigation measures.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 310. Structural Analysis. 3 Credit Hours.
Analysis of statically determinate and indeterminate structures for internal forces, external reactions, displacements, including influence lines.
Prerequisite: CAE 211.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 313. Behavior of Structural Systems II. 3 Credit Hours.
Upon completion the students will understand the application of fundamental methods of structural frame systems and their place in architectural design. The bending action of beams, including shear and moment diagrams and shear and bending stress calculations are covered. Structural material design for steel, concrete, wood and masonry are covered as separate topics. They will also understand the integration of basic elements into structural systems that resist both gravity and lateral loads. The course allows students to develop foundation and framing systems.
Prerequisite: CAE 213.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 320. Concrete Structures. 3 Credit Hours.
Course topics include design of concrete beams, columns, structural systems one-way slabs, and isolated footings by ultimate design methods.
Pre or Corequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 321. Steel Structures. 3 Credit Hours.
Design of tension, compression, flexural members, and beam columns using load and resistance factor design are discussed. Introduction to design and detailing of welded and bolted connections is also included.
Pre or Corequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 330. Fluid Mechanics. 3 Credit Hours.
Properties of fluids, gas systems, pressure distribution in static fluids, and hydrostatic forces on plane and curved surfaces are discussed. Kinematics and dynamics of fluid motion, dimensional analysis and similitude, flow in closed conduits, pumps, design of water distribution systems, and an introduction to flow in open channels is also included.
Prerequisite: CAE 211. And PHY 222.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CAE 340. Introduction to Environmental Engineering. 3 Credit Hours.
Environmental mass and energy balances, introduction to environmental chemistry, air pollution, water pollution, sustainable solid waste management, risk assessment, and global atmospheric change are discussed.
Prerequisite: MTH 162, and CHM 121 or CHM 151.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 345. Environmental Laboratory and Analysis. 3 Credit Hours.
Laboratory-based course focusing on the analysis of environmental samples including water, wastewater, air, and solids. Basic analytical techniques and quality control are also included as well as an introduction to advanced analytical measurements.
Prerequisite: CHM 112 And CAE 340.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 350. Transportation Engineering I. 3 Credit Hours.
Prerequisite: MTH 211 and Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 361. Building Information Modeling I. 3 Credit Hours.
The course prepares students to utilize AutoCAD and Building Information Modeling (BIM) in a coordinated, integrated and consistent approach for the Architecture, Engineering and Construction (AEC) Industry. The basics of AutoCAD drafting and usage are covered in the first five weeks of the course. The remaining time is dedicated to high-quality 4 dimensional BIM modeling, including 3D modeling of buildings and building components, embedded cost-estimating and scheduling for the construction process. Basics of REVIT Structure and MEP are also covered.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

CAE 370. Geotechnical Engineering I. 3 Credit Hours.
Soil composition and classification, excavation, grading, fill compaction, stress distribution in soils, one-dimensional flow of water through soil, laboratory, and field permeability, effective stress concept, calculation of consolidation, field settlement, bearing capacity, and design and analysis of shallow foundations are discussed.
Prerequisite: CAE 211. And Corequisite: CAE 371.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 371. Geotechnical Laboratory. 1 Credit Hour.
Evaluation of physical and mechanical properties of soils, and preparation of reports. Three hours.
Prerequisite: ENG 107. And IEN 311. And Corequisite: CAE 370.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 380. Electrical and Illumination Systems for Buildings. 3 Credit Hours.
Typical electrical systems for buildings including electrical circuits, protective devices and code requirements. Illumination and lighting design.
Prerequisite: PHY 223.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 381. Building Mechanical Systems I: Hvac Fundamentals. 3 Credit Hours.
Prerequisite: MAE 303 and Corequisite: CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 395. Undergraduate Research. 1-3 Credit Hours.
Designed for the undergraduate student who wishes to engage in research. Subject and credit to be arranged with the instructor.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

CAE 399. Internship. 1 Credit Hour.
Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Courses may be repeated.
Components: IND.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAE 400. Preparation for FE Exam. 1 Credit Hour.
Review of material in preparation for the Fundamentals of Engineering (FE) exam ination. For credit only.
Requisite: Senior Status.
Components: LEC.
Grading: CNC.
Typically Offered: Offered by Announcement Only.

CAE 402. Professional Engineering Practice. 3 Credit Hours.
Principles of engineering economics and economic evaluation of engineering projects. A discussion of professional practice issues including the philosophy and methodology of engineering, professional licensure and ethics. Discussion of the business aspects of engineering including business organization, management, contracts and legal issues. Engineering leadership in the formulation of public policy.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 403. Senior Design Project I - Engineering Design. 3 Credit Hours.
A two semester comprehensive design project applying the knowledge acquired during earlier coursework and implementing the pedagogy of life-long learning. Team projects incorporate interdisciplinary design skills, engineering standards and realistic constraints. The faculty coordinator working with practicing design professionals provide consultation, guidance and recommendations on aspects such as problem definition, evaluation of design alternatives and approaches. The course progresses along the customary design sequence of pre-design, schematic design and design development phases established in Civil, Architectural and Environmental Engineering practice.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 404. Senior Design Project II - Construction Documents. 3 Credit Hours.
The second semester of a two semester comprehensive design project applying the knowledge acquired during earlier coursework and implementing the pedagogy of life-long learning. Team projects incorporating interdisciplinary design skills, engineering standards and realistic constraints. The faculty coordinator working with several practicing design professionals provide consultation, guidance, and recommendations on aspects of preparing the construction documents required for project procurement and construction. Using the designs produced in CAE 403 the course develops the drawings, specifications and calculations required for a comprehensive construction documents package.
Prerequisite: CAE 403.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 421. Timber Structural Systems. 3 Credit Hours.
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included. Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 430. Water-Resources Engineering I. 3 Credit Hours.
Basic principles of open channel flow. Computation of water surface profiles. Design of hydraulic structures, design of lined and unlined open channels, and design of sanitary sewer systems. Introduction to hydrology and analysis of hydrologic data. Rainfall characteristics and peak runoff models.
Prerequisite: CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 440. Water Quality Control Systems. 3 Credit Hours.
Physical, Chemical and Biological Transformations; Water and Wastewater Treatment Processes; Water Treatment Plant Design; Wastewater Treatment Plant Design; Case Studies
Prerequisite: CAE 330. And CAE 340.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 450. Transportation Engineering II. 3 Credit Hours.
Transportation system planning and design. Advanced geometric design for highway and railway/transit. Human, vehicle, and environmental factors affecting the design, operation, and safety of transportation systems. Planning and design of both landside/airside aspects of airport facilities. Water port and multi-modal facilities design.
Prerequisite: CAE 350.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 460. Construction Management. 3 Credit Hours.
An introduction to the management of construction projects including legal considerations as well as the techniques of management science applied to construction. The course includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, network planning techniques, including CPM and PERT are introduced. The management principles of time and cost control are also explored. Computer application of project management tools are included.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 470. Foundations and Earth Retaining Systems. 3 Credit Hours.
Natural soil deposits and subsoil exploration. Geotechnical analysis and design of shallow and deep foundations. Theories of lateral earth pressure. Design and analysis of earth-filled retaining systems.
Prerequisite: CAE 330. And CAE 370. And CAE 371.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 480. Plumbing and Life Safety for Buildings. 3 Credit Hours.
Design of Building environmental systems including domestic cold and hot water systems, sanitary storm and special waste systems, fuel gas systems, building life safety systems and architectural acoustics.
Prerequisite: CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 481. Building Mechanical Systems II: HVAC Systems. 3 Credit Hours.
Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers air distribution systems, air handling units, coils and heat exchangers, water distribution systems, and primary systems.
Prerequisite: CAE 381. And CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 510. Structural Mechanics. 3 Credit Hours.
Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 511. Advanced Structural Analysis. 3 Credit Hours.
General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 520. Advanced Design of Concrete Structures. 3 Credit Hours.
Analysis and design of reinforced concrete elements in the context of the current ACI Building Code; beams subjected to combined loading, flat plates, flat slabs, slender columns, connections, and concrete building systems are included. Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 521. Advanced Design of Steel Structures. 3 Credit Hours.
Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed. Prerequisite: CAE 310. And CAE 321.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 522. Design of Prestressed Concrete Structures. 3 Credit Hours.
Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included. Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 523. Design of Masonry Structures. 3 Credit Hours.
Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included. Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 525. Timber Structural Systems. 3 Credit Hours.
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included. Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 530. Water Resources Engineering II. 3 Credit Hours.
Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project. Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 531. Surface-Water Hydrology. 3 Credit Hours.
Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies. Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 532. Ground-Water Hydrology. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 533. Water-Quality Control in Natural Systems. 3 Credit Hours.
Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.
Pre or Corequisite: CAE 430. And CAE 440.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 540. Environmental Chemistry. 3 Credit Hours.
Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.
Prerequisite: CHM 112.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 541. Engineering Systems for Disease Control and Bioremediation. 3 Credit Hours.
Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 542. Solid and Hazardous Waste Engineering. 3 Credit Hours.
Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.
Prerequisite: CAE 340.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 543. Air Pollution Control Engineering. 3 Credit Hours.
Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.
Prerequisite: MAE 303. And CAE 330. Or MAE 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 560. Sustainable Construction. 3 Credit Hours.
Pre or Corequisite: CAE 403. Or CAE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 561. Computer Aided Architectural Engineering Design. 3 Credit Hours.
The course prepares students to utilize Building Information Modeling (BIM) and Building Performance Analysis (BPA) in a coordinated, integrated and consistent approach in the Architecture, Engineering and Construction (AEC) Industry. The basics of high-quality 5 dimensional BIM modeling are covering including 3D modeling of buildings and building components, imbedded cost-estimating and the phasing the construction process. Basics of REVIT Structure and MEP are also covered. BPAC components covered include climate analysis, daylighting, wind and airflow analysis, solar radiation analysis and whole building energy analysis. Upon completion student will receive a PBA certification from Autodesk.
Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 570. Advanced Foundation Engineering. 3 Credit Hours.
Prerequisite: CAE 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 581. Energy-Efficient Building Design. 3 Credit Hours.
Concepts and methods of energy-efficient building design and sustainable performance. Topics cover building envelope, mechanical, power and lighting, and service water heating systems. Computer-based energy simulation methods and building energy standards are emphasized.
Prerequisite: CAE 481.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 582. Building Energy Modeling and Simulation. 3 Credit Hours.
Modeling and analysis of building energy performance using state-of-art whole building energy simulation programs. Topics include dynamic simulation of heating and cooling loads in buildings, modeling of building equipment and control system, and integrated simulation of equipment and building loads.
Pre-Co-requisite: CAE 581.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 590. Special Topics. 1-3 Credit Hours.
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 595. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

B.S. in Architectural Engineering

Overview
The Architectural Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and architectural engineering design. The Architectural Engineering program integrates design applications across the curriculum, beginning with building construction and architectural design in the sophomore year, and continuing with structural, building mechanical and electrical systems design, and construction management in the junior and senior years. The curriculum culminates with a major comprehensive design experience that includes applications from the major specialty areas of architectural engineering.

Graduate study is offered leading to the degree of Master of Science in Architectural Engineering (p. 2244). For detailed information on graduate studies, see the Graduate Studies Bulletin.

1. Only offered once a year
2. To be selected from list of approved People and Society (https://cognates.miami.edu/explore/People%20&%20Society/) cognates.

Mission

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning;
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life;
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise.

Goals

The educational objectives of the Architectural Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to architectural engineering, or
2. Pursuing a graduate or professional degree.

Student Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

B.S. in Civil Engineering

Civil Engineering Curriculum

The Civil Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and civil engineering design. The first two years of the Civil Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. During the next two years of the four-year program, the Civil Engineering curriculum integrates engineering sciences with design applications in the areas of structural, environmental, geotechnical, and water resources engineering. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of civil engineering.

Graduate study is offered leading to the degrees of Master of Science and Doctor of Philosophy in Civil Engineering (p. 2244). For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Civil Engineering is shown below.

Mission

The mission of the Department of Civil, Architectural & Environmental Engineering is to:

• Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering to prepare graduates for professional careers and a lifetime of learning;
• Conduct high-quality research to advance the body of knowledge and improve the quality of human life; and
• Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise.

Goals

The educational objectives of the Civil Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to civil engineering, or
2. Pursuing a graduate or professional degree.

Student Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

B.S. in Environmental Engineering

The Environmental Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and environmental engineering design. The first two years of the Environmental Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. The next two years of the four-year program, integrate engineering sciences with design applications with particular emphasis in the areas of water and wastewater engineering.

Design courses emphasize an integrated approach that considers all environmental media in the prevention and control of environmental problems. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of environmental engineering.

1. Only offered once a year.

2. To be selected from approved lists of People and Society (https://cognates.miami.edu/explore/People%20&%20Society/) (PS)/Humanities and Arts (https://cognates.miami.edu/explore/Arts%20&%20Humanities/) (HA) cognates and Biology Electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

3. Co-requisite CAE 212 not required for EnE majors.

4. CAE 540, CAE 533 and CAE 542 offered on a 3-semester rotation. Students must take these three courses.

* Note: students must select the RSMAS course from the list of required (non-elective) courses in either the Ocean Engineering Track or the Marine Policy Track. A minor in Marine Science will be awarded for 15 credit hours of MSC, OCE or other RSMAS courses provided these include MSC 111, MSC 301 and at least 6 credit hours at the 300 level or higher. Required courses in the track count towards the 6 credit hours at the 300 level or higher.

**Mission**

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning;
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life;
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise.

**Goals**

The educational objectives of the Environmental Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to the water environment, or
2. Pursuing a graduate or professional degree.

**Student Learning Outcomes**

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
B.S.in Architectural Engineering/Master of Architecture

Overview

A six-year dual-degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect. The course requirements for the BSAE/MArch program are shown in the Plan of Study.

Electrical and Computer Engineering

https://ece.coe.miami.edu/index.html

Dept. Code: ECE

Introduction

Electrical and Computer Engineering are complementary disciplines that are at the forefront of the continuing development and evolution of our modern technological society. Electrical and computer engineers have initiated and contributed to the development of such important and diverse areas as integrated electronics and photonics, telecommunication systems and computer networks, computer hardware and software, image processing and computer vision, automation and robotics, electrical power generating and transmission systems, as well as participated in the development of significant applications to biotechnology. These technologies have significantly transformed how our evolving society will live, learn, work, communicate and do business in the 21st century and are critical to the development of a sustainable world economy. It is an exciting and challenging discipline offering a variety of rewarding career paths. The Department of Electrical and Computer Engineering offers a number of innovative academic and research programs to help prepare students to achieve a variety of career goals.

The Department offers two undergraduate degree programs as well as two five year BS/MS degree programs:

- Bachelor of Science in Electrical Engineering degree program (B.S.E.E.)
- Bachelor of Science in Computer Engineering degree program (B.S.Cp.E.)
- Bachelor of Science in Computer Engineering/Master of Science in Electrical and Computer Engineering (B.S.Cp.E./M.S.E.C.E.)
- Bachelor of Science in Electrical Engineering/Master of Science in Electrical and Computer Engineering (B.S.E.E./M.S.E.C.E.)

The Electrical Engineering and the Computer Engineering degree programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org

In addition, the Department offers graduate courses leading to the:

- Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.), and the
- Doctor of Philosophy degree (Ph.D).

For further information see the Bulletin of the Graduate School (p. 2203).

Bachelor of Science in Electrical Engineering (B.S.E.E.)

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern electrical engineering, along with the necessary skills and experiences to apply standard practices, methodologies and available tools for solving electrical
engineering problems. The major areas of Electrical Engineering include electronics, analog and digital circuits, microprocessors, communications and control systems. The design sequence is spread throughout the educational experience curricula, culminating in the two-semester senior design project. Graduates are expected to keep pace with this rapidly evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

**Degree Program**

The Electrical Engineering degree program has three options:

1. Electrical Engineering Option (p. 1127)
2. Audio Engineering Option (p. 1130)
3. Electrical Engineering Pre-Med Option (p. 1133)

These options require specialized courses as well as the 49 Engineering Credit Hours required in the accredited Electrical Engineering degree program.

**Double Degree Program - B.S.E.E. & B.S.B.E.**

A BME student who satisfies the requirement of the Bachelor of Science in Biomedical Engineering (B.S.B.E.) degree with electrical orientation as described in this Bulletin may also qualify for the B.S.E.E. degree by taking the following additional courses:

<table>
<thead>
<tr>

Select one ECE Design Elective: 3

Select two EE Core Electives: 6

Select three ECE Electives: 9

Senior Project (ECE Faculty as co-sponsor):

Total Credit Hours: 35

**Bachelor of Science in Computer Engineering (B.S.Cp.E.)**

Computer engineering is a rapidly changing and evolving discipline driven by new technological developments and marketplace conditions. To adequately train students to meet the challenges of the future and to assume leadership roles in the practice of computer engineering, the department offers an up-to-date curriculum that reflects new technological developments that have the potential for significantly impacting professional practice in the industry. The curriculum is constantly updated to incorporate new technological, scientific and economic developments.

Alternatively, students can earn a Bachelor of Science in Computer Engineering under the Software Engineering option, which is primarily focused on the systematic and disciplined development of software systems. This option focuses on the application of computer engineering and computer science principles and practices to the creation, operation, and maintenance of software applications and systems.

**Degree Program**

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern computer engineering, along with the necessary skills and experiences to apply standard practices, methodologies and modern tools for solving computer engineering problems.

The computer engineering design sequence is spread throughout the curriculum, culminating in a two semester senior design project.

Graduates are expected to keep pace with this rapidly-evolving discipline. To this end, the faculty stress the importance of continued education and life-long professional development, by trying to instill in the students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

The Computer Engineering degree program has three options:

1. Computer Engineering Option (p. 1143)
2. Software Engineering Option (p. 1146)
3. Computer Engineering Pre-Med Option (p. 1149)
These options require a common engineering core, which is followed by specialized courses in each area along with elective courses.

**Dual Majors**

Computer Engineering or Electrical Engineering students who want to do additional majors or minors must meet with their academic advisor to plan out their course work.

Computer Engineering students wanting to do Computer Science as a second major must:

1. Have an additional 6 advisor-approved technical credit hours beyond that required for the CE major,
2. Complete an approved two semester sequence of courses with laboratory in Biology, Chemistry, Physics, or Geological Sciences (may also count towards Basic Science requirements),
3. Take PHI 115 (may also count towards Cognate requirements).

**Five-Year Dual B.S./M.S. Degrees**

**Purpose**

Intended for exceptional students to acquire both a Bachelor of Science and a Master of Science degree simultaneously, in five years rather than the 4 plus 2 years (approximately) it normally requires.

**Requirements**

You must be an undergraduate student in the College of Engineering (CoE). A master's degree is considered the first professional degree in engineering. The Admission Committee will carefully review academic credentials for admission into our M.S. program. Students should discuss the program and possibility of entering with an academic adviser. Completed applications are due prior to the beginning of the final exams in your junior year.

Get the application form (it is different for US students and International students) from the CoE Office of Research and Graduate Studies, fill it out and then return it to the same office. The application fee is waived for currently enrolled students in the CoE.

Take the GRE Examination before the end of your senior year and attain a combined score of more than 1000 on the Verbal and Quantitative portions. You must have a cumulative GPA of at least 3.0 at the time of application.

For further information about admission into the graduate school see the Bulletin of the Graduate School (p. 2203).

For more detailed information about the CoE Five-Year programs, please refer to the College of Engineering Bulletin section (p. 1050). The Department of Electrical and Computer Engineering has two Five-Year degree programs, B.S.Cp.E./M.S.E.C.E. and B.S.E.E./M.S.E.C.E. Each of these programs has two options listed below.

The B.S.Cp.E./M.S.E.C.E. program has two options:

1. Computer Engineering Option (p. 1152)
2. Software Engineering Option (p. 1155)

The B.S.E.E./M.S.E.C.E. program has two options:

1. Audio Engineering Option (p. 1139)
2. Electrical Engineering Option (p. 1136)

**Departmental Laboratories**

The Department maintains a variety of well-equipped laboratories and computers adequate for undergraduate instruction and graduate research. The laboratories and computer facilities include:

- Computer Vision and Image Processing Laboratory
- Digital Audio and Speech Processing Laboratory
- Digital Signal Processing Laboratory
- Digital Systems Design Laboratory
- Electronics Laboratory
- Electro-Optics and Micro-Devices Laboratory
- Embedded Systems Laboratory
- Fortinet Cyber Security Laboratory
- Information Technology Laboratory
- Microprocessor Laboratory

| **Computer Engineering (CE) Technical Electives** | | |
| Select any 300-level or above ECE course in consultation with, and with the approval of, the academic advisor. Additionally, one elective course may be selected from the following computer science courses: | |
| CSC 317                          | Data Structures and Algorithm Analysis | 3      |
| CSC 427                          | Theory of Computing                  | 3      |
| CSC 518                          | Interpreters and Compiler Theory     | 3      |
| CSC 529                          | Introduction to Computer Graphics    | 3      |
| CSC 540                          | Algorithm Design and Analysis        | 3      |
| CSC 555                          | Multimedia Systems                   | 3      |

| **Software Engineering (SE) Technical Electives** | | |
| Select any 300-level or above ECE course in consultation with, and with the approval of, the academic advisor. Additionally, one elective course may be selected from the following computer science courses: | |

Electrical and Computer Engineering

- Multimedia Laboratory (Arnold Center for Confluent Media Studies)
- Networks Laboratory
- Optics and Fiber Communications Laboratory
- Underwater Imaging Laboratory
Advanced Writing and Communication Skills

Electrical and Computer Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom, laboratory, and design procedures where they learn effective oral, graphical and technical writing skills. Electrical and Computer Engineering students acquire Advanced Writing and Communication skills in the following core courses: ECE 212, ECE 481 and ECE 482.

Internship Program

The Department of Electrical and Computer Engineering encourages its students to take advantage of the College of Engineering Internship Cooperative Program with Industry.

Students may pursue an internship either on a part-time or a full-time arrangement. Students who wish to intern full-time for one semester or for twelve weeks in the summer may apply to earn as much as 3 credit hours that could be applied to their degree requirement as a Technical Elective. Students interested in such a possibility need to submit a proposal to the ECE Department describing the type of work they expect to accomplish approved by the industrial supervisor. If the proposal is approved the student will be assigned a Faculty Supervisor and will be able to register under ECE 499. At the end of the Internship Program, the student is expected to submit to the ECE Department a technical report with comments from the student industrial supervisor. The Faculty advisor will review the report and submit the appropriate grade for ECE 499.

NOTE 1: An ECE course for which another ECE course is a prerequisite may not be taken unless the student has completed the ECE prerequisite course with a grade of C- or better.

NOTE 2: All ECE courses at the 300 level or above must be taken at UM.

Departmental Honors

See College of Engineering (p. 1044) section.

ECE 100. Introduction to Electrical and Computer Engineering. 3 Credit Hours.
Introduction to Electrical and Computer Engineering (ECE) for high school students interested in science and technology. The course covers important thematic units of the discipline: electronics, digital design, computer programming and signal processing. Emphasis on hands-on experience in the use of laboratory instrumentation, circuit construction and computer simulation.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 101. Introduction to Mobile Computing. 3 Credit Hours.
Introduction to Mobile Computing for high school students interested in application development for mobile systems. The course provides a hands-on approach to the design, development and testing of mobile applications using the latest modern tools. Students start with the basic components used to build applications and continue to more advanced features of mobile devices such as digital cameras, location services, multimedia and more. A strong emphasis is placed on hands-on experience to demonstrate the concepts, culminating in a working mobile application.
Requisite: Summer Scholars Program.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 110. Introduction to Innovation: Learning About Innovation by Innovating. 3 Credit Hours.
Introduction to diverse methods and tools that promote and nurture student creativity, entrepreneurship, team-work, and skills for creating business plans that consider ethical, global and financial issues. Students will learn to use the Maker Space facility to implement their design ideas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ECE 111. Introduction to Engineering I. 3 Credit Hours.
Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions is included as well as an introduction to professional ethics, intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 112. Introduction to Engineering II. 2 Credit Hours.
Course is designed to provide first-year undergraduate students with an introduction to some key electrical and computer engineering concepts and topics by discussing their roles in some of the commonly used electrical and computer engineering systems. Numerical examples, circuit simulations, and computer programming are introduced through the use of MATLAB, microcontroller programming languages, and PSpice. Hands-on experience are provided through a project where the students design, assemble, program, and test a microcontroller-based mobile robot with a variety of sensing devices. Should be taken as a freshman only; otherwise to be replaced by a technical elective.
Prerequisite: ECE 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 118. Introduction to Programming. 3 Credit Hours.
Introduction to computing, problem solving, program design, C++ language fundamentals, and software engineering principles. Software design projects are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 123. Explorations in Engineering. 3 Credit Hours.
Introduction to engineering for non-engineers with emphasis on real-world engineering systems and services which are changing the way we live, communicate, learn, play, and care for ourselves, our communities and our planet. Students will learn how to use modern tools to observe and design simple engineering systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 201. Electrical Circuit Theory. 3 Credit Hours.
Fundamentals of DC-AC circuit laws, including steady state and transient analysis. Lecture, 3 hours.
Prerequisite: MTH 162.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 202. Electronics I. 3 Credit Hours.
Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.
Prerequisite: ECE 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 203. Electrical Circuits Laboratory. 1 Credit Hour.
Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.
Prerequisite: ECE 201.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 204. Electrical Circuits Laboratory. 1 Credit Hour.
Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.
Prerequisite: ECE 201.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ECE 205. Principles of Electrical Engineering--I. 3 Credit Hours.
Fundamentals of DC and AC Circuits and a survey of Electrical Machinery and Electronics. Not open to students with credits in ECE 201. Lecture, 3 hours.
Prerequisite: MTH 162.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 206. Circuits, Signals, and Systems. 3 Credit Hours.
This course teaches the basics of continuous-time signals and systems with an emphasis on circuits as motivating examples. Topics include signals and linear time-invariant systems, convolution, stability, Laplace Transform, transfer function, poles and zeros, s-domain circuit analysis, feedback control, Fourier Series and Transform, Bode plots, analog filters.
Pre-requisite: ECE 201 And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 211. Logic Design. 3 Credit Hours.
Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 212. Processors: Hardware, Software, and Interfacing. 3 Credit Hours.
Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience. Lecture, 3 hours; laboratory, 3 hours.
Prerequisite: ECE 118 and ECE 211/304.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 218. Data Structures. 3 Credit Hours.
Continuation of Programming with emphasis on C++ and the skills required of a capable programmer. Essential data structures and algorithms, and introducing algorithm analysis. Basic sorting, searching, and data management. Dynamic and static memory management. Object oriented programming.
Prerequisite: ECE 118.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 301. Electromagnetic Field Theory. 3 Credit Hours.
Vector analysis, static and time-varying fields, Maxwell's equations, propagation of electromagnetic waves, and transmission line theory and applications are discussed.
Prerequisite: PHY 223 and MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 302. Electronics II. 3 Credit Hours.
Prerequisite: ECE 305 Or ECE 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 303. Electronics Laboratory. 1 Credit Hour.
Laboratory course in conjunction with courses ECE 202 and 302.
Prerequisite: ECE 203 or 204. Or Pre/Corequisite: ECE 302 or 306.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ECE 304. Logic Design. 3 Credit Hours.
Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 305. Electronics I. 3 Credit Hours.
Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.
Prerequisite: ECE 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 306. Electronics II. 3 Credit Hours.
Prerequisite: ECE 202 or 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 307. Circuits, Signals, and Systems. 3 Credit Hours.
This course teaches the basics of continuous-time signals and systems with an emphasis on circuits as motivating examples. Topics include signals and linear time-invariant systems, convolution, stability, Laplace Transform, transfer function, poles and zeros, s-domain circuit analysis, feedback control, Fourier Series and Transform, Bode plots, analog filters.
Prerequisite: ECE 201 and MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 308. Linear Control Systems. 3 Credit Hours.
Introduction to system theory, transfer function and state variable modeling of linear continuous time systems, root locus, Bode plot, Nyquist criterion, analysis and controller design using root locus and frequency domain techniques, proportional-integral-derivative controllers.
Prerequisite: ECE 206/307 and ECE 303/311 and MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 310. Introduction to Engineering Probability. 3 Credit Hours.
Axioms of probability, discrete and continuous random variables, probability density functions. Expectation, conditioning, independence, functions of random variables, characteristic functions, multiple random variables. Sums of random variables, limit theorems, probability bounds, convergence concepts. Introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with IEN 310.
Prerequisite: MTH 162 and Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 311. Electronics Laboratory. 1 Credit Hour.
Laboratory course in conjunction with courses ECE 305 and 306.
Prerequisite: ECE 203 or 204. Or Pre/Corequisite: ECE 302 or 306.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 312. Processors: Hardware, Software, and Interfacing. 3 Credit Hours.
Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience. Lecture, 3 hours; laboratory, 3 hours.
Prerequisite: ECE 118 and ECE 211/304.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 315. Digital Design Laboratory. 1 Credit Hour.
Familiarization with properties and use of logic gates, flip-flops, digital standard components, and programmable logic devices. Design and implementation of combinational and synchronous digital systems and Computer Aided Engineering (CAE) tools for design and simulation of digital systems are also included.
Prerequisite: ECE 304 Or ECE 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 316. Structured Digital Design. 1 Credit Hour.
VHDL (VHSIC (very high speed integrated circuits) hardware description language) introduction and syntax. Functional and behavioral models of VHDL for design, testing, and simulation of digital circuits and programmable logic devices. Design and implementation of combinational and sequential digital systems using VHDL is also included.
Prerequisite: ECE 315.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 318. Algorithms. 3 Credit Hours.
Continuation of the programming sequence. Object oriented programming with C++, emphasizing the skills required of a professional programmer. Essential data structures and algorithms: trees, graphs, hash tables, parsing and text processing. Advanced sorting and data management algorithms. Advanced features of C++; effective programming with C.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 322. Systems Programming. 3 Credit Hours.
Practical hands-on experience with UNIX systems programming and administration. Programming using C and shell scripting languages. File systems features, multiprocessing, inter-process communication, and systems programming fundamentals are discussed.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 336. Discrete-Time Signals and Systems. 3 Credit Hours.
This course provides the basics connecting continuous-time (CT) and discrete-time (DT) signal processing, and an introduction to discrete-time signals and systems and applications. Topics include communication, sampling, discrete-time linear time-invariant (LTI) signals and systems, difference equations, z Transform, transform domain analysis of DT systems, DT Fourier transform (DTFT), digital filters, applications to audio, and image processing.
Prerequisite: ECE 307 Or ECE 206.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 368. Internet Computing I. 3 Credit Hours.
Principles and practices used in creating interactive Internet sites. Extensive object oriented programming in Java is taught. Use of eXtensible Markup Language (XML) to provide content description. Use of GUI components and graphics to create web based applications.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 395. Undergraduate Research in Electrical and Computer Engineering. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of real-world contemporary problems. Offered by special arrangement and under the supervision of a faculty member.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 399. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student’s field of study. Course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ECE 404. Communication Systems. 3 Credit Hours.
Introduction to digital communication, including binary and M-ary baseband and bandpass modulation over additive white Gaussian noise channels. Optimal receivers, pulse shaping for bandlimited channels, synchronization, multiple access. Prerequisite: ECE 336 and ECE 310 or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 405. Solid-State Electronics. 3 Credit Hours.
Principles of semiconductor electronics, energy bands of semiconductors, Fermi level, carrier distribution, and transport mechanisms are discussed. Application of semiconductor theory to various junction and field effect devices are included. Prerequisite: ECE 301 and PHY 223.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 412. Software Engineering and Architecture. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 413. Software Design and Verification. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 414. Computer Organization and Design. 3 Credit Hours.
Hardware structure, organization and design of computers. Design of computer arithmetic and control units, data, and instruction paths. Modern hardware description language (HDL) based design methodology. Register transfer level design of computers and digital systems. Algorithmic state machine (ASM) charts, instruction set architecture, control unit implementation, microprogramming, memory organization, pipelining, I/O system organization and high speed arithmetic units are discussed. Prerequisite: ECE 312 or ECE 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 415. Senior Project I. 1 Credit Hour.
Topics cover tasks in project planning including scheduling, documentation, communication (written and oral), financial constraints, and ethics. Students are required to present project proposals to serve as the basis for the follow-up course, ECE 416. Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 416. Senior Project II. 2 Credit Hours.
The capstone design course for Electrical Engineering majors. An electrical system is designed, implemented, and documented. Prerequisite: ECE 415.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 417. Embedded Microprocessor System Design. 3 Credit Hours.
Study of microcomputer system design, scientific methods for quantifying system performance, embedded controller applications using high level languages, and debugging strategies. Lecture, 1 hour; laboratory, 3 hours. Prerequisite: ECE 218. And ECE 315. And ECE 414.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 418. Senior Project Planning. 1 Credit Hour.
The creative process of devising a product to meet customers' needs, including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 419. Senior Project. 2 Credit Hours.
The purpose of this course is to integrate the student's knowledge in hardware, software, and project management. A major digital system is designed, implemented, debugged, and documented.
Prerequisite: ECE 418.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 421. Computer Operating Systems. 3 Credit Hours.
The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.
Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 436. Digital Signal Processing. 3 Credit Hours.
Topics include finite length transforms (e.g., discrete Fourier transform, discrete sine and cosine transforms) and their fast computation, finite impulse response (FIR) and infinite impulse response (IIR) digital filter design, digital filter structures, finite wordlength effects on filter performance, and multirate signal processing fundamentals.
Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 437. Real-Time Digital Signal Processing Laboratory. 1 Credit Hour.
Digital signal processing hardware for real-time operation, software development tools, instruction set, and DSP experiments with audio and speech application are discussed.
Prerequisite: ECE 436. Or Corequisite: ECE 436.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

ECE 454. Digital System Design and Testing. 3 Credit Hours.
Functional building blocks and concepts of control and timing in digital design. Descriptive techniques for digital systems and design for testability.
Prerequisite: ECE 315 and 316. Corequisite: ECE 455.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 455. Design-for-Testability Laboratory. 1 Credit Hour.
Project laboratory demonstrating the techniques necessary to design, implement, and debug and test a large system. The process is carried through from conceptual design, implementation, integration, simulation, and synthesis on a FPGA chip.
Prerequisite: ECE 454. Or Corequisite: ECE 454.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 467. Database Design and Management. 3 Credit Hours.
Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.
Prerequisite: ECE 322 or CSC 322.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 470. Network Client-Server Programming. 3 Credit Hours.
Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 481. Senior Project I. 1 Credit Hour.
The creative process of devising a product to meet customers’ needs including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 482. Senior Project II. 2 Credit Hours.
The capstone design course for Electrical Engineering and Computer Engineering majors. A major electrical and/or computer engineering system is designed, implemented, and documented.
Pre-requisite: ECE 481.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 499. Senior-Junior Cooperative Education. 1-3 Credit Hours.
Analysis and design experience obtained in industry or government. Approved project jointly supervised and assessed by department faculty and external partner. Note: A maximum of three credits could be used to satisfy degree requirement as Technical Elective. See Bulletin for more information.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 500. Engineering Analytical Techniques. 3 Credit Hours.
Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials, singular value decomposition, vector, and matrix norms are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 502. Engineering Acoustics. 3 Credit Hours.
Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered.
Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 503. Laser Communications. 3 Credit Hours.
Principles of optics, optical fibers, electro-optics, light wave propagation in free space and anisotropic media, and waveguides are discussed. Communication devices including lasers, detectors, electro-optic modulators, optical fiber communication links are covered. The course includes seven hands-on experiments.
Prerequisite: PHY 222 and PHY 223 and ECE 301 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 504. Fundamentals of Optical Imaging. 3 Credit Hours.
Introduction to optical imaging, optical coherence tomography imaging, fiber endoscope imaging, and spectral imaging. Learn grating diffraction, interferometer, and optical spectrometer. The course includes ten hands-on experiments. Gain system level understanding of optical coherence tomography and spectral imaging.
Prerequisites: ECE 301 or BME 545.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ECE 505. Semiconductor Photonic Devices. 3 Credit Hours.
Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices.
Prerequisite: ECE 302, 306, 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 506. Microfabrication. 3 Credit Hours.
Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered.
Prerequisite: ECE 505.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 511. Computability, Complexity, and Algorithms. 3 Credit Hours.
Advanced programming techniques: dynamic programming, fast data retrieval and sorting, enumerators, data structures, and data management. The limits of software engineering, computability and models of computation, complexity analysis.
Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 512. Software Engineering and Architecture. 3 Credit Hours.
Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 513. Software Design and Verification. 3 Credit Hours.
Prerequisite: ECE 412/512.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 514. Computer Architecture. 3 Credit Hours.
Computer data and instruction types, survey of existing architectures, and the interaction between hardware and software sub-systems are discussed. Advanced topics in computer architecture.
Prerequisite: ECE 414.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ECE 519. Design of Computing Languages. 3 Credit Hours.
Major features of modern programming languages with emphasis on design and software efficiency. Interaction between language design and the design of its compiler are included.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 521. Computer Operating Systems. 3 Credit Hours.
The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.
Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 532. VLSI Systems. 3 Credit Hours.
Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered.
Prerequisite: ECE 202. Or ECE 305. And ECE 211. Or ECE 304.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 533. Random Signals and Noise. 3 Credit Hours.
Probability models, Bayes' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.
Prerequisite: ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 534. Communication Networks. 3 Credit Hours.
Principles of digital communications, Local Area Networks (LANs), Wide Area Networks(WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed.
Prerequisite: ECE 212. Or ECE 312. And ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 537. Principles of Artificial Intelligence. 3 Credit Hours.
Search techniques, game trees, use of heuristics, logic, representation of knowledge, algorithms for automated reasoning including automated reasoning under imperfect information, some advanced approaches to AI-Problems such as planning.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 538. Introduction to Digital Image Processing. 3 Credit Hours.
Prerequisite: ECE 206. Or ECE 307. And MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 539. Digital Communications. 3 Credit Hours.
Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 540. Digital Speech and Audio Processing. 3 Credit Hours.
Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.
Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 542. MEMS: Sensors and Electronics. 3 Credit Hours.
This course will introduce the fundamentals of Microelectromechanical Systems (MEMS). An introductory foundation of MEMS concepts will be established through lectures on sensors, actuators, readout electronics, and noise. Physical principles of electromechanical, piezoresistive, capacitive, and piezoelectric sensing will be introduced. Based on these design and analysis principles the course will focus on commercial applications such as accelerometers, biochemical sensors, RF components, microfluidics, and optical devices. Sensor electronics will be discussed with a focus on integration with Complementary Metal Oxide Semiconductor (CMOS) technology.
Prerequisite: Permission of Instructor OR ECE 532.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 543. BioNanotechnology. 3 Credit Hours.
Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometry with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 548. Machine Learning. 3 Credit Hours.
Fundamentals approaches to classifier induction, probabilistic and instance-based approaches, linear and polynomial classifiers, neural networks, decision trees, boosting techniques, performance evaluation, cluster analysis, reinforcement learning, fundamentals of computational learning theory.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 553. Neural Networks. 3 Credit Hours.
Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error backpropagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 562. Wireless and Cellular Communication. 3 Credit Hours.
Wireless Channel Characterization: path loss, shadowing, fading, frequency- selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 564. Wireless Networks. 3 Credit Hours.
Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks: IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.
Pre or Corequisite: ECE 534.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 567. Database Design and Management. 3 Credit Hours.
Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.
Prerequisite: ECE 322 or CSC 322.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 570. Network Client-Server Programming. 3 Credit Hours.
Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 572. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 574. Agent Technology. 3 Credit Hours.
Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information age nts, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.
Prerequisite: ECE 537 Or ECE 637.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 576. Internet and Intranet Security. 3 Credit Hours.
Security issues and applications for securing internet and intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.
Prerequisite: ECE 218 or CSC 322 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 577. Data Mining. 3 Credit Hours.
Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 579. Mobile Computing. 3 Credit Hours.
Mobile computing and proxy architectures, mobile web protocols, mobile user interfaces, applications, systems-ware adaptations, mobile databases, transactions, data synchronization, privacy, authentication, and security are covered.
Prerequisite: ECE 368.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 581. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ECE 582. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

ECE 583. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
ECE 584. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 590. Special Topics in Information Technology. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Information Technology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 594. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 595. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 596. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 597. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 598. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 599. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

B.S. in Electrical Engineering

Overview

Electrical Engineering is concerned with the design, analysis and implementation of a variety of systems, components and devices, primarily of an electrical or electronic nature, which form the cornerstone of our complex and technologically oriented society. For example, this ranges from small-scale integrated electronics and photonics systems and devices, the technological drivers of the information technology revolution, to large-scale electrical power systems and power generators, which supply the nation's energy needs and form the basis for sustained economic growth.

Furthermore, Electrical engineering also involves the design of micro and nano devices, integrated circuits, hardware, and large-scale systems for telecommunications and networking that engender our increasingly networked life. Therefore, electrical engineering is a vast and rich discipline involved in the design of systems, components, and devices for a variety of applications and areas such as portable electronics (e.g., cell phones), communications and networks, biomedical sensing and medical systems, energy harvesting, next generation displays, lasers, optical and wireless transmission, audio/video compression and recognition, radar and tracking/guidance systems, and remote sensing systems.

The University of Miami's electrical engineering curriculum is focused on the fundamentals of the discipline, in the first two years building a firm foundation in mathematics, basic science, and basic engineering principles such as basic circuits, electronics, software and programming, computer hardware, and signal and system analysis. The students build upon this foundation through more advanced courses and focused specialization, culminating in a capstone major design experience. We continually update our curriculum and laboratories to incorporate new scientific and
technological developments, and industry practices. Our graduates have gone on to successful careers in industry, or to graduate school in science and engineering, as well as law school, business school, and medical school.

1. See description of electives under the Departmental Electives Section.
2. Offered only in the Fall semester.

Mission

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

Program Educational Objectives

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including successful admission and completion of graduate studies of the highest standard.

Student Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

B.S. in Electrical Engineering - Audio Engineering Option

Audio Engineering at the University of Miami was established 1992. The program brings together faculty expertise from Electrical and Computer Engineering and from the Frost School of Music. It uniquely meets the needs of industry, training professionals with solid foundations in technical areas where sound and acoustics play a key role. Students gain theoretical knowledge from engineering and music, along with analytical, technical and design skills that can only be acquired with an engineering degree.

The Audio Engineering option curriculum combines traditional electrical engineering areas such as electronics, digital systems, microprocessors and digital signal processing with audio studies in acoustics, digital speech and audio, and acoustic transducers. Students work in modern laboratory facilities where they can experiment with electronics, digital design, microprocessors, audio recording, audio synthesis and acoustics. UM Audio Engineering graduates are audio-specialized electrical engineers who are highly sought-after by the industry.

During its 27 successful years, Audio Engineering at UM has produced an impressive group of alumni successful careers in music, gaming and entertainment, telecommunications, the analog and digital electronics, computer and software industries, and in the biomedical systems and instrumentation industry. Many have pursued graduate degrees at other top universities. The program implements continuous improvements, including innovative teaching and hands-on audio engineering design projects, as well as ever-deeper links with industry.

1. See description of electives under the Electrical and Computer Engineering Section.
2. Recommended a cognate that includes a Musicology Elective.
Offered only in the Fall semester.
Note that MMI 504 could be substituted for MMI 436.

Mission
The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

Program Educational Objectives
We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including successful admission and completion of graduate studies of the highest standard.

Student Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Electrical Engineering - Pre-Med Option
Our Department offers a pre-medical option that allows motivated students to obtain the rigorous education of a bachelors degree in electrical engineering while simultaneously completing the basic science requirements necessary for applying to medical or dental school. Much of the excitement in engineering involves applications of electrical and computer engineering to problems in health, such as the development of nano-scale biosensors, or the signal processing analysis of DNA sequences. The pre-med option allows students to learn the fundamentals of Electrical and Computer Engineering while preparing them for entry into either medical school, advanced graduate study, or industry.

---

¹ See description of electives under the Departmental Electives Section.

² Advanced Bioscience Elective is to be chosen from BMB 260 (http://bulletin.miami.edu/search/?P=BMB%20260), BIL 250 (http://bulletin.miami.edu/archives/2016-2017/search/?P=BIL%20250), BIL 255 (http://bulletin.miami.edu/archives/2016-2017/search/?P=BIL%20255), BIL 268 (http://bulletin.miami.edu/archives/2016-2017/search/?P=BIL%20268), or BMB 401 (http://bulletin.miami.edu/search/?P=BMB%20401), in consultation with their academic advisor. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements.

³ Offered only in the Fall semester.

⁴ Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 (http://bulletin.miami.edu/archives/2016-2017/search/?P=PSY%20110) and SOC 101 (http://bulletin.miami.edu/archives/2016-2017/search/?P=SOC%20101).

### Mission

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current
world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

**Program Educational Objectives**

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including successful admission and completion of graduate studies of the highest standard.

**Student Learning Outcomes**

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**B.S./M.S. in Electrical Engineering**

This is a structured and integrated program of 151 credit hours. Students may pursue this program from either of the undergraduate option available for Electrical Engineering Majors. It includes two required courses, ECE 715 and ECE 716, as well as the selection of advanced technical electives.

Note the following:

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be at 700 level. More specifically, in addition to ECE 715 (M.S. Design Project I) and ECE 716 (M.S. Design Project II), at least 6 credit hours must be in courses open to graduate students only (700 level).
- Interested ECE Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.E.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable G.R.E. score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.E.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

For more information about the BS/MS Program please refer to the College of Engineering Section (p. 1050).

### B.S./M.S. in Electrical Engineering - Audio Engineering Option

This is a structured and integrated program of 152 credit hours. Students may pursue this program from either of the undergraduate option available for Electrical Engineering Majors. It includes two required courses, ECE 715 and ECE 716, as well as the selection of advanced technical electives.

Note the following:

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be at 700 level. More specifically, in addition to ECE 715 (M.S. Design Project I) and ECE 716 (M.S. Design Project II), at least 6 credit hours must be in courses open to graduate students only (700 level).
- Interested ECE Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.E.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable G.R.E. score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.E.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

For more information about the BS/MS Program please refer to the College of Engineering Section (p. 1050).

## Minor in Electrical Engineering

### Requirements

Students must follow these guidelines in order to qualify for this minor:

- No more than 6 credits hours may be taken outside the ECE department.
- Students must maintain a minimum 2.0 grade point average in all ECE courses taken.

**B.S. in Computer Engineering**

**Overview**

Computer engineering is concerned with the characterization, design, analysis and implementation of hardware, software and the overall architecture of computers and computer systems, and with the development of applications enabled by such configurations. This ranges from embedded microprocessors and associated software supporting a variety of familiar devices, to large-scale distributed computer systems interconnected by high-speed telecommunication networks controlled by sophisticated communication protocols. Since modern electronic computing systems are digital in nature, the program provides in-depth coverage of a range of topics dealing with digital information processing systems. Among the topics covered are digital system design, computer organization and architecture, operating systems, software engineering, programming, data structures, algorithms, database systems, microprocessor-based systems, and embedded systems.

The department also offers electives in digital communications, computer networks, wireless and mobile networks, very large scale integration (VLSI), microelectronics, nanotechnology, application specific integrated circuits (ASIC), microelectromechanical systems (MEMS), image processing and computer vision, artificial intelligence, machine learning, data mining, agent technology, and cybersecurity (application, information, network, systems security etc.).
